417 *RECENT CHANGES TO A MEASURE OF U.S. HOUSEHOLD DEBT SERVICE*

Changes in levels of aggregate household debt in the United States may contain information about the current state of the nation's economy and may affect its future direction. A commonly used measure of household indebtedness is the household debt service ratio (formerly known as the household debt service burden), published since 1980 by the Board of Governors of the Federal Reserve System. Recent changes in financial markets have prompted a comprehensive revision of this statistic. This article describes the revision and introduces a new measure, the financial obligations ratio, which adds recurring obligations—rent, auto leases, homeowners' insurance, and property taxes—to the traditional calculation of the debt service ratio. In total, these revisions change the level of the debt service ratio but do not substantively alter its trajectory over time.

The article also presents separate estimates of the financial obligations ratio for homeowners and renters. The ratio for homeowners, which may summarize the effects of the recent refinancing boom on the financial obligations of homeowners, has risen gradually over the past decade; the ratio for renters has risen more steeply. The flat contour of the homeowner ratio in recent quarters suggests that homeowners may have rebalanced their portfolios toward lower-cost mortgage debt during the recent period of economic weakness.

Recent Changes to a Measure of U.S. Household Debt Service

Karen Dynan, Kathleen Johnson, and Karen Pence, of the Board's Division of Research and Statistics, prepared this article. David Brown provided research assistance.

Changes in aggregate household debt in the United States may contain information about the current state of the economy and may influence its future path. When a large share of household income is devoted to debt repayment, households have fewer funds available to purchase goods and services. Households with high debt levels relative to income are also more likely to default on their obligations when they suffer an unanticipated misfortune such as job loss or illness. Thus, when household debt ratios are high and unemployment is rising, lenders may respond to the expected increase in defaults by limiting the availability of credit; this dynamic may further weigh on spending.

An often-used summary measure of household debt is the household debt service ratio (formerly known as the household debt service burden), which the Board of Governors of the Federal Reserve System first published in 1980.¹ This measure, which is intended to capture the share of household after-tax income obligated to debt repayment, is calculated as the ratio of aggregate required debt payments (interest and principal) to aggregate after-tax income.

Changes in the structure and sophistication of financial markets in the past several years appear to have affected household debt service ratios. In the residential mortgage market, lenders have developed products that have broadened the base of household debt by enabling borrowers with impaired credit or limited funds for a down payment to purchase homes. Advances in home equity lending have enabled borrowers to extract equity more easily from their homes through a home equity line of credit or a cash-out refinancing. In the auto finance market, more drivers than in the past are leasing their cars instead of

purchasing them, while in the education finance market, market share has shifted from commercial bank loans to government-financed student loans.

Because of such changes in financial markets, Federal Reserve staff undertook a major revision of the debt service ratio (DSR), which had last been revised in 1999. In the current revision, the staff had three goals. The first was to evaluate and update the data sources and the methods used to calculate the DSR. The second was to create a broader measure of household liabilities, the financial obligations ratio (FOR), which added recurring obligations—rent, auto leases, homeowners' insurance, and property taxes—that had not traditionally been included in the calculation of the DSR. The third goal was to analyze the effect of recent mortgage market changes on the debt of homeowners by creating estimates of the FOR for homeowners and renters. The results of these revisions are presented in this article.

Interpretation of the DSR and these revisions is subject to several caveats. First, the DSR is a ratio of minimum debt payments, not total debt, to income. Required monthly payments can differ on loans of the same dollar amount because of differences in maturities and interest rates. Second, the measure is a ratio of two aggregate numbers. This measure expresses the debt service obligations of the population as a whole but not necessarily the obligations of the typical household.² Third, what the DSR indicates about the economy is not straightforward because it does not incorporate the intentions or expectations of borrowers. Some households may increase their ratios by borrowing more because they are appropriately optimistic about their future income prospects and their corresponding ability to repay debt. Other households may increase their ratios because they have suffered an unanticipated misfortune that necessitates borrowing to cover their extra expenses. An

1. See Charles Luckett, "Recent Financial Behavior of Households," *Federal Reserve Bulletin*, vol. 66 (June 1980), pp. 437–43, for more details. The data for the revised debt service ratio discussed in this article are available at www.federalreserve.gov/releases/housedebt/default.htm.

2. The Survey of Consumer Finances releases an estimate every three years of the median household debt service ratio, which can be interpreted as the debt service ratio of a typical household that has debt. This measure fell from 18.1 percent of income in 1998 to 16.0 percent in 2001. See Ana M. Aizcorbe, Arthur B. Kennickell, and Kevin B. Moore, "Recent Changes in U.S. Family Finances: Evidence from the 1998 and 2001 Survey of Consumer Finances," *Federal Reserve Bulletin*, vol. 89 (January 2003), pp. 1–32, for more details.

increase in the DSR indicates good news for the economy in the first example and bad news in the second.

UPDATING SOURCES OF DATA FOR THE DSR

Recent developments in credit markets necessitated changing some sources of the data used to calculate the DSR. Commercial banks' changing role in household credit markets led to replacing a bank-level survey with a household-level survey as the source for the distribution of loan types. In the process of revision, members of the Board staff re-evaluated and updated the data sources for loan maturities and interest rates. Also, changes in the student loan market led to using new sources of data for student loans.

Using a New Source of Nonauto, Nonrevolving Debt Shares

In the calculation of the DSR, aggregate nonauto, nonrevolving debt is split into its component parts—student loans, mobile-home loans, recreational vehicle (RV) and marine loans, and personal loans—because these loans have different interest rates and maturities and so have different amounts of debt service associated with a given increase in debt.³ In the past, the aggregate was split with shares estimated from the American Bankers Association survey of banks. However, the role of commercial banks in household credit markets has changed, and we

3. Revolving debt arises from retail credit extended on the basis of a credit line and from the sale of services and consumer goods other than passenger cars and mobile homes. A single contract governs multiple use of the account, and purchases may be made with a credit card. Generally, credit extensions can be made at the consumer's discretion, provided that they do not cause the outstanding balance of the account to exceed a prearranged credit limit.

Nonrevolving debt comprises all other loans not included in revolving credit that are unsecured or are secured by collateral other than real estate.

have become less confident that banks' distribution of loan types represents the distribution for the credit market as a whole.

One example of the changing role of commercial banks in household credit markets is the student loan market. From 1983 to 2001, student loans as a share of commercial banks' nonauto, nonrevolving loan portfolio—the previous basis for our estimates—declined from 30 percent to 12 percent (table 1). Over the same period, student loans as a share of households' nonauto, nonrevolving debt—the revised basis for our estimates—increased from about 28 percent to 58 percent. That these shares show opposite trends implies that households are obtaining education loans from lenders other than commercial banks, such as the federal government.

Another example is the market for personal loans. Between 1983 and 2001, personal loans as a share of commercial banks' nonauto, nonrevolving consumer loan portfolio fluctuated in a wide band around 30 percent. At the same time, personal loans were declining as a share of households' nonauto, nonrevolving credit; in 2001, they made up only 8 percent of such credit, down from 28 percent in 1983. One possibility is that personal loans have been replaced by credit card debt, a type of revolving debt that has more than doubled as a share of total consumer debt in the past two decades.

To obtain information about such markets, we turned to the Survey of Consumer Finances (SCF) (see box). This survey gathers detailed information on households' financial characteristics. Part of this information concerns households' outstanding consumer loans from all types of lenders.

Updating Assumptions about the Time to Maturity

The assumptions about the remaining time to maturity of the loans outstanding (remaining maturity)

used to calculate the DSR have been in place for several years and do not capture the recent changes in credit markets. These maturity assumptions have important implications for the DSR calculation because longer-maturity loans have lower payments, all else being equal, whereas shorter-maturity loans have higher payments. The average remaining times to maturity on types of nonrevolving debt other than auto loans are available infrequently and need to be re-evaluated from time to time.

To update the maturity assumptions, we again turned to the SCF.⁴ For example, after examining the SCF data and consulting with industry contacts, we raised the assumed remaining maturity for mobile-home loans to 100 months.⁵ The SCF data also indicated that the average remaining maturity on personal loans—of 42 months—was much longer than the previously assumed maturity of 16 months, and so we lengthened this maturity assumption as well. Finally, although the SCF's average remaining maturity for student loans currently being paid—at 65 months—is fairly close to our previous assumption of 80 months, payments on a large number of student loans are currently being deferred. According to the SCF, at any given time, payments are not being made on one-quarter to one-half of student loans. To

account for the deferral of student loans, we adjusted the stock of loans to reflect only those loans on which payments are currently being made.

Re-evaluating and Updating the Interest Rate Data

We have also re-evaluated and updated the sources of data on interest rates. In the past, we used proxies for interest rates on RV, marine, and mobile-home loans.⁶ According to the SCF, however, the interest rates on these loans are similar to each other and to the Federal Reserve's series on the average interest rate offered by banks on 48-month new car loans (see table 2). Thus, we replaced the previously used proxies with this rate, which is 3 to 4 percentage points lower than the proxies we had been using.

As part of the re-evaluation, we compared the quarterly interest rates for student loans from Sallie Mae and those for personal loans from the Federal Reserve with data from the SCF. The student loan interest rate, which is the average interest rate on Stafford student loans as reported by Sallie Mae, is similar to the rate reported in the SCF. Over the past twenty years, each rate has shown only mild fluctuations around its average of 8.5 percent.⁷ Interest rates on personal loans in the SCF, defined as all non-revolving loans for purposes other than education or the purchase of an RV, a boat, or a mobile home,

4. The SCF does not ask households for the remaining maturity on their loans in all cases, but we calculated the implied remaining maturity by subtracting the age of the loan from the original maturity.

5. The remaining maturity on mobile homes was previously assumed to be 40 months; the average remaining maturity captured by the SCF is about 149 months. However, the remaining maturity calculated from the SCF may not accurately represent the remaining maturity on household debt because the SCF measure of mobile-home debt includes mobile homes and sometimes the land on which they stand. The loan for this land would have a substantially longer maturity than would that for the mobile home itself.

6. We previously used the interest rate on used cars at finance companies as a proxy for the interest rate on RV and marine loans, and the interest rate on 48-month new car loans at commercial banks plus a constant as a proxy for the interest rate on mobile-home loans.

7. The similarity is not too surprising—a comparison of student loan rates by source in the SCF reveals little difference across types of lending institution.

appear to be a bit lower than the rates offered by banks on 24-month personal loans, but this difference has been close to zero in recent years.

Adding New Sources for Student Loan Data

The DSR was broadened to account for changes in the student loan market. Specifically, the measure of consumer credit used to calculate the DSR was expanded to include student loans extended by the government and Sallie Mae.⁸ From the household sector's perspective, student loans made by the government or Sallie Mae do not differ fundamentally from those made by other lenders. However, these student loans were not captured in the consumer credit statistics because information about student loans had traditionally been collected through surveys of banks.⁹

Before 1993, the federal government participated indirectly in the student loan market by guaranteeing loans made available by private lenders, a good portion of which were commercial banks.¹⁰ In 1993, it began disbursing education loans directly to households through the congressionally mandated Federal Direct Student Loan Program (FDSLPL).¹¹ The FDSLPL expanded rapidly, and by the end of the decade, the program was responsible for one-quarter of the approximately \$177 billion in student loans outstanding under federal programs.¹² Accounting for student loans extended by the federal government raised the level of consumer credit an average of 3 percent since 1994 and its annual growth rate about ½ percentage point each year.

Sallie Mae's student loans had not been included in the consumer credit statistics because consumer credit information traditionally had not been collected from government-sponsored enterprises. However, loans from Sallie Mae's parent company (SLM),

8. The consumer credit data used in the calculation are published by the Federal Reserve in the G.19 statistical release. A revision back to January 1977 first appeared in the October 7, 2003, release of data for August 2003.

Sallie Mae is a federally chartered, government-sponsored enterprise that has the majority of its assets in student loans. In 1997, it received authorization to reorganize as a fully private, state-chartered corporation. The following year, the institution became a wholly owned subsidiary of SLM Holding Corporation.

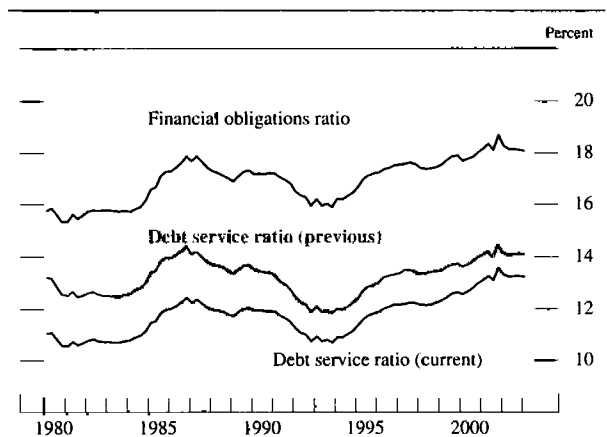

9. Federally guaranteed student loans made by state nonprofit agencies continue to be excluded from the consumer credit statistics because of the lack of frequent and timely data.

10. The Higher Education Act of 1965 authorized the Federal Family Education Loan Program (Pub. L. 89-329) November 8, 1965.

11. The Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103-66), August 10, 1993.

a private corporation, will be included in consumer loans held by finance companies when statistics from this sector are re-benchmarked in 2005. To avoid such inconsistency in treatment, Sallie Mae's student loans since 1977 were added to the Federal Reserve's G.19 consumer credit statistics beginning with the October 2003 release. Their inclusion did not materially change the growth rate of consumer credit, but it has raised the level an average of 2½ percent since 1977.

Revision to the Debt Service Ratio Estimate

On net, changes to the source data led to a downward revision to the DSR of about ½ percentage points from 1980 through 2002 (chart 1 and top portion of table 3). Revisions to personal loan payments

3. Contributions to the overall revision, 1980-2002
Percentage points

Total	5.11	5.28	5.33	5.01	5.19
Overall revision	3.31	4.08	4.19	4.08	3.78

accounted for the lion's share of this revision because of the lengthening of our assumptions about remaining maturity on these loans. This revision alone reduced our estimate of the DSR more than 1 percentage point. Reducing the interest rate used to calculate the required debt service on RV and marine loans and lengthening their assumed maturities accounted for most of the remaining revision.

BROADENING THE MEASURE OF HOUSEHOLD LIABILITIES WITH THE FOR

Because of changes in the mortgage and automobile markets, we created a new measure of household liabilities—the financial obligations ratio (FOR). By including rental payments on primary residences as well as other housing-related expenses, this measure reflects the household sector's movement toward owning (debt financing) and away from renting (lease financing) in the housing market. And by including automobile lease payments, the measure reflects the movement toward leasing in the automobile market. The resulting measure better captures changes in the share of household resources dedicated to recurring fixed expenses. The magnitude of auto lease commitments and the combination of the various housing-related commitments relative to disposable income appear in chart 2.

Housing Market

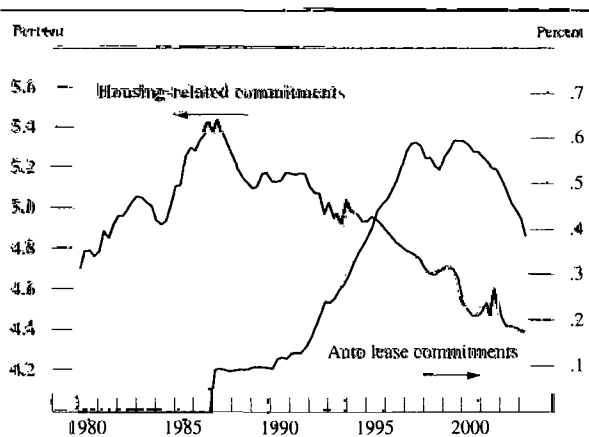

Households have moved from renting toward owning their primary residences. Over the 1990s, the share of households that owned their homes rose from

64 percent to about 68 percent.¹³ In the process, these new homeowners likely replaced their rental payments with mortgage debt.

Because of this shift from renting to owning, a measure of household financial obligations that excludes rent on tenant-occupied properties overstates the recent increases in housing-related obligations. To resolve this measurement issue, we added data from 1980 to the present on tenant-occupied, nonfarm rent from the National Income and Product Accounts (NIPA) to the estimates of household debt payments. As a share of after-tax personal income, rent payments rose fairly rapidly between the early and mid-1980s, reaching 3¾ percent, and have subsequently fallen to less than 3 percent (bottom portion of table 3). Incorporating rental payments increased the level of the DSR ¾ percentage points on average between 1980 and 2002.

To capture all the financial commitments associated with homeownership, a measure of household financial obligations should also include expenditures, such as property taxes and homeowners' insurance, that must be paid but are not part of mortgage debt. From 1980 through 1994, aggregate property taxes paid by households as a share of total disposable personal income hovered around 1½ percent. Since that time, property taxes have edged down to an estimated 1⅓ percent of income. Homeowners' insurance payments as a percentage of disposable personal income are quite small, averaging less than ¼ percent over the past two decades. Taken together, property taxes and homeowners' insurance payments account for 1⅔ percentage points of the difference between the FOR and the DSR from 1980 through 2002.

2. Financial obligations as a share of disposable income, 1980–2003:Q2

NOTE. Housing-related commitments include rent, property tax, and property insurance payments.

Auto Market

In contrast to the housing market, in the automobile market, households have shifted somewhat from owning their vehicles and incurring debt to leasing (renting) their vehicles. In 1992, 2½ percent of households leased a vehicle. By 2001, this figure had risen to 5¾ percent.¹⁴ Because of this shift, a measure of financial obligations that excludes automobile

leases understates increases in consumers' required automobile finance payments. Accordingly, we added automobile lease expenditures from the NIPA to our estimate of household debt payments. Lease payments account for roughly $\frac{1}{3}$ percentage point of the difference between the FOR and the DSR.

Comparison of the DSR and the FOR

Broadening the measure of household liabilities had a larger effect on the level of the DSR than on its contour over time. Mainly because of the addition of rental payments on tenant-occupied housing, the new FOR measure is about $5\frac{1}{4}$ percentage points higher on average than the revised DSR measure between 1980 and 2002 (chart 1). The FOR has varied between 15 percent and 19 percent since 1980, with a high in the fourth quarter of 2001 (chart 3).

The growth in debt outstanding explains much of the movement in this measure, although changes in interest rates and maturities contribute as well. In the mid-1980s, rapid growth in the major categories of household debt—mortgages, credit card debt, and automobile loans—led to a rise of 2 percentage points in the FOR. During the recession in the early 1990s, nonrevolving consumer debt contracted, mortgage growth was sluggish, and the FOR dropped $1\frac{1}{4}$ percentage points. In the mid-1990s and again around the turn of the century, rapid debt growth pushed the FOR higher.

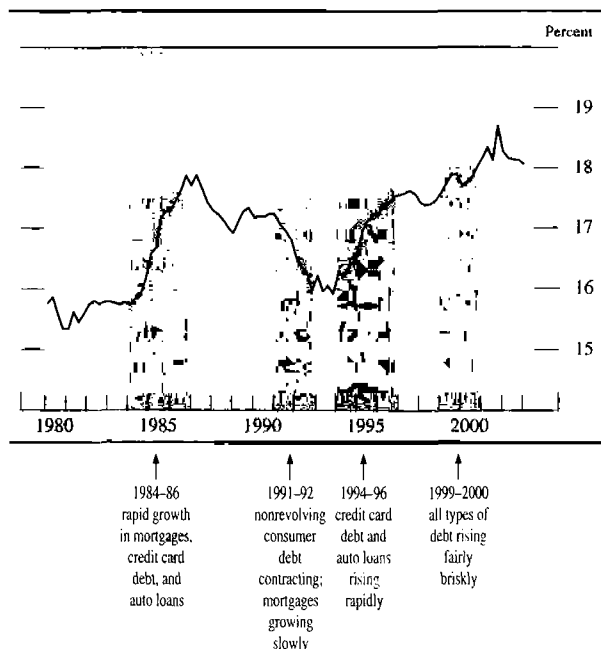

DEBT SERVICE AND FINANCIAL OBLIGATIONS BY HOMEOWNERSHIP STATUS

Record low interest rates and rising house prices over the past few years have prompted millions of homeowners to refinance their mortgages and to tap into their home equity.¹⁵ The net effect of these refinancings on the outstanding debt of homeowners is ambiguous. If homeowners reduce their mortgage payments through refinancing or if they pay off higher-cost consumer debt with the proceeds of a cash-out refinancing (that is, tap into their equity and take out cash), homeowner debt service will decrease. By lowering required monthly payments, this balance sheet restructuring may make homeowners' consumption less vulnerable to income declines. However, if homeowners use the proceeds of a cash-out refinancing to finance new consumption, homeowner debt service may increase. For these reasons, it is useful to separate financial obligations of homeowners from those of renters. The changes in the ratio of homeowners' financial obligations to their incomes may summarize the net effect of the refinancing boom on the financial situations of homeowners.

Separating homeowner and renter financial obligations also allows the creation of a renter financial obligations ratio. In general, renters have less income than do homeowners and are more likely to have trouble repaying their financial obligations. In 2001, the median income of renters was \$24,700; the median income of homeowners was \$52,100. In the same year, 14 percent of renters and only 4 percent of homeowners said that they had been delinquent sixty days or more on a loan in the past year.¹⁶ Thus, a separate financial obligations ratio for renters may indicate how the debt obligations of households with less income and less wealth have changed over time.

However, splitting homeowners' and renters' financial obligations involves complications in terms of both computation and interpretation. First, the aggregate data series used in calculating the FOR are not, in general, available separately for homeowners and renters. Thus, the income and obligation series for each group must be estimated using household-level survey data. The methods used to estimate these series are described later in this article. Second, the rise in the rate of homeownership opens the possibil-

ity that the characteristics of homeowners as a group may have changed over time. Therefore, changes in the homeowner FOR may reflect changes in the characteristics of new homeowners rather than changes in the financial commitments of existing homeowners. A rough estimate of the extent of this effect, presented at the end of the article, suggests that up to half the rise in the homeowner FOR over the 1990s may be due to the increase in homeownership.

Estimating the Financial Obligations of Homeowners and Renters

The debt of renters and owners is distributed differently across loan types. Mortgages are the dominant component of the debt of homeowners, whereas credit card, auto, and student loans are the major components of the debt of renters (table 4). As a result, changes in mortgage interest rates will affect the FOR only of homeowners, whereas changes in consumer loan interest rates will disproportionately affect the FOR of renters.

To split aggregate debt service, for each type of loan we estimate the share of debt service accruing to homeowners and renters. These shares, which are estimated from the SCF, are then applied to each loan type's aggregate debt service. Auto lease payments are also split based on estimates from the SCF, whereas homeowners' insurance and property taxes are assigned entirely to homeowners and rent payments are assigned entirely to renters.

Estimating the Income of Homeowners and Renters

Conceptually, estimating the income of homeowners and renters is similar to estimating their debt pay-

ments. Using survey data, we estimate the shares of various types of income accruing to homeowners and renters. We then use these shares to split the aggregate NIPA income data between homeowners and renters.

In practice, estimating the income of homeowners and renters is more complicated than estimating their debt payments for two reasons. First, the definition of income in NIPA data is different from that in survey data. The NIPA definition includes components such as the rental value of owner-occupied housing, employer contributions to private pension funds, and the value of Medicare and Medicaid entitlements, which are generally excluded from survey-based definitions. Second, some sources of survey data may undercount high-income households, whose income is a significant fraction of aggregate income. Moreover, in some surveys the true incomes of these high-income households are replaced with lower figures in an attempt to maintain the households' confidentiality. Because an overwhelming percentage of high-income households are homeowners, excluding their income may induce a downward bias in the estimate of the homeowner share of income.

To mitigate the difficulties raised by differences in income definitions, each component of NIPA income is matched to its closest equivalent in survey data (table 5). This method assumes only that the same share of income accrues to renters and homeowners within each subcategory for the NIPA and survey data, rather than within the NIPA and survey data as a whole. For components in which the income of high-income households plays a significant role—wage, self-employment, rental, dividend, and interest income—the homeowner/renter split is based on the Survey of Consumer Finances, which oversamples these households specifically. For other income sources, the split is based on the March supplement to the Current Population Survey (CPS), which is conducted more frequently than is the SCF and is

5. NIPA income subcategories and survey data equivalents

SCF Survey of Consumer Finances.

CPS Current Population Survey.

Microdata Sets Used to Calculate the Homeowner and Renter FORs

The Federal Reserve Board conducts the Survey of Consumer Finances (SCF) every three years. The survey is designed to provide comprehensive data on the wealth (both the assets and the liabilities) of American households. The SCF oversamples high-income households because these households hold a disproportionate share of the nation's wealth. Weighting is used in estimation to give each survey case its approximate representation in the full population of households. Survey waves are currently available for 1983, 1986, 1989, 1992, 1995, 1998, and 2001. The 2001 survey data were released publicly approximately fifteen months after the completion of the interviews and contained data from interviews with 4,442 households.

The Bureau of the Census conducts the Current Population Survey (CPS) monthly and asks detailed questions about income annually in its March supplement. The survey is designed to provide information on the labor force characteristics of the U.S. population. The CPS web site has March supplement data from 1992 onward, and the Unicon Corporation's "CPS Utilities" provides this data from 1962 onward. The data for the 2002 March supplement were released approximately six months after the completion of the interviews and contained data from approximately 78,000 households.

based on a larger number of households. (See the box for more information on these surveys.) Besides being more frequent, the CPS also asks more detailed questions about the many possible sources of transfer income, such as food stamps and Temporary Assistance to Needy Families, and thereby yields a potentially better measure for this category than does the SCF. Federal and state tax shares are estimated with the internal version of the SCF and the National Bureau of Economic Research's TAXSIM model.¹⁷

The income of homeowners and renters is distributed differently across the sources of income. Dividends, interest, and self-employment income represent 28 percent of the income of homeowners but only 8 percent of the income of renters (table 6). Transfer income and Medicaid make up only 9 percent of the income of homeowners but 23 percent of the income of renters. Thus, changes in the stock and bond markets will affect homeowners disproportionately, and changes in the rules governing transfer programs will influence primarily renters.

17. State identifiers are not released on the public version of the SCF. For more information on the TAXSIM model, see www.nber.org/~taxsim.

6. Distribution of homeowner and renter income across sources, 2001

Income source	Percent	
	Homeowners	Renters
Wages	53	63
Dividends, interest, and self-employment income	28	8
Transfers and Medicaid	9	23
Employee benefits and Medicare ..	9	7

NOTE: Details do not sum to 100 because rental income and imputed rent of homeowners are excluded from the table.

SOURCE: NIPA income data split with shares estimated from the CPS and SCF.

The Financial Obligations Ratios for Homeowners and Renters

The financial obligations ratio for renters is substantially higher than that for homeowners (chart 4). The renter ratio is higher than the owner ratio because renters as a group spend a greater share of income on housing and on consumer debt payments. Renters as a group spent 17 percent of their total after-tax income on rent payments, whereas homeowners as a group spent only 7.7 percent of their total after-tax income on mortgage payments, homeowners' insurance, and property taxes. Renters also spent 5 percentage points more of their income than homeowners did on consumer debt payments.

The financial obligations ratios for homeowners and renters also have different contours over time. The homeowner FOR moved largely in lockstep with the aggregate measure over the 1980s and 1990s, whereas the renter FOR accelerated over the 1990s. Over the 1992–2002 period, the homeowner ratio rose 2.0 percentage points, and the renter ratio rose 6.8 percentage points.

4. Financial obligations ratios for homeowners and renters, 1980–2001:Q2

The renter ratio has risen more sharply than has the homeowner ratio since the early 1990s because renters experienced less growth in income than homeowners did. From the fourth quarter of 1992 to the fourth quarter of 2001, which is the most recent peak of the FOR series, the income of renters rose 22 percent, and the income of homeowners rose 60 percent. In addition, for the first part of this period—roughly from 1993 to 1995—renter debt payments rose at a faster rate than homeowner debt payments did.

The Rise in Homeownership and the Homeowner Financial Obligations Ratio

The increase in homeownership over the 1990s appeared to stem in part from changes in the mortgage market, as the mortgage industry became more sophisticated at developing products for borrowers with impaired credit or with limited funds for a down payment. If these new homeowners, who would have been renters in the past, have high debt levels relative to their incomes, the homeowner FOR will increase. However, this increase will not signal that existing homeowners have taken on more debt; it will reflect simply the changing composition of the homeowner pool.

The effect of this rise in homeownership on the homeowner FOR cannot be precisely estimated because we have no way of identifying current homeowners who would have been renters under the prevailing lending standards of the past. However, recent research by Federal Reserve staff suggests that the increase in homeownership over the 1990s was concentrated among households with limited funds for a down payment.¹⁸ As a rough attempt to quantify the magnitude of this new-homeowner effect, we isolated the new homeowners in the 1995, 1998, and 2001 Surveys of Consumer Finances with the largest mortgage loans relative to their house values. For each of these waves of the SCF, we chose enough of these households so that, when they were removed from the homeowner group, the homeownership rate would be reduced to its 1992 value.

Removing these new homeowners from the homeowner group subtracts about half the growth in the homeowner FOR over the 1990s (chart 5). This change may be an upper bound on the magnitude of the effect because we removed from the homeowner

5. Effect of rise in homeownership on homeowner financial obligations ratio, 1989–2003:Q2

pool some of the households with the highest levels of debt. Indeed, excluding these households decreases the debt service payments of homeowners 11 percent, whereas their income decreases only 4 percent. This estimate suggests that the rise in the homeowner FOR over the 1990s reflects an increase in both the indebtedness of homeowners and in the rate of homeownership.

SUMMARY

Recent changes in financial markets have necessitated changes to the structure and the methodology of the debt service ratio statistics. The new household financial obligations ratio, introduced in this article, adds rent, auto lease payments, and other recurring obligations to the household debt service ratio. Both the new household FOR and the revised household DSR incorporate an expanded measure of consumer credit and revised estimates of loan maturities and interest rates. The new FORs for homeowners and renters provide separate estimates of the indebtedness of these groups relative to their respective incomes.

On net, these changes in methodology have raised the level of the DSR but have not substantively changed its trajectory over time. As was true before the revision, the DSR in 2002 was similar to the peak level reached in the 1980s. The homeowner FOR, like the aggregate FOR, increased gradually during the 1990s, whereas the renter FOR rose more steeply. However, both the homeowner and the renter FORs have remained largely unchanged over recent quarters. Homeowners appear to have managed their liabilities through the recent period of economic weakness by rebalancing their portfolios toward lower-cost mortgage debt.

18. See Irina Barakova, Raphael Bostic, Paul Calem, and Susan Wachter, "Does Credit Quality Matter for Homeownership?" unpublished paper, Federal Reserve Board, January 6, 2003.

APPENDIX: DEBT SERVICE CALCULATION

To calculate household debt service, the following formula for principal and interest payments is applied for each type of installment loan:

$$ds_{i,t} = \frac{r_{i,t}d_{i,t}}{1 - (1 + r_{i,t})^{-m_{i,t}}},$$

where $ds_{i,t}$ is the debt service, $d_{i,t}$ is the stock of debt, $r_{i,t}$ is the average interest rate on that stock, and $m_{i,t}$ is the remaining maturity for loan type i at time t .

Mortgage Debt Service

To calculate the mortgage debt service, we use mortgage debt as published by the Federal Reserve in its flow of funds accounts and the effective interest rate on outstanding mortgage debt as calculated by the Bureau of Economic Analysis based on a perpetual inventory of mortgage loans. The remaining maturity equals the weighted average maturity on mortgage loans in pools securitized by Fannie Mae, Freddie Mac, and other lenders.

Nonrevolving Consumer Debt Service

We use nonrevolving consumer debt as published by the Federal Reserve in its G.19 Consumer Credit statistical release. In general, this debt is split into loans for new automobiles, loans for used automobiles, student loans, mobile-home loans, RV and marine loans, and personal loans by applying shares of these loans estimated from survey data.

The average interest rate on the stock of loans for new automobiles is estimated by applying a distribu-

tion of loans by vintage, which was calculated from the SCF, to a quarterly interest rate series for new auto loans newly originated by commercial banks and finance companies. Using the same method, we estimate the rate on the stock of used automobiles with a quarterly interest rate on used auto loans newly originated by finance companies. The average interest rate on the stock of student loans, mobile-home loans, RV and marine loans, and personal loans is a backward moving average of the rate on new loans for that type of debt (or a proxy for that interest rate).

Average remaining maturities on the stock of new and used automobile loans are estimated with the same procedure as that for the interest rates. We assume that remaining maturities on other types of loans are fixed over time.

Revolving Consumer Debt Service

We use revolving consumer debt as published by the Federal Reserve in its G.19 Consumer Credit statistical release. We assume that revolving debt is composed of credit card debt only, although other types of revolving debt are likely included.¹⁹ The assumed minimum required payment rate is 2½ percent of the balance per month, based on the January 1999 Senior Loan Officer Opinion Survey, in which most banks indicated that required monthly minimum payments on credit cards ranged between 2 percent and 3 percent and had not changed substantially over the previous decade. □

19. The largest type of revolving debt outside credit card debt is likely the overdraft protection provided on many checking accounts.

Announcements

FEDERAL OPEN MARKET COMMITTEE STATEMENT

The Federal Open Market Committee decided on September 16, 2003, to keep its target for the federal funds rate at 1 percent.

The Committee continues to believe that an accommodative stance of monetary policy, coupled with robust underlying growth in productivity, is providing important ongoing support to economic activity. The evidence accumulated over the intermeeting period confirms that spending is firming, although the labor market has been weakening. Business pricing power and increases in core consumer prices remain muted.

The Committee perceives that the upside and downside risks to the attainment of sustainable growth for the next few quarters are roughly equal. In contrast, the probability, though minor, of an unelcome fall in inflation exceeds that of a rise in inflation from its already low level.

The Committee judges that, on balance, the risk of inflation becoming undesirably low remains the predominant concern for the foreseeable future. In these circumstances, the Committee believes that policy accommodation can be maintained for a considerable period.

Voting for the FOMC monetary policy action were: Alan Greenspan, Chairman; Ben S. Bernanke; Susan S. Bies; J. Alfred Broaddus, Jr.; Roger W. Ferguson, Jr.; Edward M. Gramlich; Jack Guynn; Donald L. Kohn; Michael H. Moskow; Mark W. Olson; Robert T. Parry; and Jamie B. Stewart, Jr.

STATEMENT BY CHAIRMAN ALAN GREENSPAN ON THE NOMINATIONS OF VICE CHAIRMAN FERGUSON AND GOVERNOR BERNANKE

“I welcome the announcement that President Bush is nominating Roger W. Ferguson, Jr., for a second term as Vice Chairman and nominating Ben S. Bernanke for a full term as a Governor of the Federal Reserve Board.

In making these nominations, the President affirms the many contributions Governors Ferguson and Ber-

nanke have brought to the Board. They are exemplary public servants, with strong experience and sound judgment. The Board will benefit greatly from their continued service, upon their confirmation by the Senate.”

STATEMENT BY VICE CHAIRMAN ROGER W. FERGUSON, JR., ON NOMINATION TO SECOND TERM

“I am honored President Bush has announced his intention to nominate me to serve another term as Vice Chairman of the Federal Reserve Board. I am particularly mindful that the policy decisions of the Federal Reserve influence the economic well-being of all Americans. I have been privileged to serve as part of this dedicated institution since 1997. I very much look forward to continuing this work with Chairman Greenspan and my colleagues on the Board, upon my confirmation by the Senate.”

STATEMENT BY GOVERNOR BEN S. BERNANKE ON NOMINATION TO FULL TERM

“I am honored and grateful that President Bush has announced his intention to nominate me to a full term on the Federal Reserve Board. I appreciate his confidence. I’m very pleased to have the opportunity to continue my work with Chairman Greenspan and my colleagues on the Board.”

RESULTS OF THE SHARED NATIONAL CREDIT REVIEW OF SYNDICATED BANK LOANS

The quality of large syndicated bank loans stabilized this year, according to the Shared National Credit (SNC)¹ review released September 10, 2003, by fed-

NOTE. The charts, tables, and appendixes to this announcement are available at www.federalreserve.gov/boarddocs/press/bcreg/2003/20030910.

1. The Shared National Credit (SNC) Program was established in 1977 by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency, and in 2001 the Office of Thrift Supervision became an assisting agency. The annual program, which seeks to provide an efficient and consistent review and classification of large

eral bank regulators. However, regulators noted that adversely rated loans remain at an elevated level and will require continued vigilance. The results—reported by the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Office of Thrift Supervision—are based on analyses that were prepared in the second quarter and reflect business and economic conditions at that time.

Total loan commitments² classified as either substandard, doubtful, or loss fell \$4.9 billion, or 3 percent, over the previous year, compared with a net increase of \$39.8 billion, or 34 percent, the year before. Commitments rated special mention decreased \$23.8 billion, or 30 percent, in contrast to 2002 when they grew \$3.5 billion, or 4.6 percent. None of these figures include the effects of hedging or other techniques that individual organizations might have employed to mitigate risk.

The ratio of classified loans to total commitments rose to 9.3 percent, close to the previous peak in 1991, driven by a 12 percent decline in total commitments. At the same time, total adversely rated credits (classified and special mention combined) stabilized at 12.6 percent of total commitments.

Adversely rated credits (also known as criticized credits) are the total of loans classified substandard, doubtful, loss, and loans rated special mention. Under the agencies' Uniform Loan Classification Standards,³ classified loans have well-defined weak-

syndicated loans, generally covers loans or loan commitments of at least \$20 million that are shared by three or more financial institutions, with a few exceptions.

2. Loan commitments included both drawn and undrawn portions of a loan or loan facility.

3. Excerpt from SR Letter 79-556 defining regulatory classifications:

Classification ratings are defined as "substandard," "doubtful," and "loss." A substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the bank will sustain some loss if the deficiencies are not corrected. An asset classified as doubtful has all the weakness inherent in one classified as substandard with the added characteristic that the weaknesses make the collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Assets classified as loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be effected in the future.

Excerpt from June 10, 1993, Interagency Statement on the Supervisory Definition of Special Mention Assets:

A special mention asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential

nesses, including default in some cases, while special mention loans exhibit potential weaknesses, which may result in further deterioration if left uncorrected.

Overview

In aggregate, the SNC program covered 8,232 credits totaling \$1.6 trillion in loan commitments to 5,111 borrowers in 2003. Total commitments were down 20 percent from the 2001 peak of \$2.0 trillion, driven by lower customer demand, tighter underwriting standards, attractive capital market financing alternatives, and repositioning by banks to exit nonstrategic business lines and less-profitable customer relationships.

For the 2003 review, total loan commitments classified as substandard remained roughly even with the previous year, while doubtful credits edged up \$3.2 billion, or 12.3 percent. At the same time, commitments classified as loss remained elevated at \$10.7 billion, but were down 43.8 percent from the extraordinary level of the previous year. That decline in turn led to a fall in total classifieds of 3.2 percent. Although total classified commitments fell moderately, the portion of outstanding classified loans not accruing interest⁴ was unchanged from the previous year, at \$51.0 billion.

Industry Trends

The quality of the SNC portfolio was mixed as modest-to-strong improvements in the majority of industry sectors were nearly offset by deterioration in the energy sector (oil, gas, pipelines, and utilities). In total, improving industry segments more than offset deteriorating ones by \$4.9 billion. The strongest improvement occurred in manufacturing, with an \$18.2 billion decline in classified commitments largely driven by loan repayments from a handful of substandard borrowers. Classifications in the tele-

weaknesses may result in deterioration of the repayment prospects for the asset or in the institution's credit position at some future date. Special mention assets are not adversely classified and do not expose an institution to sufficient risk to warrant adverse classification.

4. Non-accrual loans are defined for regulatory reporting purposes as "loans and lease financing receivables that are required to be reported on a non-accrual basis because (a) they are maintained on a cash basis because of a deterioration in the financial position of the borrower, (b) payment in full of interest or principal is not expected, or (c) principal or interest has been in default for 90 days or longer, unless the obligation is both well secured and in the process of collection." Non-accrual classifieds are those funded or outstanding portions of loans classified as substandard and doubtful that are not accruing interest. For 2003, this category consisted of \$23.6 billion in loans rated substandard and \$27.4 billion rated doubtful.

communication and cable segment fell \$2.4 billion, but remained at significantly elevated levels. Other segments, such as financial services and insurance, showed modest declines, with classification rates that were below those for the entire SNC program. In contrast, the energy sector showed rapid deterioration with a \$21.1 billion rise in classifieds, which were largely attributable to leveraged firms involved in energy trading. In addition, the well-known problems facing U.S. passenger airlines drove a \$1.1 billion net increase in classifieds for the lodging and transportation sector. Credits identified for special mention fell \$23.8 billion with strong declines experienced in nearly every industry. These declines were driven by a migration of a portion of special mention credits from the previous year to classified categories, as well as a decline in newly identified potential weaknesses.

Despite a decline of 44 percent in loans identified in the loss classification, this year's level of losses, \$10.7 billion, was the second highest on record. Of total losses, \$5.0 billion, or 47 percent, were directly attributable to the weakened telecommunication and energy sectors, the Argentina default, and asbestos-related litigation. The remaining losses were spread widely across a variety of industries. In contrast, during 2002 more than 60 percent of losses were attributable to the telecommunications and energy sectors. Nearly half of 2003 SNC classified commitments were related to the telecommunications and energy sectors, compared with roughly one-third in 2002.

Trends by Entity Type

During 2003, the share of SNC commitments held by nonbanks⁵ continued to grow, edging up 1 percentage point, to 11 percent, although the share held by foreign banking organizations (FBOs) fell to 44 percent and that held by U.S. banks⁶ held steady at 45 percent. U.S. banks experienced a 20 percent decline in classified assets during 2003, compared with a rise of 5.5 percent at FBOs and a 6.0 percent rise at nonbanks. These disparate trends further differentiated the quality of holdings among entity types, with classifieds amounting to just 5.8 percent of total commitments for U.S. banks, compared with 9.0 per-

cent at FBOs and 24.4 percent at nonbanks. Similarly, total non-accrual outstandings fell for U.S. banks and rose for FBOs. However, despite a rise in classified commitments, non-accrual outstandings for nonbanks fell.

To a great extent, the deteriorating trend in SNC credit quality at FBOs is explained by their higher share of riskier energy commitment holdings relative to U.S. banks. Of the \$21.1 billion increase in energy commitments, \$16.1 billion was attributable to FBOs, resulting in a 23.5 percent classification rate in energy commitments. In contrast, U.S. banks experienced a \$2.9 billion increase, and a classification rate of 10.2 percent in energy commitments. At the same time, nonbank classifieds were up \$2.1 billion, amounting to 31.4 percent of energy commitments. Notably, both FBOs and nonbanks increased their dollar holdings of energy commitments in 2002 and only began reducing them in 2003, although U.S. banks reduced their exposure in both 2002 and 2003. The increasing share held by nonbanks likely stems from the purchase of troubled loans in the secondary market at steep discounts.

The significantly higher classification rate for nonbank holdings is consistent with market observations that nonbanks continue to be active participants in the subinvestment-grade portion of the syndicated loan market and are active purchasers of distressed loans in the secondary markets at discounts to par value; all dollar amounts in this release are par amounts.

Response by Banks

Banking organizations have continued to remain vigilant in identifying problem credits and have generally reflected the appropriate risk rating in their internal credit ratings. Although credit problems have stabilized, banking organizations must continue to carefully monitor the condition of their borrowers in the current environment to ensure that they promptly identify and address any emerging weaknesses and adjust levels of loan-loss allowances appropriately.⁷

RELEASE OF DATE OF ISSUE FOR SERIES-2004 \$20 NOTE

The U.S. government announced on September 9, 2003, that the first newly redesigned Series-2004

5. Nonbanks include independent investment brokerages, investment vehicles, and other institutional investors.

6. To better reflect ultimate ownership, U.S. banks are defined to exclude U.S.-chartered subsidiaries of foreign banking organizations for the years 2001 through 2003. These U.S. subsidiaries of FBOs are included in the FBO totals.

7. For further guidance, institutions should refer to the July 12, 1999, Joint Interagency Letter to Financial Institutions on the allowance for loan losses, as well as the July 2, 2001, Interagency Policy Statement on Allowance for Loan and Lease Losses (ALLL) Methodologies and Documentation for Banks and Savings Institutions.

\$20 notes, featuring background colors and improved security features, will be issued on October 9. On the day of issue, the Federal Reserve System will begin distributing the new notes to the public through the nation's commercial banks. "This is the most secure note the U.S. government has ever produced," said Federal Reserve Board Governor Mark W. Olson. "Its enhanced security will help ensure that our currency continues to represent value, trust, and confidence to people all over the world. It will co-circulate with older-design notes, and the public can rest assured that all U.S. notes will continue to be legal tender." The U.S. government launched a worldwide public education program last May when the new \$20 design was unveiled, to create awareness among the general public and to help banks and businesses prepare for the new \$20 note. A wealth of training and informational materials, highlighted by an interactive demonstration of the bill's security features, is available to download or order through www.moneyfactory.com/newmoney. Since the Treasury's Bureau of Engraving and Printing (BEP) began taking orders last May, more than 7,500 businesses and organizations have ordered training materials. The September 9 announcement of the October 9 date of issue signaled to banks and businesses that they should make final preparations for the new notes.

"Our aim is the seamless introduction of the newly redesigned bills," said BEP Director Tom Ferguson. "To that end, the Bureau of Engraving and Printing has been working with the vending machine industry for more than a year to ensure that they have the information they need to make their equipment compatible with the newly redesigned bill by the time it enters circulation on October 9. Additionally, we have been working with businesses and industry associations across the country to provide them with the materials they need to educate their employees on the new \$20 note and its updated security features."

Counterfeiting: Increasingly Digital

To stay ahead of counterfeiters, the U.S. government plans to introduce new currency designs every seven to ten years. The new design for the \$20 note will be followed by new designs for the \$50 and \$100 notes over the next few years. Redesign of the \$5 and \$10 notes is under consideration, but there are no plans to redesign the \$1 and \$2 notes.

Counterfeiters are increasingly turning to digital methods, as advances in technology make digital

counterfeiting of currency easier and cheaper. In 1995, for example, less than 1 percent of counterfeit notes detected in the United States was digitally produced. By 2002, that number had grown to nearly 40 percent, according to the U.S. Secret Service.

Yet despite the efforts of counterfeiters, U.S. currency counterfeiting has been kept at low levels, with current estimates putting the level of counterfeit notes in circulation worldwide at about 1 to 2 notes in every 10,000 genuine notes.

Security Features

The new \$20 design retains three important security features that were first introduced in the late 1990s and are easy for consumers and merchants alike to check:

- The watermark—the faint image similar to the large portrait, which is part of the paper itself and is visible from both sides when held up to the light.
- The security thread—also visible from both sides when held up to the light, this vertical strip of plastic is embedded in the paper. "USA TWENTY" and a small flag are visible along the thread.
- The color-shifting ink—the numeral "20" in the lower-right corner on the face of the note changes from copper to green when the note is tilted. The color shift is more dramatic and easier to see on the new-design notes.

Because these features are difficult for counterfeiters to reproduce well, they often do not try. Counterfeiters are hoping that cash-handlers and the public will not check their money closely.

The New Color of Money

The most noticeable difference in the notes is the subtle green, peach, and blue colors featured in the background. Different colors will be used for different denominations, which will help everyone—particularly those who are visually impaired—to tell denominations apart.

Although consumers should not use color to check the authenticity of their currency (relying instead on the user-friendly security features noted above), color does add complexity to the note, making counterfeiting more difficult.

The new bills are the same size and use the same, although enhanced, portrait of Andrew Jackson on the face of the note and historical vignette of the

White House on the back. The redesign also features symbols of freedom—a blue eagle in the background to the left of the portrait and a metallic green eagle and shield to the right of the portrait in the case of the \$20 note.

REQUESTS FOR COMMENTS ON PROPOSED RULEMAKING FOR RISK-BASED CAPITAL STANDARDS

The federal bank and thrift regulatory agencies on September 12, 2003, requested public comment on an interim final rule and a notice of proposed rulemaking (NPR) to amend their risk-based capital standards for the treatment of assets in asset-backed commercial paper (ABCP) programs consolidated under the recently issued Financial Accounting Standards Board Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46). The NPR would also modify the risk-based capital treatment of certain securitizations with early amortization provisions.

An ABCP program is usually carried out through a bankruptcy-remote special purpose entity generally sponsored and administered by a banking organization (banks, bank holding companies, and thrift institutions) to provide funding to its corporate customers by purchasing asset pools from, or extending loans to, those customers. The ABCP provides funding for these assets through the issuance of commercial paper in the market. These issuances may be credit enhanced by various means, usually by a sponsoring bank.

Under the interim rule, sponsoring banking organizations may remove consolidated ABCP program assets from their risk-weighted asset base for purposes of calculating their risk-based capital ratios. However, sponsoring banking organizations must continue to include any other exposures they have to these programs, such as credit enhancements, in risk-weighted assets. The interim rule also amends the risk-based capital standards to exclude from tier 1 and total capital any minority interests in ABCP programs consolidated by sponsoring banking organizations under FIN 46. The interim rule will be in effect only for the regulatory reporting periods ending September 30, 2003, December 31, 2003, and March 31, 2004.

The risk-based capital treatment set forth in the interim rule does not alter the accounting rules for balance sheet consolidation as set forth under generally accepted accounting principles. Consequently, banking organizations will be required to report con-

solidated ABCP program assets in their tier 1 leverage ratio calculation.

The NPR solicits comments on a permanent, risk-sensitive, risk-based capital treatment for the risks arising from ABCP programs. In particular, it proposes to permanently permit banking organizations to exclude from their risk-weighted asset base those assets in ABCP programs consolidated on sponsoring banking organizations' balance sheets as a result of FIN 46. In addition, the NPR also would require banking organizations to hold risk-based capital against liquidity facilities provided to ABCP programs with an original maturity of one year or less. This treatment recognizes that such facilities, which currently are not assessed a capital requirement, expose banking organizations to credit risk.

The agencies are also proposing a risk-based capital charge for certain types of securitizations of revolving retail credit facilities (for example, credit card receivables) that incorporate early amortization provisions. The goal of these capital proposals is to more closely align the risk-based capital requirements with the associated risk of the exposures.

The interim final rule and NPR are being issued by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Office of the Comptroller of the Currency, and the Office of Thrift Supervision.

NEW ONLINE APPLICATION GUIDE FOR U.S. AND FOREIGN BANKING ORGANIZATIONS

An online guide for U.S. and foreign banking organizations submitting applications to the Federal Reserve has been added to the Board of Governors' public web site.

The new web page, www.federalreserve.gov/generalinfo/applications/afi/, describes the regulatory requirements and processing procedures for applications, notifications, and requests necessary for a broad range of activities, including mergers of banking organizations.

The site describes specific types of applications as well as the statutory factors considered by the Federal Reserve in evaluating applications, including the banking organization's record of compliance with the Community Reinvestment Act. It provides links to application forms and lists contacts at each Reserve Bank for questions regarding the submission of applications or the submission of public comments on applications.

RELEASE OF MINUTES OF BOARD'S DISCOUNT RATE MEETINGS

The Federal Reserve Board on August 21, 2003, released the minutes of its discount rate meetings from May 19, 2003, to June 25, 2003.

ENFORCEMENT ACTIONS

The Federal Reserve Board on August 20, 2003, announced the issuance of a consent order of assessment of a civil money penalty against the Community State Bank, Avilla, Indiana, a state member bank. Community State Bank, without admitting to any allegations, consented to the issuance of the order in connection with its alleged violations of the Board's Regulations implementing the National Flood Insurance Act.

The order requires Community State Bank to pay a civil money penalty of \$5,250, which will be remitted to the Federal Emergency Management Agency for deposit into the National Flood Mitigation Fund.

The Federal Reserve Board on August 20, 2003, announced the execution of an amendment to the written agreement by and among the Consolidated Bank and Trust Company, Richmond, Virginia, the Bureau of Financial Institutions of the Commonwealth of Virginia, Richmond, Virginia, and the Federal Reserve Bank of Richmond.

The Federal Reserve Board on August 27, 2003, announced the issuance of a combined consent order to cease and desist and an order of assessment of a civil money penalty against WestLB AG, Düsseldorf, Germany, and its New York branch.

The foreign bank, without admitting to any allegations, consented to the issuance of the combined order for violations of anti-tying restrictions in section 106 of the Bank Holding Company Act Amendments of 1970 and related unsafe and unsound banking practices. The combined order resolves allegations that in 2001, WestLB conditioned the availability or price of credit to corporate customers on the corporate customer's appointment of WestLB as an underwriter for issuances of debt securities.

The order requires that WestLB pay a civil money penalty of \$3 million and implement various policies and procedures designed to prevent future violations of this law.

The Federal Reserve Board on September 2, 2003, announced the execution of a written agreement by

and between the Ridgedale State Bank, Minnetonka, Minnesota, and the Federal Reserve Bank of Minneapolis.

The Federal Reserve Board also announced the issuance of a cease and desist order against Robert C. Arneson, the president and a director of the Ridgedale State Bank, Minnetonka, Minnesota.

These enforcement actions were issued in coordination with the U.S. Securities and Exchange Commission, which announced settlements with the Ridgedale State Bank and Mr. Arneson for alleged securities law violations.

The Federal Reserve Board on September 2, 2003, announced the execution of a written agreement by and among Gold Banc Corporation, Leawood, Kansas; the Gold Bank, Leawood, Kansas; the Office of the State Bank Commissioner; and the Federal Reserve Bank of Kansas City.

The Federal Reserve Board on September 11, 2003, announced the issuance of a cease and desist order against Craig Van Stone, a former senior vice president, chief financial officer, and cashier of the Premier Bank, Denver, Colorado, addressing Mr. Van Stone's compliance with the Bank Secrecy Act.

TERMINATION OF ENFORCEMENT ACTIONS

The Federal Reserve Board on September 15, 2003, announced the termination of the enforcement actions listed below. The Federal Reserve's enforcement action web site, <http://www.federalreserve.gov/boarddocs/enforcement>, reports the terminations as they occur.

- The PNC Financial Services Group, Inc.,
Pittsburgh, Pennsylvania
Written agreement dated July 12, 2002
Terminated September 12, 2003
- United Central Bank, Garland, Texas
Cease and desist order dated October 26, 2000
Terminated August 29, 2003
- ShoreBank Cleveland, Cleveland, Ohio
Written agreement dated August 21, 1998
Terminated August 21, 2003
- Olathe Bancorporation, Inc., Olathe, Colorado,
and Olathe State Bank, Olathe, Colorado
Written agreement dated September 12, 2000
Terminated July 11, 2003

- Allfirst Financial Inc., The Allfirst Bank, and Allied Irish Banks, p.l.c.
Written agreement dated May 15, 2002
Terminated February 24, 2003

NEW SCHEDULE FOR THE *FEDERAL RESERVE BULLETIN*

The Federal Reserve Board on October 3, 2003, announced the move to a quarterly publication schedule for the *Federal Reserve Bulletin* and the creation of a new monthly statistical supplement.

Beginning in the first quarter of 2004, the *Bulletin* will be enhanced and published four times a year. A quarterly report on the condition of the banking system and an annual report on changes in consumer regulations are among the new materials to be presented in the *Bulletin*. The *Bulletin* will continue to include topical research articles and summaries of Board survey findings, the Board's semiannual Monetary Policy Reports, a Legal Developments section, and other features such as lists of staff members, lists of Federal Reserve publications, and maps of the Federal Reserve Districts.

The Legal Developments section of the quarterly *Bulletin* will contain Board orders issued under the Bank Holding Company Act, the Bank Merger Act, the Federal Reserve Act, and the International Banking Act. Final rules and pending cases involving the Board are available on the Board's web site under "Legal Developments" at www.federalreserve.gov/releases/h2/.

The revised publication schedule responds to the results of customer surveys, the increased use of the Internet to access information on a timelier basis, and the Board's desire to provide a broader range of articles on topics of interest to *Bulletin* readers. A quarterly schedule will also make the planning and production of the *Bulletin* more efficient.

The tables that now appear in the Financial and Business Statistics section of the *Bulletin* will be published monthly as a separate publication titled *Statistical Supplement to the Federal Reserve Bulletin*. All tables that now appear in the *Federal Reserve Bulletin*, including special tables, will appear in the *Statistical Supplement*. All statistical series will be published with the same frequency that they have currently in the *Bulletin*. The first issue of the *Statistical Supplement* will be published in January 2004. The Publications Committee will monitor the usefulness of this publication in meeting the needs of the

public over time, especially in light of the widespread dissemination of data through the Internet.

A *Bulletin* editorial advisory board has been established under the direction of Lucretia Boyer, the Federal Reserve Board's Chief of Publications, to oversee the quality of content of these two publications and to ensure a diverse range of *Bulletin* articles.

Separate subscriptions for the two publications will be available starting with the January 2004 issue of the *Statistical Supplement*. For further subscription information, contact Publications Fulfillment at 202-452-3244 or 202-452-3245 or send an e-mail to publications-bog@frbog.frb.gov.

Articles published in the *Bulletin* will remain available online at www.federalreserve.gov/pubs/bulletin/default.htm.

STAFF CHANGES

Donald J. Winn, Director of the Office of Board Members and long-time congressional liaison for the Board died on August 14, 2003, after an extended illness. Mr. Winn was a trusted adviser to four chairmen in his nearly thirty years at the Board.

The Federal Reserve Board on September 10, 2003, announced the appointment of Winthrop P. Hambley as Assistant to the Board and head of the Congressional Liaison Office. Mr. Hambley, who had been Deputy Congressional Liaison, succeeded Donald J. Winn.

Laricke Blanchard, who had served as Assistant Congressional Liaison since April 2002, was appointed an officer of the Board with the title Special Assistant to the Board.

The Board also announced the appointment of Michelle Andrews Smith as Director of the Office of Board Members, also succeeding Mr. Winn. The Office of Board Members includes the Public Affairs Office, the Publications Department, the Correspondence Unit, the Office of Congressional Liaison, and the administrative staff that supports Board members. Ms. Smith will continue as Assistant to the Board for Public Affairs and, with her new position, will add responsibility for directing the internal management of the rest of the Office of Board Members.

Gary Gillum, a Senior Economist in the Division of Monetary Affairs, retired on October 3 after more than 39 years of service. □

Legal Developments

FINAL RULE—AMENDMENT TO REGULATION Z

The Board of Governors of the Federal Reserve System (Board) is amending 12 C.F.R. Part 226, the staff commentary that interprets the requirements of Regulation Z (Truth in Lending). The Board is required to adjust annually the dollar amount that triggers requirements for certain home mortgage loans bearing fees above a certain amount. The Home Ownership and Equity Protection Act of 1994 (HOEPA) sets forth rules for home-secured loans in which the total points and fees payable by the consumer at or before loan consummation exceed the greater of \$400 or 8 percent of the total loan amount. In keeping with the statute, the Board has annually adjusted the \$400 amount based on the annual percentage change reflected in the Consumer Price Index that is in effect on June 1. The adjusted dollar amount for 2004 is \$499.

Effective January 1, 2004, 12 C.F.R. Part 226 is amended as follows:

Part 226—Truth in Lending (Regulation Z)

1. The authority citation for Part 226 continues to read as follows:

Authority: 12 U.S.C. 3806; 15 U.S.C. 1604 and 1637(c)(5).

2. In Supplement I to Part 226, under *Section 226.32—Requirements for Certain Closed-End Home Mortgages*, under Paragraph 32(a)(1)(ii), paragraph 2. ix. is added.

Supplement I to Part 226—Official Staff Interpretations

* * * * *

Subpart E—Special Rules for Certain Home Mortgage Transactions

* * * * *

Section 226.32—Requirements for Certain Closed-End Home Mortgages

32(a) Coverage

* * * * *

Paragraph 32(a)(1)(ii)

* * * * *

2. *Annual adjustment of \$400 amount.*

* * * * *

- ix. For 2004, \$499, reflecting a 2.22 percent increase in the CPI-U from June 2002 to June 2003, rounded to the nearest whole dollar.

* * * * *

FINAL RULE—AMENDMENT TO REGULATION CC

The Board of Governors is amending 12 C.F.R. Part 229, Appendix A of its Regulation CC (Availability of Funds and Collection of Checks). The Board of Governors is amending Appendix A of Regulation CC to delete the reference to the Pittsburgh check processing office of the Federal Reserve Bank of Cleveland and reassign the Federal Reserve routing symbols currently listed under that office to the head office of the Federal Reserve Bank of Cleveland. These amendments reflect the restructuring of check processing operations within the Federal Reserve System. The Board also is amending appendices A and E of Regulation CC to replace all references to Thomson Financial Publishing Inc. with more general references to “an agent of the American Bankers Association.”

Effective November 1, 2003, 12 C.F.R. Part 229 is amended as follows:

Part 229—Availability of Funds and Collection of Checks (Regulation CC)

1. The authority citation for Part 229 continues to read as follows:

Authority: 12 U.S.C. 4001 *et seq.*

2. The first sentence of A. and the Fourth Federal Reserve District routing symbol list in Appendix A are revised to read as follows:

Appendix A to Part 229—Routing Number Guide to Next-Day Availability Checks and Local Checks.

- A. Each bank is assigned a routing number by an agent of the American Bankers Association. * * *

3. Appendix E is amended by removing the phrase "Thomson Financial Publishing Inc." in sections II.DD., XVIII.A.2.b.ii., and XXII.B.2.b.i. and adding the phrase "an agent of the American Bankers Association" in its place.

**ORDERS ISSUED UNDER BANK HOLDING
COMPANY ACT**

Orders Issued Under Section 3 of the Bank Holding
Company Act

Woori Finance Holdings Co., Ltd.
Seoul, Korea

Woori Bank
Seoul, Korea

Order Approving the Formation of a Bank Holding
Company and the Acquisition of a Bank

Woori Finance Holdings Co., Ltd. ("WFH") has requested the Board's approval under section 3 of the Bank Holding Company Act ("BHC Act") (12 U.S.C. § 1842) to become a bank holding company and acquire indirectly all the voting shares of Panasia Bank, National Association, Fort Lee, New Jersey ("Panasia"). Woori Bank ("Woori"), a wholly owned subsidiary of WFH and a bank holding company within the meaning of the BHC Act, has also

requested the Board's approval under section 3 to acquire indirectly all the voting shares of Panasia.¹

Notice of the proposals, affording interested persons an opportunity to submit comments, has been published (68 *Federal Register* 14,658 and 17,808 (2003)). The time for filing comments has expired, and the Board has considered the proposal in light of the factors set forth in section 3 of the BHC Act.

WFH is a Korean financial holding company controlled by the Korea Deposit Insurance Company ("KDIC").²⁵ With total consolidated assets of \$97 billion, WFH is the second largest banking organization in Korea.³ Woori, with total consolidated assets of \$74 billion, is WFH's lead subsidiary bank and the third largest bank in Korea. In the United States, Woori operates agencies in New York City and Los Angeles. Woori America, with total assets of \$354 million, controls approximately \$319 million in deposits, representing less than 1 percent of total deposits in insured depository institutions in the United States ("total U.S. insured deposits").⁴ Woori America operates branches in New York and New Jersey.⁵

Panasia, with total assets of \$213 million, controls \$187 million in deposits, representing less than 1 percent of total U.S. insured deposits. Panasia serves Korean-American communities in the New York City, Philadelphia, and Washington, D.C. metropolitan areas.⁶

Interstate Analysis

Section 3(d) of the BHC Act allows the Board to approve an application by a bank holding company to acquire control of a bank holding company or bank located in a state other than the home state of the applicant if certain conditions are met. For purposes of the BHC Act, the home state of WFH and Woori ("Applicants") is New York,²⁶ and

1. Woori owns all of the capital stock of Woori America Bank, New York, New York ("Woori America"), a state-chartered nonmember bank. Under the proposal, Woori America would acquire all the voting shares of Panasia, and Panasia immediately would be merged with and into Woori America. The proposed merger has been approved by the Federal Deposit Insurance Corporation ("FDIC") pursuant to the Bank Merger Act, and the New York State Banking Department.

2. In 2002, the KDIC sold approximately 12 percent of the voting shares of WFH in a public offering, and it now owns approximately 88 percent of WFH. Under Korea's Financial Holding Companies Act, the KDIC is required to divest fully its ownership in WFH by the end of 2005.

3. Foreign asset and ranking data are as of December 31, 2002, and use exchange rates then in effect.

4. Domestic asset data are as of March 31, 2003, and deposit data are as of December 31, 2002. Insured depository institutions include all insured banks, savings banks, and savings associations.

5. Woori America has its head office and two branches in New York City and branches in Fort Lee and Ridgefield, New Jersey.

6. Panasia, currently a subsidiary of National Penn Bancshares, Boyertown, Pennsylvania, operates offices in Fort Lee, Palisades Park, and Closter, New Jersey; Philadelphia and Cheltenham, Pennsylvania; and Annandale, Virginia.

7. A bank holding company's home state is the state in which the total deposits of all banking subsidiaries of such company were the largest on July 1, 1966, or the date on which the company became a bank holding company, whichever is later. 12 U.S.C. § 1841(o)(4)(C).

Panasia is located in New Jersey, Pennsylvania, and Virginia.⁸ Based on a review of all the facts of record, including a review of relevant federal and state statutes, the Board finds that all conditions for an interstate acquisition enumerated in section 3(d) are met in this case.⁹ Accordingly, the Board is permitted to approve the proposal under section 3(d) of the BHC Act.

Factors Under the Bank Holding Company Act

The BHC Act sets forth the factors that the Board must consider when reviewing the formation of bank holding companies or the acquisition of banks. These factors are the competitive effects of the proposal in the relevant geographic markets; the convenience and needs of the communities to be served, including the records of performance of the insured depository institutions involved in the transaction under the Community Reinvestment Act ("CRA");¹⁰ the financial and managerial resources and future prospects of the companies and banks involved in the proposal; the availability of information to determine and enforce compliance with the BHC Act and other applicable federal banking laws; and, in the case of applications involving a foreign bank such as Woori, whether the foreign bank is subject to comprehensive supervision and regulation on a consolidated basis by its home country supervisor.¹¹

The Board has considered these factors in light of a record that includes information provided by Applicants, confidential supervisory and examination information, and publicly reported financial and other information. The Board also has consulted with and considered information provided by the primary home country supervisor of Woori.

Competitive Considerations

Section 3 of the BHC Act prohibits the Board from approving a proposal that would result in a monopoly or be in furtherance of a monopoly. The BHC Act also prohibits the Board from approving a proposed bank acquisition that would substantially lessen competition in any relevant banking market unless the anticompetitive effects of the proposal in that banking market are clearly outweighed in

the public interest by the probable effects of the proposal in meeting the convenience and needs of the community to be served.¹²

Woori America and Panasia compete directly in the New York–New Jersey Metropolitan banking market ("New York banking market").¹³ Consummation of the proposal would be consistent with the Department of Justice Merger Guidelines ("DOJ Guidelines") and Board policies and precedent.¹⁴ In light of all the facts of record, the Board concludes that consummation of the proposal would not have a significantly adverse effect on competition or on the concentration of banking resources in any relevant banking market, and that competitive considerations are consistent with approval.¹⁵

Convenience and Needs Considerations

The Board has carefully considered the effect of the proposal on the convenience and needs of the communities to be served in light of all the facts of record, including the records of the relevant depository institutions under the CRA. As provided in the CRA, the Board evaluates the record of an institution in light of examinations of the CRA performance records of the institution by the appropriate federal supervisory agencies. An institution's most recent CRA performance evaluation is a particularly important consideration in the applications process because it represents a detailed, on-site evaluation of the institution's over-

12. 12 U.S.C. § 1842(c)(1).

13. The New York banking market is defined as New York City; Bronx, Dutchess, Kings, Nassau, Orange, Putnam, Queens, Richmond, Rockland, Suffolk, Sullivan, Ulster, and Westchester Counties in New York; Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex, Union, Warren, and a portion of Mercer Counties in New Jersey; Pike County in Pennsylvania; and Fairfield and portions of Litchfield and New Haven Counties in Connecticut.

14. Under the DOJ Guidelines, 49 *Federal Register* 26,823 (1984), a market is considered unconcentrated if the post-merger Herfindahl–Hirschman Index ("HHI") is below 1000. The Department of Justice has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger or acquisition increases the HHI by at least 200 points. The Department of Justice has stated that the higher than normal HHI thresholds for screening bank mergers or acquisitions for anticompetitive effects implicitly recognize the competitive effects of limited-purpose lenders and other nondepository financial institutions.

15. Woori America controls deposits of \$296 million in the New York banking market, representing less than 1 percent of total deposits in depository institutions in the market ("market deposits"), and Panasia controls deposits of \$141 million in the market. On consummation of the proposal, Woori America would be the 79th largest depository institution in the New York banking market, controlling deposits of \$437 million, representing less than 1 percent of market deposits. The HHI would remain unchanged at 960 after consummation of the proposal, and numerous competitors would remain in the market. Deposit and market share data are as of June 30, 2002, and are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board previously has indicated that thrift institutions have become, or have the potential to become, significant competitors of commercial banks. See *Midwest Financial Group*, 75 *Federal Reserve Bulletin* 386 (1989); *National City Corporation*, 70 *Federal Reserve Bulletin* 743 (1984).

8. For purposes of section 3(d), the Board considers a bank to be located in the states in which the bank is chartered, headquartered, or operates a branch.

9. Applicants meet the capital and managerial requirements established under applicable law. 12 U.S.C. § 1842(d)(1)(A). On consummation of the proposal, Applicants would control less than 10 percent of total U.S. insured deposits and would not exceed applicable deposit limitations in any state as established under state and federal law. 12 U.S.C. § 1842(d)(2). None of the relevant states specifies a minimum period of time a bank to be acquired through an interstate acquisition must have been in existence. 12 U.S.C. § 1842(d)(1)(B). All other requirements of section 3(d) of the BHC Act would be met on consummation of the proposal.

10. 12 U.S.C. § 2901 *et seq.*

11. 12 U.S.C. § 1842(c).

all record of performance under the CRA by its appropriate federal supervisor.¹⁶

The Board notes that Woori America and Panasia received “satisfactory” ratings at their most recent CRA performance examinations.¹⁷ Based on all the facts of record, the Board concludes that considerations relating to the convenience and needs of the communities to be served are consistent with approval.

Financial, Managerial, and Other Supervisory Factors

The BHC Act requires the Board to consider the financial and managerial resources and future prospects of the companies and banks involved in an acquisition.¹⁸ In assessing the financial and managerial strength of Applicants and the banks to be acquired, the Board has reviewed information provided by Applicants, confidential supervisory and examination information, and publicly reported and other financial information. In addition, the Board has consulted relevant supervisory authorities in Korea.¹⁹

In evaluating financial factors in expansion proposals by banking organizations, the Board consistently has considered capital adequacy to be especially important. Woori America is well capitalized and would remain so on consummation of the proposal. The capital ratios of WFH and Woori would continue to exceed the minimum levels required under the Basel Capital Accord and are considered equivalent to the capital ratios that would be required of a U.S. banking organization. The Board notes that the proposed transaction is relatively small and would be financed by Woori with internally available funds.

The Board has reviewed supervisory information from the home country authorities responsible for supervising Woori, as well as reports of examination from the appropriate federal and state supervisors of Woori America and the U.S. operations of Woori concerning the proposal and the managerial resources of Applicants and Woori America. Based on all the facts of record, the Board concludes that the financial and managerial resources and future prospects of Applicants, Woori America, and Panasia are consistent with approval under section 3 of the BHC Act.

Section 3 of the BHC Act also provides that the Board may not approve an application involving a foreign bank unless the bank is subject to comprehensive supervision or regulation on a consolidated basis by the appropriate authorities in the bank’s home country.²⁰ In this light, the

Board has considered the following information. In early 1997, the Korean economy experienced difficulties in the financial sector.²¹ To address these difficulties, the Korean government took measures to reform the financial sector, including restructuring bank regulation and supervision through the establishment of a new supervisory authority for Korean financial institutions, the Financial Supervisory Commission (“FSC”). The FSC is responsible for promulgating supervisory regulations, making policy decisions about supervision, and imposing sanctions on financial institutions. The Korean Financial Supervisory Service (“FSS”), the executive body of the FSC, is responsible for regulation and supervision of Korean financial institutions. The FSS has a broad range of supervisory and enforcement tools to carry out its supervisory functions.

In addition to restructuring the supervisory agencies, Korea has instituted several new requirements and prudential limitations applicable to banks that are intended to address gaps in the supervisory system that became evident during and after the financial crisis in 1997. The changes include a new asset quality assessment framework, tighter limitations on loans to a single borrower and to conglomerates (including through trust accounts), limits on loans to a shareholder that owns more than 10 percent of a financial holding company or a bank, a prompt corrective action framework, measures to strengthen of capital requirements, and improvements in accounting policies to bring them more into accordance with international accounting standards.

The FSS also has instituted restrictions on relationships between Korean banks and their affiliates. Transactions between a bank and its subsidiaries must be on terms that are fair and reasonable. In addition, Korean banks are generally prohibited from making a loan to any officer or employee of the bank or of its subsidiaries.

Financial holding companies were introduced in Korea by legislation that became effective in 2000.²² Prior

225.13(a)(4). Regulation K provides that a foreign bank will be considered to be subject to comprehensive supervision or regulation on a consolidated basis if the Board determines that the bank is supervised or regulated in such a manner that its home country supervisor receives sufficient information on the worldwide operations of the bank, including its relationship to any affiliates, to assess the bank’s overall financial condition and its compliance with law and regulation. *See* 12 C.F.R. 211.24(c)(1).

21. In the aftermath of Korea’s financial crisis, the Board determined that the Korean authorities were actively working to establish a framework for consolidated supervision in connection with applications to establish branches. *Housing & Commercial*, 83 *Federal Reserve Bulletin* 935 (1997), *Kookmin Bank*, 86 *Federal Reserve Bulletin* 291 (2000) and 87 *Federal Reserve Bulletin* 786 (2001). As noted below, there have been significant reforms of the Korean bank supervisory regime since 1997. The International Monetary Fund (“IMF”) recently conducted a Financial System Stability Assessment for Korea in which it reviewed compliance by Korea with the Basel Core Principles for Effective Banking Supervision. The IMF staff concluded that the supervisory and regulatory regime for the financial sector has been substantially strengthened, and recent reforms have helped achieve a high degree of observance of international standards and codes. *See* IMF Country Report No. 03/81 (March 2003).

22. A Korean financial holding company may only engage in activities through its subsidiaries, unless the activities concern the management of those subsidiaries and related businesses.

16. *Interagency Questions and Answers Regarding Community Reinvestment*, 66 *Federal Register* 36,620 and 36,639 (2001).

17. Woori America received a “satisfactory” CRA performance rating from the FDIC, as of November 1997; and Panasia received a “satisfactory” CRA performance rating from the OCC, as of September 2002.

18. 12 U.S.C. § 1842(c)(2).

19. The Korean Financial Supervisory Service has indicated that it has no objection to the acquisition of Panasia by Applicants, and the proposal has been approved by Korea’s Ministry of Finance and Economy.

20. 12 U.S.C. § 1842(c)(3)(B). Under Regulation Y, the Board uses the standards enumerated in Regulation K to determine whether a foreign bank that has applied under section 3 of the BHC Act is subject to consolidated home country supervision. *See* 12 C.F.R.

approval from the FSS is required to establish a financial holding company and before the company may invest in subsidiaries. Supervision of financial holding companies currently consists of consolidated reporting requirements and annual examinations.

The FSS has primary responsibility for the supervision of WFH and Woori. The FSS conducts annual on-site examinations of Woori, and targeted examinations when considered necessary. The examinations cover areas such as capital adequacy, liquidity, asset quality, and risk management processes. These examinations include a review of Woori's internal audit function and internal audit reports. Woori's foreign branches and subsidiaries are also subject to on-site examination.

Woori is subject to extensive reporting requirements by the FSS, including information filed monthly, quarterly, semiannually and annually. These reports include information on overseas branches and subsidiaries. The FSS also reviews Woori's internal and external audit reports.

Under Korean law, banks are subject to limitations on loans to one borrower or a group of borrowers under common control. With respect to affiliate transactions, a bank is limited to an aggregate exposure to related parties of 20 percent of the bank's capital.

In addition, several other regulators oversee Korean banks, including Woori. The KDIC, the Bank of Korea, and the Korean Financial Intelligence Unit all have limited authority to conduct special examinations of Korean financial institutions. Korean financial supervisors, including Korea's Securities and Futures Commission, share supervisory information about Korean financial institutions as appropriate.

Based on this finding and all the facts of record, the Board concludes that Woori is subject to comprehensive supervision on a consolidated basis by its home country supervisor.²³

In addition, section 3 of the BHC Act requires the Board to determine that a foreign bank has provided adequate assurances that it will make available to the Board such information on its operations and activities and those of its affiliates that the Board deems appropriate to determine and enforce compliance with the BHC Act.²⁴ The Board has reviewed the restrictions on disclosure in relevant jurisdictions in which WFH and Woori have material operations and has communicated with relevant government authorities concerning access to information. In addition, WFH and Woori have committed to make available to the Board such information on their operations and the operations of their affiliates that the Board deems necessary to determine and enforce compliance with the BHC Act, the IBA, and other applicable federal laws. WFH and

23. The FSS also has supervisory authority with respect to WFH and its nonbanking subsidiaries. The FSS conducts inspections of WFH and its subsidiaries and requires WFH to submit reports about its operations on a consolidated basis. The FSS also may review transactions between WFH and its subsidiaries and has authority to require WFH to take measures necessary to ensure the safety and soundness of the WFH organization.

24. 12 U.S.C. § 1842(c)(3)(A).

Woori also have committed to cooperate with the Board to obtain any waivers or exemptions that may be necessary to enable WFH and its affiliates to make such information available to the Board. In light of these commitments, the Board concludes that WFH and Woori have provided adequate assurances of access to any appropriate information that the Board may request. For these reasons, and based on all the facts of record, the Board concludes that the supervisory factors it is required to consider under section 3(c)(3) of the BHC Act are consistent with approval.

Conclusion

Based on the foregoing and in light of all the facts of record, the Board has determined that the applications should be, and hereby are, approved. In reaching this conclusion, the Board has considered all the facts of record in light of the factors that it is required to consider under the BHC Act and other applicable statutes. The Board's approval is specifically conditioned on compliance by Applicants with all the representations and commitments made in connection with the applications, commitments referred to in this order, and the receipt of all other regulatory approvals. These representations, commitments, and conditions are deemed to be conditions imposed in writing by the Board in connection with its findings and decision and, as such, may be enforced in proceedings under applicable law.

The transaction shall not be consummated before the fifteenth calendar day after the effective date of this order, and the proposal may not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, acting pursuant to delegated authority.

By order of the Board of Governors, effective August 4, 2003.

Voting for this action: Chairman Greenspan, Vice Chairman Ferguson, and Governors Bies, Olson, Bernanke, and Kohn. Absent and not voting: Governor Gramlich.

ROBERT DEV. FRIERSON
Deputy Secretary of the Board

Orders Issued Under Section 4 of the Bank Holding Company Act

Arvest Bank Group, Inc.
Bentonville, Arkansas

Order Approving the Acquisition of a Savings Association

Arvest Bank Group, Inc. ("Arvest"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act") has requested the Board's approval under section 4(c)(8) and 4(j) of the BHC Act (12 U.S.C.

§1843(c)(8) and 1843(j)) and section 225.24 of the Board's Regulation Y (12 C.F.R. 225.24) to acquire Superior Financial Corp., Little Rock ("Superior"), and its wholly owned subsidiary, Superior Federal Bank, FSB, Fort Smith ("Thrift"), both in Arkansas. Arvest would thereby engage in operating a savings association. Arvest also proposes to acquire the nondepository subsidiaries of Superior and engage in a variety of nonbanking activities in accordance with the BHC Act and applicable Board regulations.¹

Notice of the proposal, affording interested persons an opportunity to comment, has been published in the *Federal Register* (68 *Federal Register* 39,952 (2003)). The time for filing comments has expired, and the Board has considered the notice and all comments received in light of the factors set forth in section 4 of the BHC Act.

Arvest, with total assets of \$4.9 billion, operates depository institutions in Arkansas, Missouri, and Oklahoma.² Arvest is the second largest depository organization in Arkansas, controlling deposits of \$2.3 billion, representing 6.5 percent of total deposits of insured depository institutions in the state ("state deposits").³ Arvest is the seventh largest depository organization in Oklahoma, controlling deposits of \$1.6 billion, representing 4 percent of state deposits.

Superior operates depository institutions in Arkansas and Oklahoma. Superior is the eighth largest depository organization in Arkansas, controlling deposits of \$875.4 million, representing 2.5 percent of state deposits. In Oklahoma, Superior is the twentieth largest depository organization, controlling deposits of \$323.1 million, representing less than 1 percent of state deposits.

On consummation of the proposal, Arvest would remain the second largest depository organization in Arkansas, controlling deposits of \$3.2 billion, representing 9 percent of state deposits, and would become the sixth largest depository organization in Oklahoma, controlling deposits of \$2 billion, representing 4.8 percent of state deposits.

The Board previously has determined by regulation that the operation of a savings association by a bank holding company is closely related to banking for purposes of section 4(c)(8) of the BHC Act.⁴ The Board requires that savings associations acquired by bank holding companies conform their direct and indirect activities to those permissible for bank holding companies under section 4 of the BHC Act. Arvest has committed to conform all the activi-

ties of Superior to those permissible under section 4(c)(8) of the BHC Act and Regulation Y. In addition, the Board has determined that extending credit, providing securities brokerage services, providing credit insurance, and providing general insurance in a town with a population of 5000 or less are activities that are closely related to banking.⁵ Arvest has committed to conduct each of the activities in accordance with the Board's regulations and orders governing them.

In reviewing the proposal, the Board is required by section 4(j)(2)(A) of the BHC Act to determine that the acquisition of Superior and Thrift by Arvest "can reasonably be expected to produce benefits to the public . . . that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."⁶ As part of its evaluation of a proposal under these public interest factors, the Board reviews the financial and managerial resources of the companies involved, the effect of the proposal on competition in the relevant markets, the record of the relevant insured depository institutions under the Community Reinvestment Act (12 U.S.C. §2901 *et seq.*) ("CRA"), and other public interest factors.

Financial and Managerial Considerations

The Board has carefully reviewed the financial and managerial resources of the institutions involved. The Board has considered, among other things, confidential reports of examination and supervisory information from their primary federal supervisors that assess the financial and managerial resources of the organizations, and information from Arvest. The Board notes that Arvest is and will remain well capitalized on consummation of the proposal. Based on all the facts of record, the Board concludes that the financial and managerial resources of the institutions involved are consistent with approval of the proposal.

Competitive Considerations

As part of its consideration of the public interest factors under section 4 of the BHC Act, the Board has considered carefully the competitive effects of the proposal in light of all the facts of record.⁷ Arvest and Superior compete directly in five banking markets.⁸ The Board has reviewed carefully the competitive effects of the proposal in each of these banking markets in light of all the facts of record, including the number of competitors that would remain in the market, the relative share of total deposits in depository institutions in the market ("market deposits") that Arvest would control,⁹ the concentration level of market deposits

1. Arvest would acquire Superior Finance Company, Superior Financial Services, Inc., and Southwest Protective Life Insurance Company, all in Fort Smith, and Superior Insurance Services, Paris, Arkansas. These subsidiaries engage in the following nonbanking activities: extending credit, providing securities brokerage services, providing credit insurance, and providing insurance agency activities in a town with a population of 5000 or less pursuant to sections 225.28(b)(1), (7)(i), (11)(i), and (11)(iii) of Regulation Y (12 C.F.R. 225.28(b)(1), (7)(i), (11)(i), and (11)(iii)).

2. Asset data are as of March 31, 2003.

3. Deposit and market share data are as of June 30, 2002. In this context, depository institutions include commercial banks, savings banks, and savings associations.

4. 12 C.F.R. 225.28(b)(4)(ii).

5. 12 C.F.R. 225.28(b)(1), (7)(i), (11)(i), and (11)(iii).

6. 12 U.S.C. §1843(j)(2)(A).

7. *See, e.g., First Hawaiian, Inc., 77 Federal Reserve Bulletin* (1991).

8. The markets are described in Appendix A.

9. Market share data are based on calculations in which the deposits of thrift institutions are included at 50 percent before consummation. The Board has previously indicated that thrift institutions have

and the increase in this level as measured by the Herfindahl-Hirschman Index ("HHI") under the Department of Justice Merger Guidelines ("DOJ Merger Guidelines"),¹⁰ and other characteristics of the markets.

Consummation of the proposal would be consistent with the DOJ Guidelines in all five banking markets. After consummation of the proposal, four of these markets would remain moderately concentrated as measured by the HHI.¹¹

The Fayetteville/Springdale banking market, however, is highly concentrated. Arvest is the largest depository organization in the market, controlling approximately \$1.9 billion in deposits, representing 42.2 percent of market deposits. Superior is the twentieth largest depository organization in the market, controlling deposits of \$16.6 million, representing less than 1 percent of market deposits. On consummation of the proposal, Arvest would remain the largest depository organization in the market, controlling deposits of \$1.9 billion, representing 42.8 percent of market deposits.

The HHI would increase 48 points to 2073 in the Fayetteville/Springdale banking market, consistent with the DOJ Guidelines. In addition, 20 other depository institutions would remain in the market, and factors indicate that the Fayetteville/Springdale market is attractive for entry. Since 1997, the Fayetteville-Springdale metropolitan statistical area ("MSA") has had the highest annual average rates of increase in population and per-capita income of any MSA in Arkansas. Two commercial banks have also entered the market *de novo* since 2000.

Based on all the facts of record, the Board concludes that consummation of the proposal would not result in any significantly adverse effects on competition or on the concentration of banking resources in the Fayetteville/Springdale banking market or in any other relevant banking market.

The Board also has considered the effects of the proposed transaction on competition for nonbanking activities.

become, or have the potential to become, significant competitors of commercial banks. See, e.g., *Midwest Financial Group*, 75 *Federal Reserve Bulletin* 386 (1989); *National City Corporation*, 70 *Federal Reserve Bulletin* 743 (1984). Thus, the Board regularly has included thrift deposits in the calculation of market share on a 50 percent weighted basis. Because Superior's deposits are being acquired by a commercial banking organization, they are included at 100 percent in the calculation of Arvest's post-consummation share of market deposits. See *Norwest Corporation*, 78 *Federal Reserve Bulletin* 452 (1992); *First Banks, Inc.*, 76 *Federal Reserve Bulletin* 669 (1990).

10. Under these guidelines, 49 *Federal Register* 26,823 (1984), a market is considered moderately concentrated if the post-merger HHI is between 1000 and 1800 and highly concentrated if the post-merger HHI is more than 1800. The Department of Justice has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by more than 200 points. The Department of Justice has stated that the higher than normal thresholds for an increase in the HHI when screening bank mergers and acquisitions for anticompetitive effects implicitly recognize the competitive effects of limited-purpose and other nondepository financial entities.

11. These markets and the competitive effects of the proposal on the concentration of banking resources in the markets are described in Appendix B.

To the extent that Arvest and Superior offer different types of nonbanking products or services, the proposal would not result in a significant loss of competition. Arvest and Superior compete directly in providing insurance agency and securities brokerage services. The markets for these nonbanking activities are regional or national in scope and are unconcentrated. The record in this case also indicates that there are numerous providers of these services. Based on all the facts of record, the Board concludes that consummation of the proposal would have a *de minimis* effect on competition for these nonbanking activities.

CRA Record of Performance

In acting on notices to acquire a savings association, the Board also reviews the records of performance of the relevant insured depository institutions under the CRA.¹² The CRA requires the federal supervisory agencies to encourage financial institutions to help meet the credit needs of local communities in which they operate, consistent with their safe and sound operation, and requires the appropriate federal financial supervisory agency to take into account an institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, in evaluating bank expansionary proposals.

Arvest's only subsidiary insured depository institution, Arvest Bank, Fayetteville, Arkansas, received a "satisfactory" rating at its most recent CRA performance evaluation by the Federal Reserve Bank of St. Louis, as of September 2002. Thrift received a "satisfactory" rating at its most recent CRA performance evaluation by the Office of Thrift Supervision, as of January 2001. Based on all the facts of record, the Board concludes that the CRA performance records of the institutions involved are consistent with approval of the proposal.

Other Considerations

As part of its evaluation of the public interest factors, the Board also has reviewed carefully the public benefits and possible adverse effects of the proposal. The record indicates that consummation of the proposal would result in benefits to consumers and businesses currently served by Superior. Superior's consumer and commercial customers would have access to Arvest's expanded lines of products and services. The Board notes that there are also public benefits to be derived from allowing capital markets to operate so that bank holding companies can make potentially profitable investments in nonbanking companies and from permitting banking organizations to allocate their resources in the manner they consider to be most efficient when such investments and actions are consistent, as in this case, with the relevant considerations under the BHC Act.¹³

12. See, e.g., *Citigroup Inc.*, 88 *Federal Reserve Bulletin* 485 (2002); *Banc One Corporation*, 83 *Federal Reserve Bulletin* 602 (1997).

13. See *BB&T Corporation*, 87 *Federal Reserve Bulletin* 545 (2001).

Based on the foregoing and all the facts of record, the Board has determined that consummation of the proposal can reasonably be expected to produce public benefits that would outweigh any potential adverse effects under the standard of review set forth in section 4(j)(2) of the BHC Act.

Conclusion

Based on the foregoing, the Board has determined that the proposal should be, and hereby is, approved. The Board's approval is specifically conditioned on compliance by Arvest with all the commitments made in connection with the notice. The Board's determination also is subject to all the conditions in Regulation Y, including those in sections 225.7 and 225.25(c) (12 C.F.R. 225.7 and 225.25(c)), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to ensure compliance with, or to prevent evasion of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. The commitments and conditions relied on by the Board in reaching this decision are conditions imposed in writing by the Board in connection with its findings and decision and, as such, may be enforced in proceedings under applicable law.

The transaction may not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or the Federal Reserve Bank of St. Louis, acting pursuant to delegated authority.

By order of the Board of Governors, effective August 22, 2003.

Voting for this action: Vice Chairman Ferguson and Governors Gramlich, Bies, Olson, Bernanke, and Kohn. Absent and not voting: Chairman Greenspan.

ROBERT DEV. FRIERSON
Deputy Secretary of the Board

Appendix A

Banking Markets in which Arvest and Superior Compete Directly

Arkansas

Fayetteville–Springdale

Benton, Madison, and Washington Counties.

Fort Smith (AR–OK)

Crawford and Sebastian Counties and the city of Mansfield in Arkansas, and Sequoyah County and the northern half of LeFlore County in Oklahoma.

Harrison

Boone, Marion, Newton, and Searcy Counties.

Little Rock

Pulaski and Saline Counties; the townships of Magness, Ward, Caroline, York, Oak Grove, and Butler in Lonoke County; and the townships of El Paso, Royal, and Union in White County.

Oklahoma

Tulsa

The Tulsa Ranally Metro Area; Mayes County, excluding the towns of Disney, Langley, Pensacola, and Spavinaw; and the northern half of Okmulgee County, including the towns of Okmulgee, Beggs, and Morris.

Appendix B

Certain Banking Markets in which Arvest and Superior Compete

Arkansas

Fort Smith (AR–OK)

Arvest is the fourteenth largest depository organization in the market, controlling deposits of approximately \$63.5 million, representing 2.2 percent of market deposits. Superior is the fourth largest depository organization in the market, controlling deposits of \$164.6 million, representing 5.8 percent of market deposits. On consummation of the proposal, Arvest would become the third largest depository organization in the market, controlling deposits of approximately \$392.7 million, representing 13 percent of market deposits. The HHI would not increase.

Harrison

Arvest is the third largest depository organization in the market, controlling deposits of approximately \$129 million, representing 16.7 percent of market deposits. Superior is the eleventh largest depository organization in the market, controlling deposits of \$9.8 million, representing 1.3 percent of market deposits. On consummation of the proposal, Arvest would become the largest depository organization in the market, controlling deposits of approximately \$148.7 million, representing 19 percent of market deposits. The HHI would increase by 54 points to 1370.

Little Rock

Arvest is the eleventh largest depository organization in the market, controlling deposits of approximately \$161.3 million, representing 2.5 percent of market deposits. Superior is the thirteenth largest depository organization in the market, controlling deposits of \$156.1 million, representing

2.5 percent of market deposits. On consummation of the proposal, Arvest would become the fifth largest depository organization in the market, controlling deposits of approximately \$473.4 million, representing 7.3 percent of market deposits. The HHI would not increase.

Oklahoma

Tulsa

Arvest is the fifth largest depository organization in the market, controlling deposits of approximately \$535 million, representing 5 percent of market deposits. Superior is the thirty-ninth largest depository organization in the market, controlling deposits of \$29.7 million, representing less than 1 percent of market deposits. On consummation of the proposal, Arvest would remain the fifth largest depository organization in the market, controlling deposits of approximately \$594.5 million, representing 5.6 percent of market deposits. The HHI would not increase.

ORDERS ISSUED UNDER INTERNATIONAL BANKING ACT

CITIC Ka Wah Bank Limited Hong Kong Special Administrative Region People's Republic of China

Order Approving Establishment of Branches

CITIC Ka Wah Bank Limited ("Bank"),¹ Hong Kong S.A.R., the People's Republic of China, a foreign bank within the meaning of the International Banking Act ("IBA"), has applied under section 7(d) of the IBA (12 U.S.C. § 3105(d)) to establish branches in New York, New York, and Los Angeles, California. The Foreign Bank Supervision Enhancement Act of 1991, which amended the IBA, provides that a foreign bank must obtain the approval of the Board to establish a branch in the United States.

Notice of the application, affording interested persons an opportunity to comment, has been published in newspapers of general circulation in New York, New York (*New York Post*, August 23, 2002, and November 11, 2002), and Los Angeles, California (*Pasadena Star-News*, August 26, 2002). The time for filing comments has expired, and all comments have been considered.

Bank, with total assets of \$9.3 billion,² engages primarily in commercial and retail banking in Hong Kong. In January 2002, all of Bank's shares were acquired by CITIC Ka Wah Bank Limited ("CKWB"), Hong Kong, S.A.R., the People's Republic of China. Under an internal reorganization in November 2002, CKWB transferred substantially all its banking business to Bank, and Bank assumed

CKWB's name.³ CKWB had branches in New York, New York, and Los Angeles, California, and substantially all the assets and liabilities of these branches have been transferred to Bank as part of the reorganization.⁴ On November 4, 2002, the Federal Reserve System granted Bank's request to proceed with the acquisition of the banking business of CKWB before final action on Bank's application to establish offices in the United States.⁵

As discussed above, Bank conducts business as CITIC Ka Wah Bank Limited and is a wholly owned subsidiary of CITIC FHC. China International Trust & Investment Corporation ("CITIC"), Beijing, People's Republic of China, a state-owned enterprise, holds 55 percent of the shares of CITIC FHC, and no other shareholder holds more than 5 percent of the shares. CITIC's business is predominantly financial in nature, including investments in two commercial banks, a securities firm, trust and leasing companies, and an insurance company, and it also has investments in industrial and nonfinancial services companies.⁶

Bank's New York branch engages in commercial and retail lending, wholesale deposit services, loan participations and syndications, funds transfer and remittance services, trade financing, foreign exchange and money market trading, domestic and international bank facilities, and safe deposit box services. The Los Angeles branch engages in lending and other financing activities, but only takes deposits permitted for a corporation organized under section 25A of the Federal Reserve Act (12 U.S.C. § 611 *et seq.*).

In order to approve an application by a foreign bank to establish a branch in the United States, the IBA and Regulation K require the Board to determine that the foreign bank applicant engages directly in the business of banking outside of the United States and has furnished to the Board the information it needs to assess the application adequately. The Board also shall take into account whether the foreign bank and any foreign bank parent is subject to comprehensive supervision or regulation on a consolidated basis by its home country supervisor (12 U.S.C. § 3105(d)(2); 12 C.F.R. 211.24).⁷ The Board may also take

3. CKWB became a financial holding company over Bank and was renamed CITIC International Financial Holdings Limited ("CITIC FHC").

4. Bank could not retain the FDIC-insured status of CKWB's New York branch after the transfer. Accordingly, the insured deposits at CKWB's New York branch were not transferred to Bank's New York branch.

5. Prior Board approval generally is required for the establishment of branches by foreign banks. Regulation K provides that "to establish" an office means, among other things, to acquire directly, through merger, consolidation, or similar transaction with another foreign bank, the operations of an office that is open and conducting business. 12 C.F.R. § 211.21(k). The regulation further provides that under certain circumstances, a branch may be established through merger, consolidation, or similar transaction before receiving Board approval. 12 C.F.R. § 211.24(a)(6).

6. CITIC is a qualifying foreign banking organization within the meaning of Regulation K (12 C.F.R. § 211.23).

7. In assessing this standard, the Board considers, among other factors, the extent to which the home country supervisors: (i) ensure that the bank has adequate procedures for monitoring and controlling its activities worldwide; (ii) obtain information on the condition of the bank and its subsidiaries and offices through regular examination

1. Bank, formerly known as The Hongkong Chinese Bank Limited, assumed the name of its former parent bank after filing the application and now conducts business as CITIC Ka Wah Bank Limited.

2. Asset data are as of December 31, 2002.

into account additional standards as set forth in the IBA and Regulation K (12 U.S.C. § 3105(d)(3)–(4); 12 C.F.R. 211.24(c)(2)–(3)).

The IBA includes a limited exception to the general requirement relating to comprehensive, consolidated supervision (12 U.S.C. § 3105(d)(6)). This exception provides that if the Board is unable to find that a foreign bank seeking to establish a branch, agency, or commercial lending company is subject to comprehensive supervision or regulation on a consolidated basis by the appropriate authorities in its home country, the Board may nevertheless approve the application if: (i) the appropriate authorities in the home country of the foreign bank are actively working to establish arrangements for the consolidated supervision of such bank; and (ii) all other factors are consistent with approval (12 U.S.C. § 3105(d)(6)(A)). In deciding whether to exercise its discretion to approve an application under authority of this exception, the Board shall also consider whether the foreign bank has adopted and implemented procedures to combat money laundering. The Board also may take into account whether the home country of the foreign bank is developing a legal regime to address money laundering or is participating in multilateral efforts to combat it (12 U.S.C. § 3105(d)(6)(B)).

As noted above, Bank engages directly in the business of banking outside the United States. Bank also has provided the Board with information necessary to assess the application through submissions that address the relevant issues.

With respect to supervision by home country authorities, the Board previously has determined, in connection with applications involving other banks in Hong Kong, that those banks were subject to comprehensive supervision on a consolidated basis by the Hong Kong Monetary Authority (“HKMA”), the principal supervisory authority of banks in Hong Kong.⁸ Bank is supervised by the HKMA on substantially the same terms and conditions as those other banks. In this case, however, Bank is part of a large financial group headquartered in the People’s Republic of China. This group, headed by Bank’s ultimate parent, CITIC, includes a bank in the People’s Republic of China. Although the HKMA has authority to limit transactions by Bank with its affiliates and to obtain information from them, the HKMA does not have supervisory responsibility for CITIC.

reports, audit reports, or otherwise; (iii) obtain information on the dealings with and relationship between the bank and its affiliates, both foreign and domestic; (iv) receive from the bank financial reports that are consolidated on a worldwide basis or comparable information that permits analysis of the bank’s financial condition on a worldwide consolidated basis; (v) evaluate prudential standards, such as capital adequacy and risk asset exposure, on a worldwide basis. These are indicia of comprehensive, consolidated supervision. No single factor is essential, and other elements may inform the Board’s determination.

8. See *Bank of East Asia, Ltd.*, 84 *Federal Reserve Bulletin* 886 (1998); *Hong Kong and Shanghai Banking Co.*, 81 *Federal Reserve Bulletin* 902 (1995); *Liu Chong Hing Bank, Ltd.*, 81 *Federal Reserve Bulletin* 905 (1995); *Dah Sing Bank, Ltd.*, 80 *Federal Reserve Bulletin* 182 (1994).

Hong Kong is a member of the Financial Action Task Force and subscribes to its recommendations on measures to combat money laundering. In accordance with these recommendations, Hong Kong has enacted laws and created legislative and regulatory standards to deter money laundering. Money laundering is a criminal offense in Hong Kong, and financial institutions are required to establish internal policies, procedures, and systems for the detection and prevention of money laundering throughout their worldwide operations. Bank has policies and procedures to comply with these laws and regulations. Bank’s compliance with applicable laws and regulations is monitored by the HKMA and Bank’s internal and external auditors.

Based on all the facts of record, it has been determined that Bank’s home jurisdiction supervisory authority is actively working, in conjunction with the relevant supervisory authorities of the People’s Republic of China, to establish arrangements for the consolidated supervision of Bank, and that considerations relating to the steps taken by Bank and its home jurisdiction to combat money laundering are consistent with approval under this standard.⁹

The additional standards set forth in section 7 of the IBA and Regulation K (see 12 U.S.C. § 3105(d)(3)–(4); 12 C.F.R. 211.24(c)(2)–(3)) have also been taken into account. The HKMA has no objection to the establishment of the proposed branches.

Hong Kong’s risk-based capital standards are consistent with those established by the Basel Capital Accord. Bank’s capital is in excess of the minimum levels that would be required by the Accord and is considered equivalent to capital that would be required of a U.S. banking organization. Managerial and other financial resources of Bank also are considered consistent with approval, and Bank appears to have the experience and capacity to support the proposed branches. In addition, Bank has established controls and procedures for the proposed branches to ensure compliance with U.S. law, as well as controls and procedures for its worldwide operations generally.

With respect to access to information about Bank’s operations, the restrictions on disclosure in relevant jurisdictions in which Bank operates have been reviewed and relevant government authorities have been communicated with regarding access to information. Bank and its ultimate parent have committed to make available to the Board such information on the operations of Bank and any of its affiliates that the Board deems necessary to determine and enforce compliance with the IBA, the Bank Holding Company Act, and other applicable federal law. To the extent that the provision of such information to the Board may be prohibited by law or otherwise, Bank and its ultimate parent have committed to cooperate with the Board to obtain any necessary consents or waivers that might be required from third parties for disclosure of such informa-

9. In reaching this view, the oversight of Bank’s parent companies has been considered. Financial holding companies in Hong Kong are subject to the supervision of the HKMA and, accordingly, the HKMA supervises CITIC FHC. The Hong Kong Banking Ordinance also contains restrictions on transactions with affiliates.

tion. In addition, subject to certain conditions, the HKMA may share information on Bank's operations with other supervisors, including the Board. In light of these commitments and other facts of record, and subject to the condition described below, it has been determined that Bank has provided adequate assurances of access to any necessary information that the Board may request.

On the basis of all the facts of record, and subject to the commitments made by Bank and its ultimate parent, as well as the terms and conditions set forth in this order, Bank's application to establish branches is hereby approved.¹⁰ Should any restrictions on access to information on the operations or activities of Bank and its affiliates subsequently interfere with the Board's ability to obtain information to determine and enforce compliance by Bank or its affiliates with applicable federal statutes, the Board may require termination of any of Bank's direct or indirect

10. Approved by the Director of the Division of Banking Supervision and Regulation, with the concurrence of the General Counsel, pursuant to authority delegated by the Board.

activities in the United States. Approval of this application also is specifically conditioned on compliance by Bank and its ultimate parent with the commitments made in connection with this application and with the conditions in this order.¹¹ The commitments and conditions referred to above are conditions imposed in writing in connection with this decision and may be enforced in proceedings under 12 U.S.C. § 1818 against Bank and its affiliates.

By order, approved pursuant to authority delegated by the Board, effective August 6, 2003.

ROBERT DE V. FRIERSON
Deputy Secretary of the Board

11. The Board's authority to approve the establishment of the proposed branches parallels the continuing authority of the Office of the Comptroller of the Currency to license offices of a foreign bank. The Board's approval of this application does not supplant the authority of the Office of the Comptroller of the Currency to license the proposed offices of Bank in accordance with any terms or conditions that it may impose.

PENDING CASES INVOLVING THE BOARD OF GOVERNORS

This list of pending cases does not include suits against the Federal Reserve Banks in which the Board of Governors is not named a party.

Tavera v. Von Nothaus, et al., No. 03-763 (D. Oregon, filed June 5, 2003). Civil rights action for violation of rights in connection with the plaintiff's prosecution for passing "Liberty dollar coins" as lawful money.

Apffel v. Board of Governors, No. 03-343 (S.D. Texas, filed May 20, 2003). Freedom of Information Act case.

Albrecht v. Board of Governors, No. 02-5325 (D.C. Cir., filed October 18, 2002). Appeal of district court order dismissing challenge to the method of funding of the retirement plan for certain Board employees.

Community Bank & Trust v. United States, No. 01-571C (Ct. Fed. Cl., filed October 3, 2001). Action challenging

on constitutional grounds the failure to pay interest on reserve accounts held at Federal Reserve Banks.

Artis v. Greenspan, No. 01-CV-0400 (EGS) (D.D.C., complaint filed February 22, 2001). Employment discrimination action. On August 15, 2001, the district court consolidated the action with *Artis v. Greenspan*, No. 99-CV-2073 (EGS) (D.D.C., filed August 3, 1999), also an employment discrimination action.

Fraternal Order of Police v. Board of Governors, No. 1:98CV03116 (WBB) (D.D.C., filed December 22, 1998). Declaratory judgment action challenging Board regulation on labor-management relations at Reserve Banks.

To Readers of the Legal Developments Section of the *Bulletin*

The materials currently contained in the Legal Developments section of the *Federal Reserve Bulletin* are also available in various publications, in press releases, and on the Board's web site. The Board's Legal Developments web site, launched in September 2002, provides a convenient way of gaining access to material that has been published in the *Bulletin* for many years. The site is updated as orders and actions are finalized.

- Selected rulemaking actions (proposed and final) are first issued as press releases, which are available on the Board's web site at www.federalreserve.gov/boarddocs/press/bcreg/2003/. They are then published in the *Federal Register* (www.gpoaccess.gov/fr/index.html). On the Board's site, they can also be found in the Legal Developments section of the Banking Information and Regulation page at www.federalreserve.gov/boarddocs/legaldevelopments/rulemaking/. Interested persons may view proposals published for comment and comments received at www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm. Comments on proposals may also be submitted through this web site, by electronic mail, or in writing.
- Board orders issued under the Bank Holding Company Act, the Bank Merger Act, the Federal Reserve Act, and the International Banking Act are issued as attachments to press releases, which are available from 1996 on the Board's web site at www.federalreserve.gov/boarddocs/press/orders/2003/. Board orders issued under the Bank Holding Company Act can also be found at www.federalreserve.gov/boarddocs/legaldevelopments/ordersbhc/. Board orders issued under the Bank Merger Act, the Federal Reserve Act, and the International Bank-

ing Act, can also be found at www.federalreserve.gov/boarddocs/legaldevelopments/ordersother/.

- Applications approved under the Bank Holding Company Act, the Bank Merger Act, the Federal Reserve Act, and the International Banking Act are listed in the Board's weekly H.2 release "Actions of the Board, Its Staff, and the Federal Reserve Banks; Applications and Reports Received," which is available in paper copies by subscription from Publications Fulfillment and on the Board's web site at www.federalreserve.gov/releases/h2.
- Enforcement actions are issued as press releases. Actions since 1997 are available at www.federalreserve.gov/boarddocs/press/enforcement/2003/; actions since 1989 can be located by going to "Enforcement Actions" from the Banking and Information and Regulation page at www.federalreserve.gov/boarddocs/enforcement/.

Paper copies of these documents are also available upon request from the Board's Freedom of Information Office. Requests may be submitted by facsimile (202-872-7565); online at www.federalreserve.gov/generalinfo/foia/request.cfm; or by mail to the Secretary, Board of Governors of the Federal Reserve System, Freedom of Information Office, Washington, DC 20551.

Pending cases are listed in the Board's *Annual Report* in the "Litigation" chapter and on the web site at www.federalreserve.gov/boarddocs/legaldevelopments/cases.htm.

Because it is available elsewhere in a more timely fashion, much of the material currently being published in the Legal Developments section of the *Bulletin* will no longer be included in the *Bulletin* when it becomes a quarterly. Only Board orders will be included.

Financial and Business Statistics

A3 *GUIDE TO TABLES*

DOMESTIC FINANCIAL STATISTICS

Money Stock and Bank Credit

- A4 Reserves and money stock measures
- A5 Reserves of depository institutions and Reserve Bank credit
- A6 Reserves and borrowings—Depository institutions

Policy Instruments

FHLMC	Federal Home Loan Mortgage Corporation	REMICs	Real estate mortgage investment conduits
FmHA	Farmers Home Administration	RHS	Rural Housing Service
FNMA	Federal National Mortgage Association	RP	Repurchase agreement
FSA	Farm Service Agency	RTC	Resolution Trust Corporation
FSLIC	Federal Savings and Loan Insurance Corporation	SCO	Securitized credit obligation
G-7	Group of Seven	SDR	Special drawing right
		SIC	Standard Industrial Classification
		TIIS	Treasury inflation-indexed securities
		VA	Department of Veterans Affairs

GENERAL INFORMATION

In many of the tables, components do not sum to totals because of rounding.

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

“U.S. government securities” may include guaranteed issues of U.S. government agencies (the flow of funds figures also

include not fully guaranteed issues) as well as direct obligations of the U.S. Treasury.

“State and local government” also includes municipalities, special districts, and other political subdivisions.

1.10 RESERVES AND MONEY STOCK MEASURES

Percent annual rate of change, seasonally adjusted¹

19 Eurodollars ¹⁰	-3.5	28.9	19.2 ⁶	20.9	20.9 ⁷	23.1	44.8	-20.9	27.0

1. Unless otherwise noted, rates of change are calculated from average amounts outstanding during preceding month or quarter.

2. Figures incorporate adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements (See also table 1.20.)

3. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted, break-adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all weekly reporters whose vault cash exceeds their required reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

4. Composition of the money stock measures is as follows:

M1: (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float, and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. Seasonally adjusted M1 is computed by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.

M2: M1 plus (1) savings (including MMDAs), (2) small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and (3) balances in retail money market mutual funds. Excludes individual retirement accounts (IRAs) and Keogh balances at depository institutions and money market funds.

Seasonally adjusted M2 is calculated by summing savings deposits, small-denomination

time deposits, and retail money fund balances, each seasonally adjusted separately, and adding this result to seasonally adjusted M1.

M3: M2 plus (1) large-denomination time deposits (in amounts of \$100,000 or more), (2) balances in institutional money funds, (3) RP liabilities (overnight and term) issued by all depository institutions, and (4) eurodollars (overnight and term) held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Seasonally adjusted M3 is calculated by summing large time deposits, institutional money fund balances, RP liabilities, and eurodollars, each seasonally adjusted separately, and adding this result to seasonally adjusted M2.

5. Sum of (1) savings deposits (including MMDAs), (2) small time deposits, and (3) retail money fund balances, each seasonally adjusted separately.

6. Sum of (1) large time deposits, (2) institutional money fund balances, (3) RP liabilities (overnight and term) issued by depository institutions, and (4) eurodollars (overnight and term) of U.S. addressees, each seasonally adjusted separately.

7. Small time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRA and Keogh account balances at commercial banks and thrift institutions are subtracted from small time deposits.

8. Large time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

9. Large time deposits at commercial banks less those held by money market funds, depository institutions, the U.S. government, and foreign banks and official institutions.

10. Includes both overnight and term.

1. Amounts of vault cash held as reserves are shown in table 1.12, line 2.

2. Includes securities lent to dealers, which are fully collateralized by other U.S. Treasury securities.

3. Face value of the securities.

4. Compensation that adjusts for the effect of inflation on the original face value of inflation-indexed securities.

5. Cash value of agreements, which are fully collateralized by U.S. Treasury and federal agency securities.

6. Cash value of agreements, which are fully collateralized by U.S. Treasury securities.

7. Excludes required clearing balances and adjustments to compensate for float.

12 Adjustment	

1. Data in this table also appear in the Board's H.3 (502) weekly statistical release. For ordering address, see inside front cover. Data are not break-adjusted or seasonally adjusted.
 2. Excludes required clearing balances and adjustments to compensate for float and includes other off-balance-sheet "as-of" adjustments.
 3. Vault cash eligible to satisfy reserve requirements. It includes only vault cash held by those banks and thrift institutions that are not exempt from reserve requirements. Dates refer to the maintenance periods in which the vault cash can be used to satisfy reserve requirements.

4. All vault cash held during the lagged computation period by "bound" institutions (that is, those whose required reserves exceed their vault cash) plus the amount of vault cash applied during the maintenance period by "nonbound" institutions (that is, those whose vault cash exceeds their required reserves) to satisfy current reserve requirements.
 5. Total vault cash (line 2) less applied vault cash (line 3).
 6. Reserve balances with Federal Reserve Banks (line 1) plus applied vault cash (line 3).
 7. Total reserves (line 5) less required reserves (line 6).

			17	3.50	3.50			

1. Available for very short terms as a backup source of liquidity to depository institutions that are in generally sound financial condition in the judgment of the lending Federal Reserve Bank.

2. Available in appropriate circumstances to depository institutions that do not qualify for primary credit.

3. Available to help relatively small depository institutions meet regular seasonal needs for funds that arise from a clear pattern of intrayear movements in their deposits and loans and that cannot be met through special industry lenders. The discount rate on seasonal credit

takes into account rates charged by market sources of funds and ordinarily is reestablished on the first business day of each two-week reserve maintenance period.

4. Was available until January 8, 2003, to help depository institutions meet temporary needs for funds that could not be met through reasonable alternative sources. For earlier data, see the following publications of the Board of Governors: *Banking and Monetary Statistics, 1914–1941*, and *1941–1970*; and the *Statistical Digest, 1970–1979, 1980–1989*, and *1990–1995*. See also the Board's Statistics: Releases and Historical Data web pages (<http://www.federalreserve.gov/releases/H15/data.htm>).

1.15 RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS¹

Type of deposit	Requirement	
	Percentage of deposits	Effective date
<i>Net transaction accounts²</i>		
1 \$0 million–\$6 million ³	0	12/26/02
2 More than \$6 million–\$42.1 million ⁴	3	12/26/02
3 More than \$42.1 million ⁵	10	12/26/02
4 Nonpersonal time deposits ⁶	0	12/27/90
5 Eurocurrency liabilities ⁷	0	12/27/90

1. Required reserves must be held in the form of deposits with Federal Reserve Banks or vault cash. Nonmember institutions may maintain reserve balances with a Federal Reserve Bank indirectly, on a pass-through basis, with certain approved institutions. For previous reserve requirements, see earlier editions of the *Annual Report* or the *Federal Reserve Bulletin*. Under the Monetary Control Act of 1980, depository institutions include commercial banks, savings banks, savings and loan associations, credit unions, agencies and branches of foreign banks, and Edge Act corporations.

2. Transaction accounts include all deposits against which the account holder is permitted to make withdrawals by negotiable or transferable instruments, payment orders of withdrawal, or telephone or preauthorized transfers for the purpose of making payments to third persons or others. However, accounts subject to the rules that permit no more than six preauthorized, automatic, or other transfers per month (of which no more than three may be by check, draft, debit card, or similar order payable directly to third parties) are savings deposits, not transaction accounts.

3. Under the Garn–St Germain Depository Institutions Act of 1982, the Board adjusts the amount of reservable liabilities subject to a zero percent reserve requirement each year for the succeeding calendar year by 80 percent of the percentage increase in the total reservable liabilities of all depository institutions, measured on an annual basis as of June 30. No corresponding adjustment is made in the event of a decrease. The exemption applies only to accounts that would be subject to a 3 percent reserve requirement. Effective with the reserve maintenance period beginning December 26, 2002, for depository institutions that report weekly, and with the period beginning January 16, 2003, for institutions that report quarterly, the exemption was raised from \$5.7 million to \$6.0 million.

4. The Monetary Control Act of 1980 requires that the amount of transaction accounts against which the 3 percent reserve requirement applies be modified annually by 80 percent of the percentage change in transaction accounts held by all depository institutions, determined as of June 30 of each year. Effective with the reserve maintenance period beginning December 26, 2002, for depository institutions that report weekly, and with the period beginning January 16, 2003, for institutions that report quarterly, the amount was increased from \$41.3 million to \$42.1 million.

5. The reserve requirement was reduced from 12 percent to 10 percent on April 2, 1992, for institutions that report weekly, and on April 16, 1992, for institutions that report quarterly.

6. For institutions that report weekly, the reserve requirement on nonpersonal time deposits with an original maturity of less than 1.5 years was reduced from 3 percent to 1.5 percent for the maintenance period that began December 13, 1990, and to zero for the maintenance period that began December 27, 1990. For institutions that report quarterly, the reserve requirement on nonpersonal time deposits with an original maturity of less than 1.5 years was reduced from 3 percent to zero on January 17, 1991.

The reserve requirement on nonpersonal time deposits with an original maturity of 1.5 years or more has been zero since October 6, 1983.

7. The reserve requirement on eurocurrency liabilities was reduced from 3 percent to zero in the same manner and on the same dates as the reserve requirement on nonpersonal time deposits with an original maturity of less than 1.5 years (see note 5).

1. Sales, redemptions, and negative figures reduce holdings of the System Open Market Account; all other figures increase such holdings.

2. Transactions exclude changes in compensation for the effects of inflation on the principal of inflation-indexed securities. Transactions include the rollover of inflation compensation into new securities.

3. Cash value of agreements, which are collateralized by U.S. government and federal agency obligations.

4. Cash value of agreements, which are collateralized by U.S. Treasury securities.

1. Some of the data in this table also appear in the Board's H.4.1 (503) weekly statistical release. For ordering address, see inside front cover.

2. Includes securities lent to dealers, which are fully collateralized by other U.S. Treasury securities.

3. Face value of the securities.

4. Compensation that adjusts for the effect of inflation on the original face value of inflation-indexed securities.

5. Cash value of agreements, which are fully collateralized by U.S. Treasury and federal agency securities.

6. Valued daily at market exchange rates.

7. Includes special investment account at the Federal Reserve Bank of Chicago in Treasury bills maturing within ninety days.

8. Cash value of agreements, which are fully collateralized by U.S. Treasury securities.

9. Includes exchange-translation account reflecting the daily revaluation at market exchange rates of foreign exchange commitments.

10. Includes U.S. Treasury STRIPS and other zero coupon bonds at face value.

11. Includes face value of U.S. Treasury and agency securities held outright, compensation to adjust for the effect of inflation on the original face value of inflation-indexed securities, and cash value of repurchase agreements.

12. Face value of agreements, which are fully collateralized by U.S. Treasury securities.

14 Borrowings from the Federal Reserve	.32	.21	.07	.08	.08	.03	.03	.02	.03	.06	.16	.13

1. Latest monthly and biweekly figures are available from the Board's H.3 (502) weekly statistical release. Historical data starting in 1959 and estimates of the effect on required reserves of changes in reserve requirements are available from the Money and Reserves Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.

2. Figures reflect adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements. (See also table 1 10.)

3. Seasonally adjusted, break-adjusted total reserves equal seasonally adjusted, break-adjusted required reserves (line 4) plus excess reserves (line 16)

4. Seasonally adjusted, break-adjusted nonborrowed reserves equal seasonally adjusted, break-adjusted total reserves (line 1) less total borrowings of depository institutions from the Federal Reserve (line 17).

5. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted, break-adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

6. Break-adjusted total reserves equal break-adjusted required reserves (line 9) plus excess reserves (line 16).

7. To adjust required reserves for discontinuities that are due to regulatory changes in reserve requirements, a multiplicative procedure is used to estimate what required reserves

would have been in past periods had current reserve requirements been in effect. Break-adjusted required reserves include required reserves against transactions deposits and nonpersonal time and savings deposits (but not reservable nondeposit liabilities).

8. The break-adjusted monetary base equals (1) break-adjusted total reserves (line 6), plus (2) the (unadjusted) currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

9. Reflects actual reserve requirements, including those on nondeposit liabilities, with no adjustments to eliminate the effects of discontinuities associated with regulatory changes in reserve requirements.

10. Reserve balances with Federal Reserve Banks plus vault cash used to satisfy reserve requirements.

11. The monetary base, not break-adjusted and not seasonally adjusted, consists of (1) total reserves (line 11), plus (2) required clearing balances and adjustments to compensate for float at Federal Reserve Banks, plus (3) the currency component of the money stock, plus (4) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the difference between current vault cash and the amount applied to satisfy current reserve requirements. Since February 1984, currency and vault cash figures have been measured over the computation periods ending on Mondays.

12. Unadjusted total reserves (line 11) less unadjusted required reserves (line 14).

NOTES TO TABLE 1.21

1. Latest monthly and weekly figures are available from the Board's H.6 (508) weekly statistical release. Historical data starting in 1959 are available from the Money and Reserves Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.

2. Composition of the money stock measures is as follows:

M1: (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float, and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. Seasonally adjusted M1 is computed by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.

M2: M1 plus (1) savings deposits (including MMDAs), (2) small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and (3) balances in retail money market mutual funds. Excludes individual retirement accounts (IRAs) and Keogh balances at depository institutions and money market funds. Seasonally adjusted M2 is calculated by summing savings deposits, small-denomination time deposits, and retail money fund balances, each seasonally adjusted separately, and adding this result to seasonally adjusted M1.

M3: M2 plus (1) large-denomination time deposits (in amounts of \$100,000 or more) issued by all depository institutions, (2) balances in institutional money funds, (3) RP liabilities (overnight and term) issued by all depository institutions, and (4) eurodollars (overnight and term) held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada. Excludes amounts held by deposit-

ory institutions, the U.S. government, money market funds, and foreign banks and official institutions. Seasonally adjusted M3 is calculated by summing large time deposits, institutional money fund balances, RP liabilities, and eurodollars, each seasonally adjusted separately, and adding this result to seasonally adjusted M2.

3. Currency outside the U.S. Treasury, Federal Reserve Banks, and vaults of depository institutions.

4. Outstanding amount of U.S. dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions are included in demand deposits.

5. Demand deposits at commercial banks and foreign-related institutions other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float.

6. Consists of NOW and ATS account balances at all depository institutions, credit union share draft account balances, and demand deposits at thrift institutions.

7. Sum of (1) savings deposits (including MMDAs), (2) small time deposits, and (3) retail money fund balances.

8. Sum of (1) large time deposits, (2) institutional money fund balances, (3) RP liabilities (overnight and term) issued by depository institutions, and (4) eurodollars (overnight and term) of U.S. addressees.

9. Small time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRAs and Keogh accounts at commercial banks and thrift institutions are subtracted from small time deposits.

10. Large time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

11. Large time deposits at commercial banks less those held by money market funds, depository institutions, the U.S. government, and foreign banks and official institutions.

12. Includes both overnight and term.

NOTE. Tables 1.26, 1.27, and 1.28 have been revised to reflect changes in the Board's H.8 statistical release, "Assets and Liabilities of Commercial Banks in the United States," Table 1.27, "Assets and Liabilities of Large Weekly Reporting Commercial Banks," and table 1.28, "Large Weekly Reporting U.S. Branches and Agencies of Foreign Banks," are no longer being published in the *Bulletin*. Instead, abbreviated balance sheets for both large and small domestically chartered banks have been included in table 1.26, parts C and D. Data are both merger-adjusted and break-adjusted. In addition, data from large weekly reporting U.S. branches and agencies of foreign banks have been replaced by balance sheet estimates of all foreign-related institutions and are included in table 1.26, part E. These data are break-adjusted.

The not-seasonally-adjusted data for all tables now contain additional balance sheet items, which were available as of October 2, 1996.

1. Covers the following types of institutions in the fifty states and the District of Columbia: domestically chartered commercial banks that submit a weekly report of condition (large domestic); other domestically chartered commercial banks (small domestic); branches and agencies of foreign banks, and Edge Act and agreement corporations (foreign-related institutions). Excludes International Banking Facilities. Data are Wednesday values or pro rata averages of Wednesday values. Large domestic banks constitute a universe; data for small domestic banks and foreign-related institutions are estimates based on weekly samples and on quarter-end condition reports. Data are adjusted for breaks caused by reclassifications of assets and liabilities.

The data for large and small domestic banks presented on pp. A17-19 are adjusted to remove the estimated effects of mergers between these two groups. The adjustment for mergers changes past levels to make them comparable with current levels. Estimated quantities of balance sheet items acquired in mergers are removed from past data for the bank group that contained the acquired bank and put into past data for the group containing the

acquiring bank. Balance sheet data for acquired banks are obtained from Call Reports, and a ratio procedure is used to adjust past levels.

2. Excludes federal funds sold to, reverse RPs with, and loans made to commercial banks in the United States, all of which are included in "Interbank loans."

3. Consists of reverse RPs with brokers and dealers and loans to purchase and carry securities.

4. Includes vault cash, cash items in process of collection, balances due from depository institutions, and balances due from Federal Reserve Banks.

5. Excludes the due-from position with related foreign offices, which is included in "Net due to related foreign offices."

6. Excludes unearned income, reserves for losses on loans and leases, and reserves for transfer risk. Loans are reported gross of these items.

7. This balancing item is not intended as a measure of equity capital for use in capital adequacy analysis. On a seasonally adjusted basis, this item reflects any differences in the seasonal patterns estimated for total assets and total liabilities.

8. Fair value of derivative contracts (interest rate, foreign exchange rate, other commodity and equity contracts) in a gain/loss position, as determined under FASB Interpretation No. 39.

9. Includes mortgage-backed securities issued by U.S. government agencies, U.S. government-sponsored enterprises, and private entities.

10. Difference between fair value and historical cost for securities classified as available-for-sale under FASB Statement No. 115. Data are reported net of tax effects. Data shown are restated to include an estimate of these tax effects.

11. Mainly commercial and industrial loans but also includes an unknown amount of credit extended to other than nonfinancial businesses.

12. Total amount outstanding.

1. The prime rate is one of several base rates that banks use to price short-term business loans. The table shows the date on which a new rate came to be the predominant one quoted by a majority of the twenty-five largest banks by asset size, based on the most recent Call

Report. Data in this table also appear in the Board's H.15 (519) weekly and G.13 (415) monthly statistical releases. For ordering address, see inside front cover

NOTE: Some of the data in this table also appear in the Board's H.15 (519) weekly statistical release. For ordering address, see inside front cover.

1. The daily effective federal funds rate is a weighted average of rates on trades through New York brokers.

2. Weekly figures are averages of seven calendar days, ending on Wednesday of the current week; monthly figures include each calendar day in the month.

3. Annualized using a 360-day year or bank interest.

4. The rate charged for discounts made and advances extended under the Federal Reserve's primary credit discount window program, which became effective January 9, 2003. This rate replaces that for adjustment credit, which was discontinued after January 8, 2003. For further information, see <http://www.federalreserve.gov/boarddocs/press/bcreg/2002/200210312/default.htm>. The rate reported is that for the Federal Reserve Bank of New York. Historical series for the rate on adjustment credit is available at: <http://www.federalreserve.gov/releases/h15/data.htm>.

5. Quoted on a discount basis.

6. Interest rates interpolated from data on certain commercial paper trades settled by the Depository Trust Company. The trades represent sales of commercial paper by dealers or direct issuers to investors (that is, the offer side). See the Board's Commercial Paper web pages (<http://www.federalreserve.gov/releases/cp/>) for more information.

7. An average of dealer offering rates on nationally traded certificates of deposit.

8. Bid rates for eurodollar deposits collected around 9:30 a.m. Eastern time. Data are for indication purposes only.

9. Yields on actively traded issues adjusted to constant maturities.

10. Based on the unweighted average of the bid yields for all Treasury fixed-coupon securities with remaining terms to maturity of 25 years and over.

11. A factor for adjusting the daily long-term average in order to estimate a 30-year rate can be found at <http://www.treas.gov/offices/domestic-finance/debt-management/interest-rate/lcompositindex.html>.

12. General obligation bonds based on Thursday figures; Moody's Investors Service.

13. State and local government general obligation bonds maturing in twenty years are used in compiling this index. The twenty-bond index has a rating roughly equivalent to Moody's A1 rating. Based on Thursday figures.

14. Daily figures are averages of Aaa, Aa, A, and Baa yields from Moody's Investors Service. Based on yields to maturity on selected long-term bonds.

15. Effective December 7, 2001, the Moody's Aaa yield includes yields only for industrial firms. Prior to December 7, 2001, the Aaa yield represented both utilities and industrial.

16. Standard & Poor's corporate series. Common stock ratio is based on the 500 stocks in the price index.

	Mar. 11, 1968		June 8, 1968		May 6, 1970		Dec. 6, 1971		Nov. 24, 1972		Jan. 3, 1974	
13 Margin stocks	70		80		65		55		65		50	
14 Convertible bonds	50		60		50		50		50		50	
15 Short sales	70		80		65		55		65		50	

1. In July 1976 a financial group, composed of banks and insurance companies, was added to the group of stocks on which the index is based. The index is now based on 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40 financial.

2. On July 5, 1983, the American Stock Exchange rebased its index, effectively cutting previous readings in half.

3. Since July 1983, under the revised Regulation T, margin credit at broker-dealers has included credit extended against stocks, convertible bonds, stocks acquired through the exercise of subscription rights, corporate bonds, and government securities. Separate reporting of data for margin stocks, convertible bonds, and subscription issues was discontinued in April 1984.

4. Free credit balances are amounts in accounts with no unfulfilled commitments to brokers and are subject to withdrawal by customers on demand.

5. Series initiated in June 1984.

6. Margin requirements, stated in regulations adopted by the Board of Governors pursuant to the Securities Exchange Act of 1934, limit the amount of credit that can be used to purchase and carry "margin securities" (as defined in the regulations) when such credit is collateralized by securities. Margin requirements on securities are the difference between the market value (100 percent) and the maximum loan value of collateral as prescribed by the Board. Regulation T was adopted effective Oct. 15, 1934; Regulation U, effective May 1, 1936; Regulation G, effective Mar. 11, 1968; and Regulation X, effective Nov. 1, 1971.

On Jan. 1, 1977, the Board of Governors for the first time established in Regulation T the initial margin required for writing options on securities, setting it at 30 percent of the current market value of the stock underlying the option. On Sept. 30, 1985, the Board changed the required initial margin, allowing it to be the same as the option maintenance margin required by the appropriate exchange or self-regulatory organization; such maintenance margin rules must be approved by the Securities and Exchange Commission.

1. The U.S. Treasury first issued inflation-indexed securities during the first quarter of 1997.

2. Includes (not shown separately) securities issued to the Rural Electrification Administration, depository bonds, retirement plan bonds, and individual retirement bonds.

3. Nonmarketable series denominated in dollars, and series denominated in foreign currency held by foreigners.

4. Held almost entirely by U.S. Treasury and other federal agencies and trust funds.

5. Data for Federal Reserve Banks and U.S. government agencies and trust funds are actual holdings; data for other groups are Treasury estimates.

6. U.S. Treasury securities bought outright by Federal Reserve Banks, see *Bulletin* table 1.18

7. In March 1996, in a redefinition of series, fully defeased debt backed by nonmarketable federal securities was removed from "Other miscellaneous investors" and added to "State and local treasuries." The data shown here have been revised accordingly.

8. Includes nonmarketable foreign series Treasury securities and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York.

9. Includes individuals, government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and noncorporate businesses, and other investors.

SOURCES: Data by type of security, U.S. Treasury Department, *Monthly Statement of the Public Debt of the United States*; data by holder, Federal Reserve Board of Governors, *Flow of Funds Accounts of the United States* and U.S. Treasury Department, *Treasury Bulletin*, unless otherwise noted.

NOTE. Major changes in the report form filed by primary dealers induced a break in the dealer data series as of the week ending July 4, 2001. Current weekly data may be found at the Federal Reserve Bank of New York web site (<http://www.newyorkfed.org/piphone/statistics>) under the Primary Dealer heading.

1. The figures represent purchases and sales in the market by the primary U.S. government securities dealers reporting to the Federal Reserve Bank of New York. Outright transactions include all U.S. government, federal agency, government-sponsored enterprise, mortgage-

backed, and corporate securities scheduled for immediate and forward delivery, as well as all U.S. government securities traded on a when-issued basis between the announcement and issue date. Data do not include transactions under repurchase and reverse repurchase (resale) agreements. Averages are based on the number of trading days in the week.

2. Outright Treasury inflation-indexed securities (TIS) transactions are reported at principal value, excluding accrued interest, where principal value reflects the original issuance par amount (unadjusted for inflation) times the price times the index ratio.

NOTE: Major changes in the report form filed by primary dealers included a break in many series as of the week ending July 4, 2001. Current weekly data may be found at the Federal Reserve Bank of New York web site (<http://www.newyorkfed.org/pihome/statistics>) under the Primary Dealer heading.

1. Data for positions and financing are obtained from reports submitted to the Federal Reserve Bank of New York by the U.S. government securities dealers on its published list of primary dealers. Weekly figures are close-of-business Wednesday data. Positions for calendar days of the report week are assumed to be constant. Monthly averages are based on the number of calendar days in the month.

2. Net outright positions include all U.S. government, federal agency, government-sponsored enterprise, mortgage-backed, and corporate securities scheduled for immediate and forward delivery, as well as U.S. government securities traded on a when-issued basis between the announcement and issue date.

3. Figures cover financing U.S. government, federal agency, government-sponsored enterprise, mortgage-backed, and corporate securities. Financing transactions for Treasury inflation-indexed securities (TIPS) are reported in actual funds paid or received, except for pledged securities. TIPS that are issued as pledged securities are reported at par value, which is the value of the security at original issuance (unadjusted for inflation).

<i>Other lending¹⁴</i>									
25 Farmers Home Administration	6,665	5,275	n.a.	n.a.	n.a.	n.a.	n.a.	n.a.	n.a.
26 Rural Electrification Administration	14,085	13,126	13,876	14,489	14,714	14,750	14,750	14,760	14,793
27 Other	21,402	22,174	25,220	22,528	21,278	21,044	21,030	21,048	21,590

1. Consists of mortgages assumed by the Defense Department between 1957 and 1963 under family housing and homeowners assistance programs.

2. Includes participation certificates reclassified as debt beginning Oct. 1, 1976.

3. On-budget since Sept. 30, 1976.

4. Consists of debentures issued in payment of Federal Housing Administration insurance claims. Once issued, these securities may be sold privately on the securities market.

5. Certificates of participation issued before fiscal year 1969 by the Government National Mortgage Association acting as trustee for the Farmers Home Administration; the Department of Health, Education, and Welfare; the Department of Housing and Urban Development; the Small Business Administration; and the Veterans Administration.

6. Off-budget.

7. Includes outstanding noncontingent liabilities: notes, bonds, and debentures. Includes Federal Agriculture Mortgage Corporation; therefore, details do not sum to total. Some data are estimated.

8. Excludes borrowing by the Farm Credit Financial Assistance Corporation, which is shown on line 17.

9. Before late 1982, the association obtained financing through the Federal Financing Bank (FFB). Borrowing excludes that obtained from the FFB, which is shown on line 22.

10. The Financing Corporation, established in August 1987 to recapitalize the Federal Savings and Loan Insurance Corporation, undertook its first borrowing in October 1987.

11. The Farm Credit Financial Assistance Corporation, established in January 1988 to provide assistance to the Farm Credit System, undertook its first borrowing in July 1988.

12. The Resolution Funding Corporation, established by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, undertook its first borrowing in October 1989.

13. The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other federal agencies. Because FFB incurs debt solely for the purpose of lending to other agencies, its debt is not included in the main portion of the table to avoid double counting.

14. Includes FFB purchases of agency assets and guaranteed loans; the latter are loans guaranteed by numerous agencies, with the amounts guaranteed by any one agency generally being small. The Farmers Home Administration entry consists exclusively of agency assets, whereas the Rural Electrification Administration entry consists of both agency assets and guaranteed loans.

1. Figures represent gross proceeds of issues maturing in more than one year; they are the principal amount or number of units calculated by multiplying by the offering price. Figures exclude secondary offerings, employee stock plans, investment companies other than closed-end, intracorporate transactions, Yankee bonds, and private placements listed. Stock data include ownership securities issued by limited partnerships.

2. Monthly data include 1-44(a) offerings.

3. Monthly data cover only public offerings.

4. Data for private placements are not available at a monthly frequency.

NOTE: This table has been revised to incorporate several changes resulting from the benchmarking of finance company receivables to the June 1996 Survey of Finance Companies. In that benchmark survey, and in the monthly surveys that have followed, more detailed breakdowns have been obtained for some components. In addition, previously unavailable data on securitized real estate loans are now included in this table. The new information has resulted in some reclassification of receivables among the three major categories (consumer, real estate, and business) and in discontinuities in some component series between May and June 1996.

¹ Includes finance company subsidiaries of bank holding companies but not of retailers and banks. Data in this table also appear in the Board's G.20 (422) monthly statistical release. For ordering address, see inside front cover.

² Owned receivables are those carried on the balance sheet of the institution. Managed receivables are outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator. Data are shown

before deductions for unearned income and losses. Components may not sum to totals because of rounding.

³ Excludes revolving credit reported as held by depository institutions that are subsidiaries of finance companies.

⁴ Includes personal cash loans, mobile home loans, and loans to purchase other types of consumer goods, such as appliances, apparel, boats, and recreation vehicles.

⁵ Outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator.

⁶ Credit arising from transactions between manufacturers and dealers, that is, floor plan financing.

⁷ Includes loans on commercial accounts receivable, factored commercial accounts, and receivable dealer capital; small loans used primarily for business or farm purposes; and wholesale and lease paper for mobile homes, campers, and travel trailers.

1. Weighted averages based on sample surveys of mortgages originated by major institutional lender groups for purchase of newly built homes; compiled by the Federal Housing Finance Board in cooperation with the Federal Deposit Insurance Corporation.

2. Includes all fees, commissions, discounts, and "points" paid (by the borrower or the seller) to obtain a loan.

3. Average effective interest rate on loans closed for purchase of newly built homes, assuming prepayment at the end of ten years.

4. Average contract rate on new commitments for conventional first mortgages; from U.S. Department of Housing and Urban Development (HUD). Based on transactions on the first day of the subsequent month.

5. Average gross yield on thirty-year, minimum-downpayment first mortgages insured by the Federal Housing Administration (FHA) for immediate delivery in the private secondary market. Based on transactions on first day of subsequent month.

6. Average net yields to investors on fully modified pass-through securities backed by mortgages and guaranteed by the Government National Mortgage Association (GNMA), assuming prepayment in twelve years on pools of thirty-year mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.

7. Does not include standby commitments issued, but includes standby commitments converted.

8. Includes participation loans as well as whole loans.

9. Includes conventional and government-underwritten loans. The Federal Home Loan Mortgage Corporation's mortgage commitments and mortgage transactions include activity under mortgage securities swap programs, whereas the corresponding data for the Federal National Mortgage Association exclude swap activity.

1. Multifamily debt refers to loans on structures of five or more units.

2. Includes loans held by nondeposit trust companies but not loans held by bank trust departments.

3. Includes savings banks and savings and loan associations.

4. FmHA-guaranteed securities sold to the Federal Financing Bank were reallocated from FmHA mortgage pools to FmHA mortgage holdings in 1986:Q4 because of accounting changes by the Farmers Home Administration.

5. Outstanding principal balances of mortgage-backed securities insured or guaranteed by the agency indicated.

6. Includes securitized home equity loans.

7. Other holders include mortgage companies, real estate investment trusts, state and local credit agencies, state and local retirement funds, noninsured pension funds, credit unions, and finance companies.

SOURCE: Based on data from various institutional and government sources. Separation of nonfarm mortgage debt by type of property, if not reported directly, and interpolations and extrapolations, when required for some quarters, are estimated in part by the Federal Reserve. Line 69 from Inside Mortgage Securities and other sources.

1. The Board's series on amounts of credit covers most short- and intermediate-term credit extended to individuals, excluding loans secured by real estate. Data in this table also appear in the Board's G.19 (421) monthly statistical release. For ordering address, see inside front cover.

2. Comprises motor vehicle loans, mobile home loans, and all other loans that are not included in revolving credit, such as loans for education, boats, trailers, or vacations. These loans may be secured or unsecured.

3. Outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator.

4. Totals include estimates for certain holders for which only consumer credit totals are available.

Note. The statistics in the G.17 release cover output, capacity, and capacity utilization in the industrial sector, which the Federal Reserve defines as manufacturing, mining, and electric and gas utilities. Manufacturing consists of those industries included in the North American Industry Classification System, or NAICS, manufacturing plus those industries—logging and newspaper, periodical, book, and directory publishing—that have traditionally been considered manufacturing and included in the industrial sector.

1. Data in this table also appear in the Board's G.17 (419) monthly statistical release. The

data are also available on the Board's web site <http://www.federalreserve.gov/releases/g17>. The latest historical revision of the industrial production index and the capacity utilization rates was released in December 2002. The recent annual revision is described in the April 2003 issue of the *Bulletin*.

2. Capacity utilization is calculated as the ratio of the Federal Reserve's seasonally adjusted index of industrial production to the corresponding index of capacity.

3. Monthly highs, 1978–80; monthly lows, 1982.

4. Monthly highs, 1988–89; monthly lows, 1990–91.

Note: The statistics in the G.17 release cover output, capacity, and capacity utilization in the industrial sector, which the Federal Reserve defines as manufacturing, mining, and electric and gas utilities. Manufacturing consists of those industries included in the North American Industry Classification System, or NAICS, manufacturing plus those industries—logging and newspaper, periodical, book, and directory publishing—that have traditionally been considered manufacturing and included in the industrial sector.

1. Data in this table appear in the Board's G.17 (419) monthly statistical release. The data are also available on the Board's web site <http://www.federalreserve.gov/releases/g17>. The latest historical revision of the industrial production index and the capacity utilization rates was released in December 2002. The recent annual revision is described in the April 2003 issue of the *Bulletin*.

2. North American Industry Classification System.

- Gold held "under earmark" at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States; see table 3.13, line 3. Gold stock is valued at \$42.22 per fine troy ounce.

- Special drawing rights (SDRs) are valued according to a technique adopted by the International Monetary Fund (IMF) in July 1974. Values are based on a weighted average of exchange rates for the currencies of member countries. From July 1974 through December 1980, sixteen currencies were used; since January 1981, five currencies have been used. U.S.

- SDR holdings and reserve positions in the IMF also have been valued on this basis since July 1974.

- Includes allocations of SDRs by the International Monetary Fund on Jan. 1 of the year indicated, as follows: 1970—\$867 million; 1971—\$717 million; 1972—\$710 million; 1979—\$1,139 million; 1980—\$1,152 million; 1981—\$1,093 million; plus net transactions in SDRs.

- Valued at current market exchange rates.

3.13 FOREIGN OFFICIAL ASSETS HELD AT FEDERAL RESERVE BANKS¹

Millions of dollars, end of period

Asset	2000	2001	2002	2003							
				Jan.	Feb.	Mar.	Apr.	May	June	July	Aug. ^F

1. Reporting banks include all types of depository institutions as well as some banks/financial holding companies and brokers and dealers. Excludes bonds and notes of maturities longer than one year. Effective February 2003, coverage is expanded to include liabilities of brokers and dealers to affiliated foreign offices.

2. Non-negotiable deposits and brokerage balances.

3. Data available beginning January 2001.

4. Financial claims on residents of the United States, other than long-term securities, held by or through reporting banks for foreign customers. Effective February 2003, also includes loans to U.S. residents in managed foreign offices of U.S. reporting institutions.

5. Includes nonmarketable certificates of indebtedness and Treasury bills issued to official institutions of foreign countries.

6. Principally bankers acceptances, commercial paper, negotiable time certificates of deposit, and short-term agency securities.

7. Data available beginning January 2001.

8. Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank. Excludes "holdings of dollars" of the International Monetary Fund.

9. Foreign central banks, foreign central governments, and the Bank for International Settlements.

10. Excludes central banks, which are included in "Official institutions." Includes positions with affiliated banking offices also included in memo line (44) below.

11. As of February 2003, includes positions with affiliated non-banking offices also included in memo line (44) below.

12. For U.S. banks, includes amounts owed to own foreign branches and foreign subsidiaries consolidated in the quarterly Consolidated Reports of Condition filed with bank regulatory agencies. For agencies, branches, and majority-owned subsidiaries of foreign banks, consists principally of amounts owed to the head office or parent foreign office, and to foreign branches, agencies, or wholly owned subsidiaries of the head office or parent foreign bank. Effective February 2003, includes amounts owed to affiliated foreign offices of U.S. brokers and dealers.

13. Before January 2001, data for Belgium–Luxembourg were combined.

14. Before January 2001, these data were included in data reported for the United Kingdom.

15. In February 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe."

16. Includes the Bank for International Settlements and the European Central Bank.

17. Before January 2001, data for "Other Latin America" and "Other Caribbean" were combined in "Other Latin America and Caribbean."

18. Beginning January 2001, data for the Cayman Islands replaced data for the British West Indies.

19. Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

20. Comprises Algeria, Gabon, Libya, and Nigeria.

21. Before January 2001, these data were included in "All other."

22. Principally the International Bank for Reconstruction and Development. Excludes "holdings of dollars" of the International Monetary Fund.

23. Principally the Inter-American Development Bank.

24. Asian, African, Middle Eastern, and European regional organizations, except the Bank for International Settlements, which is included in "Other Europe."

1. Reporting banks include all types of depository institutions as well as bank/financial holding companies and brokers and dealers. Effective February 2003, coverage is expanded to include claims of brokers and dealers on affiliated foreign offices and cross-border brokerage balances.

2. Before January 2001, combined data reported for Belgium-Luxembourg.

3. Before January 2001, data included in United Kingdom.

4. In February 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe."

5. Includes the Bank for International Settlements and the European Central Bank.

6. Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

7. Beginning 2001, Cayman Islands replaced British West Indies in the data series.

8. Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

9. Comprises Algeria, Gabon, Libya, and Nigeria.

10. Before January 2001, included in "All other."

11. Excludes the Bank for International Settlements, which is included in "Other Europe."

1. Averages of certified noon buying rates in New York for cable transfers. Data in this table also appear in the Board's G.5 (405) monthly statistical release. For ordering address, see inside front cover

2. U.S. cents per currency unit.

3. The euro is reported in place of the individual euro area currencies. By convention, the rate is reported in U.S. dollars per euro. The bilateral currency rates can be derived from the euro rate by using the fixed conversion rates (in currencies per euro) as shown below:

Euro equals			
13.7603	Austrian schillings	1.936.27	Italian lire
40.3399	Belgian francs	40.3399	Luxembourg francs
5.94573	Finnish markkas	2.20371	Netherlands guilders
6.55957	French francs	200.482	Portuguese escudos
1.95583	German marks	166.386	Spanish pesetas
.787564	Irish pounds	340.750	Greek drachmas

4. Starting with the March 2003 *Bulletin*, revised index values resulting from the periodic revision of data that underlie the calculated trade weights are reported. For more information on the indexes of the foreign exchange value of the dollar, see *Federal Reserve Bulletin*, vol. 84 (October 1998), pp. 811-818.

5. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of U.S. trading partners. The weight for each currency is computed as an average of U.S. bilateral import shares from and export shares to the issuing country and of a measure of the importance to U.S. exporters of that country's trade in third country markets.

6. Weighted average of the foreign exchange value of the U.S. dollar against a subset of broad index currencies that circulate widely outside the country of issue. The weight for each currency is its broad index weight scaled so that the weights of the subset of currencies in the index sum to one.

7. Weighted average of the foreign exchange value of the U.S. dollar against a subset of broad index currencies that do not circulate widely outside the country of issue. The weight for each currency is its broad index weight scaled so that the weights of the subset of currencies in the index sum to one.

Maps of the Federal Reserve System

LEGEND

Both pages

- Federal Reserve Bank city
- ☆ Board of Governors of the Federal Reserve System, Washington, D.C.

Facing page

- Federal Reserve Branch city
- Branch boundary

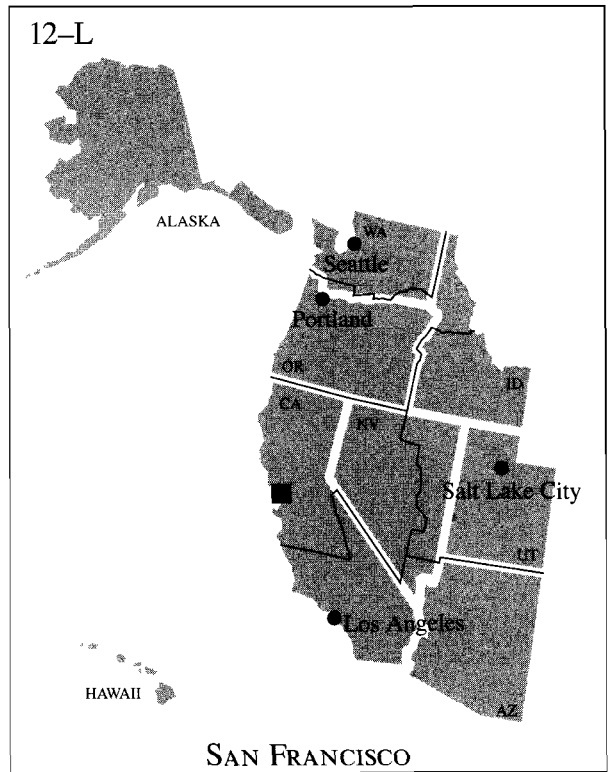

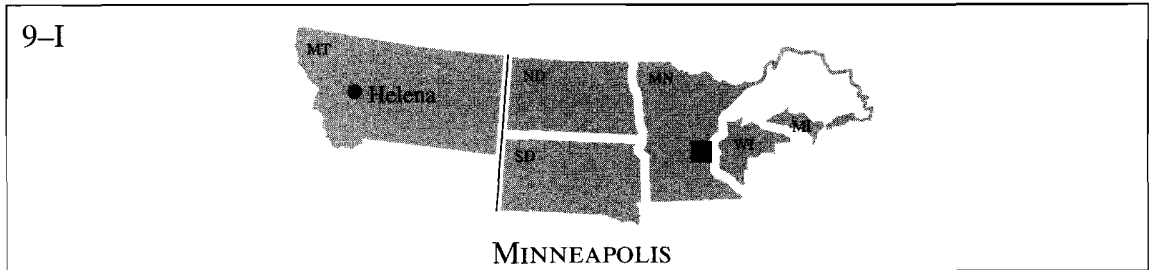

NOTE

The Federal Reserve officially identifies Districts by number and Reserve Bank city (shown on both pages) and by letter (shown on the facing page).

In the 12th District, the Seattle Branch serves Alaska, and the San Francisco Bank serves Hawaii.

The System serves commonwealths and territories as follows: the New York Bank serves the Commonwealth

of Puerto Rico and the U.S. Virgin Islands; the San Francisco Bank serves American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. The Board of Governors revised the branch boundaries of the System most recently in February 1996.
