# FEDERAL RESERVE BULLETIN

---

**Monetary Policy Report to Congress**

**FEDERAL RESERVE BULLETIN (USPS 351-150): Controlled Circulation Postage Paid at Richmond, Virginia. POSTMASTER: Send address changes to Publications Services, MP-510, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.**

---

A copy of the FEDERAL RESERVE BULLETIN is sent to each member bank without charge; member banks desiring additional copies may secure them at a special \$10.00 annual rate. The regular subscription price in the United States and its possessions, and in Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$20.00 per annum or \$2.00 per copy; elsewhere, \$24.00 per annum or \$2.50 per copy. Group subscriptions in the United States for 10 or more copies to one address, \$1.75 per copy per month, or \$18.00 for 12 months.

The BULLETIN may be obtained from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and remittance should be made payable to the order of the Board of Governors of the Federal Reserve System in a form collectible at par in U.S. currency. (Stamps and coupons are not accepted.)

VOLUME 66 □ NUMBER 7 □ JULY 1980

# FEDERAL RESERVE BULLETIN

Board of Governors of the Federal Reserve System  
Washington, D.C.

## PUBLICATIONS COMMITTEE:

Joseph R. Coyne, *Chairman* □ Stephen H. Axilrod □ John M. Denkler  
Janet O. Hart □ James L. Kichline □ Neal L. Petersen □ Edwin M. Truman

Michael J. Prell, *Staff Director*

The FEDERAL RESERVE BULLETIN is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. The artwork is provided by the Graphic Communications Section under the direction of Peter G. Thomas. Editorial support is furnished by the Economic Editing Unit headed by Mendelle T. Berenson.

# Table of Contents

## 531 *MONETARY POLICY REPORT TO CONGRESS*

Submitted pursuant to the Full Employment and Balanced Growth Act of 1978, the Board's report states that economic and financial developments over the next six months will lay the groundwork for the recovery—anticipated for 1981—from the current recession.

## 543 *STAFF STUDIES*

“Foreign Ownership and the Performance of U.S. Banks” examines the growth and operations both of existing U.S. banks acquired by foreign parties and of U.S. banks that were established by foreign banks.

## 545 *INDUSTRIAL PRODUCTION*

Output declined 2.4 percent in June.

## 547 *STATEMENTS TO CONGRESS*

Governor Lyle E. Gramley discusses measures to improve control over federally assisted credit programs; establishment of a credit budget will assist in the evaluation and control of federal credit activities and will enhance the long-run prospects for increased private capital formation, before the Special Subcommittee on Control of Federal Credit of the Senate Budget Committee, June 19, 1980.

550 Governor Henry C. Wallich gives the views of the Board on the nonbanking activities of foreign bank holding companies, including the nonbanking prohibitions of the Bank Holding Company Act, the exemptions the act provides for foreign bank holding companies, and the Federal Reserve's interpretations of those exemptions, before the Subcommittee on Commerce, Consumer

and Monetary Affairs of the House Committee on Government Operations, June 25, 1980.

555 Governor J. Charles Partee testifies on two banking bills: one would limit the insurance activities of bank holding companies, whereas the Board believes that banking organizations should be allowed to sell credit-related insurance; the other would subject acquisitions of banking organizations to stricter standards than in the present antitrust laws and would tighten the rules for expansion into nonbanking activities by bank holding companies, although the Board believes the present procedures should be continued, before the Senate Committee on Banking, Housing and Urban Affairs, July 1, 1980.

## 559 *ANNOUNCEMENTS*

Phaseout of special measures of credit restraint.

Change in discount rate.

Amendment to Regulation T. (See Legal Developments.)

Survey of foreign lending by large U.S. banks.

Adoption of standard terms and guidelines by the bank regulatory agencies.

Meeting of Consumer Advisory Council.

Changes in Board staff.

Proposed procedures for nonmember depository institutions.

Availability of banking data for Edge and Agreement corporations.

Admission of two state banks to membership in the Federal Reserve System.

565 *RECORD OF POLICY ACTIONS OF THE  
FEDERAL OPEN MARKET COMMITTEE*

At its meeting on May 20, 1980, the Committee agreed that open market operations in the period until the next meeting should be directed toward expansion of reserve aggregates consistent with growth of M-1A, M-1B, and M-2 at rates high enough to promote achievement of the Committee's objectives for monetary growth for the year as a whole, provided that in the period before the next regular meeting the weekly average federal funds rate remained within a range of 8½ to 14 percent. Specifically, the Committee agreed that operations should be directed toward encouraging growth of M-1A, M-1B, and M-2 over May and June at annual rates of 7 to 7½ percent, 7½ to 8 percent, and about 8 percent respectively. The Committee also agreed that, in light of the recent shortfall, moderately faster monetary growth would be acceptable if that developed in response to a strengthening of the demand for money.

571 *LEGAL DEVELOPMENTS*

Amendments, interpretations, or revisions to the Board's Regulations D, T, G, and Y,

to the credit restraint program, and to regulations of the Depository Institutions De-regulation Committee; various bank holding company and bank merger orders; and pending cases.

## *THE OUTLOOK FOR THE ECONOMY AND MONETARY POLICY OBJECTIVES*

### *The Outlook for the Economy*

The economy moved into recession in the first half of this year. A cyclical downturn had been widely anticipated for some time, but the decline in spending, output, and employment, once under way, has been steeper than most analysts had foreseen. The second-quarter decrease in real gross national product, at an annual rate of about 9 percent according to the Commerce Department's preliminary estimate, was considerably sharper than in the initial quarters of other post-war recessions.

The slump in activity has been most pronounced in the housing and auto industries—the latter sector being adversely affected by structural problems as well as by general cyclical pressures. But the decline has not been limited to these sectors. Retail sales excluding autos have dropped considerably since January, and business outlays for equipment and new construction also have fallen.

The very sharp curtailment of spending on houses and consumer goods and services in the current downturn probably is attributable in large part to the cumulative effect of inflation on consumers' financial well-being. Real disposable personal income was virtually flat in 1979 and has declined appreciably this year. Earlier, consumers had reduced their rate of saving in the face of shortfalls in real income in an effort to maintain consumption standards and in anticipa-

tion of inflation. This was accomplished by further rapid growth in installment and mortgage credit in the late stages of the recent expansion, but with the result that debt service burdens—which already were at high levels historically—continued to climb. Sharply higher interest rates and generally more stringent credit terms in late 1979 and early 1980 acted as additional deterrents to spending, encouraging households in their efforts to reduce debt and to rebuild savings.

The falloff in final sales has caused businesses to spend more cautiously. This tendency has been reinforced by financial factors as well. The liquidity position of businesses had deteriorated appreciably during the expansion, particularly in the latter stages when there was a surge in short-term borrowing; many firms now are making strong efforts to restructure balance sheets.

The unexpected rapidity of the current downturn thus far has led analysts to reassess their view of the prospects for economic activity in the period ahead. Significant disagreement has arisen with regard to whether recovery will be prompt and strong, with the recent relaxation of credit market conditions encouraging a resumption of normal spending patterns, or whether the cyclical adjustment will be prolonged and the subsequent upturn possibly sluggish. The experience of the past year or so has demonstrated the hazards of forecasting, and the uncertainties at the present time clearly are substantial. Much will depend, for example, on the perceptions of businessmen about the longer-range prospects for demand and the attractiveness of investment, the response of consumers to the 1981-model-year automobiles, and the strength of the rebound in housing that may develop in the wake of the recent easing in mortgage market conditions.

There are signs that the contraction in some sectors may be nearing an end, but these are far from conclusive. Retail sales in June turned up

---

1. The charts and appendixes for this report are available on request from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

slightly after four months of sharp decline; in the first ten days of July auto sales were at the strongest pace in three months. Housing starts and sales of new homes strengthened in the most recent months for which data are available.

In reflection of the prevailing uncertainties, there is a considerable range of views among the members of the Federal Open Market Committee (FOMC) regarding the movement of major economic variables over the remainder of the year. Most of the members believe that the recession probably will persist into the fourth quarter, with a cumulative net drop in real gross national product less than that in the downside of 1973-75. Although the decline should slow in the months ahead, employment may be cut back further, and the unemployment rate could rise beyond 8½ percent by year-end. The increasing slack in labor markets and in industrial capacity utilization should at the same time help to moderate inflationary pressures.

The accompanying table presents ranges for key economic variables that generally encompass the judgments of the individual FOMC members about the probable performance of the economy this year and in 1981.

Item	Actual	Projected	
	1979	1980	1981
<i>Change from fourth quarter to fourth quarter, percent</i>			
Nominal GNP .....	9.9	5 to 7½	8½ to 11½
Real GNP .....	1.0	-5 to -2½	½ to 3
Implicit GNP deflator .....	8.9	9 to 10	7½ to 9½
<i>Average level in fourth quarter, percent</i>			
Unemployment rate .....	5.9	8½ to 9½	8 to 9½

The outlook for 1981 is especially uncertain at the current time. Economic and financial developments over the next six months should lay the groundwork for the recovery anticipated in 1981. But, in addition, any actions taken in the fiscal arena would have an impact on the path of recovery. The projections presented in the table, which do not assume a tax cut in the next year, indicate a turnaround in economic activity—although there is a considerable range of views concerning the potential strength of the recovery.

On balance, the forecast is for a moderate rebound in real GNP, accompanied by some further slackening in the pace of inflation. Unemployment, however, is likely to remain high throughout the year.

Should there be a tax cut in 1981, the impact on economic performance will, of course, depend on its timing and composition. There is the distinct—and very troubling—possibility that a poorly designed tax reduction, or one not coupled with adequate restraint on the expenditure side, might give rise to added inflationary and financial pressures that would in time dissipate the beneficial short-term effects of the fiscal stimulus. Any indication that the Congress and the administration were moving away from a commitment to rigorous fiscal discipline would run the risk of reinvigorating the inflationary expectations that have played such a major role in the economy's difficulties. The Committee thus feels it important that the question of a tax cut be approached cautiously; if a tax cut ultimately is enacted, it should be carefully structured to enhance the productive potential of our economy and to yield the greatest relief from cost and price pressures over the longer run.

### *Monetary Policy Objectives*

The task for monetary policy—and for stabilization policy generally—in the current circumstances obviously is a difficult one. Recession naturally summons forth calls for stimulus to aggregate demand. The prevailing high level of unemployment and the exceptional weakness apparent in particular industries and sectors of our economy certainly must be given careful consideration in the formulation of public policy. But caution must be exercised in the application of any broad countercyclical stimulus, especially in the present environment of persistent inflationary pressures. Indeed, there is no clearer lesson from the experience of the past decade and a half than that excessive stimulus is detrimental to the objective of achieving and sustaining non-inflationary, balanced growth.

A primary and continuing goal of monetary policy must be to curb the accelerating inflationary cycle. It now appears that some progress is

beginning to be made in that direction. Price increases have slowed considerably from the pace of early in the year, in part reflecting some relief in the food and energy sectors, but also as a result of the drop in demand pressures. In addition, recent attitudinal surveys point to a reduction in inflationary expectations. The continuation of this trend in expectations will result in a greatly improved economic and financial environment, one more conducive to long-term growth. We already have witnessed one benefit of an easing of inflationary fears: a substantial decline in long-term interest rates from their highs earlier this year and a revitalization of the bond markets. The Federal Reserve's pursuit of a policy of monetary restraint—evidenced this year by a moderation of money growth—has been an important factor in this turn in expectations; a sustained commitment to the attainment of non-inflationary rates of money and credit growth is essential if this progress is to be extended.

Despite the improvement that has occurred, however, inflationary forces are far from subdued. The past years have left a legacy of adverse cost trends that will not be reversed quickly. Moreover, more extreme inflationary expectations easily could be reignited. In establishing its plans for growth in the monetary aggregates, the Federal Reserve will continue to place high priority on reducing inflation, believing that this is essential to fostering a sound and sustained recovery. Over the long term, a reduction in the underlying rate of inflation is essential for a strong U.S. economy, for encouraging the saving we will need to finance adequate capital investment, and for maintaining the position of the dollar in international markets.

But it is clear also that if inflation is to be restrained without undue disruption of economic activity we cannot rely solely on monetary policies. For example, fiscal discipline is essential to ensure that excessive pressure is not placed on the financial and real resources of the economy. The structure of our tax system should be examined with an eye to the incentives it provides for productivity-expanding research and capital formation. And the full range of governmental policies should be reviewed to ensure that they do not add needlessly to costs and do not stunt innovation and competition.

### *Money and Credit Growth in 1980 and 1981*

In February the Federal Reserve reported to the Congress ranges of growth for the monetary aggregates in 1980 that it believed to be consistent with the continuing objective of reducing inflationary pressures over time while providing for sustainable growth in the nation's production of goods and services. These ranges anticipated a substantial deceleration in monetary growth in 1980 from the pace of the preceding year. Measured from the fourth quarter of 1979 to the fourth quarter of 1980, the following ranges were adopted: for M-1A, 3½ to 6 percent; for M-1B, 4 to 6½ percent; for M-2, 6 to 9 percent; and for M-3, 6½ to 9½ percent. The associated range for bank credit expansion was 6 to 9 percent.

During the first half of 1980, growth of the monetary aggregates slowed considerably from the 1979 pace. The deceleration was particularly marked for the narrower aggregates, M-1A and M-1B, which grew at rates below the lower limits of their longer-run ranges—at annual rates of about ½ and 1¾ percent respectively from the fourth quarter of 1979 to the second quarter of 1980. (M-1A is currency and demand deposits held by the public, while M-1B includes checkable interest-bearing deposits as well.) At the same time, the broader aggregates, M-2 and M-3, grew at annual rates of 6½ and 6¾ percent respectively, which are somewhat above the lower limits of their ranges. In fact, by June, M-2—which includes money market fund shares and all deposits except large certificates of deposit (CDs) at banks and thrift institutions—was around the midpoint of its longer-run range, and M-3 slightly below, while the narrower aggregates were moving back toward their ranges, following an unusually sharp drop in early spring.

The contraction in the narrower aggregates during the second quarter was much greater than would have been expected on the basis of the historical relationships among money, income, and interest rates. This unusual weakness may have reflected exceptional efforts by the public to pare cash balances, such as have characterized some other periods following a sharp upward adjustment in market interest rates to new record levels. There may also have been an impact from the surge in

debt repayments, especially at banks, after the imposition of the credit control program in mid-March, with some of the funds apparently coming out of cash balances. In light of these special circumstances affecting the public's demand for transactions balances, and given the relative strength of the broader aggregates and the usual lags between changes in credit conditions and growth in the narrower aggregates, the FOMC believed it appropriate to foster a more gradual return of M-1 growth to the ranges established earlier.

In connection with reserve-targeting procedures, System open market operations supplied a large volume of nonborrowed reserves over the course of the second quarter. Given the weak demand for money and bank credit, most of the added nonborrowed reserves were used by banks to repay borrowings from the Federal Reserve discount window. Borrowings fell from a high of \$2.8 billion on average in March to minimal levels recently, and the easing of bank reserve positions was reflected in a sharp decline in the federal funds rate. From their peaks of late March or early April, short-term interest rates have declined 7 to 9 percentage points and long-term rates by roughly 2 to 3 percentage points.

Expansion in the broader aggregates over the first half of the year reflected the very rapid growth for much of the time in money market mutual fund shares, 6-month money market certificates, and 2½-year small saver certificates, instruments that pay market rates of interest. Late in the period, as short-term market interest rates declined sharply, the contraction in savings deposits at banks and other depository institutions halted, and the outstanding amount of those deposits began to rise. For part of the period, growth in M-3 was sustained also by continued issuance of large time deposits by commercial banks and thrift institutions, which are included in M-3 but not in M-2; however, large time deposits began to contract in late spring as credit demands weakened substantially.

Bank credit growth greatly exceeded the FOMC's range in the first quarter of the year. The second quarter, however, saw a sharp contraction in this measure, and credit growth was well below the FOMC-specified range as of mid-year. Demands for bank loans by households and businesses dropped abruptly in the second quar-

ter, while the banks—concerned about the possible erosion of profit margins by high-cost funds obtained earlier and seeking to conform to the guidelines of the March 14 special credit restraint program—pursued relatively tight lending policies. Businesses, meanwhile, have met a substantial portion of their credit needs through issuance of commercial paper (which serves as a close substitute for bank credit for many large firms), by borrowing in bond markets, and by reducing holdings of liquid assets. Over the half year, the total of credit advanced by banks and in the private short-term money markets rose at an annual rate of around 7½ percent.

At its meeting in July, the Federal Open Market Committee reassessed the ranges it had adopted for monetary growth in 1980 and formulated preliminary goals for 1981. The Committee elected to retain the previously established ranges for the aggregates over the remainder of 1980. This decision by the Committee took into consideration the recent behavior of the money stock measures as well as emerging economic conditions. In this regard it was recognized that, if the public continues to economize on cash balances to an unusual degree in the second half of the year, growth in the narrower aggregates would likely fall toward the lower end of the established ranges.

With respect to the broader aggregates, growth in the second half is likely to place them nearer the midpoints of their respective ranges and, in the case of M-2, quite possibly in the upper half of its range. Recent trends suggest that a continued substantial expansion in the interest-bearing-nontransactions component of M-2 is likely. In the current cyclical environment, consumers have begun to reevaluate their financial positions and have reduced their borrowing and adjusted upward their rate of saving. Thus, if the recent lower level of interest rates persists, the outlook is for an augmented flow of funds to depository institutions along with continued, though slower, growth in money market mutual funds.

The Committee also noted that the recent sharp contraction in bank credit makes it quite likely that this measure will fall below the 6 to 9 percent growth range specified in February. A resumption of bank credit expansion during the second half is anticipated, but the strength of that move will depend to a considerable extent on

patterns of corporate finance. The desire for balance sheet restructuring may well continue to mute business loan demands, although weaker corporate cash flows and a narrowing of the spread of the prime rate over commercial paper rates likely will prompt some borrowing at banks. Mortgage loan demands also should begin to recover as the year progresses, and the runoff in consumer loans is expected to abate.

One factor that contributed to the recent weakness in bank lending was the Board's special credit restraint program. As announced earlier, the program is being phased out this month because there is now no evident need for extraordinary measures to hold bank lending within reasonable bounds. In removing the special controls, the Board has emphasized its intention to continue to maintain aggregate growth in money and credit at rates consistent with a reduction in inflationary pressures.

With regard to monetary policy over the longer run, the FOMC reiterates its intent to seek reduced rates of monetary expansion over coming years, consistent with a return to price stability. While there is broad agreement in the Committee that it is appropriate to plan for some further progress in 1981 toward reduction of the targeted ranges, most members believe it would be premature at this time to set forth precise ranges for each monetary aggregate for next year, given the uncertainty of the economic outlook and institutional changes affecting the relationships among the aggregates. The extent and timing of adjustments in the targets will depend upon an appraisal of the outlook at the end of the year. The appropriate money growth in 1981 relative to 1980 of course will depend to some extent on the outcome in this year—that is, on exactly where in the present ranges the various aggregates fall at year-end.

In addition, the various measures of money will be affected in 1981 by shifts in the demand for different types of financial assets. The introduction of negotiable order of withdrawal (NOW) accounts on a nationwide basis in January will accelerate the shift from regular demand deposits into interest-earning transactions balances, thereby depressing M-1A growth next year. On the other hand, M-1B probably will be boosted somewhat next year by shifts from savings deposits and other interest-bearing assets in-

to NOW accounts. The range for M-1B thus may have to accommodate a period of abnormal growth as the public adjusts to the availability of a new instrument. The experience of the past year and a half with automatic transfer service (ATS) accounts has indicated the difficulty of estimating in advance the public's demand for such balances. Although growth in M-2 and M-3 will not be affected by NOW account movements, these broader aggregates include other relatively new financial instruments, the demand for which is still subject to uncertainty. The behavior of these instruments in coming months will aid the FOMC in determining appropriate growth ranges for the broader aggregates in the 1981 period.

*The Administration's Short-Term Economic Goals and the Relationship of Federal Reserve Objectives to These Goals*

The administration, in association with its mid-year budget review, has updated its forecast of the behavior of major economic variables for 1980 and 1981. The revised figures are shown in the accompanying table.

These estimates, which the administration has indicated should be viewed as forecasts rather than as goals, show a considerably greater decline in real activity in 1980 than had been anticipated in the January *Economic Report of the President*. The outlook for growth in nominal GNP through year-end has been lowered by a small amount, owing to a somewhat higher anticipated rate of inflation for the four quarters of 1980. The administration's projections for this

Item	1980	1981
<i>Change from fourth quarter to fourth quarter, percent</i>		
Nominal GNP .....	6 <sup>3</sup> / <sub>4</sub>	12 <sup>1</sup> / <sub>2</sub>
Real GNP .....	-3	1 <sup>1</sup> / <sub>2</sub>
Implicit price deflator .....	10	9 <sup>3</sup> / <sub>4</sub>
<i>Average level in fourth quarter, percent</i>		
Unemployment rate .....	8 <sup>1</sup> / <sub>2</sub>	8 <sup>1</sup> / <sub>2</sub>

year fall within the ranges expected by the members of the FOMC.

The administration has projected a resumption of output growth next year that places real GNP

near the upper end of the range encompassed by the forecasts of the members of the FOMC. At the same time, the administration's estimates place the rate of inflation somewhat above the range of the FOMC members' expectations. (Like the FOMC members' projections, the administration's forecast does not include a tax cut provision for 1981.)

As indicated in the preceding section, the Federal Reserve intends to set monetary growth ranges for 1981 that will help to restrain inflationary pressures in the recovery period. As experience this year illustrates, considerable uncertainty attaches to any analysis of the relationships over relatively short periods among money, interest rates, and nominal GNP. However, a substantial expansion in demands for goods and services, accompanied by a lack of progress on the inflation front—or worse, an actual increase in inflation or inflationary expectations—would raise the possibility of a considerable firming of conditions in financial markets. Large and prolonged federal deficits would increase that risk. This possibility highlights the urgency of concerted effort by the public and private sectors to reduce the rate of advance of costs and prices and the need to focus any discussions of fiscal action on approaches that would serve to alleviate cost pressures and bolster productivity.

## *A REVIEW OF RECENT ECONOMIC AND FINANCIAL DEVELOPMENTS*

### *Economic Activity During the First Half of 1980*

Economic activity turned down early this year following almost five years of expansion. Between January and June, industrial production fell 7½ percent, employment declined about 1¼ million, and the unemployment rate jumped 1½ percentage points. Real gross national product is estimated to have fallen at an annual rate of 9.1 percent in the second quarter, with the decline in activity widespread among major sectors of the economy. Retail sales have decreased substantially since January, housing starts have dropped to near-record postwar lows, and busi-

ness outlays for equipment and new construction have declined. Although businesses were cautious in building inventories during the expansion, the severity of the recent decline in final sales has led to some involuntary stock accumulation; as in past cycles, the resulting efforts to curb inventory growth have played a significant role in the weakening of orders and production.

Recent reductions in aggregate demand, coupled with a slower rise of energy prices, meanwhile have brought some moderation in the overall pace of inflation. The producer and consumer price indexes have risen at much less rapid rates in the past few months than they did earlier in the year. Moreover, there are indications from consumer surveys that inflationary expectations have been lowered. Nevertheless, inflation still possesses a strong momentum, with unit labor costs continuing on a steep upward trend.

*Personal Consumption Expenditures.* Personal consumption expenditures fell sharply in real terms during the first half. A number of adverse trends had characterized household finances for some time prior to the beginning of 1980. Real disposable income had stagnated after 1978, household liquidity positions had weakened as liabilities increased faster than financial assets after late 1976, and a near-record proportion of disposable income had been committed to the servicing of debt. Moreover, consumer confidence, as measured by opinion surveys, had deteriorated to levels last seen in the 1973-75 recession. In the light of these trends, a downward adjustment of consumer outlays might have been expected last year; the fact that it did not occur appears attributable in part to growing expectations of inflation that fostered a buy-in-advance psychology.

Between January and May, retail sales fell 6½ percent in nominal terms and more than 9½ percent in real terms—the sharpest four-month drop in the postwar period. Preliminary estimates for June, however, indicate that sales moved up somewhat. As in past recessions, large decreases in sales this year have occurred for the relatively discretionary items of consumer expenditure. Automobile sales in June averaged only 7.6 million units at an annual rate, close to the May

pace, which was the slowest since late 1974. Furniture and appliance sales also are down sharply this year, in part because of the fall in housing sales. But weakness in consumer outlays has not been confined to the durable goods sector. Purchases of nondurables in real terms also have been falling since late last year, with sizable declines recorded for clothing and general merchandise.

Since January, real disposable income has decreased substantially as employment and hours worked have fallen and prices have continued upward at a rapid pace; nonetheless, the retrenchment by consumers has lifted the saving rate somewhat above the extraordinarily low level of the fourth quarter of last year. It still remains low by historical standards, however, and uncertainty about job and income prospects may well prompt households to enlarge precautionary savings, thereby contributing further to the weakness in personal consumption expenditures.

*Residential Construction.* Homebuilding activity has experienced a severe decline. Housing starts, which averaged nearly 1 $\frac{3}{4}$  million units at an annual rate during the first nine months of 1979, began to fall sharply last autumn. By December, starts were at a 1 $\frac{1}{2}$ -million-unit pace, and by May they had declined to a rate of almost 900,000. June saw a pickup in starts to a 1 $\frac{1}{4}$  million annual rate.

In the single-family sector, starts dropped 45 percent between the third quarter of 1979 and the second quarter of this year. Although demographic factors remained quite favorable during this period, the demand for such dwellings was curtailed by the increased cost of homeownership associated with higher house prices and the rapid rise in mortgage interest rates. The monthly cost of interest and principal on an average-priced new home financed with a conventional mortgage rose to \$700 in May—a third higher than six months earlier and 50 percent above the same month of 1979. Households probably were increasingly reluctant to undertake such heavy financial obligations, especially as income and employment conditions weakened this year.

Home sales have dropped almost 40 percent from the pace of last summer. Although production adjustments have reduced the number of un-

sold new single-family dwellings on the market, these unsold units bulk larger relative to the recent slower rate of sales. At the May sales pace, which was up sharply from April, there was almost a nine-month supply of unsold new single-family units on the market. The pickup in sales in May is perhaps a sign of some increased interest on the part of homebuyers, prompted by the recent easing in financial markets; however, the still large overhang of unsold homes is likely to discourage a quick resumption of building in many localities.

Multifamily housing starts began declining sharply late last year and in the second quarter were off about 35 percent from the already-reduced pace of the third quarter of 1979. The decline in this sector has been less severe than in the 1973-75 period, as low vacancy rates in many areas and an acceleration in rent increases beginning in late 1979 have given builders an incentive to sustain a significant level of apartment construction in the face of high construction costs and tight financial conditions. In addition, demands for condominiums—a lower-cost alternative to single-family homeownership—have provided support to multiunit activity.

*Business Spending.* Business spending on plant and equipment has slowed in recent months as firms have sought to avoid expanding capacity at the onset of a recession. Spending on non-residential structures, which accounted for much of the gain in investment during 1979, peaked in January and declined substantially in the following months. Business purchases of trucks and automobiles also have been falling since early this year, as have outlays for other capital equipment.

Weakness in capital spending in the first half of the year—as well as in forward-looking indicators of investment activity such as surveys, construction contracts, and equipment orders—probably reflected businessmen's anticipations that sales may remain sluggish for a while. In addition, corporate cash flows are diminishing, and with liquidity positions already strained in many instances, there may be a reluctance to undertake additional projects requiring external financing. Although interest rates have fallen dramatically from the high levels reached earlier this

year, growing excess plant capacity suggests the likelihood of further decreases in real outlays, while firms take advantage of lower long-term rates to restructure their balance sheets.

Despite sizable cutbacks in production, some involuntary inventory accumulation appears to have occurred this spring as a consequence of the steep fall in sales. The stock-sales ratio for all manufacturing and trade in real terms rose only moderately during the first quarter, but climbed appreciably in April and May to near the level of late 1974. Since the start of the year, substantial increases in the ratio have been registered in most major industries with especially large rises for primary metals manufacturers, furniture and appliance retailers, and the motor vehicle industry. Auto sales incentive programs and production adjustments in the first quarter of 1980 largely eliminated excessive stocks that had resulted from last summer's gasoline shortages. However, beginning in mid-April, automobile sales plummeted, and despite further curtailments of production, some overhang of stocks at dealers reappeared.

*Government.* Spending at all levels of government has been restrained in recent months. Total federal expenditures, which grew rapidly in the early months of the year, moderated in the second quarter largely as a result of the March budget cuts. Growth in receipts fell off much more, however, as weakness in personal income and profits offset the impact of additional revenue from the windfall profits tax on oil producers. As a result, the federal deficit on a national income accounts basis probably deepened by about \$30 billion, at an annual rate, between the fourth quarter of 1979 and the second quarter of 1980. However, the high-employment budget, a better indicator of the thrust of discretionary fiscal policy, showed a movement toward restraint during this period.

State and local government spending fell in real terms during the first half of 1980, as governmental units curtailed outlays in response to the slower growth of revenues caused by tax cuts enacted in 1979, the weakening economy, and the March reductions of federal grants-in-aid. The reduced pace of spending was most pronounced for construction activity because feder-

al funding was cut back and municipal bond issuance was constrained in the first quarter by high interest rates. Despite the downward adjustments of outlays, the aggregate operating deficit of the state and local government sector apparently widened considerably in the spring.

*International Trade and Payments.* Real exports of goods and services continued to grow rapidly in the first quarter of 1980, but the rise appears to have slowed somewhat in the second quarter. The deceleration largely reflected the slowing of economic expansion abroad and the fading of the impact of the 1977-78 real depreciation of the dollar. All of the growth in the first half was concentrated in nonagricultural exports; agricultural shipments were reduced, partly because of the embargo on additional grain sales to the Soviet Union imposed by the President in January.

The volume of imports, meanwhile, began to fall off as U.S. economic activity slackened and as higher prices and greater fuel efficiency acted to restrain oil imports. The volume of non-oil imports rose slightly on balance in the first half of 1980, but all of the increase was in the first quarter. The quantity of oil imports fell, apparently reaching its lowest rate in four years in the second quarter. Despite a declining volume of oil imports in the first quarter, higher prices by the Organization of Petroleum Exporting Countries (OPEC) resulted in a continuation of the rapid growth in the dollar value of oil imports. The oil import bill nearly doubled between the fourth quarter of 1978 and the first quarter of 1980; in the second quarter the value of oil imports changed little as lower volume offset a further rise in import prices.

The U.S. merchandise trade deficit increased about \$6½ billion at an annual rate in the first quarter of this year from the rate in the last quarter of 1979. The current account moved from a deficit of about \$7 billion at an annual rate in the fourth quarter, and near balance for the year 1979, to a deficit of about \$10 billion in the first quarter of 1980. Higher foreign earnings of U.S. oil companies offset part of the rise in the merchandise trade deficit. Partial data indicate that the trade and current-account deficits narrowed in the second quarter.

### *Labor Markets and Capacity Utilization*

Labor demand was relatively well-maintained early in the year, but it fell off steeply in the spring as firms responded to the sharp declines in sales by cutting their work forces and shortening workweeks. Between January and June, the number of workers on the payrolls of nonfarm establishments fell almost 950,000; total employment, as measured by the household survey, fell more than 1<sup>1</sup>/<sub>4</sub> million. With layoffs rising, the nation's jobless rate jumped from 6<sup>1</sup>/<sub>4</sub> percent in January to 7<sup>3</sup>/<sub>4</sub> percent in May and June.

Much of the cutback in employment occurred in the construction sector and in durable goods manufacturing, especially motor vehicle and related industries. By June, the number of auto workers on indefinite layoff was nearly 250,000 (about 30 percent of total hourly workers in the industry), and substantial layoffs had occurred in the steel and tire industries as well. Construction employment began to drop early in the year, and subsequently suppliers of building materials also reduced their payrolls. During the spring, however, weakness in labor demand began to spread throughout the economy; employment at trade establishments dropped 190,000 over the second quarter, and in June payrolls in the service-producing sector registered the first monthly decline since 1975.

In addition to trimming payrolls, employers have curtailed work schedules in light of the weakening of sales. Since January, the average workweek at manufacturing establishments has been shortened almost 1<sup>1</sup>/<sub>4</sub> hours. More generally, the number of workers on part-time schedules for economic reasons rose sharply in the second quarter, with former full-time jobholders accounting for most of the increase.

The rise in joblessness has been widespread among demographic and occupational groups, with especially large increases reported among adult males. Since December, the jobless rate among men has climbed almost 2<sup>1</sup>/<sub>2</sub> percentage points, compared with an increase of <sup>3</sup>/<sub>4</sub> percentage point for adult women, and June marked the first time in two decades that the rate for men was higher than that for women. Unemployment among blue-collar workers rose sharply to an 11<sup>1</sup>/<sub>2</sub> percent rate in June, the highest since Sep-

tember 1975. In contrast, unemployment rates among white-collar workers have increased only marginally since the end of 1979.

The adjustments in output by firms, especially in the second quarter, were reflected in a sharp decline in the index of industrial production. Between January and June, industrial production fell nearly 7<sup>1</sup>/<sub>2</sub> percent. Production declines in auto-related industries and in industries supplying construction materials began early in the year, but by late spring cutbacks were occurring in most other industries as well. Among manufacturing firms, capacity utilization in June dropped to 76 percent, almost 11 percentage points below its 1979 peak.

### *Prices, Wages, and Productivity*

After exploding upward in the early months of the year, rates of price increase moderated significantly in the second quarter. The improvement resulted primarily from a stabilizing of energy prices and from declines in the prices of nonferrous metals, after a flurry of speculative activity earlier in the year. Increases in the prices of construction materials and components also slowed noticeably in the second quarter with the decline in activity in the housing sector.

In the energy area, retail prices surged in January and February, in large part the result of the hike in OPEC prices that occurred in late 1979, but the pace of increase then slowed noticeably in the spring, as inventories reached near-record levels and demand continued to drop. The increase in energy prices also moderated at the producer level. Nonetheless, indirect effects of earlier increases in the prices of fuels and petroleum feedstocks were still evident through the end of June in items such as plastics and rubber products, industrial chemicals, and household supplies. Moreover, a number of factors—including the latest increases in OPEC prices, the curtailment of gasoline production, and the progressive decontrol of crude oil prices—suggest that further relief in the energy area is not to be expected.

Food prices generally have exerted a moderating influence on aggregate price measures since the beginning of the year. At the producer level,

finished food prices fell at about a 4½ percent annual rate between December and June. Steep drops in wholesale prices through May—particularly for livestock—alleviated cost pressures at the retail level, contributing to relatively stable retail food prices since the end of last year. However, recent developments in the markets for livestock and fresh produce indicate that food prices also are likely to rise more rapidly in the second half of the year.

Inflationary pressures have persisted in sectors outside food and energy since the beginning of the year. In the consumer price index, increases in the homeownership component have been particularly large, as the measures of mortgage rates and home purchase prices both advanced rapidly in the first half of this year; the recent easing of mortgage rates will likely hold down increases in the consumer price index during the next few months. In the producer price index, prices of capital equipment accelerated in the first half of 1980 from the rapid pace of 1979.

Labor cost pressures remained intense in the first half of 1980, as compensation increases were substantial while productivity declined further. Output per hour in the private nonfarm business sector dropped at about a 1½ percent annual rate in the first quarter, after falling 2 percent over the preceding year. At the same time, hourly compensation accelerated to a 10¼ percent annual rate, so that the unit labor costs of nonfarm businesses rose at about an 11¾ percent rate in the first quarter. Preliminary data for the second quarter suggest that unit labor costs continued to rise rapidly, as productivity contracted further. Although cyclical reductions in overtime and the changing employment mix may restrain the growth in total compensation somewhat in coming months, wage demands are likely to remain strong, especially in light of past increases in consumer prices. Thus, upward pressures on unit labor costs will probably remain substantial over the near term.

### *Financial Developments During the First Half of 1980*

*Interest Rates.* Market rates of interest moved sharply higher in the early months of 1980, exceeding previous record levels and peaking

around the end of the first quarter. These increases were largely reversed in the second quarter amid a substantial downslide in economic activity and contracting demands for money and credit. The upward pressure on yields at the turn of the year resulted from a combination of factors, including a deterioration in inflationary expectations as actual price increases accelerated in January and February, the failure of incoming data to confirm the long-anticipated downturn in activity, and international political developments that raised the likelihood of an increase in federal deficit spending. In February, moreover, growth in money and credit surged, creating demands for bank reserves well in excess of the provision of nonborrowed reserves consistent with the Federal Reserve's target ranges for growth in the monetary aggregates. In the Treasury bill market, in particular, the resulting rise in short-term interest rates was reinforced by large sales of securities by foreign institutions to finance intervention in foreign exchange markets.

On March 14, the Board of Governors took actions of a temporary nature designed to reinforce the effectiveness of the measures announced in October 1979 and thus to provide greater assurance that the monetary goals reported to the Congress in February would be met. These actions, some of which were taken under the authority of the Credit Control Act as part of a broad government effort aimed at reducing inflationary pressures, included the following: (1) a special credit restraint program directed toward limiting the growth in loans to U.S. customers by commercial banks and finance companies to ranges consistent with the monetary and credit objectives of the Federal Reserve; (2) a special deposit requirement for all types of lenders on increases in certain categories of consumer credit; (3) an increase in the marginal reserve requirement on managed liabilities of large member banks and U.S. branches and agencies of large foreign banks; (4) a special deposit requirement on increases in managed liabilities of large non-member banks; (5) a special deposit requirement on increases in total assets of money market mutual funds; and (6) a surcharge of 3 percentage points on frequent borrowing by large member banks from Federal Reserve Banks.

These measures hastened the movement toward reduced credit availability already in train

at many lenders, and apparently increased the resolve of consumers to curtail their use of credit. In subsequent weeks, incoming data revealed a substantial slackening in money and credit growth to well within the Federal Reserve's objectives. In light of these developments, the Board amended the special credit program: on May 6 the 3-percentage-point surcharge on discount borrowing by large banks was eliminated, and on May 22 special deposit requirements were reduced by half and the special credit restraint guidelines were modified. On July 3 the final phaseout of the program was announced.

The rise in most interest rates came to a halt in late March and early April, and yields began to move down as demands for money and credit dropped abruptly in response to developing slack in the economy. Most private short-term rates fell 7 to 9 percentage points, to their lowest levels since the spring of 1978. In long-term securities markets, bond yields retraced most or all of the increases recorded earlier in the year, as market participants appeared to have lowered their expectations of inflation. The restraining posture of monetary and fiscal policy, as well as moderating rates of price increase in the cyclical downturn, has contributed to this improved outlook for price changes.

*Foreign Exchange Markets and the Dollar.* Movements in U.S. interest rates greatly influenced fluctuations in the foreign exchange value of the dollar over the first half of 1980. The dollar was in strong demand early in the year when U.S. interest rates rose sharply. The growing perception by market participants of accelerating inflation and worsening payments deficits abroad gave added impetus to the dollar's rise over this period, as did the announcement of credit control measures on March 14. Authorities in a number of foreign countries also moved to tighten monetary conditions, but the resulting increase in foreign interest rates lagged well behind that of U.S. rates. The strengthening in the foreign exchange value of the dollar in February and March was moderated somewhat by substantial intervention activities by U.S. and foreign monetary authorities.

The peaking and subsequent steep decline in U.S. interest rates in early April triggered heavy selling pressure on the dollar in international

markets, and the dollar's foreign exchange value fell in the April to June period. Foreign and U.S. monetary authorities intervened to moderate this decline by making net purchases of dollars. Even so, by the end of June earlier gains were entirely erased, and the weighted-average exchange value of the dollar at midyear was little changed from its value at the beginning of the year.

*Domestic Credit Flows.* Net funds raised in credit markets by domestic nonfinancial sectors of the U.S. economy totaled a sizable \$391 billion at an annual rate in the first quarter of 1980, but contracted sharply to an estimated \$193 billion in the second period. This exceptionally large decline in borrowing reflected in large part the recent sudden weakening in production and sales activity; also, monetary restraint, supplemented by the special policy actions of mid-March, contributed to tauter credit terms and reduced availability of funds at many lenders.

In the private sector, the volume of funds raised in the first quarter was greatly enlarged by a surge in borrowing on the part of nonfinancial business firms. Some of this increased borrowing reflected needs to finance growth in inventories and fixed capital outlays, as the gap between such expenditures and internally generated funds of nonfinancial corporations widened. But fears that unchecked inflation would lead to the imposition of credit controls and a consequent reduction in credit availability apparently led to a burst of anticipatory borrowing by firms as well. As a result, corporations added substantially to their holdings of liquid assets in the first quarter and appear to have drawn down these holdings in subsequent months.

As interest rates moved up rapidly early in the year, businesses concentrated their credit demands in short- and intermediate-term markets, with borrowing at banks and in the commercial paper markets especially heavy. Corporate bond financing remained relatively low as businesses, especially industrial firms, were reluctant to issue long-term debt at historically high yields. This pattern of corporate financing shifted dramatically, however, when interest rates dropped rapidly in the spring. Public offerings of longer-term corporate bonds accelerated to unprecedented levels, with the proceeds from many of these issues being used to pay down bank debt.

After March, commercial banks—concerned both about pressures on their earnings margins as interest rates dropped and about meeting the loan growth guidelines of the voluntary special credit restraint program—tended to discourage business borrowers. In particular, adjustments in the bank prime lending rate lagged substantially behind downward movements in other market rates, greatly increasing the relative cost of this source of financing. As a result of the relatively high cost of bank credit, coupled with a desire of businesses to adjust their balance sheets following the heavy reliance on short-term debt in previous months, business loans at banks contracted markedly in the second quarter. Although commercial paper issuance by firms remained very large, total short- and intermediate-term business credit demands in the second quarter moderated appreciably from the first-quarter pace. Late in the second quarter, the prime rate began to move down, narrowing the gap with market rates somewhat; survey data, furthermore, suggest that banks in May were making a large share of short-term business loans at below-prime interest rates.

In the household sector, consumers greatly reduced their use of installment credit during the first half. The large growth of consumer installment and mortgage debt in 1979—both in absolute terms and in relation to disposable income—had produced a marked deterioration in household liquidity. The combination of resulting heavy debt burdens, high interest rates, and, in some states, restrictive usury ceilings acted to slow growth of installment credit in late 1979 and the first quarter of 1980. The volume of outstanding installment credit contracted in the second quarter as consumers curtailed expenditures and repaid debt against a backdrop of rapidly declining real incomes and rising unemployment. Credit-tightening measures by lenders after the announcement of the credit-control package on March 14 and uncertainty on the part of consumers about the effects of those controls contributed further to the reduction in credit use.

Household borrowing in mortgage markets also slowed considerably in the first half. Reduced deposit flows and pressures on earnings margins from rising costs of funds constrained the lending

activity of thrift institutions and pushed mortgage rates to record levels in March. Many would-be homebuyers were deterred by the high cost of mortgage credit. More recently, lower market interest rates have helped to reduce cost pressures for thrift institutions and have contributed to a pickup in deposit flows. Sharp drops in mortgage rates since early April and reports of some easing in nonrate terms suggest that lending institutions have become more active in seeking mortgage loans since early June. But mortgage rates remain high by historical standards, while demands for housing and housing credit continue to be damped by a weak economy and by the liquidity concerns of households; consequently, mortgage commitment activity apparently has remained relatively sluggish.

The Treasury borrowed heavily in credit markets in the first half to finance the combined deficits of the federal government and off-budget agencies. Normal seasonal patterns in federal cash flows associated with the timing of tax receipts led to a concentration of the Treasury's borrowing in the first three months of the year. Although the first-quarter deficit was further deepened this year by unusually large tax refunds associated with overwithholding in 1979, the Treasury was able to even out its borrowing pattern somewhat by permitting its cash balance to drop over the first quarter and then rebuilding it in the second.

In contrast to the federal sector, net borrowing by state and local governments dropped off in the first quarter but accelerated appreciably in the second. Many municipal governments postponed or canceled scheduled bond issues early in the year because of high interest rates; for some governmental units, these actions were necessitated by the rise of interest rates above statutory limitations. But the volume of tax-exempt financing picked up considerably in the second quarter when interest rates fell and many previously postponed bond issues were brought to market. The financing needs of state and local units generally increased over the first half in response to slower growth of revenues and a consequent widening of their operating deficits. Also, the volume of tax-exempt securities issued continued to be boosted by offerings of mortgage revenue bonds, designed to finance single-family housing.

# Staff Studies

---

*The staffs of the Board of Governors of the Federal Reserve System and of the Federal Reserve Banks undertake studies that cover a wide range of economic and financial subjects. In some instances the Federal Reserve System finances similar studies by members of the academic profession.*

*From time to time the results of studies that are of general interest to the professions and to others are summarized—or they may be printed in full—in this section of the FEDERAL RESERVE BULLETIN.*

*In all cases the analyses and conclusions set forth are those of the authors and do not necessarily indicate concurrence by the Board of Governors, by the Federal Reserve Banks, or by the members of their staffs.*

*Single copies of the full text of each of the studies or papers summarized in the BULLETIN are available without charge. The list of Federal Reserve Board publications at the back of each BULLETIN includes a separate section entitled "Staff Studies" that lists the studies that are currently available.*

## STUDY SUMMARY

---

### FOREIGN OWNERSHIP AND THE PERFORMANCE OF U.S. BANKS

*James V. Hought—Staff, Board of Governors*

Prepared in early 1980 and distributed to congressional committees in connection with legislation regarding foreign ownership of U.S. banks.

Foreign ownership of U.S. banks has increased significantly in recent years, and as a result has become the focus of regulatory and congressional interest. That interest was greatly sharpened by the requests of the Hong Kong and Shanghai Banking Corporation and other foreign banking organizations to buy large U.S. banks. With the consummation of these acquisitions, foreign ownership of U.S. banks has taken on entirely new dimensions. The assets of U.S. banks controlled by foreign parties almost doubled between year-end 1978 and year-end 1979, and account for 4 percent of the assets of this country's domestic banking system (excluding the assets of U.S. branches and agencies of foreign banks). Consequently, it is important to assess the impact of foreign ownership on the performance of these banks.

This study examines the growth and operations both of existing U.S. banks acquired by

foreign parties and of U.S. banks that were established by foreign banks. Because foreign ownership is a more important issue with respect to acquisitions, the thrust of the paper is in that direction. The first part of the study provides a background by identifying the major concerns about foreign ownership and by placing the movement in perspective in the domestic banking industry. The second part presents the results of an empirical study comparing foreign-owned U.S. banks with their U.S.-owned peers, as defined by size and location. The study first compares the balance-sheet structure and profitability of the two groups for the period preceding foreign ownership and again at year-end 1978. It then examines changes in the operations of the two groups during the period of foreign ownership.

Several operational characteristics are examined, including the banks' growth in assets,

loans, and deposits; their lending and funding practices; their investment policies; and their profitability. The differences found between the foreign-owned banks and their peers generally reflected a continuation of pre-existing differences. The only statistically significant difference between the two groups of banks during the period of foreign ownership appeared with respect to the investment policies of the banks.

While the study included virtually all foreign-

owned U.S. banks with a performance record under the new owners, its findings should be regarded as tentative, given the necessarily small number of banks analyzed and their relatively short experience under foreign ownership. At the same time, the findings provide important insights into the experience to date and give no indication that the foreign-owned U.S. banks or their communities have suffered from the change in ownership. □

# Industrial Production

Released for publication July 16

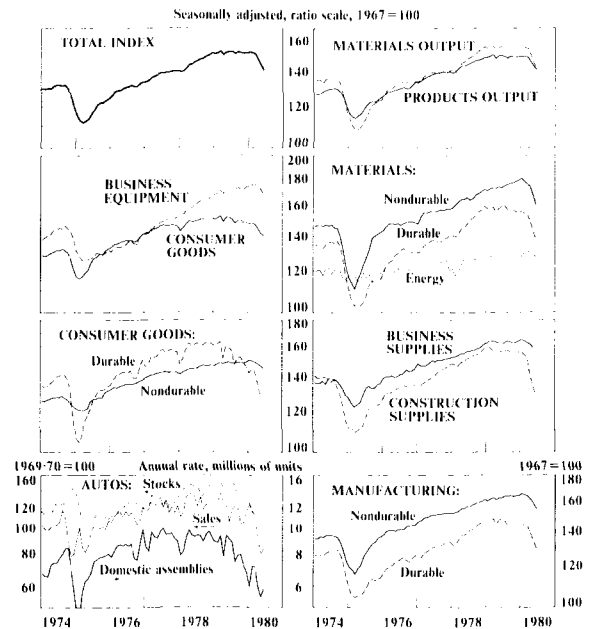

Industrial production dropped an estimated 2.4 percent further in June, reflecting widespread reductions in output of both products and materials. This decline follows revised decreases of 2.4 percent in May and 2.2 percent in April. At 141.2 percent of the 1967 average, the production index in June was 7.7 percent below its peak in March 1979.

Output of durable consumer goods decreased 0.9 percent in June after declines of more than 5 percent in each of the two preceding months. The smaller overall decline was the result mainly of an increase in auto assemblies from their extremely low level in May; there were continued sharp reductions in most other consumer goods industries. Auto assemblies rose about 7 percent to an annual rate of 5.9 million units in June, but output of utility vehicles (mainly lightweight trucks) continued to decline. Production of goods for the home, such as furniture and appliances, declined 3.1 percent further, and output of nondurable consumer goods was reduced 0.9 percent.

Output of business equipment declined 2.3 percent in June, more than twice as much as in May, reflecting cutbacks in almost all equipment industries. Output of construction supplies was reduced 4.5 percent, bringing this component to a level about 18.2 percent below a year earlier.

Production of durable goods materials was again reduced almost 4 percent, largely reflecting

further sharp decreases in the output of steel and parts for equipment and consumer durables. Nondurable goods materials, which showed relative strength last year, were down 4.2 percent in June and have shown increasingly sharp reductions in output since February. Production in the textiles, paper, and chemical group declined more than 4 percent in June. Output of energy materials also was reduced further.

Federal Reserve indexes, seasonally adjusted. Latest figures: June. Auto sales and stocks include imports.

## Statements to Congress

*Statement by Lyle E. Gramley, Member, Board of Governors of the Federal Reserve System, before the Special Subcommittee on Control of Federal Credit of the Senate Budget Committee, June 19, 1980.*

Mr. Chairman and members of this special subcommittee on federal credit, I am pleased to be here today to discuss measures to improve control over federally assisted credit programs.

The need for more adequate budget treatment and control of these activities has long been recognized. Both the *1963 Report of the President's Committee on Federal Credit Programs* and the *1967 Report of the President's Commission on Budget Concepts* called for reforms in the budgetary treatment of federal credit. Until recently, however, little progress was evident. In particular, the Congressional Budget Act of 1974 specifically exempted loan guarantees from the budget process and did not develop a comprehensive framework for evaluating these activities. It was therefore especially heartening that the administration recommended a new budgetary framework for controlling federal credit programs in its 1981 budget and that the Congress has incorporated a new federal credit budget into its First Concurrent Resolution.

As you know, federal credit programs have expanded enormously, both in amount and in scope. Direct loans and loan guarantees outstanding, for example, are projected to total more than \$425 billion in the fiscal year ending September 30. This is nearly triple the \$164 billion level reached just 10 years ago. In addition, loans held by government-sponsored agencies now are projected to be \$176 billion at the end of fiscal year 1980, up \$17 billion from the year before and more than four times the level of 10 years earlier. Federal credit activities, moreover, are projected to continue growing rapidly in the years ahead. The administration forecasts that net credit advanced under federal auspices—di-

rect, guaranteed, and sponsored—will increase more than \$70 billion during fiscal year 1981. If total credit flows in the coming year turn out to be roughly the same as in the past year, funds raised under federal credit assistance will account for more than one-sixth of the total net funds raised in financial markets.

The widening in the range of economic activities sponsored by guaranteed loans has been particularly notable. In the late 1950s, the home mortgage guarantee programs of the Federal Housing Administration and the Veterans Administration accounted for 90 percent of the total volume of guaranteed and insured loans outstanding. This proportion has since trended down, reaching 68 percent last year, mainly because of an expansion of loan guarantees into new areas—such as military sales, rural electrification, and student loans.

The provision of federal credit assistance through direct loans and loan guarantees to achieve particular social and economic objectives has been widely recognized as a legitimate and valuable activity. Many credit programs originally were established to correct imperfections in capital markets that denied credit to some groups or made its cost prohibitive. For example, the loan programs insured by the Federal Housing Administration were devised during the Great Depression to reduce the risks perceived by lenders. By pooling risks across a large number of loans issued in a standardized fashion, the government program encouraged private lenders to advance credit at a lower cost to borrowers and on less restrictive terms than would otherwise have been possible. As a result, private individuals were able to finance the purchase of homes on terms involving more reasonable interest charges, more liberal loan-to-value ratios, and longer maturities than before. Over time, these more liberal terms gained general acceptance among all types of private lenders.

Many other federal credit assistance programs

have been introduced over the years to foster social objectives. Increasingly, these programs have involved substantial interest subsidies. According to estimates of the Office of Management and Budget, the present value of the interest subsidy on new direct loan obligations and commitments to guarantee loans in fiscal 1981 will amount to almost \$30 billion. In contrast to the home mortgage area, moreover, the default rate in some of these programs—such as student loans and assistance for low-income housing—has been comparatively high. Thus, the government has had to absorb sizable default losses in addition to providing a very large interest rate subsidy to borrowers. In the past few years, the federal government has also guaranteed sizable loans to single borrowers that carry a large potential for default.

#### *PURPOSES OF CONTROLS OVER FEDERAL CREDIT PROGRAMS*

Improvement in the budgetary treatment of federal credit programs should seek to achieve several interrelated purposes.

First, it should encourage recognition by the Congress and the public that resources used in programs financed by federal credit activities may have been shifted away from more productive uses. In setting annual credit targets, the Congress must not lose sight of the long-run consequences resulting from such a shift in resource use.

Second, it should identify when possible the costs entailed in federal credit activities. These costs include not only the interest subsidies, the administrative expenses, and the default losses, but also the loss in public welfare that occurs when federal credit programs are expanded beyond socially desirable and efficient levels.

Third, it should focus attention on the macroeconomic effects of federal credit activities—on employment and output, on prices, and on developments in credit markets. Information that helps to assess these effects is, of course, especially important to the Federal Reserve in its formulation of monetary policy.

It has long been recognized that federal borrowing can “crowd out” private borrowers—and

thereby transfer command over resources from the private to the public sector. The degree of such displacement depends on the extent to which the economy's real resources are being utilized and on conditions in credit markets. During recessionary periods, when credit supplies are readily available, credit assistance programs may help promote a more intensive use of resources and an expansion in the level of economic activity. In this instance, the principal effect of the increase in expenditures made possible by the federal credit activity is likely to be an increase in aggregate demand rather than a redistribution of resource use. On the other hand, when little excess capacity exists in the economy and credit supplies are tight, there is a much stronger tendency for credit extended under federal auspices to raise interest rates and to divert loanable funds, and therefore real resources, away from private producers. Moreover, when such programs create additional demands on limited resources, they also add to pressures on prices.

It would, however, be potentially misleading in a discussion of the crowding-out problem to focus simply on the cyclical condition of the economy. The long-run potential for the diversion of resources from private to public uses stemming from federal credit programs is a serious problem.

In recent years, the performance of productivity in our economy has been dismal. We do not know all the reasons why, and that will limit our ability to deal effectively with the problem. We do know, however, that a substantial increase in the share of national output will have to be devoted to capital formation if we are to have much hope of increasing the rate of advance in productivity. Since the need for additional capital to deal with our nation's energy and environmental problems will also be large, it will be critical to adopt tax and expenditure policies that free up resources—real resources as well as financial resources—to make that possible.

The need for a higher rate of business capital formation is critical to the long-run health of our economy. Holding down the share of gross national product devoted to federal expenditures will contribute importantly to that effort. So also will the orientation of future tax cuts toward business investment incentives. But these efforts

may go for naught if we do not control carefully the share of national resources absorbed by federal credit programs.

One of the problems that has impeded the development of better budgetary treatment of federal credit programs is the lack of a good analytic framework in which to assess the economic effects of these programs. Some federal credit programs affect the economy much like direct federal expenditures. Loan guarantees for low-income housing and foreign military assistance are the most obvious examples. Others provide only marginally lower interest rates, or marginally better nonprice credit terms, to borrowers whose credit needs otherwise would probably have been met by the private financial market. These differing effects, moreover, do not bear any necessary relation to whether credit is supplied through direct loans or loan guarantees.

Since research in the area of federal credit programs has barely begun, what appears extremely complex today may appear more simple tomorrow. I suspect, however, that the problems we face in this regard stem from the diverse nature of these credit programs. If so, we will have to be satisfied with statistical measures and budgetary solutions for dealing with federal credit programs that are inherently less than fully satisfactory. For example, the proportion of total borrowing in financial markets that is federally assisted can be used as an indicator of credit resources whose direction is governed by federal lending programs. Similarly, the share of GNP accounted for by the total of federal expenditures plus credit activities is a rough measure of the proportion of real resources whose use is directed by the federal government.

Summary measures such as these have inherent weaknesses because they add up things that are really very different. But they are better than nothing.

Your committee is rightly concerned about the potential problems that federal credit programs may create for monetary policy. It is sometimes argued that expansion in federal credit programs during periods of monetary restraint might frustrate the achievement of the objectives of monetary policy by insulating some borrower groups from the discipline of the marketplace. For most federal credit programs, however, interest

charges vary with market rates of interest; moreover, increases in the quantity of credit available from federal sources seldom are large enough to offset completely the declines in the quantity available from private sources. It is true, nonetheless, that assuring larger numbers of borrowers ready access to credit requires higher interest rates to achieve a given degree of monetary restraint. This is one more reason for putting limits on how fast federal credit programs can expand.

#### *SUGGESTIONS FOR IMPROVEMENT IN THE BUDGETARY TREATMENT OF CREDIT PROGRAMS*

Let me turn now to a few suggestions on ways to sharpen the focus on the effects of federal credit programs.

First, procedures should be developed that would permit policymakers to determine the tradeoffs between accomplishing social objectives through direct outlays, on the one hand, and through federal credit programs on the other. Similar criteria need to be developed to provide guidance for choosing between giving credit assistance through direct loans or giving credit assistance through loan guarantees.

Second, further consideration might be given to ways of controlling net as well as gross lending. The present credit limits apply to gross loans; that is, I believe, the appropriate place to begin. Gross lending and guarantee activities reflect the current scope of various programs, thus indicating the overall support being given to a sector by the federal government. On the other hand, the net change in such programs determines the current impact of federal credit activities on economic and financial market conditions. So perhaps we ought to seek to limit the net, as well as the gross, increase in federal credit extensions.

Third, the budgetary treatment of nonrecourse loans—such as those made by the Commodity Credit Corporation to farmers—should be studied in greater detail. Since nonrecourse loans need not be repaid, it is not clear whether these transactions should be treated as outlays or as loans at the time the funds are disbursed.

Fourth, the accounting treatment of loans

made through the Federal Financing Bank, (FFB) could be further improved. FFB activities in the past have reduced the accountability of federal credit programs because lending activities typically have been attributed only to the FFB rather than to the agency originating the transaction. The new budget rectifies a large part of this difficulty by attributing FFB outlays to the originating agencies (within the FFB account) and by establishing limitations on the absolute amount of credit—direct and guaranteed—that can be financed by an agency in a given year. The attribution process, however, is not yet complete because the combined total of outlays and direct and guaranteed loans never appears in a consolidated statement by function and agency. If this final step were taken, the unified budget accounts would provide a more complete picture of the federal government's support for particular programs and activities.

Finally, if the control system established by the Congress is to be successful, it must be accompanied by a detailed scorekeeping system.

To satisfy this requirement the Congress should consider establishing a credit control office within the Congressional Budget Office in order to provide the Congress with detailed technical data on the costs and benefits of federal credit programs and with up-to-date reports on federal credit activities. These reports also would include a credit information system that encompasses total federal lending activity by budget function and by economic sector. Ideally, such a system would provide information that highlights the federal government's total involvement in, and assistance to, sectors in the form of direct outlays, direct loans, and loan guarantees.

To sum up, the Board of Governors welcomes the progress that has been made in establishing a credit budget. It will improve our ability to evaluate and control federal credit activities and enhance the long-run prospects for increased private capital formation. We will be happy to provide whatever assistance we can in refining further the procedures for dealing with federal credit programs in the budget. □

---

*Statement by Henry C. Wallich, Member, Board of Governors of the Federal Reserve System, before the Subcommittee on Commerce, Consumer and Monetary Affairs of the Committee on Government Operations, U.S. House of Representatives, June 25, 1980.*

Mr. Chairman, I am here today in response to your request for the views of the Board of Governors of the Federal Reserve System about the nonbanking activities of foreign bank holding companies. The questions you raise touch on some fundamental issues and I welcome the opportunity to address them.

In this statement, I shall direct my remarks to (1) the nature and public policy rationale of the nonbanking prohibitions of the Bank Holding Company Act; (2) the public policy reasons for the exemptions from these prohibitions that the act provides for foreign bank holding companies; and (3) the Federal Reserve's interpretations and administration of those exemptions. This or-

ganization accords, I believe, with the thrust of the questions contained in your letter.

#### *NONBANKING PROHIBITIONS OF THE BANK HOLDING COMPANY ACT*

The public policy in the United States that seeks to maintain a general separation between banking and commerce is of very long standing. The reasons for this policy are grounded in the economic and social history of the country. A major concern has always been the fear of undue concentration of economic power that might result from bank control of commercial enterprises. A somewhat related concern has been about unfair competition that might result from some firms being allied with banks and having access to credit and other financial services on terms not available to unaffiliated competitors. Still another concern has been about possible conflicts of interest between a bank's fiduciary responsibility

to its depositors and its own economic interests deriving from ownership of nonbanking firms.

The tradition of separating banking and commerce and the concerns underlying that tradition are so deeply ingrained in the public conscience as to make further elaboration unnecessary. Indeed, because of the strength of the tradition, I doubt that there has been much fundamental rethinking of the continuing validity of the concept in today's circumstances.

In any event, because of this public policy, banks in general have been prevented by law from holding ownership interests in commercial enterprises. Only limited exceptions have been allowed. The policy of separating banking and commerce was clearly one of the cornerstones of the bank holding company legislation in 1956 and again in 1970. In the latter instance, the debate was not about whether bank holding companies should be permitted to engage in nonfinancial business; rather, it centered on the kinds of financial business in which bank holding companies might be permitted to engage as ancillary to their banking business.

The Bank Holding Company Act, as amended in 1970, prohibits bank holding companies from holding the shares of any company that is not a bank, with a limited number of exceptions. These exceptions include shares of any company so long as the ownership interest is less than 5 percent; shares in which national banks may by statute invest; shares held in a fiduciary capacity; shares acquired in satisfaction of debts previously contracted; and shares of premises and of other companies that provide operating services for subsidiary banks. The central exception to the general prohibition is contained in section 4(c)(8) of the act; that section conferred on the Board the ability to determine which activities are closely related to banking and thus to allow bank holding companies to invest in companies engaged in those activities. That exception has been the most significant for the development of the bank holding company movement and has been the one most surrounded by controversy. Finally, there were specific exceptions relating to foreign activity, which I shall describe shortly.

The essence of the restrictions on nonbanking activities is that these restrictions are basically

concerned with the structure of banking *in this country*. That concern is directed to the soundness of U.S. banking organizations and to the relationship of those organizations to other sectors of the U.S. economy. The domestic orientation of that concern is clearly implicit in the language of section 4(c)(8). The Board is to follow a two-step process in determining whether a particular activity should be permitted: first, it must find that the activity is "closely related to banking;" and second, it is required to find that the resulting public benefits outweigh possible adverse effects "such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." These effects are primarily domestic in character.

#### *FOREIGN CONSIDERATIONS IN U.S. BANKING REGULATION*

I should now like to turn to some of the ways in which integration of the world economy has affected U.S. banking regulation. As part of that general phenomenon, U.S. banks over the past quarter century have spread their facilities and activities around the globe; they can now be found operating in a wide variety of countries and providing banking and financial services under a wide range of economic and social conditions. In more recent years, foreign banks have increasingly come to the United States to carry on part of their international operations. Foreign banks in this country now number about 150; many of them operate branches, agencies, and subsidiary banks in several states.

These mutual incursions into national territories inevitably lead to potential conflicts of laws and of national policies. Banks from different national jurisdictions are subject to different laws, rules, and traditions: some may be subject to different capital standards; some may be primarily government owned; and their powers will certainly vary. Accommodations and adjustments, both here and abroad, are necessary if the benefits of a multinational banking system are to be obtained. Very often these accommodations require careful and sensitive attention.

The need for this kind of accommodation is

clearly recognized in the bank holding company legislation. Whenever the Congress has considered such legislation it has been mindful that provisions directed at domestic banking conditions might have unintended and unnecessary extra-territorial effects and has made special legislative provisions to that end. Two exemptions from the nonbanking prohibitions of the act have been specifically tailored for the special circumstances of foreign banking organizations; they are contained in section 2(h) and section 4(c)(9) of the act. In addition, the Congress provided a specific exemption for the foreign activities of domestic bank holding companies in section 4(c)(13) of the act.

Turning to the exemptions for foreign banking organizations, section 2(h) of the act dates from 1966. As adopted, the section exempted from the nonbanking prohibitions of section 4 of the act "the shares of any company organized under the laws of a foreign country that does not do any business within the United States" if the shares are owned by a bank holding company "principally engaged in the banking business outside the United States." This exemption clearly indicated that the Congress had no intention of restricting nonbanking activities by foreign banks when such activities were conducted exclusively outside the United States.

Section 4(c)(9) was added to the act in 1970. It authorizes the Board to exempt "shares held or activities conducted by any company organized under the laws of a foreign country the greater part of whose business is conducted outside the United States" upon a determination that the exemption "would not be substantially at variance with the purposes of the act and would be in the public interest." When this exemption was proposed, it was supported by the Board. Chairman Burns stated in Senate testimony: "We do not believe Congress intended the act to be applied in such a way as to impose our ideas of banking on other countries. To do so might invite foreign retaliation against our banks operating abroad, to the detriment of the United States."

As written, section 2(h) was essentially self-administering and the Board issued no regulations to implement it. Section 4(c)(9), on the other hand, was much more generally drawn and the Board adopted rules implementing that section in

December 1971. In adopting these rules, the Board followed the required procedures of publishing proposals for public comment and then reviewing those comments before adopting a final rule.

These rules first defined the foreign bank holding companies to which the exemption would apply as those companies "organized under the laws of a foreign country, more than half of whose consolidated assets are located, or consolidated revenues derived, outside the United States." At the time, this seemed a reasonable measure to assure that the companies affected were foreign in fact, as well as in name. The rules then went on to exempt (1) all activities conducted outside the United States, (2) activities conducted inside the United States incidental to international and foreign business, (3) ownership of companies principally engaged in the United States in financing or facilitating international or foreign transactions, and (4) ownership of up to 25 percent of the shares of any foreign company more than half of whose assets are located or revenues derived outside the United States.

The first of these regulatory exemptions simply extended the statutory exemption contained in section 2(h) to all foreign bank holding companies whose activities were mainly outside the United States and not just to those principally engaged in banking outside the United States. The second exemption was rather limited since it permitted only "incidental" activities, by which the Board means those having a direct and clearly demonstrable relationship to international business. The third exemption was framed to permit the ownership of New York investment companies by foreign banks; these companies are in effect incorporated agencies of foreign banks in New York. The fourth exemption took cognizance of the fact that in a number of foreign countries banks are permitted to make portfolio investments in nonbanking firms and that these firms in turn might have operations in the United States. In addition to these general exemptions, provision was made for other activities and investments to be allowed upon application to and approval by the Board.

I noted earlier that the 1970 amendments to the act also contained an exemption for the foreign activities of domestic bank holding companies.

That exemption applies to shares or activities of companies doing no business in the United States except as an incident to international or foreign business if the Board concludes that an exemption would not be "substantially at variance with the purposes of this act and would be in the public interest." This exemption paralleled the provisions of law governing Edge corporations; the provisions allow the corporations to conduct activities in the United States only to the extent that these activities are incidental to international or foreign business. No statutory restrictions are placed on the kinds of activities in foreign countries that Edge corporations may engage in. However, the Board in regulating Edge corporations has, as a matter of policy, not allowed them to acquire controlling interests in foreign nonfinancial businesses. This policy has been followed because of prudential concerns for the corporation and their parent banks.

The International Banking Act of 1978 made two significant alterations in this legislative scheme. First, it subjected foreign banks operating branches and agencies in this country to the nonbanking prohibitions of the Bank Holding Company Act, thereby greatly increasing the number of institutions to which those prohibitions apply. Secondly, it revised the exemption contained in section 2(h) of the act.

When the International Banking Act legislation was under consideration, a number of foreign banks became aware that the nonbanking prohibitions would apply to them for the first time and expressed concern about the extra-territorial reach of those prohibitions. They were not convinced that the Board's authority to make exemptions on a case-by-case basis under section 4(c)(9) of the act would provide sufficient protection to what they thought was their legitimate business abroad. As a consequence, they sought a legislative solution. Section 2(h) was modified to meet these concerns and it now provides that a foreign bank holding company may own shares in any foreign company, principally engaged in business outside the United States, which owns shares in a U.S. company so long as the latter is in the same general line of business. This exemption does not extend to companies engaged in the securities business in the United States nor does it apply to activities of the kind

permitted under section 4(c)(8). The latter may be conducted only in accordance with the Board's rules, including prior approval when necessary. The statutory amendment does not specify what is meant by being in the "same general line of business" but the Senate report on the act suggested that the four-digit code of the standard industrial classification (SIC) be used for this purpose.

By this amendment, the Congress again reaffirmed its unwillingness to interfere with the nonbanking activities that foreign banking organizations engage in abroad; in one sense the amendment enlarged the U.S.-connected activities that may be conducted by foreign companies in which foreign bank holding companies have an ownership interest. The amendment has raised a number of issues in connection with its regulatory implementation and with its relationship to the existing rules under section 4(c)(9) of the act. The Board recently considered these issues and has now published proposed regulations for public comment, a copy of which is being submitted for the record as part of this statement.<sup>1</sup>

As the explanatory material accompanying the proposed rules makes clear, the Board had to resolve two general issues in implementing sections 2(h) and 4(c)(9) of the Bank Holding Company Act: (1) a determination of the kinds of organizations that can qualify for these exemptions from the nonbanking prohibitions; and (2) a determination of the standards to be applied in exempting certain nonbanking activities in the United States on the grounds that they are in the same general line of business as the foreign parent.

With respect to the first of these issues, the Board believes that foreign organizations conducting a banking business in the United States should themselves be substantial banking organizations abroad. In this way, the U.S. banking operations will benefit from financial and managerial expertise necessary to conduct a banking business in a safe and sound manner. Reflecting this belief and the specific language of section

1. The attachments to this statement are available on request from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

2(h), the Board's proposals would limit the availability of these exemptions only to foreign organizations that are principally engaged in the banking business abroad. More specifically, in order to qualify, an organization would have to (1) be chartered under foreign law and have its non-U.S. assets or revenues exceed its U.S. assets or revenues, (2) have its banking assets or revenues exceed its nonbanking assets or revenues, and (3) have its banking assets or revenues outside the United States be larger than its banking assets or revenues inside the United States. These tests would be made on a consolidated basis.

With respect to the second of these issues, the Board proposals follow the legislative guidance provided by the Senate Banking Committee in its report on the International Banking Act. In order to be exempt, nonfinancial activities in the United States would have to be of the same kind as those of its foreign nonbank parent as defined by the four-digit code of the SIC. The four-digit classification is a fairly narrow one. For example, a foreign banking organization has a subsidiary that manufactures automobiles abroad; using the SIC as a guide, that foreign automobile manufacturer could invest in a company in the United States that also manufactures or assembles automobiles but not in companies that manufacture, say, tires or motorcycles. The Board believes that this is a reasonable way to implement congressional intent but has specifically asked for comments on the use of this test.

Financial activities in the United States, on the other hand, would not be exempt under the proposal unless they were of the kind permitted under 4(c)(8) of the act. This requirement would assure that foreign organizations would be treated the same as domestic organizations with respect to their U.S. banking activities and other activities closely related to banking.

These are the main features of the Board's proposed rules. Further details and justification may be found in the explanatory material accompanying the proposal.

### *CONCLUDING COMMENTS*

To conclude, Mr. Chairman, the basic policy of exempting foreign nonbanking activities of for-

eign bank holding companies from the nonbanking prohibitions of the act has been determined by the Congress. The rules adopted by the Board have sought to implement that policy in keeping with congressional intent, as expressed in the language of the statute and in the debates underlying the legislation.

The Board generally supports the concept that activities of an essentially foreign character should not be disturbed by U.S. laws and regulations unless they directly and significantly affect U.S. institutions and policies. Relationships between foreign banks and nonbanking activities in foreign countries affect the structure and functioning of foreign economies and financial markets, which are not the responsibility of the U.S. government or its bank supervisory agencies. So long as those foreign relationships do not do violence to the objectives of the Bank Holding Company Act relating to the structure and conduct of banking in this country, it is sensible public policy in today's world to make an accommodation to the realities of the way in which international banking is conducted.

I do not believe that accommodations of this kind are inconsistent with the principle of national treatment. The heart of that principle is that, within national boundaries, activities conducted by comparable institutions will be essentially treated alike. The International Banking Act of 1978 sought to accomplish this with respect to U.S. operations of foreign banking organizations. The fact that those organizations may conduct nonbanking activities abroad of the kinds not permitted U.S. banking organizations, either domestically or abroad, does not violate that principle. The concern and responsibility of the Federal Reserve and other U.S. banking agencies run to the promotion of safe and sound domestic institutions. With regard to foreign banks, our responsibility is related to that part of their banking business conducted in this country and is not directly concerned with the parent institution headquartered overseas.

In your letter, Mr. Chairman, you asked how the position of nonbanking activities of foreign bank holding companies applies to the Hong Kong and Shanghai Banking Corporation. I believe that Chairman Volcker's letter to you of January 14, 1980, addresses that question. I have

appended that letter to my statement and ask that it be included in the record.

In closing, I should like to reiterate my belief that the questions you have raised are important ones. The problem of accommodating our national policies and objectives to the realities of an increasingly integrated world economy is one for

which there can be only temporary and imperfect solutions.

The dynamics of the situation call for continuous reappraisals and adjustments. These will certainly be necessary as international banking evolves and as the role of foreign banks in the U.S. economy continues to change. □

---

*Statement by J. Charles Partee, Member, Board of Governors of the Federal Reserve System, before the Committee on Banking, Housing, and Urban Affairs, U.S. Senate, July 1, 1980.*

I am glad to appear today before this committee to present the views of the Federal Reserve Board on two banking bills that have been the subject of much attention and previous debate. One bill would limit the insurance activities of bank holding companies. The other would subject acquisitions of banking organizations to stricter standards than in the present antitrust laws and would tighten the rules for expansion into nonbanking activities by bank holding companies.

The proposed H.R. 2255 would prohibit the sale of credit-related property and casualty insurance by bank holding companies with consolidated assets in excess of \$50 million, with the following exceptions:

1. The sale of credit life, personal accident, and health insurance.
2. The sale by finance company subsidiaries of bank holding companies of property and casualty insurance on property used as collateral for a loan of \$10,000 or less, indexed to future increases in the consumer price index.
3. The sale of general insurance in places of 5,000 population or less, or where the Board determines that insurance agency facilities are inadequate.
4. The sale of insurance pursuant to certain limited "grandfather" rights for organizations engaged in the activity before June 6, 1978, and a limited authority to continue to act as "managing general agents" with respect to insurance on real and personal property and group life insurance for the banking organization or its employees.

The Board consistently has opposed this bill because it seems to be anticompetitive and discriminatory. Many creditors, including finance companies and retailers, are permitted to sell insurance in connection with their credit-granting activities, but the proposed prohibitions would apply only to bank holding companies. In this respect the bill clearly discriminates against customers of bank holding companies because the finance company, retail, and other sectors would remain free to offer property and casualty insurance. The bill also may be misdirected, since the available evidence suggests that any abuses are more likely to occur among nonbank lenders than among bank lenders. The evidence clearly indicates a similar inconsistency in that potential abuses associated with the joint offering of credit and insurance are more likely to occur in the sale of credit life than in the property and casualty field. Yet the proposed legislation allows credit insurance but prohibits the sale of credit-related property and casualty insurance.

The various exemptions also seem inconsistent with the purposes of the proposed bill and would appear to compound the inequities. The Board opposes both the \$50-million-asset-size exemption and the \$10,000-transaction exemption for subsidiary finance companies. Permitting a bank holding company or its subsidiary to engage in an activity solely because of the asset size of the bank holding company or the size of the transaction involved are not relevant criteria to determining whether an activity is "closely related" to banking. By employing such a standard the Congress would be abandoning some well-established criteria that have been developed over the years by the courts and have come to be recognized as appropriate for determining whether a nonbanking activity is "closely related" to bank-

ing within the meaning of section 4(c)(8) of the act.<sup>1</sup> In addition, the effect of the \$50-million-asset-size exemption would be to permit expanded sales of insurance by small bank holding companies. The majority of these companies are located in relatively concentrated markets where the potential for abuse is greatest because market power is generally related to the relative rather than the absolute size of the organizations in such markets. The effect of lifting constraints on the scope of insurance agency activities for small bank holding companies and exempting finance company transactions of less than \$10,000 probably would be to increase the volume of insurance sold by holding companies. In fact, more than 60 percent of all bank holding companies would be able to expand the scope and volume of their activities to include transactions clearly unrelated to banking. Such an occurrence appears directly contradictory to the intent of the bill.

The Board's view continues to be that banking organizations should be allowed to sell credit-related insurance, including property and casualty insurance, to protect loan collateral. There are several reasons to believe that the benefits of such activity outweigh the possible adverse effects. First, permitting banks and bank holding companies to provide these services is likely to be procompetitive. Second, sales of insurance by subsidiary banks provide a useful and convenient service to the public, including sales at locations that may be poorly served by others. Prohibiting the activity for larger banking organizations would surely inconvenience at least some of the public—namely those borrowers who would be forced by the prohibition to look elsewhere for the needed insurance coverage.

Before commenting on specific provisions of S. 39, the Competition in Banking Act of 1979, some general observations may be useful. Governor Coldwell testified before this committee in 1978, and I testified before the House Banking Committee last year on these same proposals. In both cases we indicated that the Board sees no need for additional legal restraints on the already

closely regulated expansion by banking organizations.

First, there has been a noticeable trend toward deconcentration of domestic banking resources at the national level, as well as in many states and local markets. Most of the growth that generated concern about increased concentration in U.S. banking actually took place in the foreign sector. This growth masked the trend toward deconcentration of domestic banking assets while it actually represented an improvement in the competitive position of U.S. banking organizations in foreign markets.

Second, expansion of bank holding companies in the nonbanking area has been strictly controlled. Only those activities that are closely related to banking and are a proper incident thereto have been authorized, and expansion has been mainly *de novo* rather than by acquisition of existing organizations. This form of expansion has been procompetitive and, on balance, has brought benefits to the public. In our judgment, the flexibility of the present regulatory system serves the nation well and will continue to provide an appropriate regulatory framework for expansion of the financial sector.

I might add that passage of the Depository Institutions Deregulation and Monetary Control Act of 1980 has the potential for enhancing the competitive structure of banking markets for many financial services, for both depositors and loan customers. Its passage should further alleviate many of the concerns about concentration reflected in S. 39, and the increased competition in banking markets that will result should act as an additional deterrent to potential abuses of market power.

The appendix to my testimony sets forth the positions of the Board on the specific provisions of S. 39, except for section 601, which I will discuss briefly.<sup>2</sup> The Board strongly objects to the additional hearing and administrative procedure requirements contained in this section.

Under section 601 the Board could be required to provide an adjudicative or trial-type hearing in nearly every application or rulemaking

1. *National Courier Association v. Board of Governors*, 516 F.2d 1229, 1237 (D.C. Cir. 1975); *Alabama Association of Independent Insurance Agents v. Board of Governors*, 533 F.2d 224, 241 (5th Cir. 1976); and *NCNB Corporation v. Board of Governors*, 599 F.2d 609 (4th Cir. 1979).

2. The attachments to this statement are available on request from Publications Services, Board of Governors of the Federal Reserve System, Washington D.C. 20551.

proceeding under section 4(c)(8) whether or not disputed facts are involved. This requirement represents a step backward to the burdensome and time-consuming procedures of the Bank Holding Company Act before the 1970 amendments. The courts and other administrative law authorities have long recognized the distinction, established by the Administrative Procedure Act, between adjudication and rulemaking. Adjudication and a *formal* hearing may be required to establish disputed facts about particular parties, their activities, businesses, and property. On the other hand, a rulemaking procedure is less formal because the issues do not typically relate to disputed facts. The precedents in administrative law demonstrate that the public interest is safeguarded and best served in rulemaking by avoiding the cumbersome and unreasonably lengthy procedures of formal adversary hearings.

Recognizing the imposition in 1970 by the Congress of a time limit on the processing of applications under section 4(c)(8), the Board has suc-

cessfully accelerated its decisionmaking process by using a variety of procedural tools consistent with the Administrative Procedure Act. These include a formal hearing when there are disputed questions of fact. We believe that these procedures assure that the best possible, informed decision is made in the shortest period of time. Accordingly, we would strongly recommend that the present procedures be continued.

In closing, I would like to sound a note of caution. Our economy and financial system are changing rapidly. Demands for financial services are increasing even faster and new techniques are making it possible to meet such demands in increasingly efficient and innovative ways. In this rapidly changing environment we believe that adding to the rigidities of regulation would be a mistake. The present regulatory framework, while not perfect, has sufficient flexibility to adapt as necessary to changes in technology and services offered—a flexibility that needs to be preserved if the public is to continue to be best served by our evolving financial system. □

# Announcements

## *PHASEOUT OF CREDIT RESTRAINT MEASURES*

The Federal Reserve Board on July 3, 1980, announced plans to complete the phaseout of the special measures of credit restraint that had been put in place, or reinforced, on March 14, 1980.

The special measures were designed to supplement, temporarily, more general measures of credit and monetary control, and recent evidence indicates that the need for those extraordinary measures has ended. For the year to date, credit expansion, particularly at banks, is clearly running at a moderate pace. In recent months, consumer borrowing has apparently contracted, anticipatory and speculative demands for credit seem to have subsided, and funds have been in more ample supply.

Whereas the special conditions necessitating the extraordinary credit restraints are no longer present, the Board emphasized that its general goals of achieving restrained growth in money and credit aggregates are unchanged. Those continuing goals are closely related to the Board's concern with further reduction of inflationary pressures in the economy.

The Board on May 22 had halved the special deposit requirements in connection with the credit restraint program and had modified the guidelines for the special program for restraining bank credit growth.

The Board has now scheduled completion of the phaseout by taking the following measures:

1. Elimination of the remaining 5 percent marginal reserve requirement on managed liabilities of large banks and agencies and branches of foreign banks. This action applies to managed liabilities beginning July 10, for reserves required beginning July 24. In addition, the Board eliminated, effective the same date, the 2 percent supplementary reserve requirement applicable to member banks on large time deposits. This requirement had been initiated in November 1978.

2. Elimination of the remaining 7½ percent

special deposit requirement that applies to increases in covered consumer credit, effective for covered credit extended in June and thereafter. Thus, no further special deposits will be required after the present deposit maintenance period ends on July 23. To permit orderly implementation of changes now in process and to assure adequate notice of such changes to credit users, the Board's rule permitting creditors to modify the terms of credit accounts will remain in effect for notices mailed only on or before September 5.<sup>1</sup>

3. Elimination of the remaining 7½ percent special deposit requirement that applies to increases in covered assets of money market mutual funds and other similar institutions. This action applies to covered assets beginning July 28, and therefore no special deposits will be required beginning August 11.

4. Phaseout of the special credit restraint program under which banking institutions and finance companies were asked to limit domestic loan growth to a range of 6 to 9 percent in 1980. Available data for the first five months of this year indicate that bank loans to domestic borrowers have increased at around a 3 percent annual rate. Banking institutions with \$300 million or more in deposits were to complete reports (either the quarterly report or the monthly report for the larger institutions) due on July 10 under this program for data as of June 30. After those reports are received, discussions will be held with individual banks to review experience with the special program.

In phasing out the aggregate 6 to 9 percent guideline for individual institutions, the Board feels that normal competitive and market incentives can again be relied on to assure the flow

---

1. Under the consumer credit restraint program, to make certain changes in terms of accounts, a creditor must send a 30-day advance notice explaining the changes and giving the consumer the option of paying down the existing balance according to the original terms. Subsequent use of the account by the consumer is deemed to be acceptance of the new terms.

of credit consistent with normal banking standards and that qualitative guidelines are therefore no longer appropriate. However, the Board remains concerned over the volume of credit that appears to have flowed to essentially speculative purposes in the past and is considering the need for additional means of monitoring such developments in the future.

#### *CHANGE IN DISCOUNT RATE*

The Federal Reserve Board approved a reduction in the discount rate from 12 percent to 11 percent, effective June 13, 1980. The action was taken entirely in reflection of recent further declines in short-term market interest rates to levels well below the existing discount rate.

In making this technical change, the Board acted on requests from the directors of the Federal Reserve Banks of New York, Philadelphia, Cleveland, Richmond, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco. (Subsequently, the Board approved similar actions by the directors of the Federal Reserve Banks of Boston and Atlanta, effective June 16, 1980.) The discount rate is the interest rate that member banks are charged when they borrow from their district Federal Reserve Bank.

#### *REGULATION T: AMENDMENT*

The Federal Reserve Board on June 12, 1980, announced adoption of an amendment to its Regulation T (Credit by Brokers and Dealers) affecting specialists and options market-makers.

The amendment, which reflects comment received on a proposal, is effective August 11.

The principal features of the amendment, are as follows:

1. In general, the amendment permits good-faith financing of positions in securities in which a specialist makes a market, but requires a 25 percent margin for positions in the related security acquired for hedging or covering purposes and the generally applicable margin (50 percent) for other securities.

2. Creditors extending credit to a specialist's joint account will no longer be required to participate in the account.

3. Specialists and options market-makers will be able to use securities issued by the U.S. government or its agencies as collateral in their specialist accounts.

4. Several other changes, including a rule restricting "free riding" on underlying stock positions carried in an options market-maker's account that will apply only to market-makers whose own exchange has not adopted a rule on free riding approved by the Securities and Exchange Commission; a rule affecting the withdrawal of cash or securities from their accounts by specialists and market-makers; and a rule defining positions that may be carried on preferential credit terms in the accounts of specialists and market-makers.

The Board rescinded, effective August 11, suspension of the effective date of a rule, as it applies to options specialists, establishing uniform margin requirements for the writing of options. The suspension, adopted in January 1977, was to remain in effect until the Board could consider a separate, self-contained rule for options specialists. This has now been done and the suspension is no longer necessary.

#### *COUNTRY EXPOSURE LENDING SURVEY*

The results of a survey of foreign lending by large U.S. banks as of December 31, 1979, have been made public by the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Reserve Board. The data cover claims on foreign residents held by all domestic and foreign offices of 130 U.S. banking organizations with significant foreign banking operations.

The results indicate that cross-border and non-local currency claims increased moderately in 1979, rising 13 percent from \$217 billion to \$246 billion. The increase in 1978 was 12 percent. Much of the growth represented increased claims on banks, largely related to increased money market activity. Cross-border and cross-currency lending to public and private nonbank borrowers grew \$9 billion during the year, a 9 percent increase. In addition, the survey indicates that local currency lending to local borrowers by foreign offices of U.S. banks increased \$9 billion in 1979 to a total of \$67 billion. Most of the

growth in both types of lending occurred in the second half of the year.

### *Types of Loans*

The survey concentrated on data involving lending from a bank's offices in one country to residents of another country as well as in a currency other than that of the borrowers. These are referred to as cross-border and cross-currency loans.

Cross-border and cross-currency loans are those most closely associated with country risk. Such claims totaled \$246 billion at year-end 1979. Claims on residents of Switzerland and the Group of Ten (G-10) developed countries and "offshore banking centers" (countries in which multinational banks conduct a large international money market business) represent 55 percent of this total. Claims on residents of developing countries that are not members of the Organization of Petroleum Exporting Countries (OPEC) amount to 25 percent of the total, up slightly from 24 percent in 1978.

In addition, the banks reported \$67 billion in local currency claims that were held by their foreign offices on residents of the country in which the office was located. An example would be claims in marks on German residents held by the German branch of the reporting U.S. banks. Most of these local currency claims were funded by local currency liabilities due to local residents, which amounted to \$56 million.

### *Maturities*

More than two-thirds of the reported cross-border and cross-country claims had a maturity of one year or less. Only \$19 billion in claims had a maturity in excess of five years. Short-term claims are especially prominent in the G-10 countries and the offshore banking centers where a large volume of interbank lending takes place. Such placements of deposits are usually for very short periods.

For most other groups of countries, short-term claims accounted for slightly less than half of the total claims, although the proportion varied among countries.

### *Type of Borrower*

Business with other banks accounted for the largest amount, equaling \$136 billion. Most of the claims on banks were on those located in the G-10 countries and the offshore banking centers. Lending in the private nonbank sector totaled \$67 billion, and loans to the public sector amounted to \$43 billion. This last category includes foreign central governments, their political subdivisions and agencies, foreign central banks, and commercial nonbank enterprises owned by government. The distribution by type of borrower varied significantly from country to country.

### *Guarantees*

Cross-border and cross-currency claims that are guaranteed by residents of another country are reallocated from the country or residence of the borrower to another country in two major ways. First, claims on a bank branch located in one country when the head office is located in another country are allocated to the country of the head office. Since a branch is legally a part of the parent, claims on a branch are treated as being guaranteed by the head office. Second, claims on a borrower in one country that are formally guaranteed by a resident of another country are allocated to the latter country. These reallocations are thought to provide a better approximation of country exposure in the banks' portfolios than the unadjusted figures.

Most of the shifts are accounted for by the transfer of claims on branches (and, when guaranteed, subsidiaries) of banks to their head offices (\$52 billion out of \$64 billion). In general, the reallocations primarily affected the offshore banking centers and some of the developed countries. For example, claims on the offshore banking centers decreased from \$37 billion to \$10 billion and claims on the United Kingdom decreased from \$38 billion to \$21 billion. For most less developed countries, a relatively small portion of claims is externally guaranteed. The total for claims on foreigners by country of guarantor is about \$220 billion or \$26 billion less than the total for claims by country of borrower. This results from U.S. residents guaranteeing about

\$33 billion in claims on foreign residents and foreigners guaranteeing about \$7 billion in claims on U.S. residents.

### *Commitments to Provide Funds for Foreigners*

The survey also provided information on contingent claims on foreigners. The banks were asked to report only those contingent claims when the bank had a legal obligation to provide funds. The amounts reported total \$70 billion, 77 percent of the total being in the private sector, including banks.

### *STANDARD TERMS AND GUIDELINES*

The Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Reserve Board have adopted recommendations made to them by the Federal Financial Institutions Examination Council regarding terms to be used in competitive factor reports and uniform guidelines for internal control of the foreign exchange activities of commercial banks.

The agencies adopted, as standard terminology to be used in their assessment of competitive factors in proposed bank mergers, the following terminology:

*Monopoly.* Requires disapproval.

*Substantially adverse.* Precludes approval unless anticompetitive effects of the proposed merger are outweighed by benefits to the public in meeting the convenience and needs of the community to be served.

*Adverse.* The proposed merger has anticompetitive effects material to the decision that would not preclude approval.

*No significant effect.* Anticompetitive effects, if any, are not material to the decision.

The agencies adopted the recommended uniform guidelines for commercial banks on internal control of their foreign exchange operations covering policy documentation, internal accounting

controls, and audit documentation. The text of the guidelines will be published in the *Federal Register*.

### *MEETING OF CONSUMER ADVISORY COUNCIL*

The Federal Reserve Board has announced that its Consumer Advisory Council met on July 30 and 31, 1980. The council, with 30 members who represent a broad range of consumer and creditor interests, advises the Board on its responsibilities regarding consumer credit protection legislation and regulation at quarterly meetings.

### *CHANGE IN BOARD STAFF*

The Board of Governors has announced the following appointments.

David L. Robinson as Assistant Director and Chief Federal Reserve Examiner, Division of Federal Reserve Bank Operations, effective June 30, 1980. Mr. Robinson, who came to the Board in May 1975 from the Federal Reserve Bank of Kansas City, holds a B.S. from Emporia State College and attended the Stonier School of Banking.

Robert E. Frazier as Assistant Director for Building Services, Division of Support Services, effective July 1, 1980. Mr. Frazier, formerly with the Military Traffic Management Command, U.S. Army, holds a B.A. from Hampton Institute and an M.A. from Central Michigan University.

The Board has also announced the resignation of Richard H. Puckett, Assistant Secretary to the Board, effective June 30, 1980.

### *PROPOSED ACTIONS*

The Federal Reserve Board has proposed procedures for nonmember depository institutions to follow if they pass required reserves through another depository institution to the Federal Reserve, and procedures for these intermediaries to follow in handling the reserve balances of others.

The Board asked for comment by July 31, 1980.

*BANKING DATA  
FROM EDGE CORPORATIONS*

The Federal Reserve Board has announced the availability in magnetic tape form of data reported to the Board quarterly by individual banking Edge Act and Agreement corporations. The data, based on balance sheet information in official reports of condition, begin with data as of December 31, 1979, and will be available about 60 to 75 days after each subsequent report date.

The Board will make available the magnetic tapes, including complete documentation, at a cost of \$70.00 per reporting period, under a new service called the Banking Edge Act and Agreement Corporation Subscription. Orders with remittance should be addressed to the *Office of the Controller*, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

Information about the content or format may be obtained by telephoning (202) 452-2816, or by writing the Data Request Coordinator in the Data Services Section, *Division of Data Processing*,

Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

The Board also will make available computer listings of individual banking Edge and Agreement corporation reports of condition at a cost of 50 cents per report. These listings are released 60 to 75 days after the report date. Requests for listings should be addressed to the *Freedom of Information Office*, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

*SYSTEM MEMBERSHIP:  
ADMISSION OF STATE BANKS*

The following banks were admitted to membership in the Federal Reserve System during the period June 11, 1980, through July 10, 1980:

*New York*

Dongan Hills . . . . . Gateway State Bank

*Oregon*

Medford . . . . . Jefferson State Bank

# Record of Policy Actions of the Federal Open Market Committee

## Meeting Held on May 20, 1980

### 1. Domestic Policy Directive

The information reviewed at this meeting suggested that real output of goods and services was declining markedly in the current quarter after increasing at an annual rate of 0.6 percent in the first quarter. However, average prices, as measured by the fixed-weight price index for gross domestic business product, were continuing to rise at a rapid pace following increases at an annual rate of about 11 percent in the first quarter and nearly 10 percent during 1979.

The dollar value of total retail sales fell substantially further in April after declining sharply in February and March. Unit sales of new automobiles slowed markedly further in April to the lowest level since the spring of 1975 and apparently remained exceptionally weak in early May.

The index of industrial production fell 1.9 percent in April, following small reductions in February and March. The April decline reflected widespread cutbacks in output. The rate of capacity utilization in manufacturing fell 2 percentage points further in April to 81 percent, 6 percentage points below the recent peak in March 1979.

In April nonfarm payroll employment declined substantially following a moderate reduction in March, and the rate of unemployment rose from 6.2 to 7.0 percent. Decreases in employment were especially pronounced in automobile- and construction-related industries. The

length of the average workweek fell for the third successive month.

Private housing starts declined throughout the first quarter and edged down further in April to an annual rate of about 1 million units. Building permits for new units were down substantially further in April. In March sales of single-family homes fell for the sixth consecutive month.

The rise in producer prices of finished goods moderated appreciably in April, reflecting a large drop in prices of consumer foods and a less rapid advance in prices of energy-related items than in earlier months. In the first quarter both producer prices and consumer prices had risen at accelerated rates following rapid advances in 1979. The index of average hourly earnings of private nonfarm production workers rose at an annual rate of about 8 percent over the first four months of the year, compared with an increase of 8½ percent during 1979.

In foreign exchange markets the dollar had remained under downward pressure over most of the previous four weeks. Such pressure, which had emerged in early April, reflected primarily a sharp decline in interest rates on dollar assets in relation to those on foreign-currency assets. The trade-weighted value of the dollar against major foreign currencies had fallen about 3½ percent since the Committee's meeting on April 22 and about 7½ percent since early April.

The U.S. foreign trade deficit increased substantially from the fourth quarter of 1979 to the first quarter of 1980 despite a considerable reduc-

tion in March from the average in January and February. For the quarter as a whole, imports, including both petroleum and nonpetroleum products, rose at a much faster rate than exports even though non-agricultural exports exhibited considerable strength.

At its meeting on April 22, the Committee had agreed that open market operations in the period until this meeting should continue to be directed toward expansion of reserve aggregates consistent with growth over the first half of 1980 at annual rates of  $4\frac{1}{2}$  percent for M-1A and 5 percent for M-1B, or somewhat less, provided that in the intermeeting period the weekly average federal funds rate remained within a range of 13 to 19 percent. In the Committee's view, this short-run policy should be consistent with growth in M-2 at an annual rate of about  $7\frac{3}{4}$  percent over the first half of the year. The Committee had also agreed that if the constraint on the federal funds rate appeared to be inconsistent with the objective for the expansion of reserves, the Manager for Domestic Operations was promptly to notify the Chairman, who would then decide whether the situation called for supplementary instructions from the Committee.

Immediately after the meeting, required reserves and thus member bank demands for reserves began to fall substantially in relation to the supply being made available through open market operations, reflecting a sharp weakening of the monetary aggregates during April. Consequently, member bank borrowings for adjustment purposes and the federal funds rate both declined sharply. On May 6, after the funds rate had fallen below the 13 percent lower limit of the Committee's intermeeting range and available data had suggested that the demand for money and for reserves had remained weak, the Committee voted to reduce the lower limit of the intermeeting range for the funds rate to

$10\frac{1}{2}$  percent. In the statement week ending May 14, the funds rate averaged  $10\frac{7}{8}$  percent, down from an average of about  $18\frac{3}{8}$  percent in the statement week ending April 16.

In April M-1A and M-1B contracted at annual rates of  $18\frac{1}{2}$  and  $14\frac{1}{2}$  percent respectively following small declines in March, while M-2 fell at an annual rate of about 3 percent after increasing moderately in March. As a result, expansion of the monetary aggregates—especially M-1A and M-1B—over the first four months of the year averaged well below the growth paths set by the Committee for the first half; M-1A declined at an annual rate of  $1\frac{1}{2}$  percent over that period; M-1B was unchanged; and M-2 expanded at an annual rate of  $4\frac{1}{2}$  percent. In early May, however, there were substantial increases in demand deposits and money market mutual funds.

Total credit outstanding at U.S. commercial banks contracted in April after expanding at a substantially reduced pace during March. The April decline reflected reductions in both investments and loans, which included a drop in business loans. Net issues of commercial paper by nonfinancial corporations moderated in April from an exceptionally strong pace during the first quarter.

Interest rates fell sharply further during the intermeeting period as market participants reacted to accumulating signs of a slowdown in economic activity, to sustained weakness in the money stock, and to the decline in the federal funds rate. The rate declines were especially pronounced in short-term debt markets, but bond yields also moved substantially lower. Commercial banks reduced their loan rate to prime business borrowers from  $19\frac{1}{2}$  to  $16\frac{1}{2}$  percent over the interval. In primary markets for home mortgages, average rates on new commitments at sampled savings and loan institutions fell more than 2 percentage points to about  $14\frac{1}{8}$  percent. On May 6 the

Federal Reserve announced the removal of the surcharge of 3 percentage points on frequent borrowings from the Federal Reserve Banks by member banks with deposits of \$500 million or more. This surcharge had been imposed in mid-March as part of a broad program of credit restraint.

Staff projections prepared for this meeting suggested a larger decline in real GNP in the current quarter than had been anticipated a month earlier. Further declines were expected in subsequent quarters, and unemployment was projected to increase substantially. Prices of goods and services were projected to continue under substantial upward pressure, although the rate of increase was not expected to be so rapid as in the first quarter.

Committee members agreed that a marked contraction in real GNP was under way in the current quarter. The rapidity of the decline, reflecting in part the abrupt weakening in consumption expenditures, suggested a risk that the contraction would prove to be deeper than was widely expected. At the same time, inflation remained a serious problem. The rise in prices appeared likely to remain rapid, even though there were grounds for anticipating some moderation of the rise over the months ahead.

At its meeting on February 4-5, 1980, the Committee had agreed that from the fourth quarter of 1979 to the fourth quarter of 1980 average rates of growth in the monetary aggregates within the following ranges appeared to be consistent with broad economic aims: M-1A, 3½ to 6 percent; M-1B, 4 to 6½ percent; M-2, 6 to 9 percent; and M-3, 6½ to 9½ percent. The associated range for the rate of growth in commercial bank credit was 6 to 9 percent. It had also been agreed that the longer-run ranges, as well as the particular aggregates for which such ranges were specified, would be reconsidered in July or at any other time that condi-

tions might warrant, and also that short-run factors might cause considerable variation in annual rates of growth from one month to the next and from one quarter to the next.

In contemplating policy for the period immediately ahead, the Committee took note of a staff analysis indicating that growth of M-1A and M-1B over the first four months of the year had fallen considerably short of the rates consistent with the objectives for the first half of the year that the Committee had established at its meeting in March and reaffirmed at its meeting in April. Some rebound in growth of these aggregates was likely to occur over the May-June period, assuming interest rates at around current levels and given the staff projection of expansion in nominal GNP during the second quarter and the public's likely need to rebuild depleted cash balances. It still seemed likely, however, that growth of these aggregates over the first half of 1980 would fall considerably short of the rates consistent with the Committee's ranges for the year from the fourth quarter of 1979 to the fourth quarter of 1980. Growth of M-2 and M-3 appeared to be less weak relative to the Committee's longer-run ranges than that of the narrowly defined aggregates.

In the Committee's discussion of policy, the members agreed that operations in the period immediately ahead should be directed toward expansion of monetary aggregates at rates high enough to promote achievement of the Committee's objectives for monetary growth over the year, recognizing that a number of months might well be required in the process. They differed to some extent in their views concerning the speed with which that goal should be sought and about the further near-term decline in the federal funds rate that might be tolerated in its pursuit.

Several members believed that if the demand for money were to remain weak, the Committee should move in a relatively gradual fashion

over the balance of the year to restore the desired longer-run rates of money growth. Concern was expressed that a more aggressive approach would lead to such sharp declines in the federal funds rate and other short-term interest rates in the period immediately ahead that there could be a perverse impact on long-term interest rates by exacerbating inflationary expectations, and there could also be strong adverse effects on the value of the dollar in foreign exchange markets. Moreover, aggressive efforts to promote monetary growth might have to be reversed before long, perhaps leading to significant increases in interest rates in a period of substantial weakness in the economy. The possibility was also suggested that the demand for money had shifted downward once again, so that vigorous efforts in the short run to bring monetary growth into line with the Committee's longer-run objectives could result in excessive creation of money.

Other members of the Committee preferred efforts to bring monetary growth more promptly into line with the Committee's objectives for the year. Such an approach, which they regarded as more consistent with the operating procedures the Committee had been following since early October 1979, could make an important contribution to moderating the severity of the recession.

At the conclusion of the discussion, the Committee agreed that open market operations in the period until the next meeting should be directed toward expansion of reserve aggregates consistent with growth of M-1A, M-1B, and M-2 at rates high enough to promote achievement of the Committee's objectives for monetary growth for the year as a whole, provided that in the period before the next regular meeting the weekly average federal funds rate remained within a range of 8½ to 14 percent. Specifically, the Committee agreed that operations should be directed toward encouraging growth of M-1A,

M-1B, and M-2 over May and June at annual rates of 7 to 7½ percent, 7½ to 8 percent, and about 8 percent respectively. The Committee also agreed that, in light of the recent shortfall, moderately faster monetary growth would be acceptable if that developed in response to a strengthening of the demand for money. It was understood that if the demand for money and for bank reserves proved to be weak and the federal funds rate declined significantly within its specified range, the Committee would review the situation in advance of the next regular meeting scheduled for July 9. In any case, if it appeared that the constraint on the federal funds rate was inconsistent with the objective for the expansion of reserves, the Manager for Domestic Operations was promptly to notify the Chairman, who would then decide whether the situation called for supplementary instructions from the Committee.

The following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests a marked contraction in real GNP in the current quarter. In April the dollar value of total retail sales declined substantially for the third consecutive month. Industrial production and nonfarm payroll employment were curtailed sharply, and the unemployment rate rose from 6.2 to 7.0 percent. Private housing starts, which had declined throughout the first quarter to a relatively low rate, edged down further in April. The overall rise in prices of goods and services has remained rapid in recent months, although in April the rise in producer prices of finished goods was slowed by a large decrease in foods and by a lessening of the rapid rise in energy items. Over the first four months of the year, the rise in the index of average hourly earnings was somewhat less than the rapid pace recorded in 1979.

The downward pressure on the dollar in exchange markets that emerged in early April has continued over most of the past four weeks, in response primarily to the sharp decline in U.S. interest rates relative to foreign interest rates; the trade-weighted value of the dollar against major foreign currencies has declined about 3½ percent. The U.S. for-

eign trade deficit was substantially larger in the first quarter of 1980 than in the preceding quarter, despite a considerable decline in March from the average in the preceding two months.

M-1A and M-1B contracted sharply further in April, and M-2 also declined. Commercial bank credit, both loans and investments, contracted in April after having slowed substantially in March. Over recent weeks, market interest rates have declined sharply further.

Taking account of past and prospective economic developments, the Federal Open Market Committee seeks to foster monetary and financial conditions that will resist inflationary pressures while encouraging moderate economic expansion and contributing to a sustainable pattern of international transactions. At its meeting on February 4-5, 1980, the Committee agreed that these objectives would be furthered by growth of M-1A, M-1B, M-2, and M-3 from the fourth quarter of 1979 to the fourth quarter of 1980 within ranges of 3½ to 6, 4 to 6½, 6 to 9, and 6½ to 9½ percent respectively. The associated range for bank credit was 6 to 9 percent.

In the short run, the Committee seeks expansion of reserve aggregates consistent with growth of M-1A, M-1B, and M-2 at rates high enough to promote achievement of the Committee's objectives for monetary growth over the year, provided that in the period before the next regular meeting the weekly average federal funds rate remains within a range of 8½ to 14 percent.

If it appears during the period before the next meeting that the constraint on the federal funds rate is inconsistent with the objective for the expansion of reserves, the Manager for Domestic Operations is promptly to notify the Chairman who will then decide whether the situation calls for supplementary instructions from the Committee.

Votes for this action: Messrs. Volcker, Guffey, Morris, Rice, Schultz, Solomon, Mrs. Teeters, Messrs. Wallich, and Winn. Votes against this action: Messrs. Partee and Roos.

Mr. Partee dissented from this action because he believed that it involved a risk of extending the shortfall in monetary growth relative to the Committee's growth ranges for the year. In an effort to guard against the continuation of such a shortfall, which could worsen recessionary prospects, he preferred to direct op-

erations toward achieving somewhat higher rates of monetary growth in the May-June period. He also preferred an intermeeting range for the federal funds rate with a lower limit below 8½ percent, because such a range would be less likely to interfere with reserve-supplying operations consistent with the objectives for the aggregates.

Mr. Roos dissented because in his view the annual growth rate objective of 3½ to 6 percent for M-1A established by the Committee in February 1980 was consistent with reduction of inflation without aggravating recessionary pressures. He believed that the 8½ to 14 percent constraint on the federal funds rate was incompatible with that agreed-upon objective and would cause money growth to remain below it. Such slow growth would unnecessarily exacerbate the current economic slowdown. Historically, deep recessions had inevitably brought about countermeasures that intensified inflation.

## 2. Authorization for Foreign Currency Operations

The Committee approved an increase from \$300 million to \$500 million in the System's swap arrangement with the Bank of Sweden and the corresponding amendment to paragraph 2 of the authorization for foreign currency operations, effective May 23, 1980, for a period of one year. With this change paragraph 2 read as follows:

2. The Federal Open Market Committee directs the Federal Reserve Bank of New York to maintain reciprocal currency arrangements ("swap" arrangements) for the System Open Market Account for periods up to a maximum of 12 months with the following foreign banks, which are among those designated by the Board of Governors of the Federal Reserve System under Section 214.5 of Regulation N, Relations with Foreign Banks and Bankers, and with the approval of the Committee to renew such arrangements on maturity:

Foreign bank	Amount of arrangement (millions of dollars equivalent)
Austrian National Bank .....	250
National Bank of Belgium .....	1,000
Bank of Canada .....	2,000
National Bank of Denmark .....	250
Bank of England .....	3,000
Bank of France .....	2,000
German Federal Bank .....	6,000
Bank of Italy .....	3,000
Bank of Japan .....	5,000
Bank of Mexico .....	700
Netherlands Bank .....	500
Bank of Norway .....	250
Bank of Sweden .....	500
Swiss National Bank .....	4,000
Bank for International Settlements:	
Dollars against Swiss francs .....	600
Dollars against authorized European currencies other than Swiss francs .....	1,250

Any changes in the terms of existing swap arrangements, and the proposed terms of any new arrangements that may be authorized, shall be referred for review and approval to the Committee.

Votes for this action: Messrs. Volcker, Guffey, Morris, Partee, Rice, Roos, Schultz, Solomon, Mrs. Teeeters, Messrs. Wallich, and Winn.  
Votes against this action: None.

This action was taken to expand the short-term financing facilities available to the Bank of Sweden.

\* \* \* \* \*

Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's *Annual Report*, are made available a few days after the next regularly scheduled meeting and are later published in the BULLETIN.

# Legal Developments

## CORRECTION TO REGULATION D AMENDMENT

The Board's reserves regulation, 12 C.F.R. Part 204—RESERVES OF MEMBER BANKS is corrected by revising section 204.5(f)(3)(i), [66 FEDERAL RESERVE BULLETIN 492.] to read as follows:

### (3) *Managed liabilities base.* \* \* \*

- (i) \* \* \* outstanding during any computation period beginning after May 28, 1980, is lower than the lowest daily average of such loans and balances outstanding during any computations period between March 6, 1980, and May 28, 1980, for which data were reported on form FR 2414d. \* \* \*

## AMENDMENTS TO REGULATION T

The Board of Governors has amended its Regulation T, Credit by Brokers and Dealers, to permit stock specialists and option market-makers to finance with a broker/dealer certain offsetting positions in related securities on more advantageous terms than are available to the ordinary customer. This concession is given to those exchange-registered dealers who are obliged to promote fair and orderly markets in their specialty securities. The present rule limits margin concessions to the financing of specialty securities only. This action derives from the advent of exchange-traded options in 1973.

Effective August 11, 1980, section 220.4(g) is amended as follows:

### Section 220.4—Special Accounts

\* \* \* \* \*

#### (g) *Specialist's Account.*

- (1) *Applicability.* In a specialist's account, a creditor may clear and finance for a specialist who is a member of a national securities exchange the member's specialist transactions or transactions of any joint account in which all participants, or all participants other than the creditor, are registered and act as specialists. The provisions of this subsection are available to a specialist who is a member of a national securities exchange which submits to the Board of

Governors of the Federal Reserve System reports suitable for supplying current information regarding the use of specialist credit.

#### (2) *Definitions.* For the purpose of this subsection:

- (i) "Joint account" means an account in which the creditor may participate and which by written agreement permits the commingling of the security positions of the participants and provides for a sharing of profits and losses from the account on some predetermined ratio;
- (ii) "Underlying security" means the security which will be delivered upon exercise of the option and does not include a security convertible into the underlying security;
- (iii) "Overlying option" means (A) a put option purchased or a call option written against an existing long position in a specialist's or market-maker's account, or (B) a call option purchased or a put option written against a short position in a specialist's or market-maker's account.
- (iv) "In or at the money," with respect to a call option, indicates that the current market price of the underlying security is not more than one standard exercise interval below the exercise price of the option, and, with respect to a put option, that the current market price of the underlying security is not more than one standard exercise interval above the exercise price of the option.
- (v) "In the money," with respect to a call option, indicates that the current market price of the underlying security is not below the exercise price of the option and, with respect to a put option, that the current market price of the underlying security is not above the exercise price of the option.

(3) *Permitted offset positions.* A specialist in options is permitted to establish in this account on a share-for-share basis a long or short position in the securities underlying the options in which the specialist makes a market, and a specialist in securities other than options is permitted to purchase or write options overlying the securities in which the specialist makes a market, only under one or more of the following conditions (such positions are referred to in this paragraph as "permitted offset positions"):

- (i) The account holds a short option position which is "in or at the money" and is not offset by

- a long or short option position for an equal or greater number of shares of the same underlying security which is "in the money";
- (ii) The account holds a long option position which is "in or at the money" and is not offset by a long or short option position for an equal or greater number of shares of the same underlying security which is "in the money";
- (iii) The account held a short option position against which an exercise notice was tendered;
- (iv) The account held a long option position which was exercised;
- (v) The account holds a net long position in a security (other than an option) in which the specialist makes a market; or,
- (vi) The account holds a net short position in a security (other than an option) in which the specialist makes a market.

(4) *Maximum loan value.* The maximum loan value of securities which may be used as collateral in the account shall be:

- (i) No more than 100 per cent of the current market value of any long position in a security in which the specialist makes a market or a wholly-owned margin security;
- (ii) 75 per cent of the current market value of any underlying security or overlying option purchased and held in the account as a permitted offset position;
- (iii) The maximum loan value prescribed by the Board in section 220.8 (the Supplement to Regulation T) when a security purchased and held in the account does not qualify as a specialist or permitted offset position.

(5) *Adjusted debit balance.* The amount to be included in the adjusted debit balance of the account shall be:

- (i) Not less than 100 per cent of the current market value of either a security sold short or an option written where such position qualifies as a specialist transaction;
- (ii) 125 per cent of the current market value of any security sold short or option written and held in the account as a permitted offset position;
- (iii) The amount prescribed by the Board in section 220.8 (the Supplement to Regulation T) when a security sold short in the account does not qualify as a specialist or permitted offset position plus, for a short position in a security other than an option, the current market value of the security sold short.

(6) *Additional margin; "free-riding."* Except as required by paragraph (g)(8), on any day when addi-

tional margin is required as a result of transactions in the account, the creditor shall issue a call for a deposit of cash or securities having loan value and may allow the specialist a maximum of five full business days to make a deposit sufficient to meet the call. To prevent "free-riding" in the account, a creditor who has not obtained this deposit (and is therefore required to liquidate sufficient securities to meet the call) is prohibited for a 15 day period from extending any further credit in the account to finance transactions in securities in which the specialist is not registered to make a market. The acquisition or liquidation of a permitted offset position shall not be subject to this "free-riding" penalty. The restriction on "free-riding" shall not apply to any national securities exchange adopting a "free-riding" rule applicable to specialists which has been approved by the Securities and Exchange Commission.

(7) *Withdrawals.* On any day when a specialist requests a withdrawal of cash or securities from the account, the creditor shall compute the status of the account for non-specialist securities positions in accordance with the provisions of section 220.8 (the Supplement to Regulation T), permitted offset positions in accordance with the provisions of paragraphs (g)(4)(ii) and (g)(5)(ii), and specialist positions on a "good faith" basis. Withdrawals shall be permitted to the extent that the adjusted debit balance in the account does not exceed the maximum loan value of all of the collateral held in the account after the withdrawal has been made.

(8) *Deficit accounts.* On any day when the account would liquidate to a deficit, the creditor shall not extend any further credit in the account, and shall issue a call for additional cash or collateral, which shall be met by noon of the following business day. In the event sufficient cash or collateral is not deposited the creditor shall liquidate existing positions in the account.

#### CORRECTION TO CREDIT RESTRAINT AMENDMENT

The Board's Credit Restraint regulation, 12 C.F.R. Part 229—CREDIT RESTRAINT, Subpart C is corrected by revising section 229.24(b)(1) [66 FEDERAL RESERVE BULLETIN 494.] to read as follows:

(b) *Managed liabilities base.* \* \* \*

(1) \* \* \* outstanding during any computation period beginning after May 28, 1980, is lower than the

lowest daily average amount of such loans and balances outstanding during the base period or any computation period between March 20, 1980 and May 28, 1980. \* \* \*

#### INTERPRETATION OF REGULATION G

The Board of Governors has issued a final interpretation of its Regulation G, Securities Credit by Persons other than Banks, Brokers or Dealers. This interpretation allows plan lenders, as defined under section 207.4 of Regulation G, who currently extend purpose credit to employees under stock option plans, to also extend credit to employees covered by the plans to pay income taxes due as a result of the exercise of such options.

Effective July 1, 1980, 12 CFR Part 207 is amended by adding a new § 207.111 to read as follows:

#### Section 207.111—Combined Credit for Exercising Employee Stock Options and Paying Income Taxes Incurred as a Result of Such Exercise

(a) The Board of Governors has been asked whether section 207.1(h) of Regulation G prevents a lender under an employee stock option plan that meets the requirements of section 207.4(a) from extending credit to an employee to pay the income taxes incurred as a result of the exercise of the stock option, in addition to the credit to cover the purchase price of the stock.

(b) Section 207.1(h) prohibits a lender governed by Regulation G from extending purpose credit if it is secured by collateral including margin securities, which also secures any other credit to the same person in excess of \$5,000. Unless credit to pay income taxes is also treated as purpose credit, it could not be extended in an amount in excess of \$5,000 when the borrower also has a purpose loan outstanding with the lender, secured by margin securities, since such collateral would be deemed to be also securing the income tax loan. "Purpose credit" is defined in section 207.2(c) of the regulation as "credit which is for the purpose, whether immediate, incidental, or ultimate, of purchasing or carrying a margin security."

(c) Section 207.4(a), which provides special treatment for credit extended under employee stock option plans, was designed to encourage their use in recognition of their value in giving an employee a proprietary interest in the business. Taking a position that might discourage the exercise of options because of tax complications would conflict with the purpose of section 207.4(a).

(d) Accordingly, the Board has concluded that the combined loans for the exercise of the option and the payment of the taxes in connection therewith under

plans complying with section 207.4(a) may be regarded as credit which is for the purpose of purchasing or carrying a margin security within the meaning of section 207.2(c). Since the combined loans are treated as purpose credit, section 207.1(h) does not prohibit the transaction, irrespective of amount.

#### REVISED INTERPRETATION OF REGULATION Y

The Board of Governors has revised an interpretation of its Regulation Y, Bank Holding Companies and Change in Bank Control, that defines terms used to describe the competitive effects of proposed mergers. The revision standardizes descriptive terms used by the Board in competitive factor reports with those used by the Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency.

Effective June 11, 1980, § 250.182 is revised to read as follows:

#### Section 250.182—Terms Defining Competitive Effects of Proposed Mergers

Under the Bank Merger Act (12 U.S.C. 1828(c)), a Federal Banking agency receiving a merger application must request the views of the other two banking agencies and the Department of Justice on the competitive factors involved. Standard descriptive terms are used by the Board, the Federal Deposit Insurance Corporation, and the Comptroller of the Currency. The terms and their definitions are as follows:

(a) The term "monopoly" means that the proposed transaction must be disapproved in accordance with 12 U.S.C. 1828(c)(5)(A).

(b) The term "substantially adverse" means that the proposed transaction would have anti-competitive effects which preclude approval unless the anticompetitive effects are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served as specified in 12 U.S.C. 1828(c)(5)(B).

(c) The term "adverse" means that proposed transaction would have anticompetitive effects which would be material to the decision but which would not preclude approval.

(d) The term "no significant effect" means that the anticompetitive effects of the proposed transaction, if any, would not be material to the decision.

#### DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

*Part 1204—Interest on Deposits*

The Depository Institutions Deregulation Committee has adopted a rule providing that a penalty need not be applied to a withdrawal from an IRA or Keogh account time deposit prior to the maturity of the account, if the owner is disabled or age 59½ or over. The rule applies to all commercial banks, mutual savings banks, and savings and loan institutions subject to the authorities conferred by section 19(j) of the Federal Reserve Act, section 18(g) of the Federal Deposit Insurance Act and section 5B(a) of the Federal Home Loan Bank Act.

Effective June 2, 1980, the Committee amends Part 1204 (Interest on Deposits) by adding section 107 as follows:

*Part 1204—Interest on Deposits***Section 1204.107—Early Withdrawal of IRA and Keogh Accounts**

A depository institution subject to the authorities conferred by section 19(j) of the Federal Reserve Act (12 U.S.C. 371b), section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)), or section 5B(a) of the Federal Home Loan Bank Act (12 U.S.C. 1425(a)) may pay a time deposit or certificate account before maturity without a reduction or forfeiture of earnings if the time deposit or certificate account represents an Individual Retirement Account or a Keogh (H.R. 10) plan established under 26 U.S.C. §§ 408 or 401, and the individual for whose benefit the account is maintained has attained age 59½ or is disabled (as defined in 26 U.S.C. § 72(m)(7)).

**DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE***Part 1204—Interest on Deposits*

The Depository Institutions Deregulation Committee has adopted a technical amendment to Part 1204, Interest on Deposits. This technical amendment clarifies the application of the early withdrawal penalty rule adopted by the Depository Institutions Deregulation Committee ("Committee") on May 28, 1980, to withdrawals from time deposits with original maturities of less than three months. The rule provides that where a time deposit with an original maturity of less than three months, or any portion thereof, is paid before maturity, a depositor shall forfeit an amount at least equal to the amount of interest that could have been earned on the amount withdrawn at the nominal contract rate if the funds had remained on deposit until maturity.

Effective June 2, 1980, the Committee amends section 1204.103 of 12 C.F.R. Part 1204 as follows:

*Part 1204—Interest on Deposits***Section 1204.103—Penalty for Early Withdrawals**

Where a time deposit with an original maturity of three months or more to one year, or any portion thereof, is paid before maturity, a depositor shall forfeit an amount at least equal to three months of interest earned, or that could have been earned, on the amount withdrawn at the nominal (simple interest) rate being paid on the deposit, regardless of the length of time the funds withdrawn have remained on deposit. Where a time deposit with an original maturity of less than three months, or any portion thereof, is paid before maturity, a depositor shall forfeit an amount at least equal to the amount of interest that could have been earned on the amount withdrawn at the nominal (simple interest) rate being paid on the deposit had the funds remained on deposit until maturity. Where a time deposit with an original maturity of more than one year, or any portion thereof, is paid before maturity, a depositor shall forfeit an amount at least equal to six months of interest earned, or that could have been earned, on the amount withdrawn at the nominal (simple interest) rate being paid on the deposit, regardless of the length of time the funds withdrawn have remained on deposit.

**BANK HOLDING COMPANY AND BANK MERGER ORDERS ISSUED BY THE BOARD OF GOVERNORS***Orders Approved Under Section 3 of Bank Holding Company Act*

**Dominion Bankshares Corporation,  
Roanoke, Virginia**

*Order Approving Merger of Bank Holding Companies*

**Dominion Bankshares Corporation, Roanoke, Virginia** ("Dominion"), a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. § 1842(a)(5)) to merge with Valley of Virginia Bankshares, Inc., Harrisonburg, Virginia ("Valley"), also a bank holding company, under the charter and title of Dominion.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act.

The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act.<sup>1</sup>

Dominion, the third largest banking organization in Virginia, controls ten banks with aggregate deposits of approximately \$1.6 billion, representing 8.8 percent of the total deposits in commercial banks in the state.<sup>2</sup> Valley, the tenth largest banking organization in the state, controls five banks with aggregate deposits of approximately \$250.0 million, representing 1.3 percent of the total deposits in commercial banks in the state. Upon consummation of the proposed merger Dominion would remain the third largest banking organization in the state with 10.1 percent of the total commercial bank deposits in Virginia. On the basis of all the facts of record, including the overall structure of banking in Virginia, the Board does not view the proposed merger as having any significantly adverse effects on the concentration of banking resources in Virginia.

The banking subsidiaries of Dominion and Valley, with the exception of the banking subsidiaries in the Roanoke banking market,<sup>3</sup> do not directly compete with each other in any banking market. The distances separating the closest of Dominion's and Valley's subsidiary banks, other than in the Roanoke banking market, are approximately 40 miles. Dominion is the largest of 14 banking organizations located in the Roanoke market, controlling 39.3 percent of market deposits, Valley's banking subsidiary, The First National Bank of Troutville ("Troutville Bank"), is the market's seventh largest with 1.5 percent of market deposits. The significantly adverse competitive effects that would occur within the Roanoke banking market upon consummation of the proposal will be eliminated by the divestiture of Troutville Bank prior to consummation of the subject merger.<sup>4</sup> Accordingly, in light of the above and other facts of record, the Board finds that consummation of the proposal will not result in the elimination of significant existing competition.

1. During its consideration of this application the Board received a protest from certain directors and shareholders of Valley after the expiration of the comment period specified in the *Federal Register* notice on this application. Under the Board's Rules of Procedure, 12 C.F.R. § 262.3(d), the Board is not required to and generally will not consider untimely protests. However, even if the protest had been timely filed the Board finds that the record indicates that protestants' financial and competitive objections do not warrant denial of this application.

2. Banking data are as of December 31, 1979, and reflect bank holding company formations and acquisitions approved as of March 31, 1980.

3. The Roanoke banking market is approximated by the Roanoke SMSA.

4. Virginia National Bankshares, Inc., Norfolk, Virginia, a registered bank holding company, has filed an application under section 3(a)(3) of the Act for Board approval to acquire Troutville Bank.

While Dominion's offices are primarily concentrated in and around the Roanoke area and in the areas west and south of Roanoke, Valley operates, with the exception of Troutville Bank in the Roanoke market, in four banking markets located in the Shenandoah Valley area (Rockingham, Frederick, Augusta, and Shenandoah).<sup>5</sup> In reviewing the competitive effects of the proposal, the Board is of the opinion the most severe adverse competitive effects will be within the Rockingham and Frederick banking markets where Valley's banking subsidiaries are, respectively, the largest of eight banking organizations (with 28.2 percent of market deposits) and the second largest of five banking organizations (with 28.1 percent of market deposits). In the two other banking markets in the Shenandoah area, Valley's subsidiary banks rank sixth out of eight banking organizations in the Augusta banking market (with 6.1 percent of market deposits) and fourth out of six banking organizations in the Shenandoah banking market (with 11.9 percent of market deposits). The banking structure of each of these markets has been carefully examined to determine whether any significantly adverse effects on potential or probable future competition would result from consummation of the proposal.

Dominion appears to have the capability to enter de novo the markets currently served by the banking subsidiaries of Valley. However, with respect to the competitive effects within the Augusta and Shenandoah banking markets, based upon all the facts of record, those markets do not appear attractive to de novo entry; furthermore, in neither market is there any independent bank smaller than Valley's subsidiary banks that might serve as a foothold entry for Dominion. With respect to the Rockingham and Frederick banking markets, it is noted that each market is primarily rural in nature with only one commercial center in each market, Harrisonburg in the Rockingham market, and Winchester in the Frederick market. Entry into these two markets from outside the commercial centers of Harrisonburg or Winchester is not very realistic, while entry de novo into these commercial centers is also not very attractive in light of the number of banking offices already operating in those areas and other demographic data of record. Foothold entry is likewise not very likely as there is no independent bank remaining in Frederick County, and the two possible entry points in Rockingham County are not very meaningful alternatives, particularly in view of their distances from Harrisonburg.

5. The four relevant banking markets are approximated by the following geographical areas: Rockingham, by Rockingham County, including the city of Harrisonburg; Frederick, by Frederick County, including the city of Winchester; Augusta, by Augusta County, including the cities of Staunton and Waynesboro; and Shenandoah, by Shenandoah County. Market data are as of June 30, 1978.

Valley, on its own, does not appear to be capable of expanding beyond its market area, and thus may not be considered to be a likely entrant into any of the markets currently served by banking subsidiaries of Dominion. Based upon its review of all the facts of record, the Board is of the opinion that consummation of the proposal would have only slightly adverse effects on competition. The Board believes, however, that these effects when viewed in light of other considerations reflected in the record, are not serious enough to warrant denial of the proposal.

The Board considers the financial and managerial resources and future prospects of Dominion and its subsidiaries as generally satisfactory. Moreover, affiliation with Dominion should materially improve the financial and managerial resources and future prospects of Valley's subsidiary banks, and enhance their abilities to serve the needs of their communities. In addition, Dominion proposes to expand and improve the services offered to the public by Valley's subsidiary banks. In light of the above, considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application and outweigh the adverse competitive effects associated with this proposal. Accordingly, it is the Board's judgment that the subject proposal is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Richmond, under delegated authority.

By order of the Board of Governors, effective June 17, 1980.

Voting for this action: Vice Chairman Schultz and Governors Wallich, Partee, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Teeters.

[SEAL] (Signed) CATHY L. PETRYSHYN  
Assistant Secretary of the Board.

Fidelity Union Bancorporation,  
Newark, New Jersey

*Order Approving Acquisition of Bank*

Fidelity Union Bancorporation, Newark, New Jersey, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12

U.S.C. § 1842(a)(3)) to acquire all of the outstanding shares (less directors' qualifying shares) of Garden State National Bank, Paramus, New Jersey.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

On the basis of the record, the application is approved for the reasons set forth in the Board's Statement, which will be released at a later date.

By order of the Board of Governors, effective June 5, 1980.

Voting for this action: Chairman Volcker and Governors Schultz, Wallich, and Partee. Voting against this action: Governors Teeters and Gramley. Present and not voting: Governor Rice.

[SEAL] (Signed) GRIFFITH L. GARWOOD,  
Deputy Secretary of the Board.

**Statement by Board of Governors of the Federal Reserve System Regarding Application of Fidelity Union Bancorporation to Acquire Garden State National Bank**

By Order dated June 5, 1980, the Board approved the application of Fidelity Union Bancorporation, Newark, New Jersey, for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire all the outstanding shares (less directors' qualifying shares) of Garden State National Bank, Paramus, New Jersey. In this Statement, the Board sets forth its reasons for approving the application.

Applicant, with five subsidiary banks, is the fourth largest banking organization in New Jersey.<sup>1</sup> It holds aggregate deposits of \$1.7 billion, representing 6.2 percent of total commercial bank deposits in the state. Through its subsidiary banks, Applicant conducts its banking business at a total of eighty-six banking offices located in ten local banking markets in northeastern New Jersey.<sup>2</sup> Bank, the twelfth largest banking organization in New Jersey, holds deposits of \$709.6 million, representing 2.5 percent of statewide deposits. Bank conducts its banking business through thirty-seven banking offices located in five local markets in northern New Jersey.

1. All banking data are as of December 31, 1978.

2. In addition, Applicant's subsidiary, Suburban Finance Company, operates 15 consumer finance offices in New Jersey.

By Order dated November 16, 1979, the Board denied an earlier proposal by Applicant to acquire Bank. In that decision the Board found that the previous proposal would have a serious adverse impact on the banking structure and the concentration of banking resources in New Jersey, and on potential competition in several local banking markets in New Jersey, and that these effects were not outweighed by the increased benefit to the convenience and needs of the communities to be served that would have been derived from the proposal.

In submitting the present application, Applicant has presented additional evidence concerning the competitive and public benefits aspects of the proposal, including actions it will take to address the concerns expressed by the Board in its previous denial. In particular, Applicant proposes to divest, as going concerns, seven branches of Bank, as well as one branch of a subsidiary bank of Applicant holding aggregate deposits of \$97 million, representing 0.4 of deposits in commercial banks in the state.<sup>3</sup> The proposed divestiture of branches would effectively reduce the overall size of the institution to be acquired from the twelfth to the sixteenth largest in New Jersey, holding deposits of \$613 million. In addition, Applicant has proposed certain additions in banking services in further support of approval of the application.

In evaluating the effects of the proposal on statewide banking structure and concentration of resources in New Jersey, Applicant urges the Board to take into account the unique geographic position of that state and the resulting out-of-state influences that this geographic position has on New Jersey banking. Applicant has submitted evidence to demonstrate the significant impact that New York banking institutions have on competition in northern New Jersey. From the record it appears that New York institutions do have banking relationships with individuals and small businesses in northern and central New Jersey. There is also evidence in the record that large Philadelphia banks may exert a similar competitive influence in southern and central New Jersey. While the weight to be accorded this influence is not certain, it does appear that New Jersey's unique position between two large out-of-state financial centers does impact on the competitive environment of New Jersey banks, and the Board believes that any adverse effects on statewide banking structure and concentration of resources that

3. Applicant has also committed to make an effort to divest the branches to organizations that are not strong competitors or are not represented in the respective markets where the branches are located. Thus, the divestiture of branches could have a procompetitive effect in specific markets. In this regard, Applicant submitted evidence indicating that, when branches are transferred to another banking organization, as a general rule customers tend to continue their established banking relationships with the branch despite the transfer of its ownership.

might otherwise result from the proposal are diminished by these circumstances.

Similarly, Applicant has submitted evidence concerning the role of state mutual savings banks, as well as state and federally-chartered savings and loan associations, in New Jersey (generally referred to as "thrifts"). Applicant points out that thrifts in New Jersey, which hold total deposits approximately equal to those in commercial banks, are empowered to offer NOW accounts and also to make limited consumer, as well as commercial, loans.<sup>4</sup> While the Board continues to view commercial banking as most relevant in determining the competitive effects of a proposal, it may be appropriate in particular cases to take into consideration direct competition from thrifts in specific areas in evaluating the various competitive influences.<sup>5</sup> The present case seems to be an appropriate one for such analysis, particularly in view of the absolute size and significant deposit-taking role of thrifts in New Jersey generally as well as their increasing powers. The Board believes that their influence is such as to further diminish the importance of the effects of the proposed acquisition on banking structure and concentration of resources in New Jersey.

The Board has also considered the effects that consummation of the proposed transaction would have on existing and potential competition within each of the local banking markets where Applicant or Bank compete. Both Applicant and Bank serve the Paterson, New Jersey, banking market, where as of July 26, 1979, they held, respectively, 0.7 and 3.1 percent of commercial bank deposits. In addition, Applicant and Bank also compete in the metropolitan New York banking market, which includes portions of two New Jersey counties. On July 26, 1979, Bank, the 20th largest of 126 banking organizations, held only 0.4 percent of the deposits in the market, while Applicant ranked last in that market. Inasmuch as neither organization has a significant presence in either market in which they both compete, the Board concludes that the proposal would eliminate only a minimal amount of existing competition between the two organizations.<sup>6</sup>

With regard to potential competition, the Board notes that Applicant serves eight New Jersey markets

4. The Board notes that under the recently enacted Monetary Control Act of 1980, the commercial lending and investment powers of federally-chartered thrift institutions were broadened. However, in view of the uncertainty with respect to the extent to which the thrifts will exercise their new powers, the Board believes that it would be premature to give full credence to thrift institutions as full competitors of banks until the effects can be ascertained.

5. *United Bank Corporation of New York* (Schenectady Trust Company), 66 FEDERAL RESERVE BULLETIN 61, 63 (January 1979).

6. The United States Department of Justice has indicated its view that the proposal would have much more serious effects on existing competition. The Board notes, however, that this conclusion is based on a much more expansive definition of the Newark banking market than the Board believes is warranted in this case.

where Bank does not presently have offices, while Bank serves three markets where Applicant is not now represented. Generally, elimination of potential competition is regarded as most serious in the framework of a concentrated market, where the party being acquired is a dominant or one of the largest organizations and the party making the acquisition is sizeable and perceived to be one of a limited number of likely entrants into the market. In this regard, three of the markets in which Applicant is a sizeable organization (Freehold, Asbury Park and Newark) may be viewed as somewhat concentrated with four banking organizations holding from 56 to 88 percent of commercial bank deposits in the market. However, in view of the preceding discussion regarding the consideration of thrift organizations in evaluating market influences, the Board notes that, based on data furnished by Applicant, in two of the three markets thrifts hold 36 percent of the total market deposits, while in the Newark market, they hold 60 percent of total deposits in the market. In the Board's judgment, the significant presence of New Jersey thrift organizations in each of these three markets may serve to diminish Applicant's competitive position in each market, and lessen the relevance of the concentration figures among commercial banks. Moreover, with respect to the number of likely entrants in those markets, New Jersey law permits statewide operations by both banks and bank holding companies, and the evidence before the Board suggests that there are in fact numerous likely entrants into each of these three markets, as well as into the other markets in which either Applicant or Bank compete, depending upon the relative attractiveness of the market. Accordingly, based on the foregoing and other facts of record, the Board concludes that while the proposal would eliminate some potential competition, the Board does not believe that the overall effects would be significant.

The financial and managerial resources of Applicant and its subsidiaries are regarded as satisfactory, and their future prospects appear favorable. The financial and managerial resources and future prospects of Bank are considered to be generally satisfactory. While Applicant will incur a substantial amount of indebtedness in connection with the proposed transaction, it appears that Applicant possesses sufficient financial flexibility to service the debt and remain a source of strength to its subsidiary banks. Accordingly, banking factors are consistent with approval of the application.

With respect to the convenience and needs of the communities to be served, Applicant has indicated that it will improve Bank's services to its customers and the community in several important respects. In particular, Applicant intends to raise the interest rates paid to Bank's customers on certain time deposit ac-

counts, as well as to lower the interest rates on consumer loans. In addition, Applicant intends to undertake a program to install trilingual electronic banking facilities at a number of Bank's branches. Applicant has also committed to establish a \$5 million community loan pool for Hudson County to finance housing rehabilitation in low income areas where residents experience difficulty in obtaining credit. This pool would be of particular benefit to residents of low income areas of Hudson County where three of Bank's branches are located. Finally, Applicant notes that it will assist Bank in increasing its commercial lending services through expertise provided by Applicant, and that the availability of a greater lending capacity through the holding company system may enable Bank to become a more effective competitor in the Metropolitan New York banking market. In the Board's view, the benefits to the public that may be expected from consummation of the proposed acquisition lend significant weight toward approval of the application, and are sufficient to outweigh any adverse effects that may result. Accordingly, it is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

Based on the foregoing and other facts of record, the application is hereby approved, subject to the condition that within one year of consummation Applicant divest the seven offices of Bank and one office of Applicant's lead subsidiary bank as proposed in the application. The Board expects that such offices will be divested as going concerns having substantially the same business and assets as those offices held on November 16, 1979. The transaction shall not be consummated before the thirtieth calendar day following the effective date of the Board's Order or later than three months after the effective date of the Order, unless such period is extended for good cause by the Board of Governors or by the Federal Reserve Bank of New York pursuant to delegated authority, but in any event no later than December 31, 1980.

Board of Governors of the Federal Reserve System,  
June 26, 1980.

(Signed) GRIFFITH L. GARWOOD,  
*Deputy Secretary of the Board.*

[SEAL]

#### Dissenting Statement of Governors Teeters and Gramley

In considering the application of Fidelity Union Bancorporation to acquire Garden State National Bank, we believe that the Board should use as its point of reference the previous denial of this proposed acquisition on November 16, 1979. In that order the Board found that consummation of the proposal would result

in serious adverse impacts on banking structure, on concentration of resources, and on potential competition in New Jersey, and that these adverse effects were not outweighed by increased benefits to the convenience and needs of the communities to be served. We have examined the record in the present application, and we have not found evidence that circumstances have changed significantly or that sufficient new facts have been added to the record since the Board's previous action to warrant approval of this application. Accordingly, in light of the Board's previous denial, we believe that the application should be denied.

June 26, 1980

**National Detroit Corporation,  
Detroit, Michigan**

*Order Approving Acquisition of Bank Holding  
Company*

National Detroit Corporation, Detroit, Michigan, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire 80 percent or more of the voting shares of West Michigan Financial Corporation, Cadillac, Michigan ("WMFC"), thereby indirectly acquiring voting shares of The Cadillac State Bank, Cadillac, Michigan ("Cadillac Bank"), and The First National Bank of Evart, Evart, Michigan ("Evart Bank").

Notice of the application has been given in accordance with section 3 of the Act and the time for filing comments and views has expired. The Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the largest banking organization in Michigan, controls ten banks with aggregate deposits of \$6.1 billion, representing 15.5 percent of the total deposits in commercial banks in the state.<sup>1</sup> Acquisition of WMFC, the 29th largest banking organization in Michigan, with two subsidiary banks having combined aggregate deposits of \$173.4 million, would increase Applicant's share of commercial bank deposits in Michigan by 0.4 percent.

WMFC's larger banking subsidiary, Cadillac Bank, competes in both the Cadillac and Traverse City banking markets; its other banking subsidiary, Evart Bank, competes in the Big Rapids banking market.<sup>2</sup> None of Applicant's banking subsidiaries is located in any of

these banking markets. Furthermore, the distance separating the closest of Applicant's and WMFC's subsidiary banks is approximately 65 miles. Accordingly, the Board concludes that no existing competition would be eliminated upon consummation of the proposal.

With respect to the competitive effects within the Traverse City and Big Rapids banking markets that would result from consummation of the proposal, WMFC's banking subsidiaries hold commercial banking deposits, respectively, of \$31.5 million and \$15.1 million, representing 5.9 and 11.6 percent of market deposits. In view of all the facts of record, including the relative absolute size of WMFC's banking subsidiaries in these markets, their market shares, and the structure of each of these banking markets, the Board concludes that consummation of the proposal would have no significant adverse effects upon potential competition in these markets.

Cadillac Bank is the largest of four commercial banking organizations in the Cadillac banking market, and has \$126.7 million in deposits, representing 66.5 percent of market deposits. The Board's concerns with the possible adverse effects that consummation of this proposal would have upon potential competition in the Cadillac market are mitigated by the fact that the significant position of Cadillac Bank in the Cadillac banking market may be attributed to the fact that Cadillac Bank was the only bank in Cadillac for the 67 years prior to 1962 and that there existed a lack of overall economic growth and bank chartering activity in the Cadillac area. In addition, the record indicates that the Cadillac market is not attractive to de novo entry, particularly as evidenced by its population and deposits-per-banking-office averages, which are significantly lower than statewide averages (as of October 1979). Moreover, while there are three other commercial banking organizations in the Cadillac market, none of them is a likely vehicle for foothold entry by Applicant and Michigan law precludes entry by Applicant into the Cadillac market by other means. In light of the above and other facts of record, the Board is unable to conclude that consummation of the proposal would have such adverse competitive effects as to warrant denial of the application.

After considering the overall impact of consummation of this proposal, the Board has concluded that approval of this application would generally be in the public interest. The Board recognizes that consummation of the proposal would have some adverse competitive effects in the Cadillac banking market, as well

1. All banking data are as of June 30, 1979.

2. The Traverse City banking market is approximated by all of Antrim, Benzie, Grand Traverse, Kalhaska and Leedanau Counties,

Michigan. The Big Rapids banking market is approximated by all of Mecosta and the southern half of Osceola County, Michigan. The Cadillac market is approximated by all of Messaukee and Wexford Counties and the northern half of Osceola County, Michigan.

as a slight impact upon the concentration of banking resources in Michigan. However, the Board does not believe that the adverse effects on competition within the Cadillac market and upon the concentration of banking resources within Michigan are so adverse as to require denial of the proposal.

The financial and managerial resources of Applicant, its subsidiaries, and WMFC are regarded as satisfactory and the future prospects of Applicant and its subsidiaries appear favorable. Following consummation of this proposal Applicant proposes to expand the services of WMFC's banking subsidiaries by offering overdraft checking services and personal lines of credit. Additionally, Applicant intends Cadillac and Evert Banks to offer VA and FHA mortgage loans and to resell WMFC's existing mortgages in order to make additional mortgage funds available to local customers. Thus, the Board concludes that considerations relating to the convenience and needs of the community to be served lend sufficient weight toward approval to outweigh any adverse competitive effects associated with this proposal.

Based upon the foregoing and other considerations reflected in the record, it is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record the application is approved for the reasons summarized above. The transaction shall not be made before the thirtieth calendar day following the effective date of this Order or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective June 17, 1980.

Voting for this action: Chairman Volcker and Governors Schultz, Wallich, Partee, and Gramley. Voting against this action: Governors Teeters, and Rice.

Republic of Texas Corporation,  
Dallas, Texas

*Order Denying Merger of Bank Holding Companies*

Republic of Texas Corporation, Dallas, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. § 1842(a)(5)) to merge with Fort Sam Houston Bank-Shares, Incorporated, San Antonio, Texas ("FSHB"),

under the name and charter of Republic of Texas Corporation ("Applicant").

Applicant has also applied for the Board's approval under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to acquire all of the outstanding shares of Fort Sam Life Insurance Company, San Antonio, Texas ("Fort Sam Life"), a subsidiary of FSHB, and to engage in the sale of insurance directly related to extensions of credit by FSHB's banking subsidiaries. Fort Sam Life engages in underwriting credit life, and credit accident and health insurance in connection with extensions of credit by FSHB's banking subsidiaries. These activities have been determined by the Board to be closely related to banking (12 C.F.R. §§ 225.4(a)(9)(ii) and (10)).

Notice of the applications, affording opportunity for interested persons to submit comments and views has been given in accordance with sections 3 and 4 of the Act (45 *Federal Register* 3668). The time for filing comments and views has expired, and the applications and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)) and the considerations specified in section 4(c)(8) of the Act.

Applicant, the fourth largest banking organization in Texas, controls 22 banks with aggregate deposits of approximately \$5.0 billion,<sup>1</sup> representing 7.4 percent of total deposits in commercial banks in the state.<sup>2</sup> FSHB, the twentieth largest banking organization in Texas, has two subsidiary banks and has received approval to open a de novo bank, and controls total deposits of approximately \$183.0 million, representing 0.3 percent of total statewide commercial bank deposits. Upon consummation, the resulting banking organization would rank as the fourth largest in the state, controlling about 7.7 percent of total deposits in commercial banks in Texas. While concentration of banking resources in Texas has been a source of concern to the Board, the Board concludes that consummation of the transaction would not have serious adverse effects on the concentration of banking resources in the state.

Applicant ranks as the fifth largest of 42 banking organizations located in the San Antonio banking market (the relevant market)<sup>3</sup> through its control of two subsidiary banks with combined deposits of \$175.6 million, representing 4.8 percent of total commercial bank deposits in the market. FSHB, the fourth largest bank-

1. All banking data are as of December 31, 1978, and reflect bank holding company formations and acquisitions approved as of January 31, 1980.

2. By Order dated March 18, 1980, the Board approved the acquisition by Applicant of Bank of Austin, Austin, Texas. Consummation of that acquisition would result in Applicant's controlling 23 banks and 7.5 percent of total deposits in the state.

3. The San Antonio banking market is approximated by the San Antonio SMSA.

ing organization in the market, through its two subsidiary banks controls aggregate deposits of \$183.0 million, representing 5.0 percent of market deposits. Consummation of the transaction would increase significantly Applicant's share of market deposits, to 9.8 percent, causing Applicant to become the third largest organization in the market, and would result in the elimination of substantial existing competition between Applicant and FSHB. As the Board has indicated previously, a proposed combination of similarly-sized banking organizations within the same banking market that are of a size to achieve economies of scale and attract capable management and are able to operate independently as aggressive competitors, would ordinarily have serious anticompetitive effects and should not be approved except in compelling circumstances.

This proposal represents a large horizontal acquisition in a market where Applicant already has a significant presence through its two banks. The larger of these banks, Bexar County National Bank of San Antonio, is a sizable organization in its own right and is fully capable of marketing its services throughout the entire geographic market. The size of FSHB would indicate that it also is able to compete effectively in the market even absent affiliation with Applicant. Moreover, consummation of the proposal would remove FSHB as a viable independent organization and as a possible entry vehicle for other holding companies not currently represented in the market, and would significantly increase the concentration of banking resources in the San Antonio banking market. Based upon these and other facts of record, the Board is of the opinion that consummation of this proposal would have substantially adverse effects on competition in the relevant banking market.<sup>4</sup>

Consummation of the proposal would also foreclose the possibility of increased competition in the future. Applicant's absolute size and total resources could support its expansion in this market *de novo* or by foothold acquisition. Expansion by such means would foster rather than eliminate competition. The San Antonio banking market is growing, and can support continued expansion by existing firms while remaining attractive for outside entry by *de novo* or foothold means. In this regard, FSHB is also a large, well-managed organization fully capable of continued growth and expansion within the market, which is demonstrated by its recent *de novo* expansion in the market.

In reaching its conclusion on the competitive effects of this proposal, the Board noted that FSHB's lead subsidiary bank, National Bank of Fort Sam Houston

("Fort Sam Bank"), is what is commonly termed a "military bank" in that it is located at a military installation and derives a significant amount of its deposit and loan business from military personnel located outside the local banking market. Applicant asserts that Fort Sam Bank's market share should be reduced by half to more fairly assess the competitive effects in the local market. This reduction would result in Applicant controlling, upon consummation of this proposal, about 7.3 percent of total market deposits; however, even shading Fort Sam Bank's share of market deposits, the Board is of the opinion that consummation of the transaction would have serious adverse effects on competition. Although Fort Sam Bank may derive a large portion of its business from military personnel, to a certain degree all banks in the San Antonio market compete for business from military personnel and, therefore, the shading of FSHB's market share to the extent suggested by Applicant may overstate the significance of Fort Sam Bank's orientation.

The Board has also considered the impact of thrift institutions on competition within the San Antonio market. Although there are a number of large thrift institutions located in the San Antonio banking market, the Board in this instance is unable to conclude from the evidence in the record that these institutions compete actively with commercial banks over a sufficient range of financial services to mitigate significantly the anticompetitive effects of the proposal. Thus, having considered all of the facts of record in this application, the Board concludes that consummation of the proposed transaction would have substantially adverse effects on competition in the San Antonio market.

The financial and managerial resources and future prospects of Applicant, FSHB, and their subsidiaries are considered satisfactory. Accordingly, banking factors are consistent with approval of the application. Applicant proposes to develop the local customer and commercial business of FSHB's banks with particular emphasis on development of Fort Sam Bank's local business. However, FSHB appears to have the resources to develop these services independently of affiliation with Applicant. Applicant also intends to initiate trust and international services. While these considerations may lend some weight toward approval of the application, they are insufficient to outweigh the anticompetitive effects of the merger especially in light of the loss to the community of a viable and aggressive competitor that could continue to serve as an alternative source of banking services. Therefore, considerations relating to the convenience and needs of the community to be served do not clearly outweigh the substantial anticompetitive effects that would result from consummation of the proposed transaction.

With respect to the application to acquire Fort Sam Life, the Board has determined that the balance of

4. While Chairman Volcker agrees with the Board's denial of this application, he does not agree with the Board's characterization of the anticompetitive effects as being substantially adverse.

public interest factors prescribed by section 4(c)(8) of the Act warrant approval. There is no evidence that Applicant's acquisition of Fort Sam Life alone would result in undue concentration of resources, decreased or unfair competition, conflicts of interest, unsound banking practices, or other adverse effects on the public interest. In the context of this proposal, however, Applicant could not consummate this acquisition without acquiring control of FSHB. Accordingly, the Board concludes that this application must also be denied.

It is the Board's judgment that consummation of the proposal would not be in the public interest and that the applications should be denied. Based on the foregoing and other facts of record, the applications are hereby denied.

By order of the Board of Governors, effective June 11, 1980.

Voting for this action: Chairman Volcker and Governors Wallich, Partee, Teeters, Rice, and Gramley. Voting against this action: Governor Schultz.

### Concurring Statement of Governor Wallich

As I have indicated on previous occasions,<sup>1</sup> because of the diverse group of financial products and services that thrift institutions now offer in direct competition with commercial banks, thrift institutions should be included in the analysis of competition to a much greater extent than has been the Board's practice. I continue to adhere to that view. However, in light of all the facts of record in this instance, including the absence of sufficient evidence of active competition between thrift institutions and commercial banks in this market, I agree with the majority's action in denying this proposal.

June 11, 1980

### Dissenting Statement of Governor Schultz

I would approve the application of Republic of Texas Corporation to merge with Fort Sam Houston Bank-

Shares, Inc. because I do not believe that this merger would have serious adverse effects on competition. On the contrary, it is my opinion that the affiliation of these two organizations would enable FSHB to compete more aggressively in the local banking market, thus enhancing competition in the market and better serving the needs of the local community.

June 11, 1980

### The Royal Bank of Canada, Montreal, Canada

#### *Order Approving Acquisition of Bank*

The Royal Bank of Canada, Montreal, Canada ("Royal"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire all of the voting shares of the successor by merger to Banco de San Juan, Hato Rey, Puerto Rico ("Banco"). The bank into which Banco is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Banco. Accordingly, the proposed acquisition of shares of the successor organization is treated herein as the proposed acquisition of the shares of Banco.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of the Secretary of the Treasury of Puerto Rico, in light of the factors set forth in section 3(c) of the Act.

Royal is the largest banking organization in Canada and the thirtieth largest in the world (as of year-end 1978), with total assets in U.S. dollars of approximately \$46.8 billion and total deposits of \$41.0 billion.<sup>1</sup> Royal provides a complete array of retail, commercial and international banking services through its 1,604 banking offices worldwide, including 1,522 branches in Canada. Royal has a wholly-owned subsidiary bank in the United States, The Royal Bank and Trust Company, New York, New York (\$181.8 million in deposits).<sup>2</sup> Royal also operates a branch in Portland, agencies in New York City and San Francisco, and

1. *United Bank Corporation of New York* (Schenectady Trust Company), 64 FEDERAL RESERVE BULLETIN 894, 896 (1978); *Independent Bank Corporation* (The Old State Bank of Fremont), 65 FEDERAL RESERVE BULLETIN 867, 870 (1979); *United Bank Corporation of New York* (Schenectady Trust Company), 66 FEDERAL RESERVE BULLETIN 61, 64 (1980).

1. Banking data are as of October 31, 1979, unless otherwise indicated.

2. The Board has determined that Puerto Rico is not a "state" for the purpose of the multi-state banking prohibitions of section 3(d) of the Bank Holding Company Act (12 U.S.C. § 1842(d)), and therefore the Board is not precluded from approving Royal's acquisition of a bank in Puerto Rico.

maintains representative offices in Chicago, Dallas, Denver, Houston, Los Angeles, and Pittsburgh.<sup>3</sup>

Royal, the fifth largest of 22 banking organizations in Puerto Rico (deposits of \$405.4 million)<sup>4</sup>, has six branches controlling 5.6 percent of total deposits in commercial banks in Puerto Rico. Banco, the ninth largest banking organization in Puerto Rico (deposits of \$256.8 million), has 14 branches controlling 3.1 percent of total deposits in commercial banks in Puerto Rico. Upon consummation of the proposed acquisition, Royal would be the fifth largest of 21 banking organizations in Puerto Rico with 8.7 percent of total commercial bank deposits in Puerto Rico. The four largest banking organizations in Puerto Rico together control approximately 73.5 percent of total deposits in commercial banks in Puerto Rico, with the three largest controlling approximately 61.6 percent of total deposits. Given the structure of banking in Puerto Rico, the Board finds that approval of this application would not have a significantly adverse effect upon the concentration of banking resources in Puerto Rico.

Four of Royal's branches and 12 of Banco's offices operate in the San Juan banking market.<sup>5</sup> Royal's four branches, with total deposits of \$370.2 million or 6.8 percent of the market total, and Banco's 12 branches, with total deposits of \$198.8 million or 3.7 percent of the market total, are, respectively, the fourth and seventh largest of 17 banking organizations located in the San Juan market. Upon consummation of the proposal, Royal's share of total market deposits would increase to 10.5 percent and Royal would remain the fourth largest banking organization in the market.

The Board has recently denied acquisitions in which the increase in market concentration would have been less than that resulting from this proposal.<sup>6</sup> However, the Board finds that there are several significant factors that distinguish the competitive effects of this proposal from those that the Board previously found warranted denial. Included among such factors are the structure of the San Juan banking market as well as restrictions on the branching ability of non-Puerto Ri-

can banks and the inability of foreign banks to obtain FDIC insurance for their branches.

The San Juan banking market is dominated by two non-Puerto Rico-based banking organizations, Chase Manhattan Corporation and Citicorp, both of New York, and Banco Popular de Puerto Rico. Together these three banking organizations control approximately 68.8 percent of total deposits in the market, with Chase Manhattan Corporation and Citicorp each controlling almost 25 percent of such deposits and Banco Popular de Puerto Rico controlling slightly over 20 percent. Accordingly, even after consummation of this proposal, the amount of deposits controlled by Royal would be only one half the amount controlled by the next largest banking organization in the market.

The adverse competitive consequences that would normally be expected to result from consummation of this proposal are mitigated not only by the dominance of the San Juan banking market by the three larger banking organizations in the market, but also by other evidence of record reflecting the inability of Royal to be a fully competitive banking alternative for consumers in Puerto Rico. The extent to which Royal and Banco compete is constrained by Royal's inability to obtain FDIC deposit insurance<sup>7</sup> and its inability to expand by de novo branching.<sup>8</sup>

Accordingly, while the Board might be expected to find that consummation of this proposal would have a seriously adverse effect on existing competition in the San Juan market, in light of all the facts of record in this matter the Board is of the opinion that the competitive effect of this proposal is not so serious as to preclude approval of this application, especially in light of the outweighing convenience and needs considerations set forth below.

In addition to their presence in the San Juan market, Royal and Banco each have two additional branches, all of which are located in separate banking markets. Thus, there would be no decrease in existing competition in any of these four markets. In addition, because of the restrictions on Royal's abilities to branch and Banco's inability to branch further because of its limited financial and managerial resources, the Board finds that consummation of this proposal would not have an adverse effect on probable future competition.

The financial and managerial resources and future prospects of Royal are considered satisfactory. Royal would be able to serve as a source of financial and managerial strength for Banco, especially in view of Royal's commitment to add \$10 million to Banco's equity capital and its commitment to ensure that Ban-

3. Royal also engages in nonbanking activities in the United States through two wholly-owned subsidiaries, U.S.A. Realty Holdings, Inc., and Ferncroft Holdings, Inc., held pursuant to section 4(c)(1)(D) of the Act (12 U.S.C. § 1843(c)(1)(D)), and one wholly-owned indirect subsidiary, Globe Building Corporation, held pursuant to section 4(c)(1)(C) of the Act (12 U.S.C. § 1843(c)(1)(C)). In addition, Royal has a less than 25 percent interest in five Canadian corporations, each of which has majority or wholly-owned subsidiaries engaged in nonbanking activities in the United States. These investments are held by Royal pursuant to sections 2(h) and 4(c)(9) of the Act (12 U.S.C. §§ 1841(h) and 1843(c)(9)) and section 225.4(g)(2)(v) of the Board's Regulation Y (12 C.F.R. § 225.4(g)(2)(v)).

4. All market data are as of June 30, 1979.

5. The San Juan banking market is approximated by the San Juan SMSA.

6. *Republic of Texas Corporation*, 66 FEDERAL RESERVE BULLETIN 580 (June 1980); *County National Bancorporation*, 65 FEDERAL RESERVE BULLETIN 763 (1979).

7. The FDIC does not insure deposits held at the Puerto Rican branches of foreign banks. 44 *Federal Register* 40,059 (1979).

8. The Board notes that Royal last established a de novo office in 1966, and between 1968 and 1974 has repeatedly been denied permission to establish an additional office.

co remains strongly capitalized. In addition, affiliation with Royal would provide Banco with needed managerial expertise. Accordingly, considerations relating to banking factors favor approval of the application.

As a result of the proposed acquisition, Banco would receive financial and managerial resources that would allow it to expand into new product and geographic markets. Royal proposes that Banco will seek to establish additional offices in Puerto Rico and thereby increase its competitive presence in the Commonwealth. Banco also, for the first time, will provide personal and corporate fiduciary services to its customers. Accordingly, the Board finds that considerations relating to the convenience and needs of the communities to be served outweigh the anti-competitive effects that would result from consummation of this proposal. Accordingly, it is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Board of Governors, effective June 30, 1980.

Voting for this action: Chairman Volcker and Governors Schultz, Wallich, Partee, Teeters, Rice, and Gramley.

(Signed) GRIFFITH L. GARWOOD,  
Deputy Secretary of the Board.

Texas Commerce Bancshares, Inc.,  
Houston, Texas

#### *Order Denying Acquisition of Bank*

Texas Commerce Bancshares, Inc., Houston, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act, 12 U.S.C. § 1842(a)(3), to acquire 100 percent of the voting shares (less directors' qualifying shares) of the successor by merger to The First National Bank of Port Neches, Port Neches, Texas ("Bank"). The bank into which Bank would be merged has no significance except as a means to facilitate the acquisition of Bank's voting shares.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act.

The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act, 12 U.S.C. § 1842(c).

Applicant, the third largest banking organization in Texas, controls 39 banks with aggregate deposits of \$5.4 billion, representing 7.8 percent of the total commercial bank deposits in the state.<sup>1</sup> Bank, the 267th largest banking organization in the state, has total deposits of \$34.5 million, or 0.05 percent of the state total. Upon consummation of the proposal, Applicant would continue to rank third among banking organizations in Texas and would control 7.84 percent of statewide deposits, and the acquisition would not materially alter statewide deposit concentration or the structure of the banking system in Texas.

Bank is the ninth largest of 21 banking organizations in the Beaumont banking market; it controls \$34.5 million in deposits, representing 2.7 percent of the market.<sup>2</sup> Applicant is currently represented in the market with one subsidiary bank, American National Bank of Beaumont ("American National"), which has total deposits of \$212.6 million, or 16.5 percent of the market, making Applicant the second largest banking organization in the market. Acquisition of Bank would increase Applicant's already substantial market share to 19.2 percent and would increase the proportion of market deposits held by the four largest banking organizations from 64.1 percent to 66.8 percent.

This acquisition would also eliminate competition that exists between Bank and American National in the Beaumont market. Applicant points out that Bank and American National are located in distinct urban centers, separated by several miles. However, commuter travel between the two centers is relatively easy, and it appears that residents of the Port Neches area, where Bank is located, rely to some extent on Beaumont, where American National is located, for entertainment, cultural activities, and shopping needs, and there is other evidence of commercial interaction between Beaumont and Port Neches. With respect to the present banking operations of Bank and American National, it appears that Bank already draws considerable business from American National's primary service area, and American National serves a significant percentage of Bank's potential customers. This acquisition would eliminate, in the Board's view, a significant amount of existing competition and the possibility of further developing competition between Bank and American National.

1. Unless otherwise indicated, all banking data are of June 30, 1979, and reflect bank holding company formations and acquisitions approved as of March 31, 1980.

2. The Beaumont banking market is approximated by Jefferson and Hardin Counties and the cities of Vidor and Bridge City in Orange County.

Furthermore, Applicant's acquisition of Bank would remove an attractive alternative means of entry for bank holding companies not now represented in the market. Currently, five of the state's ten largest holding companies have subsidiaries in the Beaumont market. As one of the largest remaining independent banks in a relatively attractive market, Bank is a convenient entry vehicle for any holding company that has not yet established a market presence. Under the circumstances, the Board cannot endorse acquisition of Bank by a holding company that already has such a significant market presence.

In view of the facts of record, the Board finds that consummation of this proposal is likely to result in substantially adverse competitive effects in the Beaumont market.<sup>3</sup> In the Board's view these effects require denial of this application unless they are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Applicant proposes to introduce at Bank services similar to those it can provide in the market through *American National* or through expansion within the market that does not entail the elimination of a competitive alternative source of banking services. The Board finds that considerations relating to the convenience and needs of the community to be served do not outweigh the substantially adverse competitive effects of this proposal. Banking factors are consistent with, but do not lend significant weight toward, approval. The financial and managerial resources of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory and future prospects appear favorable.

Based on the foregoing and other considerations reflected in the record, it is the Board's judgment that the proposed acquisition is not in the public interest and that the application should be, and hereby is, denied.

By order of the Board of Governors, effective June 12, 1980.

Voting for this action: Vice Chairman Schultz and Governors Partee, Teeters, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Wallich.

(Signed) CATHY L. PETRYSHYN,  
Assistant Secretary of the Board.

[SEAL]

3. The Board has also considered the impact of thrift institutions on competition within the market and in this instance is unable to conclude from the evidence in the record that these institutions compete actively with commercial banks over a sufficient range of financial services to mitigate significantly the anticompetitive effects of the proposal.

#### *Orders Under Section 4 of Bank Holding Company Act*

Citicorp,  
New York, New York

#### *Order for Hearing*

Citicorp, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act (the "Act"), has applied for the Board's approval under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)) to engage in certain data processing activities through a subsidiary to be known as Citishare Corporation.

Under section 4(c)(8) of the Act, a bank holding company or its subsidiaries may engage, with the Board's prior approval, in any activity that the Board has determined "to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board must also consider whether the performance of a particular activity by a bank holding company can reasonably be expected to produce public benefits that outweigh possible adverse effects. This section authorizes the Board to make the determination of whether an activity is closely related to banking by regulation. The Board used this authority in 1971 when it issued section 225.4(a)(8) of Regulation Y (12 C.F.R. § 225.4(a)(8)), permitting a bank holding company to engage in the following activities:

- (i) providing bookkeeping or data processing services for the internal operations of the holding company and its subsidiaries, and
- (ii) storing and processing other banking, financial, or related economic data, such as performing payroll, accounts receivable or payable, or billing services.

In 1975, the Board issued an interpretation (12 C.F.R. § 225.123(e)), stating that the purpose of section 225.4(a)(8) of Regulation Y is to permit a bank holding company to process data for others of the kinds banks have traditionally processed, both in conducting their internal operations and in accommodating their customers, and to perform incidental activities necessary to carry on permissible data processing activities. The interpretation provides that such incidental activities include, among others:

- (1) Making excess computer time available to anyone so long as the only involvement by the holding company system is furnishing the facility and necessary operating personnel; and
- (2) Selling a byproduct of the development of a program for a permissible processing activity.

The Board interpretation excludes from the scope of permissible activities the development of programs either upon a holding company's own initiative or upon request, unless the data involved are financially oriented.

The activities proposed to be engaged in by Citishare consist of the following:

1. Providing data processing for the internal operations of Citicorp and its subsidiaries;
2. Developing, assembling, storing, processing, and distributing financial, economic, and banking data, such as selected income statement and balance sheet items, economic time-series, securities prices, and foreign exchange rates;
3. Selling computer "time-sharing" services to any person, which consists of providing access to data of the types listed in (2) above and packaged financial systems via computer terminals in the purchasers' offices;
4. Providing packaged financial systems for installation at sites to be chosen by purchasers of the systems; and
5. Selling to any person excess computer processing capacity as may from time to time be available, on the condition that the only involvement by Citishare Corporation would be furnishing the facility and necessary operating personnel, and performing other incidental activities necessary for the sale of such excess computer time.

Providing data processing for the internal operations of a bank holding company is explicitly authorized by section 225.4(a)(8)(i) of Regulation Y. Citicorp contends that the other proposed activities constitute "storing and processing . . . banking, financial, or related economic data" within the meaning of section 225.4(a)(8)(ii) of Regulation Y.

Following publication of notice of the application, the Association of Data Processing Service Organizations, Inc., Arlington, Virginia, and other interested organizations (collectively "Protestants") jointly filed written submissions in opposition to the application, and requested that the Board either deny the application or order a formal hearing on the application.<sup>1</sup> Protestants contend that the proposed activities are not within the scope of those data processing activities that the Board has previously determined to be permissible and are not otherwise "so closely related to banking or managing or controlling banks as to be a proper incident thereto" within the meaning of section 4(c)(8) of the Act. Protestants also allege that the proposal would result in adverse effects, such as undue

concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices, that would not be outweighed by any benefit to the public.

With regard to the permissibility of Citicorp's proposal under Regulation Y, Protestants challenge, for example, the proposed sale of excess computer time and time-sharing services as means for evading restrictions on processing non-financially related data. Protestants contend that data processing technology has progressed over the past few years so as to enable a data processor to tailor its computer capacity to eliminate the need for any significant amount of excess capacity. Furthermore, Protestants contend that since a purchaser of the proposed time-sharing service would have a computer terminal on its own site, it would not be possible to monitor the purchaser's use of the computer services to prevent the impermissible processing of non-financially oriented data. Although Citicorp disputes Protestants' claims, neither Citicorp nor Protestants have presented sufficient evidence to prove or disprove these contentions. In the Board's judgment, these are questions of fact that are material to the Board's decision on the application, and remain in dispute and unresolved by the parties' written submissions. Accordingly, the Board believes it appropriate to order a formal hearing on the application.

In addition, Protestants claim that many of the proposed data processing services are not the kinds of activities traditionally performed by banks. Protestants assert that technological developments in the industry have advanced the scope of data processing activities, including those proposed by Citicorp, beyond that contemplated by the Board in 1971 when it determined such activities to be permissible for bank holding companies. The Board believes that it would be appropriate to address this issue at a hearing.

Finally, Protestants allege that consummation of the proposal would result in adverse effects, especially unfair competition and conflicts of interests, that would not be outweighed by any benefit to the public. While these allegations would not, standing alone, warrant a hearing, the Board believes that all outstanding issues in this matter should be resolved in one proceeding.

Accordingly, *it is hereby ordered*, That a hearing with respect to this application be held before an Administrative Law Judge to be designated by the Office of Personnel Management. Such hearing shall be conducted in compliance with the Board's Rules of Practice for Hearings (12 C.F.R. Part 263); however, the Administrative Law Judge shall establish a schedule whereby Citicorp and Protestants shall submit their direct and rebuttal testimony in written form. Public, oral cross-examination shall then commence on a date designated by the Administrative Law Judge at the offices of the Board of Governors, Washington, D.C., or

1. Other Protestants are ADP Network Services, Inc.; Comshare, Inc.; National CSS, Inc.; On-Line Systems, Inc.; Quantum Computer Services, Inc.; and, Tymshare, Inc.

at any other place that the Administrative Law Judge may designate in the interest of fairness. The Administrative Law Judge may, in his discretion, convene a prehearing conference or conferences at any convenient time or place.

*It is further ordered.* That the issues to be considered at such hearing are: (1) whether the data processing activities proposed by Citicorp are "so closely related to banking or managing or controlling banks as to be a proper incident thereto," within the meaning of section 225.4(a) of Regulation Y (12 C.F.R. § 225.4(a)) and section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)); and (2) whether the proposed activities "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."

*It is further ordered.* That any person desiring to give testimony, present evidence, or otherwise participate in these proceedings should file with the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, on or before July 10, 1980, a written request containing a statement of the nature of the petitioner's interest in the proceedings, the extent of the participation desired, a summary of the matters upon which the petitioner desires to give testimony or submit evidence, and the name and identity of each witness who proposes to appear. Such requests will be submitted to the designated Administrative Law Judge for his disposition.

By order of the Board of Governors, effective June 10, 1980.

Voting for this action: Vice Chairman Schultz and Governors Partee, Teeters, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Wallich.

[SEAL] (Signed) CATHY L. PETRYSHYN,  
Assistant Secretary of the Board.

Citicorp,  
New York, New York

*Order Approving Retention of Citicorp Homeowners, Inc.*

Citicorp, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act of 1956, has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to retain all the voting shares of Citicorp Homeowners, Inc. ("CHI"),

Des Peres, Missouri. CHI was organized to engage in certain activities and hold certain assets formerly conducted and held by Advance Mortgage Corporation ("Advance"), Southfield, Michigan. As successor to part of Advance's business, CHI would continue to make, acquire, and service extensions of credit secured by mobile homes, mobile home inventories, and second liens on residential real estate, and it would begin originating and servicing 1-4 family residential mortgage loans. The Board has determined that these activities are closely related to banking (12 C.F.R. § 225.4(a)(1) and (3)).<sup>1</sup>

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (45 *Federal Register* 20,557 (1980)). The time for filing comments and views has expired, and the Board has considered all comments received in light of the public interest factors set forth in section 4(c)(8) of the Act.

Applicant, with total assets of \$106.4 billion, is the second largest banking organization in the nation.<sup>2</sup> In terms of domestic office deposits, it is the third largest banking organization in New York State, with 12.6 percent of the state's total deposits as of September 30, 1979. In addition to its two subsidiary banks, Applicant controls a number of domestic nonbank subsidiaries engaging in such activities as consumer, sales, and commercial finance, factoring, leasing, mortgage lending, issuance and sale of travelers' checks, and sale and underwriting of credit-related insurance.

CHI is the successor to Advance in those mobile home finance and second mortgage activities which Advance began de novo after it became a subsidiary of Applicant in 1970. In 1979, after separating these activities into CHI, Applicant sold its shares of Advance to a partnership organized by Oppenheimer and Co., Inc. ("Oppenheimer").<sup>3</sup> Through this transaction the partnership basically acquired the traditional mortgage banking activities that Advance had engaged in before Applicant bought it. Included in the sale were a mortgage servicing portfolio of \$3.2 billion, assets of \$99.8 million, and 27 offices operating through about 700 em-

1. CHI also operates through nine subsidiaries and has an interest, acquired with the Board's consent under section 4(c)(13) of the Act, in First National Nippon Shinpan Co., Ltd., Tokyo, Japan. The Federal Reserve Bank of New York, pursuant to delegated authority, has permitted Applicant to engage in certain credit-related insurance activities through two of these indirect subsidiaries. The remaining subsidiaries are inactive or provide services related to CHI's direct lending activities.

2. Banking data are as of December 31, 1979, unless otherwise noted.

3. Under the Bank Holding Company Act, Applicant could not retain Advance after December 31, 1980, without the Board's approval, which it was unable to secure. *Citicorp* 64 FEDERAL RESERVE BULLETIN 321 (1978); *First National City Corporation*, 60 FEDERAL RESERVE BULLETIN 50 (1974).

ployees in 14 states. The partnership also purchased Advance's subsidiary, Lakeland Assurance, Inc., which reinsures mortgage redemption life insurance and group accident, health, and accidental death insurance. All of Advance's mobile home and second mortgage loans and most of its conventional residential mortgage loans, as well as the offices and employees connected with the mobile home and second mortgage operations, were retained by Applicant in CHI. As of November 30, 1979, CHI had total assets of approximately \$1.5 billion.

As it did in denying applications to retain Advance, the Board must determine whether the retention of this company "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." In its more recent denial, the Board recognized that the affiliation of Applicant and Advance had produced, and the continuation of that affiliation could reasonably be expected to produce, some public benefits of significance. However, it was the Board's judgment that these public benefits did not outweigh the possible adverse effects of the affiliation on existing and future competition and concentration of resources.

Applicant's new proposal, in the Board's judgment, substantially changes that balance. Applicant has restored Advance to the market as a viable independent competitor, and Applicant itself has been restored as a potential entrant in the mortgage banking business.<sup>4</sup> Applicant proposes to retain only those lines of business which it caused Advance to enter de novo after 1970.<sup>5</sup>

4. Applicant's sale of Advance established Oppenheimer, through Advance, as the third largest firm in the mortgage banking industry. Advance was the fourth largest before Applicant acquired it. As part of the sale, Applicant has also agreed to purchase, as a secondary institutional investor, \$680 million of Advance's conventional mortgage loans over a two-year period.

5. Bank holding companies should not be encouraged to believe that the Board will look favorably upon the dismemberment of subsidiaries they must divest because of the anticompetitive effects their acquisitions entailed. Bank holding companies have no inherent claim to retain any new activities a temporarily grandfathered subsidiary commences during the period of its affiliation. The subsidiary might have commenced those activities if it had remained an independent organization, or they may have been commenced at the expense of the subsidiary's traditional activities. In either case a divestiture coupled with a retention of the new business would not achieve a return to the competitive status quo, or an approximation of it, that would be desirable. The dismembered company would be a weaker competitor than it would have been but for the anticompetitive acquisition. This case, however, is unusual. In the first place, a sale of a company of Advance's size clearly involves practical difficulties. Because of Advance's size, few organizations that do not compete with Advance could purchase it intact. In the second place, there is ample evidence that Applicant has divested a company that is probably a stronger competitor than it would have been absent the affiliation, and the business Applicant proposes to retain does not cause the Board concern about an undue concentration of resources.

When it was acquired in 1970, Advance engaged in traditional mortgage banking lines of business, primarily originating FHA-VA insured 1-4 family residential mortgage loans and servicing those loans after sale to institutional investors and, to a lesser extent, originating and servicing loans on income-producing properties and making construction loans.<sup>6</sup> CHI's current second mortgage and mobile home financing activities were commenced by Advance in 1973 and 1974. It is likely that Applicant would have engaged in each of these activities through other subsidiaries if it had not owned Advance.<sup>7</sup> It is unlikely, on the other hand, that Advance would have commenced either activity if it had not been affiliated with Applicant. Advance had no specific expertise in either line of business, and there is no reason to believe that it would have undertaken independently the cost of acquiring or training personnel and establishing the administrative and operational systems necessary to expand into these areas. Further, there is no secondary market for mobile home or second mortgage loans, and it is unlikely that an independent Advance would have had the financial resources to offer such loans.<sup>8</sup> Accordingly, Applicant's acquisition of Advance appears to have had no effect on potential or probable future competition in the mobile home and second mortgage finance areas. Neither is it likely that Applicant gained any significant competitive advantage in these areas through its ownership of Advance.<sup>9</sup> In contrast to Applicant's retention of Advance, its retention of CHI's existing business does not entail significant adverse competitive considerations.

Applicant also intends that CHI commence traditional mortgage banking activities, and the Board regards this de novo proposal as procompetitive. Additional sources of home financing will be provided in diverse geographic markets. Similarly, the Board views CHI's proposal to establish two new offices to

6. In 1976, Advance discontinued making mortgage loans on income-producing property and construction loans. CHI proposes to retain a portfolio of conventional residential mortgage loans, which the Board views as essentially a passive investment without significant competitive consequences.

7. In fact, Applicant engages in each to a more limited extent through its subsidiary, Nationwide Financial Services Corporation. Applicant's decision to engage in mobile home and second mortgage activities through Advance (and now CHI) appears to have been based on a business judgment regarding operational efficiency to be achieved through common administration of these and Advance's more traditional activities.

8. Of the ten largest mortgage bankers at mid-year 1978, none has entered the second mortgage market; two have attempted to enter the mobile home financing market, but since 1975 they have ceased originating such loans.

9. In second mortgage lending it does not appear that Applicant has achieved a dominant position in any geographic market. Applicant does finance a substantial share of mobile home units financed in some areas, based on the best data available, but the Board does not regard this with concern in view of the relative newness of mobile home financing and the absence of significant barriers to entry.

engage in second mortgage lending as at least slightly procompetitive.

There are other public benefits associated with this proposal. Supplementing those outlined in the Board's 1979 denial order, Applicant has pointed to a number of specific instances where the public has benefited, and where the public is likely to continue to benefit if Applicant retains CHI. Applicant has made significant efforts in making CHI innovative and responsive to consumer needs, and it intends to continue those efforts. CHI will actively participate in the financing of land-mobile home packages and will participate in the development of an active secondary market in conventional mortgage-backed pass-through securities with institutional investors. In addition, CHI will provide end-user loan commitments to developers of condominium and co-operative housing projects and conversions. Further, CHI has indicated that through the use of Applicant's managerial, financial, and computer resources CHI has been able to respond to customer loan applications in shorter average periods of time than competitors. Finally, CHI is working to develop a system by which mortgage loans may be pre-authorized. There is no evidence in the record indicating that retention of CHI would result in unfair competition, conflicts of interests, unsound banking practices, or other adverse effects.

In evaluating the public interest factors, the Board has reviewed Mr. Anthony R. Martin-Trigona's request that it deny this application summarily or hold a formal hearing. Apart from noting that CHI may involve a diversion of Applicant's resources from its other business, a possibility the Board has taken into account, Mr. Martin-Trigona chiefly complains of actions taken by Citibank, Applicant's lead subsidiary bank, in response to recent Board actions intended to restrain the growth of credit and, in particular, a reduction or elimination by Citibank of certain lines of consumer credit.<sup>10</sup> The protestant believes that Applicant should not be permitted to expand its nonbank operations while reducing the availability of credit to customers of its subsidiary bank.

These contentions involve no dispute of material facts that a hearing might illuminate. In the Board's view, they involve instead a dispute regarding policy, and the Board does not believe its role in this proceeding is to evaluate the desirability of the particular methods Citibank has chosen to restrain credit.<sup>11</sup> It is

clear that some actions by banks of the type of which Mr. Martin-Trigona complains have been, in general, appropriate to temporary economic circumstances and the achievement of the prevailing objectives of this nation's economic policies. Mr. Martin-Trigona's implicit suggestion is that, as a price for permitting Applicant to retain or expand its permissible nonbanking activities, the Board should extract a commitment that Citibank will moderate credit differently, if at all, and conceivably that it will price its banking services below market. This would be a policy of directing an allocation of a holding company's resources to or away from the provision of particular services that in other contexts the Board has specifically refused to embrace,<sup>12</sup> and one that the Board considers unsuitable in connection with this application. The Board concludes that the protest raises no disputed material issue of fact requiring resolution through a formal hearing and, therefore, denies Mr. Martin-Trigona's request for a formal hearing. The Board also believes that Mr. Martin-Trigona's comments present no facts that materially alter its evaluation of the relative public benefits and adverse effects likely or possible to result from Applicant's retention of CHI.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of public interest factors it is required to consider under section 4(c)(8) of the Act is favorable. Accordingly, the application is approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof. The *de novo* activities proposed in the application shall be commenced no later than three months after the effective date of this Order unless that period is extended for good cause by the Board or by the Federal Reserve Bank of New York pursuant to authority hereby delegated.

---

Not only are these new objections untimely, but the protestant has not offered substantiation of any of his claims or suggested that legal remedies available to him are inadequate. Under the circumstances the Board does not believe that its consideration of this application should be delayed pending the resolution of the protestant's dispute with Citibank on matters essentially unrelated to the retention of CHI by Applicant.

10. Mr. Martin-Trigona also complains of various other actions by Citibank, which in the Board's judgment do not present adverse considerations material to this application.

11. In a recent submission the protestant has advised the Board that he has instituted a class action against Applicant, and he has raised several new objections to Citibank's treatment of him and its handling of his business, as well as to its reductions in lines of consumer credit.

12. See, *Michigan National Corporation*, 65 FEDERAL RESERVE BULLETIN 247, 249 n. 10 (1980). Consideration of a particular bank holding company's financial or managerial resources at a particular time may dictate that it curtail significant expansion into new services or new markets, but the Board does not believe this application presents such a case.

By order of the Board of Governors, effective June 3, 1980.

Voting for this action: Vice Chairman Schultz and Governors Partee, Teeters, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Wallich.

**Heritage Banks, Inc.,  
Rochester, New Hampshire**

*Order Approving Retention of de novo Branch of  
Rochester Savings Bank and Trust Company*

Heritage Banks Inc., Rochester, New Hampshire, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) to continue to engage in guaranty savings bank activities at a de novo branch of its subsidiary, Rochester Savings Bank and Trust Company, Rochester, New Hampshire.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been duly published (45 *Federal Register* 6649 (1980)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 4(c)(8) of the Act.

On the basis of the record, the application is approved for the reasons set forth in the Board's Statement, which will be released at a later date. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective June 20, 1980.

Voting for this action: Chairman Volcker and Governors Wallich, Partee, Teeters, Rice, and Gramley. Voting against this action: Governor Schultz.

**Statement by Board of Governors of the Federal Reserve System Regarding Application by Heritage Banks Inc. to Retain a Branch of Rochester Savings Bank and Trust Company**

Heritage Banks Inc., Rochester, New Hampshire, a bank holding company within the meaning of the Bank Holding Company Act has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to continue to engage in guaranty savings bank activities at a branch of its subsidiary, Rochester Savings Bank and Trust Company ("Savings Bank"), Rochester, New Hampshire. These activities include the acceptance of time and savings deposits; the extension of consumer, real estate mortgage, VISA credit card and commercial loans; and trust and notarial services. Although the Board has not added the operation of a New Hampshire guaranty savings bank to the list of activities specified in section 225.4(a) of Regulation Y as generally permissible for bank holding companies, the Board has determined that operation of such an institution is closely related to New Hampshire banking and specifically approved Applicant's acquisition of Savings Bank. *Profile Bankshares, Inc.*, 61 FEDERAL RESERVE BULLETIN 901 (1975).

Notice of the application, affording the opportunity for interested persons to submit comments and views, has been duly published. The time for filing comments and views has expired and the Board has considered the application and all comments received, including those of the New Hampshire Association of Savings Banks, in light of the factors set forth in section 4(c)(8) of the Act.

Applicant, which has assets of \$123.8 million on December 31, 1979, has two subsidiaries: Savings Bank (deposits of \$97.9 million) and First National Bank of Rochester ("National Bank"), Rochester, New Hampshire (deposits of \$16.2 million).<sup>1</sup> Each office of Savings Bank, including the branch that is the subject of this application, is operated at the same location as an office of National Bank, and all these offices are located in Rochester, New Hampshire.

As noted, the Board in 1975 approved Applicant's acquisition of Savings Bank. At that time Savings Bank had one main office and one branch office. This application requests Board approval of Applicant's retention of a second branch office of Savings Bank, opened de novo on April 19, 1979, without the Board's prior approval, in violation of Regulation Y. In accordance with its policy regarding violations of the Act and upon its examination of all the facts of record, including Applicant's conduct, the nature of the violation,

1. Deposit data are as of September 30, 1979.

and Applicant's undertakings to guard against future violations, the Board is persuaded that the opening of this branch does not reflect so adversely on Applicant's management as to require denial of this application.

Under the Act, the Board is required to assess the public interest factors in each section 4(c)(8) application,<sup>2</sup> including an application for a de novo branch of an approved subsidiary. In making such an assessment with respect to an application to retain activities where necessary prior Board approval was not obtained, the Board applies the same standards that it applies for the commencement of such activities.<sup>3</sup> Therefore, the Board must determine whether the retention of this office "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." The original acquisition of Savings Bank by Applicant was essentially a reorganization whereby ownership of Savings Bank and National Bank was shifted to a corporation owned by their common shareholders, and the Board found that the increased efficiency of operations, access to greater financial resources, and long range increase in community services resulting from approval of the application would produce public benefits. The Board found no evidence of adverse effects on the public interest and, therefore, approved the application.

Except for the fact that the branch applied for operates in tandem with a branch of Applicant's commercial bank, the public interest factors would clearly favor approval of this application. The public convenience is enhanced by this new location for the provision of savings bank services, and there is no evidence that if the branch were not operated in tandem any of the adverse effects specified in section 4(c)(8) or other material adverse effects might result from the establishment of the branch. The Board, however, has expressed its clear view that serious adverse effects may result from tandem operation of these two types of institutions,<sup>4</sup> and this application accordingly requires closer analysis.

At the outset, the Board notes that this case involves unusual mitigating factors. In 1975 the Board, cognizant of Applicant's 42-year history of tandem operations commenced and conducted before the establishment of the current interest rate differential between the two institutions and therefore not as a device for its evasion, approved the affiliation of Savings Bank and National Bank. It has been argued that the two institutions might not have sought bank holding company status had they known that their future expansion in tandem might be restricted. It is possible, in fact, that the Board in 1975 might have taken a distinctly favorable view of this branch operation.

The complexion of New Hampshire banking has changed in several material respects since then, however. In 1975 there were only six guaranty savings banks in New Hampshire, a number that had remained stable for a long time, and there was no prospect of a proliferation of these institutions. In addition, each savings bank was confined by state branching laws to serving a relatively small local area. In that context approval under the Act of Applicant's subsidiaries' longstanding relationship, or others like it, that probably would not have been broken up by denial, was unlikely to alter the structural and competitive environment in New Hampshire in an unfavorable way. A modest trend away from common lobby operations, in fact, was in progress. Today savings banks can branch more widely, and applications are pending that, if approved, would triple the number of guaranty savings banks in New Hampshire. Moreover, with the exception of First Financial Group of New Hampshire, Inc.'s proposed acquisition of an existing savings bank, which is not predicated upon the establishment of a tandem relationship with a commercial bank, this initiative appears to be spurred by the clear desire of capable bank holding companies in the state to establish new tandem offices.

The Board, however, has taken particular note of the fact that Applicant's branch was approved by both the Federal Deposit Insurance Corporation and the appropriate New Hampshire authorities, and that the New Hampshire Association of Savings Banks, which has vigorously protested other attempts to expand tandem operations in the state, considers this branch only an extension of the proposal the Board approved in 1975, and does not object to it. The location of the branch is within Savings Bank's branching authority as it existed in 1975, and because of its proximity to Savings Bank's other offices the branch is likely to draw many customers for whom service before was conveniently available from the tandem offices which the Board specifically approved. This fact mitigates the significance of the branch, and the fact that there is no other nearby savings bank in Rochester for residents to turn to magnifies somewhat the inconvenience

2. The Board has confirmed its earlier determination that operating a guaranty savings bank is closely related to New Hampshire banking. *First Financial Group of New Hampshire, Inc.*, 66 FEDERAL RESERVE BULLETIN 594 (1980).

3. In these cases the Board assesses the public interest factors both at the time the activity was commenced and at the time of the application to retain the activity. However, because this application was submitted shortly after the branch office was opened and no significant changes have occurred since the branch was opened, a single analysis of the relevant factors was made.

4. *First Financial Group of New Hampshire, Inc.*

that the branch's customers would experience if the Board ordered that the branch be closed.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of public interest factors the Board is required to consider under section 4(c)(8) marginally favors approval of Applicant's retention of this particular branch office, although it is unlikely that proposals for further expansion of Applicant's tandem operations will satisfy that statutory test. This determination is subject to the conditions set forth in the Board's Order of June 20, 1980.

Board of Governors of the Federal Reserve System,

#### Dissenting Statement of Governor Schultz

I would deny this application, or approve it only if Applicant agreed to terminate the tandem operation of its commercial bank and savings bank subsidiaries. The Board has just expressed its view that only very compelling public benefits can justify tandem operations of these types of institutions under section 4(c)(8),<sup>1</sup> and I consider it inconsistent to approve this application and thereby condone such a tandem operation without offsetting public benefits that are particularly conspicuous or weighty.

In effect, the Board's Order in this case turns Applicant's violation of Regulation Y into a positive factor favoring approval of its application. If Applicant had applied in advance for the Board's approval of this branch, as it should have done, I believe that application would probably have been denied, and I do not think that result should be changed simply because Applicant failed, however innocently, to comply with the regulation.

In this connection I am unable to sympathize either with the view that the Federal Reserve System somehow lulled Applicant into believing this branch would be approved and that it therefore should not now order divestiture, or with the view that divestiture would be an unwarranted hardship on Applicant. These considerations are not appropriate in this case for several reasons. In the first place, the Federal Reserve System certainly did not lull Applicant into violating Regulation Y. If Applicant had properly applied for the branch in advance, any misunderstanding it had about the Board's views would have been cleared up before

it put itself to the expense of opening the branch.<sup>2</sup> Having failed to do so, Applicant assumed the risk that divestiture would be ordered. In the second place, for any nonbank activity commenced illegally, I think under the public interest factors of section 4(c)(8) the Board's evaluation should focus on the hardship divestiture may cause to the public, rather than hardship caused to the bank holding company, and I view the record on that former point as inconclusive in this case.

For the foregoing reasons I would deny this application unless Applicant agreed to terminate its tandem operations promptly.

June 25, 1980

#### *Application to Continue to Engage in Real Estate Advisory Services and Real Estate Appraisal Services and of Possible Rulemaking with Respect Thereto*

*Summary:* In connection with an application by First Chicago Corporation, Chicago, Illinois, to retain the shares of a subsidiary, the Board has been requested to add to the list of activities permissible for bank holding companies certain real estate advisory and appraisal services. The Board requests comments as to whether the proposed activity of "performing appraisals of any type of real estate, other than single-family residences" is closely related to banking or managing or controlling banks.

Applicant states that certain real estate-related advisory services, provided to state and local governments, have been previously specified by the Board as being permissible for bank holding companies as "providing financial advice to state and local governments, such as with respect to the issuance of their securities." The Board also requests comments as to whether these proposed activities are closely related to banking.

With respect to these activities and others that have been previously determined to be closely related to banking, the Board requests interested persons to comment on whether retention of the nonbanking company would result in public benefits that outweigh possible adverse effects.

*Date:* Comments must be received by August 1, 1980.

1. *First Financial Group of New Hampshire, Inc.*, 66 FEDERAL RESERVE BULLETIN 594 (1980).

2. In any event, I see nothing in the Board's 1975 Order approving Applicant's acquisition of Savings Bank suggesting that the Board would look favorably upon any future branching or any other significant alteration in Savings Bank's activities.

*Supplementary Information:* The Board of Governors has received an application filed pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843 (c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)) by First Chicago Corporation, Chicago, Illinois, for prior approval to retain shares of its subsidiary, Real Estate Research Corporation ("RERC"), Chicago, Illinois, a company engaged in a wide variety of real estate-related advisory and appraisal activities. Some of the activities that are the subject of the application have not previously been determined by the Board to be closely related to banking.

Section 225.4(a) of Regulation Y provides that a bank holding company may file an application to engage in activities, other than those determined to be permissible for bank holding companies, if it is of the opinion that the proposed activity in the circumstances surrounding a particular case is closely related to banking or managing or controlling banks. The regulation further provides that the Board will publish in the *Federal Register* a notice of opportunity for hearing regarding the proposed activity only if it believes that there is a reasonable basis for the bank holding company's opinion.

Applicant acquired RERC in June 1970, and has been engaged since that time<sup>1</sup> in the following activities: (1) providing financial advice to state and local governments; (2) providing portfolio investment advice; (3) providing branch location, financial feasibility, and specialized market studies for nonaffiliated banks; (4) providing general economic information and advice, general economic statistical forecasting services, and industry studies; (5) advising state and local governments about methods available to finance real estate development projects; (6) evaluating projected income to determine for state and local governments whether debt resulting from proposed development projects can be adequately serviced; and (7) performing appraisals of all types of real estate, other than single-family residences. These activities are performed from offices of RERC in Chicago, Illinois; Atlanta, Georgia; Dallas and Houston, Texas; Miami, Florida; San Diego and San Francisco, California; and the District of Columbia. The geographic area served is the entire continental United States. RERC also engages in other real estate advisory activities that are not subjects of this notice because the Board has determined that there is no reasonable basis for Applicant's opinion that the activities are closely related to banking.

1. Section 4 of the Act provides, inter alia, that nonbanking activities acquired between June 30, 1968, and December 31, 1970, by a company which became a bank holding company as a result of the 1970 Amendments may not be retained beyond December 31, 1980, without Board approval.

Applicant states that activity (5), "advising state and local governments about methods available to finance real estate development projects," and activity (6), "evaluating projected income to determine for state and local governments whether debt resulting from proposed development projects can be adequately serviced," are within the scope of the activity previously determined by the Board to be permissible for bank holding companies in section 225.4(a)(5)(v) of Regulation Y (12 C.F.R. § 225.4(a)(5)(v)). Applicant cites as examples of these activities, (a) analyzing the financial feasibility of converting obsolete urban buildings to new uses, and (b) examining the impact of a proposed freeway on land use, property values, tax receipts, and public expenditures. While the administrative history of that provision of Regulation Y indicates that the Board intended to restrict the scope of the activity, the Board believes nevertheless that these proposed activities may be encompassed within the language of the provision. In addition, it appears that the provision of such services by a banking organization may be consistent with factors considered by the Board under its Regulation BB (12 C.F.R. § 228.7) in assessing a state member bank's record of performance under the Community Reinvestment Act (12 U.S.C. § 2901 et seq.). Therefore, regardless of whether these activities currently are specifically authorized, the Board believes it is reasonable to secure comments on whether these activities should be permissible for bank holding companies.

Under guidelines established by a federal circuit court,<sup>2</sup> an activity may be found to be closely related to banking if it is demonstrated (1) that banks generally have in fact provided the proposed service; or (2) that banks generally provide services that are operationally or functionally so similar to the proposed services as to equip them particularly well to provide the proposed service; or (3) that banks generally provide services that are so integrally related to the proposed service as to require their provision in a specialized form.<sup>3</sup> The Board has previously found the *National Courier* guidelines useful in determining whether there is a reasonable basis for an applicant's opinion that a proposed new nonbanking activity is closely related to banking.<sup>4</sup>

2. *National Courier Association v. Board of Governors of the Federal Reserve System*, 516 F.2d 1229 (D.C. Cir. 1975) (hereinafter referred to as "*National Courier*").

3. These guidelines are cited, for example, in *NCNB Corporation v. Board of Governors of the Federal Reserve System*, 599 F.2d 609 (4th Cir. 1979); *Association of Bank Travel Bureaus, Inc. v. Board of Governors of the Federal Reserve System*, 568 F.2d 549, 551 (7th Cir. 1978); *Alabama Association of Insurance Agents v. Board of Governors of the Federal Reserve System*, 553 F.2d 224, 241 (5th Cir. 1976), rehearing denied 558 F.2d 729 (1977), cert. denied 435 U.S. 904 (1978).

4. *NCNB Corporation* (Superior Insurance Company and Superior Claim Service), 64 FEDERAL RESERVE BULLETIN 506, 507 (1978); aff'd sub nom. *NCNB Corporation v. Board of Governors of the Federal Reserve System*, 599 F.2d 609 (4th Cir. 1979).

With respect to the activity of performing appraisals of real estate other than single-family residences (RERC's activity (7)), the Board finds that the record of this application currently contains little evidence, other than Applicant's unsubstantiated assertions, that this activity meets the guidelines established by the Board and the courts. There is evidence to indicate that banks perform real estate appraisals for internal use, but this is not a basis upon which an activity may be found to be closely related to banking; otherwise, any administrative support service could be found to be closely related to banking. Nevertheless, since the Board is inviting comment on other aspects of the proposal, it appears that it would be desirable to also secure comments as to whether this activity is "so closely related to banking or managing or controlling banks as to be a proper incident thereto." It is noted that appraisals accounted for a larger percentage of RERC's sales in 1979 than any other single activity. Under the Board's Regulation Y, the Board's decision to publish notice of a proposed new activity does not obligate the Board to finally determine that the activity is closely related to banking or that the activity is permissible for bank holding companies.

Interested persons may express their views on the question of whether each of the above activities is closely related to banking or managing or controlling banks. Comments concerning this question should address the *National Courier* guidelines.

Some of RERC's activities proposed by First Chicago to be continued beyond December 31, 1980, have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b). These activities are: (1) providing financial advice to state and local governments; (2) providing portfolio investment advice; (3) providing branch location, financial feasibility, and specialized market studies for non-affiliated banks; and (4) providing general economic information and advice, general economic forecasting services, and industry studies. Interested persons may also express their views on the question of whether the continued performance by Applicant of these activities, as well as those activities proposed for rulemaking discussed above, can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."

A request for a hearing on either question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in

dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

### First Financial Group of New Hampshire, Inc., Manchester, New Hampshire

#### *Order Approving Acquisition of Guaranty Savings Bank*

First Financial Group of New Hampshire, Inc., Manchester, New Hampshire, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) to acquire all of the outstanding shares of Guaranty Savings Bank ("Guaranty"), Salem, New Hampshire.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been duly published (44 *Federal Register* 55,657 (1979)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 4(c)(8) of the Act.

On the basis of the record, the Board has confirmed that the operation of a guaranty savings bank is closely related to New Hampshire banking and has determined that, provided there is no tandem operation by Applicant of Guaranty and any commercial bank affiliate, the balance of public interest factors the Board must consider under section 4(c)(8) of the Act is favorable. Accordingly, the application is approved for the reasons set forth in the Board's Statement, which will be released at a later date. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y (12 C.F.R. § 225.4(c)), to the condition that Applicant will not operate Guaranty in tandem with any commercial bank affiliate, and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective June 20, 1980.

Voting for this action: Chairman Volcker and Governors Schultz, Rice, and Gramley. Voting against this action: Governors Wallich, Partee, and Teeters.

(Signed) GRIFFITH L. GARWOOD,  
*Deputy Secretary of the Board.*

Statement by Board of Governors of the Federal Reserve System Regarding Application by First Financial Group of New Hampshire, Inc. to Acquire First Guaranty Savings Bank

First Financial Group of New Hampshire, Inc., Manchester, New Hampshire, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to acquire First Guaranty Savings Bank ("Guaranty"), Salem, New Hampshire, an organization currently engaged in the activities of a guaranty savings bank in New Hampshire.<sup>1</sup> These activities include: accepting time and savings deposits, including NOW accounts; investing in residential and commercial mortgages; investing in U.S. Government securities and other investments permitted by applicable laws; making secured and unsecured loans; providing safe deposit services; and servicing mortgages and other loans. In 1975, the Board approved the acquisition of a New Hampshire guaranty savings bank by a New Hampshire bank holding company, determining that the operation of such an institution was closely related to banking in New Hampshire.<sup>2</sup> However, the operation of a New Hampshire guaranty savings bank has not been specified by the Board in section 225.4(a) of Regulation Y as permissible generally for bank holding companies.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been duly published. The time for filing comments and views has expired, and the Board has considered the application and all the comments received, including those of Merchants Savings Bank, the National Association of Mutual Savings Banks ("NAMSB"), the New Hampshire Association of Savings Banks, Rockingham County Trust Company, and Senator William Proxmire, in light of the factors set forth in section

4(c)(8) of the Act. In addition, in response to a request by NAMSB, Applicant and several of the protestors made an oral presentation before Board staff on January 10, 1980.

Applicant, the third largest commercial banking organization in New Hampshire, controls four banks with aggregate deposits of \$217.8 million, representing 9.5 percent of deposits in all commercial banks in the state.<sup>3</sup> In addition, Applicant engages in limited grandfathered real estate activities and controls First Mortgage Corporation, a mortgage banking subsidiary that was reactivated this year with Board approval. Guaranty, which opened for business on July 27, 1978, is an independent state-chartered guaranty savings bank controlling \$5.5 million in deposits as of December 31, 1979, representing 0.01 percent of the total deposits in New Hampshire's mutual and guaranty savings banks. Guaranty operates in the Boston banking market<sup>4</sup> and controls 0.2 percent of the total deposits of the savings banks in the Boston market.

As noted, the Board has previously determined that the operation of a New Hampshire guaranty savings bank by a New Hampshire bank holding company is closely related to banking, and in the Board's view no serious challenge has been raised to this conclusion. In the ensuing years since the Board's decision, changes in the structural and competitive circumstances relevant to that determination have been modest, although the complexion of New Hampshire banking has changed in other respects.<sup>5</sup> Banks operating in the state generally provide each of the main customer services offered by guaranty savings banks, and state trust companies can conduct a savings bank business. Based on the record, the Board confirms its conclusion that the operation of a guaranty savings bank is closely related to banking in New Hampshire.

In acting on this application, however, the Board must also determine whether the proposed acquisition

3. Applicant's four subsidiary banks are: The Manchester Bank, Manchester, New Hampshire, the largest commercial bank in the state (deposits of \$153 million); The Colonial Bank, Nashua, New Hampshire (deposits of \$17 million); Claremont National Bank, Claremont, New Hampshire (deposits of \$28.5 million); and First Bank and Trust Company, Meredith, New Hampshire (deposits of \$9.5 million). The Manchester Bank is the survivor by merger of a mutual savings bank and a commercial bank and continues to operate a large savings department with 63 percent of total deposits in the form of time and savings deposits. Unless otherwise indicated, all banking data are as of June 30, 1979, and include bank holding company acquisitions as of April 21, 1980.

4. The Boston banking market is approximated by the Boston RMA, the eighth largest RMA in the United States, which is comprised of 159 cities and towns or sections thereof. It includes all of Suffolk and Essex Counties, most of Middlesex, Norfolk, and Plymouth Counties, and small portions of Worcester and Bristol Counties. Also included are the SMSA's of Boston, Brocton, Lowell, and Lawrence-Haverhill. The area extends over the entire eastern coast of Massachusetts, excluding Cape Cod, but including 13 towns in southern New Hampshire, one of which is Salem.

5. See, *Heritage Banks, Inc.*, 66 FEDERAL RESERVE BULLETIN 590 (1980).

1. Although guaranty savings banks differ from mutual savings banks in that they are stock corporations, they are otherwise essentially the same as mutual savings banks and have federal deposit insurance available to them.

2. *Profile Bankshares, Inc.*, 61 FEDERAL RESERVE BULLETIN 901 (1975).

is a proper incident to banking, whether it "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." This is the question to which the protestants have chiefly directed their comments.

Several of the protestants have argued that the Board's denial in 1977, based on the same statutory test, of *D. H. Baldwin Company's* retention of Empire Savings, Building and Loan Association, 63 FEDERAL RESERVE BULLETIN 280 (1977), precludes approval of this application. That decision, however, reflected a general Board policy against the affiliation of commercial banks and savings and loan associations that the Board enunciated three years before it permitted the acquisition of a New Hampshire guaranty savings bank under the Act, and from which policy other similar combinations in New England, for similar historical reasons, were expressly excepted at the time.<sup>6</sup>

As the Board noted in *Savings Banks Shares, Inc.*, 65 FEDERAL RESERVE BULLETIN 767 (1979), *D. H. Baldwin* evidences the Board's serious concern about public policy implications of any affiliation of thrift institutions and commercial banks. It does not, however, preclude a favorable finding on this application. The acquisition proposed in this application does not involve the sharp institutional rivalry engendered by a separate Congressionally established regulatory framework to which the Board's discussion in *D. H. Baldwin* related. Neither would this proposal, as precedent, have the same broad national significance, nor would it lead to the creation of any bank holding company subject to separate, conflicting Federal regulation.<sup>7</sup>

Although the protestants misinterpret *D. H. Baldwin*, the Board believes they have correctly identified one substantive adverse consideration relative to the

affiliation of commercial banks and guaranty savings banks, and that involves the pairing or tandem operation of the two types of institutions.<sup>8</sup> Guaranty savings banks, having asset and liability powers similar to those of other thrift institutions, are not banks within the meaning of the Act since they do not accept demand deposits and engage in the business of making commercial loans. Although they have broad lending powers and may make many of the same types of loans as do commercial banks, guaranty savings banks have traditionally concentrated their loan portfolios on residential lending. Under FDIC regulations, stock savings banks operate under the same rate structure as mutual savings banks, thus allowing them to pay an additional 1/4 percent interest on deposits or accounts provided for as an interest rate differential between thrifts and commercial banks. The Board believes that the establishment of a guaranty savings bank, authorized to pay a higher rate of interest than commercial banks, at the same location as a commonly controlled commercial bank, would subvert the purpose of the differential. So far as the public's perception is concerned, these ostensibly competing institutions would be viewed as one institution, having a range of powers that neither Congress nor the New Hampshire legislature has conferred on any single institution. In the Depository Institutions Deregulation Act of 1980 Congress has, in effect, prescribed that commercial banks wait for the elimination of the differential. The Board believes a bank holding company must present compelling public benefits under the Act in order to justify indirectly avoiding that waiting period for its commercial bank subsidiaries through an artificial device that in the Board's judgment will entail the clear potential for serious conflicts of interests and may entail unfair competition as well.<sup>9</sup>

The same adverse effects are possible even where the two institutions are not paired at a single location but where they are located close to one another or operated in close mutual support. But, by itself, common ownership of guaranty savings banks and commercial banks in separate markets, as proposed in this application, does not raise a serious concern regarding the evasion of interest rate limitations. To the extent that the purpose of the interest rate differential is to en-

6. 37 *Federal Register* 16,133 (1972); *D. H. Baldwin*, 63 FEDERAL RESERVE BULLETIN at 284 n. 10. As the Board stressed in 1975, the historical relationship between commercial banks and guaranty savings banks in New Hampshire has been unlike historical relationships among other institutions and in other states. For that reason the Board's policy against bank holding company acquisitions of savings and loan associations did not prevent its approval of *Profile* in 1975 and, by the same token, approval of *Profile* or of this application is not considered relevant to proposals to acquire any institution other than a New Hampshire guaranty savings bank.

7. An application by an out-of-state bank holding company to acquire a New Hampshire guaranty savings bank would, because of the similarities of guaranty savings banks and commercial banks, face the same objection expressed in *D. H. Baldwin* regarding out-of-state acquisitions of savings and loan associations. However, the Act gives the Board authority to take actions necessary to prevent evasion of the Act's purposes, and the question is not presented by this application by a New Hampshire bank holding company.

8. Protestants have also suggested, based on a 1978 decision of the State Board of Trust Company Incorporation ("BTCL") denying an application to charter a guaranty savings bank subsidiary of Applicant, that affiliation of commercial banks and savings banks through bank holding companies may contravene the public policy of New Hampshire. In the Board's view this suggestion was removed as a material factor bearing on this application on April 24, 1980, when the BTCL, following a remand by the State Supreme Court for new findings, approved organization of the savings bank.

9. Tandem operation of affiliated commercial banks and savings banks have been common in New Hampshire, but there has been a distinct trend in recent years away from tandem operations, and the Board considers this trend structurally desirable.

courage the deposit of funds in thrift institutions where they will be more readily available for residential housing, that purpose may be served equally well whether a thrift institution is independent or owned by a bank holding company, as long as the thrift maintains its separate consumer oriented operations.

Applicant contends that the circumvention of the interest rate differential is not at issue in this proposal. No offices of Applicant's commercial bank subsidiaries are within Guaranty's market. Applicant affirms furthermore that, even apart from legal restrictions, it would not try to move funds between Guaranty and any commercial bank subsidiary; and since Applicant has not formulated any plans to branch into Guaranty's market, its acquisition of Guaranty and its plans for the institution are not dependent upon Guaranty's becoming a symbiont of any commercial bank affiliate.

If, in fact, the question of tandem operation is removed from consideration in this case, the Board believes the balance of public interest factors it is required to consider under section 4(c)(8) is favorable. Applicant and Guaranty, a very small institution, operate in separate markets, and there would be no significant adverse effects on competition from the acquisition. In addition, the Board does not believe there is any substantive evidence in the record that the acquisition could result in undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices, or other adverse effects, so long as Guaranty operates as a free-standing competitor in its market and its operations are not paired with Applicant's commercial bank operations. Moreover, the acquisition is likely to result in public benefits through improved services and increased competitive effectiveness of Guaranty as an affiliate of Applicant.

These public benefits, however, are not sufficient to outweigh the adverse effects the Board believes could result from the establishment of a tandem relationship between Guaranty and Applicant's commercial banks, at least so long as the interest rate differential between commercial and savings banks survives. Since Applicant has not proposed a tandem relationship, based on the foregoing and other considerations reflected in the record, the Board has approved this application in reliance on its understanding that assets and liabilities will not be shifted between Guaranty and Applicant's other subsidiaries and subject to the condition that Applicant will not establish a commercial banking facility at a location of Guaranty,<sup>10</sup> and other conditions specified in the Board's Order of June 20, 1980.

Board of Governors of the Federal Reserve System, June 25, 1980.

(Signed) GRIFFITH L. GARWOOD,  
*Deputy Secretary of the Board.*

[SEAL]

### Dissenting Statement of Governor Partee

I agree with the majority of the Board that, consistent with precedent, the operation of a guaranty savings bank in New Hampshire by a New Hampshire bank holding company is closely related to banking. However, before approving an application under section 4 of the Bank Holding Company Act the Board must find not only that the proposed activity is closely related to banking, but also that the reasonably expected public benefits associated with the proposal outweigh the possible adverse effects. I am of the opinion that the public interest requires that this application be denied, notwithstanding the imposition of a condition prohibiting the establishment of tandem operations of Applicant's commercial bank and guaranty savings bank subsidiaries.

This proposal will result in the affiliation of a commercial banking organization with a guaranty savings bank. Guaranty savings banks are stock thrift institutions which have asset and liability powers similar to mutual savings banks. Like other thrift institutions, they are also permitted to pay the differential on savings deposits as allowed by federal deposit interest rate ceilings. Applicant would become the second of approximately 70 commercial banking organizations in New Hampshire to be formally affiliated with a thrift institution. In my judgment, this affiliation will afford Applicant a competitive advantage, albeit slight, over other commercial banking organizations in the state. Moreover, it will serve as a precedent for similar affiliations in the state. This concern is heightened by the fact that several of the largest banking organizations in the state have recently initiated efforts to establish similar subsidiary relationships. Undesirable trends in statewide structure could well occur if the largest commercial banking organizations in the state are afforded a competitive advantage in terms of deposit gathering powers.

The majority notes that the recently passed Depository Institutions Deregulation Act of 1980 requires banks to wait up to six years before the differential is eliminated. I would resist any effort by commercial banking organizations to circumvent Regulation Q interest ceiling differentials until such time as this matter

10. Applicant may apply for relief from this condition when the interest rate differential has been eliminated, and the Board will review the circumstances existing in New Hampshire at that time. While the condition is intended to prohibit only the colocation of a commercial banking facility with Guaranty, any other pairing of Guaranty's operations and those of a commercial bank subsidiary could constitute a significant alteration in Guaranty's activities requiring application in accordance with section 225.4(c)(2) of Regulation Y. 12 C.F.R. § 225.4(c)(2). The Board in particular expects Applicant to consult the Federal Reserve System to determine whether the Board's prior approval would be required under this section if in the future it forms an intention to establish a commercial banking facility at a separate location within Guaranty's market.

is dealt with by regulation or—after six years—the full phase-out of the restrictions becomes effective. In the interim, I believe that all banking institutions competing in the same markets should be made to do so on equal terms.

For the foregoing reasons, I would deny this application.

June 25, 1980

First Pennsylvania Corporation,  
Philadelphia, Pennsylvania

*Order Approving Retention of Pennamco, Inc. and certain other assets*

First Pennsylvania Corporation, Philadelphia, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to retain Pennamco, Inc., Bala-Cynwyd, Pennsylvania ("Pennamco"), and the commercial finance receivables of First Pennsylvania Financial Services, Inc., Philadelphia, Pennsylvania ("FPFS"), and Industrial Finance & Thrift Corporation, New Orleans, Louisiana ("IF&T"), both of which are wholly-owned subsidiaries of Applicant.<sup>1</sup> The assets of FPFS and IF&T are to be transferred to First Pennsylvania Leasing, Inc. ("FPL"). FPL will engage in such commercial finance activities as are necessary to administer and liquidate the assets of FPFS and IF&T not acquired by Manufacturers Hanover Corporation, New York, New York, in a related transaction. Similarly, Pennamco, a mortgage banker and servicer, will administer and liquidate those portions of its assets not being acquired by Manufacturers Hanover Corporation.<sup>2</sup> Such activities have been determined by the Board to be closely related to banking (12 C.F.R. §§ 225.4(a)(1), (3)).

1. Section 4 of the Act provides, in relevant part, that nonbanking activities acquired between June 30, 1968, and December 31, 1970, by a company that became a bank holding company as a result of the 1970 Amendments to the Act may not be retained beyond December 31, 1980, without prior Board approval. Applicant became a bank holding company as a result of the 1970 Amendments and acquired Pennamco, FPFS and IF&T in 1970. Applicant is also engaged in land development and property management activities that are not permissible for bank holding companies. Applicant does not seek the Board's approval to retain these activities, and will divest them by December 31, 1980.

2. The Board, by separate action of this date, has approved the application of Manufacturers Hanover Corporation to acquire FPFS, IF&T, and certain assets of Pennamco.

Notice of the applications, affording opportunity for interested persons to submit comments on the public interest factors, has been duly published (45 *Federal Register* 30,539 (1980)). The time for filing comments has expired, and the Board has considered the applications and all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act.

Applicant, the second largest banking organization in Pennsylvania, controls First Pennsylvania Bank, N.A., Philadelphia, Pennsylvania, with total deposits of approximately \$5.0 billion.<sup>3</sup> The assets of FPFS, IF&T and Pennamco that Applicant proposes to retain (\$19.8 million in commercial finance receivables and a real estate portfolio of \$163.0 million) will eventually be liquidated and, based upon all the facts of record, the Board concludes that Applicant's proposed retention would not have any adverse competitive effects. Moreover, the proposed retention of these assets after December 31, 1980, would permit the orderly settlement of the business of FPFS, IF&T and Pennamco, which the Board believes to be in the public interest, particularly in light of certain commitments made by Applicant regarding limitations on the activities of these subsidiaries.

There is no evidence in the record indicating that this retention would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices or other adverse effects.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the applications are hereby approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y (12 C.F.R. § 225.4(c)) and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective June 2, 1980.

Voting for this action: Vice Chairman Schultz and Governors Partee, Teeters, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Wallich.

(Signed) GRIFFITH L. GARWOOD,  
Deputy Secretary of the Board.

[SEAL]

3. All data are as of March 31, 1980.

**Manufacturers Hanover Corporation,  
New York, New York**

*Order Approving Acquisition of Nonbanking  
Companies*

Manufacturers Hanover Corporation, New York, New York ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval, under § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to acquire through a de novo subsidiary, M H Financial Corporation, all of the voting shares of the following: (1) First Pennsylvania Financial Services, Inc., Philadelphia, Pennsylvania; (2) Continental Finance Corporation of America, Aurora, Colorado; and (3) Ellwood Consumer Discount Company, Inc., Ellwood City, Pennsylvania (collectively, "Companies"). Applicant also seeks to acquire through its existing mortgage banking subsidiary, Manufacturers Hanover Mortgage Corporation, the mortgage servicing portfolio and certain other assets of Pennamco, Inc., Bala Cynwyd, Pennsylvania ("Pennamco"), and thereafter service such portfolio.

Companies, directly and through subsidiaries, are engaged in the activities of consumer lending, sales finance, industrial banking, and second mortgage lending, and selling as agent credit life, accident and health insurance and property and casualty insurance directly related to extensions of credit made by Companies. Companies also act as underwriter for credit life, accident and health insurance<sup>1</sup> directly related to extensions of credit made by Companies. Each of these activities has been determined by the Board to be closely related to banking (12 C.F.R. §§ 225.4(a)(1), (2), (3), (9) and (10)).<sup>2</sup>

Notice of the application, affording opportunity for interested persons to submit comments on the public interest factors, has been duly published (45 *Federal Register* 29,119). The time for filing comments has expired, and the Board has considered the application

and all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act.<sup>3</sup>

Applicant, with total consolidated assets of \$47.7 billion, is the second largest banking organization in New York and the fourth largest in the United States.<sup>4</sup> Applicant engages through subsidiaries in a variety of nonbanking activities, including mortgage banking, leasing and factoring.

Through its subsidiary, Ritter Financial Corporation, Wyncote, Pennsylvania ("Ritter"), Applicant also engages in consumer and commercial finance and credit-related insurance agency and underwriting activities similar to those of Companies. Ritter operates 153 loan offices in 12 states, concentrated along the East coast of the United States, and is the 33rd largest non-captive finance company in the United States in terms of total capital.<sup>5</sup> Ritter's total assets approximate \$200 million.

Companies, in the aggregate, are the 28th largest non-captive finance company in the United States on the basis of total capital,<sup>6</sup> and have total assets approximating \$300 million. Companies operate 246 offices in 23 states, primarily in the mid-Atlantic states

3. On Friday, May 30, 1980, the Board received a protest by The Professional Insurance Agents of New Jersey ("Protestants") regarding that portion of the application dealing with the sale of property and casualty insurance in New Jersey. Protestants contend that (1) there are no public benefits associated with Applicant's proposal; (2) Applicant may "tie" the granting of credit to the purchase of insurance; (3) Applicant could have an advantage over independent insurance agents because of its access to depositor information; and (4) the Board should postpone action on the application while legislation to prohibit insurance sales by holding companies is under consideration in the Congress and in the New Jersey legislature. Protestants also urge the Board to sever the New Jersey property and casualty insurance portions of the application for consideration at a later time and to order a hearing.

Protestants' comments and hearing request were not received within the time specified in the *Federal Register* notice. The Board's Rules of Procedure, 12 C.F.R. § 262.3(e), preclude consideration of untimely hearing requests. It is within the Board's discretion to consider untimely comments under these rules, but the Board declines to exercise this discretion. Protestants' comments consist of nothing more than unsubstantiated conclusions and allegations which, for the most part, bear no relation to this particular application. The tying of credit extensions to insurance sales is prohibited by law (12 U.S.C. § 1972) and the possibility of the occurrence of either "involuntary" or "voluntary" tying is made quite remote by the provisions of the Board's Regulation Z dealing with insurance, 12 C.F.R. § 226.4(a)(6). Moreover, the Board believes it is inappropriate to delay or sever an application on the basis of an untimely protest, and the Board has previously indicated its belief that pending legislation will not stop the running of the 91-day limit on Board action contained in section 4(c) of the Act. Finally, the substantial public benefits associated with this proposal are sufficient to outweigh the highly speculative adverse effects alleged by Protestants. Even if this public benefits analysis is made only with regard to the insurance portion of the application, the procompetitive effect of maintaining an additional competitor in the market is sufficient to outweigh the speculative adverse effects described by Protestants.

4. All financial data are as of December 31, 1979, unless otherwise indicated.

5. *American Banker*, June 11, 1979. A "non-captive" finance company is one that does not restrict its business to loans made in connection with the purchase of a particular manufacturer's product.

6. *Id.*

1. Companies are engaged in certain activities that are impermissible for Applicant. Applicant does not propose to engage in those activities following consummation of the proposal.

2. Applicant has also applied under section 4(c) (13) of the Act for the Board's approval to acquire CommoLoCo., Inc., Hato Rey, Puerto Rico ("CommoLoCo"). CommoLoCo is engaged in consumer and commercial lending and sales finance activities and the sale of credit related insurance in Puerto Rico. Under section 211.2(f) of Regulation K, Puerto Rico is treated as a foreign country. These activities are among those the Board has determined to be permissible in section 211.5(d) of Regulation K. The Board finds that this proposal is not at variance with the purposes of the Act and that its consummation would be in the public interest. Accordingly, the Board grants its specific consent for this proposal.

and across the middle and southern portions of the United States.

The Board believes that the relevant product market to be considered in evaluating the competitive effects of this proposal is the making of personal cash loans.<sup>7</sup> Consumer finance companies compete with commercial banks in the area of personal loans, and the relevant geographic market is approximated by the local banking market.<sup>8</sup> Ritter has loan offices in 17 local markets where Companies also have loan offices, and from the record it appears that both Applicant and Companies hold a significant amount of the outstanding personal cash loans in many of those markets. Indeed, in four relatively small markets the combined market shares of Ritter and Companies exceeds 19 percent. Thus, it is the Board's opinion that the adverse affects on existing competition that would result from consummation of this proposal are serious. Were it not for the substantial public benefits associated with this proposal, as discussed below, this factor would warrant denial of Applicant's proposal.

With regard to potential competition, the Board notes that Companies' parent corporation, First Pennsylvania Corporation, Philadelphia, Pennsylvania, has decided to concentrate its financial and managerial resources on its banking subsidiary. Accordingly, it does not appear that Companies are a likely entrant into the local markets where Applicant presently has offices. On the other hand, Applicant has increased the number of its loan offices by one-fifth since 1975, and has increased the number of states in which it is represented from six to twelve. Applicant apparently has the potential to enter many of the local markets where Companies presently have offices. However, the large number of other potential entrants into Companies' local markets moderates somewhat the negative effects on potential competition associated with the proposal.

Applicant also proposes to acquire the mortgage servicing portfolio of Pennamco, which has a servicing portfolio of \$2.9 billion and ranks as the eighth largest mortgage servicer in the country. Applicant's subsidiary, Manufacturers Hanover Mortgage Corporation, services a mortgage portfolio of \$2.5 billion, and is the nation's 14th largest mortgage servicer. Thus, consummation of Applicant's proposal also will eliminate an independent competitor in the mortgage servicing industry.

In view of the size of the various companies involved in this proposal and based upon all the facts of record, consummation of the proposal would have some negative effects with respect to other consid-

erations specified in section 4(c)(8) of the Act. Nevertheless, the Board believes that such negative effects are somewhat tempered by the large number of other competitors that will remain after consummation of the proposal, and when balanced against the public benefits expected to result from this transaction, the Board does not view the adverse effects associated with the proposal as being so serious as to warrant denial. In addition, while it might be preferable from a competitive standpoint to have this acquisition made by another purchaser, in order to assure the immediate benefits to the public that are expected to result from the prompt consummation of this proposal, the Board believes that approval is in the public interest.

Affiliation of Companies and Pennamco with Applicant will provide those organizations with access to Applicant's financial and managerial resources and ensure the continued availability of personal loans and related insurance services to Companies' customers at their present locations. The Board views these factors favorably in light of First Pennsylvania Corporation's decision to concentrate its resources on its banking subsidiary. More significantly, the funds that First Pennsylvania Corporation will derive from the proposed transaction will serve to strengthen the overall organization and improve its future prospects. The continued viability of Companies and the funds First Pennsylvania Corporation will receive as a result of this transaction lend significant weight toward approval of the proposal.

Applicant also has stated that following consummation of the proposal Companies will offer at reduced premiums the several types of credit insurance policies that they will underwrite.<sup>9</sup> Since Applicant proposes to sell credit life and credit accident and health insurance underwritten by Companies in each of the states in which Companies operate, Applicant's proposed rate reductions vary according to the permissible rate structures in each respective state, and involve rate reductions for reducing-term single and joint credit life insurance at premium rates ranging from approximately 2 percent to 15 percent below the rates presently charged in each of the respective states.

On the basis of these and other facts of record, the Board concludes that the benefits to the public that

7. *Security Pacific Corporation* (American Finance System, Inc.), 65 FEDERAL RESERVE BULLETIN 73 (1979).

8. *Bankers Trust Corporation* (Public Loan Company), 59 FEDERAL RESERVE BULLETIN 694 (1973).

9. With respect to underwriting credit life and credit accident and health insurance, which is generally made available by banks and other lenders and is designed to assure repayment of a loan in the event of death or disability of the borrower, the Board has stated:

To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which the Applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally, such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. (12 C.F.R. § 225.4(a)(10) n. 8).

would result from Applicant's acquisition of Companies and Pennamco are sufficient to outweigh the negative effects on competition and concentration of resources that would result from the proposed acquisition. Furthermore, there is no evidence in the record to indicate that consummation of the proposed transaction would result in unfair competition, conflicts of interest, unsound banking practices or any other effects that would be adverse to the public interest.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved, subject to the conditions that: (1) Applicant will not engage in any of the activities in which Companies are engaged that the Board has not determined to be closely related to banking, and (2) Applicant will maintain on a continuing basis the public benefits that the Board has found to be reasonably expected to result from this proposal with regard to insurance underwriting activities. This determination is also subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof. The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York pursuant to authority hereby delegated.

By order of the Board of Governors, effective June 2, 1980.

Voting for this action: Vice Chairman Schultz and Governors Partee, Teeters, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Wallich.

Manufacturers Hanover Trust Company,  
New York, New York

*Order Approving Establishment of a Branch*

Manufacturers Hanover Trust Company, New York, New York, has applied for the Board's approval under section 9 of the Federal Reserve Act (12 U.S.C. § 321) to establish a branch at 6421-23 18th Avenue, Brooklyn, New York.

Notice of this application has been given as required by the Board's Rules of Procedure (12 C.F.R. § 262.3(b)), affording interested persons the opportunity to submit comments and views. The Board has received comments on Applicant's record under the Community Reinvestment Act of 1977 ("CRA," 12 U.S.C. §§ 2901-05) from South Brooklyn Against Investment Discrimination ("Protestant"), as well as comments from a number of other groups. The Board has considered the application and all comments received in light of section 9 of the Federal Reserve Act and the CRA.

Applicant, with total foreign and domestic deposits of \$37.8 billion,<sup>1</sup> currently operates 202 domestic branches. Establishment of the proposed office would not adversely affect existing or potential competition. The financial and managerial resources and future prospects of Applicant are considered generally satisfactory, as are the future prospects of the proposed branch. Establishment of the proposed branch would provide a convenient additional source of banking services to the surrounding community. These factors are consistent with approval of the application.

In addition to the factors considered above, the Board is required by the CRA to assess the record of Applicant of meeting the credit needs of its entire community, including low and moderate income neighborhoods, consistent with safe and sound operation, and to take that record into account in its evaluation of this application. In connection with this application, the Board conducted an extensive investigation of Applicant's record, including a full consumer compliance examination. Applicant has met all the procedural requirements of the CRA and has made a reasonable delineation of its community. Applicant, which is a major wholesale banking institution, also offers a wide range of retail banking services, emphasizing consumer and small business lending, throughout its community. Applicant has established a CRA task force and steering committee of senior officers to coordinate its efforts to meet community credit needs. One result of this process has been numerous meetings with community organizations throughout Applicant's community, and a number of these organizations have submitted comments in support of Applicant's record. Applicant has also established an urban lending department which currently has outstanding \$20 million in nonconventional business loans and bridge loans for economic development and similar purposes.

Protestant contends, however, that Applicant's record is deficient in several respects. Protestant states that although Applicant has received deposits from the Brooklyn area, it has bypassed the needs of the area

1. Financial data are as of September 30, 1979, unless otherwise noted.

by lending outside New York City; that it has failed to serve the small business credit needs of the Brooklyn area; and that with respect to housing credit it has employed restrictive mortgage policies, refused to extend credit on residential properties containing more than two units, and extended relatively little credit in racially mixed and low to moderate income neighborhoods. Having considered the charges of Protestant in light of the record before it and the requirements of CRA, the Board has concluded that the application should be approved.

With respect to the charge of disinvestment, the Board has previously stated:

There are many reasons why particular neighborhoods may generate more deposits than loan requests, or more requests than deposits, and that disparity in a particular local area between credit granted and deposit totals is not prima facie evidence of discrimination. The Board is more concerned with lender sensitivity to the needs of each area.<sup>2</sup>

Moreover, the Board has indicated that the CRA does not require the Board to dictate the product mix of a commercial bank.<sup>3</sup> Applicant is a major wholesale commercial bank involved in commercial lending and finance throughout the United States and the world, and the Board does not regard Applicant's efforts in these lines as being inconsistent with helping to meet the credit needs of its local community. Just as the CRA was not intended to establish fixed ratios between deposits and loans in particular neighborhoods, it also cannot be read to require fixed proportions of retail or commercial deposits to retail or commercial lending.

With regard to small business lending, the record indicates that Applicant is engaged in small business lending throughout its community. As of June 1979, Applicant had over \$750 million in small business loans outstanding in its community, and the distribution of those loans was similar to the distribution of small businesses in the counties comprising its community. In particular, Brooklyn receives the largest proportion of Applicant's small business installment loans and the second largest proportion, after Manhattan, of small business commercial loans. In December 1978, Applicant instituted a "Small Business Base Rate" program to permit small businesses to borrow at 1<sup>1</sup>/<sub>4</sub> percent below the prime rate, and it operates a "Quickfinance" loan program which allows rapid turnaround on loan applications for small business leasing and equipment purchase needs. Applicant has

also extended \$178 million in Small Business Administration Loans as of June 1979.

In some respects, Applicant's record of mortgage lending bears out some of Protestant's charges. Applicant, like other New York state chartered institutions, has been subject to a state usury ceiling that affected the terms and kinds of loans that it made. Applicant has not emphasized mortgage lending in New York, and has adopted relatively restrictive loan policies, including a high income-to-mortgage-size requirement. Applicant has made mortgage loans only for one- and two-family homes. Similar to other large New York state chartered institutions, approximately one-half of Applicant's mortgage portfolio consists of loans made outside the state. Its proportion of lending in low and moderate income areas is lower than the average for other state chartered institutions. Applicant's 1978 Home Mortgage Disclosure Act data also reflect relatively few loans made in predominantly minority census tracts. However, the number of such loans granted was proportionate to the number of applications received, and examination of Applicant's operations revealed no evidence of discriminatory practices in acting on applications. These mortgage lending patterns appear to result partly from Applicant's lending policies, and also from Applicant's lack of emphasis on mortgage lending, which is reflected, for example, in relatively ineffective communication with inner city real estate brokers.

During the course of this application, Applicant has met with Protestant on a number of occasions to discuss Protestant's charges. As a result of those meetings Applicant has agreed to eliminate its policy against financing three- and four-family residences,<sup>4</sup> and to institute a long term, low down payment mortgage program utilizing private mortgage insurance. In addition, Applicant has undertaken a home improvement loan campaign in Brooklyn, and, in response to discussions with a Bronx community organization, has joined with other area lenders in a housing stock loan program in the Bronx. The Board believes that these steps reflect Applicant's willingness to be responsive to community needs, and that they will serve to improve Applicant's lending record in the area of housing.

In view of these steps, Applicant's generally good record of meeting community credit needs, and the added banking convenience of the proposed branch, considerations relating to the convenience and needs of the community to be served, including CRA considerations, are consistent with approval of this appli-

3. *Commerce Bancshares, Inc.* (Manchester Financial Corporation), 64 FEDERAL RESERVE BULLETIN 576 (1978).

4. Applicant does make loans on apartments with five or more units, treating them as small business loans. Although it has made relatively few such loans, a high proportion are in low and moderate income areas.

cation. Accordingly, the Board concludes that establishment of the proposed branch would be in the public interest and should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The proposed branch should be established not later than three months from the date of this Order unless the time is extended for good cause by the Board or the Federal Reserve Bank of New York, acting under delegated authority.

By order of the Board of Governors, effective June 18, 1980.

Voting for this action: Vice Chairman Schultz and Governors Wallich, Partee, Rice, and Gramley. Absent and not voting: Chairman Volcker and Governor Teeters.

Assistant Secretary of the Board.

[SEAL]

Tennessee National Bancshares, Inc.,  
Maryville, Tennessee

*Order Approving Retention of Southeastern Life Insurance Company*

Tennessee National Bancshares, Inc., Maryville, Tennessee, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)) to acquire direct control of all of the voting shares of Southeastern Life Insurance Company, Maryville, Tennessee ("Company"). Company engages in the activity of underwriting, as reinsurer, credit life and credit accident and health insurance directly related to extensions of credit by Applicant's banking subsidiaries. Such activity has been determined by the Board to be closely related to banking (12 C.F.R. § 225.4(a)(10)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (44 *Federal Register* 45245 (1979)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)).

Applicant, the seventh largest banking organization in Tennessee, controls four subsidiary banks having total assets of approximately \$144 million.<sup>1</sup> Applicant does not engage in any other nonbanking activities.

Company was organized in 1972 by Blount National Bank of Maryville, Maryville, Tennessee ("Maryville Bank"), a subsidiary of Applicant, as trustee for the Blount National Bank Retirement Plan ("Plan"). The Plan covers certain employees of Bank, as well as Applicant and its other subsidiary banks. Company acts as reinsurer of credit life and credit accident and health insurance sold by Applicant's subsidiary banks in connection with extensions of credit. In December 1978 the Plan was dissolved and the shares of Company constituted a surplus asset of the Plan which were eligible for distribution to Maryville Bank. Under national bank laws, however, Maryville Bank was not permitted to hold such shares, and they were transferred to Applicant's counsel to be held in trust for Applicant pending action on this application.

Inasmuch as Company was formed de novo, the Board concludes that Applicant's acquisition of Company did not have any adverse effects on either existing or potential competition in any relevant area, and that Applicant's retention of Company likewise would not have any adverse competitive effects. However, the Board regards Applicant's indirect formation and acquisition of Company in 1972 as a violation of the prohibitions of section 4(a) of the Act against nonbank acquisitions.<sup>2</sup> Similarly, the transfer in 1978 of the shares of Company to a trustee to be held for the benefit of Applicant represented a continuation of Applicant's violation of section 4. While the Board regards this violation of the Act as a serious matter, Applicant maintains that its actions with respect to Company were taken on advice of counsel and did not represent an intention of Applicant to violate the provisions of the Act. From the record, it does not appear that Applicant has otherwise violated the Act, or that the acquisition of Company is indicative of a pattern of disregard by Applicant of its obligations under the provisions of the Act. In addition, Applicant has committed to undertake an affirmative program of compliance with the Act, including the designation as a corporate official as Applicant's compliance officer to oversee the program. Moreover, Applicant has committed to make restitution of the amount of net income earned by Company since its formation in 1972 that was in excess of the amount Company would have earned if it had been charging reduced insurance premiums in accordance with the Board's policy on bank holding companies engaging in insurance underwriting. Accordingly, based on its review of the entire

2. Section 2(g)(2)(C) of the Act provides that shares controlled by trustees for the benefit of employees of a company are deemed to be controlled by the company. Thus, under section 2(g) of the Act, the shares of Company acquired and held by the Plan since 1972 are deemed to be controlled by Applicant.

1. All banking data are as of December 31, 1979.

record in this matter, the Board does not believe that denial of this application is warranted.

Credit life and credit accident and health insurance is generally made available by banks and other lenders and is designed to assure repayment of a loan in the event of death or disability of the borrower. In connection with its addition of the underwriting of such insurance to the list of permissible activities for bank holding companies, the Board stated that it will only approve applications to engage in such activities where an applicant demonstrates that approval will benefit the consumer or result in other public benefits, and that normally, such a showing would be made by a projected reduction in rates or increase in policy benefits.<sup>3</sup> Applicant has stated that following approval of this application, Company will offer at reduced premiums, the several types of credit insurance policies that it underwrites. In particular, Company will offer credit life insurance and credit disability insurance at premiums of 6.7 and 5 percent, respectively, below those currently being charged. Applicant has also committed to the Board that it will reduce its rates further in order to maintain on a continuous basis these rate reductions if state rates should be reduced.

On the basis of these and other facts of record, the Board concludes that the benefits to the public that will result from Applicant's retention of Company outweigh any adverse effects that may have resulted from the affiliation. Moreover, it is the Board's view that approval of Applicant's retention of Company can reasonably be expected to produce benefits to the public that would outweigh possible adverse effects. Further, there is no evidence in the record indicating that approval of the application would result in any undue concentration of resources, conflicts of interest, unsound banking practices, or other effects that would be adverse to the public interest.

Based upon the foregoing and other considerations reflected in the record, including the commitments made by Applicant upon which the approval of the application is based, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective June 9, 1980.

Voting for this action: Chairman Volcker and Governors Partee, Teeters, Rice, and Gramley. Present and abstaining: Governors Schultz and Wallich.

(Signed) GRIFFITH L. GARWOOD,

### *Orders Under Section 2 of Bank Holding Company Act*

**Dewco Agency Company,  
Timber Lake, South Dakota**

#### *Order Granting Determination Under the Bank Holding Company Act*

Dewco Agency Company ("Dewco"), Timber Lake, South Dakota, a bank holding company within the meaning of the Bank Holding Company Act of 1956 (12 U.S.C. § 1841 et seq.) (the "Act"), has requested a determination under section 2(g)(3) of the Act (12 U.S.C. § 1841(g)(3)) that Dewco is not in fact capable of controlling Ziebach County Abstract Co., Inc. ("Ziebach"), Dupree, South Dakota, although Ziebach is indebted to Dewco as a result of Ziebach's installment purchase of all the assets of Dewey County Title Company ("Company").

Under the provisions of section 2(g)(3) of the Act, shares transferred after January 1, 1966, by any bank holding company to a transferee that is indebted to the transferor are deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not in fact capable of controlling the transferee.<sup>1</sup> No request for a hearing was made by Dewco. Instead, Dewco has submitted evidence to the Board to support its contention that it is not in fact capable of controlling Ziebach, and the Board has received no contradictory evidence.

On the basis of the facts of record, it is hereby determined that Dewco is not in fact capable of controlling Ziebach. It appears that the sale of Company's assets by Dewco was effected through arm's-length negotiations. Moreover, Dewco has indicated that all business between Dewco or Bank and Ziebach will be conducted on a nonpreferential basis. In addition, there are no employee, officer, or director interlocks be-

1. For purposes of section 2(g)(3) the Board deems the transfer of all or substantially all the assets of a company or the disposition of a separate activity of a company to involve a transfer of shares. 12 C.F.R. § 225.139(c)(3).

3. 12 C.F.R. § 225.4(a)(10), note 7.

tween Ziebach and Dewco or its subsidiary bank. Furthermore, because of the structure of the transaction, there is no significant likelihood that Dewco may reacquire Company in the future. Finally, Dewco has undertaken that it will not attempt to exercise control over Ziebach, and Ziebach has committed that it will set policy and direct operations of Company independently.

Accordingly, it is ordered that the request of Dewco for a determination pursuant to section 2(g)(3) is granted. This determination is based on representations made to the Board by Dewco and Ziebach. In the event that the Board should hereafter determine that facts material to this determination are otherwise than as represented, or that Dewco or Ziebach has failed to disclose to the Board other material facts, this determination may be revoked, and any change in the facts and circumstances relied upon by the Board in making this determination could result in the Board reconsidering the determination made herein.

By order of the Board of Governors, acting through its General Counsel, pursuant to delegated authority (12 C.F.R. § 265.2(b)(1)), effective June 20, 1980.

(Signed) GRIFFITH L. GARWOOD,  
Deputy Secretary of the Board.

[SEAL]

Pan American Bancshares, Inc.,  
Miami, Florida

*Order Granting Determination Under the Bank  
Holding Company Act*

Pan American Bancshares, Inc. ("Pan American"), Miami, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has requested a determination under section 2(g)(3) of the Act (12 U.S.C. § 1841(g)(3)), that it is not in fact capable of controlling Atico Financial Corporation ("Atico"), Miami, Florida, notwithstanding the fact that Mr. Joseph Weintraub, Pan American's chairman, is also chairman of Atico, and that Pan American is guarantor of certain debts of Atico.

Under section 2(g)(3) of the Act, shares transferred after January 1, 1966, by any bank holding company to a transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor are deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for a hearing, determines that the transferor is not in fact capable of controlling the transferee. It is hereby determined that Pan American is not in fact capable of controlling Atico. This determination is based

upon the evidence of record in this matter, including the following facts.

Pan American divested its interest in Atico by a pro rata distribution of Atico's shares to Pan American's shareholders. At the date of the transfer, Mr. Weintraub, the founder of Pan American and Atico, owned 18.8 percent of Pan American's voting shares, and upon consummation of the distribution, he received 21.4 percent of Atico's voting shares. The total number of shares owned by officers and directors of Pan American, including Mr. Weintraub, slightly is in excess 25 percent of Atico's shares. Prior to the distribution, twelve individuals served as common officers or directors of Pan American and Atico. Upon consummation of the transfer, however, only Mr. Weintraub remained as a management official of both Pan American and Atico. The presumption of control in section 2(g)(3) arises because the Board has interpreted the presumption to apply when a transferee, such as Mr. Weintraub, is an officer, director, or trustee of the transferor (12 C.F.R. § 225.139(c)(2)). In view of Pan American's commitment that this final interlock will be retained only for a short period to ensure an orderly transition of management of Atico, it does not appear that the retention of this interlock is intended as a means for perpetuating Pan American's control over Atico.

While Atico was its subsidiary, Pan American had issued certain long and short term debt obligations of Atico, and Atico is indebted to Pan American. Based on the facts of record, it appears that Atico has sufficient resources to honor its debt obligations without requiring Pan American to fulfill its obligation as guarantor, and there is no evidence in the record to indicate that Atico will not repay these debts in accordance with their terms.

Finally, Pan American's board of directors has adopted a resolution that it does not, and will not attempt to, exercise control, either directly or indirectly, over Atico or any of its affiliates. Similarly, Atico's board of directors has adopted a resolution that it is not, and will not be, controlled by Pan American. In addition, Mr. Weintraub has filed an affidavit to the effect that he will not represent the interests of Pan American in his management of voting his shares of Atico.

Based on these and other facts of record, it is hereby determined that Pan American is not, in fact, capable of controlling Atico, and that the request of Pan American for a determination pursuant to section 2(g)(3) be and hereby is granted. This determination is also based on certain representations and commitments made to the Board by Pan American, Atico, and Mr. Weintraub. In the event the Board should hereafter determine that facts material to this determination are otherwise than as represented, or that the parties have

failed to disclose any material facts or to fulfill any commitments and representations, this determination may be revoked or reconsidered.

By order of the Board of Governors, acting through its General Counsel pursuant to delegated authority (12 C.F.R. § 265.2(b)(1)), effective June 17, 1980.

(Signed) CATHY L. PETRYSHYN,  
Assistant Secretary of the Board.

First Pyramid Life Insurance Company,  
Little Rock, Arkansas

*Prior Certification Pursuant to the Bank Holding Company Tax Act of 1976*

[Docket No. TCR 76-179]

First Pyramid Life Insurance Company (First) Little Rock, Arkansas, has requested a prior certification pursuant to section 1101(b)(1) of the Internal Revenue Code ("Code") as amended by section 2(a) of the Bank Holding Company Tax Act of 1976 ("Tax Act") that its proposed divestiture of certain shares of a corporation ("New Corporation") to be formed to acquire City National Bank of Fort Smith ("Bank") Fort Smith, Arkansas, is necessary or appropriate to effectuate the policies of the Bank Holding Company Act (12 U.S.C. § 1841 et seq) ("BHC Act").<sup>1</sup> First proposes to exchange the 204,786 shares of Bank it presently owns for 225,264 shares of New Corporation, and immediately after the exchange, to distribute pro rata to the holders of common stock of First, those shares of New Corporation held by it that are received in exchange for shares by Bank held by First that could be distributed without recognition of gain under section 1101(b) of the Code.<sup>2</sup>

1. On January 24, 1980, the Board issued a prior certification pursuant to the Tax Act relating to the proposed divestiture by First of shares of New Corporation received in a transaction under section 1101(c)(3) of the Code. This certification relates to a proposal by First to acquire the shares of New Corporation under a different section of the Code, and in turn to distribute them under section 1101(b) of the Code. Accordingly, inasmuch as the facts of the transaction are other than as described in the previous certification, the Board's certification of January 24, 1980, is hereby revoked.

2. Under subsection (c) of section 1101 of the Code, property acquired after July 7, 1970, generally does not qualify for the tax benefits of section 1101(b) when distributed by an otherwise qualified bank holding company. However, where such property is acquired by a qualified bank holding company in a transaction in which gain is not recognized under section 368(a)(1)(A) of the Code, then section

In connection with this request, the following information is deemed relevant, for purposes of issuing the requested certification.<sup>3</sup>

1. First is a corporation organized under the laws of Arkansas on November 5, 1928. On July 24, 1953, First acquired ownership and control of 28,550 shares, representing 95.2 percent of the outstanding voting shares, of Bank. On July 7, 1970, First held 63,407 of the outstanding voting shares of Bank. Between July 7, 1970 and the present, First has acquired an additional 225,876 shares of Bank in various transactions and has sold 84,497 shares.<sup>4</sup>

2. First became a bank holding company on December 31, 1970, as a result of the 1970 Amendments to the BHC Act, by virtue of its ownership and control at that time of more than 25 percent of the outstanding voting shares of Bank, and it registered as such with the Board on August 15, 1971. First would have been a bank holding company on July 7, 1970, if the BHC Act amendments of 1970 had been in effect on that date by virtue of its ownership and control on that date of more than 25 percent of the outstanding voting shares of Bank. First presently owns and controls 204,876 shares, representing 34.1 percent of the outstanding voting shares, of Bank.

3. First holds property acquired by it on or before July 7, 1970, the disposition of which, but for the proviso of section 4(a)(2) of the BHC Act, would be necessary or appropriate to effectuate section 4 of the BHC Act if First were to continue to be a bank holding company beyond December 31, 1980, and

1101(b) is applicable. With respect to the shares of New Corporation to be received in exchange for the 181,755 shares of Bank that would be eligible to be distributed without recognition of gain under section 1101(b) (see note 4), First has indicated that these shares will be acquired in a transaction described in section 368(a)(1)(A) of the Code in which gain would not be recognized. Accordingly, even though such shares of New Corporation would be acquired after July 7, 1970, those shares that are substituted for the 181,755 shares of Bank that would be eligible for the benefits provided in section 1101(b) would nevertheless qualify as property eligible for the tax benefits provided in section 1101(b) of the Code, by virtue of section 1101(c)(1)(D), if those shares of New Corporation are in fact received in a transaction in which gain is not recognized under section 368(a)(1)(A) of the Code.

3. This information derives from First's correspondence with the Board concerning its request for this certification, First's Registration Statement filed with the Board pursuant to the BHC Act, and other records of the Board.

4. As discussed in note 2, under section 1101(c) of the Code, property acquired after July 7, 1970, generally does not qualify for the tax benefits of section 1101(b) when distributed by an otherwise qualified bank holding company. However, where such property was acquired by a qualified bank holding company in a transaction in which gain was not recognized under section 305(a) of the Code, then section 1101(b) is applicable. First has stated that 201,846 of the shares of Bank it has received since July 7, 1970, were received in transactions in which gain was not recognized under section 305(a) of the Code. Accordingly, even though shares of Bank were acquired after July 7, 1970, 118,348 of these shares would be eligible for the benefits provided in section 1101(b), by virtue of section 1101(c)(1)(A), if those shares of Bank were in fact received in a transaction in which gain was not recognized under section 305(a).

which property, but for such proviso, would be "prohibited property" within the meaning of section 1103(c) of the Code. Section 1103(g) of the Code provides that any bank holding company may elect, for the purposes of part VIII of subchapter O of Chapter 1 of the Code, to have the determination of whether property is "prohibited property" or is property eligible to be distributed without recognition of gain under section 1101(b)(1) of the Code, made under the BHC Act as if the Act did not contain the proviso of section 4(a)(2). First has represented that it will make such an election prior to the consummation of the proposed divestiture.<sup>5</sup>

4. First has committed to the Board that no officer, director, or employee with policy-making functions of First or any of its subsidiaries (including honorary or advisory directors) will hold any such position with New Corporation or any of its subsidiaries. First has further committed that all such interlocking relationships that now exist between First and Bank will be terminated.

On the basis of the foregoing information, it is hereby certified that:

(A) First is a qualified bank holding corporation within the meaning of subsection (b) of section 1103 of the Code, and satisfies the requirements of that subsection;

(B) the shares of New Corporation that First will receive in exchange for shares of Bank will be all or part of the property by reason of which First controls (within the meaning of section 2(a) of the BHC Act) a bank or bank holding company, and  
 (C) the distribution to the shareholders of First of the shares of New Corporation is necessary or appropriate to effectuate the policies of the BHC Act.

This certification is based upon the representations and commitments made to the Board by First and upon the facts set forth above. In the event the Board should hereafter determine that facts material to this certification are otherwise than as represented by First, or that First has failed to disclose to the Board other material facts or to fulfill any commitments made to the Board in connection herewith, it may revoke this certification.

By order of the Board of Governors acting through its General Counsel, pursuant to delegated authority (12 C.F.R. § 265.2(b)(3), effective June 13, 1980.

[SEAL] (Signed) CATHY L. PETRYSHYN,  
*Assistant Secretary of the Board.*

*ORDERS APPROVED UNDER BANK HOLDING COMPANY ACT*

*By the Board of Governors*

During June 1980 the Board of Governors approved the applications listed below. Copies are available upon request to Publications Services, Division of Support Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

Section 3

Applicant	Bank(s)	Board action (effective date)
First American Bank Corporation, Kalamazoo, Michigan	First National Bank of South Central Michigan, Quincy, Michigan	June 23, 1980
Old Canal Bankshares II, Inc., Lockport, Illinois	Old Canal Bankshares, Inc., Lockport, Illinois	June 30, 1980

5. First proposes to retain a portion of the shares of New Corporation it will receive, which shares will represent less than 5 percent of the shares of New Corporation. Section 1103(g) of the Code provides that the final certification for a bank holding company such as First that has made an election under that section must include a certification that the bank holding company has disposed of all banking property. Inasmuch as banking property means those shares by which a

company controls a bank, and section 2(a)(3) of the Bank Holding Company Act provides that a company holding less than 5 percent of the shares of a bank is presumed not to control the bank, absent other facts indicating that First would continue to control Bank, it appears that First may retain up to 5 percent of the shares of New Corporation and still meet the disposition requirements of section 1103(g).

## Sections 3 and 4

Applicant	Bank(s)	Nonbanking company (or activity)	Reserve Bank	Effective date

1. Unless otherwise noted, rates of change are calculated from average amounts outstanding in preceding month or quarter. Growth rates for member bank reserves are adjusted for discontinuities in series that result from changes in Regulations D and M.

2. Includes total reserves (member bank reserve balances in the current week plus vault cash held two weeks earlier); currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of commercial banks; and vault cash of nonmember banks.

3. M-1A: Averages of daily figures for (1) demand deposits at all commercial banks other than those due to domestic banks, the U.S. government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float; and (2) currency outside the Treasury, Federal Reserve banks, and the vaults of commercial banks.

M-1B: M-1A plus negotiable order of withdrawal and automated transfer service accounts at banks and thrift institutions, credit union share draft accounts, and demand deposits at mutual savings banks.

M-2: M-1B plus savings and small-denomination time deposits at all depository institutions, overnight repurchase agreements at commercial banks, overnight Eurodollars held by U.S. residents other than banks at Caribbean branches of member banks, and money market mutual fund shares.

M-3: M-2 plus large-denomination time deposits at all depository institutions and term RPs at commercial banks and savings and loan associations.

L: M-3 plus other liquid assets such as term Eurodollars held by U.S. residents other than banks, bankers acceptances, commercial paper, Treasury bills and other liquid Treasury securities, and U.S. savings bonds.

4. Savings deposits exclude NOW and ATS accounts at commercial banks.

5. Small-denomination time deposits are those issued in amounts of less than \$100,000.

6. Large-denomination time deposits are those issued in amounts of \$100,000 or more.

7. Savings and loan associations, mutual savings banks, and credit unions.

8. Changes calculated from figures shown in table 1.23.

9. Seven-day averages of daily effective rates (average of the rates on a given date weighted by the volume of transactions at those rates).

10. Rate for the Federal Reserve Bank of New York.

11. Quoted on a bank-discount basis.

12. Beginning Nov. 1977, unweighted average of offering rates quoted by at least five dealers. Previously, most representative rate quoted by these dealers. Before Nov. 1979, data shown are for 90- to 119-day maturity.

13. Market yields adjusted to a 20-year maturity by the U.S. Treasury.

14. Bond Buyer series for 20 issues of mixed quality.

15. Weighted averages of new publicly offered bonds rated Aaa, Aa, and A by Moody's Investors Service and adjusted to an Aaa basis. Federal Reserve compilations.

16. Average rates on new commitments for conventional first mortgages on new homes in primary markets, unweighted and rounded to nearest 5 basis points, from Dept. of Housing and Urban Development.

A4 Domestic Financial Statistics □ July 1980

1. Includes securities loaned—fully guaranteed by U.S. government securities pledged with Federal Reserve Banks—and excludes (if any) securities sold and scheduled to be bought back under matched sale-purchase transactions.

2. Includes special deposits under the credit restraint program held by money market mutual funds and other financial intermediaries, held by nonmember banks against managed liabilities, and held by any institution in conjunction with the consumer credit restraint program.

3. Includes reserves of member banks, Edge Act corporations and U.S. agencies and branches of foreign banks.

NOTE: For amounts of currency and coin held as reserves, see table 1.12

1. Adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy, effective Nov. 19, 1975, of permitting transitional relief on a graduated basis over a 24-month period when a nonmember bank merged into an existing member bank, or when a nonmember bank joins the Federal

Reserve System. For weeks for which figures are preliminary, figures by class of bank do not add to total because adjusted data by class are not available.

2. Based on closing figures.

1. Discounts or eligible paper and advances secured by such paper or by U.S. government obligations or any other obligations eligible for Federal Reserve Bank purchase.

2. Advances secured to the satisfaction of the Federal Reserve Bank. Advances secured by mortgages on 1- to 4-family residential property are made at the section 13 rate.

3. Applicable to special advances described in section 201.2(e)(2) of Regulation A.

4. Advances to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the U.S. government or any agency thereof.

5. Rates under secs. 13 and 13a (as described above). For description and earlier data, see the following publications of the Board of Governors: *Banking and Monetary Statistics, 1914-1941 and 1941-1970*; *Annual Statistical Digest, 1971-1975, 1972-1976, 1973-1977, and 1974-1978*.

Borrowings from foreign banks .....	0		22	

1. For changes in reserve requirements beginning 1963, see Board's *Annual Statistical Digest, 1971-1975* and for prior changes, see Board's *Annual Report for 1976*, table 13.

2. (a) Requirement schedules are graduated, and each deposit interval applies to that part of the deposits of each bank. Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.

(b) The Federal Reserve Act specifies different ranges of requirements for reserve city banks and for other banks. Reserve cities are designated under a criterion adopted effective Nov. 9, 1972, by which a bank having net demand deposits of more than \$400 million is considered to have the character of business of a reserve city bank. The presence of the head office of such a bank constitutes designation of that place as a reserve city. Cities in which there are Federal Reserve Banks or branches are also reserve cities. Any banks having net demand deposits of \$400 million or less are considered to have the character of business of banks outside of reserve cities and are permitted to maintain reserves at ratios set for banks not in reserve cities. For details, see the Board's Regulation D.

(c) Effective Aug. 24, 1978, the Regulation M reserve requirements on net balances due from domestic banks to their foreign branches and on deposits that foreign branches lend to U.S. residents were reduced to zero from 4 percent and 1 percent, respectively. The Regulation D reserve requirement on borrowings from unrelated banks abroad was also reduced to zero from 4 percent.

(d) Effective with the reserve computation period beginning Nov. 16, 1978, domestic deposits of Edge corporations are subject to the same reserve requirements as deposits of member banks.

3. Negotiable order of withdrawal (NOW) accounts and time deposits such as Christmas and vacation club accounts are subject to the same requirements as savings deposits.

4. The average reserve requirement on savings and other time deposits must be at least 3 percent, the minimum specified by law.

5. Effective Nov. 2, 1978, a supplementary reserve requirement of 2 percent was imposed on large time deposits of \$100,000 or more, obligations of affiliates, and ineligible acceptances.

Effective with the reserve maintenance period beginning Oct. 25, 1979, a marginal reserve requirement of 8 percent was added to managed liabilities in excess of a base amount, with the maintenance period beginning Apr. 3, 1980, the requirement was increased to 10 percent, and with the maintenance period beginning June 12, 1980, it was decreased to 5 percent. Managed liabilities are defined as large time deposits, Eurodollar borrowings, repurchase agreements against U.S. government and federal agency securities, federal funds borrowings from non-member institutions, and certain other obligations. In general, the base for the marginal reserve requirement was originally the greater of (a) \$100 million or (b) the average amount of the managed liabilities held by a member bank, Edge corporation, or family of U.S. branches and agencies of a foreign bank for the two statement weeks ending Sept. 26, 1979. For the computation period beginning Mar. 20, 1980, the base was lowered by (a) 7 percent or (b) the decrease in an institution's U.S. office gross loans to foreigners and gross balances due from foreign offices of other institutions between the base period (Sept. 13-26, 1979) and the week ending Mar. 12, 1980, whichever is greater. For the computation period beginning May 29, 1980, the base was increased by 7½ percent above the base used to calculate the marginal reserve in the statement week of May 14-21, 1980. In addition, beginning Mar. 19, 1980, the base is reduced to the extent that foreign loans and balances decline. The minimum base remains \$100 million.

NOTE. Required reserves must be held in the form of deposits with Federal Reserve banks or vault cash.

<i>Special variable ceiling rates by maturity</i>								
13 6-month money market time deposits <sup>10</sup>	(11)	(11)	(11)	(11)	(11)	(11)	(11)	(11)
14 2½ years or more	(12)	(12)	(13)	(13)	(12)	(12)	(13)	(13)

1. July 1, 1973, for mutual savings banks; July 6, 1973, for savings and loan associations.

2. For authorized states only, federally insured commercial banks, savings and loan associations, cooperative banks, and mutual savings banks in Massachusetts and New Hampshire were first permitted to offer negotiable order of withdrawal (NOW) accounts on Jan. 1, 1974. Authorization to issue NOW accounts was extended to similar institutions throughout New England on Feb. 27, 1976, and in New York State on Nov. 10, 1978, and in New Jersey on Dec. 28, 1979.

3. No separate account category.

4. For exceptions with respect to certain foreign time deposits see the FEDERAL RESERVE BULLETIN for October 1962 (p. 1279), August 1965 (p. 1084), and February 1968 (p. 167).

5. No minimum denomination. Until July 1, 1979, a minimum of \$1,000 was required for savings and loan associations, except in areas where mutual savings banks permitted lower minimum denominations. This restriction was removed for deposits maturing in less than 1 year, effective Nov. 1, 1973.

6. No minimum denomination. Until July 1, 1979, minimum denomination was \$1,000 except for deposits representing funds contributed to an Individual Retirement Account (IRA) or a Keogh (H.R. 10) plan established pursuant to the Internal Revenue Code. The \$1,000 minimum requirement was removed for such accounts in December 1975 and November 1976 respectively.

7. Between July 1, 1973, and Oct. 31, 1973, there was no ceiling for certificates maturing in 4 years or more with minimum denominations of \$1,000; however, the amount of such certificates that an institution could issue was limited to 5 percent of its total time and savings deposits. Sales in excess of that amount, as well as certificates of less than \$1,000, were limited to the 6½ percent ceiling on time deposits maturing in 2½ years or more.

Effective Nov. 1, 1973, ceilings were reimposed on certificates maturing in 4 years or more with minimum denomination of \$1,000. There is no limitation on the amount of these certificates that banks can issue.

8. Accounts subject to fixed rate ceilings. See footnote 6 for minimum denomination requirements.

9. Effective January 1, 1980, commercial banks are permitted to pay the same rate as thrifts on IRA and Keogh accounts and accounts of governmental units when such deposits are placed in the new 2½ year or more variable ceiling certificates or in 26-week money market certificates regardless of the level of the Treasury bill rate.

10. Must have a maturity of exactly 26 weeks and a minimum denomination of \$10,000, and must be nonnegotiable.

11. Commercial banks, savings and loan associations, and mutual savings banks were authorized to offer money market time deposits effective June 1, 1978. The ceiling rate for commercial banks on money market time deposits entered into before June 5, 1980, is the discount rate (auction average) on most recently issued six-month U.S. Treasury bills. Until Mar. 15, 1979, the ceiling rate for savings and loan associations and mutual savings banks was ½ percentage point higher than the rate for commercial banks. Beginning March 15, 1979, the ½ percentage-point interest differential is removed when the six-month Treasury bill rate is 9 percent or more. The full differential is in effect when the six-month bill rate is 8¾ per cent or less. Thrift institutions may pay a maximum 9 percent when the six-month bill rate is between 8¾ and 9 percent. Also effective March 15, 1979, interest compounding was prohibited on six-month money market time deposits at all offering institutions. The maximum allowable rates in June for commercial banks were as follows: June 5, 8.415; June 12, 7.750; June 19, 7.750; June 26, 7.750. The maximum allowable rates in May for thrift institutions were as follows: June 5, 8.665; June 12, 7.750; June 19, 7.750; June 26, 7.750. Effective for all six-

month money market certificates issued beginning June 5, 1980, the interest rate ceilings will be determined by the discount rate (auction average) of most recently issued six-month U.S. Treasury bills as follows:

<i>Bill rate</i>	<i>Commercial bank ceiling</i>	<i>Thrift ceiling</i>
8.75 and above	bill rate + ¾ percent	bill rate + ¾ percent
8.50 to 8.75	bill rate + ¾ percent	9.00
7.50 to 8.50	bill rate + ¾ percent	bill rate + ½ percent
7.25 to 7.50	7.75	bill rate + ½ percent
Below 7.25	7.75	7.75

The prohibition against compounding interest in these certificates continues. In addition, during the period May 29, 1980, through Nov. 1, 1980, commercial banks may renew maturing six-month money market time deposits for the same depositor at the thrift institution ceiling interest rate.

12. Effective Jan. 1, 1980, commercial banks, savings and loan associations, and mutual savings banks were authorized to offer variable-ceiling nonnegotiable time deposits with no required minimum denomination and with maturities of 2½ years or more. The maximum rate for commercial banks is ¾ percentage point below the yield on 2½ year U.S. Treasury securities; the ceiling rate for thrift institutions is ¼ percentage point higher than that for commercial banks. Effective Mar. 1, 1980, a temporary ceiling of 11¾ per cent was placed on these accounts at commercial banks; the temporary ceiling is 12 percent at savings and loan associations and mutual savings banks. Effective for all variable ceiling nonnegotiable time deposits with maturities of 2½ years or more issued beginning June 2, 1980, the ceiling rates of interest will be determined as follows:

<i>Treasury yield</i>	<i>Commercial bank ceiling</i>	<i>Thrift ceiling</i>
12.00 and above	11.75	12.00
9.50 to 12.00	Treasury yield - ¼ percent	Treasury yield
Below 9.50	9.25	9.50

Interest may be compounded on these time deposits. The ceiling rates of interest at which these accounts may be offered vary biweekly. Throughout June, the maximum allowable rate at commercial banks was 9.25, and at thrift institutions it was 9.50.

13. Between July 1, 1979, and Dec. 31, 1979, commercial banks, savings and loan associations, and mutual savings banks were authorized to offer variable ceiling accounts with no required minimum denomination and with maturities of 4 years or more. The maximum rate for commercial banks was ¼ percentage points below the yield on 4-year U.S. Treasury securities; the ceiling rate for thrift institutions was ¼ percentage point higher than that for commercial banks.

NOTE. Before Mar. 31, 1980, the maximum rates that could be paid by federally insured commercial banks, mutual savings banks, and savings and loan associations were established by the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board under the provisions of 12 CFR 217, 329, and 526, respectively. Title II of the Depository Institutions Deregulation and Monetary Control Act of 1980 (P.L. 96-221) transferred the authority of the agencies to establish maximum rates of interest payable on deposits to the Depository Institutions Deregulation Committee. The maximum rates on time deposits in denominations of \$100,000 or more with maturities of 30-89 days were suspended in June 1970; such deposits maturing in 90 days or more were suspended in May 1973. For information regarding previous interest rate ceilings on all types of accounts, see earlier issues of the FEDERAL RESERVE BULLETIN, the Federal Home Loan Bank Board Journal, and the Annual Report of the Federal Deposit Insurance Corporation.

## 1.17 FEDERAL RESERVE OPEN MARKET TRANSACTIONS

Millions of dollars

1. Includes securities loaned—fully guaranteed by U.S. government securities pledged with Federal Reserve Banks—and excludes (if any) securities sold and scheduled to be bought back under matched sale-purchase transactions.

2. Beginning Dec. 29, 1978, such assets are revalued monthly at market exchange rates.

3. Includes exchange-translation account reflecting, beginning Dec. 29, 1978, the monthly revaluation at market exchange rates of foreign-exchange commitments.

5 Business <sup>3</sup>	21.7	56.7	78.4	92.8	79.4	85.5	87.0	79.0
6 Others	152.3	361.0	593.7	763.4	681.0	741.4	801.6	667.5
Demand deposit turnover <sup>1</sup> (seasonally adjusted)								
7 All commercial banks	129.2	139.4	163.2	189.1	191.9	188.9	196.2	203.3
8 Major New York City banks	503.0	541.9	646.2	763.4	760.6	721.3	805.9	871.8
9 Other banks	85.9	96.8	113.2	125.8	129.1	129.8	128.3	131.6
Savings deposit turnover <sup>2</sup> (not seasonally adjusted)								
10 All customers	1.6	1.9	3.2	4.3	3.9	4.3	4.7	4.0
11 Business <sup>3</sup>	4.1	5.1	7.2	9.3	8.2	9.4	10.1	8.9
12 Others	1.5	1.7	3.0	4.0	3.6	4.0	4.5	3.8

1. Represents accounts of individuals, partnerships, and corporations, and of states and political subdivisions.

2. Excludes negotiable order of withdrawal (NOW) accounts and special club accounts, such as Christmas and vacation clubs.

3. Represents corporations and other profit-seeking organizations (excluding commercial banks but including savings and loan associations, mutual savings banks, credit unions, the Export-Import Bank, and federally sponsored lending agencies).

NOTE. Historical data—estimated for the period 1970 through June 1977, partly on the basis of the debits series for 233 SMSAs, which were available through June 1977—are available from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. Debits and turnover data for savings deposits are not available prior to July 1977.

1. Composition of the money stock measures is as follows:

M-1A: Averages of daily figures for (1) demand deposits at all commercial banks other than those due to domestic banks, the U.S. government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float; and (2) currency outside the Treasury, Federal Reserve Banks, and the vaults of commercial banks.

M-1B: M-1A plus negotiable order of withdrawal and automatic transfer service accounts at banks and thrift institutions, credit union share draft accounts, and demand deposits at mutual savings banks.

M-2: M-1B plus savings and small-denomination time deposits at all depository institutions, overnight repurchase agreements at commercial banks, overnight Eurodollars held by U.S. residents other than banks at Caribbean branches of member banks, and money market mutual fund shares.

M-3: M-2 plus large-denomination time deposits at all depository institutions and term RPs at commercial banks and savings and loan associations.

2. L: M-3 plus other liquid assets such as term Eurodollars held by U.S. residents other than banks, bankers acceptances, commercial paper, Treasury bills and other liquid Treasury securities, and U.S. savings bonds.

3. Small time deposits are those issued in amounts of less than \$100,000.

4. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. government, money market mutual funds, and foreign banks and official institutions.

5. Includes ATS and NOW balances at all institutions, credit union share draft balances, and demand deposits at mutual savings banks.

6. Overnight (and continuing contract) RPs are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

NOTE: Latest monthly and weekly figures are available from the Board's H.6(S08) release. Back data are available from the Banking Section, Division of Research and Statistics.

1. Member bank reserve series reflect actual reserves requirement percentages with no adjustment to eliminate the effect of changes in Regulations D and M. Effective Nov. 2, 1978, a supplementary reserve requirement of 2 percentage points was imposed on time deposits of \$100,000 or more. This action increased required reserves approximately \$3.0 billion in the week beginning Nov. 16, 1978. Effective Oct. 11, 1979, an 8 percentage point marginal reserve requirement was imposed on "managed liabilities" (liabilities that have been actively used to finance rapid expansion in bank credit). On Oct. 25, 1979, reserves of Edge Act corporations were included in member bank reserves. This action raised required reserves \$318 million. Effective Mar. 12, 1980, the marginal reserve requirement of 8 percentage points was raised to 10 percentage points. In addition the base upon which the marginal reserve requirement is calculated was reduced. This action increased required reserves about \$1,693 million in the week ending April 2, 1980.

2. Includes total reserves (member bank reserve balances in the current week plus vault cash held two weeks earlier); currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of commercial banks; and vault cash of nonmember banks.

3. Includes total time and savings deposits and net demand deposits as defined by Regulation D. Private demand deposits include all demand deposits except those due to the U.S. government, less cash items in process of collection and demand balances due from domestic commercial banks.

NOTE. Latest monthly and weekly figures are available from the Board's H.3(502) release. Back data and estimates of the impact on required reserves and changes in reserve requirements are available from the Banking Section, Division of Research and Statistics.

23 Loans to commercial banks in the United States	54.1	57.3	77.8	83.7	92.4	56.9	60.3	81.9	86.8	88.2

1. Includes domestic chartered banks, U.S. branches, agencies, and New York investment company subsidiaries of foreign banks; and Edge Act corporations.

2. Excludes loans to commercial banks in the United States.

3. As of Dec. 31, 1978, total loans and securities were reduced by \$0.1 billion. "Other securities" were increased by \$1.5 billion and total loans were reduced by \$1.6 billion largely as the result of reclassifications of certain tax-exempt obligations. Most of the loan reduction was in "all other loans."

4. As of Jan. 3, 1979, as the result of reclassifications, total loans and securities and total loans were increased by \$0.6 billion. Business loans were increased by \$0.4 billion and real estate loans by \$0.5 billion. Nonbank financial loans were reduced by \$0.3 billion.

5. As of Dec. 31, 1977, as the result of loan reclassifications, business loans were reduced by \$0.2 billion and nonbank financial loans by \$0.1 billion; real estate loans were increased by \$0.3 billion.

6. As of Dec. 31, 1978, commercial and industrial loans were reduced \$0.1 billion as a result of reclassifications.

7. As of Dec. 1, 1978, nonbank financial loans were reduced \$0.1 billion as the result of reclassification.

8. As of Dec. 1, 1979, loans sold to affiliates were reduced \$800 million and commercial and industrial loans sold were reduced \$700 million due to corrections of two banks in New York City.

9. Loans sold are those sold outright to a bank's own foreign branches, non-consolidated nonbank affiliates of the bank, the bank's holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company.

10. As of Dec. 31, 1978, commercial and industrial loans sold outright were increased \$0.7 billion as the result of reclassifications, but \$0.1 billion of this amount was offset by a balance sheet reduction of \$0.1 billion as noted above.

11. United States includes the 50 states and the District of Columbia.

NOTE: Data are prorated averages of Wednesday data for domestic chartered banks, and averages of current and previous month-end data for foreign-related institutions.

1. Domestically chartered commercial banks include all commercial banks in the United States except branches of foreign banks; included are member and non-member banks, stock savings banks, and nondeposit trust companies.  
2. Commercial banking institutions include domestically chartered commercial banks, branches and agencies of foreign banks, Edge Act and Agreement corporations, and New York state foreign investment corporations.

NOTE. Figures are partly estimated. They include all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries. Data for domestically chartered commercial banks are for the last Wednesday of the month; data for other banking institutions are for last Wednesday except at end of quarter, when they are for the last day of the month.

1. Member banks exclude and nonmember banks include 13 noninsured trust companies that are members of the Federal Reserve System.

2. Demand deposits adjusted are demand deposits other than domestic commercial interbank and U.S. government, less cash items reported as in process of collection.

NOTE: Data include consolidated reports, including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries. Securities are reported on a gross basis before deductions of valuation reserves. Back data in lesser detail were shown in previous issues of the BULLETIN.

1. Exclusive of loans and federal funds transactions with domestic commercial banks.

2. All demand deposits except U.S. government and domestic banks less cash items in process of collection.

3. Loans sold are those sold outright to a bank's own foreign branches, non-consolidated nonbank affiliates of the bank, the bank's holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company.

4. Excludes trading account securities.

## NOTES TO TABLE 1.311.

1. Commercial banks are those in the 50 states and the District of Columbia with national or state charters plus U.S. branches, agencies, and New York investment company subsidiaries of foreign banks and Edge Act corporations.

2. Includes seasonally adjusted federal funds, RPs, and other borrowings from nonbanks and not seasonally adjusted net Eurodollars and loans to affiliates. Includes averages of Wednesday data for domestic chartered banks and averages of current and previous month-end data for foreign-related institutions.

3. Other borrowings are borrowings on any instrument, such as a promissory note or due bill, given for the purpose of borrowing money for the banking business. This includes borrowings from Federal Reserve Banks and from foreign banks, term federal funds, overdrawn due from bank balances, loan RPs, and participations in pooled loans. Includes averages of daily figures for member banks and averages of current and previous month-end data for foreign-related institutions.

4. Loans initially booked by the bank and later sold to affiliates that are still held by affiliates. Averages of Wednesday data.

5. As of Dec. 1, 1979, loans sold to affiliates were reduced \$800 million due to corrections of two New York City banks.

6. Includes averages of daily figures for member banks and quarterly call report figures for nonmember banks.

7. Includes averages of current and previous month-end data until August 1979; beginning September 1979 averages of daily data.

8. Based on daily average data reported by 122 large banks beginning February 1980 and 46 banks before February 1980.

9. Includes U.S. Treasury demand deposits and Treasury tax-and-loan notes at commercial banks. Averages of daily data.

10. U.S. Treasury demand balances and time deposits in denomination of \$100,000 or more have been benchmarked to the June and December 1979 call reports.

11. Averages of Wednesday figures.

12 Other	6.6	7.1	7.4	7.5	7.5	6.7	6.6	7.4	7.8	7.2

1. Figures include cash items in process of collection. Estimates of gross deposits are based on reports supplied by a sample of commercial banks. Types of depositors in each category are described in the June 1971 BULLETIN, p. 466.

2. Beginning with the March 1979 survey, the demand deposit ownership survey sample was reduced to 232 banks from 349 banks, and the estimation procedure was modified slightly. To aid in comparing estimates based on the old and new reporting sample, the following estimates in billions of dollars for December 1978 have been constructed using the new smaller sample: financial business, 27.0; nonfinancial business, 146.9; consumer, 98.3; foreign, 2.8; and other, 15.1.

3. After the end of 1978 the large weekly reporting bank panel was changed to 170 large commercial banks, each of which had total assets in domestic offices exceeding \$750 million as of Dec. 31, 1977. See "Announcements," p. 408 in the May 1978 BULLETIN. Beginning in March 1979, demand deposit ownership estimates for these large banks are constructed quarterly on the basis of 97 sample banks and are not comparable with earlier data. The following estimates in billions of dollars for December 1978 have been constructed for the new large-bank panel: financial business, 18.2; nonfinancial business, 67.2; consumer, 32.8; foreign, 2.5; other, 6.8.

1. Weekly figures are seven-day averages of daily effective rates for the week ending Wednesday; the daily effective rate is an average of the rates on a given day weighted by the volume of transactions at these rates.  
 2. Beginning November 1977, unweighted average of offering rates quoted by at least five dealers (in the case of commercial paper), or finance companies (in the case of finance paper). Previously, most representative rate quoted by those dealers and finance companies. Before November 1979, maturities for data shown are 30-59 days, 90-119 days, and 120-179 days for commercial paper; and 30-59 days, 90-119 days, and 150-179 days for finance paper.  
 3. Yields are quoted on a bank-discount basis.  
 4. Average of the midpoint of the range of daily dealer closing rates offered for domestic issues.  
 5. Five-day average of rates quoted by five dealers (three-month series was previously a seven-day average).  
 6. Averages of daily quotations for the week ending Wednesday.  
 7. Except for auction averages, yields are computed from daily closing bid prices.  
 8. Rates are recorded in the week in which bills are issued.  
 9. Yield on the more actively traded issues adjusted to constant maturities by the U.S. Treasury, based on daily closing bid prices.  
 10. Each monthly figure is an average of only five business days near the end of the month. The rate for each month was used to determine the maximum interest rate payable in the following month on small saver certificates, until June

2. 1980. Each weekly figure shown is calculated on a biweekly basis and is the average of five business days ending on the Monday following the calendar week. Beginning June 2, the biweekly rate is used to determine the maximum interest rate payable in the following two-week period on small saver certificates. (See table 1.16.)  
 11. Unweighted averages for all outstanding notes and bonds in maturity ranges shown, based on daily closing bid prices. "Long-term" includes all bonds neither due nor callable in less than 10 years, including several very low yielding "flower" bonds.  
 12. The three- to five-year series has been discontinued.  
 13. General obligations only, based on figures for Thursday, from Moody's Investors Service.  
 14. Twenty issues of mixed quality.  
 15. Averages of daily figures from Moody's Investors Service.  
 16. Compilation of the Board of Governors of the Federal Reserve System. Issues included are long-term (20 years or more). New-issue yields are based on quotations on date of offering; those on recently offered issues (included only for first 4 weeks after termination of underwriter price restrictions), on Friday close-of-business quotations.  
 17. Standard and Poor's corporate series. Preferred stock ratio based on a sample of ten issues: four public utilities, four industrials, one financial, and one transportation. Common stock ratios on the 500 stocks in the price index.

28 Convertible bonds	50	60	50	50	50	50				
29 Short sales	70	80	65	55	65	50				

1. Effective July 1976, includes a new financial group, banks and insurance companies. With this change the index includes 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40 financial.

2. Margin credit includes all credit extended to purchase or carry stocks or related equity instruments and secured at least in part by stock. Credit extended is end-of-month data for member firms of the New York Stock Exchange.

In addition to assigning a current loan value to margin stock generally, Regulations T and U permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.

3. A distribution of this total by equity class is shown on lines 17-22.

4. Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

5. Each customer's equity in his collateral (market value of collateral less net debit balance) is expressed as a percentage of current collateral values.

6. Balances that may be used by customers as the margin deposit required for additional purchases. Balances may arise as transfers based on loan values of other collateral in the customer's margin account or deposits of cash (usually sales proceeds) occur.

7. Regulations G, T, and U of the Federal Reserve Board of Governors, prescribed in accordance with the Securities Exchange Act of 1934, limit the amount of credit to purchase and carry margin stocks that may be extended on securities as collateral by prescribing a maximum loan value, which is a specified percentage of the market value of the collateral at the time the credit is extended. Margin requirements are the difference between the market value (100 percent) and the maximum loan value. The term "margin stocks" is defined in the corresponding regulation.

1. Effective June 1978, earned income credit payments in excess of an individual's tax liability, formerly treated as income tax refunds, are classified as outlays retroactive to January 1976.

2. Half-year figures are calculated as a residual (total surplus/deficit less trust fund surplus/deficit).

3. Includes Pension Benefit Guaranty Corporation; Postal Service Fund; Rural Electrification and Telephone Revolving Fund; and Rural Telephone Bank.

4. Includes U.S. Treasury operating cash accounts; special drawing rights; gold tranche drawing rights; loans to International Monetary Fund; and other cash and monetary assets.

5. Includes accrued interest payable to the public; deposit funds; miscellaneous liability (including checks outstanding) and asset accounts; seignorage; increment on gold; net gain/loss for U.S. currency valuation adjustment; net gain/loss for IMF valuation adjustment; and profit on the sale of gold.

SOURCE: "Monthly Treasury Statement of Receipts and Outlays of the U.S. Government," *Treasury Bulletin*, and the *Budget of the United States Government, Fiscal Year 1981*.

## NOTES TO TABLE 1.38

1. Holdings of stock of the Federal Home Loan Banks are included in "other assets."

2. Includes net undistributed income, which is accrued by most, but not all, associations.

3. Excludes figures for loans in process, which are shown as a liability.

4. The NAMSBA reports that, effective April 1979, balance sheet data are not strictly comparable with previous months. Beginning April 1979, data are reported on a net-of-valuation-reserves basis. Prior to that date, data were reported on a gross-of-valuation-reserves basis.

5. Beginning April 1979, includes obligations of U.S. government agencies. Before that date, this item was included in "Corporate and other."

6. Includes securities of foreign governments and international organizations and, prior to April 1979, nonguaranteed issues of U.S. government agencies.

7. Excludes checking, club, and school accounts.

8. Commitments outstanding (including loans in process) of banks in New York State as reported to the Savings Banks Association of the state of New York.

9. Direct and guaranteed obligations. Excludes federal agency issues not guaranteed, which are shown in the table under "Business" securities.

10. Issues of foreign governments and their subdivisions and bonds of the International Bank for Reconstruction and Development.

NOTE. *Savings and loan associations*: Estimates by the FHLBB for all associations in the United States. Data are based on monthly reports of federally insured associations and annual reports of other associations. Even when revised, data for current and preceding year are subject to further revision.

*Mutual savings banks*: Estimates of National Association of Mutual Savings Banks for all savings banks in the United States.

*Life insurance companies*: Estimates of the American Council of Life Insurance for all life insurance companies in the United States. Annual figures are annual-statement asset values, with bonds carried on an amortized basis and stocks at year-end market value. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately but are included, in total, in "other assets."

*Credit unions*: Estimates by the National Credit Union Administration for a group of federal and state-chartered credit unions that account for about 30 percent of credit union assets. Figures are preliminary and revised annually to incorporate recent benchmark data.

1. Effective June 1978, earned income credit payments in excess of an individual's tax liability, formerly treated as income tax refunds, are classified as outlays retroactive to January 1976.

2. Old-age, disability, and hospital insurance, and railroad retirement accounts.

3. Old-age, disability, and hospital insurance.

4. Supplementary medical insurance premiums, federal employee retirement contributions, and Civil Service retirement and disability fund.

5. Deposits of earnings by Federal Reserve Banks and other miscellaneous receipts.

6. Effective September 1976, "Interest" and "Undistributed offsetting receipts" reflect the accounting conversion for the interest on special issues for U.S. government accounts from an accrual basis to a cash basis.

7. Consists of interest received by trust funds, rents and royalties on the Outer Continental Shelf, and U.S. government contributions for employee retirement.

1. Includes (not shown separately): Securities issued to the Rural Electrification Administration, depository bonds, retirement plan bonds, and individual retirement bonds.

2. These nonmarketable bonds, also known as Investment Series B Bonds, may be exchanged (or converted) at the owner's option for 1½ percent, 5-year marketable Treasury notes. Convertible bonds that have been so exchanged are removed from this category and recorded in the notes category (line 5).

3. Nonmarketable dollar-denominated and foreign currency-denominated series held by foreigners.

4. Held almost entirely by U.S. government agencies and trust funds.

5. Data for Federal Reserve Banks and U.S. government agencies and trust funds are actual holdings; data for other groups are Treasury estimates.

6. Consists of the investments of foreign balances and international accounts in the United States. Beginning with July 1974, the figures exclude non-interest-bearing notes issued to the International Monetary Fund.

7. Includes savings and loan associations, nonprofit institutions, corporate pension trust funds, dealers and brokers, certain government deposit accounts, and government sponsored agencies.

NOTE: Gross public debt excludes guaranteed agency securities and, beginning in July 1974, includes Federal Financing Bank security issues.

Data by type of security from *Monthly Statement of the Public Debt of the United States* (U.S. Treasury Department); data by holder from *Treasury Bulletin*.

NOTE: Direct public issues only. Based on Treasury Survey of Ownership from *Treasury Bulletin* (U.S. Treasury Department).

Data complete for U.S. government agencies and trust funds and Federal Reserve Banks, but data for other groups include only holdings of those institutions that report. The following figures show, for each category, the number and proportion reporting as of Apr. 30, 1980: (1) 5,368 commercial banks,

460 mutual savings banks, and 723 insurance companies, each about 80 percent; (2) 416 nonfinancial corporations and 481 savings and loan associations, each about 50 percent; and (3) 492 state and local governments, about 40 percent.

"All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

1. Includes, among others, all other dealers and brokers in commodities and securities, foreign banking agencies, and the Federal Reserve System.

NOTE. Averages for transactions are based on number of trading days in the period.

Transactions are market purchases and sales of U.S. government securities dealers reporting to the Federal Reserve Bank of New York. The figures exclude allotments of, and exchanges for, new U.S. government securities, redemptions of called or matured securities, or purchases or sales of securities under repurchase, reverse repurchase (resale), or similar contracts.

1. Net amounts (in terms of par values) of securities owned by nonbank dealer firms and dealer departments of commercial banks on a commitment, that is, trade-date basis, including any such securities that have been sold under agreements to repurchase. The maturities of some repurchase agreements are sufficiently long, however, to suggest that the securities involved are not available for trading purposes. Securities owned, and hence dealer positions, do not include securities purchased under agreement to resell.

2. Total amounts outstanding of funds borrowed by nonbank dealer firms and dealer departments of commercial banks against U.S. government and federal

agency securities (through both collateral loans and sales under agreements to repurchase), plus internal funds used by bank dealer departments to finance positions in such securities. Borrowings against securities held under agreement to resell are excluded when the borrowing contract and the agreement to resell are equal in amount and maturity, that is, a matched agreement.

3. All business corporations except commercial banks and insurance companies.

NOTE. Averages for positions are based on number of trading days in the period; those for financing, on the number of calendar days in the period.

28 Other	4,966	6,782	6,951	9,546	9,696	10,015	10,106	11,059	11,281

1. In September 1977 the Farm Credit Banks issued their first consolidated bonds, and in January 1979 they began issuing these bonds on a regular basis to replace the financing activities of the Federal Land Banks, the Federal Intermediate Credit Banks, and the Banks for Cooperatives. Line 17 represents those consolidated bonds outstanding, as well as any discount notes that have been issued. Lines 1 and 10 reflect the addition of this item.

2. Consists of mortgages assumed by the Defense Department between 1957 and 1963 under family housing and homeowners assistance programs.

3. Includes participation certificates reclassified as debt beginning Oct. 1, 1976.

4. Off-budget Aug. 17, 1974, through Sept. 30, 1976; on-budget thereafter.

5. Consists of debentures issued in payment of Federal Housing Administration insurance claims. Once issued, these securities may be sold privately on the securities market.

6. Certificates of participation issued prior to fiscal 1969 by the Government National Mortgage Association acting as trustee for the Farmers Home Administration; Department of Health, Education, and Welfare; Department

of Housing and Urban Development; Small Business Administration; and the Veterans Administration.

7. Off-budget.

8. Unlike other federally sponsored agencies, the Student Loan Marketing Association may borrow from the Federal Financing Bank (FFB) since its obligations are guaranteed by the Department of Health, Education, and Welfare.

9. The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other federal agencies. Since FFB incurs debt solely for the purpose of lending to other agencies, its debt is not included in the main portion of the table in order to avoid double counting.

10. Includes FFB purchases of agency assets and guaranteed loans; the latter contain loans guaranteed by numerous agencies with the guarantees of any particular agency being generally small. The Farmers Home Administration item consists exclusively of agency assets, while the Rural Electrification Administration entry contains both agency assets and guaranteed loans.

1. Excluding money market funds.

2. Includes reinvestment of investment income dividends. Excludes reinvestment of capital gains distributions and share issue of conversions from one fund to another in the same group.

3. Excludes share redemption resulting from conversions from one fund to another in the same group.

4. Market value at end of period, less current liabilities.

5. Also includes all U.S. government securities and other short-term debt securities.

NOTE. Investment Company Institute data based on reports of members, which comprise substantially all open-end investment companies registered with the Securities and Exchange Commission. Data reflect newly formed companies after their initial offering of securities.

1. Weighted averages based on sample surveys of mortgages originated by major institutional lender groups. Compiled by the Federal Home Loan Bank Board in cooperation with the Federal Deposit Insurance Corporation.

2. Includes all fees, commissions, discounts, and "points" paid (by the borrower or the seller) in order to obtain a loan.

3. Average effective interest rates on loans closed, assuming prepayment at the end of 10 years.

4. Average contract rates on new commitments for conventional first mortgages, rounded to the nearest 5 basis points; from Department of Housing and Urban Development.

5. Average gross yields on 30-year, minimum-downpayment, Federal Housing Administration-insured first mortgages for immediate delivery in the private secondary market. Any gaps in data are due to periods of adjustment to changes in maximum permissible contract rates.

6. Average net yields to investors on Government National Mortgage Association guaranteed, mortgage-backed, fully modified pass-through

securities, assuming prepayment in 12 years on pools of 30-year FHA/VA mortgages carrying the prevailing ceiling rate. Monthly figures are unweighted averages of Monday quotations for the month.

7. Average gross yields (before deduction of 38 basis points for mortgage servicing) on accepted bids in Federal National Mortgage Association's auctions of 4-month commitments to purchase home mortgages, assuming prepayment in 12 years for 30-year mortgages. No adjustments are made for FNMA commitment fees or stock related requirements. Monthly figures are unweighted averages for auctions conducted within the month.

8. Includes some multifamily and nonprofit hospital loan commitments in addition to 1- to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMA-GNMA tandem plans.

9. Mortgage amounts offered by bidders are total bids received.

10. Includes participation as well as whole loans.

11. Includes conventional and government-underwritten loans.

1. Includes loans held by nondeposit trust companies but not bank trust departments.

2. Outstanding principal balances of mortgages backing securities insured or guaranteed by the agency indicated.

3. Other holders include mortgage companies, real estate investment trusts, state and local credit agencies, state and local retirement funds, noninsured pension funds, credit unions, and U.S. agencies for which amounts are small or separate data are not readily available.

NOTE: Based on data from various institutional and governmental sources, with some quarters estimated in part by the Federal Reserve in conjunction with the Federal Home Loan Bank Board and the Department of Commerce. Separation of nonfarm mortgage debt by type of property, if not reported directly, and interpolations and extrapolations when required, are estimated mainly by the Federal Reserve. Multifamily debt refers to loans on structures of five or more units.

1. The Board's series cover most short- and intermediate-term credit extended to individuals through regular business channels, usually to finance the purchase of consumer goods and services or to refinance debts incurred for such purposes, and scheduled to be repaid (or with the option of repayment) in two or more installments.

2. Includes auto dealers and excludes 30-day charge credit held by travel and entertainment companies.

3. Net change equals extensions minus liquidations (repayments, charge-offs, and other credit); figures for all months are seasonally adjusted.

NOTE. Total consumer noninstallment credit outstanding—credit scheduled to be repaid in a lump sum, including single-payment loans, charge accounts, and service credit—amounted to \$70.9 billion at the end of 1979, \$64.7 billion at the end of 1978, \$58.6 billion at the end of 1977, and \$55.4 billion at the end of 1976.

1.58 CONSUMER INSTALLMENT CREDIT Extensions and Liquidations

## NOTES BY LINE NUMBER.

- Line 2 of p. A-44.
- Sum of lines 3-6 or 7-10.
- Includes farm and commercial mortgages.
- Credit market funds raised by federally sponsored credit agencies, and net issues of federally related mortgage pool securities. Included below in lines 3, 13, 33.
- Line 1 less line 2 plus line 11. Also line 19 less line 26 plus line 32. Also sum of lines 27, 32, 39, 40, 41, and 46.
- Includes farm and commercial mortgages.
- Sum of lines 39, 40, 41, and 46.
- Excludes equity issues and investment company shares. Includes line 18.
- Foreign deposits at commercial banks, bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign affiliates.
- Demand deposits at commercial banks.

30. Excludes net investment of these reserves in corporate equities.

31. Mainly retained earnings and net miscellaneous liabilities.

32. Line 12 less line 19 plus line 26.

33-37. Lines 13-17 less amounts acquired by private finance. Line 37 includes mortgages.

47. Mainly an offset to line 9.

48. Lines 32 plus 38, or line 12 less line 27 plus 45.

49. Line 2 line 1.

50. Line 19 line 12.

51. Sum of lines 10 and 28.

52, 54. Includes issues by financial institutions.

NOTE: Full statements for sectors and transaction types quarterly, and annually for flows and for amounts outstanding, may be obtained from Flow of Funds Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

2.10 NONFINANCIAL BUSINESS ACTIVITY Selected Measures

1967 = 100; monthly and quarterly data are seasonally adjusted. Exceptions noted.

1. The industrial production and capacity utilization series have been revised. For a description of the changes see the August 1979 BULLETIN, pp. 603-07.

2. Ratios of indexes of production to indexes of capacity. Based on data from Federal Reserve, McGraw-Hill Economics Department, and Department of Commerce.

3. Index of dollar value of total construction contracts, including residential, nonresidential, and heavy engineering, from McGraw-Hill Information Systems Company, F. W. Dodge Division.

4. Based on data in *Employment and Earnings* (U.S. Department of Labor). Series covers employees only, excluding personnel in the Armed Forces.

Monthly data for lines 12 through 16 reflect March 1979 benchmarks; only seasonally adjusted data are presently available.

5. Based on data in *Survey of Current Business* (U.S. Department of Commerce). Series for disposable income is quarterly.

6. Based on Bureau of Census data published in *Survey of Current Business* (U.S. Department of Commerce).

7. Data without seasonal adjustment, as published in *Monthly Labor Review* (U.S. Department of Labor). Seasonally adjusted data for changes in the price indexes may be obtained from the Bureau of Labor Statistics, U.S. Department of Labor.

NOTE: Basic data (not index numbers) for series mentioned in notes 4, 5, and 6, and indexes for series mentioned in notes 3 and 7 may also be found in the *Survey of Current Business* (U.S. Department of Commerce).

Figures for industrial production for the last two months are preliminary and estimated, respectively.

2.11 OUTPUT, CAPACITY, AND CAPACITY UTILIZATION<sup>1</sup>

1. Persons 16 years of age and over. Monthly figures, which are based on sample data, relate to the calendar week that contains the 12th day; annual data are averages of monthly figures. By definition, seasonality does not exist in population figures. Based on data from *Employment and Earnings* (U.S. Department of Labor).

2. Includes self-employed, unpaid family, and domestic service workers.

3. Data include all full- and part-time employees who worked during, or received pay for, the pay period that includes the 12th day of the month, and exclude proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the Armed Forces. Data are adjusted to the March 1979 benchmark and only seasonally adjusted data are available at this time. Based on data from *Employment and Earnings* (U.S. Department of Labor).

1. Not at annual rates.

2. Not seasonally adjusted.

3. Value of new construction data in recent periods may not be strictly comparable with data in prior periods due to changes by the Bureau of the Census in its estimating techniques. For a description of these changes see *Construction Reports (C-30-76-5)*, issued by the Bureau in July 1976.

4. Beginning January 1977 "Highway" imputations are included in "Other".

NOTE. Census Bureau estimates for all series except (a) mobile homes, which are private, domestic shipments as reported by the Manufactured Housing Institute and seasonally adjusted by the Census Bureau, and (b) sales and prices of existing units, which are published by the National Association of Realtors. All back and current figures are available from originating agency. Permit authorizations are those reported to the Census Bureau from 14,000 jurisdictions through 1977, and 16,000 jurisdictions beginning with 1978.

MEMO:								
39 Changes in official assets								
U.S. official reserve assets (increase, -)	-375	732	-1,106	-3,585	343	2,779	-644	-3,246
40 Foreign official assets in the United States (increase, +)	35,416	31,072	-13,556	-8,616	-10,216	5,573	-297	-7,722
41 Change in Organization of Petroleum Exporting Countries official assets in the United States (part of line 23 above)	6,351	-1,137	5,508	-1,361	238	1,676	4,955	2,721
42 Transfers under military grant programs (excluded from lines 4, 6, and 11 above)	204	236	305	29	49	88	139	91

1. Seasonal factors are no longer calculated for lines 13 through 42.

2. Data are on an international accounts (IA) basis. Differs from the census basis primarily because the IA basis includes imports into the U.S. Virgin Islands, and it excludes military exports, which are part of line 6.

3. Includes reinvested earnings of incorporated affiliates.

4. Differs from the definition of "net exports of goods and services" in the national income and product (GNP) account. The GNP definition makes various adjustments to merchandise trade and service transactions.

5. Primarily associated with military sales contracts and other transactions arranged with or through foreign official agencies.

6. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and state and local governments.

NOTE. Data are from Bureau of Economic Analysis, *Survey of Current Business* (U.S. Department of Commerce).

## 3.11 U.S. FOREIGN TRADE

Millions of dollars; monthly data are seasonally adjusted.

Item	1977	1978	1979	1979		1980				
				Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May
1 EXPORTS of domestic and foreign merchandise excluding grant-aid shipments .....	121,150	143,578	181,637	16,928	16,742	17,348	17,233	18,534	18,468	17,678
2 GENERAL IMPORTS including merchandise for immediate consumption plus entries into bonded warehouses .....	147,685	171,978	206,326	18,548	19,665	20,945	21,640	20,607	19,308	20,528
3 Trade balance .....	-26,535	-28,400	-24,690	-1,620	-2,923	-3,597	-4,407	-2,073	-840	-2,850

NOTE. Bureau of Census data reported on a free-alongside-ship (f.a.s.) value basis. Effective January 1978, major changes were made in coverage, reporting, and compiling procedures. The international-accounts-basis data adjust the Census basis data for reasons of coverage and timing. On the export side, the largest adjustments are: (a) the addition of exports to Canada not covered in Census statistics, and (b) the exclusion of military exports (which are combined with other military transactions and are reported separately in the "service account").

On the import side, the largest single adjustment is the addition of imports into the Virgin Islands (largely oil for a refinery on St. Croix), which are not included in Census statistics.

SOURCE: FT 900 "Summary of U.S. Export and Import Merchandise Trade" (U.S. Department of Commerce, Bureau of the Census).

## 3.12 U.S. RESERVE ASSETS

Millions of dollars, end of period

1. Gold held under earmark at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States; see table 3.22.

2. Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

3. Includes allocations by the International Monetary Fund of SDRs as follows: \$867 million on Jan. 1, 1970; \$717 million on Jan. 1, 1971; \$710 million on Jan. 1, 1972; \$1,124 million on Jan. 1, 1979; and \$1,150 million Jan. 1, 1980; plus net transactions in SDRs.

4. Beginning November 1978, valued at current market exchange rates.

1. In May 1978 the exemption level for branches required to report was increased, which reduced the number of reporting branches.

2. In May 1978 a broader category of claims on foreign public bor-

rowers, including corporations that are majority owned by foreign governments, replaced the previous, more narrowly defined claims on foreign official institutions.

1. Includes the Bank for International Settlements.

2. Principally demand deposits, time deposits, bankers acceptances, commercial paper, negotiable time certificates of deposit, and borrowings under repurchase agreements.

3. Includes nonmarketable certificates of indebtedness (including those payable in foreign currencies through 1974) and Treasury bills issued to official institutions of foreign countries.

4. Excludes notes issued to foreign official nonreserve agencies. Includes bonds and notes payable in foreign currencies.

5. Debt securities of U.S. government corporations and federally sponsored agencies, and U.S. corporate stocks and bonds.

6. Includes countries in Oceania and Eastern Europe.

NOTE: Based on Treasury Department data and on data reported to the Treasury Department by banks (including Federal Reserve Banks) and securities dealers in the United States.

## 3.15 LIABILITIES TO AND CLAIMS ON FOREIGNERS Reported by Banks in the United States Payable in Foreign Currencies

Millions of dollars, end of period

Item	1976	1977	1978	1979			1980
			Dec.	June	Sept.	Dec.	Mar.
1 Banks' own liabilities	781	925	2,235	1,931	2,312	1,824	2,289
2 Banks' own claims <sup>1</sup>	1,834	2,356	3,504	2,467	2,564	2,443	3,242
3 Deposits	1,103	941	1,633	1,271	1,220	1,017	1,490
4 Other claims	731	1,415	1,871	1,196	1,343	1,425	1,751
5 Claims of banks' domestic customers <sup>2</sup>	.....	.....	367	574	616	592	1,056

1. Includes claims of banks' domestic customers through March 1978.

2. Assets owned by customers of the reporting bank located in the United States that represent claims on foreigners held by reporting banks for the accounts of their domestic customers.

NOTE: Data on claims exclude foreign currencies held by U.S. monetary authorities.

1. Excludes negotiable time certificates of deposit, which are included in "Other negotiable and readily transferable instruments." Data for time deposits prior to April 1978 represent short-term only.

2. Includes borrowing under repurchase agreements.

3. U.S. banks: includes amounts due to own foreign branches and foreign subsidiaries consolidated in "Consolidated Report of Condition" filed with bank regulatory agencies. Agencies, branches, and majority-owned subsidiaries of foreign banks: principally amounts due to head office or parent foreign bank, and foreign branches, agencies or wholly owned subsidiaries of head office or parent foreign bank.

4. Financial claims on residents of the United States, other than long-term securities, held by or through reporting banks.

5. Includes nonmarketable certificates of indebtedness and Treasury bills issued to official institutions of foreign countries.

6. Principally bankers acceptances, commercial paper, and negotiable time certificates of deposit.

7. Principally the International Bank for Reconstruction and Development, and the Inter-American and Asian Development Banks.

8. Foreign central banks and foreign central governments and the Bank for International Settlements.

9. Excludes central banks, which are included in "Official institutions."

1. U.S. banks: includes amounts due from own foreign branches and foreign subsidiaries consolidated in "Consolidated Report of Condition" filed with bank regulatory agencies. Agencies, branches, and majority-owned subsidiaries of foreign banks: principally amounts due from head office or parent foreign bank, and foreign branches, agencies, or wholly owned subsidiaries of head office or parent foreign bank.

2. Assets owned by customers of the reporting bank located in the United States that represent claims on foreigners held by reporting banks for the account of their domestic customers.

3. Principally negotiable time certificates of deposit and bankers acceptances.

4. Data for March 1978 and for period prior to that are outstanding collections only.

5. Includes demand and time deposits and negotiable and nonnegotiable certificates of deposit denominated in U.S. dollars issued by banks abroad. For description of changes in data reported by nonbanks, see July 1979 BULLETIN, p. 550.

NOTE: Beginning April 1978, data for banks' own claims are given on a monthly basis, but the data for claims of banks' own domestic customers are available on a quarterly basis only.

30 Africa <sup>4</sup>	329	-100		-100						

1. Estimated official and private holdings of marketable U.S. Treasury securities with an original maturity of more than 1 year. Data are based on a benchmark survey of holdings as of Jan. 31, 1971, and monthly transactions reports. Excludes nonmarketable U.S. Treasury bonds and notes held by official institutions of foreign countries.

2. Beginning December 1978, includes U.S. Treasury notes publicly issued to private foreign residents denominated in foreign currencies.

3. Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

4. Comprises Algeria, Gabon, Libya, and Nigeria.

## 3.22 FOREIGN OFFICIAL ASSETS HELD AT FEDERAL RESERVE BANKS

Millions of dollars, end of period

Assets	1977	1978	1979	1979	1980					
				Dec.	Jan.	Feb.	Mar.	Apr.	May <sup>P</sup>	June <sup>P</sup>
1 Deposits	424	367	429	429	439	450	468	618	380	691
Assets held in custody										
2 U.S. Treasury securities <sup>1</sup>	91,962	117,126	95,075	95,075	97,116	96,200	89,290	85,717	88,489	93,661
3 Earmarked gold <sup>2</sup>	15,988	15,463	15,169	15,169	15,138	15,109	15,087	15,057	15,037	15,034

1. Marketable U.S. Treasury bills, notes, and bonds; and nonmarketable U.S. Treasury securities payable in dollars and in foreign currencies.

2. The value of earmarked gold increased because of the changes in par value of the U.S. dollar in May 1972 and in October 1973.

NOTE. Excludes deposits and U.S. Treasury securities held for international and regional organizations. Earmarked gold is gold held for foreign and international accounts and is not included in the gold stock of the United States.

1. For a description of the changes in the International Statistics tables, see July 1979 BULLETIN, p. 550.

2. Prior to December 1978, foreign currency data include only liabilities denominated in foreign currencies with an original maturity of less than one year.

3. Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

4. Comprises Algeria, Gabon, Libya, and Nigeria.

5. Includes nonmonetary international and regional organizations.

## 3.26 DISCOUNT RATES OF FOREIGN CENTRAL BANKS

Percent per annum

Country	Rate on June 30, 1980		Country	Rate on June 30, 1980		Country	Rate on June 30, 1980	
	Per-cent	Month effective		Per-cent	Month effective		Per-cent	Month effective
Argentina .....	18.0	Feb. 1972	France .....	9.5	Aug. 1977	Norway .....	9.0	Nov. 1979
Austria .....	6.75	Mar. 1980	Germany, Fed. Rep. of ..	7.5	May 1980	Sweden .....	10.0	Jan. 1980
Belgium .....	13.0	June 1980	Italy .....	15.0	Dec. 1979	Switzerland .....	3.0	Feb. 1980
Brazil .....	33.0	Nov. 1978	Japan .....	9.0	Mar. 1980	United Kingdom .....	17.0	Nov. 1979
Canada .....	10.63	June 1980	Mexico .....	4.5	June 1942	Venezuela .....	8.5	May 1979
Denmark .....	13.0	Feb. 1980	Netherlands .....	9.5	June 1980			

NOTE. Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or government securities for commercial banks or brokers. For countries with

more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations.

## 3.27 FOREIGN SHORT-TERM INTEREST RATES

Percent per annum, averages of daily figures

Country, or type	1977	1978	1979	1980						
				Dec.	Jan.	Feb.	Mar.	Apr.	May	June
1 Eurodollars .....	6.03	8.74	11.96	14.51	14.33	15.33	18.72	17.81	11.20	9.41

1. Index of weighted average exchange value of U.S. dollar against currencies of other G-10 countries plus Switzerland. March 1973 = 100. Weights are 1972-76 global trade of each of the 10 countries. Series revised as of August 1978. For description and back data, see "Index of

the Weighted-Average Exchange Value of the U.S. Dollar: Revision" on page 700 of the August 1978 BULLETIN.

NOTE. Averages of certified noon buying rates in New York for cable transfers.

# Guide to Tabular Presentation and Statistical Releases

## GUIDE TO TABULAR PRESENTATION

### *Symbols and Abbreviations*

c	Corrected	0	Calculated to be zero
e	Estimated	n.a.	Not available
p	Preliminary	n.e.c.	Not elsewhere classified
r	Revised (Notation appears on column heading when more than half of figures in that column are changed.)	IPCs	Individuals, partnerships, and corporations
		REITs	Real estate investment trusts
		RPs	Repurchase agreements
*	Amounts insignificant in terms of the last decimal place shown in the table (for example, less than 500,000 when the smallest unit given is millions)	SMSAs	Standard metropolitan statistical areas
		.....	Cell not applicable

### *General Information*

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

"U.S. government securities" may include guaranteed issues of U.S. government agencies (the flow of funds figures also include not fully guaranteed issues) as well as direct obli-

gations of the Treasury. "State and local government" also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.

## STATISTICAL RELEASES
