# Recent Activities of Foreign Branches of U.S. Banks

EXPANSION in the financial activities of foreign branches of U.S. banks, which began in the late 1950's, has continued at a rapid pace in recent years. Growth in balance sheet totals for these branches reflects in part their active participation in the Euro-dollar and other Euro-currency markets. Activities of the foreign branches of U.S. banks are of interest because of their magnitude, their impact on credit conditions in the United States and in other countries, and their implications for international capital mobility.

Total assets of foreign branches, which were roughly \$7½ billion in mid-1965, grew from \$35 billion in September 1969—the first date for which the Federal Reserve collected comprehensive monthly reports on these branches (see Bulletin, February 1972, pp. 106-21)—to almost \$70 billion at the end of June 1972. Total assets of banks of all nationalities in the Euro-dollar and other Euro-currency markets also have roughly doubled since September 1969.

The increased foreign activity of the branches has reflected not only growth by major international banks but also the establishment of foreign branches by many small and medium-sized banks that previously have not been active in international finance. On June 30, 1972, 106 Federal Reserve member banks had 558 foreign branches, compared with 27 member banks with 340 branches at the end of 1968, and only 13 member banks with 188 branches at the end of 1965.

During the past 7 years, there have been several marked shifts in the sources and uses of the funds of the foreign branches. In mid-1965, while U.S. banks were still in the process of adjusting their lending policies to the guidelines of the Voluntary Foreign Credit Restraint (VFCR) program, the foreign branches were substantially engaged in banking in currencies other than the U.S. dollar. More than half of foreign branch assets were denominated in currencies other than the dollar, as foreign lending in dollars was concentrated at the domestic offices of U.S. banks. Moreover, a large share of branch transactions was with foreign nonbank customers, who were both the principal source of funds for the branches and the principal user of funds provided by the branches. In mid-1965 foreign branches of U.S. banks were supplying a relatively minor net amount (\$0.5 billion) to their head offices and were obtaining a similar small amount (\$0.7 billion) by net borrowing from foreign commercial banks.

Since 1965 the pace of expansion in the activities of foreign branches of U.S. banks has been influenced by the rapid growth in the Euro-dollar market, the controls over bank and nonbank capital outflows from the United States, and conditions in U.S. money markets, including the effects of the use of Regulation Q in restricting the ability of U.S. banks to bid for domestic funds. Periods of credit stringency in the United States in the second half of 1966 and again in 1969 created strong incentives for U.S. banks to borrow abroad to offset run-offs in domestic certificates of deposit, and many banks relied on their foreign branchesprimarily those in London—as a source of funds for domestic operations. For example, on September 30, 1966, the most important use of funds of the branches was net dollar-denominated claims on their head offices of more than \$21/2 billion and an important source of funds for the branches was net dollar-denominated deposits of foreign commercial banks of almost \$2 billion.

During the fall of 1969, when credit restraint reached its peak, net branch claims on head offices increased more than fivefold to almost \$14 billion, as branches increased their reliance on funds obtained from foreign commercial banks.

As conditions in U.S. money markets were relaxed after 1969, foreign branches reduced their net claims on their head offices. Recently, they have been expanding their extensions of credit to their foreign nonbank customers. The increased emphasis of the foreign branches on making credits to nonbank customers has shifted their balance sheets toward the pattern of mid-1965, except that as of June 1972 more than one-half of the branch claims on nonbank borrowers were dollar denominated, whereas in 1965 more than two-thirds of their claims had been nondollar denominated.

The foreign branches currently have extensive liabilities to and claims on foreign commercial banks, and their net liability position

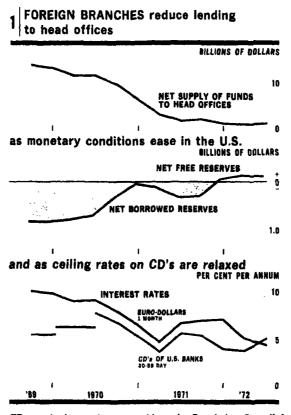

to foreign commercial banks is an important source of funds. Both the size of the gross accounts with foreign commercial banks and the utilization of foreign banks as a net source of funds represent a change from the mid-1965 pattern of activity.

In particular, branches in the United Kingdom, the Bahamas, and to a lesser extent France, Germany, and Italy are the principal takers of funds through net borrowing from foreign commercial banks and are net providers of funds to nonbank borrowers. Branches in Japan operate quite differently as they are net lenders to other banks as well as to nonbank borrowers. Much of this lending by the branches is Euro-currency lending to foreign borrowers who are not residents of the country in which the branch is located. A further important development has been the increased use by U.S. banks of their foreign branch networks to raise funds in one financial market abroad for ultimate use by the same institution in another financial market abroad.

### NET SUPPLY OF FUNDS TO HEAD OFFICES

Rising interest rates on deposits at head offices in the United States during 1967 and 1968, followed by a more restrictive monetary policy in 1969 and the heightened impact of Regulation Q ceilings on interest rates payable on domestic CD's, led U.S. banks increasingly to borrow funds abroad for financing U.S. domestic lending operations, since these borrowings were not subject to interest rate ceilings. To forestall further sizable increases in the use of foreign branches as a source of funds for domestic purposes. the Federal Reserve published for comment in mid-1969 a proposal to establish a 10 per cent marginal reserve requirement for U.S. head offices on any net borrowings from their foreign branches above levels outstanding in May 1969. This proposal became effective in September 1969 (with an alternative reserve-free level of borrowings equal to 3 per cent of deposits). Head-office gross borrowings from foreign branches reached a peak of about \$14 billion in the fall, and net borrowings were only a little less. At that level, U.S. banks were maintaining required reserves against approximately \$4 billion of borrowings from their foreign branches.

As conditions in domestic U.S. markets eased, U.S. banks reduced their over-all net borrowings from their foreign branches gradually to \$11.5 billion in mid-1970, an average rate of repayment of about \$250 million per month. During this period the repayment of the borrowings from the branches may have been moderate in part because repayments resulted in a corresponding reduction in the reserve-free bases. (In order to discourage subsequent repayments that would have weakened the dollar in exchange markets, the Board in 1969 had structured its reserve requirement so that the reserve-free level of borrowings would be reduced

CD rate is the maximum payable under Regulation Q until June 1970. From then on it is the median offering rate on large-denomination negotiable CD's at prime N.Y. banks.

permanently by any repayments below the reserve-free level.) Banks may have been hesitant to give up quickly their reserve-free bases, which could be of potential value in a future period of credit stringency when they would want to borrow at longer terms from their foreign branches.

In mid-1970, the Board suspended the maximum rates payable on large CD's with maturities of 30 to 89 days and raised the ceilings on rates payable on longer maturities, as a step to improve the ability of member banks to meet unusual demands for short-term credit accommodation that might arise from uncertainties in financial markets, particularly the market for commercial paper. As a result of this suspension, U.S. banks were able to compete more actively for funds in domestic money markets and thus had less immediate need for borrowings from foreign branches. Moreover, during the second half of 1970, money market conditions in the United States eased substantially. The Federal funds rate declined from 7 per cent to 5 per cent, as member banks shifted from a net borrowed reserve position of \$780 million in June 1970 to one of virtual balance at year-end. U.S. banks responded to these changes by reducing their net borrowings from foreign branches by a total of \$5 billion during the latter half of 1970.

Effective early in 1971, the Federal Reserve increased from 10 to 20 per cent the marginal reserve requirement on borrowings by domestic offices from foreign branches, in order to give banks an added inducement to preserve their reserve-free bases against a time of future need. Moreover, in early 1971, the Export-Import Bank offered foreign branches a special security, and the Board amended its regulations to permit U.S. banks to count toward maintenance of their reserve-free bases any funds invested by foreign branches in these securities, and in the special U.S. Treasury certificates (Euro-dollar series) that were subsequently issued to replace Export-Import Bank securities.

Branches purchased these securities in most instances by drawing on balances held with domestic offices. The securities, by providing an alternative investment outlet for branch funds that had previously been advanced to head offices, tended to slow the extent to which repayments of borrowings from branches were reflected in increased availability of funds in the Euro-dollar market. Branch holdings of special securities reached a peak of \$3 billion in the summer of 1971, but as Euro-dollar rates rose sharply during the summer of that year under pressure from currency speculation, maturing issues of securities were no longer replaced by new issues, and by autumn the special securities had matured.

Since then, the foreign branches have not been an important source of funds to their head offices. In October 1971 gross borrowings from the foreign branches totaled \$3.6 billion, and by June 1972 they had declined to only about \$2.3 billion. In September 1972 the Federal Reserve published for comment a proposal to eliminate the reserve-free bases for all banks and to reduce the reserve ratio on all borrowings from 20 per cent to 10 per cent.

BRANCHES FROM BRANCHES FR

The foreign branches engage in a limited volume of transactions with residents of the United States other than their parent banks. Since September 1969 loans to residents of the United States by foreign branches have been subject to reserve requirements parallel to those that apply to borrowings by the head office, except in the case of loans made to U.S. corporations to enable them to comply with the Foreign Direct Investment program. U.S. banks have been requested not to accept deposits from U.S. residents at their foreign branches unless such deposits are connected with international business since deposits at foreign branches are exempt from reserve requirements (Regulation D) and from regulations on the maximum permissible rate of interest (Regulation Q).

Total branch claims on and liabilities to U.S. residents other than the parent bank have fluctuated narrowly around \$2 billion each over the last 3 years. In September 1969, the branches had net liabilities of \$0.3 billion to residents of the United States; by June

1972 they had net claims of only \$0.1 billion on U.S. residents other than the parent banks.

## TRANSACTIONS WITH COMMERCIAL BANKS N FOREIGN COUNTRIES

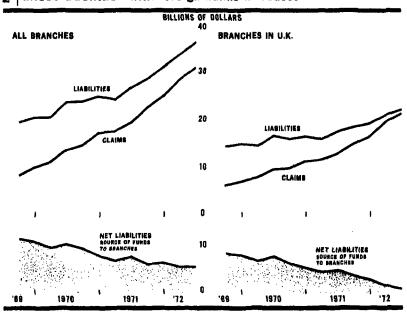

Foreign branches of U.S. banks in many countries are engaged in extensive transactions with foreign commercial banks. In some countries a net liability position vis-a-vis foreign commercial banks is the primary source of funds to the branches because they often have limited local nonbank deposit resources relative to their demands for funds. In addition, much of the lending by banks in the Euro-dollar market is to banks in other countries.

In recent years foreign branches of U.S. banks have increased the level of their accounts with other banks abroad. Between September 1969 and June 1972 the total claims of the foreign branches on other foreign banks increased from \$8.0 billion to \$30.7 billion; during this same period liabilities to foreign banks increased from \$19.5 billion to \$36.3 billion.

The faster growth of claims on than of liabilities to foreign commercial banks reflected in large part branch placement of increasing amounts of funds with foreign banks (especially in London) as head offices reduced their borrowings from branches. Branches have thus reduced substantially the net amount of funds raised from foreign banks from \$11.4 billion in September 1969 to \$5.6 billion in June 1972.

London has traditionally served as a major center of the interbank market because of the absence either of regulations on interest rates or of reserve requirements on nonsterling claims and liabilities of banks operating in the United Kingdom. In September 1969 the

## 2 GROSS BUSINESS with foreign banks increases

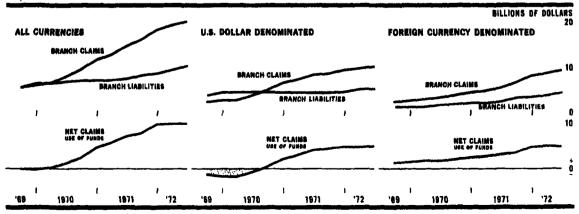

vast majority of claims and liabilities of foreign branches of U.S. banks to other foreign banks were recorded by their branches in the United Kingdom, and about three-quarters of the net funds raised by the branches from foreign commercial banks were obtained at U.K. branches. Although London remains dominant, in recent years other banking centers have increased in relative importance. By June 1972, U.S. banks were obtaining only about \$1 billion in net funds from foreign commercial banks at their branches in the United Kingdom, or less than one-fifth the total net amount raised by foreign branches of U.S. banks from foreign commercial banks.

In recent months branches of U.S. banks in other countries have raised increasing amounts of funds from foreign commercial banks. In particular, there has been a rapid expansion of the branch activities in the Bahamas. At the end of June 1972, branches of U.S. banks there had net liabilities of \$1.8 billion to other banks. As of the same date, branches of U.S. banks in France had net liabilities of about \$1.1 billion to foreign commercial banks, while branches in Germany were obtaining an additional \$0.8 billion from foreign banks. Branches in Japan, however, had net claims of \$0.2 billion on other foreign banks, which may have reflected loan and acceptance financing rather than short-term deposits.

## TRANSACTIONS WITH NONBANK FOREIGN CUSTOMERS

As of September 1969, claims on and liabilities to nonbank foreign customers reported by foreign branches of U.S. banks were approximately equal—about \$6 billion. By the end of June 1972, claims on nonbank foreign borrowers at foreign branches had increased to \$19.6 billion, whereas liabilities to nonbank foreigners had grown much more slowly to a total of \$10.2 billion. Thus by June 1972, foreign branches of U.S. banks, acting as intermediaries between foreign banks and foreign nonbank borrowers, were net suppliers of \$9.4 billion to nonbank foreign customers.

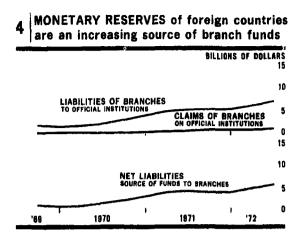

A somewhat similar pattern emerges when transactions with nonbank foreigners are broken down into those denominated in dollars and those denominated in other currencies. In September 1969, foreign branches of U.S. banks had net liabilities of \$1.2 billion in dollars to nonbank foreigners. The extremely high rates of interest that branches paid for dollar-denominated deposits in order to obtain funds for their head offices at that time, combined with the high rates charged on dollar-denominated credits, encouraged nonbank customers to place dollar deposits at foreign branches of U.S. banks and discouraged them from seeking dollardenominated credits. The reduction in interest rates in the Eurodollar market as foreign branches reduced their net supply of funds to their head offices led to a rapid increase in loans to nonbank customers relative to deposits. So, by June 1972 foreign branches of U.S. banks had gross dollar-denominated claims of \$10.2 billion on nonbank borrowers compared with \$5.4 billion in gross dollar liabilities; thus the branches were net suppliers of \$4.8 billion in dollar-denominated funds to their nonbank customers.

The rise in claims on nonbank borrowers reported by foreign branches of U.S. banks in the 1969-72 period, particularly those claims denominated in dollars, is a continuation of a trend that began in 1965 when the guidelines of the VFCR program began to curtail the foreign lending activities of the domestic offices of U.S. banks. In addition, the interest equalization tax on bank loans of over-1-year maturity to foreign borrowers and the regulations of the Foreign Direct Investment program have encouraged U.S. investors to obtain a proportion of their foreign financing requirements from nondomestic sources. Some of the increase in net claims on nonbank foreign borrowers reported by foreign branches of U.S. banks is attributable to the heavy credit demands by large multinational corporations in support of their worldwide operations.

In increasing their commercial lending activities generally, foreign branches have expanded their loans with a maturity of over 1 year to nonbank borrowers. In September 1969, these term claims on nonbank foreign borrowers at foreign branches of U.S. banks stood at \$2.2 billion dollars. By June 1972 such claims had more than doubled to \$5.5 billion, of which \$4 billion was denominated in dollars. However, term claims on nonbank borrowers currently represent less than one-tenth of the total assets of all foreign branches of U.S. banks.

SACTIONS WITH SACTIONS OFFICIAL INSTITUTIONS

In recent years foreign official institutions have placed increasing amounts of reserves on deposit with foreign branches of U.S. banks, as well as with other banks in the Euro-currency market. Between September 1969 and June 1972, liabilities to foreign

official institutions at foreign branches of U.S. banks increased from \$2.1 billion to \$7.2 billion, of which \$5.6 billion was denominated in dollars. The reserve funds, principally dollars, supplied by foreign authorities have enabled both the foreign branches of U.S. banks and other foreign banks to expand dollar loans to foreign nonbank and bank borrowers. Expansion of such loans may result in further additions to foreign official reserves.

Since September 1969 foreign branches of U.S. banks have increased their claims on foreign official institutions from \$0.5 billion to \$1.3 billion. In some cases, these claims have represented credits to countries experiencing balance of payment difficulties.

## UTILIZATION OF FOREIGN NETWORKS OF U.S. BANKS

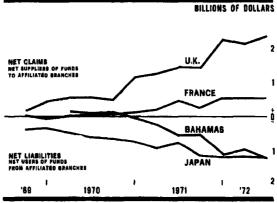

Foreign branches of U.S. banks engage in extensive transactions with branches of their parent banks that are located in other foreign financial markets. In June 1972 foreign branch claims on other such branches of the parent bank were almost \$10 billion, which was more than three times the level of September 1969.

The large and rapidly expanding foreign networks of U.S. banks and of banks of other nationalities have important implications for international capital mobility. Through their branch networks, banks are now able to shift significant amounts of funds from one financial market to another in which credit conditions are more stringent.

At present the major net flows of funds within the foreign branch networks of individual U.S. banks involve primarily branches in the United Kingdom, Japan, and the Bahamas. Relatively small net flows are reported by branches in France and Italy (net suppliers of funds to other branches of the parent bank) and branches in Germany (net users of the funds supplied by other branches of the parent bank).

Branches operating in the United Kingdom, which are important takers of funds from other commercial banks abroad, have consis-

tently provided funds to other branches of their parent banks. At the end of June 1972 U.K. branches were supplying \$2.3 billion to other branches of their parent banks.

Branches in Japan and the Bahamas are the principal recipients of funds from other branches of their parent banks. Branches in

## BRANCHES obtain funds net from other banks and official institutions while they supply funds net to nonbanks

<sup>\*</sup>Branches in other countries having the same parent bank in the United States.

Japan obtained \$1.2 billion net in funds from foreign branches in other countries of the parent banks in June 1972, and they supplied approximately an equal amount, net, to nonbank customers.

In recent years there has been a marked expansion in the activities of U.S. banks in the Bahamas as certain tax advantages as well as modest chartering costs have made the Bahamas an attractive site in which to locate a foreign branch. For many smaller U.S. banks these Bahamian branches are their sole offshore facility. The branches in the Bahamas are limited service facilities; that is, they are not licensed to do business with the local public. Rather, these branches provide their parent bank with an access to the Euro-dollar market and a means to expand foreign lending activities outside the restraints of the VFCR program.

Since mid-1971, branches in the Bahamas have been net recipients of funds from other branches of their parent banks. As of the end of 1972, they had net liabilities of about \$1.2 billion to their affiliated branches. Thus, the Bahamian branches tend to acquire funds both from foreign commercial banks and from other foreign branches of their parents and function as net suppliers of funds to nonbank customers.

# Changes in Time and Savings Deposits at Commercial Banks

April—July 1972

Interest rates on negotiable certificates of deposit in denominations of \$100,000 and over moved higher—as did those on other short-term market instruments—at many large commercial banks in the survey for the 3 months ending July 31, 1972. However, the changes in rates on smalldenomination consumer-type CD's and open account time deposits were relatively minor; a few banks lowered rates whereas others raised them. On balance, most banks were offering depositors the maximum rate permitted by supervisory authorities on July 31, as they had been 3 months earlier. However, rates on passbook savings were ½ per cent below the regulatory ceiling at some of the largest banks holding an appreciable proportion of all savings deposits. These banks had lowered the rate to 4 per cent in the early months of this year when short-term interest rates were declining.

In the survey, banks were asked to indicate whether they intended to raise their offering rate on consumer-type deposits in the immediate future. Four banks, three of which were large eastern institutions, reported that they intended to raise the rate on passbook savings back to 4½ per cent; no bank planned to lower this rate. On other small-denomination time deposits the number of rate changes scheduled was small; planned rate increases about offset rate decreases.

NOTE.—Caroline H. Cagle of the Board's Division of Research and Statistics prepared this article.

Appendix tables for this article appear on pp. 873-77.

Because of a vigorous expansion in loan demand in the first half of this year, banks began to bid actively for large-denomination time deposits. The advance in rates on large negotiable CD's, which are competitive with other liquid market instruments, was about in line with the net increase in short-term yields generally in the period covered by this survey. The higher rates were accompanied by a sizable inflow of deposits. Almost half of the growth in all time and savings deposits in the 3 months ending July 31 was in negotiable CD's and other large-denomination time deposits. There had been relatively small expansion in the preceding 6 months, when banks had been paying lower rates on these deposits and the volume of consumer-type time and savings deposits had been growing rapidly.

Aggregate holdings of small-denomination consumer-type deposits increased less in the 3 months ending July 31 than they had in other recent quarters. This slowdown was entirely in passbook savings, where the increase in the April-July quarter amounted to only half as much as in the January-April period. The slowing in the savings growth rate reflects in part a reduction in the interest rate paid at some banks early this year which, together with the rise in short-term market rates, lowered the relative attractiveness of savings deposits. On the other hand, inflows were brisk into small CD's and open account deposits, where rates paid were higher than on savings deposits. Growth in these deposits far outstripped the increase in the January-April quarter.

#### **NET CHANGES IN DEPOSITS**

In the 3 months ending July 31, 1972, insured commercial banks recorded one of the largest quarterly gains in total time and savings deposits

Previous surveys of time and savings deposits at all member banks were conducted by the Board of Governors in late 1965, in early 1966, and quarterly beginning in 1967. Beginning in 1968 the surveys were expanded to provide figures for all insured commercial banks and were conducted jointly by the Board of Governors and the Federal Deposit Insurance Corporation. The results of earlier surveys have appeared in BULLETINS for 1966-71, the most recent being July 1972, pp. 615-25.

Most of these are believed to be in accounts totaling less than \$100,000. The figures shown on this line are included above in the appropriate maturity category.

than \$100,000. The natures shown on this line are included above in the appropriate maturity category.

Note.—Data were compiled jointly by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation. For Jan. 31, Apr. 30, and July 31, 1972, the information was reported by a probability sample of all insured commercial banks; for Oct. 31, 1971, the data for member banks were reported by virtually all such banks and for insured nonmember banks by the same sample of these banks reporting in earlier surveys.

Some deposit categories include a small amount of deposits out-

Some deposit categories include a small amount of deposits outstanding in a relatively few banks that no longer issue these types of deposits and are not included in the number of issuing banks. Dollar amounts may not add to totals because of rounding.

in recent years. All time and savings deposits held by individuals, partnerships, and corporations (IPC) on that date amounted to \$259.7 billion—\$10.6 billion more than on April 30 and nearly \$4 billion more than the growth in the preceding quarter (Table 1). This compares with a record expansion of \$13.3 billion in the 3 months ending January 31, 1971.

About half of the recent growth in time and savings deposits was in large-denomination deposits. These rose by \$5 billion, or nearly 14 per cent. Negotiable CD's outstanding were up by almost \$4 billion (15 per cent), while nonnegotiable CD's and open account deposits issued in large denominations rose by \$1 billion (10 per cent).

Small depositors apparently were interested in securing the highest bank rate available on their funds. Growth in CD's and open account time deposits in denominations of less than \$100,000 aggregated about \$3.4 billion (nearly 4 per cent) in the 3 months April-July. The most rapid expansion was in deposits with maturities of 2 years or more on which a majority of the

banks were paying the ceiling rate of 5% per cent. These rose by \$1.4 billion or 5.7 per cent. On the shorter-maturity, lower-yielding deposit instruments, the growth rate was less rapid and it varied with the rate paid: a 5 per cent increase for deposits with maturities of 1 to 2 years and a 2 per cent increase for maturities of less than 1 year.

Depositors added less than \$1.9 billion to their holdings of passbook savings in the period covered by this survey. This contrasts sharply with the preceding 3 months, when the rate of increase had been twice that of the most recent quarter. Banks that offered depositors an interest rate of only 4 per cent experienced about one-third of the growth rate of banks that were paying the ceiling rate of 4½ per cent on July 31. But even for banks paying the highest rate, inflows in the most recent quarter were at a slower rate than in the January-April period.

Time deposits in special fund accounts rose by \$290 million in the most recent period. This represented largely a seasonal movement. Christmas club accounts, an important part of the total, are built up in the early part of each year to a peak in the autumn and then are paid out. The increase in all special fund accounts from April through July was roughly comparable to the growth in the same period of the preceding year.

#### RATE CHANGES AND RATE STRUCTURE

Nearly half of all large issuing banks raised their most common offering rate on negotiable CD's in denominations of \$100,000 or more in the April-July period (Appendix Table 7). Deposits of this kind are issued mainly to corporations and are offered in volume principally by large banks (total deposits of \$100 million or more). As of July 31 two-thirds of the large issuing banks reported the most common rate was between 4½ and 5½ per cent; 3 months earlier nearly half of these banks had been paying a rate no higher than 4½ per cent (Table 2).

As with negotiable CD's, large banks issue most of the nonnegotiable CD's and open account deposits in denominations of \$100,000 and over. More than one-third of the banks of this size increased their offering rate in the most recent quarter; at the end of July most large issuing banks reported a rate between 4½ and 5½ per cent.

To compete for large-denomination time deposits, some small banks pay fairly high rates of interest. A number of these banks paying unusually high rates on April 30 lowered their offering rate on these deposits in the 3 months covered by this survey. As a result, the average interest rates paid on large-denomination time deposits in many of the smaller bank size classes were slightly lower on July 31 than they had been 3 months earlier.

On consumer-type time deposits, other than savings, offering rates at the end of July were at or close to ceiling levels at most banks. About nine-tenths of the banks—holding a comparable proportion of such deposits—were paying depositors the maximum rates permitted by supervisory authorities. The percentages of banks at the ceiling rate in each of the three maturity categories were slightly higher than they had been 3 months earlier.

Rate changes on these deposits were more prevalent among large banks—total deposits of

\$100 million or more—than among smaller institutions. Of the large banks that changed their offering rate in the most recent quarter, the number of rate increases greatly exceeded decreases. This is in part because many big banks lowered their rate on these deposits in early 1972, when short-term rates were falling, and some of these banks adjusted the rate back to the ceiling after interest rates reversed direction. To compete for deposits of this kind, most small banks maintained their offering rates at the ceiling level during the past year.

As of July 31 the largest banks had the widest spread between the interest rate paid and the ceiling level on small-denomination CD's and open account deposits. For banks with total deposits of \$500 million and over, the average interest rate paid on deposits with maturities of less than 2 years was 8 basis points below the ceiling and for deposits with maturities of 2 years and over it was 15 basis points below. As bank size declined, the spread narrowed. In bank size classes below \$100 million the average rates on these deposits were very close to the ceiling.

Relatively few banks made any change in the interest rate paid on passbook savings in the 3 months ending July 31. On the survey date three-fourths of all banks were paying the 4½ per cent maximum rate; they held just under two-thirds of all passbook savings. In the early months of 1972 some banks lowered their rate on regular savings from 4½ to 4 per cent. Many of these banks were located on the West Coast and they held about one-fifth of all savings deposits. Most of these banks continued to pay the lower rate in the April-July period. Reflecting this situation, for banks with total deposits of \$100 million and over, which hold more than three-fifths of all regular savings deposits in the country, nearly half of the savings were in banks that were paying an interest rate on these deposits of 4 per cent on July 31.

#### **AVERAGE INTEREST RATES**

The weighted average interest rate on all forms of time and savings deposits, IPC, at insured commercial banks on July 31, 1972, was 4.77 per cent—up 4 basis points from April 30 (Table 3).

Note.—The average rates were calculated by weighting the most common rate reported on each type of deposit at each bank by the amount of that type of deposit outstanding. Christmas savings and other special funds, for which no rate information was collected, were excluded.

Rates were close to ceiling levels on CD's and other time deposits in denominations of less than \$100,000 on July 31. The average rate was 4.96 per cent for deposits with maturities of less than 1 year; 5.45 per cent for maturities of 1 to 2 years; and 5.68 per cent for maturities of 2 years and over.

Because some of the largest banks with a substantial volume of passbook savings were paying ½ of 1 per cent below the maximum rate on July 31, the average rate for savings

deposits at all banks of 4.31 per cent was 19 basis points below the regulatory ceiling.

On negotiable CD's in denominations of \$100,000 or more the average rate at insured commercial banks on July 31 was 4.89 per cent and on other large-denomination time deposits, 5.01 per cent. These rates represented increases of 16 and 2 basis points, respectively, in the most recent quarter. As indicated, average rates rose at most large banks in this period but were lower at some of the smaller banks.

As in the preceding survey, the average rate paid on all forms of time deposits varied inversely with the size of bank. The smallest banks—total deposits of less than \$10 million—had a rate of 5.05 per cent on July 31,

or 41 basis points higher than the rate for the largest bank size class. In all major categories of deposits the smallest banks were paying somewhat higher rates at the end of July than the largest banks.

#### NOTE TO TABLE 2:

Note.—The most common interest rate for each instrument refers to the basic stated rate per annum (before compounding) in effect on the survey date that was generating the largest dollar volume of deposit inflows. If the posted rates were unchanged during the 30-day period just preceding the survey date, the rate reported as the most common rate was the rate in effect on the largest dollar volume of deposit inflows during that 30-day period. If the rate changed during that period, the rate reported was the rate prevailing on the survey date on the largest dollar volume of deposit inflows.

While rate ranges of \( \frac{4}{3} \) or \( \frac{4}{3} \) of a percentage point are shown in this and other tables, the most common rate reported by most banks was the top rate in the range; for example, 4.00, 4.50, etc. On negotiable CD's in denominations of \$100,000 and over, however, some large banks have rates at intervals of \( \frac{4}{3} \) of a percentage point. Some deposit categories exclude a small amount of deposits outstanding in a relatively few banks that no longer issue these types of deposits and are not included in the number of issuing banks.

Figures may not add to totals because of rounding.

#### NOTES TO APPENDIX TABLES 1-6:

'Less than \$500,000.

<sup>2</sup>Omitted to avoid individual bank disclosure.

NOTE.—Data were compiled from information reported by a probability sample of all insured commercial banks. The latter were expanded to provide universe estimates.

Figures exclude banks that reported no interest rate paid and that held no deposits on the survey date, and they also exclude a few banks

that had discontinued issuing these instruments but still had some deposits outstanding on the survey date. Time deposits, open account, exclude Christmas savings and other special accounts. Dollar amounts may not add to totals because of rounding.

In the headings of these tables under "Most common rate paid (per cent)" the rates shown are those being paid by most reporting banks. However, for the relatively few banks that reported a rate in between those shown, the bank was included in the next higher rate column.

Shaded areas indicate that rates shown in the stub are higher than the maximum permissible rate on the various instruments.
 1 For description of most common rate, see Note to Table 2, p. 872.

Apr. 30, 1972. The table excludes banks that issued these types of deposits on Apr. 30, but no longer issued them on July 31. Percentages may not add to totals because of rounding.

<sup>&</sup>lt;sup>2</sup> Less than 0.05 per cent. Note.—This table was compiled by comparing rates as reported by the sample banks that had these types of deposits outstanding on July 31, 1972, with the rates reported by the same banks on

## Revision of Consumer Credit Statistics

Federal Reserve estimates of consumer instalment and noninstalment credit have been revised for the period from 1965 to date. The tables at the end of this article incorporate adjustment of sample-based estimates to reflect recent benchmarks, computation of new seasonal factors, provision of certain additional detail by type of credit, and extension to earlier years of a recent reorganization of institutional classifications.

The cumulative effect of these changes has been to raise the estimate of total consumer credit outstanding on December 31, 1971, by about \$1.2 billion, or 0.8 per cent. The net increase reflects an upward adjustment of nearly \$1.8 billion in the instalment credit share of the total, and a downward adjustment of \$0.6 billion in the noninstalment share. The related estimates of extensions of consumer instalment debt have been raised moderately; estimates of repayments have also been raised, but by a somewhat smaller amount. For the full year 1971, the increase in indicated extensions from the previously published estimate amounted to \$6.6 billion; the increase in indicated repayments was nearly \$5.8 billion.

For the major types of instalment credit outstanding, the new benchmarks required considerable increases in the previous estimates for other consumer goods and for repair and modernization credit, a slight increase in the automobile credit estimate, and a reduction in the estimate for personal loan indebtedness. In the noninstalment credit total, a large reduction in charge account balances as reported before this revision was partly offset by moderate increases in estimated amounts of outstanding service credit and single-payment loans (Table 1). Changes in extensions and repayments of instalment credit were concentrated in increases in other consumer goods and repair and modernization credit.

Additional details by type of credit-some published for the first time in this revision-are presented for other consumer goods. This category has been subdivided to reveal two of the most rapidly growing forms of instalment credit—bank-card credit and mobile-home credit. A separate series for outstandings under commercial bank credit-card plans begins with data for 1968. Bank check-credit is still included under personal loans in the BULLETIN tables (p. A-57) but separate figures are available on request.

Mobile-home credit held by commercial banks and finance companies had expanded to \$7 billion at the end of 1971. Reflecting the growing importance of this credit, figures on the amounts outstanding are indicated separately in the revised tables, and current figures will be published separately in future issues of the BULLETIN. These figures are available beginning in mid-1970 for finance companies and in mid-1971 for commercial banks. Although separate data are not yet available for mobile-home credit held by other lender groups, the amount of such paper is believed to be relatively small.

For the various groups that hold consumer instalment paper, the adjustment to new benchmarks increased outstanding credit at financial institutions as of the end of 1971 by a total of \$3.1 billion, or 3.3 per cent, and reduced holdings of retail outlets by \$1.3 billion, or 8.5 per

cent. The figure for financial institutions represents a substantial upward revision in outstanding credit at commercial banks—the largest holder group—that was partly offset by a decrease in estimated holdings of finance companies (Table 2). New reporting panels have been developed for both commercial banks and finance companies: the bank sample was adopted in January 1970; the finance company sample in November 1970. The new samples were designed to reflect changes in industry structure and

should minimize the size of revisions required to bring the series into line with future benchmarks.

Consumer credit data on the revised basis for the period 1965-71 are shown in the tables on pages 882-98. Revised data for the first 8 months of 1972 appear in the regular consumer credit tables beginning on page A-56 of this issue of the BULLETIN.

#### **COVERAGE OF SERIES**

Consumer credit, as measured by the Federal Reserve series, consists of amounts owed by individuals to financial institutions, retailers, and other distributors primarily for financing purchases of consumer goods and services. However, amounts owed by individuals on real estate mortgages and on life insurance policy loans are excluded regardless of the actual use of the funds.

Estimates of consumer credit are based primarily on reports from financial institutions and retailers to various Federal agencies and trade associations. Both commercial banks and finance companies report data to the Board of Governors of the Federal Reserve System or to one of the 12 district Federal Reserve Banks. Estimates for credit unions are based on reports compiled by the National Credit Union Administration, retail credit estimates on data from the Bureau of the Census, and estimates for savings and loan associations on reports made to the Federal Home Loan Bank Board. Figures for mutual savings banks are prepared from data collected by the National Association of Mutual Savings Banks.

Some reports do not separate loans made to individuals for consumer purposes from those for nonconsumer purposes. Appropriate adjustments are made by the Federal Reserve, where possible, to eliminate the nonconsumer portion. Most of these adjustments are comparatively small except for repair and modernization loans and single-payment loans. In the retail credit sector, an adjustment is also made to allow for credit extended to consumers by wholesalers.

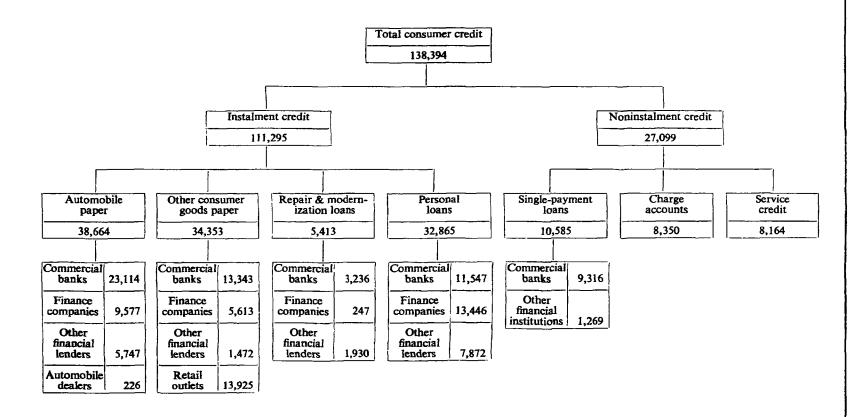

#### RECLASSIFICATION

A number of changes were made during 1970 in the organization of consumer credit data. These changes, as indicated in the BULLETIN for November 1970, regrouped certain institutions holding consumer credit in order to reflect more closely contemporary industry practices. Finance company figures were aggregated to combine estimates, previously published separately, for sales finance companies and consumer finance companies, with estimates, not formerly published separately, for consumer loans of industrial loan companies and the consumer lending of business finance companies. This consolidation of finance company figures was in recognition of the increasing diversification of loan portfolios, which has reduced the number of firms that can be identified exclusively with a single subsector of the industry.

A new category, "miscellaneous lenders," was established to cover totals of consumer instalment credit at savings and loan associations

<sup>&</sup>lt;sup>1</sup>Data for earlier years, which were not altered by the current benchmark adjustment, are available in Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965, and the BULLETIN for December 1968, pp. 983-1003.

SHORT- AND INTERMEDIATE-TERM CONSUMER CREDIT, DECEMBER 31, 1971, BY TYPE OF CREDIT AND INSTITUTION In millions of dollars

and mutual savings banks. Another new category, "other financial lenders," was developed to consolidate credit union data with the total for miscellaneous lenders. The classifications for commercial banks and credit unions were not changed.

## SEASONAL, TRADING-DAY, AND OTHER ADJUSTMENTS

Seasonal and working- or trading-day differences continue to play a significant role in month-to-month fluctuations in consumer credit. In the separately published seasonally adjusted series, allowances for these influences have again been made in both instalment credit extended and instalment credit repaid and in the net change in credit outstandings. In addition, a special correction continues to be made in the seasonally adjusted retail charge account estimates for March and April, in order to allow for the shifting date of Easter. This adjustment continues to be small, even for very early and very late Easter dates.

#### **BENCHMARK SOURCES**

Data for commercial banks are adjusted by type of loan to benchmarks provided by June and December call reports of condition. In the current revision, the series were adjusted through the call report for June 30, 1971. Figures for mutual savings banks also are adjusted to call report data for June 30, 1971. The prior benchmark adjustment for both of these series had been June 30, 1967.

Figures for finance companies are based on benchmark data obtained in Federal Reserve surveys that have been conducted at 5-year intervals since 1955, the most recent being that for June 30, 1970. Detailed results of the 1970 survey will be published in a forthcoming BULLETIN.

Data for credit unions (both State and Federal) are adjusted to year-end figures provided

by the National Credit Union Administration. The present revision includes adjustments to benchmarks from 1966 through December 1970 for State, and through December 1971 for Federal, credit unions.

Year-end data from reports of the Federal Home Loan Bank Board provide benchmarks for adjusting figures for savings and loan associations. Data for 1966 through 1971 were used in this revision.

Retail estimates are based on the monthly data on retailer-held credit compiled by the Bureau of the Census, to which appropriate adjustments are made for nonconsumer and wholesale credit, as discussed earlier. These data were adjusted from 1966 through 1971.

## PUBLICATION OF CONSUMER CREDIT ESTIMATES

Current estimates of consumer credit outstanding, and of consumer instalment credit extended and repaid, are published monthly in Federal Reserve statistical release G.19, "Consumer Credit," and in the statistical section of the Federal Reserve BULLETIN. In addition, monthly estimates for commercial banks appear in the Federal Reserve release G.18, "Consumer Instalment Credit at Commercial Banks," and for finance companies in the release G.20, "Finance Companies." A detailed explanation of these series is available in Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965.<sup>2</sup>

<sup>&</sup>lt;sup>2</sup>This supplement may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, at the price quoted on p. A-102.

Historical data on extensions, repayments, and outstandings for bank-card credit, check credit, and mobile-home credit are also available on request from the Mortgage, Agricultural, and Consumer Finance Section of the Board.

<sup>1</sup> Holdings of financial institutions; holdings of retail outlets are included in "Other consumer goods paper."

NOTE.—Consumer credit estimates cover loans to individuals for household, family, and other personal expenditures, except real estate mortgage

loans. For back figures and description of the data see "Consumer Credit," Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965, and BULLETIN for Dec. 1968. Estimates for 1972 are shown on pp. A-56 and A-57 of this BULLETIN.

 $<sup>^{\</sup>rm 1}$  Net changes in credit outstanding are equal to extensions less repayments.

Note.—Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and sales of instalment paper, and certain other transactions may increase

the amount of extensions and repayments without affecting the amount outstanding.

Annual figures are shown on p. 894. For back figures and description of the data, see "Consumer Credit," Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965, and Bulletin for Dec. 1968. Estimates for 1972 are shown on p. A-58 and A-59 of this Bulletin.

<sup>&</sup>lt;sup>1</sup> Net changes in credit outstanding are equal to extensions less repayments, except in certain months when data for extensions and repayments have been adjusted to eliminate duplication resulting from large transfers of paper. In those months the differences between extensions and repayments for some particular holders do not equal the changes in their outstanding credit. Such transfers do not affect total instalment credit extended, repaid, or outstanding. Annual figures are shown on p. 894. See Note to table on p. 891.

<sup>&</sup>lt;sup>2</sup> Finance companies consist of those institutions formerly classified as sales finance, consumer finance, and other finance companies.

<sup>3</sup> Other financial lenders include credit unions and miscellaneous lenders. Miscellaneous lenders include savings and loan associations and mutual savings banks.

<sup>1</sup> Net changes in credit outstanding are equal to extensions less repay-

ments.

Note:—Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and sales of instalment paper, and certain other transactions may increase the

amount of extensions and repayments without affecting the amount out-

standing.

For back figures and description of the data, see "Consumer Credit,"
Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965, and BULLETIN for Dec. 1968.

<sup>&</sup>lt;sup>1</sup> Net changes in credit outstanding are equal to extensions less repayments.

Note.—Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and sales of instalment paper, and certain other transactions may in-

crease the amount of extensions and repayments without affecting the amount outstanding.

For back figures and description of the data, see "Consumer Credit," Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965, and Bulletin for Dec. 1968. Estimates for 1972 are shown on pp. A-58 and A-59 of this Bulletin.

<sup>&</sup>lt;sup>1</sup> Net changes in credit outstanding are equal to extensions less repayments, except in certain months when data for extensions and repayments have been adjusted to eliminate duplication resulting from large transfers of paper. In those months the differences between extensions and repayments for some particular holders do not equal the changes in their outstanding credit. Such transfers do not affect total instalment credit extended, repaid, or outstanding.

See Note on p. 896.

<sup>&</sup>lt;sup>2</sup> Finance companies consist of those institutions formerly classified as sales finance, consumer finance, and other finance companies.
<sup>3</sup> Other financial lenders include credit unions and miscellaneous lenders. Miscellaneous lenders include savings and loan associations and mutual savings banks.

# Record of Policy Actions

### of the Federal Open Market Committee

Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's Annual Report, are released approximately 90 days following the date of the meeting and are subsequently published in the Federal Reserve BULLETIN.

The record for each meeting includes the votes on the policy decisions made at the meeting as well as a résumé of the basis for the decisions. The summary descriptions of economic and financial conditions are based on the information that was available to the Committee at the time of the meeting, rather than on data as they may have been revised since then.

Policy directives of the Federal Open Market Committee are issued to the Federal Reserve Bank of New York—the Bank selected by the Committee to execute transactions for the System Open Market Account.

Records of policy actions have been published regularly in the BULLETIN beginning with the July 1967 issue, and such records have continued to be published in the Board's Annual Reports.

The records for the meetings held in 1972 through June 19-20 were published in the BULLETINS for April, pages 390-97; May, pages 455-63; June, pages 562-70; July, pages 640-48; August, pages 707-12; and September, pages 790-96. The record for the meeting held on July 18, 1972, follows:

### **MEETING HELD ON JULY 18, 1972**

### Current economic policy directive.

The information reviewed at this meeting suggested that growth in real output of goods and services in the second quarter of 1972 had been much faster than the annual rates of between 5.5 and 6 per cent recorded in the two preceding quarters and that the rise in prices had slowed considerably from the first to the second quarter of the year. Staff projections suggested that growth in real GNP would remain rapid in the second half, although not so rapid as in the quarter just ended.

In June industrial production continued to expand, reflecting gains in output of business equipment and of materials, but the pace of the expansion—as in May—was well below that in the first 4 months of the year. Total nonfarm payroll employment was unchanged from May, following three sizable monthly increases. Although employment in manufacturing declined somewhat, the average factory workweek remained relatively high. The unemployment rate dropped to 5.5 per cent from 5.9 in May, but the decline was concentrated among younger workers and might have reflected in part seasonal adjustment problems at the end of the school year. Retail sales declined, according to the advance report, after having increased sharply in May; sales in the second quarter as a whole were substantially higher than in the first quarter.

Wholesale prices of farm and food products rose considerably further in June, and prices of industrial commodities continued upward at about the average rate of earlier months this year. The advance in hourly earnings of production workers on private nonfarm payrolls, which had slowed in May, remained small in June.

Staff projections of real GNP for the second half of 1972 were generally similar to those of 4 weeks earlier. However, the rate of growth anticipated was less rapid than that in the second quarter, which now appeared to have been substantially greater than had been expected. It was anticipated that the rise in disposable personal income in the second half would be somewhat faster than in the second quarter and that expansion in consumption expenditures would remain strong—with the recently enacted increase of 20 per cent in social security benefits contributing to the gains in the fourth quarter. It was still expected that State and local government

purchases of goods and services would increase substantially; that business capital outlays would rise moderately and inventory investment appreciably; and that residential construction would level off.

In foreign exchange markets, speculation intensified in mid-June. The United Kingdom lost a substantial amount of reserves in supporting its exchange rate, and early on June 23 it announced that the rate for sterling would be allowed to float and that its exchange markets would be closed for 2 days. Uncertainty and speculation then focused on the dollar and led to the closing of official markets in all major countries-although in some European countries, not before central banks had acquired a substantial amount of dollars in the process of maintaining their currencies within the limits of the Smithsonian Agreement. When exchange markets were reopened around the end of June, controls on capital inflows into some countries were tighter. At the time of this meeting of the Committee, speculative pressures against the dollar had abated somewhat, but exchange rates for most major foreign currencies were at or close to their ceilings against the dollar. The rate for sterling had declined about 5 per cent from the level prevailing before it was allowed to float.

U.S. merchandise exports increased in May while imports changed little, and the trade deficit receded from the exceptionally large figure in April. The average deficit in the April-May period, however, was substantially greater than that in the first quarter of the year.

Since the last meeting of the Committee, interest rates on most short-term market securities had risen somewhat, partly in response to gradual firming in money market conditions. Rates on shorter-term Treasury bills were an exception, reflecting anticipations of demands for Treasury securities by those foreign official institutions that had been acquiring dollars; at 3.92 per cent on the day before this meeting, the market rate on 3-month bills was unchanged from 4 weeks earlier.

In markets for long-term securities, interest rates on corporate and State and local government bonds rose somewhat in the latter part of June but declined again in early July; at the time of this Committee meeting yields on long-term bonds generally were little changed from 4 weeks earlier. The combined volume of new

publicly issued corporate bonds and of State and local government bonds changed little from May to June; the volume appeared likely to expand in July.

Contract interest rates on conventional new-home mortgages and yields in the secondary market for Federally insured mortgages both were unchanged from May to June. Inflows of savings funds to nonbank thrift institutions increased somewhat in June, but the average rate of inflows in the second quarter of the year was well below the exceptional pace in the first quarter.

At commercial banks, real estate and consumer loans outstanding continued to expand rapidly in June, but business loans declined—after having expanded substantially throughout the first 5 months of the year—and banks reduced their holdings of securities other than those of the U.S. Government. Despite the measured decrease in business loans, part of which may have been attributable to seasonal adjustment problems, loan demand was reported to have remained basically strong. In late June most major banks raised their prime rates from 5 to 5¼ per cent.

Growth in the narrowly defined money stock (private demand deposits plus currency in circulation, or  $M_1$ ) in June remained close to the relatively slow rate recorded in May. Sluggishness in June, however, may have reflected temporary effects of the speculation in foreign exchange markets and outflows of funds from the United States after midmonth, and weekly data suggested a sharp increase in the rate of expansion in early July. Growth in the more broadly defined money stock ( $M_1$  plus commercial bank time and savings deposits other than large-denomination CD's, or  $M_2$ ) remained substantial in June, as inflows of consumer-type time and savings deposits to banks continued at a relatively high rate. Expansion in the bank credit proxy—daily-average member bank deposits, adjusted to include funds from nondeposit sources—slowed sharply, reflecting a marked reduction in U.S. Government deposits.

System open market operations in the period since the June 19-20 meeting of the Committee had been directed at fostering growth in reserves available to support private nonbank deposits (RPD's) at an annual rate in the June-July period of between 4.5 and 8.5 per cent, while avoiding sharp day-to-day fluctuations and large cumulative changes in money market conditions. Since July 6,

when Committee members voted to amend the current economic policy directive to take international developments into account, operations also had been conducted with a view to providing and absorbing reserves in ways that avoided significant declines in Treasury bill rates that might otherwise have resulted from heavy foreign official demands for bills. It appeared at present that RPD's would grow over the June-July period at a rate of about 8.5 per cent. The Federal funds rate rose to about 4% per cent from just under 4½ per cent shortly before the preceding meeting. In the 4 weeks ending July 12 member bank borrowings averaged about \$180 million, compared with about \$115 million in the preceding 4 weeks.

The Committee agreed that the economic situation continued to call for moderate growth in the monetary aggregates over the months ahead, and it decided to seek growth in RPD's at an annual rate in a range of 3 to 7 per cent during the July-August period while continuing to avoid sharp fluctuations and large cumulative changes in money market conditions. The members also decided that account should be taken of the forthcoming Treasury financing, of developments in capital markets, and of international developments, and that some allowance should be made in the conduct of operations if growth in the monetary aggregates appeared to be deviating significantly from the rates expected. As at other recent meetings, it was understood that the Chairman might call upon the Committee to consider the need for supplementary instructions before the next scheduled meeting if it appeared that the Committee's objectives and constraints were not being met satisfactorily.

The following current economic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests that real output of goods and services increased at a faster rate in the second quarter than in the two preceding quarters. In June the unemployment rate declined, but it was still substantial. Wholesale prices of farm and food products advanced appreciably further in June and the rise in prices of industrial commodities remained substantial. Recent data suggest moderation in the pace of advance in wage rates. In foreign exchange markets, following disturbances leading to a floating of the pound sterling, the dollar has come under pressure and the reserves of European central banks have increased sharply. In May,

the excess of merchandise imports over exports remained large, though a little less than in April.

Growth in the narrowly defined money stock was relatively slow in May and June, but preliminary weekly data suggest a pickup in early July. Growth in the broadly defined money stock was more substantial as inflows of consumer-type time and savings deposits to banks remained strong. Expansion in the bank credit proxy slowed sharply in June as U.S. Government deposits declined markedly. In recent weeks, long-term interest rates have changed little; rates in short-term markets have advanced, except for those on shorter-maturity Treasury bills.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions conducive to sustainable real economic growth and increased employment, abatement of inflationary pressures, and attainment of reasonable equilibrium in the country's balance of payments.

To implement this policy, while taking account of the forthcoming Treasury financing, developments in capital markets, and international developments, the Committee seeks to achieve bank reserve and money market conditions that will support moderate growth in monetary aggregates over the months ahead.

Votes for this action: Messrs. Burns, Hayes, Brimmer, Bucher, Daane, Eastburn, MacLaury, Robertson, Sheehan, and Winn. Vote against this action: Mr. Coldwell.

Absent and not voting: Mr. Mitchell.

Mr. Coldwell dissented from this action because in his judgment average growth in bank reserves within the specified range for July and August and the associated expansion in the money supply might build a base for excessive economic stimulation. He was concerned about the effects both on the domestic economic situation, in the context of heavy stimulation from fiscal policy, and on international financial problems.

# Law Department

Statutes, regulations, interpretations, and decisions

#### INTERPRETATION OF REGULATION Y

## ACTIVITIES NOT CLOSELY RELATED TO BANKING

The Board of Governors has expanded its interpretation on this subject, published at page 571 of the June 1972 BULLETIN, to include three additional activities. Also, the words "Equity funding" in the original interpretation have been changed to read "Insurance premium funding." The amended interpretation reads as follows:

Pursuant to section 4(c)(8) of the Bank Holding Company Act and § 225.4(a) of Regulation Y, the Board of Governors has determined that the following activities are not so closely related to banking or managing or controlling banks as to be a proper incident thereto:

- (a) Insurance premium funding—that is, the combined sale of mutual funds and insurance.
- (b) Underwriting life insurance that is not sold in connection with a credit transaction by a bank holding company, or a subsidiary thereof.
- (c) Real estate brokerage (see 1972 Federal Reserve BULLETIN 428).
- (d) Land development (see 1972 Federal Reserve BULLETIN 429).
  - (e) Real estate syndication.
- (f) Management consulting (see 1972 Federal Reserve Bulletin 571).
- (g) Property management (see 1972 Federal Reserve BULLETIN 652).
- (h) Operation of savings and loan associations.\* (see 1972 Federal Reserve BULLETIN 717).

#### BANK HOLDING COMPANY AND BANK MERGER APPLICATIONS: PUBLICATION OF BOARD'S ORDERS

Enactment of the 1970 Amendments to the Bank Holding Company Act expanded the coverage of the Act to include one-bank holding companies; as a result, the number of holding company applications processed by the Board of Governors has increased tremendously, with a corresponding increase in the number of orders issued by the Board in holding company cases. For comparison, the Board issued 92 orders in 1969; 149 orders in 1970; 189 orders in 1971; and 232 orders during the first 9 months of 1972.

In the past, the Board has published each of its orders in the BULLETIN, together with any accompanying statement or statements. However, in view of the anticipated continued rise in the number of holding company orders, the procedures set forth below will be followed regarding publication of orders issued by the Board under the Bank Holding Company Act and the Bank Merger Act.

As part of the Law Department Section of the BULLETIN, two sections will be set out under the heading "Bank Holding Company and Bank Merger Orders Issued by the Board of Governors." In the first section, entitled "Orders Printed in this Issue," will be printed in full all orders issued under the above two acts that are accompanied by a statement of any kind—majority statement, concurring statement, or dissenting statement—which also will be printed in full.

In the second section, captioned "Orders not Printed in this Issue," will be listed all Board orders that were issued without a statement. This list, with respect to holding company orders, will include the name of the applicant; name of bank or banks involved (orders under § 3 of the Act) or name of company or activity involved (orders under § 4 of the Act); the Board's action with respect to the application and effective date thereof; and the Federal Register citation for each order. (Inasmuch as each of the Board's orders is published in the Federal Register, usually within 5 to 7 days after it is issued, the Federal Register citation for each order will be available for inclusion in the BULLETIN list of orders.) Similar information will be listed for the Board's orders issued on applications under the Bank Merger Act.

The Board will continue to release all orders and statements in mimeographed form, together with a press release, copies of which will be available upon request to the Board of Governors.

<sup>\*</sup>As indicated in its statement announcing this action, this activity may be the subject of further consideration by the

This new publication procedure is scheduled to go into effect in the November 1972 issue of the BULLETIN and will include all orders issued during October 1972.

#### ORDER UNDER BANK MERGER ACT

THE CITIZENS COMMERCIAL BANK, CELINA, OHIO

ORDER APPROVING APPLICATION FOR MERGER OF BANKS

The Citizens Commercial Bank, Celina, Ohio ("Celina Bank"), a member State bank of the Federal Reserve System, has applied for the Board's approval pursuant to the Bank Merger Act (12 U.S.C. 1828(c)) of the merger of that bank with The Peoples Bank Company, Fort Recovery, Ohio ("Fort Recovery Bank"), under the charter and title of Celina Bank. As an incident to the merger, the single office of Fort Recovery Bank would become a branch of the resulting bank.

As required by the Act, notice of the proposed merger, in form approved by the Board, has been published, and the Board has requested reports on competitive factors from the Attorney General, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

The Board has considered the application and all comments and reports received in the light of the factors set forth in the Act, and finds that:

Celina Bank (\$25 million deposits)<sup>1</sup> operates its only two offices in Mercer County (population of 35,600) where it ranks as the second largest of the seven county banks, controlling 25 per cent of aggregate deposits.

Fort Recovery Bank is the smallest bank in Mercer County with deposits of \$7 million. Its only office is located in Fort Recovery and is separated by a distance of 20 miles from Celina Bank's closest office. There is no main road connecting these offices, two competing banks are located in the intervening area, and another competing bank is located in Fort Recovery. Although Celina and Fort Recovery Banks are located in the same county their service areas do not overlap. No meaningful competition exists between them which would be eliminated by consummation of this proposed merger.

The largest of the county banks (\$27 million deposits) has requested permission of the Comptroller of the Currency to merge with the sixth

largest county bank (\$8 million deposits). The resulting bank emerging from consummation of the instant proposal would hold 32 per cent of county deposits. It appears unlikely that any of the three small county banks would merge due to their overlapping market areas. Fort Recovery is not an attractive area for de novo entry by Celina Bank or others since there are presently two banking offices serving this village of 1,348 persons, and there appears to be no immediate prospect for economic expansion of the area. It is also apparent that Fort Recovery Bank does not have sufficient financial resources to permit it to establish a new branch in the Celina area.

A report from the Department of Justice on the competitive factors involved in the proposed merger stated that whereas there was only a limited amount of existing competition between the two institutions, consummation of the proposal would have an adverse effect on competition which would be compounded by consummation of the other pending Mercer County proposed merger. The Department cited the elimination of an alternative source of banking within the county, and the increased concentration of banking resources in the localized market as adverse factors affecting competition. Conversely, a report from the Federal Deposit Insurance Corporation concluded that the proposed merger would not eliminate any significant existing competition between them or any significant potential for increased competition through de novo branching, and that although the concentration of banking resources in Mercer County area would be increased, there would remain numerous conveniently available banking alternatives. The Corporation concluded that the proposed merger would have no significant effects on competition in any relevant area. The report from the Comptroller of the Currency also determined that the proposed merger would have no anticompetitive results.

On the basis of the record, the reports from other agencies, and in view of the circumstances attendant upon banking in the relevant areas hereinbefore discussed, the Board is of the opinion that consummation of this merger would have only a slightly adverse effect on existing or potential competition, and that the increase in concentration of banking resources in Mercer County would not significantly affect competition in the relevant areas

The financial and managerial resources of Celina Bank are generally satisfactory and prospects for the resulting bank appear favorable. The merger

<sup>&</sup>lt;sup>1</sup>All banking data are as of December 31, 1971.

would strengthen the Fort Recovery office and would also solve its present management succession problems. Considerations relating to banking factors are consistent with, and lend some weight, toward approval of the application. Considerations relating to the convenience and needs of the communities to be served also lend weight toward approval since the merger of the two banks would make possible expanded loans for Fort Recovery Bank's customers, as well as an increase in the number and dollar volume of residential mortgages; and the availability of new services to include Bank Americard and Line-O-Credit services. Consequently, the banking factors as well as the convenience and needs aspects outweigh the slightly adverse competitive consequences of this proposed merger. Based upon the foregoing, it is the Board's judgment that consummation of the proposal would be in the public interest, and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Cleveland pursuant to delegated authority.

By order of the Board of Governors, effective July 28, 1972.

Voting for this action: Chairman Burns and Governors Robertson, Mitchell, and Sheehan. Absent and not voting: Governors Daane, Brimmer, and Bucher.

(Signed) TYNAN SMITH, Secretary of the Board.

### ORDERS UNDER SECTION 3 OF BANK HOLDING COMPANY ACT

# TEXAS COMMERCE BANCSHARES, INC., HOUSTON, TEXAS

ORDER APPROVING ACQUISITION OF BANKS

Texas Commerce Bancshares, Inc., Houston, Texas, a registered bank holding company within the meaning of the Bank Holding Company Act, has applied in separate applications for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of the successor by merger to Airline Bank, Houston, Texas ("Airline Bank") and of the successor by merger to Reagan State Bank of Houston, Houston, Texas ("Reagan Bank").

The banks into which Airline and Reagan banks are to be merged have no significance except as a means to facilitate the acquisition of the voting shares of Airline and Reagan banks. Accordingly, the proposed acquisitions of the successor organizations are treated herein as the proposed acquisitions of the shares of Airline and Reagan banks.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls two banks located in the Houston area with aggregate deposits of \$1.2 billion, representing 3.9 per cent of total deposits of commercial banks in the State. Applicant, the fourth largest banking organization in Texas and the second largest in the Houston banking market, controls approximately 16.5 per cent of total commercial bank deposits in the Houston area.<sup>1</sup> (All banking data are as of December 31, 1971, and reflect bank holding company acquisitions and formations approved through June 30, 1972.) In addition to its two subsidiary banks, Applicant holds, through a subsidiary, 24.9 per cent of the outstanding voting shares of each of the banks

proposed to be acquired. Applicant's subsidiary also holds between 20 and 24 per cent of each of three other banks in the Houston market. These five banks hold aggregate deposits of \$168.7 million representing 2.4 per cent of total deposits of commercial banks in the Houston area. Upon consummation of the proposals herein, Applicant would control approximately 18 per cent of total deposits of commercial banks in the Houston area and would remain the area's second largest banking organization. Applicant's share of deposits of commercial banks in the State would increase by .3 percentage points and Applicant's ranking among banking organizations in the State would be unchanged.

Reagan Bank (\$65 million of deposits) and Airline Bank (\$26.5 million of deposits) rank 15th and 45th, respectively, among 142 banking organizations in the Houston market and control respectively, .9 and .4 per cent of total deposits of commercial banks in that area. Reagan and Airline banks are located approximately four miles north and six miles northwest, respectively, of Applicant's lead bank located in downtown Houston. In addition, Applicant's other subsidiary, North Freeway Bank (\$4.5 million of deposits) is located in the Houston area approximately five miles north of Airline and Reagan banks. The service area of Applicant's lead bank completely overlaps the service areas of the two proposed subsidiary banks. It appears that some deposit and loan overlap exists among these banks.

Both Reagan and Airline banks were organized in the 1950's by individuals closely associated with Applicant's lead bank. Except for a brief period of about two years from 1966 to 1968, shares of Reagan and Airline banks have been held continuously by Applicant or its predecessor organizations. A close working relationship between Applicant and each of the banks proposed to be acquired has continued uninterruptedly since Reagan and Airline banks were chartered. The proposals herein represent a strengthening of existing interests rather than the acquisition of independent competing banks. In view of Applicant's significant holding of shares of these banks and the continued close relationship between Applicant and these banks, the prospect of disaffiliation seems remote.

It appears that consummation of Applicant's proposals herein would not eliminate any meaningful competition between the proposed subsidiaries or between either of them and any of Applicant's subsidiary banks. Nor would consummation

¹ On August 31, 1972, the Board approved Applicant's application to acquire American National Bank of Beaumont, Beaumont, Texas (\$112 million of deposits). At the same time the Board directed Applicant to divest shares of Beaumont State Bank, Beaumont, Texas (\$25 million of deposits) which would be acquired indirectly through Applicant's acquisition of American National Bank. Applicant is in the process of organizing seven de novo banks located in the Houston market.

of either or both of Applicant's proposals raise barriers to entry by other bank holding companies into the expanding Houston market since, after consummation of these proposals a number of other banks would remain in the Houston market as potential vehicles for entry by other bank holding company organizations. Additionally, neither Airline Bank nor Reagan Bank, each a retail institution located outside of downtown Houston. appears to be an attractive vehicle for a new or different bank holding company organization to enter into the Houston market. Reagan Bank is located approximately four miles from downtown Houston in an established lower-middle income neighborhood that has been encircled by freeways which tend to limit accessibility to other areas.

On the record before it, the Board concludes that consummation of Applicant proposals would not result in a monopoly nor be in furtherance of any combination, conspiracy, or attempt to monopolize the business of banking in any area, nor have any substantially anticompetitive effect.

The financial condition and managerial resources of Applicant and its subsidiaries appear satisfactory and future prospects of all seem favorable. The financial condition, management resources and prospects of Reagan Bank and of Airline Bank also appear satisfactory and consistent with approval of each of these applications. Soon after acquisition, Applicant has agreed to strengthen the somewhat low capital position of Airline Bank and proposes to do so through the immediate injection of capital funds and the initiation of certain policies with respect to dividend payments and retention of earnings. This consideration lends some weight toward approval of the acquisition of Airline Bank. The banking needs of the residents of the Houston banking market, including those in the service areas of Reagan and Airline banks, appear to be adequately served at the present time by existing institutions. However, Applicant proposes to make more efficient and expanded banking resources available through Airline and Reagan banks. Trust services, real estate financing and international banking are among specialized services Applicant states that it intends to make available at these banks. Considerations relating to the convenience and needs of the relevant areas are consistent with approval of the applications. It is the Board's judgment that consummation of each of the proposed transactions is in the public interest and that each application should be approved.

On the basis of the record, these applications

are approved for the reasons summarized above. Neither acquisition shall be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective September 1, 1972.

Voting for this action: Chairman Burns and Governors Mitchell, Sheehan, and Bucher. Voting against this action: Governors Robertson and Brimmer. Absent and not voting: Governor Daane.

[SEAL]

(Signed) TYNAN SMITH, Secretary of the Board.

### DISSENTING STATEMENT OF GOVERNORS ROBERTSON AND BRIMMER

We dissent from the majority's approval of the acquisition by Applicant of both Reagan and Airline banks. These banks are located in the same market as that served by Texas Commerce Bank (\$1.2 billion of deposits), Applicant's lead bank, and communities served by Applicant's one other subsidiary bank or other of its associated banks are adjacent to areas served by Airline or Reagan banks.

Acquisition of both of these banks would further strengthen Applicant's already dominant position in the Houston market (from 16.7 to 18 per cent of market deposits); eliminate significant potential competition that could develop upon the disaffiliation of these banks from Applicant; and eliminate an attractive vehicle for entry into the Houston market by a new or different bank holding company organization not presently represented in that market. Such adverse consequences would not result from the acquisition of Airline Bank alone. Therefore, we would approve the acquisition of Airline Bank, deny the application to acquire Reagan Bank, and condition approval of the application to acquire Airline Bank upon divestiture by Applicant of the voting shares it presently holds in Reagan Bank.

We believe the majority places too much significance on the prior affiliation of Airline and Reagan banks with Applicant and its predecessor organizations and, to a large extent, disregards the adverse competitive effects of the proposed transactions. The three largest bank holding companies in the Houston market have 24 chain related banks throughout the Houston metropolitan area holding approximately 10 per cent of total deposits of

commercial banks in that market. Rapid consolidation of banking resources held by these related banks is presently being sought in the Houston area as these bank holding companies are engaged in acquiring or have indicated plans to acquire full share ownership and control of at least 16 of these chain banks which hold total deposits of more than \$500 million, representing more than 7 per cent of total market deposits.

We believe that the Bank Holding Company Act requires that competitive criteria shall be applied to acquisitions of related banks as well as to acquisitions of unrelated banks. In our judgment, application of the competitive standards prescribed by the Act requires denial of the acquisition of both Airline and Reagan banks or of Reagan Bank alone

Acquisition of Airline Bank only, in view of its size (\$26.5 million of deposits) and the distance between it and Houston, does not present serious adverse competitive effects. Acquisition of both Reagan and Airline banks by Applicant, however, would have adverse competitive effects on potential competition in the Houston banking market. Reagan Bank (\$65 million of deposits) is located only four miles from downtown Houston and has experienced rapid deposit growth during the last few years. These factors indicate that acquisition of Reagan Bank by Texas Commerce would strengthen significantly the company's already dominant position throughout the Houston area and have serious anticompetitive effects on smaller banks in the area served by Reagan Bank. Divestiture of Reagan Bank by Texas Commerce as a condition to its acquisition of Airline Bank, would, on the other hand, have a procompetitive effect on the Houston banking market. As a result of such a separation. Reagan Bank could become a significant independent competitor in the Houston market in which only 21 of more than 140 banks hold deposits in excess of \$50 million. The Board's action today eliminates Reagan Bank as an entry vehicle and thereby increases the barriers to entry into the Houston banking market by a bank holding company not already in that market.

### SOUTHWEST BANCSHARES, INC., HOUSTON, TEXAS

ORDER APPROVING ACQUISITION OF BANK

Southwest Bancshares, Inc., Houston, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act

(12 U.S.C. 1842(a)(3)) to acquire 51 per cent or more of the voting shares of The First National Bank at Brownsville, Brownsville, Texas ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the fifth largest banking organization and third largest multi-bank holding company in Texas has five subsidiary banks with aggregate deposits of \$829 million representing approximately 2.76 per cent of total deposits of commercial banks in the State<sup>1</sup> (All banking data are as of December 31, 1971, and reflect bank holding company acquisitions approved through May 31, 1972.) Consummation of the proposed acquisition of Bank (deposits of approximately \$51 million) would increase Applicant's share of commercial bank deposits in the State by . 16 percentage points and Applicant's rank in the State would be unchanged. The proposed acquisition represents Applicant's initial entry into the Brownsville-Harlingen-San Benito area which approximates Bank's relevant market.2

Bank second largest of nine banks in the Brownsville-Harlingen-San Benito area, controls approximately 23 per cent of total deposits of commercial banks in that market. Upon consummation of the present proposal, Applicant would become the only bank holding company

<sup>&</sup>lt;sup>1</sup> Applicant controls substantially all the stock of three Texas banks: Bank of the Southwest, Houston; Village National Bank, Houston; and First National Bank of Longview, Longview, Texas. Applicant holds approximately 38 per cent of the voting shares of South Park National Bank, Houston, and has minority interests of between 4.20 and 20 per cent in four other Houston banks whose aggregate deposits as of June 30, 1971, were approximately \$117 million. Applicant's minority interest of 24.7 per cent in Kilgore National Bank, Kilgore, Texas, is expected to be liquidated. The Board approved Applicant's applications to acquire Long Point National Bank of Houston, Houston, Texas (\$29 million of deposits) and Continental National Bank of Fort Worth, Fort Worth, Texas (\$182.2 million of deposits) on April 11, 1972, and May 24. 1972, respectively. On June 8, 1972, Applicant received approval from the Federal Reserve Bank of Dallas, acting under delegated authority, to acquire Bank of Woodlake, National Association, Houston, Texas, a proposed new bank. On June 29. 1972, the Board approved Applicant's application to acquire The Denton County National Bank of Denton, Denton, Texas (\$33 million of deposits).

<sup>&</sup>lt;sup>2</sup> In addition to the present application, Applicant has filed an application with the Board to acquire The First National Bank at Port Arthur, Port Arthur, Texas.

represented in the Brownsville-Harlingen-San Benito area.

Applicant's subsidiary bank located nearest to Bank is in Houston, Texas, approximately 350 miles north of Bank. It appears that no meaningful competition exists between Bank and any of Applicant's subsidiary banks. Further, it seems unlikely that meaningful competition would develop in the future between Bank and Applicant's subsidiaries in light of the facts presented, particularly the distances separating these banks, and the Texas statutes prohibiting branch banking. Applicant could enter the market de novo. However, such prospect appears unlikely in view of the number of banks already in that market, the decline in population (7.1 per cent from 1960 to 1970) and the relatively high unemployment in the communities served by these banks. Acquisition by Applicant of one of the smaller banks in the market might have a somewhat more favorable effect on competition than the proposal herein. However, Bank is not regarded as a likely prospect for the formation of a new bank holding company and it appears that acquisition of Bank would not have a significant adverse effect on the remaining banks in the relevant market nor foreclose entry by other bank holding companies into that market as eight independent banks would remain as potential members of other bank holding company organizations.

On the basis of the record before it, the Board concludes that consummation of the proposed acquisition would not have an adverse effect on competition in any relevant area.

The financial and managerial resources and future prospects of Applicant and its subsidiaries appear satisfactory. Bank appears to be in satisfactory financial condition although its capital position is below desired levels. Applicant has agreed to make a significant contribution of equity capital to Bank. The expected strengthening of Bank's capital position lends weight to approval of the application.

Although the major banking needs of the relevant area appear adequately served at the present time, Applicant proposes to assist Bank in providing increased lending capacity, international banking and other expanded services as the need develops. Considerations relating to the convenience and needs of the communities to be served appear consistent with approval of the application. It is the Board's judgment that the proposed transaction is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective September 1, 1972.

Voting for this action: Governors Mitchell, Brimmer, Sheehan, and Bucher. Voting against this action: Vice Chairman Robertson. Absent and not voting: Chairman Burns and Governor Daane.

(Signed) TYNAN SMITH, Secretary of the Board.

[SEAL]

### DISSENTING STATEMENT OF GOVERNOR ROBERTSON

The wresting of control over financial resources from regional interests by a few giant bank holding company organizations in Texas continues with the Board's action approving entry of the State's fifth largest banking organization into the Brownsville area through acquisition of the second largest bank in that market.

On a number of previous occasions, I have questioned the wisdom of permitting the financial power of this country to become more centralized in a small number of giant banking organizations. In no State is this trend more apparent than in Texas where the State's largest banking organizations continue to enter new markets throughout the State by acquiring the larger, most viable independent banks in those markets without any showing of benefits flowing to the banking customers in these communities. I find it necessary to reassert my objections to this method of Statewide expansion which I expressed in my Dissenting Statement with respect to Applicant's recent application to acquire the third largest bank in Fort Worth. (Application of Southwest Bancshares, Inc., Houston, Texas, to acquire Continental National Bank of Fort Worth, 72 Federal Reserve BULLETIN 591).

The facts of Applicant's present proposal suggest clearly that less anticompetitive means of entry into the Brownsville-Harlingen-San Benito market are available. The relatively high ratio of persons per banking office in this market (15,596 compared with 9,276 Statewide) suggests that the prospects for *de novo* entry are favorable. Further, several smaller banks are available to Applicant

as an entry vehicle into this market. In fact, Applicant's lead bank has financed the purchase of the third largest bank in the relevant banking market. Acquisition of that bank or another of the smaller unaffiliated banks in the area would serve to stimulate competition whereas the proposed transaction will further entrench an already dominant bank in the market.

Bank appears to be in satisfactory financial condition and its future prospects with or without affiliation with Applicant appear favorable. It also appears that the banking needs of the relevant communities are being adequately served by the banks presently operating in that area. Although Applicant's commitment to bolster Bank's capital position constitutes a favorable consideration, it is not a sufficient factor to swing the balance in favor of approval of this proposal. I see no benefits accruing to the convenience and needs of the communities in the relevant market which would outweigh the anticompetitive effects resulting from consummation of the proposed transaction. I would deny this application.

#### ORDER APPROVING ACQUISITION OF BANK

Southwest Bancshares, Inc., Houston, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of the successor by merger to The First National Bank of Port Arthur, Port Arthur, Texas ("Bank").

The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c))

Applicant, the fifth largest banking organization and third largest multi-bank holding company in Texas, has six subsidiary banks with aggregate deposits of \$1,028 million representing approximately 3.4 per cent of total deposits of commercial

banks in the State. (All banking data are as of December 31, 1971, and reflect bank holding company acquisitions approved through May 31, 1972.) Consummation of the proposed acquisition of Bank (deposits of approximately \$73.5 million) would increase Applicant's share of commercial bank deposits in the State by .3 percentage points and Applicant's rank in the State would be unchanged. The proposed acquisition represents Applicant's intital entry into the Beaumont-Port Arthur-Orange area which approximates Bank's relevant market.

Bank, third largest of 19 banks in the Beaumont-Port Arthur-Orange area, controls approximately 13 per cent of total deposits of commercial banks in that market. Upon consummation of the present proposal, Applicant would become the second bank holding company operating in that market. (Pending before the Board are three applications filed by three bank holding company organizations (other than Applicant) each of which seeks to enter the relevant market; the banks involved are that area's second, fourth and fifth largest banks. The lead bank of First Security National Corporation, Beaumont, Texas (the only multi-bank holding company presently operating in the market) with deposits of approximately \$150 million controls more than 25 per cent of deposits of commercial banks in Bank's market.

Applicant's subsidiary banks located nearest to Bank are in Houston, Texas, approximately 90 miles west of Bank and operate in a separate but adjoining banking market. It appears that no meaningful competition exists between Bank and any of Applicant's subsidiary banks. Further, it appears unlikely that meaningful competition would develop in the future between Bank and

Applicant controls substantially all the stock of five Texas banks: Bank of the Southwest, Houston; Village National Bank, Houston; First National Bank of Longview, Longview; Long Point National Bank, Houston; Continental National Bank of Fort Worth. Fort Worth. Applicant holds approximately 38 percent of the voting shares of South Park National Bank, Houston, and has minority interests of between 4.20 and 20 per cent in four other Houston banks whose aggregate deposits as of June 30, 1971, were approximately \$117 million. Applicant's minority interest of 24.7 per cent in Kilgore National Bank, Kilgore, Texas, is expected to be liquidated. The Board approved Applicant's applications to acquire Long Point National Bank of Houston, Houston, Texas (\$29 million of deposits) and Continental National Bank of Fort Worth, Fort Worth, Texas (\$182.2 million of deposits) on April 11. 1972, and May 24, 1972, respectively. On June 8, 1972. Applicant received approval from the Federal Reserve Bank of Dallas, acting under delegated authority, to acquire Bank of Woodlake, National Association, Houston, Texas, a proposed new bank. On June 29, 1972, the Board approved Applicant's application to acquire The Denton County National Bank of Denton, Denton, Texas (\$33 million of deposits).

any of Applicant's subsidiaries in light of the facts presented, particularly the distances separating these banks, the number of banks in intervening areas and the Texas statutes prohibiting branch banking. Applicant could enter the market de novo or through the acquisition of a smaller bank. However, such prospect appears unlikely in view of the number of banks already in that market, the failure of the area to experience significant population growth during the past decade and the existence of a somewhat static economic condition in the relevant communities. Although acquisition by Applicant of one of the smaller banks in the market might have a somewhat more favorable effect on competition than acquisition of Bank, the prospect of entry into the Beaumont-Port Arthur-Orange area by a number of the State's largest multi-bank holding companies should stimulate aggressive banking competition in that market. Further, Bank has operated under conservative management policies and is not regarded as a likely prospect for the formation of a new bank holding company; it appears that acquisition of Bank would not have a significant adverse effect on the remaining banks in the relevant market; nor foreclose entry by other bank holding companies into the market as a significant number of independent banks would remain as potential members of other bank holding company organizations.

On the basis of the record before it, the Board concludes that consummation of the proposed acquisition would not have an adverse effect on competition in any relevant area.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks appear satisfactory. Bank appears to be in satisfactory financial condition. Upon acquisition of Bank, Applicant has stated its intention to make available to Bank more aggressive management to enable Bank more effectively to satisfy the financial needs of the many industrial companies located in its market. At the present time, Bank's loan to deposit ratio is significantly below those of its more aggressive competitors. To the extent affiliation with Applicant may result in Bank providing more of its financial resources to the community, this prospect lends weight to approval of the application. Considerations relating to the convenience and needs of the communities to be served lend some weight to approval of the application. It is the Board's judgment that the proposed transaction is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective September 1, 1972.

Voting for this action: Governors Mitchell, Brimmer, Sheehan, and Bucher. Voting against this action: Vice Chairman Robertson. Absent and not voting: Chairman Burns and Governor Daane.

(Signed) TYNAN SMITH,
[SEAL] Secretary of the Board.

### DISSENTING STATEMENT OF GOVERNOR ROBERTSON

I would deny Applicant's proposal to enter the Beaumont-Port Arthur-Orange banking market through acquisition of the third largest bank in that market controlling 13 per cent of total deposits of commercial banks in that area. On previous occasions, I have indicated my belief that it is not in the best interests of banking in Texas to permit the strongest, most aggressive banking organizations in the State to continue to acquire dominant and viable independent banks in the various banking markets throughout the State without a clear showing that the acquisition will result in benefits flowing to the banks involved or to the banking public in the relevant communities. The present proposal fails to indicate any public benefits that would override the anticompetitive consequences that I believe will result from consummation of Applicant's acquisition of Bank.

The record indicates that Applicant is a likely entrant into Bank's market which is approximately 90 miles from Houston, where Applicant's lead bank is located. In view of the relatively high population per banking office ratio in Bank's market (15,797 compared to 9,276 for the State) and the existence of numerous smaller banks in the area, the market seems attractive for entry de novo or through the acquisition of one of the smaller banks operating in that area.

Bank is in satisfactory financial condition and would be an attractive vehicle for entry by a bank holding company that occupies a less dominant position in the State than Applicant. Such entry would serve to encourage the development of additional banking organizations in the State,

whereas entry by Applicant significantly increases the resource strength of an already dominant bank holding company operating in an adjacent market. Also the size and strength of Bank suggest that it is able to compete in its market as an independent bank.

The Board's recent Order approving the entry of Texas Commerce Bancshares, Houston, Texas, into the Beaumont market through acquisition of the second largest bank in that market, in my view, can be distinguished from Applicant's proposal herein, particularly on the basis of the market position and managerial resource strength of American National Bank (which had deteriorated significantly in the last few years) and the requirement in the Board's Order that Texas Commerce Bancshares divest shares now held by American National Bank in the seventh largest bank in the Beaumont market, so that an additional independent banking competitor emerges in connection with the acquisition of American National Bank.

In the present application, Applicant fails to show that any benefits to the relevant communities will result from its acquisition of Bank. Applicant points only to the fact that Bank's conservative management is responsible for a loan to deposit ratio that is significantly below those of Bank's more aggressive competitors. While it may be true that affiliation with an aggressive bank holding company organization will result in Bank's lending policies becoming more aggressive, this may be either good or bad depending upon a host of considerations, including whether the community's need for borrowed funds is being adequately met. If so, there is no public advantage in trying to increase the amount of loans outstanding. In any event, this prospect, in itself, fails to weigh heavily in counterbalancing the anticompetitive consequences of the proposed transaction.

It is often asserted, and Applicant and the majority of the Board rely on the proposition, that the affiliation of a large bank holding company with a relatively small bank will increase the availability of loanable funds in the market of the smaller bank. In my view, such affiliation may reduce the amount of funds available in the smaller bank's market when the need therefor is greatest. For example, if "tight money" conditions obtain and the holding company's large city bank is "loaned up", the holding company is in a position to draw funds out of the market of smaller subsidiary banks in order to satisfy the loan demands of the lead bank's largest customers. Indeed, the reason most frequently advanced in support of

proposed acquisitions of additional banks by holding companies of large city banks is that they will be better able to finance their large customers. Of course, if the large customers are preferred borrowers—and I suspect they will be—it is probable that smaller borrowers seeking loans in the relatively small market of the subsidiary bank will be deprived of the use of funds generated in their own area.

Moreover, to the extent that bank holding company affiliation creates constraints upon holding company subsidiary banks to seek loan participations with banks outside the holding company system, local customers seeking loans in excess of a bank's own legal limit may seek in vain. After giving up its previous freedom to sell its loan overlines to any of its several large correspondent banks, a subsidiary may find its "in-house" banks unable to pick up a loan during high demand periods and itself unable to make a particular loan. Such limitations on the traditional loan participation procedure, brought about by holding company affiliation, may work well enough in rosy times and reduce the availability of funds in a particular banking market in others.

In view of these considerations, I am not convinced that Bank's affiliation with a large aggressive bank holding company will permanently increase the availability of loanable funds in Bank's market and, hence, better serve the convenience and needs of the Bank's community; certainly not to the extent needed to outweigh the anticompetitive effects of the proposed transaction.

I would deny the application.

### SHOREBANK, INC., QUINCY, MASSACHUSETTS

ORDER APPROVING ACQUISITION OF BANKS

Shorebank, Inc., Quincy, Massachusetts, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire at least 80 per cent of the voting shares of The Mechanics Bancorp, Inc., Worcester, Massachusetts, a one-bank holding company which owns 100 per cent of the voting shares (less directors' qualifying shares) of The Mechanics National Bank of Worcester, Worcester, Massachusetts ("Mechanics Bank"); and to acquire at least 80 per cent of the voting shares of First Agricultural National Bank of Berkshire County, Pittsfield, Massachusetts ("Agricultural Bank").

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, organized in 1968, controls three banks holding aggregate deposits of \$225 million, representing 1.9 per cent of total commercial bank deposits in Massachusetts, and is the seventh largest banking organization in the State. (All banking data are as of December 31, 1971, and reflect holding company acquisitions and formations approved through July 31, 1972.) The acquisitions of Mechanics Bank and Agricultural Bank would increase Applicant's share of State deposits by 1.6 percentage points, thereby making it the sixth largest banking organization in the State.

Mechanics Bank (\$96 million in deposits), the only banking subsidiary of The Mechanics Bancorp, Inc., operates its main office and five branches in Worcester, and three offices in nearby towns. It ranks as third largest among the eight banks in the Worcester SMSA (Standard Metropolitan Statistical Area) and among the 13 Worcester County banks. The two largest county banks hold total deposits of \$336 and \$164 million, respectively, and together control 70.6 per cent of the aggregate deposits in the Worcester SMSA. It appears that the area banks would not be adversely affected by the proposed affiliation.

Agricultural Bank (\$91 million in deposits) operates its main office and five branches in Pittsfield. It also maintains six other branches throughout Berkshire County, where it ranks as the largest commercial bank, and controls 48.2 per cent of county deposits. The remaining five county banks hold total commercial bank deposits ranging from \$64 million to \$3.5 million. It appears that banking operations are well apportioned throughout the county as the needs of the area demand and that the proposed affiliation of Agricultural Bank with Applicant would not adversely affect other county banks.

The closest subsidiary offices of Applicant and Mechanics Bank are 21 miles apart, and 120 miles separate Applicant's nearest office to Agricultural Bank. There is no meaningful competition between any of Applicant's subsidiaries and the proposed subsidiaries, nor between Mechanics Bank and Agricultural Bank, and it appears unlikely that significant competition would develop

in the future due to the distances separating the banking offices and State laws that restrict branching to the home office county.

Applicant states its objective is to build a holding company of such strength that it would become a strong competitive force among the large Massachusetts banking organizations. The State's two largest multi-bank holding companies each hold over \$1 billion in deposits, and the five largest banking organizations control 60 per cent of the deposits of commercial banks in the State. Upon consummation of the proposed acquisitions, Applicant, as the sixth largest banking organization would control less than half the amount of deposits held by the fifth largest organization. The acquisition by Applicant of smaller banks in the markets or de novo entry probably would not substantially change its present position. However, the acquisition of subject banks would enable Applicant to compete more effectively with the State's larger banking organizations. Competitive considerations are consistent with approval of the applications.

The financial and managerial resources of Applicant, its subsidiaries and the proposed subsidiaries are considered to be generally satisfactory. Prospects for Applicant appear favorable, as do the prospects for Mechanics Bank and Agricultural Bank under Applicant's control. Banking factors are, therefore, consistent with approval of the applications.

The major banking needs of the respective areas are served at the present time. However, Applicant proposes to assist subject banks in offering a broader range of financial services to their customers. Accounts receivable financing and equipment leasing would be added to present services offered by the two banks, and international banking services would be introduced at Agricultural Bank. Considerations relating to the convenience and needs of the communities to be served are consistent with and add some weight toward approval of the applications. It is the Board's judgment that consummation of the proposed acquisitions would be in the public interest, and that the applications should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board,

or by the Federal Reserve Bank of Boston pursuant to delegated authority.

By order of the Board of Governors, effective September 8, 1972.

Voting for this action: Chairman Burns and Governors Mitchell, Brimmer, and Sheehan. Absent and not voting: Governors Robertson, Daane, and Bucher.

[SEAL]

(Signed) TYNAN SMITH, Secretary of the Board.

### FIRST CITY BANCORPORATION OF TEXAS, INC., HOUSTON. TEXAS

#### ORDER APPROVING ACQUISITION OF BANK

First City Bancorporation of Texas, Inc., Houston Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of Executive National Bank, Houston, Texas ("Bank"), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls eight banks with aggregate deposits of about \$1.5 billion, representing approximately 4.9 per cent of the deposits in commercial banks in Texas. 1 Applicant presently operates four of these banks in the Houston market and controls about 19 per cent of that area's deposits.2 However, since Bank is a proposed new bank, its acquisition by Applicant would not initially add to the latter's control of banking resources in the Houston area, nor would any existing competition be eliminated. Moreover, given the nature of the Houston market, including the size of the market, its prospects for growth, and the number of banks in the market, significant future competition should not be adversely affected by consummation of the proposed acquisition. Two banks, neither of which is a member of a bank holding company, are located within Bank's proposed service area. The Board concludes that consummation of the transaction will not have a significantly adverse effect on competition.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks are generally satisfactory and consistent with approval of the application. Bank has no financial or operating history. However, under Applicant's management Bank's prospects appear favorable. Considerations relating to the convenience and needs of the community to be served lend some weight to approval of the application, since the service area of Bank should benefit from an additional source of services. The Board finds that the proposed acquisition is in the public interest and should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, and (c) Executive National Bank, Houston, Texas, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective September 14, 1972.

Voting for this action: Chairman Burns and Governors Robertson, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Governor Mitchell.

[SEAL]

(Signed) TYNAN SMITH, Secretary of the Board.

# SOUTHEAST BANKING CORPORATION, MIAMI. FLORIDA

#### ORDER APPROVING ACQUISITION OF BANK

Southeast Banking Corporation, Miami, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of First Bank of Deltona, Deltona, Florida ("Deltona Bank").

Notice of receipt of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments re-

Banking data are as of December 31, 1971.

<sup>&</sup>lt;sup>3</sup>The Houston market is approximated by the Houston Standard Metropolitan Statistical Area.

ceived in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 15 banks with aggregate deposits of \$1.17 billion, representing 7.21 per cent of the total commercial bank deposits held by Florida banks, and is the second largest banking organization in the State. (All banking data are as of December 31, 1971, and reflect acquisitions and formations approved through August 31, 1972.) The acquisition of Deltona Bank (\$10.6 million deposits) would increase Applicant's share of State deposits by .07 percentage points, and would not significantly increase the concentration of banking resources on a local or Statewide basis.

Deltona Bank holds 9.64 per cent of the area deposits as the smallest of the five banks located in the West Volusia banking market in central Florida. Two of the competing banks are subsidiaries of Florida's second and third largest bank holding companies. It appears that consummation of the proposed affiliation would not adversely affect the other area banks.

Applicant's closest subsidiary banking office and Deltona Bank are 30 miles apart. No significant present competition exists between any of Applicant's present banking offices and Deltona Bank. In view of the wide separation of the banks, the presence of numerous intervening banking offices, and Florida's restrictive branching laws, it also appears that no significant potential competition would be eliminated by Applicant's proposed acquisition. Competitive considerations are, therefore, consistent with approval of the application.

Applicant has completed a financial review of its system and has formulated plans to increase the capital of its present subsidiaries and also Deltona Bank. Upon the completion of this improvement program, each of these banks will have adquate capital. In view of the proposed capital improvements, the financial condition of Applicant and its group of banks is deemed to be generally satisfactory. The financial condition of Deltona Bank is also considered to be generally satisfactory in view of Applicant's commitment to increase its capital. Applicant, its banks, and the proposed subsidiary have capable managements and their prospects appear favorable. Banking factors are consistent with approval of the application.

The major banking needs of the area are presently served by local banking offices. However, no trust services are presently available in the town of Deltona, and Applicant's assistance in establishing a trust department at Deltona Bank will

serve the convenience and need for such services in this retirement community. Applicant will also improve and expand the bank's services presently offered and enable it to compete on a more equal basis with the four larger area banks. Considerations relating to the convenience and needs of the communities to be served are consistent with and lend some support toward approval of the application. It is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective September 14, 1972.

Voting for this action: Chairman Burns and Governors Robertson, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Governor Mitchell.

[SEAL]

(Signed) TYNAN SMITH, Secretary of the Board.

#### ARVCO, INC., ARVADA, COLORADO

ORDER DENYING APPLICATION TO REMAIN A BANK HOLDING COMPANY AND TO RETAIN SHARES OF BANK

Arvco, Inc., Arvada, Colorado, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to remain a bank holding company through the retention of 53.065 per cent of the voting shares of Arvada State Bank, Arvada, Colorado.

Notice of receipt of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

On the basis of the record, the application is denied for the reasons set forth in the Board's Statement of this date. Applicant is directed to take appropriate measures to effect a divestiture of control of Arvada State Bank, Arvada, Colorado. Applicant is further directed to report on the

[SEAL]

progress made toward said divestiture to the Federal Reserve Bank of Kansas City not later than two months from the effective date of this Order.

By order of the Board of Governors, effective September 14, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governor Daane.

(Signed) TYNAN SMITH, Secretary of the Board.

#### STATEMENT

Arvco, Inc., Arvada, Colorado, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to remain a bank holding company through the retention of 53.065 per cent of the voting shares of Arvada State Bank, Arvada, Colorado ("Arvada Bank").

Statutory considerations. Applicant states that it acquired 53.065 per cent of the voting shares of Arvada Bank in January 1971 without first obtaining Board approval required by the 1970 Amendments to the Act. However, Applicant made timely application under the Board's Order of June 22, 1971, which permits companies that acquired an interest in a bank between December 31, 1970, and June 22, 1971, without knowledge of the changes in the law, to apply by August 31, 1971, for a Board determination that the acquisition was in the public interest. In this connection, the Board required that the applications so filed would be in the form ordinarily required for requesting prior approval and would be determined by the Board in accordance with the criteria established by the Act.

Applicant was organized in 1962 as an insurance agency for the sale of credit life, health and accident insurance in connection with the lending activities of Arvada Bank. On January 29, 1971, Applicant acquired 13,797 of the 26,000 shares outstanding of Arvada Bank stock.

Arvada Bank, organized in April 1962, holds deposits of \$14.1 million, representing 0.3 per cent of the total commercial bank deposits in Colorado (all banking data are as of December 31, 1971). Arvada Bank ranks fortieth among banks located in the Denver Standard Metropolitan Statistical Area ("SMSA"), and is only slightly larger than the other commercial bank located in the Arvada suburb of Denver. No competitive issues are involved in this application which seeks Board approval of the present corporate ownership.

A review of the financial resources of Applicant and Arvada Bank reveals that the acquisition debt can not be serviced adequately under the proposed financial arrangements. Applicant proposes to increase the capital assets of Arvada Bank by an issuance and sale of the bank's stock and debentures. However, the Board considers the projected increase in capital as insufficient. In addition, Applicant would incur substantial debt in order to finance the purchase of shares of the proposed new issue. Applicant's only income is derived from Arvada Bank's dividends and receipts from insurance activities. Such income is deemed insufficient to service the present acquisition debt and the additional debt to be incurred in the proposed purchase of Arvada Bank shares. Under the circumstances presented here, the Board is of the opinion that the interests of the public are best served by a denial of the application.

The banking needs of the area are presently being served, and the proposal would not bring any additional benefits to the public. On the contrary, the heavy acquisition debt could result in attempts by the bank to assist in servicing the obligations of Applicant, thereby placing an additional strain on the resources of Arvada Bank. Considerations relating to the convenience and needs of the communities to be served lend no weight towards approval of the application.

On the basis of the record, the Board finds that approval of the application would not be in the public interest and it is accordingly denied.

# FINANCIAL INSTITUTIONS, INC., WARSAW, NEW YORK

ORDER APPROVING ACQUISITION OF BANK HOLD-ING COMPANY

Financial Institutions, Inc., Warsaw, New York ("Financial"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(5) of the Act (12 U.S.C. 1842(a)(5)) to merge Geneva Shareholders, Inc., Warsaw, New York ("Geneva"), into Financial.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant presently controls three banks with

aggregate deposits of about \$60 million and is the smallest multi-bank holding company in New York.¹ Two of these banks are controlled indirectly by Financial through its ownership of approximately 76 per cent of the voting stock of Geneva which, in turn, owns over 97 per cent of the voting stock of the two banks. The proposal by Financial to merge Geneva into itself is essentially a corporate reorganization and would have no effect on existing or future competition. The Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks are generally satisfactory and consistent with approval of the application. Considerations relating to the convenience and needs of the communities to be served are also consistent with approval of the application. The Board finds that the proposed application is in the public interest and should be approved.

On the basis of the record, the applicant is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Board of Governors, effective September 15, 1972.

Voting for this action: Chairman Burns and Governors Robertson, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Governor Mitchell.

[SEAL]

(Signed) TYNAN SMITH, Secretary of the Board.

### EQUITABLE BANCORPORATION, BALTIMORE, MARYLAND

ORDER APPROVING ACQUISITION OF BANK

Equitable Bancorporation, Baltimore, Maryland, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of Farmers and Merchants Bank of Hagerstown, Maryland, Hagerstown, Maryland ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and

views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, with two subsidiary banks holding aggregate deposits of \$702.5 million, is the second largest banking organization in Maryland with 11.8 per cent of the commercial bank deposits in the State. (All banking data are as of December 31, 1971, unless otherwise indicated, and reflect bank holding company formations and acquisitions approved by the Board through August 31, 1972.) Acquisition of Bank (\$28.6 million in deposits) would increase applicant's share of Statewide deposits by only 0.5 per cent and would leave Applicant as the second ranking banking organization in Maryland. Consummation of the transaction would not result in a significant increase in the concentration of banking resources in Maryland.

Bank is the third largest of eleven banks serving the Washington County banking market, holding about 16.1 per cent of market deposits (as of June 30, 1970). This proposal represents Applicant's initial entry into Washington County and the western part of the State and, inasmuch as the closest offices of Applicant and Bank are 47 miles apart, would not result in the elimination of any significant existing competition. The likelihood that future competition would develop appears remote. The Maryland Commissioner of Banking recently denied a request by Applicant's lead bank to establish a branch in Washington County near Hagerstown on the ground that Washington County was overbanked (county average of 3,461 persons per banking office versus the Statewide average of 5,286 persons per banking office). Bank is the smaller of the two banks headquartered in Hagerstown, and acquisition of Bank by Applicant would provide added competition for the nine branches of the State's largest and third largest banking organizations located in the Hagerstown market. It does not appear, therefore, that significant competition would be eliminated or significant potential competition foreclosed by consummation of Applicant's proposal, or that there would be undue adverse effects on any bank in the area involved.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are all regarded as generally satisfactory and consistent with approval of the application. It

Banking data are as of December 31, 1971.

appears that the banking needs of the residents of Washington County are being met; however, customers of Bank should benefit from the higher lending limits and additional services that Applicant will be able to provide. This increase in the competitive capacity of Bank would be in the public interest. Convenience and needs considerations are consistent with approval of the application. It is the Board's judgment that consummation of the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Richmond pursuant to delegated authority.

By order of the Board of Governors, effective September 21, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer. Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

### GRAHAM-MICHAELIS FINANCIAL CORPORATION, WICHITA, KANSAS

ORDER APPROVING FORMATION OF BANK HOLDING COMPANY

Graham-Michaelis Financial Corporation, Wichita, Kansas, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 80 per cent or more of the voting shares of Wichita State Bank, Wichita, Kansas ("Bank").

Notice of receipt of the application has been given in accordance with § 3(b) of the Act, and the time for filing comments and views has expired. The Board has considered the application and all comments received in the light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)) and finds that:

Applicant is a newly-formed organization and has no operating history. Bank (deposits of \$19.9 million) is the eighth largest of 14 banks located in Wichita. (All banking data are as of December 31, 1971.) The Board notes that the principals of Applicant also hold an interest in another bank

in Wichita with deposits of approximately \$22 million. However, consummation of the proposed transaction is not likely to adversely affect existing competition in that there is little overlap in the service areas of the two banks. Furthermore, common ownership of the two banks will continue to exist, irrespective of Board action on this application.

Applicant's principals presently own 83 per cent of the outstanding shares of Bank. With the exception of 6 per cent of those outstanding shares, which the principals acquired subsequent to obtaining majority control, all sellers received an identical price for their shares, and Applicant intends to make this same offer to remaining shareholders of Bank. Those shares purchased subsequently at a lower price were purchased from brokers without any prior solicitation from Applicant. The Board therefore concludes that the offers made to Bank's shareholders by Applicant and its principals are substantially equivalent.

Applicant's financial resources and future prospects are dependent upon those of Bank. Its projected earnings appear to be sufficient to service the debt which it will incur upon consummation of the proposed transaction without adversely affecting Bank's capital structure. Consummation of the proposal would ensure continuation of local ownership and management of Bank. Therefore, considerations relating to the financial and managerial resources and future prospects of Bank weigh toward approval of the application. Considerations relating to the convenience and needs of the communities to be served are consistent with approval of the application. It is the Board's judgment that the transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective September 21, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

## SOUTHEAST BANKING CORPORATION, MIAMI, FLORIDA

ORDER APPROVING ACQUISITION OF BANK

Southeast Banking Corporation, Miami, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of Manatee National Bank of Bradenton, Bradenton, Florida ("Manatee Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 15 banks with aggregate deposits of \$1.17 billion, representing 7.21 per cent of the total commercial bank deposits held by Florida banks, and is the largest banking organization in the State. (All banking data are as of December 31, 1971, and reflect holding company formations and acquisitions approved through July 31, 1972.) The acquisition of Manatee Bank (\$58.8 million deposits) would increase Applicant's share of Florida deposits by 0.38 percentage points. Consummation of the acquisition would not result in a significant increase in the concentration of banking resources on a local or a Statewide basis. Manatee Bank is the second largest of nine banks located in the Bradenton banking market, where it controls 23.3 per cent of area deposits. However, two of Florida's large multibank holding companies together control over 50 per cent of the market. It appears that consummation of the proposal would not adversely affect any of the area banks.

Manatee Bank is affiliated at the present time, through common ownership and management, with two smaller area banks. This common share-holder relationship would be substantially eliminated by consummation of the acquisition since it is proposed that the majority shares of Manatee Bank would be exchanged for Applicant's stock. Applicant also states that the common officer and director relationship between the three banks would be terminated upon consummation of the proposal. Accordingly, it appears that disaffiliation of the three banks would have a procompetitive effect on area banking.

The nearest subsidiary banking office of Appli-

cant is located 40 miles north of Manatee Bank, and no significant competition exists between any of Applicant's offices and Manatee Bank at the present time, nor does it appear that the proposed acquisition would eliminate future competition in view of the distances involved and Florida's restrictive branching laws. Based on the foregoing, competitive considerations are consistent with approval of the application. Moreover, it appears that the ability of Manatee Bank to compete with the area's large banking organizations would be enhanced by the proposed affiliation.

The financial condition of Applicant and its subsidiaries is considered to be generally satisfactory in view of Applicant's commitment to inject additional capital into its subsidiaries by December 31, 1972, thereby assuring adequate capital for each bank in its group. Applicant's management is deemed capable and prospects for the group are favorable. The financial condition and management of Manatee Bank are considered to be satisfactory, and prospects for the bank are favorable. Banking factors are consistent with approval of the application.

Present banking services in the area appear to be adequate. However, the development of nearby Port Manatee will probably give rise to a greater need for international banking services which Applicant proposes to introduce at Manatee Bank. Applicant also proposes to assist Manatee Bank in establishing a mortgage financing section, to expand present trust services, and to enable it to satisfy larger loan demands. Considerations relating to the convenience and needs of the communities to be served are consistent with and lend some support toward approval of the application. It is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective September 21, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

### INDEPENDENT BANKSHARES CORPORA-TION,

### SAN RAFAEL, CALIFORNIA

ORDER APPROVING FORMATION OF BANK HOLD-ING COMPANY

Independent Bankshares Corporation, San Rafael, California, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 100 per cent of the voting shares (less directors' qualifying shares) of the successors by merger to Bank of Marin, San Rafael, California ("Marin Bank"), and Bank of Sonoma County, Sebastopol, California ("Sonoma Bank"); and through the acquisition of up to 100 per cent of the voting shares (less directors' qualifying shares) of The First National Bank of Cloverdale, Cloverdale, California ("Cloverdale Bank"). The banks into which Marin Bank and Sonoma Bank are to be merged have no significance except as a means of acquiring all of the shares of Marin Bank and Sonoma Bank; accordingly, the proposed acquisitions of the shares of the successor organizations are treated herein as the proposed acquisitions of the shares of Marin Bank and Sonoma Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a newly organized corporation. Consummation of the proposal herein would result in Applicant controlling approximately \$112 million in deposits, representing 0.2 per cent of total commercial bank deposits in the State, and Applicant would become the ninth largest bank holding company in California. (Unless otherwise noted, all banking data are as of December 31, 1971, adjusted to reflect bank holding company formations and acquisitions approved by the Board through August 31, 1972.)

Marin Bank (\$72.0 million in deposits), the proposed lead bank, is headquartered in San Rafael and has six branches serving the Marin County banking market. Marin Bank controls 9.4 per cent of commercial bank deposits in the Marin County banking market, and is the fourth largest bank in the market. (Banking data concerning market control are as of June 30, 1970.) It competes with

eight other banks, four of which are branches of organizations which rank among the four largest banking organizations in California, each of which has over \$4.2 billion in deposits.

Sonoma Bank (\$27.8 million in deposits) operates three offices in the sparsely populated Sebastopol area of central Sonoma County in which market Sonoma Bank controls 54.8 per cent of market deposits. This seeming market dominance is mitigated by the fact that the Sebastopol area supports only three banks; Sonoma Bank's principal competitor is a branch of Bank of America; and those Sebastopol residents who work in nearby Santa Rosa can choose from among six banks in Santa Rosa.

Cloverdale Bank (\$12.6 million in deposits) has three branches which operate in sparsely populated northern Sonoma County and southern Mendocino County. Cloverdale Bank's head office and Healdsburg branch compete with offices of the largest and fourth largest bank holding companies in California, with Cloverdale Bank being the smallest bank in both communities.

The record indicates that Banks do not compete with each other, and the development of such competition in the future appears unlikely. The nearest offices of the three banks are 14 miles apart, and although California's unlimited branching laws would permit any of the three banks to establish a de novo branch in any of the other bank's service area, there is little probability of such a move in view of the relatively small size of the banks involved and the low population density per banking office for the areas involved. It appears that the affiliation of the three banks in a holding company would not have any adverse effects on other banks in these markets. Affiliation may actually promote competition by creating a larger institution which can then operate in an environment in which large banking systems are very prominent. On the basis of the record before it, the Board concludes that consummation of the proposal would not have an adverse effect on competition in any relevant area.

The financial and managerial resources of each bank appear generally satisfactory. It appears that Applicant would begin operations in generally satisfactory condition and with competent management. In addition, Applicant has indicated an intention to increase the capital accounts of Marin Bank and Cloverdale Bank by a combined \$1.6 million upon affiliation. Applicant's future prospects, which are largely dependent upon those of its subsidiary banks, also appear favorable. Al-

though there is no evidence that existing banking needs of the communities involved are not being met, affiliation of the three banks with Applicant would lead to the availability of larger lines of credit than either bank could offer and other services offered by each bank would be expanded. These considerations relative to the convenience and needs of the communities to be served lend some weight toward approval. It is the Board's judgment that the proposed transaction is in the public interest and should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of San Francisco pursuant to delegated authority.

By order of the Board of Governors, effective September 21, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

# BOATMEN'S BANCSHARES, INC. ST. LOUIS, MISSOURI

ORDER APPROVING ACQUISITION OF BANK

Boatmen's Bancshares, Inc., St. Louis, Missouri, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of Boatmen's National Bank of North St. Louis County, St. Louis County, Missouri, a proposed new bank ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application, the recommendation of the Comptroller of the Currency that the application be approved, and all other comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the sixth largest banking organization in Missouri, controls five banks which have total deposits of \$376.5 million, representing 3 per

cent of the total commercial bank deposits in the State. (Deposit data are as of December 31, 1971 and reflect holding company acquisitions approved through July 14, 1972). Bank is a proposed new bank and its acquisition by Applicant would not increase the concentration of banking resources nor have any significant adverse effect on any competing bank in the relevant areas.

Bank will be located in an unincorporated area in the northeastern section of St. Louis County. Applicant's banking subsidiary closest to Bank is its lead bank, Boatmen's National Bank of St. Louis ("Boatmen's"), which is located 14 miles south in downtown St. Louis. Applicant has two banking subsidiaries in St. Louis County but both are more than 27 miles from Bank. Applicant does not have a dominant position in the St. Louis City and County area where it is the third largest banking organization with 6.8 per cent of total commercial bank deposits. Moreover, Bank's estimated primary service area is served by only one other bank. Thus, Applicant's acquisition of Bank would likely have a pro-competitive effect in providing an additional banking alternative. Accordingly, the Board concludes that consummation of the proposed acquisition would not have an adverse effect on existing or potential competition in any relevant area.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks and Bank are regarded as satisfactory and consistent with approval. Considerations relating to the convenience and needs of the community lend weight to the approval since Bank would provide an additional source of banking services to a rapidly growing suburban area.

Within the time provided for public comment, a bank located in Bank's proposed service area protested the application, contending that acquisition of Bank by Applicant would be in violation of the branch banking restrictions of the State of Missouri. After careful consideration of the arguments raised by protestant and the documentary materials submitted in support thereof, the Board hereby affirms the position expressed in Application of First Arkansas Bankstock Corporation, 1970 Federal Reserve Bulletin 778, that a State's restrictive branch banking laws do not, in the light of the legislative history of the Bank Holding Company Act of 1956, prohibit the formation or expansion of a bank holding company in that State. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) Boatmen's National Bank of North St. Louis County, St. Louis County, Missouri, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of St. Louis pursuant to delegated authority.

By order of the Board of Governors, effective September 26, 1972.

Voting for this action: Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governors Robertson and Daane.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

### FIRST FINANCIAL CORPORATION, TAMPA, FLORIDA

#### ORDER APPROVING ACQUISITION OF BANK

First Financial Corporation, Tampa, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire not less than 57.967 per cent of the voting shares of Venice-Nokomis Bank and Trust Company, Venice, Florida ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls nine banks with aggregate deposits of approximately \$520 million, and is the sixth largest banking organization in Florida, with 3.2 per cent of commercial bank deposits in the State. (All banking data are as of December 31, 1971, and reflect bank holding company formations and acquisitions approved by the Board through August 31, 1972.) Acquisition of Bank (\$34.8 million in deposits) would increase Applicant's share of commercial bank deposits in the State by an insignificant amount and its ranking in the State would be unchanged.

Bank is the second largest of three banking

organizations competing in the Venice banking market which encompasses the city of Venice and nearby residential areas located in southwest Sarasota County. Bank controls 43.4 per cent of the total commercial bank deposits in the market.

Applicant's subsidiary bank located closest to Bank is 29 miles north of Bank, in Bradenton. It appears that there is no significant competition between Bank and Applicant's Bradenton Bank or any of Applicant's other subsidiary banks. Moreover, it appears unlikely that such competition would develop in the future in the light of the facts of record, notably, the distances separating Bank from Applicant's present subsidiary banks, the number of banks located in intervening areas, and the State prohibition against branch banking. It appears, therefore, that consummation of the proposal herein would neither eliminate meaningful existing competition nor foreclose significant potential competition. It appears that adverse publicity relating to Bank's former management has resulted in Bank's not providing the degree of competition in the market that it is capable of offering. Affiliation with Applicant should enable Bank to compete more aggressively within the Venice banking market; thus, approval of this application should have a procompetitive effect on competition in the area. On the basis of the record before it, the Board concludes that consummation of the proposed acquisition would not have an adverse effect on competition in any relevant area.

The financial and managerial resources and prospects of Applicant and its subsidiary banks are regarded as generally satisfactory and consistent with approval of the application, particularly in the light of Applicant's commitment and program for increasing the capital of its subsidiaries. Bank has experienced some management problems. Affiliation with Applicant should enable Bank to draw upon Applicant's managerial resources to aid Bank in strengthening management and the condition of Bank, and enhancing its prospects. Also Applicant has agreed to add \$1,000,000 in equity capital to Bank upon acquisition. The banking factors lend weight for approval. The banking needs of the Venice banking market appear to be adequately served at the present time; however, Applicant proposes to improve, expand, and revitalize those services Bank is offering to its community, and thereby enable Bank to become once again a strong competitor. Considerations relating to the convenience and needs of the community to be served weigh in favor of approval of the application. It is the Board's judgment that the

proposed transaction is in the public interest and should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective September 26, 1972.

Voting for this action: Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governors Robertson and Daane.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

## FIRST AT ORLANDO CORPORATION, ORLANDO, FLORIDA

ORDER APPROVING ACQUISITION OF BANKS

First at Orlando Corporation, Orlando, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has filed separate applications for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire at least 90 per cent of the voting shares of The City Bank and Trust Company of St. Petersburg ("City Bank"), and The Suncoast City Bank of St. Petersburg ("Suncoast Bank"), both located in St. Petersburg, Florida.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 26 banks with aggregate deposits of \$904.6 million, representing 5.6 per cent of the deposits for commercial banks in Florida, and is the fourth largest banking organization in the State. (All banking data are as of December 31, 1971, and reflect holding company formations and acquisitions approved through August 31, 1972.) The acquisition of City Bank (\$44.4 million in deposits) and Suncoast Bank (\$5 million in deposits) would increase Applicant's control of State deposits to 5.9 percentage points. Applicant's rank among State banking organizations would remain unchanged, and the concentration

of banking resources on a local and State level would not increase significantly.

Subject banks are located in the City of St. Petersburg, in the South Pinellas banking market, and their acquisitions would represent Applicant's initial entry into the area. City Bank and Suncoast Bank hold 4.53 and .52 per cent of total market deposits and rank seventh and twenty-third, respectively, among the 23 banks represented in this market area. Six multibank holding companies and three banking groups are represented in the market, and six banks control 57 per cent of total market deposits. Although subject banks are less than three miles apart and their service areas overlap, they do not actively compete with each other. Suncoast Bank was organized by City Bank in 1971, and both are under common management and control. It appears that no present or future competition between subject banks would be eliminated by consummation of this proposal.

Applicant's closest subsidiary banking offices are located approximately 25 miles from subject banks. There is no significant present competition between any of these offices, and due to the densely populated areas, the distances between banking offices, and Florida's restrictive branching laws, it appears that there is little likelihood of the development of future competition. Consequently, competitive considerations are consistent with approval of the applications.

The capital positions of eight of Applicant's subsidiaries are deemed to be somewhat low; however, Applicant has made a commitment to increase the equity capital in these banks by the end of 1972, and after the proposed increases each of the banks would have adequate equity capital bases. Accordingly, the financial condition of Applicant and its subsidiary banks are deemed to be generally satisfactory; their managements are considered to be capable and prospects for the group are favorable. The financial conditions and managements of City and Suncoast Banks are also believed to be generally satisfactory and prospects for both banks appear favorable. Banking factors are consistent with approval of the applications.

Although the primary banking needs of the communities are presently being served, Applicant's expansion and improvement of services now available at both subject banks, especially trust services, would benefit the public and enable banks to become stronger competitors with the larger area banking offices. Therefore, considerations relating to the convenience and needs of the communities to be served are consistent with and lend

some support toward approval of the applications. It is the Board's judgment that consummation of the proposed acquisitions would be in the public interest and that the applications should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective September 26, 1972.

Voting for this action: Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governors Robertson and Daane.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

## COMBANKS CORPORATION, WINTER PARK, FLORIDA

ORDER APPROVING ACQUISITION OF BANKS

Combanks Corporation, Winter Park, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire not less than 51 per cent of the voting shares of each of the following banks all located in Florida: (1) South Seminole Bank, Fern Park; (2) North Orlando Bank, Fairvilla; (3) The Commercial Bank at Pine Castle, Pine Castle ("Commercial/Pine Castle Bank"); and (4) The Commercial Bank at Apopka, Apopka ("Commercial/Apopka Bank").

Notice of the applications affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls one bank with total deposits of approximately \$59 million, representing about .4 per cent of deposits in commercial banks in Florida. Consummation of the proposed transactions would increase Applicant's share of Statewide deposits by only .4 percentage points and

would not result in a significant increase in the concentration of banking resources in Florida.

South Seminole Bank (about \$28 million in deposits), North Orlando Bank (about \$14 million in deposits), Commercial/Pine Castle Bank (about \$6 million in deposits), and Commercial/Apopka Bank (about \$5 million in deposits) are all located in the Orlando area, as is The Commercial Bank at Winter Park, Applicant's present banking subsidiary. Control of the five banks by Applicant would make it the second largest banking organization in the Orlando area with about 12 per cent of area deposits. However, since the largest organization in the area controls approximately 43 per cent of area deposits, there is no real possibility that Applicant would obtain a dominant position in the area through consummation of these transactions. Moreover, there is no existing competition between Applicant's lead bank and any of the four banks sought to be acquired, nor is there a reasonable probability of future significant competition developing between them. Applicant presently owns directly slightly less than 25 per cent of each of the four banks, and the largest stockholder of Applicant owns substantial additional shares in each of the four banks. A working relationship between Applicant's bank and the four proposed subsidiaries has existed for several years, manifesting itself in the advertising of the banks as affiliated banks and in the sharing of executive personnel and the establishment of common operating policies. The Board concludes that, in light of the affiliate relationships among the banks involved, consummation of the proposal will not have a significant anticompetitive effect in any relevant area.

The financial and managerial resources and future prospects of Applicant, its subsidiary bank and South Seminole Bank, North Orlando Bank, Commercial/Pine Castle Bank, and Commercial/Apopka Bank are regarded as generally satisfactory. Applicant, as a multi-bank holding company, is expected to have greater accessibility to the money markets as a source of additional capital for its subsidiaries and plans to provide additional capital for its present banking subsidiary shortly after consummation of these transactions. These considerations weigh in favor of approval of the acquisitions. Considerations relating to the convenience and needs of the community are consistent with approval of the applications. It is the Board's judgment that the proposed transactions are in the public interest and that the applications should be approved.

<sup>&</sup>lt;sup>1</sup>All banking data are as of December 31, 1971.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective September 26, 1972.

Voting for this action: Chairman Burns and Governors Robertson, Daane, Sheehan, and Bucher. Absent and not voting: Governors Mitchell and Brimmer.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

## MID AMERICA BANCORPORATION, INC., ST. PAUL, MINNESOTA

#### ORDER APPROVING ACQUISITION OF BANK

Mid America Bancorporation, Inc., St. Paul, Minnesota, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of First State Bank of Coon Rapids, Coon Rapids, Minnesota ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls five operating banks (and has received Board approval for an additional bank not yet opened for business) with aggregate deposits of approximately \$59 million, representing 0.6 per cent of the total commercial bank deposits in the State, and is the seventh largest bank holding company in Minnesota. (All banking data are as of December 31, 1971, and reflect bank holding company formations and acquisitions approved by the Board through August 31, 1972.) Applicant's acquisition of Bank (\$10.2 million in deposits) would increase Applicant's share of deposits in Minnesota by 0.1 percentage point, without changing its ranking within the State.

Bank, the only bank in Coon Rapids, is located in a growing area 15 miles north of downtown Minneapolis, adjacent to a small local shopping center. The relevant market area is the Minneapolis-St. Paul banking market in which Applicant has five banking subsidiaries (including the bank not yet opened for business), the closest being located 16 miles southeast of Bank. There is no substantial existing competition between Applicant's present banking subsidiaries and Bank; and, for several reasons, including the distances involved, the presence of banking alternatives in the intervening areas, and Minnesota's prohibition against branch banking, there is no substantial likelihood of future competition developing between those subsidiaries and Bank. For similar reasons, there is no significant possibility of substantial competition developing between Bank and Applicant's other banking subsidiary, which is located approximately 60 miles west of the Minneapolis-St. Paul area.

Moreover, consummation of this transaction might have a beneficial effect on competition in the Minneapolis-St. Paul banking market. Six bank holding company groups hold, in the aggregate, nearly 82 per cent of the deposits in the market, while Applicant controls only 0.8 per cent of the deposits. Acquisition of Bank would increase Applicant's share of market deposits by 0.2 percentage points and would give it a service outlet in an area of the Twin Cities in which it is presently not represented. Thus, acquisition of Bank might enable Applicant to provide more effective competition for the much larger banking organizations in the Minneapolis-St. Paul banking market with which it must compete. On the basis of the record before it, the Board concludes that consummation of the proposed acquisition would not adversely affect competition in any relevant area.

Considerations relating to the financial and managerial resources and future prospects of Applicant and its subsidiary banks are regarded as satisfactory. Applicant can provide lending policy guidance that might strengthen the overall asset condition and management of Bank and this consideration lends some weight for approval. The Coon Rapids community might benefit as a result of Bank's improved ability, through the capacity of Applicant's system, to serve the growing credit needs of the area more effectively. It is the Board's judgment that consummation of the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Minneapolis pursuant to delegated authority.

By order of the Board of Governors, effective September 26, 1972.

Voting for this action: Governors Mitchell, Brimmer, Shechan, and Bucher. Absent and not voting: Chairman Burns and Governors Robertson and Daane.

[SEAL] Assistant Secretary of the Board.

#### FIRST AT ORLANDO CORPORATION, ORLANDO, FLORIDA

ORDER APPROVING ACQUISITION OF BANK

First at Orlando Corporation, Orlando, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of North Semoran First National Bank, Fern Park, Florida ("Semoran Bank"), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. The Board has considered the application in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 26 banks with aggregate deposits of \$904.6 million, representing 5.6 per cent of the total commercial bank deposits in the State, and is the fourth largest banking organization and bank holding company in Florida. Since Semoran Bank is a proposed new bank, no existing competition would be eliminated nor would concentration be increased in any relevant area. Semoran Bank would be located in the southern portion of Seminole County, a recently developing trade area with an estimated population of 45,000, and would be competing in the Orlando banking market, in which market Applicant controls 42.9 per cent of deposits. Applicant presently operates six banks in the Orlando banking market, the nearest of which-First National Bank at Orlando-is 9.5 miles south of Fern Park where the proposed Semoran Bank would be located. There is very little employment in the downtown Orlando area which would draw off commuters from Fern Park and thus place the two banks in competition.

Additionally, there are numerous intervening banks.

Applicant's share of deposits in the relevant market area has not increased since approval of its last Orlando de novo acquisition in 1969. The second largest bank holding company in the market controls 11.6 per cent of commercial deposits therein, while the third and fourth largest control 10.7 and 9.2 per cent, respectively. At the present time, there are seven multibank holding companies represented in the Orlando market, six of which are among the State's ten largest banking organizations. It appears that consummation of the proposal herein would not alter adversely the competitive situation nor the concentration of resources in the market, nor is there any evidence that Applicant's proposal is an attempt to pre-empt a site before there is a need for a bank. Applicant is not represented in Seminole County, the northern section of the Orlando market, where extensive suburban type growth is occurring.

The financial and managerial resources and the future prospects of Applicant and its subsidiary banks are regarded as generally satisfactory. Prospects for bank appear favorable. Semoran Bank would be able to provide a local alternative banking source within the proposed service area, which is experiencing rapid growth. Considerations relating to the convenience and needs of the area to be served lend slight support to, and are consistent with, approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) North Semoran First National Bank, Fern Park, Florida, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective September 28, 1972.

Voting for this action: Chairman Burns and Governors Daane, Brimmer, Sheehan, and Bucher. Dissenting from this action: Governor Robertson. Absent and not voting: Governor Mitchell.

[SEAL]

(Signed) MICHAEL A. GREENSPAN, Assistant Secretary of the Board. LAW DEPARTMENT 929

## DISSENTING STATEMENT OF GOVERNOR ROBERTSON

With each successive Board approval of a de novo bank for First at Orlando Corporation in its home market, its dominance in that market is maintained, and the "invisible hand" of Adam Smith again stayed. The action of normal market forces would, in the usual course, slowly erode the high market share this Applicant holds in the Orlando area. Yet there has been no sign of deconcentration since Board approval of Applicant's formation as a holding company in 1967. The reason is obvious. Deposit growth has been won by the market leader; smaller banks have received only a modest share.

Other things being equal, purchasers of homogeneous banking services, i.e., those with wellknown qualities that are substantially the same, would tend to distribute their patronage on a random basis. The result would be a fairly even distribution of the market—including an even distribution of the deposit growth in that market. Yet in the growing Orlando area, Applicant's share of market deposits-42.9 per cent-has remained remarkably constant over time. The randomization pattern normally found for homogeneous products or services is not present here. Instead, the public has displayed a preference for Applicant's banking services over those offered by its competitors. This preference, commonly referred to as "product differentiation", represents Applicant's ability to distinguish or set apart its own services, in the minds of buyers, from those offered by its com-

Applicant's success in differentiating its banking services is one of the principal benefits of its market dominance. Long recognized as the leading banking institution in the Orlando market, it attracts deposits from customers outside the primary service areas of its own offices. In fact, Applicant already controls in excess of \$5 million in deposits and holds in excess of \$8.8 million in loans which originate within the service area of the proposed new bank—an area in which it now has no office. Of the two banks presently located within this service area, one, with deposits of \$27.8 million, is but two city blocks from the site of the proposed new bank, while the other, with deposits of approximately \$6.5 million, has only been open

since February 1971. It is doubtful whether eighteen months is a sufficient period of time for this smaller bank to have achieved an adequate earnings rate. Moreover, a third bank has had its charter approved but has not yet opened for business on a site 2.7 miles south of the location of Applicant's proposed new bank.

Were the cost experience for every de novo bank in the Orlando market symmetrical, none could be said to experience a disadvantage. But unlike entry in a competitive market, where differential experience and reputation effects are, perforce, negligible, cost differences in a market with a dominant bank are to be anticipated precisely because these factors are considerable. Thus, although it is generally estimated a de novo bank's net earnings during its first two or three years of operation will be negligible or perhaps show a deficit, a de novo bank established by the dominant firm in that market is likely to realize profitable operations at an earlier date. It is not surprising, therefore, to find the following statement by First at Orlando Corporation in its application:

"Although the projection of earnings and expenses for the first year of operation indicates an anticipated loss for the period, it is expected that beginning in the second year of operation the Bank will begin to show an annual profit. The expected rate of growth in income and the projected modest expenses for the first three years of operation is due in part to the assistance that will be forthcoming from the Applicant if this application is approved."

Such assistance, as described by Applicant, includes group purchasing, printing, and advertising, as well as specialized services in the various fields of banking policy and operation including internal auditing and investment portfolio management. The assistance available to this proposed new bank, enhancing its ability to become profitable soon after commencing operations, clearly evidences Applicant's competitive advantage in the Orlando market. It can hardly be questioned that Applicant will, as it has in the past, experience little difficulty in maintaining its dominant position or continue to successfully differentiate its services from those of competing organizations in the Orlando market.

No claim has been made in this case that Applicant's entry-cost advantages or ability to differentiate its banking services from competitors in the Orlando area are due to any superiority in the

<sup>&</sup>lt;sup>1</sup>The Board's decision, and my dissent, in that case is published at 1967 Federal Reserve BULLETIN 235; for the Board's decision, and my dissent, to approve First at Orlando Corporation's acquisition of a de novo bank established in the Orlando market in 1969, see 1969 Federal Reserve BULLETIN 942.

<sup>&</sup>lt;sup>2</sup>Application, Exhibit F. p. 56.

services Applicant provides that market. Instead, the evidence points to the undue concentration of banking resources and Applicant's dominant position in the Orlando banking market as structural conditions which—so long as they remain—provide Applicant an inherent advantage that competitors find difficult, if not impossible, to overcome. And while competitors may enjoy some umbrella effects from Applicant's dominance in the Orlando area, so too they are likely to forego those aggressive actions which would be freely undertaken in a less concentrated market.<sup>3</sup> In short, banking rivalry in the Orlando area has been attenuated by a dominant organization.

The same evil present in this case was observed by Judge Learned Hand in *United States v. Alcoa*, 148 F. 2d 416 (2d Cir. 1945). Referring to the undesirable effects of economic power which transgress the antitrust laws, Judge Hand stated:

"Many people believe that possession of unchallenged economic power deadens intitative, discourages thrift and depresses energy; that immunity from competition is a narcotic, and rivalry is a stimulant, to industrial progress; that the spur of constant stress is necessary to counteract an inevitable disposition to let well enough alone." Id. at 427.

I am one of those who share such beliefs. I must therefore dissent to the approval of a de novo bank for this Applicant in a market which it clearly dominates. Permitting Applicant to open a new bank in the projected service area not only imposes a hardship upon other small banks in the area which could profitably use additional time in which to become more effective competitors, but to the public at large who would benefit from the advantages a more competitive banking environment would offer.

#### BANCO DI ROMA S.P.A., ROME, ITALY

ORDER APPROVING FORMATION OF BANK HOLDING COMPANY

Banco di Roma S.p.A., Rome, Italy, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through the acquisition of 100 per cent of the voting shares (less directors' qualifying shares)

of Banco di Roma (Chicago), Chicago, Illinois ("Bank"), a proposed new bank.

Notice of receipt of the application has been given in accordance with § 3(b) of the Act, and the time for filing comments and views has expired. The Board has considered the application and all comments received in the light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)) and finds that:

Applicant, majority owned by the Italian government, is the third largest commercial bank in Italy, operates approximately 300 branches and agencies, and has worldwide deposits of \$7.3 billion. Applicant presently operates an agency office in San Francisco, California, and representative offices in New York, New York, and Chicago, Illinois. Applicant also owns a one-third interest in EuroPartners Securities Corporation, New York, New York, which engages in a general securities business.

Acquisition of Bank would enable Applicant to convert the activities of its representative office into full scale banking operations. It is contemplated that while Bank will offer general banking services, it will specialize in the provision of foreign banking services, particularly those relating to Italy and Western Europe in general. Consummation of the proposal would have no adverse effects on existing or potential competition and may increase competition to some degree in the market of international banking services.

The financial and managerial resources and prospects of Applicant and Bank are satisfactory and consistent with approval of the application. At the present time, although approximately 30 per cent of United States trade with Italy originates in the Midwest, approximately 90 per cent of the payment settlements for this trade are channeled through New York banks. Bank could help alleviate the problems this causes in delays in payment and consequent loss of available funds. Considerations relating to the convenience and needs of the communities to be served thus lend weight toward approval of the application. It is the Board's judgment that the proposed transaction is in the public interest and should be approved.

In connection with the present application, Applicant also applied for the Board's permission to retain its one-third interest in EuroPartners Securities Corporation. That application was separately considered by the Board under 4(c)(9) of the Act and is the subject of a denial Order issued by the Board today. (See page 940 of this BULLETIN).

<sup>&</sup>lt;sup>3</sup>As the Supreme Court observed in *United States v. Philadelphia National Bank*, 374 U.S. 321, 363, in the "live and let live" policy of firms in a concentrated market is an implicit recognition that their interests are best served by renouncing vigorous competition.

LAW DEPARTMENT 931

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, and (c) Banco di Roma (Chicago), Chicago, Illinois, shall be opened for business not later than six months after the date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective September 28, 1972.

Voting for this action: Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governor Robertson.

(Signed) TYNAN SMITH, Secretary of the Board.

FIRST NATIONAL STATE BANCORPORA-TION,

NEWARK, NEW JERSEY

ORDER APPROVING ACQUISITION OF BANK

First National State Bancorporation, Newark, New Jersey, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of First National State Bank of Ocean County, Lakewood, New Jersey, the successor by merger to Trust Company of Ocean County, Lakewood, New Jersey ("Ocean Bank"). The bank into which Ocean Bank is to be merged (the resulting bank) has no significance except as a means to facilitate the acquisition of Ocean Bank. Accordingly, the proposed acquisition of the shares of the successor organization is treated herein as the proposed acquisition of shares of Ocean Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls six banks with aggregate deposits of \$1.2 billion, representing 7.2 per cent of the total commercial bank deposits in New Jersey and is the largest banking organization in

the State. Acquisition of Ocean Bank (\$31.3 million deposits) would increase Applicant's share of New Jersey bank deposits by .2 percentage points.

Subject acquisition would represent Applicant's initial entry into New Jersey's Third Banking District. Ocean Bank is the twenty-third largest of 60 banks in this district and the sixth largest of eight banks located in the Lakewood-Toms River market. It controls 1 per cent and 8.4 per cent of total deposits for the district and market, respectively, and is the third largest of five competing area banks which control deposits ranging from \$198 million to \$3 million. It appears that Applicant's acquisition of Ocean Bank would not adversely affect the other area banks.

No significant present competition exists between Applicant's present subsidiaries and Ocean Bank. Their nearest offices are 12 miles apart with five banks located in the intervening area. It also appears unlikely that an appreciable amount of future competition would develop between them because of the separation of their market areas, and the restrictions on branching imposed by State laws. Moreover, the proposed acquisition would not act as a deterrent to entry by other groups into the market since there are a number of independent banks available for acquisition. Competitive considerations are consistent with approval of the application.

The financial conditions and managerial resources of Applicant, its subsidiary banks, and Ocean Bank are generally satisfactory, and prospects for each are favorable. Banking factors appear to be consistent with approval of the application. Whereas the major banking needs of the area are served at the present time, the introduction by Applicant of trust and computer services and accounts receivable financing at Ocean Bank would serve the convenience of its cutomers. In addition, the affiliation would enable Ocean Bank to serve the larger credit requirements of the rapidly growing area. Considerations relating to the convenience and needs of the communities to be served are consistent with and add some weight toward approval of the application. It is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The

<sup>&</sup>lt;sup>1</sup>Banking data are as of December 31, 1971, and reflect holding company formations and acquisitions approved by the Board through August 31, 1972.

transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Board of Governors, effective September 28, 1972.

Voting for this action: Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governor Robertson.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

## ORDER UNDER SECTIONS 3 AND 4 OF BANK HOLDING COMPANY ACT

L&L HOLDING COMPANY,
FORT COLLINS, COLORADO
ORDER APPROVING FORMATION OF
BANK HOLDING COMPANY
AND ACQUISITION OF INSURANCE AGENCY

L&L Holding Company, Fort Collins, Colorado, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through the acquisition of 56 per cent or more of the voting shares of Rocky Mountain Bank and Trust Company, Fort Collins, Colorado ("Bank").

At the same time Applicant has applied for the Board's approval under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y to engage in insurance agency activities through the acquisition of the assets of W&W Insurance Agency, Fort Collins, Colorado ("Agency").

Notice of receipt of the applications has been given in accordance with §§ 3 and 4 of the Act, and the time for filing comments and views has expired. The Board has considered the applications and all comments received in the light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)), and the considerations specified in § 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and finds that:

Applicant is a nonoperating corporation formed for the purpose of acquiring Bank and Agency. Bank, with deposits of \$4.3 million, controls 2.5 per cent of deposits in the Fort Collins banking market and is the smallest of six banking organizations in that market. Since the transaction involves only a change from individual to corporate ownership, consummation of the proposal will

have no adverse effects on existing or potential competition.

Considerations relating to the financial and managerial resources and prospects of Applicant and Bank are satisfactory and consistent with approval. In this connection the Board has determined that the offers to be made to majority and minority shareholders, while not identical, are substantially equivalent. Considerations relating to the convenience and needs of the communities to be served are consistent with approval of the application. It is the Board's judgment that consummation of the transaction would be in the public interest and that the acquisition of Bank should be approved.

Agency operates on the premises of Bank and is engaged in selling credit life and accident and health insurance in connection with lending activities of Bank. The Board has previously determined by regulation that this activity is closely related to banking (12 CFR 225.4(a)(9)).

There is no evidence in the record indicating that consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices, or other adverse effects on the public interest. It does appear that Applicant's acquisition of both Bank and Agency will enable those shareholders of Bank who accept the exchange offer to share in the income of Agency as well as Bank. Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors that the Board is required to consider regarding the acquisition of Agency under § 4(c)(8) is favorable and that the application should be approved.

On the basis of the record, the applications to acquire Bank and Agency are approved for the reasons summarized above. The acquisition of Bank shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The determination as to Agency's activities is subject to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof. By order of the Board of Governors, effective September 21, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(Signed) MICHAEL A. GREENSPAN, Assistant Secretary of the Board.

## ORDERS UNDER SECTION 4(c)(8) OF BANK HOLDING COMPANY ACT

[SEAL]

#### PROVIDENT NATIONAL CORPORATION, PHILADELPHIA, PENNSYLVANIA

ORDER APPROVING ACQUISITION OF LEASE FINANCING CORPORATION

Provident National Corporation, Philadelphia, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire not less than 51 per cent of the voting shares of Lease Financing Corporation ("LFC"), Wynnewood, Pennsylvania, a company that engages in the activity of leasing personal property or acting as agent, broker or adviser with respect to the leasing of such property. Such activity has been determined by the Board to be closely elated to the business of banking (12 CFR 225.4(a)(6)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (37 Federal Register 14259). The time for filing comments and views has expired, and none have been timely received.

Applicant's subsidiary bank, Provident National Bank, Philadelphia, Pennsylvania ("Bank"), has total deposits of \$1.045 billion and is the fifth largest commercial bank in the city of Philadelphia, controlling 3.3 per cent of deposits in that area.<sup>1</sup>

LFC is primarily engaged in leasing transportation equipment, computer equipment and other equipment, and acting as agent, broker or adviser in the leasing of such equipment. As of March 31, 1972, LFC leased directly equipment costing approximately \$13 million and acted as adviser with respect to equipment costing about \$33.75 million.

It appears that the relevant geographic market

for the type of property that LFC generally leases is nationwide and LFC leases property or provides advisory service in all but 11 States. On the basis of its direct leasing and lease advisory services, it appears that LFC controls less than one per cent of that market. Applicant's subsidiary, Provident National Bank ("Bank") has engaged, as authorized by the Comptroller of the Currency, in direct personal property leasing, but to date has made only three lease transactions with a total original equipment cost of \$3.47 million. Bank is not authorized to act as agent, broker or adviser with respect to the leasing of personal property and has not acted in that capacity. Although some existing competition would be eliminated upon consummation of this proposal, the small size of Bank's existing leasing operation, LFC's substantial activity in lease advisory services in which Bank cannot participate, the limited expertise of Bank in leasing, and the small size of LFC in the national leasing market make it unlikely that approval of this application would result in any significant reduction of existing competition. Some potential competition would be eliminated upon consummation of this proposal because Bank could engage de novo in personal property leasing activities. The small size of LFC in the national leasing market, the large number of existing leasing companies, and the entry of many new leasing firms should reduce the likelihood of adverse competitive effects on potential competition. On the basis of the facts before the Board, it does not appear that any significant existing or potential competition would be eliminated upon consummation of the proposal herein.

The Board has considered the possible vertical anticompetitive effects such as Bank ceasing to be a source of credit for competitors of LFC or LFC ceasing to be a source of loan business for competitors of Applicant's bank. The possibility of such dangers does not appear serious.

Consummation of the proposal would enable LFC to acquire capital at a lower cost. This should serve to expand LFC's direct leasing activity and enable them to lease more costly equipment and to become a stranger competitor in the national market. Accordingly, the public benefits involved are consistent with approval.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject

<sup>1</sup> Deposit data are as of December 31, 1971.

to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, September 1, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell. Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(SEAL)

(Signed) TYNAN SMITH, Secretary of the Board.

## BANK OF VIRGINIA COMPANY,\* RICHMOND, VIRGINIA

ORDER APPROVING ACQUISITION OF RICHMOND FINANCE CORPORATION AND HANOVER MORTGAGE CORPORATION

Bank of Virginia Company, Richmond, Virginia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire all of the voting shares of (1) Richmond Finance Corporation, Richmond, Virginia, a company that engages in the activity of making personal loans or extensions of credit to individuals, and acting as agent for credit life, accident and health insurance in connection with such loans; and (2) Hanover Mortgage Corporation, Richmond, Virginia, a company that engages in the activity of making mortgage loans principally secured by junior liens on commercial, residential and unimproved real estate, and acting as agent for credit life, accident and health insurance in connection with such loans. Such activities have been determined by the Board to be closely related to the business of banking.

Notice of the applications, affording opportunity for interested persons to submit comments and views on the public interest factors has been duly published (37 Federal Register 12188). The time for filing comments and views has expired, and none have been timely received.

Applicant, parent holding company of Bank of Virginia-Central, Richmond ("Bank"), controls fifteen other banks in other markets, with aggre-

gate deposits of \$781.1 million, representing 8.5 per cent of the total commercial deposits in Virginia. Bank is the third largest banking stitution in the Richmond Standard Metropolitan Statistical Area ("SMSA"), where it holds 19 per cent of deposits in that market. Applicant's nonbanking subsidiaries include both domestic and foreign factoring companies, a leasing corporation and a mortgage company. None of Applicant's nonbanking subsidiaries are engaged in making consumer loans and the loans of its mortgage company are primarily secured by first liens on real estate.

Richmond Finance Corporation is engaged in the business of making small loans to individuals secured primarily by liens on used motor vehicles. It competes with sixteen other small loan companies in the Richmond SMSA and based on its decline in volume of business (\$1,225,000 in 1968 to \$576,000 in 1971) offers but limited competition to these competitors. While Bank, on occasion, extends credit for the purchase of used cars, there is no significant existing competition between Bank and Richmond Finance Corporation in the consumer small loan market.

Hanover Mortgage Corporation ("Hanover"), is engaged in the business of making loans to individuals for its own account secured primarily by second mortgages on real estate. As of January 31, 1972, Hanover held total outstanding mortgage loans of \$2.3 million, representing approximately 3 per cent of all second mortgage loans outstanding in the Richmond SMSA. Bank's second mortgage loans in the market area are nominal (\$498,000) and, in view of bank regulations restricting the eligibility of loans secured by junior liens, not likely to increase substantially. The Board therefore concludes that consummation of the proposed acquisition of Hanover would have no significant adverse effects on existing competition, nor foreclose the development of future competition.

Financial factors, as discussed in an accompanying order of today's date involving Applicant's proposed retention of Rusch Factors, Inc., are consistent with approval. Acquisition of Richmond Finance Corporation and Hanover will not place additional demands on Applicant's earnings or adversely affect Applicant's financial condition in any manner.

Approval of each acquisition will make available to Richmond Finance Corporation and Hanover the financial resources of Applicant and enable both companies to better serve their customers and provide more effective competition to their competitors in the market area. The resulting

<sup>\*</sup>Virginia Commonwealth Bankshares. Inc. changed its name to Bank of Virginia Company during the processing of this application.

LAW DEPARTMENT 935

benefits in terms of public needs and convenience, and increased competition would, in the Board's judgment, outweigh any possible adverse effect on competition.

Based on the foregoing and other considerations reflected in the record, the Board hereby approves the applications. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasions thereof.

Voting for this action: Chairman Burns and Governors Mitchell, Brimmer, and Sheehan. Absent and not voting: Governors Robertson, Daane, and Bucher.

(SEAL)

(Signed) TYNAN SMITH, Secretary of the Board.

## ORDER APPROVING RETENTION OF RUSCH FACTORS, INC.

Bank of Virginia Company, Richmond, Virginia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to retain all of the voting shares of Rusch Factors, Inc. ("Rusch"), Richmond, Virginia, a company that engages in the activities of full notification and nonnotification factoring of accounts receivable, secured and unsecured commercial financing without restriction as to the nature of security taken, including but not limited to providing guarantees of letters of credit and issuing letters of guaranty of any kind. Such activities have been determined by the Board to be closely related to the business of banking (12 CFR 225.4(a)(1)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (37 Federal Register 7951). The time for filing comments and views has expired, and none have been timely received.

Applicant, parent holding company of Bank of Virginia-Central, Richmond, ("Bank"), controls sixteen banks with aggregate deposits of \$781.1 million, representing 8.5 per cent of the total deposits in commercial banks in Virginia. Bank

is the third largest banking institution in the Richmond SMSA and it controls 19 per cent of deposits in that market. Applicant's nonbanking subsidiaries include both domestic and foreign factoring companies, a leasing corporation and a mortgage company.

Rusch, with offices in Barrington, Rhode Island, New York, New York, and Richmond, Virginia, is an "old-line" factoring company originally established in 1827 and acquired by Applicant under § 4(c)(5) of the Bank Holding Company Act in July, 1969. Under § 4(c)(5), Rusch is not authorized to conduct full service factoring operations at locations other than such locations where Applicant's subsidiary banks are authorized to engage in business. Applicant now seeks permission to operate Rusch under authority of § 4(c)(8) so that Rusch would not be subject to the "loan production" restriction at its New York and Rhode Island offices and could engage in full service factoring activities at those offices.

Since Applicant's acquisition of Rusch in 1969, its factored accounts outstanding have increased from \$52.2 million to \$99.1 million. Rusch has only a small share of the New York, Connecticut, Rhode Island, Massachusetts, New Hampshire and Vermont factoring markets where total outstanding factored accounts of Rusch's major competitors are approximately \$6 billion.

Applicant has a factoring subsidiary located in Canada and its subsidiary banks located in Virginia engage to some extent in the same type of commercial financing engaged in by Rusch. The factoring activities of Applicant's subsidiaries, other than Rusch, appear to be insubstantial in Rusch's primary service areas. The Board therefore concludes that the proposed retention of Rusch by Applicant would not have any significant adverse effect on either existing or potential competition in any relevant area.

There is no evidence in the record to indicate that the proposed retention would lead to an undue concentration of resources, conflicts of interest, or unsound banking practices. Some benefits may accrue to the public through the proposed reten-

Prior to June 30, 1971, a bank holding company could, under § 4(c)(5), directly acquire shares of a corporation to perform, at locations at which the bank is authorized to engage in business, functions, such as factoring, that national banks are empowered to perform directly (12 CFR 7.1105; 225.4(e); 250.141).

<sup>&</sup>lt;sup>2</sup>Rusch's offices in New York and Rhode Island are "loan production offices" where Rusch may solicit loans, assemble credit information, prepare applications for loans, and perform other similar agent type activities for Rusch's main office in Richmond, Virginia.

tion, since Applicant would be able to offer full service factoring, rather than merely loan production facilities, to its customers in New York and Rhode Island, thereby possibly providing more competition to the larger factoring companies.

In its consideration of the application, the Board noted that Applicant has substantial short-term debt, utilized to carry receivables of nonbank subsidiaries. In addition, Applicant has issued significant long-term debt primarily to make additions to the capital accounts of its subsidiary banks and affiliated companies and to acquire foreign companies. Although Applicant's resulting overall debt level is relatively high in relation to other bank holding companies, each of Applicant's nonbank subsidiaries has been profitable and each appears to have a reasonable capital base. Moreover, Applicant and its subsidiaries are considered capably managed.

Based on the foregoing circumstances, the Board concludes that the financial and managerial factors are consistent with approval and that the public interest considerations reflected in the record are favorable. Accordingly, the application is approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective September 8, 1972.

Voting for this action: Chairman Burns and Governors Mitchell. Brimmer, and Sheehan. Absent and not voting: Governors Robertson, Daane, and Bucher.

PROVIDENT NATIONAL CORPORATION, PHILADELPHIA, PENNSYLVANIA
ORDER APPROVING ACQUISITION OF JOHN P.
MAGUIRE & Co., Inc.

Provident National Corporation, Philadelphia, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire all of the voting shares of John P. Maguire & Co., Inc. ("Maguire"), New York, New York, a company that engages in the

activities of factoring and related commercial financing, including conditional sales financing. Such activities have been determined by the Board to be closely related to the business of banking (12 CFR 225.4(a)(1)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (37 Federal Register 13218). The time for filing comments and views has expired, and none have been timely received.

Applicant's subsidiary bank, Provident National Bank, Philadelphia, Pennsylvania ("Bank"), has total deposits of \$1.045 billion and is the fifth largest commercial bank in the city of Philadelphia, controlling 3.3 per cent of deposits in that area. Maguire was acquired by Bank on October 29, 1971, in a transaction approved by the Comptroller of the Currency and, accordingly, became an indirect subsidiary of Applicant pursuant to § 4(c)(5) of the Bank Holding Company Act. The proposed transaction would transfer direct ownership of Maguire from Bank to Applicant, which would change Maguire's operating authority from § 4(c)(5) to § 4(c)(8).

Under §4(c)(5) Maguire is not authorized to conduct a full service factoring business at locations other than those at which Bank is authorized to engage in business, but rather is subject to the "loan production" restriction inherent in such authority (12 CFR 250.141). The Board believes that when a bank holding company indirectly acquires a nonbanking company through a subsidiary bank, pursuant to  $\S 4(c)(5)$ , and subsequently applies to the Board to acquire direct ownership of such nonbanking company and operate it pursuant to the broader authority of § 4(c)(8), the Board must consider the transaction as if the nonbanking company was being acquired initially from an independent third party. Accordingly, in such circumstances the Board must find that neither the original acquisition of the nonbanking company nor the Board's approval of the § 4(c)(8) application would result in an undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices.

Maguire is primarily an old-line factoring company whose customers are predominantly in the garment and carpet industries. Maguire also makes loans to clients secured by accounts receivable and engages in conditional sales financing of equipment. Maguire has a factoring volume of approxi-

<sup>&</sup>lt;sup>1</sup>Deposit data are as of December 31, 1971.

LAW DEPARTMENT 937

mately \$625 million, derived primarily from the New England States, New York, North Carolina, and Oklahoma. On a national basis, Maguire ranks ninth of twenty-nine factoring companies with 4.7 per cent of total commercial factored volume.

Prior to the acquisition of Maguire by Bank, no subsidiary of Applicant had ever engaged in factoring. Bank or Applicant might have entered the factoring industry de novo, however, the level of risk in the industry and the need for highly specialized factoring skills made such entry unlikely. Although some loans made by Bank might be considered competitive with loans and advances made by Maguire, the majority of Maguire's accounts originate in areas where Bank has few or no customers and the loans Bank derives from those areas is small in proportion to its total loan portfolio. On the basis of the record the Board finds that the proposed acquisition of Maguire by Applicant would not have any significant adverse effect on either existing or potential competition in the factoring or commercial finance businesses.

There is no evidence in the record to indicate that the proposed acquisition of Maguire would lead to an undue concentration of resources, conflict of interest or unsound banking practices. Although it is unlikely that the transaction will produce any significant new benefits to the public, the Board noted that Maguire has been able to obtain funds more easily and at lower rates since its acquisition by Bank. Such gains in efficiency are consistent with the public interest considerations the Board must consider under § 4(c)(8).

If this transaction is approved by the Board, Bank's ownership of Maguire's shares will be distributed to Applicant through a dividend in kind. Although this would have the effect of reducing Bank's equity capital significantly, the Board noted that subsequent to the filing of this application, Bank sold \$21 million in capital notes in order, among other reasons, to replace the anticipated loss of capital funds represented by Bank's ownership of Maguire. Accordingly, the transaction will not cause Bank's overall capital position to fall below acceptable levels.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) are consistent with approval. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination

of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective September 14, 1972.

Voting for this action: Chairman Burns and Governors Robertson, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Governor Mitchell.

## THIRD NATIONAL CORPORATION, NASHVILLE, TENNESSEE

## ORDER APPROVING ACQUISITION OF FRIENDLY FINANCE, INCORPORATED

Third National Corporation, Nashville, Tennessee, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire all of the voting shares of Friendly Finance, Incorporated, Paducah, Kentucky ("Friendly"), a company that engages in the activities of making installment loans direct to borrowers, discounting installment notes receivable issued to dealers by purchasers, and acting as agent for credit life, accident and health insurance in connection with such loans. Such activities have been determined by the Board to be closely related to the business of banking (12 CFR 225.4(a)(1) and (9)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (37 Federal Register 153). The time for filing comments and views has expired, and the Board has considered all comments received in the light of the public interest factors set forth in § 4(c)(8) of the Act (12 U.S.C. 1843(c)).

Applicant's banking subsidiary, Third National Bank in Nashville ("Bank"), is the fourth largest bank in Tennessee and the second largest bank in Nashville with deposits of \$540.1 million, representing 30 per cent of total commercial deposits in the Davidson County banking market. (All deposit data and market share data are as of December 31, 1971.) Bank operates 20 offices, all in Davidson County. (Tennessee law prohibits a bank from branching outside of the county in which its principal office is located.) Bank makes

consumer installment loans through its principal office and branch offices in Davidson County. As of August 1, 1972, Bank's total volume of consumer loans approximated \$12.5 million.

Friendly is a consumer finance company that operates 19 offices in the States of Kentucky, Tennessee, Oklahoma, and Mississippi, 1 of which is located in the service area of Bank. Friendly makes installment loans up to \$5,000 directly to borrowers, most of which are secured by automobiles, household goods, other chattels or real estate, and sells credit insurance in connection with its lending activities. It had total loans outstanding of \$10.6 million as of April 30, 1972, of which \$0.5 million were derived from Davidson County.

Although Bank and Friendly both compete for consumer loan business in Davidson County, Tennessee, consummation of the proposed acquisition would not have a significant adverse effect on existing competition since the market share of Bank would be increased only slightly. A substantial number of independent competitors would remain in the market. Moreover, since Tennessee law precludes the establishment of branches by Bank outside Davidson County, the development of competition between Bank and Friendly in other markets is unlikely. Applicant has the resources to enter markets served by Friendly through formation of its own consumer loan companies. However, there are numerous active competitors in these markets; in addition, the existence of many potential entrants diminishes any possible adverse effects that consummation of the proposed acquisition might have upon potential competition. The Board concludes that consummation of the proposed acquisition would not have a serious adverse effect upon existing or potential competition between Applicant and Friendly. Further, there is no significant possibility that the acquisition will have adverse effects on credit currently available to independent finance companies by Bank.

It is anticipated that Friendly's affiliation with Applicant, by providing access to the greater financial resources of Applicant, will enable Friendly to compete more effectively with other consumer finance lenders in the areas in which it operates. There is no evidence in the record indicating that consummation of the proposed acquisition would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices or other adverse effects.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective September 21, 1972.

Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

(Signed) MICHAEL A. GREENSPAN,
[SEAL.)

Assistant Secretary of the Board.

# UNITED VIRGINIA BANKSHARES INCORPORATED, RICHMOND, VIRGINIA ORDER APPROVING RETENTION OF UNITED VIRGINIA MORTGAGE CORPORATION

United Virginia Bankshares Incorporated, Richmond, Virginia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to retain all of the voting shares of United Virginia Mortgage Corporation, Richmond, Virginia, a company that engages in the activities of a mortgage company and proposes to engage de novo in acting as agent for the sale of credit life, credit disability and mortgage redemption insurance. Such activities have been determined by the Board to be closely related to the business of banking (12 CFR 225.4(a)(1) and (9)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (37 Federal Register 15896). The time for filing comments and views has expired, and none have been timely received.

Applicant, the largest banking organization in Virginia, controls 12 banks with aggregate deposits of approximately \$1.3 billion, representing 14.2 per cent of the total deposits in commercial

banks in Virginia. Applicant's nonbanking subsidiaries include a service corporation, an insurance agency, a leasing company, and United Virginia Mortgage Corporation ("Company").

The Company, with offices in Richmond, Roanoke, Annandale, Manassas, Norfolk, Newport News, and Alexandria, Virginia, and Langley Park, Maryland, engages in the activities of a mortgage company which include originating loans as principal, originating loans as agent, servicing loans for nonaffiliated individuals, partnerships and corporations, and servicing loans for affiliates of United Virginia Bankshares Incorporated. In addition, Applicant proposes to engage de novo in acting as agent for the sale of credit life, credit disability and mortgage redemption insurance in connection with the origination or servicing of such mortgages.

Prior to this application the Company, which was acquired on October 1, 1968, has been operated pursuant to § 4(c)(5) of the Bank Holding Company Act.<sup>2</sup> Under § 4(c)(5), the Company is not authorized to conduct full service mortgage banking operations at locations other than such locations where Applicant's subsidiary banks are authorized to engage in business.<sup>3</sup> Applicant now seeks permission to operate the Company under the broader authority of § 4(c)(8) so that none of the Company's offices would be subject to the 'loan production' restriction.

The Board regards the standards of  $\S$  4(c)(8) for the retention of shares in a nonbanking company, previously operated by a bank holding company pursuant to  $\S$  4(c)(5), to be the same as the standards for a proposed  $\S$  4(c)(8) acquisition. Accordingly, the Board must find that neither the operation of the nonbanking company under  $\S$  4(c)(5), nor the Board's approval of the  $\S$  4(c)(8) application would result in an undue concentration of resources, decreased or unfair competition, conflict of interest, or unsound banking practices.

Since Applicant's acquisition of the Company

in 1968, the Company's assets have quadrupled. The Company derives business from all of Applicant's subsidiary banks located throughout Virginia and from one "loan production" office located in the Maryland suburbs of Washington, D.C. With permanent mortgage servicing contracts in excess of \$204 million, as of June 30, 1971, the Company was the third largest mortgage banking company in Virginia on that date.

The Company is primarily engaged in originating mortgage loans for the account of others and servicing such loans. Although Applicant's subsidiary banks do originate a limited volume of mortgage loans for their own account, this activity does not overlap significantly with the Company's activities. Accordingly, no significant competition exists between the Company and Applicant's subsidiary banks. Further, it does not appear that any significant potential competition would be foreclosed upon consummation of the proposal because it is unlikely that the Company would remain a significant competitor without access to Applicant's resources.

Under Applicant's operations the Company, originally a small, local mortgage company, has become a larger and more viable competitor among mortgage companies in Virginia. Although the proposed retention would change only the company's operating authority, some benefits may accrue to the public through the proposed retention, since Applicant would be able to offer full service mortgage banking facilities at locations other than its subsidiary banking offices, thereby providing greater convenience to its customers. There is no evidence in the record to indicate that the proposed retention would lead to an undue concentration of resources, conflicts of interest, or unsound banking practices.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective September 26, 1972.

<sup>&</sup>lt;sup>1</sup>All banking data are as of December 31, 1971.

<sup>&</sup>lt;sup>2</sup>Prior to June 30, 1971, a bank holding company could, under § 4(c)(5), directly acquire shares of a corporation to perform, at locations at which its subsidiary banks are authorized to engage in business, functions, such as mortgage banking, that national banks are empowered to perform directly (12 CFR 7.7379; 225.4(e); 250.141).

The Company's offices that are not located on the premises of Applicant's subsidiary banks are "loan production offices" where the Company may solicit loans, assemble credit information, prepare applications for loans, and perform other similar agent type activities for mortgage offices located on the premises of Applicant's subsidiary banks (12 CFR 250.141).

Voting for this action: Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governors Robertson and Daane.

(Signed) MICHAEL A. GREENSPAN,
[SEAL] Assistant Secretary of the Board.

## ORDER UNDER SECTION 4(c)(9) OF BANK HOLDING COMPANY ACT

#### BANCO DI ROMA, ROME, ITALY

ORDER DISAPPROVING RETENTION OF INVEST-MENT IN EUROPARTNERS SECURITIES CORPORATION

Banco di Roma, Rome, Italy, has applied for the Board's approval under section 4(c)(9) of the Bank Holding Company Act to retain 33½ per cent of the voting shares of EuroPartners Securities Corporation ("EuroPartners"), New York City, if Banco di Roma becomes a bank holding company.

Banco di Roma has received the Board's permission to become a bank holding company through the acquisition of all of the voting stock (less directors' qualifying shares) of a proposed new bank in Chicago, Illinois, to be named Banco di Roma (Chicago). If the proposed acquisition is consummated, Banco di Roma will be a foreign bank holding company within the meaning of § 225.4(g)(1)(iii) of Regulation Y.

EuroPartners was originally incorporated under the name of Credit Lyonnais Corporation by Credit Lyonnais, a French bank, in 1968. Later the name of the corporation was changed, and Banco di Roma and Commerzbank, a German bank, each acquired 33½ per cent of the voting shares of the corporation. EuroPartners was originally formed and operates primarily to facilitate investments in the United States by the European clients of its three European bank shareholders.

The general plan and character of the business of EuroPartners is to engage in and conduct as a broker-dealer a securities business, including brokerage activities, underwriting, and investment banking and investment advisory services. The corporation is a member of the National Association of Securities Dealers, Inc., the Philadelphia-Baltimore-Washington Stock Exchange, and the Midwest Stock Exchange.

In the calendar year 1971, EuroPartners did a substantial underwriting business, accounting for approximately 15 per cent of its gross income. Almost 90 per cent of gross income from this source was derived from United States customers.

The predominant activity of EuroPartners was brokerage business. Commission income from this source accounted for approximately two-thirds of its gross income. Historically, foreign customer accounts have generated more than 90 per cent of its gross brokerage commissions on all customer accounts.

EuroPartners offers financial advice and services to European and other foreign clients interested in obtaining financing in the United States or in effecting in the United States direct investments, acquisitions, joint ventures, mergers and other corporate transactions. It offers similar services with respect to foreign markets to American and Canadian companies having interests abroad.

Section 4(c)(9) of the Act provides that the prohibitions of section 4 shall not apply to the investments or activities of foreign bank holding companies that conduct the greater part of their business outside the United States, if the Board by regulation or order determines that, under the circumstances and subject to the conditions set forth in the regulation or order, the exemption would not be substantially at variance with the purposes of the Act and would be in the public interest. Banco di Roma has applied for a special exemption for its investment in EuroPartners under § 225.4(g)(3) of Regulation Y, contending that retention of such investment would be consistent with the purposes of the Act and would be in the public interest. Its principal arguments are that (1) a very substantial proportion (73%) of EuroPartners' gross income is derived from foreign sources,1 (2) the possibility of abuses associated with common ownership of a commercial bank and an investment banking firm could be eliminated by specific undertakings of Banco di Roma to insulate the activities of Banco di Roma (Chicago) from those of EuroPartners, (3) the operations of EuroPartners would have a beneficial impact on the balance of payments of the United States by facilitating foreign investment in this country, and (4) it would be inequitable to

It does not appear that EuroPartners is or will be engaged in the United States exclusively in activities incidental to its international or foreign business, nor has Banco di Roma given any assurances to the Board concerning the future scope—whether foreign or domestic oriented—of the operations of EuroPartners. Since the underwriting business of EuroPartners predominantly relates to United States customers, an exemption under §§ 225.4(g)(2)(iii) or (iv) of Regulation Y would not seem appropriate, and Banco di Roma has not applied under those sections. The Board expresses no opinion on the question whether a company engaged in the United States exclusively in brokerage business for primarily foreign customers could qualify for exemption under either of these sections.

deny an exemption in circumstances that would force Banco di Roma to choose between a securities operation in New York and a banking operation in Illinois, when other foreign banks are permitted to have both a securities operation and a banking operation in New York.<sup>2</sup>

Banco di Roma's investment in EuroPartners is an investment that would not be permissible to a domestic bank holding company. The Board has consistently applied the policies of the Glass-Steagall Act to all bank holding companies registered under the Bank Holding Company Act irrespective of whether they have subsidiaries that are member banks. (See, e.g., 12 CFR 225.125 and 12 CFR 225.126.) In enacting the Glass-Steagall Act, Congress indicated that affiliations of commercial banks and securities companies give rise to potential conflicts of interests and unsound banking practices.

The Board is not persuaded that the public benefits that are alleged for the affiliation of a foreign bank holding company and a securities company would outweigh the possible adverse effects with which Congress was concerned in the enactment of the Glass-Steagall Act. An affiliation with a securities company would give a foreign bank holding company an unfair competitive advantage over a domestic bank holding company in that a foreign bank holding company would be able to offer its customers an alternative means of obtaining financing to credit facilities, namely, underwriting facilities. While there is no reason to doubt the sincerity of the Banco di Roma's plan to insulate the operations of its subsidiary bank in Chicago from the operations of EuroPartners, adoption of such a plan as a general guideline for conforming the operations of any bank holding

company to the policies of the Glass-Steagall Act would pose very difficult supervision problems for the Board which, in the Board's judgment, render such a plan unworkable.<sup>3</sup>

Moreover, the Board is of the opinion that differences in State laws on bank branching should not be permitted to override the policies of the Bank Holding Company Act regarding the separation of banking from commerce. The Banco di Roma is at no disadvantage to any other bank in its inability to obtain a branch in Illinois, since Illinois law does not authorize branching by any bank. Were the Board to adopt a policy of permitting exceptions to the prohibitions of section 4 in the interest of compensating for differences in State law, the application of section 4 would be seriously compromised.

Based on the foregoing and other considerations reflected in the record, the Board hereby denies the request of Banco di Roma for an exemption under § 4(c)(9) of the Bank Holding Company Act for its investment in EuroPartners. Under § 4(a)(2) of the Act, if Banco di Roma consummates the acquisition of its proposed subsidiary bank in Chicago, it will be required by law to divest its ownership of shares of EuroPartners within two years after the date as of which it becomes a bank holding company.

By order of the Board of Governors, effective September 28, 1972.

Voting for this action: Governors Mitchell, Daane, Brimmer, Sheehan and Bucher. Absent and not voting: Chairman Burns and Governor Robertson.

(Signed) TYNAN SMITH,

Secretary of the Board.

[SEAL]

<sup>&</sup>lt;sup>2</sup>The fourth argument refers to branch operations of foreign banks in New York. Foreign banks are permitted to establish branches under New York State law and are not so permitted under Illinois law. A branch of a foreign bank in the United States would not be a "bank" as that term is defined in § 2(c) of the Bank Holding Company Act, and such a branch may therefore he established wherever permitted by State law without the Board's prior approval under the Act.

<sup>&</sup>lt;sup>3</sup>A comprehensive plan would need to be more extensive than that proposed by Applicant and would be unduly complex to administer. For example, Applicant's plan would not deal with several potential conflict of interests problems: (1) a bank's loans to finance the operations of corporate investment banking clients of its securities affiliate, (2) a bank's loans to finance the purchase of securities from or through its securities affiliate, (3) promotional activities of a bank on behalf of its securities affiliate, and (4) reciprocal lending between banks and each other's securities affiliates.

## Announcements

#### APPOINTMENT OF RESERVE BANK PRESIDENT

The Board of Governors has approved the appointment by the directors of the Federal Reserve Bank of San Francisco of John J. Balles as president of that Bank, to serve the remainder of a 5-year term expiring February 29, 1976. He succeeds Eliot J. Swan, who retired June 1, after having served 31 years with the Bank, including more than 11 years as its president.

Prior to his appointment, Dr. Balles was senior vice president of the Mellon National Bank and Trust Co., Pittsburgh, Pennsylvania. Before joining the Mellon Bank in 1959, Dr. Balles served for 5 years with the Federal Reserve Bank of Cleveland. A native of Freeport, Illinois, Dr. Balles holds degrees from the State University of Iowa (B.S. and M.A.) and from Ohio State University (Ph.D.).

#### APPOINTMENT OF DIRECTOR

Frederick G. Koenig, Jr., of Birmingham, Alabama, has been appointed by the Board of Governors to serve as a Director of the Birmingham Branch of the Federal Reserve Bank of Atlanta, effective September 23, 1972. Mr. Koenig, who is President of Alabama By-Products Corporation, Birmingham, will complete the term, expiring December 31, 1972, of E. Stanley Robbins, who resigned.

#### REGULATIONS D AND J: POSTPONEMENT OF EFFECTIVE DATE OF AMENDMENTS

The Board of Governors on September 20, 1972, issued the following statement regarding its implementation of amendments to Regulations D and J:

The Board of Governors of the Federal Reserve System today postponed the effective date of amendments to its Regulations D and J which had been scheduled to go into effect on September 21.

This action resulted from the issuance of a temporary restraining order by the U.S. District Court for the District of Columbia on a petition filed by the Independent Bank-

ers Association of America and the Western Independent Bankers.

The amendment to Regulation D represents a restructuring of reserve requirements on demand deposits and will apply the same reserve requirements to member banks of like size, regardless of their location. The amendment to Regulation J will require all banks served by the Federal Reserve check collection system to pay for checks in immediately available funds on the day of presentment.

Strict compliance with the Court's order would restrain implementation only as to a limited group of banks and only with respect to Regulation J. However, in view of the adverse effect on the payments mechanism if implementation of the Regulation J proposals were fragmented, and, considering the adverse monetary policy impact should the reserve requirement adjustment under Regulation D be effected without the accompanying Regulation J changes, the Board has determined that it is necessary to postpone the effective date of both regulatory amendments, pending judicial determination and subsequent action by the Board.

(For the text of the amendments and the Board's earlier announcement, see pages 649 and 679, respectively, of the July 1972 BULLETIN.)

#### OVERSEAS BRANCHES OF MEMBER BANKS

Total assets of the overseas branches of member banks increased by \$14.4 billion, or 27 per cent, during 1971 to a total of \$67 billion, the Board of Governors announced on October 12, 1972, in releasing data showing balance sheet items of overseas branches at the beginning and end of the year. At the end of 1971, 577 overseas branches were in operation, an increase of 41 branches during the year.

Most of the increase in total branch assets in 1971 was again accounted for by the branches in Europe—particularly those in London—and in the Bahamas.

NOTE. - Data are from Board of Governors of the Federal Reserve System.

branches declined by 57 per cent to \$3.7 billion as head offices continued to reduce their reliance on foreign funds to support domestic operations. Loans at overseas branches expanded by \$7.3 billion, or 35.5 per cent, during the year. The marked increase in cash assets reflected expanded time placements with other banks in Euro-currency markets.

The data, derived from reports of condition filed at the end of the year with the Comptroller of the Currency and the Federal Reserve System, differ in certain respects from other statistical reports covering aspects of overseas branch operations. The assets and liabilities shown are payable in U.S. dollars as well as in currencies of the countries where the branches are located and in other foreign currencies.

#### **PUBLICATION OF VOLUME ON PRICE CONFERENCE**

The Econometrics of Price Determination Conference is available for distribution. This Conference was held on October 30 and 31, 1970, in Washington, D.C., under the joint sponsorship of the Social Science Research Council and the Board of Governors of the Federal Reserve System. The Conference was designed to encourage new research to ascertain the price—wage properties of major econometric models, to hasten the completion of econometric studies under way, and to provide an interchange between Government

agencies originating price data and econometricians using such data. The Conference was not aimed at policy, but rather was intended to deepen our understanding of the structural mechanisms that have made contemporary economies so vulnerable to inflation.

The book contains the following papers, with a preface by Professor Otto Eckstein of Harvard University who was both Chairman of the Planning Committee for the Conference and Editor of this volume:

Session I: "The Wage-Price Mechanism: Overview of the Conference" by James Tobin; "Recent Developments in Price Dynamics" by William D. Nordhaus; "Econometric Testing of the Natural Rate Hypothesis" by Robert E. Lucas, Jr.; "On the Structure of Serial Dependence in Some U.S. Price Series" by Marc Nerlove; and discussions of these papers by Franklin M. Fisher, P. W. MacAvoy, and Peter von zur Muehlen.

Session II: "Industry Price Equations" by Otto Eckstein and David Wyss; "An Econometric Analysis of the Relation of Monetary Variables to the Behavior of Prices and Unemployment" by Leonall C. Andersen and Keith M. Carlson; "Price Determination and Cost-of-Living Measures in a Disaggregated Model of the U.S. Economy" by Dale Heien and Joel Popkin; and discussions of these papers by Robert J. Gordon and Zvi Griliches.

Session III: "Price Determination in the Wharton Model" by L. R. Klein; "Price Simulations with the OBE Econometric Model" by Albert A. Hirsch; "Prices and Wages in the FR-MIT-Penn Econometric Model" by George de Menil and Jared J. Enzler; "Prices and Price Behavior in Three U.S. Econometric Models" by Saul H. Hymans; discussions of these papers by Carl F. Christ, Dale W. Jorgenson, and Frank W. Schiff; and a "Reply to Comments by Christ and Jorgenson" by de Menil, Enzler, and Hirsch.

Session IV: "Price Formation in European Countries" by R. J. Ball and Martyn Duffy; "Wage and Price Formation in Selected Canadian Econometric Models" by Ronald G. Bodkin; "Objectives for Price and Wage Statistics at the Bureau of Labor Statistics" by Geoffrey H. Moore; "Discussion of Moore's Paper" by Milton Moss; and "Discussion of Papers by Bodkin and by Ball and Duffy" by James K. Kindahl.

Copies may be obtained from Publications Services, Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The price of the clothbound edition is \$5.00 per copy (\$4.50 each in quantities of 10 or more sent to one address).

The paperbound edition is \$4.00 (\$3.60 each in quantities of 10 or more sent to one address).

#### **NEW PUBLICATION**

A new publication that gives a line-by-line explanation of the terms appearing in two statistical releases of the Board of Governors has been published by the Federal Reserve Bank of New York. The publication is a 24-page annotated glossary of terms used in the Consolidated Statement of Condition of All Federal Reserve Banks H. 4.1(a) and Factors Affecting Bank Reserves H. 4.1. The publication entitled "Glossary: Weekly Federal Reserve Statements" is available without charge from the Public Information Department, Federal Reserve Bank of New York, 33 Liberty Street, New York, New York 10045.

#### **ERRATUM**

In the amendment to § 221.3(a) of Regulation U, published at page 797 of the September BULLETIN, the reference to paragraph (x) in the proviso clause should be deleted. As corrected, the proviso clause reads "... Provided, That this requirement shall not apply to any credit described in paragraphs (o), (w), (y), or (z) of this section. ..."

## National Summary of Business Conditions

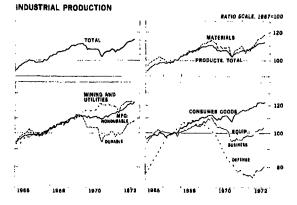

Released for publication October 17

Industrial production and nonfarm employment increased further in September, and the unemployment rate was about unchanged. Retail sales declined. The wholesale price index rose further. Commercial bank credit, the money stock, and time and savings deposits increased. Between mid-September and mid-October, yields in securities markets tended to steady following earlier sharp increases.

#### INDUSTRIAL PRODUCTION

Industrial production rose 0.6 per cent further in September to 115.2 per cent (1967 = 100) as gains in most final products, including equipment, and in materials more than offset a decline in durable consumer goods. The August index was revised upwards by two-tenths of a percentage point to 114.5 per cent. The total index in September was 7.6 per cent above a year earlier.

Auto assemblies in September remained at the July-August annual rate of 8.5 million units. Production schedules for October, however, indicate a rise in auto output. Production of household appliances and television sets declined in September but output of nondurable consumer goods increased. Production of business equipment rose further and was 10 per cent above the 1971 low but 5 per cent below the 1969 high. Output of defense equipment also rose in September. Among materials, production of steel and the textile,

F.R. indexes, seasonally adjusted. Latest figures: September.

paper, and chemicals grouping increased further, while output of most other materials remained at high levels.

#### **EMPLOYMENT**

Nonfarm payroll employment rose substantially in September with strong advances in manufacturing and State and local government. The average factory workweek edged up 0.1 hour to 40.7 hours. The unemployment rate was essentially unchanged at 5.5 per cent as employment gains were about matched by labor force growth.

#### **RETAIL SALES**

The value of retail sales declined 1.5 per cent in September and was 6 per cent above a year earlier. Sales at durable goods stores were down nearly 4 per cent from August and sales at nondurable goods stores declined 0.3 per cent.

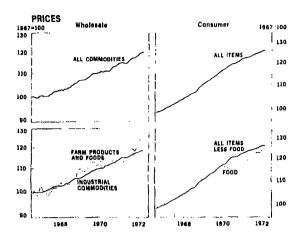

#### **AGRICULTURE**

Total crop production this year is expected to equal last year's record. Cotton and citrus will be much larger than last year's small crops and grain production will be at a near-record high. Livestock slaughter and egg production are somewhat below last year, while milk and poultry output is larger.

#### WHOLESALE AND CONSUMER PRICES

The wholesale price index, after seasonal adjustment, rose 0.3 per cent between August and September. Prices of farm and food products were up 0.8 per cent while the index of industrial commodities increased 0.2 per cent, with important advances for fuels and power and consumer durables.

Consumer prices rose 0.2 per cent in August, after seasonal adjustment, to a level 2.9 per cent above that in August 1971. Food prices posted another substantial advance. Other commodity prices rose 0.3 per cent, with continued marked advances for gasoline, while service costs were up 0.2 per cent.

Bureau of Labor Statistics. "Farm products and foods" is BLS "Farm products, and processed foods and feeds." Latest figures: Consumer, August; Wholesale, September.

#### BANK CREDIT, DEPOSITS, AND RESERVES

Commercial bank credit, adjusted for transfers of loans between banks and their affiliates, increased at an annual rate of about 12 per cent in September, considerably less rapidly than in August. The slowdown reflected moderation in loan expansion, especially credit extended to businesses which had been very large in August. Consumer and real estate loans continued strong. Holdings of municipal and Federal agency securities increased at about the same pace as in August while holdings of U.S. Treasury securities rose somewhat after 2 months of decline.

The narrowly defined money stock increased at an annual rate of 6 per cent in September about the same as in August. U.S. Government deposits also increased. Growth in time and savings deposits other than large negotiable CD's was slightly faster than in August and close to the pace of expansion over the second and third quarters. Net sales of large CD's continued strong in September.

Net borrowed reserves of member banks averaged about \$340 million over the 4 weeks

ending September 27 compared with \$190 million in August. Member bank borrowings increased substantially further but excess reserves also rose somewhat.

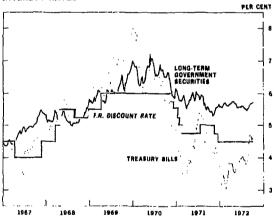

#### SECURITY MARKETS

Treasury bill rates were about 10 basis points lower to 15 basis points higher between mid-September and mid-October, with the increases occurring on the shorter maturities. The 3-month bill was bid at around 4.80 per cent in the middle of October, up from 4.65 per cent a month earlier. Yields on U.S. Government notes and bonds declined by some 5 to 15 basis points over the same period.

New corporate security yields rose slightly on balance from mid-September to early October while seasoned corporate security yields remained steady. Municipal security rates declined.

On balance common stock prices were relatively unchanged on moderate volume during the same period.

#### INTEREST RATES

Discount rate, range or level for all F.R. Banks. Weekly average market yields for U.S. Govt. bonds maturing in 10 years or more and for 90-day Treasury bills. Latest figures: week ending Oct. 7.

#### **GENERAL INFORMATION**

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

A heavy vertical rule is used in the following instances: (i) to the right (to the left) of a total when the components shown to the right (left) of it add to that total (totals separated by ordinary rules include more components than those shown), (2) to the right (to the left) of items that are not part of a balance sheet, (3) to the left of memorandum items.

"U.S. Govt. securities" may include guaranteed issues of U.S. Govt. agencies (the flow of funds figures

also include not fully guaranteed issues) as well as direct obligations of the Treasury. "State and local govt." also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.

The footnotes labeled Note (which always appear last) provide (1) the source or sources of data that do not originate in the System; (2) notice when figures are estimates; and (3) information on other characteristics of the data.

<sup>1</sup> Includes Federal agency issues held under repurchase agreements as of Dec. 1, 1966 and Federal agency issues bought outright as of Sept. 29, 1971.

2 Beginning with 1960 reflects a minor change in concept; see Feb. 1961 HULLETIN, p. 164.

2 Beginning Apr. 16, 1969, "Other F.R. assets" and "Other F.R. liabilities and capital" are shown separately; formerly, they were netted together and reported as "Other F.R. accounts."

4 Includes industrial loans and acceptances until Aug. 21, 1959, when industrial loan program was discontinued. For holdings of acceptances

on Wed. and end-of-month dates, see tables on F.R. Banks on following pages. See also note 2.

3 Part allowed as reserves Dec. 1, 1959—Nov. 23, 1960; all allowed thereafter. Beginning with Jan. 1963, figures are estimated except for weekly averages. Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date.

4 Includes securities loaned—fully secured by U.S. Govt. securities pledged with F.R. Banks.

7 Reflects securities sold, and scheduled to be bought back, under matched sale/purchase transactions.

<sup>&</sup>lt;sup>1</sup> Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date.

Total reserves held: Based on figures at close of business through Nov. 1959; thereafter on closing figures for balances with F.R. Banks and opening figures for allowable cash; see also note 3 to preceding table.

Required reserves: Based on deposits as of opening of business each day.

Borrowings at F.R. Banks: Based on closing figures.

Note.—Averages of daily figures. Monthly data are averages of daily figures within the calendar month; they are not averages of the 4 or 5 weeks ending on Wed, that fall within the month. Beginning with Jan. 1964 reserves are estimated except for weekly averages.

<sup>&</sup>lt;sup>1</sup> Based upon reserve balances, including all adjustments applicable to the reporting period. Prior to Sept. 25, 1968, carryever reserve deficiencies, if any, were deducted. Excess reserves for later periods are not of all carryover reserves.

<sup>2</sup> Derived from averages for individual banks for entire week. Figure for each bank indicates extent to which the bank's weekly average purchases and sales are offsetting.

<sup>3</sup> Federal funds loaned, not funds supplied to each dealer by clearing

banks, repurchase agreements (purchases of securities from dealers subject to resale), or other lending arrangements.

4 Federal funds borrowed, net funds acquired from each dealer by clearing banks, reverse repurchase agreements (sales of securities to dealers subject to repurchase), resale agreements, and borrowings secured by Govt. or other issues.

Note.—Weekly averages of daily figures. For description of series and back data, see Aug. 1964 BUILETIN, pp. 944-74.

Nov. 24	163/2		12		In effect Sept. 30, 1972.  Present legal requirement:	17	171/2	121/2	13	3	3	5
					Minimum	!	0 22	1	7 14	3 10	3 10	3 10

1 When two dates are shown, the first applies to the change at central reserve or reserve city banks and the second to the change at central banks. For changes prior to 1950 see Board's Annual Reports.

2 Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.

3 Authority of the Board of Governors to classify or reclassify cities as central reserve cities was terminated effective July 28, 1962.

4 Since Oct. 16, 1969, member banks have been required under Regulation M to maintain reserves against balances above a specified base due from domestic offices to their foreign branches. Effective Jan. 7, 1971, the applicable reserve percentage was increased from the original 10 per cent to 20 per cent. Regulation D imposes a similar reserve requirement on borrowings above a specified base from foreign banks by domestic offices

of a member bank. For details concerning these requirements, see Regulations D and M and appropriate supplements and amendments thereto.

5 Effective Jan. 5, 1967, time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits.

6 See preceding columns for earliest effective date of this rate.

7 Implementation of amendments to Regulation D to restructure member bank reserve requirements has been postponed. See p. 679 of the July 1972 BULLETIN and p. 942 of this issue.

Note.—All required reserves were held on deposit with F.R. Banks June 21, 1917, until Dec. 1959. From Dec. 1959 to Nov. 1960, member banks were allowed to count part of their currency and coin as reserves; effective Nov. 24, 1960, they were allowed to count all as reserves. For further details, see Board's Annual Reports.

#### MARGIN REQUIREMENTS

date	date	Т	U	G	T	U	G	(т)
1937—Nov. 1 1945—Feb. 5 1946—Jan. 21 1947—Feb. 1 1949—Mar. 30 1951—Jan. 17 1953—Feb. 20 1955—Jan. 4 Apr. 23 1958—Jan. 16 Aug. 5 Oct. 16 1962—July 28 1962—July 28 1962—July 10 1963—Nov. 6	1945—Feb. 4	1	40 40 75 75 75 75 75 75 70 70 70 70 70 70					50 50 75 100 75 50 75 50 60 70 50 70 90 70
1968—Mar. 11 June 8 1970—May 6 Effective I	June 7		70 80 65 55	<u>-</u>		50 60 50 50		70 80 65 55

Note.—Regulations G, T, and U, prescribed in accordance with the Securities Exchange Act of 1934, limit the amount of credit to purchase and carry margin stocks that may be extended on securities as collateral by prescribing a maximum loan value, which is a specified percentage of the market value of the collateral at the time the credit is extended; margin requirements are the difference between the market value (100 per cent) and the maximum loan value. The term margin stocks is defined in the corresponding regulation. Regulation G and special margin requirements for bonds convertible into stocks were adopted by the Board of Governors effective Mar. 11, 1968.

#### MAXIMUM INTEREST RATES PAYABLE ON TIME AND SAVINGS DEPOSITS

(Per cent per annum)

Rates Jan.	1, 1962-	July 19, 19	66		Rates be	ginning Ju	ly 20, 1966		
		Effecti	ve date				Effectiv	ve date	-
Type of deposit	Jan. 1, 1962	July 17, 1963	Nov. 24, 1964	Dec. 6, 1965	Type of deposit	July 20, 1966	Sept. 26, 1966	Apr. 19, 1968	Jan. 21, 1970
Savings deposits; 1 12 months or more Less than 12 months	31/2	4 31/2	} 4	4	Savings deposits		4 4 5	4 4 5	41/2 41/2 5 51/4
Other time deposits: 2 12 months or more 6 months to 12 months 90 days to 6 months Less than 90 days (30-89 days)	4 31/4 21/2	} 4	41/2	51/2	2 years and over. Single-maturity: Less than \$100,000; 30 days to 1 year. 1 year to 2 years 2 years and over. \$100,000 and over: 30-99 days. 60-89 days. 90-179 days. 180 days to 1 year. 1 year or more.	51/2	5 51/2	5 51/4 51/4 61/4	51/4 51/4 5 51/4 5 51/4 61/4 7 7/4

60-89 days. Effective June 24, 1970, maximum interest rates on these maturities were suspended until further notice.

NOTE.—Maximum rates that may be paid by member banks are established by the Board of Governors under provisions of Regulation Q; however, a member bank may not pay a rate in excess of the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Beginning Feb. 1, 1936, maximum rates that may be paid by nonmember insured commercial banks, as established by the FDIC, have been the same as those in effect for member banks.

<sup>&</sup>lt;sup>1</sup> Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.

Note.--Averages of daily figures, close of business.

<sup>1</sup> Closing date for the Postal Savings System was Mar. 28, 1966. Maximum rates on postal savings accounts coincided with those on savings deposits.

2 For exceptions with respect to certain foreign time deposits, see BULLETINS for Oct. 1962, p. 1279; Aug. 1965, p. 1084; and Feb. 1968, p. 167.

3 Multiple-maturity time deposits include deposits that are automatically renewable at maturity without action by the depositor and deposits that are payable after written notice of withdrawal.

4 The rates in effect beginning Jan. 21 through June 23, 1970, were 614 per cent on maturities of 30-59 days and 61/2 per cent on maturities of

<sup>&</sup>lt;sup>1</sup> Outside Treasury and F.R. Banks. Includes any paper currency held outside the United States and currency and coin held by banks. Estimated totals for Wed, dates shown in table on p. A-5.

<sup>2</sup> Consists of credits payable in gold certificates, the Gold Certificate Fund—Board of Governors, FRS.

<sup>3</sup> Redeemable from the general fund of the Treasury.

<sup>&</sup>lt;sup>2</sup> Paper currency only; \$1 silver coins reported under coin,

<sup>&</sup>lt;sup>4</sup> Does not include all items shown, as gold certificates are secured by gold. Duplications are shown in parentheses.

NOTE.—Prepared from Statement of United States Currency and Coin and other data furnished by the Treasury. For explanation of currency reserves and security features, see the Circulation Statement or the Aug. 1961 Bulletin, p. 336.

<sup>&</sup>lt;sup>1</sup> Includes, in addition to currency and demand deposits, savings deposits, time deposits open account, and time certificates of deposits other than negotiable time certificates of deposit issued in denominations of \$100,000 or more by large weekly reporting commercial banks.

<sup>2</sup> Includes M<sub>2</sub>, plus the average of the beginning and end of month deposits of mutual savings banks and savings and loan shares.

<sup>3</sup> Negotiable time certificates of deposit issued in denominations of \$100,000 or more by large weekly reporting commercial banks.

<sup>4</sup> Average of the beginning and end-of-month deposits of mutual savings banks and savings and loan shares.

<sup>5</sup> At all commercial banks.

Note.—For description of revised series and for back data, see pp. 880-93 of the November Bulletin.

Average of daily figures. Money stock consists of (1) demand deposits at all commercial banks other than those due to domestic commercial banks and the U.S. Govt., less cash items in process of collection and F.R. float; (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, F.R. Banks, and vaults of all commercial banks. Time deposits adjusted are time deposits at all commercial banks other than those due to domestic commercial banks and the U.S. Govt.

<sup>1</sup> Averages of daily figures. Member bank reserve series reflects actual Averages of daily figures. Member bank reserve series reflects actual reserve requirement percentages with no adjustment to eliminate the effect of changes in Regulations D and M. Required reserves were increased by \$660 million effective Apr. 16, 1969, and \$400 million, effective Oct. 16, 1969. Required reserves were reduced by \$500 million (net) effective Oct. 1, 1970.
Reserves available to support private nonbank deposits are defined as (1) required reserves for (a) private demand deposits, (b) total time and savings deposits, and (c) nondeposit sources subject to reserve requirements, and (2) excess reserves. This series excludes required reserves for net interbank and U.S. Govt. demand deposits.
<sup>3</sup> Averages of daily figures. Deposits subject to reserve requirements include total time and savings deposits and net demand deposits as defined by Regulation D. Private demand deposits include all demand deposits

except those due to the U.S. Govt., less cash items in process of collection and demand balances due from domestic commercial banks. Data for 1968 are not comparable with later data due to the withdrawal from the System on Jan. 2, 1969, of a large member bank.

4 Total member bank deposits subject to reserve requirements, plus Euro-dollar borrowings, bank-related commercial paper, and certain other nondeposit lems. This series for deposits is referred to as "the adjusted bank credit proxy."

Note.—Due to changes in Regulations M and D, member bank reserves include reserves held against nondeposit funds beginning Oct. 16, 1969. Back data may be obtained from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

<sup>1</sup> Adjusted to exclude domestic commercial interbank loans.

<sup>2</sup> Beginning June 30, 1971, Farmers Home Administration insured notes totaling approximately \$700 million are included in "Other securities" rather than in "Loans."

<sup>3</sup> Loans sold outright by commercial banks to own subsidiaries, foreign branches, holding companies, and other affiliates.

<sup>4</sup> Beginning June 30, 1969, data revised to include all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries; earlier data include commercial banks only. Also, loans and investments are now reported gross, without valuation reserves deducted, rather than net of valuation reserves as was done previously. For a description of the revision, see Aug. 1969 BULLETIN, pp. 642-46, Data shown in this table beginning January 1959 have been revised to include valuation reserves.

5 Beginning June 30, 1972, commercial and industrial toans were reduced by about \$400 million as a result of loan reclassifications at one large bank.

Note.—For monthly data on total loans and investments 1959-70, see Dec. 1971 BULLETIN, pp. 974-75. For monthly data, 1948-58, see Aug. 1968 BULLETIN, pp. A-94-A-97. For a description of the seasonally adjusted series see the following Bulletins: July 1962, pp. 797-802; July 1966, pp. 950-55; Sept. 1967, pp. 1511-17; and Dec. 1971, pp. 971-73. For monthly data on commercial and industrial loans, 1959-71, see July 1972 BULLETIN, p. A-109. For description of series, see July 1972 BULLETIN, p. 683. Data are for last Wednesday of month except for June 30 and Dec. 31; data are partly or wholly estimated except when June 30 and Dec. 31 are call dates.

Note.—For back figures and descriptions of the consolidated condition statement and the seasonally adjusted series on currency outside banks and demand deposits adjusted, see "Banks and the Monetary System," Section of Supplement to Banking and Monetary Statistics, 1962, and BULLETINS for Jan. 1948 and Feb. 1960. Except on call dates, figures are partly estimated and are rounded to the nearest \$100 million.

For description of substantive changes in official call reports of condition beginning June 1969, see BULLETIN for Aug. 1969, pp. 642—46.

l Includes Special Drawing Rights certificates beginning Jan. 1970.

Beginning with data for June 30, 1966, about \$1.1 billion in "Deposits accumulated for payment of personal loans" were excluded from "Time deposits" and deducted from "Loans" at all commercial banks. These changes resulted from a change in Federal Reserve regulations. See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. A-32.

See footnote 1 on p. A-23.

3 After June 30, 1967, Postal Savings System accounts were eliminated from this Statement.

4 See second paragraph of note 2.

5 Figures for this and later dates take into account the following changes (beginning June 30, 1969) for commercial banks: (1) inclusion of consolidated reports (including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis—that is, before deduction of valuation reserves, See also note 1.

6 Series began in 1946; data are available only for last Wed, of month.

7 Other than interbank and U.S. Govt., less cash items in process of collection,

See first paragraph of note 2.
9 Includes relatively small amounts of demand deposits. Beginning with June 1961, also includes certain accounts previously classified as other liabilities.

<sup>10</sup> Reclassification of deposits of foreign central banks in May 1961 reduced this item by \$1,900 million (\$1,500 million to time deposits and \$400 million to demand deposits).

l Beginning June 30, 1966, loans to farmers directly guaranteed by CCC were reclassified as securities, and Export-Import Bank portfolio fund participations were reclassified from loans to securities. This reduced Total loans and increased "Other securities" by about \$1 billion. Total loans include Federal funds sold, and beginning with June 1967 securities purchased under resale agreements, figures for which are included in "Federal funds sold, etc.," on p. A-24.

Beginning June 30, 1971, Farmers Home Administration notes are classified as "Other securities" rather than "Loans." As a result of this change, approximately \$300 million was transferred to "Other securities" for the period ending June 30, 1971, for all commercial banks.

See also table (and notes) at the bottom of p. A-32.

2 See first two paragraphs of note 1.

3 Reciprocal balances excluded beginning with 1942.

4 Includes items not shown separately. See also note 1.

5 See last paragraph of note 1.

6 Beginning with Dec. 31, 1947, the series was revised; for description, see note 4, p. 587, May 1964 BULLETIN.

7 Figure takes into account the following changes beginning June 30, 1969; (1) inclusion of consolidated reports (including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis—that is, before deduction of valuation reserves—rather than net as previously reported.

p. 993. For various changes between reserve city and country status in 1960-63, see note 6, p. 587, May 1964 BULLETIN.

9 Beginning May 6, 1972, two New York City country banks, with deposits of \$1,412 million, merged and were reclassified as a reserve city

Note.—Data are for all commercial banks in the United States (including Alaska and Hawaii, beginning with 1959). Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; and nondeposit trust companies.

For the period June 1941-June 1962 member banks include mutual savings banks as follows: three before Jan. 1960, two through Dec. 1960, and one through June 1962. Those banks are not included in insured commercial banks.

commercial banks.

Beginning June 30, 1969, commercial banks and member banks exclude a small national bank in the Virgin Islands; also, member banks exclude, and noninsured commercial banks include, through June 30, 1970, a small member bank engaged exclusively in trust business.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

Data for national banks for Dec. 31, 1965, have been adjusted to make them comparable with State bank data.

Figures are partly estimated except on call dates.

For revisions in veries before June 30, 1947, see July 1947 Bulletin, pp. 870-71.

1969—Dec. 31 10 1971—Dec. 31 . 1972—June 30 .	85,115 111,674 120,510	2,572 4,581 5,037	51,111 64,830 71,319	12,348 17,046 18,743	4,141 5,187 5,686	329 398 348	741 492 535	231 468 521	1,028 1,213 1,249	16,813 20,509 22,711	14,868 18,675 20,640	612 842 886	14,875 17,297 16,550				11,956 17,176 18,820	4,600 7,790 8,782

<sup>1</sup> Beginning with June 30, 1948, figures for various loan items are shown gross (i.e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown not. See also note 10.

2 Includes securities purchased under resale agreements. Prior to June 30, 1967, they were included in loans—for the most part in loans to "Banks." Prior to Dec. 1965, Federal funds sold were included with "Total" loans and loans to "Banks."

3 See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. A-32.

<sup>4</sup> Breakdowns of loan, investment, and deposit classifications are not available before 1947; summary figures for 1941 and 1945 appear in the table on pp. A-20—A-23.

<sup>5</sup> Beginning with June 30, 1966, loans to farmers directly guaranteed by CCC were reclassified as "Other securities," and Export-Import Bank portfolio fund participations were reclassified from loans to "Other securities." This increased "Other securities" by about \$1 billion.

<sup>6</sup> Beginning with Dec. 31, 1965, components shown at par rather than at book value; they do not add to the total (shown at book value) and are not entirely comparable with prior figures. See also note 10.

For other notes see opposite page.

<sup>7</sup> Beginning with 1942, excludes reciprocal bank balances.

8 Through 1960 demand deposits other than interbank and U.S.
Govt., less cash items in process of collection; beginning with 1961, demand deposits other than domestic commercial interbank and U.S.
Govt., less cash items in process of collection.

9 For reclassification of certain deposits in 1961, see note 6, p. 589,
May 1964 BULLETIN.

10 Beginning June 30, 1969, reflects (1) inclusion of consolidated reports (including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis—that is, before deduction of valuation reserves. See also notes 1 and 6.

Note.—Data are for all commercial banks in the United States; member banks in U.S. possessions were included through 1968 and then excluded. For the period June 1941—June 1962 member banks include mutual savings banks as follows: three before Jan. 1960, two through Dec. 1960, and one through June 1962. Those banks are not included in all insured or total banks.

A small noninsured member bank engaged exclusively in trust business is treated as a noninsured bank and not as a member bank for the period June 30, 1969—June 30, 1970.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

For other notes see opposite page.

Total loans	31,468			30,769	<u></u>					699	-460	-692	-457	-1,152

Note.—About 160 weekly reporting banks are included in this series; these banks classify, by industry, commercial and industrial loans amounting to about 90 per cent of such loans held by all weekly reporting banks and about 70 per cent of those held by all commercial banks.

For description of series see article "Revised Series on Commercial and Industrial Loans by Industry," Feb. 1967 BULLETIN, p. 209.

Commercial and industrial "term" loans are all outstanding loans with an original maturity of more than I year and all outstanding loans granted under a formal agreement—revolving credit or standby—on which the original maturity of the commitment was in excess of I year.

<sup>1</sup> Averages of the most representative daily offering rate quoted by dealers.
2 Averages of the most representative daily offering rate published by finance companies, for varying maturities in the 90-179 day range.
3 Soven-day average for week ending Wednesday.
4 Except for new bill issues, yields are averages computed from daily closing bid prices.

<sup>5</sup> Bills quoted on bank discount rate basis.
6 Beginning in this BULLETIN, these series have been revised to include the new bill issue the day following the auction, as trading begins on a when-issued basis.
7 Certificates and selected note and hond issues.
8 Selected note and bond issues.

<sup>1</sup> Includes bonds rated Aa and A, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat. As of Dec. 23, 1967, there is no longer an Aas-rated railroad bond series.

2 Number of issues varies over time; figures shown reflect most recent

Note.—Annual yields are averages of monthly or quarterly data. Bonds: Monthly and weekly yields are computed as follows: (1) U.S. Govi.: Averages of daily figures for bonds maturing or callable in 10 years or more. (2) State and local govi.: General obligations only, based on

Thurs, figures. (3) Corporate: New-issue Aaa utility rates are weekly averages compiled by the Board of Governors of the Federal Reserve System. Rates for seasoned issues are averages of daily figures from Moody's In-

Rates for seasoned tables and Poor's corporate series. Dividend/price ratios Stocks: Standard and Poor's corporate series. Dividend/price ratios Stocks: are based on Wed. figures; earnings/price ratios are as of end of period. Preferred stock ratio is based on eight median yields for a sample of non-callable issues—12 industrial and two public utility; common stock ratios on the 500 stocks in the price index. Quarterly earnings are seasonally editated angula ratio. adjusted at annual rates,

## Notes to tables on opposite page:

#### Security Prices:

<sup>1</sup> Begins June 30, 1965, at 10.90. On that day the average price of a share of stock listed on the American Stock Exchange was \$10.90.

Note.—Annual data are averages of monthly figures. Monthly and weekly data are averages of daily figures unless otherwise noted and are computed as follows: U.S. Gov. bonds, derived from average market yields in table on preceding page on basis of an assumed 3 per cent, 20-year bond. Municipal and corporate bonds, derived from average yields as computed by Standard and Poor's Corp., on basis of a 4 per cent, 20-year bond; Wed. closing prices. Common stocks, derived from component common stock prices. Average daily volume of trading, normally conducted 5 days per week for 5½ hours per day, or 27½ hours per week. In recent years shorter days and/or weeks have cut total weekly trading to the following number of hours: 1967—Aug. 8-20, 20; 1968—Jan. 22-Mar. 1, 20; June 30-Dec. 31, 22; 1969—Jan. 3-July 3, 20; July 7-Dec. 31-22.5; 1970—Jan. 2-May 1, 25.

#### Terms on Mortgages:

t Fees and charges—related to principal mortgage amount—include loan commissions, fees, discounts, and other charges, which provide added income to the lender and are paid by the borrower. They exclude any closing costs related solely to transfer of property ownership.

Note.—Compiled by Federal Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation. Data are weighted averages based on probability sample survey of characteristics of mortgages originated by major institutional lender groups (including mortgage companies) for purchase of single-family homes. Data exclude loans for refinancing, reconditioning, or modernization; construction loans to homebuliders; and permanent loans that are coupled with construction loans to owner-builders. Series beginning 1965, not strictly comparable with earlier data. See also the table on Home-Mortgage Yields, p. A-55.

¹ Margin credit includes all credit extended to purchase or carry stocks or related equity instruments and secured at least in part by stock (see Dec. 1970 BULETIN). Credit extended by brockers is end-of-month data for member firms of the NYSE. June data for banks are universe totals; all other data for banks represent estimates for all commercial banks based on reports by a reporting sample, which accounted for 60 per cent of security credit outstanding at banks on June 30, 1971.

¹ In addition to assigning a current loan value to margin stock generally, Regulations T and U permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.

- 3 Nonmargin stocks are those not listed on a national securities exchange and not included on the Board of Governors of the Federal Reserve System's list of OTC margin stocks. At banks, loans to purchase or carry nonmargin stocks are unregulated; at brokers, such stocks have no loan
- value.

  4 Includes loans to purchase or carry margin stock if these are unsecured or secured entirely by unrestricted collateral (see Dec. 1970 Bulletin).

  5 Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

#### **EQUITY STATUS OF MARGIN ACCOUNT DEBT** AT BROKERS

(Per cent of total debt, except as noted)

	Total debt		Eq	uity clas	s (per cor	nt)

<sup>&</sup>lt;sup>1</sup> Issues of foreign governments and their subdivisions and bonds of the International Bank for Reconstruction and Development,

NOTE.—Institute of Life Insurance estimates for all life insurance companies in the United States.

Figures are annual statement asset values, with bonds carried on an amortized basis and stocks at year-end market value. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately but are included in total, in "Other assets."

<sup>&</sup>lt;sup>1</sup> Also includes securities of foreign governments and international organizations and nonguaranteed issues of U.S. Govt, agencies.

<sup>2</sup> See note 8, p. A-19.

<sup>3</sup> Commitments outstanding of banks in New York State as reported to the Savings Banks Assn. of the State of New York. Data include building loans beginning with Aug. 1967.

<sup>4</sup> Balance sheet data beginning Jan. 1972 are reported on a gross of valuation reserves basis. The data differ somewhat from balance sheet

<sup>&</sup>lt;sup>1</sup> U.S. Govt. securities only through 1967. Beginning 1968 the total flects liquid assets and other investment securities. Included are U.S. Govt. obligations, Federal agency securities, State and local govt. securities, time deposits at banks, and miscellaneous securities, except FHLBB stock. Compensating changes have been made in "Other assets."

<sup>2</sup> Includes other losas, stock in the Federal home losan banks, other investments, real estate owned and sold on contract, and office buildings and fixtures. See also note 1.

<sup>3</sup> Consists of advances from FHLBB and other borrowing.

<sup>4</sup> Insured savings and losan assas, only. Data on outstanding commit-

ments are comparable with those shown for mutual savings banks (on preceding page) except that figures for loans in process are not included above but are included in the figures for mutual savings banks.

5 Balance sheet data for all operating savings and loan associations were revised by the Federal Home Loan Bank Board for 1969 and 1970.

Notr.—Federal Home Loan Bank Board data; figures are estimates for all savings and loan assns. in the United States. Data are based on monthly reports of insured assns, and annual reports of noninsured assns. Data for current and preceding year are preliminary even when revised.

NOTE.—Half years may not add to fiscal year totals due to revisions in series which are not yet available on a monthly basis.

<sup>&</sup>lt;sup>1</sup> Equals net expenditures plus net lending.

<sup>2</sup> The decrease in Federal securities resulting from conversion to private ownership of Govt, sponsored corporations (totaling \$9,853 million) is not included here. In the bottom panel, however, these conversions decrease the outstanding amounts of Federal securities held by the public mainly by reductions in agency securities. The Federal National Mortgage Association (FNMA) was converted to private owership in Sept, 1968 and the Federal intermediate credit banks (FICB) and banks for cooperatives in Dec. 1968.

<sup>3</sup> Represents non-interest-bearing public debt securities issued to the International Monetary Fund and international lending organizations. New obligations to these agencies are handled by letters of credit.

<sup>4</sup> Includes accrued interest payable on public debt securities, deposit funds, miscellaneous liability and asset accounts, and seigniorage.

3 As of Jan. 3, 1972, the Treasury operating balance was redefined to exclude the gold balance and to include previously excluded "Other depositaries" (deposits in certain commercial depositaries that have been converted from a time to a demand basis to permit greater flexibility in Treasury cash management).

5 Includes debt of Federal home loan banks, Federal land banks, R.F.K. Stadium Fund, FNMA (beginning Sept. 1968), FICB, and banks for cooperatives (beginning Dec. 1968).

NOTE,—Half years may not add to fiscal year totals due to revisions in series which are not yet available on a monthly basis.

<sup>Old-age, disability, and hospital insurance, and Railroad Retirement accounts.
Supplementary medical insurance premiums and Federal employee retirement contributions.
Deposits of earnings by Federal Reserve Banks and other miscellaneous receivers.</sup> 

Deposits of earnings by receipt Reserve Banks and other inscellaneous receipts.

4 Outlays by functional categories are published in the Monthly Treasury Statement (beginning April 1969). Monthly back data (beginning July 1968) are published in the Treasury Bulletin of June 1969.

5 Consists of government contributions for employee retirement and interest received by trust funds.

<sup>&</sup>lt;sup>6</sup> Estimates presented in the Jan. 1973 Budget Document. Breakdowns do not add to totals because special allowances for contingencies, Federal pay increase (excluding Department of Defense), and revenue sharing, totaling \$6,275 million for fiscal 1973, are not included.

<sup>7</sup> On June 5, 1972, the administration revised the Budget estimates—increasing total outlays to \$250.0 billion; revised figures for the functional breakdown are not available.

The debt and ownership concepts were altered beginning with the Mar. 1969 BULLETIN. The new concepts (1) exclude guaranteed securities and (2) remove from U.S. Govt. agencies and trust funds and add to other miscollaneous investors the holdings of certain Govt.-sponsored but privately owned agencies and certain Govt. deposit accounts.

<sup>1</sup> Includes non-interest-bearing debt (of which \$622 million on Sept. 30, 1972, was not subject to statutory debt limitation).

2 Includes Treasury bonds and minor amounts of Panama Canal and postal savings bonds.

3 Includes (not shown separately): depositary bonds, retirement plan bonds, foreign currency series, foreign series, and Rural Electrification Administration bonds; before 1954, Armed Forces leave bonds; before 1956, tax and savings notes; and before Oct. 1965, Series A investment bonds.

<sup>4</sup> Nonmarketable certificates of indebtedness, notes, and bonds in the Treasury foreign series and foreign currency series issues. 3 Held only by U.S. Govt, agencies and trust funds and the Federal home loan banks.

<sup>&</sup>lt;sup>1</sup> Consists of investments of foreign and international accounts in the United States.

<sup>2</sup> Consists of savings and loan assns., nonprofit institutions, corporate pension trust funds, and dealers and brokers. Also included are certain Govt. deposit accounts and Govt.-sponsored agencies.

Note.—Reported data for F.R. Banks and U.S. Govt. agencies and trust funds; Treasury estimates for other groups.

ketable issues held by groups, the proportion held on latest date by those reporting in the Survey and the number of owners surveyed were: (1) about 90 per cent by the 5,642 commercial banks, 484 mutual savings banks, and 739 insurance companies combined; (2) about 50 per cent by the 466 nonfinancial corporations and 486 savings and loan assns.; and (3) about 70 per cent by 505 State and local govts.

"All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

Note.—Direct public issues only. Based on Treasury Survey of Ownership.

Beginning with Dec. 1968, certain Govt.-sponsored but privately owned agencies and certain Govt. deposit accounts have been removed from U.S. Govt. agencies and trust funds and added to "All others." Comparable data are not available for earlier periods.

Data complete for U.S. Govt. agencies and trust funds and F.R. Banks but for other groups are based on Treasury Survey data. Of total mar-

Note.—The figures include all securities sold by dealers under repurchase contracts regardless of the maturity date of the contract, unless the contract is matched by a reverse repurchase (resale) agreement or delayed delivery sale with the same maturity and involving the same amount of securities. Included in the repurchase contracts are some that more clearly represent investments by the holders of the securities rather than dealer trading positions.

Average of daily figures based on number of trading days in the period.

<sup>&</sup>lt;sup>1</sup> Only bonds sold pursuant to 1949 Housing Act, which are secured by contract requiring the Housing Assistance Administration to make annual contributions to the local authority.

<sup>2</sup> Municipalities, counties, townships, school districts.

<sup>3</sup> Excludes U.S. Govt. loans. Based on date of delivery to purchaser and payment to issuer, which occurs after date of sale.

<sup>4</sup> Water, sewer, and other utilities.

<sup>&</sup>lt;sup>5</sup> Includes urban redevelopment loans.

NOTE.—The figures in the first column differ from those shown on the following page, which are based on Bond Buyer data. The principal difference is in the treatment of U.S. Govt. loans.

Investment Bankers Assn. data; par amounts of long-term issues based on date of sale unless otherwise indicated.

Components may not add to totals due to rounding.

NOTE.—Securities and Exchange Commission estimates of cash transactions only. As contrasted with data shown on opposite page, new issues

exclude foreign sales and include sales of securities held by affiliated com-panies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements are defined in the same way and also include securities retired with in-ternal funds or with proceeds of issues for that purpose.

<sup>&</sup>lt;sup>1</sup> Includes contractual and regular single purchase sales, voluntary and contractual accumulation plan sales, and reinvestment of investment income dividends; excludes reinvestment of realized capital gains dividends.
<sup>2</sup> Market value at end of period less current liabilities.

Excludes investment companies,
 Extractive and commercial and miscellaneous companies,
 Railroad and other transportation companies.

<sup>&</sup>lt;sup>3</sup> Cash and deposits, receivables, all U.S. Govt. securities, and other short-term debt securities, less current liabilities.

Note.—Investment Company Institute data based on reports of members, which comprise substantially all open-end investment companies registered with the Securities and Exchange Commission. Data reflect newly formed companies after their initial offering of securities.

<sup>&</sup>lt;sup>1</sup> Includes outstanding amount of VA vendee accounts held by private investors under repurchase agreement.

<sup>&</sup>lt;sup>1</sup> Commercial banks (including nondeposit trust companies but not trust depts.), mutual savings banks, life insurance companies, and savings and loan assns.

<sup>2</sup> U.S. agencles include former FNMA and, beginning fourth quarter 1968, new GNMA as well as FHA, VA, PHA, Farmers Home Admin., and in earlier years, RFC, HOLC, and FFMC. They also include U.S. sponsored agencies—new FNMA, Federal land banks, GNMA (Pools), and the FHLHC. Other U.S. agencies (amounts small or separate data not readily available) included with "individuals and others."

<sup>3</sup> Derived figures; includes debt held by Federal land banks and farm debt held by Farmers Home Admin.

<sup>4</sup> For multifamily and total residential properties, see tables below.

and loan assns.

6 Data by type of mortgage on nonfarm 1- to 4-family properties alone are shown in table below.

Note.—For total debt outstanding, figures are FHLBB and F.R. estimates. For conventional, figures are derived.

Based on data from FHLBB, Federal Housing Admin., and Veterans Admin.

Note.—Life Insurance Association of America data for new commitments of \$100,000 and over each on mortgages for multifamily and non-residential nonfarm properties located largely in the United States. The 15 companies account for a little more than one-half of both the total assets and the nonfarm mortgages held by all U.S. life insurance companies. Averages, which are based on number of loans, vary in part with loan composition by type and location of property, type and purpose of loan, and loan amortization and prepayment terms. Data for the following are

limited to cases where information was available or estimates could be made: capitalization rate (net stabilized property earnings divided by property value); abt coverage ratio (net stabilized earnings divided by debt service); and per cent constant (annual level payment, including principal and interest, per \$100 of debt). All statistics exclude construction loans, increases in existing loans in a company's portfolio, reapprovals, and loans secured by land only.

Note.—Average secondary market yields are gross—before deduction of 38 basis-point fee paid for mortgage servicing. They reflect the average accepted bid yield for home mortgages assuming a prepayment period of 12 years for 30-year loans, without special adjustment for FNMA commitment fees and FNMA stock purchase and holding requirements. Beginning Oct. 18, 1971, the maturity on new short-term commitments was extended from 3 to 4 months. Mortgage amounts offered by bidders are total eligible bids received.

### **GNMA MORTGAGE-BACKED SECURITY PROGRAM**

(In millions of dollars)

Note.—Government National Mortgage Assn. data. Under the Mortgage-Backed Security Program, GNMA guarantees the timely payment of principal and interest on both pass-through and bond-type securities, which are backed by a pool of mortgages insured by FHA or Farmers Home Admin. or guaranteed by VA and issued by an approved mortgagee. To date, bond-type securities have been issued only by FNMA and FHLMC.

Note.—Annual data are averages of monthly figures. The FHA data are based on opinion reports submitted by field offices on prevailing local conditions as of the first of the succeeding month. Yields on FHA-insured mortgages are derived from weighted averages of private secondary market prices for Sec. 203, 30-year mortgages with minimum downpayment and an assumed prepayment at the end of 15 years. Gaps in data are due to periods of adjustment to changes in maximum permissible contract interest rates. The FHA series on average contract interest rates on conventional first mortgages in primary markets are unweighted and are rounded to the nearest 5 basis points. The FHLBs effective rate series reflects fees and charges as well as contract rates (as shown in the table on conventional first-mortgage terms, p. A-37) and an assumed prepayment at end of 10 years.

Includes adjustments for differences in trading days.
 Net changes in credit outstanding are equal to extensions less repayments.

NOTE.—Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and

sales of instalment paper, and certain other transactions may increase the amount of extensions and repayments without affecting the amount outstanding.

For back figures and description of the data, see "Consumer Credit," Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965 BULLETIN for Dec. 1968, and pp. 882–98 of this BULLETIN.

<sup>&</sup>lt;sup>1</sup> Includes adjustments for differences in trading days.
<sup>2</sup> Net changes in credit outstanding are equal to extensions less repayments, except in certain months when data for extensions and repayments have been adjusted to eliminate duplication resulting from large transfers of paper. In those months the differences between extensions and repayments for some particular holders do not equal the changes in

their outstanding credit. Such transfers do not affect total instalment credit extended, repaid, or outstanding.

NOTE.—Other financial lenders include credit unions and miscellaneous lenders. See also NOTE to preceding table and footnote 1 at bottom of p. A-56.

<sup>1</sup> Employees only: excludes personnel in the Armed Forces, 2 Production workers only. 5 F.R. index based on Census Bureau figures. 4 Prices are not seasonally adjusted. Latest figure is final.

Note.—All series: Data are seasonally adjusted unless otherwise noted, Capacity utilization: Based on data from Federal Reserve, McGraw-Hill Economics Department, and Department of Commerce.

Construction contracts: F. W. Dodge Co. monthly index of dollar value of total construction contracts, including residential, nonresidential, and heavy engineering; does not include data for Alaska and Hawaii, Employment and payrolls: Based on Bureau of Labor Statistics data; includes data for Alaska and Hawaii beginning with 1959.

Prices: Bureau of Labor Statistics data.

## CONSTRUCTION CONTRACTS AND PRIVATE HOUSING PERMITS

(In millions of dollars, except as noted)

Type of ownership and	1970	1971			1971						19	72			
type of construction			Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.

By type of ownership: Public Private 1	23,362 45,058	24,183 56,408	2,299 5,413	2,010 4,804	1,837 4,731	1,960 4,445	1,696 4,590	2,137 4,097	1,634 3,973	1,686 5,598	1,741 6,359	2,574 6,524	2.517 5,960	2.528 5.538	2,466 6,409
By type of construction: Residential building 1 Nonresidential building Nonbuilding	24,910 24,180 18,489	35,226 26,577 20,509	2,120	2,246	2,064	3,001 2,128 1,274	1.959	1,728	1,799	3,617 2,187 1,480	2,182	4,428 2,908 1,762	2,447	3.864 2.461 1.741	
Private housing units authorized (In thousands, S.A., A.R.)	1,324	1,885	1,997	1,944	1,983	2,051	2,142	2,204	2,056	2,007	1,991	1,995	2,121	2,108	2,246

<sup>&</sup>lt;sup>1</sup> Because of improved collection procedures, data for 1-family homes beginning Jan. 1968 are not strictly comparable with those for earlier periods. To improve comparability, earlier levels may be raised by approximately 3 per cent for total and private construction, in each case, and by 8 per cent for residential building.

Note.—Dollar value of construction contracts as reported by the F. W. Dodge Co. does not include data for Alaska or Hawaii. Totals of monthly data exceed annual totals because adjustments—negative—are made into accumulated monthly data after original figures have been published. Private housing units authorized are Census Bureau series for 13,000 reporting areas with local building permit systems.

Note.—Starts are Census Bureau series (including farm starts) except for Govt.-underwritten, which are from Federal Housing Admin. and Veterans Admin. and represent units started, including rehabilitation

units under FHA, based on field office reports of first compliance inspec-tions. Data may not add to totals because of rounding.

Mobile home shipments are as reported by Mobile Homes Manufac-turers Assn.

<sup>&</sup>lt;sup>1</sup> Includes religious, codessions, 12.2 ings.

<sup>2</sup> Sewer and water, formerly shown separately, now included in "Other."

<sup>3</sup> Reginning July 1962, reflects inclusion of new series affecting most private nonresidential groups.

<sup>&</sup>lt;sup>4</sup> Beginning 1963, reflects inclusion of new series under "Public" (for State and local govt. activity only).

NOTE.—Census Bureau data, monthly series at seasonally adjusted annual rates.

Note.—Bureau of Labor Statistics; data include all full- and part-time employees who worked during, or received pay for, the pay pe-riod that includes the 12th of the month. Proprietors, self-employed

persons, domestic servants, unpaid family workers, and members of the Armed Forces are excluded. Beginning with 1969, series has been adjusted to Mar. 1970 benchmark.

<sup>&</sup>lt;sup>1</sup> Includes self-employed, unpaid family, and domestic service workers.

<sup>2</sup> Per cent of civilian labor force.

<sup>3</sup> Beginning 1967, data not strictly comparable with previous data.

Description of changes available from Bureau of Labor Statistics.

Capital outlays are totals for residential and nonresidential fixed capital, net change in inventories, and consumer durables, except outlays by financial business.
 Capital consumption includes amounts for consumer durables and excludes financial business capital consumption.
 Excess of net investment over net funds raised.

Note.—Capital outlays and capital consumption allowances reflect 1969-72 revisions published in the July 1972 issue of Survey of Current Business.

Funds raised by type and sector. Credit flows included here are the

net amounts raised by households, nonfinancial business, governments, and foreigners. All funds raised by financial sectors are excluded. U.S. Government budget issues (line 4) are loan participation certificates issued by CCC, Export-Import Bank, FNMA, and GNMA, together with security issues by FHA, Export-Import Bank, and TVA. Issues by federally sponsored credit agencies are excluded as borrowing by financial institutions. Such issues are in U.S. Government securities on p. A-73, line 11. Corporate share issues are net cash issues by nonfinancial and foreign corporations. Mortgages exclude loans in process, Open market paper is commercial paper issued by nonfinancial corporations plus bankers' acceptances.

U.S. payment of increases in its gold subscription to IMF, gold deposits by the IMF (see note i (b) to Table 4), and withdrawal of deposits. The first withdrawal (\$17 million) was made in Feb. 1972.

IMF sold to the United States a total of \$800 million of gold (\$200 million in 1956, and \$300 million in 1959 and in 1960) with the right of repurchase; proceeds from these sales invested by IMF in U.S. Govt. securities. IMF repurchased \$400 million in Sept. 1970 and the remaining \$400 million in Feb. 1972.

Payment to the IMF of \$259 million increase in U.S. gold subscription less gold deposits by the IMF.

## Notes to Table 5 on opposite page:

<sup>1</sup> Represents net IMF sales of gold to acquire U.S. dollars for use in IMF operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table 6).

<sup>2</sup> Positive figures represent purchases from the IMF of currencies of other members for equivalent amounts of dollars; negative figures represent repurchase of dollars, including dollars derived from charges on purchases and from other net dollar income of the IMF. The United States has a commitment to repurchase within 3 to 5 years, but only to the extent that the holdings of dollars of the IMF exceed 75 per cent of the U.S. quota, Purchases of dollars of other countries reduce the U.S. commitment to repurchase by an equivalent amount.

<sup>3</sup> Includes dollars obtained by countries other than the United States from sales of gold to the IMF.

from sales of gold to the IMF.

4 Represents the U.S. gold tranche position in the IMF (the U.S. quota minus the holdings of dollars of the IMF), which is the amount that the United States could purchase in foreign currencles automatically

if needed. Under appropriate conditions, the United States could purchase additional amounts equal to its quota.

Includes \$259 million gold subscription to the IMF in June 1965 for a U.S. quota increase, which became effective on Feb. 23, 1966. In figures published by the IMF from June 1965 through Jan. 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve notation.

scription was included in the U.S. gold stock and excluded from the reserve position.

5 Includes \$30 million of Special Drawing Rights.

7 Represents amount payable in dollars to the IMF to maintain the value of IMF holdings of U.S. dollars.

Note.—The initial U.S. quota in the IMF was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, to \$5,160 million in Feb. 1966, to \$6,700 million in Dec. 1970, and to \$7,274 million in May 1972 as a result of the change in par value of the U.S. dollar. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 per cent in gold and 75 per cent in dollars.

<sup>1</sup> Includes purchase from Denmark of \$25 million.
2 Includes purchase from Kuwait of \$25 million.
3 Includes sales to Algeria of \$150 million in 1967 and \$50 million in

<sup>1968.

\*</sup> Data for IMF include the U.S. payment of \$385 million increase in its gold subscription to the IMF and gold sold by the IMF to the United States in mitigation of U.S. sales to other countries making gold payments to the IMF. The country data include U.S. gold sales to various countries in connection with the IMF quota payments. Such U.S. sales to countries and resales to the United States by the IMF total \$548 million each, Includes IMF gold sales to and purchases from the United States,

### 4. U.S. RESERVE ASSETS

l Includes (a) gold sold to the United States by the International Monetary Fund with the right of repurchase, and (b) gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the IMF under quota increases. For corresponding liabilities, see Table 6.

2 Includes gold in Exchange Stabilization Fund.

3 The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions the United States could purchase additional amounts equal to the U.S. quota. See Table 5.

4 Includes allocations by the IMF of Special Drawing Rights as follows: \$867 million on Jan. 1, 1970; \$717 million on Jan. 1, 1971; and \$710 million on Jan. 1, 1972; plus net transactions in SDRs.

5 For holdings of F.R. Banks only, see pp. A-12 and A-13.

6 Reserve position includes, and gold stock excludes, \$259 million gold subscription to the IMF in June 1965 for a U.S. quota increase which

Note,—See Table 24 for gold held under earmark at F.R. Banks for foreign and international accounts, Gold under earmark is not included in the gold stock of the United States.

For notes see opposite page.

became effective on Feb. 23, 1966. In figures published by the IMF from June 1965 through Jan. 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

7 Includes gain of \$67 million resulting from revaluation of the German mark in Oct. 1969, of which \$13 million represents gain on mark holdings at time of revaluation.

8 Includes \$28 million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of Dec. 31, 1971.

9 Total reserve assets include an increase of \$1,016 million resulting from change in par value of the U.S. dollar on May 8, 1972; of which, total gold stock is \$828 million (Treasury gold stock \$822 million), reserve position in IMF \$33 million, and SDR's \$155 million.

<sup>1</sup> Includes (a) liability on gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the IMF under quota increases, and (b) U.S. Govt. obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the IMF to the United States to acquire income-earning assets.

2 Includes BIS and European Fund.

3 Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-63. Includes securities issued by corporations and other agencies of the U.S. Govt. which are guaranteed by the United States.

4 Includes nonguaranteed securities of U.S. Federally-sponsored agencies, beginning Feb. 1972.

3 Excludes notes issued to foreign official nonreserve agencies.

6 Includes abort-term liabilities payable in dollars to commercial banks abroad and to "other foreigners."

7 Includes marketable U.S. Govt. bonds and notes held by commercial banks abroad.

7 Includes marketable U.S. Govt. bonds and notes held by commercial banks abroad.

8 Principally the International Bank for Reconstruction and Development and the Inter-American and Asian Development Banks. From Dec. 1957 through Jan. 1972 includes difference between cost value and face value of securities in IMF gold investment account.

9 Includes total foreign holdings of U.S. Govt, bonds and notes, for which breakdown by type of holder is not available.

10 Not available.

11 Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on first line are comparable with those shown for the preceding date; figures on second line are comparable with those shown for the following date.
12 Includes \$10i million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969 as follows: liquid, \$17 million, and nonliquid, \$84 million.
13 Data on the second line differ from those on first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury securities payable in foreign currencies issued to official institutions of foreign countries have been increased in value to reflect market exchange rates as of Dec. 31, 1971.

Note.—Based on Treasury Dept, data and on data reported to the Treasury Dept, by banks and brokers in the United States. Data correspond generally to statistics following in this section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies, the inclusion of investments by foreign official reserve agencies in nongueranteed bonds of U.S. Pederally sponsored agencies and minor rounding differences. Table excludes IMF "holdings of dollars," and holdings of U.S. Treasury letters of credit and non-negotiable, non-interest-bearing special U.S. notes held by other international and regional organizations.

For notes see the following page.

l Includes Bank for International Settlements and European Fund.

Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.

See note 11 to Table 6.

Includes \$101 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969.

Data on second line differ from those on the first line because certain accounts previously classified as "Official institutions" are included in "Banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury liabilities payable in foreign currencies

<sup>1</sup> Data exclude "holdings of dollars" of the International Monetary

-"Short term" refers to obligations payable on demand or having Note.—"Short term" refers to obligations payable on demand or having an original maturity of 1 year or less. For data on long-term liabilities reported by banks, see Table 10. Data exclude the "holdings of dollars" of the International Monetary Fund; these obligations to the IMF constitute contingent liabilities, since they represent essentially the amount of dollars available for drawings from the IMF by other member countries. Data exclude also U.S. Treasury letters of credit and non-negotiable, non-interest-bearing special U.S. notes held by the Inter-American Development Bank and the International Development Association.

<sup>1</sup> Data exclude "holdings of dollars" of the International Monetary Fund.
2 Excludes negotiable time certificates of deposit, which are included in "Other."
3 Includes nonmarketable certificates of indebtedness issued to official institutions of foreign countries.
4 Principally bankers' acceptances, commercial paper, and negotiable time certificates of deposit. See also note 8(a).
5 U.S. Treasury bills and certificates obtained from proceeds of sales of sold by the IMF to the United States to acquire income-carning assets. Upon termination of investment, the same quantity of gold was reacquired by the IMF.
6 Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.
Includes difference between cost value and face value of securities in IMF gold investment account.
7 Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage with those shown for the preceding date; figures on the second line are comparable with those shown for the following date.

<sup>&</sup>lt;sup>a</sup> Data on second line differ from those on first line because (a) those liabilities of U.S. banks to their foreign branches and those liabilities of U.S. agencies and branches of foreign banks to their head offices and foreign branches, which were previously reported as deposits, are included in "Other short-term liabilities"; (b) certain accounts previously classified as "Official institutions" are included in "Banks"; and (c) a number of reporting banks are included in the series for the first time.

\*\*Poreign central banks and foreign central govts, and their agencies, and Bank for International Settlements and European Fund.

10 Excludes central banks, which are included in "Official institutions,"

Includes bonds issued in 1964 to the Government of Canada in connection with transactions under the Columbia River treaty. Amounts outstanding end of 1967 through Oct. 1968, \$114 million; Nov. 1968 through Sept. 1969, \$84 million; Cet. 1969 through Sept. 1970, \$54 million; and Oct. 1970 through Oct. 1971, \$24 million.
 Bonds issued to the Government of Italy in connection with military purchases in the United States.
 In addition, nonmarketable U.S. Treasury notes amounting to \$125

million equivalent were issued to a group of German commercial banks in June 1968. The dollar value of these notes was increased by \$10 million in Oct, 1969 and by \$18 million as of Dec. 31, 1971.

4 Includes an increase in dollar value of \$84 million resulting from revaluation of the German mark in Oct, 1969.

5 Includes \$106 million increase in dollar value of foreign currency obligations revalued to reflect market exchange rates as of Dec. 31, 1971.

# 20. FOREIGN CREDIT AND DEBIT BALANCES IN BROKERAGE ACCOUNTS

(Amounts outstanding; in millions of dollars)

End of period	Credit balances (due to foreigners)	Debit balances (due from foreigners)		
1969—Sept	467 434	297 278		
1970—Mar	334 291	220 182 203 281		
1971—Mar June Sept Dec	333	314 300 320 314		
1972—Mar	325 312	379 339		

NOTE.—Data represent the money credit balances and money debit balances appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

Notes to Tables 21a and 21b on following pages:

NOTE,-Components may not add to totals due to rounding.

For a given month, total assets may not equal total liabilities because some branches do not adjust the parent's equity in the branch to reflect unrealized paper profits and paper losses caused by changes in exchange rates, which are used to convert foreign currency values into equivalent dollar values.

<sup>&</sup>lt;sup>1</sup> Total assets and total liabilities payable in U.S. dollars amounted to \$9,373 million and \$9,468 million, respectively, on June 30, 1972.

<sup>1</sup> Effective Aug. 10, 1969, the French franc was devalued from 4.94 to 5.55 francs per U.S. dollar.

2 A new Argentine peac, equal to 100 old peacs, was introduced on Jan. 1, 1970. Since Apr. 6, 1971, the official exchange rate is set daily by the Government of Argentina. Average for Feb. 1-27, 1972.

3 On June 1, 1970, the Canadian Government announced that, for the time being, Canada will not maintain the exchange rate of the Canadian dollar within the margins required by IMF rules.

4 Effective May 9, 1971, the Austrian schilling was revalued to 24.75 per U.S. dollar.

5 Effective Oct. 26, 1969, the new par value of the German mark was set at 3.66 per U.S. dollar.

4 Effective May 10, 1971, the German mark and Netherlands guilder have been floated.

7 Effective May 10, 1971, the Swiss franc was revalued to 4.08 per U.S. dollar.

Effective Oct. 20, 1971, the Spanish pesets was revalued to 68.455 per U.S. dollar.
 Effective June 23, 1972, the U.K. pound was floated.
 Danish krone—Sept. 26, 1972, n.a.; Sept. 27 and 28 rates nominal.

Note.—Effective Aug. 16, 1971, the U.S. dollar convertibility to gold was suspended; as from that day foreign central banks did not have to support the dollar rate in order to keep it within IMF limits.

During December 1971, certain countries established central rates against the U.S. dollar in place of former IMF parities.

Averages of certified noon buying rates in New York for cable transfers. For description of rates and back data, see "International Finance," Section 15 of Supplement to Banking and Monstary Statistics, 1962.

Note.—Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt, securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations. Other rates for some of these countries follow:

Argentine—3 and 5 per cent for certain rural and industrial paper, depending on type of transaction;

Brazil—8 per cent for secured paper and 4 per cent for certain agricultural paper;

Brazil—8 per cent for secured paper and 4 per cent tor certain agricultural paper;

Chile—Various rates ranging from 1 per cent to 17 per cent; 20 per cent for loans to make up reserve deficiencies.

Colombia—5 per cent for warehouse receipts covering approved lists of products, 6 and 7 per cent for agricultural bonds, and 12 and 18 per cent for rediscounts in excess of an individual bank's quota;

Costa Rica—5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper);

Ecuador—5 per cent for special advances and for bank acceptances for agricultural purposes, 7 per cent for bank acceptances for industrial purposes, and 10 per cent for advances to cover shortages in legal reserves;

Ethiopia—5 per cent for export paper and 6 per cent for Treasury bills.

Honduras—Rate shown is for advances only.
Indonesia—Various rates depending on type of paper, collateral, com-

Monduras—Rate snown is for advances only.

Indonesia—Various rates depending on type of paper, collateral, commodity involved, etc.;

Japan—Penalty rates (exceeding the basic rate shown) for borrowings from the central bank in excess of an individual bank's quota;

Morocco—Various rates from 3 per cent to 4.6 per cent depending on type of paper, maturity, collateral, guarantee, etc.

Peru—3.5, 5, and 7 per cent for small credits to agricultural or fish production, import substitution industries and manufacture of exports; 8 per cent for other agricultural, industrial and mining paper;

Philippines—6 per cent for financing the production, importation, and distribution of rice and corn and 7.75 per cent for credits to enterprises engaged in export activities. Preferential rates are also granted on credits to rural banks; and

Vensuela—2 per cent for rediscounts of certain agriculture paper, 4½ per cent for advances against government bonds, and 5½ per cent for rediscounts of certain industrial paper and on advances against promissory notes or securities of first-class Venezuelan companies.

Vietnam—10 per cent for export paper; treasury bonds are rediscounted at a rate 4 percentage points above the rate carried by the bond; and there is a penalty rate of 24 per cent for banks whose loans exceed quantitative ceilings.

Based on average yield of weekly tenders during month.
 Based on weekly averages of daily closing rates.
 Data for 1968 through Sept. 1971 are for bankers' acceptances, 3 months.
 Data for 1968 through Sept. 1971 are for bankers' allowance on

deposits.

<sup>5</sup> Rate shown is on private securities.
6 Rate in effect at end of month.
7 Monthly averages based on delly quotations.
8 Bill rates in table are buying rates for prime paper.

Note.—Treasury bills: All rates are on the latest issue of 91-day bills. U.S. and Canadian rates are market offer rates 11 a.m. Friday; U.K. rates are Friday opening market offer rates in London.

Premium or discount on forward pound and on forward Canadian dollar: Rates per annum computed on basis of midpoint quotations (between bid and offer) at 11 a.m. Friday in New York for both spot and forward pound sterling and for both spot and forward Canadian dollars.

All series: Based on quotations reported to F.R. Bank of New York by market sources.

For description of series and for back figures, see Oct. 1964 BULLETIN, pp. 1241-60. For description of adjustments to U.K. and Canadian Treasury bill rates, see notes to Table 1, p. 1257, and to Table 2, p. 1260, Oct. 1964 BULLETIN.
