FEDERAL RESERVE BULLETIN

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM, WASHINGTON, D.C.

PUBLICATIONS COMMITTEE

Joseph R. Coyne, *Chairman* □ Michael Bradfield □ S. David Frost
□ Griffith L. Garwood □ Donald L. Kohn □ Michael J. Prell □ Edwin M. Truman

The FEDERAL RESERVE BULLETIN is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. It is assisted by the Economic Editing Section headed by Mendelle T. Berenson, the Graphic Communications Section under the direction of Peter G. Thomas, and Publications Services supervised by Linda C. Kyles.

Table of Contents

53 *MONETARY POLICY IN AN ERA OF CHANGE*

To the ongoing process of adaptation and innovation in a dynamic market economy has been added the dismantling of regulations in several areas, all of which has been reflected in the rapid pace of change in the economy and in financial markets over the past decade or so. This article discusses the developments that have been most important from the perspective of monetary policy.

58 *TREASURY AND FEDERAL RESERVE FOREIGN EXCHANGE OPERATIONS*

On balance over the three-month period from August through October 1988, the dollar ended the period about 5½ percent lower against the Japanese yen and 5 percent lower against the German mark from levels at the end of July.

63 *INDUSTRIAL PRODUCTION*

Industrial production increased an estimated 0.5 percent in November.

65 *ANNOUNCEMENTS*

Increase in the net transaction accounts to which a 3 percent reserve requirement will apply in 1989.

Proposal to amend Regulation Z.

Hearing scheduled on proposal to rescind rule.

Changes in Board staff.

Admission of one state bank to membership in the Federal Reserve System.

66 *RECORD OF POLICY ACTIONS OF THE FEDERAL OPEN MARKET COMMITTEE*

At its meeting on November 1, 1988, the Committee agreed on a directive that called for maintaining the current degree of pressure on reserve conditions and that provided for remaining especially alert to potential developments that might require some firming during the intermeeting period. Accordingly, somewhat greater reserve restraint would be acceptable, or slightly lesser reserve restraint might be acceptable, over the intermeeting period depending on indications of inflationary pressures, the strength of the business expansion, the behavior of the monetary aggregates, and developments in foreign exchange and domestic financial markets. The reserve conditions contemplated by the Committee were expected to be consistent with growth of M2 and M3 at annual rates of around 2½ percent and 6 percent respectively over the three-month period from September to December. The intermeeting range for the federal funds rate was left unchanged at 6 to 10 percent.

73 *LEGAL DEVELOPMENTS*

Various bank holding company, bank service corporation, and bank merger orders, and pending cases.

A1 *FINANCIAL AND BUSINESS STATISTICS*

These tables reflect data available as of December 28, 1988.

Monetary Policy in an Era of Change

This article has been adapted from remarks made by Donald L. Kohn, Director of the Board's Division of Monetary Affairs, at the opening session of a conference on this subject sponsored by the American Enterprise Institute on November 16, 1988, in Washington D C

The pace of change in financial markets and the economy seems to have accelerated over the past decade or so. To the ongoing process of private adaptation and innovation in a dynamic market economy has been added the dismantling of regulations in a number of areas. This article discusses those developments that have been most important from one perspective—that of monetary policy.

RELATION OF POLICY ACTIONS TO ECONOMIC OBJECTIVES

The practical question a monetary policymaker must ask constantly is, how do I judge whether the instruments at my disposal are at the right settings to foster national economic objectives? Or, more broadly, is there a system to guide adjustment of those instruments to get them closer to their appropriate settings? Such a system need not involve frequent discretionary changes in the instrument settings in response to a variety of incoming information. Rather, it could be embodied in a policy rule in which the instruments reacted fairly automatically to certain developments, such as changes in demands for money, and in which few, if any, ad hoc adjustments were required.

These questions arise in part out of the uncertainties created by the lags between policy actions and economic results. The lags are inherent in a complex process through which actions to alter policy instruments, such as adjustments to reserve availability through open market operations or changes in the discount rate, are trans-

mitted to the economy. In a simplified description of this process, the central bank alters the cost and quantity of reserves, and those alterations work through the supply of and demand for money and credit to affect interest rates, exchange rates, and other financial variables and to influence the demand for output and the price level. Inevitably, it takes some time for people to recognize that factors important to their spending decisions have changed in more than trivial ways and to alter their behavior accordingly, and then for the full effects of the new behavior to be felt in the economy. In practice, the process involves the simultaneous determination of these variables through complex interactions, affected powerfully by expectations about the future actions of the participants, including those of the central bank. As a consequence, the duration of the lags may vary over time.

Questions about the relation of policy settings to objectives also arise because of the effects of factors outside the direct influence of the monetary policymaker, such as developments abroad or changes in fiscal policy or private spending behavior. These factors could significantly influence the level of economic activity and prices, possibly requiring some reaction by monetary policymakers.

Because of the lags involved, making monetary policy necessarily involves predicting the effects of policy actions and of these other influences. The predictions may be arrived at through formal forecasting exercises. However, the experience of recent decades has reinforced skepticism about detailed forecasts of gross national product that attempt to take explicit account of the interactions over time, a skepticism already present in face of the complexity of the economy and of the transmission of policy actions. That skepticism has prompted a search for intermediate guideposts along the way, so that policymakers can judge whether they are on the right track and the public can judge the direction of policy.

It has also prompted a search for policy rules—ways of setting or adjusting the instruments of policy, usually keyed to an intermediate guidepost such as a measure of the money stock—that require little judgment by policymakers. Of course, the use of guideposts and rules itself involves implicit forecasting: the intermediate guide should be related predictably to objectives, and predetermined changes in instruments in reaction to deviations of the guide from its path should be proportioned and timed appropriately to achieve progress toward those objectives.

It is in the context of the need to predict the effect of policy actions that questions arise about how financial and economic changes have affected the transmission of policy and about the implications of these changes for the variables to which the central bank is, or ought to be, paying attention. That is, harking back to the issues facing the policymaker, how have these changes affected the instrument settings needed to achieve ultimate objectives and the criteria for judging whether the settings are appropriate?

EFFECTS OF DEREGULATION AND INNOVATION

A number of developments in the economic and financial environment bear on these questions. Several involved discrete changes in law, regulation, and international agreements. A key series of changes concerned deregulation of interest rates on both sides of the balance sheets of depository institutions, through removal of Regulation Q on deposits and of usury ceilings on loans. In the international arena, the earlier moves to floating exchange rates and freer capital flows seemed to take on greater importance in the past decade.

At the same time, certain evolutionary changes in financial markets and the economy may have affected the way monetary policy works. In financial markets such changes include the greater use of floating-rate financing, and of futures and options and other forms of reallocation of the risks of fluctuations in interest rates or other prices in financial markets. The expansion of markets in derivative instruments has been fostered in part by improvements to information

systems, which have facilitated more complex strategies for managing assets and liabilities. Such strategies also have included greater economizing on lower-yielding financial assets, such as transaction deposits, and on lower-yielding real assets in the form of business inventories. In the economy, imports and exports have become more important in variations in domestic spending and production. Deregulation and technological advances have made some of these developments possible, but many have also been impelled by the unusually wide amplitude of cycles in the economy, in inflation, and in financial markets. These swings have reflected in part the supply shocks of the last 15 years as well as unprecedented shifts in monetary and fiscal policy, and they have been associated with huge fluctuations in interest and exchange rates.

Certainly, taken together these developments have mattered for the transmission of monetary policy to the economy. They have altered the responses of certain financial variables to policy impulses and the responses of the economy to those financial variables. And they have changed the importance of particular channels of policy influence as well as the way other variables affect the economy.

The effects can be seen clearly in new behavior patterns of traditional intermediate indicators of policy, both money and interest rates—changes that have been well-documented elsewhere, most recently in articles by William Poole and Benjamin Friedman in the Summer 1988 issue of *Journal of Economic Perspectives*.

Effects on the Monetary Aggregates

As the character of monetary assets has changed with innovation and deregulation, so has the way these assets have been supplied and demanded in financial markets. In effect, new instruments have been created bearing old names, and quite naturally they do not behave in the old ways.

The most important effect of deregulation on the monetary aggregates has been on their interest elasticity over the short and intermediate terms. Many observers expected that, when deposit rates were deregulated, adjustment of these rates to market yields would forestall widespread

reallocation of asset portfolios in the wake of changes in market interest rates. Instead, demands for the aggregates remain quite sensitive to movements in market interest rates, indeed, the interest sensitivity of the narrow aggregates has increased. As anticipated, since deregulation the opportunity costs of holding deposits have fallen as deposit rates have moved up toward market rates. Yet, for many household deposits opportunity costs continue to fluctuate over a wide range in response to changes in market rates, and on average, for periods of a year or two, may be relatively as variable as before.

The behavior of opportunity costs results from the tendency for depository institutions to adjust many of their retail deposit rates only sluggishly. The effects have been greatest on M1, since yields on NOW accounts, which are an important component of that aggregate, move much more slowly than short-term market rates or yields on small time deposits do. Also, NOW accounts have attracted considerable savings funds, which may be particularly sensitive to changes in interest differentials. The lag in adjustment of rates on NOW accounts has occasioned substantial shifts of funds between these accounts and small time deposits as yield relationships have changed. Such shifts would be subsumed within M2, but even demands for this aggregate seem to exhibit substantial interest sensitivity over the periods of a year or so that are relevant to standard targeting exercises.

For the policymaker, the practical effect of an interest-sensitive money demand is a loose tie between money and income within a business cycle. The amount of money the public wishes to hold at any level of income or spending can vary substantially depending on the interest rates prevailing. For example, strong growth of income might be associated with fairly subdued monetary expansion if the robust behavior of the economy were accompanied by higher interest rates, whose depressing effects on money demand could more than offset the boost from greater income and savings. Although rapid money growth in a strong economy might well signal a monetary policy that had been too easy, weak money growth would not necessarily suggest that policy was too tight and might lead to a downturn. In fact, such a path for money might

be an aspect of a prescient and appropriate policy that had moved toward restraint to head off inflationary pressures. Similar problems could cloud the interpretation of opposite movements of money supply indicators if the economy were weak and interest rates had fallen substantially.

As a consequence of deregulation, these problems have become so serious for M1 that this aggregate, which formerly was considered the most reliable intermediate guide, has not been able to serve as a useful indicator or target for policy. M2 has not been affected in this way, but it remains sufficiently interest sensitive that it is difficult to judge the import of a path for this aggregate without reference to the surrounding economic situation.

Effects on Interest Rates and Spending

The natural inclination in such circumstances is to pay closer attention directly to spending trends, relating them to such determinants as interest rates. But, even that relationship has been affected by deregulation and innovation in recent years.

In particular, removal of Regulation Q ceilings on deposits and of usury ceilings on loans has meant that financial intermediaries no longer abruptly reduce the supply of mortgage credit and certain other types of credit, with effects on associated spending, when interest rates reach certain levels. Moreover, new financial instruments, markets, and techniques have broadened the choices available to savers, spenders, and intermediaries for structuring their assets and liabilities. Small savers have many more opportunities to earn market-related rates of return, and investors can adjust the liquidity and other risk characteristics of their portfolios at lower transaction costs. Borrowers have new, inexpensive channels for liquefying fixed assets and for tapping savings flows—for example, through home equity lines of credit and securitized mortgages. Financial intermediaries have gained greater flexibility for asset and liability management. The result has been to reduce quantity or liquidity constraints in financial markets, and thus to elevate rate movements as a transmission channel for monetary policy and other influences in the economy. In turn, this development means

that real interest rates now may vary more as economic conditions change and in particular they may need to rise to higher levels than previously to provide equivalent restraint on spending during "booms" in business activity

International Considerations

At the same time, judgments about what policy settings are appropriate for the desired results with respect to prices and output have been affected by the growing need to take account of international considerations. This need reflects the shift to floating exchange rates and the increasing mobility of capital, as well as the greater proportion of imports and exports in spending and production. Changes in interest rates, for example, may have a significant effect on the economy through their influence on capital flows, exchange rates, and the competitive position of domestic versus foreign providers of goods and services, as well as through their direct effect on spending and saving decisions. In addition, wide variations in exchange rates in recent years—under the influence of a variety of factors besides monetary policy—have had major effects on the economy.

One consequence of this confluence of international factors has been increasing attention to the exchange rate as an influence on prices and output and as a channel through which various forces, including monetary policy, affect the economy. A related consequence has been heightened sensitivity to foreign economic developments and policies as influences on the exchange rate, financial markets, and the economy in the United States. Recognition of these interdependencies has argued strongly that policy can be improved through more regular and more systematic exchanges of information about economic developments and policy intentions with foreign authorities. And, it has prompted exploration of the potential benefits from more formal schemes for policy cooperation or coordination.

Further Research

Together, these changes in the transmission of policy to the economy probably have added to the uncertainty associated with predicting the

effects of particular policy actions. Certainly, projections made using older relationships—based on either the money stock or interest rates—have foundered at one time or another in recent years. These failures have spurred a fresh examination of the fundamental relationships among financial and real variables. The U.S. economy probably never was so orderly or so easily described as implied by the settled relationships that, until the mid-1970s, seemed to emerge from the data of the postwar era, with its damped business cycles and stable exchange rates. Attempts to respecify and rethink these relationships are clearly desirable from the perspective of the policymaker.

Important aspects of this work, and, indeed, good indicators of the unsettled nature of the debate, have been the renewed attention to the value of particular intermediate targets or indicators for policy and the proposals of new candidates. Many of those who would run policy according to a rule for money stock growth have acknowledged the disturbances to deposits that accompanied deregulation and are looking to the monetary base as a guide. Those who focus on interest rates have acknowledged the difficulty of determining their appropriate level without reference to numerous other factors. Recently, commodity prices, exchange rates, the slope of the yield curve, and various leading indicators of real activity all have been mentioned for use as intermediate guides to policy in combination with each other or with other variables, such as the money supply and interest rates. Given the added uncertainty, this discussion takes on greater significance, though perhaps with even less chance of successful conclusion than before.

SOME CAVEATS

At the same time, we should be careful not to overstate the effects of changes in the economic and financial environment on the policy process. Monetary policy seems to have done reasonably well in fostering progress toward national economic goals in recent years. One reason for this relative success may be that, although the precise specifications of key relationships have changed, many of the changes have been more

evolutionary than revolutionary, leaving longer-term and more fundamental relationships essentially intact. Policymakers have, with due caution, been able to take advantage of the lessons of history.

The monetary aggregates, for example, always have had some interest sensitivity that policymakers needed to be aware of when interpreting their movements. In fact, deregulation probably has enhanced the monetary aggregates as nominal anchors for policy over the long run, by reducing longer-term interest elasticity and by diluting the incentives for financial innovation that would facilitate economizing on holdings of monetary assets.

Although the fading of credit-availability effects undoubtedly has lifted equilibrium real interest rates under certain circumstances, it has not altered the fundamental comparison of cost, including interest rates, with return when deciding whether to spend. This decision also has been basically unaffected by the use of variable-rate loans, futures, swaps, and the like. These instruments serve primarily to redistribute cash flow and wealth when interest rates, exchange rates, or stock prices change; they do not alter the prospective profitability of a capital project.

Moreover, attention to international considerations is not a new aspect of monetary policy. Even before the gyrations of exchange markets and trade balances of recent years, movements of the dollar, and before that of international reserves, were taken as indicators of underlying conditions in the economy and prices and as influences on future developments. As such, they frequently have had a bearing on the stance of policy.

A recent twist for the United States has been concern that the move from net creditor to net debtor status internationally will constrain monetary policy. The underlying hypothesis, it seems, is that crossing that essentially unknowable line heightens the risk of shifts out of dollar

claims that would cause conflicts between the need to stabilize the dollar to prevent inflation and the need to supply sufficient liquidity to sustain growth. But, a large volume of liquid dollar claims has long been held in internationally mobile portfolios, and an exogenous impulse to flee from these assets could be just as serious for the United States whether it is a net creditor or a net debtor. Furthermore, in the last few years the Federal Reserve has not encountered prolonged or disruptive conflict between the needs of internal and external balance. Nevertheless, the deterioration in our external position is a serious problem: it represents an underlying imbalance between domestic spending and production that is not sustainable. Reliance on monetary policy alone to address this problem will damp growth of capital and add to strains in our financial markets. We need, instead, to augment national savings by bringing down our federal budget deficit.

With all the changes in the financial and economic system, monetary policy continues to work through the same basic mechanisms that alter the incentives to save and to spend and that shift the locus of such spending. Many of these changes arise in the natural evolution of a dynamic economic and financial system to which a central bank must learn to adapt. Some of them may have weakened the effectiveness of policy—defined narrowly as the impact of a given twist of the instrument dials—while others have probably strengthened it. On balance, they do not justify holding policymakers any less accountable for results today than they were 10, 20, or 30 years ago.

Even so, the system is changing, and along with that, so are the answers to the policymakers' questions about the relationship of instrument settings to ultimate outcomes. To enable policy to adapt to the changes in the system, we must find out as much about their effects as possible. □

Treasury and Federal Reserve Foreign Exchange Operations

This quarterly report, covering the period August through October 1988, provides information on Treasury and System foreign exchange operations. It was prepared by Sam Y Cross, Manager of Foreign Operations of the System Open Market Account and Executive Vice President in charge of the Foreign Group of the Federal Reserve Bank of New York.¹

During the early weeks of the period under review, the dollar continued the generally upward trend that had prevailed throughout the summer, moving higher against all major foreign currencies but especially against the German mark. At times during August and to a lesser extent during September, there were episodes of upward pressure whereupon the U S authorities intervened, selling dollars to restrain the dollar's rise. As the period progressed, shifts in expectations about the U S economic outlook, about the prospects for further increases in U S short-term interest rates, and about the progress of external adjustment led to a more cautious attitude toward the dollar, and the currency started to ease. During October, selling pressures intensified, and late that month the U S authorities intervened in the foreign exchange market to support the dollar. On balance, the dollar ended the three-month period about 5½ percent lower against the Japanese yen and 5 percent lower against the German mark from levels at the end of July.

In the opening weeks of the period, the dollar was buttressed by the release of economic statistics indicating continued strength in the U S economy. The August 5 announcement of preliminary employment data for July, together with

an upward revision to June employment data and evidence of increasing capacity utilization, suggested that U S economic growth was proceeding at a pace that could give rise to new inflationary pressures. Market participants interpreted these economic statistics as increasing the likelihood that the Federal Reserve would tighten its monetary policy stance. Some observers already claimed to see signs of Federal Reserve tightening and were attracted by the prospects of rising short-term interest rates and the relatively high yields available on dollar-denominated assets. Even so, market participants were somewhat surprised when the Federal Reserve raised the discount rate ½ percentage point to 6½ percent on August 9. Subsequently, short-term interest rate differentials favoring the dollar against both the German mark and the Japanese yen widened. On August 10, the dollar reached

its period high of DM1 9245 against the mark while trading as high as ¥135 20 against the yen. At that time, the dollar was 2½ percent higher against the mark and 1½ percent higher against the yen from the start of the period. From its low point around the turn of the year, the dollar had moved up more than 23 percent against the mark and more than 12 percent against the yen.

For several weeks thereafter the dollar traded firmly as market participants adjusted commercial leads and lags and implemented other hedging strategies to take account of the dollar's renewed strength. Sentiment toward the dollar remained bullish, with traders interpreting even potentially unfavorable news as favorable for the dollar. In these circumstances, market participants questioned the degree of the administration's concern over the dollar's rise.

Perceptions that external adjustment was proceeding on track encouraged positive sentiment toward the dollar. Market participants noted that the trade deficit had narrowed with each of the previous three monthly reports, setting in place a trend of improved performance based on varying combinations of strong export performance and slower growth of imports. The August 16 report that the U.S. trade deficit for June had widened to a seasonally adjusted \$12.5 billion from a revised \$9.8 billion in May initially disappointed the market, and the dollar briefly declined. But strong upward pressure on the dollar soon re-emerged as some market participants seemed to view the widening of the deficit—and in particular the rise in imports—as yet another indication that the Federal Reserve might further tighten its policy stance to counter inflationary pressures. Meanwhile, others noted the favorable implications for increasing U.S. industrial capacity of the substantial rise in imports of capital goods.

The dollar moved as high as DM1 9230 against the mark on August 22 and ¥134 70 against the yen on August 24, almost matching the highs reached earlier in the month. Between August 5 and August 23, the U.S. monetary authorities at times intervened heavily in the foreign exchange market to resist the tendency for the dollar to advance, selling a total of \$1,806 million against marks in operations often coordinated with other central banks. The intervention operations, reinforced by official commentary both in the United

States and abroad expressing concern that any further rise of the dollar against the German mark might impede improvement in the trade balances, were, by the end of August, beginning to be viewed as a forceful demonstration that international agreements to foster exchange market stability remained intact.

Then on August 25, in a move prompted by developments in the foreign exchange market as well as by domestic conditions in the individual countries, the German Bundesbank and several other European central banks raised their official interest rates. As German interest rates edged higher after the Bundesbank's announcement of a ½ percentage point rise in the discount rate, interest rate differentials favoring the dollar against the mark narrowed, diminishing the relative attractiveness of dollar-denominated assets.

That day the dollar declined almost 1 percent against the mark, bringing the dollar to about the same level as at the opening of the period. The yen declined even more against the mark on that and subsequent days because the Bank of Japan was not expected to follow actions by the other central banks to raise official interest rates. As the yen weakened, the dollar moved to its period high against the yen of ¥137 25 on September 2.

Throughout much of September, the dollar traded within a relatively narrow range. Market participants expressed renewed confidence in the official commitments to promote exchange rate stability and perceived that monetary authorities would not welcome any further rise of the dollar. Many of the factors that had contributed to the upward pressure during late summer also had become much less evident. In particular, a new round of statistics suggested that U.S. economic growth was slowing to a more sustainable pace. While that development was viewed as generally favorable for long-run economic prospects, it weakened some of the short-term demand for dollars by contributing to expectations that upward pressure on dollar interest rates was likely to subside. The financial markets took special note of the September 2 release of U.S. nonfarm payroll figures for August that showed slower employment growth than the market had previously anticipated. Inflation concerns were also allayed by the outlook for declining oil prices and

the report of unchanged average earnings during August

As the upward pressures on the dollar eased and as market participants perceived prospects for greater exchange rate stability, investors were increasingly attracted to certain relatively high-yielding currencies, such as the Canadian dollar. The Canadian dollar also benefited from early public opinion polls in advance of the Canadian elections showing strong support for the incumbent Conservative party that favored the enactment of the U S-Canadian free trade agreement. The U S dollar declined steadily against the Canadian dollar from early September through mid-October.

Although the positive outlook that had prevailed during the summer tended to erode during September, there were episodes of upward pressure on the dollar. One occasion followed the September 14 announcement of a U S trade deficit for July that was smaller than expected and that provided reassurance to the market that the correction of global imbalances was continuing. Another occurred following the release of a statement by the Group of Seven (G-7) finance ministers and central bank governors attending a meeting in Berlin over the weekend of September 24. Although that statement reaffirmed the basic objectives of previous commitments regarding cooperative efforts, including exchange rate stability, it contained no precise reference to dollar exchange rates. Some market participants, therefore, concluded that the G-7 was prepared to tolerate further dollar appreciation.

During these episodes, the dollar moved up smartly, and the U S authorities intervened to resist these pressures. Between September 14 and September 22, the Trading Desk at the Federal Reserve Bank of New York sold \$230 million against marks. On September 26, the first business day after the G-7 meeting, the Desk sold an additional \$100 million against marks, and a substantial number of other central banks intervened forcefully to sell dollars at the same time. The visible, concerted intervention operations provided a clear signal to the market that the G-7 had not changed its exchange market objectives.

At the end of September, market participants noted that there was significant concerted intervention to sell dollars against the mark when the dollar, at about DM1 89, was still well below the levels reached the previous month. Furthermore, subsequent official statements from various sources pointed to the economic risks of a further dollar rise and gave new weight to the September 24 statement.

During October, market sentiment toward the dollar turned negative. For one thing, the prospect of upward pressure on short-term dollar interest rates appeared to diminish further. Release of a series of economic reports indicated that U S economic activity, while still showing strength, was moderating even more. News of increases in U S employment during September that were smaller than had been forecast (although they were later revised upward) and preliminary third-quarter U S GNP figures rein-

forced the view that a further tightening of U S monetary policy was less likely in the near term

Moreover, market participants, having seen repeated evidence of coordinated central bank sales of dollars during the summer and early autumn, remained convinced that the monetary authorities would firmly resist any further substantial rise of the dollar

In addition, concerns were aroused about the pace of adjustment of global imbalances by the October 13 release of U S trade data for August showing a widening of the trade deficit to \$12.2 billion. Despite comments of U S officials cautioning that wide fluctuations in monthly trade data were of little significance and noting the clear trend of improvement in the U S trade accounts over a longer period, the market continued to focus closely on these monthly trade releases. Participants expressed growing concern about the sustainability of U S progress in reducing its external deficit.

The dollar's decline against the yen during October was particularly noteworthy. Over the course of the month, the dollar moved approximately 6 percent lower against the Japanese yen. Widespread reports circulated of substantial sales of dollars against yen by Japanese institutional investors and by U S investment banks seeking to hedge an increasing proportion of their dollar portfolios in anticipation of further dollar declines. Furthermore, the yen's strength seemed to reflect a relatively favorable market assessment of Japan's progress in adapting to the rise in its currency since 1985. Selling pressure intensified as the dollar moved below important technical and psychological levels, reaching the period lows of about ¥124.50 against the yen and DM1.76 against the mark at one point on October 31. Under these circumstances, the U S authorities entered the market to buy dollars for the first and only time in the period, purchasing on that day \$200 million against yen to support the dollar.

As the period ended, the dollar was underpinned by a widely held market view that the authorities would act to prevent any sharp fall in the dollar, at least through early November, in advance of the U S presidential election. In addition, interest rate differentials favoring the dollar widened slightly as Japanese money mar-

ket rates eased by a modest amount. However, market sentiment toward the dollar remained distinctly negative as skepticism deepened that the policy initiatives needed to keep the international adjustment process intact, both here and abroad, would be undertaken promptly enough.

The dollar closed the three-month period at ¥125.50 against the yen, barely 4½ percent above its record low of ¥120.20 recorded on January 4, 1988. Against the mark, the dollar closed the reporting period at around DM1.79, more than 14½ percent above its record low of DM1.5615 in January. On a trade-weighted basis, as measured by the index of the Federal Reserve Board staff, the dollar declined 4½ percent in terms of the other Group of Ten currencies during the period.

The U S monetary authorities sold a total of \$2,136 million against German marks and purchased a total of \$200 million against Japanese yen during the three-month period. The Federal Reserve and the Treasury's Exchange Stabilization Fund (ESF) participated equally in the financing of all intervention operations.

During the period, there were several other foreign currency transactions of the ESF and the Federal Reserve.

- On August 1, the Bank of Mexico activated its reciprocal arrangements with the Federal Reserve and the U S Treasury, drawing \$700 million and \$300 million respectively. On September 15, both amounts were fully repaid.

- On August 26, the Central Bank of Brazil repaid an outstanding drawing of \$232.5 million on a short-term ESF financing facility of \$250 million. The remaining \$17.5 million was not drawn during the period.

- The National Bank of Yugoslavia repaid \$17.2 million to the U S Treasury on September 26 and \$16.6 million on September 30, thereby liquidating the \$50 million ESF facility. This facility was provided to Yugoslavia in June along with a \$200 million facility by the Bank for International Settlements, acting for a number of central banks.

- On October 20, the U S Treasury through the ESF, together with a number of other monetary institutions, agreed to establish a facility to provide up to \$500 million in short-term financing.

Valuation profits and losses on outstanding assets and liabilities as of October 31, 1988	1,536.9	1,258.9

¹ Data are on a value-date basis

to Argentina. The ESF's share was \$265 million. No drawings were made as of October 31.

As in previous periods, the U.S. authorities acquired foreign currencies through sales of dollars to other official institutions and through receipt of principal repayments and interest payments received under the Supplementary Financing Facility of the International Monetary Fund.

Such foreign currency acquisitions totaled \$2,103.4 million equivalent.

As of the end of October, cumulative book-keeping or valuation gains on outstanding foreign currency balances were \$1,536.9 million for the Federal Reserve and \$1,258.9 million for the ESF. These valuation gains represent the increase in the dollar value of outstanding currency assets valued at exchange rates at the end of the period, compared with the rates prevailing at the time the foreign currencies were acquired.

The Federal Reserve and the ESF regularly invest their foreign currency balances in a variety of instruments that yield market-related rates of return and that have a high degree of quality and liquidity. A portion of the balances is invested in securities issued by foreign governments. As of the end of October, holdings of such securities by the Federal Reserve amounted to \$2,540.1 million equivalent, and holdings by the Treasury amounted to the equivalent of \$2,816.9 million.

Industrial Production

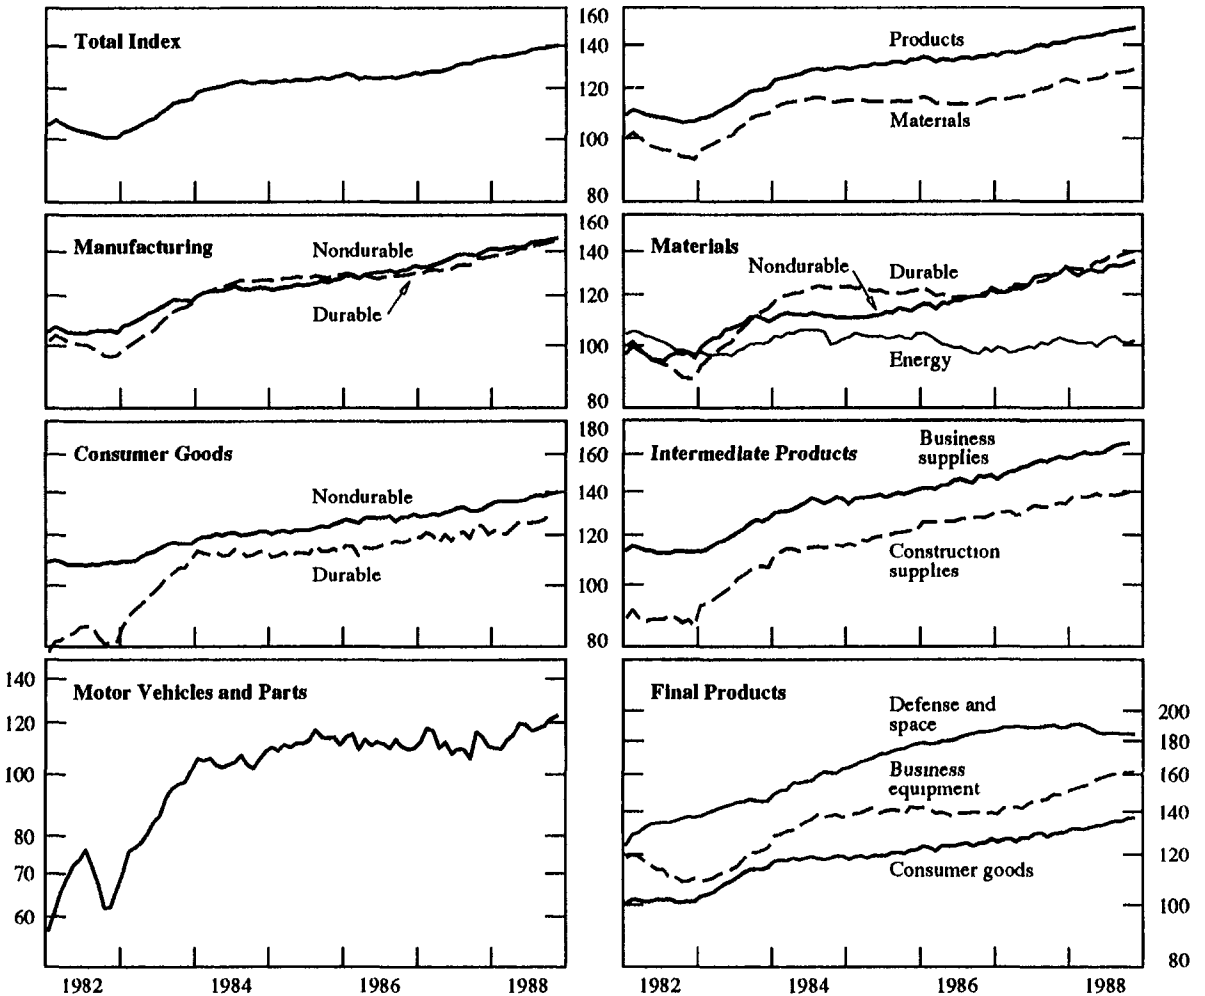

Released for publication December 14

Industrial production increased 0.5 percent in November after having risen a revised 0.5 percent in October and 0.1 percent in September. In November, the output of materials, business equipment (other than commercial equipment), and construction supplies led the advance. At 139.9 percent of the 1977 average, the total index

in November was 5.1 percent higher than it was a year earlier.

In market groups, output of consumer goods increased 0.3 percent in November as production of light trucks and nondurable goods posted gains. However, auto assemblies, at an annual rate of 7.6 million units, were down slightly from October. Moreover, output of home goods, such as appliances, declined in November after having

risen sharply in October. Total production of business equipment advanced 0.4 percent in November as all major components other than commercial equipment continued to advance rapidly. Output of commercial equipment, which includes computers, decreased for the third successive month. Gains in materials production were wide-

spread in November, the most notable advances occurred in the output of parts for consumer durables, basic metals, chemicals, and coal.

In industry groups, manufacturing output increased 0.5 percent as most major industries posted gains, the only significant decline was in petroleum refining. Mining output rose 0.6 percent, and production at utilities increased 0.4 percent.

Capacity utilization in total industry for November 1988 was estimated at 84.2 percent, up 0.2 percentage point from October. In manufacturing, capacity utilization for November was 84.5 percent, 0.2 percentage point higher than it was in October, and 2.3 percentage points higher than it was a year earlier. Detailed data for capacity utilization are shown separately in "Capacity Utilization," Federal Reserve monthly statistical release, G 3.

Announcements

INCREASE IN AMOUNT TO WHICH RESERVE REQUIREMENT WILL APPLY

The Federal Reserve Board announced on December 6, 1988, an increase from \$40.5 million to \$41.5 million in the net transaction accounts to which a 3 percent reserve requirement will apply in 1989. The Board also increased the amount of reservable liabilities that are exempt from reserves from \$3.2 million to \$3.4 million of total reservable liabilities.

Additionally, the Board increased the deposit cutoff level, which separates weekly reporting institutions from quarterly reporters, from \$40.0 million to \$42.1 million. Institutions with total reservable liabilities below the exemption level of \$3.4 million are excused from reporting even on a quarterly basis if their deposits can be estimated from other sources.

These adjustments took effect beginning December 20, 1988.

PROPOSED ACTION

The Federal Reserve Board issued for public comment on December 22, 1988, a proposal to amend its Regulation Z (Truth in Lending) to implement the Fair Credit and Charge Card Disclosure Act. Comment is requested by February 21, 1989.

HEARING SCHEDULED ON PROPOSAL TO RESCIND RULE

The Federal Reserve Board scheduled an informal hearing for February 3, 1989, on a recent proposal to rescind the Board's current rule that permits state banks in a holding company to acquire all of the shares of a company engaged in nonbanking activities that the state bank is permitted to conduct directly.

CHANGES IN BOARD STAFF

James McAfee, Associate Secretary in the Office of the Secretary, resigned, effective January 23, 1989.

Jennifer J. Johnson has been appointed to the Board's staff as Associate Secretary. Ms. Johnson was Vice President and General Counsel of Shawmut Bank and Secretary of Shawmut Corporation. She received an A.B. degree from Mount Holyoke College and a J.D. degree from the University of Pennsylvania.

SYSTEM MEMBERSHIP: ADMISSION OF STATE BANKS

The following state bank was admitted to membership in the Federal Reserve System for the period December 1 through December 31, 1988.

Virginia

Stephens City

Marathon Bank

Record of Policy Actions of the Federal Open Market Committee

MEETING HELD ON NOVEMBER 1, 1988

1. Domestic Policy Directive

The information reviewed at this meeting indicated that the expansion in economic activity had moderated from the vigorous pace evident earlier in the year. Private domestic final demand grew at an appreciably slower pace in the third quarter than in the first half of the year, and other recent statistics, including data on labor market activity, also suggested some slowing in the rate of economic expansion. Information on wage and price developments gave no clear evidence on balance of any change in underlying inflation trends.

Total nonfarm payroll employment increased considerably in the third quarter, but the gains were less than those registered in the first half. In August and September, hiring in all major sectors except government moderated, and employment in manufacturing declined. Despite this broad-based slowing in the growth of private payrolls, the civilian unemployment rate fell to 5.4 percent in September and has remained in a narrow range around 5½ percent since early spring.

Industrial production increased only slightly on balance in August and September after a strong surge earlier in the summer. Output of business equipment continued to advance fairly rapidly while production of consumer goods was sluggish. Total industrial capacity utilization declined slightly in September but was still more than ½ percent above the relatively high second-quarter level.

Overall consumer spending in constant dollar terms increased substantially on average in the third quarter, as outlays for services and nondurable goods strengthened while purchases of durables were little changed. However, retail sales

weakened in August and September, owing partly to reduced sales of motor vehicles.

Indicators of business capital spending in the third quarter suggested a considerably reduced rate of expansion compared with the first half of the year. Growth of real outlays for business equipment slowed sharply, as investment in information-processing equipment decelerated. Nonresidential construction activity was weak in the first two months of the quarter, with oil drilling and expenditures on commercial and industrial structures other than office buildings contracting further. Inventory investment in the manufacturing and wholesale sectors picked up in July and August, but stocks accumulated about in line with the growth of sales. Retail inventories, reflecting little further change in stocks at auto dealers after a sharp rise in the second quarter, increased much less rapidly. Housing construction had been flat in recent months, the third-quarter pace of starts of single-family homes was unchanged from that of the previous quarter while multifamily starts edged down.

Preliminary data for the nominal U.S. merchandise trade deficit in August showed a larger deficit than in July. However, the average for July and August was slightly lower than the second-quarter rate as exports increased more than imports. Most of the rise in exports was in nonagricultural goods, particularly capital goods and consumer durables, increased imports of consumer goods and food outweighed a slight reduction in the value of purchases of imported oil. Economic activity in the major foreign industrial economies appeared to have rebounded somewhat in the third quarter, following a pronounced slackening in the second quarter.

Reflecting a decline in gasoline prices at the refinery level, producer prices of finished goods registered a smaller advance in September than

in August, however, for the third quarter as a whole, these prices rose more rapidly than during the first half of the year. At the crude materials level, producer food prices continued to rise sharply. Consumer prices increased at a somewhat slower rate in September as declines in energy prices outweighed the passthrough to the retail level of higher wholesale food prices. Excluding food and energy items, consumer prices on a year-over-year basis continued to rise at about the 4½ percent annual rate evident since late 1987. Most measures of labor costs indicated some slowing in the rate of increase over the summer months, after a sharp upward movement in the second half of 1987 and early 1988.

In the foreign exchange markets, the trade-weighted value of the dollar in terms of the other G-10 currencies had declined from its high level of last summer by the time of the previous Committee meeting on September 20. Following the meeting, the dollar initially fluctuated in a narrow range but later declined appreciably in response to indications of more moderate U.S. economic growth and to information suggesting a slower U.S. external adjustment than the markets had anticipated earlier.

At its meeting on September 20, the Committee adopted a directive calling for no change in the degree of pressure on reserve positions. These reserve conditions were expected to be consistent with growth of M2 and M3 at annual rates of about 3 and 5 percent respectively over the period from August to December. The members agreed that somewhat greater reserve restraint would, or slightly lesser reserve restraint might, be acceptable depending on indications of inflationary pressures, the strength of the business expansion, the behavior of the monetary aggregates, and developments in foreign exchange and domestic financial markets.

Adjustment plus seasonal borrowing fluctuated over a sizable range during the intermeeting period, averaging about \$630 million in the two complete reserve maintenance periods since the September meeting. The federal funds rate rose somewhat, with funds trading around 8¼ percent and sometimes higher over most of the intermeeting period. Most other short-term interest rates edged higher, perhaps reflecting the firmer federal funds rate as well as increased supplies of

Treasury bills and CDs. Interest rates in long-term debt markets declined a little further as indications of more moderate economic expansion and weak energy prices apparently reduced concerns about inflation and buoyed expectations that money market conditions would not be tightened substantially further. Lower bond yields apparently contributed to higher equity prices, some broad indexes of stock prices had risen about 3 percent since the September meeting.

Expansion of M2 slowed further in September, and preliminary data suggested that growth remained quite weak in October as earlier increases in market interest rates and opportunity costs continued to damp demands for liquid deposit components. By contrast, after slow growth in August and September, M3 appeared to have strengthened somewhat in October, in association with a resumption in growth of bank credit. After registering relatively strong expansion in June and July, M1 had increased only slightly on balance in recent months, with total transactions deposits falling marginally.

The staff projection prepared for this meeting suggested that growth of the nonfarm sector of the economy in the current quarter might be near the reduced pace of the third quarter and that expansion in 1989 was likely to remain, on balance, well below the pace of the first half of 1988. The effects of the drought would continue to be reflected in an uneven quarterly pattern of growth of GNP, notably through the first half of next year. To the extent that expansion of final demand at a pace that could foster higher inflation was not accommodated by monetary policy, pressures would be generated in financial markets that would restrain domestic spending. The staff projection, which assumed a slightly restrictive fiscal policy, continued to indicate relatively sluggish growth of consumer spending, sharply reduced expansion of business fixed investment from the pace in the first half of 1988, and restrained housing activity. As in earlier projections, the external sector was expected to contribute importantly to domestic economic growth. The staff now anticipated some marginal easing in aggregate price increases in 1989, in large part because recent declines in crude oil prices portended lower energy prices more gen-

erally. However, any decline in inflation would be limited, largely because of continuing pressures stemming from still strong demands pressing against reduced margins of unutilized labor and other production resources.

In the Committee's discussion of the economic situation and outlook, members welcomed the apparent moderation in the expansion of economic activity toward a pace that might prove to be more sustainable and consistent with progress over time toward price stability. Continuing expansion, but at a more moderate pace than that experienced in the first half of 1988, was viewed as a reasonable expectation, partly in light of the monetary policy tightening that already had been implemented this year. There was no evidence of emerging imbalances in key sectors of the economy that might bring the expansion to an end, although the outlook remained clouded by the nation's outsized trade and federal budget deficits and the financial problems or debt exposure of a number of depository institutions and business firms. In the view of many of the members, the risks of deviations from current expectations continued to be in the direction of greater inflationary pressures. Other members, while concerned about the potential for inflation, felt that the economy already appeared to be on a track consistent with no pickup in inflation and perhaps some improvement next year.

In the course of the Committee's discussion, members noted that despite signs of some slowing in recent months, the expansion in business activity retained appreciable momentum as evidenced, for example, by order backlogs, ongoing strength in business capital spending, and noteworthy improvement in the agricultural sector. Further improvement in the nation's trade balance also appeared likely, and while the gains might be more limited than in recent quarters, they would help to sustain domestic manufacturing activity. Consumer spending might be supported to some extent by gains in real incomes stemming from reduced energy prices. By most measures, business inventories appeared to be relatively lean and, assuming continued moderate growth in overall final demand, further inventory accumulation might provide a modest fillip to the expansion over the year ahead. On the other hand, members also took note of the

relatively sluggish performance of retail sales recently, notably of durable goods, and the continuing weakness of construction activity, including housing. A review of local business conditions continued to indicate an uneven pattern of regional activity, but on balance local developments tended to confirm broader indications of further, though reduced, growth in overall business activity.

With regard to the outlook for inflation, a critical issue in the view of many members was whether overall demand conditions in the economy would be consistent with containing or reducing inflation. A number of members expressed concern that underlying pressures on resources remained strong and that the possibility of greater inflation constituted the major current threat to sustained economic expansion. One observed that the uncertainties in the outlook for inflation were compounded by the prospect that, with production resources at or close to full capacity, even small differences in demand pressures could have a disproportionate effect on the actual rate of inflation next year. However, some members commented that, on the whole, price and wage developments were more favorable than might have been anticipated at current rates of capacity utilization. Recent reports from around the nation suggested that inflation was not worsening in regional markets, including parts of the country where business activity remained relatively robust. Indeed, there were indications that prices of some business products previously in short supply now were showing some tendency to level off, and there was little or no evidence of faster increases in wages. Moreover, recent developments in financial markets suggested some lessening of inflationary expectations, although the latter remained volatile.

At its meeting in late June, the Committee reviewed the basic policy objectives that it had set for growth of the monetary and debt aggregates in 1988, and it established tentative objectives for expansion of those aggregates in 1989. For the period from the fourth quarter of 1987 to the fourth quarter of 1988, the Committee reaffirmed the ranges of 4 to 8 percent set in February for growth of both M2 and M3. The monitoring range for expansion of total domestic nonfinancial debt in 1988 was left unchanged.

from its February specification of 7 to 11 percent. For the year to date, M2 had grown at an annual rate somewhat below, and M3 at a rate somewhat above, the midpoints of their annual ranges. Expansion of total domestic nonfinancial debt appeared to have moderated to a pace marginally below the midpoint of its range. For 1989 the Committee agreed on tentative reductions to ranges of 3 to 7 percent for M2 and 3½ to 7½ percent for M3. The monitoring range for growth of total domestic nonfinancial debt was lowered to 6½ to 10½ percent for 1989. It was understood that all the ranges for next year were provisional and that they would be reviewed in February 1989 in the light of intervening developments. With respect to M1, the Committee reaffirmed in June its earlier decision not to set a specific target for growth in 1988 and it also decided not to establish a tentative range for 1989.

In the Committee's discussion of policy implementation for the period immediately ahead, the members generally agreed that the current relatively balanced performance of the economy and the uncertainties surrounding the outlook argued for an unchanged policy at this point. Some commented that the apparent strength of underlying inflationary pressures might require further monetary restraint later, but for now they favored or could accept a steady policy course. Other members were more persuaded that, in the context of the recent evidence of slower economic growth, monetary policy already appeared to be on a course that would promote progress in reducing inflation. From the perspective of the growth of the monetary aggregates and reserve as well as interest rate developments, monetary policy had been fairly restrictive for some months and further restraint needed to be approached with some caution. At the same time, members stressed the continuing need to sustain the System's commitment to its long-run objective of controlling inflation, including the desirability of making clear that the current rate of inflation was unacceptable.

In the course of the Committee's discussion, the members took account of a staff analysis that concluded that the maintenance of unchanged reserve conditions was likely to be associated with relatively slow monetary growth over the balance of the year. Some pickup in the growth

of M2 and M3 was anticipated from the very sluggish performance of September and October, but further adjustments of asset portfolios to previous increases in interest rates and opportunity costs were likely to limit the rise. In addition, reductions in compensating balances in response to earlier increases in market interest rates were expected to be more pronounced late in the year, though such adjustments would have their major impact on M1 growth. Concurrently, expansion of M3 and, to a lesser degree, M2 might be buttressed to some extent as banks undertook to secure funds to underwrite a perhaps substantial portion of the initial cash needed to finance the recent surge in merger and buyout activities. Although members observed that any easing of reserve conditions to stimulate monetary growth would not be desirable at this point, some indicated that they would become increasingly concerned if very weak monetary growth were to persist in the context of sluggish expansion in economic activity.

With regard to possible adjustments in the degree of reserve pressure in the intermeeting period, a majority of the members believed that operations should be adjusted more readily toward further tightening than toward any easing. Some indicated that they viewed the incorporation of such an understanding as a key element of an acceptable directive, given their assessment of the inflationary risks in the economic outlook. Most of the other members indicated that they could accept such a directive, although they were less inclined than they had been previously to bias it toward further restraint. In this view, the direction of any potential adjustment in policy implementation was less certain than earlier, given the recent performance of the economy and behavior of the monetary aggregates. One member felt that the risks of some further weakness in the economy were sufficiently strong that a continued bias toward possible tightening during the intermeeting period was not acceptable.

At the conclusion of the Committee's discussion, all but one member indicated that they favored or could accept a directive that called for maintaining the current degree of pressure on reserve conditions and that provided for remaining especially alert to potential developments

that might require some firming during the intermeeting period. Accordingly, somewhat greater reserve restraint would be acceptable, or slightly lesser reserve restraint might be acceptable, over the intermeeting period depending on indications of inflationary pressures, the strength of the business expansion, the behavior of the monetary aggregates, and developments in foreign exchange and domestic financial markets. The reserve conditions contemplated by the Committee were expected to be consistent with growth of M2 and M3 at annual rates of around 2½ percent and 6 percent respectively over the three-month period from September to December. The intermeeting range for the federal funds rate, which provides one mechanism for initiating consultation of the Committee when its boundaries are persistently exceeded, was left unchanged at 6 to 10 percent.

At the conclusion of the meeting, the following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting indicates that the expansion in economic activity has moderated from the vigorous pace earlier in the year. Total nonfarm payroll employment grew considerably in the third quarter but the gains were less than those registered in the first half of the year and employment in manufacturing declined in August and September. The civilian unemployment rate fell to 5.4 percent in September, remaining in the narrow range that has prevailed since early spring. Industrial production advanced only slightly on balance in August and September after a sharp increase in July, while housing construction has been flat in recent months. Consumer spending increased substantially on average in the third quarter but apparently slowed in recent months. Indicators of business capital spending suggest considerably slower expansion in the third quarter, following very rapid growth in the first half of the year. Preliminary data for the nominal U.S. merchandise trade deficit in August showed a greater deficit than in July, but the average for July–August was slightly less than the second-quarter rate. The latest information on prices and wages suggests little if any change from recent trends.

Interest rates in long-term debt markets have declined a little further since the Committee meeting on September 20, while rates in short-term markets have edged higher. The trade-weighted foreign exchange value of the dollar in terms of the other G-10 currencies declined appreciably over the intermeeting period from the high level of last summer.

Expansion of M2 has slowed considerably in recent

months, growth of M3 moderated in August and September but appears to have strengthened somewhat in October. Thus far this year, M2 has grown at a rate somewhat below, and M3 at a rate somewhat above, the midpoint of the ranges established by the Committee for 1988. M1 has increased only slightly on balance in recent months after registering relatively strong growth in June and July. Expansion of total domestic nonfinancial debt for the year thus far appears to be at a pace somewhat below that in 1987.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability over time, promote growth in output on a sustainable basis, and contribute to an improved pattern of international transactions. In furtherance of these objectives, the Committee at its meeting in late June reaffirmed the ranges it had established in February for growth of 4 to 8 percent for both M2 and M3, measured from the fourth quarter of 1987 to the fourth quarter of 1988. The monitoring range for growth of total domestic nonfinancial debt was also maintained at 7 to 11 percent for the year.

For 1989, the Committee agreed on tentative ranges for monetary growth, measured from the fourth quarter of 1988 to the fourth quarter of 1989, of 3 to 7 percent for M2 and 3½ to 7½ percent for M3. The Committee set the associated monitoring range for growth of total domestic nonfinancial debt at 6½ to 10½ percent. It was understood that all these ranges were provisional and that they would be reviewed in early 1989 in the light of intervening developments.

With respect to M1, the Committee reaffirmed its decision in February not to establish a specific target for 1988 and also decided not to set a tentative range for 1989. The behavior of this aggregate will continue to be evaluated in the light of movements in its velocity, developments in the economy and financial markets, and the nature of emerging price pressures.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. Taking account of indications of inflationary pressures, the strength of the business expansion, the behavior of the monetary aggregates, and developments in foreign exchange and domestic financial markets, somewhat greater reserve restraint would, or slightly lesser reserve restraint might, be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with growth of M2 and M3 over the period from September through December at annual rates of about 2½ and 6 percent, respectively. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 6 to 10 percent.

Votes for this action: Messrs Greenspan, Corrigan, Angell, Black, Forrestal, Heller, Hoskins,

Johnson, Kelley, LaWare, and Parry Vote against this action Ms Seger

Ms Seger indicated that while an unchanged policy was acceptable to her at this point, she did not want to bias the directive toward potential tightening. In her view current indications of slower economic growth and the lagged effects of earlier policy tightening actions pointed to relatively slow expansion and reduced inflationary pressures over the year ahead. In these circumstances, she would not want to react more promptly or vigorously to indications of greater strength or price pressures in the economy, which might well prove to be temporary, than to evidence of a weakening economy.

In the period following the Committee meeting on November 1, it became increasingly evident in the implementation of policy that depository institutions had reduced their demands on the discount window, in this period, a significantly lower level of adjustment plus seasonal borrowing was being associated with a slightly higher federal funds rate than had been anticipated at the time of the meeting. To take account of this change in behavior, but also in light of recent information suggesting that the economic expansion retained considerable strength, the Manager for Domestic Operations adjusted the reserve paths to incorporate a lower level of borrowing, with the expectation that federal funds would continue to trade in the slightly higher range that had prevailed recently. This adjustment in open market operations was discussed with the Committee on November 22, 1988. The members agreed that the factors relating to the apparent change in the relationship between borrowing and the federal funds rate, and the broader implications for the conduct of open market operations, would be reviewed further at the December meeting.

2. *Authorization for Domestic Open Market Operations*

Effective November 2, 1988, the Committee approved a temporary increase of \$4 billion, to \$10 billion, in the limit between Committee meetings on changes in System Account holdings of U.S.

government and federal agency securities that is specified in paragraph 1(a) of the Authorization for Domestic Open Market Operations. The increase was effective for the intermeeting period ending with the close of business on December 14, 1988.

Votes for this action Messrs Greenspan, Corrigan, Angell, Black, Forrestal, Heller, Hoskins, Johnson, Kelley, LaWare, Parry, and Ms Seger
Votes against this action None

This action was taken on the recommendation of the Manager for Domestic Operations. The Manager had advised that the usual leeway of \$6 billion for changes in System Account holdings would probably not be sufficient over the intermeeting period because of seasonal increases in currency in circulation and in required reserves.

3. *Change in Terms of Certain Members to Calendar-Year Basis*

The Committee amended its "Rules of Organization" to advance from March 1 to January 1 of each year the start of the terms of office of the Federal Reserve Bank presidents who serve one-year terms as Committee members or alternate members. The change will be effective starting with the calendar year 1990. Because the Committee's objectives for monetary growth are established on a calendar-year basis, the Committee believed that it would be appropriate to have all the members responsible for carrying out those objectives during the year participate in the vote to establish them at the start of the year. The Committee emphasized that this change was essentially procedural in nature, given the continuity of its decisionmaking process. The Full Employment and Balanced Growth Act of 1978 requires that the Committee's monetary growth objectives for the calendar year be transmitted to the Congress by February 20 of each year.

Votes for this action Messrs Greenspan, Corrigan, Angell, Black, Forrestal, Heller, Hoskins, Johnson, Kelley, LaWare, Parry, and Ms Seger
Votes against this action None

Legal Developments

FINAL RULE—AMENDMENT TO REGULATION E

The Board of Governors is amending 12 C F R Part 205, its Regulation E (Electronic Fund Transfers), to reflect properly an amendment that was incorrectly incorporated into the *Code of Federal Regulations*

Effective December 30, 1988, 12 C F R Part 205 is amended as follows

1 The authority citation for 12 C F R Part 205 continues to read as follows

Authority Pub L 95-630, 92 Stat 3730 (15 U S C 1693b)

2 Section 205 6(c) is revised in its entirety to read as follows

Section 205 6—Liability of Consumer for Unauthorized Transfers

* * * * *

(c) *Notice to financial institution* For purposes of this section, notice to a financial institution is given when a consumer takes such steps as are reasonably necessary to provide the financial institution with the pertinent information, whether or not any particular officer, employee, or agent of the financial institution does in fact receive the information Notice may be given to the financial institution, at the consumer's option, in person, by telephone, or in writing Notice in writing is considered given at the time the consumer deposits the notice in the mail or delivers the notice for transmission by any other usual means to the financial institution Notice is also considered given when the financial institution becomes aware of circumstances that lead to the reasonable belief that an unauthorized electronic fund transfer involving the consumer's account has been or may be made

* * * * *

FINAL RULE—AMENDMENT TO REGULATION CC

The Board of Governors is amending 12 C F R Part 229, its Regulation CC (Availability of Funds and

Collection of Checks), with respect to the law of New Jersey The Expedited Funds Availability Act provides standards for determining whether State law governing funds availability supersedes, or is preempted by Federal law Under Regulation CC, the Board will issue preemption determinations upon request

Effective December 19, 1988, 12 C F R Part 229 is amended as follows

Part 229—[Amended]

1 The authority citation for Part 229 continues to read as follows

Authority Title VI of Pub L 100-86, 101 Stat 522, 635, 12 U S C 4001 *et seq*

2 Appendix F is amended by adding a preemption determination for the state of New Jersey alphabetically to read as follows

Appendix F—Official Board Interpretations, Preemption Determinations

* * * * *

New Jersey

Background

The Board has been requested, in accordance with section 229 20(d) of Regulation CC (12 C F R Part 229), to determine whether the Expedited Funds Availability Act (the "Act") and Subpart B (and in connection therewith, Subpart A) of Regulation CC preempt the provisions of New Jersey law concerning disclosure of a bank's funds availability policy (*See also* the Board's preemption determination regarding the Uniform Commercial Code, section 4-213(5), pertaining to availability of cash deposits)

New Jersey does not have a law or regulation establishing the maximum time periods within which funds deposited by check or electronic payment must be made available for withdrawal New Jersey does, however, have regulations concerning the disclosure of a banking institution's availability policy (N J A C §§ 3 1-15 1 *et seq*)

Disclosures

New Jersey law requires every banking institution (defined as any state or federally chartered commercial bank, savings bank, or savings and loan association) to provide written disclosure to all holders of and applicants for deposit accounts which describes the institution's funds availability policy. Institutions must also disclose to their customers any significant changes to their availability policy.

Regulation CC preempts state disclosure requirements concerning funds availability that relate to "accounts" that are inconsistent with the federal requirements. The state requirements are different from, and therefore inconsistent with, the federal disclosure rules (Section 229.25(c)(2)). Thus, the New Jersey statute (N.J.A.C. §§ 3:1-15.1 *et seq.*) is preempted by Regulation CC to the extent that these disclosure provisions apply to "accounts" as defined by Regulation CC. The New Jersey disclosure rules would continue to apply to other "deposit accounts," as defined by New Jersey law, including money market accounts and saving accounts established by a natural person for personal or family purposes, which are not governed by the Regulation CC disclosure requirements.

ORDERS ISSUED UNDER BANK HOLDING COMPANY ACT

Orders Issued Under Section 3 of the Bank Holding Company Act

First Bank System, Inc.
Minneapolis, Minnesota

Order Approving the Merger of Bank Holding Companies

First Bank System, Inc., Minneapolis, Minnesota, a bank holding company within the meaning of the Bank Holding Company Act (12 U.S.C. § 1841 *et seq.*) ("BHC Act"), has applied for the Board's approval under section 3(a)(5) of the BHC Act to merge with Suburban Bancorporation, Inc., Eden Prairie, Minnesota ("Suburban"), and thereby to acquire indirectly Suburban National Bank, Eden Prairie, Minnesota ("Bank").¹

¹ In connection with the holding company merger, Suburban's banking subsidiary, Suburban National Bank, Eden Prairie, Minnesota, will be merged into First Bank System's lead bank, First Bank National Association, Minneapolis, Minnesota.

Notice of the application, affording interested persons an opportunity to submit comments, has been published (53 *Federal Register* 43,037 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the BHC Act.

First Bank System is the largest commercial banking organization in Minnesota, controlling deposits of \$12.3 billion, representing 31 percent of total deposits in commercial banking organizations in the state.² Suburban is the 46th largest commercial banking organization in Minnesota, controlling deposits of \$73 million, representing less than one percent of total deposits in commercial banking organizations in the state. Upon consummation of this proposal, First Bank System would control approximately \$12.4 billion in deposits, representing 31.1 percent of total deposits in commercial banking organizations in the state. Consummation of the proposal would not increase significantly the concentration of banking resources in Minnesota.

First Bank System competes directly with Suburban in the Minneapolis - St. Paul banking market.³ First Bank System is the largest commercial banking organization in the market, with deposits of \$10.9 billion, representing 44 percent of the total deposits in commercial banks in the market. Suburban is among the smaller commercial banking organizations in the market, with \$73 million in deposits, representing less than one percent of the total deposits in commercial banks in the market. Upon consummation of this proposal, First Bank System would control \$10.9 billion in deposits, representing 44.3 percent of the total commercial banking deposits in the market. The Minneapolis - St. Paul banking market would be considered highly concentrated with a four firm ratio of 74.8 percent. Consummation of this proposal would increase the Herfindahl-Hirschman Index ("HHI") of the market by 26 points to 2519.⁴

² Banking data are as of March 31, 1988.

³ The Minneapolis - St. Paul banking market is defined as the Minneapolis - St. Paul Ranally Metropolitan Area adjusted to include all of Scott and Carver Counties and Lanesburgh Township in Le Sueur County.

⁴ Under the revised Department of Justice Merger Guidelines (49 *Federal Register* 26,823 (June 29, 1984)), any market in which the post-merger HHI is over 1800 is considered highly concentrated, and the Department is likely to challenge a merger that increases the HHI by more than 50 points unless other factors indicate that the merger will not substantially lessen competition. The Department of Justice has informed the Board that a bank merger or acquisition is not likely to be challenged (in the absence of other factors indicating an anticompetitive effect) unless the post-merger HHI is at least 1800 and the merger increases the HHI by at least 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anti-competitive effects implicitly recog-

Although consummation of this proposal would eliminate some existing competition in the Minneapolis - St Paul banking market, 108 other commercial banking organizations would continue to operate in the market. In addition, the Board has considered the presence of thrift institutions in the banking market in its analysis of this proposal. The Board has previously indicated that thrift institutions have become, or have the potential to become, major competitors of commercial banks.⁵ Thrift institutions already exert a considerable competitive influence in the market as providers of NOW accounts and consumer loans, and many are engaged in the business of making commercial loans. Based upon the number, size, market share and commercial lending activities of thrift institutions in the market, the Board has concluded that thrift institutions exert a significant influence upon competition in the Minneapolis - St Paul banking market.⁶ Accordingly, in view of all the facts of record, and in particular in light of the small increase in concentration in the market, the Board has determined that consummation of this proposal would not have a significant adverse effect on existing competition in the Minneapolis - St Paul banking market.

The financial and managerial resources of First Bank System and its subsidiary banks are consistent with approval. In reaching this conclusion, the Board has taken into account First Bank System's recent announcement of the substantial loss resulting from the sale of its government bond portfolio, as well as the steps First Bank System intends to take to restore its capital position to more satisfactory levels. Considerations relating to the convenience and needs of the community to be served are also consistent with approval.

In connection with this application, the Board has received comments from various insurance trade associations ("Protestants").⁷ Protestants assert that the proposal to merge Suburban into First Bank System would result in an impermissible broadening of First Bank System's grandfather rights to conduct insur-

ance agency activities. First Bank System is authorized to engage in insurance agency activities pursuant to exemption G to section 4(c)(8) of the BHC Act, which authorizes those bank holding companies that engaged, with Board approval, in insurance agency activities prior to 1971, to engage, or control a company engaged, in insurance agency activities. 12 U.S.C. § 1843(c)(8)(G). The record indicates that First Bank System has been engaged in general insurance agency activities in the state of Minnesota on a continuous basis since receiving Board approval in 1959, and is one of 16 companies that qualify for exemption G.⁸ Protestants claim, however, that as a result of this proposal a new bank holding company is being created that would not be entitled to exercise the grandfather rights of First Bank System.

The Board has considered carefully the arguments made by Protestants and concludes that facts and circumstances do not support Protestants' arguments that First Bank System would cease to exist under this proposal. As noted above, the structure of the proposal is a merger of Suburban into First Bank System, with First Bank System continuing to exist as the surviving corporation. First Bank System will continue to operate under the same corporate charter following consummation. The much larger size of First Bank System, with approximately \$26 billion in assets, relative to the size of Suburban, with approximately \$60 million in assets, reflects a bona fide acquisition by First Bank System of Suburban.

In addition, the Board notes that the acquisition of Suburban would not expand First Bank System's authority to engage in insurance activities under exemption G, since First Bank System currently has authority to engage in insurance agency activities at the locations in which Suburban operates, or other locations in the United States.⁹ The Board notes that the Board's original approval in 1959 gave First Bank System authority to engage in insurance agency activities at all of its bank subsidiaries in Minnesota.¹⁰

Based on the structure of the proposal, the relative size of the two institutions involved, the continuation of First Bank System's charter, and all the other facts of record indicating that the essential characteristics of First Bank System will continue to exist, the Board concludes that this proposal would not result in the

nizes the competitive effects of limited purpose lenders and other non-depository financial entities.

⁶ If 50 percent of the deposits controlled by thrift institutions were included in the calculation of market concentration, First Bank System and Suburban would control 38.7 percent and 0.3 percent of total market deposits, respectively. The HHI would increase by 21 points to 2005 upon consummation of this proposal.

formation of a new bank holding company or the loss of First Bank System's exemption G rights.¹¹

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. The acquisition shall not be consummated before the thirtieth calendar day following the effective date of this Order or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Minneapolis, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 21, 1988

Voting for this action: Chairman Greenspan and Governors Angell, Heller, Kelley, and LaWare. Absent and not voting: Governors Johnson and Seger.

JAMES MCAFEE
Associate Secretary of the Board

Security Pacific Corporation
Los Angeles, California

Order Approving Acquisition of a Bank Holding Company

Security Pacific Corporation, Los Angeles, California ("Security Pacific"), a bank holding company within the meaning of the Bank Holding Company Act (the "BHC Act") (12 U.S.C. § 1842(a)(3)), has applied for the Board's approval under section 3(a)(3) of the BHC Act to acquire 100 percent of the outstanding voting shares of Nevada National Bancorporation, Reno, Nevada ("Nevada National"), and thereby indirectly to acquire Nevada National Bank, Reno, Nevada.

Notice of the application, affording interested persons an opportunity to submit comments, has been published (53 *Federal Register* 36,638 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the BHC Act.

The Douglas Amendment to the BHC Act prohibits the Board from approving an application by a bank holding company to acquire a bank located outside the bank holding company's home state, unless such acquisition is "specifically authorized by the statute laws

of the state in which such bank is located, by language to that effect and not merely by implication."¹

Effective December 31, 1988, the Nevada interstate banking statute will permit out-of-state bank holding companies to acquire established Nevada banks and bank holding companies.² Security Pacific will not acquire Nevada National until after December 31, 1988. The Nevada Commissioner of Financial Institutions has approved Security Pacific's proposal pursuant to the Nevada statute. In light of the foregoing, the Board has determined that its approval of the proposal is not prohibited by the Douglas Amendment.

Security Pacific operates 10 banking subsidiaries located in California, Washington, Oregon, Arizona, Alaska, and New York. Security Pacific is the third largest banking organization in California, controlling deposits of \$27.1 billion, representing 13.8 percent of the total deposits in commercial banks in California.³ Nevada National is the fourth largest commercial banking organization in Nevada, controlling deposits of \$516.8 million, representing 8.5 percent of total deposits in commercial banks in the state. Consummation of the proposal would not have any significant adverse effect upon the concentration of banking resources in California or Nevada.

Security Pacific and Nevada National do not compete directly in any banking market. Accordingly, consummation of the proposal would not eliminate any significant existing competition in any relevant banking market. Consummation also would not have any significant adverse effect on probable future competition in any relevant banking market.

The financial and managerial resources of Security Pacific, Nevada National, and their subsidiaries are consistent with approval. Considerations relating to the convenience and needs of the communities to be served by Security Pacific's and Nevada National's subsidiary banks are also consistent with approval.

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. This transaction shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or

¹¹ Protestants also requested the Board to order new publication of notice of the application to permit public comment on the entry of a new bank holding company into insurance activities. Because the Board has concluded that no new bank holding company is being formed as a result of the proposal, the Board has determined there is no basis for ordering republication of notice in this case.

¹ 12 U.S.C. § 1842. A bank holding company's home state for purposes of the Douglas Amendment is that state in which the total deposits of its banking subsidiaries were largest on July 1, 1966, or on the date it became a bank holding company, whichever date is later. Security Pacific's home state is California.

² Nev. Rev. Stat. Ann. § 666.335 (Michie 1986) (Effective December 31, 1988. Expires by limitation July 1, 1990). Nevada National was in operation on July 1, 1985, as required by the statute. *Id.*

³ Deposit data are as of June 30, 1987.

by the Federal Reserve Bank of San Francisco, acting pursuant to delegated authority

By order of the Board of Governors, effective December 5, 1988

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Kelley, and LaWare. Absent and not voting: Governors Angell and Heller.

JAMES MCAFEE
Associate Secretary of the Board

SouthTrust Corporation
Birmingham, Alabama

Order Approving the Acquisition of a Bank Holding Company

SouthTrust Corporation, Birmingham, Alabama ("SouthTrust"), a bank holding company within the meaning of the Bank Holding Company Act (the "Act") (12 U.S.C. § 1841 *et seq.*), has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire at least 80 percent of the voting shares of The Wiregrass Bank & Trust Company, Headland, Alabama ("Wiregrass").

Notice of the application, affording interested persons an opportunity to submit comments, has been duly published (53 *Federal Register* 37,053 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act.

SouthTrust is the second largest commercial banking organization in Alabama, controlling total deposits of approximately \$4.3 billion, representing 17.9 percent of the total deposits in commercial banking organizations ("total bank deposits") in the state.¹ Wiregrass is the 96th largest commercial banking organization in Alabama, controlling deposits of \$17.4 million, representing 0.07 percent of the total bank deposits in the state. Consummation of this proposal would not have any significant adverse effect on the concentration of banking resources in Alabama.

Wiregrass and a subsidiary bank of SouthTrust compete directly in the Dothan, Alabama, banking market.² In this market, SouthTrust's subsidiary bank, SouthTrust Bank of Dothan, N.A., Dothan, Alabama, is the largest bank, with deposits of \$274.8 million, representing 44.15 percent of deposits in commercial

banks in the market. Wiregrass is the seventh largest banking organization, with deposits of \$18.4 million, representing 2.95 percent of market deposits. The Dothan market is highly concentrated, with the four largest commercial banks controlling 82.91 percent of the total bank deposits in the market. Upon consummation, SouthTrust would remain the largest commercial banking organization in the market, controlling \$293.1 million in deposits, or 47.1 percent of market deposits. The four-firm concentration ratio would increase 2.95 points to 85.86 percent. The market would be considered highly concentrated after consummation of the proposed transaction, with the Herfindahl-Hirschman Index ("HHI") increasing 260 points to 2881.³

Although consummation of this proposal would eliminate some existing competition between SouthTrust and Wiregrass in the Dothan banking market, numerous other commercial banks would continue to operate in the market after consummation of this proposal. In addition, the Board has considered the presence of thrift institutions in this market. The Board has previously indicated that thrift institutions have become, or have the potential to become, major competitors of commercial banks.⁴ In the Dothan market, thrift institutions account for a significant percentage of the total deposits.⁵ Based upon the size and market share of thrift institutions, the Board has concluded that thrift institutions exert a significant competitive influence that mitigates the anticompetitive effects of this proposal in this banking market.⁶

On the basis of the foregoing and other facts of record, the Board concludes that consummation of this proposal would not have a significantly adverse

3 Under the revised Department of Justice Merger Guidelines, 49 *Federal Register* 26,823 (June 29, 1984), a market in which the post-merger HHI is above 1800 is considered highly concentrated. In such markets, the Justice Department is likely to challenge a merger that increases the HHI by more than 50 points. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by at least 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anticompetitive effects implicitly recognizes the competitive effect of limited-purpose lenders and other non-depository financial entities.

4 *National City Corporation*, 70 *FEDERAL RESERVE BULLETIN* 743 (1984), *The Chase Manhattan Corporation*, 70 *FEDERAL RESERVE BULLETIN* 529 (1984), *NCNB Bancorporation*, 70 *FEDERAL RESERVE BULLETIN* 225 (1984), *General Bancshares Corporation*, 69 *FEDERAL RESERVE BULLETIN* 802 (1983), and *First Tennessee National Corporation*, 69 *FEDERAL RESERVE BULLETIN* 298 (1983).

5 Thrift institutions control nearly 25 percent of the combined deposits of banks and thrifts in the Dothan banking market. Market deposit data for thrift institutions are as of June 30, 1987.

6 If 50 percent of deposits held by thrift institutions in the Dothan banking market were included in the calculation of market concentration, SouthTrust's pro forma market share would be 40.65 percent. The HHI would increase by 193 points to 2311.

1 State banking data are as of December 31, 1987. Market deposit data are as of June 30, 1987.

2 The Dothan banking market is approximated by the following areas in Alabama: Houston County, Midland City and Grimes in Dale County, and Headland and Newville in Henry County.

effect on existing competition in the Dothan banking market

The financial and managerial resources of SouthTrust and Wiregrass are considered satisfactory and consistent with approval. Further, the Board concludes that convenience and needs of the communities to be served are consistent with approval of this application.

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. The acquisition of Wiregrass shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 5, 1988

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Kelley, and LaWare. Absent and not voting: Governors Angell and Heller.

JAMES MCAFEE
Associate Secretary of the Board

Orders Issued Under Section 4 of the Bank Holding Company Act

BankAmerica Corporation
San Francisco, California

Order Approving Application to Execute and Clear Futures Contracts on Stock Indexes and a Municipal Bond Index and Options on such Futures Contracts

BankAmerica Corporation, San Francisco, California ("BankAmerica"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied pursuant to section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) for its wholly owned subsidiary, BA Futures, Incorporated, San Francisco, California ("BA Futures"), to engage *de novo* in the execution and clearance, on major commodity exchanges, of futures contract on stock indexes, a futures contract on a municipal bond index, and options on such futures contracts.

BA Futures proposes to execute and clear

(1) the Standard & Poor's 500 Stock Price Index futures contract ("S&P 500"), the Standard & Poor's 100 Stock Price Index futures contract ("S&P 100"), and options on the S&P 500 futures contract, which are traded on the Chicago Mercantile Exchange,

(2) the Bond Buyer Municipal Bond Index futures contract, the Major Market Index futures contract, and options on the Bond Buyer Municipal Bond Index futures contract, all of which are traded on the Chicago Mercantile Exchange,

(3) the New York Stock Exchange Composite Index futures contract, which is traded on the New York Futures Exchange, a subsidiary of the New York Stock Exchange,

(4) the Financial Times Stock Index futures contract, which is traded on the London International Financial Futures Exchange, and

(5) the Nikkei Stock Average futures contract, which is traded on the Singapore International Monetary Exchange.

Notice of the application, affording interested persons an opportunity to submit comments on the proposed activities has been duly published (53 *Federal Register* 44,666 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

BankAmerica, with total consolidated assets of \$95 billion, is the largest banking organization in California.¹ BankAmerica operates two subsidiary banks and engages through certain of its subsidiaries in a variety of nonbanking activities. BA Futures is a futures commission merchant ("FCM") registered with the Commodity Futures Trading Commission ("CFTC") that engages in the execution and clearance of futures contracts and options on futures contracts for bullion, foreign exchange, government securities, certificates of deposit, and other money market instruments that a bank may buy or sell in the cash market for its own account, pursuant to section 225.25(b)(18) of the Board's Regulation Y, 12 C.F.R. § 225.25(b)(18).²

The Board has previously determined that the execution and clearance of futures contracts and options on futures contracts based on stock indexes and on a municipal bond index are closely related to banking (*J.P. Morgan & Co. Incorporated*, 71 *FEDERAL RESERVE BULLETIN* 251 (1985), and *Northern Trust Corporation*, 74 *FEDERAL RESERVE BULLETIN* 333 (1988)). The proposed activities of BA Futures are essentially identical to those activities previously approved by the Board.³ Accordingly, the Board concludes that

¹ As of September 30, 1988.

² In March 1984, the Federal Reserve Bank of San Francisco, acting pursuant to delegated authority under 12 C.F.R. § 225.23(a)(1), authorized BA Futures to engage in the above activities.

³ The Board has previously approved under section 4(c)(8) the execution and clearance of futures contracts and options on those

BankAmerica's proposed activities are closely related to banking

Under section 4 of the BHC Act, the Board is also required to determine that the performance of the proposed activities by the applicant "can reasonably be expected to produce benefits to the public that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" 12 U S C § 1843(c)(8)

Consummation of BankAmerica's proposal would provide added convenience to its customers. In addition, the Board expects that the *de novo* entry of BankAmerica into the market for these services would increase the level of competition among providers of these services already in operation. Accordingly, the Board concludes that the performance of the proposed activities by BankAmerica can reasonably be expected to provide benefits to the public.

Moreover, there is no evidence in the record that consummation of the proposed FCM activities would result in any adverse effects such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. In addition, the Board has taken into account and has relied on the regulatory framework established pursuant to law by the CFTC for the trading of futures.

The financial and managerial resources and future prospects of Applicant are considered consistent with approval. Based upon consideration of all the relevant facts, the Board concludes that the balance of the public interest factors that it is required to consider under section 4(c)(8) is favorable. Accordingly, based on all the facts or record, and subject to the conditions in this Order, the Board has determined that the proposed application should be, and hereby is approved. This determination is subject to all of the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b)(3) (12 C F R §§ 225.4(d) and 225.23(b)(3)), and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the

futures contracts on all of the indexes being applied for by BankAmerica with the exception of the Financial Times futures contract and the Nikkei futures contract. The Board has however permitted bank holding companies to execute and clear the Financial Times futures contract and the Nikkei futures contract pursuant to Regulation K (12 C F R Part 211). Board letters, dated August 6, 1984 and January 27, 1986. These contracts have essentially the same terms and serve the same functions as the futures contracts for which execution and clearance has been previously approved by Board order. Therefore, the Board has determined that the execution and clearance of futures contracts on these additional indexes is closely related to banking

BHC Act and the Board's regulations and orders thereunder

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of San Francisco, pursuant to delegated authority.

By order of the Board of Governors, effective December 13, 1988

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Heller, Kelley, and LaWare. Absent and not voting: Governor Angell.

JAMES MCAFEE
Associate Secretary of the Board

Bank of Boston Corporation Boston, Massachusetts

Order Approving the Acquisition of Factoring Assets

Bank of Boston Corporation, Boston, Massachusetts ("Bank of Boston"), a bank holding company within the meaning of the Bank Holding Company Act (the "Act") (12 U S C § 1841 *et seq.*), has applied for the Board's approval under section 4(c)(8) of the Act and section 225.23(a)(2) of the Board's Regulation Y (12 C F R § 225.23(a)(2)) to acquire all of the factoring assets and assume related liabilities of First Union Commercial Corporation, Charlotte, North Carolina ("First Union"). First Union engages in commercial financing and factoring activities, primarily for the furniture, textile, apparel, and carpet industries. Factoring activities have previously been determined by the Board to be closely related to banking and permissible for bank holding companies or their subsidiaries (12 C F R § 225.25(b)(1)(v)).

Notice of the application, affording interested persons an opportunity to submit comments and views, has been duly published (53 *Federal Register* 46,660 (1988)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors specified in section 4(c)(8) of the Act.

Bank of Boston, with consolidated assets of approximately \$34.2 billion,¹ operates four subsidiary banks in Massachusetts, Connecticut, Maine and Rhode Island.² Bank of Boston also engages through its

¹ Asset data are as of September 30, 1988.

² On November 30, 1988, the Board approved the application of Bank of Boston Corporation to acquire BankVermont Corporation, Burlington, Vermont. This transaction has not yet been consummated and the asset data regarding Bank of Boston do not reflect this acquisition.

nonbank subsidiaries in various nonbanking activities, such as mortgage banking, trust activities, leasing, investment advisory services, and underwriting and dealing in municipal revenue bonds, commercial paper and consumer-receivable related securities

Bank of Boston controls indirectly BancBoston Financial Company ("BBFC"), Boston, Massachusetts, which engages in factoring activities world-wide. Through BBFC, Bank of Boston controls the eighth largest factoring operation in the United States, with year-end 1987 receivables of \$2.96 billion, representing 6.57 percent of the market for factoring in the United States.³

First Union is the eighteenth largest factoring operation in the United States, with year-end 1987 receivables of \$615 million, representing 1.36 percent of the market for factoring services in the United States. First Union provides factoring services primarily in North Carolina, South Carolina and New York through offices located in Charlotte, North Carolina and New York, New York. Upon consummation of this proposal, Bank of Boston would control the sixth largest factoring operation in the United States, with a 7.93 percent market share.

The Board has previously stated that the market for factoring services is nationwide. The market is considered unconcentrated, with a four-firm concentration ratio of 38.0 percent. The Herfindahl-Hirschman Index ("HHI") of the market is 705 and would increase by 18 points to 723 upon consummation of this proposal.⁴ Although the acquisition of First Union would eliminate some existing competition between Bank of Boston and First Union, numerous other factors continue to operate in the market and the market would remain unconcentrated. Accordingly, consummation of this proposal would not have a significant adverse effect on competition in the factoring market.

There is no evidence in the record that consummation of this proposal would result in adverse effects, such as unsound banking practices, unfair competition, conflicts of interest, or an undue concentration of resources. Financial and managerial resources also are consistent with approval of this application.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors that the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved.

³ Market data are as of December 31, 1987.

⁴ Under the revised Department of Justice Merger Guidelines (49 *Federal Register* 26,823 (June 29, 1984)), any market in which the post-merger HHI is below 1000 is considered unconcentrated, and the Department will not challenge a merger with a post-merger HHI below 100, except in extraordinary circumstances.

This determination is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be consummated not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston, pursuant to delegated authority.

By order of the Board of Governors, effective December 21, 1988

Voting for this action: Chairman Greenspan and Governors Angell, Heller, Kelley and LaWare. Absent and not voting: Governors Johnson and Seger.

JAMES MCAFEE
Associate Secretary of the Board

Barnett Banks, Inc.
Jacksonville, Florida

Order Approving Acquisition of a Federal Savings Bank

Barnett Banks, Inc., Jacksonville, Florida ("Barnett"), a bank holding company within the meaning of the Bank Holding Company Act (the "BHC Act") (12 U.S.C. § 1841 *et seq.*), has applied pursuant to section 4(c)(8) of the BHC Act and section 225.23 of the Board's Regulation Y (12 C.F.R. § 225.23), to acquire all of the voting shares of Barnett Federal Savings Bank ("Barnett Federal"), a *de novo* federal savings bank formed to acquire substantially all of the assets and certain liabilities of First Federal Savings and Loan Association of Columbus, Columbus, Georgia ("First Federal"), an insolvent thrift institution.¹ Upon consummation of the proposed acquisition, Barnett Federal will operate as a federal savings bank in Georgia.²

¹ First Federal is currently operated as a federal stock savings and loan association and will be placed into receivership by the Federal Savings and Loan Insurance Corporation (the "FSLIC"). Immediately thereafter, Barnett Federal will acquire substantially all of the assets, as well as the secured, deposit and certain tax claim liabilities of First Federal, from the FSLIC as receiver for First Federal. FSLIC will also provide financial assistance for the acquisition.

² Barnett Federal will be operated as a wholly owned subsidiary of First City Bancorp, Inc., Marietta, Georgia, which is a wholly owned subsidiary of Suncoast Bancorp, Inc., Vero Beach, Florida, which, in turn, is a wholly owned subsidiary of Barnett.

Barnett, with total consolidated assets of \$24.5 billion, is the largest commercial banking organization in Florida.³ It operates 34 banking subsidiaries and engages in numerous nonbanking activities, including trust company functions, check-guaranty services, discount securities brokerage, and permissible credit related insurance activities.

First Federal, with total assets of \$265.8 million, is the eleventh largest savings institution in Georgia, and operates one office in the state.

By letter dated December 27, 1988, the Federal Home Loan Bank Board ("Bank Board") requested that the Board approve this application to acquire Barnett Federal under the Bank Board's Expedited Case Processing Program for failing thrift institutions. The Bank Board urged the Board to approve this application in order to restore public confidence, maintain confidence in the savings and loan industry generally, and stabilize the daily increasing potential cost to the FSLIC. The Bank Board based its request on the insolvent condition of First Federal as well as on the substantial public benefits of the proposal, including the significant and stabilizing capital injections proposed by Barnett and the FSLIC.

In light of the condition of First Federal, the Board promptly caused notice of the application to be published in the *Federal Register* (53 *Federal Register* 49,228 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.⁴

Section 4(c)(8) of the BHC Act authorizes a bank holding company to engage in, or acquire and retain a company that engages in, activities determined by the Board to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has determined previously that the operation of a thrift institution is closely related to

banking, and reaffirms that determination in this Order.⁵

In *D H Baldwin & Co*,⁶ however, the Board determined that, as a general matter, the operation of a savings and loan association is not a proper incident to banking because the potential adverse effects of generally allowing affiliations of banks and thrift institutions were not outweighed by the potential public benefits. In individual cases involving failing thrifts, the Board has found that the balance of public benefits was favorable on the basis that the adverse effects of the affiliation would be overcome by the public benefits of preserving the failing thrift institution as a competitive entity in the market and ensuring public confidence.⁷ The 1982 Garn-St Germain Act recognized the Board's authority under section 4(c)(8) of the BHC Act to approve such acquisitions by authorizing the Board in these cases to dispense with the usual notice and hearing requirements of section 4(c)(8) under appropriate emergency circumstances.

Based upon the Board's review of the record, the Board has determined that there are substantial benefits to the public in this case that outweigh the generalized adverse effects found by the Board in the *D H Baldwin* case. In particular, under the proposal, Barnett Federal will have the financial and managerial resources to continue to provide service to the convenience and needs of the customers and community served by First Federal.

As the Board previously has noted, bank holding companies contemplating expansion proposals are expected to maintain consolidated capital levels significantly above the minimums set forth in the Board's Capital Adequacy Guidelines and without undue reliance on intangibles, particularly goodwill. In that regard, Barnett is an adequately capitalized institution, and, because this transaction will have a *de minimis* effect on its financial condition, it will remain so on a consolidated basis upon consummation of the proposal. Moreover, in accordance with its prior rulings in this area, the Board expects that Barnett will cause Barnett Federal to achieve and maintain levels of capital consistent with those applying to banking

³ Asset data are as of September 30, 1988.

⁴ The Board received a protest to the proposal alleging an unfairness in the Bank Board's bidding procedure in favor of out-of-state institutions as well as an inability on Barnett's part to acquire First Federal directly under applicable law. As the Board has previously held, the Board's consideration of the effects of a proposal involving a bank holding company acquisition under the prudential standards of section 4(c)(8), which involve an evaluation of the possible adverse effects and anticipated public benefits of the proposal, does not include a review of the FSLIC's selection of the appropriate bidder for the failing thrift. *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724, 728 (1986); *Citicorp*, 68 FEDERAL RESERVE BULLETIN 656, 668 (1982). That decision is committed to the discretion of the FSLIC. With regard to protestant's second contention, the Board notes that Barnett could acquire First Federal directly under applicable law. Accordingly, and in light of the facts of record in this case, the Board concludes that protestant's comments do not warrant denial of this application.

⁵ See, e.g., *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724 (1986), *First Pacific Investments Limited*, 72 FEDERAL RESERVE BULLETIN 342 (1986), *FNB Corporation*, 71 FEDERAL RESERVE BULLETIN 340 (1985).

⁶ *D H Baldwin & Co*, 63 FEDERAL RESERVE BULLETIN 280 (1977). The Board has invited public comment on a proposal to reexamine this position. 52 *Federal Register* 36,041 (1987).

⁷ See, e.g., *FNB Corporation*, *supra*, *The Chase Manhattan Corporation*, 71 FEDERAL RESERVE BULLETIN 462 (1985), *Interstate Financial Corp*, 68 FEDERAL RESERVE BULLETIN 316 (1982).

organizations generally as soon as possible, and in any case within one year ⁸

First Federal operates in the Columbus Area banking market ⁹ Barnett does not control a depository institution in that market. Accordingly, the Board has determined that consummation of this proposal would not have a significant adverse effect on competition. In addition, the Board concludes that consummation of this proposal would not have a significant adverse effect on probable future competition in any relevant market.

To guard against possible adverse effects of affiliation between a banking organization and a savings and loan association, the Board conditions its approval as follows:

1 Barnett will operate Barnett Federal as a federal savings bank having as its primary purpose the provision of residential housing credit. Barnett Federal will limit its activities to those currently permitted to thrift institutions under the Home Owners' Loan Act, but shall not engage in any activity prohibited to bank holding companies and their subsidiaries under section 4(c)(8) of the BHC Act ¹⁰

2 Barnett Federal will not establish or operate a remote service unit at any location outside of Georgia.

3 Barnett Federal will not establish or operate branches at locations not permissible for national banks located in Georgia.

4 Barnett shall not change Barnett Federal's name to any title that might confuse the public regarding its status as a nonbank thrift institution ¹¹

5 Barnett Federal will not convert its charter to that of a national or state commercial bank without the Board's prior approval.

The Board concludes that consummation of the proposal, subject to the conditions set out above, would not result in conflicts of interests, unsound banking practices, decreased or unfair competition, undue concentration of resources, or other adverse effects.

⁸ See *First Bancorporation of Ohio*, 74 FEDERAL RESERVE BULLETIN 817 (1988).

⁹ The Columbus Area banking market is approximated by Chatahoochee and Muskogee Counties in Georgia, Russell County, Alabama, and the city of Smiths in Lee County, Alabama.

¹⁰ These limitations also apply to First Federal's wholly owned subsidiary, First Columbus Service Corporation, Columbus, Georgia ("Company"), which is primarily engaged in the sale of real estate owned by the company. Barnett has committed that Company will engage in only those real estate activities permissible under the BHC Act and the Board's Regulation Y. Barnett has also committed that Company will discontinue any impermissible activities within two years after consummation of the proposed transaction.

¹¹ See *Barnett Banks, Inc.*, 75 FEDERAL RESERVE BULLETIN (Order dated December 5, 1988).

Based upon the foregoing and other facts and circumstances reflected in the record, the Board has determined that the acquisition of Barnett Federal by Barnett would result in substantial and compelling public benefits that are sufficient to outweigh any adverse effects that may reasonably be expected to result from this proposal. Accordingly, the application is approved subject to the conditions described in this Order, and the record of the application.

The Board's decision in this case is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. This transaction shall not be consummated later than three months after the effective date of this Order, unless that period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta, pursuant to delegated authority.

By order of the Board of Governors, effective December 27, 1988.

Voting for this action: Chairman Greenspan and Governors Angell, Heller, Kelley, and LaWare. Absent and not voting: Governors Johnson and Seger.

WILLIAM W. WILES
Secretary of the Board

Barnett Banks, Inc.
Jacksonville, Florida

Order Approving Acquisition of a Federal Savings Bank

Barnett Banks, Inc., Jacksonville, Florida ("Barnett"), a bank holding company within the meaning of the Bank Holding Company Act (12 U.S.C. § 1841 *et seq.*) (the "BHC Act"), has applied pursuant to section 4(c)(8) of the BHC Act and section 225.23 of the Board's Regulation Y (12 C.F.R. § 225.23), to acquire all of the voting shares of the successor to First Federal Savings and Loan Association, Summerville, Georgia ("First Federal"), an insolvent thrift institution.¹ Upon consummation of the proposed acquisition, First Federal will operate as a federal savings bank in Georgia.²

¹ Under Barnett's proposal, the assets and liabilities of First Federal will be transferred to the FSLIC as receiver, and then to a newly-formed federal savings bank.

² Through its acquisition of First Federal, Barnett will also indirectly acquire First Federal's wholly owned insurance agency.

Barnett, with total consolidated assets of \$24.2 billion, is the largest commercial banking organization in Florida.³ It operates 34 banking subsidiaries and engages in numerous nonbanking activities, including trust company functions, check-guaranty services, discount securities brokerage, and permissible credit related insurance activities.

First Federal, with total assets of \$41.4 million, is the fifty-eighth largest savings institution in Georgia. First Federal operates one office in Summerville, Georgia.

By letter dated December 2, 1988, the Federal Home Loan Bank Board ("Bank Board") requested that the Board act immediately upon the application in view of the emergency nature of the situation at First Federal, its deteriorating financial condition, the need to restore public confidence in First Federal, and in order to stabilize the increasing potential cost to the FSLIC.⁴

In light of the condition of First Federal, the Board promptly caused notice of the application to be published in the *Federal Register*⁵ and determined that a shortened public comment period was necessary.⁶ The time for filing comments has expired and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.⁷

Section 4(c)(8) of the BHC Act authorizes a bank holding company to engage or acquire a company that engages in activities determined by the Board to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The

Board has determined previously that the operation of a thrift institution is closely related to banking, and reaffirms that determination in this Order.⁸

In *D H Baldwin & Co*,⁹ however, the Board determined that, as a general matter, the operation of a savings and loan association is not a proper incident to banking because the potential adverse effects of generally allowing affiliations of banks and thrift institutions were not outweighed by the potential public benefits. In individual cases involving failing thrifts the Board has found that the balance of public benefits was favorable on the basis that the adverse effects of the affiliation would be overcome by the public benefits of preserving the failing thrift institution as a competitive entity in the market and ensuring public confidence.¹⁰ The 1982 Garn-St Germain Act recognized the Board's authority under section 4(c)(8) of the BHC Act to approve such acquisitions by authorizing the Board in these cases to dispense with the usual notice and hearing requirements of section 4(c)(8) under appropriate emergency circumstances.

Based upon the Board's review of the record, the Board has determined that there are substantial benefits to the public in this case that outweigh the generalized adverse effects found by the Board in *D H Baldwin*. In particular, Barnett's acquisition of First Federal will provide First Federal with the financial and managerial resources to enable it to continue its operations and its service to the convenience and needs of its community.

As the Board previously has noted, bank holding companies contemplating expansion proposals are expected to maintain consolidated capital levels significantly above the minimums set forth in the Board's Capital Adequacy Guidelines and without undue reliance on intangibles, particularly goodwill. In that regard, Barnett is a strongly capitalized institution, and will remain so on a consolidated basis upon consummation of the proposal. Moreover, in accordance with its prior rulings in this area, the Board expects that Barnett will cause First Federal to achieve and maintain levels of capital consistent with those applying to banking organizations generally.

subsidiary, Summerville Service, Inc., Summerville, Georgia ("Company"). Barnett has committed that Company will engage in only those insurance activities permissible under the Board's Regulation Y.

3 Asset data are as of June 30, 1988.

4 The Bank Board has indicated that First Federal has incurred significant operating losses over a prolonged period, and has negative capital of \$3.68 million, as of June 30, 1988.

5 Notice of the application, providing an opportunity for interested third parties to submit comments, was also published in newspapers of general circulation in Summerville and Atlanta, Georgia, and Jacksonville, Florida.

6 The Board is authorized by statute to waive or shorten the usual notice and comment period under section 4 in the case of failing thrift acquisitions, if the Board, with the concurrence of the primary Federal regulator of the thrift being acquired, determines that an emergency exists which requires the Board to act immediately on the application. 12 U.S.C. § 1843(c)(8), 12 C.F.R. § 225.23(i). The FHLBB has concurred in the Board's finding that an emergency exists requiring immediate action.

7 The Board received one comment on the application, from Farmers & Merchants Bank, Summerville, Georgia ("F&M"). F&M argued that Barnett's acquisition of First Federal would result in decreased competition in the Chattooga Area banking market. As discussed below, the Board has considered the effect on competition of the proposal, and concluded that consummation of the proposal would not have a significant adverse effect on competition in the relevant market. Indeed, the proposal would have a beneficial impact on competition by ensuring the continued operation of First Federal as a viable institution.

8 See, e.g., *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724 (1986), *First Pacific Investments Limited*, 72 FEDERAL RESERVE BULLETIN 342 (1986), *FNB Corporation*, 71 FEDERAL RESERVE BULLETIN 340 (1985), *Old Stone Corporation*, 69 FEDERAL RESERVE BULLETIN 812 (1983), *Interstate Financial Corp.*, 68 FEDERAL RESERVE BULLETIN 316 (1982), *D H Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977).

9 *D H Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977). The Board has invited public comment on a proposal to reexamine this position. 52 *Federal Register* 36,041 (1987).

10 See, e.g., *FNB Corporation*, *supra*, *The Chase Manhattan Corporation*, 71 FEDERAL RESERVE BULLETIN 462 (1985), *Interstate Financial Corp.*, *supra*.

First Federal operates in the Chattooga Area banking market.¹¹ Barnett does not control a depository institution in that market. Accordingly, the Board has determined that consummation of this proposal would not have a significant adverse effect on competition.

To guard against possible adverse effects of affiliation between a banking organization and a savings bank, the Board conditions its approval as follows:

1 Barnett will operate First Federal as a federal savings bank having as its primary purpose the provision of residential housing credit. First Federal will limit its activities to those currently permitted to thrift institutions under the Home Owners' Loan Act, but shall not engage in any activity prohibited to bank holding companies and their subsidiaries under section 4(c)(8) of the BHC Act.

2 First Federal will not establish or operate a remote service unit at any location outside of Georgia.

3 First Federal will not establish or operate branches at locations not permissible for national or state banks located in Georgia.

4 Barnett shall not change First Federal's name to any title that might confuse the public regarding its status as a nonbank thrift institution.

5 First Federal will not convert its charter to that of a national or state commercial bank without the Board's prior approval.

Barnett has requested that the Board not limit the branching ability of First Federal to that permitted a commercial bank in Georgia. Under Georgia law, banks generally may only branch within their home counties. Ga. Code Ann. §§ 7-1-601 (1988).¹² In this case, the Georgia Department of Banking and Finance has conditioned its approval of Barnett's acquisition on a requirement that First Federal not branch beyond those areas permissible for commercial banks in Georgia.

In enacting the emergency thrift acquisition provisions of the 1982 Garn-St Germain Act, Congress imposed a series of restrictions and limitations on the operation of thrift institutions acquired by bank holding companies with federal assistance, including a limitation that the acquired thrift "may retain and operate any existing branch or branches—but otherwise shall be subject to the conditions upon which a national bank may establish and operate branches in the state in which the thrift is located."¹³ 12 U.S.C. § 1730a(m)(5)(A). The Bank Board has chosen not to

process this application under the emergency thrift acquisition provisions of the Garn-St Germain Act, but under another provision of the Savings and Loan Holding Company Amendments ("S&LHC Act") (12 U.S.C. § 1729(f)).

While the branching restriction may not be required under the S&LHC Act, the Board believes that it continues to be appropriate under the BHC Act. Commencing in 1982 (prior to the enactment of the Garn-St Germain Act) and continuing to the present, the Board has allowed emergency thrift acquisitions as an exception to its *D H Baldwin* doctrine under certain limitations, including the branching restriction noted above. The branching restriction was established in order to minimize the impact of bank holding company thrift acquisitions on the authority of a state to limit the expansion of financial institutions within its borders. The Board was also concerned with the competitive impact bank holding company thrift acquisitions could have on local commercial banking organizations, which, unlike thrift institutions, could be limited in their ability to branch. That concern is heightened where federal assistance has been provided to the bank holding company in order to facilitate its acquisition of the thrift.

The legislative history of the 1982 Garn-St Germain Act evidences a clear Congressional policy of promoting competitive equality between branches of thrifts acquired by banks with federal assistance and branches of commercial banks.¹³ Accordingly, Congress established specific policies for handling federally assisted emergency thrift acquisitions by bank holding companies, such as this, that limit the acquired thrift's branching. The Board finds no compelling reason to deviate from those policies in this case.

Barnett also has proposed to rename First Federal "Barnett Bank, a Federal Savings Bank." In that regard, Barnett has applied to acquire and operate First Federal as a thrift and not as a bank. The Board has, however, required in previous thrift acquisitions that any name proposed for an acquired thrift not blur the distinction between banking and nonbanking subsidiaries of bank holding companies.

The Board does not believe that this case presents any facts which would justify departing from past practice, particularly in view of the fact that Barnett

¹¹ The Chattooga Area banking market is approximated by Chattooga and Floyd Counties in Georgia.

¹² A federally-chartered thrift institution is not limited in its branching power in Georgia.

¹³ See, e.g., *Financial Institutions Restructuring and Services Act of 1981 Hearings on S 1686, S 1703, S 1720, and S 1721 Before the Senate Committee on Banking, Housing, and Urban Affairs, 97th Cong. 1st Sess. 215 (1981)*. "This [branching restriction] assures the acquiring institution will not gain competitive advantage over a bank or bank holding company, because it has acquired an institution which has greater branching powers" (Remarks of Mr. Bianchi, President, Conference of State Bank Supervisors). See also *id.* at 309, 386-387, and S. Rep. No. 97-536 at 6-7.

currently controls a bank subsidiary in Georgia named Barnett Bank of Atlanta. Barnett Bank of Atlanta currently operates 15 offices in Cobb and Fulton counties in Georgia. Accordingly, the Board's approval is conditioned on Barnett's not changing the name of First Federal as proposed.

The Board concludes that consummation of the proposal, subject to the conditions set out above, would not result in conflicts of interests, unsound banking practices, decreased or unfair competition, undue concentration of resources, or other adverse effects.

Based upon the foregoing and other facts and circumstances reflected in the record, the Board has determined that the acquisition of First Federal by Barnett would result in substantial and compelling public benefits that are sufficient to outweigh any adverse effects that may reasonably be expected to result from this proposal. Accordingly, the application is approved subject to the conditions described in this Order, and the record of the application.

The Board's decision in this case is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. This transaction shall not be consummated later than three months after the effective date of this Order, unless that period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta, pursuant to delegated authority.

By order of the Board of Governors, effective December 5, 1988.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, Kelley, and LaWare. Absent and not voting: Governor Heller.

JAMES MCAFEE
Associate Secretary of the Board

Concurring Statement of Governor Seger

I concur in the Board's decision to approve this application. I am concerned, however, regarding the requirement that First Federal's future branching be limited to that of a commercial bank in Georgia. I recognize that the Board has consistently imposed the branching limitation in past failing thrift acquisitions, that such limitation is required by the Garn-St Germain Act, and that the state of Georgia has chosen to limit branching by commercial banks in that state. On

the other hand, I would note that First Federal is a thrift institution and not a commercial bank, and I am concerned that the branching restriction will, in the future, diminish the attractiveness of failing thrift acquisitions for bank holding companies.

I would also allow Barnett to rename First Federal, "Barnett Bank, a Federal Savings Bank." The FHLBB has expressed the opinion that the name change is consistent with that agency's regulations. Moreover, many thrift institutions that are not owned by bank holding companies have adopted names that contain the word "bank" and that identify the thrift as a federal savings bank. In these circumstances I believe Barnett's proposed name change for First Federal is not likely to confuse the public regarding that institution's status as a thrift, and is consistent with the standards the Board must apply under the Bank Holding Company Act. Accordingly, I would approve the application and permit the name change proposed by Barnett.

December 5, 1988

Citicorp
New York, New York

Order Approving Acquisition of a Federal Savings and Loan Association

Citicorp, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act (the "BHC Act") (12 U.S.C. § 1841 *et seq.*), has applied pursuant to section 4(c)(8) of the BHC Act and section 225.23 of the Board's Regulation Y (12 C.F.R. § 225.23), for Citicorp Mortgage, Inc., St. Louis, Missouri, a wholly owned subsidiary of Citicorp, to acquire all of the voting shares of Glen Ellyn Savings and Loan Association, A Federal Savings and Loan Association, Glen Ellyn, Illinois ("Glen Ellyn").¹ Glen Ellyn is a failed thrift institution in receivership that will be merged into and operated as a branch of Citicorp Savings of Illinois, A Federal Savings and Loan Association, Chicago, Illinois ("Citicorp Savings") upon consummation of the proposed acquisition.

Citicorp, with total consolidated assets of \$209.2 billion, is the largest commercial banking organization

¹ Glen Ellyn currently operates as a mutual thrift institution and will be converted to a federal stock savings and loan association on a voluntary supervisory basis. Glen Ellyn is qualified for such a conversion under Federal Home Loan Bank Board regulations (12 C.F.R. § 563b.24), because its liabilities exceed its assets under generally accepted accounting principles and, upon consummation of the proposed transaction, Glen Ellyn will become a viable entity under 12 C.F.R. § 563b.26. Glen Ellyn will retain its Federal Savings and Loan Insurance Corporation ("FSLIC") deposit insurance.

in New York.² It presently operates nine banking subsidiaries.

Glen Ellyn, with total assets of \$713 million, is the 148th largest of 252 savings institutions in Illinois, and operates one office in the state.³

By letter dated December 16, 1988, the Federal Home Loan Bank Board ("Bank Board") requested that the Board approve this application to acquire Glen Ellyn under the Bank Board's Expedited Case Processing Program for failing thrift institutions. The Bank Board urged the Board to approve this application in order to restore public confidence in Glen Ellyn, maintain confidence in the savings and loan industry generally, and stabilize the daily increasing potential cost to the FSLIC. The Bank Board based its request on both the deteriorating and volatile condition of Glen Ellyn, as well as on the substantial public benefits of the proposal, including the significant and stabilizing capital injections proposed by Citicorp and the FSLIC.

In light of the condition of Glen Ellyn, the Board promptly caused notice of the application to be published in the *Federal Register* (53 *Federal Register* 44,666 (1988)) and determined that a shortened public comment period was necessary.⁴ The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Section 4(c)(8) of the BHC Act authorizes a bank holding company to engage in, or acquire a company that engages in, activities determined by the Board to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has determined previously that the operation of a thrift institution is closely related to banking, and reaffirms that determination in this Order.⁵

² Asset data are as of September 30, 1988.

³ Asset data are as of June 30, 1988.

⁴ The Board is authorized by statute and regulation to waive or shorten the usual notice and comment period, as well as the hearing requirements normally accorded section 4 applications, in the case of failing thrift acquisitions. Under these provisions, the Board is required to determine, with the concurrence of the primary Federal regulator of the thrift being acquired, that an emergency exists which requires the Board to act immediately on an application to acquire a failing thrift institution. 12 U.S.C. § 1843(c)(8), 12 C.F.R. § 225.23(i). The Bank Board has concurred that an emergency exists and has requested that the Board act immediately on the application.

⁵ See, e.g., *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724 (1986), *First Pacific Investments Limited*, 72 FEDERAL RESERVE BULLETIN 342 (1986), *FNB Corporation*, 71 FEDERAL RESERVE BULLETIN 340 (1985), *Old Stone Corporation*, 69 FEDERAL RESERVE BULLETIN 812 (1983), *Interstate Financial Corp.*, 68 FEDERAL RESERVE BULLETIN 316 (1982), *DH Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977).

In *DH Baldwin & Co.*,⁶ however, the Board determined that, as a general matter, the operation of a savings and loan association is not a proper incident to banking because the potential adverse effects of generally allowing affiliations of banks and thrift institutions were not outweighed by the potential public benefits. In individual cases involving failing thrifts, the Board has found that the balance of public benefits was favorable on the basis that the adverse effects of the affiliation would be overcome by the public benefits of preserving the failing thrift institution as a competitive entity in the market and ensuring public confidence.⁷ The 1982 Garn-St Germain Act recognized the Board's authority under section 4(c)(8) of the BHC Act to approve such acquisitions by authorizing the Board in these cases to dispense with the usual notice and hearing requirements of section 4(c)(8) under appropriate emergency circumstances.

Based upon the Board's review of the record, the Board has determined that there are substantial benefits to the public in this case that outweigh the generalized adverse effects found by the Board in *DH Baldwin*. In particular, Citicorp's acquisition of Glen Ellyn will provide Glen Ellyn with the financial and managerial resources to enable it to continue its operations and its service to the convenience and needs of its community.

As the Board previously has noted, bank holding companies contemplating expansion proposals are expected to maintain consolidated capital levels significantly above the minimums set forth in the Board's Capital Adequacy Guidelines and without undue reliance on intangibles, particularly goodwill. In that regard, Citicorp is an adequately capitalized institution, and, because this transaction will not result in a diminution of its capital, it will remain so on a consolidated basis upon consummation of the proposal. Moreover, in accordance with its prior rulings in this area, the Board expects that Citicorp will cause Glen Ellyn to achieve and maintain levels of capital consistent with those applying to banking organizations generally as soon as possible, and in any case within one year.⁸

The proposed acquisition would not substantially lessen or otherwise decrease competition in any relevant market. On the contrary, the acquisition would have the substantial beneficial effect of preserving

⁶ *DH Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977). The Board has invited public comment on a proposal to reexamine this position. 52 *Federal Register* 36,041 (1987).

⁷ See, e.g., *FNB Corporation*, *supra*, *The Chase Manhattan Corporation*, 71 FEDERAL RESERVE BULLETIN 462 (1985), *Interstate Financial Corp.*, *supra*.

⁸ See *First Bancorporation of Ohio*, 74 FEDERAL RESERVE BULLETIN 817 (1988).

Glen Ellyn as an effective competitor. In that regard, both Citicorp Savings and Glen Ellyn engage in deposit taking and lending activities within the Chicago, Illinois banking market.⁹ In view of Glen Ellyn's small market share, the unconcentrated nature of the market and the *de minimis* increase in concentration resulting from this proposal, the deteriorating condition of Glen Ellyn, and the fact that numerous other bank and thrift institutions would remain in the market, the Board concludes that the acquisition would have no substantial adverse effect on existing competition in the Chicago market. In addition, the Board concludes that consummation of this proposal would not have a significant adverse effect on probable future competition in any relevant market.

To guard against possible adverse effects of affiliation between a banking organization and a savings and loan association, the Board conditions its approval as follows:

- 1 Citicorp will operate Glen Ellyn as a federal savings and loan association having as its primary purpose the provision of residential housing credit. Glen Ellyn will limit its activities to those currently permitted to thrift institutions under the Home Owners' Loan Act, but shall not engage in any activity prohibited to bank holding companies and their subsidiaries under section 4(c)(8) of the BHC Act.¹⁰
- 2 Glen Ellyn will not establish or operate a remote service unit at any location outside of Illinois.
- 3 Glen Ellyn will not establish or operate branches at locations not permissible for national banks located in Illinois.
- 4 Citicorp shall not change Glen Ellyn's name to any title that might confuse the public regarding its status as a nonbank thrift institution.¹¹
- 5 Glen Ellyn will not convert its charter to that of a national or state commercial bank without the Board's prior approval.

The Board concludes that consummation of the proposal, subject to the conditions set out above,

⁹ The Chicago, Illinois banking market is approximated by Cook, DuPage and Lake counties in Illinois. Within the Chicago market, Citicorp Savings is the fifth largest depository institution among banks and thrift institutions in the market with total deposits of \$3.8 billion, representing approximately 4.0 percent of market deposits in such institutions. Glen Ellyn is the 189th largest depository institution among banks and thrifts in the market, with total deposits of \$71.0 million, representing less than one percent of the total deposits in banks and thrifts in the market. Market data are as of June 30, 1987.

¹⁰ These limitations also apply to Glen Ellyn's wholly owned subsidiary, Trust Company of Glen Ellyn ("Company"). Citicorp has committed to divest Company's real estate investments within two years from the date of consummation of this proposal, and will not undertake any new projects or investments during this period.

¹¹ See *Barnett Banks, Inc.*, 75 FEDERAL RESERVE BULLETIN (Order dated December 5, 1988).

would not result in conflicts of interests, unsound banking practices, decreased or unfair competition, undue concentration of resources, or other adverse effects.

Citicorp's previous acquisition of Citicorp Savings and its application to acquire Glen Ellyn were made pursuant to section 408(m) of the National Housing Act ("section 408(m)").¹² Section 408(m) and the Board's previous approval restrict Citicorp Savings from establishing branches in Illinois at locations not permissible for national or state banks. A recently enacted exception to Illinois bank branching restrictions provides that the main office of a bank acquired by merger with another bank may be operated as a branch of the acquiring bank.¹³ Correspondingly, Citicorp proposes to operate Glen Ellyn's only office as a branch of Citicorp Savings after Glen Ellyn is acquired by merger. The Board has requested the views of the Illinois Commissioner of Banks and Trust Companies on the permissibility of the proposal under Illinois law and has received no objections. Accordingly, the Board concludes that approval of this application is consistent with the provisions of section 408(m).

Based upon the foregoing and other facts and circumstances reflected in the record, the Board has determined that the acquisition of Glen Ellyn by Citicorp would result in substantial and compelling public benefits that are sufficient to outweigh any adverse effects that may reasonably be expected to result from this proposal. Accordingly, the application is approved subject to the conditions described in this Order and the record of the application.

The Board's decision in this case is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. This transaction shall not be consummated later than three months after the effective date of this Order, unless that period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective December 19, 1988.

¹² Section 408(m) was enacted by section 123 of the Garn-St Germain Act of 1982, and is codified at 12 U.S.C. § 1730a(m) *Citicorp*, 70 FEDERAL RESERVE BULLETIN 149, 151 (1984).

¹³ This exception provides that a "continuing bank" may "continue, maintain and operate the main banking premises and facilities of any merging bank." Ill. Ann. Stat. ch. 17, para. 311(15)(g) (Smith-Hurd, West Supp. 1988).

JAMES MCAFEE
Associate Secretary of the Board

Michigan National Corporation
Farmington Hills, Michigan

*Order Approving Acquisition of a Federal Savings
and Loan Association*

Michigan National Corporation, Farmington Hills, Michigan ("Michigan National"), a bank holding company within the meaning of the Bank Holding Company Act (the "BHC Act") (12 U S C § 1843(c)(8)), has applied pursuant to section 4(c)(8) of the BHC Act and section 225.23 of the Board's Regulation Y (12 C F R § 225.23), to acquire all of the voting shares of Beverly Hills Savings, A Federal Savings and Loan Association, Beverly Hills, California ("Beverly Hills Savings"), an insolvent thrift institution. Upon consummation of the proposal, Beverly Hills Savings will be operated as a subsidiary of Michigan National.¹

Michigan National, with assets in Michigan of \$8.4 billion, is the third largest commercial banking organization in Michigan. It presently operates four banking subsidiaries.

Beverly Hills Savings, with total assets of \$1.4 billion, is the 34th largest savings institution in California, and operates six branches in the state.²

By letter dated December 30, 1988, the Federal Home Loan Bank Board ("Bank Board") requested that the Board approve this application to acquire Beverly Hills Savings. The Bank Board urged the Board to approve this application in order to restore public confidence in Beverly Hills Savings, maintain confidence in the savings and loan industry generally, and stabilize the daily increasing potential cost to the FSLIC. The Bank Board based its request on both the deteriorating and volatile condition of Beverly Hills Savings, and on the substantial public benefits of the proposal, including the significant and stabilizing capital injections proposed by Michigan National and the FSLIC.

Section 4(c)(8) of the BHC Act authorizes a bank holding company to engage in, or acquire and retain a

company that engages in, activities determined by the Board to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has determined previously that the operation of a thrift institution is closely related to banking, and reaffirms that determination in this Order.³

In *D H Baldwin & Co.*,⁴ however, the Board determined that, as a general matter, the operation of a savings and loan association is not a proper incident to banking because the potential adverse effects of generally allowing affiliations of banks and thrift institutions were not outweighed by the potential public benefits. In individual cases involving failing thrifts, the Board has found that the balance of public benefits was favorable on the basis that the adverse effects of the affiliation would be overcome by the public benefits of preserving the failing thrift institution as a competitive entity in the market and ensuring public confidence.⁵ The 1982 Garn-St German Act recognized the Board's authority under section 4(c)(8) of the BHC Act to approve such acquisitions by authorizing the Board in these cases to dispense with the usual notice and hearing requirements of section 4(c)(8) under appropriate emergency circumstances.

After considering all the facts and circumstances in this case, the Board has concluded that an emergency situation exists at Beverly Hills Savings that requires the Board to act immediately on this application, and the Bank Board has concurred in this finding. Accordingly, the Board has, under the authority provided in section 118 of the Garn-St German Act, dispensed with the notice and hearing requirements of section 4(c)(8) with respect to this application.⁶

³ See, e.g., *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724 (1986), *First Pacific Investments Limited*, 72 FEDERAL RESERVE BULLETIN 342 (1986), *F N B Corporation*, 71 FEDERAL RESERVE BULLETIN 340 (1985), *Old Stone Corporation*, 69 FEDERAL RESERVE BULLETIN 812 (1983), *Interstate Financial Corp.*, 68 FEDERAL RESERVE BULLETIN 316 (1982), *D H Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977).

⁴ *D H Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977). The Board has invited public comment on a proposal to reexamine this position. 52 *Federal Register* 36,041 (1987).

⁵ See, e.g., *F N B Corporation*, *supra*, *The Chase Manhattan Corporation*, 71 FEDERAL RESERVE BULLETIN 462 (1985), *Interstate Financial Corp.*, *supra*.

⁶ The Board is authorized by statute and regulation to waive or shorten the usual notice and comment period, as well as the hearing requirements normally accorded section 4 applications, in the case of failing thrift acquisitions. Under these provisions, the Board is required to determine, with the concurrence of the primary Federal regulator of the thrift being acquired, that an emergency exists which requires the Board to act immediately on an application to acquire a failing thrift institution. 12 U S C § 1843(c)(8), 12 C F R § 225.23(i). The Board has waived the notice and hearing requirements of section 4(c)(8) in similar circumstances. *First Pacific Investments Limited*, *supra*, *F N B Corporation*, *supra*.

¹ Beverly Hills Savings currently operates as a mutual thrift institution and will be converted to a federal stock savings association on a supervisory basis with assistance from the Federal Savings and Loan Insurance Corporation (the "FSLIC"). Beverly Hills Savings will retain its FSLIC deposit insurance.

² Asset data are as of June 30, 1988.

Based upon the Board's review of the record, the Board has determined that there are substantial benefits to the public in this case that outweigh the generalized adverse effects found by the Board in *DH Baldwin*. In particular, Michigan National's acquisition of Beverly Hills Savings will provide Beverly Hills Savings with the financial and managerial resources to enable it to continue its operations and its service to the convenience and needs of its community.

As the Board previously has noted, bank holding companies contemplating expansion proposals are expected to maintain consolidated capital levels significantly above the minimums set forth in the Board's Capital Adequacy Guidelines and without undue reliance on intangibles, particularly goodwill. In evaluating such a proposal, the Board will consider, among other factors, the effect of the acquisition on the tangible primary capital of the applicant and the acquired institution.

Michigan National's primary capital on a tangible basis is above levels specified in the Board's Capital Adequacy Guidelines. While the proposal would reduce Michigan National's tangible primary capital, its capital position would continue to be well in excess of minimum requirements under the Guidelines, and Michigan National has indicated that it plans to restore its capital position by internal capital generation or otherwise to take into account the expansion effected through this acquisition. Moreover, in accordance with its prior rulings in this area, the Board expects that Michigan National will cause Beverly Hills Savings to achieve and maintain levels of capital consistent with those generally applying to banking organizations as soon as possible, and in any case within one year.⁷

Beverly Hills Savings operates in the consolidated Los Angeles metropolitan banking market.⁸ Michigan National does not control a depository institution in that market. Accordingly, the Board has determined that the acquisition would have no substantial adverse effect on existing competition in any market. In addition, the Board concludes that consummation of this proposal would not have a significant adverse effect on probable future competition in any relevant market.

To guard against possible adverse effects of affiliation between a banking organization and a savings and loan association, the Board conditions its approval as follows:

1 Michigan National will operate Beverly Hills Savings as a federal savings and loan association having as its primary purpose the provision of residential housing credit. Beverly Hills Savings will limit its activities to those currently permitted to thrift institutions under the Home Owners' Loan Act, but shall not engage in any activity prohibited to bank holding companies and their subsidiaries under section 4(c)(8) of the BHC Act.⁹

2 Beverly Hills Savings will not establish or operate a remote service unit at any location outside of California.

3 Beverly Hills Savings will not establish or operate branches at locations not permissible for national banks located in California.

4 Beverly Hills Savings will be operated as a separate, independent, profit-oriented corporate entity and shall not be operated in tandem with any other subsidiary of Michigan National. Michigan National and Beverly Hills Savings will limit their operations to effect this condition and will observe the following conditions:

a No banking or other subsidiary of Michigan National will link its deposit-taking activities to accounts at Beverly Hills Savings in a sweeping arrangement or similar arrangement.

b Neither Michigan National nor any of its subsidiaries will solicit deposits or loans for Beverly Hills Savings, nor shall Beverly Hills Savings solicit deposits or loans for any other subsidiary of Michigan National.

5 Michigan National shall not change Beverly Hills Savings' name to any title that might confuse the public regarding its status as a nonbank thrift institution.¹⁰

6 Beverly Hills Savings will not convert its charter to that of a national or state commercial bank without the Board's prior approval.

7 To the extent necessary to insure independent operation of Beverly Hills Savings and prevent the improper diversion of funds, there shall be no transactions between Beverly Hills Savings and Michigan National or any of its subsidiaries without the prior approval of the Federal Reserve Bank of Chicago. This limitation encompasses the transfer, purchase, sale or loan of any assets or liabilities, but does not include infusions of capital from Michigan National, the payment of dividends by Beverly Hills Savings, or the sale of residential real estate loans from

⁷ See *First Bancorporation of Ohio*, 74 FEDERAL RESERVE BULLETIN 817 (1988).

⁸ The consolidated Los Angeles metropolitan banking market is approximated by the Los Angeles RMA.

⁹ These limitations also apply to Beverly Hills Savings' service corporation subsidiaries.

¹⁰ See *Barnett Banks, Inc.*, 75 FEDERAL RESERVE BULLETIN (Order dated December 5, 1988).

Beverly Hills Savings to any subsidiary of Michigan National

The Board concludes that consummation of the proposal, subject to the conditions set out above, would not result in conflicts of interests, unsound banking practices, decreased or unfair competition, undue concentration of resources, or other adverse effects

Based upon the foregoing and other facts and circumstances reflected in the record, the Board has determined that the acquisition of Beverly Hills Savings by Michigan National would result in substantial and compelling public benefits that are sufficient to outweigh any adverse effects that may reasonably be expected to result from this proposal. Accordingly, the application is approved subject to the conditions described in this Order and the record of the application.

The Board's decision in this case is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. This transaction shall not be consummated later than three months after the effective date of this Order, unless that period is extended for good cause by the Board or by the Federal Reserve Bank of Chicago, pursuant to delegated authority.

By order of the Board of Governors, effective December 30, 1988

Voting for this action: Chairman Greenspan and Governors Angell, Heller, Kelley, and LaWare. Absent and not voting: Governors Johnson and Seger.

WILLIAM W. WILES
Secretary of the Board

MNC Financial, Inc
Baltimore, Maryland

Order Approving Acquisition of a Federal Savings Bank

MNC Financial, Inc., Baltimore, Maryland ("MNC"), a bank holding company within the meaning of the Bank Holding Company Act (the "BHC Act") (12 U.S.C. § 1841 *et seq.*), has applied pursuant to section 4(c)(8) of the BHC Act and section 225.23 of the Board's Regulation Y (12 C.F.R. § 225.23), to acquire all of the voting shares of Virginia Federal Savings Bank, Richmond, Virginia ("Savings

Bank"), the successor to Virginia Federal Savings and Loan Association, Richmond, Virginia ("Virginia Federal")¹

MNC, with total consolidated assets of \$17.8 billion, is the largest commercial banking organization in Maryland.² It presently operates three banking subsidiaries.

Virginia Federal, with total assets of \$662 million, is the tenth largest savings institution in Virginia, and operates 16 full-service offices in the state.³

By letter dated December 22, 1988, the Federal Home Loan Bank Board ("Bank Board") requested that the Board approve this application to acquire Virginia Federal under the Bank Board's Expedited Case Processing Program for failing thrift institutions. The Bank Board stated that Virginia Federal is insolvent and urged the Board to approve this application in order to restore public confidence in Virginia Federal, maintain confidence in the savings and loan industry generally, and stabilize the daily increasing potential cost to the FSLIC. The Bank Board based its request on both the deteriorating and volatile condition of Virginia Federal, and on the substantial public benefits of the proposal, including the significant and stabilizing capital injections proposed by MNC and the FSLIC.

In light of the condition of Virginia Federal, the Board promptly caused notice of the application to be published in the *Federal Register* (53 *Federal Register* 49,230 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Section 4(c)(8) of the BHC Act authorizes a bank holding company to engage in, or acquire a company that engages in, activities determined by the Board to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has determined previously that the operation of a thrift institution is closely related to banking, and reaffirms that determination in this Order.⁴

1 Virginia Federal currently operates as a mutual thrift institution and will be converted to a federal stock savings bank on a supervisory basis. Virginia Federal will then be merged with and into Savings Bank, a *de novo* federal stock savings bank, and will retain its Federal Savings and Loan Insurance Corporation ("FSLIC") deposit insurance.

2 Asset data are as of September 30, 1988.

3 Asset data are as of June 30, 1988.

4 See, e.g., *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724 (1986), *First Pacific Investments Limited*, 72 FEDERAL RESERVE BULLETIN 342 (1986), *F.N.B. Corporation*, 71 FEDERAL RESERVE BULLETIN 340 (1985), *Old Stone Corporation*, 69 FEDERAL RESERVE BULLETIN 812 (1983), *Interstate Financial Corp.*, 68 FEDERAL RESERVE BULLETIN 316 (1982), *D.H. Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977).

In *D H Baldwin & Co*,⁵ however, the Board determined that, as a general matter, the operation of a savings and loan association is not a proper incident to banking because the potential adverse effects of generally allowing affiliations of banks and thrift institutions were not outweighed by the potential public benefits. In individual cases involving failing thrifts, the Board has found that the balance of public benefits was favorable on the basis that the adverse effects of the affiliation would be overcome by the public benefits of preserving the failing thrift institution as a competitive entity in the market and ensuring public confidence.⁶ The 1982 Garn-St Germain Act recognized the Board's authority under section 4(c)(8) of the BHC Act to approve such acquisitions by authorizing the Board in these cases to dispense with the usual notice and hearing requirements of section 4(c)(8) under appropriate emergency circumstances.

Based upon the Board's review of the record, the Board has determined that there are substantial benefits to the public in this case that outweigh the generalized adverse effects found by the Board in *D H Baldwin*. In particular, MNC's acquisition of Savings Bank will provide Savings Bank with the financial and managerial resources to enable it to continue its operations and its service to the convenience and needs of its community.

As the Board previously has noted, bank holding companies contemplating expansion proposals are expected to maintain consolidated capital levels significantly above the minimums set forth in the Board's Capital Adequacy Guidelines and without undue reliance on intangibles, particularly goodwill. In evaluating such a proposal, the Board will consider, among other factors, the effect of the acquisition on the tangible primary capital of the applicant and the acquired institution.

MNC's primary capital on a tangible basis is above levels specified in the Board's Capital Adequacy Guidelines. While the proposal would reduce MNC's tangible primary capital, its capital position would continue to be well in excess of minimum requirements under the Guidelines. Moreover, in accordance with its prior rulings in this area, the Board expects that MNC will cause Savings Bank to achieve and maintain levels of capital consistent with those gener-

ally applying to banking organizations as soon as possible, and in any case within one year.⁷

The proposed acquisition would not substantially lessen or otherwise decrease competition in any relevant market. On the contrary, the acquisition would have the substantial beneficial effect of preserving Virginia Federal as an effective competitor. In view of the fact that MNC's bank subsidiaries and Virginia Federal operate in separate banking markets, the Board concludes that the acquisition would have no substantial adverse effect on existing competition in any market. Moreover, while both MNC and Virginia Federal offer mortgage lending in the Richmond banking market, consummation of the proposal would have a *de minimis* effect on existing competition. In addition, the Board concludes that consummation of this proposal would not have a significant adverse effect on probable future competition in any relevant market.

To guard against possible adverse effects of affiliation between a banking organization and a savings institution, the Board conditions its approval as follows:

1 MNC will operate Savings Bank as a federal savings bank having as its primary purpose the provision of residential housing credit. Savings Bank will limit its activities to those currently permitted to thrift institutions under the Home Owners' Loan Act, but shall not engage in any activity prohibited to bank holding companies and their subsidiaries under section 4(c)(8) of the BHC Act.⁸

2 Savings Bank will not establish or operate a remote service unit at any location outside of Virginia.

3 Savings Bank will not establish or operate branches at locations not permissible for national banks located in Virginia.

4 MNC shall not change Savings Bank's name to any title that might confuse the public regarding its status as a nonbank thrift institution.⁹

5 Savings Bank will not convert its charter to that of a national or state commercial bank without the Board's prior approval.¹⁰

⁷ See *First Bancorporation of Ohio*, 74 FEDERAL RESERVE BULLETIN 817 (1988).

⁸ These limitations also apply to Savings Bank's seven wholly owned subsidiaries. MNC has committed to terminate any impermissible insurance activities of Savings Bank within two years of consummation of this proposal. During this two-year period, MNC will limit the insurance agency activities of Savings Bank and its subsidiaries to the renewal of existing policies and those credit-related insurance agency activities permitted under section 4(c)(8)(A) of the BHC Act.

⁹ See *Barnett Banks, Inc.*, 75 FEDERAL RESERVE BULLETIN (Order dated December 5, 1988).

¹⁰ See *Citicorp (Fidelity Federal Savings and Loan Association)*, 68 FEDERAL RESERVE BULLETIN 656 (1982). The Board notes that MNC may acquire a bank in Virginia pursuant to relevant state law.

⁵ *D H Baldwin & Co*, 63 FEDERAL RESERVE BULLETIN 280 (1977). The Board has invited public comment on a proposal to reexamine this position. 52 *Federal Register* 36,041 (1987).

⁶ See, e.g., *FNB Corporation*, *supra*, *The Chase Manhattan Corporation*, 71 FEDERAL RESERVE BULLETIN 462 (1985), *Interstate Financial Corp.*, *supra*.

The Board concludes that consummation of the proposal, subject to the conditions set out above, would not result in conflicts of interests, unsound banking practices, decreased or unfair competition, undue concentration of resources, or other adverse effects

Based upon the foregoing and other facts and circumstances reflected in the record, the Board has determined that the acquisition of Savings Bank by MNC would result in substantial and compelling public benefits that are sufficient to outweigh any adverse effects that might reasonably be expected to result from this proposal. Accordingly, the application is approved subject to the conditions described in this Order and the record of the application.

The Board's decision in this case is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. This transaction shall not be consummated later than three months after the effective date of this Order, unless that period is extended for good cause by the Board or by the Federal Reserve Bank of Richmond, pursuant to delegated authority.

By order of the Board of Governors, effective December 22, 1988

Voting for this action: Chairman Greenspan and Governors Angell, Heller, Kelley, and LaWare. Absent and not voting: Governors Johnson and Seger.

JAMES MCAFEE
Associate Secretary of the Board

Southeast Banking Corporation
Miami, Florida

Order Approving Acquisition of Federal Savings and Loan Associations

Southeast Banking Corporation, Miami, Florida ("Southeast"), a bank holding company within the meaning of the Bank Holding Company Act (the

and section 3(d) of the BHC Act, Va. Code Ann. § 6-1-399 (1988), 12 U.S.C. § 1842(d). In these situations, the Board has relied on the conditions listed above to address the potential adverse effects rather than the more extensive tandem conditions applicable where the thrift to be acquired is located in a state in which the applicant bank holding company may not acquire a bank. See *Letter from William W. Wiles to Patrick Mulhern, Senior Vice President and General Counsel, Citicorp* (August 10, 1987).

"BHC Act") (12 U.S.C. § 1841 *et seq.*), has applied pursuant to section 4(c)(8) of the BHC Act and section 225.23 of the Board's Regulation Y (12 C.F.R. § 225.23), to acquire all of the voting shares of First Federal Savings and Loan Association of Jacksonville, Jacksonville, Florida ("First Federal"), and subsequently to acquire South Florida Savings, A Federal Savings and Loan Association, Miami, Florida ("South Florida"), by merger with First Federal.¹

Southeast, with total consolidated assets of \$13.2 billion, is the third largest commercial banking organization in Florida.² It presently operates five banking subsidiaries and engages in a number of nonbanking activities.

First Federal, with total assets of \$1.2 billion, is the 25th largest savings institution in Florida. It currently operates 18 branches in Florida and controls five service corporation subsidiaries. South Florida, with total assets of \$133 million, is the 60th largest savings institution in Florida. It currently operates four branches in Florida and controls three service corporation subsidiaries.³

By letter dated December 14, 1988, the Federal Home Loan Bank Board ("Bank Board") requested that the Board approve Southeast's application to acquire First Federal and South Florida. The Bank Board stated that both thrifts are insolvent and have incurred significant operating losses. The Bank Board urged the Board to approve this application in order to restore public confidence in the resulting thrift institu-

¹ First Federal is currently operated as a mutual thrift institution, and will be converted to a federal stock savings and loan association on a voluntary supervisory basis. First Federal is qualified for such a conversion under Federal Home Loan Bank Board regulations (12 C.F.R. § 563b.24), because its liabilities exceed its assets under generally accepted accounting principles and, upon consummation of the proposed transaction, First Federal will become a viable entity under 12 C.F.R. § 563b.26. South Florida will then be merged with and into First Federal in a supervisory merger with Federal Savings & Loan Insurance Corporation (the "FSLIC") assistance, pursuant to an agreement to be entered into by the FSLIC, First Federal and Southeast. First Federal will retain its FSLIC deposit insurance.

² Asset data are as of June 30, 1988.

³ The service corporation subsidiaries of First Federal engage in real estate investment and development, mortgage banking activities, insurance brokerage and agency activities, and advertising, marketing, promotional and public relation services on behalf of First Federal. The service corporation subsidiaries of South Florida engage in real estate investment and development.

Southeast has committed to terminate any impermissible real estate development activities within two years of consummation of this proposal and will not undertake any new projects or investments during this period. Southeast has also committed that, within two years of consummation of its acquisition of First Federal, Southeast will divest or terminate its general insurance agency activities, unless during such period Southeast receives approval pursuant to an application under section 4(c)(8) of the BHC Act to retain such activities. During this two-year period or unless authorization is granted pursuant to the BHC Act for broader activities, Southeast will limit the insurance agency activities of First Federal and its subsidiaries to the renewal of existing policies and those credit-related insurance agency activities permitted under section 4(c)(8)(A) of the BHC Act.

tion, maintain confidence in the savings and loan industry generally, and stabilize the daily increasing potential cost to the FSLIC. The Board based its request on both the deteriorating condition of the thrifts and the substantial public benefits of the proposal, including the significant and stabilizing capital injections proposed by Southeast and the FSLIC.

Notice of the application, affording interested persons an opportunity to submit comments on the proposal, has been duly published (53 *Federal Register* 41,412 (1988)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Section 4(c)(8) of the BHC Act authorizes a bank holding company to engage in or acquire a company that engages in activities determined by the Board to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has determined previously that the operation of a thrift institution is closely related to banking, and reaffirms that determination in this Order.⁴

In *D H Baldwin & Co.*,⁵ however, the Board determined that, as a general matter, the operation of a savings and loan association is not a proper incident to banking because the potential adverse effects of generally allowing affiliations of banks and thrift institutions are not outweighed by the potential public benefits. In individual cases involving failing thrifts, the Board has found that the balance of public benefits was favorable on the basis that the adverse effects of the affiliation would be overcome by the public benefits of preserving the failing thrift institution as a competitive entity in the market and ensuring public confidence.⁶ The 1982 Garn-St Germain Act recognized the Board's authority under section 4(c)(8) of the BHC Act to approve such acquisitions by authorizing the Board in these cases to dispense with the usual notice and hearing requirements of section 4(c)(8) under appropriate emergency circumstances.

Based upon the Board's review of the record, the Board has determined that there are substantial bene-

fits to the public in this case that outweigh the generalized adverse effects found by the Board in *D H Baldwin*. In particular, Southeast's acquisition of First Federal and South Florida will provide them with the financial and managerial resources to enable them as a combined entity to continue to serve the convenience and needs of their communities.

As the Board previously has noted, bank holding companies contemplating expansion proposals are expected to maintain consolidated capital levels significantly above the minimums set forth in the Board's Capital Adequacy Guidelines and without undue reliance on intangibles, particularly goodwill. In evaluating such a proposal, the Board will consider, among other factors, the effect of the acquisition on the tangible primary capital of the applicant and the acquired institution.

Southeast's primary capital on a tangible basis is above levels specified in the Board's Capital Adequacy Guidelines. While the proposal would reduce Southeast's tangible primary capital, its capital position would continue to be well in excess of minimum requirements under the Guidelines, and Southeast has indicated that it plans to restore its capital position by internal capital generation or otherwise to take into account the expansion effected through this acquisition. Moreover, the Board expects that Southeast will cause First Federal to achieve and maintain levels of capital consistent with those applying to banking organizations generally as soon as possible, and in any case within approximately one year.⁷

The proposed acquisitions would not substantially lessen competition in any relevant market. On the contrary, the acquisitions would have the substantial beneficial effect of preserving the resulting merged thrift institution as an effective competitor. In that regard, Southeast and South Florida engage in deposit taking and lending activities within the Miami-Fort Lauderdale banking market.⁸ In view of South Florida's small market share and the *de minimis* increase in concentration resulting from this proposal, the deteriorating condition of South Florida, and the fact that 141 other bank and thrift institutions would re-

4 See, e.g., *Citicorp*, 72 FEDERAL RESERVE BULLETIN 724 (1986), *First Pacific Investments Limited*, 72 FEDERAL RESERVE BULLETIN 342 (1986), *FNB Corporation*, 71 FEDERAL RESERVE BULLETIN 340 (1985), *Old Stone Corporation*, 69 FEDERAL RESERVE BULLETIN 812 (1983), *Interstate Financial Corp.*, 68 FEDERAL RESERVE BULLETIN 316 (1982), *D H Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977).

5 *D H Baldwin & Co.*, 63 FEDERAL RESERVE BULLETIN 280 (1977). The Board has invited public comment on a proposal to reexamine this position. 52 *Federal Register* 36,041 (1987).

6 See, e.g., *FNB Corporation*, *supra*, *The Chase Manhattan Corporation*, 71 FEDERAL RESERVE BULLETIN 462 (1985), *Interstate Financial Corp.*, *supra*.

7 See *First Bancorporation of Ohio*, 74 FEDERAL RESERVE BULLETIN 817 (1988).

8 The Miami-Fort Lauderdale banking market is approximated by Dade and Broward Counties. Within the Miami-Fort Lauderdale banking market, Southeast is the largest depository institution among banks and thrift institutions in the market with total deposits of \$4.9 billion, representing approximately 9.4 percent of market deposits in such institutions. South Florida is the 40th largest depository institution among banks and thrifts in the market, with total deposits of \$204.3 million, representing approximately 0.4 percent of the total deposits in banks and thrifts in the market. Upon consummation of the proposal, Southeast would control 9.8 percent of the total deposits of banks and thrifts in the market. Market data are as of June 30, 1986.

main in the market, the Board concludes that the acquisitions would have no substantial adverse effect on existing competition in the Miami-Fort Lauderdale banking market

In the Jacksonville banking market, Southeast and First Federal engage in deposit taking and lending activities.⁹ In view of the small increase in concentration resulting from this proposal, the deteriorating condition of First Federal, and the fact that 23 other bank and thrift institutions would remain in the market, the Board concludes that the acquisitions would have no substantial adverse effect on existing competition in the Jacksonville banking market. In addition, the Board concludes that consummation of this proposal would not have a significant adverse effect on probable future competition in any relevant market.

Regarding the nonbanking activities of First Federal and South Florida, consummation of the proposal would have a *de minimis* effect on existing competition, and there are numerous competitors for these services.

To guard against possible adverse effects of affiliation between a banking organization and a savings and loan institution, the Board conditions its approval as follows:

- 1 Southeast will operate First Federal as a federal savings and loan association having as its primary purpose the provision of residential housing credit. First Federal will limit its activities to those permitted to thrift institutions under the Home Owners' Loan Act, but shall not engage in any activity prohibited to bank holding companies and their subsidiaries under section 4(c)(8) of the BHC Act.¹⁰
- 2 First Federal will not establish or operate a remote service unit at any location outside of Florida.
- 3 First Federal will not establish or operate branches at locations not permissible for national banks located in Florida.
- 4 Southeast shall not change First Federal's name to any title that might confuse the public regarding its status as a nonbank thrift institution.¹¹

⁹ The Jacksonville banking market is approximated by Duval County plus Orange Park in Clay County. Within the Jacksonville banking market, Southeast is the 7th largest depository institution among banks and thrift institutions in the market, with total deposits of \$235.1 million, representing approximately 2.9 percent of market deposits in such institutions. First Federal is the 4th largest depository institution among banks and thrifts in the market, with total deposits of \$909.8 million, representing approximately 11.4 percent of the total deposits in banks and thrifts in the market. Upon consummation of the proposal, Southeast would control 14.3 percent of the total deposits of banks and thrifts in the market. Market data are as of June 30, 1986.

¹⁰ These limitations also apply to First Federal's service corporation subsidiaries.

¹¹ See *Barnett Banks, Inc.*, 75 FEDERAL RESERVE BULLETIN ____ (Order dated December 5, 1988).

5 First Federal will not convert its charter to that of a national or state commercial bank without the Board's prior approval.

The Board concludes that consummation of the proposal, subject to the conditions set out above, would not result in conflicts of interests, unsound banking practices, unfair competition, undue concentration of resources, or other adverse effects.

Based upon the foregoing and other facts and circumstances reflected in the record, the Board has determined that the acquisition of First Federal and South Florida by Southeast would result in substantial and compelling public benefits that are sufficient to outweigh any adverse effects that may reasonably be expected to result from this proposal. Accordingly, the application is approved subject to the conditions described in this Order, applicable Bank Board approvals, and the record of the application.

The Board's decision in this case is subject to the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. This transaction shall not be consummated later than three months after the effective date of this Order, unless that period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta, pursuant to delegated authority.

By order of the Board of Governors, effective December 15, 1988.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Heller, Kelley, and LaWare. Absent and not voting: Governor Angell.

JAMES McAFEE
Associate Secretary of the Board

The Fuji Bank,
Limited Tokyo, Japan

*Order Approving Application to Acquire
24.9 Percent of the Shares of a Company Engaged
in Certain Securities and Futures Activities*

The Fuji Bank, Limited, Tokyo, Japan ("Fuji"), a registered bank holding company, has applied for the Board's approval under section 4(c)(8) of the Bank Holding Company Act ("BHC Act") (12 U.S.C. § 1843(c)(8)), and section 225.21(a) of the Board's Regulation Y, 12 C.F.R. § 225.21(a), to acquire 24.9

percent of the outstanding voting shares of Kleinwort Benson Government Securities, Inc., Chicago, Illinois ("Company"). Fuji will acquire the shares from Kleinwort Benson Group plc, London, United Kingdom ("Kleinwort"), which currently owns 100 percent of Company. Company engages in the following activities that the Board has determined by regulation to be closely related to banking and generally permissible for bank holding companies:

- (1) underwriting and dealing in obligations of the United States, general obligations of states and their political subdivisions, and other obligations ("bank-eligible securities"), pursuant to 12 C.F.R. § 225.25(b)(16),¹
- (2) purchasing and selling futures, forward and options contracts for its own account on bank-eligible securities for hedging purposes in accordance with 12 C.F.R. § 225.142,
- (3) providing portfolio investment advice and research and furnishing general economic information and advice, general economic statistical forecasting services and industry studies pursuant to 12 C.F.R. §§ 225.25(b)(4)(iii) and (iv) in connection with and as an incident to the proposed bank-eligible securities activities, and
- (4) acting as a futures commission merchant ("FCM") for affiliated and nonaffiliated persons in the execution and clearance on major commodity exchanges of futures contracts and options on futures contracts for bullion, foreign exchange, government securities, certificates of deposit, and other money market instruments that a bank may buy or sell in the cash market for its own account, and providing investment advice to institutional customers in conjunction therewith as permitted by 12 C.F.R. §§ 225.25(b)(18) and (19), respectively.²

In addition, Fuji has also applied for approval to acquire indirectly through Company one percent of the voting shares of Liberty Brokerage, Inc., New York, New York, an inter-dealer blind broker of government securities.

Notice of the application, affording interested persons an opportunity to submit comments, has been duly published (53 *Federal Register* 26,663 (1988)). The time for filing comments has expired, and the

Board has considered the application in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Fuji, with total consolidated assets equivalent to approximately \$326.4 billion, is the fifth largest banking organization in the world.³ Fuji owns a bank subsidiary in New York City, and operates branches in New York and Chicago, and agencies in Los Angeles, Houston, San Francisco and Atlanta. Fuji engages in various activities in the United States under sections 4(c)(8) and 4(c)(9) of the BHC Act and the Board's Regulations Y and K (12 C.F.R. Parts 225 and 211, respectively).

In acting on Fuji's proposed acquisition, the Board must consider whether the standards enumerated in section 4(c)(8) of the BHC Act are satisfied. As noted above, the Company's activities have previously been determined by the Board to be closely related to banking within the meaning of section 4(c)(8) of the BHC Act. The Board must also find that the proposed acquisition can reasonably be expected to produce benefits to the public that outweigh the possible adverse effects. 12 U.S.C. § 1843(c)(8).

In prior decisions, the Board has expressed concern about joint ventures, particularly those between bank holding companies and securities firms. The Board has previously stated that such relationships could potentially lead to a matrix of relationships between co-venturers that could break down the legally mandated separation of banking and commerce, create the possibility of conflicts of interest and concentration of resources that the BHC Act was designed to prevent, or impair or give the appearance of impairing, the ability of the banking organization to function effectively as an independent and impartial provider of credit.⁴ Further, joint ventures must be carefully analyzed for any possible adverse effects on competition and on the financial condition of the banking organization involved in the proposal. The Board has also stated that such concerns are exacerbated where, as here, the joint venture involves a relationship between a bank holding company and a securities firm that is more than a passive investor, because such an arrangement creates the potential for the mingling of permissible and impermissible securities activities.⁵

To address the possible adverse effects of Fuji's association with Company, Fuji has made a series of commitments which are consistent with prior Board

¹ Company also engages in the following incidental activities: engaging in repurchase and reverse repurchase transactions and collateralized bank-eligible securities borrowing and lending transactions.

² Until Company becomes a registered FCM, Fuji proposes that Company continue to receive customer orders to purchase and sell financial contracts and pass them on to registered FCM's for execution, clearing and settlement for a fee. Company would not take a position as principal in such contracts.

³ Asset data are as of March 31, 1988. Banking data are as of December 31, 1987. Ranking is as of December 31, 1986.

⁴ See e.g., *Independent Bankers Financial Corporation*, 72 FEDERAL RESERVE BULLETIN 664 (1986), and *Amsterdam-Rotterdam Bank, N.V.*, 70 FEDERAL RESERVE BULLETIN 835 (1984).

⁵ *Id.*

decisions in this area. These commitments require a separation between the activities of the bank holding company and the impermissible activities of the nonbanking joint venture partner (in this case Kleinwort).

While Fuji's commitments are slightly different than in prior cases, in light of the temporary nature of the joint venture, the Board believes that the commitments adequately separate Company's permissible securities activities from the impermissible activities of Kleinwort's other subsidiaries. In this case, Fuji states that the parties do not intend to enter into the transaction for the purpose of being in business together. Rather, the parties expect that either Fuji or Kleinwort will divest its interest in Company by year-end 1989, or shortly thereafter.

Accordingly, the Board concludes that no adverse effects would be likely to result from the proposal which would warrant denial of the application.

With regard to competitive issues, Fuji and Company do not currently compete with each other in any market either in the United States or abroad. Accordingly, consummation of the proposed transaction would not eliminate any existing competition between Fuji and Company.

In every case involving a nonbanking acquisition by a bank holding company under section 4 of the BHC Act, the Board considers the financial condition and resources of the applicant and its subsidiaries and the effect of the transaction on these resources.⁶ In accordance with the principles of national treatment and competitive equity, the Board has stated that it expects a foreign bank to meet the same general standards of financial strength as domestic bank holding companies and to be able to serve as a source of strength to its United States banking operations.⁷ In considering applications of foreign banking organizations, the Board has noted that foreign banks operate outside the United States in accordance with different regulatory and supervisory requirements, accounting principles, asset quality standards, and banking practices and traditions, and that these differences have

made it difficult to compare the capital positions of domestic and foreign banks. The Board, however, recently adopted a proposal to supplement its consideration of capital adequacy with a risk-based system that has been agreed to by the member countries of the Basle Committee on Banking Regulations and Supervisory Practices and the other domestic federal banking agencies.⁸ The Japanese Ministry of Finance in April of this year acted to implement for Japanese banking organizations the risk-based capital framework developed by the Basle Committee. The Board considers the Basle Committee proposal an important step toward a more consistent and equitable international standard for assessing capital adequacy.

In this case, the primary capital ratio of Fuji, as publicly reported, is well below the 5.5 percent minimum level specified in the Board's Capital Adequacy Guidelines. After making adjustments to reflect Japanese banking and accounting practices, however, including consideration of a portion of the unrealized appreciation in Fuji's portfolio of equity securities consistent with the principles in the Basle capital framework, Fuji's capital ratio meets United States standards.

The Board has also considered several additional factors that mitigate its concern in this case. The Board notes that the application involves nonbanking activities that require a small commitment of capital and that Fuji's bank in the United States is among the more strongly capitalized banking organizations in the United States. The Board notes further that Fuji is in compliance with the capital and other financial requirements of Japanese banking organizations. In this regard, the Board has considered as favorable factors that, in anticipation of implementation of the Basle Committee risk-based capital framework, Fuji has, through the issuance of common stock and retention of earnings increased its equity capital by almost \$1.2 billion in its latest fiscal year and that Fuji's capital improvement program is consistent with meeting the standards in the Basle Committee capital framework for 1990 and 1992.

Based on these and other facts of record, the Board concludes that financial considerations are consistent with approval of the application.

Consummation of Fuji's proposal would provide increased convenience to Company's customers and gains in efficiency. In addition, the Board expects that the *de novo* entry of Fuji into the market for these services would increase the level of competition among providers of these services. Accordingly, the Board has determined that the performance of the

⁶ 12 C.F.R. § 225.24, *Bayrische Vereinsbank AG*, 73 FEDERAL RESERVE BULLETIN 155, 156 (1987).

⁷ *Toyo Trust and Banking Co., Ltd.*, 74 FEDERAL RESERVE BULLETIN 623 (1988), *Taiyo Kobe Bank, Ltd.*, 74 FEDERAL RESERVE BULLETIN 621 (1988), *The Long-Term Credit Bank of Japan, Limited*, 74 FEDERAL RESERVE BULLETIN 573 (1988), *The Sanwa Bank, Limited*, 74 FEDERAL RESERVE BULLETIN 578 (1988), *Sumitomo Trust & Banking Co., Ltd.*, 73 FEDERAL RESERVE BULLETIN 749 (1987), *Ljubljanska Banka-Associated Bank*, 72 FEDERAL RESERVE BULLETIN 489 (1986), *The Mitsubishi Trust and Banking Corporation*, 72 FEDERAL RESERVE BULLETIN 256 (1986), *The Industrial Bank of Japan, Ltd.*, 72 FEDERAL RESERVE BULLETIN 71 (1986), and *The Mitsubishi Bank, Limited*, 70 FEDERAL RESERVE BULLETIN 518 (1984). See also, Policy Statement on Supervision and Regulation of Foreign-Based Bank Holding Companies, Federal Reserve Regulatory Service ¶ 4-835 (1979).

⁸ 53 *Federal Register* 8,549 (1988).

proposed activities by Company can reasonably be expected to produce benefits to the public

The Board believes that the proposal is not likely to result in decreased or unfair competition, conflicts of interests, unsound banking practices, concentration of resources, or other adverse effects. Based on the foregoing and other facts of record, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the BHC Act is favorable. Accordingly, the Board has determined that the application should be, and hereby is, approved. This determination is further subject to all of the conditions set forth in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b), and to the Board's authority to require modification or termination of the activities of the holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The Primary Dealers Act of 1988, enacted as part of the Omnibus Trade and Competitiveness Act of 1988, prohibits ownership or control of a primary dealer by a foreign person from a country that does not accord U.S. financial institutions the same competitive opportunities as it affords to domestic companies with respect to the underwriting and distribution of government debt instruments. In this case, Fuji proposes

- (i) to acquire 24.9 percent of the voting shares of Company,
- (ii) to hold subordinated debt of Company,
- (iii) to provide capital support to Company if necessary,
- (iv) to acquire an option to purchase up to 80 percent of Company, and
- (v) to have representation on the board of directors and the executive committee of Company.

In the light of these facts, under a reasonable construction of the term control the Board is likely to find that Fuji controls Company. It is not necessary, however, to make a control determination at this time as the Primary Dealers Act does not become effective until August 23, 1989, and then only if it were to be determined that the home country of Fuji does not accord U.S. institutions the same competitive opportunities as it affords to domestic companies in its government debt market.

This transaction shall not be consummated later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective December 19, 1988

JAMES MCAFEE
Associate Secretary of the Board

Dissenting Statement of Governor Seger

I dissent from the Board's action in this case. I believe that foreign banking organizations whose primary capital, based on U.S. accounting principles, is below the Board's minimum capital guidelines for U.S. banking organizations have an unfair competitive advantage in the United States over domestic banking organizations. In my view, such foreign organizations should be judged against the same financial and managerial standards, including the Board's capital adequacy guidelines, as are applied to domestic banking organizations. The majority concludes that Applicant's primary capital meets United States standards. To do so, however, the majority makes adjustments that are not available for U.S. banks under guidelines that have not yet become effective for U.S. or foreign banking organizations.

In addition, I am concerned that while this application would permit a large Japanese banking organization to acquire a large securities dealer in the U.S., U.S. banking organizations are not permitted to make comparable acquisitions in Japan. While some progress is being made in opening Japanese markets to U.S. banking organizations, U.S. banking organizations and other financial institutions, in my opinion, are still far from being afforded a full opportunity to compete in Japan.

December 19, 1988

Orders Issued Under Sections 3 and 4 of the Bank Holding Company Act

Chemical Banking Corporation
New York, New York

Order Approving Acquisition of a Bank Holding Company, Banks, and Nonbanking Subsidiaries

Chemical Banking Corporation, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act (the "Act") (12 U.S.C. § 1841 *et seq.*), has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire Horizon Bancorp, Morristown, New Jersey ("Horizon"), and thereby indi-

rectly to acquire Horizon's four subsidiary banks.¹ Applicant has also applied under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) to indirectly acquire Horizon's two nonbanking subsidiaries: Horizon Brokerage Services, Inc., Morristown, New Jersey, engaged in discount brokerage activities, and Horizon Trust Company of Florida, N.A., Boca Raton, Florida, engaged in providing corporate trust operations and services.

Notice of the applications, affording an opportunity for interested persons to submit comments, has been duly published (53 *Federal Register* 43,037 (1988)). The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in sections 3(c) and 4(c)(8) of the Act (12 U.S.C. §§ 1842(c) and 1843(c)(8)).

Applicant, with \$40.9 billion in domestic deposits, is the fourth largest banking organization in the United States. Applicant ranks third in the state of New York, with deposits representing 10.7 percent of the total deposits in commercial banks in the state. Applicant also ranks third in the state of Texas, controlling 9.4 percent of the total deposits in commercial banks in the state. Horizon is the fifth largest commercial banking organization in New Jersey, with total deposits of \$3.6 billion, representing 5.4 percent of the total deposits in commercial banks in New Jersey.²

The Board has previously determined that the acquisition of a New Jersey bank holding company by a New York bank holding company is specifically authorized by the statute laws of New Jersey, subject to the determination by the New Jersey Commissioner of Banking that the specific proposal is consistent with the New Jersey banking statute.³ Based on the foregoing, the Board has determined that the proposed acquisition is specifically authorized by the statute laws of New Jersey and that Board approval of the proposal is not barred by the Douglas Amendment to the BHC Act (12 U.S.C. § 1842(d)), subject to the New Jersey Commissioner's specific determination that the proposal is consistent with the New Jersey interstate banking statute.⁴

¹ Applicant will acquire Horizon through a merger of New Jersey Holdings, Inc., a wholly owned subsidiary of Applicant, with and into Horizon.

Horizon's bank subsidiaries, all located in New Jersey, are Horizon Bank, N.A., Morristown, Horizon Trust Company, N.A., Morristown, Marine National Bank, Pleasantville, and Princeton Bank, Princeton.

² National and state deposit data are as of June 30, 1988.

³ N.J. Stat. Ann. § 17:9A-370 *et seq.* (West 1988), *National Westminster Bank PLC*, 74 *FEDERAL RESERVE BULLETIN* 142 (1988).

⁴ Horizon owns Princeton Bank of Pennsylvania, Philadelphia, Pennsylvania ("PBP"). Pennsylvania law, however, does not currently permit New York bank holding companies to acquire banks in Pennsylvania. Accordingly, Horizon has agreed to dissolve PBP prior

to consummation. The Pennsylvania Department of Banking has approved the plan of dissolution.

Applicant competes with Horizon in the Metropolitan New York - New Jersey banking market.⁵ Applicant is the fourth largest of 155 commercial banking organizations in the market, with deposits of \$23.3 billion, controlling 9.7 percent of total deposits in commercial banks in the market.⁶ Horizon is the 25th largest commercial banking organization in the market, with deposits of \$1.6 billion, controlling 0.7 percent of total deposits in commercial banks in the market. The Metropolitan New York - New Jersey market is considered unconcentrated, with a Herfindahl-Hirschman Index ("HHI") of 686, which would increase by 13 points to 699 upon consummation of the proposal. On the basis of the foregoing, the Board concludes that consummation of the proposal would not have a substantial adverse competitive effect in the Metropolitan New York - New Jersey banking market. The Board also concludes that consummation of the proposal would not have a significant adverse effect on probable future competition in any relevant banking market.

Section 3(c) of the Act requires in every case that the Board consider the financial resources of the applicant and the bank or bank holding company to be acquired. The Board has stated and continues to believe that capital adequacy is an especially important factor in the analysis of bank holding company expansion proposals. The Board expects banking organizations contemplating expansion proposals to maintain strong capital levels substantially above the minimum levels specified in the Board's Capital Adequacy Guidelines without significant reliance on intangibles, particularly goodwill.⁷

The Board carefully analyzes the effect of expansion proposals on the preservation or achievement of strong capital levels and has adopted a policy that there should be no significant diminution of financial strength below these levels for the purpose of effecting major expansion proposals.⁸ To achieve full compli-

to consummation. The Pennsylvania Department of Banking has approved the plan of dissolution.

⁵ The Metropolitan New York - New Jersey market includes New York City, Nassau, Orange, Putnam, Rockland, Suffolk, Sullivan, and Westchester Counties in New York, Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex, Union, and Warren Counties in New Jersey, and parts of Fairfield County in Connecticut.

⁶ Market deposit data are as of June 30, 1986.

⁷ Capital Adequacy Guidelines, 50 *Federal Register* 16,057 (1985), 71 *FEDERAL RESERVE BULLETIN* 445 (1985).

⁸ Thus, for example, the Board has generally approved proposals involving a decline in capital only where the applicants have promptly restored their capital to pre-acquisition levels following consummation of the proposals and have implemented programs of capital improvement to raise capital significantly above minimum levels. See, e.g., *Citicorp*, 72 *FEDERAL RESERVE BULLETIN* 724 (1986), *Security*

ance with this policy, the Board has required, as a condition for approval of expansion proposals, that a substantial majority of the cash outlay for an acquisition be supported by the issuance before consummation of an equal amount of new equity capital, with the remaining portion of the cash outlay supported by the issuance of new equity capital within a short period of time thereafter.⁹

Applicant proposes to acquire Horizon through a cash purchase amounting to approximately \$642 million. While the proposal will result in a lessening of the overall capital strength of Applicant, Applicant has taken, and has committed to take in the near term, substantial steps to satisfy the Board's policy against declines in necessary capital strength to support expansion proposals. Applicant already has issued \$200 million of perpetual preferred stock and \$150 million of mandatory convertible debt. It will issue \$150 million of subordinated debt within one year of consummation. In addition, the Board has relied on assurances of Applicant that it plans to further strengthen its equity capital in the near future.

The Board has also considered several additional factors that bear on the financial assessment of this case. Initially, the Board notes that this acquisition is of a company that is in strong condition and that the acquisition, in conjunction with asset reductions Applicant has already made, should result in an overall strengthening of Applicant's asset structure. The Board has also considered that Applicant negotiated the terms of this agreement before the Board had announced its policy regarding diminution in capital strength to support expansion proposals.¹⁰ Moreover, taking into account the substantial steps already taken and proposed to be taken by Applicant to improve its capital position, Applicant will be in compliance with the 1990 transitional risk-based capital requirements established by the Basle Committee on Banking Regulations and Supervisory Practices at consummation of this proposal and appears well positioned to meet the Basle Committee's 1992 minimum ratios in the near future.

Finally, and most significantly, the Board expects Applicant to continue to improve its equity capital base through controlled asset growth, external capital improvement initiatives, and sound dividend policies. In acting on future proposals, the Board will consider Applicant's progress in this regard.

Accordingly, on the basis of the above considerations, the particular facts of this case, and Applicant's continuing steps to strengthen its capital position, the Board concludes that financial factors are consistent with approval of the proposal. Managerial resources, convenience and needs considerations, and future prospects of Applicant and Horizon are also consistent with approval.

Applicant competes with Horizon in the provision of discount brokerage and corporate trust operations and services. In view of the small market share held by Applicant and Horizon in the relevant markets and the unconcentrated nature of the markets, the Board concludes that the proposal would not have any significant adverse effect on existing or probable future competition in any relevant market for these services.

Furthermore, there is no evidence in the record to indicate that approval of this proposal would result in undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest. Accordingly, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the Act is favorable and consistent with approval of the application to acquire the nonbanking subsidiaries of Horizon.

Based on the foregoing and other facts of record and in reliance on the commitments made by Applicant, the Board has determined that consummation of the transaction would be in the public interest and that the applications under sections 3 and 4 of the Act should be, and hereby are, approved. The transaction shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective December 2, 1988

1 Unless otherwise noted, rates of change are calculated from average amounts outstanding in preceding month or quarter

2 Figures incorporate adjustments for discontinuities associated with the implementation of the Monetary Control Act and other regulatory changes to reserve requirements. To adjust for discontinuities due to changes in reserve requirements on reservable nondeposit liabilities, the sum of such required reserves is subtracted from the actual series. Similarly, in adjusting for discontinuities in the monetary base, required clearing balances and adjustments to compensate for float also are subtracted from the actual series

3 The monetary base not adjusted for discontinuities consists of total reserves plus required clearing balances and adjustments to compensate for float at Federal Reserve Banks plus the currency component of the money stock less the amount of vault cash holdings of thrift institutions that is included in the currency component of the money stock plus, for institutions not having required reserve balances, the excess of current vault cash over the amount applied to satisfy current reserve requirements. After the introduction of contemporaneous reserve requirements (CRR), currency and vault cash figures are measured over the weekly computation period ending Monday

Before CRR all components of the monetary base other than excess reserves are seasonally adjusted as a whole, rather than by component and excess reserves are added on a not seasonally adjusted basis. After CRR, the seasonally adjusted series consists of seasonally adjusted total reserves, which include excess reserves on a not seasonally adjusted basis plus the seasonally adjusted currency component of the money stock plus the remaining items seasonally adjusted as a whole

4 Composition of the money stock measures and debt is as follows:
M1 (1) currency outside the Treasury, Federal Reserve Banks, and the vaults of depository institutions (2) travelers checks of nonbank issuers (3) demand deposits at all commercial banks other than those due to depository institutions, the U.S. government and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float and (4) other checkable deposits (OCD) consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions

M2 M1 plus overnight (and continuing contract) repurchase agreements (RPs) issued by all commercial banks and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, Money Market Deposit Accounts (MMDAs), savings and small-denomination time deposits (time deposits)—including retail RPs—in amounts of less than \$100,000, and balances in both taxable and tax-exempt general purpose and broker dealer money market mutual funds. Excludes individual retirement accounts (IRA) and Keogh balances at depository

institutions and money market funds. Also excludes all balances held by U.S. commercial banks, money market funds (general purpose and broker dealer), foreign governments and commercial banks, and the U.S. government

M3 M2 plus large denomination time deposits and term RP liabilities (in amounts of \$100,000 or more) issued by commercial banks and thrift institutions term Eurodollars held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada and balances in both taxable and tax exempt, institution only money market mutual funds. Excludes amounts held by depository institutions, the U.S. government money market funds, and foreign banks and official institutions. Also subtracted is the estimated amount of overnight RPs and Eurodollars held by institution only money market mutual funds

L M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper and bankers acceptances, net of money market mutual fund holdings of these assets

Debt Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments, and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances, and other debt instruments. The source of data on domestic nonfinancial debt is the Federal Reserve Board's flow of funds accounts. Debt data are based on monthly averages. Growth rates for debt reflect adjustments for discontinuities over time in the levels of debt presented in other tables

5 Sum of overnight RPs and Eurodollars, money market fund balances (general purpose and broker dealer) MMDAs and savings and small time deposits less the estimated amount of demand deposits and vault cash held by thrift institutions to service their time and savings deposit liabilities

6 Sum of large time deposits, term RPs, and Eurodollars of U.S. residents money market fund balances (institution-only), less a consolidation adjustment that represents the estimated amount of overnight RPs and Eurodollars held by institution-only money market mutual funds

7 Excludes MMDAs

8 Small-denomination time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRA and Keogh accounts at commercial banks and thrifts are subtracted from small time deposits

9 Large denomination time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities

10 Large-denomination time deposits at commercial banks less those held by money market mutual funds, depository institutions, and foreign banks and official institutions

11 Changes calculated from figures shown in table I 23

A4 Domestic Financial Statistics □ February 1989

1 These data also appear in the Board's H 3 (502) release. For address, see inside front cover.

2 Excludes required clearing balances and adjustments to compensate for float.

3 Dates refer to the maintenance periods in which the vault cash can be used to satisfy reserve requirements. Under contemporaneous reserve requirements maintenance periods end 30 days after the lagged computation periods in which the balances are held.

4 Equal to all vault cash held during the lagged computation period by institutions having required reserve balances at Federal Reserve Banks plus the amount of vault cash equal to required reserves during the maintenance period at institutions having no required reserve balances.

5 Total vault cash at institutions having no required reserve balances less the amount of vault cash equal to their required reserves during the maintenance period.

6 Total reserves not adjusted for discontinuities consist of reserve balances

with Federal Reserve Banks, which exclude required clearing balances and adjustments to compensate for float, plus vault cash used to satisfy reserve requirements. Such vault cash consists of all vault cash held during the lagged computation period by institutions having required reserve balances at Federal Reserve Banks plus the amount of vault cash equal to required reserves during the maintenance period at institutions having no required reserve balances.

7 Reserve balances with Federal Reserve Banks plus vault cash used to satisfy reserve requirements less required reserves.

8 Extended credit consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as there is with traditional short term adjustment credit, the money market impact of extended credit is similar to that of nonborrowed reserves.

9 Data are prorated monthly averages of biweekly averages.

1 Adjustment credit is available on a short term basis to help depository institutions meet temporary needs for funds that cannot be met through reasonable alternative sources. After May 19, 1986, the highest rate established for loans to depository institutions may be charged on adjustment credit loans of unusual size that result from a major operating problem at the borrower's facility.

Seasonal credit is available to help smaller depository institutions meet regular seasonal needs for funds that cannot be met through special industry lenders and that arise from a combination of expected patterns of movement in their deposits and loans. A temporary simplified seasonal program was established on Mar 8 1985, and the interest rate was a fixed rate ½ percent above the rate on adjustment credit. The program was reestablished on Feb 18, 1986 and again on Jan 28, 1987, the rate may be either the same as that for adjustment credit or a fixed rate ½ percent higher.

2 Extended credit is available to depository institutions, when similar assistance is not reasonably available from other sources when exceptional circumstances or practices involve only a particular institution or when an institution is experiencing difficulties adjusting to changing market conditions over a longer period of time.

3 For extended credit loans outstanding more than 30 days, a flexible rate

somewhat above rates on market sources of funds ordinarily will be charged, but in no case will the rate charged be less than the basic discount rate plus 50 basis points. The flexible rate is reestablished on the first business day of each two week reserve maintenance period. At the discretion of the Federal Reserve Bank, the time period for which the basic discount rate is applied may be shortened.

4 For earlier data, see the following publications of the Board of Governors: *Banking and Monetary Statistics, 1914–1941*, and *1941–1970, Annual Statistical Digest 1970–1979*.

In 1980 and 1981, the Federal Reserve applied a surcharge to short-term adjustment credit borrowings by institutions with deposits of \$500 million or more that had borrowed in successive weeks or in more than four weeks in a calendar quarter. A 3 percent surcharge was in effect from Mar 17, 1980 through May 7, 1980. There was no surcharge until Nov 17, 1980, when a 2 percent surcharge was adopted, the surcharge was subsequently raised to 3 percent on Dec 5 1980, and to 4 percent on May 5, 1981. The surcharge was reduced to 3 percent effective Sept 22, 1981, and to 2 percent effective Oct 12, 1981. As of Oct 1, 1981 the formula for applying the surcharge was changed from a calendar quarter to a moving 13 week period. The surcharge was eliminated on Nov 17, 1981.

1 15 RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS¹

Percent of deposits

Type of deposit, and deposit interval ²	Depository institution requirements after implementation of the Monetary Control Act	
	Percent of deposits	Effective date
<i>Net transaction accounts</i> ^{3 4}		
\$0 million-\$41.5 million	3	12/20/88
More than \$41.5 million	12	12/20/88
<i>Nonpersonal time deposits</i> ⁵		
By original maturity		
Less than 1½ years	3	10/6/83
1½ years or more	0	10/6/83
<i>Eurocurrency liabilities</i>		
All types	3	11/13/80

1 Reserve requirements in effect on Dec. 31, 1988. Required reserves must be held in the form of deposits with Federal Reserve Banks or vault cash. Nonmembers may maintain reserve balances with a Federal Reserve Bank indirectly on a pass-through basis with certain approved institutions. For previous reserve requirements, see earlier editions of the *Annual Report* and of the FEDERAL RESERVE BULLETIN. Under provisions of the Monetary Control Act, depository institutions include commercial banks, mutual savings banks, savings and loan associations, credit unions, agencies and branches of foreign banks, and Edge corporations.

2 The Garn-St Germain Depository Institutions Act of 1982 (Public Law 97-320) requires that \$2 million of reservable liabilities (transaction accounts, nonpersonal time deposits, and Eurocurrency liabilities) of each depository institution be subject to a zero percent reserve requirement. The Board is to adjust the amount of reservable liabilities subject to this zero percent reserve requirement each year for the succeeding calendar year by 80 percent of the percentage increase in the total reservable liabilities of all depository institutions, measured on an annual basis as of June 30. No corresponding adjustment is to be made in the event of a decrease. On Dec. 20, 1988, the exemption was raised from \$3.2 million to \$3.4 million. In determining the reserve requirements of depository institutions, the exemption shall apply in the following order: (1) net NOW accounts (NOW accounts less allowable deductions), (2) net other transaction accounts, and (3) nonpersonal time deposits or Eurocurrency liabilities starting with those with the highest reserve ratio. With respect to NOW accounts and

other transaction accounts, the exemption applies only to such accounts that would be subject to a 3 percent reserve requirement.

3 Transaction accounts include all deposits on which the account holder is permitted to make withdrawals by negotiable or transferable instruments, payment orders of withdrawal, and telephone and preauthorized transfers in excess of three per month for the purpose of making payments to third persons or others. However, MMDAs and similar accounts subject to the rules that permit no more than six preauthorized, automatic, or other transfers per month, of which no more than three can be checks, are not transaction accounts (such accounts are savings deposits subject to time deposit reserve requirements).

4 The Monetary Control Act of 1980 requires that the amount of transaction accounts against which the 3 percent reserve requirement applies be modified annually by 80 percent of the percentage increase in transaction accounts held by all depository institutions, determined as of June 30 each year. Effective Dec. 20, 1988 for institutions reporting quarterly and Dec. 27, 1988 for institutions reporting weekly, the amount was increased from \$40.5 million to \$41.5 million.

5 In general, nonpersonal time deposits are time deposits, including savings deposits, that are not transaction accounts and in which a beneficial interest is held by a depositor that is not a natural person. Also included are certain transferable time deposits held by natural persons and certain obligations issued to depository institution offices located outside the United States. For details see section 204.2 of Regulation D.

1 Some of these data also appear in the Board's H 4 1 (503) release. For address, see inside front cover.

2 Includes securities loaned—fully guaranteed by U S Treasury securities pledged with Federal Reserve Banks—and excludes securities sold and scheduled to be bought back under matched sale purchase transactions.

3 Valued monthly at market exchange rates.

4 Includes special investment account at the Federal Reserve Bank of Chicago in Treasury bills maturing within 90 days.

5 Includes exchange-translation account reflecting the monthly revaluation at market exchange rates of foreign-exchange commitments.

1 Latest monthly and biweekly figures are available from the Board's H 3(502) statistical release. Historical data and estimates of the impact on required reserves of changes in reserve requirements are available from the Monetary and Reserves Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

2 Figures incorporate adjustments for discontinuities associated with the implementation of the Monetary Control Act and other regulatory changes to reserve requirements. To adjust for discontinuities due to changes in reserve requirements on reservable nondeposit liabilities, the sum of such required reserves is subtracted from the actual series. Similarly, in adjusting for discontinuities in the monetary base, required clearing balances and adjustments to compensate for float also are subtracted from the actual series.

3 Total reserves not adjusted for discontinuities consist of reserve balances with Federal Reserve Banks, which exclude required clearing balances and adjustments to compensate for float, plus vault cash held during the lagged computation period by institutions having required reserve balances at Federal Reserve Banks plus the amount of vault cash equal to required reserves during the maintenance period at institutions having no required reserve balances.

4 Extended credit consists of borrowing at the discount window under the

terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as there is with traditional short-term adjustment credit, the money market impact of extended credit is similar to that of nonborrowed reserves.

5 The monetary base not adjusted for discontinuities consists of total reserves plus required clearing balances and adjustments to compensate for float at Federal Reserve Banks and the currency component of the money stock plus, for institutions not having required reserve balances, the excess of current vault cash over the amount applied to satisfy current reserve requirements. Currency and vault cash figures are measured over the weekly computation period ending Monday.

The seasonally adjusted monetary base consists of seasonally adjusted total reserves, which include excess reserves on a not seasonally adjusted basis plus the seasonally adjusted currency component of the money stock and the remaining items seasonally adjusted as a whole.

6 Reflects actual reserve requirements, including those on nondeposit liabilities with no adjustments to eliminate the effects of discontinuities associated with implementation of the Monetary Control Act or other regulatory changes to reserve requirements.

NOTES TO TABLE 1 21

1 Latest monthly and weekly figures are available from the Board's H 6 (508) release. Historical data are available from the Monetary and Reserves Projection section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, D C 20551.

2 Composition of the money stock measures and debt is as follows:
M1 (1) currency outside the Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those due to depository institutions, the U S government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float and (4) other checkable deposits (OCD) consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions.

M2 M1 plus overnight (and continuing contract) repurchase agreements (RPs) issued by all commercial banks and overnight Eurodollars issued to U S residents by foreign branches of U S banks worldwide, MMDAs, savings and small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and balances in both taxable and tax exempt general purpose and broker-dealer money market mutual funds. Excludes individual retirement accounts (IRA) and Keogh balances at depository institutions and money market funds. Also excludes all balances held by U S commercial banks, money market funds (general purpose and broker-dealer), foreign governments and commercial banks, and the U S government.

M3 M2 plus large denomination time deposits and term RP liabilities (in amounts of \$100,000 or more) issued by commercial banks and thrift institutions, term Eurodollars held by U S residents at foreign branches of U S banks worldwide and at all banking offices in the United Kingdom and Canada, and balances in both taxable and tax exempt, institution only money market mutual funds. Excludes amounts held by depository institutions, the U S government, money market funds, and foreign banks and official institutions. Also subtracted is the estimated amount of overnight RPs and Eurodollars held by institution only money market mutual funds.

L M3 plus the nonbank public holdings of U S savings bonds, short-term Treasury securities, commercial paper and bankers acceptances, net of money market mutual fund holdings of these assets.

Debt Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U S government, state and local governments and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances, and other debt instruments. The source of data on domestic nonfinancial debt is the Federal Reserve Board's flow of funds accounts. Debt data are based on monthly averages.

3 Currency outside the U S Treasury, Federal Reserve Banks, and vaults of depository institutions.

4 Outstanding amount of U S dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions are included in demand deposits.

5 Demand deposits at commercial banks and foreign related institutions other than those due to depository institutions, the U S government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float.

6 Consists of NOW and ATS balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

7 Sum of overnight RPs and overnight Eurodollars, money market fund balances (general purpose and broker-dealer), MMDAs, and savings and small time deposits.

8 Sum of large time deposits, term RPs, and term Eurodollars of U S residents, money market fund balances (institution only), less the estimated amount of overnight RPs and Eurodollars held by institution only money market funds.

9 Savings deposits exclude MMDAs.

10 Small denomination time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All individual retirement accounts (IRA) and Keogh accounts at commercial banks and thrifts are subtracted from small time deposits.

11 Large-denomination time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

12 Large denomination time deposits at commercial banks less those held by money market mutual funds, depository institutions, and foreign banks and official institutions.

1 Commercial banks are those in the 50 states and the District of Columbia with national or state charters plus agencies and branches of foreign banks. New York investment companies majority owned by foreign banks and Edge Act corporations owned by domestically chartered and foreign banks.

These data also appear in the Board's G-10 (411) release. For address, see inside front cover.

2 Includes seasonally adjusted federal funds, RPs, and other borrowings from nonbanks and not seasonally adjusted net Eurodollars.

3 Other borrowings are borrowings on any instrument, such as a promissory note or due bill, given for the purpose of borrowing money for the banking

business. This includes borrowings from Federal Reserve Banks and from foreign banks, term federal funds, overdrawn due from bank balances, loan RPs, and participations in pooled loans.

4 Averages of daily figures for member and nonmember banks.

5 Averages of daily data.

6 Based on daily average data reported by 122 large banks.

7 Includes U.S. Treasury demand deposits and Treasury tax and loan notes at commercial banks. Averages of daily data.

8 Averages of Wednesday figures.

1 Figures include cash items in process of collection. Estimates of gross deposits are based on reports supplied by a sample of commercial banks. Types of depositors in each category are described in the June 1971 BULLETIN, p. 466. Figures may not add to totals because of rounding.

2 Beginning in March 1984, these data reflect a change in the panel of weekly reporting banks, and are not comparable to earlier data. Estimates in billions of dollars for December 1983 based on the new weekly reporting panel are: financial business, 24.4; nonfinancial business, 80.9; consumer, 30.1; foreign, 3.1; other, 9.5.

3 Beginning March 1985, financial business deposits and, by implication, total gross demand deposits have been redefined to exclude demand deposits due to thrift institutions. Historical data have not been revised. The estimated volume of such deposits for December 1984 is \$5.0 billion at all insured commercial banks and \$3.0 billion at weekly reporting banks.

4 Historical data back to March 1985 have been revised to account for corrections of bank reporting errors. Historical data before March 1985 have not been revised and may contain reporting errors. Data for all commercial banks for March 1985 were revised as follows (in billions of dollars): all holders, -3; financial business, -8; nonfinancial business, -4; consumer, 9; foreign, 1; other, -1. Data for weekly reporting banks for March 1985 were revised as follows (in billions of dollars): all holders, -1; financial business, -7; nonfinancial business, -5; consumer, 1.1; foreign, 1; other, -2.

5 Beginning March 1988, these data reflect a change in the panel of weekly reporting banks, and are not comparable to earlier data. Estimates in billions of dollars for December 1987 based on the new weekly reporting panel are: financial business, 29.4; nonfinancial business, 105.1; consumer, 41.1; foreign, 3.4; other, 13.1.

1 Weekly, monthly and annual figures are averages of all calendar days where the rate for a weekend or holiday is taken to be the rate prevailing on the preceding business day. The daily rate is the average of the rates on a given day weighted by the volume of transactions at these rates.

2 Weekly figures are averages for statement week ending Wednesday.
 3 Rate for the Federal Reserve Bank of New York.
 4 Unweighted average of offering rates quoted by at least five dealers (in the case of commercial paper), or finance companies (in the case of finance paper). Before November 1979, maturities for data shown are 30-59 days, 90-119 days, and 120-179 days for commercial paper, and 30-59 days, 90-119 days, and 150-179 days for finance paper.
 5 Yields are quoted on a bank-discount basis rather than in an investment yield basis (which would give a higher figure).
 6 Dealer closing offered rates for top rated banks. Most representative rate (which may be, but need not be, the average of the rates quoted by the dealers).
 7 Unweighted average of offered rates quoted by at least five dealers early in the day.
 8 Calendar week average. For indication purposes only.
 9 Unweighted average of closing bid rates quoted by at least five dealers.
 10 Rates are recorded in the week in which bills are issued. Beginning with the Treasury bill auction held on Apr. 18, 1983 bidders were required to state the percentage yield (on a bank discount basis) that they would accept to two decimal

places. Thus, average issuing rates in bill auctions will be reported using two rather than three decimal places.

11 Yields are based on closing bid prices quoted by at least five dealers.
 12 Yields adjusted to constant maturities by the U.S. Treasury. That is, yields are read from a yield curve at fixed maturities. Based on only recently issued, actively traded securities.
 13 Averages (to maturity or call) for all outstanding bonds neither due nor callable in less than 10 years, including one very low yielding "flower" bond.
 14 General obligations based on Thursday figures, Moody's Investors Service.
 15 General obligations only, with 20 years to maturity, issued by 20 state and local governmental units of mixed quality. Based on figures for Thursday.
 16 Daily figures from Moody's Investors Service. Based on yields to maturity on selected long term bonds.
 17 Compilation of the Federal Reserve. This series is an estimate of the yield on recently-offered, A-rated utility bonds with a 30 year maturity and 5 years of call protection. Weekly data are based on Friday quotations.
 18 Standard and Poor's corporate series. Preferred stock ratio based on a sample of ten issues: four public utilities, four industrials, one financial and one transportation. Common stock ratios on the 500 stocks in the price index.
 NOTE: These data also appear in the Board's H 15 (519) and G 13 (415) releases. For address, see inside front cover.

15 Short sales	70		80		65		55		65		50	

1 Effective July 1976 includes a new financial group banks and insurance companies. With this change the index includes 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40 financial.

2 Beginning July 5, 1983, the American Stock Exchange rebased its index effectively cutting previous readings in half.

3 Beginning July 1983, under the revised Regulation T, margin credit at broker dealers includes credit extended against stocks, convertible bonds, stocks acquired through exercise of subscription rights, corporate bonds, and government securities. Separate reporting of data for margin stocks, convertible bonds, and subscription issues was discontinued in April 1984.

4 Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

5 New series beginning June 1984.

6 These regulations, adopted by the Board of Governors pursuant to the Securities Exchange Act of 1934, limit the amount of credit to purchase and carry

margin securities'' (as defined in the regulations) when such credit is collateralized by securities. Margin requirements on securities other than options are the difference between the market value (100 percent) and the maximum loan value of collateral as prescribed by the Board. Regulation T was adopted effective Oct 15, 1934, Regulation U, effective May 1, 1936, Regulation G, effective Mar 11, 1968, and Regulation X, effective Nov 1, 1971.

On Jan 1 1977, the Board of Governors for the first time established in Regulation T the initial margin required for writing options on securities, setting it at 30 percent of the current market-value of the stock underlying the option. On Sept 30, 1985, the Board changed the required initial margin, allowing it to be the same as the option maintenance margin required by the appropriate exchange or self-regulatory organization, such maintenance margin rules must be approved by the Securities and Exchange Commission. Effective Jan 31, 1986 the SEC approved new maintenance margin rules, permitting margins to be the price of the option plus 15 percent of the market value of the stock underlying the option.

1 Contra assets are credit balance accounts that must be subtracted from the corresponding gross asset categories to yield net asset levels. Contra-assets to mortgage loans, contracts, and pass through securities include loans in process, unearned discounts and deferred loan fees, valuation allowances for mortgages held for sale, and specific reserves and other valuation allowances.

2 Contra assets are credit balance accounts that must be subtracted from the corresponding gross asset categories to yield net asset levels. Contra-assets to nonmortgage loans include loans in process, unearned discounts and deferred loan fees and specific reserves and valuation allowances.

3 Holding of stock in Federal Home Loan Bank and Finance leases plus interest are included in "Other" (line 9).

4 Excludes checking, club, and school accounts.

5 Data include all federally insured credit unions, both federal and state chartered, serving natural persons.

6 Direct and guaranteed obligations. Excludes federal agency issues not guaranteed, which are shown in the table under "Business" securities.

7 Issues of foreign governments and their subdivisions and bonds of the International Bank for Reconstruction and Development.

NOTE: FSLIC insured institutions. Estimates by the FHLBB for all institutions insured by the FSLIC and based on the FHLBB thrift Financial Report.

FSLIC insured federal savings banks. Estimates by the FHLBB for federal savings banks insured by the FSLIC and based on the FHLBB thrift Financial Report.

Savings banks. Estimates by the National Council of Savings Institutions for all savings banks in the United States and for FDIC-insured savings banks that have converted to federal savings banks.

Credit unions. Estimates by the National Credit Union Administration for federally chartered and federally insured state-chartered credit unions serving natural persons.

Life insurance companies. Estimates of the American Council of Life Insurance for all life insurance companies in the United States. Annual figures are annual statement asset values, with bonds carried on an amortized basis and stocks at year end market value. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately but are included, in total, in "other assets."

1 In accordance with the Balanced Budget and Emergency Deficit Control Act of 1985, all former off-budget entries are now presented on budget. The Federal Financing Bank (FFB) activities are now shown as separate accounts under the agencies that use the FFB to finance their programs. The act has also moved two social security trust funds (Federal old-age survivors insurance and Federal disability insurance trust funds) off-budget.

2 Includes SDRs, reserve position on the U S quota in the IMF, loans to

international monetary fund other cash and monetary assets, accrued interest payable to the public, allocations of special drawing rights, deposit funds, miscellaneous liability (including checks outstanding) and asset accounts, seigniorage, increment on gold, net gain/loss for U S currency valuation adjustment, net gain/loss for IMF valuation adjustment, and profit on the sale of gold.

1 Functional details do not add to total outlays for calendar year data because revisions to monthly totals have not been distributed among functions. Fiscal year total for outlays does not correspond to calendar year data because revisions from the Budget have not been fully distributed across months.

2 Old-age, disability, and hospital insurance, and railroad retirement accounts.

3 Old-age, disability, and hospital insurance.

4 Federal employee retirement contributions and civil service retirement and disability fund.

5 Deposits of earnings by Federal Reserve Banks and other miscellaneous receipts.

6 Net interest function includes interest received by trust funds.

7 Consists of rents and royalties on the outer continental shelf and U S government contributions for employee retirement.

1 Transactions are market purchases and sales of securities as reported to the Federal Reserve Bank of New York by the U S government securities dealers on its published list of primary dealers

Averages for transactions are based on the number of trading days in the period. The figures exclude allotments of and exchanges for new U S Treasury securities, redemptions of called or matured securities, purchases or sales of securities under repurchase agreement, reverse repurchase (resale), or similar contracts

2 Data for immediate transactions do not include forward transactions

3 Includes among others, all other dealers and brokers in commodities and

securities, nondealer departments of commercial banks foreign banking agencies, and the Federal Reserve System

4 Futures contracts are standardized agreements arranged on an organized exchange in which parties commit to purchase or sell securities for delivery at a future date

5 Forward transactions are agreements arranged in the over the counter market in which securities are purchased (sold) for delivery after 5 business days from the date of the transaction for Treasury securities (Treasury bills notes and bonds) or after 30 days for mortgage-backed agency issues

1 Data for dealer positions and sources of financing are obtained from reports submitted to the Federal Reserve Bank of New York by the U S Treasury securities dealers on its published list of primary dealers

Data for positions are averages of daily figures, in terms of par value, based on the number of trading days in the period. Positions are net amounts and are shown on a commitment basis. Data for financing are in terms of actual amounts borrowed or lent and are based on Wednesday figures

2 Immediate positions are net amounts (in terms of par values) of securities owned by nonbank dealer firms and dealer departments of commercial banks on a commitment, that is, trade-date basis, including any such securities that have been sold under agreements to repurchase (RPs). The maturities of some repurchase agreements are sufficiently long, however, to suggest that the securities involved are not available for trading purposes. Immediate positions include

reverses to maturity, which are securities that were sold after having been obtained under reverse repurchase agreements that mature on the same day as the securities. Data for immediate positions do not include forward positions

3 Figures cover financing involving U S Treasury and federal agency securities, negotiable CDs, bankers acceptances, and commercial paper

4 Includes all reverse repurchase agreements, including those that have been arranged to make delivery on short sales and those for which the securities obtained have been used as collateral on borrowings that is, matched agreements

5 Includes both repurchase agreements undertaken to finance positions and matched book⁶ repurchase agreements

NOTE: Data on positions for the period May 1 to Sept 30, 1986, are partially estimated

1 Consists of mortgages assumed by the Defense Department between 1957 and 1963 under family housing and homeowners assistance programs

2 Includes participation certificates, reclassified as debt beginning Oct 1 1976

3 Off budget Aug 17, 1974, through Sept 30, 1976 on-budget thereafter

4 Consists of debentures issued in payment of Federal Housing Administration insurance claims Once issued these securities may be sold privately on the securities market

5 Certificates of participation issued before fiscal 1969 by the Government National Mortgage Association acting as trustee for the Farmers Home Administration, Department of Health, Education, and Welfare, Department of Housing and Urban Development, Small Business Administration, and the Veterans Administration

6 Off budget

7 Includes outstanding noncontingent liabilities notes bonds, and debentures Some data are estimated

8 Excludes borrowing by the Farm Credit Financial Assistance Corporation shown in line 17

9 Before late 1981, the Association obtained financing through the Federal Financing Bank (FFB) Borrowing excludes that obtained from the FFB, which is shown on line 21

10 The Financing Corporation, established in August 1987 to recapitalize the Federal Savings and Loan Insurance Corporation undertook its first borrowing in October 1987

11 The Farm Credit Financial Assistance Corporation (established in January 1988 to provide assistance to the Farm Credit System) undertook its first borrowing in July 1988

12 The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other federal agencies Since FFB incurs debt solely for the purpose of lending to other agencies its debt is not included in the main portion of the table in order to avoid double counting

13 Includes FFB purchases of agency assets and guaranteed loans, the latter contain loans guaranteed by numerous agencies with the guarantees of any particular agency being generally small The Farmers Home Administration item consists exclusively of agency assets, while the Rural Electrification Administration entry contains both agency assets and guaranteed loans

1 Figures which represent gross proceeds of issues maturing in more than one year, are principal amount or number of units multiplied by offering price. Excludes secondary offerings, employee stock plans, investment companies other than closed-end, intracorporate transactions, equities sold abroad, and Yankee bonds. Stock data include ownership securities issued by limited partnerships.

2 Monthly data include only public offerings.
3 Data are not available on a monthly basis. Before 1987, annual totals include underwritten issues only.

1 Weighted averages based on sample surveys of mortgages originated by major institutional lender groups, compiled by the Federal Home Loan Bank Board in cooperation with the Federal Deposit Insurance Corporation

2 Includes all fees, commissions, discounts and "points" paid (by the borrower or the seller) to obtain a loan

3 Average effective interest rates on loans closed assuming prepayment at the end of 10 years

4 Average contract rates on new commitments for conventional first mortgages, from Department of Housing and Urban Development

5 Average gross yields on 30-year minimum-downpayment, Federal Housing Administration insured first mortgages for immediate delivery in the private secondary market. Based on transactions on first day of subsequent month. Large monthly movements in average yields may reflect market adjustments to changes in maximum permissible contract rates

6 Average net yields to investors on Government National Mortgage Association guaranteed, mortgage backed fully modified pass-through securities, assuming prepayment in 12 years on pools of 30-year FHA/VA mortgages carrying the prevailing ceiling rate. Monthly figures are averages of Friday figures from the *Wall Street Journal*

7 Includes some multifamily and nonprofit hospital loan commitments in addition to 1 to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMA-GNMA tandem plans

8 Includes participation as well as whole loans

9 Includes conventional and government underwritten loans. FHLMC's mortgage commitments and mortgage transactions include activity under mortgage/securities swap programs, while the corresponding data for FNMA exclude swap activity

1 Based on data from various institutional and governmental sources, with some quarters estimated in part by the Federal Reserve. Multifamily debt refers to loans on structures of five or more units.

2 Includes loans held by nondeposit trust companies but not bank trust departments.

3 Includes savings banks and savings and loan associations. Beginning 1987, data reported by FSLIC insured institutions include loans in process and other contra assets (credit balance accounts that must be subtracted from the corresponding gross asset categories to yield net asset levels).

4 Assumed to be entirely 1- to 4 family loans.

5 FmHA-guaranteed securities sold to the Federal Financing Bank were reallocated from FmHA mortgage pools to FmHA mortgage holdings in 1986, 4, because of accounting changes by the Farmers Home Administration.

6 Outstanding principal balances of mortgage pools backing securities insured or guaranteed by the agency indicated.

7 Other holders include mortgage companies, real estate investment trusts, state and local credit agencies, state and local retirement funds, noninsured pension funds, credit unions and other U.S. agencies.

NOTES BY LINE NUMBER

- 1 Line 1 of table 1 57
2 Sum of lines 3-6 or 7-10
6 Includes farm and commercial mortgages
11 Credit market funds raised by federally sponsored credit agencies, and net issues of federally related mortgage pool securities
13 Line 1 less line 2 plus line 11 and 12 Also line 20 less line 27 plus line 33
Also sum of lines 28 and 47 less lines 40 and 46
18 Includes farm and commercial mortgages
26 Line 39 less lines 40 and 46
27 Excludes equity issues and investment company shares Includes line 19
29 Foreign deposits at commercial banks bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign affiliates less claims on foreign affiliates and deposits by banking in foreign banks
30 Demand deposits and note balances at commercial banks

- 31 Excludes net investment of these reserves in corporate equities
32 Mainly retained earnings and net miscellaneous liabilities
33 Line 13 less line 20 plus line 27
34-38 Lines 14-18 less amounts acquired by private finance plus amounts borrowed by private finance Line 38 includes mortgages
40 Mainly an offset to line 9
47 Lines 33 plus 39 or line 13 less line 28 plus 40 and 46
48 Line 2/line 1
49 Line 20/line 13
50 Sum of lines 10 and 29
51 52 Includes issues by financial institutions
NOTE Full statements for sectors and transaction types in flows and in amounts outstanding may be obtained from Flow of Funds Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D C 20551

1 A major revision of the industrial production index and the capacity utilization rates was released in July 1985. See "A Revision of the Index of Industrial Production" and accompanying tables that contain revised indexes (1977=100) through December 1984 in the FEDERAL RESERVE BULLETIN, vol. 71 (July 1985), pp. 487-501. The revised indexes for January through June 1985 were shown in the September BULLETIN.

2 Ratios of indexes of production to indexes of capacity. Based on data from Federal Reserve, McGraw-Hill Economics Department, Department of Commerce, and other sources.

3 Index of dollar value of total construction contracts, including residential, nonresidential and heavy engineering, from McGraw-Hill Information Systems Company, F. W. Dodge Division.

4 Based on data in *Employment and Earnings* (U.S. Department of Labor). Series covers employees only, excluding personnel in the Armed Forces.

5 Based on data in *Survey of Current Business* (U.S. Department of Commerce).

6 Based on Bureau of Census data published in *Survey of Current Business*.

7 Data without seasonal adjustment, as published in *Monthly Labor Review*. Seasonally adjusted data for changes in the price indexes may be obtained from the Bureau of Labor Statistics, U.S. Department of Labor.

NOTE: Basic data (not index numbers) for series mentioned in notes 4, 5, and 6, and indexes for series mentioned in notes 3 and 7 may also be found in the *Survey of Current Business*.

Figures for industrial production for the last two months are preliminary and estimated, respectively.

2.11 LABOR FORCE, EMPLOYMENT, AND UNEMPLOYMENT

Thousands of persons, monthly data are seasonally adjusted Exceptions noted

1 Persons 16 years of age and over. Monthly figures, which are based on sample data, relate to the calendar week that contains the 12th day, annual data are averages of monthly figures. By definition, seasonality does not exist in population figures. Based on data from *Employment and Earnings* (U.S. Department of Labor).

2 Includes self-employed, unpaid family, and domestic service workers.

3 Data include all full and part-time employees who worked during or received pay for, the pay period that includes the 12th day of the month, and exclude proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the Armed Forces. Data are adjusted to the March 1984 benchmark and only seasonally adjusted data are available at this time. Based on data from *Employment and Earnings* (U.S. Department of Labor).

2 12 OUTPUT, CAPACITY, AND CAPACITY UTILIZATION¹

A major revision of the industrial production index and the capacity utilization rates was released in July 1985. See "A Revision of the Index of

Industrial Production" and accompanying tables that contain revised indexes (1977=100) through December 1984 in the FEDERAL RESERVE BULLETIN, vol. 71 (July 1985), pp. 487-501. The revised indexes for January through June 1985 were shown in the September BULLETIN.

1 Not at annual rates

2 Not seasonally adjusted

3 Value of new construction data in recent periods may not be strictly comparable with data in previous periods because of changes by the Bureau of the Census in its estimating techniques. For a description of these changes see *Construction Reports (C-30-76-3)*, issued by the Bureau in July 1976

NOTE: Census Bureau estimates for all series except (1) mobile homes, which are private, domestic shipments as reported by the Manufactured Housing Institute and seasonally adjusted by the Census Bureau, and (2) sales and prices of existing units, which are published by the National Association of Realtors. All back and current figures are available from the originating agency. Permit authorizations are those reported to the Census Bureau from 16,000 jurisdictions beginning with 1978.

41 Transfers under military grant programs (excluded from lines 4, 6, and 10 above)	46	101	58	13	12	45	4	5

¹ Seasonal factors are not calculated for lines 6, 10, 12-16, 18-20, 22-34, and 38-41.

² Data are on an international accounts (IA) basis. Differs from the Census basis data, shown in table 3 11, for reasons of coverage and timing. Military exports are excluded from merchandise data and are included in line 6.

³ Reporting banks include all kinds of depository institutions besides commercial banks, as well as some brokers and dealers.

⁴ Primarily associated with military sales contracts and other transactions arranged with or through foreign official agencies.

⁵ Consists of investments in U S corporate stocks and in debt securities of private corporations and state and local governments.

NOTE: Data are from Bureau of Economic Analysis, *Survey of Current Business* (Department of Commerce).

1 The Census basis data differ from merchandise trade data shown in table 3 10, U S International Transactions Summary, for reasons of coverage and timing. On the *export side*, the largest adjustment is the exclusion of military sales (which are combined with other military transactions and reported separately in the "service account" in table 3 10, line 6). On the *import side*, additions are made for gold, ship purchases, imports of electricity from Canada, and other transac-

tions, military payments are excluded and shown separately as indicated above. As of Jan 1, 1987 census data are released 45 days after the end of the month, the previous month is revised to reflect late documents. Total exports and the trade balance reflect adjustments for undocumented exports to Canada.

1 Gold held under earmark at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States, see table 3 13. Gold stock is valued at \$42.22 per fine troy ounce.

2 Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of member countries. From July 1974 through December 1980, 16 currencies were used, from January 1981, 5 currencies have been used. The U S SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

3 Includes allocations by the International Monetary Fund of SDRs as follows: \$867 million on Jan 1, 1970, \$717 million on Jan 1, 1971, \$710 million on Jan 1, 1972, \$1,139 million on Jan 1, 1979, \$1,152 million on Jan 1, 1980, and \$1,093 million on Jan 1, 1981, plus transactions in SDRs.

4 Valued at current market exchange rates.

3 13 FOREIGN OFFICIAL ASSETS HELD AT FEDERAL RESERVE BANKS¹

Millions of dollars, end of period

Assets	1985	1986	1987	1988						
				May	June	July	Aug	Sept	Oct	Nov ^p
1 Deposits	480	287	244	297	381	269	230	338	301	251
Assets held in custody										
2 U S Treasury securities ²	121,004	155,835	195,126	226,341	223,127	223,296	221,715	221,119	226,533	229,926

1 Data for banks' own claims are given on a monthly basis, but the data for claims of banks' own domestic customers are available on a quarterly basis only.

Reporting banks include all kinds of depository institutions besides commercial banks, as well as some brokers and dealers.

2 U.S. banks includes amounts due from own foreign branches and foreign subsidiaries consolidated in Consolidated Report of Condition filed with bank regulatory agencies. Agencies' branches and majority owned subsidiaries of foreign banks principally amounts due from head office or parent foreign bank

and foreign branches, agencies, or wholly owned subsidiaries of head office or parent foreign bank.

3 Assets owned by customers of the reporting bank located in the United States that represent claims on foreigners held by reporting banks for the account of their domestic customers.

4 Principally negotiable time certificates of deposit and bankers' acceptances.

5 Includes demand and time deposits and negotiable and nonnegotiable certificates of deposit denominated in U.S. dollars issued by banks abroad. For description of changes in data reported by nonbanks, see July 1979 BUI LITIN p. 550.

1 The banking offices covered by these data are the U S offices and foreign branches of U S owned banks and of U S subsidiaries of foreign owned banks. Offices not covered include (1) U S agencies and branches of foreign banks, and (2) foreign subsidiaries of U S banks. To minimize duplication the data are adjusted to exclude the claims on foreign branches held by a U S office or another foreign branch of the same banking institution. The data in this table combine foreign branch claims in table 3 14 (the sum of lines 7 through 10) with the claims of U S offices in table 3 18 (excluding those held by agencies and branches of foreign banks and those constituting claims on own foreign branches.)

2 Beginning with June 1984 data, reported claims held by foreign branches have been reduced by an increase in the reporting threshold for shell branches

from \$50 million to \$150 million equivalent in total assets the threshold now applicable to all reporting branches.

3 This group comprises the Organization of Petroleum Exporting Countries shown individually other members of OPPEC (Algeria Gabon Iran Iraq Kuwait Libya, Nigeria, Qatar, Saudi Arabia and United Arab Emirates), and Bahrain and Oman (not formally members of OPEC.)

4 Excludes Liberia

5 Includes Canal Zone beginning December 1979

6 Foreign branch claims only

7 Includes New Zealand, Liberia and international and regional organizations

1 Estimated official and private transactions in marketable U S Treasury securities with an original maturity of more than 1 year. Data are based on monthly transactions reports. Excludes nonmarketable U S Treasury bonds and notes held by official institutions of foreign countries.

2 Includes U S Treasury notes publicly issued to private foreign residents denominated in foreign currencies.

3 Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

4 Comprises Algeria, Gabon, Libya, and Nigeria.

3 26 DISCOUNT RATES OF FOREIGN CENTRAL BANKS

Percent per year

Country	Rate on Dec 31, 1988		Country	Rate on Dec 31, 1988		Country	Rate on Dec 31, 1988	
	Percent	Month effective		Percent	Month effective		Percent	Month effective
Austria	4 0	Aug 1988	France ¹	7 75	Dec 1988	Norway	8 0	June 1983
Belgium	7 5	Dec 1988	Germany, Fed Rep of	3 5	Aug 1988	Switzerland	3 5	Dec 1988
Brazil	49 0	Mar 1981	Italy	12 5	Aug 1988	United Kingdom ²		
Canada	11 17	Dec 1988	Japan	2 5	Feb 1987	Venezuela	8 0	Oct 1985
Denmark	7 0	Oct 1983	Netherlands	4 5	Dec 1988			

1 As of the end of February 1981, the rate is that at which the Bank of France discounts Treasury bills for 7 to 10 days

2 Minimum lending rate suspended as of Aug '0 1981

NOTE Rates shown are mainly those at which the central bank either discounts

or makes advances against eligible commercial paper and/or government commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations

3 27 FOREIGN SHORT-TERM INTEREST RATES

Percent per year, averages of daily figures

1 Averages of certified noon buying rates in New York for cable transfers. Data in this table also appear in the Board's G 5 (405) release. For address see inside front cover.

2 Value in U S cents

3 Index of weighted average exchange value of U S dollar against the

currencies of 10 industrial countries. The weight for each of the 10 countries is the 1972-76 average world trade of that country divided by the average world trade of all 10 countries combined. Series revised as of August 1978 (see FEDERAL RESERVE BULLETIN, vol 64, August 1978, p 700).

Guide to Tabular Presentation, Statistical Releases, and Special Tables

GUIDE TO TABULAR PRESENTATION

Symbols and Abbreviations

c	Corrected	0	Calculated to be zero
e	Estimated	n a	Not available
p	Preliminary	n e c	Not elsewhere classified
r	Revised (Notation appears on column heading when about half of the figures in that column are changed)	IPCs	Individuals, partnerships, and corporations
*	Amounts insignificant in terms of the last decimal place shown in the table (for example, less than 500,000 when the smallest unit given is millions)	REITs	Real estate investment trusts
		RPs	Repurchase agreements
		SMSAs	Standard metropolitan statistical areas
			Cell not applicable

General Information

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow

"U S government securities" may include guaranteed issues of U S government agencies (the flow of funds figures also include not fully guaranteed issues) as well as direct

obligations of the Treasury "State and local government" also includes municipalities, special districts, and other political subdivisions

In some of the tables, details do not add to totals because of rounding
