The FEDERAL RESERVE BULLETIN is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. It is assisted by the Economic Editing Unit headed by Mendelle T. Berenson, the Graphic Communications Section under the direction of Peter G. Thomas, and Publications Services supervised by Helen L. Hulen.

### 527 APPLYING THE THEORY OF PROBABLE FUTURE COMPETITION

Recent legal developments will have a substantial effect on the manner in which the Board applies the theory of probable future competition in analyzing the competitive effects of proposed mergers and acquisitions.

# 535 INDUSTRIAL PRODUCTION

Output declined about 0.5 percent in August.

# 537 ANNOUNCEMENTS

Changes in the discount rate.

Amendment to Regulation Y to clarify and expand the data processing activities permissable for bank holding companies.

Interpretation of Regulation Q concerning arrangements a member bank may enter into in helping to provide a secondary market for negotiable time deposits issued by the bank; amendments to Regulation Q to conform it with recent actions of the Depository Institutions Deregulation Committee.

Participation in a multilateral financial transition program with Mexico.

Exemption of Maine and Connecticut from certain parts of the Truth in Lending Act.

Changes in Board staff.

Admission of one state bank to membership in the Federal Reserve System.

# 541 RECORD OF POLICY ACTIONS OF THE FEDERAL OPEN MARKET COMMITTEE

At its meeting on June 30–July 1, 1982, the Committee reviewed its ranges for growth of the monetary and credit aggregates for the period from the fourth quarter of 1981 to the fourth quarter of 1982 and gave preliminary consideration to objectives for monetary growth that might be appropriate for 1983. The Committee concluded its discussion and reached a decision on longer-run ranges during a telephone conference on July 15, 1982. The Committee reaffirmed the following ranges for growth of the monetary aggregates over the year from the fourth quarter of 1981 to the fourth quarter of 1982 that it had adopted in early February: for M1, 21/2 to 51/2 percent; for M2, 6 to 9 percent; and for M3, 6<sup>1</sup>/<sub>2</sub> to 9<sup>1</sup>/<sub>2</sub> percent. The associated range for bank credit was 6 to 9 percent. At the same time, the Committee agreed that growth in the monetary and credit aggregates around the top of the indicated ranges would be acceptable in the light of the relatively low base period for the M1 target and other factors, and that it would tolerate for some period of time growth somewhat above the target range should unusual precautionary demands for money and liquidity be evident in the light of current economic uncertainties. The Committee indicated that for 1983 it was tentatively planning to continue the current ranges for 1982, but would review that decision carefully in the light of developments over the remainder of 1982.

At the meeting on June 30–July 1, the Committee agreed to seek behavior of reserve aggregates associated with growth of M1 and M2 from June to September at annual rates of about 5 percent and about 9 percent respectively. It decided that somewhat more rapid growth would be acceptable depending on evidence that economic and financial uncertainties were leading to exceptional liquidity demands. It was also noted that seasonal uncertainties, together with increased social security payments and the initial impact of the tax cut on cash balances, might lead to a temporary bulge in the monetary aggregates, particularly M1. The intermeeting range for the federal funds rate, which provides a mechanism for initiating further consultation of the Committee, was continued at 10 to 15 percent.

# Applying the Theory of Probable Future Competition

This article was prepared by Anthony S. Winer, of the Board's Legal Division. Footnotes appear at the end of the article.

The theory of probable future competition is one of the few analytic tools with which to examine the competitive effects of mergers and acquisitions involving firms not competing in the same market. If patterns of bank expansion continue to evolve along their present course, the frequency of such mergers and acquisitions, often called market-extension mergers, may well increase. The degree to which the Board of Governors of the Federal Reserve System directly influences changes in the structure of banking in the coming years may therefore depend in part on the manner in which it applies this theory.

Recent developments have had a substantial effect on the Board's application of the theory of probable future competition. In the early months of 1981, a federal appellate court rejected the Board's method of employing the theory with respect to applications submitted by two bank holding companies. In light of the appellate court actions, the Board reversed its original determinations and approved both applications early this year. Shortly thereafter, the Board determined that a public statement of the ways in which it will apply the theory would be helpful. Accordingly, the Board issued for public comment a proposed policy statement containing guidelines that would define the range of applications that would be rigorously scrutinized under the theory. On June 14, 1982, the Department of Justice released its own long-awaited new Merger Guidelines, which contained a section addressing the theory of probable future competition that varied substantially from the Board's proposal. Against this background the Board is expected to issue the final version of its own guidelines in the fall of 1982.

The various positions expressed in past months by the federal court, the Board, public commentors, and the Department of Justice differ not so much on the substance of the theory as on methods of applying it. This article reviews the recent developments in the application of the theory of probable future competition and describes the positions of the parties involved in those developments. The discussion begins with a brief description of the theory and related background.

### Two Theories of Competition

The Bank Merger Act and the Bank Holding Company Act require the Board to consider the impact of certain banking mergers, acquisitions, consolidations, assumptions of liabilities, and acquisitions of assets (collectively, "mergers") on competition in the banking industry.<sup>1</sup> In particular, the statutes generally prohibit the Board from approving a merger whose effect may be substantially to lessen competition in any section of the country. In analyzing merger proposals, the Board relies chiefly on two distinct theories of competition: the theory of existing competition and the theory of probable future competition.

### Existing Competition

The theory of existing competition applies only to mergers involving firms in the same market. The theory focuses on the concentration of the market in which the firms compete and the market shares held by the combining firms. A merger that produces a firm controlling an undue percentage share of the market and results in a significant increase in market concentration should in most cases be prohibited because it would eliminate substantial "existing" competition between the two firms.<sup>2</sup> Although the validity of the theory has been accepted by the federal courts, its applicability is limited to cases of combinations of firms operating in the same market. When the Board must assess the competitive impact of a merger involving firms in different markets—a market-extension merger it often employs the theory of probable future competition.

### **Probable Future Competition**

Although the theory of probable future competition provides a framework for analyzing some market-extension mergers, it is not applicable to all such mergers. The theory applies only when the firm to be acquired competes in an oligopolistic market-that is, a market in which a small group of firms possesses the power to determine price. If a firm outside the market acquires one of the oligopolistic firms, according to the theory, the acquiring firm will take the acquiree's place in the oligopoly structure and the market will continue to experience oligopoly pricing. If the merger is prevented, the outside firm will in some cases enter the market through a toehold acquisition or by establishing a new-often called a de novo-office. The theory concludes that the toehold or de novo entrant might then actively compete with the oligopolistic firms and thereby help to improve the market's performance.

Consummation of the merger would eliminate this opportunity for improvement and could also solidify the anticompetitive structure of the market. To the extent that the merger would lessen the "probability" that the outside firm would provide "competition" in the "future," the theory of probable future competition would support prohibition of the merger.

The theory of probable future competition can be distinguished from the theory of existing competition in two important respects. First, the Supreme Court has never explicitly approved the theory of probable future competition. Indeed, on two occasions, the Court discussed the theory's validity under the antitrust laws but declined to resolve the issue.<sup>3</sup> Second, the theory of probable future competition applies only in markets that are oligopolistic before the merger, while the theory of existing competition can apply to cases involving any type of market, whether oligopolistic or competitive.

### THE TEXAS CASES

The way the Board applies the theory of probable future competition recently emerged as an issue in judicial consideration of two bank holding company mergers in Texas. In April 1980, the Board denied the application of Mercantile Texas Corporation, Dallas, Texas, to acquire by merger Pan National Group, Inc., El Paso, Texas; and in August of the same year, it denied the application of Republic of Texas Corporation, Dallas, Texas, to acquire the Citizens National Bank of Waco, Waco, Texas.<sup>4</sup> The Board based its denials largely on the ground that the mergers would substantially lessen competition under the theory of probable future competition.

Mercantile and Republic each petitioned the U.S. Court of Appeals for the Fifth Circuit for review of the Board's denials. In both cases, the court vacated the Board's order and remanded the application for further consideration by the Board and further findings of fact.<sup>5</sup> The court declared that, to deny a merger application on the basis of the theory of probable future competition, the Board must make four findings of fact, and that with the Order denying each application the Board had not sustained this burden.

### **Required Findings**

With respect to their delineation of issues associated with the theory of probable future competition, the court's opinions in the Texas cases were substantially identical. Each opinion specified the same four criteria the Board would have to satisfy to deny an application on the basis of the theory.

First, the court required the Board to show that the market of the firm to be acquired was concentrated. A finding that a market is concentrated frequently serves as a proxy for a determination that the market is oligopolistic, which is difficult to prove directly.<sup>6</sup> The Board has usually measured concentration in a market by calculating the total percentage of the market's deposits held by the four organizations in the market that hold the four largest shares of deposits. This measure is called the four-firm concentration ratio.

In its orders denying the Texas applications, the Board noted that the four-firm concentration ratios were 86.1 and 73.8 percent for the two markets in the Mercantile proposal and 72.4 percent for the market in the Republic proposal. The Board concluded that each of the markets was concentrated. The court indicated that the Board's use of the four-firm concentration ratios had satisfied its first evidentiary requirement.

The court's second criterion required the Board to determine whether the pool of potential entrants into the market was so large as to "vitiate" the importance of the acquiring firm as a potential competitor.<sup>7</sup> The statutes direct the Board to deny any application that may substantially lessen competition. The court believed that a lessening of competition would be substantial under the theory only if there were a small number of other potential entrants.

In both cases, the court viewed the Board's findings on this point as insufficient. In the Mercantile opinion, the court said that there were likely to be other potential competitors in Texas and that a significant number of large Texas bank holding companies remained as possible entrants. In the same opinion, however, it left "to the Board's expertise the task of developing standards for determining the number and importance of the other potential competitors."<sup>8</sup>

Third, the court's opinions directed the Board to develop a "persuasive rationale" that, upon denial of a merger or acquisition, an institution would prefer the opportunity to enter the market independently—either de novo or through a toehold acquisition—to some other investment.<sup>9</sup> This requirement reflects the assumption, imposed by the theory, that if the proposed merger is prevented, the outside firm will enter the market independently. In its original order the Board determined that Mercantile possessed the financial and managerial resources for de novo or toehold entry and that the evidence suggested that such entry could occur. The Board stated similar findings in the Republic order, but the court viewed both sets of findings as insufficient. The court suggested an alternative analysis that involves comparing the expected profitability of independent entry with that of other investment opportunities, to determine whether the former is great enough to draw the applicant into the market de novo or by a toehold acquisition.

Finally, if the Board is to deny an application, the court required it to find that independent entry will be substantially likely to bring about deconcentration of the market or other significant procompetitive effects. While allowing the Board appreciable latitude in defining such effects, the court suggested that the Board could satisfy this requirement only if it determined at what point in time the outside firm would be likely to enter the market, and if it found that consummation of the proposed merger at that point would result in illegal anticompetitive effects. The Board could not, for example, deny a firm entry through acquisition or merger on the grounds that sometime in the remote future the firm would enter the market in such a way as to promote competition there.

# **Reconsideration of the Applications**

In July 1981, the court remanded the two Texas applications to the Board for additional findings of fact. To obtain the type of evidence that could support the findings delineated by the court's opinion, the Board requested additional information from the holding companies involved.

The Board's requests for information were broadly drawn, and the materials submitted in response were voluminous. Republic submitted about 1,200 pages, and Mercantile's submission numbered more than 1,500 pages. The submissions consisted of, among other things, minutes of executive committee and board of directors meetings, internal staff memoranda and letters, financial statements, letters among financial institutions, feasibility studies and research reports, various types of market information, published articles and periodical information taken from other sources, operating and administrative circulars and telegrams, and advocacy materials prepared especially for the Board's review in the context of the submissions.

After thorough consideration, a majority of the Board concluded that the evidence submitted could not justify denial under the evidentiary standards established by the court, and so the Board—with some dissent—approved both applications.<sup>10</sup> In each case, however, the majority reserved judgment on the appropriateness of applying the court's analysis in all circumstances.

# THE BOARD'S PROPOSED GUIDELINES

During reconsideration of the Republic and Mercantile cases, it became apparent that the requirements for information under the theory of probable future competition could become extremely burdensome for applicants. Accordingly, the Board proposed for public comment guidelines designed to determine whether a case should be subject to intensive examination from the standpoint of the theory.<sup>11</sup>

The guidelines consisted of four criteria, each responsive to one of the requirements that the appellate court had imposed. For a proposal to warrant intensive examination under the guidelines, it would usually have to fit the descriptions in all four of the proposed criteria. However, the guidelines were not rigid: the Board reserved the right to require intensive examination of some cases that did not fall fully within the guidelines, and to excuse from such examination some applications that did. Moreover, the guidelines spoke merely to procedure—to ways of deciding whether a case would be subject to intensive examination—and not directly to the disposition of the case.

The first of the four criteria required that the firm to be acquired be located in a highly concentrated market, defined as one for which the three-firm concentration ratio was at least 75 percent. The proposed criterion contained a footnote indicating that the Board would take into account, on a case-by-case basis, the competitive effects exerted by thrift institutions and other near-banks on market concentration.

Second, the Board set at six the number of probable future entrants, apart from the appli-

cant, that would determine whether the pool of applicants was large enough to "vitiate" the importance of the applicant as a potential competitor. The Board acknowledged that no single number could be a true indicator in all circumstances, and that it intended six as a general guideline. This criterion also defined a probable future entrant as any commercial banking organization not already in the market that either was one of the state's four largest or was a lowerranking organization with assets of \$1 billion or more (or \$500 million or more if the state had no lower-ranking organization with at least \$1 billion in assets).

The third criterion presented difficult issues because it addressed the subjective question of the intent of an applicant to enter the market independently. Because that intent is difficult to measure objectively, the Board determined to use the attractiveness of the market involved as a proxy for the likelihood that the applicant would enter independently. Accordingly, the third criterion required that the firm to be acquired be in a standard metropolitan statistical area (SMSA) and be in a market that had more than \$250 million in deposits and had a rate of growth of deposits in the two most recent years at least matching that for its state or the country as a whole.

Finally, the Board required that the firm to be acquired be a "market leader," defined as any firm that ranks among the top three firms in a market, in terms of deposit holdings, and accounts for 10 percent or more of the market's deposits. This criterion addressed the court's requirement of a finding that alternative entry by an applicant would likely result in deconcentration or have other significant procompetitive effects.

The Board decided that a finding that the firm to be acquired is a market leader could serve as a proxy for a finding of likely procompetitive effects for two reasons. First, the preservation as an independent organization of a leading firm would likely have a significant procompetitive effect, particularly for concentrated markets that satisfied the other criteria. Second, given that the acquiring firm intended to enter the market, this criterion would encourage it to seek entry through toehold acquisitions, or at least to enter on a smaller scale. The point again was to encourage competition by preserving strong competitors.

# Public Reaction to the Proposal

The Board received thirty-three responses to its request for comment on its proposed guidelines, the most detailed of which was submitted by the Department of Justice. Sixteen commentors supported the concept of objective guidelines, noting such beneficial effects as the reduction of uncertainty on the part of prospective applicants concerning permissible mergers and acquisitions, and increases in efficiency and reductions in cost in the processing of applications. No commentors disapproved of the guidelines concept.

Most pervasive among the comments was the argument that the Board should increase the extent to which thrift institutions and nonbank organizations offering banking services are considered banks. Commentors made this point with regard not only to the market-concentration criterion, but also to the probable-future-entrants criterion and the market-attractiveness criterion. The Department of Justice supported the approach the Board adopted in its proposal: the inclusion of thrift institutions and other organizations as warranted on a case-by-case basis.

Several comments regarding the market-concentration criterion asserted that the three-firm concentration ratio of 75 percent was too high, or that the Board should adopt the Herfindahl-Hirschman Index (HHI) as a measure of concentration.<sup>12</sup> The Department of Justice, for example, advocated the use of the HHI as "a more sensitive barometer" of market structure than concentration ratios, and considered the Board's 75 percent three-firm concentration ratio to be "inexplicably" high.

Many commentors expressed dissatisfaction with the Board's use of the number six to define the pool of potential entrants that would trigger intensive examination. Some preferred a number between one and three, claiming that a larger number was unrealistic, or not required under the theory of probable future competition. Others maintained that the choice of any single number would be unsatisfactory, given the wide differences in banking markets throughout the country. The Department of Justice suggested that the Board consider lowering the threshold level when the Board became able accurately to predict the likelihood of alternative entry.

Two aspects of the market-attractiveness criterion were most frequently criticized. First, many commentors criticized the requirement that the market be in an SMSA, asserting that non-SMSA markets can be highly concentrated and that the opportunity for oligopoly behavior is greater in smaller markets. Second, several commentors criticized the use of a countrywide growth rate in judging deposit growth in the subject market. The usual ground for objection was that because banking organizations are generally prevented from expanding beyond state boundaries, a comparison with national growth rates would not illuminate the issue of alternative possibilities for acquisitions.

The Department of Justice expressed both these views and also advocated elimination of the market-attractiveness criterion. It maintained that the court's requirement in this area might be so stringent as to make it questionable whether the court's version of the doctrine could be invoked successfully in actual litigation. The department stated that, for the purposes of guidelines, the applicant's attempt to enter the market through merger or acquisition seemed sufficient indication that the applicant found the market attractive.

The department also requested the Board to refrain from adopting a final version of its guidelines until the department's own new merger guidelines were issued, on the ground that those guidelines would establish an analytical approach that the Board should have an opportunity to consider before taking its final action.

### Department of Justice Merger Guidelines

On June 14, 1982, the Department of Justice released its new Merger Guidelines.<sup>13</sup> The guidelines addressed a broad range of issues, including definition of product and geographic markets, measurement of concentration, ease of entry, and defenses. In one section, the department addressed the theory of probable future competition and established a list of four "objective factors" designed to identify mergers that the department would be likely to challenge. The guidelines indicate that the department will consider any "specific evidence" presented by parties proposing to merge showing that the inference of competitive harm drawn from the objective factors is unreliable.<sup>14</sup> Although the structures are similar, the department's guidelines differ from the Board's proposed guidelines in several respects.

The department's first criterion sets an HHI of 1,800 as the threshold concentration level. The department adds that, other things being equal, a challenge is increasingly likely as this threshold is exceeded. The Board's proposal measured market concentration through a three-firm concentration ratio, rather than the HHI.

The department's second criterion addresses the question of whether new entry into the acquired firm's market can be accomplished by firms without any specific entry advantage. The department's new guidelines define ease of entry in a relatively complicated manner, involving the extent to which hypothetical increases in price would encourage outside firms to enter. The Board's proposed guidelines did not explicitly address ease of entry and contained no hypothetical test of this kind.

According to the third criterion, the department is unlikely to challenge a market-extension merger if three or more other firms have the entry advantage ascribed to the acquiring firm. As a general matter, the department will be increasingly likely to challenge a merger as the number of other similarly situated firms decreases below three and as the extent of the entry advantage increases.

The final factor the department will consider is the market share of the acquired firm. Under the guidelines, the department is unlikely to challenge a market-extension merger when the acquired firm has a market share of 5 percent or less; is increasingly likely to challenge as the share increases; and is likely to challenge any merger satisfying the other factors in which the acquired firm's market share is 20 percent or more. The Board's fourth criterion is roughly similar, but uses a 10 percent threshold and requires that the firm to be acquired hold one of the three largest shares in the market.

### CONCLUSION

The Board's determination of the final form of its market-extension guidelines will greatly affect the Board's application of the theory of probable future competition. The determination may thereby significantly influence the future structure of banking in the United States. In reaching this determination, the Board will consider criticisms and suggestions from various sources, including the Department of Justice, public commentors, and federal court decisions. The Board will therefore be balancing such considerations as the burden on banking organizations of compiling applications, the conformity of administrative practice with competitive theory, compliance with legal authority, and uniformity of enforcement practices-all within the context of fulfilling the Board's statutory responsibilities to preserve competition in banking.

# **Industrial Production**

### **Released for publication September 15**

Industrial production declined an estimated 0.5 percent in August, reflecting continued cutbacks in production of business equipment and a sharp cut in output of motor vehicles. The decline in August followed an increase of 0.1 percent in July and a decline of 0.5 percent in June. The percentage changes in June and July estimated a

month earlier were each revised upward 0.2 percentage point. At 138.0 percent of the 1967 average, the index for August was down 10.3 percent from its recent high in July 1981 and at the lowest level since May 1977.

In market groupings, output of consumer goods declined 1.2 percent in August, following gains in each of the preceding three months that averaged 0.9 percent. In recent months, auto

All series are seasonally adjusted and are plotted on a ratio scale. Auto sales and stocks include imports. Latest figures: August.

production has exceeded sales, resulting in excess dealers' inventories; in August, auto assemblies were reduced more than 16 percent to an annual rate of 5.5 million units from a rate of 6.6 million units in July. Production of consumer goods other than autos declined slightly in August. Output of business equipment was reduced 1.4 percent further in August and has now declined 18 percent since its peak in July 1981; this decline compares with a reduction of 14.2 percent in the 1974–75 recession. Output of construction supplies edged up again in August, but remained more than 14 percent below a year earlier.

Production of materials was unchanged in August, following small declines in June and July. Production of parts for consumer durable goods and for equipment was reduced, as was output of energy materials; in contrast, production of nondurable materials rose.

In industry groupings, manufacturing output was reduced 0.5 percent in August, following an increase of 0.2 percent in July. Production of durables was reduced 1.1 percent, reflecting cutbacks in motor vehicles, machinery, and metals. Nondurable manufacturing was virtually unchanged in August, as was utility output. However, mining was again reduced sharply.

# Announcements

### CHANGES IN DISCOUNT RATE

The Federal Reserve Board approved a reduction in the basic discount rate from 11 percent to  $10\frac{1}{2}$  percent, effective August 16, 1982. As in other recent changes, the action was taken against the background of moderate growth in money, some indication of reduced credit demands at banks, and declines in market interest rates.

The Board acted on requests from the directors of the Federal Reserve Banks of Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco.

The Federal Reserve Board later approved a reduction in the basic discount rate from  $10\frac{1}{2}$  percent to 10 percent, effective August 27, 1982. The action was taken to bring the discount rate into better alignment with short-term market interest rates.

The Board acted on requests from the directors of the Federal Reserve Banks of Boston, New York, Philadelphia, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco. Subsequently, the Board approved similar action by the directors of the Federal Reserve Bank of Cleveland, effective August 30, 1982.

The discount rate is the interest rate that applies to borrowings from the District Federal Reserve Banks.

### **REGULATION Y: AMENDMENT**

The Federal Reserve Board has amended its Regulation Y (Bank Holding Companies and Change in Bank Control) and a related interpretation to clarify and expand the data processing activities permissible for bank holding companies, effective September 25, 1982.

The Board's action followed approval in July

of an application by Citicorp to engage in similar expanded data processing activities. The Board's order approving the Citicorp application and its amendment of Regulation Y reflect the Board's consideration of public comment, a public hearing, and the findings of the administrative law judge who conducted the hearings.

The Board's actions are set forth in an official notice and are related to previous provisions of Regulation Y, previous Board bank holding company actions, the amendment of Regulation Y as proposed for comment, and the law judge's determinations. Highlights are as follows:

1. For the internal operations of the bank holding company or the internal operations of its subsidiaries, services provided may include data processing and data transmission, including provision of data processing hardware, software, documentation, and operating personnel.

2. For others, a bank holding company may provide—when certain specified conditions are met—data processing and transmission services, facilities (defined to include hardware, software, documentation, and operating personnel), or data bases provided by any technologically feasible means, on condition that the data to be processed are financial, banking, or economic data.

In an accompanying interpretation, the Board specified that in providing packaged data processing and transmission facilities a bank holding company should provide facilities only for the performance of banking functions, such as check collection and the like, for depository or similar institutions, such as mortgage companies. The Board interpreted its regulation expanding permissible data processing services to include as incidental activities the provision of excess data processing capacity under specified restrictions, and the provision of by-products of permissible data processing and transmission activities when they are not designed or appreciably enhanced for marketing purposes.

### **REGULATION** Q

### Interpretation

The Federal Reserve Board on August 24, 1982, published an interpretation of its Regulation Q (Interest on Deposits) concerning arrangements a member bank may enter into in helping to provide a secondary market for negotiable time deposits issued by the bank.

Under the interpretation a member bank may do the following:

1. Act on behalf of a depositor to find a purchaser of the depositor's time deposit.

2. Enter into arrangements with an unaffiliated third party who stands ready to purchase negotiable time deposits issued by the bank. (Under such arrangements, payment of a fee or provision of interim financing at other than market terms by a member bank is prohibited.)

3. Not enter into a reciprocal arrangement with other depository institutions under which each institution stands ready to purchase time deposits issued by the others.

The Board believes the two types of transactions approved are not devices to avoid the interest penalty required for payment of a time deposit before maturity, while the third type of transaction would constitute such a device.

### Amendments

The Board on September 2, 1982, issued notice of several amendments to its Regulation Q (Interest on Deposits).

One amendment permits member banks to issue all time deposits in book-entry form (computer recorded) as an alternative to using paper instruments.

The other amendments are technical changes in the regulation to conform it to recent actions concerning deposits by the Depository Institutions Deregulation Committee (DIDC).

### MULTILATERAL FINANCING FOR MEXICO

As part of a multilateral financial transition program being arranged with Mexico, the U.S. Treasury Department and the Federal Reserve on August 30, 1982, announced their participation in an arrangement, in cooperation with the central banks of other Group of Ten countries, Spain, and Switzerland, under the aegis of the Bank for International Settlements, designed to provide short-term financing to the Banco de Mexico.<sup>1</sup> Financing available under the multilateral arrangement totals \$1.85 billion, of which the Treasury will provide \$600 million and the Federal Reserve \$325 million through swap arrangements.

The multilateral financing is in support of Mexico's efforts to strengthen its economic and financial position. It provides for drawings by Mexico in line with progress toward agreement between the Mexican government and the International Monetary Fund on an economic adjustment program that will enable Mexico to qualify for drawings under the IMF's Extended Fund Facility.

The multilateral arrangement for short-term financing is part of an interrelated program of short-term and longer-term credits for Mexico. The total program involves not only the BIS and the IMF, but also Mexican discussions with international banks regarding Mexico's external debts.

This multilateral effort is designed to provide an orderly transition to an economic adjustment program that the Mexican government has announced it is developing.

### EXEMPTIONS FROM TRUTH IN LENDING REQUIREMENTS

The Federal Reserve Board has granted exemptions, effective October 1, 1982, from certain parts of the federal Truth in Lending Act to the states of Maine and Connecticut. Exemptions were granted on the grounds that consumer credit protection legislation in these states met the standards of the act for exemptions. The Board also asked for public comment on requests for exemptions from the states of Massachusetts, Oklahoma, and Wyoming.

<sup>1.</sup> The Group of Ten includes Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Sweden, the United Kingdom, and the United States.

### CHANGES IN BOARD STAFF

The Federal Reserve Board has announced the following changes in its official staff, effective August 30, 1982.

George E. Livingston, Assistant Controller, has been named Controller.

David L. Robinson, Assistant Director, Division of Federal Reserve Bank Operations, has been promoted to Associate Director in the Division.

C. William Schleicher, Jr., Assistant Director, Division of Data Processing, has been made Associate Director, Division of Federal Reserve Bank Operations.

Anne M. DeBeer has been appointed Assistant Director, Division of Federal Reserve Bank Operations. Ms. DeBeer, a member of the Board's staff since 1974, holds a B.A. from the University of Toronto and an M.A. and a D.P.A. from George Washington University.

Jack Dennis, Jr., has been named Assistant

Director, Division of Federal Reserve Bank Operations. Mr. Dennis was with the Federal Reserve Bank of Minneapolis before joining the Board's staff in 1976. He holds a B.A. from Minneapolis Metropolitan State University and an M.B.A. from Southern University.

The Board has also announced the retirement of J. Cortland G. Peret, Deputy Associate Director, Division of Research and Statistics, effective September 18, 1982.

System Membership: Admission of State Bank

The following bank was admitted to membership in the Federal Reserve System during the period August 11 through September 10, 1982:

#### Texas

Fulshear ..... Fulshear State Bank

# Record of Policy Actions of the Federal Open Market Committee

### Meetings Held on June 30–July 1, 1982, and on July 15, 1982<sup>1</sup>

**Domestic Policy Directive** 

The information reviewed at this meeting suggested that real GNP had changed little in the second quarter, after declining at an annual rate of 3.7 percent in the first quarter, as business inventory liquidation moderated from an extraordinary rate. The rise in average prices, as measured by the fixed-weight price index for gross domestic business product, appeared to have slowed somewhat from the annual rate of about 4<sup>3</sup>/<sub>4</sub> percent in the first quarter.

The nominal value of retail sales rose 1½ percent further in May, according to the advance report. Sales gains were widespread and were especially strong at automotive, general merchandise, and apparel outlets. Unit sales of new domestic automobiles rose about 16½ percent to an annual rate of 6.4 million units. Auto sales dropped sharply in the first 20 days of June, however, following the termination of most purchase-incentive programs.

The index of industrial production edged down 0.2 percent in May, following declines of 0.8 percent in each of the two preceding months. Output of business equipment continued to drop sharply, and production of durable goods materials also declined further. But production of consumer durable goods rose markedly for the second month in a row, reflecting primarily an appreciable increase in automobile assemblies.

Nonfarm payroll employment was essentially unchanged in May, after having declined substantially in March and April. In manufacturing, job losses were appreciably less in May than in the earlier months, and the average workweek edged up 0.1 hour to 39.1 hours. In contrast to the payroll data, the survey of households indicated a substantial increase in employment; but growth in the civilian labor force was even greater, and the unemployment rate edged up 0.1 percentage point to 9.5 percent.

The Department of Commerce survey of business spending plans taken in late April and May suggested that current-dollar expenditures for plant and equipment would rise only  $2\frac{1}{4}$  percent in 1982, compared with  $7\frac{1}{4}$  percent reported in the February survey and an actual expansion of about  $8\frac{3}{4}$  percent in 1981. The survey results implied a year-toyear decline of about  $2\frac{1}{2}$  percent in real terms.

Private housing starts rose appreciably in May to an annual rate of 1.1 million units, exceeding a rate of 1 million units for the first time since last July. Most of the May increase

<sup>1.</sup> At its meeting on June 30-July 1, 1982, in accordance with the Full Employment and Balanced Growth Act of 1978 (the Humphrey-Hawkins Act), the Committee reviewed its ranges for growth of the monetary and credit aggregates for the period from the fourth quarter of 1981 to the fourth quarter of 1982 and gave preliminary consideration to the objectives for monetary growth that might be appropriate for 1983. The conclusion of the Committee's consideration of the ranges was deferred until July 15, 1982, owing to the long interval before the date of Chairman Volcker's testimony in conjunction with the Board's midyear report under the act, which was scheduled for July 20 before the Senate Committee on Banking, Housing, and Urban Affairs. The Board's report also was transmitted to the Congress on July 20.

was in the more volatile multifamily sector: multifamily starts rose nearly 50 percent, compared with an increase of about 9 percent in singlefamily starts. Sales of new homes increased substantially in May, while sales of existing homes were unchanged; total home sales were nearly 25 percent below the level of a year earlier.

The producer price index for finished goods changed little in May, as sharp declines in prices of energyrelated items about offset increases in prices of food and other consumer goods and capital equipment. Over the first five months of the year, the index was virtually stable. The consumer price index, which had registered a small net increase over the first four months of the year, rose 1 percent in May, reflecting sharp increases in the volatile homeownership and energy components of the index and a considerable rise in food prices. Through May, the rise in the index of average hourly earnings was at a significantly less rapid pace than during 1981.

In foreign exchange markets the trade-weighted value of the dollar against major foreign currencies had risen about 7 percent over the period since the last FOMC meeting, to its highest level since early 1971. The strength of the dollar reflected a rise in U.S. interest rates relative to foreign rates as well as heightened concerns because of hostilities in the Middle East. The U.S. foreign trade deficit in the first five months of 1982 was at a rate substantially less than that in the fourth quarter of last year, as imports declined more than exports.

At its meeting on May 18, the Committee had reaffirmed the objectives for monetary growth established at its meeting at the end of March; thus, it had decided to seek behavior of reserve aggregates associated with growth of M1 and M2 from March to June at annual rates of about 3 percent and 8 percent respectively. The Committee had also agreed that deviations from these objectives should be evaluated in light of changes in the relative importance of NOW accounts as a savings vehicle. The intermeeting range for the federal funds rate, which provides a mechanism for initiating further consultation of the Committee, was set at 10 to 15 percent.

M1 declined at an annual rate of about 2 percent in May, following expansion at an annual rate of about  $10^{3/4}$  percent in April. The contraction was attributable to a sizable decline in other checkable deposits, which had exhibited extraordinary growth over the preceding six months. M2 grew at an annual rate of about  $10^{1/2}$  percent in May, a little above the rate in April.

Total credit outstanding at U.S. commercial banks grew at an annual rate of about 8½ percent in May, down slightly from the pace in April. Growth in business loans, at an annual rate of nearly 19 percent, accounted for much of the rise in bank credit, as most other categories of loans and investments registered only moderate growth or contraction. Business demands for credit, especially short-term credit, were exceptionally strong in May, as nonfinancial businesses also issued a sizable volume of commercial paper.

Nonborrowed reserves, adjusted to include extended credit from Federal Reserve Banks, expanded substantially in May, after having changed little in April. Total reserves grew moderately, however, as borrowing from Federal Reserve Banks for purposes of adjusting reserve positions (including seasonal borrowing) declined appreciably. In the two statement weeks ending June 23, such borrowing averaged about \$875 million, compared with an average of about \$940 million in May.

The federal funds rate averaged about 14<sup>1</sup>/<sub>4</sub> percent in the two statement weeks ending June 23, compared with around 14<sup>1</sup>/<sub>2</sub> percent in the days immediately preceding the Committee meeting on May 18. The

rate moved toward 15 percent in the days just before this meeting, influenced by the approach of the June 30 statement date. Most other interest rates rose about  $\frac{1}{2}$  to  $\frac{1}{2}$  percentage points over the intermeeting period. The failure of one dealer in U.S. government securities and difficulties being experienced by another dealer heightened concerns about credit risks throughout the securities markets and induced some widening of risk premiums.<sup>2</sup> The prime rate charged by most commercial banks on short-term business loans remained at 161/2 percent. Average rates on new commitments for fixedrate mortgage loans at savings and loan associations edged up slightly.

The staff projections presented at this meeting suggested that real GNP would grow at a moderate pace over the year ahead but that the unemployment rate would remain near its recent high level. The rise in prices, as measured by the price index for gross domestic business product, was expected to pick up somewhat in the second half of 1982 from the substantially reduced rate in the first half, but continued improvement in the underlying trend was anticipated.

Views of Committee members concerning prospects for economic activity and the behavior of prices generally were similar in character to the staff projections. Consumption seemed likely to rise in response to the 10 percent reduction in federal income taxes at midyear, the concurrent cost-of-living increase in social security payments, and other factors; and the extraordinary rate of liquidation of business inventories in the first half of 1982 also seemed likely to contribute to some economic growth.

As had been the case at the May meeting of the Committee, however,

several members commented that the principal risks of a deviation from the projection of moderate growth in real GNP were on the downside, and some expressed concern that any recovery could falter. Business and consumer sentiment was reported to have deteriorated further, reflecting, among other things, greater uneasiness about the effects of high interest rates, increased bankruptcies, and difficulties affecting certain financial and industrial institutions. In these circumstances, business and consumer demands for liquidity might increase, rather than decline as many expected, extending the contraction in business capital expenditures and limiting consumer outlays for housing and durable goods. Concerning the prospective behavior of consumers, most statistical measures suggested that their liquidity was improving. The point was made, however, that rapidly rising prices of existing houses and readily available mortgages, which were characteristic of earlier years, were no longer providing stimulus for spending. Starting in 1983, a significant volume of balloon payments on earlier house-purchase loans would mature. Moreover, the recovery in activity could be impeded by weak expansion abroad, by import-financing problems of some major trading partners of the United States, and by the deterioration in the competitiveness of U.S. exports associated with the sharp rise in the foreign-exchange value of the dollar.

It was stressed during the meeting that considerable uncertainty remained about the size of the federal budget deficit for fiscal 1983, as well as for later years, although the recent congressional action on a budget resolution for the coming fiscal year represented progress toward a more restrained fiscal policy. To implement the resolution, a great deal remained to be done in legislating appropriations and additional revenues. Several Committee members observed, moreover, that the deficit

<sup>2.</sup> Neither of these firms was on the Federal Reserve Bank of New York's list of primary dealers in U.S. government securities that file reports on their operations with the Bank's Market Reports Division.

would be considerably larger than that contained in the resolution, only in part because the latter was based on relatively optimistic assumptions concerning the performance of the economy. The degree of progress in reducing prospective federal deficits would have a major impact on pressures in financial markets and thus on the performance of such creditsensitive sectors as homebuilding and business fixed investment. In the absence of significant progress, private investment outlays of all types would be less than otherwise.

With respect to prices, the members noted that considerable progress had been made in reducing the rate of increase but that the risks of exacerbating inflationary expectations remained serious. In any case, the underlying rate of inflation was not so low as might be inferred from the recent behavior of major indexes of prices, and the rise in those indexes was generally expected to pick up somewhat from the substantially reduced pace of 1982 to date.

At its meeting on February 1-2, 1982, the Committee had adopted the following ranges for growth of the monetary aggregates over the year from the fourth quarter of 1981 to the fourth guarter of 1982: for M1,  $2\frac{1}{2}$  to  $5\frac{1}{2}$  percent; for M2, 6 to 9 percent; and for M3, 61/2 to 91/2 percent. The associated range for bank credit was 6 to 9 percent. In setting the range for M1, the Committee recognized that the level of that aggregate in January was well above the average in the fourth quarter of 1981 but that it was too early to judge conclusively the extent to which the recent upsurge in growth reflected temporary influences rather than a basic change in the amount of money needed to finance growth of nominal GNP. On the assumption that the relationship between growth of M1 and the expansion of nominal GNP was likely to be closer to normal than it had been in 1981, and given the relatively low base in the fourth quarter of 1981, the Committee contemplated that growth of M1

in 1982 might acceptably be in the upper part of its range. The Committee also contemplated that growth of M2 was likely to be high within its range.

At this meeting, the Committee reviewed its ranges for growth of the monetary and credit aggregates for the period from the fourth quarter of 1981 to the fourth quarter of 1982 and gave preliminary consideration to objectives for monetary growth that might be appropriate for 1983. With respect to the current year, the Committee noted that the levels of the monetary aggregates in June were slightly above the upper ends of their ranges for 1982. The upsurge in M1 in January was followed by quite slow growth on average over the next five months, and from the fourth quarter of 1981 to June, M1 had increased at an annual rate of 5.7 percent. Over the same period, M2 and M3 had grown at annual rates of 9.4 percent and 9.7 percent respectively.

Although the growth of M1 was moderate over the first half of 1982, it considerably exceeded the growth of nominal GNP; in the first quarter, the decline in the income velocity of M1 was extraordinarily sharp. Similarly, the income velocity of the broader monetary aggregates was unusually weak in the first half. Given the persistence of relatively high interest rates, the behavior of velocity in the first half suggested a heightened demand for M1 and M2.

The unusual demand for M1 in the first half was concentrated in NOW accounts and other interest-bearing checkable deposits, which have some characteristics of traditional savings deposits. The enlarged share of these accounts in M1 had made this aggregate more sensitive to changes in the public's desire to hold highly liquid assets.

Growth of M2 as well as that of M1 appeared to have been bolstered in the first half of 1982 by increased preferences for holding highly liquid financial assets. Conventional savings deposits actually increased, after having contracted in the preceding four years, and money market mutual funds continued to expand strongly, although less so than in 1981. Altogether, the nontransaction component of M2 (M2 less M1) grew at an annual rate of 10<sup>1</sup>/<sub>2</sub> percent from the fourth quarter of 1981 to June.

In reconsidering the ranges for 1982. Committee members remained in agreement on the need to maintain the commitment to the long-standing goal of restraining growth of money and credit in order to contribute to a further reduction in the rate of inflation and provide the basis for restoration of economic stability and sustainable growth in output. At the same time, the Committee took account of the need to provide sufficient monetary growth to encourage recovery in economic activity over the months ahead. Growth consistent with the current longer-run ranges, quite possibly around the upper end, was thought to be adequate in view of the sizable rise in the velocity of money that generally developed in the early stages of a cyclical recovery in economic activity. Still, the members recognized that regulatory actions and changes in the public's preferences for various assets, as well as shifts in liquidity demands generally, would tend to affect the velocity of money and would need to be taken into account in evaluating the behavior of the monetary aggregates. To the extent that precautionary demands for money remained strong, for example, growth of the major monetary aggregates near, or possibly somewhat above, the upper ends of their ranges for 1982 might well be consistent with the Committee's general policy objectives.

In the Committee's discussion at this meeting, almost all members preferred retention of the previously established ranges for growth of the monetary aggregates in 1982, with the understanding that growth around the upper ends of the ranges would be acceptable, but some senti-

ment was expressed for small upward adjustments in the ranges. Several members observed that any increase in the ranges might well be misinterpreted as a relaxation of the Committee's commitment to the long-run objective of restraining monetary growth and contributing to a further reduction in the rate of inflation, thereby adversely affecting inflationary expectations and longterm interest rates. It was also noted that minor adjustments in the ranges might seem to suggest an unrealistic degree of precision with which monetary growth could be controlled and might not be sufficient in any case to allow for a temporary bulge related to exceptional demands for liquidity, should they develop.

With respect to 1983, most members felt that the current ranges for 1982 could appropriately be retained; but they recognized that, in light of all the current uncertainties surrounding the economic, financial, federal budgetary outlook, and ranges adopted at this time would be especially tentative. The current ranges would be consistent with a reduction in monetary growth in 1983 if, as seemed likely, growth of the monetary aggregates in 1982 was around the upper ends of their ranges. Some sentiment was expressed for a reduction in the ranges for 1983, particularly if those for 1982 were raised, in line with the general objective of reducing monetary growth gradually over time.

The implications for monetary policy of the recent congressional action on a budget resolution were considered at some length. Committee members generally felt that a firm follow-through in current efforts to reduce budgetary deficits should contribute to easing financial market strains within the context of the current ranges for monetary growth; to help assure that result, in their view, it was important that action beyond the magnitude incorporated in the first budget resolution be taken affecting future years. It was not thought that the budgetary effort itself would warrant even greater growth in the monetary aggregates than was being contemplated. Excessive monetary growth would tend to work against the benefits of an improved budgetary outlook in curbing inflation and inflationary expectations. The Committee concluded its discussion and reached a decision on the longer-run ranges during a telephone conference on July 15, 1982.

The Committee considered policy for the period from June to September in light of the apparent consensus for retaining the previously established ranges for growth of the monetary aggregates over the year, with the understanding that growth near, or for a time somewhat above, the upper ends of those ranges would be acceptable depending on emerging strength of liquidity demands in a period of economic uncertainty. The data becoming available at the time of the meeting indicated that growth of M1 had weakened appreciably after mid-June and that growth of both M1 and M2 over the whole period from March to June apparently had been in line with the Committee's objectives for growth over that period at annual rates of about 3 percent and 8 percent respectively. The levels of M1 and M2 in June, as noted earlier, were just slightly above the upper ends of their ranges for 1982.

Evaluating the behavior of M1 and implementing policy in the period immediately ahead would be complicated by a number of special influences. The midyear reduction in withholding rates for federal income taxes and the cost-of-living increase in social security payments were generally expected to lead to some bulge in monetary growth in July. It was also expected, however, that any such bulge would be offset in ensuing months. More fundamentally, some easing in demands for liquidity and precautionary balances, and a concomitant increase in the income velocity of money, was anticipated over the months ahead, but the public's liquidity preferences could not be predicted with much confidence, especially in the current environment of financial strains.

Given these problems, most members stressed the need for flexibility in interpreting the behavior of the monetary aggregates in the period ahead. Thus, while still aiming to provide moderate monetary growth consistent with the objectives for growth over the year, those members would be willing to tolerate a bulge early in the period to the extent that it appeared to be a temporary effect of the tax reduction and increased social security payments. perhaps compounded by seasonal adjustment problems. They would also accept somewhat faster growth over the quarter as a whole if it appeared that demands for liquidity and precautionary balances were not easing as anticipated. In general, they wished to guard against the possibility that short-term aberrations in the behavior of money or exceptional demands for liquidity in circumstances of unusual uncertainty would generate financial market pressures that would impede the prospective recovery in output.

A few members of the Committee were concerned that accommodation of much of a bulge in monetary growth in July or a relatively rapid expansion over the summer months as a whole might jeopardize prospects for achieving the monetary objectives for the year and thus would risk exacerbating inflationary expectations. Accordingly, they believed that tendencies toward such monetary growth rates in the months ahead should be met by increased pressures on bank reserve positions and in the money market.

On the other hand, one member advocated a strategy directed toward a prompt easing of money market conditions with a view to promoting reductions in short-term interest rates. It was also suggested by one member that the Committee adopt an effective ceiling of 15 percent for fluctuations in the federal funds rate over the weeks until the next scheduled meeting, in an effort to avoid any significant backing up of interest rates in the current environment and to strengthen prospects for the anticipated recovery in economic activity. Several members observed, however, that such a strategy was more likely to be viewed as a fundamental change in the Committee's approach to targeting monetary growth and would have adverse market reactions because of its potential for producing an unduly rapid expansion in bank reserves and money.

At the conclusion of the discussion, the Committee agreed to seek behavior of reserve aggregates associated with growth of M1 and M2 from June to September at annual rates of about 5 percent and about 9 percent respectively. It decided that somewhat more rapid growth would be acceptable depending on evidence that economic and financial uncertainties were leading to exceptional liquidity demands. It was also noted that seasonal uncertainties, together with increased social security payments and the initial impact of the tax cut on cash balances, might lead to a temporary bulge in the monetary aggregates, particularly M1. The intermeeting range for the federal funds rate, which provides a mechanism for initiating further consultation of the Committee, was continued at 10 to 15 percent.

The following domestic policy directive was transmitted to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests that real GNP changed little in the second quarter, after the appreciable further decline in the first quarter, as business inventory liquidation moderated from an extraordinary rate. In May the nominal value of retail sales continued to pick up, while industrial production declined only a little further and nonfarm payroll employment was essentially unchanged. The unemployment rate edged up 0.1 percentage point to 9.5 percent. Housing starts rose appreciably from a depressed level.

The price index for gross domestic business product appears to have risen at

a relatively slow rate in the second quarter. Over the first five months of this year the producer price index for finished goods was virtually stable, and the advance in the index of average hourly carnings remained at a reduced pace. The consumer price index rose sharply in May, after a small net increase over the preceding four months.

The weighted average value of the dollar against major foreign currencies has risen sharply over the past month, reaching its highest level since early 1971, in response to a rise in U.S. interest rates relative to foreign rates as well as to hostilities in the Middle East. The U.S. foreign trade deficit in the first five months of 1982 was at a rate substantially less than in the fourth quarter of last year, as imports declined more than exports.

M1 declined somewhat in May, after its sharp rise in April, while growth of M2 remained substantial. Business demands for credit, especially short-term credit, were exceptionally strong. Shortterm market interest rates and bond yields generally have risen since late May, and mortgage interest rates have increased.

The Federal Open Market Committee seeks to foster monetary and financial conditions that will help to reduce inflation, promote a resumption of growth in output on a sustainable basis, and contribute to a sustainable pattern of international transactions. At its meeting in early February, the Committee agreed that its objectives would be furthered by growth of M1, M2, and M3 from the fourth quarter of 1981 to the fourth quarter of 1982 within ranges of  $2\frac{1}{2}$  to  $5\frac{1}{2}$ percent, 6 to 9 percent, and  $6\frac{1}{2}$  to  $9\frac{1}{2}$ percent respectively. The associated range for bank credit was 6 to 9 percent. These ranges were under review at this meeting.

In the short run, the Committee seeks behavior of reserve aggregates consistent with growth of M1 and M2 from June to September at annual rates of about 5 percent and about 9 percent respectively. Somewhat more rapid growth would be acceptable depending on evidence that economic and financial uncertainties are leading to exceptional liquidity demands and changes in financial asset holdings. It was also noted that seasonal uncertainties, together with increased social security payments and the initial impact of the tax cut on cash balances, might lead to a temporary bulge in the monetary aggregates, particularly M1. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that pursuit of the monetary objectives and related reserve paths during the period before the

next meeting is likely to be associated with a federal funds rate persistently outside a range of 10 to 15 percent.

Votes for this action: Messrs. Volcker, Solomon, Balles, Gramley, Martin, Partee, Rice, and Keehn. Votes against this action: Messrs. Black, Ford, Mrs. Teeters, and Mr. Wallich. Mr. Keehn voted as alternate for Mrs. Horn.

Messrs. Black, Ford, and Wallich dissented from this action because they favored a policy for the period immediately ahead that was firmly directed toward bringing growth of M1 down to its range for 1982 by the end of the year. They were concerned that accommodation of relatively rapid growth over the summer months might jeopardize achievement of the monetary objectives for the year and thus would risk exacerbating inflationary expectations. Accordingly, they believed that tendencies toward rapid monetary expansion in the months immediately ahead should be met by greater pressures on bank reserve positions and in the money market.

Mrs. Teeters dissented from this action because she favored specification of somewhat higher rates for monetary growth during the third quarter along with an approach to operations early in the period that would clearly signal an easing in policy. In her opinion, policy at this point should be directed toward exerting downward pressure on shortterm interest rates in order to promote recovery in output and employment.

At a telephone meeting on July 15, the Committee concluded its review of the ranges for growth of the monetary aggregates in 1982 and the tentative ranges for 1983 and took the following actions.

The Committee reaffirmed the following ranges for growth of the monetary aggregates over the year from the fourth quarter of 1981 to the fourth quarter of 1982 that it had adopted in early February: for M1,  $2\frac{1}{2}$  to  $5\frac{1}{2}$  percent; for M2, 6 to 9 percent; and for M3,  $6\frac{1}{2}$  to  $9\frac{1}{2}$ percent. The associated range for bank credit was 6 to 9 percent. At the same time, the Committee agreed that growth in the monetary and credit aggregates around the top of the indicated ranges would be acceptable in the light of the relatively low base period for the M1 target and other factors, and that it would tolerate for some period of time growth somewhat above the target range should unusual precautionary demands for money and liquidity be evident in the light of current economic uncertainties.

Votes for this action: Messrs. Volcker, Solomon, Balles, Black, Ford, Mrs. Horn, Messrs. Martin, and Partee. Vote against this action: Mrs. Teeters. Absent and not voting: Messrs. Gramley, Rice, and Wallich.

Mrs. Teeters dissented from this action because she favored an explicit statement that growth of M1 above the upper end of the Committee's range for 1982 by 1 percentage point, or even as much as  $1\frac{1}{2}$  percentage points, might be acceptable. In her opinion, it was important to indicate the acceptable degree of growth of M1 above the range in order to foster market behavior that would lower interest rates and enhance the prospects for sustaining recovery in output and employment.

The Committee indicated that for 1983 it was tentatively planning to continue the current ranges for 1982, but would review that decision carefully in the light of developments over the remainder of 1982.

Votes for this action: Messrs. Volcker, Solomon, Balles, Black, Ford, Mrs. Horn, Messrs. Martin, Partee, and Mrs. Teeters. Votes against this action: None. Absent and not voting: Messrs. Gramley, Rice, and Wallich.

Shortly afterwards, Messrs. Gramley, Rice, and Wallich, who had been unable to attend the meeting on July 15 but who had been present for the main discussion of the longer-run ranges for monetary growth held at the meeting on June 30–July 1, associated themselves with the Committee in its actions with respect to the ranges for both 1982 and 1983.

Following the Committee's actions on July 15, the next to last paragraph of the domestic policy directive adopted at its meeting on June 30–July 1 read as follows:

The Federal Open Market Committee seeks to foster monetary and financial conditions that will help to reduce inflation, promote a resumption of growth in output on a sustainable basis, and contribute to a sustainable pattern of international transactions. At its meeting in early February, the Committee had agreed that its objectives would be furthered by growth of M1, M2, and M3 from the fourth quarter of 1981 to the fourth quarter of 1982 within ranges of  $2\frac{1}{2}$  to  $5\frac{1}{2}$  percent, 6 to 9 percent, and  $6\frac{1}{2}$ to 9<sup>1</sup>/<sub>2</sub> percent respectively. The associated range for bank credit was 6 to 9 percent. The Committee began a review

of these ranges at its meeting on June 30-July 1, and at a meeting on July 15, it reaffirmed the targets for the year set in February. At the same time the Committee agreed that growth in the monetary and credit aggregates around the top of the indicated ranges would be acceptable in the light of the relatively low base period for the M1 target and other factors, and that it would tolerate for some period of time growth somewhat above the target range should unusual precautionary demands for money and liquidity be evident in the light of current economic uncertainties. The Committee also indicated it was tentatively planning to continue the current ranges for 1983, but would review that decision carefully in the light of developments over the remainder of 1982.

\* \* \* \* \*

Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's Annual Report, are made available a few days after the next regularly scheduled meeting and are later published in the BULLETIN.

# Legal Developments

#### AMENDMENTS TO REGULATION A

The Board of Governors of the Federal Reserve System has amended its Regulation A Extensions of Credit by Federal Reserve Banks (12 CFR Part 201), for the purpose of adjusting discount rates with a view of accommodating commerce and business in accordance with other related rates and the general credit situation of the country.

Effective July 20, 1982, the Board acted to amend Regulation A to reduce the discount rate to  $11\frac{1}{2}$  per cent. On August 2, 1982, the Board amended Regulation A to reduce the discount rate to 11 per cent.

Effective August 16, 1982, sections 201.51 and 201.52 of Regulation A were amended as set forth below:

# Part 201—Extensions of Credit by Federal Reserve Banks

Section 201.51—Short Term Adjustment Credit for Depository Institutions

The rates for short term adjustment credit provided to depository institutions under § 201.3(a) of Regulation A are:

Federal Reserve Bank of	Rate	Effective
Boston	10%	Aug. 16, 198
New York	101/2	Aug. 16, 1982
Philadelphia	101/2	Aug. 16, 198.
Cleveland	101/2	Aug. 16, 198
Richmond	101/2	Aug. 16, 198
Atlanta	101/2	Aug. 16, 1982
Chicago	101/2	Aug. 16, 1983
St. Louis	101/2	Aug. 16, 1982
Minneapolis	101/2	Aug. 16, 1982
Kansas City	101/2	Aug. 16, 1982
Dallas	101/2	Aug. 16, 198
San Francisco	10½	Aug. 16, 198

# Section 201.52—Extended credit to Depository Institutions

(a) The rates for seasonal credit extended to depository institutions under § 201.3(b)(1) of Regulation A are:

Federal Reserve Bank of	Rate	Effective
Boston	101/2	Aug. 16, 1982
New York	101/2	Aug. 16, 1982
Philadelphia	101/2	Aug. 16, 1982
Cleveland	101/2	Aug. 16, 1982
Richmond	101/2	Aug. 16, 1982
Atlanta	101/2	Aug. 16, 1982
Chicago	101/2	Aug. 16, 1982
St. Louis	101/2	Aug. 16, 1982
Minneapolis	101/2	Aug. 16, 1982
Kansas City	10½	Aug. 16, 1982
Dallas	101/2	Aug. 16, 1982
San Francisco	101/2	Aug. 16, 1982

(b) The rates for other extended credit provided to depository institutions under sustained liquidity pressures or where there are exceptional circumstances or practices involving a particular institution under § 201.3(b)(2) of Regulation A are:

Federal Reserve Bank of	Rate	Effective	
Boston	101/2	Aug. 16, 1982	
New York	101/2	Aug. 16, 1982	
Philadelphia	101/2	Aug. 16, 1982	
Cleveland	101/2	Aug. 16, 1982	
Richmond	101/2	Aug. 16, 1982	
Atlanta	101/2	Aug. 16, 1982	
Chicago	101/2	Aug. 16, 1982	
St. Louis	101/2	Aug. 16, 1982	
Minneapolis	101/2	Aug. 16, 1982	
Kansas City	101/2	Aug. 16, 1982	
Dallas	101/2	Aug. 16, 1982	
San Francisco	101/2	Aug. 16, 1982	

Note. These rates apply for the first 60 days of borrowing. A 1 per cent surcharge applies for borrowing during the next 90 days, and a 2 per cent surcharge applies for borrowing thereafter.

### AMENDMENTS TO REGULATION D

The Board of Governors of the Federal Reserve System has amended its Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204) to define the new 7 to 13 day deposit category authorized by the Depository Institutions Deregulation Committee ("DIDC") as a "time deposit" for purposes of Regulation D. Accordingly, these deposits will be subject to no basic reserve requirements if they are personal time deposits and to a 3 per cent reserve requirement if they are nonpersonal time deposits. All other deposit categories, with original maturities or notice periods of less than 14 days, will continue to be defined as "demand deposits" and subject to transaction account reserve requirements. Effective September 1, 1982, subparagraph 204.2 (b)(2) is amended, and subparagraphs 204.2(c)(1) (i)(E) and (ii) are revised and a new subparagraph (iii) is added as set forth below:

Part 204—Reserve Requirements of Depository Institutions

#### Section 204.2—Definitions

\* \* \* \*

(b) \* \* \*

(2) A "demand deposit" does not include (i) checks or drafts drawn by the depository institution on the Federal Reserve or on another depository institution; (ii) a deposit or account issued pursuant to 12 CFR 1204.121, including those with an original maturity or required notice period of seven to 13 days; or (iii) for depository institutions not subject to the rules of the Depository Institutions Deregulation Committee under 12 U.S.C. § 3501 *et seq.*, a deposit or account issued with an original maturity or required notice period of 7 to 13 days if such deposit or account is nonnegotiable, subject to a minimum balance of \$20,000, and not otherwise a transaction account under section 204.2(e) of this Part.

- (c) \* \* \*
  - (1) \* \* \*
  - (i) \* \* \*

(E) that constitute a "savings deposit" which is not regarded as a "transaction account;"

(ii) borrowings, regardless of maturity, represented by a promissory note, an acknowledgment of advance, or similar obligation described in section 204.2(a)(1)(vii) that is issued to any office located outside the United States of another depository institution or Edge or agreement corporation organized under the laws of the United States, to any office located outside the United States of a foreign bank, or to institutions whose time deposits are exempt from interest rate limitations under section 217.3(g) of Regulation Q (12 CFR 217.3(g)); and

(iii) a deposit or account issued pursuant to 12 CFR § 1204.121, including those with an original maturity or required notice period of 7 to 13 days; or for depository institutions not subject to the rules of the Depository Institutions Deregulation Committee under 12 U.S.C. § 3501 *et seq.*, a deposit or account issued with an original maturity or required notice period of 7 to 13 days if such deposit or account is nonnegotiable, subject to a minimum balance of \$20,000, and is not otherwise a transaction account under section 204.2(e) of this Part.

\* \* \* \* \*

### Amendment to Regulation Q

The Board of Governors of the Federal Reserve System has amended Regulation Q—Interest on Deposits (12 CFR Part 217) to permit member banks to issue automatically renewable repurchase agreements on U.S. government or agency securities ("RPs") of less than \$100,000 with maturities of 89 days or less exempt from Federal interest rate ceilings. In addition, member banks will be permitted to issue small denomination RPs with maturities of 90 days or more exempt from interest rate ceilings.

Effective August 23, 1982, subparagraph 217.1(f)(2) is amended to read as follows:

### Part 217—Interest on Deposits

\* \* \* \*

Section 217.1—Definitions

(f) \* \* \*

(2) Evidences an indebtedness arising from a transfer of direct obligations of, or obligations that are fully guaranteed as to principal and interest by, the United States or any agency thereof that the bank is obligated to repurchase;

\* \* \* \* \*

AMENDMENT TO REGULATION Y

The Board of Governors of the Federal Reserve System is amending its Regulation Y—Bank Holding Companies and Change in Bank Control (12 CFR Part 225) to clarify and expand the scope of permissible data processing activities in which a bank holding company may engage. The revised interpretation describes certain activities the Board considers incidental to permissible data processing and data transmission activities.

Effective September 25, 1982, section 225.4 is amended by revising paragraph (a)(8) to read as follows:

Part 225—Bank Holding Companies and Change in Bank Control

#### Section 225.4—Nonbanking Activities

(a) \* \* \*

(8)(i) Providing data processing and data transmission services, data bases or facilities (including data processing and data transmission hardware, software, documentation, and operating personnel) for the internal operations of the holding company or its subsidiaries;

(ii) Providing to others data processing and transmission services, facilities, data bases or access to such services, facilities, or data bases by any technologically feasible means, where:

(A) Data to be processed or furnished are financial, banking or economic, and the services are provided pursuant to a written agreement so describing and limiting the services;

(B) The facilities are designed, marketed, and operated for the processing and transmisison of financial, banking or economic data; and

(C) Hardware in connection therewith is offered only in conjunction with software designed and marketed for the processing and transmission of financial, banking or economic data, and where the general purpose hardware does not constitute more than 30 percent of the cost of any packaged offering.

### BANK HOLDING COMPANY AND BANK MERGER ORDERS ISSUED BY THE BOARD OF GOVERNORS

### Orders Under Section 3 of Bank Holding Company Act

Colorado National Bankshares, Inc., Denver, Colorado

#### Order Approving Acquisition of Bank

Colorado National Bankshares, Inc., Denver, Colorado ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the act (12 U.S.C. § 1842(a)(3)) to acquire 100 percent of The Exchange National Bank of Colorado Springs, Colorado Springs, Colorado ("Bank").

Notice of this application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the act (12 U.S.C. § 1842(c)).

Applicant, the fourth largest commercial banking organization in Colorado, controls 21 subsidiary banks with consolidated deposits of \$1.2 billion, representing 10.0 percent of total deposits in commercial banks in the state.<sup>1</sup> Bank, is the tenth largest banking organization in Colorado, with consolidated deposits of \$168.6 million representing 1.2 percent of total deposits in commercial banks in the state. Upon consummation of the proposed transaction, Applicant would become the third largest banking organization in Colorado, and its share of total deposits in commercial banks in the state would increase to 11.2 percent. While the size of the organizations involved is significant, consummation of this proposal will not significantly affect statewide concentration or statewide banking structure.

Bank is the second largest banking organization in the Colorado Springs banking market and controls 17.7 percent of that market's commercial bank deposits.<sup>2</sup> Because Applicant does not currently operate in this market, consummation of the proposed transaction would not increase the concentration of banking resources or reduce the number of competitors in the market. Accordingly, the Board concludes that the proposed transaction would have no adverse effects on existing competition in the market.

The Board has also considered the effects that this acquisition will have on probable future competition in light of its proposed guidelines for assessing the competitive effects of bank holding company acquisitions and mergers.<sup>3</sup> Under these guidelines, the Board will make an intensive examination of a proposed acquisition's effects on potential competition where the market involved is concentrated, where there are only a small number of probable future entrants into the market, where the market is attractive for entry, and the firm to be acquired is a market leader. Two of the four criteria established under the guidelines are present in this case. Bank, the second largest banking organization in the market with a 17.7 percent share of total market commercial banking deposits, is a dominant competitor in the market. Moreover, the banking structure of Colorado is such that there are no more than four banking organizations in the state that are potential market entrants. However, other relevant market data do not satisfy the remaining criteria. The Colorado Springs market, with a three-firm deposit concentration ratio of 56.4 percent and a Herfindahl index of 1338, is not considered a highly concentrated banking market. Furthermore, the market is not attractive for de novo entry as defined under the guidelines because the average growth rate of market depos-

<sup>1.</sup> All banking data as of December 31, 1981.

<sup>2.</sup> The Colorado Springs banking market is approximated by the Colorado Springs RMA.

<sup>3. &</sup>quot;Policy Statement of the Board of Governors of the Federal Reserve System in Assessing Competitive Factors Under the Bank Merger Act and the Bank Holding Company Act", 47 Federal Register 9017 (March 3, 1982). Although the proposed policy statement has not been approved by the Board, the Board is applying the policy guidelines to all applications to determine whether further scrutiny is warranted for anticompetitive effects. See J "Shawmut Corporation", 68 FEDERAL RESERVE BULLETIN 309 (May 1982).

its during the last two years (9.3 percent) is less than the corresponding national rate (9.6 percent) and the corresponding Colorado rate (16.6 percent). In light of all the facts of the record the Board does not consider that consummation of the proposed acquisition will have such adverse effects on probable future competition in the Colorado Springs market as to warrant denial.

The financial and managerial resources and future prospects of Applicant, its subsidiaries and Bank are regarded as generally satisfactory. Considerations relating to banking factors are consistent with approval. Moreover, considerations relating to the convenience and needs of the community to be served are consistent with approval.

On the basis of the record, this application is approved for the reasons summarized above. The transaction shall not be made before the thirtieth calender day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City acting pursuant to delegated authority.

By Order of the Board of Governors, effective August 31, 1982.

Voting for this action: Chairman Volcker and Governors Martin, Wallich, Teeters, and Gramley. Absent and not voting: Governors Partee and Rice.

(Signed) WILLIAM W. WILES, [SEAL] Secretary of the Board.

Em Kay Financing Corp., Panama, Panama

Em Kay Holding Corp., New York, New York

Order Approving Formation of Bank Holding Companies

Em Kay Financing Corp. ("Financing"), Panama, Panama, and its 90 percent-owned subsidiary, Em Kay Holding Corp. ("Holding"), New York, New York (collectively referred to as "Applicants"), have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become bank holding companies by acquiring 67 percent or more of the voting shares of Village Bank of New Jersey ("Bank"), South Orange, New Jersey.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the act. The time for filing comments and views has expired and the Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the act.

Applicants are non-operating corporations organized for the purpose of becoming bank holding companies by acquiring Bank. Financing, a corporation organized under the laws of Panama, owns 90 percent of the outstanding stock of Holding, which is organized under the laws of New Jersey. Upon acquisition of Bank (deposits of \$47.1 million), Applicants will control the 68th largest commercial bank in New Jersey with 0.2 percent of the total deposits in commercial banks in that state.<sup>1</sup>

Bank is the 20th largest of 37 commercial banks in the relevant banking market<sup>2</sup> and controls 0.7 percent of the total deposits in commercial banks in the local market. Inasmuch as Applicants and their principals control no other banks in the United States, consummation of the proposed transaction would have no adverse effects on either existing or potential competition in the market, and would not increase the concentration of resources in any relevant area. Therefore, competitive considerations are consistent with approval of the applications.

The financial and managerial resources of Applicants and Bank are considered generally satisfactory and the future propsects of each appear favorable, especially in light of the additional capital that Applicants intend to furnish Bank. Thus, considerations relating to banking factors lend some weight to approval of the applications. Applicants also propose to increase commercial lending by Bank to mid-sized businesses and to expand Bank's branch network. Therefore, considerations relating to the convenience and needs of the community to be served also lend some weight toward approval of these applications. Accordingly, the Board has determined that consummation of the transaction would be in the public interest and that the applications should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transaction shall not be made before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

<sup>1.</sup> Banking data are as of June 30, 1980.

<sup>2.</sup> The relevant market is the Greater Newark market which is approximated by all or part of Bergen, Essex, Hudson, Morris, and Union Counties, New Jersey.

By order of the Board of Governors, effective August 30, 1982.

Voting for this action: Chairman Volcker and Governors Martin, Wallich, Teeters, and Gramley. Absent and not voting: Governors Partee and Rice.

(Signed) WILLIAM W. WILES, [SEAL] Secretary of the Board.

### First American Bank Corporation, Kalamazoo, Michigan

### Order Approving Merger of Bank Holding Companies

First American Bank Corporation, Kalamazoo, Michigan ("Applicant"), has applied for the Board's approval under section 3(a)(5) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(5)) to merge with Mid Michigan Bank Corporation, Gladwin, Michigan ("Mid Michigan"), and thereby acquire its subsidiary bank, Mid Michigan Bank, Gladwin, Michigan ("Bank"). Upon approval of the merger, Mid Michigan would cease to exist, and Bank would become a subsidiary of Applicant.

Notice of the application, affording an opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the act (12 U.S.C. § 1842(c)).

Applicant, the fifth largest banking organization in the state of Michigan, controls 27 subsidiary banks with aggregate deposits of \$3.06 billion, representing 7.04 percent of total deposits in commercial banks in that state. Bank is the 117th largest commercial bank in Michigan, controlling total deposits of \$63.0 million, representing 0.15 percent of commercial bank deposits in the state. Consummation of this proposal would increase Applicant's aggregate deposits statewide to approximately \$3.12 billion, or 7.19 percent of total commercial bank deposits in the state<sup>1</sup> and Applicant would retain its ranking as the fifth largest commercial banking organization in Michigan. Thus, the Board concludes that consummation of the transaction would have no significant effects upon the concentration of banking resources in Michigan.

Bank competes in three banking markets, the Standish–West Branch market, the Bay City–Saginaw market, and the Mt. Pleasant market and controls 0.2, 2.3, and 9.1 percent of the markets' deposits in commercial banks, respectively.<sup>2</sup> Because Applicant currently does not operate in these markets, consummation of the proposal would have no adverse effects on competition in any relevant market and would not increase the concentration of resources in any relevant area. Accordingly, the Board concludes that competitive considerations are consistent with approval.

The financial and managerial resources and future propsects of Applicant, its subsidiary banks, and Bank are considered generally satisfactory and consistent with approval. While some new or expanded services may result from approval of this proposal, there is no evidence in the record indicating that the banking needs of the community to be served are not being met. Considerations relating to the convenience and needs of the community to be served are consistent with approval. Accordingly, the Board has determined that consummation of the transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made before the thirtieth calendar day following the effective date of this Order or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Chicago, acting pursuant to delegated authority.

By order of the Board of Governors, effective August 30, 1982.

Voting for this action: Chairman Volcker and Governors Martin, Wallich, Teeters, and Gramley. Absent and not voting: Governors Partee and Rice.

[SEAL]

(Signed) WILLIAM W. WILES, Secretary of the Board.

Harris Bankcorp, Inc., Chicago, Illinois

#### Order Approving Acquisition of Bank

Harris Bankcorp, Inc., Chicago, Illinois, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval

<sup>1.</sup> All banking data are as of June 30, 1981.

<sup>2.</sup> The Standish-West Branch market is approximated by Arenac and Ogemaw Counties, the western half of Ioseo County, and Curtis Township in Alcona County, Michigan. The Bay City-Saginaw market includes Bay, Midland, and Gladwin Counties, plus the northern three-fourths of Saginaw County, Michigan. The Mt. Pleasant market is defined as Isabella and Clare Counties, Michigan.

under section 3(a)(3) of the act (12 U.S.C. § 1842(a)(3)) to acquire 100 percent of the voting shares of the successor by merger to Roselle State Bank and Trust Company, Roselle, Illinois ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the act (12 U.S.C. § 1842(b)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the act (12 U.S.C. § 1842(c)).

Applicant, the third largest bank holding company in Illinois, controls one subsidiary bank, Harris Trust and Savings Bank, Chicago, Illinois ("Harris Bank"). Harris Bank, the third largest commercial bank in Illinois, has total deposits of \$3,499.5 million, representing 3.85 percent of all commercial bank deposits in the state.<sup>1</sup> In addition, on June 25, 1982, Applicant's proposal to acquire a second bank, Argo State Bank, Summit, Illinois ("Argo Bank"),<sup>2</sup> having total deposits of \$42.1 million, was approved but has not yet been consummated. Bank is the 102nd largest commercial bank in Illinois and has deposits of \$111.7 million, representing 0.12 percent of all commercial bank deposits in Illinois. Upon consummation of the aguisition of Argo Bank and approval of the instant proposal, Applicant's total deposits would increase to approximately \$3,653.3 million, or 4.02 percent of the state's commercial bank deposits, and Applicant would retain its rank as the third largest banking organization in Illinois. Thus, the Board concludes that consummation of the proposal would have no significant effects upon the concentration of banking resources in Illinois.

Bank competes in the Chicago banking market<sup>3</sup> and ranks 67th out of 369 commercial banks in that market, controlling 0.18 percent of total commercial bank deposits therein. Harris Bank also operates in the Chicago banking market and is the third largest banking organization therein, holding 5.58 percent of total market deposits. Argo Bank also operates in the Chicago banking market, and Applicant's share of total market deposits would increase to 5.65 percent upon consummation of its aquisition of Argo. Thus, consummation of the instant application would eliminate some existing competition between Applicant and Bank. However, the adverse competitive consequences associated with consummation of this proposal are mitigated by the following and other facts by record. First, upon consummation of this proposal, Applicant would continue to rank third in the Chicago banking market and Applicant's market share, including deposits of Argo Bank, would only increase to 5.83 percent of total bank deposits in the market. Second, there are numerous competitors in the market and the Chicago banking market is not considered highly concentrated since the four largest banking organizations control only 56.43 percent of total market deposits. Finally, as multibank holding companies have been permitted in Illinois only since January 1, 1982, most other commercial banks are not affiliated with multibank holding companies and remain in the market as possible acquisition candidates. Accordingly, on the basis of the above and other facts of record, the Board believes that the proposal will not have any significant adverse effects on existing or potential competition or on the concentration of resources in the relevant market.

The financial and managerial resources and future prospects of Applicant, its subsidiary bank, and Bank are considered generally satisfactory and consistent with approval. In addition, Bank's affiliation with Applicant will enable Bank to avail itself of Applicant's expertise and resources, particularly in the specialized financing and fiduciary areas. Accordingly, considerations relating to the convenience and needs of the community to be served lend slight weight toward approval and outweigh any adverse competitive effects that may result from consummation of the proposal. Accordingly, the Board has determined that consummation of the transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made before the thirtieth calendar day following the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Chicago, acting pursuant to delegated authority.

By order of the Board of Governors, effective August 30, 1982.

[SEAL]

(Signed) WILLIAM W. WILES, Secretary of the Board.

<sup>1.</sup> All deposit data are as of December 31, 1981.

<sup>2.</sup> See Order dated June 25, 1982, by the Federal Reserve Bank of Chicago.

<sup>3.</sup> The Chicago banking market is defined as Cook, Du Page, and Lake Counties, all in Illinois.

Voting for this action: Chairman Volcker and Governors Martin, Wallich, Teeters, and Gramley. Absent and not voting: Governors Partee and Rice.

### ORDERS APPROVING APPLICATIONS UNDER THE BANK HOLDING COMPANY ACT AND BANK MERGER ACT

### By the Board of Governors

During August 1982, the Board of Governors approved the applications listed below. Copies are available upon request to Publications Services, Division of Support Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

1. Unless otherwise noted, rates of change are calculated from average amounts

Onlices otherwise noted, rates of change are calculated from average amounts outstanding in preceding month or quarter.
 Includes reserve balances at Federal Reserve Banks in the current week plus vault cash held two weeks earlier used to satisfy reserve requirements at all deposi-tory institutions plus currency outside the U.S. Treasury, Federal Reserve Banks, the vaults of depository institutions, and surplus vault cash at depository institu-tion.

the valits of depository institutions, and surplus valit cash at depository institu-tions. 3. M1: Averages of daily figures for (1) currency outside the Treasury, Federal Reserve Banks, and the valits of commercial banks; (2) traveler's checks of non-bank issuers; (3) demand deposits at all commercial banks other than those due to domestic banks, the U.S. government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float; and (4) negotiable order of withdrawal (NOW) and automatic transfer service (ATS) ac-counts at banks and thrift institutions, credit union share draft (CUSD) accounts, and domaid deposite at mutual eaving banks.

and demand deposits at mutual savings banks. M2: M1 plus savings and small-denomination time deposits at all depository institutions, overnight repurchase agreements at commercial banks, overnight Lu-rodollars held by U.S. residents other than banks at Caribbean branches of member banks, and balances of money market mutual funds (general purpose and broker/ dealer)

dealer). M3: M2 plus large-denomination time deposits at all depository institutions and term RPs at commercial banks and savings and loan associations and balances of institution-only money market mutual funds. L: M3 plus other liquid assets such as term Eurodollars held by U.S. residents other than banks, bankers acceptances, commercial paper, Treasury bills and other liquid Treasury securities, and U.S. savings bonds. 4. Savings deposits exclude NOW and ATS accounts at commercial banks and thrifts and CUSD accounts at credit unions.

5. Small-denomination time deposits -including retail RPs--are those issued in amounts of less than \$100,000. 6 Large-denomination time deposits are those issued in amounts of \$100,000 or

more.

more.
7 Stavings and loan associations, mutual savings banks, and credit unions.
8. Changes calculated from figures shown in table 1.23. Beginning December 1981, growth rates reflect shifts of foreign loans and securities from U.S. banking offices to international banking facilities.
9. Averages of daily effective rates (average of the rates on a given date weighted by the volume of transactions at those rates).
10. Rate for the Federal Reserve Bank of New York.
11. Ouoted on a bank-discount basis.
12. Unweighted average of offering rates quoted by at least five dealers.
13. Market yields adjusted to a 20-year maturity by the U.S. Treasury.
14. Bond Hayer series for 20 issues of mixed quality.
15. Weighted averages of new publicly offered bonds rated Aaa, Aa, and A by Moody's Investors Service and adjusted to an Aaa basis. Federal Reserve compilations. pilations

16. Average rates on new commitments for conventional first mortgages on new homes in primary markets, unweighted and rounded to nearest 5 basis points, from Dept. of Housing and Urban Development.

NOTE. Revisions in reserves of depository institutions reflect the transitional phase-in of reserve requirements as specified in the Monetary Control Act of 1980.

1. Applicable to advances when exceptional circumstances or practices involve only a particular depository institution and to advances when an institution is under sustained liquidity pressures. See section 201.3(b)(2) of Regulation A. 2. Rates for short-term adjustment credit. For description and earlier data see the following publications of the Board of Governors: Banking and Monetary Statistics, 1914–1941 and 1941–1970; Annual Statistical Digest, 1970–1979, and 1980.

In 1980 and 1981, the Federal Reserve applied a surcharge to short-term ad-justment credit borrowings by institutions with deposits of \$500 million or more that had borrowed in successive weeks or in more than 4 weeks in a calendar quarter. A 3 percent surcharge was in effect from Mar. 17, 1980, through May 7, 1980. There was no surcharge until Nov. 17, 1980, when a 2 percent surcharge was adopted; the surcharge was used to 3 percent on Dec. 5, 1980, and to 4 percent on May 5, 1981. The surcharge was reduced to 3 percent effective Sept. 22, 1981, and to 2 percent effective Oct. 12, As of Oct. 1, the formula for applying the surcharge was changed from a calendar quarter to a moving 13-week period. The surcharge was eliminated on Nov. 17, 1981.

1. For changes in reserve requirements beginning 1963, see Board's Annual Statistical Digest, 1971–1975 and for prior changes, see Board's Annual Report for 1976, table 13. Under provisions of the Monetary Control Act, depository institutions include commercial banks, mutual savings banks, asivings and loan associations, credit unions, agencies and branches of foreign banks, and Edge Act

The second secon

Effective Aug. 24, 1978, the Regulation M reserve requirements on net balances due from domestic banks to their foreign branches and on deposits that foreign branches lend to U.S. residents were reduced to zero from 4 percent and 1 percent respectively. The Regulation D reserve requirement on borrowings from unclated banks abroad was also reduced to zero from 4 percent. Effective with the reserve computation period beginning Nov. 16, 1978, domestic deposits of Edge corporations were subject to the same reserve requirements as deposits of member banks. 3. Negotiable order of withdrawal (NOW) accounts and time deposits such as Christmas and vacation club accounts were subject to the same requirements as savings deposits.

savings deposits.

Savings deposits. The average reserve requirement on savings and other time deposits before implementation of the Monetary Control Act had to be at least 3 percent, the minimum specified by law. 4. Effective Nov. 2, 1978, a supplementary reserve requirement of 2 percent was imposed on large time deposits of \$100,000 or more, obligations of affiliates, and ineligible acceptances. This supplementary requirement was eliminated with the maintenance period beginning July 24, 1980. Effective view requirement of 8 percent was added to managed liabilities in excess of a base amount. This marginal requirement was increased to 10 percent beginning Apr. 3, 1980, was decreased to 5 percent beginning June 12, 1980, and was reduced to zero beginning July 24, 1980. Managed liabilities are defined as large time deposits. Eurodollar borrowings, repurchase agreements against U.S.

government and tederal agency securities, tederal funds borrowings from non-member institutions, and certain other obligations. In general, the base for the marginal reverve requirement was originally the greater of (a) \$100 million or (b) the average amount of the managed liabilities held by a member bank, forge corporation, or tamily of U.S. branches and agencies of a torcign bank for the two statement weeks ending Sept 26, 1979. For the computation period beginning Mar. 20, 1980, the base was lowered by (a) 7 percent or (b) the decrease in an institution's U.S. office gross loans to foreigners and gross balances due from foreign offices of other institutions between the base period (Sept. 13-26, 1979) and the week ending Mar. 12, 1980, whichever was greater. For the computation period beginning May 29, 1980, the base was increased by 7½ percent above the base used to calculate the marginal reserve in the statement week of May 14-21, 1980. In addition, beginning Mar. 19, 1980, the base was reduced to the extent that toreign loans and balances declined. 5. For existing nonmember banks and thrift institutions at the time of imple

balances declined.
5. For existing nonmember banks and thrift institutions at the time of implementation of the Monetary Control Act, the phase-in period ends Sept. 3, 1987
For existing member banks the phase-in period is about three years, depending on whethet their new reserve requirements are greater or less than the old requirements. For existing agencies and branches of toreign banks, the phase-in ends Aug 12, 1982. New institutions have a two-year phase-in beginning with the date that they open to business, except for those institutions having total reservable liabilities of \$50 million or more.

6. Transaction accounts include all deposits on which the account holder is permitted to make withdrawals by negotiable or transferable instruments, payment orders of withdrawal, and telephone and preauthorized transfers (in excess of three per month) for the purpose of making payments to third persons or others. 7. The Monetary Control Act of 1980 requires that the amount of transaction accounts against which the 3 percent reserve requirement will apply be modified annually to 80 percent of the percentage increase in transaction accounts held by all depository institutions on the previous June 30. At the beginning of 1982 the amount was accordingly increased from \$25 million to \$26 million.
8. In general, nonpersonal time deposits are time deposits, including savings depositor that is not a natural person. Also included are certain transferable time deposits held by autoral person, and certain obligations issued to depository institution offices located outside the United States. For details, see section 204.2 of Regulation D.

Section 204.2 of regulation D. The category of time deposit authorized by the Depository Institutions Dereg-ulation Committee (DIDC), effective Sept. 1, 1982 (original maturity or required notice period of 7 to 31 days, required minimum deposit balance of \$20,000, and ceiling rate tied to the 91-day Treasury bill rate), is classified as a time deposit for reserve requirement purposes.

NO11. Required reserves must be held in the form of deposits with Federal Reserve Banks or vault cash. After implementation of the Monetary Control Act, nonmembers may maintain reserves on a pass-through basis with certain approved institutions

#### NOTES TO TABLE 1 16

18. Effective Dec 1, 1981, depository institutions were authorized to offer time deposits not subject to interest rate ceilings when the funds are deposited to the credit of, or in which the entire beneficial interest is held by, an individual pursuant to an IRA agreement or Keogh (H R. 10) plan. Such time deposits must have a minimum maturity of 18 months, and additions may be made to the time deposit at any time before its maturity without extending the maturity of all or a portion of the balance of the account
19. Effective May 1, 1982, depository institutions were authorized to offer negotiable or nonnegotiable time deposits with a minimum original maturity of 3½ years or more that are not subject to interest rate ceilings. Such time deposits have no minimum denomination, but must be made available in a \$500 denomination. Additional deposits may be made to the account during the first year without extending its maturity.

No11. Before Mar. 31. 1980, the maximum rates that could be paid by federally insured commercial banks, mutual savings banks, and savings and loan associations were established by the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board under the provisions of 12 CFR 217, 329, and 526 re-spectively. Title II of the Depository Institutions Deregulation and Monetary Con-trol Act of 1980 (PL. 0-6-21) transferred the authority of the agencies to establish maximum rates of interest payable on deposits to the Depository Institutions De-regulation Committee The maximum rates on time deposits in denominations of \$100,000 or more with maturities of 30-89 days were suspended in June 1970, such deposits maturing in 90 days or more were suspended in May 1973. For information regarding previous inferest rate centings on all types of accounts, see carlier issues of the FLDERAL RESERVE DUILLIN, the Federal Home Loan Bank Board Journal, and the Annual Report of the Federal Deposit Insurance Corporation

July 1, 1973, for mutual savings banks: July 6, 1973, for savings and loans.
 For authorized states only. Federally insured commercial banks, savings and loan associations, cooperative banks, and mutual savings banks in Massachusetts and New Hampshire were first permitted to offer negotiable order of withdrawal (NOW) accounts on Jan. 1, 1974. Authorization to issue NOW accounts on Jan. 1, 1974. Authorization to reserve NOW accounts was extended to similar institutions throughout New Fingland on Feb. 27, 1976, in New York State on Nov. 10, 1978, and in New Jersey on Dec 28, 1979. Authorization to issue NOW accounts was extended to similar institutions, was extended to similar institutions.

bec. 31, 1980.
3. For exceptions with respect to certain foreign time deposits see the BuTLEIN for October 1962 (p. 1279). August 1965 (p. 1084), and February 1968 (p. 167).
4. Effective Nov. 10, 1980, the minimum notice period for public unit accounts at savings and loan associations was decreased to 14 days and the minimum maturity period for time deposits at savings and loan associations in excess of \$100,000 was decreased to 14 days at mutual savings banks.
5. Effective Oct. 30, 1980, the minimum maturity or notice period for time deposits was decreased from 30 to 14 days at mutual savings banks.
5. Effective Oct. 30, 1980, the minimum maturity or notice period for time deposits was decreased from 30 to 14 days at commercial banks.
6. No separate account category
7. No minimum denomination. Until July 1, 1979, a minimum of \$1,000 was required for savings and loan associations, cxcept in areas where mutual savings banks persist maturing in less than 1 year, effective Nov 1, 1973.
8. No minimum denomination. Until July 1, 1979, the minimum denomination was \$1,000 except for deposits representing tunds contributed to an individual

8. No minimum denomination. Until July 1, 1979, the minimum denomination was \$1,000 except for deposits representing tunds contributed to an individual retirement account (IRA) or a Keogh (H.R. 10) plan established pursuant to the Internal Revenue Code. The \$1,000 minimum requirement was removed for such accounts in December 1975 and November 1976 respectively.
9. Between July 1, 1973, and Oct. 31, 1973, certificates maturing in 4 years or more with minimum denominations of \$1,000 had no ceiling however, the amount of such certificates that an unstitution could issue was limited to 5 percent of its total time and savings deposits. Sales in excess of that amount, as well as certificates to the 6½ percent ceiling on time deposits maturing in 24 years or more. Effective Nov. 1, 1973, ceilings were reimposed on certificates naturing in 4 years or more with minimum denomination of \$1,000. There is no limitation on the amount of these certificates that pusses.
10. Accounts subject to fixed-rate ceilings. See tootnote 8 for minimum denomination maturing in the deposition of \$1,000. There is no limitation equirements.

Accounts subject to fixed-rate comings. See footnote 8 for minimum denom-ination requirements.
 Effective Jan. 1, 1980, commercial banks are permitted to pay the same rate as thrifts on IRA and Keogh accounts and accounts of governmental units when such deposits are placed in the new 2½-year or more variable-ceiling certificates or in 26-week money market certificates regardless of the level of the Treasury bill

12. Must have a maturity of exactly 26 weeks and a minimum denomination

12. Must have a maturity of exactly 26 weeks and a minimum denomination of \$10,000, and must be nonnegotiable.
13. Effective May 1, 1982, depository institutions were authorized to offer time deposits that have a minimum denomination of \$7,500 and a maturity of 91 days. The ceiling rate of interest on these deposits is indexed to the discount rate (auction verage) on most recently issued 91-day Treasury bills for thrift institutions and the discount rate minus 25 basis points for commercial banks. The rate differential ends 1 year from the effective date of these unstruments and is suspended at any time the Treasury bill discount rate is 9% or below tor four consecutive auctions. The maximum allowable rates in August (in percent) for conniercial banks were as follows: August 3, 9,383; August 10, 9,775; August 17, 8,366; August 24, 7,498; August 17, 8,616; August 24, 7,748; August 31, 8,854.
14. Commercial banks and thrift institutions were authorized to offer money market time deposits fective June 1, 1978. These deposits have a minimum denomination requirement of \$10,000 and a maturity of 26 weeks. The ceiling rate of interest on these deposits. Suddexed to the discount rate (auction average) on most recently issued 26-week U.S. Treasury bills. Interest on these certificates issued not be compounded. Effective for all 6-month money market certificates issued

beginning Nov 1, 1981, depository institutions may pay rates or interest on these deposits indexed to the higher of (1) the rate ton 26-week Treasury bills established immediately before the date of deposit (bill rate) or (2) the average of the four rates tor 26-week Treasury bills established for the 4 weeks immediately before the date of deposit (4-week average bill rate). Ceilings are determined as follows:

Bill rate or 4-week

*average bill rate* 7.50 percent or below Above 7.50 percent

7.25 percent or below Above 7.25 percent, but below 8.50 percent

8.50 percent or above, but below

8.75 percent 8.75 percent or above

Commercial bank ceiling

7.75 percent ¼ of 1 percentage point plus the higher of the bill rate or 4-week average bill rate

Thuft ceiling

7.75 percent  $\frac{1}{2}$  of 1 percentage point plus the higher of the bill rate or 4-week average bill rate 9 percent

 $\frac{1}{4}$  of 1 percentage point plus the higher of the bill rate or 4-week average bill rate

The maximum allowable rates in-August for commercial banks and thrifts based

the bill rate or 4-week average bill rate The maximum allowable rates in August to commercial banks and thrifts based on the bill rate were as follows: August 3, 10.921; August 10, 11.190; August 17, 10.071; August 24, 9238; August 33, 10.921; August 10, 11.357; August 17, 10.071; August 24, 9238; August 34, 9.996. The maximum allowable rates in August for commercial banks and thrifts based on the 4-week average bill rate were as follows: August 3, 11.614; August 10, 11.357; August 17, 10.952; August 24, 10.357; August 31, 10.123. The Effective Oct. 1, 1981, depository institutions are authorized to issue all savers certificates (ASCS) with a 1-year maturity and an annual investment yield could to 70 percent of the average investment yield for 52-week U.S. Treasury bills as determined by the auction of 52-week Treasury bills held immediated for interest income from ASCs. The annual investment yield for ASCs issued in August (in percent) was as follows: August 8, 896. The Effective Aug. 1, 1981, commercial banks may pay interest on any variable celling nonnegotiable time deposit with an original maturity of 212 years to less than 4 years at a rate not to exceed 4 of 1 percent below the average 212-year yield for U.S. Treasury securities as determined and announced by the Treasury Department immediately before the date of deposit. Effective May 1, 1982, the maximum maturity for this category of deposits was reduced to less than 312 years. Thrift institutions may pay interest on these certificates at a rate not to exceed the average 212-year yield for Treasury securities is less than 9.50 percent, commercial banks may pay 9.25 percent and thrift institutions 9.50 percent, commercial banks were as follows. August 1, 1801, August 1, 1275; August 31, 11.70, and tor thrifts: August 3, 13.20; August 17, 12.05; August 31, 11.70, and tor thrifts: August 3, 13.20; August 17, 12.05; August 31, 11.70, and tor thrifts: August 3, 13.454; August 17, 13.00; August 13, 10.50 The Between Jan 1, 1980, an

1 Represents accounts of individuals, partnerships, and corporations, and of

Represents accounts or individuals, partnersmips, and corporations, and or states and pollicial subdivisions.
 Excludes special club accounts, such as Christmas and vacation clubs.
 Accounts authorized for negotiable orders of withdrawal (NOW) and accounts authorized for automatic transfer to demand deposits (ATS). ATS data availability starts with December 1978.
 Represents corporations and other profit-seeking organizations (excluding

commercial banks but including savings and loan associations, mutual savings banks, credit unions, the Export-Import Bank, and federally sponsored lending agencies). 5 Savings accounts other than NOW; business; and, from December 1978, ATS.

Norri Historical data for the period 1970 through June 1977 have been estimated; these estimates are based in part on the debits series for 233 SMSAs, which were available through June 1977. Back data are available from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. Debits and turnover data for savings deposits are not available before July 1977.

Reserve measures from November 1980 to date reflect a one-time increase estimated at \$550 million to \$600 million in required reserves associated with the reduction of week-end avoidance activities of a few large banks.
 Reserve aggregates include required reserves of member banks and I dge Act corporations and other depository unstitutions. Discontinuities associated with the implementation of the Monetary Control Act, the inclusion of I dge Act corporation reserves, and other changes in Regulation D have been removed.
 Reserve balances with Federal Reserve Banks (which exclude required clearing balances) plus vault cash at institutions with required reserve balances plus vault cash at institutions.
 4 Includes reserve balances and required clearing balances at Federal Reserve Banks in the current week plus vault cash held two weeks cather used to safest reserve requirements at all depository institutions.
 Treasury, Federal Reserve Banks, the vaults of depository institutions, and surplus vault cash at depository institutions.

5. Reserves of depository institutions series reflect actual reserve requirement percentages with no adjustments to climinate the effect of changes in Regulation D, including changes associated with the implementation of the Monetary Control Vet. Includes required reserves of member banks and Fdg. Act corporations and, beginning Nov. 13, 1980, other depository institutions. Under the transitional phase-in program of the Monetary Control Act of 1980. The effective Nov. 13, 1980, a reduction of 52.8 billion, Feb. 12, 1981, an increase of \$245 million, Mar. 12, 1981, an increase of \$245 million, Mar. 12, 1981, an increase of \$245 million, and Nov. 19, 1981, an increase of \$245 million, and Nov. 19, 1981, an increase of \$245 million, and Nov. 19, 1981, an increase of \$245 million.

NOTE Latest monthly and weekly figures aronyminble from the Board's H 3(502) (sorr) reasonation and weeky neuros according to the model of the Board's H 3(502) statistical release Back data and estimates of the impact on required reserves and changes in reserve requirements are available from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D C 20551

Includes domestically chartered banks; U.S. branches and agencies of foreign banks. New York investment companies inajority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.
 Beginning December 1981, shifts of toreign loans and securities from U.S. banking offices to international banking facilities (IDFs) reduced the levels of several items. Seasonally adjusted data that include adjustments for the amounts shifted from domestic offices to IBFs are available in the Board's G.7 (407) sta-tistical release (available from Publications Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551).
 Excludes loans to commercial banks in the United States
 The merger of a commercial bank with a mutual savings bank beginning Feb 24, 1982, increased total loans and securities \$1.0 billion; U.S. Treasury securities, \$0.1 billion; other securities and scurities \$0.6 billion, U.S. Treasury securities, \$0.1 billion; other securities \$0.1 billion; total loans and leases, \$0.4 billion; and real estate loans, \$0.7 billion

6 Beginning June 2, 1982, total loans and securities, total loans and leases, and loans to individuals were increased \$0.5 billion due to acquisition of loans by a commercial bank from a nonbank institution.
7 Loans sold are those sold outlight to a bank's own foreign branches, non-consolidated nonbank attilitates of the bank, the bank's holding company (it not a bank), and nonconsolidated nonbank subsidiaries of the holding company.
8. United States includes the 50 states and the District of Columbia.

NOTE. Data are prorated averages of Wednesday estimates for domestically both, Data are plotated averages of wearestay estimates for domestically chattered banks, based on weekly reports of a sample of domestically chartered banks and quarterly reports of all domestically chartered banks. For foreign-related institutions, data are averages of month-end estimates based on weekly reports from large agencies and branches and quarterly reports from all agencies, branches, investment companies, and Edge Act corporations engaged in banking.

Domestically chartered commercial banks include all commercial banks in the United States except branches of foreign banks; included are member and non-member banks, stock savings banks, and nondeposit trust companies
 Other assets include loans to U.S. commercial banks.
 Commercial banking institutions include domestically chartered commercial banks, branches and agencies of foreign banks, ledge Act and Agreement corpo-rations, and New York State foreign investment corporations.

Not1. Figures are partly estimated. They include all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries. Data for domestically chartered commercial banks are for the last Wednesday of the month. Data for other banking institutions are for the last day of the quarter until June 1981; beginning July 1981, these data are estimates made on the last Wednesday of the month based on a weekly reporting sample of foreign-related institutions and quarter-end condition report data.

Includes securities purchased under agreements to resell.
 Other than financial institutions and brokers and dealers.
 Includes federal funds purchased and securities sold under agreements to repurchase; for information on these fiabilities at banks with assets of \$1 billion or more on Dec. 31, 1977, see table 1.13.
 Not a measure of equity capital for use in capital adequacy analysis or for other analytic uses.

No11-. Beginning in the week ending Dec. 9, 1981, shifts of assets and liabilities to international banking facilities (IBFs) reduced the amounts reported in some items, especially in loans to foreigners and to a lesser extent in time deposits. Based on prelminary reports, the large weekly reporting banks shifted \$4.7 billion of assets to their IBFs in the five weeks ending Jan. 13, 1982. Domestic offices net positions with IBFs are now included in net due from or net due to related institutions. More detail will be available later.

 Includes securities purchased under agreements to resell
 Balances due to other than directly related institutions.
 Borrowings from other than directly related institutions.
 Includes securities sold under agreements to repurchase
 Excludes loans and federal funds transactions with commercial banks in United States

Nort-. Beginning in the week ending Dec. 9, 1981, shifts of assets and liabilities to international banking facilities (IBFs) reduced the amounts reported in some items, especially in loans to foreigners and to a lesser extent in time deposits. Based on preliminary reports, the large weekly reporting branches and agencies shifted \$22.2 billion of assets to their IBFs in the six weeks ending Jan. 13, 1982. Domestic offices net positions with IBFs are now included in net due from or net due to related institutions. More detail will be available later

1. Figures include cash items in process of collection. Estimates of gross deposits

Figures include cash items in process of collection. Estimates of gross deposits are based on reports supplied by a sample of commercial banks. Types of depositors in each category are described in the June 1971 BU11+INs, p. 466.
 Beginning with the March 1979 survey, the demand deposit ownership survey sample was reduced to 232 banks from 349 banks, and the estimation procedure was modified slightly. To aid in comparing estimates based on the old and new reporting sample, the following estimates in billions of dollars for December 1978 have been constructed using the new smaller sample; financial business, 126.0; consumer, 98.3; foreign, 2.8; and other, 15.1.
 Demand deposit ownership data for March 1981 are subject to greater than normal errors reflecting unusual reporting difficulties associated with funds shifted to negotiable order of withdrawal (NOW) accounts authorized at year-end 1980. For the household category, the 15.7 billion decline in demand deposits at all commercial banks between December 1980 and March 1981 has an estimated standard error of \$4.8 billion.

4. Demand deposit ownership survey estimates for June 1981 are not yet available

4. Demand deposit ownership survey estimates for June 1981 are not yet available due to unresolved reporting errors.
5. After the end of 1978 the large weekly reporting bank panel was changed to 170 jarge commercial banks, each of which had total assets in domestic offices exceeding 3750 million as of Dec. 31, 1977. See "Announcements," p. 408 in the May 1978 BUILETIN. Beginning in March 1979, demand deposit ownership estimates for these large banks are constructed quarterly on the basis of 97 sample banks and are not comparable with earlier data. The following estimates in billions of dollars for December 1978 have been constructed for the new large-bank panel; financial business, 18.2; nonfinancial business, 67.2; consumer, 32.8; foreign, 2.5; other, 6.8.

Weekly and monthly figures are averages of all calendar days, where the rate for a weekend or holiday is taken to be the rate prevailing on the preceding business day. The daily rate is the average of the rates on a given day weighted by the volume of transactions at these rates.
 Weekly figures are statement week averages—that is, averages tor the week ending Wednesday.
 Uweekly figures are statement week averages—that is, averages tor the week ending Wednesday.
 Uweekly figures are statement week averages—that is, averages tor the week ending Wednesday.
 Unweighted average of offering rates quoted by at least five dealers (in the case of commercial paper), or finance companies (in the case of finance paper).
 Before November 1970, maturities for data shown are 30-59 days, 90-119 days, and 120-179 days for commercial paper; and 30-59 days, 90-119 days, and 150-179 days for finance paper.
 Yields are quoted on a bank-discount basis, rather than an investment yield basis (which would give a higher figure).
 Dealer closing offered rates for top-rated banks. Most representative rate (which may be, but need not be, the average of the rates quoted by the dealers).
 Ourweighted average of offered rates quoted by at least five dealers carly in the day.

6. Unweighted average of offered rates quoted by at least five dealers early in the day.
7. Unweighted average of closing bid rates quoted by at least five dealers.
8. Rates are recorded in the week in which bills are issued.
9. Yields are based on closing bid prices quoted by at least five dealers.
10. Yields adjusted to constant maturities by the U.S. Treasury. That is, yields are read from a yield curve at fixed maturities. Based on only recently issued, actively traded securities.

Lach weekly figure is calculated on a biweekly basis and is the average of five business days ending on the Monday following the calcudar week. The biweekly rate is used to determine the maximum interest rate payable in the following two-week period on small saver certificates. (See table 1.16.)
 Unweighted averages of yields (to maturity or call) for all outstanding notes and bonds neither due nor callable in less than 10 years, including several very low yielding "flower" bonds.
 General obligations only, based on figures for Thursday, from Moody's Investors Service.
 General obligations only, with 20 years to service and board of the second s

Investors Service. 14. General obligations only, with 20 years to maturity, issued by 20 state and local governmental units of mixed quality. Based on figures for Thursday. 15. Daily figures from Moody's Investors Service. Based on yields to maturity on selected long-term bonds. 16. Compilation of the Federal Reserve. Issues included are long-term (20 years or more). New-issue yields are based on quotations on date of offering; those on recently offered issues (included only for first 4 weeks after termination of under-writer price restrictions), on Friday close-of-business quotations 17. Standard and Poor's corporate series. Preferred stock ratio based on a sample of ten issues: four public utilities, four industrials, one financial, and one trans-portation. Common stock ratios on the 500 stocks in the price index.

Effective July 1976, includes a new financial group, banks and insurance companies With this change the index includes 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40 financial
 Margin credit includes all credit extended to purchase or carry stocks or leafed equity instruments and secured at least in part by stock. Credit extended is end-of-month data for member firms of the New York Stock Exchange. In addition to assigning a current loan value to margin stock generally, Regu-lations. Tand U permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.
 A distribution of this total by equity class is shown on lines 17-22
 Free credit balances are in accounts with no unfulfilled commutments to the brokers and are subject to withdrawal by customers on demand.

5 Each customer's equity in his collateral (market value of collateral less net debit balance) is expressed as a percentage of current collateral values.
6. Balances that may be used by customers as the margin deposit required for additional purchases. Balances may arise as transfers based on loan values of other collateral in the customer's margin account or deposits of each (usually sales proceeds) occut.
7. Regulations G, T, and U of the Federal Reserve Board of Governors, prescribed in accordance with the Securities Lxchange Act of 1934, limit the amount of credit to purchase and carry margin stocks that may be extended on securities as collateral by prescribing a maximum loan value, which is a specified. Margin requirements are the difference between the market value (100 percent) and the maximum loan value. The term "margin stocks" is defined in the corresponding regulation. regulation

Note: Direct public issues only. Based on 'treasury Survey of Ownership from *Treasury Bulletin* (U.S. 'Treasury Department). Data complete for U.S. government agencies and trust funds and Federal Reserve Banks, but data for other groups include only holdings of those institutions that report. The following figures show, for each category, the number and proportion reporting as of June 30, 1982. (1) 5,283 commercial banks, 439 mutual savings banks.

and 726 insurance companies, each about 80 percent; (2) 406 nontinancial cor-portations and 464 savings and loan associations, each about 50 percent; and (3) 488 state and local governments, about 40 percent. "All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

Before 1981, data for immediate transactions include torward transactions.
 Includes, among others, all other dealers and brokers in commodities and securities, nondealer departments of commercial banks, foreign banking agencies, and the Federal Reserve System.
 Futures contracts are standardized agreements arranged on an organized ex-change in which parties commit to purchase or sell securities for delivery at a future date.

date.

4. Forward transactions are agreements arranged in the over-the-counter market in which securities are purchased (sold) for edelivery after 5 business days from the

date of the transaction for government securities (Treasury bills, notes, and bonds) or after 30 days for mortgage-backed agency issues. No11, Averages for transactions are based on number of trading days in the period. Transactions are market purchases and sales of U.S. government securities deal-ers reporting to the Federal Reserve Bank of New York. The figures exclude allotments of, and exchanges for, new U.S. government securities, redemptions of called or matured securities, purchases or sales of securities under repurchase agreement, reverse repurchase (resale), or similar contracts.

In September 1977 the Farm Credit Banks issued their first consolidated bonds, and in January 1979 they began issuing these bonds on a regular basis to replace the financing activities of the Federal Land Banks, the Federal Intermediate Credit Banks, and the Banks for Cooperatives. Line 17 represents those consolidated bonds outstandling, as well as any discount notes that have been issued. Lines 1 and 10 reflect the addition of this item.
 Consists of mortgages assumed by the Detense Department between 1957 and 1963 under family housing and homeowners assistance programs.
 Includes participation certificates reclassified as debt beginning Oct. 1, 1976.
 Off-budget Aug. 17, 1974, through Sept. 30, 1976; on-budget thereafter.
 Consists of debentures issued in payment of Federal Housing Administration insurance claims Once issued, these securities may be sold privately on the se-curities market.

curities market.

6. Certificates of participation issued prior to tiscal 1969 by the Government National Mortgage Association acting as trustee for the Faimers Home Admin-istration; Department of Health, Education, and Welfare; Department

of Housing and Urban Development; Small Business Administration, and the Veterans Administration.
7. Off-budget
8. Unlike other federally sponsored agencies, the Student Loan Marketing Association may borrow from the Federal Financing Bank (FFB) since its obligations are guaranteed by the Department of Health, Education, and Welfare.
9. The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other tederal agencies. Since FFB incurs debt solely for the purpose of lending to other agencies, its debt is not included in the main portion of the table in order to avoid double counting.
10. Includes FFB purchases of agency assets and guaranteed solary the latter contain loans guaranteed by numerous agencies with the guarantees of any particular agency being generally small. The Farmers Home Administration item consists exclusively of agency assets, while the Rural Electrification Administration entry contains both agency assets and guaranteed loans.

#### NOTES TO TABLE 1.44

NOTES TO TABLE 1.44 1. Immediate positions are net amounts (in terms of par values) of securities owned by nonbank dealer firms and dealer departments of commercial banks on a commitment, that is, trade-date basis, including any such securities that have been sold under agreements to repurchase (RPs). The maturities of some repur-chase agreements are sufficiently long, however, to suggest that the securities involved are not available for trading purposes. Securities owned, and hence dealer positions, do not include securities to resell (reverse RPs). Before 1981, data for immediate positions include forward positions. 2. Figures cover financing involving U.S. government and tederal agency secu-rities, negotiable CDs, bankers acceptances, and commercial paper.

 Includes all reverse repurchase agreements, including those that have been arranged to make delivery on short sales and those for which the securities obtained have been used as collateral on borrowings, i.e., matched agreements.
 Includes both repurchase agreements undertaken to finance positions and "matched book" repurchase agreements.

NOTE. Data for positions are averages of daily figures, in terms of par value, based on the number of trading days in the period. Positions are shown net and are on a commitment basis. Data for financing are based on Wednesday figures, in terms of actual money borrowed or lent.

Weighted averages based on sample surveys of mortgages originated by major institutional lender groups. Compiled by the Federal Home Loan Bank Board in cooperation with the Federal Deposit Insurance Corporation
 Includes all fees, commissions, discounts, and "points" paid (by the borrower or the seller) to obtain a loan.
 Average effective interest rates on loans closed, assuming prepayment at the end of 10 years.

end of 10 years.
4. Average contract rates on new commitments for conventional first mortgages, rounded to the nearest 5 basis points; from Department of Housing and Urban Development.
5. Average gross yields on 30-year, minimum-downpayment, Federal Housing Administration-insured first mortgages for immediate delivery in the private secondary market. Any gaps in data are due to periods of adjustment to changes in maximum permissible contract rates.
6. Average net yields to investors on Government National Mortgage Association guaranteed, mortgage-backed, fully modified pass-through securities,

assuming prepayment in 12 years on pools of 30-year FIIA/VA mortgages carrying the prevaling ceiling rate. Monthly figures are unweighted averages of Monday quotations for the month. 7. Average gross yields (before deduction of 38 basis points for mortgage ser-vicing) on accepted bids in Federal National Mortgage Association's auctions of 4-month commitments to purchase home mortgages, assuming prepayment in 12 years for 30-year mortgages. No adjustments are made for FNMA commitment tees or stock related requirements. Monthly figures are unweighted averages for auctions conducted within the month. 8. Includes some multifamily and nonprofit hospital loan commitments in ad-dition to 1- to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMA-GNMA tandem plans. 9. Includes participation as well as whole loans. 10. Includes conventional and government-underwritten loans.

Includes loans held by nondeposit trust companies but not bank trust de-1

Includes loans held by nondeposit trust companies but not bank trust departments.
 Outstanding principal balances of mortgages backing securities insured or guaranteed by the agency indicated.
 Outstanding balances on FNMA's issues of securities backed by pools of conventional mortgages held in trust. The program was implemented by FNMA in October 1981.
 Other holders include mortgage companies, real estate investment trusts, state and local credit agencies, state and local retirement funds, noninsured pension tunds, credit unions, and U.S. agencies for which amounts are small or for which separate data are not readily available.
 Includes a new estimate of residential mortgage credit provided by individuals

NOTE Based on data from various institutional and governmental sources, with some quarters estimated in part by the Federal Reserve in conjunction with the Federal Home Loan Bank Board and the Department of Commerce. Separation of nonfarm mortgage debt by type of property, it not reported directly, and interpolations and extrapolations when required, are estimated manify by the Federal Reserve. Multitamily debt refers to loans on structures of five or more units

- NOTES BY LINE NUMBER.
  1. Line 2 of table 1.58.
  2. Sum of lines 3-6 or 7 10.
  6. Includes farm and commercial mortgages.
  11. Credit market funds raised by federally sponsored credit agencies, and net issues of federally related mortgage pool securities.
  12. Line 1 less line 2 plus line 11 Also line 19 less line 26 plus line 32. Also sum of lines 27, 32, and 38 less lines 39 and 45.
  17. Includes farm and commercial mortgages.
  26. Line 38 less lines 39 and 45.
  26. Excludes equity issues and investment company shares. Includes line 18.
  28. Foreign deposits at commercial banks, bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign attiliates.
  29. Demand deposits at commercial banks.
  30. Excludes net investment of these reserves in corporate equities.

31. Manify retained earnings and net miscellaneous habilities.
32. Line 12 less line 19 plus line 26
33-37. Lines 13-17 less amounts acquired by private finance. Line 37 includes mortgages
39. Mainly an offset to line 9.
46. Lines 22 plus 38, or line 12 less line 27 plus 39 and 45.
47. Line 2/line 12.
49. Sum of lines 10 and 28.
50, 52. Includes issues by linancial institutions.

NOTE. Full statements for sectors and transaction types quarterly, and annually for flows and for amounts outstanding, may be obtained from Flow of Funds Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551

The industrial production and capacity utilization series have been revised back to January 1979
 Ratios of indexes of production to indexes of capacity. Based on data from Federal Reserve, McGraw-Hill Economics Department, and Department of Com-reserve

Federal Reserve, McGraw-Hill Economics Department, and Department of Com-merce.

 Index of dollar value of total construction contracts, including residential, nonresidential, and heavy engineering, from McGraw-Hill Information Systems Company, F. W. Dodge Division
 Based on data in *Employment and Earnings* (U.S. Department of Labor).
 Series covers employees only, excluding personnel in the Armed Forces
 Based on data in *Survey of Current Business* (U.S. Department of Commerce).

Based on Bureau of Census data published in Survey of Current Business.
 Data without seasonal adjustment, as published in Monthly Labor Review.
 Seasonally adjusted data for changes in the price indexes may be obtained from the Bureau of Labor Statistics, U.S. Department of Labor.

N011 . Basic data (not index numbers) for series mentioned in notes 4, 5, and 6, and indexes for series mentioned in notes 3 and 7 may also be found in the Survey of Current Rismess. Figures for industrial production for the last two months are preliminary and

estimated, respectively

Persons 16 years of age and over. Monthly figures, which are based on sample data, relate to the calendar week that contains the 12th day; annual data are averages of monthly figures. By definition, seasonality does not exist in population figures. Based on data from *Employment and Earnings* (U.S. Department of Labor).
 Includes self-employed, unpaid family, and domestic service workers.

3. Data include all full- and part-time employees who worked during, or received pay for, the pay period that includes the 12th day of the month, and exclude proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the Armed Forces. Data are adjusted to the March 1979 benchmark and only seasonally adjusted data are available at this time Based on data trom *Employment and Earnings* (U.S. Department of Labor).

## 2.13 INDUSTRIAL PRODUCTION Indexes and Gross Value

Not at annual rates
 Not seasonally adjusted.
 Value of new construction data in recent periods may not be strictly comparable with data in prior periods because of changes by the Bureau of the Census in its estimating techniques. For a description of these changes see *Construction Reports* (C-30-76-5), issued by the Bureau in July 1976.

NOTE. Census Bureau estimates for all series except (a) mobile homes, which are private, domestic shipments as reported by the Manufactured Housing Institute and seasonally adjusted by the Census Bureau, and (b) sales and prices of existing units, which are published by the National Association of Realtors. All back and current figures are available from originating agency. Permit authorizations are those reported to the Census Bureau from 16,000 jurisdictions beginning with 1978.

above). 41 Transfers under military grant programs (excluded from lines 4, 6, and 10 above).	5,543 465	12,769 631	13,314 602	5,364 192	2,786 214	2,935 132	2,230 64	4,940 93

Scasonal factors are no longer calculated for lines 12 through 41.
 Data are on an international accounts (1A) basis. Differs from the Census basis data, shown in table 3.11, for reasons of coverage and timing; military exports are excluded from merchandise data and are included in line 6.
 Includes remvested earnings of incorporated atfiliates.

Primarily associated with military sales contracts and other transactions arranged with or through foreign official ageocies.
 Consists of investments in U.S. corporate stocks and in debt securities of private corporations and state and local governments.

NOTE: Data are from Bureau of Economic Analysis, *Survey of Current Business* (U.S. Department of Commerce).

#### 3.11 U.S. FOREIGN TRADE

Millions of dollars; monthly data are seasonally adjusted.

		1979	1980	1981	1982										
	Item	(979	1960	1961	Jan.	Feb.	Mar.	Арг	May	June	July				
1	EXPORTS of domestic and foreign merchandise excluding grant-aid shipments	181,860	220,626	233,677	18,737	18,704	18,602	17,843	18,218	18,822	18,026				
2	GENERAL IMPORTS including mer- chandise for immediate consump- tion plus entries into bonded warehouses	209,458	244,871	261,305	22,829	19,090	20,349	17,387	20,558	21,310	19,559				
3	Trade balance	- 27,598	- 24,245	- 27,628	- 4,092	- 387	- 1,747	456	- 2,340	~ 2,488	1,532				

NOTE: The data through 1981 in this table are reported by the Bureau of Census No11- The data through 1981 in this table are reported by the Bureau of Census data on a free-alongside-ship (f.a.s.) value basis - that is, value at the port of export. Beginning in 1981, foreign trade of the U.S. Virgin Islands is included in the Census basis trade data; this adjustment has been made for all data shown in the table. Beginning with 1982 data, the value of imports are on a customs valuation basis. The Census basis data differ from merchandise trade data shown in table 31.0, U.S. International Transactions Summary, for reasons of coverage and tuning. On the *export side*, the largest adjustments are: (1) the addition of exports to Canada

not covered in Census statistics, and (2) the exclusion of military sales (which are combined with other military transactions and reported sparately in the "service account" in table 3.10, line 6). On the *import side*, additions are made tor gold, ship purchases, imports of electricity from Canada and other transactions; military payments are excluded and shown separately as indicated above.

1. In May 1978 the exemption level for branches required to report was increased, which reduced the number of reporting branches.

2. In May 1978 a broader category of claims on foreign public borrowers, including corporations that are majority owned by foreign governments, replaced the previous, more narrowly defined claims on foreign official institutions.

Includes the Bank for International Settlements. Beginning April 1978, also includes Eastern European countries not listed in line 23.
 Beginning April 1978 comprises Bulgaria, Czechoslovakia, the German Dem-oratic Republic, Hungary, Poland, and Romania.
 Included in "Other Latin America and Caribbean" through March 1978.
 Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Oatar, Saudi Arabia, and United Arab Emirates (Trucial States).
 Comprises Algeria, Gabon, Labya, and Nigeria.

6 Asian, African, Middle Eastern, and European regional organizations, except the Bank for International Settlements, which is included in "Other Western Europe"
 ▲ Laabilities and claums of banks in the United States were increased, beginning in December 1981, by the shift from foreign branches to international banking facilities in the United States of liabilities to, and clauns on, foreign residents.

# 3.18 BANKS' OWN CLAIMS ON FOREIGNERS Reported by Banks in the United States Payable in U.S. Dollars

Millions of dollars, end of period

Includes the Bank for International Settlements. Beginning April 1978, also includes Eastern European countries not listed in line 23.
 Beginning April 1978 comprises Bulgaria, Czechoslovakia, the German Dem-ocratic Republic, Hungary, Poland, and Romania.
 Included in "Other Latin America and Caribbean" through March 1978.
 Comprises Bahram, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

5. Comprises Algeria, Gabon, Libya, and Nigeria
6. Excludes the Bank for International Settlements, which is included in "Other Western Europe."
NOTE. Data for period prior to April 1978 include claims of banks' domestic customers on foreigners.
▲ Liabilities and claims of banks in the United States were increased, beginning in December 1981, by the shift from foreign branches to international banking facilities in the United States of liabilities to, and claims on foreign residents.

#### A62 International Statistics 🗆 September 1982

The banking offices covered by these data are the U.S. offices and foreign branches of U.S.-owned banks and of U.S. subsidiaries of foreign-owned banks. Offices not covered include (1) U.S. agencies and branches of foreign banks, and (2) foreign busidiaries of U.S. banks. To minurze duplication, the data are adparted to exclude the claims on foreign branches held by a U.S. office or another foreign branch claims in table 3.14 (the sum of lines 7 through 10) with the claims of U.S. offices in table 3.18 (excluding those held by agencies and branches of toreign banks and those constituting claims on own foreign branches). However, see also footnote 2.
 Beginning with data for June 1978, the claims of the U.S. othes

in this table include only banks' own claims payable in dollars. For earlier dates the claims of the U.S. offices also include customer claims and foreign currency claims (anounting in lune 1978 to \$10 billion).
3. In addition to the Organization of Petroleum Exporting Countries shown individually, this group includes other members of OPEC (Algeria, Gabon, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, and United Arab Emirates) as well as Bahrain and Oman (not tormally members of OPEC).
4. Excludes Liberia.
5. Includes Canal Zone beginning December 1979
6. Foreign branch claims only

Foreign branch claims only
 Includes New Zealand, Liberia, and international and regional organizations.

#### A64 International Statistics 🗆 September 1982

Estimated official and private holdings of marketable U.S. Treasury securities with an original maturity of more than 1 year. Data are based on a benchmark survey of holdings as of Jan. 31, 1971, and monthly transactions reports. Excludes nonmarketable U.S. Treasury bonds and notes held by official institutions of toreign countries.

2. Beginning December 1978, includes U.S. Treasury notes publicly issued to Degiming December 1978, includes U.S. Treadity notes publicly issued to private foring residential denominated in foreign currencies.
 Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Oatar, Saudi Arabia, and United Arab Emirates (Tructal States).
 Comprises Algeria, Gabon, Libya, and Nigeria

#### 3.26 DISCOUNT RATES OF FOREIGN CENTRAL BANKS

#### Percent per annum

	Rate on Aug. 31, 1982			Rate on Aug. 31, 1982			Rate on Aug 31, 1982		
Country	Pe1- cent	Month effective	Country	Per- cent	Month effective	Country	Per- cent	Month effective	
Argentina Austria Belgium Brazil Canada Denmark	6 25	Aug 1982 Aug 1982 Aug 1982 Mar. 1981 Aug 1982 Oct. 1980	France <sup>1</sup> . Germany, Fed Rep. of Italy. Japan . Netherlands . Notway .	14.25 7.0 18.0 5.5 7.0 9.0	Aug. 1982 Aug. 1982 Aug. 1981 Dec 1981 Aug 1982 Nov 1979	Sweden Switzerland United Kingdom <sup>2</sup> Venezuela	10 0 5 0 14 0	Mar 1982 Aug 1982 Aug. 1981	

As of the end of February 1981, the rate is that at which the Bank of France discounts Treasury bills for 7 to 10 days.
 Minimum lending rate suspended as of Aug 20, 1981

NOTE. Rates shown are mainly those at which the central bank either

discounts or makes advances against chigible commercial paper and/or government commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations.
