#### Subscription Price of Bulletin

A copy of the Federal Reserve Bulletin is sent to each member bank without charge. The subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Newfoundland (including Labrador), Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela, is \$2.00 per annum, or 20 cents per copy; elsewhere, \$2.60 per annum or 25 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 15 cents per copy per month, or \$1.50 for 12 months.

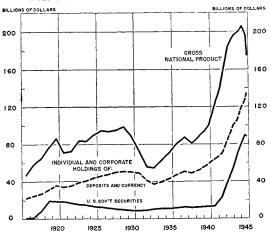

### FEDERAL RESERVE BULLETIN

November 1945 VOLUME 31 NUMBER II

### WARTIME MONETARY EXPANSION AND POSTWAR NEEDS

Bank deposits and currency held by individuals and businesses expanded by almost 70 billion dollars as a result of financing the war and are now more than double the 1941 level. In addition, holdings by these of United States Government securities, which may readily be converted into money, have increased an additional 70 billion dollars. There will be further increases as a result of the current Victory Loan. The magnitude of the wartime expansion in these holdings is indicated on the chart, which shows amounts outstand-

GROSS NATIONAL PRODUCT AND INDIVIDUAL AND CORPORATE HOLDINGS OF CASH AND GOVERNMENT SECURITIES

Figures for gross national product are annual totals, 1916-1938; semi-annual, 1939 through first half of 1945; and quarterly for last half of 1945; all figures are expressed on an annual basis. Sources: 1916-1918, Department of Commerce estimates based on National Bureau of Economic Research estimates of the production of finished goods; 1919-1929, Federal Reserve BULLETIN, September 1945, p. 873; 1930-1945 (first half), Department of Commerce estimates; last two quarters of 1945, preliminary estimates made by Federal Reserve.

Figures for individual and corporate holdings of cash and Government securities are for June 30, 1916-1938; June 30 and December 31, 1939—June 1945; latest figures are preliminary estimates for September 30, 1945. All figures are estimated by Federal Reserve on basis of banking and corporation data from various sources; see June 1945 BULLETIN, pp. 532-535.

ing and compares them with the dollar value of the country's annual gross product during the past 30 years.

Expansion of money and Government security holdings is an almost inevitable result of war. Every country engaged in the war experienced a similar rise. Individuals and corporations received large incomes, a considerable part of which they could not spend. They were free to decide whether to hold their funds in the form of currency or deposits, or to invest them in Government securities or in other ways. The role of commercial banks was to purchase such securities as were issued by the Government and not acquired by other investors; by doing this the banks added to the money supply and enabled the public to keep in cash or as deposits the part of their excess earnings that they did not choose to invest in Government securities. The Federal Reserve Banks in turn purchased such amounts as were necessary to maintain bank reserves at the required level. In the aggregate, a little more than 40 per cent of the Government's wartime expenditures were met out of tax revenues, 32 per cent by borrowing from nonbank investors, and 28 per cent through securities purchased by the banks, including savings institutions.

### WARTIME NEEDS FOR MONEY

Wartime expansion in deposits and currency reflected in part the increased require-

November 1945 1091 ments and in part the preferences of individuals and businesses in an expanding economy. With increased incomes and business volumes there was need for larger cash holdings. During the early years of the defense preparation and war, the growth in deposits and currency was not as great as the increase in the total value of the national product, but since 1942 cash holdings have expanded more rapidly than gross product. The relationship of the volume of deposits and currency holdings to production and incomes is shown on the chart.

Average deposit and currency holdings of individuals and businesses were about 60 per cent of the gross national product during the period 1935–39, a higher figure than prevailed in the 1920's when business was more active. By 1942 this ratio had declined to about 50 per cent, but by the third quarter of 1945 it had increased to over 65 per cent. With the decrease in production and income following termination of the war, even though there should be little further increase in the amount of deposits, the ratio will be about 75 per cent by the end of 1945.

In addition to growing cash needs commensurate with expanding business and income payments, there were other special wartime factors operating to increase the desire of the public for holding cash and other liquid assets. The growth of tax liabilities, especially those of corporations, the inability to make capital expenditures equivalent to current allowances for depreciation, and the absence of many consumer goods from the market all tended to encourage businesses and individuals to accumulate liquid assets in order to have funds readily available for use when the situation changed. In addition, the uncertain prospects for income, employment, and sales

gave money holders an added reason for maintaining a degree of liquidity not normally required.

While monetary expansion in the war period has been at least equal to and probably in excess of all of these needs, this has been the inevitable result of providing all the financing needed for effective prosecution of the war at a low and stable level of interest rates. During this period excessive use of the available supply of money and undue inflation of prices have been avoided by the imposition of direct controls, such as price ceilings, priorities, allocations, and rationing, by inability to secure many goods, and by voluntary restraints on spending.

Termination of the war has brought changes in the financial needs both of the Government and of the rest of the economy. Government deficits and borrowings will shrink sharply from war levels; businesses and individuals will be less restricted in ability to use funds available to them; the volume of economic activity will be somewhat smaller; and needs for a high degree of liquidity will be lessened. With the decreased need for liquidity there will be an opportunity to channel savings more into nonmonetary forms. This will help the Government to meet the recurring problem of refunding the public debt and to secure the funds necessary to offset the redemption of savings bonds and tax notes turned in to discharge tax liabilities and for other purposes.

### OWNERSHIP OF DEPOSITS AND CURRENCY

Increased holdings of deposits and currency during the war have been widely distributed among different groups of holders. Almost all groups have had substantial increases in holdings of demand deposits, particularly those groups in which large

deferred capital and consumption expenditures are to be expected. The most recent Federal Reserve survey of demand deposit ownership, elsewhere reported in this Bul-LETIN and summarized in the following table, shows that manufacturing and mining businesses have increased their holdings by 84 per cent since December 1941 and trade concerns have increased theirs by 137 per cent. Personal holdings are up 140 per cent. Although estimates of farmer ownership over the whole period are not available, it appears that expansion of farmers' deposits has been even more rapid. only important group not reporting deposit gains are insurance companies, which have generally kept their funds fully invested.

 Excludes foreign banks and governments.

In addition to holdings of demand deposits, shown in the table, there have been substantial increases in currency and in time deposits, which are largely held by individuals. The amount of currency in circulation outside of banks has increased from about 9 billion dollars in 1941 to 26 billion at present. Time deposits expanded more slowly than demand deposits and currency in the early years of the war but have increased more rapidly in the past two years. Since 1941 all time deposits, including those of mutual savings banks and postal savings deposits as well as those at commercial banks, have expanded from 28 billion dollars to 47 billion. It is estimated that total holdings of deposits and currency by individuals, excluding unincorporated businesses, have grown from 46 billion dollars at the end of 1941 to about 95 billion at the end of September 1945.

#### Basis of Monetary Expansion

Principal banking factors accounting for changes in the amount of bank deposits and currency during the war are shown in the following table. While ultimate decisions as to amounts of deposits and currency that may be held rest with businesses and individuals, the banking mechanism makes it possible to effectuate these decisions and also influences them. In the absence of an increase in the country's gold stock, or the payment of Government expenses through the direct issuance of currency, deposits and currency can increase only as the result of an expansion in bank credit. The table shows the dominance of Treasury financing in the growth of deposits and currency during the war.

During the war bank credit extended to individuals or businesses increased very little. Although bank loans to business for war purposes increased, the major expenditures for plants, equipment, and inventories were made directly by the Government and so were not reflected in private credit opera-At the same time business borrowing at banks for nonwar purposes declined, and reduction in long-term indebtedness of business corporations also resulted in a decrease in bank holdings of corporate securities. In addition, there was consid-

November 1945 1093 erable contraction of consumer credit, which directly or indirectly reduced bank loans. Loans for purchasing and carrying Government securities, though sizable, were relatively less important than in the last war.

<sup>-</sup>Estimated.

Since 1942 additions to bank holdings of Government securities generally have occurred during war loan drives. At such times banks had excess reserves because nonbank purchases of Government securities shifted deposits from accounts against which reserves are required to the reserveexempt war-loan accounts of the Govern-At the same time many individuals and corporations sold some of their existing holdings in order to subscribe for new issues in the drive, and these Government securities were largely acquired by the banking system. Between drives some commercial banks sold Government securities to the Reserve Banks in order to obtain additional reserves needed as deposits were reshifted from war-loan accounts to private accounts subject to reserve requirements. Through these steps, as shown in the chart, bank

#### WEEKLY REPORTING MEMBER BANKS

Latest figures are for October 24.

credit was gradually expanded. Aggregate bank holdings, however, showed little or no decline in the interdrive periods because of the increase in Reserve Bank holdings and also because nonreporting banks, which are not included in this chart, generally were buying securities between war loan drives.

In accordance with its wartime policy of supplying banks with reserves needed to enable the war to be financed at a stable level of interest rates, the Federal Reserve System purchased securities sold by banks and others in the market. In this way banks obtained the reserve funds needed to meet the currency and deposit demands of the public. At the same time both Treasury

and Federal Reserve policies have been designed to discourage undue expansion of bank credit by limiting the issues of securities available to banks and by supplying only such additional reserves as were demanded by the banks. Nevertheless, banks could by selling short-term low-rate securities to the Reserve Banks and purchasing longer-term higher-rate issues in the market, actively bid securities away from other holders and bring about a further expansion of bank reserves and deposits. This practice has been particularly in evidence during the past year.

### Treasury Requirements in Transition Period

As the Federal Government deficit declines, this dominant wartime factor in the growth of bank credit, of deposits and currency, and of holdings of Government securities by individuals and businesses will diminish and perhaps even disappear. Federal Government expenditures, which reached a wartime peak of over 100 billion dollars a year, are being drastically reduced and by the end of 1946 may be at a level of little over 30 billion a year. Receipts of the Government, which in the last fiscal year amounted to 47 billion dollars, will decline somewhat as a result of decreases in incomes and tax revisions, and there will continue to be a deficit throughout the next year. For the last six months of 1945, which include expenditures for a part of the war and for much of the reconversion and demobilization, the deficit will amount to about 20 billion dollars, and in the first six months of 1946 it may amount to about 10 billion or less. During the next several months the Treasury may need additional funds to meet substantial redemptions of demand and maturing obligations held by

individuals and corporations seeking cash during the reconversion and demobilization period.

The Victory Loan now in progress is for the purpose of raising funds to meet these requirements of the Treasury. It is important that investors other than banks subscribe in full for the securities offered in this drive and that the use of bank credit be kept to a minimum; special efforts are being made to bring about these results.

Following the Victory Loan the Treasury will have a large cash balance, which will probably be sufficient to meet its deficit and a large part of the security redemptions during 1946. The need for additional openmarket financing will depend primarily upon the amount of redemptions. In any event there should be little or no further increase in the total public debt during 1946, although there may be important shifts in its distribution among different groups of holders. These shifts will reflect the savings, the investment policies, and the cash needs of the various holders.

### BANK CREDIT IN TRANSITION PERIOD

Further developments in bank credit will reflect private credit needs and adjustments in holdings of Government securities. Private demands for credit are not likely to require much net expansion of bank loans. Some demands may emerge, both for business credit and for credit to finance consumer purchases, but the credit extended for war purposes will be in the process of liquidation.

Large net redemptions or sales of Government securities from the holdings of individuals and businesses might necessitate further bank credit expansion. Under the established policy of maintaining stability in the Government security markets, the

NOVEMBER 1945 1095

Federal Reserve Banks would be called upon to purchase a sufficient amount of Government securities to supply the additional bank reserves needed. While the large volume of Government securities held by businesses and individuals provides the possibility of substantial bank credit expansion from this source, such an expansion need not occur. In the absence of a sharp rise in prices there will be no occasion for the public as a whole to add to its already large holdings of cash and deposits by selling Government securities to the banks. Sales by some companies and individuals may be offset in the aggregate by purchases of others.

### PROSPECTIVE SHIFTS IN OWNERSHIP OF GOVERNMENT SECURITIES

Even though the public debt in the aggregate does not increase, there may be substantial shifts in the pattern of Government security ownership. These will result only in part from the sale in the open market of Government securities by present nonbank holders. Holdings of nonmarketable issues, largely savings bonds in the hands of individuals and tax notes in the hands of corporations, will be offered to the Treasury for redemption in cash or, in the case of savings notes, in payment of To the extent that cash from current sales of nonmarketable issues does not cover these redemptions, the Treasury will need to sell additional marketable issues. Refunding of maturing issues will also result in redistribution of ownership to the extent that present owners take cash rather than new issues offered in exchange.

The table shows the estimated distribution of ownership of Government securities as of September 30, 1945, and December 31, 1941.

OWNERSHIP OF UNITED STATES GOVERNMENT DEBT [Estimates, in billions of dollars]

	Outsta	In-	
	Sept.30, 1945	Dec. 31, 1941	crease
Federal Reserve Banks Commercial banks Mutual savings banks Postal Savings System	23.3 83.5 10.0 2.8	2.3 21.8 3.7 1.3	21.0 61.7 6.3 1.5
Total banking system	119.6	29.0	90.6
Individuals <sup>1</sup>	58.5	13.5	45.0
banks and insurance companies2	30.0	4.3	25.7
Insurance companies	23.2	8.2	15.0
State and local governments	5.0 23.8	0.5 8.2	4.5 15.6
Total nonbank investors	140.5	34.7	105.8
Total interest-bearing direct and guaranteed debt	260.2	63.8	196.4

Corporations.—Holdings of Government securities by business corporations other than insurance companies and banks have increased from about 4 billion dollars in 1941 to about 30 billion at present. A third of this growth has been in Treasury tax and savings notes, and most of the remainder has been in short-term securities. These securities are held in part against accrued tax liabilities and in part for prospective cash needs in the reconversion and postwar periods. Accrued tax liabilities will decline as higher taxes for 1945 are paid and the lower ones for 1946 accrue. As this occurs, corporations may liquidate some of the securities held against their tax liabilities.

Financing of reconversion may lead to other demands upon the liquid assets of corporations. Corporate expenditures for acquiring and improving plant and equipment, for rebuilding inventories, and for increasing credits advanced to customers may again exceed internal sources of funds. In addition to their holdings of Government securities, business corporations have approximately doubled their deposit balances at banks during the war. It is probably not to be expected that these balances

<sup>&</sup>lt;sup>1</sup> Includes unincorporated business. <sup>2</sup> Includes brokers, dealers, and foreigners.

will be reduced to prewar levels. If they should be maintained near current levels, any drains on corporate liquid assets to finance reconversion or other postwar needs will be reflected in a decline in corporate holdings of Government securities or an increase in borrowings and security issues. Although some corporations may find themselves in a position to maintain their present liquidity, it appears likely that on balance corporate holdings of Government securities will decline next year.

Individuals.—Some individual owners of Government securities will also be disposing of their holdings. Expenses incidental to shifts in the nature and perhaps location of employment, increased purchases of durable goods as supplies become available, and the buying of homes, farms, corporate securities, and other forms of property may occasion the redemption or sale of Government securities. At the same time many individuals will continue to receive substantial incomes, and net savings by individuals in the aggregate will continue. Outlets for these savings will include substantial purchases of Government securities, as long as the Treasury continues to offer securities that are attractive to individuals and especially if purchases are maintained through pay roll savings plans and by other means.

Redemptions of savings bonds have gradually increased as the aggregate amount outstanding expanded and prior to the end of the war amounted to about 400 million dollars a month. Subsequently they have increased further and in August, September, and October exceeded 500 million a month, slightly above the reduced level of sales in the last two of those months. Sales will increase during the Victory Loan Drive and

then no doubt decline to well below wartime levels. It is not certain, however, that redemptions will continue for any extended period substantially in excess of sales.

Investment Institutions.—Insurance companies will probably continue to purchase Government securities. With the revival of business capital expenditures and of home construction after the war, some increases in outlets for private investment by insurance companies will emerge. It seems unlikely, however, that these outlets will absorb all of the investment funds that will accumulate in these institutions. Though they will not continue to buy 3 to 4 billion dollars of Federal Government securities a year, as they did during the war years, the amount might nevertheless be an important factor in the market, especially in view of the small demand for new money by the Treasury.

Private trust accounts, administered largely by banking institutions, may also furnish a market of importance. While the total amount of new investment funds in these accounts is not likely to continue at the accelerated level of wartime, when these accounts appear to have absorbed about 2 billion dollars of Government securities a year, they will nevertheless continue to invest on balance.

The various trust accounts administered by the Federal Government will also probably continue to absorb United States Government securities. Although large unemployment compensation payments would result in some drain on these funds, receipts will probably continue in excess of expenditures for the various funds as a whole, leaving a balance available for investment. The amounts invested will for some time be below the wartime annual

NOVEMBER 1945 1097

average of almost 4 billion dollars. These accounts are likely to take larger amounts of securities in times of large incomes and activity, when absorption of debt by non-bank investors is most desirable.

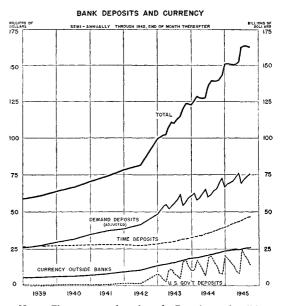

### Need for Bank Purchases of Government Securities

The banking system, including commercial banks, mutual savings banks, and Federal Reserve Banks, has purchased more than two-fifths of the total amount of United States Government securities offered during the war and now holds about the same proportion of those outstanding. some extent an increase in bank holdings of Government securities reflects the decision of individuals and businesses to increase their deposits in banks. Banks may, however, encourage or discourage these decisions by their willingness to expand credit, and in purchasing securities banks may bid them from other holders and thus take the initiative in expanding credit.

Need for further expansion in bank holdings of Government securities will depend upon whether the various nonbank investing groups absorb all of the securities which become available, as offered either by the Treasury or by other holders desiring cash, and upon the public's desire for additional cash holdings. It has been pointed out that the public debt will show little or no further increase in 1946. It seems likely that various demands from customary investment sources should be sufficient to absorb Government securities in amounts equal to redemptions and sales by others. In view of the large volume of cash already held by individuals and businesses and the likelihood that production and income will be at a somewhat lower level next year than they have been during the war, there should be little need for further additions to cash holdings.

Consequently bank holdings of Government securities would not need to increase during the next year.

Commercial banks are to some extent savings institutions, and the securities they purchase represent in part the reinvestment of savings, as do purchases of savings banks. Savings held in banks, however, are generally much more readily available than those held otherwise and, therefore, are considered highly liquid assets. Time and savings deposits in commercial banks and deposits in mutual savings banks and in the Postal Savings System increased slowly in the early years of the war while demand deposits were increasing rapidly, but since the middle of 1943 time deposits have also grown considerably, as shown in the chart. The aggregate increase in time deposits was 4 billion dollars in 1943, 7 billion in 1944, and has been at a rate of 9 billion a year in 1945. A continued growth, though at a reduced rate, seems likely in 1946.

Note.—Figures are partly estimated. Deposits are for all banks in United States. Demand deposits-adjusted exclude U. S. Government and interbank deposits and items in process of collection. Time deposits include deposits in the Postal Savings System and in mutual savings banks. Figures for July 1945 and subsequently are preliminary; latest figures are for September.

The public demand for currency was the major factor in the wartime expansion of Reserve Bank credit. When currency is withdrawn from commercial banks, these banks must obtain it from the Reserve Banks, drawing on their reserve balances in the process. These reserve balances must then be replenished, and this occasions sales of Government securities to the Reserve Banks.

During 1945 the currency outflow, while still substantial, has been slackening. In the early spring the currency demand slackened apparently in response to rumors of special measures that might be adopted to restrict currency holdings. Later the Treasury took action to require reports of unusual currency transactions. Since the end of hostilities there has been some further decrease in the outflow. In 1946 the outflow of currency probably will be at a much reduced rate and might even cease. To the extent that expansion continues, the Reserve Banks will be called upon to supply additional credit. Should a return flow of currency develop, banks will have additional reserves which they could use as a basis for further credit expansion, unless the Reserve Banks reduced their holdings of Government securities.

### POTENTIALITIES FOR CREDIT EXPANSION

Although it appears likely that there will be little or no need for additional bank purchases of Government securities or for further expansion in bank deposits during 1946, potentialities for credit expansion continue to exist. Under present conditions banks can increase their holdings of Government securities by bidding them

away from other holders. Banks hold substantial amounts of short-term low-rate Government securities which they can readily sell to Federal Reserve Banks. Some banks may sell such securities to the Reserve Banks and purchase higher-yield issues in the market. This process makes available additional reserves, which are transferred to other banks, providing the basis for a multiple credit expansion.

In the transition period, moreover, there may be some shifting of deposits among banks and areas. To meet drains of funds, some banks may need to dispose of a part of their holdings of short-term securities. If these securities are purchased by the banks gaining the funds, there will be no material change in the investment capacity of the banking system as a whole. If, however, the process of transitional marketing should channel these securities to the Reserve Banks, the reserves of the banking community will be augmented, thereby establishing the possibility of further multiple credit expansion. That would give the commercial banking community the funds to enter into competition with the other potential buyers.

In view of the existing sources of demand for Government securities and the reduced supply of new securities, prospects are for a continued strong market for these securities. Under the circumstances demands are particularly strong for the intermediate and long-term issues bearing the higher yields. Such of these issues as can be held by banks will be in demand by banks, while non-bank investors may be expected to buy principally the issues that are not eligible for purchase by banks.

November 1945 1099

### OWNERSHIP OF DEMAND DEPOSITS

Distribution of ownership of demand deposits among different economic groups showed little change in the six months prior to the end of the war, a period of continued growth in the total. This is brought out by an analysis of a survey conducted by the Federal Reserve System as of July 31, 1945. Deposits of individuals, manufacturing and mining companies, public utilities, trade establishments, and financial businesses other than insurance companies all increased at a rate of about 6 per cent, which is close to the rate of growth for the total of all deposits for the period. Farmers' balances, contrary to usual seasonal trends, increased somewhat more rapidly than other personal balances, and noncorporate business deposits again showed a greater rate of increase than corporate deposits.1

Demand deposits of individuals, partnerships, and corporations increased by an estimated 3.7 billion dollars during the six-month period ended July 31, 1945 and reached a total of 69.6 billion, as is shown in the table.<sup>2</sup> The largest part of the increase was accounted for by a 2.0 billion dollar growth in business deposits. Personal deposits, including those of farmers, increased by 1.5 billion dollars over the period. Deposits of trust funds and nonprofit organizations increased by comparatively small amounts, while those of foreigners declined slightly.

The increase in demand deposits of individuals was only half as much as in the preceding six-month period, but about as much as the average for other half-year periods during the war. About one-third of the growth in personal deposits was added to the accounts of farmers. This is in contrast to the development in the corresponding period last year when

farmers' deposits declined slightly. It is noteworthy particularly because in many parts of the country deposits of farmers are likely to be seasonally smaller in the summer months than at other times of the year.

Preliminary.

P Preliminary.
 Revised.
 The figures in this table have been rounded to tenths of billions from estimates with one more decimal place; therefore, the parts of totals may not add to total and changes may be different from those that could be computed from the figures shown in the table.
 Less than 50 million dollars.
 Note.—The figures on deposit ownership presented in this article are estimates of the balances as recorded by the books of all banks, and as a consequence are different from figures that appear on the books of depositors. The former includes amounts represented by checks that have been drawn by depositors and deducted from their books but not yet charged off their balances on bank records. The latter includes checks received by the payees which have been entered on their records but not yet deposited with the banks.

The smaller additions to personal demand deposits during the period covered by this survey than in the preceding six months were accompanied by a slackening in the outflow of currency. On the other hand, individuals added more to their holdings of time deposits and War Savings bonds during this period than in prior six-month periods. Personal demand deposits at 23 billion dollars were two and a half times larger than at the time of Pearl Harbor, and total individual holdings of liquid

<sup>&</sup>lt;sup>1</sup> Prior surveys of demand deposit ownership were discussed in the Federal Reserve BULLETIN of August 1943, pp. 713-16; October 1943, pp. 917-22; May 1944, pp. 432-35; November 1944, pp. 1069-76; and April 1945, pp. 331-34.

<sup>2</sup> The comparison between the two dates Jan. 31, 1945, and July 31, 1945 is believed to be relatively free of bias owing to war loan drives, inasmuch as the two surveys followed war loan drives by roughly equal time intervals.

#### OWNERSHIP OF DEMAND DEPOSITS

assets, including currency, demand deposits, time deposits, and United States Government securities, showed about the same rate of growth.

Demand deposits of businesses were about 42.4 billion dollars, compared with 25 billion in December 1941. Manufacturing and mining companies accounted for half of the increase in deposits of domestic businesses. This increase of almost a billion dollars for manufacturing and mining during the six months ending last July, though considerably greater than the 300 million dollar increase in the preceding six months, is only slightly larger than the increase in the five-month period ended July 31 last year. Balances of wholesale and retail trade establishments, which expanded more rapidly than those of other businesses during the war, rose by 600 millions, as compared with 1.5 billions in the previous period. Deposits of public utility, transportation, and communications companies, which had not changed in the year and a half ending last January, increased by 300 millions in the following six months. Accounts of other nonfinancial businesses, including contractors, theaters, lawyers, doctors, and other service industries, increased slightly in the aggregate. Balances of insurance companies showed little change throughout the war period except for variations during and between war loan drives. Deposits of financial businesses other than insurance companies real estate agents, investment trusts, brokers, loan companies, and similar enterprises— continued to increase somewhat.

Corporations owned over 75 per cent of business deposits on July 31, 1945, and the increase in corporate deposits accounted for 1.3 billions of the 2.0 billion dollar increase in business accounts. The rate of growth in corporate holdings, however, was smaller than that for noncorporate business in both the manufacturing and mining and the trade groups. For the last three surveys business deposits have been classified by corporate status of the holders, and the following table shows estimates of corporate and noncorporate business deposits as of July 31, 1944, January 31, 1945, and July 31, 1945, and the change over the one-year period ended July 31, 1945.

### LOANS FOR WAR PURPOSES

by
GERALD M. CONKLING
Division of Bank Operations

Loans for war purposes outstanding at all commercial banks in the United States declined to an estimated 3 billion dollars in June 1945 after reaching an estimated peak of 3.5 billion at the end of 1943. As shown in Table 1, the increase in these loans was very rapid during 1942 and at a much lower rate during 1943; the ensuing decline has been gradual. The decline during the first half of 1944 resulted from a continued decline in loans not guaranteed under Regulation V, which reached a low close to I billion dollars on June 30, 1944. Conversely, in the latter half of the year, a decline of over 0.3 billion dollars in guaranteed war loans was offset by an increase in other war loans. During the first half of 1945 a further decline of over 0.3 million dollars in the guaranteed portion was only partly offset by a further increase in other war loans. The guaranteed portion of total war loans, which had reached 66 per cent by June 30, 1944, declined during the last two semi-annual periods to 46 per cent in June 1945.

Until around mid-1944, the tendency was for banks to shift their credits from an unguaranteed to a guaranteed status. There are a number of possible explanations of the subsequent reversal of this tendency: (1) Businesses generally were in a better financial condition than in the earlier stages of the war, and their experience in war production tended to reduce credit risk; banks were more willing to extend credit on an unguaranteed basis. (2) War contracts were in financially stronger hands. (3) The "other war loan" category undoubtedly includes some loans only indirectly related to the war. For example, some loans were being classified as commercial loans for war purposes when in all probability the main purposes were either to broaden the borrowers' capital structure base for computing excess profits taxes or to purchase United States Government obligations, particularly in loan drives that have occurred near the reporting date.

### WAR LOAN SURVEYS OF THE ABA

The estimate of total war loans for all commercial banks is based largely on statistics collected and released by the American Bankers Association. Beginning December 1940, the Association has periodically sent questionnaires to about 500 of the largest banks in the United States requesting data regarding war loans outstanding and commitments to make additional war loans. Banks were requested to report the number of these loans and to classify them as to purpose: For plant facilities and construction (defined in the recent questionnaires as "loans to finance the building of plants, cantonments or other construction related to the war program, including defense housing financing"); and for all other purposes (defined as "working capital loans to manufacturers for production of supplies and equipment for war purposes; loans to industries directly or indirectly contributing to the war effort"). Both of these classifications have been subdivided to

FEDERAL RESERVE BULLETIN

show Regulation V loans separately, and the plant facilities and construction classification has also been subdivided on most dates to show emergency plant facility loans. The results of these statistics, collected by the American Bankers Association on a quarterly basis through December 1942 and semi-annually thereafter until the surveys were discontinued following the reports of June 1945, are summarized in Table 2.

all dates reported. They continued to increase during 1944 after the volume of outstanding loans began to decline, and on the two most recent dates they amounted to over twice the volume of loans outstanding.

### ESTIMATED WAR LOANS AT ALL COMMERCIAL BANKS

By applying some of the results of the American Bankers Association survey of selected large

1945—June	439	416	23	181	25,056	2,335	150	2,185	5,240	108	5,132		

On most dates during 1941 and 1942, the volume of loans for plant facilities and construction represented from one-fifth to onethird of total loans outstanding for defense and war purposes; after 1942, the relative importance of this class of loans declined rapidly. The largest amount of these construction loans was outstanding in September 1942; thereafter they declined substantially. Other working capital loans for war purposes continued to increase to December 1943, when total war loans at the reporting banks were at their peak. The average loan outstanding has ranged between \$60,000 in reports for September 1941 and June 1942, and \$93,000 in reports for June 1945.

Commitments outstanding for future loans were greater than loans outstanding on nearly

banks to data for commercial loans at member banks, rough estimates have been made of loans for war purposes at all commercial banks since December 1941. In general, the banks reporting to the Association correspond roughly to the weekly reporting member banks and to central reserve and reserve city banks. This similarity and the survey of commercial loans at member banks made by the Federal Reserve System in 1942 are the basis of the estimates.1 The survey showed that the proportion of commercial and industrial loans being made for war purposes at country banks was between two-thirds and three-quarters of the proportion at central reserve and reserve city banks. In estimating war loans at all commercial banks,

November 1945 1103

<sup>&</sup>lt;sup>1</sup> For description of the survey, see Federal Reserve Bulletin for August 1942, pp. 768-73.

the holdings of such loans at central reserve and reserve city banks have been computed at the same proportions as shown in the Association surveys, and the holdings at other banks have been computed on the assumption that the war loan portion of commercial and industrial loans has been 70 per cent of the corresponding ratio at central reserve and reserve city banks.

TABLE 3

1945—June 30	416	409	12,758	13,996	91.15					

<sup>&</sup>lt;sup>1</sup> With the exception of June 30, 1942, when total loans were reported.

<sup>2</sup> Excludes banks that reported no war loans.

Table 3 shows the fluctuations in the number and the loan coverage of banks reporting war

loans in the American Bankers Association series as compared with the more stable series of member banks in central reserve and reserve cities. For several dates it was necessary to adjust the results for variations in bank coverage in the Association statistics; and for the December 1941 estimate of loans for war purposes shown in Table 1, it was assumed that the banks reporting to the American Bankers Association were identical with the weekly reporting member banks. It should be noted that the Association series shown in Table 3 includes only those banks that reported some war loans, whereas the reserve series includes all central reserve and reserve city banks.

### WAR LOANS AT INSURED COMMERCIAL BANKS

Table 4 shows a classification of war loans and other loans held by insured commercial banks during the war. From December 1941 to June 1943, when war loans were rapidly increasing, loans in several other principal categories were declining and there was a net decline of nearly 4 billion dollars in total loans. The low point for the non-war portion of commercial and industrial loans was also reached in June 1943. Since that date total loans have increased to a level higher than at the beginning of the war.

1945—June 30	23,376	7,501	3,000	4,500	1,632	6,714	4,413	3,116	

<sup>&</sup>lt;sup>1</sup> Estimate of war loans at all commercial banks, the same as in Table 1. It is probable that war loans at noninsured commercial banks have not exceeded from 10 to 20 million dollars at any date.

On June 30, 1945, all classes of loans shown in the table, except loans for war production and real estate loans, were at a higher level than they had been two years earlier. The greater part of the increase, however, was in the volume of outstanding loans for purchasing and carrying securities, especially United States Goverment securities. These loans have increased cumulatively throughout the period. They have fluctuated widely with war loan drives, usually reaching their peak around the end of a drive and declining gradually to a low point shortly preceding the next drive. At the end of June 1945, close to the end of the Seventh War Loan, these loans were near a new wartime peak of 6.7 billion dollars.

Changes in agricultural loans outstanding (excluding farm mortgages) are usually largely seasonal, but on successive June and December dates throughout the war period they have increased, slowly and almost steadily. Loans

on real estate have declined steadily throughout nearly the entire period. They increased slightly, for the first time, in the first half of 1945. "Other" loans, a large part of which are consumer loans, declined rapidly through 1942 and the first half of 1943; since the low point at the end of 1943 there has been a moderate increase.

It appears likely that a substantial portion of the increase in non-war commercial loans since June 1943 has reflected loans for purchasing Government securities. This was particularly true in the last half of 1943, when non-war commercial loans increased more than 0.6 billion dollars. Although the commercial loan item on the call report is intended to exclude loans for purchasing or carrying securities, it seems probable that a number of loans have been classified as commercial which were for the purpose of replenishing working balances used in purchasing Government securities.

November 1945 1105

### MEMBER BANK EARNINGS, FIRST HALF OF 1945

Net profits of member banks after income taxes in the first half of 1945 aggregated 391 million dollars, an increase of 77 million over the first half of 1944. Net current earnings increased 60 million dollars. Cash dividends also increased, but not substantially. Nearly all major items of income and profits were higher, including increases of 94 million dollars in earnings on securities and 74 million in profits on securities sold. These were offset in part by increases of 54 million dollars in expenses and 48 million in taxes on net income.

As a result of the increased holdings of securities, interest and dividends on securities continued to increase in amount, but the annual rate of return remained unchanged at 1.5 per cent. Earnings on loans showed little change from recent comparable periods, notwith-standing a moderate increase in holdings since the first half of 1944. The annual rate of return on loans declined to 3.0 per cent, continuing the downward course that has been in progress for several years. Other items of earnings showed small increases.

Salaries and wages continued to increase and amounted to 272 million dollars in the first half of 1945. Continued growth in time deposits resulted in an increase in interest payments, but the average rate paid on these deposits was unchanged from the previous year. This item of expense has been increasing since it reached its low point in 1943.

Profits on securities sold were more than double the amount in the corresponding period of 1944 and were higher than in any year since 1940. Losses and charge-offs on loans declined about 13 million dollars and other losses and charge-offs declined slightly. The excess of all recoveries and profits over losses and charge-offs was 113 million dollars as compared with 49 million in the first half of 1944.

Net current earnings on an annual basis amounted to 11.6 per cent of total capital accounts as compared with 10.8 per cent in the first half of 1944 and 11.1 per cent in the calendar year. Net profits on total capital accounts amounted to 11.0 per cent as compared with 9.5 per cent in the first half of 1944 and 9.7 per cent for the year.

For details of earnings, expenses, etc., in the first half of 1944 and 1945, see page 1161.

r Revised to exclude taxes on net income from expenses; see following footnote.

¹ The following changes in reporting are reflected in the annual figures beginning with 1942 and in the figures for the first half of the year beginning with 1943: (a) earnings on loans include "service charges and fees on loans," an item previously included in other earnings; (b) taxes on net income, previously included with other taxes in expenses, are a separate item; (c) recurring depreciation on real estate, previously included in losses and charge-offs, is included in expenses.

² Includes interest on capital notes and debentures.

<sup>&</sup>lt;sup>1</sup> Net current earnings comprise gross operating earnings less gross operating expenses; they exclude recoveries, profits, losses, and taxes on net income. For composition of net current earnings and net profits, see summary table on this page and detailed table on page 1161.

### POSTWAR ECONOMIC STUDIES NO. 3

Public Finance and Full Employment, the third of the postwar pamphlets prepared by staff members of the Board of Governors and the Federal Reserve Banks, will be available in December. The papers included in this pamphlet are the following: "Fiscal Policy, Stability, and Full Employment" and "Federal Tax Reform," by Richard A. Musgrave; "Public Debt and National Income," by Evsey D. Domar; "Monetary Aspects of National Debt Policy," by Roland I. Robinson; "Public Debt and Income Flow," by Henry C. Wallich; and "State and Local Finance," by George W. Mitchell, Oscar F. Litterer, and Evsey D. Domar. Critical comments on the papers, prepared by Alvin H. Hansen, Charles O. Hardy, and Simeon E. Leland, are appended.

The Board of Governors has authorized publication of the series of eight pamphlets, of which Public Finance and Full Employment is one, in the belief that it may be of value in furthering the discussion of the many difficult questions with which the country is faced in the postwar period. There is no official endorsement of any of the opinions or proposals made by the authors. A complete list of the pamphlets and their authors follows:

No. 1—Jobs, Production, and Living Standards.

Three papers by E. A. Goldenweiser, Everett E. Hagen, and Frank R. Garfield.

No. 2—Agricultural Adjustment and Income.

Three papers by Arthur C. Bunce,
William H. Fisher, and Earle L.
Rauber.

No. 3—Public Finance and Full Employment. Six papers and Critical Comments by the authors listed in the text above. No. 4—Prices, Wages, and Employment.

Three papers by Charles O. Hardy,

Kenneth B. Williams, and Howard

S. Ellis.

No. 5-Private Capital Requirements.

Two papers, one by Frederick C. Dirks and one by Susan S. Burr and Ernest J. Hopkins.

No. 6—Housing, Social Security, and Public Works.

Three papers by Ramsay Wood, Eliot J. Swan, and Walter F. Stettner.

No. 7—The United States in World Trade and Finance.

Three papers by Walter R. Gardner, Lloyd A. Metzler, and Robert Triffin.

No. 8-Federal Reserve Policy.

This pamphlet will contain papers in which monetary and credit controls are discussed in the light of changes wrought by the war in monetary and credit conditions. As background for the discussion of wartime developments, there will be a review of Federal Reserve policy since the establishment of the System and of the general and selective instruments of credit control which have been available to credit authorities.

Individual pamphlets may be purchased for 25 cents each, or for 15 cents each for group purchases of ten or more in single shipment. The price for the set of eight pamphlets is \$1.25. Orders should be sent to the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington 25, D. C.

November 1945

### CURRENT EVENTS

### Federal Reserve Meetings

The Conference of Presidents of the Federal Reserve Banks met in Washington, D. C., on October 15 and 16, 1945. The Presidents met with the Board of Governors of the Federal Reserve System on October 18, 1945.

A meeting of the Federal Open Market Committee was held in Washington, D. C., on October 17, 1945.

The Conference of Chairmen of the Federal Reserve Banks met in Washington, D. C., on October 29 and 30, 1945.

### Appointment of Mr. Dunn as First Vice President of the Federal Reserve Bank of Chicago

Mr. Charles B. Dunn, Vice President and General Counsel of the Federal Reserve Bank of Chicago was appointed First Vice President effective October 25, 1945, to succeed Mr. H. P. Preston who resigned to accept the presidency of the Hamilton National Bank of Knoxville, Tennessee.

Mr. Dunn has served as General Counsel of the Federal Reserve Bank of Chicago from January 1, 1934 to October 25, 1945. On February 26, 1942, he was appointed Vice President as well as General Counsel.

### Admissions of State Banks to Membership in the Federal Reserve System

The following State banks were admitted to membership in the Federal Reserve System during the period September 16, 1945 to October 15, 1945, inclusive:

### Mississippi

Columbus—Merchants & Farmers Bank Yazoo City—Bank of Yazoo City

Nebraska

Tecumseh-Johnson County Bank

New Jersey

Paterson-Broadway Bank & Trust Company

New York

Holland-Bank of Holland

Ohio

Orwell-The Orwell Banking Company

### THE FEDERAL REGISTER

Following is an announcement regarding the Federal Register which is printed in the Bulletin by request:

The Federal Register publishes daily the full text of Presidential Proclamations and Executive Orders and any order, regulation, notice, or similar document promulgated by Federal Administrative agencies which has general applicability and legal effect. A partial list of subjects covered includes: Agriculture, Aviation, Business Credit, Communications, Contracts, Customs, Fair Trade Practice, Food and Drugs,

Foreign Relations, Housing, Labor Relations, Mineral Resources, Price Control, Priorities, Reconversion, Securities, Shipping, Surplus Property, Taxation, Transportation, Wages and Hours. A sample copy of the Federal Register and additional information may be secured on request to the Federal Register, National Archives, Washington 25, D. C. Orders for copies at the rate of \$1.50 a month and \$15.00 a year may be sent to the Superintendent of Documents, U. S. Government Printing Office. Washington 25, D. C.

### NATIONAL SUMMARY OF BUSINESS CONDITIONS

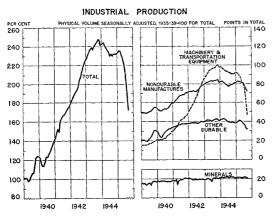

Compiled October 24, and released for publication October 26. Figures shown on charts may differ from preliminary figures used in text.

Output and employment at factories producing war products declined further in September but production and incomes in most other sectors of the economy were maintained or increased somewhat. Retail buying in September and the first half of October continued above year ago levels.

### INDUSTRIAL PRODUCTION

Industrial production declined eight per cent in September, reflecting mainly the continued rapid liquidation of output for war purposes, and the Board's seasonally adjusted index was 172 per cent of the 1935-39 average as compared with 187 in August and 210 in July.

Reduced activity in the machinery and transportation equipment industries continued to account for most of the decline in the total index. Output in these industries during September was about one-fifth below the August average and one-half of the rate at the beginning of the year. Steel production, on the other hand, was five per cent larger in September than in August. In the first three weeks of October, however, steel mill operations declined substantially owing largely to a temporary reduction in coal supplies. Output of non-

Federal Reserve indexes. Groups are expressed in terms of points in the total index. Monthly figures, latest shown are for September.

ferrous metals, lumber, and stone, clay and glass products decreased somewhat in September.

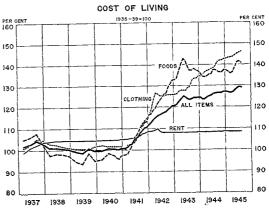

Production of nondurable goods, as a group, showed little change in September, as further reductions in output of war products in the chemical, petroleum, and rubber products industries were offset by increases in output of most civilian-type products. Output of textile yarns and fabrics, shoes, meats, beverages, cigarettes, and paper products increased.

Output of minerals declined in September due mainly to an eight per cent decrease in crude petroleum production. Coal production increased in September but in the first three weeks of October dropped sharply as a result of work interruptions at bituminous coal mines.

Contracts awarded for private construction, according to the F. W. Dodge Corporation, increased further in September, reflecting the largest volume of awards for nonresidential building in many years. Private residential awards showed little change and publicly-financed construction declined further.

### EMPLOYMENT

Employment at factories showed a decline of about 600,000 during the month of September,

Bureau of Labor Statistics' indexes. Last month in each calendar quarter through September 1940, monthly thereafter. Midmonth figures, latest shown are for August.

1109

as compared to a decrease of 1,600,000 workers during August, reflecting a much smaller reduction of munitions employment in September and some increases in other industries. Employment in most nonmanufacturing lines, except Government service, was maintained or increased slightly, after allowing for seasonal changes.

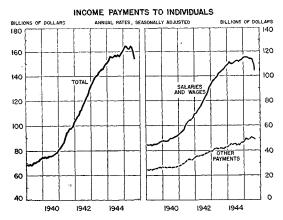

#### DISTRIBUTION

Department store sales in September showed about the usual sharp seasonal increase and the Board's adjusted index was 199 per cent of the 1935-39 average. This was at the same high level as the average for the first half of 1945 and was seven per cent above that for September 1944. In the first two weeks of October sales were 11 per cent larger than in the corresponding period last year.

The total volume of railroad revenue freight was maintained in September at the August rate and was only eight per cent lower than last year's high level. In the early part of October shipments of coal and coke declined substantially as a result of the drop in coal production.

### COMMODITY PRICES

Prices of cotton, grains, and most other farm products increased somewhat from the middle of September to the middle of October, following decreases in the previous six weeks. Prices of most industrial products continued to be maintained at Federal maximum levels.

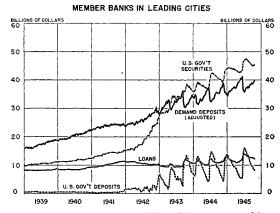

Based on Department of Commerce estimates. Wages and salaries include military pay. Monthly figures raised to annual rates, latest shown are for September.

### BANK CREDIT

Rising reserve requirements, resulting from expanded deposits of businesses and individuals, and an increase in currency in circulation accounted for continuing needs for reserve funds by banks between the middle of September and the middle of October. These needs were supplied through decreases in Treasury and nonmember deposits at Federal Reserve Banks. The amount of Reserve Bank credit outstanding showed little change in the period. Money in circulation increased by 175 million dollars during the four weeks ended October 17; this was a smaller growth than has been customary in recent years reflecting in part some currency inflow following the mid-September tax date. Holdings of Government securities and member bank borrowing at the Reserve Banks increased fairly substantially in the latter part of September concurrent with a temporary rise in Treasury deposits, but both were later reduced. This reduction in security holdings was in Treasury bills and accompanied an increase in member bank holdings of bills.

At reporting banks in 101 leading cities loans for purchasing and carrying Government securities declined by 550 million dollars during the four weeks ended October 17; commercial loans increased somewhat, and holdings of securities showed little change in the aggregate. Loans on Government securities remained well above amounts outstanding immediately prior to the Seventh War Loan.

Demand deposits (adjusted) exclude U. S. Government and interbank deposits and collection items. Government securities include direct and guaranteed issues. Wednesday figures, latest shown are Oct. 24.

Tables on the following pages include the principal available statistics of current significance relating to financial and business developments in the United States. The data relating to the Federal Reserve Banks and the member banks of the Federal Reserve System are derived from regular reports made to the Board; index numbers of production are compiled by the Board on the basis of material collected by other agencies; figures for gold stock, money in circulation, Treasury finance, and operations of Government credit agencies are obtained principally from statements of the Treasury, or of the agencies concerned; data on money and security markets and commodity prices and other series on business activity are obtained largely from other sources. Back figures for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, Banking and Monstary Statistics; back figures for most other tables may be obtained from earlier Bulletins.

November 1945

### MEMBER BANK RESERVES AND RELATED ITEMS

<sup>&</sup>lt;sup>1</sup>Rates shown also apply to advances secured by obligations of Federal intermediate credit banks maturing within 6 months.

Note.—Maximum maturities for discounts and advances to member banks are: 15 days for advances secured by obligations of the Federal Farm Mortgage Corporation or the Home Owners Loan Corporation guaranteed as to principal and interest by the United States, or by obligations of Federal intermediate credit banks maturing within 6 months; 90 days for other advances and discounts made under Sections 13 and 13a of the Federal Reserve Act (except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6 months and 9 months, respectively); and 4 avances under Section 10(b). The maximum maturity for advances to individuals, partnerships, or corporations made under the last paragraph of Section 13 is 90 days. Back figures.—See Banking and Monetary Statistics, Tables 115–116, pp. 439–443.

### FEDERAL RESERVE BANK BUYING RATES ON BILLS

[Per cent per annum]

Maturity	Rate on Oct. 31	In effect be- ginning—	Previous rate
Treasury bills <sup>1</sup>	3/8	Apr. 30, 1942	_
1- 90 days	3/4	Oct. 20, 1933 Oct. 20, 1933 Oct. 20, 1933	1 1 11/4

1 Established rate at which Federal Reserve Banks stand ready to buy all Treasury bills offered. Effective Aug. 3, 1942, purchases of such bills, if desired by the seller, were made on condition that the Reserve Bank, upon request before maturity, would sell back bills of like amount and maturity at the same rate of discount. Since May 15, 1943, all purchases have been made subject to repurchase option.

2 Minimum buying rates on prime bankers' acceptances.

Back figures.—See Banking and Monetary Statistics, Table 117, pp. 443-445.

# GUARANTEE FEES AND MAXIMUM INTEREST AND COM-MITMENT RATES CHARGEABLE UNDER REGULATION V ON LOANS GUARANTEED BY WAR DEPARTMENT, NAVY DEPARTMENT, AND MARITIME COMMIS-SION UNDER EXECUTIVE ORDER NO. 9112 AND CONTRACT SETTLEMENT ACT OF 1944

[Rates in effect October 31] FEES PAYABLE TO GUARANTOR BY FINANCING INSTITUTIONS

	Percentage of	f loan guaranteed	Guarantee fee (In terms of per- centage of amount of interest payable by borrower)1
80 or les	ss		10
85			15
90			20
Over 95	· · · · · · · · · · · · · · · · · · ·		50

### MAXIMUM RATES THAT MAY BE CHARGED BORROWERS BY FINANCING INSTITUTIONS

[Per cent per annum]	
Maximum rate of interest	4½ ¼

<sup>1</sup> Guarantee fee is charged only on guaranteed portion of loan.

<sup>2</sup> Based on average daily unused balance of the maximum principal amount of the loan. The financing institution may, in the alternative, charge a flat fee of not to exceed \$50, without regard to the amount or maturity of the commitment.

### FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS AND COMMITMENTS UNDER SECTION 13b OF THE FEDERAL RESERVE ACT1 Maturities not exceeding five years

\*IIn effect October 31. Per cent per appur

In en	ect Octobe	rot. Per c	ent per ani	ium j

- <sup>1</sup> See table on maximum interest and commitment rates chargeable under Regulation V for rates on guaranteed Section 13b loans.

  <sup>2</sup> Including loans made in participation with financing institutions.

Rate charged borrower less commitment rate. Rate charged borrower.

6 May charge rate charged borrower by financing institution, if lower.
6 Charge of 1/4 per cent is made on undisbursed portion of loan.

Back figures.—See Banking and Monetary Statistics, Table 118, pp. 446-447.

### MAXIMUM RATES ON TIME DEPOSITS

Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q [Per cent per annum]

	Nov. 1, 1933-	Feb. 1, 1935-	Effective
	Jan. 31, 1935	Dec. 31, 1935	Jan. 1, 1936
Savings deposits	3	2½	2½
Postal savings deposits	3	2½	2½
Other deposits payable: In 6 months or more In 90 days to 6 months. In less than 90 days	3 3 3	2½ 2½ 2½ 2½	2½ 2 1

Note.—Maximum rates that may be paid by insured nonmember banks as established by the F. D. I. C., effective Feb. 1, 1936, are the same as those in effect for member banks. Under Regulation Q the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located.

### MEMBER BANK RESERVE REQUIREMENTS

[Per cent of deposits]

	Net d	lemand de	posits1	Time deposits

<sup>&</sup>lt;sup>1</sup>Demand deposits subject to reserve requirements, i.e., demand deposits other than war loan deposits, minus cash items in process of collection and demand balances due from domestic banks.

#### MARGIN REQUIREMENTS<sup>1</sup>

[ Per cent of market value ]

Prescribed in accordance with Securities Exchange Act of 1934	Nov. 1, 1937- Feb. 4, 1945	Feb. 5, 1945- July 4, 1945	Effective July 5, 1945
Regulation T: For extensions of credit by brokers and dealers on listed securities. For short sales. Regulation U:	40 50	50 50	75 75
For loans by banks on stocks	40	50	75

¹ Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the 'margin requirements' shown in this table are the difference between the market value (100%) and the maximum loan value.

Back figures.-See Banking and Monetary Statistics, Table 145, p. 504.

<sup>&</sup>lt;sup>1</sup> Includes any banks in outlying sections of reserve cities which have been given permission to carry the same reserves as country banks. All reserve cities have a population of more than 15,000.

<sup>2</sup> Includes war loan deposits, shown separately for all country banks in the table on the following page.

<sup>&</sup>lt;sup>7</sup> Revised.
Note.—The difference between guaranteed loans authorized and sum of loans outstanding and amounts available to borrowers under guarantee agreements outstanding represents amounts repaid, guarantees available but not completed, and authorizations expired or withdrawn.

<sup>&</sup>lt;sup>1</sup> Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.

<sup>2</sup> Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

P Preliminary. 1 Weekly figures of excess reserves of all member banks and of country banks are estimates. Weekly figures of borrowings of all member banks and of country banks may include small amounts of Federal Reserve Bank discounts and advances for nonmember banks, etc.

<sup>1</sup> Averages of daily closing figures for reserves and borrowings and of daily opening figures for other columns, inasmuch as reserves required are based on deposits at opening of business.

2 Figures include Series E bond deposit accounts, but do not include certain other demand deposits of the U. S. Government with member banks and, therefore, differ from figures for U. S. Government deposits shown in other published banking data. See also footnote 3.

3 Preceding column minus (a) so-called "float" (total cash items in process of collection) and (b) U. S. Government demand deposits (other than war loan and Series E bond accounts) on the latest available call report date.

4 Demand deposits subject to reserve requirements, i.e., demand deposits other than war loan deposits, minus cash items in process of collection and demand balances due from domestic banks.

6 Includes some interbank and U. S. Government time deposits; the amounts on call report dates are shown in the Member Bank Call Report.

Total of amounts of coin and paper currency shown by denominations less unassorted currency in Treasury and Federal Reserve Banks.
 Includes unassorted currency held in Treasury and Federal Reserve Banks and currency of unknown denominations reported by the Treasury as destroyed.
 Paper currency only; \$\frac{1}{2}\$ tilver coins reported under coin.
 Back figures.—See Banking and Monetary Statistics, Table 112, pp. 415-416.

#### UNITED STATES MONEY, OUTSTANDING AND IN CIRCULATION, BY KINDS

Total—September 30, 1945. August 31, 1945. Septenber 30, 1944.	(4)	19,910 19,905 20,508	2,246 2,230 2,363	15,082 15,111 15,832	3,864 3,741 3,742	27,826		23,794

¹ Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States; totals for other end-of-month dates shown in table above, totals by weeks in table on p. 1113, and seasonally adjusted figures in table on p. 1122.
² Includes \$1,800,000,000 Exchange Stabilization Fund and \$156,039,431 held as reserve against United States notes and Treasury notes of 1890; the balance resulting from reduction in weight of the gold dollar, also included, is not shown in the circulation statement beginning July 31.
³ To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.
⁴ Because some of the types of money shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See note for explanation of these duplications.
⁵ Less than \$500,000.
NOTE.—There are maintained in the Treasury—(i) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (ii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on receipt); (iii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars of a monetary value equal to the face amount of such silver cretificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver cretificates, and (iv) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such silver cretificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve and security in colluding the redemption fund which must be deposited with the Treasurer of the United States, ag

November 1945 1121

### MONEY IN CIRCULATION WITH ADJUSTMENT FOR SEASONAL VARIATION

[Outside Treasury and Federal Reserve Banks. In millions of dollars]

Date	Amount— unadjusted for seasonal variation	Amount— adjusted for seasonal variation	Change in seasonally adjusted series <sup>1</sup>

<sup>1</sup> For end of year figures, represents change computed on absolute amounts in first column.

Note.—For discussion of seasonal adjustment factors and for back figures on comparable basis see September 1943 BULLETIN, pp. 822-826. Because of an apparent recent change in the seasonal pattern around the year end, adjustment factors have been revised somewhat for dates affected, beginning with December 1942; seasonally adjusted figures for money in circulation, as shown in Banking and Monetary Statistics, Table 111, p. 414, and described on p. 405, are based on an older series of adjustment factors. ment factors.

Jan.-Oct. | P20,037 | P-582.3 | (4) | 6-314.2 | P25.4 |
P Preliminary. | Figure carried forward.

1 Annual figures are estimates of the United States Mint. Monthly figures are those published in table on p. 1164, adjusted to exclude Philippine Islands production received in United States.

2 Figures based on rate of \$20.67 a fine ounce in January 1934 and \$35 a fine ounce thereafter.

3 Includes gold in the Inactive Account amounting to 27 million dollars on Dec. 31, 1936, and 1,228 million on Dec. 31, 1937.

4 Not yet available.

5 Gold held under earmark at the Federal Reserve Banks amounted to 4,251.4 million dollars on Oct. 31, 1945. All of this was earmarked directly for foreign account except 102.8 million dollars which was earmarked in the name of a domestic bank as security for a foreign loan.

NOTE.—For back figures, see Banking and Monetary Statistics, Table 156, pp. 536-538, and for description of statistics see pp. 522-523 in the same publication.

publication.

<sup>7</sup> Revised. 1 National series for which bank debit figures are available beginning with 1919.
2 Annual figures for 1936-1942 (old series) include 133 centers; annual figures for 1942 (new series) and subsequent figures include 193 centers.
3 See p. 717 of August 1943 BULLETIN for description of revision beginning with May 1942; deposits and debits of new series for first four months of 1942 partly estimated.

Note.—Debits to total deposit accounts, except interbank accounts, have been reported since 1942 for 334 reporting centers; the deposits from which rates of turnover have been computed have likewise been reported by most banks and have been estimated for others. Debits to demand deposit accounts, except interbank and U. S. Government, and the deposits from which rates of turnover have been computed have been reported by member banks in 101 leading cities since 1935; yearly turnover rates in this series differ slightly from those shown in Banking and Monetary Statistics, Table 55, p. 254, due to differences in method of computation.

P Preliminary.

Includes demand deposits, other than interbank and U. S. Government, less cash items in process of collection.

Beginning with December 1938, includes United States Treasurer's time deposits, open account.

Excludes interbank time deposits and postal savings redeposited in banks.

Beginning with June 1941, the commercial bank figures exclude and the mutual savings bank figures include three member mutual savings banks.

Includes both amounts redeposited in banks and amounts not so redeposited; excludes amounts at banks in possessions.

Note.—Except on call dates, figures are rounded to nearest 100 million dollars. See Banking and Monetary Statistics, p. 21, for description and Table 9, pp. 34-35, for back figures.

<sup>\*</sup>These figures do not include data for banks in possessions of the United States and therefore differ from those published by the Comptroller of the Currency and the Federal Deposit Insurance Corporation for national banks and insured banks respectively.

1 Beginning June 30, 1942, excludes reciprocal bank balances, which on Dec. 31, 1942, aggregated 513 million dollars at all member banks and 525 million at all insured commercial banks.

2 During 1941 three mutual savings banks, with total deposits of 8 million dollars, became members of the Federal Reserve System. These banks are included in both "member banks" and "insured mutual savings banks," are not included in "commercial banks," and are included only once in "all banks."

3 Decreases in "noninsured monmember commercial banks" figures reflect principally the admission to membership in the Federal Reserve System of one large bank with total loans and investments aggregating 554 million dollars on Dec. 31, 1942.

4 Beginning June 30, 1942, includes Bank of North Dakota, a nonmember bank not previously included in these statistics; on Dec. 31, 1941, its deposits, excluding interbank deposits, were 33 million dollars and its loans and investments 26 million.

Back figures.—See Banking and Monetary Statistics, Tables 1-7, pp. 16-23; for description, see pp. 5-15 in the same publication.

\*These figures do not include data for banks in possessions of the United States and therefore differ from those published by the Federal Deposit Insurance Corporation.

1 During 1941 three mutual savings banks with total deposits of 8 million dollars became members of the Federal Reserve System. These banks are included in "member banks" but are not included in "all insured commercial banks."

2 Central reserve city banks.

Estimated. Complete reports now collected semiannually; monthly figures for three items estimated on basis of reports from a small number of large firms.

1 Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms'

<sup>1</sup> As reported by dealers; includes some finance company paper sold in open market.
2 None held by Federal Reserve Banks except on Juty 31, 1945, when their holdings were \$486,000.
3 Less than \$500,000.

Back figures. - See Banking and Monetary Statistics, Table 127, pp. 465-467; for description, see p. 427.

<sup>1</sup> Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms' own partners.
2 Includes money borrowed from banks and also from other lenders (not including member firms of national securities exchanges).
3 As reported to the New York Stock Exchange. According to these reports, the part of total customers' debit balances represented by balances secured by U. S. Government securities was (in millions of dollars): March, 109; April, 106; May, 110; July, 145; August, 148; September, 153.

Note.—For explanation of these figures see "Statistics on Margin Accounts" in BULLETIN for September 1936. The article describes the method by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.—See Banking and Monetary Statistics, Table 143, pp. 501-502, for monthly figures prior to 1942, and Table 144, p. 503, for data in detail at semiannual dates prior to 1942.

November 1945 1133

Monthly and weekly data are averages of daily figures, except for municipal bonds, which are based on Wednesday figures.
 Standard and Poor's Corporation.
 U. S. Treasury Department.
 Moody's Investors Service, week ending Friday. Because of limited number of suitable issues, the industrial Aaa, Aa, and A groups have been reduced from 10 to 3, 6, and 9 issues, respectively, and the railroad Aaa, Aa, and A groups from 10 to 7, 6, and 9 issues, respectively.
 Back figures.—See Banking and Monetary Statistics, Tables 128-129, pp. 468-474, and the Bulletin for May 1945, pp. 483-490.

<sup>1</sup> Monthly and weekly data are averages of daily figures, except for municipal bonds and for stocks, which are based on Wednesday figures.

2 Average of taxable bonds due or callable in 15 years and over.

3 Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent 20-year bond.

4 Prices derived from averages of median yields, as computed by Standard and Poor's Corporation.

5 Standard and Poor's Corporation.

6 Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend.

7 Average daily volume of trading in stocks on the New York Stock Exchange.

8 Back figures.—See Banking and Monetary Statistics, Tables 130, 133, 134, and 136, pp. 475, 479, 482, and 486, respectively, and the BULLETIN for May 1945 pp. 483-490.

<sup>1</sup> Includes publicly-offered issues of Federal credit agencies, but excludes direct obligations of U. S. Treasury.
2 Includes issues of noncontiguous U. S. Territories and Possessions.
Source.—For domestic issues, Commercial and Financial Chronicle; for foreign issues, U. S. Department of Commerce. Monthly figures subject to revision.

Back figures.—See Banking and Monetary Statistics, Table 137, p. 487.

<sup>&</sup>lt;sup>1</sup> Estimates of new issues sold for cash in the United States. Current figures subject to revision.

<sup>2</sup> Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

<sup>3</sup> Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.

<sup>4</sup> Includes repayment of other debt and other purposes.

Source.—Securities and Exchange Commission; for compilations of back figures, see Banking and Monetary Statistics (Table 138, p. 491), a publication of the Board of Governors.

<sup>1 &</sup>quot;Net profits" and "net income" refer to income after all charges and taxes and before dividends.
2 Class I line-haul railroads, covering about 95 per cent of all railroad operations.
3 Class A and B electric utilities, covering about 95 per cent of all electric power operations. Figures include affiliated nonelectric operations.
4 Thirty large companies, covering about 85 per cent of all electric power operations. Series excludes American Telephone and Telegraph Company, the greater part of whose income consists of dividends received on stock holdings in the 30 companies.
5 After all charges and taxes except Federal income and excess profits taxes.
6 Partly estimated.
7 Not available.
Sources.—Interstate Commerce Commission for railroads; Federal Power Commission for electric utilities (nonelectric operations and quarterly figures prior to 1942 are partly estimated); Federal Communications Commission for telephone companies (except dividends); published reports for industrial companies and for telephone dividends. Figures for the current and preceding year subject to revision, especially for war producers whose contracts are under renegotiation. For description of data and back figures, see pp. 214-217 of the March 1942 BULLETIN.

<sup>\*</sup> Figures include only holdings by institutions or agencies from which reports are received. Data for commercial banks, mutual savings banks, and the residual "other" are not entirely comparable from month to month. Since June 1943 the coverage by the survey of commercial banks has been expanded. Figures in column headed "other" include holdings by nonreporting banks and insurance companies as well as by other investors. Estimates of total holdings (including relatively small amounts of nonmarketable issues) by all banks and all insurance companies for certain dates are shown in the table

r Revised.

1 Figures for insurance companies and other investors have been rounded to nearest 100 million dollars for all dates, and figures for commercial banks and mutual savings banks have been rounded to nearest 100 million for all dates except June and December for which call report data are available.

Back figures.—See Banking and Monetary Statistics, Table 149, p. 512.

above.

1 Including stock savings banks. On Aug. 31, 1945, commercial banks reporting to the Treasury held 27,443 million dollars of U. S. Government securities due or callable within one year out of a total of 65,847 million outstanding.

2 Including 196 million dollars of Postal Savings and prewar bonds not shown separately below.

<sup>1</sup> Assets are shown on a net basis, i.e., after reserves for losses.
2 Less than \$500,000.
3 Includes Agricultural Marketing Act Revolving Fund and Emergency Crop and Feed Loans.
4 Corporations previously classified "war corporations" are now shown under two headings:(1) "certain affiliates" under Reconstruction Finance Corp. (including Defense Plant Corp., Defense Supplies Corp., Metals Reserve Co., and War Damage Corp.) and (2) "other" under Office of Emergency Management (including Cargoes, Inc., Petroleum Reserves Corp., Rubber Development Corp., U. S. Commercial Co., and Coordinator of Inter-American Affairs). The item "certain affiliates" also includes Disaster Loan Corp.

Note.—This table is based on the revised form of the Treasury Statement beginning Sept. 30, 1944, which is on a quarterly basis. Figures on the quarterly basis are not comparable with monthly figures previously published, owing to changes in reporting, of which the most important are: assets items are included in total assets on a net basis (after reserves for losses); each asset and liability item is segregated into Government agencies (intergaency) and other, and segregation of interagency amounts is more complete than formerly; some asset items formerly shown are completely changed; reporting of certain assets, especially cash and privately-owned interest, is more complete.

Monthly figures on the old reporting basis for the months prior to Sept. 30, 1944, may be found in earlier issues of the Bulletin (see p. 1110 of the November 1944 Bulletin) and in Banking and Monetary Statistics, Table 152, p. 517.

1141 November 1945

<sup>\*</sup>Average per working day. \*P Preliminary. \*T Revised.

1 Department of Commerce series on value of payments to individuals.

2 For indexes by groups or industries, see pp. 1142-1145.

3 Based on F. W. Dodge Corporation data; for description, see p. 358 of BULLETIN for July 1931; by groups, see p. 1149 of this BULLETIN.

4 The unadjusted indexes of employment and pay rolls, wholesale commodity prices, and cost of living are compiled by or based on data of the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces.

5 For indexes by Federal Reserve districts and other department store data, see pp. 1151-1153.

Back figures in BULLETIN.—For industrial production, August 1940, pp. 825-882, September 1941, pp. 933-937, and October 1943, pp. 958-984; for factory employment, January and December 1943, pp. 14 and 1187, respectively, and October 1945, pp. 1054-1055; for department store sales, June 1944, pp. 549-561.

<sup>\*\*</sup>Revised.
Note.—These indexes have been adjusted to final 1943 data made available by the Bureau of Employment Security of the Federal Security Agency.
Back data and data for industries not here shown are obtainable from the Bureau of Labor Statistics. Underlying figures are for pay roll period ending nearest middle of month and cover wage earners only. Figures for September 1945 are preliminary.

<sup>\*</sup> Includes Contract Construction and Federal Force Account Construction. \* Revised.

Note.—Unadjusted data compiled by Bureau of Labor Statistics. Estimates include all full- and part-time wage and salary workers in nonagricultural establishments employed during the pay period ending nearest the 15th of the month. Proprietors, self-employed persons, domestic servants, and personnel of the armed forces are excluded. September 1945 figures are preliminary. For back seasonally adjusted estimates see BULLETIN for June 1944, p. 600. Back unadjusted data are available from the Bureau of Labor Statistics.

\*Less than \$500,000.

Note.—Figures represent gross insurance written during the period and do not take account of principal repayments on previously insured loans. Figures include some reinsured mortgages, which are shown in the month in which they were reported by FHA. Reinsured mortgages on rental and group housing (Title II) are not necessarily shown in the month in which reinsurance took place.

Preliminary. Revised.
 Including both domestic and foreign merchandise.
 General imports, including merchandise entered for immediate consumption and that entered for storage in bonded warehouses.
 Source.—Department of Commerce.
 Back figures.—See Bulletin for April 1940, p. 347; February 1937, p. 152; July 1933, p. 431; and January 1931, p. 18.

Revised.
Note.—For description and back data, see pp. 529-533 of the Bulletin for June 1941. Based on daily average loadings. Basic data compiled by Association of American Railroads. Total index compiled by combining indexes for classes with weights derived from revenue data of the Interstate Commerce Commission.

P Preliminary. 'Revised.
Note.—Descriptive material and back figures may be obtained from the Division of Research and Statistics. Basic data compiled by the Interstate Commerce Commission. Annual figures include revisions not available monthly.

BASEMENT STORE—total Women's apparel and accessories Men's and boys' clothing and furnishings Home furnishings Piece goods. Shoes	165 120 54	+4 +4 +8 -9 +1 +32	+11 +13 +11 +4 +14 +12	+8 +13 0 +7 -15 +10	2.9 2.4 4.2 3.6 2.0 4.2	2.8 2.2 4.5 3.0 2.4 5.0

Note.—Group totals include sales in departments not shown separately. Figures for basement store are not strictly comparable with those for main store owing chiefly to inclusion in basement of fewer departments and somewhat different types of merchandise. The ratio of stocks to sales is obtained by dividing stocks at the end of the month by sales during the month and hence indicates the number of months' supply on hand at the end of the month in terms of sales for that month.

1 Figures for other than Wednesday dates are shown under the Wednesday included in the weekly period.

2 Less than \$5,000,000.

3 Figures for earlier dates should be corrected as follows: Sept. 5, 1.17; Sept. 12, 1.19; and Sept. 19, 1.31.

4 For charts on pages 20, 23, and 27, figures for a more recent period are available in the regular BULLETIN tables that show those series.

5 Adjusted for seasonal variation.

6 Revised series; for explanation and new data back to 1939 see Bureau of Foreign and Domestic Commerce report "Industry Survey," August 1945.

7 Figures available for June and December dates only.

• Copies of the Chart Book may be obtained at a price of 50 cents each.

# MEMBER BANK EARNINGS

# NATIONAL AND STATE MEMBER BANKS, FIRST HALF OF THE YEAR, 1944-1945

Figures for national banks were compiled by the Comptroller of the Currency from reports submitted by national banks. [Amounts in thousands of dollars]

1161 NOVEMBER 1945

 <sup>\*</sup>Revised to exclude taxes on net income, which are reported separately and are shown just above net profits.
 \*Corrected.
 \*Includes interest on capital notes and debentures.
 \*For the first half of 1944 these are averages of figures reported on Dec. 31, 1943, Apr. 13, 1944, and June 30, 1944; for the first half of 1945 they are averages of figures reported on Dec. 30, 1944, Mar. 20, 1945, and June 30, 1945.
 \*Annual basis.

Foreign exchange rates	117 <b>7</b>
Price movements:	
Wholesale prices	1178
Retail food prices and cost of living	1179
Security prices	1179

Tables on the following pages include the principal available statistics of current significance relating to gold, international capital transactions of the United States, and financial developments abroad. The data are compiled for the most part from regularly published sources such as central and commercial bank statements and official statistical bulletins, some data are reported to the Board directly. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Back figures for all except price tables, together with descriptive text, may be obtained from the Board's publication, Banking and Monetary Statistics.

Sept Dec 1945—Mar	12 32			17

P Preliminary.

1 Figures through March 1940 and for December 1942, December 1943, and December 1944 include, in addition to gold of the Central Bank held at home, gold of the Central Bank held abroad and gold belonging to the Argentine Stabilization Fund.

2 On May 1, 1940, gold belonging to Bank of Canada transferred to Foreign Exchange Control Board. Gold reported since that time is gold held by Minister of Finance.

3 Figure for December 1938 is that officially reported on Apr. 30, 1938.

4 Figures relate to last official report dates for the respective countries, as follows: Java—Jan. 31, 1942; Norway—Mar. 30, 1940; Poland—July 31, 1939; Yugoslavia—Feb. 28, 1941.

5 Figure for February 1941; beginning Mar. 29, 1941, gold reserves no longer reported separately.

6 These countries are: Albania, Algeria, Australia, Austria through Mar. 7, 1938, Belgian Congo, Bolivia, Bulgaria, China, Costa Rica beginning July 1943, Danzig through Aug. 31, 1939, Ecuador, El Salvador, Estonia, Finland, Guatemala, Iceland, Ireland beginning February 1943, Latvia, Lithuania, Morocco, and Thailand (Siam). Figures for certain of these countries have been carried forward from last previous official report.

7 Gold holdings of Bank of England reduced to nominal amount by gold transfers to British Exchange Equalization Account during 1939.

Nore.—For back figures, see Banking and Monetary Statistics, Tables 156-160, pp. 536-555, and for a description of figures, including details regarding special internal gold transfers affecting the reported data, see pp. 524-535 in the same publication.

¹ Reported at infrequent intervals or on de-layed basis: U. S.—Exchange Stabilization Fund (Special A/c No. 1); U. K.—Exchange Equali-zation Account; France—Exchange Stabilization Fund and Rentes Fund; Belgium—Treasury. ² Figure for end of September. ² Reported figure for total British gold reserves on Aug. 31, 1939, less reported holdings of Bank of Eng-land on that date. ² Figure for Sept. 1, 1941.

Note.—For available back figures and for details regarding special internal gold transfers affecting the British and French institutions, see Banking and Monetary Statistics, p. 526, and Bulletin for February 1945, p. 190.

Gold production in U. S. S. R.: No regular Government statistics on gold production in U. S. S. R. are available, but data of percentage changes, irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production as follows: 1934, 135 million dollars; 1935, 158 million; 1936, 187 million; 1937, 185 million; 1938, 180 million.

P Preliminary. Figure carried forward.

Annual figures through 1940 are estimates of U. S. Mint; annual figure for 1941 based on monthly estimates of American Bureau of Metal Statistics.

Beginning April 1941, figures are those reported by American Bureau of Metal Statistics. Beginning January 1944 they represent Gold Coast only.

Beginning May 1940, monthly figures no longer reported. Annual figures for 1940 estimated at three times production for first four months of the year.

Includes Philippine Islands production received in United States. Annual figures are estimates of United States Mint. Monthly figures represent estimates of American Bureau of Metal Statistics, those for 1944 having been revised by adding to each monthly figure \$59,421 so that aggregate for the year is equal to annual estimate compiled by Bureau of Mint in cooperation with Bureau of Mines.

Figures for Canada beginning 1944 are subject to official revision.

Beginning April 1942, figures no longer reported. Annual figure for 1942 is rough estimate based on reported production of \$7,809,000 in first three months of year.

\*\* Beginning April 1942, figures no longer reported. Annual nigure for 1942 is rough estimate based on reported production of \$\pi\_1,007,000\$ in miss lines months of year.

7 Gold exports, reported by the Banco Nacional de Nicaragua, which states that they represent approximately 90 per cent of total production.

8 Beginning December 1941, figures are those reported by American Bureau of Metal Statistics.
For the period December 1941—December 1943 they represent total Australia; beginning January 1944, Western Australia only.

9 Beginning May 1940, figures are those reported by American Bureau of Metal Statistics.
Note.—For explanation of table and sources, see Bulletin for February 1939, p. 151; July 1938, p. 621; June 1938, p. 540; April 1933, pp. 233-235; and Banking and Monetary Statistics, pp. 524. For annual estimates compiled by the United States Mint for these and other countries in the period 1910-1941, see Banking and Monetary Statistics, pp. 542-543.

¹ This category made up as follows: through Sept. 21, 1938, funds held by foreign central banks at the Federal Reserve Bank of New York; beginning Sept. 28, 1938, also funds held at commercial banks in New York City by central banks maintaining accounts at the Federal Reserve Bank of New York which had been transferred from central bank to government names; beginning with the new series commencing with the month of July 1942, all funds held with banks and bankers in the United States by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.).

² The weekly series of capital movement statistics reported through July 1, 1942, was replaced by a monthly series commencing with July 1942. Since the old series overlapped the new by one day, the cumulative figures were adjusted to represent the movement through June 30 only. This adjustment, however, is incomplete since it takes into account only certain significant movements known to have occurred on July 1. Subsequent figures are based upon new monthly series. For further explanation, see BULLETIN for January 1943, p. 98.

³ Amounts outstanding June 30, in millions of dollars: total foreign banking funds in United States, 5,927.3, including official funds, 3,541.2, and other funds, 2,386.1; United States banking funds abroad, 375.0; and brokerage balances (net due "foreigners"), 54.9.

NOTE.—Statistics reported by banks, bankers, brokers, and dealers. For full description of statistics see Banking and Monetary Statistics, pp. 558-560; for back figures through 1941 see Tables 161 and 162, pp. 574-637, in the same publication, and for those subsequent to 1941 see BULLETIN for September 1945, pp. 960-974.

<sup>&</sup>lt;sup>1</sup> The figures in this table represent a breakdown of the columns headed "Asia" and "All other" in the main table. The figures for "Asia" cover four countries from Jan. 3, 1940, and five additional countries since June 30, 1942, while those for "All other" cover five countries available only from June 30, 1942. <sup>2</sup> Prior to June 30, 1942, included under "Other Asia." <sup>3</sup> Country breakdown not available until June 30, 1942. <sup>4</sup> See footnote 2 for main table.

### Footnotes to table on page 1168.

Footnotes to table on page 1168.

¹ Prior to Jan. 3, 1940, the figures under Asia represent Far East only, the remaining Asiatic countries being included under "All other."

² Certain of the figures are not strictly comparable with the corresponding figures for preceding months owing to changes in reporting practice of various banks. The cumulative figures in Tables 1, 2, and 3 of "Net Capital Movement to the United States" have been adjusted to exclude the unreal movements introduced by these changes. Figures shown above are adjusted to compare with those of previous months.

³ The figures in this table represent a breakdown of the column headed "Other Europe" in the main table and cover five countries from Jan. 3, 1940, and seven additional countries since June 30, 1942.

⁴ Prior to June 30, 1942, included under "Other Latin America" in the main table and cover six countries from Jan. 3, 1940, and seven additional countries since June 30, 1942.

⁵ Prior to June 30, 1942, included under "Other Latin America." 7 Included "Canal Zone" prior to June 30, 1942.

⑤ Prior to June 30, 1942, included under "Other Latin America." 7 Included "Canal Zone" prior to June 30, 1942.

Note.—For previous changes or corrections in the reporting practices of reporting banks (similar to those indicated in footnote 2 above), which occurred on Aug. 12, 1936, Jan. 5, 1938, Oct. 18, 1939, and May 7, 1941, see Banking and Monetary Statistics, pages 578-584. For changes subsequent to 1941, which occurred on Apr. 1 and June 30, 1942, Sept. 30 and Oct. 31, 1943, and Mar. 31, 1944, see Bulletin for September 1945, pp. 967-970.

Prior to Jan. 3, 1940, the figures under Asia represent Far East only, the remaining Asiatic countries being included under "All other."

Note.—The figures in this table are not fully comparable throughout since certain changes or corrections took place in the reporting practice of reporting banks on Aug. 12, 1936, and Oct. 18, 1939. (See Banking and Monetary Statistics, Table 161, pp. 589 and 591.) On June 30, 1942, reporting practice was changed from a weekly to a monthly basis. For further information see BULLETIN for September 1945, pp. 971-974.

<sup>1</sup> Through February 1939, valued at legal parity of 85 shillings a fine ounce; thereafter at market price, which fluctuated until Sept. 6, 1939, when it was officially set at 168 shillings per fine ounce; the latter rate remained in effect until June 9, 1945, when it was raised to 172 shillings and three pence.

2 Securities and silver coin held as cover for fiduciary issue, the amount of which is also shown by this figure.

3 Notes issued less amounts held in banking department.

4 On Jan. 6, 1939, 200 million pounds sterling of gold (at legal parity) transferred from Bank to Exchange Equalization Account; on Mar. 1, 1939, about 5.5 million pounds (at current price) transferred from Exchange Account to Bank; on Sept. 6, 1939, 279 million pounds transferred from Bank to Exchange Account.

5 Fiduciary issue increased by 50 million pounds on June 12, 1940, Apr. 30, Aug. 30, and Dec. 3, 1941, and Apr. 22 and July 28, 1942; by 70 million pounds on Dec. 2, 1942; and by 50 million pounds on Apr. 13, Oct. 6, and Dec. 8, 1943, Mar. 7, Aug. 2, and Dec. 6, 1944, and on May 8 and July 3, 1945.

6 Securities maturing in two years or less.

7 Includes notes held by the chartered banks, which constitute an important part of their reserves.

8 Beginning November 1944, includes a certain amount of sterling and United States dollars.

9 On May 1, 1940, gold transferred to Foreign Exchange Control Board in return for short-term Government securities (see BULLETIN for July 1940, pp. 677-678).

pp. 677-678).

Note.—For back figures on Bank of England and Bank of Canada, see Banking and Monetary Statistics, Tables 164 and 166, pp. 638-640 and pp. 644-645, respectively; for description of statistics see pp. 560-564 in same publication.

<sup>1</sup> Gold revalued March 1940, November 1938, July 1937, and October 1936. For further details see Bulletin for May 1940, pp. 406-407; January 1939, p. 29; September 1937, p. 853; and November 1936, pp. 878-880.

2 For explanation of this item, see Bulletin for July 1940, p. 732.

3 By a series of Conventions between the Bank of France and the Treasury, dated from Aug. 25, 1940, through July 20, 1944, advances of 441,000 million francs were authorized to meet the costs of the German army of occupation.

4 Central Administration of the Reichskreditkassen.

5 In each of the weeks ending Apr. 20 and Aug. 3, 1939, 5,000 million francs of gold transferred from Exchange Stabilization Fund to Bank of France; in week ending Mar. 7, 1940, 30,000 million francs of gold transferred from Bank of France to Stabilization Fund.

6 First official statement published since liberation.

7 Includes 9,447 million francs charged to the State to reimburse the Bank for the gold turned over by it to the National Bank of Belgium on Dec. 22.

8 Gold not shown separately in weekly Reichsbank statement after June 15, 1939.

9 Figure not available.

Note.—For back figures on Bank of France and Reichsbank, see Banking and Monetary Statistics, Tables 165 and 167, pp. 641-643 and pp. 645-647, respectively; for description of statistics see pp. 562-565 in same publication.

<sup>1</sup> Beginning Aug. 27, 1945, figures published in the balance sheet of the Commonwealth Bank cover central banking operations only, while previously these statements included the operations of the General Banking Division.

2 Gold revalued provisionally at 49.318 francs per gram. The resulting increment is held for the account of the Treasury and is shown on the liabilities side under "Blocked Treasury account."

3 In addition to the gold increment includes notes not presented for exchange and forfeited to the State.

4 Includes current accounts transferred and to be transferred to blocked accounts and old notes not declared.

5 Latest month available.

6 For last available report from the central bank of Bulgaria (January 1943), see Bulletin for July 1943, p. 697; of Finland (August 1943), see Bulletin for April 1944, p. 405; of Greece (March 1941) and Japan (September 1941), see Bulletin for March 1942, p. 281; and of Java (January 1942), see Bulletin for March 1943, p. 278.

7 First statement available since liberation is that for July 31. Until May 1945, known as the National Bank of Bohemia and Moravia.

8 Represents Bank's claim on the Government for the Bank's foreign exchange losses resulting from the revaluation of the krone on Jan. 23, 1942.

9 Items for issue and banking departments consolidated.

Corrected.

Includes gold, silver, and foreign exchange forming required reserve (25 per cent) against notes and other demand liabilities.

Gold revalued in July 1945 from 2,098 to 2,970 guilders per fine kilogram.
For last available reports from the central banks of Norway (March 1940) and Yugoslavia (February 1941), see Bulletin for March 1942, p. 282; and of Rumania (June 1944), see Bulletin for March 1942, p. 282; and of Rumania (June 1944), see Bulletin for March 1945, p. 286.

The Bank of the Republic of Paraguay was reorganized in September 1944 under the name of Bank of Paraguay. The new institution is divided into a Monetary, a Banking, and a Mortgage Department. The first official balance sheet of the Monetary Department, which assumes central banking functions, was issued for the end of December 1944.
Latest month available.
Valued at average cost beginning October 1940.
Includes small amount of non-Government bonds.
Figure not available.
Beginning October 1944, a certain amount of gold, formerly reported in the Bank's account, shown separately for account of the Government.
Beginning October 1944, a certain amount of gold, formerly reported in the Bank's account, shown separately for account of the Government.

<sup>1</sup> Through August 1939, averages of weekly figures; beginning September 1939, end-of-month figures, representing aggregates of figures reported by individual banks for days, varying from bank to bank, toward the end of the month.

2 Represent six-month loans to the Treasury at 1½ per cent, callable by the banks in emergency at a discount equal to the Bank of England rate.

3 Due to changes in reporting procedure, the figure for "Note circulation" includes a small amount of interbank note holdings while these holdings are now omitted from "Other liabilities."

Note.—For back figures and figures on German commercial banks, see Banking and Monetary Statistics, Table 168, pp. 648-655, and for description of statistics see pp. 566-571 in same publication.

1 Figures represent calculated prices of a 4 per cent 20-year bond offering a yield equal to the monthly average yield for 15 high-grade corporate bonds. Source.—Standard and Poor's Corporation; for compilations of back figures on prices of both bonds and common stocks in the United States see Banking and Monetary Statistics, Table 130, p. 475, and Table 133, p. 479.

2 Published by the Ministry of National Economy with new base of 1938 = 100. Figures are for the last Friday of each month. The number of bonds included in the new index was increased to 50 (formerly 36), while the number of stocks remained the same. For complete information on the composition of the bond and stock indexes see "Bulletin de la Statistique Générale" December 1942, pp. 511-513, and July-August 1942, pp. 364-371, respectively. For back figures for both indexes from 1938 through 1941 on a monthly basis see "Bulletin de la Statistique Générale" for October-December 1944, pp. 274-276.

3 Since Apr. 1, 1935, the 139 bonds included in the calculation of the average price have all borne interest at 4½ per cent. The series prior to that date is not comparable to the present series, principally because the 169 bonds then included in the calculation bore interest at 6 per cent.

4 Indexes of reciprocals of average yields. For old index, 1929-1936, 1929 = 100; average yield in base year was 4.57 per cent. For new index beginning January 1937, Jan.—Mar. 1937 = 100; average yield in base period was 3.39 per cent.

6 Average based on figures for 5 months; no data available June-Dec.

7 Average based on figures for 5 months; no data available May-July.

8 Average based on figures for 5 months; no data available May-July.

9 Average based on figures for 9 months; no data available May-July.
