Subscription Price of Bulletin

A copy of the Federal Reserve Bulletin is sent to each member bank without charge. The subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic. Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico. Nicaragua, Panama, Paraguay, Peru. El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents per copy; elsewhere, \$7.00 per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or \$5.00 for 12 months.

# Gold and Dollar Flows in 1958

Foreign countries and international institutions increased their gold reserves and dollar holdings by \$4.2 billion in 1958. Nearly four-fifths of the gain resulted from balance-of-payments transactions with the United States, and the remainder from purchases of gold from new production and other sources.

### FOREIGN GOLD RESERVES AND DOLLAR HOLDINGS

Note.-End-of-year data. Includes international institutions.

The U. S. balance of payments shifted from a surplus in 1957 to the largest deficit in any 12-month period since the Korean War. Exports dropped one-eighth from 1957 to 1958, while imports and capital outflows fell only slightly.

Growth of the gold and dollar holdings of industrial countries reflected transactions with the United States and with nonindustrial countries that used dollars acquired from the United States to cover their payments deficits with other industrial countries. Concentration of reserve gains in countries that hold a large proportion of their official reserves in the form of gold led to greatly increased demand for gold.

Net gold purchases by foreign countries from the United States totaled \$2.3 billion in 1958, exceeding \$1 billion in the second quarter alone. Thereafter they declined, while foreign dollar holdings grew at an increasing rate.

### TRANSACTIONS WITH THE UNITED STATES

The U. S. payments surplus on goods and services was \$1.7 billion in 1958. It was far below the level of 1957 but a little above the average for the two years preceding the exceptional growth in exports that began in 1956.

Merchandise exports declined from a peak early in 1957 to a low early in 1958, but changed little during the last three quarters of the year. With the ending of the investment boom in industrial countries abroad, demand for industrial materials exported by the United States dropped sharply. Foreign demand for U. S. capital goods also declined. Return to the usual sources of supply for fuel after the Suez crisis reduced petroleum exports from this country.

Exports of services declined only slightly between 1957 and 1958. Imports of merchandise and services, including military expenditures abroad and remittances, were unchanged, as the table on the following page shows.

The outflow of private capital was only moderately less than in 1957, and the outflow of U. S. Government capital remained at the high level that prevailed in that year. The inflow of foreign capital to this country declined. Foreign net acquisitions of longterm assets in the United States were less than one-tenth the average for the two preceding years.

Private capital. The outflow of private U. S. capital totaled \$2.9 billion last year, about 10 per cent less than the record amount the year before. Additions to direct investment in foreign countries and to new commercial bank credit extended to foreigners both declined. Contrariwise, purchases of new foreign security issues by U. S. investors reached a postwar high.

SELECTED COMPONENTS OF UNITED STATES BALANCE OF PAYMENTS

ΙĪ'n	hill	ions	Ωf	dal	larel
1111	DHI	IUIIS	OI	aoi	iarsi

Component	1954-55 average	1957	1958"
Goods and services: Exports <sup>1</sup> Imports <sup>2</sup>	19.0 17.6	26.5 21.4	23.1 21.4
Balance	1.4		1.7
Net outflow of U. S. capital and Government grants:			• •
Private capital Government loans <sup>3</sup> Government grants <sup>4</sup>	1.4 0.1 1.8	3.2 1.0 1.6	2.9 1.0 1.6
Foreign capital and unrecorded inflows 5	0.6	1.2	0.4
Net transfer of gold and dollars to foreigners 6	1.4	-0.6	3.3

Direct investment in foreign countries fell to \$1.1 billion, about half the amount for 1957, as outflows to Canada and Latin America declined. In that year, payments for oil concessions in Venezuela and for investments in Canada had been especially large.

Commercial bank credit extended to foreigners continued to rise in 1958 although the increase was smaller than in either of the preceding two years. Banks provided this credit in part through more extensive participation in Export-Import Bank loans. Bankers' acceptances declined, reflecting reduced commodity trade and possibly some shift in its financing to other forms of credit and to financial centers abroad.

Offerings of foreign dollar bonds in U. S. capital markets were in exceptional volume in 1958. A major factor in the growth of issues by foreign governments has been increased investor confidence in the ability of the borrowing countries to meet the future dollar obligations represented by the bonds. Foreign governments outside the Western Hemisphere floated bonds totaling \$250 million, of which more than one-fifth was issued in conjunction with loans from the International Bank for Reconstruction and Development. The Bank issued \$400 million in bonds to finance increased disbursements on its loans.

New bonds issued in the United States by Canadian local authorities and corporations totaled \$450 million. Most of the issues were in the first half of the year, when interest rate differentials between Canadian and U. S. capital markets widened.

Altogether, U. S. investors purchased nearly \$1 billion of newly issued foreign securities in 1958—two-thirds more than in 1957. Their purchases consisted largely of fixed-interest obligations, but included

P Preliminary.

some new equity issues. Foreigners also invested in the foreign securities offered in the United States.

Government loans and grants. Net disbursements on U. S. Government loans and net Government grants as a whole were unchanged from 1957 levels, although net disbursements by the Export-Import Bank increased by 10 per cent to a postwar record. Most disbursements by the Bank provided financing in connection with the export of U. S. commodities or capital goods.

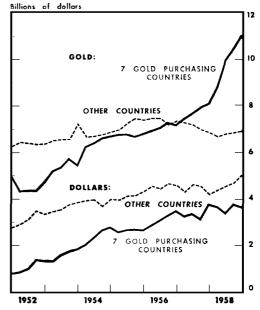

### **GOLD MOVEMENTS**

Official gold holdings of foreign countries (excluding the Soviet Bloc and Mainland China) rose by \$3 billion in 1958. Foreign countries purchased gold to the net amount of \$2.3 billion from the United States and, according to preliminary estimates, they added almost \$900 million to their holdings from new production and other sources. They transferred \$150 million to the International Monetary Fund to meet quota subscriptions and repurchase obligations.

The countries that purchased gold in 1958 had large balance-of-payments surpluses and used a large part of their dollar receipts to acquire gold for their official holdings. Almost all the growth in foreign gold reserves in 1958 and earlier years was in holdings of seven countries, as the chart shows. Four of them—the United Kingdom, Belgium, the Netherlands, and Switzerland—have traditionally held their official reserves almost entirely in gold and have used net dollar receipts to purchase gold. The other three—Italy, Germany, and Austria—have added both gold and dollars to their official reserves.

Increased demand for gold for reserve purposes exceeded by a wide margin the

### FOREIGN OFFICIAL HOLDINGS OF GOLD AND DOLLARS

Note.—End-of-quarter data. Gold purchasing countries are Austria, Belgium, Germany, Italy, the Netherlands, Switzerland and the United Kingdom. Dollars are short-term holdings only.

supply available from new production and from sales by countries other than the United States. As a consequence, foreign purchases of gold from the United States rose almost to the record 12-month total for the period immediately following the outbreak of the Korean War in 1950. As in past years, the countries buying gold from the United States in 1958 did so without reducing their aggregate official holdings of dollars.

Transfers of foreign-held dollar balances to Federal Reserve Banks in connection with gold purchases tend to reduce commercial bank reserves. In 1958, however, Federal Reserve open market purchases of securities and reductions in reserve requirements improved commercial bank reserve positions and prevented such transfers from having a restrictive impact on domestic money markets.

### FOREIGN DOLLAR ASSETS

Foreigners increased their dollar holdings by \$1 billion in 1958. About three-quarters of the increase was in official holdings, and reflected substantial reserve gains by Japan and smaller ones by Canada and other countries.

Many countries increased their private short-term dollar holdings. Those of Switzerland declined, however, mainly in the first half of the year when short-term interest rates in Europe (after allowing for the cost of covering the foreign exchange risk) were at times almost one per cent above those in the United States. The decline was less than the growth in 1956-57, when some European currencies had been under pressure and some Swiss holdings of short-term funds had been converted into dollars.

TRANSFERS OF GOLD AND DOLLARS TO FOREIGNERS, 1958 1

Other <sup>4</sup>	-0.1	0.1	-0.1	(2)	(2)

Note.-Details may not add to totals because of rounding.

Changes in interest rates influenced the form of dollar assets held by foreigners. As yields on Treasury bills declined more rapidly than rates paid on time deposits in the first half of 1958, foreigners reduced their holdings of short-term U. S. Government securities and increased their deposits at commercial banks in the United States. Similarly, in the first quarter there was a shift into bankers' acceptances and commercial paper as rates on these instruments went down more slowly than bill rates. Since the marked upturn in bill rates last summer, foreign investment in Treasury bills has increased and deposits have declined.

Total foreign holdings of U. S. Government bonds and notes changed little for the year as a whole. Fluctuations during the year reflected for the most part minor adjustments in portfolio maturities.

Foreign investors added an estimated \$270 million to their fixed-interest dollar securities in 1958 through purchase of new dollar bonds issued by foreign governments and the International Bank. Many of these bonds were issued at yields ranging from 1 to 2 per cent above those on U. S. Government bonds; they had the additional attraction of being free of U. S. income tax if held by foreign investors.

### SHIFTS IN GOLD AND DOLLAR HOLDINGS

Foreign industrial countries, chiefly West European countries, added more than \$4 billion to their gold and dollar holdings during 1958. For many countries, growth in these holdings was resumed in 1958 after an interruption in 1957 that resulted primarily from inflationary pressures.

Most nonindustrial countries lost gold and dollars in 1958 and some also drew down their sterling balances, in many cases continuing drains of earlier years. Losses by nonindustrial countries and gains by industrial countries were accentuated by a change in the relation between prices of raw materials and manufactured products. Export prices of primary-producing countries aver-

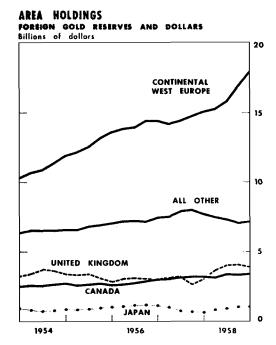

<sup>&</sup>lt;sup>1</sup> Includes international institutions.
<sup>2</sup> Net transfer of less than \$50 million to United States.
<sup>3</sup> Net transfer of less than \$50 million from United States.
<sup>4</sup> Represents mainly bankers' acceptances and short-term commercial paper.

aged about 5 per cent lower than in 1957, while those of most industrial countries declined little if at all.

European countries. At the end of 1958, gold and dollar holdings of the United Kingdom and continental West European countries were \$21.8 billion, 65 per cent of the total for all foreign countries. Holdings of the United Kingdom and most other major countries increased more than 20 per cent during the year. French holdings rose rapidly as the country's balance of payments improved in the second half of the year. Germany and Switzerland, the continental West European countries with the largest holdings, increased them by relatively small amounts.

Strengthening of reserve positions was accompanied by a movement toward convertibility of European currencies. In late December, 12 West European countries gave foreigners the right to convert currencies acquired through current transactions into any foreign currency, including dollars. Prior to that time, Switzerland was the only West European country with a fully convertible currency. The currencies of most of the other countries had been convertible for nonresidents at small discounts from official rates. France's move to convertibility was accompanied by a 15 per cent devaluation and by several internal financial measures designed to end inflation.

The European Monetary Agreement replaced the European Payments Union at the time West European countries moved to convertibility. Members of the Union had settled balances resulting from transactions with other members partly in gold and dollars and partly by automatic credits. As a rule, signatories to the Agreement settle balances in convertible currencies, gold, or nonautomatic credits, in much the same way

Note.-End-of-quarter data.

that countries with fully convertible currencies settle their international balances.

Countries outside Europe. Canadian gold and dollar holdings rose \$230 million, reflecting in large part receipts from new security issues in U. S. capital markets. Japan added \$385 million to its holdings as imports fell almost one-third and exports were maintained. Gold and dollar holdings of most nonindustrial countries declined, despite drawings on the International Monetary Fund, and by year-end some were below the minimum needed to satisfy statutory reserve requirements.

### INTERNATIONAL MONETARY FUND

The International Monetary Fund continued in 1958 to aid countries with balance-of-payments deficits. Early in the year, France drew \$131 million under a stabilization program approved by the Fund. Later,

Fund drawings and standby arrangements in connection with stabilization programs in Argentina, Brazil, Peru, and Turkey totaled \$155 million; each country, as part of its program, moved toward more realistic exchange rates. The U. S. Government gave financial assistance in all these programs, and some European countries also provided credits to France and Turkey.

For 1958 as a whole, repurchases of currencies exceeded drawings on the International Monetary Fund. Most of the repurchases represented dollars that had been drawn by industrial countries in the preceding year.

At the end of 1958 the Fund held \$2.5 billion in gold and U. S. dollars. It also held the equivalent of \$2.3 billion in Canadian dollars, pounds sterling, Belgian francs, German marks, and Netherlands guilders—currencies which have been drawn in the past. Commitments under standby agreements were \$900 million.

In order to insure the Fund adequate resources to meet potential exchange crises,

the Board of Governors of the Fund voted in early 1959 to approve a general increase in members' quotas of 50 per cent (and larger increases in special cases), and to require that each member pay one-fourth of its quota increase in gold. Each member country has to approve the proposed change in its own quota.

The European moves toward fuller convertibility of currencies as well as the stabilization efforts of France and several nonindustrial countries were generally accompanied or followed by further relaxation of quantitative restrictions on imports, especially discriminatory restrictions against imports from the dollar area, and of restrictions on international capital transactions. Actions of this kind benefit the countries taking them and also enable producers in the United States to compete on more equal terms in foreign markets; they also give private financial institutions in all parts of the world greater opportunity to expand their international business.

# Preliminary Findings of the 1959 Survey of Consumer Finances

EARLY THIS YEAR, consumers viewed their financial situations and prospects more favorably than a year ago, and the proportion who planned to make major expenditures during 1959 was moderately larger than in early 1958, according to the preliminary findings of the fourteenth annual Survey of Consumer Finances.<sup>1</sup> This Survey was conducted in January and February 1959 by the Board of Governors of the Federal Reserve System in cooperation with the Survey Research Center of the University of Michigan. Personal interviews with a representative sample of the consumer population provided information on consumers' financial positions, views about their own and general economic prospects, and their plans for purchasing durable goods and houses during the year.

The recovery in economic activity that had occurred by early 1959 was reflected in an increase from early 1958 in the proportion of consumer spending units who said that they were earning more than a year earlier and a corresponding decrease in the proportion who said they were earning less. This improvement in rate of income was reported by all of the major occupational groups, and was reflected in a more favorable evaluation of individual financial positions. Nearly four in ten consumers reported that they were better off financially than a year ago, compared with one in three consumers in early 1958. Consumers' views on their financial situations in early 1959 were about the same as in early 1955, but were slightly less favorable than those reported at the beginning of 1956 and 1957.

The distribution of consumer income for 1958 was similar to that in 1957 and 1956, with about two-fifths of all consumer units having incomes of \$5,000 and over in each of the three years. In early 1959 about three-fourths of all consumers held some liquid assets. This was about the same proportion as in the two preceding years. There were some declines in the size of holdings reported early this year, however, as the proportion of consumers with small holdings (under \$200) increased and the proportion with intermediate-size holdings (\$1,000-\$5,000) decreased.

Early this year consumers were much more optimistic than a year ago about their earnings prospects and about general business conditions during the coming year. More than four in ten consumers expected their earnings rate to improve over the year and less than one in ten expected it to de-

<sup>&</sup>lt;sup>1</sup>These findings are based on preliminary tabulations of about 2,550 interviews taken in January and February 1959 in the 12 largest metropolitan areas and 54 other sampling areas throughout the country. Additional interviews and adjustments for differential response rates in various strata of the sample will be incorporated in the tabulations that will be published in later articles in the Federal Reserve BULLETIN. In past years differences between preliminary and final data have been small.

The Survey of Consumer Finances, like other sample surveys of this type, is subject to response as well as sampling errors. As a result of such factors, undue importance should not be attached to small changes in the data from year to year. For tables of sampling errors in Survey data see the Federal Reserve BULLETIN, September 1958, pp. 1041-42.

Preliminary data for early 1959 are based on the first 2,550 spending units interviewed and have not been adjusted for nonresponse. Data for previous years are based on complete surveys and adjusted for nonresponse.
 Based on data for nonfarm spending units only.
 Liquid assets include U. S. Government savings bonds, checking accounts, savings accounts in banks, and shares in savings and loan associations and credit unions; currency is excluded. Data prior to 1959 include postal savings accounts, which were held by less than 2 per cent of all spending units in 1958. Data prior to 1957 include also marketable U. S. Government bonds, which were held by about 1 per cent of all spending units in 1957.
 Data not available.

<sup>5</sup> Data are based on question: "Now considering the country as a whole, do you think that during the next 12 months we will have good times or bad times, or what?"

6 Spending units that reported they would, probably would, or possibly would buy, or that had already bought, in Survey year.

7 Includes only planned expenditures of \$50 or more.

8 Data for automobiles are based on planned expenditures of spending units that reported they would or probably would buy or had already bought; data for other items include, in addition, planned expenditures of spending units that reported they possibly would buy. Medians shown are interpolated from bracket amounts starting in 1952.

For notes see preceding page.

cline. The outlook was a little more optimistic than in early 1957 and considerably more optimistic than in most previous postwar years. This improvement in income outlook was general for most income and occupational groups. Consumer expectations about general business conditions during the coming year improved substantially from early 1958, and were only slightly less optimistic than in the 1955-57 period. Early this year more than one-half of the consumers expected business conditions to be good during the coming year, while less than one-fifth said they expected bad times.

For the most part, consumers also expect higher prices. Three-fifths of all spending units reported that they expect retail prices to rise during the year, and less than one-tenth expect prices to decline. A year ago slightly less than one-half of consumers expected price increases.

Except for a substantial rise in plans to buy houses, consumers' buying plans in general were only moderately above a year ago. The proportion of consumers planning to make expenditures on cars, on other durable goods, or on home improvement and maintenance increased to 50 per cent early this year from 47 per cent a year earlier, but the average planned expenditure declined moderately.

The proportion of consumers reporting plans to buy new cars during the year rose from the relatively low level of early 1958 but was still below the levels in the previous three years. The median price consumers expected to pay reached a new high of \$3,030. While the proportion of consumers that planned to buy used cars was above that of most recent years, it was down from the high reached last year, and the median price consumers expected to pay was lower than a year ago.

The proportion of consumer units with intentions of buying a house in 1959 was much larger than last year and about as large as the previous high levels in 1955 and 1956. Nearly one-fourth of consumers reported that they intended to make expenditures on home improvements or maintenance. This was a larger proportion than in any other recent year, but the median planned expenditure was somewhat lower.

# Credit Extended by Banks to Real Estate Mortgage Lenders

Credit extended to real estate mortgage lenders by weekly reporting member banks as of February 11, 1959 amounted to \$1,551 million, \$342 million more than reported at the previous survey on August 13, 1958. Commitments to extend additional credit to these lenders increased \$106 million to \$778 million.

Loans to real estate mortgage lenders secured by the pledge of real estate mortgage loans amounted to \$1,195 million and accounted for \$290 million of the increase since August. As in previous surveys these loans were largely to real estate mortgage companies.

The data for these surveys were obtained for the purpose of ascertaining amounts of all types of credit extended by commercial banks to real estate mortgage lenders. Results of earlier surveys have been published in the September 1958 and earlier Federal Reserve Bulletins.

Administrative interpretations, new regulations, and similar material

### Questions Arising under Regulation U

Regulation U governs "any loan" made by a bank "secured directly or indirectly by any stock for the purpose of purchasing or carrying any stock registered on a national securities exchange," with certain exceptions, and provides that the maximum loan value of such stock shall be a fixed percentage "of its current market value, as determined by any reasonable method."

The Board of Governors has recently had occasion to consider the application of this language to the three following questions:

### LOAN SECURED BY STOCK

First, is a loan to purchase or carry registered stock subject to Regulation U where made in unsecured form, if stock is subsequently deposited as security with the lending bank, and surrounding circumstances indicate that the parties originally contemplated that the loan should be so secured? The Board answered that in a case of this kind, the loan would be subject to the Regulation, for the following reasons.

The Board has long held, in the closely related "purpose" area, that the original purpose of a loan should not be determined upon a narrow analysis of the technical circumstances under which a loan is made. Instead, the fundamental purpose of the loan is considered to be controlling. Indeed, "the fact that a loan made on the borrower's signature only, for example, becomes secured by registered stock shortly after the disbursement of the loan" affords reasonable grounds for questioning whether the bank was entitled to rely upon the borrower's statement as to the purpose of the loan. (1953 Federal Reserve BULLETIN 951.)

Where security is involved, standards of interpretation should be equally searching. If, for example, the original agreement between borrower and bank contemplated that the loan should be secured by registered stock, and such stock is in fact delivered to the bank when available, the transaction must be regarded as fundamentally a secured loan. This view is strengthened by the fact that the regulation applies to a loan "secured

directly or indirectly by any stock." (Italics supplied.)

### LOAN TO ACQUIRE CONTROLLING SHARES

The second question is whether the Regulation governs a stock-secured loan made for the business purpose of purchasing a controlling interest in a corporation, or whether such a loan would be exempt on the ground that the Regulation is directed solely toward purchases of stock for speculative or investment purposes. The Board answered that a stock-secured loan for the purpose of purchasing or carrying registered stock is subject to the Regulation, regardless of the reason for which the purchase is made.

This answer is required, in the Board's view, since the language of the Regulation is explicitly inclusive, covering "any loan . . . secured directly or indirectly by any stock for the purpose of purchasing or carrying any stock registered on a national securities exchange." (Italics supplied.) Moreover, the withdrawal in 1945 of the original Section 2(e) of the Regulation, which exempted "any loan for the purpose of purchasing a stock from or through a person who is not a member of a national securities exchange . . ." plainly implies that transactions of the sort described are now subject to the general prohibition of Section 1.

### DETERMINATION OF CURRENT MARKET VALUE

The third question is how to determine the "current market value" of a block of registered stock which represents a controlling interest in a corporation where the block is purchased at a price in excess of the average of bid and asked prices on the Exchange for the day of the purchase, and also in excess of the average price on the Exchange over recent months, while the parties to the loan, on the other hand, believe the purchase to be a bargain and report opportunities to resell at a price which is higher still. In a case of this kind, the Board believes that the current market value of the block is the price at which the actual purchase was made.

The Supplement to Regulation U states that cur-

rent market value shall be determined by "any reasonable method." Regulation T, which, while not controlling, may throw some light on the problem, provides that the current market value of a security "throughout the day of its purchase or sale" shall be "total cost or the net proceeds of its sale." The Board is of the opinion that actual sale price in an arm's length transaction provides the best evidence of value. Particularly in circumstances such as those indicated above, it must be assumed that this price reflects intangible factors including control.

### Compilation of State Laws Relating to Bank Reserves

The Legal Division of the Board of Governors, with the assistance of the Bank Operations Division of the Board and counsel for the Federal Reserve Banks, has prepared a compilation of provisions of State laws relating to reserves required to be maintained by State banks against deposits. Copies of the compilation may be obtained upon request. This compilation, prepared as of January 1, 1959, supersedes a similar compilation of State laws relating to bank reserves which is dated January 1, 1956.

### Percentage Limitation on Acquisition by Bank Holding Company of Stock of Small Business Investment Company

An interpretation of the Board published at page 1161 of the October 1958 issue of the Federal Reserve BULLETIN dealt with the question of whether, and to what extent, the Bank Holding Company Act of 1956 permits a bank holding company or its subsidiary banks to acquire shares in a small business investment company ("SBIC") organized pursuant to the Small Business Investment Act of 1958 ("SBI Act").

That interpretation pointed out that the general prohibition in Section 4 of the Bank Holding Company Act against a bank holding company's acquiring "direct or indirect ownership or control of any voting shares of any company which is not a bank or a bank holding company" is subject to an exemption in Section 4(c)(4) for stocks of the kinds and amounts eligible for investment by a national bank; that Section 302(b) of the SBI Act permits a national bank to purchase shares of stock in SBICs "in an amount aggregating [not] more than one per cent of [the bank's] capital and

surplus"; and that, accordingly, a bank holding company may invest in stock of an SBIC up to the specified one per cent. The interpretation also expressed the view, however, that Section 6(a)(1) of the Bank Holding Company Act applies a further limitation to banking subsidiaries of a bank holding company; and that under that section such a subsidiary bank could not invest in the stock of an SBIC if the SBIC is, or would become by the investment, a "subsidiary" of the bank's parent holding company.

Two further questions have arisen concerning the amount of stock of an SBIC that may be acquired by a bank holding company. The first relates to the definition of "capital and surplus" under the one per cent limitation of Section 302(b) of the SBI Act. Since the amount of SBIC stock eligible for investment by a national bank under the SBI Act is limited to one per cent of the bank's capital and surplus, it is the Board's view that the amount eligible for investment by a bank holding company is similarly limited to one per cent of the holding company's capital and surplus. In order to apply this limitation, however, it is necessary to define the term "capital and surplus." While the matter is not entirely free from doubt, it is the opinion of the Board that, since neither the SBI Act nor its legislative history supplies a definition, the term should be interpreted in accordance with generally accepted accounting and reporting procedures applicable to the investing entity, in the present case, the bank holding company.

The second question concerns the method of applying the one per cent limitation stated in Section 302(b) of the SBI Act when all or part of the shares of the SBIC are owned by a subsidiary of the bank holding company. For example, the SBIC shares might be owned by a bank holding company which is a subsidiary of another bank holding company, or by a subsidiary bank in a case where the SBIC is not a subsidiary of the bank's parent holding company. Since ownership or control of stock by a subsidiary should be regarded as indirect ownership or control of such stock by the parent, the Board is of the opinion that the amount invested in an SBIC by the holding company and by its subsidiaries must be added together to determine whether the total amount directly and indirectly invested by the holding company exceeds the amount permissible, that is to say, exceeds one per cent of the holding company's capital and surplus. Assuming that no other exception is available in the particular case, acquisition or retention by the holding company of direct or indirect control of any amount in excess of that one per cent would be prohibited by Section 4 of the Bank Holding Company Act. Thus, a particular subsidiary of a bank holding company could not invest in the stock of an SBIC if such investment, together with the investments of the parent bank holding company and of other subsidiaries, would exceed one per cent of the capital and surplus of the parent bank holding company.

### Indirect Control by Bank Holding Company through Convertible Debentures Held by Small Business Investment Company

A question has been raised concerning the applicability of provisions of the Bank Holding Company Act of 1956 to the acquisition by a bank holding company of stock of a small business investment company ("SBIC") organized pursuant to the Small Business Investment Act of 1958 ("SBI Act").

As indicated in the interpretation of the Board published at page 1161 of the October 1958 issue of the Federal Reserve BULLETIN, it is the Board's opinion that, since stock of an SBIC is eligible for purchase by national banks and since Section 4(c)(4) of the Holding Company Act exempts stock eligible for investment by national banks from the prohibitions of Section 4 of that Act, a bank holding company may lawfully acquire stock in such an SBIC.

However, Section 304 of the SBI Act provides that debentures of a small business concern purchased by a small business investment company may be converted at the option of such company into stock of the small business concern. The question therefore arises as to whether, in the event of such conversion, the parent bank holding company would be regarded as having acquired "direct or indirect ownership or control" of stock of the small business concern in violation of Section 4(a) of the Holding Company Act.

The Small Business Investment Act clearly contemplates that one of the primary purposes of that Act was to enable SBICs to provide needed equity capital to small business concerns through the purchase of debentures convertible into stock. Thus, to the extent that a stockholder in an SBIC might

acquire indirect control of stock of a small business concern, such control appears to be a natural and contemplated incident of ownership of stock of the SBIC. The Office of the Comptroller of the Currency has informally indicated concurrence with this interpretation insofar as it affects investments by national banks in stock of an SBIC.

Since the exception as to stock eligible for investment by national banks contained in Section 4(c)(4) of the Holding Company Act was apparently intended to permit a bank holding company to acquire any stock that would be eligible for purchase by a national bank, it is the Board's view that Section 4(a)(1) of the Act does not prohibit a bank holding company from acquiring stock of an SBIC, even though ownership of such stock may result in the acquisition of indirect ownership or control of stock of a small business concern which would not itself be eligible for purchase directly by a national bank or a bank holding company.

### Order under Section 3 of Bank Holding Company Act

The Board of Governors of the Federal Reserve System, on February 27, 1959, issued the following Order and Statements with respect to an application by a bank holding company for approval of the acquisition of voting shares of a bank:

### FIRST SECURITY CORPORATION

In the Matter of the Application of First Security Corporation for prior approval of acquisition of voting shares of Fillmore State Bank, Fillmore, Utah.

### ORDER APPROVING APPLICATION

There having come before the Board of Governors pursuant to Section 3(a)(2) of the Bank Holding Company Act of 1956 (12 USC 1843) and Section 4(a)(2) of the Board's Regulation Y (12 CFR 222.4(a)(2)), an application on behalf of First Security Corporation, whose principal office is in Salt Lake City, Utah, for the Board's prior approval of the acquisition of 3,000 of the outstanding voting shares of Fillmore State Bank, Fillmore, Utah; a Notice of Tentative Decision referring to a Tentative Statement on said application having been published in the Federal Register on February 5, 1959 (24 FR 873); the said Notice having provided interested persons an opportunity,

before issuance of the Board's final order, to file objections or comments upon the facts stated and the reasons indicated in the Tentative Statement; and the time for filing such objections and comments having expired and no such objections or comments having been filed;

It is hereby ordered, for the reasons set forth in the Board's Statement of this date, that the said application be and hereby is granted and the acquisition by First Security Corporation of 3,000 of the outstanding voting shares of Fillmore State Bank, Fillmore, Utah, is hereby approved, provided that such acquisition is completed within three months from the date hereof, and that no action be taken by First Security Corporation that will result in Fillmore State Bank ceasing to operate as a separate banking institution within 60 days from the date of this Order.

Dated at Washington, D. C., this 27th day of February, 1959.

By order of the Board of Governors.

Voting for this action: Governors Szymczak, Robertson, and Shepardson. Voting against this action: Governor Mills. Absent and not voting: Chairman Martin and Vice Chairman Balderston.

(Signed) MERRITT SHERMAN,

Secretary.

(SEAL)

### STATEMENT

First Security Corporation, a bank holding company, has applied, pursuant to Section 3(a)(2) of the Bank Holding Company Act of 1956 ("the Act"), for this Board's prior approval of the acquisition of all of the outstanding common stock (3,000 shares) of Fillmore State Bank, Fillmore, Utah.

Pursuant to Section 3(b) of the Act, the Bank Commissioner for the State of Utah was asked for his views and recommendations. His office replied that the Department interposed no objection to the granting of the requested approval.

Statutory factors. Section 3(c) of the Act requires the Board to take into consideration the following five factors: (1) the financial history and condition of the holding company and bank concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether or not the effect of the acquisition would be to expand the size or extent of the bank holding company system involved be-

yond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking.

Discussion. The Applicant, First Security Corporation, is a bank holding company with its principal office in Salt Lake City, Utah. It owns a large majority of the stock of 4 banks in Utah, Wyoming, and Idaho. Those subsidiary banks have total deposits of about \$453 million, representing about 26 per cent of the total of \$1,725 million deposits in the three States. They have 71 banking offices, which represent 26 per cent of the 271 offices in those States. The respective percentages of deposits and banking offices held by these banks in each of the three States are: Utah—32 per cent and 35 per cent; Wyoming—1 per cent and 2 per cent; Idaho—33 per cent and 29 per cent.

The town of Fillmore is the county seat of Millard County. It is the center of a relatively sparsely populated agricultural and retail trade area which does not have as ready access to other areas as is usually found in other sections of the country. Millard County extends about 100 miles east and west and approximately 65 miles north and south. High mountains outline its eastern boundary from which the county extends westward to the State of Nevada. Fillmore is located in the eastern part of Millard County and Fillmore State Bank draws substantially all of its business from about 4,000 people in that part of the County. Geographic conditions tend to discourage those people from trading or banking elsewhere. The only other banking office in the County is located at Delta, about 37 miles away. Other banking offices in the surrounding areas are at distances ranging from about 52 to more than 90 miles. The deposits of Fillmore State Bank are about \$2 million and the deposits at each of the banking offices in these surrounding areas range from about \$1 million to about \$6 million.

The financial history and condition of both First Security Corporation and Fillmore State Bank are satisfactory. The prospects of both the holding company and the Bank are favorable, except to the extent that the prospects of the Bank might be adversely affected by problems of management discussed hereafter.

The management of First Security Corporation is capable and experienced. There appears to be

some basis for Applicant's assertion that suitable continuing management for Fillmore Bank is not available within the Bank's present staff, that it would be difficult to secure management from outside the Bank, and that if First Security Corporation acquires control it would facilitate the providing of suitable management for the Bank.

The Bank appears to have been serving the convenience, needs, and welfare of its community and area in a satisfactory manner, but acquisition of control by First Security Corporation probably would result in the Bank's furnishing somewhat better and more complete banking services to its customers.

The most difficult problem here, as in many other cases under the Bank Holding Company Act, arises under the fifth factor stated in Section 3(c), which requires the Board to consider whether the effect of the acquisition "would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking."

Since there is only one bank in Fillmore there can be no question of reducing competition with another bank in that community. However, the banking office in Delta, the only other banking office in Millard County, is a branch of First Security Bank of Utah, N. A., a subsidiary of First Security Corporation. This branch has deposits of about \$2½ million. The fact that acquisition of Fillmore State Bank by First Security Corporation would give that Corporation control of both the banking offices in Millard County is an adverse consideration. It is also an adverse feature that the only banking office in Nephi, about 60 miles from Fillmore, is a branch of First Security Bank of Utah, N. A. First Security Corporation thus controls two of the seven banking offices that appear to be most accessible to the area served by Fillmore State Bank, and the Corporation would control three of the seven if it acquires that Bank.

The adverse elements are mitigated by the fact that there does not appear to be extensive trade or traffic between Fillmore and Delta or much overlap of banking business between them; neither of these small banking offices has more than about 3 per cent of its deposits from the primary market area of the other. The general geographic and economic characteristics of Fillmore, Millard

County, and the surrounding counties tend to make the circumstances relating to competition somewhat different from those in many other areas. The adverse features are also offset to some extent by the improved management and expanded service to the community that probably would result, as indicated above, from acquisition of control of Fillmore Bank by First Security Corporation.

Conclusion. The above views were incorporated in the Tentative Statement issued in connection with the Notice of Tentative Decision published in the Federal Register on February 5, 1959 (24 FR 873) affording interested persons an opportunity to submit comments on or objections to the Board's proposed action, and no such comments or objections were received within the period specified for their submission.

Viewing the relevant facts in the light of the factors specified in Section 3(c) of the Act and the general purposes of the Act, it is the judgment of the Board that in the particular circumstances of this case the proposed acquisition would be consistent with the applicable standards and purposes, and that the application should be approved. It is so ordered.

### DISSENTING STATEMENT OF GOVERNOR MILLS

The record in this case contains impressive evidence in favor of the First Security Corporation's proposal to acquire control of the Fillmore State Bank, but in my opinion that evidence is insufficient to justify approval of the application. In view of the topographical characteristics and the distribution of population in the areas of the State of Utah that are now served by First Security Corporation's subsidiary banks, and particularly the absence of any competing banks in some counties of the State, it is apparent that the situation calls for further investigation of the question whether approval of the application would lessen banking competition and further a trend to monopoly. A public hearing on this application would have afforded banking, commercial, and other groups, as well as individuals, an opportunity to present views and information regarding all aspects of the competitive situation in this case.

Without the benefit of such a hearing, and in the absence of the evidence—either in support of or in opposition to the application—that might thus have been adduced, I dissent from the decision of the Board.

### Current Events and Announcements

### REDESIGNATION OF CHAIRMAN AND VICE CHAIRMAN OF BOARD

The President of the United States on March 12, 1959, issued an Order redesignating Mr. Wm. McC. Martin, Jr., as Chairman of the Board of Governors of the Federal Reserve System, to serve as such for a term of four years from April 1, 1959, unless and until his services as a Member of the Board of Governors shall have sooner terminated.

The President on the same day issued an Order redesignating Mr. C. Canby Balderston as Vice Chairman of the Board of Governors of the Federal Reserve System, to serve as such for a term of four years, unless and until his services as a Member of the Board of Governors shall have sooner terminated.

### APPOINTMENT OF BOARD MEMBER

The President, on March 5, 1959, sent to the Senate the nomination of Mr. G. H. King, Jr., of Mississippi as a Member of the Board of Governors. The nomination was confirmed by the Senate without objection on March 12.

Mr. King was appointed for the unexpired portion of the term of 14 years from February 1, 1946, to fill the vacancy occasioned by the resignation of Mr. James K. Vardaman, Jr.

Mr. King was born in Oakdale, Louisiana, on August 18, 1920, the son of George Harold King and French Freeman King. He married Daudrille Elaine Hollaway on May 15, 1942, and they have two daughters and one son. He graduated from Louisiana State University in 1941 with a B.S. degree; he also attended the University of Colorado Summer School in 1939, 1940, and 1941.

Mr. King was Treasurer of King Lumber Industries, Canton, Mississippi, from 1946 to 1949, and served as Executive Vice President from 1950 until he assumed the Presidency in 1958. In addition to the domestic and foreign marketing of wood products, he has engaged in timber and mineral leasing of lands. In agriculture he has produced purebred Hereford cattle that have been sold throughout the United States and Mexico. He

entered upon active duty with the United States Naval Reserve as an Ensign on May 1, 1942, and was released to inactive duty in the United States Naval Reserve on February 2, 1946, with the rank of Lieutenant. He was appointed Director of the New Orleans Branch of the Federal Reserve Bank of Atlanta in January 1956, and served as Chairman of the Board of Directors of the Branch during 1958.

### FEDERAL RESERVE MEETINGS

A meeting of the Federal Open Market Committee was held on March 3, 1959. Wm. McC. Martin, Jr., was re-elected Chairman and Alfred Hayes, Vice Chairman. The representative members of the Committee elected by the Federal Reserve Banks for the period of one year beginning March 1, 1959, are: J. A. Erickson, Alfred Hayes, Carl E. Allen, Delos C. Johns, and Frederick L. Deming, Presidents of the Federal Reserve Banks of Boston, New York, Chicago, St. Louis, and Minneapolis, respectively.

At the meeting of the Federal Advisory Council held on February 16, 1959, Homer J. Livingston, representing the Seventh Federal Reserve District, was elected President; Lloyd D. Brace, representing the First Federal Reserve District, was elected Vice President; and John J. McCloy (Second District), Casimir A. Sienkiewicz (Third District), and Gordon Murray (Ninth District) were elected directors to serve with Messrs. Livingston and Brace as members of the Executive Committee. Herbert V. Prochnow and William J. Korsvik were appointed Secretary and Assistant Secretary, respectively.

### CHANGE IN OFFICERS AT RESERVE BANKS

Mr. W. D. Gentry, First Vice President of the Federal Reserve Bank of Dallas, retired February 28, 1959. Mr. Gentry became associated with the Reserve Bank in 1916, and was appointed an Assistant Cashier in 1923. He served as Manager of the Houston Branch from February 1, 1930 until April 1, 1943 when he returned to the Head

Office as Vice President and Cashier. He has been First Vice President since October 1, 1944.

Effective March 1, 1959, Mr. Harry A. Shuford was appointed First Vice President of the Federal Reserve Bank of Dallas to succeed Mr. Gentry for the unexpired portion of the five-year term which began March 1, 1956. Mr. Shuford joined the staff of the Reserve Bank in 1948 as Counsel, and was appointed Vice President and General Counsel in May 1952. He received his B.S. in Commerce and LL.B. degrees from Southern Methodist University, Dallas.

### INCREASE IN FEDERAL RESERVE DISCOUNT RATE

The Board of Governors of the Federal Reserve System has recently approved actions by the directors of all 12 Federal Reserve Banks to increase the discount rate at those Banks to 3 per cent. The effective dates of the new rate at the several Reserve Banks were as follows:

New York	March 6,	1959
Philadelphia	March 6,	1959
Chicago	March 6,	1959
Dallas	March 6,	1959
Boston	March 10,	1959

# National Summary of Business Conditions

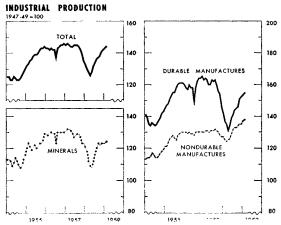

Released for publication March 16

Industrial production and industrial prices continued upward in February and early March. Construction activity and consumer buying in February were maintained close to record highs. Total employment and the number of persons unemployed remained at January levels. Common stock prices advanced, reaching new highs in mid-March.

### INDUSTRIAL PRODUCTION

The Board's seasonally adjusted index of industrial production rose one point in February to 144 per cent of the 1947-49 average, one point below the prerecession level in August 1957 and two points below the record high of February 1957.

A gain in durable goods production in February was marked by a sharp advance in output of primary metals. The expansion in buying reflects substantial liquidation of inventories during 1958 and protection against possible work stoppages later this year as well as increased consumption of these materials. Steel production increased 14 per cent to 85 per cent of capacity. In the second week of March, output was scheduled at 92 per cent, a record high in tonnage terms. Aluminum production was at a new high in February and copper smelting

Federal Reserve indexes, seasonally adjusted. Monthly figures; latest shown are for February.

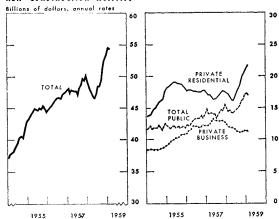

and refining remained at advanced levels. Activity in business equipment lines increased further as truck production continued to rise and output of farm machinery recovered following settlement of a major work stoppage. Production of household durable goods changed little at near record rates. Auto assemblies declined further, owing mainly to glass shortages, but schedules for March indicate a recovery.

Production of nondurable goods continued to expand in February and activity in most industries was at or above previous highs. Minerals output also increased reflecting gains in coal and metal mining.

### Construction

Private housing starts declined somewhat further in February, to a seasonally adjusted annual rate of 1,320,000 units, but were nearly one-half above the low of a year earlier. The value of new construction put in place, at a seasonally adjusted rate of \$54.4 billion, was close to the revised January record total and one-sixth above the low last May. Private residential building continued to advance but business and highway construction activity declined.

### NEW CONSTRUCTION ACTIVITY

Department of Commerce data. Private business includes industrial, commercial, and public utility construction. Monthly figures; latest shown are for February.

### EMPLOYMENT

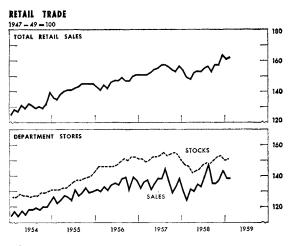

Seasonally adjusted nonfarm employment was unchanged in February at 51.0 million, one million above the April 1958 low. Employment continued to increase in durable goods manufacturing, trade, and State and local governments, but declined in mining, transportation, and construction. Unemployment was unchanged in February, and the seasonally adjusted rate was 6.1 per cent of the civilian labor force, about the level prevailing since November.

### DISTRIBUTION

Seasonally adjusted retail sales in February remained near the record high reached in December and were 9 per cent above the recession low of a year earlier. Gains over the year were particularly marked for automotive and department store sales. In January, the value of stocks at department stores was 3 per cent higher than a year earlier, but the value of total retail inventories was slightly lower.

### COMMODITY PRICES

Wholesale prices of industrial commodities continued to advance from mid-February to mid-

Federal Reserve indexes, seasonally adjusted; retail sales based on Department of Commerce data. Monthly figures; latest shown for stocks is January, for other series, February.

March. In response to expanding business demands, prices of refined copper, copper and brass mill products, rubber, lumber, hides, wastepaper, and man-made and cotton textiles increased. Steel scrap prices declined somewhat despite the rise in output of steel to a new high.

Prices of farm and food products declined slightly further, owing in part to improved supplies of meats. Support prices for 1959 crops of corn, other feed grains, and oilseeds were announced by the Department of Agriculture on February 18 at levels generally well below those for 1958. Reduced support levels for the 1959 cotton crop had been announced earlier.

### BANK CREDIT AND RESERVES

Total loans and investments at city banks declined \$1.1 billion over the four weeks ending March 4. Reduction in holdings of U. S. Government securities was offset only in small part by expansion in loans—mainly business, real estate and "other" loans. Banks purchased new tax anticipation bills in mid-February but reduced their holdings of Government securities at other times during the period.

Member bank borrowings from the Federal Reserve averaged \$560 million and excess reserves \$410 million over the four weeks ending March 11. Borrowings were somewhat higher and excess reserves somewhat lower than earlier in the year. Between mid-February and mid-March the volume of reserves absorbed through System sales of Government securities and increases in Treasury deposits at the Reserve Banks exceeded that supplied through a decline in required reserves.

### SECURITY MARKETS

From mid-February to mid-March bond yields generally declined somewhat. The market rate on 90-day Treasury bills, which usually rises at this season of the year, increased slightly to about 2.80 per cent. Discount rates at Federal Reserve Banks were raised one-half percentage point to 3.00 per cent.

Tables on the following pages include the principal statistics of current significance relating to financial and business developments in the United States. The data relating to Federal Reserve Banks, member banks of the Federal Reserve System, and department store trade, and the consumer credit estimates are derived from regular reports made to the Board; production indexes are compiled by the Board on

the basis of material collected by other agencies; figures for gold stock, currency in circulation, Federal finance, and Federal credit agencies are obtained from Treasury statements; the remaining data are obtained largely from other sources. Back figures for 1941 and prior years for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, Banking and Monetary Statistics.

<sup>Preliminary.
Averages of daily closing figures for reserves and borrowings and of daily opening figures for other items, inasmuch as reserves required are based on deposits at opening of business.
Weekly figures of required, excess, and free reserves of all member</sup> 

banks and of country banks are estimates.

<sup>3</sup> Demand deposits subject to reserve requirements, i.e., gross demand deposits minus cash items reported as in process of collection and demand balances due from domestic banks.

<sup>4</sup> Free reserves are excess reserves less borrowings.

¹ Loans made by private financing institutions and guaranteed by Government procurement agencies, pursuant to the Defense Production Act of 1950. Federal Reserve Banks act as fiscal agents of the guaranteeing agencies in these transactions, and the procedure is governed by Regulation V of the Board of Governors.

NOTE.—The difference between guaranteed loans authorized and sum of loans outstanding and additional amounts available to borrowers under guarantee agreements outstanding represents amounts repaid, guarantees authorized but not completed, and authorizations expired or withdrawn.

<sup>1</sup> Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.
2 Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.
3 Not covered by Federal Reserve Bank commitment to purchase or discount.
Note.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

### MAXIMUM INTEREST RATES PAYABLE ON TIME DEPOSITS

[Per cent per annum]

Type of deposit	Feb. 1, 1935- Dec. 31, 1935	Jan. 1, 1936- Dec. 31, 1956	Effective Jan. 1, 1957
Savings deposits	21/2	21/2	3
Postal Savings deposits	21/2	21/2	3
Other time deposits payable: In 6 months or more In 90 days to 6 months In less than 90 days	2½ 2½ 2½ 2½	2½ 2 1	3 2½ 1

Note.—Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q. Under this Regulation the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Maximum rates that may be paid by insured nonmember banks as established by the F.D.I.C., effective Feb. 1, 1936, are the same as those in effect for member banks.

### FEES AND RATES ON LOANS GUARANTEED UNDER REGULATION $\mathbf{V}^1$

[In effect Feb. 28]

Fees Payable to Guaranteeing Agency by Financing Institution on Guaranteed Portion of Loan

Percentage of loan guaranteed	Guarantee fee (percentage of interest payable by borrower)	Percentage of any commitment fee charged borrower
70 or less	10 15 20 25 30 35 40–50	10 15 20 25 30 35 40–50

Maximum Rates Financing Institution May Charge Borrower [Per cent per annum]

<sup>&</sup>lt;sup>1</sup> Schedule of fees and rates established by the Board of Governors on loans made by private financing institutions and guaranteed by Government procurement agencies, pursuant to the Defense Production Act of 1950. Federal Reserve Banks act as fiscal agents of the guaranteeing agencies in these transactions, and the procedure is governed by Regulation V of the Board of Governors.

Standard silver dollars Silver bullion Silver certificates and Treasury notes of 1890 Subsidiary silver coin. Minor coin. United States notes. Federal Reserve Bank notes. National Bank notes.	2,245 <sup>3</sup> 2,402 1,462 519 347 115	157 2,245	45 		8 345 85 13 40 1	278 2,057 1,362 500 301 114 58	278 2,178 1,399 505 311 115 58	262 2,011 1,317 482 301 125 60		
Total—Jan. 31, 1959	(5)	22,326 22,404 24,541	721 683 771	17,077 17,135 19,289	5,279 4,815 5,414	31,125		30,576		

<sup>1</sup> Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above; totals for Wednesday dates, in table on p. 268.

2 Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.

3 To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.

4 Less than \$500,000.

5 Because some of the types of currency shown are held as collateral or

receipt); (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (4) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such sold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Each Federal Reserve Bank must maintain a reserve in gold certificates of at least 25 per cent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve agents as collateral, and those deposited with the Treasury of the United States as a redemption fund, are counted as reserve. Gold certificates, as herein used, includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

<sup>&</sup>lt;sup>5</sup> Because some of the types of currency shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See NOTE for explanation of duplications.

Note.—There are maintained in the Treasury—(1) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (2) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on

Note.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in other securities and in capital and miscellaneous accounts, net, and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against capital and miscellaneous accounts, net, instead of against U. S. Govt. deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes foreign bank deposits, net, and Treasury cash. Except on call dates, figures are rounded to nearest \$100 million and may not add to the totals.

Preliminary.

Revised.

Represents all commercial and savings banks, Federal Reserve Banks, Postal Savings System, and Treasury currency funds (the gold account, Treasury currency account, and Exchange Stabilization Fund).

Excludes interbank time deposits; U. S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

Prior to June 30, 1947, includes a small amount of demand deposits.

Poemand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.

Seasonally adjusted series begin in 1947 and are available only for last Wednesday of the month. For back figures, see BULLETIN for July 1957, pp. 828-29.

### PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF ALL BANKS, BY CLASSES1

\*\* Preliminary. \*\* Revised.

1 All banks in the United States. Beginning with January 1959, includes figures for all banks in Alaska (previously one member bank had been included). Assets of the banks that were added totaled \$185 million on Dec. 31, 1958.

All banks comprise all commercial banks and all mutual savings banks. All commercial banks comprise all nonmember commercial banks and all member banks (including (1) one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively, and (2) a noninsured nondeposit trust company, but excluding three mutual savings banks that became members in 1941).

Stock savings banks and nondeposit trust companies are included with commercial banks. Number of banks includes a few noninsured banks for which asset and liability data are not available. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

2 Beginning June 30, 1942, excludes reciprocal balances, which on Dec. 31, 1942, aggregated \$513 million at all member banks and \$525 million at all insured commercial banks.

3 Includes other assets and liabilities not shown separately. For other notes see following two pages.

### PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF ALL BANKS, BY CLASSES1-Continued

<sup>4</sup> Beginning with Dec. 31, 1947, the all-bank series was revised as announced in November 1947 by the Federal bank supervisory agencies. At that time a net of 115 noninsured nonmember commercial banks with total loans and investments of about \$110 million was added, and 8 banks with total loans and investments of \$34 million were transferred

from noninsured mutual savings to nonmember commercial banks.

<sup>5</sup> Less than \$5 million. Because preliminary data are rounded to the nearest \$10 million no amount is shown except on call dates.

cluded in member banks but are *not* included in all insured commercial banks or all commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

For other notes see opposite page.

<sup>&</sup>lt;sup>e</sup> Estimated.

<sup>1</sup> All commercial banks in the United States. These figures exclude data for banks in U. S. possessions except for one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively. During 1941 three mutual savings banks became members of the Federal Reserve System; these banks are in-

<sup>&</sup>lt;sup>2</sup> Beginning June 30, 1948, figures for various loan items are shown gross (i.e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown net.

<sup>3</sup> Breakdowns of loan, investment, and deposit classifications are not available prior to 1947; summary figures for earlier dates appear in the preceding table.

<sup>&</sup>lt;sup>4</sup> Central reserve city banks.
<sup>5</sup> Beginning June 30, 1942, excludes reciprocal bank balances, which on Dec. 31, 1942, aggregated \$513 million at all member banks and \$525 million at all insured commercial banks.
<sup>6</sup> Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.
For other notes see opposite page.

<sup>&</sup>lt;sup>1</sup> As reported by dealers; includes finance company paper as well as other commercial paper sold in the open market.

<sup>2</sup> As reported by finance companies that place their paper directly with investors.

J Includes machinery and transportation equipment.
 Prior to week ending Jan. 11, 1956, included changes in agricultural

loans.

5 January-June includes 25 weeks; July-December, 27 weeks.

6 Figures revised; see BULLETIN for February 1959, p. 216, note 4.

<sup>&</sup>lt;sup>3</sup> Beginning with November 1958, series revised to include 270-day paper. Figures on old basis for November and December, respectively, were (in millions of dollars): Total, 3,192 and 2,371; placed directly, 2,252 and 1,891.

<sup>&</sup>lt;sup>1</sup> Monthly and weekly yields are averages of daily figures for U. S. Govt. and corporate bonds. Yields of State and local govt. bonds are based on Thursday figures; dividend/price ratios for preferred and common stocks, on Wednesday figures. Earnings/price ratios for common stocks are as of end of period.

<sup>2</sup> Series is based on bonds maturing or callable in 10 years or more. <sup>3</sup> Moody's Investors Service. State and local govt. bonds include general obligations only.

Average of daily prevailing rates.
 Except for new bill issues, yields are averages computed from daily closing bid prices.
 Consists of certificates of indebtedness and selected note and bond issues.
 Consists of selected note and bond issues.

<sup>&</sup>lt;sup>4</sup> Includes bonds rated Aa and A, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat.

<sup>5</sup> Standard and Poor's Corporation. Preferred stock ratio is based on 8 median yields in a sample of noncallable issues—12 industrial and 2 public utility. For common stocks, the dividend/price and the earnings/price ratios are now computed for the 500 stocks in the price index, but figures prior to mid-1957 are based on the 90 stocks formerly included in the daily price index,

<sup>&</sup>lt;sup>1</sup> Monthly and weekly data for (1) U. S. Govt. bond prices, Standard and Poor's common stock indexes, and volume of trading are averages of daily figures; (2) municipal and corporate bond prices are based on Wednesday closing prices; and (3) the Securities and Exchange Commission series on common stock prices are based on weekly closing prices.

<sup>2</sup> Prices derived from average market yields in preceding table on basis of an assumed 3 per cent, 20-year bond.

<sup>3</sup> Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent, 20-year bond.

<sup>4</sup> Average daily volume of trading in stocks on the New York Stock Exchange for a 5½-hour trading day.

<sup>&</sup>lt;sup>1</sup> Ledger balances of member firms of the New York Stock Exchange carrying margin accounts, as reported to the Exchange. Customers' debit and free credit balances exclude balances maintained with the reporting firm by other member firms of national securities exchanges and balances of the reporting firm and of general partners of the reporting firm. Balances are net for each customer—i.e., all accounts of one customer are consolidated. Money borrowed includes borrowings from banks and from other lenders except member firms of national securities exchanges. Data are as of the end of the month, except money borrowed, which is as of the last Wednesday of the month beginning with June 1955.

<sup>&</sup>lt;sup>2</sup> Figures are for last Wednesday of month for weekly reporting member banks, which account for about 70 per cent of all loans for this purpose, Column 5 includes some loans for purchasing or carrying U. S. Govt. securities (such loans are reported separately only by New York and Chicago banks). On June 30, 1956, reporting banks outside New York and Chicago held \$51 million of such loans. On the same date insured commercial banks not reporting weekly held loans of \$28 million for purchasing and carrying U. S. Govt. securities and of \$384 million for other securities. Noninsured banks had \$33 million of such loans, probably mostly for purchasing or carrying other securities.

<sup>&</sup>lt;sup>1</sup> Figures are for all savings and loan associations in the United States. Data beginning with 1950 are based on monthly reports of insured associations and annual reports of noninsured associations. Data prior to 1950 are based entirely on annual reports.

<sup>2</sup> Includes gross mortgages with no deduction for mortgage pledged charges.

<sup>&</sup>lt;sup>4</sup> These represent book value of ledger assets. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately, but are included in total, in "Other assets."

shares.

<sup>&</sup>lt;sup>3</sup> Beginning with January 1958, no deduction is made for mortgage pledged shares. These have declined consistently in recent years and amounted to \$42 million at the end of 1957.

<sup>4</sup> Includes other loans, stock in the Federal home loan banks and other investments, real estate owned and sold on contract, and office buildings and fixtures.

Note.—Data for 1958 are preliminary.

Note.—Statistics beginning Mar. 31, 1956, reflect the expanded coverage and the new classification of agencies now reported in the Treasury Bulletin. The revised statement includes a larger number of agencies, and their activities are classified according to the type of fund they represent. Funds are combined in the table above, but are shown separately in the table on the following page. Classifications by supervisory authorities are those in existence currently. Where current Treasury compilations do not provide a detailed breakdown of loans, these items have been classified by Federal Reserve on basis of information about the type of lending activity involved.

\* Totals reflect exclusion of agencies reporting other than quarterly. I Figures for trust revolving funds include interagency items. For all types of funds combined, loans by purpose and agency are shown on a gross basis; total loans and all other assets, on a net basis, i.e., after reserve for losses.

2 Coverage changed from preceding period (see also NOTE).

<sup>3</sup> Effective Jan. 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (70 Stat. 659). Thereafter operations of the banks are classified as trust revolving transactions.

<sup>4</sup> Less than \$500,000.

<sup>5</sup> Figures represent largely the Treasury loan to the United Kingdom, and through 1952 are based in part on information not shown in Treasury compilation.

and through 1952 are based in part on information not shown in a reason, compilation.

6 Figure derived by Federal Reserve.

7 Includes investment of the Agricultural Marketing revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset.

8 Includes \$1,000 million due under the agreement with Germany signed Feb. 27, 1953, and lend-lease and surplus property balances due the United States in the principal amount of \$1,875 million.

Preliminary.
 1 Consists primarily of interest payments by Treasury to trust accounts and to Treasury by Govt. agencies, transfers to trust accounts representing

Budget expenditures, and payroll deductions for Federal employees retirement funds.

<sup>2</sup> Small adjustments to arrive at this total are not shown separately. For other notes, see opposite page.

<sup>&</sup>lt;sup>3</sup> Consists primarily of (1) intra-Governmental transactions as described in note 1, (2) net accruals over payments of interest on savings bonds and Treasury bills, (3) Budget expenditures involving issuance of Federal securities, (4) cash transactions between International Monetary Fund and the Treasury, (5) reconciliation items to Treasury cash, and (6) net operating transactions of Govt. sponsored enterprises.

<sup>4</sup> Primarily adjustments 2, 3, and 4, described in note 3.

<sup>5</sup> Excludes net transactions of Govt. sponsored enterprises, which are included in the corresponding columns above.

<sup>6</sup> Includes transfers to Federal disability insurance trust fund.

<sup>7</sup> Represents the sum of taxes for old-age insurance, railroad retirement, and unemployment insurance.

separately.

For other notes, see opposite page.

<sup>&</sup>lt;sup>8</sup> The 1960 Budget document showed certain revisions in fiscal year data. When the revisions were in classification of functions—such as the shift of defense-support activities from military assistance and major national security to international affairs—the revisions were made in monthly and semiannual data. Other fiscal year revisions not available for monthly and semiannual periods.

For more details, see the 1960 Budget document and the Treasury Bulletin, Table 4.

9 Includes stockpiling and defense production expansion not shown separately.

r Revised.

1 Estimates of new issues maturing in more than one year sold for cash in the United States.

2 Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

3 Includes guaranteed issues.

4 Issues not guaranteed.

5 Represents foreign governments, International Bank for Reconstruction and Development, and domestic eleemosynary and other nonprofit organizations.

<sup>6</sup> Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.

7 Represents proceeds for plant and equipment and working capital.

8 Represents proceeds for the retirement of mortgages and bank debt with original maturities of more than one year. Proceeds for retirement of short-term bank debt are included under the uses for which the bank debt was incurred.

9 Less than \$500,000.

10 Represents all issues other than those for retirement of securities.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that quarterly figures on operating revenue and profits before taxes are partly

estimated by the Federal Reserve to include affiliated nonelectric operations.

tions. Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For detailed description of series (but not for figures), see pp. 662–66 of the BULLETIN for June 1949 (manufacturing); pp. 215–17 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power). Revised data annually beginning with 1939 and quarterly beginning with 1946 are available from the Division of Reserach and Statistics.

<sup>&</sup>lt;sup>1</sup> Includes 26 companies in groups not shown separately, as follows: textile mill products (10); paper and allied products (15); miscellaneous (1). <sup>2</sup> Includes 25 companies in groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

NOTE.—Manufacturing corporations. Sales data are obtained from the Securities and Exchange Commission; other data from published

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

\*P Preliminary.

1 Derived figures, which include negligible amount of farm loans held by savings and loan associations.

2 Derived figures, which include debt held by Federal land banks and Farmers Home Administration.

NOTE.—Figures for first three quarters of each year are Federal Reserve estimates. Financial institutions represent commercial banks (including nondeposit trust companies but not trust departments), mutual savings banks, life insurance companies, and savings and loan associations.

Federal agencies represent HOLC, FNMA, and VA (the bulk of the amounts through 1948 held by HOLC, since then by FNMA). Other Federal agencies (amounts small and separate data not readily available currently) are included with individuals and others.

Sources.—Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, Institute of Life Insurance, Departments of Agriculture and Commerce, Federal National Mortgage Association, Veterans Administration, Comptroller of the Currency, and Federal Reserve.

based on Federal Reserve preliminary tabulation of a revised series of banking statistics. March and September figures are Federal Reserve estimates based in part on data from National Association of Mutual Savings Banks.

Sources.—All-bank series prepared by Federal Deposit Insurance Corporation from data supplied by Federal and State bank supervisory agencies, Comptroller of the Currency, and Federal Reserve.

P Preliminary.
 Represents all banks in the United States and possessions.
 Includes loans held by nondeposit trust companies but excludes holdings of trust departments of commercial banks. March and September figures are Federal Reserve estimates based on data from Member Bank Call Report and from weekly reporting member banks.
 Figures for 1941 and 1945, except for the grand total, are estimates

Note.—For loans acquired, the monthly figures may not add to annual totals, and for loans outstanding, the end-of-December figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset

values, and because data for year-end adjustments are more complete. Source.—Institute of Life Insurance; end-of-year figures are from Life Insurance Fact Book, and end-of-month figures from the Tally of Life Insurance Statistics and Life Insurance News Data.

1959—Jan	700	217	369	37	77	276	194	81

Monthly figures do not reflect mortgage amendments included in annual totals.
 These loans are not ordinarily secured by mortgages.
 Includes a small amount of alteration and repair loans, not shown separately; only such loans in amounts of more than \$1,000 need be secured.

Note.—FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amount of loans closed. Figures do not take account of principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

Sources.—Federal Housing Administration and Veterans Administration.

<sup>&</sup>lt;sup>1</sup> Represents all consumer instalment credit extended for the purpose of purchasing automobiles and other consumer goods, whether held by retail outlets or financial institutions. Includes credit on purchases by individuals of automobiles or other consumer goods that may be used in part for business.

<sup>2</sup> Represents repair and modernization loans held by financial institutions; holdings of retail outlets are included in other consumer goods paper.

Note.—Monthly figures for the period December 1939 through 1947, and a general description of the series are shown on pp. 336-54 of the BULLETIN for April 1953; monthly figures for 1948-57, in the BULLETINS for October 1956, pp. 1035-42, December 1957, pp. 1420-22, and November 1958, pp. 1344-45. A detailed description of the methods used to derive the estimates may be obtained from Division of Research and Statistics.

 $<sup>^{\</sup>rm 1}$  Obtained by subtracting instalment credit repaid from instalment credit extended.

in the BULLETIN for January 1954, pp. 9-17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

Note.—Monthly figures for 1940-54 are shown on pp. 1043-54 of the Bulletin for October 1956; for 1955-57, in the Bulletins for December 1957, pp. 1420-22, and November 1958, pp. 1344-45.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown

### INSTALMENT CREDIT EXTENDED AND REPAID, BY HOLDER

[Estimates of short- and intermediate-term credit, in millions of dollars. The terms "adjusted" and "unadjusted" refer to adjustment of monthly figures for seasonal variation and differences in trading days]

¹ Data on extensions and repayments have been adjusted to avoid duplications resulting from large transfers of other consumer goods paper. As a result, the differences between extensions and repayments for some types of holders do not equal the changes in outstanding credit.

² Obtained by subtracting instalment credit repaid from instalment credit extended, except as indicated in note 1.

Note.—Monthly figures for 1940-54 are shown on pp. 1043-54 of the Bulletin for October 1956; for 1955-57, in the Bulletins for December 1957, pp. 1420-22, and November 1958, pp. 1344-45.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown in the BULLETIN for January 1954, pp. 9-17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

\* Average per working day.

<sup>1</sup> Indexes beginning 1956 are based on data for 48 States from F. W. Dodge Corporation, 1956-57= 100. Figures for earlier years are threemonth moving averages, based on data for 37 States east of the Rocky Mountains, 1947-49= 100; the data for 1956 on this basis were: Total, 268; Residential, 271; and all other, 266. A description of the old index, including seasonal adjustments, may be obtained from the Division of Research and Statistics.

<sup>&</sup>lt;sup>2</sup> The indexes of employment and payrolls, wholesale commodity prices, and consumer prices are compiled by the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces. The consumer price index is the revised series, reflecting, beginning January 1953, the inclusion of some new series and revised weights; prior to January 1953, indexes are based on the "interim adjusted" and "old" indexes converted to the base 1947–49=100.

 Publication suspended pending revision.

Note.—A number of groups and subgroups include individual series not published separately, and metal fabricating contains the ordnance group in addition to the groups shown. Certain types of combat materiel

are included in major group totals but not in individual indexes for autos farm machinery, and some other products, as discussed in the BULLETIN for December 1953, pp. 1269-71.

For description and back figures, see BULLETIN for December 1953, pp. 1247-93 and pp. 1298-1328, respectively.

Preliminary.
 Revised.
 n.a. Not available.
 Represents units started under commitments of FHA or VA to insure or guarantee the mortgage.
 VA figures after June 1950 and all FHA

figures are based on filed office reports of first compliance inspections; earlier VA figures are estimates based on loans-closed information.

Preliminary.
 Preliminary.
 Figures for sales are the average per trading day, while those for stocks are as of the end of the month or averages of monthly data.

Note.—For description of the series and for monthly indexes beginning 1947, see Bulletin for December 1957, pp. 1323-52. Figures prior to 1947 may be obtained from the Division of Research and Statistics.

P Preliminary.
 Revised.
 1 These figures are not estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1958, sales by these stores accounted for about 45 per cent of estimated total department store sales.
 2 Derived from the reported figures on sales and stocks.

<sup>&</sup>lt;sup>3</sup> Derived from receipts and reported figures on outstanding orders.

<sup>4</sup> The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

Note.—For description and monthly figures for back years, see BULLETIN for October 1952, pp. 1098–1102.

<sup>&</sup>lt;sup>7</sup>Revised.

<sup>1</sup> Exports of domestic and foreign merchandise.

<sup>2</sup> Department of Defense shipments of grant-aid military equipment and supplies under the Mutual Security Program.

<sup>&</sup>lt;sup>3</sup> General imports including imports for immediate consumption plus entries into bonded warehouses.

Note—Data for both export items for 1957 and most of 1958 and data for imports in some months of both years has been revised.

<sup>&</sup>lt;sup>1</sup> Includes expenditures for crude petroleum and natural gas drilling.

<sup>2</sup> Series revised on basis of definitional changes in two components of the gross national product estimates; for explanation see *United States Income and Output* (a supplement to the Survey of Current Business for 1959) and the December 1958 issue of the Survey of Current Business.

<sup>3</sup> Net exports of goods and services and net foreign investments have been equated, since foreign net transfers by government were negligible during the period 1929–45.

<sup>4</sup> This category corresponds closely to the major national security classification in the *Budget of the United States Government* for the fiscal year ending June 30, 1960.

<sup>5</sup> Consists of sales abroad and domestic sales of surplus consumption goods and materials.

P Preliminary.

1 Monthly data are seasonally adjusted totals at annual rates.

2 Represents compensation for injuries, employer contributions to private pension and welfare funds, and other payments.

3 Represents business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.

4 Represents government social insurance benefits, direct relief, mustering-out pay, veterans' readjustment allowances and other payments, as well as consumer bad debts and other business transfers.

<sup>5</sup> Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.

<sup>6</sup> Represents personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net interest, and net dividends paid by agricultural corporations.

Index to statistical tables	344

Tables on the following pages include the principal available statistics of current significance relating to international capital transactions of the United States, foreign gold reserves and dollar holdings, and the balance of payments of the United States. The figures on international capital transactions are collected by the Federal Reserve Banks from banks, bankers, brokers, and

dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Other data are compiled largely from regularly published sources such as central bank statements and official statistical bulletins. Back figures for 1941 and prior years, together with descriptive text, may be obtained from the Board's publication, Banking and Monetary Statistics.

P Preliminary.

Revised.

1 Short-term liabilities reported in these statistics represent principally deposits and U. S. Government obligations maturing in not more than one year from their date of issue; small amounts of bankers' acceptances and commercial paper and of liabilities payable in foreign currencies are also included. Banking liabilities to foreigners maturing in more than one year (excluded from these statistics) amounted to \$2 million on Jan. 31, 1959.

2 Includes International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations.

3 Represents liabilities to foreign central banks and foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.)

4 Includes Bank for International Settlements.

<sup>&</sup>lt;sup>5</sup> Part of the United Arab Republic since February 1958.

<sup>6</sup> Except where noted, these data are based on reports by banks in the Second (New York) Federal Reserve District. They represent a partial breakdown of the amounts shown in the "other" categories in tables 1a-1c.

<sup>7</sup> Based on reports by banks in all Federal Reserve districts.

NOTE.—Statistics on international capital transactions of the United States are based on reports by U. S. banks, bankers, brokers, and dealers, by branches or agencies of foreign banks, by certain domestic institutions not classified as banks that maintain deposit or custody accounts for foreigners, and by the U. S. Treasury. The term "foreigner" is used to designate foreign governments, central banks, and other official institutions as well as banks, organizations, and individuals domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms.

P Preliminary. 1 Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves, Reserve Bank Credit, and Related Items" or in the Treasury statement "United States Money, Outstanding and in Circulation, by Kinds."

<sup>\*</sup>Revised.

1 Includes sales of gold to Belgian Congo as follows (in millions): 1951, \$8.0; 1952, \$2.0; and 1953, \$9.9.

2 Less than \$50,000.

3 Includes purchases of gold from Spain as follows (in millions): 1957,

<sup>\$31.5;</sup> and 1958, \$31.7.

4 Includes sale of \$30 million of gold to Japan.

5 Figures represent purchase of gold from, or sale to (-), International Monetary Fund.

Net after payment of \$687.5 million in gold as United States gold subscription to the International Monetary Fund.
 Not yet available.
 Gold held under earmark at the Federal Reserve Banks for foreign and international accounts amounted to \$8,616.3 million on Feb. 28, 1959.
 Gold under earmark is not included in the gold stock of the United States

<sup>5</sup> Part of the United Arab Republic since February 1958.
<sup>6</sup> Excludes gold reserves of the U. S. S. R. and other Eastern European countries.

Note.—Gold and short-term dollars include reported and estimated official gold reserves, and total dollar holdings as shown in Short-term Liabilities to Foreigners Reported by Banks in the United States by Countries (Tables 1 and 1a-1d of the preceding section). U. S. Govt. bonds and notes represent estimated holdings with original maturities of more than one year; these estimates are based on a survey of selected U. S. banks and on monthly reports of security transactions.

P Preliminary.
 Revised.
 1 Excludes gold holdings of French Exchange Stabilization Fund.
 2 Less than \$500,000.
 3 Includes Yugoslavia, Bank for International Settlements (both for its own and European Payments Union account), gold to be distributed by the Tripartite Commission for Restitution of Monetary Gold, and unpublished gold reserves of certain Western European countries.
 4 Includes latest reported figure (Oct, 31) for gold reserves.

#### REPORTED GOLD RESERVES OF CENTRAL BANKS AND GOVERNMENTS

Currencies include demand obligations held in lieu of deposits.
 Represents principal of authorized loans, less loans not yet effective, repayments, the net amount outstanding on loans sold or agreed to be sold to others, and exchange adjustment.
 Excludes uncalled portions of capital subscriptions.
 Loans to dependencies are included with member.
 Includes also effective loans agreed to be sold but not yet disbursed.
 Less than \$500,000.
 Includes \$129 million in loans not yet effective.
 Includes \$246 million not guaranteed by the Bank.
 U. S. Treasury bills purchased with proceeds of sales of gold.
 Transferred to general reserve.
 Represents sales of U. S. dollars by the Fund to member countries for local currencies, less repurchases of such currencies with dollars.

national public securities; El Salvador—3 per cent for agricultural and industrial paper and 2 per cent for special cases; Finland—rates ranging up to 7.25 per cent for longer term paper (rate shown is for 3 months commercial paper); Indonesia—various rates depending on type of paper, collateral, commodity involved, etc.; Japan—penalty rates (exceeding the basic rate shown) for borrowings from the Central bank in excess of an individual bank's quota; Peru—4 per cent for industrial paper and mining paper, and 3 per cent for most agricultural paper; and Philippine Republic—4.5 per cent for crop loan paper and 5 per cent for export packing credit paper.

3 Since Nov. 1, 1956, the discount rate has been set each week at ¾ of one per cent above the latest average tender rate for Treasury bills; end-of-month rate shown.

4 Rate shown is for advances only.

5 Since May 16, 1957, this rate applies to advances against commercial paper as well as against government securities and other eligible paper.

¹ Rates shown represent mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or government securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which the largest proportion of central bank credit operations is understood to be transacted. In certain cases other rates for these countries are given in note 2.

² Discounts or advances at other rates include: Argentina—3 and 5 per cent for certain rural and industrial paper, depending on type of transaction; Brazil—8 per cent for secured paper and 4 per cent for certain agricultural paper; Chile—rates of more than 6 per cent for rediscounts in excess of 50 per cent of the rediscounting bank's capital and reserves, and 2 and 4 per cent for certain types of agricultural paper; Colombia—3 per cent for agricultural paper and for loans on products in bonded warehouses; Costa Rica—5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper); Cuba—4.5 per cent for sugar loans and 4 per cent for loans secured by

Based on quotations through Dec. 29, 1958.
 Effective Jan. 12, 1959, the Argentine Government established a single exchange rate for the peso in place of the former official and free rates.
 Based on quotations through June 20, 1958,

<sup>&</sup>lt;sup>4</sup> Effective rate of 420 francs per U. S. dollar, established Aug. 12, 1957, was extended to all foreign exchange transactions on Oct. 28, 1957, and on June 23, 1958, became the official rate. On Dec. 29, 1958, the franc was further devalued to 493.706 francs per U. S. dollar.

<sup>5</sup> Based on quotations beginning Jan. 2, 1958.
