**LITIGATION BETWEEN GUARANTEE COMPANIES.**—The Fidelity and Casualty Insurance Company, of New York, has brought an action in the Supreme Court against the Guarantee Insurance Company of North America, to compel the latter company to give the Fidelity and Casualty Company one-half the business now done by that company with the Elevated Railroad Company in furnishing bonds for ticket sellers and gatemen. The complaint sets up a contract between the two companies that they should jointly enjoy the business of the elevated railroad companies in the matter referred to. The Guarantee Insurance Company denies the validity of the contract, on the ground that it was not authorized by the home office.

#### REPLIES TO QUESTIONS.

*Question.*—I see that Ball on "National Banks," Chapter V., says: "Each of the banks situated in Albany, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Detroit, Louisville, Milwaukee, New Orleans, New York, Philadelphia, Pittsburgh, St. Louis, San Francisco and Washington, shall keep on hand, in lawful money, at least 25 per cent. of its deposits; and all other banks not less than 15 per cent. of the same." Now, I understand that this is the law, and that the practice conforms to it. But on looking in chapter IX., I find section 5191, "Revised Statutes," quoted to show the lawful money reserve prescribed. According to this the banks of the cities named "shall at all times have on hand, in lawful money of the United States, an amount equal to at least twenty-five per centum of the aggregate amount of its notes in circulation and its deposits." Whence arises the discrepancy?

*Answer.*—Section 31 of the national bank act, and section 5191 quoted above, were so amended in the act of June 20, 1874 "that the several associations therein provided for shall not hereafter be required to keep on hand any amount of money whatever by reason of the amount of their respective circulations," but the amount of reserve was to be determined by the amount of deposits only. We can only account for the fact that Section 5191 is quoted by Ball without comment, by supposing it to be an oversight.

*Question.*—In the testimony of Jay Gould given in "Wall Street Methods" contained in your June number, he says that the London Stock Exchange has adopted a rule that in stock dealings the loss shall not be above a certain amount or per cent. He thinks it is ten per cent. Can you quote the rule?

*Answer.*—In our copy of the rules and regulations of the London Stock Exchange we find no such rule. It is possible that it is of recent date. Further information may be given on this point at some future time.

## BANKING AND FINANCIAL NEWS.

**Banker's Convention for 1888.**—At a meeting of the American Bankers' Association held June 7, the Executive Council decided to hold the next annual convention of the Association at Louisville, Ky., on Wednesday and Thursday, October 9 and 10.

The circular of invitation to the Convention says that Saratoga, Cincinnati, Chicago and other places were proposed for the meeting, but from the importance of having a large delegation from the South and West this year the council chose Louisville, where many friends of the Association have desired for several years to have the meeting.

Attention is called to resolutions passed at the last Convention on the subjects of uniform State savings bank laws; distribution of credit reports through clearing-houses; and a uniform law on commercial paper. Suggestions on these subjects are requested. Among the topics offered for discussion are: the present and prospective increase of our national wealth; the decreased remuneration from bank circulation; the rapid growth of banks; the causes of the decline in the rate of interest; the comparative advantages of private, State, and national banking; the absorption of our securities abroad; the monetary perturbations due to the conversion of floating into fixed capital; the crop movements and the foreign exchanges; the proportions of the Treasury balance of gold and silver; the newer aspects of the silver question; the practical effects of usury penalties; the causes and the prevention of financial panics; the principles of sound bankruptcy legislation; the improvements, economies and safeguards of practical banking; the guarantees against defalcations and breach of trust; the banking relations of the through trade between the West and Europe; the proposed changes in international bills of lading; the improvements in the clearing-house system here and abroad; the necessity of ample cash reserves; the causes of the rapid growth of our banking system since the war; the prospects and growth of banking in the West; the financial history and movements of the year, and the more important features of the monetary situation here and in Europe.

Members are requested to prepare addresses or papers on these or other topics, and to also present reminiscences of banks and banking, and obituaries of prominent bankers. They are also asked to suggest names of any gentlemen whom they consider it well to invite to address the Convention, mentioning

the subject proposed. Resolutions and papers should be sent to the office of the Association, 247 Broadway, New York, by Saturday, September 8.

A delegate shall be an officer, or director, or trustee of the institution he represents, or a member of the banking firm, or an individual doing business as a bank.

**Redemption of Check Stamps.**—At a recent date the work of redeeming and canceling stamps imprinted on checks, drafts, &c., was proceeding satisfactorily at the Internal Revenue Bureau. It was stated at the Bureau that all cases then on hand would be rapidly disposed of and the check-books returned to the owners before July 1. We published last month the regulations for the redemption of unused stamps. The following amended instructions have been issued since by the Commissioner of Internal Revenue :

Since the issue of Circular No. 259, dated April 19, 1883, many inquiries have been received concerning the instructions in paragraph 6, which provide, in the case of claims for redemption of stamps imprinted on checks, drafts, etc., allowed on or after July 1, 1883, that the stamps may be cancelled and the blanks returned to the consignors upon receipt of a special request for such cancellation and return.

In answer to these inquiries, and in order to facilitate the work of cancellation, the following amended instructions are issued :

Imprinted stamps may be presented for redemption and cancellation at once, instead of waiting until July first. Such of the stamps received as are redeemed in June will be cancelled and the blanks returned, if possible, in time to reach the owners July first.

Stamped blanks may be presented in sheets or bound in books, and will be returned in the same condition. Blanks which have been compressed into blocks or pads must be separated before presentation.

The cancellation of stamps will be as follows, (the words "Stamp Redeemed" being in red ink :)

[The stamp consists of a diamond with the words "Stamp Redeemed" in the centre.—Ed.]

Requests for cancellation in any form other than that indicated above, or in any place other than this Office, cannot be considered.

Claims for redemption of imprinted stamps should be made on Form 81—"Revised April, 1883," copies of which will be furnished upon application. Care should be exercised in the preparation of claims, as stamps will in no case be cancelled until the claim for their redemption has been examined and found to be satisfactory.

Cases will be taken up for examination in the order of their receipt. If the claim in any case is complete, the stamps accompanying it will be ordered cancelled at once. If the claim is incomplete, and it becomes necessary to call for additional evidence, the case will be laid aside and no further action will be taken until the additional evidence is received.

WALTER EVANS, Commissioner.

**Gold and Silver Production.**—The following is an abstract of the special report of Mr. Burchard, Director of the Mint, upon the production of the precious metals in the United States, which was ordered to be printed by the last Congress.

The yield in the mines of the United States for 1882 was \$32,500,000 in gold, \$46,800,000 in silver; a total of \$79,300,000. Compared with the previous

year, this shows a decline of \$2,200,000 of gold and an increase of \$3,800,000 of silver. The comparative decline in the production of gold was greater in California than in any other State or Territory—the yield being \$1,400,000 less than in 1881. This resulted from the interruption of hydraulic mining in some of the northern and middle counties, owing to litigation, and also from the falling off in the production of the quartz mines at Bodie. In Oregon, where the mining is chiefly placer, there was a diminution, and also in Nevada, Idaho, and Dakota. In silver, the principal increase was in Idaho, Montana, and New Mexico—Idaho showing an increase of \$700,000, Montana \$1,740,000, and New Mexico \$1,500,000. Colorado furnished about \$600,000 less silver than in 1881. Of the bullion production of the country, \$30,964,958 of gold and \$31,400,792 of silver were deposited at the Mints and Assay Offices for coinage, or return in bars to depositors. Of the deposits of gold \$5,600,000 was paid in bars for manufacturing purposes, and the remainder went into coinage; \$1,400,000 was furnished by private refineries for manufacturers' use, and there was an export of \$175,000 in silver bars. Of the total silver production, \$15,750,000 was exported—\$5,994,000 furnished by the Mints and Assay Offices to manufacturers, \$350,000 by private refineries for the same purpose, and \$24,700,000 was used in coinage. The production of the country was from the States and Territories as follows:

|                           | <i>Gold.</i> | <i>Silver.</i>    |
|---------------------------|--------------|-------------------|
| Alaska.....               | \$150,000    | ....              |
| Arizona.....              | 1,085,000    | .... \$7,500,000  |
| California.....           | 16,800,000   | .... 845,000      |
| Colorado.....             | 3,380,000    | .... 16,500,000   |
| Dakota.....               | 3,300,000    | .... 175,000      |
| Georgia.....              | 250,000      | ....              |

| Total.....                | \$32,500,000 | .... \$46,800,000 |

**First National Bank of Buffalo.**—The Comptroller of the Currency has declared a second dividend, 8 per cent., in favor of the creditors of the First National Bank of Buffalo, N. Y.

A former dividend of 25 per cent., amounting to \$208,125, has been paid to the creditors of this bank. The present dividend calls for \$66,600, making the total payments to date \$274,725, being 33 per cent. of the liabilities. It will be remembered that the bank succumbed in April, 1882, under the criminal mismanagement of its President, who is serving out the term of his sentence in a State prison. The report of Bank Examiner Young showed that the losses of the bank amounted to over \$540,000, which included the capital, surplus, undivided earnings and \$352,000 beside. Under the circumstances the dividends paid thus far speak very favorably for the management of the

affairs of the insolvent bank, and form a marked contrast with the ordinary management of insolvent corporations by receivers under the State law. The law has been amended recently, however, so as to provide for publicity and oversight of the transactions of receivers.

**The Repealed Tax.**—The saving to the banks from the decision of the Attorney-General that no taxes are due since January 1 last is estimated at \$3,000,000.—*Press Dispatch from Washington.*

The amount of national taxes on national and State bank capital and deposits during the fiscal year 1882 was \$11,208,875, and at this rate the saving to the banks would be \$5,604,437. The amount quoted above has probably been arrived at by taking the amount paid by the national banks alone in 1882 on capital and deposits, \$5,959,702, one-half of which for the current six months (presuming the condition of the banks to have remained unchanged since last year) would be nearly \$3,000,000. To state the result succinctly, it may be said that the repealed taxes amounted in the fiscal year 1882 to over 1 1-4 per cent. on the capital stock of the national banks, and, of course, to an approximate ratio of the capital of other banks. This is a very important result in a business that is carried on upon so close a margin, as is banking.

**Clairmont Savings Bank Dividend.**—Receiver Clark Brooks began the payment of a 7 per cent. dividend to the creditors of the Clairmont Savings Bank, of New York City, on May 31. Mr. Brooks says that there is a possibility of his being able to pay another dividend of 4 or 5 per cent.

When this bank failed in September, 1877, the nominal assets were \$140,000, and the liabilities as reported by the receiver to the Bank Department were \$102,203 due to depositors, and \$44,732 due to other creditors, a total of \$146,935. A dividend of 8 per cent. was declared in April, 1881, and the payments on this account up to January 1, 1882, aggregated \$6,954, leaving \$155 unpaid. If after the present 7 per cent. is paid an additional dividend of 5 per cent. should be declared, the total realized would be 20 per cent., or less than \$18,000—a beggarly showing after nearly six years under a receivership!

**High Prices for Municipal Bonds.**—The Mayor and Comptroller of Brooklyn, N. Y., sold on June 13, the following bridge bonds: Four per cent. Brooklyn city bonds, for bridge, payable July 1, 1928, \$156,000 at 111.39, \$100,000 at 108.50, and \$100,000 at 105.52; 4 per cent. Brooklyn city bonds, for bridge, payable July 1, 1927, \$100,000 at 111.25, \$100,000 at 108.40, \$23,000 at 106, \$77,000 at 105.50.

The price obtained for \$156,000 of these bonds, 111.39, is said to be the highest price ever paid in this country for city bonds having so long a time to run, and it is certainly the highest we have heard of. The circumstance shows on what favorable terms municipalities can obtain loans, when the ability and intention to pay them is unquestioned. Any State in this country could obtain a loan on even better terms, if capitalists were only assured of the integrity of its people.

**A Supposed Murderer Detected by Bank Officers.**—Joseph Petmecky, the supposed murderer of Mrs. Andrew Froitzheim, who was found with her head crushed in at her home in Auburn on Friday afternoon, was captured here this morning. About 10 o'clock a young German stranger applied at the First National Bank for \$25 on a bank-book of the Auburn Savings Bank issued to Martin Froitzheim. Mr. Ledyard Cogswell, the Teller, held some conversation with the man and told him he must be identified before he could obtain the money. After the man went out, William Osterhout, the porter of the bank, who was standing near and heard the re-

marks, called the Teller's attention to the similarity between the name on the bank-book and that of the woman murdered in Auburn. Mr. Cogswell at once hastened to inform the police, who sent warning to the other banks to be on the lookout for the man. After leaving the bank, Petmecky went to a German saloon in Broadway, where he told the proprietor he was from Auburn and wanted to raise money to go to Philadelphia. At his request the saloon-keeper went to the Mechanics' and Farmers' Bank with him about noon to identify him. The Teller detained Petmecky until the police arrived and took him in custody.—*Albany, N. Y., June 2.*

An examination and search of the prisoner revealed many circumstances pointing to his guilt. His capture reflects credit upon the bank officers through whose aid it was effected.

**New York Produce Exchange Bank.**—The certificate of association of this bank was filed on June 20. The capital stock of the association is fixed at \$1,000,000, which is divided into 10,000 shares of \$100 each, provision being made for its increase up to a limit of \$5,000,000. The shareholders and the number of the shares held by each are as follows: A. E. Orr, 835 shares; Forrest H. Parker, 835; S. Jacoby, 833; Munroe Crane, 833; Alexander Munn, 833; L. J. N. Stark, 833; A. P. Armour, 833; E. S. Whitman, 833; J. A. Bostwick, 833; R. H. Laimbeer, 833; Asa Stevens, 833; Henry W. O. Edye, 833—making in all 10,000 shares.

**Fidelity and Casualty Company of New York.**—Some few months ago charges were made that the accounts of this company had been falsified and that it was actually insolvent. As the company was authorized to take charge of court funds, Judge Noah Davis appointed James McNamee as a referee to examine into its condition and management. This report, which was filed on June 18, declares the complete solvency of the company, approves its methods of doing business, and commends the officers as faithful and prudent. This is all stated at length, and figures are given to show the present condition of the company, the surplus in 1882 being \$24,625.

**Mr. E. B. Sherman** has retired from the Presidency of the Mechanics' National Bank, of New York, being succeeded by William H. Cox, the late Cashier. Mr. Sherman has long been known as one of the ablest and clearest-headed bankers of Wall street, and his opinion on any financial matter of public moment has been always sought and read with interest and profit. He has always been ready to assist any object looking to reform in political, social or financial methods, and it is gratifying to learn that the condition of his health, which necessitates the withdrawal from office, will not prevent him from lending his advice and the result of his long experience to his old associates.

**The Sioux National Bank**, of Sioux City, Iowa, intends this year to increase their capital stock from \$300,000 to \$500,000. This will give the bank a capital larger than that of any other bank between Kansas City and St. Paul, and equal to any in Iowa. The necessity for the change has grown out of the increase in population and business in that region, Sioux City being a center for jobbing business throughout the surrounding district for many miles. The city will have \$700,000 of banking capital, represented by four banks of good reputation. The following were elected directors of the Sioux National at the recent annual meeting: Wm. L. Joy, Alex. Elliott, Judge J. R. Zuver, John Hornick, D. P. Hale, D. T. Hodges and A. S. Garretson.

**American National Life and Trust Company of New Haven, Conn.**—Receiver Talcott H. Russell expects to declare a dividend to the policy holders in a short time. The assets on hand are the insurance building, worth \$150,000, and \$50,000 in cash, mostly the result of suits against subscribers to the guaranty capital. In many suits the receiver accepted compromise judgments as being the best and quickest way of obtaining anything. In a suit against Benjamin Noyes for between \$300,000 and \$400,000 the receiver agreed to a judgment for \$2,000, which has not yet been paid, and probably never will be. The claims against the company amount to about \$1,200,000. These will probably be reduced by the Insurance Commissioners to \$500,000, and it is believed that a dividend of 30 per cent. may be paid. The receiver declines to give an estimate of the dividend.

**A Guarantee Company Indemnifies Itself.**—Five years ago Walter H. Smith, the Manager of the Merchants' Bank, Sarnia, Ont., absconded with \$32,000. He was guaranteed for a large portion of this sum in the Citizens' Insurance Company at Montreal, and this was immediately paid. Smith was never arrested, managing to make good his escape to Nebraska, where he purchased a tract of land and managed to accumulate a considerable fortune. He died a couple of years ago, and this coming to the knowledge of the Guarantee Company a claim was made upon his estate, which was contested by the heirs. Evidence was taken in the case, upwards of five commissions having been sent from Nebraska to Montreal, the last of them being heard during the past week. After several witnesses had been examined and the claim fully established, a compromise was effected and the case settled by the payment to the company of a percentage of its claim.—*Exchange.*

**Lady Bank Officers.**—Since the recent accession of Mrs. Stephens, of Marion, Iowa, to the Presidency of the First National Bank, items have been going the rounds of the press to the effect that she is the first woman who has enjoyed this distinction. The fact is that Mrs. M. G. Williams is also the President of the State National Bank of Raleigh, N. C., and has held the office for several years, and Mrs. M. H. Galloway is also President of the Fond du Lac Savings Bank, Wisconsin.

There are also several women acting as Cashiers and Assistant Cashiers of banks in different States, and in many cases they prove themselves quite as smart and shrewd as their brethren of the sterner sex. In fact we know of no good reason why they should not act in such a capacity, for their fondness for handling money is almost proverbial. We can't see of any possible objection that might be raised, unless it is that of the title which, we suppose, would have to be changed to Cashieress and Presidentess to correspond with the sex, and that might lead some ignorant persons to doubt the genuineness of bills so signed. But the Comptroller of the Currency can regulate all that. So we respectfully turn the matter over to his tender consideration hoping that he will not deal it any very hard knocks.

**The "Bank Clerks' League"** is the title of an association formed in New York for the purpose of carrying on the business of life insurance on the assessment or co-operative plan. The main object, as stated, is to provide a fund for the representatives of deceased bank clerks, and moderate assessments are to be made upon active members, so that it is expected a considerable fund will soon be raised. The officers are as follows:—*President*, E. H. Pullen; *Vice-President*, F. N. Lawrence; *Treasurer*, W. A. Camp; *Secretary*, Newton Squire. The following well-known bankers compose the present Board of Directors:—Hon. Thomas Hillhouse, President Metropolitan Trust Company; Hon. Thos. L. James, President Lincoln National Bank; O. D. Baldwin, President Fourth National Bank; J. T. Baldwin, Cashier Manhattan Company Bank; E. H. Pullen, Cashier National Bank of the Republic; Wm. A. Camp, Manager New York Clearing-House; James R. Lott, President Mechanics' and Traders' Insurance Company; George Montague, President Seventh Ward National Bank; Chas. H. Leland, New York County National Bank; Samuel J. Harriot, of Harriot & Noyes, bankers; F. N. Lawrence, late President of New York Stock Exchange; Edward V. Loew, President Manufacturers' and Builders' Insurance Co.; E. A. Quintard, President Citizens' Savings Bank; F. P. Alcott, Vice-President Central Trust Company; W. D. Searles, Vice-President Farmers' Loan and Trust Company.

**A Decision affecting Mutual Benefit Associations**, was recently rendered in the case of Deady against the Bank Clerks' Mutual Association of New York. One of the by-laws of the association provides that every member of the association may, by written notice to its Board of Managers, designate the person to whom, at his death, shall be paid the sum of \$500 out of its funds, and an additional sum equal to 50 cents for each member of the association. Richard J. B. Deady, in 1875, so designated his mother, Rebecca Deady. On Jan. 23, 1882, three days before he died, he surrendered to the association the paper certifying that fact, and took out a new certificate by which Emma L. Deady was designated. These acts were done by him without notice to his mother. On his death she applied to the association for the insurance money. Payment having been refused, she sued the association. At the trial a verdict in her favor was directed. This verdict has been set aside by

the Superior Court, General Term, Chief-Justice Sedgwick writing the opinion of the court, in which it is decided that the power of a member of the association to designate his beneficiary is not exhausted by one choice, and that to bind him to one choice would lead to many and great difficulties. The court also holds that the certificate by which the association agreed to pay the plaintiff as the appointee of her son was not operative as a contract between her and the association, but that it was an agreement limited in its effect by the by-laws of the association, which conferred on her son the right to do away with it at his will.

#### MISCELLANEOUS BANK ITEMS.

— It is reported that the Bank of Cheney (W. T.), owned by John C. Davenport, has suspended.

— Receiver Price of the Pacific National Bank, of Boston, has compromised the claim for \$71,000 against George R. Eager for 20 per cent.

— Edward P. Wetzlar, a Philadelphia stock broker, suspended on June 6, with obligations to members of the Board estimated at \$20,000.

— The managers of the Fifth Ward Savings Bank, of Jersey City, N. J., began to pay a second dividend of 10 per cent. to the depositors on May 23.

— E. H. Atwood, A. P. Turner, of Philadelphia, Frank Ellison and Abraham Wolff have been elected members of the New York Stock Exchange.

— Arthur H. Blaney, Cashier of the Massachusetts Loan and Trust Company, has confessed to a defalcation of \$44,000, and been arrested. He had been speculating.

— Mr. R. Hammer, for seventeen years cashier of the banking firm of Knauth, Nachod & Kuhne of New York, has retired from business and returned to Germany.

— The banks of San Francisco are said to have loaned large amounts on opium collateral, which has been largely imported in view of the increase in the duty on the article on July 1.

— Mr. George Ball, the senior partner of the banking-house of Ball, Hutchins & Co., of Galveston, Texas, has given to that city the sum of \$50,000, to be expended in the erection of a high school.

— Mr. W. D. Searles has been chosen Vice-President of the Farmers' Loan and Trust Company, in place of Mr. G. F. Talman, deceased. The office of Second Vice-President has been abolished.

— Mr. W. H. Pierson, Jr., for many years connected with the New York Produce Exchange, has been appointed manager of the Produce Exchange Safe Deposit Company.

— Messrs. Vanderhoof, Morrison & Co., stock brokers of New street, New York, had to suspend on June 11, owing (as stated) to the failure of customers to keep their engagements. It is hoped that the embarrassment will prove only temporary.

— There has been a renewal of activity in confederate bonds, \$6 to \$8 per \$1000 having recently been paid for 6, 7 and 8 per cent. bonds. North Carolina war bonds have also been dealt in at \$4 per \$1000.

— A package containing \$40,000 sent by the Marine Bank of New York to the Susquehanna Valley Bank, Binghamton, N. Y., has mysteriously disappeared. The American Express Company is responsible.

— Governor Crittenden of Missouri has declined in advance the present of a watch which the bankers of the State propose to make him, as a suitable testimonial for his interest in behalf of law and order. He said he had done no more than his duty.

— Mr. E. H. Wilson, Cashier of the Indiana County Deposit Bank, of Indiana, Pa., has resigned on account of the failure of the Mahoning Furnace Company, of which he was a member. Judgments for \$12,000 were entered against him.

— Mr. Henry P. Kidder, of Kidder, Peabody & Co., of New York and Boston, was married at Meadville, Pa., on June 21, to Miss Elizabeth Huidekoper, a niece of the Rev. James Freeman Clarke. They have departed for Europe.

— The Nassau Bank, New York, have taken a lease of their rooms in Temple Court for ten years at a rent of \$6,000. Mr. Eugene Kelly, the owner, is to pay \$37,500 for the bank's safe deposit vaults at the expiration of the lease.

— On June 11 Barritt & Cattell, stock brokers, of Philadelphia, were compelled to suspend, but by the 13th they had made a complete settlement with their creditors and were re-admitted to the Board.

— Mr. Charles Crocker, President of the Southern Pacific Railroad Company, and Mr. Woolworth, formerly President of the First National Gold Bank of San Francisco, have established the banking house of Crocker, Woolworth & Co. in San Francisco.

— The Massachusetts Supreme Court has decided that the veto of the Union Safe Deposit bill is valid, because it was written by the Governor and signed when he was in the State. The House has sustained the veto.

— A recent report states that Silverton, Col. was in a high state of excitement over attempts to fire the place and rob the First National Bank, and a vigilance committee had been formed.

— William C. Moore, the proprietor of the Victor, (N. Y.) Bank which failed disastrously last fall, at the time of the suspension of the City Bank of Rochester, was arrested in Benton township, Iowa, on June 8.

— The seat in the New York Stock Exchange of E. A. Vanderhoof, Jr., of the firm which suspended on June 11, was sold for \$27,000, the purchaser being Mr. William H. Kitchen, who sold his seat a year ago for \$32,000.

— Mr. Alexander Mitchell denies that he was interested with McGeoch in his lard transaction. He declares that he never had a personal interest in the grain or provision market, and has always condemned attempts at cornering the produce markets.

— R. H. Parks & Co., stock, cotton and grain brokers of New Street, New York, suspended on June 19, owing to the break in the Chicago markets. They settled all their differences at the Stock Exchange, and it is supposed they will resume business very soon.

— The Supreme Court at Trenton, N. J., has affirmed the sentence to two years imprisonment passed on John Halliard, President of the defunct Mechanics and Laborers' Savings Bank of Jersey City, which, it is charged, he ruined by mismanagement.

— The seat of Mr. Edward Mertens, the New York Stock Exchange member who recently failed, has been sold for \$28,000, which afforded a dividend of about 50 per cent. to his creditors. He is said to have begun business life anew, as a clerk in a western town.

— The receiver of the Grocers' National Bank of New York City has obtained a mandamus to compel the city of Rahway, N. J., to include in its next tax levy the balance due on the amount of a judgment in favor of the bank, being \$30,000, or \$40,000.

— The arguments in the case of the Dexter (Maine) bank against Cashier Barron's estate were concluded on June 11. The Auditor will present a report at the October term of the Supreme Court, but no final decision is expected until the full court has passed upon the intricate legal points raised during the trial.

— Alexander Barton, late cashier of the Fishkill (N. Y.) National Bank, indicted for embezzlement in appropriating funds of the bank, was acquitted by direction of the court, on his second trial at Poughkeepsie on June 12. He was convicted on the former trial four years ago, but was granted a new trial by the Court of Appeals.

— Mr. R. W. Donnell, of the New York banking firm of Donnell, Lawson & Simpson, has offered to present to the people of St. Joseph, Mo., a piece of property valued at \$100,000, for an educational institution on condition that they shall raise a sufficient endowment fund. He settled in that part of the country when a boy in 1838.

— It is announced that Mr. John W. Ellis will retire from the banking firm of Winslow, Lanier & Co. on August 1. He will, at that time, have completed fifty years

of active and successful business life, and will leave the affairs of the great concern of which he has had the chief management, in good hands.

—It is reported that suit is to be brought against the estate of Major Thomas O'Connor, the President of the Mechanics' National Bank of Nashville, who was killed last October, by the State of Tennessee. It involves an amount of \$104,000, the alleged profits of a joint speculation between the deceased and ex-Treasurer Polk in Tennessee bonds.

#### NEW YORK RECEIVERSHIP LAW.

The readers of RHODES' JOURNAL OF BANKING have been from time to time kept informed of the many instances that have occurred in New York State of gross abuses arising under the management of insolvent banks, savings institutions and other corporations by receivers appointed by the courts. A searching investigation was made into a number of cases by a Legislative committee some months since, the revelations being of such a nature as to arouse an urgent demand for reform on all sides. It was shown that receiverships had been made an ordinary means of rewarding partisan political services, and that they had often, or generally (with a few honorable exceptions) been carried on with a sole view to the benefit of the receivers and their friends. There was, in fact, strong evidence to support the opinion that companies had, in certain cases, been forced into the hands of receivers for the purpose of rendering them the easy prey of political and financial adventurers.

The outcome of the investigation mentioned is a bill that was introduced by Isaac L. Hunt at the session of the Legislature just closed, and reported from the Insurance Committee by Mr. Haggerty, and which has been enacted into law, being approved by the Governor on May 11. This law is intended to fix the charges of receivers at a specified rate and to compel them to make semi-annual reports of their proceedings, not only to the Supreme Court, but, in the case of banks and trust companies, to the Bank Superintendent, and in the case of insurance companies, to the Superintendent of Insurance, and in each case, as well, to the Attorney-General. The affairs of corporations now in the hands of receivers are to be closed up within a year, unless the court gives additional time. Other provisions are made intended to keep receivers under a far stricter responsibility and supervision than have existed hitherto. Following is the text of the act:

SEC. 1. Every application hereafter made for the appointment of a receiver of a corporation shall be made at a special term of the court held in and for the judicial district in which the principal business office of the corporation was located at the commencement of the action wherein such receiver is appointed, or in and for a county adjoining such district; and any order appointing a receiver otherwise made shall be void.

SEC. 2. Every receiver shall be allowed to receive as compensation for his services as such receiver, five per cent. for the first \$100,000 actually received and paid out, and two and one-half per cent. on all sums received and paid out in excess of the said \$100,000.

SEC. 3. All orders appointing receivers of corporations shall designate therein one or more places of deposit wherein all funds of the corporation not needed for immediate disbursement shall be deposited, and no deposits or investments of such trust funds shall be made elsewhere, except upon the order of the court, upon due notice given to the Attorney-General.

SEC. 4. It shall be the duty of every receiver of an insurance, banking, or railroad corporation or trust company to present every six months to the General Term of

the Supreme Court, held in the department wherein the place of trial or venue of the action or special proceeding in which he was appointed may then be, on the first day of its first sitting, after the expiration of such six months, and to file a copy of the same, if a receiver of a bank or trust company, with the Bank Superintendent, if a receiver of an insurance company, with the Superintendent of Insurance, and in each case with the Attorney-General, an account exhibiting in detail the receipts of his trust, and the expenses paid and incurred therein during the preceding six months; and it shall be unlawful for any receiver of the character specified in this section to pay to any attorney or counsel any costs, fees, or allowances until the amounts thereof shall have been stated to the General Term in this manner, as expenses incurred, and shall have been approved by that court by an order of the court duly entered. Of the intention to present such account as aforesaid the Attorney-General shall be given eight days' notice in writing; and the Attorney-General shall examine the books and accounts of such receiver at least once every twelve months.

SEC. 5. In case of the intervention of any policy-holder or depositor, by permission of the court, such policy-holder or depositor shall defray the legal expenses thereof, and no allowance shall be made for costs or fees to any attorney of such policy-holder or depositor.

SEC. 6. The affairs of every insolvent corporation now in the hands of any receiver shall be fully closed up by the receiver thereof within one year from the passage of this act, unless the court, upon application by said receiver and upon due notice to the Attorney-General, shall give additional time for that purpose.

SEC. 7. The Attorney-General may, at any time he deems that the interests of the stockholders, creditors, policy-holders, depositors, or other beneficiaries interested in the proper and speedy distribution of the assets of any insolvent corporation will be subserved thereby, make a motion in the Supreme Court, at a special term thereof, in any judicial district, for an order removing the receiver of any insolvent corporation and appointing a receiver thereof in his stead, or to compel him to account, or for such other and additional order or orders as to him may seem proper to facilitate the closing up of the affairs of such receivership, and any appeal from any order made upon any motion under this section shall be to the general term of said court of the department in which such motion is made.

SEC. 8. A copy of all motions and all motion papers and a copy of any other application to the court, together with a copy of the order or judgment to be proposed thereon to the court, in every action or proceeding now pending for the dissolution of a corporation or a distribution of its assets, or which shall hereafter be commenced for such purpose, shall in all cases be served on the Attorney-General in the same manner as provided by law for the service of papers on attorneys who have appeared in actions, whether the applications but for this law would be *ex parte* or upon notice, and no order or judgment granted shall vary in any material respect from the relief specified in such copy or order, unless the Attorney-General shall appear on the return day, and have been heard in relation thereto; and any order or judgment granted in any action or proceeding aforesaid, without such service of such papers upon the Attorney-General, shall be void, and no receiver of any such corporation shall pay to any person any money directed to be paid by order or judgment made in such order or proceeding, until the expiration of eight days after a certified copy of such order or judgment shall have been served as aforesaid upon the Attorney-General.

SEC. 9. All applications to the court contemplated by this act shall be made in the judicial district where the principal office of the insolvent corporation was located; and the venue of all actions or proceedings now pending not in the judicial district where the principal office of the insolvent corporation was located, are hereby changed and transferred to the county and judicial district where such principal office was located.

SEC. 10. All actions or other legal proceedings and appeals therefrom or therein brought by or against a receiver of any of the insolvent corporations referred to in this act, shall have a preference upon the calendars in all courts next in order to actions or proceedings brought by the people of the State of New York.

SEC. 11. All acts or parts of acts inconsistent herewith are hereby repealed.

SEC. 12. This act shall take effect immediately.

## SAVINGS BANKS OF MICHIGAN.

We are indebted to the State Treasurer of Michigan for copies of the reports of the Savings Banks of the State showing their condition at the close of business on April 2, 1883. The following table is a summary compiled from these reports, showing the principal items only, together with the total resources on October 2, 1882, when the last previous reports were rendered:

|                       | Capital. | Surplus. | Undivided<br>Profits. | Deposits. | Total<br>Resources.<br>Oct. 2, '82. |           |
|-----------------------|----------|----------|-----------------------|-----------|-------------------------------------|-----------|
| Adrian.....           | \$10,000 | ....     | ....                  | \$121,313 | \$131,313                           | \$130,052 |
| Ann Arbor.....        | 50,000   | \$25,000 | \$10,822              | 516,244   | 602,686                             | 543,062   |

\* In savings department only.

FRENCH SCHOOL SAVINGS BANKS.—The Minister of Public Instruction, of France, has just published a report on the school savings banks as of January 1, 1883. The progress of these institutions during six years is shown in the following table:

| Jan. 1.   | Number of<br>Banks. | Number of<br>Pass-books. | Amount of<br>Deposits. |
|-----------|---------------------|--------------------------|------------------------|
| 1877..... | 8,033               | .. 176,040               | .. 2,984,352 francs.   |
| 1879..... | 10,440              | .. 224,200               | .. 3,602,621 "         |
| 1881..... | 14,372              | .. 302,841               | .. 6,403,773 "         |
| 1882..... | 16,494              | .. 349,219               | .. 7,984,811 "         |
| 1883..... | 19,433              | .. 395,869               | .. 9,064,583 "         |

In commenting on these figures M. de Malarce says in the "Journal des Debats" that since he formulated the system in 1874, there have grown up in France nearly 20,000 banks, by means of which nearly 400,000 scholars are formed to regular and provident habits in the use of money. These habits once acquired strengthen and elevate the character of the working class, leading them to renounce the futile or meretricious indulgences in prosperous times, so that they may be more independent in bad times. It also makes them more industrious, and educates them to correct economic ideas. These institutions, it should be understood, are not formed for the purpose of taking care of the money of the depositors, but solely as a means of education. For this reason parents are not allowed to deposit their savings in them. The intention is solely to teach the children habits of economy and thrift, and to practically demonstrate how little sacrifices made almost insensibly from day to day result in large and important advantages in the course of weeks or months. Mr. Luzzati, the organizer of the popular banks of Italy, and who has thoroughly studied the matter of economizing provident habits among the working class, declares that the school savings bank is the base of all provident institutions.

## FOREIGN BANKING AFFAIRS.

## CANADA BANKS AND BANKERS.

[A digest of Banking and Financial News of the British Provinces. By the JOURNAL'S Correspondent at Montreal.]

THE WINNIPEG OPEN BOARD OF TRADE AND STOCK EXCHANGE was formally opened on May 29.

THE BANKERS' ATHLETIC ASSOCIATION OF ONTARIO is an idea which might perhaps be extended to other places with profit.

BANK OF TORONTO.—The net profits for the year ended May 31, 1883, were \$267,703. Two 4 per cent. dividends were paid and a bonus of 2 per cent., in all, \$200,000; added to rest, \$60,000; amount carried forward, \$14,861. The rest is \$1,000,000; capital, \$2,000,000.

MARITIME BANK, St. JOHN, N. B.—The general statement for the year ended May 25, shows that of the net profits, \$95,600, nearly all was lost through the failure of Carvill, McKean & Co., only \$6,425 being left as the result of the year's business.

VILLE MARIE BANK.—The balance to the credit of profit and loss May 31, 1882, was \$24,155; net profit for the year ended May 31, 1883, \$31,893; total, \$56,048. From this were paid two 3 per cent. dividends, \$27,856; carried to reserve fund, \$20,000; to profit and loss, \$6,641. Present capital paid-up, \$464,300; reserve fund, \$20,000.

ONTARIO BANK.—The net profits for the year ending May 31, 1883, were \$203,712. Two 3 per cent. dividends were paid, amounting to \$90,000; added to rest, \$110,000; balance of profit carried forward, \$5,172. The branches at Brussels, Oshawa, and Alliston have been withdrawn. The capital stock is \$1,500,000; rest, \$335,000.

JACQUES-CARTIER BANK.—The balance to the credit of profit and loss on May 31, 1882, was \$10,563; profits realized during the year ended May 31, 1883, \$66,773; total, \$77,336. From this were paid two 3½ per cent. dividends, \$35,000; added to reserve fund, \$15,000; balance to credit of profit and loss, \$27,336. The reserve fund is now \$140,000; capital, \$500,000.

QUEBEC BANK.—The balance to credit of profit and loss on May 15, 1882, was \$35,830; profits for the year ended May 15, 1883, \$301,956; total, \$337,786. From this two 3½ per cent. dividends were paid, amounting to \$175,000. After deductions for doubtful debts, &c., the balance of profit and loss was \$86,904. The reserve remains at \$325,000; capital stock, \$2,500,000.

BANK OF HAMILTON.—The balance to credit of profit and loss May 31, 1882, was \$3,962; net profits for the year ended May 31, 1883, \$135,108; total, \$139,034. From this two 3½ per cent. dividends were paid, amounting to \$63,609; carried to reserve fund, \$65,000; balance forward of profit and loss, \$7,425. Capital stock paid-up, \$976,510; reserve fund, \$200,000.

FREEHOLD LOAN AND SAVINGS CO.—The announcement is made that Mr. W. A. Douglass, for many years accountant in the Freehold Loan Company, has been appointed Assistant Manager of that institution. Those who are familiar with that gentleman's abilities will agree with us in the opinion that the promotion is well deserved.—*Monetary Times, Toronto.*

**EASTERN TOWNSHIPS BANK.**—The balance of profit and loss carried forward from last year was \$3,242; net profit for the year ended May 15, 1888, \$188,751; total, \$191,994. Two  $\frac{3}{4}$  per cent. dividends were paid during the year, amounting to \$97,980; transferred to reserve fund, \$80,000; profit balance carried forward, \$14,013; capital paid in, \$1,309,740; reserve fund, \$350,000.

**THE BANK STATEMENT FOR MAY** shows an aggregate reserve fund of \$17,052,718, at the end of the month, which is nearly 28 per cent. of the aggregate capital. The dividends shown in statement for each bank, average about 7.4 per cent. The circulation decreased in the month from \$33,082,659 to \$31,301,076. The amount due from foreign agencies increased from \$11,172,542 to \$12,009,294. The discounts were reduced from \$146,613,144 to \$144,451,187.

**FEDERAL BANK OF CANADA.**—The net profits for the year ended May 31, 1888, were \$459,257; balance from last year, \$23,704; premium on new issue of stock, \$588,720; back dividends on stock payments, \$36,250; total, \$1,065,981. Two  $\frac{3}{4}$  per cent. dividends were paid, amounting to \$191,774; transferred to rest, \$850,000; balance of profits forward, \$34,157. Of \$1,500,000 additional stock authorized last year, \$1,466,800 was taken up. The paid-up capital is \$2,787,810; rest, \$1,450,000.

**BANK OF MONTREAL.**—The balance of profit and loss account on April 30, 1882, was \$215,404; net profit for the year ended April 30, 1883, \$1,556,788; total, \$1,772,192. From this were paid two 5 per cent. dividends, amounting to \$1,200,000; added to rest, \$250,000, leaving \$322,192 to credit of profit and loss. Capital stock paid-up, \$12,000,000; rest, \$5,750,000.

At the annual meeting on June 4, Mr. C. F. Smithers, the President, again urged the necessity of caution in doing business, but his speech was somewhat more assuring than that of last year.

**BANK OF NOVA SCOTIA.**—The statement for the year 1882 shows that the balance to the credit of profit and loss on December 31, 1881 was \$3,299; the net profits for 1882, after writing off all bad and doubtful debts, losses, etc. were \$141,463; profit on bonds sold, \$12,500; total \$158,282. From this dividend number 23 of \$40,000 was paid August 1, 1882 and \$40,000 more was applicable to dividend 24, payable February 1, 1883; \$75,000 was transferred to the reserve fund, leaving a balance carried forward of \$3,282. On December 30, 1882, the deposits at call amounted to \$1,020,957; deposits subject to notice, \$2,058,664; notes in circulation, \$936,929; capital paid-up, \$1,000,000; reserve fund, \$400,000; specie, \$122,588; dominion notes, \$359,557.

**MERCHANTS' BANK OF CANADA.**—The report for the year ended May 31, 1883, shows that the net ordinary profits were \$865,912; profit Pacific Railway bonds, \$17,500; profits brought forward from 1882, \$13,701; total, \$897,113. From this were paid two dividends of  $\frac{3}{4}$  per cent., \$399,966; added to "rest," \$400,000; transferred to contingent fund, \$65,000. The "rest" is now \$1,150,000; and the contingent fund, \$255,000; capital paid-up, \$5,714,506.

In his remarks, at the annual meeting on June 20, the General Manager, Mr. G. Hague, gave a warning against the abuse of the credit system, a serious evil of former years having broken out again, viz.: the giving and taking of unreasonable amounts of credit. He deprecated the practice of keeping more than one bank account. It prevented the merchant from having the benefit of the banker's information and the banker's judgment as to the amount of credit he is giving, and opened the way to a dangerous and ruinous extension of credits generally. He said the Bank had abstained from making loans based on real estate in the Northwest.

**LONDON CLEARING-HOUSE BUSINESS.**—Sir John Lubbock's annual statement of statistics of the London Bankers' Clearing House up to April 30, 1883, shows a decreased total clearing of over 8 per cent. as compared with the previous year, and a falling off on Stock Exchange half-monthly settling days of nearly 15 $\frac{1}{4}$  per cent. The total of clearings in the year ended April 30 was £6,189,146,000, being £193,508,000 less than in 1881-82. The clearings on Stock Exchange settling days amounted to £1,160,815,000, a decrease of £209,879,000; total on consols settling days, £253,545,000, a decrease of £46,243,000; on fourths of the month (ordinary trade clearances), £242,581,000, a decrease of £14,073,000. These last are smaller than during the years from 1872 to 1875.

## NEW BANKS, CHANGES, FAILURES, ETC.

**New National Banks.**—The Comptroller of the Currency furnishes the following statement of National Banks organized since our last report:

- 2965—First National Bank, Homer, Illinois. Capital, \$50,000. Solomon Plant, President; Emanuel I. Fisher, Cashier.
- 2966—Puget Sound National Bank, Seattle, Washington Territory. Capital, \$50,000. Bailey Gatzert, President; J. Furth, Cashier.
- 2967—Front Royal National Bank, Front Royal, Virginia. Capital, \$50,000. Giles Cook, Jr., President; Jas. H. French, Cashier.
- 2968—Farmers' National Bank, Owenton, Kentucky. Capital, \$60,000. J. Holbrook, President; Jo. C. Revill, Cashier.
- 2969—First National Bank of DuBois City, DuBois, Pennsylvania. Capital, \$50,000. Frederick K. Arnold, President; James E. Long, Cashier.
- 2970—National Bank of St. Joseph, St. Joseph, Missouri. Capital, \$100,000. Calvin F. Burnes, President; George C. Hull, Cashier.
- 2971—Commercial National Bank, Marshalltown, Iowa. Capital, \$100,000. Elijah L. Lyon, President; Andrew A. McFadon, Cashier.
- 2972—First National Bank, Lewiston, Idaho. Capital, \$50,000. John P. Vollmer, President; Cashier, John H. Evans.

---

Mechanics' National, New York.—Mr. William H. Cox, who was elected President of this bank in June, in place of Mr. B. B. Sherman, had served as Cashier since the year 1861. Mr. H. E. Garth, the new Cashier, was formerly President of the German National Bank of Memphis, Tenn.

---

## BANKERS' OBITUARY RECORD.

---

**Allen.**—Leander Allen, who died in New York on May 23, aged 83 years, was formerly employed in the Bank of Commerce, and was one of the original founders of the Institution for the Savings of Merchants' Clerks.

**Bartles.**—Charles Bartles, who died at Flemington, N. J., on June 13th, aged 83 years, was for several years President of the Hunterdon County National Bank. He amassed a large fortune, which he used to advance the interests of his section of the country.

**Beall.**—E. S. Beall, Cashier of the Farmers and Merchants' National Bank, of Baltimore, died June 8. He was born in Norfolk, Va., thirty-eight years ago, and was engaged in the bank sixteen years in all, having been appointed Cashier in 1879.

**Gaines.**—John G. Gaines, formerly President of the Citizens' Bank, and a leading hardware merchant of New Orleans, died June 5. He was a native of Portsmouth, N.H., was 72 years old, and had lived in New Orleans 50 years. He was at one time the possessor of great wealth, but failed to weather a financial storm a few years ago.

**Grannis.**—Timothy O. Grannis, of the banking firm of T. O. Grannis & Co., of Utica, N. Y., died May 19, aged seventy-three years. He was born in Claremont, N. H., and removed to Utica in 1825. When a young man he studied law in the office of Aaron Burr, at New York, for a short time, but returning to Utica he entered the old Bank of Utica, and ultimately he became Teller. When the Bank of Central New York was established in 1846 he was appointed Teller and afterward Cashier. It failed in 1860, and in 1862 the bank of T. O. Grannis & Co. was chartered under State laws. This became a private concern later, but has had an honorable and successful career up to the present time.

**Hammett.**—The death was recently announced of James M. Hammett, of the banking house of James M. Hammett & Co. of Huntsville, Mo.

**Ludlow.**—John Ludlow, President of the First National Bank of Springfield, O., died June 10, 1883, aged 72 years. He was born near Springfield, in 1810, and spent his life in that city. He was closely related to Israel Ludlow, one of the founders of Cincinnati. He followed the drug business for nearly thirty years, but in 1854 was elected President of the Springfield Bank. He continued in this position when the bank was changed to the First National, and up to his death. He also held other positions of trust.

**Mackey.**—Great excitement and sorrow was caused in Stroudsburg, Pa., on May 18, by the news that Jeremy Mackey, Cashier of the Stroudsburg Bank, and an ex-Associate Judge of Monroe county, had committed suicide by shooting. He had been suffering from insomnia and melancholia for some time, and the coroner's jury found that he was temporarily insane. Judge Mackey was born near Belvidere, N. J., seventy-two years ago, and removed to Pennsylvania in 1836, where he for some years followed the tanning business. He was elected Associate Judge 25 years ago. When he became Cashier of the bank, 13 years ago, it was in a wretched condition. He built it up until it paid an 8 per cent. dividend and had a good surplus.

**MacRae.**—Colonel John MacRae, of Wilmington, N.C., whose death was announced about June 20, was formerly, for many years, President of the Bank of Wilmington. He was also the first Mayor of Wilmington, and held many positions of trust in the State.

**Munger.**—H. S. Munger, President of the First National Bank of Geneva, Ohio, died May 26, 1883, at the age of fifty-seven years. He was born at Geneva, O., and was connected with the above bank as a Director, in all twenty-one years. He was its President for the last five years.

**Shippen.**—John Shippen, who was for 51 years President of the Miners' National Bank, of Pottsville, Pa., died at that place on May 12. He was born in Chester county, Pa., on August 13, 1791, coming of English Quaker stock. In youth he was a surveyor, and surveyed the whole of Clarion and adjoining counties. In 1829 he went to Pottsville, and two years later he was chosen President of the above-named bank, which position he resigned in 1882 on account of old age. In length of service he was the oldest bank President in the country.

**Talman.**—George F. Talman, Vice-President of the Farmers' Loan and Trust Company, New York, died June 11, 1883, aged eighty-eight years. He was born in New York, graduated from Columbia College, and studied law in Goshen, N. Y., where he practiced for some years. Returning to New York he continued the practice of law in connection with Ogden Hoffman, until he became agent of the American Trust Company of Baltimore. When this company wound up he became Vice-President of the above-named company. Mr. Talman was not married. He was a public-spirited man.

**Trowbridge.**—Henry Trowbridge, Vice-President of the National New Haven Bank, died May 28th, aged sixty-eight years. While yet a boy he was employed by the firm of H. Trowbridge's Sons & Dwight, and for six years represented the house in the West Indies. In 1836 he became a member of the firm, and of the successive firms of H. Trowbridge & Sons (1848), and H. Trowbridge's Sons (1849). He was also interested in a number of other enterprises, and held several public offices. The reference library of Yale Theological School was founded by him. He was for thirty-three years a Director of the above bank, and for the past fifteen years its Vice-President.

**Wallace.**—Francis B. Wallace, one of the oldest members of the New York Stock Exchange, died on June 21, aged seventy-six years. He was born in Milford, Pa., but when young entered the store of an uncle in Goshen, N. Y., and in time became a partner. He came to New York about 1857, and in 1860 went into the stock brokerage business, his firm being Wallace & Broadhead. A few years after this firm was dissolved, and Mr. Wallace took his nephew, J. Frank Philips, into partnership, assuming the existing firm name of F. B. Wallace & Co. Upon the death of Mr. Philips, about three years ago, Mr. Wallace became a special partner in the present firm. He was well known in Wall Street as a man of high principle and positive convictions.

**Ward.**—Israel K. Ward, Cashier of the Second National Bank, of New Haven, Conn., died May 25, in his fifty-seventh year. He was appointed Teller of the bank in 1857, and Cashier two years later. He was Treasurer of the town of Orange, and of the New Haven & West Haven R. R. Co., and held other places of trust, having represented his native town of West Haven in the Legislature. He was a most highly respected citizen.

**Webster.**—Hosea Webster, President of the Brooklyn (L. I.) Savings Bank, died June 1, aged ninety-three years. He was born in Litchfield, Conn., on December 14, 1789. Early in life he went to the South, and for some years did business in Georgia with success. Removing to Brooklyn in 1832, he was chosen a Trustee of the Savings Bank in 1835, and in 1845 was elected its President.

**White.**—Norman White, who died in New Rochelle, N. Y., on June 13, was formerly for many years a Director of the Mercantile National Bank, of New York, and for four years its President. He was also connected with many large business enterprises, as well as religious organizations.

**Wyckoff.**—Nicholas Wyckoff, who died in Brooklyn, L. I., on June 24, at the age of 82 years, resigned the position of President of the First National Bank of Brooklyn a few weeks ago, on account of ill-health.

## RAILROAD FINANCES AND NEWS.

(A synopsis of Railroad finances and affairs of interest to Bankers, Investors, &c.  
*Classification*: I. New Issues. II. Reports. III. Miscellaneous R. R. News).

### I. NEW ISSUES.

PAUL, MINNEAPOLIS AND OMAHA.**—This company will issue at its convenience additional capital stock, at the rate of \$10,000 per mile of preferred and \$15,000 of common, on 50 43-100 miles of new railroad. The preferred stock, 5,043 shares, will amount to \$504,300; the common, 7,564 shares, will amount to \$756,400.

**NEW YORK, LAKE ERIE AND WESTERN.**—The second consolidated mortgage bonds, \$25,000,000, and the second consolidated funded coupon bonds, \$8,597,400, which were formerly listed and called separately at the Stock Exchange, have, since June 1, become one series, being similar in all respects.

**ATLANTIC AND PACIFIC.**—The Boston "Transcript" says: The company has sold at about 15 ten millions of its treasury capital stock and given an option at 20 on another ten millions. The first ten millions has been over-subscribed for, and no doubt the second will be readily sold by the syndicate. This will give the Atlantic and Pacific over \$3,000,000, and enable it to repay the \$2,360,000 advanced for its construction by the Atchafson and San Francisco companies.

**THE GALVESTON, HOUSTON AND HENDERSON RAILROAD COMPANY** recently applied to the New York Stock Exchange for the listing of \$2,000,000 of its purchase money first mortgage 5 per cent. bonds, and \$1,000,000 of its capital stock. The principal and interest of the bonds are guaranteed by the International and Great Northern Company.

**ST. PAUL, MINNEAPOLIS AND MANITOBA.**—Application was made recently to the New York Stock Exchange by this company for the listing of \$10,574,000 of their consolidated bonds. The amount of these bonds authorized is \$50,000,000, and of the remaining \$39,426,000, there are reserved to cover previous issues, \$19,426,000, leaving \$20,000,000 to be issued on additional roads as built or required.

**THE CHICAGO AND NORTHWESTERN RAILROAD COMPANY** has given notice of their intention to issue 97,651 shares of additional stock, 88,842 of which will be on the Chicago, Milwaukee and Northwestern Division, and 10,809 in holdings of the Elgin and State Line.

**CHICAGO, MILWAUKEE AND ST. PAUL.**—On June 4 the stockholders re-elected the directors of last year and authorized the issuance of 30,000 shares, or \$3,000,000

of common stock, to pay for coal lands purchased. There are 260 miles of road on which no stock has been issued. The newly-elected directors re-elected last year's officers and added John D. Durand as Second Vice-President, with headquarters at New York.

**EAST TENNESSEE, VIRGINIA AND GEORGIA.**—At a meeting of the stock and registered bondholders on June 23, full power was granted the directors to make any extension to the system they deem proper, either by construction, purchase or lease. The directors were also authorized to issue \$10,000,000 in 6 per cent. bonds, \$3,000,000 in preferred stock and \$13,000,000 in common stock, the mortgage to be only on newly acquired property.

## II. REPORTS.

**CEDAR RAPIDS AND MISSOURI RIVER.**—The report for the year ended March 31, 1883, shows that the gross earning were \$3,177,192 against \$3,472,261 in the previous year, a decrease of \$295,068. The rental income was \$854,646, which by other items was increased to \$865,926. Interest was paid on the bonds and preferred stock, and quarterly dividends of  $1\frac{1}{2}$  per cent. on common stock. The common stock amounts to \$6,850,400; preferred stock, \$769,600; first mortgage bonds, \$3,614,000; balance to credit of income account March 31, 1883, \$836,606.

**IOWA FALLS AND SIOUX CITY.**—The report for the year ended March 31, 1883, shows gross earnings of \$723,684, an increase of \$33,145 over the previous year. The income from rental, etc., was, \$901,276; expenses, \$6,413; net income, \$894,863. Interest was paid on the bonds, which amount to \$2,947,500; and  $6\frac{3}{4}$  per cent. dividends on the stock, which amounts to \$4,623,500. The balance to income account for the year was \$376,452, and the total balance to credit of income account was \$1,315,229. The surplus net income above interest on bonds and 7 per cent. on stock, which is set apart to provide for the liability at the termination of the lease to the Illinois Central in 1887, amounts to \$1,150,000.

**ALABAMA GREAT SOUTHERN, LIMITED.**—The gross earnings in 1882 were \$856,757 against \$789,375 in 1881, an increase of \$67,381. The balance to the credit of net revenue was £33,051, out of which £20,431 was appropriated to pay a 6 per cent. revenue to the English company, and £12,011 to the Alabama, New Orleans, Texas and Pacific Junction Railways Company, limited, for subsidy. The balance carried forward was £608.

**ST. LOUIS AND CAIRO.**—The first annual report, for the year ended January 31, 1883, shows that the road is narrow gauge and 151.6 miles long. The capital stock is \$6,500,000. The mortgage debt is \$2,600,000 represented by 5 per cent. income bonds, interest payable if earned, and non-cumulative. A dividend of 5 per cent. was declared from the net earnings for the year. The total earnings for the year were \$382,297; expenses, including taxes and rent, \$141,016; leaving net revenue, \$382,297.

**BURLINGTON, CEDAR RAPIDS AND NORTHERN.**—The average mileage operated for the year ended December 31, 1882, was 638, against 564 in 1881.

The earnings were:

|                                          | 1882.            | 1881.            |
|------------------------------------------|------------------|------------------|
| Total gross earnings.....                | \$2,800,682      | \$2,259,036      |
| Operating expenses, including taxes..... | 1,883,681        | 1,626,850        |
| Net earnings.....                        | \$917,001        | \$632,186        |
| Summary of income account:               |                  |                  |
|                                          | 1882.            | 1881.            |
| Total income.....                        | \$995,058        | \$691,376        |
| Total disbursements.....                 | 947,487          | 916,874          |
| Balance.....                             | (surp.) \$47,571 | (def.) \$225,498 |

There was no change in the stock (\$10,000,000); the funded debt was increased from \$9,059,900 to \$9,964,000.

**CENTRAL IOWA.**—The total length of the line on December 31, 1882, was 504½ miles, which included the Eastern Division, 124 miles, incomplete, and the Illinois Division, 90 miles, under construction. The earnings for two calendar years were as follows:

|                                   | 1882.       |    | 1881.       |
|-----------------------------------|-------------|----|-------------|
| Total earnings.....               | \$1,209,109 | .. | \$1,001,966 |
| Operating expenses and taxes..... | 675,876     | .. | 576,759     |
| Net earnings.....                 | \$533,233   | .. | \$424,907   |
| Balance over interest.....        | 230,738     | .. | 165,607     |

**DES MOINES AND FORT DODGE.**—During the year ending December 31, 1882, the extension was completed from Tara to Ruthven, 56 miles, and 6½ per cent. bonds were issued against it.

Earnings in 1882 and 1881:

|                         | 1882.     |    | 1881.     |
|-------------------------|-----------|----|-----------|
| Total earnings.....     | \$347,168 | .. | \$401,532 |
| Operating expenses..... | 226,882   | .. | 228,988   |
| Net earnings.....       | \$120,286 | .. | \$172,543 |

**BOSTON, CONCORD AND MONTREAL.**—The gross earnings for the year ending March 31, 1883, were \$923,195; expenditures, \$697,651; net earnings, \$225,544. The gross earnings for the year ending March 31, 1882, were \$902,906; expenses, \$669,157. The Pemigewasset Valley Railroad has been substantially completed from Plymouth to North Woodstock and leased to the above company.

**OGDENSBURG AND LAKE CHAMPLAIN.**—The report for the year ended March 31, 1883, shows that the earnings were as follows:

|                         | 1883.     |    | 1882.     |
|-------------------------|-----------|----|-----------|
| Total earnings.....     | \$642,196 | .. | \$609,324 |
| Operating expenses..... | 450,758   | .. | 438,469   |
| Net earnings.....       | \$191,438 | .. | \$170,855 |

The net income was \$184,817, from which \$184,594 was paid in interest, leaving \$261 balance carried to profit and loss. The floating debt was increased \$61,000 during the year, and \$103,000 of first consolidated mortgage bonds were sold.

**ALLEGHENY VALLEY.**—During the year ending December 31, 1882, the earnings were as follows:

|                                   | 1882.       |    | 1881.       |
|-----------------------------------|-------------|----|-------------|
| Total gross earnings.....         | \$2,356,696 | .. | \$2,169,787 |
| Operating expenses and taxes..... | 1,427,456   | .. | 1,285,114   |
| Net earnings.....                 | \$929,242   | .. | \$904,673   |
| Income account:                   |             |    |             |
| Net earnings.....                 | \$929,242   | .. | \$904,673   |
| Total disbursements.....          | 1,770,039   | .. | 1,823,961   |
| Balance, deficit.....             | \$840,797   | .. | \$924,288   |

The total to debit of profit and loss on December 31, 1882, was \$6,982,993. The stock and bonds were:

|                                       | 1882.       |    | 1881.       |
|---------------------------------------|-------------|----|-------------|
| Common stock.....                     | \$2,166,500 | .. | \$2,166,500 |
| Bonds prior to incomes.....           | 16,700,000  | .. | 16,900,000  |
| Income bonds.....                     | 8,760,700   | .. | 8,171,700   |
| Guar. coupons held by Penn. R. R..... | 3,539,306   | .. | 2,920,260   |

**CANADA SOUTHERN.**—The annual report for the year ending December 31, 1882, shows that the mileage was unchanged, the total being 404, of which 229 are main line. Following are the earnings:

|                                   | 1882.       |    | 1881.       |
|-----------------------------------|-------------|----|-------------|
| Total gross earnings.....         | \$3,416,969 | .. | \$3,369,260 |
| Operating expenses and taxes..... | 2,597,179   | .. | 2,672,345   |
| Net earnings.....                 | \$819,790   | .. | \$696,915   |

## Income account :

|                          | 1882.             |    | 1881.           |
|--------------------------|-------------------|----|-----------------|
| Total income.....        | \$831,790         | .. | \$706,572       |
| Total disbursements..... | 680,290           | .. | 767,276         |
| Balance.....             | (surp.) \$151,500 | .. | (def.) \$60,704 |

## Stock and bonds :

The common stock, \$15,000,000, remained unchanged, and the bonded debt was increased from \$13,768,038 to \$13,802,938 during the year.

MILWAUKEE, LAKE SHORE AND WESTERN.—The report for the year ending December 31, 1882, shows that the mileage operated was 32½, of which all but 4 was owned by the company. During the year a consolidation was effected with the Vieux Desert & Lake Superior Railroad Company for the purpose of constructing an extension in Michigan.

## The earnings were :

|                                   | 1882.     |    | 1881.     |
|-----------------------------------|-----------|----|-----------|
| Total receipts .....              | \$909,907 | .. | \$637,485 |
| Operating expenses and taxes..... | 578,044   | .. | 423,000   |
| Net receipts.....                 | \$331,863 |    | \$214,485 |

The balance after paying interest on bonds was \$102,792. The balance to the credit of income account on Dec. 31 was \$422,707.

CONCORD RAILROAD.—During eleven months of the year ended March 31, 1883, the road was operated in connection with the Boston and Lowell, but the arrangement has been discontinued.

## The earnings for the year were :

|                           | 1882-3.     |    | 1881-2.     |
|---------------------------|-------------|----|-------------|
| Total gross receipts..... | \$1,317,879 | .. | \$1,258,419 |
| Expenditures.....         | 887,562     | .. | 787,211     |
| Net receipts.....         | \$430,317   | .. | \$471,208   |

After payment of taxes, rents, etc., amounting to \$279,934, there remained a balance of \$150,383. From this two dividends of 5 per cent. each were paid, leaving \$383 to be carried to contingent fund.

NORTHERN RAILROAD OF NEW HAMPSHIRE.—The following shows the earnings for the year ending March 31, 1883:

|                         | 1882-3.   |    | 1882-1.   |
|-------------------------|-----------|----|-----------|
| Total earnings.....     | \$583,627 | .. | \$528,404 |
| Expenses and taxes..... | 416,077   | .. | 405,675   |
| Net earnings.....       | \$167,550 | .. | \$122,729 |

Adding to the net earnings the balance of interest account, \$58,493, and the balance of income for the previous year, \$150,820, gives a total of \$376,864. From this \$179,838 was paid in dividends, leaving balance of income account at the end of the year \$197,026.

MANCHESTER AND LAWRENCE.—Gross earnings for the year ending March 31, 1873, \$180,498; operating expenses, \$80,242; net earnings, \$100,255; paid in dividends, \$100,000; balance, \$255. Credit balance of income and expenses, \$115,827.

## III. MISCELLANEOUS R. R. NEWS.

NEW YORK, WEST SHORE AND BUFFALO.—This important railroad was opened from Jersey City to Newburgh, N. Y., on June 4. The Pennsylvania Railroad's depot at Jersey City is used for the present, until the new company's own station at Hoboken is completed. The officers expected to open the road to Albany and Saratoga by July 1, and it is the intention to run through trains from Saratoga to Long Branch by way of the Pennsylvania line.

## THE BANKER'S GAZETTE.

### The Money Market and Financial Situation.

NEW YORK, JULY 2, 1883.

Some few weekssince a good English authority expressed the opinion that American securities were being bought up there instead of being sold. There is a change in this respect since, for cable dispatches of July 1 say that there is no trading in American securities, the public seeming to be waiting for developments on this side of the water.

The prospects are somewhat cleared on this side by the recent breaking down of the great bull pool in provisions at Chicago. It was undoubtedly a great calamity to those who were interested in it, and who had temerity enough to wager their fortunes against the resources of the commercial world. There are hopes that the form of lunacy which takes this direction will become extinct after a few more examples, such as the Keene pool and the McGeoch pool.

But we have to consider here more particularly the result of the pool to the country generally. It is pretty certain that the extravagant prices to which agricultural products had been forced were the cause of the comparatively very light exports, for some time past. The wheat exports in May amounted to only 5,634,390 bushels, against 7,220,649 in May 1882, and 12,903,813 in May 1881. There has also been a decrease in the exportation of bacon, lard and pork as compared with corresponding time last year, there being about 5,500,000 pounds less of bacon exported last May than in May 1882. The results have been high rates of foreign exchange, looking toward an export of gold, a partial paralysis of trade in various branches, and an inclination to dispose of American securities abroad rather than to invest in them.

Of course the pool was not the sole cause of these conditions, but it tended to aid them.

At the beginning of the dull season of midsummer no report of a special improvement in trade can be expected, but it is gratifying to find that the outlook brightens as the year rolls on. The prospect of the wheat crop has perceptibly improved during the past month, the pig iron trade has been growing firmer on increasing transactions, the outlook for the cotton crop has improved somewhat, and the coal trade is in a somewhat better condition than formerly.

A strong disposition is manifested in some quarters to exaggerate the consequences of the Chicago failures. It has been said that the banks were largely involved. No doubt some of the banks have loaned money to the speculators, but it must have

been on good collateral, and although certain of them may have sustained losses, it is not at all probable that any have been seriously injured.

**BUSINESS FAILURES.**—The record of mercantile failures in the United States, kept by "Bradstreet's" shows that the number during the second quarter of 1883, just closed, was 2,107, with liabilities of \$31,560,207, and actual assets, \$16,126,760. For the first quarter of 1883, the number was 3,189; liabilities, \$42,235,535; actual assets, \$23,763,823. The large difference between the first and second quarters was to be expected, as toward the end and the beginning of the year when balance sheets are generally made up, the number of assignments and suspensions is always increased. During the second quarter of 1882, the number of failures was 1,503; liabilities, \$31,560,207; assets, \$16,126,760. This shows that the results from business during the quarter have been not nearly so favorable as last year. The following table compares the statistics of failures for the past six months, with those of the first half of 1882:

|           | <i>Number.</i> |    | <i>Assets.</i> |    | <i>Liabilities.</i> |
|-----------|----------------|----|----------------|----|---------------------|
| 1882..... | 3,649          | .. | \$27,329,765   | .. | \$52,383,289        |
| 1883..... | 5,296          | .. | 30,889,202     | .. | 73,594,205          |

The increase in the number of failures is 1,647, or 45 per cent., being a result of the liquidation that has been carried on for a year or more, necessitated by a general decrease in the prices of merchandise and the collapse of speculative values.

**THE PUBLIC DEBT** was decreased during June to the surprisingly large amount of \$18,098,201, which seems to be a little the largest monthly reduction from ordinary revenue on record. The large reduction is attributed to the large customs receipts, and the reduction in disbursements. The customs receipts amounted to about \$20,000,000, being 7 millions greater than the amount for May. The amount paid for pensions in June was only about \$1,000,000. The total reduction in the public debt during the past fiscal year was \$137,823,253, which, in view of the decreased taxation, is possibly a larger reduction than will ever occur in a year again. The reduction, in the interest-bearing debt during the fiscal year, was \$125,581,250, from which a decrease of nearly 6 millions in the annual interest charge will accrue. Since August 1865 the public debt has been reduced nearly 1,000 million dollars, and the annual interest charge has decreased nearly 100 million.

**TREASURY MATTERS.**—The available cash balance was increased during the past month nearly 20 million dollars, to \$151,118,847. The gold coin and bullion was increased nearly 5 millions, being over 198 million dollars. The amount of gold certificates has not increased, being a little less than \$60,000,000. The Treasury contains \$111,914,019 in standard silver dollars, against which there are outstanding \$72,620,686, in silver certificates. The amount of silver dollars owned by the Government increased about 2 millions during the past month.

**MONEY AND DOMESTIC EXCHANGE.**—The absence of speculation, and the comparative slackness in the movement of commodities eastward, causes the loan market to be quite as easy as it usually is at this time of the year. Call loans on good stock collateral are readily negotiated at 2 @  $\frac{3}{4}$  per cent., and time loans for six months at  $4\frac{1}{2}$  @ 5 per cent. The discount rate on 60 to 90 days indorsed bills is 4 @ 5 per cent., on four months acceptances 5 @  $5\frac{1}{2}$  per cent., and on good single named paper at four to six months time,  $5\frac{1}{4}$  @ 6 per cent.

Domestic Exchange continues generally in favor of New York. Following are the rates on July 2: Savannah, buying par; selling  $\frac{1}{4}$ @ $\frac{1}{2}$  premium. Charleston, par; selling  $\frac{1}{4}$ @ $\frac{1}{2}$  premium. New Orleans commercial, 25c. per \$1,000 discount; bank, par@ \$1 25 per \$1,000 premium. St. Louis, \$1 per \$1,000 premium. Chicago, 70c. per \$1,000 premium. Boston, 16@20c. per \$1,000 discount.

FOREIGN EXCHANGE.—The market has remained unchanged for some weeks at high rates for bills; but the demand is now light and the market weak.

Following are the posted and the actual rates of foreign exchange on July 2: Bankers' sterling, 60 days, nominal, \$4.85 $\frac{1}{4}$ ; sight, nominal, \$4.89; 60 days, actual, \$4.84 $\frac{1}{4}$ @\$4 85; sight, actual, \$4.88 $\frac{1}{4}$ @\$4.88 $\frac{1}{4}$ . Cable transfers, \$4.89@ \$4.89 $\frac{1}{4}$ ; Prime commercial sterling, long, \$4.84@ \$4.84 $\frac{1}{4}$ ; Documentary sterling, 60 days, \$4.83 $\frac{1}{4}$ @ \$4.84; Paris, bankers', 60 days, 5.20@5.19 $\frac{1}{2}$ ; sight, 5.17 $\frac{1}{4}$ @5.16 $\frac{1}{2}$ ; Antwerp, commercial, 60 days, 5.23 $\frac{1}{4}$ @5.22 $\frac{1}{4}$ ; Swiss, bankers', 60 days, 5.19 $\frac{1}{2}$ @5.18 $\frac{1}{4}$ ; sight, 5.16 $\frac{1}{4}$ @5.15 $\frac{1}{2}$ ; Reichsmarks (4), bankers', 60 days, 94 $\frac{1}{2}$ @94 $\frac{1}{4}$ ; sight, 95 $\frac{1}{4}$ @95 $\frac{1}{2}$ ; Guilders, bankers', 60 days, 40@40 $\frac{1}{4}$ ; sight, 40 $\frac{1}{4}$ @40 $\frac{1}{4}$ .

Paris dispatches quote exchange on London 25f. 29c.

The following shows the posted rates for prime bankers' sterling bills on London at 60 days and sight, cable transfers, and prime commercial sterling at 60 days, together with exchange on Paris on June 1, the changes in the rates as they occurred during the month, and the highest and lowest during the months of May and June:

|              | Bankers—<br>60 days. |  | Sight.             |      | Cable<br>Transfers. |      | Commercial.        |      | Paris—<br>60 days. |      | Sight.             |      |

GOVERNMENT BONDS have been strong in price, confirming our intimation of a month ago, that the tendency was toward higher prices for long term bonds.

The following table shows the closing bids for the principal issues of Government bonds on each day of the month of June, and the highest and lowest during the month:

|      | 3 per             | 5s. '81.          | 4 $\frac{1}{2}$ s. '91. | 4s. 1907.         | C'y 6s. |                       | 3 per             | 5s. '81.          | 4 $\frac{1}{2}$ s. '91. | 4s. 1907.         | C'y 6s. |
|------|-------------------|-------------------|-------------------------|-------------------|---------|-----------------------|-------------------|-------------------|-------------------------|-------------------|---------|
| June | cents.            | cont'd.           | coup.                   | coup.             | 1899.   | June                  | cents.            | cont'd.           | coup.                   | coup.             | 1899.   |
| 1    | 103 $\frac{1}{4}$ | 103               | 112 $\frac{1}{4}$ x     | 119 $\frac{1}{4}$ | 129x    | 18                    | 103 $\frac{1}{4}$ | 103 $\frac{1}{4}$ | 112 $\frac{1}{4}$       | 119 $\frac{1}{4}$ | 131     |

**RAILROAD AND MISCELLANEOUS STOCKS.**—The break in the Chicago produce market had an unfavorable influence on the price of stocks for the time being, but some change for the better has occurred since. A number of theories have been lately published to account for the dullness which has prevailed in the stock market for some time. The principal ones are, distrust of the large capitalists by the public; the increased competition to which old companies will be subjected in consequence of the formation of new railroad lines; and the great increase in the amount of stocks and bonds, many of them representing no visible property, that have been recently thrown upon the market.

The following table shows the highest, lowest, and closing prices of the most important railway and miscellaneous stocks at the New York Stock Exchange during the month of June:

| Companies.              | Highest. | Lowest. | Clos'g | Companies.             | Highest. | Lowest. | Clos'g. |

| <b>Total. ....</b>              | <b>\$357,993,800</b> | <b>\$357,228,750</b> | <b>\$356,588,600</b> | <b>\$356,551,500</b> |

**NEW YORK CITY BANKS.**—The average loans have been considerably increased of late. The reserve continues large and the condition is generally satisfactory. In the slight demand for money the temptation to loan money on unusual ventures is to be guarded against.

The following table shows the range of call loans, and rate on prime paper, for the past five weeks:

|                           | June. 2. | June 9. | June 16. | June 23. | June 30. |
|---------------------------|----------|---------|----------|----------|----------|
| Range of call loans ..... | 2@3½     | 2@3     | 2@3      | 2@3      | 2@3      |
| Rate of discount.....     | 4½@5     | 4@4½    | 4@4½     | 4@4½     | 4@4½     |

COINS AND BULLION.—Bar silver is quoted in London at 50 7-16d per ounce, and Mexican dollars at 49 3-16d per ounce.

The following are quotations in gold for other coins and bullion:

|                                         |              |                            |                 |
|-----------------------------------------|--------------|----------------------------|-----------------|
| Trade dollars.....                      | Unsettled    | English silver.....        | \$4 75 @ \$4 85 |
| New (412½ grains) dollars \$            | 99¾ @ \$1 00 | Five francs.....           | 98 @ 96         |
| American silver ½s & ¼s..               | 99¾ @ 1 00   | Victoria sovereigns.....   | 4 88 @ 4 90     |
| American Dimes.....                     | 99¾ @ 1 00   | Twenty francs.....         | 3 85 @ 3 90     |
| Mutilated U. S. silver coin,            |              | Twenty marks.....          | 4 74 @ 4 78     |
| per oz.....                             | 97½ @        | Spanish doubloons.....     | 15 50 @ 15 65   |

### LATEST QUOTATIONS AND OTHER INFORMATION.

The following tables give the latest quotations of stocks and bonds at the New York Stock Exchange. In the case of all but the New York bank stocks the highest and lowest actual prices of a year ago are also given, for comparison. The quotation tables on the following pages include *all securities listed at the Stock Exchange*.

### NEW YORK CITY BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The Capital and Surplus are as given in the latest official reports, viz.: the National banks June 22, as reported to the Comptroller of the Currency; the State banks, June 22, as reported to the State Banking Department. The Surplus includes the undivided profits on the dates given. The Banks which are not members of the New York Clearing-House Association are indicated by a (\*). Not listed at the Stock Exchange by a (†). This table includes all the Commercial banks of New York.

## BOSTON BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The following table gives the latest quotations of Bank Stocks in the Boston market. The Capital and Surplus given are from the last official report, June 22d, and all the banks are National. The surplus includes the undivided net profits. All the banks belong to the Clearing-House, except Bunker Hill, First Ward, Mechanics', National Market of Brighton, People's, and Rockland, which are located out of the city proper, but within city limits, and they clear through other banks.

**Condition of the Boston Banks.**—The following is the statement of the Boston National Banks as returned at the Clearing-House on Monday, July 2:—Capital, \$50,300,000; loans, \$144,317,800; increase, \$435,000; specie, \$4,999,200; increase, \$66,800; legal-tender notes, \$4,882,900; increase, \$482,900; 5 per cent. fund, \$1,483,200; increase, \$2,400; due from reserve agents, \$10,903,800; decrease, \$1,367,600; due from other banks, \$11,422,700; decrease, \$648,900; due to other banks, \$27,508,100; decrease, \$726,400; deposits, \$60,165,600; increase, \$108,400; circulation, \$23,916,400; decrease, \$158,400; excess of reserve, \$1,304,828.

## DAILY RECORD OF FINANCIAL EVENTS.

JUNE, 1883.

1. **FRIDAY**.—Reduction in the public debt in May, \$4,800,477; since June 30, 1882, \$119,725,052.

The stockholders of the New Jersey Central Railroad ratified the lease of the road to the Philadelphia & Reading.

2. **SATURDAY**.—Discount on prime commercial paper in New York,  $4\frac{1}{2}$  per cent.; call loans,  $2\frac{1}{4}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{2}$  per cent. and trade bills,  $3\frac{3}{4}$  per cent.

4. **MONDAY**.—The German Reichstag approved a treaty of commerce with Italy.

Annual election at the New York Produce Exchange, the New York Cotton Exchange, and the New York Metal Exchange.

The New York, West Shore and Buffalo Railroad opened to Newburgh.

7. **THURSDAY**.—The Executive Council of the American Bankers' Association appointed the next annual convention for Louisville on October 9 and 10.

9. **SATURDAY**.—Discount on prime commercial paper in New York,  $4\frac{1}{2}$  per cent.; call loans,  $3\frac{1}{2}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{2}$  per cent., and trade bills  $3\frac{3}{4}$  per cent.

11. **MONDAY**.—Annual election at the New York Mining Stock and Petroleum Exchange; C. O. Morris chosen President.

12. **TUESDAY**.—The session of the German Reichstag closed.

14. **THURSDAY**.—The Star Route trial ended in the acquittal of the accused.

16. **SATURDAY**.—Discount on prime commercial paper in New York,  $4\frac{1}{2}$  per cent.; call loans,  $2\frac{1}{4}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{2}$  per cent.; trade bills,  $3\frac{3}{4}$  per cent.

McGeoch, Everingham & Co., and other firms of Chicago, failed owing to the collapse of a corner in lard and provisions, causing a panic in the Board of Trade.

20. **WEDNESDAY**.—Two more Chicago commission houses failed.

22. **FRIDAY**.—A bill to incorporate the Cape Cod Ship Canal Company passed the Massachusetts Legislature.

A serious difficulty between China and France adjusted.

23. **SATURDAY**.—Discount on prime commercial paper in New York,  $4\frac{1}{2}$  per cent.; call loans,  $2\frac{1}{4}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{2}$  per cent.; trade bills,  $3\frac{3}{4}$  per cent.

Destructive floods are reported along the Mississippi in Illinois and Missouri.

25. **MONDAY**.—The trade mark treaty with Italy confirmed there by royal decree.

27. **WEDNESDAY**.—The appearance of cholera causes a panic in Egypt.

28. **THURSDAY**.—The arrival of "assisted" immigrants from Ireland becomes a subject of controversy.

29. **FRIDAY**.—A general agreement to refuse the trade dollar caused the price to drop to 85 to 90 cents.

30. **SATURDAY**.—Discount on commercial paper in New York,  $4\frac{1}{2}$  per cent.; call loans,  $3\frac{1}{4}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{2}$  per cent., and trade bills  $3\frac{3}{4}$  per cent.

VOLUME XI. }

AUGUST, 1883.

No. 8.

---

**A**N effort is to be made, it is said, to have the tax on national bank circulation abolished at the next session of Congress, and a paper on the subject has been prepared by a well-known banker of New York. There is no room for dispute regarding the fact that under the present conditions the profits derived by the banks from circulation are not large enough to induce them to keep up the normal amount, much less to increase it proportionally to the increase of the banking requirements of the country. But, notwithstanding this, there is room for doubt as to the expediency of the agitation for the repeal of the tax. Even if it were successful, that would not save the national banking system from extinction so long as it is founded upon a national debt which is rapidly disappearing. If some other kind of security was substituted for the redeemed Government bonds as a basis for circulation, a kind paying a fair rate of interest, then there would not be the same necessity for the abolition of the tax. In the paper referred to, it seems to be claimed that a tax on bank circulation in ordinary times is improper, but we doubt if the people or Congress can be convinced of this. The Comptroller's statement for August 1, however, shows that the circulation decreased during the past twelve months nearly \$3,000,000. As a temporary expedient, to keep the amount from decreasing still further and more largely, it might be good policy to reduce this tax one-half. But it would be wiser for those who are interested in the system to expend their efforts on formulating and popularizing some method of making the system permanent, instead of merely on the item of tax repeal, which would provoke the antagonism of many who cast wicked glances at the banks—the result of ignorance mainly—but a forceful opposition all the same. Better commence at the bottom and build, rather than expend effort in repairing (exposed) defects in the structure here and there.

IT IS SELDOM that a month passes without some instance of munificence on the part of some banking man coming to light. In our last number we had the pleasure to record the fact that Mr. George Ball, of the firm of Ball, Hutchings & Co., of Galveston, Texas, had presented to that city a sum of \$50,000 for the purpose of erecting a high school there; and also that Mr. R. W. Donnell, of the firm of Donnell, Lawson & Simpson, of New York, had offered a piece of property valued at \$100,000 to the city of St. Joseph, Mo., for an educational institution. We have this month again to notice an instance of rare and openhanded generosity, in the gift of a handsome library building to the city of Baltimore, together with a check for \$833,333.33 to be invested in city bonds for the support of the institution. The donor is Mr. Enoch Pratt, President of the National Farmers and Planters' Bank of Baltimore. In connection with this the public-spirited act of Mr. Joseph H. Oglesby, President of the Louisiana National Bank, in advancing the sum of \$70,000 to pay the July interest on the bonds of the City of New Orleans, on his own responsibility, and to save the honor of the city, must not be passed by without commendation. These noble examples do honor to the banking profession, and tend to elevate it in the public estimation to a point even higher than it has occupied hitherto.

---

A CONSIDERABLE part of the present number is given to the recent address of the Right Hon. George J. Goschen, before the London Institute of Bankers, on the subject of the effect in reducing prices of the absorption of gold by nations resuming specie payments, and substituting gold for silver. This has been done because of the intrinsic value of the article and the wide discussion which it has caused, as well as the eminence of the author as a banker, economist and statesman. Mr. Goschen presents statistics showing how prices of merchandise generally fell from 5 to 20 per cent. during the decade 1870 to 1880, and argues that it was the result of the absorption of about \$1,000,000,000 of gold by Germany, the United States and Italy during that period. It must be said that most of the authorities that have come under our notice disagree with Mr. Goschen, in the main, but part of their opposition may be attributable to the fact that his arguments tend somewhat toward bi-metallism. The chief points upon which the address have been criticised are, (1) that the amount of gold absorbed is overstated by \$300,000,000 or more, and (2) that the decrease in prices was not synchronous with the absorption. It is shown, for instance, that prices fell steadily from 1873 to 1879, but that they have risen since; but the resumption of specie payments in this country only began in the latter year, and in Italy only a few months since, so that, to bear out Mr. Goschen's theory, prices should have been steadily falling instead of rising within the last four years. It is not denied that

the cause named by Mr. Goschen is partly responsible for the decrease in prices, but it is held by his opponents that he has exaggerated its importance. The subject is a deep one, and well worthy of the attention it is receiving.

---

NOTHING is more discouraging to the observer of financial affairs than the cool and sober way in which the most erroneous assertions, or the grossest absurdities relating to such matters, are occasionally printed by respectable papers and, being uncontradicted, are taken up and repeated by thoughtless people until they gain a currency which it is difficult or impossible to stop. It should be understood that in saying this, we wish to assume none of the air of infallibility or omniscience that is fashionable in a certain class of papers, for the kind of errors and absurdities referred to belong to the mere elementary part of finance and can be readily corrected by any intelligent person who will take the trouble to think for himself. By way of illustration let us take the familiar dictum that to take the tax off matches, or tobacco, or whatnot will be no use to the consumer: it will only put money into the pockets of the manufacturers, and be a sheer loss to the Government. It is idle to attempt to guess how many times this saying has been repeated in some form by writers on the subject, but very likely one-half of the articles that have been written in late years on tax reduction have embodied it in some shape. Now, it is almost too simple a question to argue about, but it may be said that each necessary expense that is regularly incurred in producing an article of commerce must affect, in some degree, the selling price. This is especially true where there is free competition. Whether this rule has proved true in common experience must be left at present for the reader to judge. We must be satisfied with denying for once the assertion so freely and often put in print.

---

THIS reflection was prompted by the following sentences in an article published by a somewhat venerable and highly respectable periodical contemporary: "Nothing pleases the witless demagogues of this country better, and nothing serves their purpose better, than a catch-phrase. It was under the cry of 'a free breakfast table' that they threw away \$20,000,000 of revenue from taxes on tea and coffee, without any reduction in the cost of those articles to the consumer." Now, what is said about the "catch-phrase" may be perfectly just, but it is too bad to see it backed up with so stale a fallacy. Urged by curiosity we have taken the trouble in this case to see how far the facts bear out the statement that the repeal of the duties on tea and coffee was followed by no reduction to the consumer. The following table shows the prices of coffee and tea in the New York market at the beginning of January, 1882, before the repeal, and January, 1883, after the re-

peal, and also near the end of 1882, together with the price of gold at these various dates:

| Articles.             | Jan. 1878. | Jan. 1873. | Dec. 1882. |
|-----------------------|------------|------------|------------|
| Gold.....             | 108½@110½  | 111½@114½  | 100        |
| Coffee, Rio.....      | 21¼@21½    | 18@18½     | 8¼@9¼      |
| " San Domingo.....    | 18½@14     | 18½@18¾    | 5¼@6¼      |
| " Java.....           | 23@24½     | 18¾@20     | 15@17      |
| Tea, Young Hyson..... | 40@55      | 50@65      | *9@33      |
| " Oolong, fine.....   | 60@75      | 41@52      | *12@31     |
| " Souehong, fine..... | 60@75      | 40@55      | *10@25     |

Of course the prices are affected by numerous factors beside the rate of taxation, but, so far as we can find, the assertion is based on no traceable fact. In four of the six instances shown (which are all that the report of the Bureau of Statistics for 1873 gives of the articles in question) there was a decided and rapid decrease in the prices, notwithstanding a rise in the price of gold. So that the statement quoted seems to be as much opposed to fact as to common sense.

---

CURIOSLY enough, some of our Canadian contemporaries seem to be considerably exercised on a subject involving the United States greenback currency. The Toronto "World," a daily paper, has, it seems, undertaken a crusade in favor of a currency similar to United States legal-tenders. It says: "American greenbacks are supplanting our own Canadian bank bills right in our own country. \* \* \* British Columbia bank notes, and the notes of banks in the Maritime Provinces are 'shaved' from 3 to 10 per cent. when offered out of the Provinces. So are the French Canadian bank notes. The result of all of which is that when a man travels from one Province to another, if he is wise, instead of taking Canadian bank bills he provides himself with United States notes. The American greenback is becoming the most cosmopolitan of money. It is good for a dollar any place. A Canadian note is suspected in its own country and dishonored outside of it. \* \* \* We want a Canadian note, issued by the Government, that will be good all over the Dominion, and, what is more, outside of it."

---

IN reply to this one of the weekly financial papers, the Montreal "Shareholder," says that there is a good deal of feeling afloat in Western Ontario in favor of the greenback policy, but that the leading banks in its part of the Dominion regard the presence of United States greenbacks in Montreal as absolutely unimportant. A Toronto financial weekly, however, treats the question with much acerbity. It doubts that the use of greenbacks is on the increase there, and says: "So long as our banks decline to receive these bills on deposit, and thus practically redeem them, such bills cannot possibly obtain any

---

\* Fair to fine.

considerable circulation in Canada. As to these bills being better than the bills of our own banks, it is an absurdity. Greenbacks have only been issued for about twenty years, and during three-quarters of the time they were worth less than one hundred cents on the dollar. \* \* Such bills were worth less than forty cents on the dollar, and it took more than fifteen years of terrible monetary perturbation to bring them up to their face value. To compare such a bill as that with our bank notes, which are a first lien on all the assets of the banks, is a trifle too ridiculous."

---

THE assertions here made about the greenbacks may be absolutely correct, but it is nevertheless rather galling to see a security of our Government treated with such scorn at a time when the national credit is superior to that of every other country but one, and is unexcelled by that. But there are reasons against the issue of a national currency, that are not to be overcome by the almost solitary instance of good fortune of the United States in bringing the greenbacks to par with a good reserve of coin to sustain them. But the difficulty and expense arising from the use of bank bills in the Provinces may be overcome in another way. Even if the greenbacks were wiped out here, we would still have a sound paper currency which passes at par in every State in the Union. The national banking system, which is formed on a similar basis to the Bank of England and the other great national banks of the world, differing from them principally in the fact that under it there is no monopoly of banking privileges, affords the very elements now lacking in the Canadian bank bills. It would bring the issuing banks under more direct supervision of the Government, and would supply a currency that would circulate freely at par throughout the Provinces. The latter is a desideratum not to be underrated.

---

THE resolution of the New York Commercial Exchange against the trade dollar seems to have set a stone to rolling that was already on the brink. Otherwise the movement would not have been so general or so sudden. However, as it is certain that the coin is condemned, the question now is, what shall be done with it. It is reported that Secretary Folger will recommend to Congress that the coins be purchased by the Government at their bullion value. The holders would doubtless be very thankful to the Secretary for taking such action, especially in view of the fact that the Government is already buying silver bullion at its market value at the rate of \$2,000,000 a month! The Philadelphia Commercial Exchange and Produce Exchange have each passed resolutions calling upon Congress to either redeem the coins at par or else make them a legal-tender. Some officials in high position in the Treasury Department take the ground that this would be only

just. We doubt if Secretary Folger will make the recommendation mentioned. He will probably prefer to leave the matter to Congress, which is responsible for the crime or blunder of issuing these discredited coins.

---

THE New York press is nearly unanimous in insisting that the Government is not responsible. The papers say that the trade dollars were coined solely for use abroad, and some of them are even feeling their way toward proclaiming the assertion that they were only declared to be a legal-tender by a "clerical error." There is very little doubt that it was an "error," but so the majority of people (in the East, at least) claim is the present coinage of standard dollars. It will not do, though, for the Government to repudiate its obligations on such childish pretexts. Unfortunately for the assertions of our contemporaries, the statute books of the United States lend no color of probability to them. There is nothing in the acts authorizing the trade dollar, to the effect that it was to be used only in the foreign trade. It was simply declared to be one of the coins of the United States and a legal-tender, as follows (Act of February 12, 1873. Sec. 15); "That the silver coins of the United States shall be a trade dollar, a half-dollar \* \* \*" etc. "And said coins shall be a legal-tender at their nominal value for any amount not exceeding five dollars in any one payment." This act remained in force until 1876, and some time after the trade dollars were at a discount, when Congress deprived them of the legal-tender quality. There are few if any of the States which refuse to pay their debts that have not as good an excuse for their acts as the Government has for repudiating this coin. If this is done, the next thing in order will be the repudiation of the standard dollar.

---

IN spite of the many warnings from the newspapers to the Secretary of the Treasury of the danger of impairing his reserve, it was evident for some time past that he would have soon to issue another call for bonds, in order to prevent an over-accumulation of funds in the Treasury. The call of July 26, being the 121st, includes the whole of the bonds extended at 3 1-2 per cent. now outstanding, which on July 1 amounted to \$32,082,600. Of these the national banks had on deposit with the Treasurer to secure circulation \$7,402,800 and to secure public moneys in public depositories \$255,000, making a total of \$7,657,800. Interest ceases on these bonds on November 1 next, so that the banks will either have to replace them with others or else relinquish a proportional amount of circulation. After that time the only bonds subject to call and redemption will be the three per cents amounting to 305 million dollars, of which the banks hold 201 millions to secure circulation and 8 3-4 millions to secure public deposits. Of course, the debt will not be reduced so rapidly as heretofore, but it is evident

from these figures that there must be a shrinkage in the national bank circulation soon, unless some new means be provided for its preservation.

---

THE secret underlying the recent speculative movement in Confederate bonds seems to have at last come to light. The London "Daily News" says that a number of holders of the bonds have subscribed £10,000 to be used for the purpose of inducing the Southern States to recognize a portion of their debt, and that Lord Penzance, Messrs. J. E. Gorst and the Hon. T. C. Bruce, members of Parliament, and Messrs. J. B. Martin and Robert Stewart have been appointed trustees of the fund. Other accounts state that opinions of lawyers have been obtained to the effect that the fourteenth amendment to the United States Constitution, declaring that neither the Government or any States shall pay any debt incurred in the aid of any insurrection against the United States, is unconstitutional and can be set aside. A part of the plan is said to be the moral suasion that will be brought to bear against the Southern States by injuring their credit in Europe, unless they agree to compromise with the bondholders. The whole scheme looks like a trick to induce ill-informed people to purchase bonds from the syndicate at a profit to it. Some decent men may have been induced to lend their names to aid the project, but it has every appearance of being a concoction by shrewd rogues. Our English friends may rest assured that the holders of Fenian bonds have as much chance of being paid by England as the holders of Confederate bonds have of being paid by the United States or any of them.

---

THE statistics collected by the "Railway Age" show that during the first half of 1883 there were 2,509 miles of new railway constructed, counting main lines only. The reports include 114 different lines in 35 States and Territories. California reports the greatest increase in mileage, with 200 miles, laid chiefly on the extension of the Southern Pacific to the Colorado. Montana comes next, with 196 miles, all upon the Northern Pacific line. New York follows, with 193 miles, largely laid on the New York, West Shore and Buffalo; Pennsylvania, with 186; Utah, 156; Arizona, 120; Idaho, 122; and Ohio, 110 miles. The record for the first half of 1882 showed 4,990 miles of new track laid—a difference which sufficiently accounts for the comparative dullness in many departments of business. Last spring, however, was very backward, and not nearly so favorable for construction as the previous one, and besides, railway promoters are looking ahead more carefully than heretofore. It is estimated that the total this year will be about 8,000 miles, against nearly 12,000 last year. The track laid so far this year, estimated at \$25,000 a mile, has cost \$62,500,000.

## THE NATIONAL BANKS.

The accompanying tables will be found to contain some interesting information regarding the present condition of the national banks, and the data here brought together may be also useful to indicate the future of the system. It will be seen, in the first place, that the number of banks was increased between March 13 and May 1, 1883, by 32, and between May 19, 1882, and May 1, 1883, by 152. The aggregate capital increased in round numbers from 490 1-2 millions to 493 3-4 millions between March 13 and May 1, the exact difference being \$3,516,137. During the year ended the first of last May the aggregate capital of the national banks increased some 20 millions of dollars, and the surplus 8 1-2 millions. These figures are very gratifying as showing that the decrease of interest on the Government bonds, and the consequent decreased profit on circulation, have not resulted so far in a disposition on the part of the banks to relinquish the national system, which has proved so beneficial to the country. As regards the number of banks and the amount of capital invested, the national banks were never before so strong, and the surplus was never so large.

The tables do not show in what parts of the country the increase in the national banks is most pronounced. But it may be mentioned that it was most marked in the Trans-Mississippi States and Territories, where the increase between March 13 and May 1 last was 11 banks. The increase was large proportionally in the Southern States, being 5 banks; in the States north of the Ohio it was 7 banks; in the Middle States, the same; and in the New England States only 2.

Perhaps, however, the causes above-mentioned, which have been for some time operating against the national bank system, might be expected to have a special effect on the amount of bank circulation. During the spring of 1882 there was a reduction of some 9 million dollars, but during the year ended May 1 last there was a very slight change in the outstanding circulation.

During the period covered by the last two statements there was a slight increase, but it is a noticeable fact that the circulation has not kept pace with the increase in the number of banks or in the aggregate capital. In this respect the banks in the reserve cities follow the same tendency which has been frequently noticed heretofore. They are gradually relinquishing their circulation, while the other banks are holding theirs or else increasing it.

The other items shown in the tables may be compared with profit,

| Mar. 18, '85  | May 1, 1885   | June 22, 1885 |
|---------------|---------------|---------------|

by those who are interested in the subject. The balance of silver coin on hand in the banks was very nearly the same on May 1, 1883, as on December 30, 1882, but the use of silver certificates seems to be gradually increasing. This tendency should be withstood, but it is hard to see how it is to be done if the silver coinage is continued.

### THE LAST FISCAL YEAR.

The close of the Treasury fiscal year on June 30 is an appropriate time to look back over the operations of the Treasury for the year, and note the changes that have occurred in the Government finances.

The item that is generally looked for with most interest is the amount of the reduction in the debt. This was as follows :

|                                                         |                 |
|---------------------------------------------------------|-----------------|
| Total debt less cash in the Treasury, July 1, 1882..... | \$1,688,914,460 |
| “ “ “ “ “ “ July 1, 1883.....                           | 1,551,091,207   |

Decrease during the fiscal year..... \$137,823,253

The amounts of total debt given above include interest accrued at the debt mentioned. The decrease in the debt, less cash in the Treasury in the previous fiscal year, ending June 30, 1882, was \$151,-684,351.

The change in the amount of interest-bearing debt was as follows :

|                                                |                 |
|------------------------------------------------|-----------------|
| Total interest-bearing debt, July 1, 1882..... | \$1,463,810,400 |
| “ “ “ “ “ “ July 1, 1883 .....                 | 1,338,229,150   |

Decrease in the fiscal year..... \$125,581,250

It may be noticed that the reduction in the total debt, less cash in the Treasury, was over 12 million dollars greater than the decrease in interest-bearing debt. This difference is accounted for by the fact that the amount of debt on which interest ceased since maturity was less than 8 million dollars on June 30 last, against 16 1-4 million dollars on June 30, 1882, and that there are lesser differences in some other items.

The following will show the source and amount of the revenue for the past two fiscal years, and also the estimate of the Secretary of the Treasury for the last year:

|                       | 1882.         |      | *1883.        |      | 1883, Estimated. |
|-----------------------|---------------|------|---------------|------|------------------|
| Customs.....          | \$220,410,730 | .... | \$213,534,240 | .... | \$235,000,000    |
| Internal revenue..... | 146,497,595   | .... | 144,330,361   | .... | 145,000,000      |
| Other sources.....    | 36,616,925    | .... | 40,453,829    | .... | 35,000,000       |
| Total receipts.....   | \$403,525,250 | .... | \$398,318,530 | .... | \$415,000,000    |

This shows that while the internal revenue receipts were only 2 millions less than in the previous year, the customs receipts fell off 7

\* These figures are subject to slight correction when the official statements are published.

millions. The estimate made by Secretary Folger in his last annual report is given above for the sake of showing how near he came to the actual figures. He was aided in making his estimate by having the actual receipts for the first quarter of the fiscal year at hand. It will be seen that the customs receipts were estimated at 14 1-2 millions more than the previous year, whereas the actual returns were about 7 millions less.

No reason was given in the report for supposing that the receipts would be larger than those of the previous year. It is not customary with Secretaries of the Treasury to be so particular, and, in fact, there is very little encouragement for them to be so. Congress in making appropriations generally follows its own sweet will, or regards the exigencies of partisan politics, while ignoring the estimates or recommendations of the Secretary. These remarks are suggested by the fact that a number of financial authorities took occasion during the time that the appropriations were pending at the last session, to compare the custom obtaining in this country with that of Great Britain. It is well known that there the estimates of income and expenditure are prepared with great care by the Chancellor of the Exchequer and submitted to Parliament. It is expected that Parliament will accept the budget proposed by the "Government," and if they disagree materially with the proposal, the cabinet is likely to resign. An illustration of how closely the fate of the cabinet depends upon the budget is offered by an item of news just arrived from London. In the House of Commons a conservative member having moved a resolution expressing regret that part of the cost of the Egyptian war had been charged to India, Mr. Gladstone said that if the motion was adopted the Government would resign.

There is little doubt that the strict accountability for every item of expenditure and of taxation which forms part of this system, compares very favorably with the system (or lack of system) which the abundance of revenue makes possible and even renders tolerable in this country. But it is easy to see that the difference between the two cases are constitutional, and our system can in no wise be made to assimilate to the other by merely giving the heads of departments a seat in Congress.

To return to our direct subject: the expenditures for the last two fiscal years, and the Treasury estimate for the last year were as follows:

|                 | 1882.         |      | 1883.         |      | 1883, Estimated. |
|-----------------|---------------|------|---------------|------|------------------|
| Ordinary .....  | \$125,569,038 | .... | \$140,428,361 | .... | \$135,500,500    |
| Interest .....  | 71,077,207    | .... | 59,084,692    | .... | 59,500,000       |
| Pensions .... . | 61,245,194    | .... | 66,075,034    | .... | 100,000,000      |
| Total .....     | \$257,981,439 | .... | \$265,588,087 | .... | \$295,000,000    |

The above shows that the estimates were approximately correct, excepting for the item of pensions, which is the financial puzzle of the

day. The Commissioner cannot now estimate the amount for the current year. All the accounts received describe the matter as depending upon the ability of the Bureau to dispose of claims. No estimate seems to have ever been made as to the number of living persons who are entitled to pensions. In the course of time the census will probably settle the matter, for at the present rate of increase the pensioners will soon embrace the whole population.

A grave financial writer argues earnestly against a reduction of taxes on the ground that the public is in favor of granting pensions, and that if the survivors of the Mexican war are pensioned there is no knowing what the expenses of the Government will be. It is just this reckless throwing around of the public money by demagogues that prompts us to urge a lopping off of superfluous taxes. Should we believe all that our political speech-makers and their supporters of the press say, we should think that high taxes and gross extravagance were the sources of our prosperity, and the bulwarks of our institutions.

We come now to consider briefly the condition of the Treasury, as regards the condition of its assets. In the first place, the cash balance available on July 1 was \$151,118,346, against \$140,604,474, on July 1, 1882, so that, the amount of legal-tenders being the same, the Treasury was stronger by over 10 millions on July 1 than it was a year ago. The following shows the amount of gold coin and bullion at the beginning and the end of the fiscal year, the amount of gold certificates outstanding, and the difference which represents the amount of gold belonging to the Government at the respective dates:

|                                    | July 1, 1882. | July 1, 1883. |
|------------------------------------|---------------|---------------|
| Gold coin .....                    | \$91,964,508  | \$141,824,496 |
| Gold bullion.....                  | 56,541,886    | 56,254,072    |
| Total .....                        | \$148,506,394 | \$198,078,568 |
| Gold certificates outstanding..... | 5,029,020     | 59,807,870    |
| Difference .....                   | \$143,477,369 | \$138,271,198 |

A nearly similar table will show the same items as regards silver and silver certificates:

|                                       | July 1, 1882. | July 1, 1883. |
|---------------------------------------|---------------|---------------|
| Standard silver dollars.....          | \$27,153,816  | \$111,914,019 |
| Silver certificates outstanding ..... | 54,506,090    | 72,620,686    |
| Difference.....                       | \$32,647,726  | \$39,293,333  |
| Silver bullion.....                   | 3,220,906     | 4,482,216     |
| Total . .....                         | \$35,878,634  | \$43,775,549  |

It is not very assuring to find that, in spite of an overflowing treasury, the gold balance decreased over 5 millions while the silver increased nearly 8 millions. The amount of standard dollars owned by the Government has steadily increased of late, and even if they were not increasing, the policy of continuing the coinage would be just as suicidal as it now is. The above figures give point to all the arguments that have been urged against it, and is a warning to the people against forever playing into the hands of egotists who would burn down the edifice of our prosperity for the sake of cooking their own eggs.

## \* THE APPRECIATION OF GOLD.

### THE PROBABLE RESULTS OF AN INCREASE IN ITS PURCHASING POWER.

I would wish to be permitted to vary the title of the address which I am about to deliver, and to head it, "On the probable results of an increase in the purchasing power of Gold," rather than use the more technical term, "The Appreciation of Gold." What I wish to address you on is the probable results of such an increased purchasing power. I had hoped to be able at once to approach the subject of such results, assuming, more or less, that fall in the price of commodities which is practically synonymous with the increase of the purchasing power of gold; but I have found, within the last few days, that the question of the fall in prices is, to some extent, still in dispute. Therefore I think it necessary to prepare the ground somewhat in this respect, and to enter—though I hope not at any great length—into the question as to whether prices of commodities have, or have not, generally fallen during the past ten years. To me it appears that we have a striking phenomenon before us. On the one hand, I do not think any of you will be ignorant of the fact of the withdrawal of an immense amount of gold, which, under ordinary circumstances, would have passed into the currency of the gold-using countries, and of its application to what I may practically call a new purpose, namely, the supply of a new gold currency to Germany, Italy, and the United States. If you take the amount of gold currency which has been absorbed within the last ten years by these three countries, you will arrive at the stupendous sum of about £200,000,000. Germany required £84,000,000, Italy required £16,000,000, and the United States have taken more than £100,000,000. Holland has also taken a certain amount. On the other hand, a certain portion of German gold may have been re-exported, to supply the sum that ultimately went to America. Therefore I will not take a higher sum than £200,000,000. But we have this phenomenon before us—that £200,000,000 of gold has been applied to purposes for which, ten years ago or fourteen years ago, it was not necessary to apply it.

I next have to ask from what annual supply of gold this extraor-

---

\* This valuable paper, being an address delivered by the Right Hon. George J. Goschen, M. P., before the Institute of Bankers of London, Eng., has attracted such wide notice and discussion in this country as well as abroad that we have decided to present it to our readers in full as delivered. It has probably not been published in complete form in the United States heretofore.

dinary demand had to be met? Now, many of you may be aware that there has been a falling off in the annual supply of gold, and that while in 1852—the first year after the gold discoveries—the amount of gold produced was £36,000,000, it is now about £20,000,000 per annum. I think it may be well to give these facts in a quinquennial statement. The total production from 1852 to 1856—in those five years—was, in round numbers, £150,000,000, giving an annual average of £30,000,000. In the next quinquennial period, from 1857 to 1861, the total production was £123,200,000, giving an annual average of £24,600,000. Between 1862 and 1866 the total amount produced was £114,000,000, and the annual average £22,750,000. Between 1867 and 1871 the total production was about £109,000,000 with an annual average of £21,753,000; and in the years between 1871 and 1875 the total production was £77,000,000, and the annual average £19,200,000. The annual average therefore fell in the years from 1871 to 1875 to £19,200,000 as compared with very nearly £30,000,000 in the years from 1852 to 1856. Thus you will observe that we have had an extraordinary and additional demand of £200,000,000 sterling coming upon an annual supply of £20,000,000 sterling. The consequence is that this extraordinary demand has practically absorbed the total supply of gold for ten years.

But it is not sufficient to state that the total supply of gold available for the needs of circulation in the gold-using countries of Europe has been absorbed. This additional and extraordinary demand falls upon a supply of £20,000,000 which has to furnish the wear and tear of the coinage and the total amount used for the purposes of art and manufacture besides the purposes of circulation. Now, there are various estimates of the amount of gold annually used in arts and manufactures. Monsieur Lavaleye, a very eminent authority, accepts an estimate of 250,000,000 francs, or £10,000,000 sterling, as the amount annually consumed for such purposes.\* If we take the figure of £10,000,000, as required for arts and manufactures, and for all purposes other than circulation, and subtract that sum from the £20,000,000 of annual supply, it leaves for the purposes of circulation £10,000,000 only, and on this hypothesis the extraordinary demand of £200,000,000 would absorb the available yield, not of ten years but of twenty years. Twenty years' ordinary supply of gold for circulation would have been absorbed by this extraordinary demand!

Economists will accordingly ask themselves what result, if any, is such a phenomenon likely to have produced? I think there is scarcely an economist but would answer at once—"It is probable, it is almost necessary, it is according to the laws and the principles of currency, that such a phenomenon must be followed by a fall in the prices of commodities generally. Just as a large amount of gold, poured

---

\* *Vide Lavaleye's "International Bi-metallism,"* page 64.

into Europe in 1852 and subsequent years, created a rise in prices, so the counter-phenomenon must produce a fall."

Let us now turn to the other side of the question, and forgetting for the moment, and setting aside what I have mentioned, *viz.*, the question of the pressure upon the total supply of gold, let us examine the range of prices of commodities, and see whether or not it is a fact that there has been a great fall. I daresay, that you are accustomed to be troubled very often with statistics in this room, so that I make no apology for reading some figures to you. But I do not profess to have examined this question as a statistician, or to deal with it statistically; it is rather with the results I am anxious to deal. For the figures I am about to place before you I am indebted mainly to Mr. Giffen of the Board of Trade. I have examined the prices of commodities, as published by the Board of Trade, but I have also consulted other sources. I have here a classification of articles under certain heads showing prices in the years 1873 and 1883 respectively:

|                                     | 1873.                 | 1883.               |
|-------------------------------------|-----------------------|---------------------|
| Sugar—Brown Manilla.....            | 16s. 6d. per cwt.     | 12s. per cwt.       |
| Good and fine West Indian... ..     | 20s. per cwt.         | 20s. per cwt.       |
| Tea—Sound Common Congou.....        | 11½d. per lb.         | 5d. to 5½d. per lb. |
| Coffee—Middling Plantation Ceylon.. | 8½s. per cwt.         | 70s. per cwt.       |
| Cocoa—Guayaquil.....                | 50s. to 60s. per cwt. | 50s. per cwt.       |

Cocoa has not fallen in price, but with that exception you will see that the articles of a "Free Breakfast Table," *viz.*, sugar, tea, and coffee, show not only a fall, but a very great fall, in price. But let me continue:—

|                   | 1873.            | 1883.          |
|-------------------|------------------|----------------|
| Wheat.....        | £2 16d. per qr.  | £2 6d. per qr. |
| Rice—Rangoon..... | 9s. 6d. per cwt. | 7s. per cwt.   |
| Pepper.....       | 7d. per lb.      | 5½d. per lb.   |

#### METALS.

|                      |                   |                   |
|----------------------|-------------------|-------------------|
| Iron—Scotch Pig..... | £8 7s. per ton.   | £2 9s. per ton.   |
| Lead—English.....    | £21 10s. per ton. | £13 15s. per ton. |
| Copper.....          | £91 per ton.      | £65 per ton.      |
| Tin—Foreign.....     | £142 per ton.     | £93 per ton.      |

#### OTHER RAW MATERIALS.

|                                      |                            |                             |
|--------------------------------------|----------------------------|-----------------------------|
| Wool—English Sheep's, half }         | 2s. 3d. per lb.            | 10½d. per lb.               |
| Hog, half Wether }                   |                            |                             |

I am bound to say it appears to me that these figures reveal an extraordinary state of things. I will now mention some articles which have not fallen. I am not quite clear about tobacco, but it appears to me, so far as I can judge, that the common sorts have fallen somewhat, while the better sorts have risen. With regard to spirits, they have not risen, and beer has not risen. It is a very curious coincidence that while tea, coffee, and sugar have fallen so materially, what we may call the luxuries of the working man—tobacco, spirits, and beer—have not fallen, or, at all events, not in the same proportion. I would also mention the question of meat, but before I do that I should like to make one general remark upon the table I have read, and it is to the following effect: You may, and you probably have, while I have been reading these figures, as I approached the particular business of many of those who are here, been able to say, "Oh! the fall of such and such an article is accounted for by totally different circumstances than the rise in the price of gold." That is perfectly true. There may have been increased crops of cotton, there may have been increased crops in the case of many of these articles; but the extraordinary fact remains that the fall has run through so many of them. I have not yet exhausted the list I have to submit to you, but in the case of the following articles I have only the figures up to the year 1881:

|                                       | 1873. |    |    |      | 1881. |    |    |  |
|---------------------------------------|-------|----|----|------|-------|----|----|--|
|                                       | £     | s. | d. | .... | £     | s. | d. |  |
| Paper for writing and printing.....   | 3     | 0  | 9  | .... | 1     | 16 | 3  |  |
| Silk, per lb.....                     | 1     | 1  | 0  | .... | 0     | 17 | 0  |  |
| Timber, per load, hewn.....           | 3     | 5  | 0  | .... | 2     | 12 | 0  |  |
| Staves, per load, hewn.....           | 10    | 0  | 0  | .... | 5     | 0  | 0  |  |
| Mahogany, per load, hewn.....         | 11    | 12 | 0  | .... | 9     | 5  | 0  |  |
| Railway carriages.....                | 111   | 10 | 0  | .... | 85    | 0  | 0  |  |
| Boots and shoes, per dozen pairs..... | 3     | 4  | 9  | .... | 2     | 17 | 2  |  |

I may add that linen has fallen and soap has fallen, and now I think I may reassure my audience by saying that I have done with statistics for the rest of my speech. I fear I have given you them in rather full measure, but my object was to place before you, if you have not seen it in an aggregate form, the great fall which ranges over almost all articles. Just now I touched on the suggestion that there were extraordinary reasons to account for the fall in many cases. In the same way it is true that there is an exceptional reason for the very high price of meat. I mentioned in a previous speech on this subject that the ravages in our flocks and herds through diseases of various characters, have so exhausted the stock in this country that the price of meat, has, as everybody is aware, remained exceedingly high. But I am not going through the various articles to examine the causes which may in special cases have produced or retarded a fall in price. I shall simply make some observations presently upon several general causes.

But first let me deal with a question that has been put to me, *viz.*,

this—"Is anyone the better for this fall in prices? Is it not a mere question for statisticians? Can any individual—a rich man or a poor man—buy more now with a number of sovereigns which he owns, than he could ten years ago?" People are likely to say that this is a much more practical way of approaching the question than to look at the mere figures. Then let us look at it in that way. Take the case of the poor man. I think it is clear he can buy his tea cheaper, he can buy his coffee cheaper, he can buy his bread cheaper, and he can buy his clothes cheaper also. In all these respects he must be better off than he was before. Take the richer man. He has all these articles cheaper, too; besides, he has his coals cheaper, and he has his gas cheaper; in fact you can run through most of the articles—the great articles of consumption—and you will see that he can buy them cheaper. But there is a counterbalancing circumstance in all expenditure which most of you know as well as I do, and that is that the standard does not remain the same, that there is a constant tendency to increase the standard of your expenditure—to get better things or more of them, and gradually to attempt to rise somewhat in the scale of living. That I believe to be true of all classes, and it accounts for men's aggregate expenditure not being reduced, though many items cost less money.

Supposing the workman's wages are the same now as they were before, is he better off than he was before? I would ask anyone who goes into a country church and sees the people coming in, whether the population is not better dressed than it used to be? The same is equally true of the manufacturing districts. The manufacturing population is infinitely better dressed, both men and women, than it was a certain number of years ago. They may not have more savings to put by, but their money does go further than it went before; and let me ask, supposing it were not so, can you deny that, wholesale, these articles are to be bought cheaper? Otherwise, what means the quotation in the market? The only other alternative would be that the whole difference caused by the fall in the prices has gone into the pocket of the middlemen, and this I think, looking to the competition of dealers, would really be impossible. Doubtless it is a long time before the consumer gets the full advantage of the fall. The remoter the district in the country the more difficult it may be; but I am told that in London and in the large markets, the competition is keen enough to have enabled the working classes to purchase the necessities of life considerably cheaper.

The question with regard to people who are in a somewhat better position and more comfortably off is the same—not "Do you spend more?" but "Do you get more for your money?" When you see so many articles so much cheaper, when you see that coals are cheaper, gas cheaper, groceries cheaper, bread cheaper, you must analyze your expenditure and see where that reduction is to be found. One circum-

stance will have to be considered, with regard to which I shall feel it my duty to say a few words presently, a very important question, *viz.*, the question of wages and salaries. But I am dealing now with commodities generally. Gentlemen, a good test in the fall in prices would be this: How is the situation with regard to our large hospitals, and the feeding of our troops, and in those administrative branches where purchases are made in large quantities? All governmental expenditure tends to increase in this country, the standard is continually raised. It would be extraordinary if you could keep a hospital patient at the same price now as you could before all the hospital reforms were introduced, and before the doctors acquired that immense predominance over public opinion which is now accorded to them both by the State and by individuals. It would be perfectly natural, too, that there should be a great increase in the price of maintenance of soldiers as well as of paupers; but as far as I can make out that is not so. I see that the average cost of a pauper in 1867 was £10 0s. 4d.; and in 1881 £10; that is to say, the cost is the same; and that cost is the same in the workhouse, notwithstanding the great improvements in the position and in the treatment of the pauper. You must not look merely to the total expenditure, because the total expenditure includes those increased comforts which public opinion has required in the management of all our great establishments. I commend this matter to statisticians and ask them to examine how far, in our hospitals and great establishments you are able to find, under certain heads, diminished expenditure because the great articles of consumption have fallen in price?

And, now, will you allow me to assume for the rest of my address that a fall in prices has actually occurred? If so, I would ask you to proceed to consider "To what is this fall in prices due?" On the one hand I have shown you, that the amount of gold which is available for the purpose of circulation has had a tremendous strain put upon it during the last ten years; and on the other hand I have placed before you that fall of prices which would naturally flow from that cause. Do you admit any connection between the two? Has the necessary gold been found without any strain upon the stock of gold; and has this fall of prices been produced by causes totally separate from this strain upon gold?

Let me recur in the first place to the strain upon gold. I have shown how it has been calculated that we have taken ten years' production to supply Germany, the United States, Italy, and Holland. Now, I would ask this question. What would have happened supposing those countries had not taken the \$200,000,000 of gold? where would the gold have been? The gold would have continued to supply those countries which received it before. It would have been carrying on that normal work which the gold annually produced has always been performing, namely, meeting the increasing demand for gold

which arises from the natural increase of population, and from the increase of wealth.

It appears to me, that if it be true that population continually increases, and that there is a certain increase in wealth, an additional amount of circulation will be necessary in order to meet the increased demand, unless there are compensating counter economies by the extension of the check system and other methods. Now I wish to be very precise on this point. On the one hand, you undoubtedly have increased population. Going back thirty years, you may say you have an addition to the population of 50 per cent, including not only the gold-using countries of the old world, but new countries, such as Australia, where the population increases fast. You also have an increase of wealth. I do not mean the growth of capital in the hands of large capitalists, but you have that increase in comfort, which means that there are more people who carry one or two sovereigns or half-sovereigns about with them in their pockets. Then, again, you require more gold for more transactions. Of course you are not ignorant of the fact, that the increased amount of gold required is certainly not in proportion to the increased transactions, but merely in proportion to the increased balance of the transactions. Gold has two or three functions to perform in circulation. It has to supply what I may call pocket-money, and it has to liquidate large transactions between nations and nations: and what is almost an analogous function, it has to remain in the vaults of bankers on deposit against the notes that are issued against it; still it is more simple to treat these two latter functions as one. Such being the two functions of gold, if the population increases, the necessary pocket-money must increase; and if the transactions increase, somewhat more is required for liquidating the balances of those transactions.

Let us now consider, on the other hand, whether the economies in the use of gold have been as great as the increase in the population, and as the increase in the amount of gold required to liquidate the balance of transactions. Mr. Giffen, in an article to which I am much indebted, printed in the journal of the Statistical Society for March, 1879, expresses the opinion that the United Kingdom was thoroughly "well banked" even twenty years ago, and that there have been no new devices invented during the last twenty years which have much economized the use of gold in the United Kingdom. We have already, I believe, reduced the use of gold in this country almost to a minimum; and I am confirmed in this view by the statement that the total circulation of gold in England increased, according to the estimate of the authorities of the Bank of England, from £103,000,000 to £124,000,000 between 1870 and 1880. This would mean—and it is a most significant fact—that in this country which is so "well banked," to use Mr. Giffen's phrase, £20,000,000 more circulation was nevertheless required in 1880 than in 1870. What a pull must those £20,000,000 have been

on the total supply of gold, after, or concurrently with, those other demands to which I have called your attention. As regards England then, I do not see that there has been any economy in the use of gold to counterbalance the increasing demand of the population, nor are we aware—those of us who have been able to look into the matter—that in France or Germany, or elsewhere the economies have been such as to counterbalance the increasing demand for gold.

I have been reminded of one point, which I mention in order to exhaust this part of the subject, and that is, as regards international transactions. It is alleged that there is an economy in the use of gold through large transactions being liquidated by what is called international stock, and that great amounts of stock passing from one country to another to a certain extent save the use of gold. I mention this explanation for what it is worth. To sum up this part of the question, wishing to make every allowance for the fact that as little gold is used as is possible to use, and that every economy in its use is studied by bankers in England and elsewhere. I certainly do share the opinion that the economies effected do not counterbalance the strain put upon gold, either by the increased demand of the population for pocket-money, or for the liquidating of the enormously increased balance of transactions both of this country and of others.

I am now brought to the point that, if there is any truth in the theory that the amount of circulation stands in a certain relation to the question of price, then this strain upon the gold circulation must have produced an effect upon prices. There is a fall, and there is a cause which ought to have produced a fall; but has it produced a fall, or has the fall been produced by other causes? Certainly there are other causes which might account for the fall of prices, and I will enumerate some of them. I will be perfectly fair in this matter because I am rather inviting inquiry upon all these complicated matters than wishing to state any dogmatic opinion. Indeed, the causes are so deep down, and are surrounded by so many counter considerations, that it is most difficult to say that any particular cause is responsible for any given effect.

It has been suggested to me that the fall in prices is partly due to the greatly increased facilities of communication both in the carrying of goods and in ordering goods; that through the Suez Canal, and through various other arrangements and better lines of steamers, and, above all, and concurrently, through the action of the telegraph, goods can be brought cheaper from the producing country to the consuming country than they could be brought a certain number of years ago. A second cause is stated to be the diminution of a class to which a great many, possibly, of my hearers belong, namely, the class of middlemen, or agents whose traditional business it always has been in London to act between the producer and consumer. There is the banking business, the agent's business, and the various businesses which

consist in assisting the producers in the most remote countries to place their goods, not only in England, but in most other parts of the world. I am told that transactions are now conducted to a very much greater extent than formerly, direct between the producer and the consumer, even in the interior of Germany, France, and Switzerland, and this change, of course, does diminish, to a great extent, the cost to the consumer; because a number of intermediate profits have vanished in the process of business. This would be a second cause to account for the cheaper production, and for cheaper prices. A third cause is alleged to be a great diminution of speculation; a fourth cause, that crops have been larger, thus accounting, in the case of a great many articles, for the cheaper price. With regard to this last consideration, I suggest to you, on the other hand, that if the crops have been larger, so is the population of the world larger too; and it would, indeed, be a sad thing if the crops were to remain stationary, while the inhabitants of this globe, who consume those crops, were not to remain stationary, but to multiply at that pace at which thriving countries do multiply. I therefore think we must not lay too much stress on the increase of crops over a long series of years.

I have now cited a number of causes for the fall in prices, independent of the question of gold. But supposing these to be the actual causes, and for the moment I will assume them to be so, you have to deal, at all events, with the fact that prices have fallen, and if that is so, that is only another way of saying that the purchasing power of gold has increased. Whatever causes may have brought about the fall, if the fall is there, and if prices are so much lower, the purchasing power of gold has increased. On the preceding assumption it has increased, not on account of the special circumstances connected with gold, but from other causes which have operated upon commodities. Still we have to deal with the fact—let us look at it how we will—that owing to these causes, if you like, but as I believe, owing in a great measure to the other causes which I have indicated—the sovereign goes farther than it used to go. Happy then it is for those who have the sovereigns; on the other hand, unhappy it is for those who have commodities left on hand and produce which they have not sold.

Thus we are brought to what, to my mind, is more interesting than the dry argument with which I have been compelled to trouble you. We have to examine how the fall in prices, how the increased purchasing power of sovereigns, will affect various classes of the community, and the community at large. In the first place does it not account, to a certain extent, for a great many rash statements which are continually made with regard to a diminution of our exports and imports, and with regard to the depression in trade? If all prices have fallen, the total of our exports has naturally fallen too, being calculated in money. But do not look at the money value of our exports. Look at the volume of our exports, and see whether that volume

shows a decrease—that is the true test ! It does not show a decrease; and our trade may go on, and even be as profitable, after prices have once been adjusted, as before. Let us look at the matter from this point of view, that it is a transitional state through which we are passing to a future period. We have a painful transition from a period of one set of prices to a period of another set of prices; but we have, also, to look to the future when prices will once again have settled down, when in many branches of trade, and in many manufactures it will probably be the fact that the situation will be precisely as it was before, that is to say the manufacturer will pay less for his cotton, and will get less for his cotton goods when they are sold. It does not follow because prices are generally low, that therefore there must be an absence of prosperity in a country. If you can buy your material cheaper, you can sell the manufactured article all the cheaper; and, therefore, in deploring, if we have to deplore, the difficulties incidental to a transitional state from high prices to low prices, don't let us, for one moment, lend ourselves to the dangerous theory that because there will be less gold in any country, that, therefore, such a country will be less well off or less able to thrive. The special characteristics of the transitional period have, I think, often misled the public. They mentally apply to the conditions after the change is completed, the phenomena which are incident to the period of transition. It is undoubted that a transition, such as took place in 1852 and the following years, from low to high prices stimulates commerce and industry while the change is going on, giving an appearance of great prosperity for the time, to be followed probably by a re-action afterward, which will produce temporary depression; but do not let us confound temporary difficulties with the ultimate future, in the conclusions at which we may arrive.

Let us now assume what I think is probable enough, that there will be a continuance of low prices—that is to say, a continuance of the increased value of the sovereign. Two classes would be permanently affected: one is the class which is entitled permanently to *receive* a given amount of sovereigns. They will be much better off. The class of debtors, on the other hand, who are bound to *pay* a given amount of sovereigns for a long period to come, will be much worse off. In the same way as the rise in prices generally is to the advantage of the debtor, so a fall in prices will be to his disadvantage. And that leads me to another consideration. In examining the fall in the price of various commodities, I did not allude to the value of consols and of securities. Have they fallen ? No, they have not fallen. Ought they to have fallen ? No, they ought not to have fallen. According to the theory they ought to have risen. Why ? Because consols mean the right of the holder to a given number of sovereigns; and consols and railway debentures and other such instruments which give the holder a right to a certain number of sovereigns, ought to

have risen, and they have risen. This squares entirely with the theory of the increased value of the purchasing power of gold. In the same way as commodities, measured by gold, have fallen, these which entitled the holder to a certain given amount of gold ought to rise, and they have risen.

Let us proceed in enquiring what will be the effect upon various classes of the country on the assumption of the increased purchasing power of gold? As to the fundholder I need not say any more. He will gain. He will receive his £3 per £100, and those £3 will be worth more than they were before. But, perhaps, they might be worth so much more that consols may rise beyond £100, and it may very likely occur to a Chancellor of the Exchequer that the fundholder—if the position admits of it—should have his interest reduced from £3 to £2 15s., or possibly to £2 10s.

Now let me pass to another class. The holders of mortgages would be in a distinctly favorable position. While the mortgages run, they will continue to receive a sum which will represent a larger purchasing power than it did before. Those on the other hand who have borrowed on mortgage will be in a worse position. They will be under contract to pay a given sum, which, measured by the value of all other commodities, will represent a greater value than before. To obtain that sum which they have to pay, they would have to part with a greater quantity of commodities. The influence of this circumstance on landowners will not be overlooked. Landowners who have borrowed largely on their estates will be under contract to pay away a sum which represents more value than before, while the produce of the land, if ultimately that produce should generally fall in price like other commodities, would not secure the same amount of sovereigns. It is impossible to see how farmers should be able to continue to pay the same amount of sovereigns for rent, if the prices of what they raise from the soil should permanently fall.

I have explained how up to the present time the price of meat, and I should add the price of butter and milk, has been affected by the great mortality in our flocks, and has not experienced the general fall. But if the hypothesis is correct that the purchasing power of gold has increased, it would not ultimately be without its effect on the price of beef and mutton, as on everything else. However, I am rather suggesting these questions with a view of indicating the method in which they ought, in my judgment, to be examined, than attempting to deal with them exhaustively. It would indeed be utterly impossible to do so within the limit of time which a speaker may claim on such occasions as these.

Let me rapidly glance at another case, that of the railway companies. The railway companies would seem to be in some sense in a peculiarly satisfactory position, unless indeed they should ultimately be obliged to reduce their fares, a natural result if 16s. should ultimate-

ly represent as much purchasing power as 20s. do now. A man who buys a railway ticket will be in worse position if he has to continue to give 20s. of appreciated gold. Everyone knows how difficult it is to secure such reductions in fares as would be proportionate to an ultimate fall in prices generally, and till fares are reduced the receipts of the railway companies would represent more value than before. So far as their expenditure represents a fixed interest on debentures, this benefit would be neutralized; so far as their expenditure represents outlay for the purchase of materials, they would clearly benefit greatly. If there is any class who ought not to dispute the fall in prices, I think it is those interested in railways, if it be true, as stated in the returns of the Board of Trade that a railway carriage costs £85 now, instead of £111 10s. some ten years ago, and looking to the fall in the price of coal, of oil, and indeed of nearly all materials which a railway company uses.

Now, if you will still grant me your attention, I will briefly examine the position of the working classes. Assuming the increased purchasing power of gold, I promised to say a word or two about wages. Wages are a commodity like everything else; at least, economists say so. It is of course true, in one sense, but in another sense it is not. According to the strict laws of economical science, when the purchasing power of gold increases, wages ought to fall, and I doubt whether they are quite as low now as they were during the period of greatest inflation. But I cannot discover that they have fallen much. Here it is necessary to bear in mind how many causes operate upon the price of labor, independently of the scientific causes taught by political economy. It is a very different thing to speak of reducing wages in a country like this, and of reducing the price of commodities which are bought and sold, and are liable to the higgling of the market. In many senses, a fall in wages stands on a different footing, and at all events in the case of the agricultural laborer, it is affected by the circumstance that the feeling of the community has distinctly been that his wages have been upon a scale considered too low with regard to the requirements of his living. General satisfaction has been felt that wages in this branch of industry rose considerably some time ago, and though the sum now given in wages represents more purchasing power, it seems to me not unnatural that the scale has thus far been maintained. It must not be overlooked that the wages of laborers are not only determined by supply and demand, but that most economists have admitted that wages must be on a scale to enable the laborers to live, and to be supplied at least with the minimum necessities of life. I consider that that minimum has been raised. In the sentiment of the country it has distinctly been raised; and public sentiment counts for a great deal in such matters. I should not be surprised, therefore, if an increased purchasing power of gold had no immediate effect upon wages, nor do I feel confident as to the degree in which it will have an

ultimate effect. It is possible, indeed, that the fact that wages have not fallen might lead economists to dispute that the purchasing power of gold has risen. It is perfectly open for them to do so, and they might make a powerful argument in respect of the circumstance. They might argue with much force that wages are an element of such extreme importance, and so far-reaching that, if wages had not fallen, the price of gold cannot be said to have increased. On the other hand, I have pointed to the counterbalancing influences.

Let us look more closely into the case of the laborer. His wages, if not reduced, represent generally more purchasing power. He can buy his bread, his tea, his coffee, and his clothes cheaper; but I have before pointed to the curious circumstance that some of the articles most important for working men have not fallen. You will remember that beer and spirits are not much cheaper, and that tobacco is not much cheaper either. These items, you are aware, consume a considerable portion of the wages of the working man.

But what will be the position as to the houses for working men, and, indeed, as to houses generally? In other words, how ought the fall in commodities generally to affect house-rent? Here let us distinguish between the geographical position of a house and the cost of building the house. So far as the geographical position goes, the principle of monopoly enters; but so far as the builder's part of the work is concerned, the cost of commodities generally, comes into play. So far as new houses are to be built, the question of cost is clearly one of very great importance. The figures I have read seem to show that as far as materials go, a house ought to cost less. At least, many of the materials entering into the building of a house have fallen in price; timber has fallen, lead has fallen, iron has fallen, glass has fallen. Houses ought to be built cheaper, and the rent be proportionately less. But, on the other hand, you cannot multiply the sites for houses, and you may have the fall in prices arrested to the advantage of the monopolist holder of plots of ground on which houses would be built. I do not use these words in an invidious sense, but merely to indicate the position. I should doubt whether house-rents will fall in the same proportion as other commodities, at least, so long as wages and salaries do not fall. But if wages and salaries fall, laborers and others would clearly not be able to pay the same rents out of diminished receipts, and a fall in house-rent would be the ultimate consequence. But the ground landlords will be in an enviable position. They will continue to receive their ground-rents in sovereigns, commanding a greater amount of commodities, and will be in the position of fund-holders and others who receive a fixed income payable in appreciated gold.

It is impossible for me to follow this investigation any further with respect to other classes of the community, and I wish most respectfully to say to the economists who are present, that it is not my purpose, for

one moment, to lay down any specific doctrine with regard to the points which I have touched. I would wish to recommend the general lines on which, in my opinion, the investigation of the probable results of the increased value of gold should be followed, and to leave the enquiry to others who have the necessary leisure and ability for pursuing these studies. Let them consider and examine, on the hypothesis of the increased purchasing power of gold, what would be the position of the various classes of the community, and what results would follow. It is possible that these results, from a social point of view, may be very considerable. From the political point of view the revenues of States may be seriously affected. There may be changes in the relations of debtor and creditor, but with regard to commerce, when a new scale of prices has been definitely reached, I believe that the operations of trade will proceed precisely as before.

You will observe that I have not touched upon any remedies. I have refrained from doing so because, if I were to enter upon that question I might soon find myself on controversial ground, and dealing with topics which have excited the very deepest interest, but which would possibly divert men's minds from the particular investigation to which I have ventured to call your attention this evening. The question might indeed be fairly put, is it the duty of the State to interfere at all with results which have flowed from this great strain upon gold? We have adopted gold as our standard, why should we then seek to remedy the results which may flow from circumstances incident to the use of that metal? I am not thinking of bi-metallism, or if it did pass through my mind, I mean that I am not thinking of it at this moment. The question in my mind is this—how far the State ought or ought not to concern itself in the relations between debtor and creditor in any way. That is the only point now present to my mind. It would not, on the one hand, be correct to urge the view that the whole present situation is the result of natural laws as an argument against the propriety of interference. It is true that no State action on the part of England can be cited, but it would not be true of Europe generally, because, if the fall of prices has been brought about by the absorption in Germany, Italy, and the United States, of nearly £200,000,000 in gold coinage, it is by the laws passed by those Governments, and not by any change in production, that the serious results indicated have been caused. Therefore I wish to put aside the doctrine, that it is utterly out of the question for States to act, but whether it would be wise in any degree to act, is a matter of a very different nature. Debts have been contracted on the faith of certain national laws, and engagements have been made. Debtors had a great advantage once, when the gold discoveries in America depreciated the price in gold, but I am afraid they may suffer somewhat now. A distinguished French economist has said that he was not sure whether France would not have been bankrupt in 1848, but for that great increase in the production of gold,

which created a degree of commercial prosperity, which enabled the French to escape from the difficulties they were in. I have heard another distinguished man suggest that the great difficulties of the old Roman Empire, with regard to laws which had to be passed for the relief of debtors, was due to the fact that they never had an expansive currency, but that the supply of the precious metals was stationary, at least if compared with the increasing transactions and the increasing population, and that it did not enable the Roman men of business to conduct their operations with that continuously small increase in the supply of the precious metals which was required to meet the increased demands of population and increasing wealth. The observation seemed to me of historical interest, and to be very suggestive; but I have not the necessary knowledge to judge of the accuracy of the facts which it implies.

I thank you most heartily for the attention with which you have listened to me. When I read what has been written by able men on the subject which has occupied us to-night, I feel strongly that an address of the kind which I have delivered has no value at all for economists; but if I shall have contributed at all to direct men's attention—not to what I have said, but to what others have said, and to the facts themselves, and the manner in which those facts ought to be investigated—then I shall hope to have made some contribution to the elucidation of a question so difficult and so complicated that he will indeed be a vain man who would venture for one moment to pronounce dogmatic opinions upon it.

---

**SPECULATION IN JAPAN.**—The Japanese have a short and easy way of dealing with Stock Exchange speculators. It was recently resolved to arrest at the same moment all offenders on the stock exchanges at Osaka, Yokohama and Kobe, as well as on the rice exchanges of Tokio, Otsu and other important commercial centres. The police inspectors receive their orders only on the morning of the day fixed, and strong detachments of constables—all wearing various disguises—then proceeded to the vicinity of the exchanges and mingled with the crowd so as to avoid observation. A few minutes after eleven all was in readiness. Six detectives stationed inside sounded their whistles and before the amazed speculators realized what was the matter, the exchanges were in the occupation of the police, the doors locked and the prisoners secured. All the books, records and papers were then taken possession of, and the whole "haul" was removed in boats to the central police station. It is stated that the offense with which these men are charged is speculating in "margins." Over 700 delinquents were put in prison.

**THE PRESIDENT** of a bank who seldom visits it and knows very little about it, says an American writer, is a man who ought to resign just about as speedily as he can procure pen, ink, and paper and write a resignation.

## LAW NOTES, AND REPLIES TO QUESTIONS.

**PROPERTY IN A BOARD OF TRADE SEAT.**—The certificate of membership of one of the Chicago Board of Trade was directed to be sold for the benefit of the holder's creditors, and he carried the judgment (*Barclay vs. Smith*) to the Supreme Court of Illinois, where it was reversed. Judge Craig, in the opinion, said: "The certificate only entitles the holder to attend the meetings of the Board and deal in the various products of the country; but he is not entitled under it to any dividends or pecuniary profits; though a valuable privilege, it is not property, and is not subject to sale for the member's debts. It is a right which may be regarded as valuable, and which has a market value, but it is a right which cannot be divided or destroyed, except by the board itself, or a failure of the member to conform to its rules and regulations, and it is not transferable except the assignee is approved by the votes of at least ten directors. This membership is like the membership of a church, with its privileges, and the membership in Masonic and other social organizations, and licenses to carry on certain callings or businesses. It has never yet been claimed that these privileges, however valuable, can be made the subject of a sale to satisfy a debt."

**COLLECTION OF DRAFT BY INSOLVENT BANK.**—A Chicago bank sent to its correspondent at Buffalo, a bank, a draft for \$6,527 75 for collection, with the instruction to remit the proceeds for its account to a New York bank. At the receipt of the draft the insolvency of the Buffalo bank was well known to its officers. During the day \$28,000 were received on deposit and \$61,000 paid out. There was in bank, in cash, \$40,000, and the proceeds of the draft was mingled with the other moneys in the bank. A bill in equity was filed against the insolvent bank and its Receiver (Illinois Trust and Savings Bank of Chicago *vs.* First National Bank of Buffalo) in the United States Circuit Court for the Northern District of New York, to enforce the equitable lien of the Chicago bank for this special collection, but the bill was dismissed. Judge Wallace, in the opinion, said: "It was undoubtedly a fraudulent act by the Buffalo bank, in its hopeless insolvency, to mingle the proceeds of the draft with its own funds, so that all identity was lost. The cases hold that if a trustee converts a trust fund into money, and mingles the money with his other moneys so that it is indistinguishable, the beneficiary cannot follow his fund into the hands of an assignee in bankruptcy or an executor of the trustee, but he must occupy the position of a general creditor. The right to follow a trust fund ceases when the means of ascertainment fail, as is the case here."

**CONFISCATION OF BANK DEPOSITS.**—In 1865 the United States Government took from the Phoenix National Bank of New York \$2,117 88, which that bank held as the correspondent of the Georgetown Bank, of Georgetown,

S. C. The seizure was made under the acts of Congress declaring the forfeiture of goods and money owned by persons in insurrection, or likely to be used for insurrectionary purposes. The Georgetown Bank went into the hands of a Receiver in 1869, and that officer sold to William L. Ellis, for \$100, its claims against the Phoenix National Bank, which, he said at the sale, were a deposit balance of \$129, and, possibly, the proceeds of a draft for \$5,500 drawn in 1861 and sent to New York for collection. Ellis sued the Phoenix Bank for an accounting of its business with the Georgetown Bank and for a judgment for whatever sum should appear to be due the latter. The latter set up the action of the United States as a bar to the suit, but a judgment in favor of Ellis was given in the Common Pleas, Special Term. The judgment was recently affirmed by the General Term, in an opinion written by Chief Justice Daly, declaring that the seizure by the United States did not release the Phoenix National Bank from liability, inasmuch as the forfeiture acts, passed by Congress on Aug. 6, 1861, and July 17, 1862, did not authorize the confiscation of the property of corporations, and the seizure was therefore illegal.

MANDAMUS AGAINST A CITY.—Judge Nixon in the United States Circuit Court, at Trenton, N. J., on June 16, signed the order for a peremptory mandamus compelling the city of Rahway to include in its next tax levy the amount of the undischarged judgment obtained against the city by the Grocers' Bank of New York city. The judgment was for \$40,000 and interest, that being the amount of the bank's loan to the city, but the sum due was reduced to \$30,000 by the sale of certain city bonds which the bank has held as collateral security for its loan.

#### REPLIES TO QUESTIONS.

*Question.*—Be kind enough to give me the benefit of your long experience in handling such or similar paper to that to which I invite your attention. On November 4, 1882, O. B. Smith executed and delivered to John Jones "for the use and benefit of the Town of Ashland," his promissory note for \$16 80, at ten per cent. interest per annum. On or about January 20, 1883, one J. B. Brown endorsed the note by simply writing his name across the back, as shown in the copy :

\$16 80.

NOVEMBER 4, 1882.

Six months after date I promise to pay to the order of John Jones (for the use and benefit of the Town of Ashland) sixteen and 80-100 dollars. For value received negotiable and payable without defalcation or discount with interest at 10 per cent. per annum from date, if the interest be not paid annually to become as principal and bear the same rate of interest.

O. B. SMITH.

[Endorsed, J. B. Brown.]

Now the point is this: No demand has ever been made on Smith for the payment until he recently became totally insolvent, since the maturity of the note on May 4, 1883. Now, Jones calls upon Brown without ever having made any legal demand upon Smith, or causing the note to be protested at maturity for non-payment. Is Brown liable for the note, it never having been protested, and Jones waiting an unreasonable time before notifying Brown of its non-payment and dishonor?

*Answer.*—In the case of an endorsed note or draft, the holder must present it for payment on the day it falls due at the proper place, and upon non-payment must without delay protest it and send notice to the endorser; otherwise the endorser is discharged from all liability. This is one of the best settled rules of the law-merchant relating to negotiable paper. The above seems to be a clear case.

## BANKING AND FINANCIAL NEWS.

(With Comments on the more important matters. This Department also includes General Business News—Notes from Foreign Banking Centres, including Canada—A Complete List of New Banks, Changes in Officers, Dissolutions and Failures—Banking and Monetary Tables—Bankers' Obituary Record, &c.)

**New York Bank Department—New Deputy, etc.**—Superintendent Paine has appointed Mr. Josiah Van Vranken as Deputy Superintendent, in place of Mr. Thurston, who has resigned in order to become Assistant Treasurer of the American Loan and Trust Company of New York on September 1st.

The resignation of Mr. Thurston was voluntary, and Mr. Paine says that he has been a most capable and efficient officer. The new deputy was highly recommended. In regard to the management of his office, Mr. Paine said further that he had determined to reduce the expenses of the department as much as possible, consistent with efficiency, for the reason, among others, that while no complaint had been made by the banks that the expenses were too great, yet he thought every effort should be made, as a matter of State pride, to have the system of banking compare more than favorably with the national system. That while the new deputy's immediate predecessors had respectively received four thousand and thirty-five hundred dollars a year, he would be paid but twenty-five hundred dollars. The other clerks, instead of receiving eighteen hundred dollars yearly, respectively, are paid sixteen hundred and eighty and fifteen hundred dollars a year, while the messenger, who was paid at the rate of one thousand dollars, receives but two hundred and eighty dollars a year. The services of an examiner, who is paid for the year ending March 1, 1882, twenty-four hundred dollars, and for the year ending March 1, 1883, two thousand and thirty-eight dollars, are dispensed with entirely, for the reason that, in Mr. Paine's opinion, the deputy and one of the clerks could do his work. The two officers last named have each been required to give bonds in \$10,000, a wise precaution which has not been taken hitherto.

We hear that Mr. Paine has in preparation a work which may be termed an annotated edition of the revised banking laws of the State. While it will not contain decisions on the other statutes, or references to the common law as applied to commercial paper, yet it is designed to be of large practical value to bankers. In addition to banking laws it will contain a history of the three banking methods of New York State, including the savings bank and trust companies' systems. The work has occupied the leisure time of the author during three years, having grown out of his labors as Commissioner to revise the banking laws. He does not expect to reap any profits from his labor, as the book will be sold at the bare cost of publication. It will probably be issued in the coming fall.

**New York Stock Clearing-House**—Operations of an experimental character were begun on July 18, at the new Clearing-House, eighty-five members of the New York Stock Exchange having signed the rules and regulations. Only four stocks were cleared at first, viz.: Western Union, St. Paul common, Delaware, Lackawanna and Western, and Union Pacific, in order that the system might be introduced gradually, and without confusion. The work of making the clearances began at 12:30 P. M. and within fifteen minutes it was finished, the number of shares cleared being 6,200.

This very welcome improvement in the method of conducting the trading in stocks has now for the first time received a practical test of its value in this country, and it is hoped that it will prove successful. On July 23, four other stocks were added to those cleared through the house. The transactions that day were 30, 00 shares, and the work was completed in fifteen minutes. The institution is under the management of Mr. R. L. Edwards, President of the Bank of the State of New York. Mr. H. Osterbeg, the inventor of the system, says that if all the members of the Stock Exchange join the new association the whole work of a day's clearing can be done by twelve clerks in half an hour. An account of the method has been given in a previous number.

**Redemption of Check Stamps.**—Much delay and inconvenience has been experienced by the Internal Revenue Bureau in handling the check stamps forwarded for redemption on account of letters and packages of stamps being addressed to the Treasurer of the United States, Comptroller of the Currency, and the Secretary of the Treasury. All check stamps forwarded for redemption, and all correspondence relating thereto, should be addressed to the Commissioner of Internal Revenue.—*Washington Dispatch.*

We have already published the full directions given by the Commissioner in regard to the redemption of stamps, but, as there seems to be much misunderstanding in the matter, it may be well to give the following intelligent information furnished by a Washington correspondent:

Any person having stamps, or stamped checks, in sheets or blocks, if purchased within three years, may have them redeemed and receive money or an equivalent value in stamps by complying with a few requirements. It will not be necessary to employ a claim agent, for such an agent will only do what the original holder can easily do without expense. The holder of stamps or stamped checks should first procure a blank form, which will be provided on application to the Internal Revenue Commissioner here or one of his Collectors. On this form an account is given of the value of the stamps sought to be redeemed, and it must be sworn to. The filled-out form and a package containing the stamps offered for redemption must be addressed to "The Commissioner of Internal Revenue, Washington, D. C." As soon as received, the package will be turned over to Col. Holt, Chief of the Stamp Division, who will give it a number corresponding with the order of its receipt, and it will in its turn be examined to ascertain whether the invoice and the stamps correspond, and whether the Government limitations do or do not exclude the stamps from redemption. If all, or a part, of the stamps can be redeemed, or if all are rejected, the owner will be informed. He may not get the money or the stamps in which the Government redeems the stamps for some time, as the Stamp Division is overrun with work of this sort, and after an owner of stamped checks has received his check-books with the stamps canceled, he may be obliged to wait weeks before he obtains the value of the canceled stamps upon them. After a claim for redemption has been allowed by the Stamp Di-

vision the account is sent by the accounting officer of that division to the Fifth Auditor of the Treasury. When the Fifth Auditor has passed upon it, it is sent to the First Comptroller, and if he approves it goes to the Warrant Division, whence a draft will issue to the owner for the amount allowed. Each application must take this course, and no claim agent can obtain a preference for one claim over another, no matter what compensation he may receive for professing to be able to hurry the Internal Revenue Bureau, the Auditor, the Comptroller, or the Warrant Officer.

**Silver Certificates in Chicago.**—The Chicago "Tribune" says: "The report that some of the city banks are refusing to take silver certificates except at a discount is incorrect. One bank received a message from Detroit last week asking if they would take \$30,000 worth of these certificates, and the reply was at one per cent. discount. While the banks are not over-anxious to take these certificates, because of their prejudice against the silver dollar, they are at the same time taking them, and probably will continue to do so at their face value. It is understood that the silver certificates are not to be used in making settlements at the Clearing-House, and they are usually turned over by the banks to the distillers and tobaccoists, who pay them over to the United States revenue office, where they are receivable for taxes, being to this extent as much of a legal-tender as any thing else is. The circulation of these certificates is especially large in Cincinnati, owing to the extensive tobacco and distilling interests in that city and vicinity. The local bankers said, almost without exception, yesterday, that they had not heard any talk of the silver certificates being at a discount, and some of them thought it would be decidedly unwise to agitate such a question, especially on the near approach of a crop movement which will require the use of vast sums of money."

It is gratifying to hear that the Chicago banks entertain a "prejudice against the silver dollar," because some of the newspapers of their city have been foremost in the advocacy of a silver currency for the country. Public opinion seems to be settling down to the conviction that the silver dollar must go—or, at least, that the coinage must be stopped. The politicians would like to defer action on the matter until after the Presidential election, but the interests of business must not forever be postponed to the exigencies of would-be Presidents and President makers.

**Proposed New England Clearing-House.**—The proposal to establish a New England Clearing-House, has been discussed by the Boston Clearing-House Association. The plan proposed is the formation of a bank, or association, with \$100,000 capital, to do an exclusively collection business, the stock to be held by the Boston banks. The matter has been referred to a committee.

We are informed by a member of the Committee that it consists of the following gentlemen: George Ripley, President of the Hide and Leather National Bank; John Cummings, President of the Shawmut National Bank; W. S. Blanchard, President of the Metropolitan National Bank; A. L. Newmar, President of the National Bank of the Commonwealth; Charles A. Vialle, President of the National Bank of the Republic. No definite plan has yet been evolved. It is not proposed at first to collect anything but country bank checks.

So far as we understand the matter, the intention is to save part of the expense and labor of collecting country checks deposited with the banks. At present each bank collects such country checks as are deposited with it, for itself. If this labor could all be done by one establishment a great saving would result, as, for instance, instead of sending thirty letters a day by as

many Boston banks to banks in Providence, Worcester or Portland, all the checks for one point could be sent in a package together by express or messenger.

It has been said that such a method is in operation in London. It is doubtful, however, if the system pursued there is applicable to Boston. The "country clearing" there is carried on at the Bankers' Clearing-House, beginning at noon every day. Every clearing bank or banker is the agent for one or more country banks, and the name of the agent is printed upon their checks. Each clearing bank, of course, receives a number of checks drawn on the country banks on deposit every day. These being properly entered, are arranged in batches according to the London agent's name which they bear. They are then sent to the Clearing-House and delivered to the respective clerks of the agent banks. By this means each bank is intrusted with the collection of all the checks on its country correspondent that are deposited in London each day. These it sends to its correspondents each day, and if the checks are found correct the London agent is notified, and each of the banks which delivered the checks into the Clearing-House is credited with its respective amount. Bad checks are returned and the amount deducted, three days' time being allowed for this purpose, and checks not returned in that time are credited as if paid.

**Winding up the American Mining Exchange.**—A suit has been begun in the Supreme Court at New York, by the members of the American Mining Stock Exchange, in which they seek to dissolve the Exchange, and also for a distribution of the insurance and gratuity fund of the Exchange among its members. This action is taken by reason of the fact that last May the Exchange rooms were given up, and the members have disbanded and joined other Exchanges. The action is brought for the purpose of having a Receiver appointed to take possession of the fund, which amounts to about \$10,000.

This concern was started a few years ago for the purpose of extending the dealings in mining stocks, a "boom" in that kind of property being actively manipulated at the time. The New York Mining Exchange was then in existence, and had been for some time, so that there was not the slightest genuine necessity for the new concern.

**A Model Receivership.**—The Bank of Lansingburgh, N. Y., a State institution, failed on March 1, 1877, through unfortunate investments in railroad stocks. Albert E. Powers, a wealthy oil-cloth manufacturer, was appointed Receiver. He found that the assets, if sold immediately, would not pay the depositors, to say nothing of the \$150,000 invested by the stockholders. Among the assets were 4,500 shares of New Jersey Central stock, at that time down to 8%, and large parcels of Lake Shore, Michigan Central, and Rock Island. Although urged to dispose of the assets by the depositors, Mr. Powers refused to follow their advice. When New Jersey Central reached 96¼ he closed out the 4,500 shares. All the other stocks were disposed of at advantageous terms, and the depositors are paid in full, with interest, and the stockholders receive 75 per cent. of the par value of their stock. The Receiver has a surplus of over \$90,000 on hand.

It is well known to our readers that the management of a great majority of receiverships of financial institutions of this State of late years have been a scandal to the community. We have had occasion to note with commendation, however, a few cases in which common honesty and thrift were exercised by receivers. In this case higher praise is due to the Receiver, inasmuch as he withstood the clamors of those interested in the trust and held on to the assets until they could be sold to the best advantage. It appears now that some of the stockholders have been ill-advised enough to resist the full payment for his

services. Judge Ingalls, however, has decided that he must be paid in full under the Haggerty bill, and says that he "regards the receivership as the most successful on record."

**The Old Ohio Life Insurance and Trust Company.**—The report of James P. Kilbreath, Trustee in the assignment of the Ohio Life Insurance and Trust Company, which was made in 1858, is published. The report says a final dividend of 9¼ per cent. to the unsecured creditors is now ready for distribution.—*Cincinnati Dispatch*, July 8.

It was the suspension of this company, if we mistake not, which precipitated the disastrous panic of 1857. In explanation of the long delay in closing up its affairs the Trustee says :

"There probably never was a great failure in this country in which the complications were so all-pervading, and where the assets were of such uncertain value and so hard to reach. It soon became evident that a forced and hurried liquidation would yield to unsecured creditors a mere pittance, owing to the fact that every account of importance was tied up in litigation in a number of States and in Europe, but chiefly in New York. The only hope lay in seeking to unravel complications, in resisting unjust demands, and pursuing with diligence all legal remedies. Only recently two Ohio decisions have released, on pure technicalities, parties amply able to pay back to the trust company money which they had borrowed and used. But for this creditors would receive a much larger final dividend."

The total receipts of the trust were \$1,234,540. The total expenses have been as follows: Law expenses, \$87,279; compensation of trustees, \$76,146; miscellaneous expenses, \$220,710. The total amount of dividends paid to unsecured creditors, including the 9 1-2 per cent. now declared, is 46 1-2 per cent.

**A Splendid Gift.**—Enoch Pratt has executed a deed of the property of the Pratt Free Library, on Mulberry Street, to the city of Baltimore, and gave his check for \$833,333.33, which will be invested in city bonds for the support of the library. The building is nearly completed, and the library will be ready for use as soon as the interior is made ready to receive it.—*Baltimore*, July 9.

The handsome library which Mr. Pratt, who is President of the National Farmers and Planters' Bank, has presented to his fellow-citizens is not quite ready for use, but will be so in about five months. The building proper is entirely completed, while the most important work of the interior is also finished. The front, which is of marble in the rough, trimmed with polished Tennessee marble, presents a handsome appearance. The exterior is beautified by a number of appropriate figures and heads of men prominent in the world of learning. The reading-room, which is 37 feet by 75 feet, is located on the second floor, and is a large, airy, well-lighted room, and well adapted in all respects for the purposes intended. It will be frescoed in the finest style.

**New Orleans Saved from Financial Disaster.**—The interest on the extended bonds of the City of New Orleans fell due on July 1, and a few days before there were no funds in the Treasury to meet it. This was owing to the fact that the city was working under a new charter which did not allow the Collector of Taxes time to provide for the amount, which was \$70,000. The conditions upon which the extended bonds exist are that the interest shall be promptly paid, and that any default in the payment of the interest nullifies the arrangement under which they were extended. Under these trying circumstances City Treasurer Walsh brought the matter to the attention of the Board of Liquidation of the City Debt. The board had a meeting on June 29, at which Messrs. J. H. Oglesby, President of the Louisiana National Bank;

S. H. Kennedy, President of the State National Bank; John Phelps, President of the Cotton Exchange; Mayor W. J. Behan, and other prominent capitalists, all members of the board, were present. When all the other members had expressed their inability to devise any means to save the credit of the city, Mr. Oglesby, who is President of the board, portrayed in strong colors the evils that would result from the default from this special interest, and declared that he would individually provide for this interest, and the coupons would be paid on July 1 at the Louisiana National Bank. The announcement was received with great applause, and the city's finances were again saved from disaster.

**Royal Weller**, Cashier of the Hampden National Bank of Westfield (Mass.) has retired. His successor is Charles L. Weller.

**Bankers' License.**—The city license of Chicago for brokers is \$50, and for bankers \$100. This new license is to be vigorously collected.

**Springfield, Mo.**—With the Exchange Bank at Springfield, Mo., which has been chartered with a capital stock of \$50,000, the town will possess five banks. The new bank will put up a new building immediately.

**F. Wymond**, President of the Aurora (Ind.) National Bank, which was recently started there, died after a short illness. He had been member of the mercantile house of Chambers, Stevens & Co., Cincinnati.

**George W. Bowen**, registering clerk for the last twelve years with the Vicksburg Bank, committed suicide by throwing himself into the Mississippi river on July 9. He was only 28 years of age, was highly-esteemed, and left his accounts perfectly correct.

**C. W. Siemens**, the celebrated English inventor, has begun a suit at Pittsburgh (Pa.) against H. S. McKee, President of the Merchants and Manufacturers' Bank of that city. The suit involves \$300,000, and grows out of the failure of the Siemens-Anderson Steel Company. An arrangement had been made with the bank to buy the patents, but after the failure the bank refused to do so.

**Fidelity and Casualty Company**, of New York.—This company which recently passed satisfactorily through the ordeal of an official examination, has issued its semi-annual statement under date of June 30. The total assets are \$463,390, which includes United States bonds (market value), \$262,050; loans on collaterals, \$119,509; cash, \$20,977; premiums in course of collection, \$54,368 etc. The liabilities amounted to \$161,300, leaving a surplus to stockholders of \$51,991, and a surplus to policy-holders of \$301,991.

**Sandwich Islands Coin.**—The dies for the new issue of coin for the Sandwich Islands were cut in Philadelphia, but the coinage will be done at the San Francisco Mint. The dies show the bust of Kalakua on the obverse side, and the same impression that is made on American coins of like value appears on the reverse. The reverse bears the denomination and the inscription in Hawaiian, "United Kingdom of Hawaii." The coins will be one dollar, halves, quarters, and one-eighth dollars, of silver.

**The Bank of France** has published a notice that counterfeit 50-franc notes are circulating in Paris at present. The notes bear the numbers 697-693, and date of creation Sept. 30, 1882. The paper is thick and cottony, very different from the bank paper, while the watermark shows only a few vague lines, in place of the lines and shades forming the head of Mercury. The vignette is heavy and blurred, the drawing of the two children in the medallion is poor, and the moulding full of ink spots.

**Getzendaner & Ferris.**—The Waxahachie, (Tex.) "Enterprise" remarks the fact that as the above banking firm was closing up its accounts for the year ended June 30, the proprietors were reminded that it was the fifteenth anniversary of the firm's existence, whereupon they improvised a little banquet in which the principals, clerks and a few friends took part. The bank began business in 1868 in a law office, at some distance from the public square, under the style of Ferris & Getzendaner, who undertook the practice of law as well as banking. In 1874 they moved to the large brick building, which they had built on a corner lot, facing the public square, and which they still occupy. In 1875 Judge J. W. Ferris nominally retired in favor of his son R. A. Ferris, and the firm name was changed to Getzendaner & Ferris, the law

business being at the same time separated from the bank. It is one of the oldest, if not the oldest, bank in Northern Texas, and it supplied banking facilities to a large part of Dallas, Tarrant, Johnson, Navarro and Hill counties until they obtained banks of their own. Its comparatively rapid success is an illustration of how quickly that district has become settled, for from a small beginning it has grown so that its capital is now nearly \$200,000, and it paid one-seventh of the city taxes for 1882. The losses incurred since the firm began business do not exceed \$1,000. The "Enterprise" says "Their reliability, added to their correct and fair mode of doing business, has given them a reputation at home and abroad of which they may be justly proud."

**The Philadelphia Banks.**—Compared with the May statement, the June statement shows the aggregate capitals of the banks to be unchanged at \$17,558,000, and the aggregate surplus also unchanged at \$8,690,303. There are five Philadelphia banks that now have a surplus equal to or greater than their capital—the Bank of North America, Northern Liberties, City, Central and Tradesmen's, the latter having a surplus equal to one and a half times its capital. The aggregate surplus of the thirty-two national banks is about 49½ per cent. of their aggregate capital. Thirty of these thirty-two banks form the Philadelphia Clearing-House.

**Maine Savings Banks.**—The bank examiner of Maine completed his first semi-annual examination of the savings banks lately. Another examination will be begun in August. During the examination Mr. Richards will give special attention to the method of bookkeeping and examine the trial balance of the "individual ledger." Some few banks have not made such a trial balance for years, but the uncertainty arising from this will now be removed. The total deposits of the 54 banks have increased from \$29,503,889 to \$30,147,708. Some banks show a decrease, however, as follows: Augusta, \$8,387; Bridgton, \$41,280; Dexter, \$2,371; Kennebec, \$10,238; Lubec, \$470; People's Twenty-five-Cent, Bath, \$97,808; South Berwick, \$714; Wiscasset, \$362. The reserved fund of the banks has increased from \$958,883 to \$1,001,462. The only loss sustained was that of the Bath People's Twenty-five-Cent, through the failure of the Pacific National, of Boston. Out of a deposit of \$42,000 only \$2,100 has been recovered. By the act of last winter, savings banks were given more freedom of investment, but due care seems to be exercised. Only \$140,975 have been altogether placed in the new class of securities, the amounts held by the different banks of this class being as follows:

|                           |          |
|---------------------------|----------|
| Androscoggin County ..... | \$ 7,000 |
| Bangor .....              | 13,000   |
| Bath .....                | 18,500   |
| Buxton and Hollis .....   | 3,000    |
| Calais .....              | 3,000    |
| Gorham .....              | 1,000    |
| Kennebec .....            | 14,000   |
| Mechanics', Auburn .....  | 15,000   |
| Norway .....              | 2,000    |
| Portland .....            | 15,000   |
| Searsport .....           | 10,475   |
| Skowhegan .....           | 4,000    |
| Thomaston .....           | 4,000    |
| Waterville .....          | 21,000   |
| York County .....         | 10,000   |

**California Bank Dividends.**—Bank Commissioner J. E. Farnum having requested an opinion from Attorney-General Marshall to the following question, "Is it legal and right for any bank, savings or otherwise, that is incorporated under the laws of California, to pay either its stockholders or depositors any dividends from uncollected interest?" the Board of Bank Commissioners has been informed by Mr. Marshall that it is simply a question of the construction of Sections 309 and 587 of the Civil Code. He holds that profits which have not been realized and interest which has not been paid cannot be appropriated, and if cash on hand is paid out upon estimated profits and interest not collected such payment constitutes an advance from the corporation making it and creates a debt to be paid when the profits are realized

or interest paid. Section 573 of the Civil Code provides that "the Directors must not construct any debt or liability against the corporation for any purpose whatever, except for deposits." The Attorney-General is therefore of the opinion that dividends upon uncollected interest cannot lawfully be paid. The Bank Commissioners, in view of this opinion, have issued a circular in which they state that they hope that the Board of Directors of each bank under their supervision will see that the law relating to this subject, as expressed by the Attorney-General, is properly enforced.

**A Bank Robbed at Noonday.**—About noon on July 19, the Coldwater (Mich.) National Bank was robbed of a box of valuable jewelry, the property of Henry C. Lewis, the President of the bank. The Cashier was alone in the place at the time, and was busy, when a man entered the rear door and stole inside of the counter and went into the vault. On his retreat he made a slight noise, which the Cashier noticed. The person with whom the latter was engaged slipped out suddenly, leaving about \$50 in the bank. The two were soon joined by a third man when all three left in a buggy. Citizens and officers followed in hot pursuit and headed them off, but being poorly armed, the pursuers were bullied by the robbers, who thus got a considerable start.

**The Lincoln National Bank**, which was established in Vanderbilt avenue, New York, on January 12, 1882, was removed to the new building on Forty-second street, opposite the Grand Central Depot, and reopened on July 3, 1883. The new structure is owned by the Lincoln Safe Deposit Company, which, with the exception of one director, Frederick W. Vanderbilt, is composed of the officers of the bank. The new building has a frontage on Forty-second street of 100 feet and extends back to Forty-first street. It is of brick, stone and iron, and ex-Postmaster-General James, President of the bank, says there "is hardly enough wood in the edifice to make a toothpick." The first floor is occupied by the bank and safe deposit offices. On the other floors are 132 fireproof rooms or vaults for the storage of paintings, bric-a-brac and valuable household goods of various kinds. The safe deposit vaults are of steel and "Franklinite." Each door weighs 8,200 pounds.

The bank deposits at a recent date were \$1,467,000. The following is a list of the officers of the bank:—President, Thomas L. James; Vice-President, Alfred Van Santvoord; Cashier, Joseph H. B. Edgar. Directors:—William R. Grace, Noah Davis, John W. Harper, Matthew C. D. Borden, John T. Plummer, William Seward Webb, Frederick W. Vanderbilt and Frederick Kuhne.

**Curious Story about a Smart Bank Teller.**—An interesting story is told of the way in which a paying teller of one of the city banks, of a shrewd and provident turn of mind, was able to acquire a competency in a short time, and then retire from his position without the bank having been any the loser by the operation and without having his own reputation blasted. The story is that the bank carried a heavy cash balance to meet such calls as might be made upon it from day to day, and to draw upon in case of a run. This was intrusted to the paying teller. Instead of allowing this sum to remain in the bank's safe, as was the intention of the directors, and as they supposed to be actually the case, the teller invested largely in 6 per cent. bonds and early issues of the Government 4 per cents. These were substituted for the cash, the investor cutting off the coupons and getting the money on them as they became payable. The prospective calls upon the cash could be readily estimated, and anything beyond that limit was converted into bonds. This state of affairs went along smoothly for about two years, the enterprising teller enjoying all the privileges as to coupons of a bloated bondholder.

Soon after the Oby Owen defalcation became public, the directors had a sudden spasm of vigilance, and one day, without a moment's warning, they called upon the teller for his keys, and were about to institute a count of the cash. With an assurance and nerve that struck the investigating directors fairly speechless, he said: "Gentlemen, you cannot have the keys. I will give you my written resignation, according to the terms of our contract, but you shall not have the keys to the safe."

The gentlemen were taken completely by surprise, and knew not what to say or do. Arrest was threatened, but the teller was obdurate, and the directors finally withdrew to talk the matter over. This gave him his chance, and slipping out with the surreptitiously purchased bonds, he speedily converted them into cash, and the right amount was deposited in the vaults. By that time the objection to the surrender of

the keys was removed, and the directors and bondsmen, who had been thoroughly nonplussed and thoroughly frightened by the refusal, found their heaped-up thousands secure and the bank on as sound financial bed-rock as it had ever been. The fact that the teller had just disposed of a large amount of bonds, however, led to the discovery of the way in which he had been using the funds of the bank for his own emolument, and the resignation went into effect. During the time between the purchase and sale of the bonds they had largely appreciated in value, so that during the transaction the teller had cleared between \$50,000 and \$60,000 from the rise in value and the coupons. The bank was none the poorer from the operation, and attempts made to compel the employee to disgorge his profits were unavailing. Public prosecution would have given the affair unpleasant notoriety for both parties, and the story has consequently been closely kept.—*St. Louis Globe-Democrat*.

**Illinois National Banks.**—Since the organization of the national banking system, 189 national banks have been established in Illinois, of which 152 are still in operation, with a combined capital of \$19,037,843, and an outstanding circulation of \$10,841,221. The total circulation issued to these banks reaches the sum of \$40,591,025. The individual deposits of Chicago exceed in amount all those of the rest of Illinois. The First National has more deposits than any other bank in the country outside of New York City. One bank has \$19,000,000 of deposits; two have nearly \$10,000,000 each; one has over \$6,000,000, and two have nearly \$5,000,000. Only one bank in the State outside of Chicago has over \$1,000,000—the Alton National Bank. There have been only six failures among the Chicago national banks—the worst being the Cook County, in 1875, with liabilities of \$1,096,530, of which only 8 per cent. was paid.

**New Money Order Rates.**—On July 1 the new tariff on domestic Post-office money orders went into effect in accordance with the act of Congress of March 1. From that date money orders from all money order offices in the United States are issued to any amount from 1 cent to \$100. Fractional parts of a cent must not, however, be introduced into the order. For sums not exceeding \$10, the new tariff is 8 cents; for sums over \$10, but not exceeding \$15, the charge is 10 cents; for sums over \$15, and not exceeding \$30, the rate is 15 cents, and for each additional \$10 an additional 5 cents is added to the rate up to \$30; between \$30 and \$100 the charge is 45 cents. Postmasters are instructed to refuse to issue in one day over three orders to the same remitter, in favor of the same person, and payable at the same office. International orders remain unchanged as to rates.

**First National Bank of Washington, Iowa.**—The managers of this bank have for some five months past been erecting a new building to take the place of the former one, which after twenty-five years service was destroyed by fire. The construction was carried on under the supervision of the President, Mr. Norman Everson, and the result does him great credit, as the building is not excelled in beauty, strength and convenience by any bank building in the State. It is deeper than the old building and lighted in front with large panes of plate glass. The counters and fixtures are in cherry and maple in the natural colors, handsomely ornamented and finished. This part of the work was suggested by the Cashier, Mr. W. G. Simmons. The building will be heated by steam. The ponderous gas-lit safe is 6x11 feet in extent, its doors being protected by a time-lock.

**Bold Attempt to Rob a Bank Messenger.**—On July 6, a very tall, well-dressed man made a daring attempt in St. Louis to rob a bank messenger in the business thoroughfare of the city. John Gerhaeuser, messenger and collector for the German-American Bank, started on his regular trip among the banks a little after noon. He visited the Fourth National and there collected \$1,800. With this money and a number of checks in his book he stopped at the Continental Bank to cash a small check. There were at the time probably twenty-five people near him. Suddenly he felt a suspicious tug at his pocket, and whirled just in time to see a man making for the door. The messenger realized in an instant that he had been robbed. He is a little man, but hesitating not a second, he made a spring, alighting fairly on the robber's shoulders, at the same time seizing the book containing the money and checks, while the robber held in his hand. The thief, who was a very muscular fellow, shook Gerhaeuser off, and at the same time another man, evidently a pal, raised a loaded cane to strike the messenger. A man caught hold of the cane, or Gerhaeuser would

have received a terrible blow. The thieves fled, and, though they were followed by a great crowd, they managed to elude their pursuers. They obtained nothing. Gerhaeusser found his money all right, but a few small checks were lost.

#### MISCELLANEOUS BANK ITEMS.

— The Bank of Evansville, (Minn.) was burnt out on July 5, with a loss stated at \$6,000.

— R. H. Parks & Co., brokers, of New York and Chicago, who suspended in June, have since made an assignment.

— Several "trading parlors" have been recently established in Chicago in which women deal in grain and provisions.

— Counterfeit (photographed) ten-dollar silver certificates are being circulated to some extent in Southern Wisconsin and Northern Illinois.

— The Woodbury (Conn.) Savings Bank was entered by burglars recently and robbed of over \$4,000, of which it appears only \$80 was the property of the bank.

— Receiver S. H. Hurd, of the Third Avenue Savings Bank, New York, expects to finally wind up in the fall after paying another dividend of five or ten per cent.

— Receiver Willis S. Paine of the Bond Street Savings Bank, New York, (who has been appointed Superintendent of the Bank Department) is now paying to depositors another dividend of 5 per cent.

— Charles E. Upton, ex-President of the failed City Bank of Rochester (N. Y.), has been tried on a charge of overdrawing his account and receiving deposits after the bank was insolvent. He was convicted.

— The Dime Savings Bank, Jersey City Heights, which failed three or four years ago, is paying a final dividend of twenty per cent. to depositors. The dividends previously paid amounted to fifty per cent.

— Mr. Nathan D. Wendell, Vice-President of the Merchants' National Bank, of Albany, N. Y. and formerly Treasurer of the State, recently sustained a stroke of apoplexy, but it is hoped that he will recover.

— Mr. Alfred M. Bull, for over twenty-one years connected with the Phenix National Bank, New York, and for some time past Assistant Cashier, has been appointed Cashier in place of Mr. John Parker, deceased.

— John Halliard, ex-President of the defunct Mechanics and Laborers' Bank of Jersey City, whose sentence to two years imprisonment was recently affirmed by the Supreme court, has surrendered himself to the authorities.

— J. H. Platt, Assignee of the broken Market Savings Bank, of New York, wishes to pay a final dividend of  $1\frac{1}{4}$  per cent. and be discharged. A dividend of 38 per cent. has already been paid. The depositors are dissatisfied.

— The Comptroller of the Currency has declared a final dividend of  $8\frac{1}{4}$  per cent. in favor of the creditors of the First National Bank of Norfolk, Va., making in all  $57\frac{1}{4}$  per cent. amounting to \$101,389, paid to the creditors of this bank.

— Charles Rogers, alias Rufe Minor, alias Pine, one of the most notorious bank thieves of the country, was arrested in New York recently, and taken to Baltimore on a charge of robbing the Bank of Baltimore of \$12,000, in September last.

— The schedules of Vanderhoof, Morrison & Co., the New York brokers, who assigned in June, show liabilities, \$119,908; nominal assets, \$83,398; actual assets, \$32,705. Other assets amounting to \$64,000 had been hypothecated as collateral security.

— A desperate attempt was made on July 7 to rob the Belleville (Ill.) Savings Bank, by two men, one of whom engaged the attention of the Cashier while the other passed behind the counter and grasped for a pile of money. Their effort was defeated through the vigilance of the clerk, who gave an alarm. The villains escaped by taking flight in a buggy.

— Receiver Williams of the City Bank of Jersey City, began on July 24 to pay the first dividend of ten per cent. to the creditors. He says they will realize less than fifteen per cent. in all. The late President, Cashier, and bookkeeper are in State prison.

— The Cincinnati Oil Exchange, with M. F. Thompson as President, organized to promote business dealings in petroleum, was formally opened on July 18, in rooms in Pike's Opera House, adjacent to the Chamber of Commerce. Mr. A. G. McLean is the Secretary.

— Judge Donohue of the New York Supreme Court has made an order directing the Central Trust Company, which is the receiver of the New York Loan and Trust Company, to pay a dividend of 10 cents on the dollar to the stockholders of the latter company.

— Edward P. Wetzler, a Philadelphia stock broker, who is charged with fraudulently converting to his own use \$8,400 in railroad bonds, and with larceny as bailee, and the embezzlement of \$4,700 belonging to Dr. Benjamin Miers, of Branchtown, Pa., has been given a hearing and held in \$2,500 for trial.

— When Hosea Webster, the lately deceased President of the Brooklyn (N. Y.) Savings Bank, first assumed the management in 1847, the deposits amounted to \$191,000 with \$8,000 surplus. When he died the deposits were \$20,000,000 and the surplus nearly \$4,000,000. The number of depositors increased from 5,000 to 45,000.

— The First National Bank of Franklin, N. Y., was robbed on July 11 of \$800 in silver. Two families living near were bound and gagged, and after two hours' work the burglars blew the safe open. The explosion tore out nearly the whole front of the building and set fire to the papers. The money of the bank was in another safe.

— Timothy Smith, who had been for three years a trusted Cashier of the firm of John Pickering & Mosely, stock brokers of Boston, was recently discovered to be a defaulter to the extent of \$17,300. The amount does not materially injure the firm's standing. He waived examination and was held in \$25,000 bail. The money was lost in speculation.

— The Hon. Henry H. Van Dyck has been elected President of the American Safe Deposit Company, at Fifth Avenue and Forty-second street, New York, vice Sir Edward M. Archibald, who was compelled to resign on account of ill health. Mr. Van Dyck was formerly United States Assistant Treasurer in the same city, and was at one time Superintendent of the Banking Department of the State.

— Boston claims to be the second banking city in the Union, far outranking Chicago and Philadelphia. It has 63 national banks, with a combined capital of \$60,450,000, and a total outstanding circulation of \$30,441,182. The city has also 88 banking establishments, having a capital of \$7,988,200, and 4 State banks, with a capital of \$8,150,000, and 14 savings banks, having deposits amounting to \$64,137,146.

— A complimentary dinner was recently given at Coney Island, to State Senator Kiernan, of New York, by a number of Wall street bankers and brokers, and his political associates. This was a well-deserved compliment to a gentleman who has accomplished in his short political career a good deal for the business community. It was mainly through his efforts that the act was passed relieving call loans for \$5,000 and over from the provisions of the usury law.

— William H. Moyer, who was arrested in September 1879, and sentenced to State prison for abstracting a package of bonds worth \$10,000 on special deposit with the Niagara County National Bank, of Lockport, N. Y., of which he was bookkeeper, has just completed the term of his sentence. It is proposed now to try him on indictments charging him with an embezzlement of \$10,000 to \$15,000 of the bank's funds at the same time, but it is doubtful if the trial will be had.

— Plans have been filed with the New York Bureau of Buildings for a structure on the site of the old Manhattan and Merchants' Bank Buildings, at Nos. 40 and 42 Wall street, which is to be erected by the two institutions jointly. It will be 119 feet high, 7 stories, and basement and cellar, with a frontage of 74 feet and 94 feet deep, and extend through to Pine street. The walls will be of brick, and granite front up to the second story, and granite and blue-stone copings. The roof will be of brick and the general structure fire-proof. The cost of the building is variously stated at \$500,000 and \$1,000,000.

## MICHIGAN STATE AND SAVINGS BANKS.

Through the kindness of the Hon. Charles H. Hodskin, Deputy Treasurer of the State of Michigan, we are enabled to present the principal items contained in the reports of the savings and State banks of the State, as made to the Treasurer, at the close of business on July 2, 1883:

## SAVINGS BANKS.

|                       | Capital.  | Surplus and<br>Undivided<br>Profits. | Loans<br>and<br>Discounts. | Deposits. | Total Resources. | Oct. 2 '82. |
|-----------------------|-----------|--------------------------------------|----------------------------|-----------|------------------|-------------|
| Adrian .....          | \$10,000* | .....                                | \$100,098                  | \$128,238 | \$138,238        | \$130,032   |
| Ann Arbor.....        | 50,000    | \$81,545                             | 285,916                    | 482,058   | 566,691          | 543,062     |
| Central Michigan..... | 50,000    | 15,581                               | 283,590                    | 306,231   | 371,762          | 296,442     |
| Chelsea.....          | 50,000    | 8,934                                | 133,313                    | 129,536   | 183,470          | 141,192     |
| Detroit.....          | 200,000   | 107,475                              | 1,985,134                  | 2,568,939 | 2,930,677        | 2,877,769   |
| Genesee County.....   | 100,000   | 12,398                               | 160,174                    | 262,148   | 379,546          | 330,941     |
| Grand Rapids.....     | 50,000    | 28,368                               | 215,396                    | 255,669   | 399,014          | 308,896     |
| Lenawee County.....   | 60,000    | 33,041                               | 404,079                    | 452,634   | 645,675          | 520,168     |
| Michigan .....        | 150,000   | 18,814                               | 687,940                    | 736,472   | 905,286          | 841,144     |
| Mt. Clemens.....      | 50,000    | 17,026                               | 205,976                    | 182,723   | 249,749          | 202,998     |
| People's.....         | 250,000   | 77,921                               | 2,720,539                  | 3,188,236 | 3,612,482        | 3,150,859   |
| Port Huron.....       | 321,668   | 33,548                               | 321,668                    | 347,357   | 489,924          | 523,465     |
| Wayne County.....     | 150,000   | 145,174                              | 3,025,065                  | 3,560,790 | 3,855,965        | 3,659,530   |
| West Michigan.....    | 25,000    | 1,232                                | 56,841                     | 40,195    | 66,478           | 74,354      |
| Wyandotte.....        | 50,000    | 1,547                                | 119,779                    | 103,491   | 155,037          | 150,529     |

MR. GLADSTONE ON GOVERNMENT FINANCE.—At a meeting of the National Liberal Club of England, held in London, May 3, Mr. Gladstone, in the course of a review of the administrative acts of his Government, said:—It is not from mere extravagance, but it is from disregarding the balance between income and expenditure, that those cases of confusion have arisen in different countries which have found their upshot in revolution and ruin. As long as you keep your income up to your expenditure, and the people pay their way, why, in a country like this, if they find the burden too heavy they will take care that you reduce your expenditure, and, therefore, this is the real test and safeguard, and the true corner-stone of all sound finance.

## NEW BANKS, CHANGES, FAILURES, ETC.

## BANKERS' OBITUARY RECORD.

---

**Bean.**—James S. Bean, Vice-President and General Manager of the Ogdensburgh Bank, Ogdensburgh, N. Y., died July 10, 1883. He was a prominent and highly-esteemed citizen of that place.

**Bean.**—Joseph S. Bean, Cashier of the National Exchange Bank of Augusta, Ga., died on June 20th, after a lingering illness. He was born at Tamworth, N. H., and engaged in commercial pursuits in Boston when a youth. At 21 he removed to the South, and before the war carried on a hardware business in Augusta. After the war he became Cashier of the Merchants and Planters' National Bank, and later Cashier of the National Exchange Bank, which position he filled with ability and credit.

**Bentel.**—Philip Bentel of the banking firm of P. Bentel & Co., Freedom, Pa., died June 29, in the seventy-seventh year of his age. He was one of the oldest and most highly respected residents of Beaver county. Up to two years ago he was as active as a man of fifty.

**Brush.**—William B. Brush, a member of the New York Stock Exchange, died July 1, aged thirty-four years. He had been a member of the Board for twelve years.

**Clymer.**—William H. Clymer, President of the First National Bank of Reading, Pa., died July 26, aged sixty-two years. He was ex-President of the Temple and Clymer Iron companies, and a brother of the Hon. Heister Clymer.

**Curtenius.**—Col. Frederic W. Curtenius, President of the Kalamazoo City Bank of Kalamazoo, Mich., died July 13. He was graduated at Hamilton College in 1823, and then after beginning the study of law, joined the South American patriot cause under Bolivar. At the age of 18 he embarked for South America, and was commissioned Lieutenant in the New-Granada army; was wounded and returned to New York, and in 1831 was made a Colonel of State militia. He went to Kalamazoo in 1836; in 1847 raised a regiment and went into the Mexican war, serving until the close. From 1855 to 1861 he was Adjutant-General of Michigan, and at the outbreak of the war he raised and commanded the Sixth Michigan Infantry. In 1856 and 1867 he was State Senator from Kalamazoo County, and in 1863 he was Collector of Internal Revenue of the Fourth District of Michigan.

**Harker.**—The Hon. James Harker, President of the First National Bank of Storm Lake, Iowa, died on July 5, aged forty-eight years. The deceased was a man of great force of character, of strong convictions, very prudent in business, with exemplary habits. These characteristics, which are seldom combined in one person, were associated in him with true Christian charity. Beginning life with slight education or assistance from friend, he became a member of the Wisconsin Legislature at the age of twenty-eight. He afterward removed to Jefferson, Iowa, where he engaged in the milling and general business, and in 1874 settled in Storm Lake, where he bought a large quantity of Government land, and was instrumental in having the branch of the C. & N. W. R. R. run through that section.

**Henry.**—William T. Henry, banker, of Mineral Point, Wis., died July 2, 1883, aged fifty-nine years. He was born at St. Louis, Mo., in 1823, and moved to Mineral Point in 1834. He made a trip to California in 1849 and again in 1855. He was a lawyer by profession and served as clerk of the United States court in his native town. He also served several terms as Mayor. The bank was established in 1861 and he retained the active management until his death.

**Hulett.**—S. P. Hulett, of the banking house of Hulett & Gaylord, Sodus, N. Y., died on June 23, 1883, at the age of sixty-four years. He was born at Sodus and was in active business there ever since the year 1847. He organized the above-named firm, in connection with Mr. C. D. Gaylord, October 1, 1881.

**Kendall.**—Henry L. Kendall, a prominent citizen and business man of Providence, R. I., and President of the National Exchange Bank, died July 10, 1883, at the age of seventy-eight years.

**Marvin.**—Charles R. Marvin, member of the New York Stock Exchange, died July 7. Mr. Marvin had retired from active business since 1873 but retained his Exchange membership, being, since the death of Col. Stebbins a year ago, the senior member of the organization. He was born in Connecticut in 1811 and came to Brooklyn over fifty years ago. His first experience on the "street" was gained as clerk for Col. Stebbins. In 1834 he joined the Exchange, having founded the firm of Marvin & Hays, which became successively C. R. Marvin & Co., and O. R. Marvin's Sons & Co. Two of his sons now compose the latter firm. During his long business career he held several positions of trust, being at one time Treasurer of the Chicago & Northwestern Railroad Company, and was at the time of his death Vice-President and lately Acting President of the Brooklyn Trust Company.

**Patterson.**—Colonel William C. Patterson, late President of the Union Trust Company of Philadelphia, died June 20, aged about seventy-one years. He was born in East Tennessee in 1813, and went to Philadelphia in 1820. At an early age he entered the counting-house of his brother, Gen. Robert Patterson, who afterwards took him into partnership. In 1849 he was chosen President of the Pennsylvania Railroad Co.; in 1854, served a term in the Legislature; was chosen President of the Little Schuylkill Railroad in 1857, and in 1869 organized and became President of the Southern and Atlantic Telegraph Company. He organized the Union Trust Company only about a year ago, and relinquished the Presidency on account of the malady which soon after caused his death.

**Sherman.**—Robert L. Sherman, a wealthy farmer living near Watertown, N. Y., who shot himself on July 9, was formerly Secretary and Treasurer of the Jefferson County Savings Bank.

**Stickney.**—Charles L. Stickney, Vice-President of the Oriental Bank, New York, died June 26, aged seventy-one years. He was born in Boston in 1811, but had been since 1831 engaged in the mustard manufacture in New York, his establishment being the largest of the kind in the country. Mr. Stickney was a man of strict business habits, and of the highest integrity. Personally he was very liberal and enjoyed the respect and love of a large circle of friends.

**Waterman.**—James S. Waterman, President of the Sycamore (Ill.) National Bank, died July 19, in the 64th year of his age. He was born at Franklin, Herkimer Co., N. Y., and in 1838 removed to Illinois. He was one of the first surveying party which surveyed Northern Illinois. He afterward started a store in Old Sycamore, and, in 1855, a bank in connection with it, which afterward became the Sycamore National. He was the earliest merchant in the place, the first banker, and the wealthiest person, and during the forty-five years that he resided there he was eager to do anything to aid its prosperity.

**Webster.**—William V. Webster, Secretary of the Dry Dock Savings Institution of New York, died June 28, at the age of fifty-six years. He was born in New York, and was connected with the Dry Dock Savings Institution since 1858, being appointed Secretary in 1872. He was a man of engaging manners and a warm heart, and is mourned by a host of friends.

---

**Notice.**—It is now well understood by JOURNAL subscribers that the business of THE BANKER'S AGENCY is conducted by Messrs. Bradford Rhodes & Co., who are also the publishers of this magazine. The Agency is doing good service for banks and bankers already admitted as subscribers. Concerning the banking institutions which have failed or become embarrassed during the past few months, Agency subscribers have in every case been advised in time to protect themselves.

## NOTICES OF NEW BOOKS.

*Protection to Young Industries, as Applied to the United States.* A study in Economic History. By F. W. TAUSSIG, Instructor in Political Economy in Harvard College. Cambridge, Mass.: Moses King, Publisher.

This is an essay which gained the Toppan prize in Political Science in Harvard University last year. The author states the argument for the protection of young industries, and, without disputing it, applies it to the case of the United States. The general conclusion drawn from the facts stated is that during the war of 1812, when commercial intercourse with Europe was cut off, the incipient industries of the country were stimulated to a greater extent than would have been possible under a strictly protective tariff; and that, therefore, the high tariffs that have been in existence since were not necessary to secure the existence and prosperity of such manufactures as were destined to be permanently successful. This argument is illustrated by the early history of the cotton, woolen and iron manufactures. The author says: "The stimulus which it [the war of 1812] gave to some manufactures, perhaps shows that the first steps in these were not taken without some artificial help. The intrinsic soundness of the argument for protection to young industries is therefore not touched by the conclusions drawn from the history of its trial in the United States." The arrangement of the work is excellent, and it is a welcome addition to the literature of Political Economy.

*The American Citizen's Manual.* Parts I. and II. The functions of Governments (State and Federal). By WORTHINGTON C. FORD. New York: G. P. Putnam's Sons. 1888.

We had occasion to notice the first part of this work some months since, with commendation. The work, as a whole, gives in two handsome volumes (of 146 and 184 pages respectively) a very complete account of the functions of the United States Government and the State governments, and of the relations of the citizen to each. The whole is set forth with surprising brevity, considering the nature of the subject. Part II. is divided into four chapters, as follows: (1) Protection to Life and Property, (including the topics personal rights, and protection to property); (2) The Federal Government (including war powers, foreign relations, etc.); (3) Functions of the State Governments (including corporations, education, charitable institutions, and immigration); (4) State Finances, (including taxation, debts, and coinage and currency). It is a very useful work.

*Land and Labor in the United States.* By WM. GODWIN MOODY. New York: Charles Scribner's Sons. 1883.

In this well-printed and well-bound volume of 360 pages, the author attempts to deal with the subject of "the condition of the great masses of the people—their idleness and their employment, with their consumption as well as production." The radical change in all our methods of production is another topic which he finds to vitally affect the welfare of mankind. These subjects, he says, have been uniformly overlooked or designedly ignored, and he has "failed to find that others have deemed them of sufficient moment to merit even the most casual inquiry." It is not surprising that an author who in his preface reveals such a slight acquaintance with the labors of the writers on social and economic topics of the present and the past generation, should also exhibit throughout the body of his work the crudeness of idea and self-confidence that we have had to notice on several occasions in works of this class. He brings together a large mass of statistics, part of which are valuable, but the conclusions are generally directly opposite to those that a judicial consideration of the

facts would warrant. We are expected to reconsider the long-settled question whether machinery is not harmful to the laboring classes. We are told that "when the war closed we simply went back again to the idleness and distress of four or five years before;" that "circulating capital is generally understood to be money;" that "our political economists have dealt solely with a matter which lies upon the surface of political and social organization—with money;" that England is the "great apostle of Free Trade," and that for a "full century it has occupied that position." Space is lacking in which to discuss the remedies proposed for the troubles affecting the laborers of the country.

### AFTER BANK HOURS.

— "When the door is closed, the safe is locked,  
And loans and discounts are forgot."

— Verse, *L. F.* [which being interpreted,  
means, blank verse by Longfellow].

— The most difficult arithmetic that a man has to face is when he tries to reconcile a \$500 salary with a \$600 wife.

— Says Dr. Deems, the genial pastor of the Church of the Strangers, New York: "I know men down in Wall street, and I will even go so far as to say in Washington, who are as pure as any saints I ever saw." The doctor deems this a safe speech, for the chances are that he never in his life saw a saint anywhere.

— At a recent Lord Mayor's dinner, the health of the three "present" foreign "consuls" was given, but the toastmaster got it—it was probably pretty late in the evening—"The Lord Mayor drinks the health of three per cent. consols." They are generally pretty healthy.

— In this age of adulterations even comparatively primitive Spain has not escaped. One Spanish magistrate has hit upon a highly original mode of dealing with them. His proclamation runs thus: "All articles, in shape of wines, groceries and provisions, which upon examination and analysis are proved injurious to health will be confiscated forthwith and distributed to the different charitable institutions."

— Sheridan once told a story of the exquisite good breeding of a banker's clerk, of whom the wit had borrowed some money, and to whom he actually repaid it. "Didn't he look astonished?" asked a discourteous friend, "No," said Sheridan; "he was just going to look astonished, when he remembered his manners, and swept away the money as unconcernedly as if he had not given up any idea of seeing it again."

— The difference:—"How long will it take you to cure me, doctor?" "Well, Mr. Blank, I think you can get back to your desk at the bank in a month, but you will have to remain under treatment for several years." "But you mistake; I am not Mr. Blank, the banker, but Mr. Blank, the letter-carrier." "Oh, that alters the case. There is nothing the matter with you but a little billiousness. You will be well in a week!"

— The Cashier of a country bank suddenly expired. When the President reached the institution the next morning he found a committee of depositors busily engaged overhauling the books. "What are you doing?" he asked, incensed by the intrusion and resenting the presence of the committee as an interference with his authority. "Don't you know the Cashier's dead?" "Yes," returned the spokesman, "and we're looking through his accounts to see whether he died a natural death."

THE FAILURE of the Ward Iron Company at Niles, O., caused a run on A. G. Bentley & Co., bankers of that place, and they were compelled to make an assignment on July 26.

THE AMERICAN NATIONAL BANK has been organized at Nashville, Tenn., with Col. E. W. Cole as President, and some of the leading merchants as stockholders. The capital will be \$500,000. Operations will be begun September 1.

## RAILROAD AND INVESTMENT NEWS.

(A synopsis of information regarding Railroad and other Corporation affairs of interest to Bankers, Investors, &c. *Classification:* I. New Issues. II. Reports. III. Miscellaneous Investment News.)

### I. NEW ISSUES.

**DETROIT, MACKINAC AND MARQUETTE.**—The capital stock has been increased to \$10,000,000.

**NEW YORK AND ATLANTIC.**—The Receiver has been authorized to issue \$100,000 worth of 6 per cent. receiver's certificates, for the purpose of completing the road and improving the slip and bulkhead at Gowanus, Long Island.

**EAST TENNESSEE, VIRGINIA AND GEORGIA.**—The report that this company intended to make a new issue, common and preferred stock and bonds, is denied. The syndicate controlling this system, however, are reported to own a well-greased printing press and a ton or so of paper!!

**SCHUYLKILL AND LEHIGH.**—The stockholders have authorized a new mortgage for \$1,000,000, to be used in the improvement of the road, and the redemption of the first mortgage bonds.

**SHAMOKIN, SUNBURY AND LEWISBURGH.**—The Philadelphia and Reading Railroad Company offered in June \$1,000,000 of 5 per cent. first mortgage coupon bonds of the company, redeemable in 1912. They have been all taken at prices ranging from 95 to 98.

**THE CINCINNATI AND EASTERN** stockholders at a recent meeting increased the number of directors to 15. The action of the directors authorizing the issue of \$2,000,000 mortgage bonds, and contracting for the expenditure of the proceeds was approved.

**SOUTH PENNSYLVANIA.**—All the stock has been subscribed, Mr. William H. Vanderbilt heading the list with \$5,000,000, and Dr. Hostetter following with \$2,000,000. Nearly all the Philadelphia and Reading Board of Management have subscribed \$100,000 each. A committee has been appointed to take charge of the construction of the line.

**OREGON IMPROVEMENT COMPANY.**—The Boston "Transcript" says: "Last December the Oregon Improvement Company determined to issue \$2,000,000 of new capital, \$1,500,000 to be used to extinguish the floating debt of the company, and \$500,000 to remain as assets in the treasury. The bondholders did not avail themselves of the subscription privilege, and the company has, we understand, recently sold the entire \$2,000,000 of new stock, mostly to Boston investors."

**LITTLE ROCK AND FORT SMITH.**—It is proposed to fund the coupons falling due next July and January into 7 per cent. ten-year scrip. The floating debt was decreased from January 1 to July 1 by \$160,000.

**RICHMOND AND DANVILLE.**—The stockholders will meet at Richmond on September 12, 1888, for the purpose of voting on the proposed increase of the capital stock from \$5,000,000 to \$7,000,000. The amount is needed, it is said, to pay off the floating debt.

**UNION IRON AND STEEL COMPANY.**—A plan for the reorganization of the Union Iron and Steel Company has been formulated for the consideration of the stockholders. The company owns large mills at South Chicago, iron mines in the

Menomonee range, and other property, valued altogether at \$3,000,000. The plan for reorganization contemplates the issue of 7 per cent. cumulative capital stock of \$4,000,000, \$3,000,000 of it being preferred, and \$1,000,000 common. The preferred issue is to be used in wiping out the old company's liabilities, aggregating \$2,800,000.

**BRUNSWICK AND WESTERN.**—There was recorded in the Dougherty (Ga.) Superior Court, on July 20, a mortgage for \$3,500,000 by the Brunswick and Western Railway Company in favor of the New York Trust Company.

**THE KOOTENAY RAILWAY COMPANY** was organized at Victoria, B. C., on July 14, with a capital of \$5,000,000; \$4,000,000 of it was subscribed at once. Provisional directors were elected, and the work will be pushed forward as rapidly as possible.

**CHICAGO AND WESTERN INDIANA.**—An issue was recently made in London and New York of \$7,200,000 general mortgage 6 per cent. bonds, due 1932. They were offered at par and accrued interest.

**NEW YORK, LACKAWANNA AND WESTERN.**—It is authoritatively stated that only a small portion of the \$5,000,000 construction mortgage bonds will be issued at present. The proceeds of these bonds will be applied to the purchase of additional equipment and to the newly acquired terminal property at Buffalo.

**TOLEDO, ANN ARBOR AND NORTHERN.**—Mr. J. M. Ashley's plan of soliciting aid for the northern extension is to ask no subscription for stock, but to sell to contributors, at par, first mortgage 6 per cent. 20-year bonds, which are a first lien on all property, present and future, of the road, and a second lien on the Toledo, Ann Arbor and Grand Trunk. The issue is limited to \$20,000 per mile of new road.

**CHARLOTTE, COLUMBIA AND AUGUSTA.**—At a special meeting on July 26, it was determined by the stockholders to issue \$3,000,000 of bonds, secured by a consolidated first mortgage, and to be used in funding the present indebtedness and in improving the equipment.

## II. REPORTS.

**CINCINNATI, HAMILTON AND DAYTON.**—The report for the year ended March 31, 1883, shows the following earnings:

|                                    | 1882-3.     |    | 1881-2.     |
|------------------------------------|-------------|----|-------------|
| Total receipts.....                | \$3,088,407 | .. | \$2,981,446 |
| Total expenses, interest, etc..... | 2,751,778   | .. | 2,799,750   |
| Net surplus.....                   | \$336,629   | .. | \$161,696   |

Dividends at the rate of 6 per cent. per annum on the common and preferred stock of the C. H. & D. railroad, amounting to \$214,348, leaving balance of earnings over expenditures, \$122,280; less accrued interest charges, \$74,562; balance surplus, \$47,717.

**ST. JOSEPH AND WESTERN.**—During the year ended December 31, 1882, the earnings were:

|                     | 1882.     |    | 1881.     |
|---------------------|-----------|----|-----------|
| Total earnings..... | \$800,318 | .. | \$750,596 |
| Total expenses..... | 797,067   | .. | 725,330   |
| Surplus .....       | \$11,650  | .. | \$24,263  |

The total surplus on December 31 was \$15,996; unfunded debt, \$158,077.

**PENNSYLVANIA COMPANY.**—The report of this company, which operates the lines of the Pennsylvania Railroad west of Pittsburgh and Erie, for the year ended December 31, 1882, gives the following totals of income account:

|                                    | 1882.       |    | 1881.       |
|------------------------------------|-------------|----|-------------|
| Total revenue.....                 | \$2,990,827 | .. | \$4,074,506 |
| Total expenses, interest, etc..... | 1,122,943   | .. | 1,308,335   |
| Net income.....                    | \$1,867,873 | .. | \$2,766,171 |
| Less dividends on stock.....       | 800,000     | .. | 1,000,000   |
| Balance, surplus.....              | \$1,067,873 | .. | \$1,766,171 |

The balance to credit of income account December 31, 1882, was \$5,160,494.

**INDIANA, BLOOMINGTON AND WESTERN.**—The report for the year ended December 31, 1882, shows that 844 miles were owned against 202 miles in 1881; and 696 miles operated, against 401 in 1881. The earnings and income were:

|                                | 1882.       |    | 1881.       |
|--------------------------------|-------------|----|-------------|
| Total gross earnings.....      | \$2,740,227 | .. | \$1,826,086 |
| Total operating expenses... .. | 1,551,574   | .. | 1,134,874   |
| Net earnings.....              | \$888,653   | .. | \$691,192   |
| Total disbursements.....       | 981,964     | .. | 479,701     |

Balance.....(def.) \$43,811 .. (sur.) \$211,491  
The common stock was \$10,000,000; bonded debt, \$13,637,300; balance to credit of income account, \$582,647.

**CHICAGO, ROCK ISLAND AND PACIFIC.**—The mileage owned and operated in the year ended March 31, 1883, was unchanged, being 1,381. The earnings were:

|                           | 1882-3.      |    | 1881-2.      |
|---------------------------|--------------|----|--------------|
| Total gross earnings..... | \$12,189,908 | .. | \$13,266,643 |
| Operating expenses.....   | 7,109,817    | .. | 7,222,862    |
| Net earnings.....         | \$5,080,066  | .. | \$5,943,781  |

Abstract of income account:

|                          | 1882-3.     |    | 1881-2.     |
|--------------------------|-------------|----|-------------|
| Total income.....        | \$5,640,086 | .. | \$6,006,989 |
| Total disbursements..... | 5,639,143   | .. | 6,555,106   |

Balance, surplus... .. \$943 .. \$51,883

The amount of common stock, \$41,960,000, and bonds, \$17,500,000 (which includes \$5,000,000 Chicago and Southwestern bonds guaranteed) were unchanged.

**CENTRAL PACIFIC.**—The report for the year ending December 31, 1882, was only issued in July. The earnings were as follows:

|                                           | 1882.        |    | 1881.        |
|-------------------------------------------|--------------|----|--------------|
| Total gross earnings.....                 | \$23,662,757 | .. | \$24,094,100 |
| Operating expenses, rentals, taxes, etc.. | 17,101,706   | .. | 14,579,427   |
| Net earnings. ....                        | \$8,560,991  | .. | \$9,514,673  |

Summary of income account:

|                              | 1882.       |    | 1881.        |
|------------------------------|-------------|----|--------------|
| Total income .....           | \$9,573,736 | .. | \$10,809,829 |
| Disbursements:               |             |    |              |
| Interest on debt.....        | \$3,443,418 | .. | \$3,506,292  |
| Dividends (6 per cent.)..... | 3,556,590   | .. | 3,556,530    |
| Total disbursements.....     | \$4,999,943 | .. | \$7,064,823  |
| Balance, surplus.....        | 2,573,798   | .. | 3,745,007    |

The capital stock remains at \$50,275,500; the bonded debt was decreased from \$54,917,000 to \$54,199,000 during the year; the Government bonded debt is \$27,855,680; balance to credit of profit and loss, December 31, 1882, \$23,071,599, against \$20,497,807 at the end of 1881. The mileage owned was unchanged, being 1,215; miles operated, 3,201, against 2,866 in 1881.

**OREGON AND TRANSCONTINENTAL.**—This company which was formed for the purpose of acquiring a controlling interest in the stocks of the Northern Pacific and Oregon Railway and Navigation companies, and to create auxiliary railway and steamships, and other enterprises, makes its annual report for the year ended June 30, 1883, through Henry Villard, the President. During the year the capital stock was increased from \$23,760,000 to \$40,000,000. Of the new stock 50,000 shares were exchanged for 50,000 of the Northern Pacific preferred stock, the remainder being sold for cash. The company held at the close of the fiscal year 162,792 shares of N. P. common; 151,-

300 N. P. preferred and 128,535 Oregon Railway and Navigation. After paying the last instalment, the company will own 8,535 shares more than a majority of the stock of the Oregon R. & N. Co., and now holds more than one-third of the total stock of the N. P. Railroad Co. Enough of the latter stock is held or controlled by directors of the O. & T. Co., and allied corporations to constitute, together with the holding of the O. & T. Co., a majority of the shares. During the year 118 1-3 miles of branch lines were sold to the St. Paul, Minneapolis and Manitoba R. R. Co.; and the lines of the Oregon and California R. R. Co., were leased by the company. In the present fiscal year 350 miles of new road will be built. During the past year 3 quarterly dividends of 1½ per cent. each were paid, amounting to \$1,650,000. The general balance sheet shows a balance of undivided profits June 30, 1883, of \$2,880,896, which includes N. P. dividend scrip of \$1,561,806 market value.

**MOBILE AND GIBARD.**—The report for the year ended May 31, 1883, says: "The gross earnings for the past fiscal year have been \$255,756, and the expenses for the same period \$178,300, leaving a net of \$77,455. Of this net, \$59,649 has been paid out for interest, and the balance, \$17,806, has been used in reducing indebtedness."

### III. MISCELLANEOUS INVESTMENT NEWS.

**DISTRICT OF COLUMBIA.**—A statement of the funded indebtedness of the District of Columbia and the late corporation of Washington, as prepared by Treasurer Wyman, up to July 1, shows that \$1,312,150 of the debt has been retired since July 1, 1878, and a reduction made in annual interest charge of \$70,922. The issue of District 3.65s to date is \$14,502,850. These bonds are limited by law to \$15,000,000. The total funded debt of the District is now \$21,553,900.

**STATE OF IOWA.**—Early in July the State Treasurer paid the last dollar of the State war debt. The State has no other indebtedness of any character not covered by funds now in the Treasury. The returns from the County Auditors to the Auditor of State show a total valuation of the State for taxing purposes of \$440,618,330, the report two years ago being \$412,788,902.

**CITY OF BOSTON.**—The report of the Auditor on July 1 shows the entire debt of the city of Boston to be \$41,281,000, an increase over last year of \$1,118,000; debt, less means of paying it, \$24,858,800; total receipts, \$20,632,500; payments, \$20,195,860.

**CITY OF NEW ORLEANS.**—The "Picayune" speaking of the act of Mr. Oglesby, President of the Louisiana National Bank, in offering to pay the July coupons of the city bonds says: "The situation is a very peculiar one, and this action will go a long way in promoting the acceptance of the terms of the debt settlement under the acts of 1882. Indeed, the bondholders are now coming forward freely, and the rate of issue of the extended sizes is only limited by the ability of the clerical force to handle them properly. The situation is, therefore, favorable for a complete adjustment of the old debt within a short period."

**RAILROAD EARNINGS.**—The "Railroad Gazette" says: "There are seventy-one different railroads that have now reported their earnings for June last. The aggregate mileage and earnings and the average earnings per mile of these seventy-one roads were:

|                        | 1883.        |      | 1882.        |      | Inc. or Dec. | Per cent. |
|------------------------|--------------|------|--------------|------|--------------|-----------|
| Miles of road.....     | 58,048       | .... | 51,823       | .... | 6,220        | 12.0      |
| Total earnings.....    | \$26,545,636 | .... | \$24,623,246 | .... | \$1,922,390  | 7.8       |
| Earnings per mile..... | 457          | .... | 476          | .... | 18           | 3.8       |

"The comparison is with an unfavorable month. Last year the 66 roads reporting for June with an increase of 12.3 per cent. in mileage had an increase of but 0.6 per cent. in earnings, and a decrease of 10.4 per cent. in earnings per mile. In 1881 54 roads reporting had an increase of 13.4 per cent. in earnings per mile; in 1880 50 roads had an increase of no less than 16 2-3 per cent. in average earnings per mile. The month can hardly be called a favorable one this year. In view of the large increase of mileage, a decrease of 3¼ per cent. in earnings per mile would not be very unfavorable, but for the fact that the earnings were unusually bad last year."

The statistics of the "Chronicle" for the first half of 1883 show that out of 69 railroads which report, only fifteen record a decrease in gross earnings, leaving fifty-four that have done better than in the first half of last year. The gain is over

11½ million dollars, or nearly 9 per cent., which is all the more satisfactory as the table last year, containing 56 roads, recorded an increase of 17 million dollars, or nearly 14 per cent., making it clear that the present gain is not a recovery of what was lost in 1882. The St. Paul gained over 1¼ millions; the Canadian Pacific comes next, with \$1,313,902; the Missouri Pacific gains \$957,281; and, as a rule, all the South-western roads have made striking progress, while such roads as the Grand Trunk, the Louisville and Nashville, and the Northern Pacific also stand in the front rank of those having enlarged receipts. A compilation of the net earnings for the first five months of the calendar year shows that there are but few roads that have not done better than at the same time in 1882. It should be remarked that none of these statistics covering the half-year take account of the increased mileage of the railroads.

**CITY OF BROOKLYN.**—Proposals were recently received for the purchase of \$500,000 of 10-40, 4 per cent. arrearage bonds and \$200,000 4 per cent. 10-year local improvement bonds. The former were awarded at 103.93 to 105.35, and the latter at 104.25 to 105.35. The bonded debt of the city was increased \$3,365,000 since January 1.

**STATE OF TENNESSEE.**—A bill was filed in the Chancery Court at Nashville, by John R. Beasley seeking an injunction restraining the State Funding Board from funding the railroad bonds comprising seven-eighths of the State debt. An injunction had already been refused by Judge Williams. Chancellor Merritt took the matter into consideration. Funding began on July 9.

**NEW YORK CITY.**—The Comptroller's statement issued on July 1, shows that on the last day of June the total funded debt was \$180,925,561, not including \$13,532,734 revenue bonds issued in anticipation of taxes, and including \$538,000 debt of the annexed district of Westchester County. The amount in the sinking fund for the redemption of the City debt on June 30 was \$35,535,388. The valuation of real estate by the Commissioners of Taxes and Assessments for 1883 is \$1,079,130,669, against \$1,035,208,816 in 1882. The personal estate was valued at \$197,548,495, against \$198,272,582 in 1882.

**NATIONAL BANK STATISTICS.**—Statement of the Comptroller of the Currency on August 1, 1883, showing the amounts of the National Bank Notes and of Legal-Tender Notes outstanding at dates of the passage of the Acts of June 20, 1874, January 14, 1875, and May 31, 1878, together with the amounts outstanding at date, and the increase or decrease.

## \* THE BANKER'S GAZETTE.

### The Money Market and Financial Situation.

NEW YORK, August 2, 1883.

The general aspect of trade has not changed materially during the past month. The recent heavy failures in the iron and leather trades prove that a strong tendency still exists, in some departments of business, to production of commodities in larger quantities than they are demanded by consumers at the prices asked, or at which they can be produced. The conditions seem to indicate that there is a slight reduction in general prices going on, not marked enough to be generally disastrous, but still sufficient to wipe out the fine margins of profit which are expected in many trades. It will be remembered that at the beginning of the present year we called attention to the fact that during last year there was a falling off in prices, both here and abroad, that was sufficient to explain the somewhat unsatisfactory condition of business. It is very likely that the movement still continues, and such statistics as are at hand confirm this view.

So far as the crops are to affect the fall trade, the prospects can, of course, be better judged than heretofore. The probabilities now are that the spring wheat crop will show a slight increase, as compared with last year, which will partially offset the considerable decrease in the winter wheat crop. Taking the surplus on hand into consideration, the country is in a better condition, as regards the wheat supply, than at this time last year. The outlook for corn is rather better than last year, and not quite so good as at the same time in 1881. It is not now expected that the cotton crop will be better than fair.

As the conditions prevailing in Europe will largely affect trade here, in respect of the exports of agricultural products, the movement of gold, etc., it is important to know what the outlook is there. The conclusion arrived at in the crop report given in a recent number of the London "Times" is that the area of wheat planted in the United Kingdom is from ten to fifteen per cent. below that of last year, and the yield will be below the average. Reports from the continent are very similar in their conclusions. The London "Economist," in noticing the fact that the exchange with New York has moved against London, says: "On balance, this country is believed to be indebted to the United States at the present time, and the number of produce bills coming forward and known to be on the way is large. Hence the drop in the New York exchange is intelligible, as indicating the expectation of the movement of money. Last year—it may be as well to recall the past—the balance of trade was, before the usual produce bills came forward, the reverse of what it is now, and in favor of this country. Hence the movement of money may be likely to follow a

---

\* The financial situation at Boston and Chicago also appears in this department, the reviews being written by the JOURNAL'S correspondents at those cities.

different course this year from what it did last autumn." During the first half of 1882 this country exported 33¼ million dollars of gold and silver, and it was only in the last three months of the year that the current was reversed. The exchange being now slightly in favor of New York, it may be expected, with the increase of the merchandise export movement in the fall, that this tendency will be increased, and that, if there is any movement of gold, it will be in our favor.

The stock market continues dull and, were it not for the strike of the employees of the telegraph companies, uninteresting. This has made the task of upholding Western Union and some other stocks with good backing a difficult one, while weaker properties have been made a prey of false rumors and bear raids. The rumors that were so rife regarding disagreements between the trunk lines, and the probability of a railroad war when a new division of the Chicago traffic had to be made, have been happily set at rest for the present by the agreement that was easily made recently between the various lines. The condition of business at the Stock Exchange is indicated by the fact that seats are valued at \$22,000 to \$25,000, whereas the price a year ago was about \$10,000 higher.

**THE PUBLIC DEBT.**—The debt, less cash in the Treasury, was reduced during July by \$7,900,591, which amount, however, was not used in reducing outstanding obligations. About \$3,000,000 went to pay accrued interest, and the remainder to swell the cash balance. The gold coin and bullion amounts to about 203 million dollars, or 5 millions more than on July 1. The revenue receipts were about 1 million greater during the past month than in July, 1882, while the internal revenue fell off 3¼ millions, and the miscellaneous receipts nearly 2 millions. Altogether, the receipts were 22 million dollars, against \$36,323,724. This shows the effect of the new tax law. The increased customs receipts came from merchandise held in bond waiting for the reduction in duties on July 1. The decrease in internal revenue was caused chiefly by the abolition of the bank taxes, which were formerly payable in July.

A statement prepared by Commissioner Evans estimates the annual reduction in internal revenue at \$42,637,563.

The condition of the Treasury has induced the Secretary to issue the following call, being the 121st :

TREASURY DEPARTMENT, }  
WASHINGTON, D. C., July 26. }

By virtue of the authority conferred by law upon the Secretary of the Treasury, notice is hereby given that the bonds hereinafter indicated will not be accepted for surrender and exchange into 3 per cent. bonds, and that the principal and accrued interest of the bonds hereinbelow designated will be paid at the Treasury of the United States, in the city of Washington, D. C., on the first day of November, 1883, and that the interest on said bonds will cease on that day, viz :

All registered bonds of the acts of July 14, 1870, and January 20, 1871, continued during the pleasure of the Government under the terms of Circular No. 52, dated May 12, 1881, to bear interest at the rate of 3¼ per cent. per annum from August 12, 1881, and which constitutes the residue of those issued under the acts of July 14, 1870, and January 20, 1871, known as continued 5a, and which have not heretofore been called or which have not been offered for surrender and exchange into 3 per cent. bonds of the act of July 12, 1882.

The bonds embraced in this circular are those last dated and numbered, as required by section 3 of the act of July 14, 1870, and include those which have been issued on transfers since the one hundred and twentieth call was issued.

Three months' interest due November 1, 1883, on the above described bonds will not be paid by checks forwarded to the holders of the bonds, but will be paid with the principal to the holders at the time of presentation.

Any of the bonds embraced in this call will be redeemed prior to their maturity

upon presentation to this Department, interest being paid to the date of such redemption.

Bonds forwarded for redemption should be addressed to the "Secretary of the Treasury, Division of Loans, &c., Washington, D. C.," and all the bonds called by this circular should be assigned to the "Secretary of the Treasury for redemption." Where checks in payment are desired in favor of anyone but the payee the bonds should be assigned to the "Secretary of the Treasury, for redemption for account of" ———. [Here insert the name of the person or persons to whose order the check should be made payable.]

(Signed)

CHARLES J. FOLGER, Secretary.

**MONEY AND DOMESTIC EXCHANGE.**—There is a great deal of money which the holders are unwilling to invest in the present condition of the stock market, and which goes to swell the amount floating on the loan market to such an extent that the supply, for the time being, outruns the demand. This applies to call loans on undoubted security. The recent business failures have made commercial paper less desirable, and the rates of discount, therefore, do not correspond with the rate for short loans. The rate for call loans is  $1\frac{1}{4}$ @ $2\frac{1}{2}$  per cent., and for time loans on good collateral,  $4$ @ $1\frac{1}{4}$  per cent. The rate of discount on 60 and 90 days indorsed bills receivable is 5 per cent.; four months acceptances,  $5\frac{1}{4}$ @ $5\frac{1}{2}$  per cent.; and good single names, at four to six months,  $5\frac{1}{4}$ @ $5\frac{1}{2}$ .

The following table shows the range of call loans, and rate on prime paper, for the past five weeks:

|                           | June 30.             | July 7.              | July 14.             | July 21.             | July 28.                        |
|---------------------------|----------------------|----------------------|----------------------|----------------------|---------------------------------|
| Range of call loans ..... | $2\frac{1}{2}$ @ $3$ | $2\frac{1}{2}$ @ $3$ | $2$ @ $3$            | $2$ @ $3$            | $2$ @ $3$                       |
| Rate of discount.....     | $4$ @ $4\frac{1}{4}$ | $4$ @ $5$            | $4\frac{1}{4}$ @ $5$ | $4\frac{1}{4}$ @ $5$ | $4\frac{1}{4}$ @ $5\frac{1}{2}$ |

Following are the rates of domestic exchange on New York on August 1: Savannah, buying,  $\frac{1}{2}$  premium; selling,  $\frac{1}{4}$ @ $\frac{3}{4}$  premium. Charleston, par; selling,  $\frac{1}{2}$ @ $\frac{1}{4}$  premium. New Orleans, commercial, \$1 25 per \$1,000 premium; bank, \$1 50 per \$1,000 premium. St. Louis, \$1 per \$1,000 premium. Chicago, 60@70c. per \$1,000 premium. Boston, par@5c. per \$1,000 premium.

**GOVERNMENT BONDS.**—The tendency recently has been toward higher prices, especially for long term issues.

The following table shows the closing bids for the principal issues of Government bonds on each day of the month of July, and the highest and lowest during the month:

| July | 3 per cents. | 5s, '81. cont'd. | 4½s, '91. coup. | 4s, 1907. coup. | C'y 6s, 1899. | July | 3 per cents. | 5s, '81. cont'd. | 4½s, '91. coup. | 4s, 1907. coup. | C'y 6s, 1899. |
|------|--------------|------------------|-----------------|-----------------|---------------|------|--------------|------------------|-----------------|-----------------|---------------|
| 2    | 103¼         | 102¼             | 112¾            | 119¾            | 131           | 19   | 103          | 101              | 112¾            | 118¾            | 133           |
| 3    | 103¼         | 102¾             | 112¾            | 119¾            | 131           | 20   | 103          | 101              | 112¾            | 118¾            | 132           |

| 16   | 103          | 101              | 112¾            | 118¾            | 133           | High | 103¼         | 102¾             | 112¾            | 119¾            | 133           |
| 17   | 103          | 101              | 112¾            | 118¾            | 133           | Low  | 102¾         | 101              | 112¾            | 118¾            | 131           |
| 18   | 103          | 101              | 112¾            | 118¾            | 133           |      |              |                  |                 |                 |               |

**FOREIGN EXCHANGE.**—The rates of foreign exchange continue high, which is partly caused by the high rates of interest prevailing in London; but the tendency

appears to be downward, as might be expected with the increased movement of produce to Europe. The market is dull. Following are the posted and actual rates of foreign exchange on August 1: Bankers' sterling, 60 days, nominal, \$4 84; sight, nominal, \$4 87½; 60 days, actual, \$4 83@ \$4 83½; sight, actual, \$4 86½@ \$4 87; cable transfers, \$4 87@ \$4 87½; prime commercial sterling, long, \$4 82@ \$4 82½; documentary sterling, 60 days, \$4 81½@ \$4 82; Paris, bankers', 60 days, 5 22½@ 5 21½; sight, 5 19½@ 5 18½; Antwerp, commercial, 60 days, 5 25@ 5 23½; Swiss, bankers', 60 days, 5 21½@ 5 20½; sight, 5 18½@ 5 18½; Reichsmarks (4), bankers', 60 days, 94½@ 94½; sight, 94½@ 95½; Guilders, bankers', 60 days, 30½@ 40; sight, 40½@ 40½. Paris dispatches quote exchange on London 25f. 20c.

The following shows the posted rates for prime bankers' sterling bills on London at 60 days and sight, cable transfers, and prime commercial sterling at 60 days, together with exchange on Paris on July 1, the changes in the rates as they occurred during the month, and the highest and lowest during the months of June and July:

|              | Bankers  |        |       | Cable      |             |       | Paris    |        |
|--------------|----------|--------|-------|------------|-------------|-------|----------|--------|

THE NATIONAL BANKS have been slightly increasing their holdings of three per cents, so as to replace 3½ per cents redeemed. Some reduction in the circulation may reasonably be expected within a few months to come.

The following will show the amount of each description of bonds held by the Treasurer to secure national bank circulation, on or about the dates indicated:

|                              | May 1.        | June 1.       | July 1.       | August 1.     |
|------------------------------|---------------|---------------|---------------|---------------|
| Currency 6 per cents.....    | \$3,502,000   | \$3,502,000   | \$3,552,000   | \$3,452,000   |
| 5 per cents .....            | 15,000        | 15,000        | 15,000        | 15,000        |
| 4½ per cents .....           | 38,180,400    | 38,899,900    | 39,408,500    | 39,797,500    |

| Total .....                  | \$357,228,750 | \$356,588,600 | \$356,551,500 | \$357,151,500 |

RAILROAD AND MISCELLANEOUS STOCKS.—The market has been, for the most part, depressed and feverish, but the outlook is now somewhat better than formerly. The earnings for the first half of the year make a fair showing, and if the present prospects of the crops are realized, we may look to a stronger feeling in the market. Although the great railroad lines have to contend with new competitors, there seems to be no disposition to begin ruinous wars of rates.

The following table shows the highest, lowest, and closing prices of the most important railway and miscellaneous stocks at the New York Stock Exchange during the month of July :

| Companies.              | Highest. | Lowest. | Clos'g. | Companies.             | Highest. | Lowest. | Clos'g. |
|-------------------------|----------|---------|---------|------------------------|----------|---------|---------|

**NEW YORK CITY BANKS.**—The loans and deposits continue large in amount, but the latter are well secured by a surplus of over 9 million dollars of lawful money, above the 25 per cent. prescribed by law for the national banks.

The following shows the condition of the New York Clearing-House banks for a number of weeks past, as well as about this time in 1882 and 1881 :

| 1888.         | Loans.        | Specie.      | Legal-tenders. | Deposits.     | Circulation. | Surp. Res.  |
|---------------|---------------|--------------|----------------|---------------|--------------|-------------|

## Bank, Government, Railroad and Miscellaneous Stocks and Bonds.

### LATEST QUOTATIONS AND OTHER INFORMATION.

The following tables give the latest quotations of stocks and bonds at the New York Stock Exchange. In the case of all but the New York bank stocks the highest and lowest actual prices of a year ago are also given, for comparison. The quotation tables on the following pages include *all securities listed at the Stock Exchange*.

#### NEW YORK CITY BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The Capital and Surplus are as given in the latest official reports, viz.: the National banks June 22, as reported to the Comptroller of the Currency; the State banks, June 22, as reported to the State Banking Department. The Surplus includes the undivided profits on the dates given. The Banks which are *not* members of the New York Clearing-House Association are indicated by a (\*). Not listed at the Stock Exchange by a (†). This table includes all the Commercial banks of New York.

**BOSTON—The Financial Situation, Banking News, &c.**

(From the JOURNAL's regular Correspondent.)

BOSTON, August 2, 1883.

**MONEY MATTERS** are very quiet, but there is no great abundance of surplus capital. Clearing-House rates are 8 per cent., and best business paper 5 per cent., with exceptions at  $5\frac{1}{4}$  to 9 per cent. Choice manufacturing acceptances are passed sparingly at 4 to  $4\frac{1}{4}$  per cent., very little at the lower rate. The recent failures in this city are a disturbing element, but to what extent, and the actual results to be produced, is yet undetermined. The moral effect is bad, from the fact that they occur in the shoe trade, a branch of business heretofore almost exempt from disasters of this kind. "Shoe paper" has stood A No. 1, and single names have heretofore passed readily.

General business is dull, and very few branches of trade but could do more, and most happily too, if it offered. This is partially due to the season of the year and perhaps no more so than should be looked for. The trade is generally hopeful for the fall outlook.

In stocks there is no more to be said favorable here than in the markets of the country elsewhere. Bank stocks are well sustained at fair prices, while manufacturing are more than commonly dull and neglected. Railroads of the better class are all high, and readily taken by investors; speculative securities out of favor. City bonds sell very high, on a basis of  $8\frac{1}{4}$  to 4 per cent., held to maturity, and subject to municipal tax at that, unless holders "dodge it."

BOSTON, August 4, 1883.

**POSTSCRIPT.**—Recent heavy failures have created no alarm in Boston, as frequent inquiries from New York would seem to indicate. There are no Boston banks "in trouble"; (though, of course, it must be said, *sotto voce*, that some of our banks followed the "penny wise and pound foolish" plan, in getting loaded up with large blocks of the leather trade paper without taking the precaution to find out exactly how much had been issued and saddled on the banks through the various channels.) This sort of experience proves expensive to the shareholders, though it is hoped that, being dearly bought, it may lead to some good plan looking to protection in the future.

But, with all the probable loss, no trouble in the banking line need be feared. Fortunately, the losing banks are well up in their reserves, and can afford to charge off their losses and let their shareholders "grin and bear it."

As to the general business public, no individuals are seriously embarrassed, except the failed ones; no feeling of despondency for the future; naturally some want of confidence and extreme caution, which will soon wear off. At present writing there are no indications of further failures of consequence, and it is generally believed that the business public will shortly be moving along with the old-time regularity.

**THE BOSTON CLEARING-HOUSE ASSOCIATION** will shortly move into new quarters expressly prepared for its accommodation. The entrance is on the main street floor, at 66 State street, but the room, or rather hall, is in the rear, two stories having been thrown into one, and amply lighted both from the top and side. The room now occupied is low-studded and inconvenient, up two long flights of stairs, which is very objectionable in view of the large amount of gold coin it has sometimes been necessary to transport back and forth. The "boys," as Manager Snelling calls his daily visiting messengers and clerks, will gladly abandon the old quarters for the new, which will

have all the modern conveniences and be as nearly perfect, for its purpose, as time and skill can make it. If we should make any possible objection, it would be that the room is not as large as it should be, for the wants of the Association.

**CURIOSITIES OF EARLY BANKING IN MASSACHUSETTS.**—The "Old Massachusetts" bank, the first institution in the State and oldest in the country, except the North American at Philadelphia, was incorporated Feb. 7, 1784, and commenced operations July 5, 1784, with a capital paid in of \$253,500, but reduced to \$100,000 the next year and this remained until 1791, when it was made \$300,000, and afterwards further increased.

The "Union" came next (June 25, 1792) and the act of incorporation was strongly resisted on the ground that another bank was not needed in Boston.

The "Nantucket," the third bank in Massachusetts, was chartered Feb. 27, 1796, with a capital of \$40,000, but by act of March 1, 1797 "the amount of capital was reduced to \$20,000," as "by reason of a theft lately committed on the bank," the stockholders were unable to raise so large a sum as \$40,000. March 1, 1803, the Boston (the ninth bank) was chartered with a capital of \$1,200,000, the State in 1811 with \$3,000,000; New England, 1813, \$1,000,000; and Manufacturers and Mechanics' (now Tremont), in 1814, with \$1,000,000—an amount of authorized capital which in those days must have been astonishingly large, especially as we find but one other later bank (the "India" April 9, 1838, \$1,000,000) with a capital over \$500,000, up to 1850.

The following table shows the highest, lowest and closing prices of the most important railway and miscellaneous stocks sold at the Boston Stock Exchange during the month of July:

| Railroads.               | Low.   | High. | Clos. | Railroad Bonds.                                  | Low.   | High. | Clos. |

\* Ex. dividend.

**NEW YORK AND NEW ENGLAND.**—Your correspondent observes that a New York daily paper asserts that the Boston banks are heavily loaded with New York and New England securities in addition to the paper of the recently failed firms. The said newspaper states the fact in a manner calculated to mislead, doubtless with a purpose other than the good of the banks or the business public. Assuming that the banks hold large blocks of the securities (and they have loaned on them to a considerable extent), they are abundantly able at this writing to meet all demands and protect their own interests.

**BOSTON BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.**

The following table gives the latest quotations of Bank Stocks in the Boston market. The Capital and Surplus given are from the last official report, June 22d, and all the banks are National. The surplus includes the undivided net profits. All the banks belong to the Clearing-House, except Bunker Hill, First Ward, Mechanics', National Market of Brighton, People's, and Rookland, which are located out of the city proper, but within city limits, and they clear through other banks.

| BANK TITLE.                      | PAR. | CAPITAL.  | SURPLUS.  | INT. PAYABLE. | AUG. 1, 1883. |       | LAST DIV'D. |       |

(a) Quarterly. (b) Ex-dividend.

**CHICAGO—The Financial Situation, Banking News, &c.**

(From the JOURNAL's Correspondent.)

CHICAGO, August 2, 1883.

- The duties on imports to Chicago as shown by the Custom House figures increased 33 per cent. in the last fiscal year.
- The Northwestern crop reports are excellent. In the corn belt the outlook is said to have improved greatly within a fortnight.
- The Receiver of the State Savings Institution is now paying the seventh and last dividend, 3 8-10 per cent., making in all 48 8-10 per cent.
- The Chicago Grain and Provision Call Board is paying out \$151,000 in dividends. Each member receives a \$100 Board of Trade bond, and \$50 cash.
- Nearly all of the Board of Trade firms which were dragged to the earth by the collapse of the lard deal in June have settled and resumed business.
- The telegraphers' strike materially reduced the volume of business, more particularly on the Board of Trade, which is dependent, to a large extent, on the telegraph.
- The trade dollar war did not extend to Chicago. The coin has been at a discount here for two or three years past, which resulted in driving it out of circulation.
- The majority of the creditors of M. S. Nichols & Co., of the Board of Trade, have signed an agreement to accept the firm's offer of settlement—30 cents cash, and 20 in four months.
- The Chicago Stock Exchange listed petroleum a few weeks ago, but has not yet done a very extensive business in pipe-line certificates. On July 9 they were called for the first time.
- The First Collection District of Illinois (Chicago) paid \$9,119,191 internal revenue taxes during the fiscal year ending June 30. The Fifth District (Peoria) leads all others, having paid \$13,963,625.
- The stock of grain in store in the Chicago elevators, on July 21, was 8,908,502 bu., of which 5,765,533 bu. were wheat. On the corresponding date, 1882, the total quantity in elevator was 2,512,006 bu., and of wheat, 1,163,235 bu.
- The Millers' National Association, under date of June 20, estimate that present indications point to a yield of 358,000,700, bu. wheat in twenty States and one Territory, Dakota. The official figures for 1882 were 466,297,900 bu. showing a shortage this season as compared with last of 107,600,000 bu., or a little over 20 per cent.
- The Receiver of the Farmers', Merchants', and Mechanics' Savings Bank, better known as the "Bee Hive," which failed in the savings bank panic here several years ago, announces that the first dividend will be paid the depositors about Aug. 1. The dividend will be 10 per cent. and after the payment of another, making 20 per cent. in all, the affairs of the defunct institution will be closed up.
- The two Chicago national banks which took \$500,000 5 per cent. Board of Trade building bonds a few weeks ago, report a rapid sale of these securities, and say it is the most successful loan they have ever handled. These bonds were first offered to the public at 97½; on July 18 the price was advanced to 98½ and accrued interest. The authorized issue of these bonds is \$1,500,000. About \$800,000 have been issued.
- The court has recently decided that the stockholders are liable for the stock of the Manufacturers' National Bank held by them at the time of its suspension, about nine years ago. Those stockholders who went through bankruptcy since the

failure of the bank, and the Receiver having neglected to prove up against them, are not to be held liable, this liability being wiped out by their discharge in bankruptcy. Transfers of stock made after the bank closed are declared void. The case is to be referred to a Master in Chancery, to report the amount of debt and the assessment necessary. The original liabilities of the bank were about \$350,000. It is estimated that an assessment of nearly 90 per cent. will have to be made on the solvent stockholders to meet the deficiency.

— The Chicago Board of Trade firm of McGeoch, Everingham & Co. failed on June 15, and the great attempt to corner the lard market was at an end. The aggregate liabilities of the firm were about \$4,000,000, the excess over assets being about \$1,400,000. The affairs of the firm were placed in the hands of a receiver, and five weeks after the failure the creditors were paid 50 cents on the dollar, the amount they agreed to accept in settlement of their claims. The cost of settling this vast estate was less than \$20,000. If the concern had been taken into the courts, the "law's delay" and the expenses of litigation would probably have eaten up so much of the property that the creditors would have received little or nothing, and that only after a long series of months, and perhaps years. Mr. John R. Bensley, the Receiver, has been justly complimented for the care and skill he has exercised in securing such a good and quick settlement.

#### CHICAGO BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, AND LAST DIVIDEND.

Following is a statement showing (1) the Capital and Surplus of the Chicago banks on and since June 22, 1883 (the date of the last official statement), (2) the bid and asked price of their Stock and, (3) the rate and date of last dividend. The Surplus includes the undivided profits. The Clearing-House banks are indicated by a star (\*).

| BANK TITLE.                     | PAR.      | CAPITAL.  | SURPLUS. | DIV'D PAYABLE. | JULY 1, 1883. |       | LAST DIV'D. |            |

The Bank of Montreal, Canadian Bank of Commerce, and Bank of British North America are branches of Canadian institutions, and do not make a separate local report.

‡ Dividend for 6 months on capital stock. † New. § Earnings added to surplus. ¶ Not reported.

FRANCIS M. KERR, who is charged with embezzling \$50,000 from his employers, the Chicago firm of Preston, Kean & Co., was captured in Callao, Peru, S. A., and brought to Chicago by way of the Sandwich Islands and San Francisco, arriving on July 16.

COUNTERFEIT \$20 bills of the People's Bank of New Brunswick are in circulation in Nova Scotia. They are raised from \$1 notes.

# RHODES' JOURNAL OF BANKING.

NEW SERIES. }  
VOLUME XI. }

SEPTEMBER, 1883.

No. 9.

THE comprehensive table (inset) contained in this number shows that the total public debt of the United States, less cash in the Treasury, on July 1 last was \$1,538,781,825; the annual interest charge was \$51,436,709; the debt per head of the population was \$28.41, and the interest per capita 95 cents. The total public debt of France at a recent date was 24,002,751,531 francs, or (reckoned at 5 francs to the dollar) \$4,800,550,306; the debt per head of the population was 642 francs, or \$128.40, and the interest per head 23 francs, or \$4.60. The total public debt of the United Kingdom of Great Britain and Ireland was £763,045,940, or (reckoned at \$5 to the pound sterling) \$3,815,229,700. As the population was not much over 35 millions, against over 50 millions here, it may be readily seen that the debt per capita was many times the amount shown for this country. The annual charge for interest and management of the debt was £29,665,945, or \$148,229,725. The public debt of the German Empire proper is comparatively small, as it was only organized in 1871. The Italian debt was 11,162,561,000 lire, or (reckoning the lire at 20 cents) \$2,232,512,200. This does not include a loan of 729,745,000 lire issued in 1881-2 for the purpose of redeeming the paper currency. The population was 28 1-2 millions. The Russian debt was 4,480,812,699 roubles, or (reckoning the rouble at 65 cents) \$2,912,528,254. The Spanish debt amounted to 12,503,327,576 pesetas, or (reckoning five pesetas to the dollar) \$2,500,665,515, but it was expected that this might be reduced by conversion to about \$1,690,000,000 with an annual interest charge of \$47,500,000, equal to about \$2.67 per head of the population. An important fact to be taken into account in comparing these amounts is that nearly every other country is increasing its debt from year to year, while the debt of this country is being rapidly reduced.

A SUBSCRIBER is "surprised," in view of the determined stand which the JOURNAL made in favor of the repeal of the taxes on bank capital, deposits and checks, that we now "seem to oppose the effort to abolish the equally burdensome tax on circulation." No one who has read the JOURNAL for the past few years will for a moment accuse us of entertaining a trace of hostility to the national banks. But, although we claim to have labored more persistently for the abolition of the bank taxes than any other publication, yet now we hold that there is room for doubt if the contemplated agitation is judicious. After a long struggle the banks have just been relieved from three forms of onerous tax. Is it judicious to so soon begin a new contest for the abolition of the only remaining one? But, it is claimed that the tax on circulation is absurd, unjust, and is a deformity in our revenue system. This sounds like the language of enthusiasm, and not of reason. The repealed taxes were injurious to the banking and general business, and their only excuse for being was the urgent necessity of the Government. But if the circulation were taxed out of existence, when the operation was once complete, the banking and other business of the country would go on much as before. A large portion of the banks of the country do now, and have since 1863, carried on business without circulation. Why should some of the banks be allowed to issue, and others not, unless the Government is allowed something for the privilege. It is a privilege, and one which we believe is paid for in some shape or other in nearly all civilized countries. It seems to be one of the most just forms of raising revenue discoverable. At the same time, however, it is undeniable that the bank circulation cannot be kept up long under the present conditions. But the best efforts of the friends of the national banking system should rather be directed to inventing some new basis for the circulation, than to a futile, and probably disastrous attempt at tax repeal. In conclusion, it may be well to say that we are supported in this assertion by some of the most experienced and judicious banking men of New York.

---

If the Secretary of the Treasury should ever ask the advice of a judicious friend as to whether he ought to relieve a stringency in the money market by paying out the surplus funds in the Treasury, we are sure the friend would reply, "You'll be blamed if you do; you'll be blamed if you don't." The circular of August 15th, in which the Department offers to redeem 5 million dollars per week of the bonds embraced in the 121st call, without rebate of interest, has, of course, drawn out its share of criticism. But the strictures have in this instance been most unjust. For instance, one paper remarks: "It is the same old story, a flurry in Wall street seems to call for immediate remedial attention from the Treasury officials." Now, although there was a flurry in Wall street at the time, yet money was easy and there were

no demands for relief from the Department. But why do we claim that the Department was right in the present instance? because it exactly conformed to a rule which ought to be recognized by every one who pretends to write on the subject. As it is, the only rule in connection with the matter is, indiscriminate condemnation. The rule we mean is, that the Department should conduct its collections and disbursements in such a manner as to affect the money market as little as possible one way or the other. Let us apply the rule to the case in question. On July 26, was issued the 121st call, being for the 32 millions remaining outstanding of the 3 1-2 per cent. "continued" bonds. The call provided that any of the bonds embraced in it would be redeemed prior to their maturity upon presentation to the Department, interest being paid to the date of such redemption. The reason for the latter proviso was that the money was already accumulating in the Treasury. But the demand for money was so slight that it did not induce holders to redeem their bonds. Therefore the Acting Secretary issued, on August 15, a circular to the effect that the bonds would be redeemed at the rate of 5 millions per week, without rebate of interest. The Treasury did not lose one cent by the operation, and it will prevent the money market from becoming stringent through its agency during the fall.

---

THE Nashville "American" of August 4th contains a communication giving a draft of a great banking scheme, which seems worthy of notice. It is from Col. Sterling R. Cockrill, Vice-President and Chairman of the Committee of Ways and Means of the Cotton Planters' Association. His letter embodies the head notes of his forthcoming report to the Association on the question, "What shall we do to improve our condition," and in reply to the question he recommends a petition to Congress for a cotton bank. The scheme embraces the ten cotton States, and includes a combination of cotton mills, cotton plantations, and a proposed cotton planters' bank, as well as the privilege of using cotton lands as security, and of issuing silver certificates of deposit. By way of illustration, the Colonel takes his own county of Jefferson, Arkansas, with an annual crop of 30,000 bales of cotton. These 30,000 are to be converted into yarn at a mill to be built by the combination of the planters of that county, and they will yield in the yarn \$75 a bale, realizing in Manchester \$2,250,000 in silver dollars for the whole. This silver is to be deposited in a cotton planters' bank of Jefferson county, and silver certificates issued for it. The planters will have thus avoided all middle men and many expenses, and realized \$60, instead of \$35 or \$40 in the lint. The annual deposit of \$2,250,000, will enable the bank to discount planters' paper at 6 per cent. on twelve months' notes, secured by real estate. When the cotton is put into cloth by cotton mills, to be erected by the combination,

it will yield \$150 a bale, which gives a capital of \$5,000,000 on deposit. In this way it is expected the cotton belt may be made independent of foreign capital. The above illustrates the working of the scheme merely in one county, but it is intended to apply to the whole South. The "American" says, "There is nothing chimerical in this scheme. But it is the only practical method of securing the capital which is necessary to the desired consummation."

---

WE are sorry to disagree with this opinion. In order to take a view of the matter in the light of this climate, let us look over the illustration again. It is, of course, understood that the main purpose of the plan is to raise capital, or to do without capital a good many things for which capital is generally needed. First, then, the cotton raised in Jefferson county is to be worked in a mill built by a combination of the planters; but we are not told where they are to obtain the capital to build with. Then, having sold the yarn for 2 1-4 million dollars in silver, the money will be deposited in the Cotton Bank and silver certificates issued against it. Is the bank to hold the full amount of silver as a reserve against the certificates as the Government does against its issue? It is morally certain that the Government would as soon allow a bank to issue counterfeit money as to issue silver certificates so as to gain 15 cents on the dollar at the expense of the community, much less to issue them without a full coin reserve. The project takes for granted that the money will be left in the bank to be loaned out to the planters. But if they can afford to leave the money earned from their crops in the bank, why borrow from the bank at 6 per cent., or 1 per cent.? The idea of any sort of a bank lending at twelve months on real estate security is simply preposterous. The bankers and business men of the North are at one in wishing success to the South, but the scheme proposed will not be approved by judicious men of any section.

---

THE subject of the coinage of the silver dollar has been written and talked about until it has grown tiresome, but it cannot be dropped so long as matters continue as they are at present. Two events bearing upon the matter occurred during the past month which cannot pass without notice. First, it has transpired that the silver dollars have accumulated to such an extent that the storage capacity of the several mints and sub-treasuries have once more proved insufficient to accommodate them. It has, therefore, been found necessary to make plans for a new silver vault under the cash room of the Treasury Department, capable of holding 23,000,000 standard dollars. Plans are also being prepared for a new vault at the New Orleans mint. The silver dollars and bullion in the Treasury on August 27th amounted to

118 million dollars. There were 74 million certificates outstanding, leaving 44 millions in silver (fractional currency excepted), the property of the Government.

---

THE other matter is more important. There being a demand for currency in the South and West, Treasurer Wyman has issued a notice to the effect that if gold coin be deposited with the Assistant-Treasurer at New York in sums of \$500 or any multiple thereof, and a certificate to that effect sent to the Treasurer at Washington, he would direct payment of the amount to be made in silver certificates at any sub-treasury which the depositor might designate, or the certificates would be sent by express by the Assistant-Treasurer named to any point desired, at the expense of the consignee. The public is also notified that silver certificates will be furnished in exchange for gold coin by any Assistant-Treasurer in the United States. The meaning of this is simple enough. The Treasury wants to induce people to part with their good gold for its cheap paper by offering a trifle of expressage as a premium. It is only one move in the conspiracy that has been entered into between the Government and the men who are interested in silver bullion, by which they are each making a paltry profit, while the currency of the country is rapidly degraded to a permanent silver standard.

---

It is now morally certain that an earnest effort will be made at the next session of Congress to have a law passed providing for a Government postal telegraph system. The chances are now in favor of its passage, but it is an open question if it would not be better to wait and see if the competition offered by some of the new companies to the practical monopoly of the telegraph business which has been long enjoyed by a single company, will not give the public all the benefits that can be expected from a postal telegraph system. Of course, the fact is not to be ignored that a number of companies have been started in past years, each in turn loudly proclaiming its determination to never sell out to the Western Union, and that each in turn has been quietly absorbed by that great octopus. But it is certain that this process has reached its limit, and it is doubtful if Western Union stock will bear any more water. However, if open competition between companies cannot be realized, then a Government system or, at least, Government supervision will be indispensable.

---

DURING the fiscal year ended June 30, 1883, there was an excess of exports of merchandise over the imports of \$100,683,153, against a like excess of \$25,902,683 in the previous fiscal year. Here is a difference of 75 million dollars in favor of the fiscal year 1883. But in that

year there was an export balance of coin and bullion of \$3,330,942, against a similar balance of \$6,945,089 in the previous fiscal year. Judging from figures which very roughly approximate the above (which are official), the London "Economist," thinks that a specie movement to this country is probable this fall. But an analysis of the data may bring us closer to the true conditions. During the first half of 1882, a balance of merchandise imports of 39 1-2 million dollars was coincident with a specie export balance of 33 1-2 millions. In the second half of 1882, a balance of merchandise exports of 45 1-2 million dollars was coincident with a balance of specie exports too small to be considered. Again, in the first half of 1883 a balance of merchandise exports of 46 millions was coincident with an export balance of coin of over 3 million dollars. What is the meaning of these anomalous facts? Why is it that our excess of imports had to be paid for in hard cash, while our excess of exports brought no returns in the same shape? The reason evidently is that our stocks and bonds have been sent from Europe in large amounts, instead of gold. Nearly every foreign mail brings an account of the demoralized feeling with which American securities are regarded abroad. As soon as there is a change in this respect we may reasonably look for an import of specie.

---

If it is wondered at that the proposal to divide up the Treasury surplus among the various States (which has met with much favor in Pennsylvania) has not been discussed in this publication, the reason is to be found in the fact that the plan was tried once before, nearly fifty years ago, and the consequences were so deplorable that every respectable writer, with whom we are acquainted, who has treated the subject from that time to this has condemned the scheme. There is no probability that it will be tried again in this century. The State of Virginia is now putting in a claim against the Treasury for the last instalment, which it never received under the act of 1836. The Government had better ask for the 2 millions which it loaned to Virginia at that time, with interest.

---

DURING the first half of 1883 the nine principal joint-stock banks of London, realized a profit amounting to £644,303, against £656,353 in the second half of 1882, and £699,182 in the first half of 1882. Last year was, however, an unusually profitable one for the banks, and the showing for the past six months is considered a favorable one. The net profits of the same banks in the first half of 1881 were £574,179, and in the first half of 1880 £540,186, while during the same period of 1879 they did not reach £500,000. During the past six months two of the banks paid dividends at the rate of 15 per cent. per annum, two 10 per cent, one 16, one 12 1-2, one 8, one 7, and one six per cent.

## THE PARIS CONGRESS OF PROVIDENT INSTITUTIONS.

The accounts that have been received respecting the second session of the Congress of persons interested in provident institutions (Congrès Scientifique Universel des Institutions de Prévoyance), which was announced in our July number to be held at the Palais de Trocadéro, Paris, from July 9th to the 16th, represent it as being very successful. Mons. A. de Malarce, the founder and Secretary-General of the Congress, writes as follows:

“ Cher Monsieur:—You will receive by this mail a number of the journals which give the best accounts of the daily sittings of the Congress. We much regret not to have met you there. \* \* \*

“ This second session has created a profound impression. More than twenty-five hundred documents have been sent to the Congress, which added to the six hundred and thirty documents of the first Congress of 1878, form a rich collection—a real treasury of knowledge, as one of the Presidents has remarked. All the States of the civilized world were represented by statesmen, economists, bankers and officials of the highest reputation on matters pertaining to the work of the Congress. Brazil had three representatives—the Baron d'Ourém, M. de Rosorio, and the Chargé d'Affaires of Brazil at Paris, M. the Chevalier d'Avanjo. Other Brazilians, among them M. J. da Silva Mello Guimaraes, of Rio de Janeiro, have sent us valuable documents and memoirs.

The United States, thanks to M. John P. Townsend of the Bowery Savings Bank, of New York, M. the General John Eaton, President of the Bureau of Education at Washington, your Minister of the Interior, and others, have sent or brought a whole library on the provident institutions of the United States, giving historical and statistical reports on these institutions in the various States of the Union.

“ All the members have been so pleased with the Congress, its organization, the discussions, and the documents collected, that they have expressed the desire to meet every three years instead of five years. We will see if that can be brought about. If it is, the third session will be held in 1886, and the fourth in 1889, the centennial of the great year of liberty, 1789. The President of the Republic, M. Grévy, being informed of the sitting of the Congress, expressed to me, on the last day of the session (July 16), through his son-in-law M. Wilson, his desire to receive the members at the Palace de l'Elysée,

if they pleased to come. The reception took place at 11 o'clock the next day; and on that occasion M. Grévy repeated to me what M. Gambetta said shortly after the first Congress, in 1878: You have here accomplished a great thing, a work that will result in the practical progress and well-being of the people, etc."

The society forming the Congress, was established during the Exposition of 1878, the real founder being M. A. de Malarce. Some of its members, world-renowned men, have passed away since the last meeting; its President, Hippolyte Passy, Michel Chevalier, Laboulaye, Schulze-Delitzsch, Franz Deak. The new President, M. Léon Say, touchingly alluded to these losses, and trusted that the good work would show no lack of energy and good results. He spoke in high terms of the volume containing the report of the general meetings as furnishing the very best reading for thinking people—a regular compendium of the "Science of Savings." He referred at some length to the comparative scarcity of the provident habit, and to the vain hopes held out by professional agitators to the working classes.

"So the greatest difficulty for those who are honestly endeavoring to improve the lot of the poorer classes, is not to establish institutions and suggest new methods of facilitating savings, but to combat the idleness and thriftlessness that are encouraged by unscrupulous demagogues. . . . They substitute at least collective for individual savings."

The first sitting was taken up with the speech of M. Léon Say, by addresses from Mess. Luzzati, de Bruyn-Kops, and with a report by the Secretary, M. de Malarce. The second and third sittings were devoted to a thorough discussion of the management of savings banks. The question of State management was considered, M. Luzzati, now as some years ago, defending the complete liberty of the banks, but spoke in favor of postal savings banks. The 670 million lire in the Italian savings banks were employed as follows:

131 millions in mortgages, 93 millions in loans to townships and departments, 26 millions in public funds, 88 millions in Treasury bonds, 39 millions in other public securities, 36 millions in county bonds, 48 millions in commercial bonds and stocks, and 78 millions in discounts and bills of exchange. It is the free control that the banks enjoy that allows them such a variety of investments. M. Léon Say stated that there is no absolute security in the French savings banks, that the control of the deposits by the Government is an evil, and that the rate of interest paid is too high; that the rate should never be as high as that paid on the State debt.

Mutual benefit societies were reviewed, and pension funds and insurance in the last sittings. M. Marco Besso, one of the Italian delegates, offered a prize of 2,500 francs for the best treatise on life insurance. The judges will be Mess. Léon Say, Marco Besso, Cheysson,

Ch. Robert and A. de Malarce. The essays may be in French, English, German or Italian, and will be received up to December 31, 1884.

As we are particularly requested to state the terms of this contest the subject of the essay is given in full, as follows:—What are the means of spreading life insurance (endowments or annuities for old age, assurances after death, etc.) among the poorest working people; to render the assurance the most advantageous for the assured, by reducing the cost to a minimum; to facilitate and popularize regularity in saving with a view to life assurance?

The essays must be marked at the head with some motto, which shall be repeated on a sealed envelope containing the name and address of the author, which envelope will not be opened until the judgment of the committee is delivered. They should be addressed to Mons. A. de Malarce, 68, rue de Babylone, a Paris.

The volume of transactions of the Congress is in preparation, but as it will take some time to complete it, M. de Malarce proposes to soon issue a summary of the work.

---

## THE PUBLIC DEBT.

The August number of the JOURNAL contained an article entitled "The Last Fiscal Year," which showed briefly the changes that occurred in the total public debt, the amount and sources of the Treasury receipts, and the expenditures, during the fiscal year ended June 30, as well as the changes that had occurred in the Treasury reserve. We are now, however, able to present a very complete and satisfactory table which is, in fact, an epitome of the history of the finances of the Government for the twenty-seven years ended July 1, 1883. It may readily be seen that some trouble and expense have been incurred in order to give it in its present form in this publication, but we have no doubt that its utility to the reader will repay the expenditure.

The figures speak so plainly for themselves that there is not much room for comment, but it may be said by way of preface that the data have been all prepared at the Warrant Division of the Treasury Department, and are therefore thoroughly trustworthy. It may be noticed that there is a break in the regularity of the dates, each item being as of July 1 in each year from 1856 to 1883, excepting that under the year 1865 the date August 31 is interpolated. The reason is that on or about that date the national debt stood at its highest point, and in referring to the reduction of the debt incurred by the civil war, comparison should be made with the amount outstanding at that time. Thus, the outstanding principal of the public debt on August 31, 1865, was \$2,844,649,626; on July 1, 1883, it was \$1,884,171,728, a decrease of \$960,477,898. The total debt, less cash in the Treasury, on August 31, 1865, was \$2,756,431,571; on July 1, 1883, it was \$1,538,781,825, a

decrease of \$1,217,649,746. The decrease under the latter head is so much larger than under the former because the cash in the Treasury on July 1 last was \$345,389,902, against only \$88,218,055 on August 31, 1865. The total interest-bearing debt on August 31, 1865, was \$2,381,530,294; on July 1 last it was \$1,338,229,150, a decrease of \$1,043,301,144.

Upon examining other particulars we find that the annual interest charge (exclusive of interest of Pacific Railway bonds) was reduced from \$150,977,697 on August 31, 1865, to \$51,436,709 on July 1, 1883, a decrease of \$99,540,988, or nearly two-thirds. Of course, a large part of this reduction is due to the payment of bonds bearing a high rate of interest and the conversion of others into bonds bearing a low rate.

The last two columns are not the least interesting, showing as they do the debt, less cash in the Treasury, per capita of the population, and also the interest on the debt, per capita. The debt per capita was reduced from \$78.25 on August 31, 1865, to \$28.41 on July 1, 1883, a decrease of \$49.84. The interest per capita was reduced in an astonishingly large proportion, from \$4.29 on August 31, 1865, to 95 cents on July 1, a decrease of \$3.34 per capita, or 78 per cent.

It having already been remarked that the great decrease in the item of interest is largely owing to the payment and conversion of bonds bearing a high rate of interest, it only remains to briefly notice these changes. In 1865 there were outstanding 830 million dollars of 7 3-10 per cent bonds, but they were wiped out in a few years. There were also on August 31, 1865, 1,282 millions of six per cents, which amount was swollen to 1,878 millions by July 1, 1868; and, again, there were at the former date 269 millions of five per cents, which amount was increased to 712 millions on July 1, 1876. The outstanding remainder of these two classes of bonds has, within two years, been either redeemed, or been renewed at 3 1-2 per cent., and the 3 1-2 per cents have been in turn either redeemed or converted into three per cents.

As is shown by the table, all the bonds of any importance that were issued during the war have been redeemed or converted. The outstanding four-and-a-half per cents first appeared in the fiscal year 1877. They now amount to 250 millions, are redeemable September 1, 1891, and cannot, therefore, be interfered with by the Government before that time excepting at the pleasure of the owners. The outstanding 738 millions of four per cents cannot be interfered with until July 1, 1907, unless under a similar condition. The 32 millions of three-and-a-half per cents outstanding on July 1 last, are all called for November 1, or sooner; leaving 318 millions of three per cents to be gradually eaten up by the Treasury surplus as soon as the former are disposed of.

## BANKING LAW—LATEST CASES.

### REPLIES TO LAW AND BANKING QUESTIONS.

[The Editor of the Law Department of RHODES' JOURNAL will furnish, on application of subscribers, further information regarding any case referred to herein, and will answer such questions in banking law as may be of sufficient general interest to warrant publication. A charge is made for special replies when not to be published.]

### NEGOTIABLE INSTRUMENTS—NOTES TO GUARDIAN—SALE FOR HIMSELF.

STRONG V. STRAUSS.

(*Supreme Court Commission of Ohio, May 29, 1883.*)

The purchaser of a promissory note from a guardian when the note upon its face shows that it was made to the guardian will acquire no title to it as against the ward.

A guardian to whom notes had been made as guardian, for the purchase money of real estate belonging to the ward, sold them for his own use, and became insolvent. Another guardian was appointed in his place, and on learning of the disposition of the notes brought a suit against the maker and joined the purchaser, to restrain him from paying them. He succeeded in the trial court, but the intermediate appellate court reversed the judgment. He appealed to the highest court, which decided in his favor. The opinion was delivered by Judge Dickman, who said:

The statutes of Ohio, in plain language, give a guardian power to sell his ward's personal estate only "when for the interest of the ward." But, it may be well inquired, whether after the ward's personal estate has been disposed of by the guardian, at the sacrifice of the ward's interest, there can be no other remedy for the ward, than a removal of the guardian and an action against the sureties? Is the property itself to be irrevocably beyond the reach? The guardian is a trustee, and if one buys from him the ward's personal estate, with actual or constructive notice that the same is held in trust, and under circumstances furnishing reasonable grounds to believe that the sale is not for the ward's interest, the purchaser can acquire no title to the property, if the guardian misappropriates the proceeds of the sale. In such a case, the purchaser is put upon inquiry; he buys at his peril; he can stand in no better position than the guardian himself, and must be held to be a trustee for the wards. In this case, the defend-

ant, Raphael Strauss, at the time he bought the notes was informed as to their origin and the title of the real estate mortgaged to secure them. An inquiry into the title doubtless disclosed the fact, that the real estate of the wards had been sold, and said notes taken as purchase money notes for the deferred payments. The notes on their face plainly told that they belonged to a trust fund. They were put by William Rankin, the guardian, into the hands of a broker for sale; and the defendant purchased them for less than their face value. In buying them—although executed by a solvent maker and secured by mortgage—the defendant realized that he was purchasing at his peril, and that he was running a risk in taking the endorsement of Rankin in his fiduciary capacity alone, and therefore required, in addition, his individual endorsement. In paying for the notes, by drawing his checks to Rankin individually, and not as guardian, the defendant contributed to the concealment of the fact that Rankin was receiving the money as a trust fund. The defendant apparently gave no thought to the interest of the wards. It is not claimed that he made any inquiry of Rankin himself, or in any way sought information, as to whether the interest of the wards would be promoted or sacrificed by the guardian's sale of the notes. It may be said that it would have been of no avail to make inquiry of the guardian himself, who committed the breach of trust. But, there is much force in the words of Sir John Romilly, Master of the Rolls, in a leading case, *Jones v. Williams*, 24 Beav. 62; "With respect to the argument that it was unnecessary to make any inquiry, because it must have led to no results," he says, "I think it impossible to admit the validity of this excuse. I concur in the doctrine of *Jones v. Smith*, 1 Hare 55, that a false answer or a reasonable answer, given to an inquiry made, may dispense with the necessity of further inquiry; but, I think it impossible beforehand to come to the conclusion that a false answer would have been given which would have precluded the necessity of further inquiry." We cannot resist the conclusion that the defendant, at the time he bought the notes, had sufficient warning to put him upon a more thorough inquiry than that which he is shown to have made. Thus put upon inquiry, he might easily have removed all doubt and fortified himself, by declining to purchase the notes, unless the guardian would first obtain leave to sell the same, by application to the probate court. Instead of an unmistakable trust fund to be regarded as sacred, the defendant treated the notes in the hands of the broker as ordinary commercial paper. We do not think that the notes in question should have been so classed. Made payable as they were, to the order of William Rankin, guardian of the minors respectively named in the body of the notes, they could not have the unrestricted circulation of commercial paper, or bills of exchange and promissory notes negotiable by the law merchant. Far from being treated as commercial paper bought before maturity, in the usual course of trade,

for a fair value, we consider it the better rule to hold the defendant as charged with notice of the peculiarly trust character of the notes, and as bound to exercise that high degree of caution in purchasing the same, which the protection of such trust funds demands. Not long after the purchase of these notes by the defendant, Raphael Strauss, the financial condition of Rankin culminated in an assignment by him, of all his property, for the benefit of his creditors; and no portion of the proceeds of the sale of the notes has ever been accounted for by him to his wards, or the guardian who succeeded him.

In the case at bar, we think that the circumstances under which the defendant came into the possession of said notes and mortgage, were such as to give him no title to the same, and that he must be held to have taken the same in trust for the wards.

### BANKING—DEPOSIT FOR COLLECTION—INSOLVENCY OF BANK.

ILLINOIS TRUST AND SAVINGS BANK OF CHICAGO V. FIRST NATIONAL BANK OF BUFFALO, AND RECEIVER.

(*United States Circuit Court, N. D. of New York, March 16, 1883.*)

Though a bank received and collected and then mingled with its own funds, a draft which was sent for collection and remittance to another bank, when its officers knew it was insolvent and must suspend payment within a day or two, the money cannot be recovered from its Receiver unless the identical amount can be traced and distinguished.

A draft was sent by the plaintiff to the defendant bank for collection with instructions to remit the amount received to the Bank of New York, the correspondent of plaintiff, in the city of New York, for its credit. At the time the draft was received the defendant bank was insolvent and its officers knew that it would be compelled to suspend payment within a day or two; but, instead of putting the proceeds of the draft, which it collected, aside, as the special property of the plaintiff, it mingled the money with its own money. The defendant suspended payment on the day the draft was collected, and it had received on that day from depositors \$28,000, and had paid out \$61,000. It had on hand when it opened \$40,000. The plaintiff brought a bill in equity to compel the Receiver of the bank to pay over the amount of the collection, \$6,527 75. The bill was dismissed on the ground that as the money received for the collection could not be distinguished from the money of the depositors, it could not be specially set aside. Judge Wallace, in the opinion, said: It may be assumed that the First National Bank of Buffalo was insolvent when it received the draft for collection; that its officers knew of the insolvency; and that the bank would be obliged to suspend within a day or two; and it may be further assumed that the bank received the draft merely as an agent to collect it of the drawers and remit the collected proceeds, when converted into a draft on New York, to the Bank of New York, to the credit of the com-

plainant. Instead of remitting the proceeds to the Bank of New York the First National Bank of Buffalo kept them and mingled them with the general funds of the bank, the draft having been paid in money, and the money having been put by the bank with its other moneys indiscriminately. All this took place before the bank closed its doors or any proceedings were instituted to compel it to go into liquidation. When the title of the Receiver accrued assets came into his hands more than sufficient for the payment of the draft. Whether any of the moneys collected upon the draft came to the Receiver's hands could not, from the nature of the case, be ascertained. It was undoubtedly a fraudulent act on the part of the defendant bank, in its condition of hopeless insolvency, to convert the proceeds of the draft by mingling them with its own funds so that their identity was destroyed. Assuming that there was a trust relation between the complainant and the defendant bank, and not merely the relation of creditor and debtor, it is incumbent upon the complainant to trace the fund misappropriated by the defendant bank into the hands of the Receiver before it can charge him with the duty of recognizing the complainant's equitable title. There is an insuperable difficulty in doing this which must defeat the complainant's right to relief. All the moneys and assets of the defendant bank, when they were received by the Receiver, came to him as a trust fund for all the creditors of the bank, without preference, subject to the prior lien of the United States, by force of the provisions of the statutes under which the Receiver was appointed; and it would be a violation of law upon his part to set aside any portion of these assets for the complainant, unless its portion is capable of identification, or of being definitely traced and distinguished from the funds of the general body of creditors. A *cestui que trust*, under such circumstances, must be able to point out his fund, or the proceeds which are specifically derived from it, and trace it through its transformations so as to show that it is not a fund or product to which all other creditors have an equal right to resort. From the nature of the fund and the manner in which it was appropriated that cannot be done here. Money ordinarily has no ear-mark. It is not ordinarily the subject of replevin or detinue. "The writ lieth not for money out of a bag or chest; and so of corn out of a sack, and the like; these cannot be known from others." Coke's Littleton, 286b.

Accordingly the cases hold that if a trustee has converted a trust fund into money and mingled the proceeds with his other moneys, so that they were indistinguishable, the *cestui que trust* cannot follow his fund into the hands of an assignee in bankruptcy, or of an executor of such trustee, but must occupy the position of a general creditor of the estate. *Whitecomb v. Jacob*, 1 Salk. 160; *Trecothick v. Austin*, 4 Mason, 29; *Ex parte Mordaunt*, 3 Dea. & C. 351; *Kip v. Bank of New York*, 10 Johns. 63; *Bank of Commerce v. Russel*, 2 Dill. 215; *Re Coan Manufg Co.* 12 N. B. R. 203; *Re Janeway*, 4 N. B. R. 100. In *Story*,

Eq. Jur. § 1259, the doctrine is stated thus: "The right to follow a trust fund ceases when the means of ascertainment fail, which, of course, is the case when the subject-matter is turned into money and mixed and confounded in a general mass of property of the same description." On the morning of the day when the defendant bank received the proceeds of complainant's draft it had cash on hand of about \$40,000. It received during the day about \$28,000 from depositors, and it paid out \$61,000. Every dollar that was received from depositors on that day was as fraudulently taken from them as the complainant's money was from it. Each depositor has, at law, an equal right with the complainant to insist upon the repayment of the money that belongs to him; and the same right would exist in equity, except for the existence of a trust relation between the complainant and the defendant bank, which is more theoretical than substantial.

STOCK BROKERS—PURCHASE ON MARGIN—RIGHT TO SELL  
—NOTICE.

COVELL V. LOUD.

(*Supreme Judicial Court of Massachusetts, April, 1883.*)

A stock broker may sell stock bought and carried on a margin unless the margin is kept good, without notice, when there is a custom to that effect amongst stock-brokers, which is known to the customer.

Action to recover damages for the conversion of stock.

The defendants, who were stockbrokers, bought for the plaintiff, upon his order, some stock, and they were paid \$250 as a margin, which was to be kept good at ten per cent. above the market price. Interest was to be paid on the account, and the defendants agreed to carry the stock. The stock began to decline very soon after the purchase, and, on notice, the plaintiff deposited a further margin; but he failed to make any deposit when the stock still declined, though he was duly notified, but asked the brokers to do the best they could for him, which they said they would do. The stock continued to fall, and the defendants, a few days after the request, sold it at the New York Stock Exchange, without notice to the plaintiff, and the account showed a balance against the plaintiff. No demand was made for this balance for some months, and then the stock had gone up beyond the price at which it was purchased. The plaintiff instead of paying the amount due the defendants tendered them the purchase price, less the margins paid, with interest, and demanded the stock, which was refused. The court on the trial found upon the evidence that at the time of the purchase there was a uniform and well-established usage among stock-brokers, which was known to the plaintiff, to sell stock bought on margin at the brokers' board, without notice when the margin was exhausted. The defendants asked the court to decide, upon this evidence, that the action could not be maintained, but the request was

declined, and the ruling was made that the relation between the parties was that of pledger and pledgee, and that the sale of the stock without due notice to the plaintiff would constitute a conversion; that the usage of brokers to sell stock so held, without notice, was illegal, and that plaintiff was entitled to recover of defendants the market value of the stock at the time demand was made, less the balance due with interest thereon. A verdict was given for the plaintiff according to these instructions, and the defendants carried the case up on exceptions to the rulings. The appellate court sustained the exceptions, and in the opinion, which was delivered by Judge Devens, said: 'The relation of the parties existed by force of a mutual and dependent contract by which the defendants agreed to purchase, and hold or convey for the plaintiff, a certain number of shares of stock, the plaintiff paying a certain sum of money at the time, and agreeing to pay interest on the sums advanced by the defendants, and in case the stock depreciated, to make what is termed "a margin" of \$10 per share in the cost of the market price of the stock, as that might change from time to time. When the plaintiff failed to perform his part of the contract by making the necessary advances upon demand, the stock having rapidly depreciated in value, he has no ground of complaint that the defendant ceased to hold and carry it for him, and thereafter disposed of it.

We are aware that transactions of this nature have been held sometimes to make the broker an agent who purchases the stock as such agent for the customer, and who holds it thereafter as a pledgee for the money advanced for its purchase. *Markham v. Jandon*, 41 N. Y. 235; *Stenton v. Jerome*, 546, 480; *Baker v. Drake*, 666, 518; *Gruman v. Smith*, 816, 25. But in *Wood v. Hayes*, 15 Gray, 375, it was held that a broker who advanced money to buy stock for another, and held it in his own name might, so long as he had not been paid or tendered the amount of his advances, pledge it as security for his own debt to a third person without making himself liable to an action by his employer, and this upon the ground that the contract was conditional to deliver the shares upon the payment of the money. It can not make any difference that, in this case, a small portion of the money necessary for the original purchase was advanced by the customer.

If the transaction were treated as creating a pledge, we should here, upon the facts as they appear, reach a similar result. When the money to be paid, or the thing to be done, is not paid or performed, the pledgee may not only dispose of the pledge at public auction, as provided by Public Statutes, chap. 102, sec. 10 11, but may also do so "in any other manner allowed by the contract or by the rules of law." Pub. Stat., chap. 102, sec. 12. When the plaintiff was called upon to make good his "margin" by advancing the necessary sums, he told the defendants that he could pay them no more, and requested them to do the best they could for him. This was sufficient to give them authority to sell the stock, if, in so doing, they acted fairly and with proper re-

gard to the interests of the plaintiff. Nothing appears tending to show that they acted otherwise.

We have not found it necessary to consider whether a usage of brokers, known to plaintiff, to sell stocks which were carried on a "margin," when the customer fails to make the advances agreed, is to be treated as forming a part of the contract, nor whether a contract like this of buying stocks on "a margin" is to be deemed so contrary to the policy of the law that neither can maintain any action against the other for breach of it; both of which questions were discussed.

---

1. NATIONAL BANKS—INDICTMENT AGAINST PRESIDENT FOR WILFUL MISAPPLICATION OF FUNDS—DISCOUNT OF HIS OWN NOTE. 2. SAME—DISCOUNT OF NOTE OF INSOLVENT MAKER. 3. SAME—ALLOWING DEBTOR TO WITHDRAW DEPOSIT.

UNITED STATES V. BRITTON.

(*Supreme Court of the United States, May, 1883.*)

The President of a national bank is not liable to indictment as for a wilful misapplication of the funds of the bank, when he has had a note discounted which was made by a known insolvent maker and then indorsed by himself who was also insolvent, if the note was discounted by the board of directors, though he was a member of the board.

Nor is he liable to a like indictment for a discount by the board of directors of a note of a known insolvent and indorsed by himself when insolvent. Nor is he liable to a like indictment because he has permitted a depositor to withdraw the balance of his account when he was indebted to the bank, instead of applying the deposit to the payment of such indebtedness.

James H. Britton, the President and one of the Directors of the National Bank of the State of Missouri, was indicted, as such President and Director, for the wilful misappropriation of the funds of the bank to a large amount. The indictment, which was brought in the United States Circuit Court for the Eastern District of Missouri, contained three counts, as follows:

1. The first count charged that the defendant, James H. Britton, on March 24, 1877, within the Eastern District of Missouri, being the President and a Director of the National Bank of the State of Missouri, the same being a national banking association organized under the act of Congress, "did cause and procure to be then and there received and discounted by said association a certain promissory note, which said note was then and there in the words and figures following: "\$20,835. St. Louis, March 24, 1877. Four months after date I promise to pay to the order of Geo. F. Britton, negotiable and payable at the National Bank of the State of Missouri, in St. Louis, twenty thousand eight hundred thirty-five dollars, for value received, without defalcation or discount, with interest, after maturity, at the rate of ten per cent. per annum.—J. H. Britton."

That the note was endorsed as follows: "Geo. F. Britton." That

the defendant converted to his own use the proceeds of the discount of said note, to wit, the sum of \$20,251.63; that said note, when so discounted, was not well secured; that "said James H. Britton, and the said payee and indorser of said note, to wit, one George F. Britton, were then and there insolvent, as he, the said James H. Britton, as President and Director as aforesaid then and there well knew;" and that said James H. Britton, by procuring said note to be discounted, and by applying the proceeds of said discount to his own use, wilfully misapplied the said sum of \$20,251.63 of the money and funds of said association, with intent then and there to defraud said association and certain persons to the grand jurors unknown.

2. The second count charged that on June 2, 1877, within the Eastern District of Missouri, one George F. Britton was indebted to said association in the sum of \$79,480.23 as the maker of five promissory notes then unpaid. That said indebtedness of George F. Britton was known to James H. Britton, President and Director of said association; that on said June 2, 1877, said notes were not well secured and said George F. Britton was insolvent, both of which facts said James H. Britton then well knew. Nevertheless, said James H. Britton, as President and Director of said association, did then and there receive and discount a note for \$800, dated June 2, 1877, due and payable on August 5, 1877, signed by the said George F. Britton as maker, and indorsed by him, the said James H. Britton, he being then insolvent, as he then well knew; that said James H. Britton did then and there pay out of the moneys and funds of said association, as the proceeds of said discount, to the said George F. Britton, the sum of \$780.45, contrary to the form of the statute, etc.

3. The third count charged that on May 18, 1877, within the Eastern District of Missouri, said James H. Britton was President and a Director of said banking association; that from April 12, 1873, to May 18, 1877, one Alfred M. Britton had been continuously indebted to said association in the sum of \$37,122.67, as maker of a certain promissory note during said period, owned and held by said association, and was then indebted to said association for interest past due on said note in the further sum of \$4,529.01; that said Alfred M. Britton was on said May 18, 1877, insolvent; that on the day and year last named there was in the moneys and funds of said association to the credit of said Alfred M. Britton the sum of \$36,860.45; that said James H. Britton well knowing the said indebtedness of Alfred M. Britton to said association and his said insolvency, failed and neglected to cause to be applied to the said indebtedness of said Alfred M. Britton the said sum of \$36,860.45, so as aforesaid in the moneys and funds of said association to the credit of said Alfred M. Britton, and did then and there wilfully permit said Alfred M. Britton, while so indebted, to transfer and assign said sum of \$36,860.45 to the credit of the City National Bank of Fort Worth, Texas. "And so the said James H. Britton did wilfully misapply the

said sum of \$36,860.45 of the moneys of said association, with intent to injure and defraud said association and certain persons to the grand jurors unknown," etc. Upon demurrer to the indictment the judges of the circuit court were divided in opinion upon the question whether the several counts charged with sufficient certainty an offence under section 5,209 of the Revised Statutes. The case was taken up on this certificate of division

The Supreme Court of the United States in sustaining this attack upon the validity of the indictment, through Mr. Justice Woods, said:

1. It is not alleged in the first count that the J. H. Britton, maker of the note discounted, was the James H. Britton who was President and a Director of the association and the defendant in the indictment, and consequently there is no averment that the maker of the note was insolvent. Passing by this defect, and assuming that the maker of the note being the defendant in this case, the gravamen of the charge is that defendant, being President and a Director of the association, and being insolvent, procured to be discounted his own note, the same not being well secured, the payee and indorser thereof being also insolvent, which he, the defendant, well knew. The incriminating facts are that the note was not well secured, and that both the maker and indorser were, to the knowledge of defendant, insolvent when the note was discounted. The question is, therefore, presented whether the procuring of the discount of such a note by an officer of the association is a wilful misapplication of its moneys within the meaning of the law. We are clearly of the opinion that it is not. It is not even necessarily a fraud on the association. One branch of the business of a banking association is the discounting and negotiating of promissory notes, and this is to be done by its board of directors or duly authorized officers or agents. Sec. 5,136 Revised Statutes. There is no provision of the statute which forbids the discounting of a note not well secured, or both the maker and indorser of which are insolvent. It is within the discretion of the directors, or the officers or the agents lawfully appointed by them, to discount such a note if they see fit, and it might, under certain circumstances, tend to the advantage of the association. This count does not charge that the note of the defendant was discounted at his instance, without the authority of the board of directors. On the contrary, the charge is that he caused and procured it to be discounted. This implies that it was done by the directors or other duly authorized officers or agents. It is not alleged that the discount was procured by any fraudulent means. From all that appears, the board of directors, or the officer or agent by whom the note was discounted, may, upon knowledge of all the facts, in the utmost good faith and for the advantage of the association, have decided to discount the note. The discount may have turned out to be a benefit to the association, for there is no averment that the note was not paid at maturity, or that the association suffered any loss by reason of its dis-

count. But whether the discounting of the note was an advantage to the association or not, and whether the note was paid or not, is immaterial. If an officer of a banking association, being insolvent, submits his own note, with an insolvent indorser as security, to the board of directors for discount, and they knowing the facts, order it to be discounted, it would approach the verge of absurdity to say that the use by the officer of the proceeds of the discount for his own purposes, would be a wilful misapplication of the funds of the bank, and subject him to a criminal prosecution. The count under consideration charges nothing more than this against the defendant. We are of opinion, therefore, that it does not charge an offence under section 5,209 of the Revised Statutes.

2. What we have said in reference to the first count of this indictment also applies in all respects to the second. We are, therefore, of opinion that it also does not charge an offence under section 5,209.

3. In respect to the third count we observe that the statute (section 5,130, clause seven) places the conduct of the business of banking associations with its board of directors or its duly authorized officers or agents. Section 5,145 provides that the affairs of each banking association shall be managed by not less than five directors to be chosen by the shareholders. It is alleged in this count that the defendant was President and one of the directors of the association. But he was only one of at least five directors. The only duties imposed on him as President were to certify payments on the capital stock of the association (sec. 5,140), to cause to be kept in the office where the business of the association was transacted a list of the shareholders (sec. 5,210), and to verify by his oath the general reports made by the association to the Comptroller of the Currency (sec. 5,211), and the reports of dividends declared (sec. 5,212). It is nowhere averred in this count that the defendant was the duly authorized officer or agent of the association, whose duty it was to look after the accounts of depositors, to apply the sums standing to their credit to the payment of their obligations to the association, or to prevent the withdrawal or transfer of their deposits while they continued indebted to the association, or that he was even charged with a general superintendence of the affairs of the association. Until it is shown that some officer or agent of the bank was duly authorized to take charge of this branch of the business of the association, the presumption is that it was the duty of the board of directors, and if such was the fact, the defendant was powerless to prevent the transfer of the deposit of Alfred M. Britton to the credit of the City National Bank of Fort Worth. At all events, it is not charged that it was his duty to prevent such transfer, and this constitutes a fatal defect in the indictment. But even if the defendant had been charged with the duty of looking after the deposits of debtors of the association, and of applying their deposits to the payment of their debts, we do not think that the fact that he permitted Alfred M. Britton

while indebted to the association to withdraw and assign to the City National Bank of Fort Worth his deposit, would constitute a criminal misapplication by the defendant of the funds of the association. The count charges neither application nor misapplication by the defendant of the funds of the association. It merely charges that he failed to apply certain funds standing to the credit of Alfred M. Britton to the payment of Britton's debt. It charges that he permitted Alfred M. Britton to do a perfectly lawful act, namely, to withdraw his own funds from the association and transfer them to another bank. This might be an act of maladministration on the part of the defendant. It might show neglect of official duty, indifference to the interest of the association or breach of trust, and subject the defendant to the severest censure and to removal from office; but to call it a criminal misapplication by him of the moneys and funds of the association, would be to stretch the words of this highly penal statute beyond all reasonable limits. In our judgment the count under consideration, as well as the first and second, is bad. We, therefore, answer the first, third, and fourth questions submitted to us by the judges of the circuit court in the negative.

### INSOLVENT BANK—LIABILITY OF STOCKHOLDERS.

#### MANVILLE V. KARST.

(*United States Circuit Court, E. D. of Missouri, May 8, 1885.*)

A stockholder of a banking corporation who is liable to its creditors cannot defeat the action of a creditor by confessing judgment to another creditor after an action by the former has been brought.

Karst was a stockholder in a bank at Belleville, Illinois, which became insolvent, and as he was a shareholder to the amount of \$1,200, under the "double liability" statute of Illinois, he was liable to any creditor of the bank for the sum of \$1,200. Manville, to whom the bank owed more than \$1,200, sued Karst upon his liability, but before he could get judgment by default, Karst had confessed judgment to B, to whom he had gone immediately on being served in Manville's suit, and requested him to buy up claims against the bank to the extent of \$1,200. This judgment Karst paid to B, and then set up the satisfaction of B's judgment in bar of Manville's right to recover. Judge Treat, in deciding in favor of Manville, said: It appears that both the defendant and his friend were fully aware of the pendency of this suit, and they supposed that the subsequent purchase of outstanding indebtedness, with a confession of the judgment thereon, would operate not only as a preference of one creditor over another, but also in enabling the friend, through the defendant's co-operation, to defeat plaintiff's rights and possibly make a speculation to the injury of this creditor, even if there were no understanding that defendant was to share in the speculation. The supreme courts of Missouri, and seemingly of

Illinois, have held that a stockholder, when sued, or before suit, can pay outstanding demands, and, having surrendered them for cancellation, can plead that fact in bar to the extent of the amount so bought and canceled. The reasons given in those cases for the conclusions reached are purely technical and not satisfactory, even on technical grounds, for they ignore the general spirit and purpose of the law of double liability, and leave the door wide open for fraud. If this court is at liberty to go behind those decided cases, it would certainly agree with the appellate court of the fourth district of Illinois—*Gauch v. Harrison*, (Wall, J.),—in which sounder views are expressed—those more consonant with the purposes of the statute and the rights of parties, and even with technical rules. If a stockholder cannot set off the debts of the corporation to him, in order to defeat his liability, why should he be permitted through a friend to defeat a just claim against himself when sued, by confessing judgment in favor of that friend, prior to the possible time when the creditor originally suing could obtain judgment on a valid demand, except by consent?

In the absence of proof that the confessed judgment was in whole or part for the defendant's benefit, or that the same was collusively contrived to defeat the plaintiff, the technical rulings referred to might be conclusive, although no adjudged cases cover fully the facts and circumstances under consideration. The salient facts are that the defendant was sued by this plaintiff; that he conversed with his friend on the subject; that they were satisfied of his liability; that it was understood defendant would confess judgment in favor of his friend if he bought up demands against the bank; that thereupon demands were bought up at a heavy discount, judgment confessed, etc. Those demands were bought from a well-known stockholder who could not use them in his own case. It may be that the technical rulings of the Missouri and Illinois supreme courts might lead to the extent claimed by defendant, but the views of Judge Wall are far more consistent with sound law, right, reason, and strict justice. They commend themselves fully to the judgment of this court. The result is, that judgment will have to be entered in favor of plaintiff for the sum of \$1,200. The cases especially referred to are *State Savings Association v. Kellogg*, 63 Mo. 540; *Manville v. Roeber*, 11 Mo. App. 317; *Buchanan v. Meisser*, Ill. Sup. Ct. MS.; *Gauch v. Harrison*, Fourth App. Ct. Ill. MS.; *Jones v. Wiltberger*, 42 Ga. 575; *Cole v. Butler*, 43 Me. 141; *Thompson on the Liability of Stockholders*, §§ 424, 425.

It is not to be considered that this court admits that the decisions of the supreme court of Illinois go to the extent claimed by the defendant, but merely that if they do, this court follows, as more persuasive, the views of Judge Wall heretofore referred to. Were any other views to obtain than those here indicated, the double-liability clause would be comparatively futile, for a stockholder could, at pleasure, defeat the rights of a creditor pursuing him, by securing the intervention of a

friend, or by transferring his claims which he could not use as a set-off, and have them made the basis of a suit against himself, whereby the obligation imposed on him by law would be defeated.

#### REPLIES TO QUESTIONS.

NATIONAL BANK OF THE REPUBLIC.  
PHILADELPHIA, AUG. 18, 1888. }

*Sir*.—In "Table B," at page 640, of your August number, in stating the deposits of national banks of reserve cities, I think you fail to include the amounts due to banks and bankers, which so far as the Boston, New York and Philadelphia banks are concerned form a large part of their deposits. In Boston and New York Clearing-House statements, showing *net* deposits after the daily exchanges, I believe all deposits are included under the one head of "Deposits"; but the Philadelphia Clearing-House reports them under the two heads of "Deposits," and "Due to Banks," which is perhaps confusing.

Respectfully,

W. H. RHAWN,

RHODES' JOURNAL OF BANKING, NEW YORK.

President.

*Answer*.—In the first place we beg to say that any criticism or correction of any statement made in the JOURNAL by any reader of it is always welcome. The data referred to in the above communication were compiled from the reports of the national banks to the Comptroller of the Currency, and not from the weekly Clearing-House statements. Table "B" does not include the item "due to other banks" in the case of any reserve city, but, our attention now being called to the matter, we can see that it is important that it should be included, and shall endeavor to give it (under a separate head) the next time the table is published.

*Question*.—I have some curiosity to know the meaning of the curious English term used in connection with stock speculation, "contango." Also the derivation of "consols," applied to the British national debt. Can you enlighten me?

*Answer*.—Dealings on the London Stock Exchange are closed, not daily as here, but on each fortnightly settling day. The contango is the premium that is paid to the seller for carrying the stock over one settlement and delaying the delivery until the next. This is called "contangoing," and it is frequently said that such a percentage was paid for contangoes. Consols is the name given to the leading British funded government security, the fund being formed by the *consolidation* of different annuities.

*Question*.—I want to get a book that gives a plain account of the movements in finance and commerce in this country since the Government was started. Is there any such book that you can recommend? Sometime ago you noticed in the JOURNAL a "Financial History of the United States from 1789 to 1880" by Albert S. Bolles. Do you think it would answer my purpose? I do not care so much what theories the writer puts forth about the tariff, etc., so long as he gives facts, and is reasonably honest.

*Answer*.—Your question about Judge Bolles's book is a delicate one for us to answer. The notice you allude to gave our impression regarding the work at that time. Take, however, an instance from our later experience. Word came recently that the affairs of the Ohio Life Insurance and Trust Company were being finally wound up, after a twenty-five years trusteeship. Being under the impression that it was the suspension of this company which precipitated the financial crisis of 1857, and desiring to refresh our memory on the matter, we turned to the work mentioned. But, Lo and Behold! We turned

to the table of contents, and found no allusion to 1857 there. A careful scrutiny of the index was equally unsuccessful, and it was only after a long search through the text that the slightest allusion to the crisis of 1857 was found. There was no information about it that was not (in our opinion) worse than useless. Comparisons are odious, but we recommend that you look into Professor Sumner's work before deciding to purchase.

NEW ORLEANS NATIONAL BANK, }  
NEW ORLEANS, AUG. 18, 1883. }

**EDITOR RHODES' JOURNAL OF BANKING :**

*Dear Sir:*—A national bank has had some of its unsigned circulating notes stolen from it. The signatures of its officers being subsequently forged to the notes, can the bank be held liable for their payment? Very respectfully,

WM. PALFREY, Cashier.

*Answer.*—Treasury circular of October 28, 1882, says: "It having been decided that national bank notes, stolen when unsigned, and put in circulation with forged signatures, are not obligatory promissory notes of the banks, under section 5,182 of the Revised Statutes, they are not redeemed by the Treasurer." This is the ruling of the Treasury Department on the matter, but we are not certain that it is final. It is held by some persons that when the banks whose notes have been stolen go into final liquidation, and make a deposit of greenbacks with the Treasurer for the purpose, the Treasurer will probably conclude to redeem all the notes, including the stolen ones. Perhaps the question will have to be settled by litigation. As the Government will be the gainer to the extent of all notes lost and unclaimed, it has been suggested that Congress might provide for cases like the above. A prominent bank officer of New York whom we consulted on this matter was of the opinion that Congress had at one time made an appropriation for the purpose, which was exhausted. This appears to be a mistake, however.

*Question.*—I see you quote "commercial sterling" and "bankers' sterling" exchange. Please explain the difference.

*Answer.*—Commercial sterling bills are bills drawn by a merchant against a shipment of goods that he has made, or to settle a balance, or any commercial purpose. Bankers' sterling consists of bills, or a bill, drawn by a banker on his foreign correspondent, or *vice versa*, and sold to any one desiring to make a remittance.

---

**ARKANSAS BOND CASES.**—Arguments in the Arkansas bond cases, the hearing of which by Justice Miller and Judge Caldwell, of the United States Court, at Keokuk, Iowa, occupied a week, closed on June 28. During the argument Justice Miller stated that the court was satisfied that the bonds were constitutional and valid, the decision of the Arkansas Supreme Court to the contrary notwithstanding. As to whether the lien created by the acts extended beyond the income and revenues of the companies to which the bonds were issued, and whether the bondholders were entitled to avail themselves of the remedies provided, were the questions which the court desired to have argued. After arguments upon these points the cases were taken under advisement.

## BANKING AND FINANCIAL NEWS.

(With Comments on the more important matters. This Department also includes General Business News—Notes from Foreign Banking Centres, including Canada—A Complete List of New Banks, Changes in Officers, Dissolutions and Failures—Banking and Monetary Tables—Bankers' Obituary Record, &c.)

**The Treasury Gold and Silver Reserve—A Criticism Answered.**—The "Tribune's" averment that the Treasury is gradually decreasing its "reserve of gold owned," the falsity of which we took occasion to make very plain last week, we find repeated in the JOURNAL OF BANKING for August, with specification as to dates and amount of decrease, coupled with the comment that it "is not very assuring to find that, in spite of an overflowing Treasury, the gold balance decreased over five millions, while the silver increased nearly eight millions." We refer to this use of figures, in themselves true so far as they go, to illustrate the superficial, devious, reckless manner in which the metallic money question is habitually treated here in New York by writers more or less influenced by the banks. Just the least bit of candor might have led the "Bankers' Journal" to mention the fact, that while the gold owned by the Treasury was, say \$5,206,171 less on the first day of July, 1883, than it had been on the first day of July, 1882, it was chiefly because the Treasury Department during the intervening twelve months had elected to pay off \$137,823,081 in gold, including about \$18,000,000 paid during the one month of June, 1883. A little more of the spirit of candor might have caused another pertinent fact to be brought into daylight, namely, that of the gold owned by the Treasury on the first of July, 1881, about \$20,000,000 had accrued directly from the sale of silver certificates by the Treasury. And a little more reflection and less haste in making an unfavorable, uncandid showing against the coinage of the silver product of the country, might have prevented our contemporary from reaching the really unfounded conclusion that the condition of the Treasury is "not assuring" and that the Government is losing gold. For, as we showed last week, there was \$203,200,825 in the Treasury on the 17th of August, of which the Government owned \$145,264,875. It is said to be "a poor rule that does not work both ways." If, as the JOURNAL OF BANKING fancies it to be "not assuring" to find less gold in the Treasury on the first of July, 1883, than there was on the same day a year before, it surely on the other hand must be *most assuring* to find by the 17th of August, 1883, the decrease converted into an increase of \$2,787,506, coupled with so great a diminution of the public debt.—*The Mining Record, August 25, 1883.*

Among the "Editorial Comments" in our number for last April we replied to a previous criticism of the "Mining Record," in which the correctness of some of our statistics was impeached, and it did not see fit to either apologize or reply. After reading the above and the article criticised over, we see no more justice, or sense, in the above strictures or the accompanying epithets, than in those used on the occasion alluded to. If we might be allowed to suggest a word of advice to the "Record" it would be this: "In argument, you will gain nothing by throwing hard words at the heads of others who are just as honest and fair as you are, if not nearly so narrow and bitter."

The article to which the strictures relate is headed "The Last Fiscal Year," and in it is briefly compared the condition of the Government's finances

at the end of the fiscal year (June 30, 1883) with their condition at the end of the previous fiscal year (June 30, 1882). On comparing the condition of the Treasury reserve at the respective dates we found it "not very assuring" that during the year the gold balance owned by the Government decreased over 5 million dollars, while the silver increased nearly 8 millions. But the "Record" finds that the gold balance had increased by the 17th of August, some time after our August number was in the hands of our subscribers. Because we did not mention the fact of the increase, which occurred after our number was probably in the hands of the writer of the above criticism, we are called "uncandid;" we are hasty, and lack "reflection." The Treasury reserve has been increasing of late on account of the slow payment of bonds, as our readers well know.

But the rest of the paragraph is just as reasonable and fair. It does not say whether the silver had increased in a larger proportion than the gold by August 17. The fact of the decrease of the gold reserve during the last fiscal year was just as little re-assuring, whether it arose from the Treasury's "electing" to pay 138 millions in gold, or any other cause. If the silver currency outside of the Treasury were increased at the expense of gold, we should not consider it assuring, and we look upon the exchange of silver certificates for gold by the Treasury as wretched paltering with the currency of the country.

The quarrel of our contemporary with us, with the banks, and about the whole press of this part of the country, is because we insist upon the fact that some other interests, besides those of a comparatively insignificant number of silver mine owners, are worthy of attention.

**Commercial National Bank of Reading, Pa.**—The Comptroller of the Currency recently notified the Directors of the above bank that the capital of the bank was impaired to the extent of \$15,000, and that the amount must be made up according to law. The board held a meeting and determined to levy an assessment of 10 per cent. on the shareholders in order to avoid the appointment of a Receiver.

It is reported that this action was no surprise to the business community. The bank was organized in 1880 by Mr. William Young, of Mifflinburg, who is now President and who, with other members of his family, held the largest number of shares. Prominent business men of Reading held the rest. A large business was done at the start, but trouble between the Reading stockholders and the Messrs. Young grew beyond reconciliation. A number of the city stockholders withdrew and organized the Pennsylvania National Bank, a few doors above the Commercial. The new bank has, it is said, been doing a flourishing business ever since.

**Withdrawal of Circulation.**—Sandwiched by a low rate of bonded interest on the one side and a tax of 1 per cent. on the other, the circulation of the national banks has become a very unprofitable contingent, and led in many cases to withdrawals to the limit of bond deposit required by the Federal Government. Last week the Philadelphia National Bank had a circulation of \$225,000. Since then this has been reduced to \$45,000, and four other banks in the city are in the same position—the Southwark, the Penn. the Western, and the Commerce. In speaking this morning of these withdrawals of circulation, President Comegys, of the Philadelphia Bank, said that there was little or no profit in circulation any more. The profits were practically wiped out by the low rate of interest on Government bonds and the prevailing tax of 1 per cent. on every dollar issued. The  $3\frac{1}{4}$  per cents were payable yet, but they had been called. This left the banks the 3s, 4s, and  $4\frac{1}{2}$ s to bank upon. Banks that happened to have the 4 and  $4\frac{1}{2}$  per cents were, of course, better off than his was, for they realize something out of circulation. Mr. Comegys referred to the fact of so many New York banks be-

ing without any circulation at all as an instance that the feeling in respect to this once important branch of the banking business was general. Every bank was required, whether it has a circulation or not, to deposit in Washington \$50,000 in Government bonds before it can transact any business, and as the allowance of circulation was 90 per cent. of the whole amount of bonds deposited, the Philadelphia Bank continued its \$45,000 circulation. The bank had previous to this week \$250,000 of Government bonds, but it has since retired \$200,000. At one time it had a circulation of \$1,000,000.—*Philadelphia Telegraph*, August 3.

The above emphasizes the fact to which we have repeatedly called attention, that the large banks of the East were reducing their circulation, while the Western and Southern banks were increasing theirs almost largely enough to make up the deficiency. But, it is evident that the circulation is not keeping pace with the needs of the country, and, besides, the amount must soon be considerably decreased unless some other means be adopted for securing it than Government bonds at the present prices.

**Consolidation of Telephone Companies.**—At a meeting of the directors of the National Bell Telephone Company of Boston and of the Suburban and Bay State companies at Lowell, Mass., on August 4, resolutions were adopted recommending a consolidation of the companies, the consolidated company to have a capital of \$16,000,000. The terms were subsequently agreed upon, and the following summary has been issued: The American Bell Company to have \$8,000,000 of the stock and 50 per cent. of any increase that may be made hereafter. They to waive dividends for three years for a sum not exceeding \$60,000 the first year, \$120,000 the second and \$180,000 the third, providing said sums are earned over the 6 per cent. dividend, which is to be paid to the stock representing the property; \$1,000,000 of the Bell stock will draw regular dividends the fourth year, and \$1,000,000 each succeeding year until all the stock comes in, in eleven years. They will also have surplus earnings above 6 per cent. after the third year, not exceeding \$180,000 until the ninth year. On the ninth year they will have surplus earnings not exceeding \$120,000, and the tenth year surplus earnings not exceeding \$80,000. For this the American Bell Company gives the new company perpetual license for all patents they now hold or may hereafter acquire; also, any of Boston; also, waiving of the claim to purchase the Suburban Company at cost at the expiration of its contract. The earnings of the new consolidated company will exceed 7 per cent. on the present dividend-drawing capital and a quarterly dividend of  $1\frac{1}{4}$  per cent. will be paid, commencing October, 1883, for the three months dating from July 1.

This is only another instance of the rage which has recently sprung up for consolidating all kinds of business into the hands of large companies. The ideal in the minds of the projectors is, very evidently, a new Western Union on a small scale. The capital of the new company, upon which dividends are to be paid, is \$16,000,000, while the total amount invested in plant is said to be only \$5,000,000. In view of facts like this we cannot wonder at the growth of the anti-monopoly sentiment, whose blind and reckless course, if unchecked, will ruin all business, whether honest or dishonest. [Since writing above there has been some hitch in the consolidation scheme.]

**Bank Failure—Exemplary Act of a Son.**—On August 2 the Beaver Savings Bank, of Thomas McCreery & Co., Beaver, Pa., suspended, with liabilities reported at \$30,000, and assets valued at \$12,000. It was rumored that the cause of the failure was advances made by the head of the firm to the amount of \$22,000 to his son, who is a prominent lawyer of Pittsburgh, and who refused to make the amount good. An assignment was made to Col. J. Weyand, of Beaver.

The pleasant part of this story came to hand a few days after the above. Mr. J. H. McCreery, the son alluded to, denies being indebted to his father in any way except for moneys freely given. At the same time, acknowledging

higher obligations than those of ordinary business, he has undertaken to pay all the indebtedness of the failed bank, and to provide for his father. With this view an agreement was entered into with the assignee by which Mr. McCreery bound himself to pay all his father's debts, in amounts not over \$100 on August 31; 25 per cent. of the rest in sixty days; 25 per cent. in ninety days, and the remainder in four months, with interest on the deferred payments. He also agreed to pay his father an annuity of \$1,000 during his life.

**Silver Certificates Exchanged for Gold.**—Owing to a demand for currency from the South and West, Treasurer Wyman has issued the following notice:—Upon the receipt by the Treasurer of an original certificate issued by the Assistant Treasurer, United States, at New York, that there has been deposited with him gold coin in the sum of \$500 or any multiple thereof, payment of a like amount in silver certificates will be directed to be made by any assistant treasurer of the United States that the depositor may designate, or the certificates will be forwarded by express by such assistant treasurer to any point designated by the depositor at the expense of the consignee. Silver certificates will be furnished in exchange for gold coin by any assistant treasurer of the United States.

The practice of exchanging silver certificates for gold is not a new one with the Department, but the above circular is an additional advertisement to the public. The effect of it is to keep the accumulation of silver coin from affecting the Treasury reserve, while it replaces the gold dollars in general circulation, worth 100 cents each, with silver dollars worth 85 cents each.

**St. Alban's National Bank, and St. Alban's Trust Company, of St. Alban's, Vt.**—These two institutions suspended on August 6. The Hon. Bradley Barlow, President of the bank was also President and owner of the Southeastern Railway, of Canada, on which he had expended a large sum with the expectation of selling it to the Canadian Pacific. Being unsuccessful in this, and being unable to meet his engagements, he failed and caused the suspension of the bank. Lawrence Brainerd, President of the St. Alban's Trust Company, being a heavy endorser of Mr. Barlow's paper, also failed and made an assignment in favor of the Trust Company, which was in turn compelled to suspend. Comptroller Knox went in person to investigate the affairs of the bank and he authorized the following statement:—"The bank holds about \$100,000 in assets, cash and notes, which will soon be available, and it is believed that the remaining indebtedness will be liquidated from other assets and collateral, and negotiations are now in progress to that end." He appointed George W. Hendee, Morrisville, as Receiver.

A later statement issued by the Directors of the Trust Company shows that the failed bank owed it \$55,000 secured by its stock; it also held paper of the Norwood Lumber Company, of New York, secured by an assignment of the entire property. The remaining assets are real estate, mortgage, notes, etc. The Directors thought that the depositors would be paid in full. Charles W. Rich was appointed Receiver.

**Cecil, Ward & Co.**, stock-brokers, of New York, notified the Stock Exchange, on August 13, of their inability to meet their engagements. Their liabilities were stated at \$40,000. An attachment against the firm's effects was afterward granted in favor of the Wall Street National Bank, for \$8,062.50, and another in favor of Kirkland & Co., brokers, for \$236.50.

The failure of this firm is somewhat involved with that of Messrs. E. C. Stedman & Co. It appears that young Frederick S. Stedman last spring took securities belonging to his firm and left them as security with Cecil, Ward & Co., against stock speculations which he carried on through various fictitious names. The matter is under investigation by the Committee on Insolvency of the Stock Exchange.

**E. C. Stedman & Co's Suspension.**—This firm, of New York stock-brokers, the head of which is Mr. E. C. Stedman, sometimes called the "banker-poet," suspended on August 15, and made an assignment to Mr. John McGinnis, Jr. Mr. Stedman arrived in town from his country place a few days before, and found that his son and partner, Frederick S. Stedman, (who is only 24 years of age) had taken a large amount of bonds belonging to the firm, to use as collateral against stock speculations on his own account. These transactions (which caused the suspension) had been carried on through Cecil, Ward & Co., the accounts being kept under several fictitious names. The young man immediately upon the discovery, went and secured about \$67,000 of these securities, leaving about \$30,000 to be accounted for.

Mr. Stedman's misfortune aroused a general feeling of sympathy, as he is personally highly esteemed. The schedules that have been filed with the Clerk of the Court of Common Pleas show the nominal indebtedness of the firm to be \$17,941; actual liabilities, \$62,941; nominal assets \$91,048; actual assets, \$23,878. The transactions with Cecil, Ward & Co., are undergoing investigation by a Stock Exchange committee.

**Indianapolis Bank Embarrassments.**—On August 9, a run was started on the First National Bank of Indianapolis, and the Indiana Banking Company, which is situated just opposite. The cause of the trouble in the case of the former bank was ascribed to the withdrawal of a deposit of \$500,000 by State Treasurer Cooper. In a few days an arrangement was made by some large capitalists, Messrs. W. C. Depauw, W. H. English and E. F. Claypole, to assist the bank and place it on a better basis than before. The capital stock was increased from \$400,000 to \$800,000. By August 16 the reorganization had been completed. Mr. W. H. English was chosen President, and J. W. McCutcheon was continued as Cashier. It is said that the capital is to be further increased to \$1,000,000.

After negotiations extending over some days, it was found impossible to put the Indiana Banking Company on its feet, and on August 13, John Landers was appointed Receiver, but he was afterward superseded by William Wallace.

This latter bank is a private concern, the partners being F. W. A. Davis, the estates of W. H. Morrison, and John L. Ketchum, and William Needham, and Peter J. Banta. The officers attribute the failure to a late investment in stock of the First National Bank, upon which they are said to have lost \$300,000. It is feared that the depositors will suffer loss, while the proprietors will be ruined.

**American and Canadian Coins.**—The American half-dollar and quarter-dollar are taken at a discount in Canada. It is suggested that business men on this side fix a date beyond which they will not receive Canadian coins at their face value.—*Utica Herald.*

There is great complaint along the lines, the Americans flooding us with their trade dollars at par, while they themselves will only take them at a discount.—*Montreal Witness.*

It is a pity that so much fuss is made by traders about accepting the minor coins of the United States in Canada, and of Canada here. As it is, trade is injured, and no one excepting the money brokers is benefitted. The advice of the *Utica "Herald"* is thrown away, as everyone knows that retail dealers will generally accept a Canadian quarter-dollar for only 20 cents, whereas the brokers pay 24 cents for them. We are sorry for the Canadians, who are being flooded with trade dollars at par! We suspect that the "*Witness*" is a "false" one in this instance.

**A Congressman on the National Banks.**—Several business men of Rockford, Floyd County, having subscribed \$50,000 for the capital of a national bank, applied to H. W. Weller, Congressman for that district, for a letter recommending their application to the Comptroller of the Treasury for a charter. Mr. Weller wrote them a letter

refusing his indorsement, for the reason that he regards the national banking system as a scheme of banking on what one owes instead of what one owns and has a right to; as an insidious enemy to a Republican form of government, reaching out to its probable destruction, and raising in place thereof one akin to that of the British aristocracy and monarchy; as a means to put into the hands and keeping of a consolidated corporate national bank monopoly the entire control of the volume of money, and thus determining, in a very large degree, the price of labor, the product of labor, lands and tenements, and other property.—*Des Moines, Iowa, Aug. 9.*

A respectable contemporary has taken the trouble to discuss the wildly idiotic ravings quoted above, but we forbear. The one quoted here is a terrible example to those who send such men to Congress. But why did the business men who organized the bank consider it necessary to go to their Congressman for his recommendation? Banking under the national system is not such a monopoly that it needs political influence to enable anyone to carry it on.

**The National Banks and the Stock Market.**—The Treasury officers at Washington say that there is no cause to fear that the recent troubles among stock brokers will lead to any difficulty with the national banks of the country. The impression which prevails that these banks hold large blocks of stocks, the values of which are depreciating daily, is not borne out by the facts. The Acting Comptroller of the Currency says that there is not at present the least foundation for a fear that a panic involving the national banking interest is imminent. On the contrary, he says that there is every reason to believe that the banks hold full and ample securities for loans and discounts, which securities will not be affected by the present fluctuations.—*Dispatch, Aug. 15.*

The wildly exaggerated reports that have been recently circulated as to the perilous condition of the banks, have been largely concocted for the purpose of affecting the stock market. There are certain persons and newspapers that have for some time past done their utmost to create a panic, and the futility of their efforts is only an indication of the strength of the situation.

**Fifty Years a Banker.**—Fifty years ago to-day Gustavus F. Davis, now President of the City National Bank of this city, entered the Phoenix Bank as "notice clerk," at which time Charles Sigourney was President, George Beach, Cashier; Elisha Colt, Teller; Daniel Crowell, book-keeper, and John C. Furber, discount clerk. The Directors were Charles Sigourney, Henry Shepard, Haynes L. Porter, Norman Smith, Jr., David C. Collins, Ward Woodbridge, Cyprian Nichols, Edward P. Cooke, Elisha Peck, Daniel Burgess, and Eli Terry, not one of whom is now living. After remaining six years in the Phoenix Bank, Mr. Davis went to Litchfield to fill a place in the branch there, operated then by that bank. In 1854 he returned to become Cashier of the City Bank, of which he has now been President since 1857. His term of continuous active service is probably longer than that of any other banker in the State, and his experience covers a great change in the methods and traditions of the business. In speaking of this yesterday Mr. Davis said that at that time there were only four banks in the city—the Phoenix, Hartford, and Connecticut River, and a branch of the old United States Bank. The Farmers and Mechanics' and the Exchange were organized within about a year. The capital in each of the four was about the same as now, but the Phoenix reserved \$250,000 for its Litchfield branch. Under the old law the State and charitable institutions could subscribe at par to stock in the banks to the amount of one-tenth of the capital, and about \$200,000 was so held in the Hartford and the same amount in the Phoenix. This stock could not be sold by the holders, but the investment could be withdrawn on six months' notice. The hours of business were from 9 to 12 and 2 to 4; the banks closed for two hours in the middle of the day. Usually some one or more of the officers were in the bank in the evening, and the youngest clerk was obliged to sleep there. This was Mr. Davis' experience at the outset, and the first night he dreamed of a robbery with all its details, up to his journey along the streets after it was over to notify the bank officers. The safe was not completely looked till evening, when the Cashier attended to it and took the keys home. The

bank was then in charge of the clerk, and the main dependence for fastening the doors was on the inside bars, which he put up after locking. The banking capital, which was \$2,250,000, exclusive of the amount kept in the branch of the United States Bank, has increased to \$3,275,000, and the number of banks from four to sixteen.—*Hartford (Conn.) Courant, Aug. 15.*

**Comptroller's Report.**—It is said that the forthcoming annual report of the Comptroller of the Currency will show that while the number of banks has been increased nearly 200, the increase in capital stock paid in has been but \$17,000,000. The capital stock of the banks beginning business during the year has averaged considerably less than \$100,000. This brings the general average of the capital of the national banks of the country down to about \$220,000. In 1880 they averaged \$210,000; in 1875, \$240,000; in 1870, \$280,000. The number of banks is now 2,425, and their capital, \$500,000,000. The deposits are over \$1,000,000,000, or double their capital stock. They own about \$400,000,000 of Government bonds, or one-third of the total outstanding bonds. The capital stock of New York banks is \$50,000,000, and their loans and discounts \$240,000,000, or nearly five times the amount of their capital stock. The loans and discounts of all the banks of the country amount to \$1,280,000,000, or 2½ as much as their capital. The circulation of New York banks is about one-third their capital stock, while the average circulation of all banks is two-thirds of their capital stock. The capital of New York banks averages over \$1,000,000 each; those of other leading cities about \$750,000 each. Massachusetts has the largest amount of capital invested in national banks, the total reaching nearly \$100,000,000. New York State has about \$90,000,000. Pennsylvania comes next in the list with about \$80,000,000. The private banks of the country number nearly 5,300, with a capital stock of over \$250,000,000, or an average of \$50,000 each, against an average of \$200,000 each for the national banks. The 8,000 banks of the country have a total capital of \$750,000,000, while their deposits are about \$3,000,000,000, or four times the amount of their capital stock.

**An Example for Young Men.**—Major Lewis Allen, President of the Warren National Bank, of Peabody, Mass., completed his eighty-ninth year July 26, having been born July 23, 1794, at Weston, Mass. He is now the oldest man but one in the town, his senior being Mr. Joshua Buxton.

When he was 4 years of age his father died, leaving a family of three children, of whom he was the oldest. In three years his mother was again married, and became the mother of nine more children, their father dying when the subject of this article was 13 years old, so that on him depended in a large measure the support of the whole family. Young Allen struggled manfully for the family's maintenance, and at the age of 21 years and 5 days, Aug. 1, 1815, he had saved from his earnings \$50, which he put into the shoe manufacturing business.

By his indomitable and untiring zeal, perseverance and honesty, he has risen step by step in wealth and distinction, till to-day there are few, if any, in the community who command more influence. He was one of the first Directors of the Warren National Bank, and was one of the committee who obtained the bank charter. He has been its President for the past forty years. In 1830, when the town was in its infancy and when a large undertaking was looked upon as a folly, he built Allen's old block, and was the butt of much ridicule. The wisdom of his action was appreciated in after years. Mr. Allen has displayed traits of pluck and enterprise worthy of imitation, and it is the wish of his townsmen that he may long live to enjoy the fruits of an industrious and honorable life.

**Maine Savings Bank Deposits.**—An exchange calls in question the wisdom of the action of the recent Legislature in reducing the State tax on savings banks from 1 per cent. to three-fourths of 1 per cent., and alleges that most of the deposits are made not by workmen and men of small means, but by capitalists. The official statistics, however, show that 76,602 of the depositors in Maine savings banks had on deposit less than \$500 each, and only 13,887 more than \$500, and not one of these more than \$2,000. This would seem to establish the fact that the deposits are mainly the savings of men of small means. This fact undoubtedly had great weight with the Legislature, as the object of savings banks is to encourage working men to save. Probably hardly any of the twenty-nine and a half millions of deposits in Maine savings banks would have been reached for taxation if it had not been put in Maine savings banks, where it paid

nearly \$300,000 taxes last year, and will pay \$225,000 next year. Another reason which probably induced the Legislature to reduce the tax is the fact that, notwithstanding the economy of the management of our savings banks, yet last year they paid an average of only 4 per cent. interest on deposits to depositors, after paying the State tax. —*Lewiston (Me.) Journal.*

The Second National Bank of Warren, Ohio, closed its doors on the afternoon of August 17, the Cashier, Kirtland M. Fitch, having disappeared, leaving a statement confessing to a defalcation of \$80,000, which he had lost in stock speculations in New York. The capital stock of the bank is \$100,000, and Fitch's bond \$20,000. Bank Examiner R. Ellis, Jr., who was put in charge, has informed the Comptroller that the stockholders will raise \$75,000 additional capital and resume business. Cashier Fitch delivered himself up to the police of Boston, and was taken back to Ohio.

**Savings Banks of New York.**—The following table is of more than ordinary interest, showing as it does the gradual accumulation of savings deposits. The table is compiled from the official returns of July 1, 1883, and shows, by counties, the number of banks, total resources, amount due the depositors, surplus held, and number of open accounts; also, for comparison, totals of the same items Jan. 1 last:

| Counties.                     | No. of Banks. | Total Resources. | Due Depositors.  | Surplus.        | Open Acc'ts. |
|-------------------------------|---------------|------------------|------------------|-----------------|--------------|

**ITEMS FROM THE REPORT.**—The semi-annual report made by the Superintendent of the Bank Department of the Savings Banks of New York State, showing the condition on July 1, 1883, yields the following particulars:—There are at the present

time 25 savings banks in the city of New York, though one of the number—the Equitable—has only a nominal existence. During the six months the American Savings Bank, authorized by the Bank Superintendent Dec. 31, 1882, entered upon active business. The only other change during the same period was the voluntary closing of the Morrisania Savings Bank, which was effected by a resolution of the Board of Trustees of the bank adopted Nov. 17, 1882. Its depositors, so far as the same could be found, were paid in full, and the unclaimed balances, amounting to \$842.74, were on June 30, 1883, deposited with the Bank Superintendent at Albany as required by chapter 409 of the Laws of 1882. Such balances will be paid to the depositors entitled to receive the same upon receipt at the Bank Department of the depositors' pass-books.

Since the passage of the General Savings Bank act, in 1875, only seven new savings banks have been authorized in the State, two of which forfeited their privileges through failure to begin business within one year, the period fixed by law.

The number of banks in the State is 126, there being no change except in the City of New York. The banks of the City of New York on July 1 held \$231,525,352 of deposits, being an increase during the six months of \$6,002,488. The deposits in the State were \$420,831,007, an increase of \$8,683,731. The increase in deposits from Jan. 1, 1882, to July 1 of the same year was \$12,910,945. The aggregate resources of the banks of the State are \$483,662,008; of these the City of New York has \$267,841,417. The surplus in the State is \$63,114,693; in New York City, \$36,310,141. The total number of open accounts in the State is 1,119,512; in New York City, 593,170. In the State during the six months, 129,744 accounts were opened and 105,102 closed; in New York City, 65,475 opened and 51,659 closed.

The deposits received by the banks of the State during the six months aggregate \$80,776,781, of which \$36,765,716 were received by the banks of the City. During the same period \$79,148,054 of deposits were withdrawn from the banks of the State, of which sum \$34,598,671 was from the banks of the City of New York. The total expenses of conducting the business of all of the banks of the State was \$687,042, of which \$327,352 was expended by the banks of the City of New York.

**A Check on a Shingle.**—Joseph C. Palmer, a California pioneer, and at one time a banker and politician, died recently at Oakland at the age of sixty-three. Mr. Palmer, in the early days of California, was a member of the firm of Palmer, Cook & Co., a bank which did an immense business, and whose influence was felt throughout the State. To show his readiness to adopt original methods in emergency, it is related that once a depositor called to draw a large sum of money (twenty-eight thousand dollars) from the bank. Mr. Palmer's consent was necessary, but he had been called away to attend to some duty in a lumber yard a mile or more from the bank. Thither the depositor hastened, and made known his wants and the necessity of having them attended to at once. Mr. Palmer could find neither pen, ink, pencil or paper. But without a moment's hesitation he picked up a shingle, borrowed a piece of red chalk, and with it wrote a check on the shingle in large and distinct letters for twenty-eight thousand dollars. This was good when presented for all the money the depositor had in the bank, and it proved an exceedingly good advertisement for Palmer. It gained confidence for the original genius of this great banker, whom everybody admired and trusted.

**Receipt of Deposits by an Insolvent Banker.**—An important case was concluded on August 23, in the District Court at Wyandotte, Kan. John Harris & Co., bankers, of Olathe, Kan., failed recently with \$80,000 liabilities and merely nominal assets. John Harris was indicted under a recent statute making it felony for a banker to receive deposits knowing his bank to be in a failing condition. A change of venue was taken to Wyandotte, and the defendant was found guilty upon the first of five presentments. The extreme penalty is five years' imprisonment.

**Texas Banks.**—There are twenty-one national banks in Texas with an aggregate capital of \$1,955,000. The two principal banks are the San Antonio, and the First National of Galveston. Only one national bank of Texas has gone into liquidation under the Bank Act, viz.: the National Exchange Bank of Austin, which had a capital of \$100,000 and an issued circulation of \$31,500. Of this amount \$9,000 are still outstanding. The single failure was that of the First National of Dallas, which failed in

1878 with liabilities of \$73,804. Thirty-seven per cent. of this sum has been paid over to creditors. Sixteen of the national banks gave dividends last year, the average being 8 per cent. Their net earnings amounted to \$320,176. In addition to the national banks there are 138 other banking institutions with an aggregate capital of \$4,686,442, having some 15 millions on deposit. There are 15 State banks, with a capital of \$1,978,079, and deposits of \$2,357,246. Of private banking-houses there are 123. Capital, \$2,708,364. Deposits, \$7,224,606.

**Foreign Items.**—A great enterprise is spoken of by Mees. Portalis Frères, of Paris. They promise to form a large Public Works Company in La Plata with a capital of 100 million francs. Railways would be built, docks made, &c. Finally an issue bank and a lottery would be established.

In the Oriental Republic an international banking syndicate has undertaken the unification of the debt, the basis of 65 per cent. having been accepted by the Government. The conversion will be effected at various rates for the different securities.

A proposition has been made to the Brazilian Government for the redemption of the paper currency, based on the farming out by a private company of the Dom Pedro II. line of railway. The company would hand over £8,300,000 to the State, and thus redeem 94,065,000 of milreis, which sum constitutes one-half of the unconvertible debt.

Extensive forgeries of bank notes are reported from Italy. It is said that Italian cities are infested with dens of forgers. The Wilcox process has been adopted by the German Government.

**Counterfeit Tennessee Bank Notes.**—A large number of the notes of the Bank of Tennessee that have been presented to the Funding Board at the Capitol have been found to be bogus and worthless. The most of these were put in circulation by one R. Clay Crawford, who was an officer in the Federal Army during the war, and took possession of the effects of the Bank of Rogersville, a branch of the Bank of Tennessee. Finding there a large number of sheets of the notes of the Bank of Tennessee printed from the steel plates, but unsigned, he forged or had forged the names of some of the officers of the bank to them, while others were signed with fictitious names by Crawford's friends. It appears he divided these notes up among his friends, who, with himself, passed them wherever they could in Tennessee. For this he was tried by court-martial and cashiered. The public are warned against these notes.—*Nashville American*.

**An Honorable Transaction.**—George William Ballou, the head of the New York and Boston banking-house which suspended payment yesterday, was formerly Cashier of the First National Bank, of Greenfield, and is personally known to the officers of the Third National Bank, of this city, by reason of a certain specially honorable transaction. While living at Greenfield he became indebted to the Third National for \$500 through the indorsement of another man's note. He was poor and unable to pay, and the bank sued him; but the case was thrown out of court on account of some informality. Mr. Harris, the Cashier and manager of the bank, supposed that the money was lost, until several years later, after the debt had become outlawed, Mr. Ballou, who had prospered meantime, called on him one day and insisted on paying up the full amount, with interest.—*Springfield (Mass.) Republican, August 15*.

**George W. Ballou & Co., of New York and Boston.**—The most startling of the surprises that occurred in financial circles during August was the announcement of the suspension of this firm on August 14. The firm was known to be wealthy, their capital being recently reported at \$750,000 to \$1,000,000, but the ruinous fluctuations in the stock market that occurred at that time caused them heavy losses and threw their affairs into embarrassment. The assignee is Theodore M. Nevins. The Boston "Transcript" of August 30, says: "The liabilities of the house are to-day, as they were when it suspended, \$3,000,000, and were a month before the suspension \$4,000,000, which shows that the house has been rapidly liquidating. Despite this rapid liquidation the house can make a fair exhibit to-day."

**All About a Quarter.**—The Cashier of the Farmers' National Bank of Bucks County (Pa.), recently received a remittance of \$1,000 in silver from the Treasury Department at Washington. The remittance was found to be 25 cents short, and Treasurer

Wyman was at once notified. A prompt reply inclosing a 25-cent piece was received, in which, as showing the strict watch kept by the Treasury Department over its cash, the following from Treasurer Wyman's letter is interesting: "At the conclusion of the examination of the moneys in this office last month a 25-cent piece was found on the floor of the silver vault, which the examiners were unable to account for. It is supposed that in weighing the coin this piece must have accidentally dropped on the floor and was not observed at the time."

**How a Safe was Robbed.**—At a London West End establishment lately a burglar was caught red-handed in the strong room opening a safe containing a fortune, with a key as perfect as though it had been made originally for the lock. The man was convicted, and his prosecutors, out of curiosity, begged him to tell them how he got the key. "Nothing easier," he replied. "We knew who carried the key and what it was like, so me and my pals we gets into the same carriage with your manager when he's going home by rail. One of us has a bag which he can't open. Has any gentleman got a key? Your manager produces his bunch. And my pal he has wax in his palm, and takes a likeness of the key of the safe while seeming to open his bag. There's the secret for you."

**State Bank of LaCrosse** is the title of a new State bank which succeeded to the business of the banking-house of Holley & Borresen, of La Crosse, Wis., on August 1. Following are the Directors: D. D. McMillan, J. M. Holley, E. N. Borresen, G. H. Ray, J. W. Weston, A. Salzer and G. Goddard. The Directors have elected the following officers: *President*, D. D. McMillan; *Vice-President*, E. N. Borresen; *Cashier*, J. M. Holley. The change was made for the purpose of introducing new capital into the business, and increasing its facilities. The management remains unchanged, however, and we are assured that it will follow the safe and honorable course which it has pursued hitherto.

**United States Bonds Held Abroad.**—According to an estimate made, at least \$300,000,000 of the national debt is held in Europe. The Treasurer sent \$183,275 to foreign bondholders direct last quarter—\$79,948 to the holders of 4 per cents, \$48,288 to holders of 4½ per cents, \$4,830 to holders of 3 per cents, and \$50,227 to holders of 3½ per cents. This sum represents about \$180,000,000 in bonds, and if it is true that 40 per cent. of foreign owners receive their interest through American agents—and that is believed to be a liberal estimate—about \$300,000,000 of the national debt is held across the water, or less than 20 per cent. There are over 60,000 accounts on the Register's books.

**Assignment of Registered Government Bonds.**—The Treasury Department at Washington is receiving daily called bonds bearing assignments witnessed by Cashiers or Presidents of national banks, but not verified by the bank's seal. Heretofore the signatures of bank officers have been certified by Treasury officials after comparison with the signatures on file in the office of the Comptroller of the Currency and known to be genuine. It has been decided, however, that this practice involves too much risk, and hereafter when the seal of the bank is missing the bonds will be returned to the senders.

**Mexican Notes.**—One of the latest curiosities in the Texan money market is the introduction of Mexican bank notes as a part of the currency. The denominations of these notes range from 25 cents to \$1,000 and pass current at the same rate as Mexican silver money. The first paper money ever issued in Mexico was in the present year.

The principal owner of the Bank of Cheney, W. T., which lately suspended, is John C. Davenport, and it is thought that he has property sufficient to pay all liabilities.

The St. Paul National Bank, St. Paul, Minn., has been opened at the corner of Fifth and Jackson streets. The woodwork of the banking-room is ash, trimmed with cherry, and the furniture of the latter. A new steel vault of 10,000 pounds weight is being made in New York.

**A Charity Bank.**—There has been formed recently a Savings Bank plan by the Detroit Association of Charities. Pass-books are given out and deposits as low as five cents are received; 4 per cent. interest is paid on all amounts of \$1 and upward. It

is proposed also to have the poorer population visited by proper persons who will encourage them to give a part of their weekly earnings during summer to the bank. Arrangements would then be made with wood and coal dealers to supply the poor with fuel during winter at wholesale summer prices.

The City National Bank, of Lawrenceburg, Ind., closed its doors on August 11, owing to embarrassments which are said to have grown out of the use of its resources by the Vice-President, Henry Fitch, in his milling business. Upon the statement of Bank Examiner Hayes, the Directors were notified by the Comptroller that they might settle up the affairs of the bank in any way they choose. The Cashier thinks that the bank can pay 50 per cent. of its indebtedness in 30 days, and the remainder in 90 days.

**The Old Story.**—C. E. Luce, the owner of the broken banks of Breckinridge (Col.) and Perham (Minn.) has made a statement that his assets were \$40,000, while his liabilities were only \$1,500, but strange to say he did not make out a clear schedule of what his so-called "assets" consisted of. Mr. Luce attempted too much on a small capital. It is said that he started two banks on \$1,500, besides engaging in manufacturing enterprises!

**Dakota.**—The location of the capital of Dakota at Bismarck placed Elijah Coffin, teller of the Richmond National Bank, in a position to make \$100,000 by simply signing a deed to some farm property near the town which he had bought only a few weeks before.

Nathan T. Churchhill, who died recently at Woodstock, Vt., was born there in 1795. He was President of the Woodstock Savings Bank from 1868 to 1875.

#### MISCELLANEOUS BANK ITEMS.

— A new bank building is being erected at East Dallas, Texas. It will be occupied by Henry Clark.

— Messrs. Schott & Knight, stock brokers, of New York and Philadelphia, suspended on August 21.

— English pennies plated with silver have lately been passed at night upon careless Bostonians for American half-dollars.

— John C. Watson, a well-known stock broker of Boston, suspended on August 8 owing, it is said, to the decline in New York and New England Railroad stock.

— Mr. Preston, Acting-Director of the Mint, has directed that no melting charge be imposed on trade dollars deposited at the mints on account of sales of silver bullion.

— An inventory of the property of the late Chester W. Chapin, of Springfield, Mass., gives the valuation of the personal property at \$1,986,000, and of the real estate at \$171,800.

— Messrs. Kountze Brothers state that forged drafts purporting to be issued by the First National Bank of Omaha, Nebraska, upon Kountze Brothers, New York, are in circulation.

— The suspension of the firm of Ashton Coates & Co., stock-brokers, of Philadelphia, was announced on July 21, the liabilities being mostly outside the Exchange, and amounting to about \$10,000.

— John D. Lawler, of Prairie du Chien (Wis.), and M. H. Rawley, of Mitchell, Dakota, have purchased a controlling interest in the First National Bank of the latter place. J. F. Kimball is Cashier.

— Bank Superintendent Paine has granted a certificate authorizing the New York Produce Exchange Bank, of New York, to do a banking business, with a capital of \$1,000,000, all of which is paid in.

— The Georgetown (Col.) "Miner" of July 28 says: "Senator Warner Miller, of New York, during his visit here this week expressed himself on the money question. He is a bi-metallist. He says that only 15 per cent. of the gold produced in the world

enters into the coinage, the balance being used in arts and manufactures. Soon it will all be absorbed by the trades for jewelry, plate, &c. Silver will then become the single monetary basis or standard. Prices will be nominally higher in proportion to the increased supply of money to meet them. Colorado and the Rocky Mountain States will thus become the leading treasure vaults of the world." We hope next to hear from Senator Tabor on wood-pulp.

— An English newspaper says that United States Treasury bonds to the amount of £24,000,000 are held by three persons—the Duke of Sutherland, Sir Thomas Brassey, and the Baroness Burdett-Coutts.

— Mr. H. C. Fahnestock, of the First National Bank, and Mr. J. F. D. Lanier have become partners in the firm of Winslow, Lanier & Co., of New York, and Messrs. John W. Mills and D. B. Safford have retired.

— The heavy failures in Boston early in August resulted in considerable losses to a number of the banks, but these were, at first, largely exaggerated, just as every unfavorable event has been recently in certain quarters.

— Sylvester F. Fuller, the runaway Cashier of the Second National Bank of Jefferson, Ohio, and H. L. St. John, his assistant, were arrested at Cleveland on August 30, on the charge of stealing \$50,000 of the bank's money.

— J. F. D. Lanier, Lewis Roberts, Homer A. Lattin, Louis H. Strouse and John S. Baird have been admitted to membership in the New York Stock Exchange. They are reported to have paid from \$23,000 to \$28,000 for seats.

— The Osterberg system of clearing stocks has been abandoned after a month's trial, by the members of the New York Stock Exchange, who agreed to try it. They could not persuade enough of the members to join them to make it practically available.

— The three-thousandth national bank organized was authorized to begin business on July 12. As the total number of national banks on June 22 was 2,417, it would appear that 583 have dissolved or declined the national system since it first went into operation.

— The Farmers' Bank, a private institution, of Richmond, Ind., closed its doors on August 16. The deposits were between \$40,000 and \$50,000. The directors have given notice that its affairs will be wound up and the depositors will be paid in full after September 8.

— The Bank of Leadville, at Leadville, Col., E. L. Campbell, President, George R. Fisher, Cashier, made an assignment on July 26 to George W. Trumble. The assignment has long been anticipated. It is thought that the other Colorado banks will not be seriously affected.

— Mr D. O. Mills has presented the State of California with a magnificent piece of statuary representing Columbus at the Court of Queen Isabella. The work of art is 9 feet high and cost \$35,000. It will be placed in the rotunda of the Capitol at Sacramento at Mr. Mills' expense.

— Receiver Williams, of the City Bank of Jersey City, has commenced a suit against the stockholders to recover 50 per cent. of the amount of stock held by them, to make up the deficiency due depositors, and another to recover deposits received by them after the bank became insolvent.

— S. W. Clarkson has been appointed Cashier of the First National Bank of Ann Arbor, Mich., to succeed J. W. Knight, resigned. Mr. Clarkson has been Cashier of the People's Bank at Manchester for the past ten years. He entered upon his duties in Ann Arbor the first part of August.

— Charles H. Gogel, of Baltimore, has been held for trial on a charge of obtaining \$12,000 from the National Union Bank on forged paper. This bank, and the Manufacturers' Bank, the Howard Bank, and the banking-house of Nicholson & Sons are said to hold paper with forged endorsements to the amount of \$56,000.

— The story is told that Mr. John W. Shipp, son of the Rev. Dr. Shipp, of Vanderbilt University, while visiting St. Augustine, Fla., was recently assigned a room in the Edwards House. Happening to raise one of the pillows of the bed, he was surprised to see laying before his eyes a plump-looking pocket-book. He opened it and drew out

a one-thousand-dollar bill. He then counted thirty-one bills of the same denomination in the pocket-book. Mr. Shipp went down stairs and turned the wallet and its contents over to John Edwards, proprietor of the hotel. It ultimately transpired that a Utica banker, and stockholder in the Jacksonville, St. Augustine and Halifax Railroad—W. Jerome Green—had occupied that room the night previous, and the money was his property.

— The Denver (Col.) "Tribune" clamors to have the one and two-dollar bills withdrawn from circulation on the ground that they stand in the way of the circulation of money "which has an intrinsic claim to be called by the name." The "name" by which many people call the money alluded to is the "stove-lid currency."

— Mr. Alva Trowbridge has been appointed Cashier of the Bank of North America, New York, in place of Mr. F. W. Whittemore, who has resigned in consequence of ill health. Mr. Trowbridge was formerly assistant to Cashier White, of the Sub-Treasury, and has had a long and valuable experience in banking business.

— An action has been brought by Hunter, Keller & Co., against Edwin J. Dunning, a note broker of New York, who is charged with having converted to his own use promissory notes which were placed in his hands to negotiate, to the amount of \$31,889. Other charges of a similar character have been made against the same person.

— Bernard Phillips, a stock broker and prominent politician, was arrested at Mauch Chunk, Pa., on August 8, charged with the embezzlement of about \$800, which had been intrusted to him by J. C. Rutter, President of the Miners' Bank of Summit Hill. He was held to answer at court. He was formerly Recorder of Deeds of Carbon County.

— A remarkably fine counterfeit five-dollar gold piece recently stopped in the Boston Sub-Treasury, and found to contain \$4.63 worth of fine gold, is supposed by Treasury officials to be a relic of the early mining days of California, when bars and coins of pure or nearly pure gold were made by the various "mints" on the Pacific coast and freely circulated.

— Counsel for the Receivers of the Barnstable (Mass.) Savings Bank has obtained from the Supreme Court leave to declare a final dividend. When the bank suspended, in May, 1878, its total liabilities were \$1,291,303, and three dividends, amounting to 70 per cent., have been paid. The Receivers have now on hand \$167,867, and intend to pay a final dividend of 12 per cent.

— Assistant-Treasurer Acton has appointed Wealey D. Hawkins to the position of Teller in the New York Sub-Treasury lately made vacant by the resignation of William Urban, Jr., who accepted an appointment in the Custom-House. Mr. Hawkins had been in the employ of the Metropolitan Bank for twenty years, and is said to be particularly skillful in the handling of money.

— The failures of W. M. Miller & Co. and Edward P. Wetzelar were announced at the Philadelphia Stock Exchange, in consequence of the break in the market on August 11. Neither suspension was important. Mr. Wetzelar failed only a few weeks before and had recently regained his standing at the Board. The other was a new firm, with a comparatively small capital, and expects to resume.

— Chauncey Johnson, the notorious expert bank sneak thief, was recently arrested in Philadelphia on a charge of theft. He offered to refund the missing amount rather than be exposed, but a number of detectives and special officers from banks and other institutions were on hand at his examination. He is a man past middle age, with thin, bony features, and a close-cropped mustache.

— The Louisville (Ky.) "Courier-Journal" says: "New men and much capital are going South; the farmers are changing their methods and diversifying their crops; mines are being worked and great mills erected. This is but the beginning of a new era, an industrial transformation, in which Louisville should have part. She must assist in the work if she expects to participate in the benefit."

— A package of bills containing \$1,000 was stolen on July 6 from the First National Bank of Charleston, S. C. The matter was kept quiet until August 7, when John Robinson, colored, the trusted porter of the bank, was arrested. He acknowledged the

theft and returned about \$900 of the stolen funds. Upon the restitution of this sum he was discharged, and, it is said, will not be prosecuted. Robinson has been connected with the bank as porter for several years, and was noted for his honesty. In 1880, when John Morgan robbed the bank of bonds, he was instrumental in catching the thief.

— A suit has been begun by S. X. Metzger, of Elmira, against D. R. Pratt, President of the Second National Bank of that place, on account of notes given by the son and partner of the former to Mr. Pratt for the purpose of raising funds to enable him to speculate in produce in the Chicago market. Rumors of losses by Mr. Pratt himself caused some excitement in Elmira for a time, early in August.

— J. B. Gardner, a wealthy citizen of Boston, recently deceased, provided by will that a large sum of money, bonds and other securities, aggregating in value \$931,600, should be turned over to the United States Treasury, to be used in helping to pay the national debt. The bequest has been received at the Treasury Department, and by direction of the Register, placed to the credit of "patriotic donations."

— A bold but unsuccessful attempt to rob Thomas J. Smith, Cashier of the Orange (N. J.) National Bank, of a valise containing \$12,000 was made on Saturday, July 23, in the Hoboken depot of the Delaware, Lackawanna and Western Railroad. Ex-Policeman Nugent, who was implicated in the robbery of the Manhattan Savings Bank of New York, and two confederates were arrested. Two of the miscreants were arraigned on Monday the 30th and sentenced to ten years hard labor in State prison.

— Mr. Isaac N. Seligman, of the firm of J. & W. Seligman & Co., and one of our most active and rising bankers, sailed for Europe Aug. 18. In a few months Mr. Seligman expects to form a new, and what we trust will be a very pleasant, partnership, with the handsome daughter of Mr. Loeb, a well-known New York banker, by which the great wealth of the two families will be united, and, no doubt, their names perpetuated. We wish Mr. Seligman a pleasant voyage across the water, and a happy and prosperous voyage through life.

— Ex-Governor Page, of Vermont, President of the Rutland Railroad Company, has begun a libel suit for \$200,000 against the Messrs. Clement, bankers, of Rutland, Vermont, and attached the real estate and railroad stocks of the latter. The suit was brought because of statements contained in a circular distributed to the stock holders of the railroad, to the effect that Page had used a balance of \$80,000 of railroad money without paying interest, and had fabricated a pass-book with the bank to deceive the accountant, who examined the books of the railroad.

---

**PRICE FACTORIES.**—While only one bushel in seven of the wheat crop of the United States is received by the Produce Exchange of New York, its traders buy and sell two for every one that comes out of the ground. When the cotton plantations of the South yielded less than 6,000,000 bales, the crop on the New York Cotton Exchange was more than 82,000,000. Oil wells are uncertain, but the flow on the Petroleum Exchanges of New York, Bradford, and Oil City never hesitates. Pennsylvania does well to run 24,000,00 barrels in a year, but New York City will do as much in two small rooms in one week, and the Petroleum Exchanges sold altogether last year 2,000,000,000 barrels. When the Chicago Board of Trade was founded, its members were required to record their transactions. The dance of speculation has nowadays grown to be so rapid that no count is kept of the steps. The board was lately reported to have turned over as much wheat in one day as the whole State of Illinois harvests in a twelvemonth. Its speculative hogs outnumber two to one the live hogs in the United States, and it is safe to say that the board raises five bushels of grain to every one that is produced by the farmers of the West. Securities have become as staple an article of production with us as wheat, cotton, oil, or hogs. One million dollars' worth a day of new stocks and bonds is needed in

prosperous years to supply the demands of the New York Stock Exchange, and its annual transactions are nearly thrice the taxable valuation of all the personal property in the United States. One of the things that would be new to Solomon, if he lived to-day, is the part played by the modern Exchange in the distribution of the products of labor, and the redistribution of wealth. The honest industry that builds up our greatest fortunes is raising wheat and pork on the Chicago Board of Trade, mining on the San Francisco Stock Exchange, building railroads in Wall Street, sinking oil wells in William Street, and picking cotton in Hanover Square. While the text-books of the science of exchange are describing in infantile prattle the imaginary trade of prehistoric trout for pre-Adamite venison between the "first hunter" and the "first fisherman," the industry of the cotton plantation, the oil-fields, and the farm is being overlaid by an apparatus of Exchanges which will prove an extremely interesting study to the Ricardo of, say, the twenty-fifth century. These Exchanges are the creameries of the world of labor. The prices of the speculative wheat and the spectral hog of the board fix those of the real wheat and the actual hog of the field. The negro planter of Georgia who raises his bale and a half must sell it for what the Cotton Exchange says it is worth. The man who works in the ground must take the price fixed for him by the man who works in the air. No one can understand the "corner" who does not comprehend the development and reach of the Exchanges of our time. The manufacture of prices, like other modern industries, is being concentrated into vast establishments, and these are passing under the rule of bosses and syndicates. The markets, like political parties, are run by the machine. The people are losing the power of making prices as well as nominations. The "Free Breakfast Table" pays tribute to some clique, whether railroad pool, trades-union, match monopoly, coal combination, pottery tariff infant, or Board of Trade corner, on pretty much everything upon it. The coffee market of the country has lately gone out of the region of unorganized supply and demand into the hands of a Coffee Exchange, with all the modern improvements for speculation. A price factory to make the quotations of butter and cheese has just been established in New York. It deals in brokers' eggs as well as hens' eggs, and has all the approved facilities to enable it to count and sell the chickens that are not yet hatched out of eggs that are not yet laid.—*North American Review*.

---

THE GROWTH OF INTEREST.—The Philadelphia "Press" reports a case recently tried before a Common Pleas judge in that city which illustrates the old adage that "interest eats like a moth." The case grew out of certain financial transactions between one John Kessler, Jr., and Dungan and Steever, members of the firm of Dungan, Cartwright and Company, contractors for building the Hoosac Tunnel in Massachusetts. The work involved the use of large sums of money by the contracting firm, and Kessler was frequently called upon to endorse their paper. In 1857 Dungan and Steever gave Kessler a judgment bond for \$192,428 to indemnify him from loss by reason of a large number of checks, notes and due-bills that he had signed for their accommodation. Two years after the reception of the bond by Kessler, he assigned it to the use of J. D. Vermilye, and finally Steever, one of the makers, died. Several attempts have been made to collect the face of the bond with legal in-

interest. One such attempt was made in 1862, at which time principal and interest amounted to \$251,080.68. Another revival was made in 1868, at which time judgment was given for \$325,692.83. In 1873 judgment was again rendered, and this time for \$431,054.47. In 1878, the verdict upon revival was for more than half a million, and in the recent trial before Judge Finletter, the verdict was for \$784,427.82, principal and interest.

An amusing anecdote illustrating the growth of interest is told of the late Peter Cooper. He was strongly opposed to the methods of many merchants, who launched out into extravagant enterprises on borrowed money for which they paid exorbitant rates of interest. Once while talking about a project with an acquaintance, the latter said he would have to borrow the money for six months, paying interest at the rate of three per centum per month. "Why do you borrow for so short a time?" Mr. Cooper asked. "Because the brokers will not negotiate bills for longer." "Well, if you wish," said Mr. Cooper, "I will discount your note at that rate for three years." "Are you in earnest?" asked the would-be borrower. "Certainly I am. I will discount your note for \$10,000 for three years at that rate. Will you do it?" "Of course I will," said the merchant. "Very well," said Mr. Cooper; "just sign this note for \$10,000, payable in three years, and give me your check for \$800, and the transaction is complete." "But where is the money for me?" asked the astonished merchant. "You don't get any money," was the reply. "Your interest for thirty-six months, at 3 per centum per month, amounts to 108 per centum, or \$10,800; therefore your check for \$800 just makes us even." The force of this practical illustration of the folly of paying such an exorbitant price for the use of money was such that the merchant determined never to borrow at such ruinous rates, and he frequently used to say that nothing could have so fully convinced him as this rather humorous proposal by Mr. Cooper.

---

THE UNITED STATES AND GREAT BRITAIN—THEIR COMPARATIVE WEALTH.—According to figures recently compiled by Mr. Mulhall, of the Royal Society of London, and an eminent statistician, the property of the United States, as represented by houses, furniture, manufactures, railways, shipping, bullion, lands, cattle, crops, investments abroad, etc., is \$42,000,000,000, which, adding roads, public lands, etc., valued at \$7,700,000,000, gives a grand total of \$49,770,000,000. This he states to be more than \$9,000,000,000 in excess of the aggregate wealth of Great Britain. The wealth proper of the latter he estimates to be \$38,948,000,000, and the value of English roads, public lands, etc., \$1,700,000,000, making a grand total of \$40,640,000,000. The wealth per inhabitant is \$1,160 in that country, against \$995 in this. It has been objected to Mr. Mulhall's figures that the prices of fixed property here are largely based on fictitious and inflated values. Perhaps, for instance, a factory, coal mine, dwelling, or steamship or railroad would be valued at 50 per cent. more than the same properties would be worth in Great Britain. This criticism should be kept in mind when the above suggestive figures are read. We are, however, gaining rapidly on Great Britain in average as well as aggregate wealth.

**NEW YORK CITY NATIONAL BANKS.**—The following is an abstract of the reports made to the Comptroller of the Currency, showing the condition of the national banks in the City of New York at the close of business on June 23, 1888, the number of banks being 48. The figures for May 1, 1888, are also given for comparison:

\*Circulation of National Gold Banks not included in the above.....\$754,679

JOHN JAY KNOX,  
Comptroller of the Currency.

BANKERS' CONVENTION OF 1883.—It should not be forgotten that the annual convention of the American Bankers' Association will be held at Louisville, Kentucky, on Wednesday and Thursday, October 10 and 11. The Exposition now open at that place will no doubt make a visit to Louisville all the more desirable. Those who have attended the previous conventions have found themselves repaid not only in the formal transactions, but in the pleasant and useful acquaintances that have been formed or renewed.

**NATIONAL DEBT STATEMENT.**—Following is a recapitulation of the national debt statement for September 1, 1883, with the figures of August 1, for comparison (cents omitted):

| <b>INTEREST-BEARING DEBT.</b>                                                            |                 |                 |
|------------------------------------------------------------------------------------------|-----------------|-----------------|
|                                                                                          | Aug. 1, 1883.   | Sept. 1, 1883.  |
| Bonds at 5 per cent., continued at $3\frac{1}{4}$ .....                                  | \$32,045,050    | \$21,404,550    |
| " $4\frac{1}{4}$ "    .....                                                              | 250,000,000     | 250,000,000     |
| "    4    "    .....                                                                     | 737,607,350     | 737,610,550     |
| "    3    "    .....                                                                     | 304,241,900     | 305,529,000     |
| Refunding certificates.....                                                              | 337,700         | 334,850         |
| Navy pension fund.....                                                                   | 14,000,000      | 14,000,000      |
| Principal.....                                                                           | \$1,338,232,000 | \$1,323,878,950 |
| Interest.....                                                                            | 9,488,647       | 10,675,650      |
| <b>DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.</b>                                 |                 |                 |
| Principal.....                                                                           | \$7,267,765     | \$6,583,165     |
| Interest.....                                                                            | 361,311         | 353,347         |
| <b>DEBT BEARING NO INTEREST.</b>                                                         |                 |                 |
| Old demand and legal-tender notes.....                                                   | \$346,739,926   | \$346,739,891   |
| Certificates of deposit.....                                                             | 12,910,000      | 12,145,000      |
| Gold and silver certificates.....                                                        | 172,723,451     | 175,644,721     |
| Fractional currency.....                                                                 | 6,999,241       | *6,997,796      |
| Principal.....                                                                           | \$529,372,618   | \$541,527,408   |
| Unclaimed Pacific Railroad interest.....                                                 | 4,619           | 4,329           |
| * Total \$15,373,730; amount estimated lost or destroyed, \$3,375,934.                   |                 |                 |
| <b>TOTAL DEBT.</b>                                                                       |                 |                 |
| Principal.....                                                                           | \$1,884,872,383 | \$1,876,989,523 |
| Interest.....                                                                            | 9,854,573       | 11,033,227      |
| Total.....                                                                               | \$1,894,726,951 | \$1,888,022,751 |
| Total cash in the Treasury.....                                                          | 351,536,345     | 351,503,986     |
| Debt, less cash in the Treasury.....                                                     | \$1,543,190,617 | \$1,536,518,765 |

## BANKERS' OBITUARY RECORD.

---

**Breese.**—William C. Breese, Cashier of the First National Bank of Charleston, S. C., died August 13, aged seventy-five years. Mr. Breese was born at Hoosick Falls, N. Y., and at the age of twenty years removed to Columbia, S. C., where he was employed in the Commercial Bank. In 1838 he was appointed Teller of the Southwestern Railroad Bank, and was afterward for some time Cashier of the Bank of South Carolina. During the war the funds of this bank were secreted at his house at Anderson, S. C., at great risk, his own valuables being lost. He held the position of Cashier of the First National Bank, of Charleston, from its organization in 1866 until the time of his death. He was a gentleman of the old school, retiring in disposition and zealous and faithful in the discharge of his duties, public and private.

**Condon.**—James S. Condon, President and proprietor of the Morrow Bank, Morrow, Ohio, died June 24 last, aged sixty-six years.

**Dennison.**—The death is announced of Robert Dennison, Cashier of the Citizens' National Bank of Warren, Pa.

**Fisher.**—Thomas Fisher, President of the First National Bank of Huntingdon, Pa., died August 2, aged eighty-two years. He was one of the oldest, most successful, and highly respected business men of that district. Born in 1802, he became clerk in a store at Huntingdon Furnace at the age of fourteen. In 1822 he removed to Huntingdon, and engaged in business, subsequently erecting flouring mills and acquiring coal lands. In 1861 took his two sons into partnership, the firm name being Fisher & Sons. The elder son, Horatio G., served two terms in Congress.

**Gould.**—Edward O. Gould, of the firm of B. P. Learned & Co., New York, and a member of the New York Stock Exchange, died on the evening of September 3. He was thirty-eight years of age and unmarried.

**Stout.**—Andrew Varick Stout, ex-President of the National Shoe and Leather Bank of New York, died September 5, 1883, in the seventy-first year of his age. Mr. Stout was one of the best and most favorably known of the business men of New York for many years. Here he was born, and received his education in the public schools. At eighteen he was appointed an assistant teacher, was afterwards a Principal and served for a time as Manager of the New York Orphan Asylum. With his savings he subsequently embarked in the wholesale boot and shoe trade, in the successive firms of Stout & Ward, and A. V. Stout & Co., and was very successful. When the Shoe and Leather Bank was started in 1855 he was chosen Vice-President, and on April 3 of that year became President, holding that position until February 1, 1883, when failing health obliged him to resign. He was, besides, a Director in a number of other institutions. He served as City Chamberlain at one time, for six years, with great credit. He was a Trustee of St. Paul's M. E. Church, and gave largely to charitable objects. He recently gave \$40,000 to Drew Theological Seminary and \$50,000 to the Wesleyan University. His son, Joseph S. Stout, is head of the firm of Stout & Co., brokers, of New York, of which the father was a special partner.

**Wheeler.**—Charles H. Wheeler, Vice-President of the Central National Bank, of Philadelphia, Pa., died suddenly from heart disease in Vesey street, New York, on August 18. He was well-known in financial circles of New York, as well as Philadelphia, as a shrewd, liberal and successful man. He was born at Philadelphia about fifty years ago, and began his business career as a clerk for Morris, Tasker & Co., iron

manufacturers of Philadelphia, and subsequently becoming a partner. He afterwards engaged in banking and insurance. He was a Director of the Seaboard Bank of New York, and of the Insurance Company of North America, Philadelphia, and is said to have left a large fortune.

**Williams.**—Joseph P. Williams, a member of the New York Stock Exchange, and of the firm of Williams & Co., Exchange place, New York, died August 8, at Stonington, Conn. He had been connected with financial matters since 1865.

## NOTICES OF NEW BOOKS.

*What Social Classes Owe to Each Other.* By WILLIAM GRAHAM SUMNER, Professor of Political and Social Science in Yale College. New York: Harper & Brothers. 1883.

This little volume is composed of a series of essays which were originally published in "Harper's Weekly." If called upon to describe the subject in a word we should say that it was a plea in favor of the scientific view as opposed to the sentimental view of social and economic questions. Free institutions and a paternal Government are not compatible. "The free man who steps forward to claim his inheritance and endowment as a free and equal member of a great civil body must understand that his duties and responsibilities are measured to him by the same scale as his rights and powers. He wants to be subject to no man. He wants to be equal to his fellows. He wants to be equal. So be it; but he cannot escape the deduction that he can do no more than his fellow. It is not wicked to be rich, and the rights of the rich man are not to be measured as those of the poor man. The views of the writer are methodical, and, at the same time, easy style. They show only one side of the subject, but on these questions it is certainly reasonable sense.

With Explanatory Notes, Citizenship Department. By CHAS. F. SUMNER, octavo, \$1.50.

## RAILROAD AND INVESTMENT NEWS.

(A synopsis of information regarding Railroad and other Corporation affairs of interest to Bankers, Investors, &c. *Classification*: I. New Issues. II. Reports. III. Miscellaneous Investment News.)

### I. NEW ISSUES.

**CONNECTICUT.**—An issue of \$1,500,000 Connecticut State  $3\frac{1}{4}$  per cent. bonds has been awarded to the Williamsburg City Savings Bank at 106 $\frac{1}{4}$ .

**NEW YORK STOCK EXCHANGE.**—The Committee on Stock List have recommended that Elizabeth City and Norfolk Point Road be removed from the list and the new Norfolk Southern Railroad stock placed there.

**PENNSYLVANIA RAILROAD.**—The first instalment, amounting to \$100,000, of the issue of \$5,000,000 collateral trust bonds recently authorized for the construction of the company's Schuylkill Valley lines, has been forwarded to Europe.

**THE GULF, COLORADO & SANTA FE RAILROAD** stockholders have decided to issue 40-year 6 per cent. mortgage bonds, not to exceed \$13,000 per mile on the road constructed, or to be constructed, for the purpose of extending, improving and operating the railroad.

**THE NEW YORK AND SEA BEACH RAILWAY COMPANY** has decided to increase its capital stock from \$500,000 to \$600,000, to provide funds for necessary improvements, etc. If the approval of the Railroad Commissioners is obtained the new stock will be taken by present holders of stock.

**PENNSYLVANIA AND SCHUYLKILL VALLEY RAILROAD.**—At a special meeting held in Philadelphia on August 7, the stockholders formally approved the recent action of the Directors in increasing the bonded indebtedness to \$4,500,000 and leasing the property to the Pennsylvania Railroad Company.

**NEW YORK & ATLANTIC RAILROAD CO.**—The Receiver has been granted permission to issue \$100,000 worth of 6 per cent. Receiver's certificates for completing a bulkhead and other works. The road is to run from South Brooklyn to Canarsie, and will be connected with New York by boats from the Battery.

**EASTON AND BANGOR RAILROAD.**—The stockholders of this company, which is authorized to build a road from Easton to Wind Gap, Northampton county, Pa., a distance of 16 miles, have approved an increase of the bonded indebtedness from \$150,000 to \$400,000. The capital stock was recently increased from \$150,000 to \$400,000.

**BALTIMORE.**—Bids were recently opened for \$181,000 of 4 per cent. city bonds, to run until 1925, issued by the city for the use of the Western Maryland Railroad. The bids aggregated \$1,182,800, at premiums ranging from  $2\frac{1}{4}$  to 10 per cent. The Finance Department of the city was the highest bidder, and they will be added to the sinking fund.

**MONTCLAIR (N. J.)** has arranged its railroad debt, for which the township was bonded some years ago, on a satisfactory basis. The original sum was \$200,000, which had nearly doubled from defaulted interest. New bonds to the amount of \$335,000 have been issued at 5 per cent. for 22 years, and the entire amount has been taken by the Mutual Benefit Life Insurance Company.

**OHIO AND MISSISSIPPI RAILWAY.**—A mortgage for \$16,000,000 was recently recorded at Springfield, Ill., in favor of Cyrus C. Hines, of Indiana, and the Union Trust Co.,

of New York. The object is to secure the bonds ordered at the meeting at Flora, Ill., for the purpose of taking the road out of the hands of the Receiver. The probability is that all the arrangements will be completed for the reorganization of the road by the time of the next annual meeting, the third Wednesday in October next.

**THE SHENANDOAH VALLEY RAILROAD COMPANY** has applied to the New York Stock Exchange for the listing of \$2,270,000 of first mortgage bonds. There is an authorized issue of \$6,212,000 general mortgage bonds, of which \$2,270,000 are reserved to retire the first mortgage bonds, leaving the actual issue \$3,942,000. The amount of income bonds thus far issued by the Shenandoah Company is but \$1,750,000.

**STEBENVILLE AND INDIANA RAILROAD.**—Notice has been given by the Pittsburgh, Cincinnati and St. Louis Railway Company offering to the holders of the bonds of the Steubenville and Indiana Railroad maturing Jan. 1, 1884, the option of extending the same for 30 years, or until payable, July 1 and Jan. 1. The option of extension expires Sept. 29, 1883. The bonds, as extended, will be in registered form. The Steubenville and Indiana Railroad is a portion of the consolidated line now known as the Pittsburgh, Cincinnati and St. Louis Railway. Parties desiring to avail themselves of this option should present their bonds at the office of the Treasurer of the Pennsylvania Railroad Company at Philadelphia. All bonds not so extended will be purchased at maturity, when interest thereon will cease. The interest due Jan. 1 will be paid without rebate when the bonds are presented for extension.

**THE CANADA SOUTHERN RAILWAY COMPANY** has made application to place on the list of the New York Stock Exchange \$6,000,000 of second mortgage bonds, to draw interest at 5 per cent. per annum, payable semi-annually. The bonds are secured by a mortgage to Augustus Schell and Cornelius Vanderbilt, as Trustees, upon the company's railway and undertaking, and all its equipment, property of every kind, its proprietary interests in the Canada Southern Bridge Company, the Erie and Niagara Railway, Toledo, Canada Southern and Detroit Railway, Michigan Midland and Canada Railway, all branches to be constructed or acquired, and the bridge now being built over the Niagara River, subject only to the first mortgage of \$14,000,000. The bonds are issued for the purpose of constructing a road from Welland to the Niagara River, acquiring the ownership of the bridge over the Niagara River, replacing the Kettle Creek bridge at St. Thomas, laying second tracks, extending existing branches and increasing the equipment.

**BANKERS & MERCHANTS' TELEGRAPH COMPANY.**—For the further improvement and extension of its lines and facilities, the Bankers and Merchants' Telegraph Company early in August secured a loan from the Farmers' Loan and Trust Company of \$300,000, for which it has issued 300 bonds of the denomination of \$1,000 each.

At a meeting on August 8 the issue of a quantity of new stock was authorized. The company is about to add ten wires to its lines between this city and Washington, and also to construct lines to Boston and Chicago. It was therefore resolved that 7,000 additional shares of capital stock be issued and that stockholders of record, Sept 1, 1883, be entitled to a preference in the subscription therefor to the extent of two and one-third shares of such additional stock for each share of existing stock then held by them, (excluding fractions;) that such stock shall be sold at not less than 25 per cent. premium and shall be deliverable Sept. 20, 1883, at which time the preference granted in the resolution will expire. The Directors also declared a cash dividend of 6 per cent., payable on Sept. 10.

This company is said to now control the stock of the Southern Telegraph Company, and to contemplate large additions to its lines.

## II. REPORTS.

**RUTLAND RAILROAD.**—At the annual meeting on August 1, the Clement ticket was elected. The report for the year ending June 30, 1883, showed no change in the income of the road during the preceding year. The disbursements were increased by payments for scrip of \$27,486, principally on a judgment in favor of F. Chaffee. From an investigation into the irregularities of the late Treasurer it appears that the amount of preferred stock in excess of the legal amount is 2,391 shares, and of common stock 496 shares, while the deficiency in cash was \$42,717. Consequently no dividend can now be declared. It is hoped that the cash deficiencies will be made good

from the property of the late Treasurer, and that the company will be indemnified for the over-issued stock.

**AUGUSTA AND KNOXVILLE.**—During the year ended March 31, 1883, the earnings were \$91,069; expenses, \$60,479 52; net earnings, \$30,590. Of this \$22,901 went to pay floating debt, and \$7,688 to construction.

**CHICAGO, ST. PAUL, MINNEAPOLIS AND OMAHA.**—The report for the year ending December 31, 1882, shows that at that date 1,115 miles were operated; proprietary roads, 34; total, 1,150 miles. The earnings were as follows:

|                               | 1882.        |    | 1881.        |
|-------------------------------|--------------|----|--------------|
| Total gross earnings.....     | \$4,962,202  | .. | \$4,021,961  |
| Total operating expenses..... | 3,240,787    | .. | 2,776,463    |
| Net earnings.....             | \$1,721,415  | .. | \$1,245,499  |
| Summary of income account:    |              |    |              |
|                               | 1882.        |    | 1881.        |
| Total income.....             | \$2,268,684  | .. | \$1,828,228  |
| Total disbursements.....      | 1,777,663    | .. | 1,619,832    |
| Balance surplus.....          | \$491,221    | .. | \$208,896    |
| Stock and bonds:              |              |    |              |
|                               | 1882.        |    | 1881.        |
| Common stock.....             | \$18,573,233 | .. | \$17,206,633 |
| Preferred stock.....          | 10,759,993   | .. | 9,848,333    |
| Funded debt.....              | 10,509,488   | .. | 17,790,488   |

Dividends at the rate of 7 per cent. were paid. The capital stock was increased on account of 46 miles Norfolk line, 14 miles C. F. & N. Railroad, 20 miles Superior Branch, and 20 miles Bayfield Extension.

**CHICAGO AND NORTHWESTERN.**—The annual report for the year ended May 31, 1883, shows that at the date mentioned 3,584 miles were operated, against 3,278 miles the year before, an increase of 306 miles. Of this increase 89.80 became part of the railway proper, by consolidation and purchase; there were constructed 185.24 miles of additional proprietary lines, and 31.50 miles were added to the Maple River Railroad, an extension of a leased Iowa line. The earnings were as follows:

|                            | 1882-83.     |    | 1881-82.     |
|----------------------------|--------------|----|--------------|
| Total gross earnings.....  | \$24,061,835 | .. | \$23,634,656 |
| Total expenses.....        | 14,072,516   | .. | 12,689,634   |
| Net earnings.....          | \$10,009,319 | .. | \$11,045,022 |
| Summary of income account: |              |    |              |
|                            | 1882-83.     |    | 1881-82.     |
| Net earnings.....          | \$10,009,319 | .. | \$11,045,022 |
| Total disbursements.....   | 8,848,038    | .. | 8,263,583    |
| Balance surplus.....       | \$1,161,281  | .. | \$2,791,439  |

The following shows the amount of stock (including the amount in the company's treasury) and bonds (including those in sinking funds) outstanding at the end of the fiscal year:

|                                       | 1882-83.     |    | 1881-82.     |
|---------------------------------------|--------------|----|--------------|
| Common stock.....                     | \$16,229,916 | .. | \$15,096,324 |
| Preferred stock.....                  | 22,323,190   | .. | 22,153,119   |
| Stocks of proprietary roads, etc..... | 22,463,400   | .. | 22,883,150   |
| Bonds.....                            | 69,821,000   | .. | 64,248,000   |

### III. MISCELLANEOUS INVESTMENT NEWS.

**CALIFORNIA.**—All of the counties, so far as heard from, report a large increase in their assessment rolls, and from the agricultural counties there is every indication of prosperity. In Sacramento County there is an increase, not including railroad property, of \$2,250,000, mostly in real estate and improvements. The total amount of the roll, with the exception noted, is \$31,712,250. Amador County has a roll of \$3,250,000

being an increase of \$400,000 over the assessment of last year. In San Luis Obispo the increase is \$1,541,641, and the total valuation \$6,600,458. There are 222,040 acres of inclosed land in the county, but only 75,900 acres cultivated. This county has not yet gone into fruit-growing on a large scale, as there are enumerated only 16,650 fruit trees of all kinds and 85 acres of vines. Santa Barbara County shows an increase of valuation of \$750,000 and a total of \$5,773,000, about two-thirds of the increase being on real estate and improvements. The Assessor states that there has been a decrease in the number of all kinds of live stock in the county since the last assessment, but there has been a great increase in the value of all kinds of animals, especially horses and sheep. A better breed of stock is being raised in the county, and worthless animals are being killed off or sent away. Horses are being rapidly and steadily improved. Sheep last year were assessed at \$1 per head; this year, owing to their improved character, they are assessed from \$1 80 to \$1 40 per head.—*San Francisco Alta*.

NEWARK, N. J.—The tax rate has been fixed at \$2 06 on the \$100 for the current year, a reduction of 38 cents from last year. This reduction of rate is due to an increase of about \$4,000,000 in the valuation of property.

BROOKLYN, N. Y.—The following are the assessed valuations of the capital of corporations of Brooklyn for 1883: Gas companies, \$2,443,600; insurance companies, \$123,000; railroad companies, \$2,148,600; ferry companies, \$445,000; miscellaneous companies, \$107,600; manufacturing companies, \$587,300; shares in banks, \$2,200,610. Total, \$8,164,710.

NEW YORK STATE.—The State Board of Assessors have engaged Mr. Richard A. Bishop to examine the assessed valuations of real estate in the various counties of the State. He has completed his examination in ten counties, and it is said he finds their valuations do not average more than one-third of those which have been fixed by the local assessors in Kings county.

THE LONDON STOCK EXCHANGE has granted quotations to the Illinois Central leased line 4 per cent. stock; Buffalo, New York & Philadelphia 40-year gold bonds Nos. 1 to 11,000, and Oregon & California Railway bonds Nos. 6,001 to 7,400. Application has been made for quotations for Long Island Railway \$1,000,000 5 per cent. bonds, and Northern Pacific first mortgage land grant bonds Nos. 35,228 to 38,977.

VERMONT.—The report of the State Treasurer of Vermont shows that the receipts for the year ending on the 31st ult. were \$583,596 and the disbursements \$532,673, leaving a balance of \$50,923. The total liabilities of the State are \$225,504, including the Agricultural College fund of \$135,500, which is not due till 1890. The revenues for the coming year are estimated at over \$3,000,000, including \$250,000 of corporation taxes for the support of the State, under the law of last year, which takes the place of the old general State tax.

INDIANA RAILROADS.—The State Board of Equalization has concluded the appraisement and assessments of Indiana railways. The following are the totals: Miles of main and second track, 1883, 5,301; do 1882, 4,954. Valuation of main tracks, 1883, \$39,572,223; 1882, \$36,871,726; increase, \$3,200,497. Valuation of side track, 1883, \$2,571,996; 1882, \$2,256,713. Valuation of rolling stock, 1883, \$10,742,270; 1882, \$9,183,198. Total valuation, 1883, \$54,209,228; 1882, \$47,865,398—an increase over last year of \$5,323,830, and of \$10,873,888 over 1881.

EXCHANGE TELEGRAPH COMPANY.—A certificate incorporating this company has been filed in the County Clerk's office of New York. The lines of the company are to run from this city to San Francisco, California, touching at all intermediate points which may be desired. The capital stock is fixed at \$2,000,000, divided into 20,000 shares of \$100 each; provision is also made for the increase of the capital stock in case it becomes necessary. The corporators are Stephen D. Field, Charles S. Hurd, Alexander Thain, J. Bentley Squire and James C. Jewett.

POSTAL TELEGRAPH COMPANY.—The Directors met on August 8 and accepted the resignations of President Joel B. Erhardt and Directors Hugh J. Jewett and Thomas Dickson. The vacancies caused by the resignations of the two last-named gentlemen were filled by the election of George S. Hart, of the firm of George S. Hart & Co., produce brokers, and William K. Soutter, the well-known banker. George R. Williamson was elected Secretary in the place of Mr. Fanshawe, who has also resigned. On

the 15th John W. Mackey, the California millionaire, was elected a Director. There will be \$21,000,000 of stock in all, \$19,000,000 of which have been issued, \$12,000,000 being in the hands of George S. Coe, President of the American Exchange Bank, in trust for the pool, to be jointly controlled by him and Mr. Mackey. The company has issued \$10,000,000 of first mortgage bonds at 6 per cent. for thirty years, secured by the filing of mortgages upon the works at Ansonia and upon all the lines and plant owned by them. Three millions of these bonds will be used for working capital the next twelve months, and seven millions will remain in the Treasurer's hands. Arrangements were consummated by which J. W. Mackey, H. L. Horton and George D. Roberts are to take a million of these securities among them jointly. No President was chosen.

LOUISIANA.—Owing to the prolonged litigation obstructing the operation of the Louisiana laws for the collection of back taxes great delays occurred in enforcing the collections. The semi-annual interest was due on August 1 last, on what are known as the "baby bonds," and the financial officers of the State, finding that they had not sufficient funds to meet them sent a request to the State National Bank of New Orleans to advance sufficient funds to meet the emergency. A special meeting of the directors was held and the request acceded to, and the coupons paid on presentation.

BULL'S INTERNATIONAL IRON AND STEEL COMPANY.—The certificate of incorporation of this company has been filed in the office of the County Clerk of New York. The capital stock is fixed at \$10,000,000, divided into 10,000 shares of \$100 each. The trustees for the first year are Henry G. Bickwell, Edgar B. Kenyon, Aaron H. Cragin, James Turner, Benj. M. Plumb, Charles M. Gormley, Frederick M. Kelly, Benjamin M. King and Henry W. Blair. The purpose is represented to be the development of a patent process for manufacturing iron and steel at a great reduction from the present cost.

ST. LOUIS, EMPORIA AND DENVER RAILWAY COMPANY.—A charter for this company was recently filed with the Secretary of State of Kansas. The road is to run from St. Louis to Denver and the estimated length is 1,000 miles. The capital stock is \$20,000,000. The Board of Directors for the first year comprises Gov. Charles Foster, of Ohio; Congressman Amos Townsend, of Ohio; Senator Warner Miller, of Herkimer, N. Y.; John D. Perry and John Scollin, of St. Louis; J. L. Pace, of Butler, Mo.; R. W. Blue, William Martindale, H. C. Cross, and C. Hood, of Kansas, and Thomas M. Nichol, of New York City.

CINCINNATI.—Real estate continues to sell for high figures, and the building interests were never more active. According to the returns of the Assessors to the County Auditor, the total value of Cincinnati manufactures for the past year, iron excepted, was \$82,011,430. The first in importance is the liquor products—alcohol, whisky, and malt liquors—which were valued at \$7,919,000. Clothing comes next, valued at \$7,666,745.

The annual report of the Board of Trade, issued in August, shows that the total product of the manufacturers of the city for the year was \$194,572,000. This is an excess of \$8,000,000 over the value of the product of last year. The manufacture of carriages has increased 25 per cent.; soap, candles, and oils, 25 per cent.; iron, 20 per cent.; wood, 8 per cent.; and paper and clothing each 5 per cent. The liquor and tobacco interest fell off 10 per cent., drugs and chemicals, 20 per cent., and there was a falling off in half a dozen other lines of manufacture, attributed principally to the agitation of the tariff question in Congress last Winter. In 1875 the tax levy was 4.32; in 1876, 5.16; 1877, 5.20; 1878, 5.34; 1879, 2.75; 1880, 3.40; 1881, 2.85; 1882, 2.46; 1883, 1.70.

JAMES O'CONNOR, SON & COMPANY is the name of a new banking firm which has begun business at 69 Wall Street, New York. It is composed of Mr. James O'Connor, formerly President of the Fourth National Bank of Pittsburgh, Pa., and also of the Central National Bank of Baltimore, his son, Mr. W. Scott O'Connor, and Mr. E. P. Chamberlin. The purpose is to receive deposits, keep accounts of banks, bankers, trust companies, capitalists and others, subject to check, and to loan money. No speculative accounts are desired. Government and State bonds will be bought and sold on orders only, and drafts on Europe and circular letters will be furnished by the firm. They begin business under very favorable auspices and will no doubt achieve the position to which they appear to be entitled.

**THE NATIONAL BANK NOTE CIRCULATION.**—Statement of the Comptroller of the Currency, showing by States the amount of National Bank circulation issued, the amount of Legal-Tender Notes deposited in the United States Treasury to retire National Bank circulation, from June 20, 1874, to September 1, 1888, and amount remaining on deposit at latter date.

| STATES AND TERRITORIES.                                                         | Addition'l circulat'n issued since June 20, '74 | Legal-Tender Notes Deposited to Retire Nat'l B'k Circulat'n since June 20, '74. |                                             |                 | Leg'l t'd's on deposit with U. JOHN JAY KNOX,  
Comptroller of the Currency.

## \* THE BANKER'S GAZETTE.

### The Money Market and Financial Situation.

NEW YORK, September 4, 1883.

The past month has been remarkable for the number of alarming events that have occurred in financial circles in various parts of the country, which seem, however, to have resulted in little damage compared with the excitement they caused. From present appearances there was more smoke than fire. Not that the disasters that occurred in Boston, in Vermont, Indiana, and on the New York stock market were not real enough, but that they were not nearly so significant of the general condition of business as they were at first thought to be. Late accounts received from various parts of the country show that there is a good and increasing volume of trade and the outlook for the fall is very encouraging. An active demand for dry goods is reported in Eastern centres, and altogether although a boom is not expected, the prevalent feeling is one of confidence that the worst is well over for this time. The disturbances alluded to and the depression in the stock market have given rise to many rumors and outspoken statements to the effect that many of the banks were in a dangerous condition. These statements being directed largely to the Boston banks, we have taken special pains to inquire into their correctness, and find that they were unwarranted. Some of these statements were to the effect that some of the Boston banks had made large loans on New York & New England Railroad bonds, a very poor security under present circumstances. At first it was the Maverick National Bank, which was said to be most deeply involved in this manner, but when it transpired that the bank had had no transactions in the security named in a long time past, the rumors settled about the American Loan & Trust Company. We are authoritatively assured, however, that the company does not hold \$5,000 of the bonds, and the only foundation for the rumor is that over a year ago the company placed \$1,000,000 of the bonds on the market (realizing a good profit on the operation), and that they are trustees of the Car Trust, which does not involve them in the least. The statements mentioned are only examples of the attempts that have been steadily made of late to break down public confidence in the value of all kinds of property.

Some interest is taken in the matter of the probability of an import of specie during the fall. The merchandise exports during the last fiscal year exceeded the imports by 100 million dollars, but the specie movement on balance was slightly against us. Very likely, the merchandise balance during the present year will be no more in our favor than during last year. But for some time past there has been a pretty steady movement of Government and other securities from Europe. This has

*\* The financial situation at Boston and Chicago also appears in this department, the reviews being written by the JOURNAL'S correspondents at those cities.*

been owing partly to the rapid payment of United States Government bonds but in a larger degree, to the depression in general stocks and bonds here, which has been deeply reflected abroad. As soon as the stock market is settled down into a more natural condition a specie movement in this direction will be possible.

THE PUBLIC DEBT was reduced \$6,671,852 during August, making the total reduction since the beginning of the fiscal year (July 1) \$14,572,442, against a decrease of \$29,988,288 in the first two months of the previous fiscal year. This difference may be used for the purpose of measuring roughly the effect of the tax reduction law of last spring. If the same rate of difference be continued throughout the fiscal year, the total reduction in the debt will be only about 65 million dollars, against 137 millions last year. But the amount of pension payments, the appropriations by Congress, etc., will, of course, largely affect this showing. The Internal Revenue receipts during July and August amount to \$19,188,816, against \$25,282,825 in the corresponding time last year, a decrease of \$6,094,009.

As the bonds included in the 121st call were sent in for redemption very slowly, while the surplus was accumulating in the Treasury, the Acting Secretary issued the following circular on August 15:

TREASURY DEPARTMENT,  
WASHINGTON, August 15. }

Notice is hereby given that on Wednesday, August 2, 1883, and on each Wednesday following, United States bonds embraced in the 121st call will be redeemed at the Treasury Department in Washington, to the amount of \$5,000,000, without rebate of interest.

Bonds presented at the Department at 10 o'clock on the day named for redemption will be paid in the order of their presentation, and if an excess of \$5,000,000 be presented on either day, such excess will be first paid on the next redemption day.

Parties transmitting bonds for redemption should address them to the "Secretary of the Treasury, Loan Division, Washington, D. C.," and the bonds should be assigned to "The Secretary of the Treasury for redemption."

When checks in payment are desired in favor of any one but the payee the bonds should be assigned to the "Secretary of the Treasury, for redemption for account of" — (here insert the name of the person or persons to whose order the check should be made payable.)

(Signed), H. F. FRENCH, Acting Secretary.

The total amount of  $3\frac{1}{4}$  per cent. bonds redeemed under the 121st call, and the above circular, up to August 29th, was \$3,231,211.

THE NATIONAL BANKS.—The following will show the amount of each description of bonds held by the Treasurer to secure national bank circulation, on or about the dates indicated:

|                                                | June 1.       | July 1.       | August 1.     | Sept. 1.      |
|------------------------------------------------|---------------|---------------|---------------|---------------|
| Currency 6 per cents.....                      | \$3,502,000   | \$3,552,000   | \$3,452,000   | \$3,463,000   |
| 5 per cents .....                              | 15,000        | 15,000        | 15,000        | .....         |
| $4\frac{1}{4}$ per cents .....                 | 38,899,900    | 39,408,500    | 39,797,500    | 40,631,700    |
| 4 per cents .....                              | 106,188,450   | 104,954,650   | 104,693,650   | 105,207,000   |

| 4 per cents extended at $3\frac{1}{2}$ }       |               |               |               |               |
| 3 per cents.....                               | 200,953,750   | 200,832,850   | 201,989,850   | 201,611,250   |
| Total. ....                                    | \$356,538,000 | \$356,551,500 | \$357,151,500 | \$355,619,150 |

FOREIGN EXCHANGE.—The rates have been repeatedly reduced of late so that a moderate import of gold is not considered unlikely to accompany the usual increase in the produce export movement in the fall. Following are the posted and actual rates of foreign exchange on Sept. 2: Bankers' sterling, 60 days, nominal, \$4 83 $\frac{1}{4}$ ; sight,

nominal, \$4 86; 60 days, actual, \$4 81½@ \$4 82; sight, actual, \$4 85¼@ \$4 85½; cable transfers, \$4 85¼@ \$4 86½; prime commercial sterling, long, \$4 80¼@ \$4 81; documentary sterling, 60 days, \$4 79¼@ \$4 80¼; Paris, bankers', 60 days, 5 25@ 5 24½; sight, 5 22¼@ 5 21½; Antwerp, commercial, 60 days, 5 26½@ 5 26¼; Swiss, bankers' 60 days, 5 24½@ 5 23½; sight, 5 21¼@ 5 21¼; Reichsmarks (4), bankers', 60 days 94@ 94½; sight, 94¼@ 94½; Guilders, bankers', 60 days, 39¼@ 39½; sight, 40@ 40½ Paris dispatches quote exchange on London 25f. 33c.

The following shows the posted rates for prime bankers' sterling bills on London at 60 days and sight, cable transfers, and prime commercial sterling at 60 days, together with exchange on Paris on August 1, the changes in the rates as they occurred during the month, and the highest and lowest during the months of July and August:

|              | Bankers  |        |       | Cable      |             |       | Paris    |        |
|--------------|----------|--------|-------|------------|-------------|-------|----------|--------|
|              | 60 days. | Sight. |       | Transfers. | Commercial. |       | 60 days. | Sight. |
| July—        |          |        |       |            |             |       |          |        |

| 10   | 103½            | 113                 | 119½               | 132                | 28               | 103½ | 113½            | 119½                | 133                |                    |                  |
| 11   | 103½            | 112½                | 119                | 133                | 29               | 103½ | 113½            | 119½                | 133                |                    |                  |
| 13   | 103½            | 112½                | 119                | 133                | 30               | 103½ | 113½            | 119½                | 133                |                    |                  |
| 14   | 103½            | 112¾                | 118¾               | 132                | 31               | 103½ | 113½            | 119½                | 133½               |                    |                  |
| 15   | 103½            | 112½                | 118¾               | 132                | High             | 103½ | 113½            | 119½                | 133½               |                    |                  |
| 16   | 103½            | 113                 | 119                | 132                | Low              | 103  | 112¾            | 118¾                | 132                |                    |                  |
| 17   | 103½            | 113½                | 119½               | 133                |                  |      |                 |                     |                    |                    |                  |

MONEY AND DOMESTIC EXCHANGE.—There is an abundance of loanable capital in the market, and call loans on collateral security are obtained on very easy terms, but commercial paper is carefully examined before being discounted. The quoted rates

are  $5\frac{1}{2}\%$  per cent. on 60 days to 4 months double-named paper, and  $6\frac{1}{2}\%$  per cent. on single-named. Time loans on bond or stock collateral are made at  $3\frac{1}{2}\%$  per cent.

The following table shows the range of call loans, and rate on prime paper, for the past five weeks:

|                           | Aug. 4.          | Aug. 11.         | Aug. 18.         | Aug. 25.         |
|---------------------------|------------------|------------------|------------------|------------------|
| Range of call loans ..... | $1\frac{1}{2}\%$ | $1\frac{1}{2}\%$ | $1\frac{1}{2}\%$ | $2\frac{1}{2}\%$ |
| Rate of discount.....     | $4\frac{1}{2}\%$ | $4\frac{1}{2}\%$ | $4\frac{1}{2}\%$ | $5\frac{1}{2}\%$ |

Following are the rates of domestic exchange on New York on Sept. 1: Savannah, buying, par; selling,  $\frac{1}{2}\%$  premium. Charleston, buying,  $\frac{1}{2}\%$  discount; selling,  $\frac{1}{2}\%$  premium. New Orleans, commercial, 25c. per \$1,000 discount @ par; bank, \$1 per \$1,000 premium. St. Louis, 25c. per \$1,000 discount. Chicago, 50c. per \$1,000 discount; Boston, 10@16c. per \$1,000 discount.

**NEW YORK CITY BANKS.**—The reserve is being gradually reduced, as is to be expected at this time of the year, but the surplus is 6 million dollars, against nothing at this time last year and in 1881.

The following shows the condition of the New York Clearing-House banks for a number of weeks past, as well as about this time in 1882 and 1881:

| 1883.        | Loans.        | Specie.      | Legal-tenders. | Deposits.     | Circulation. | Surp. Rest  |
|--------------|---------------|--------------|----------------|---------------|--------------|-------------|
| Sept. 1..... | \$325,880,600 | \$59,951,200 | \$25,207,800   | \$315,739,900 | \$15,636,300 | \$6,224,025 |
| Aug. 25..... | 327,595,600   | 59,829,200   | 25,412,000     | 317,277,900   | 15,618,600   | 5,821,835   |

RAILROAD AND MISCELLANEOUS STOCKS.—The market has been very much depressed, having reached the lowest point of the year in the middle of August. There are, as we write, however, strong indications that a change for the better is about to occur:

The following table shows the highest, lowest and closing prices of the active stocks at the New York Stock Exchange in the month of August, the highest and lowest since January 1, 1883, and also during the year 1882:

|                           | August, 1883. |       |         | Since Jan. 1, 1883. |                | 1882. |      |

## Bank, Government, Railroad and Miscellaneous Stocks and Bonds.

### LATEST QUOTATIONS AND OTHER INFORMATION.

The following tables give the latest quotations of stocks and bonds at the New York Stock Exchange. In the case of all but the New York bank stocks the highest and lowest actual prices of a year ago are also given, for comparison. The quotation tables on the following pages include *all securities listed at the Stock Exchange*.

#### NEW YORK CITY BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The Capital and Surplus are as given in the latest official reports, *viz.*: the National banks June 22, as reported to the Comptroller of the Currency; the State banks, June 22, as reported to the State Banking Department. The Surplus includes the undivided profits on the dates given. The Banks which are not members of the New York Clearing-House Association are indicated by a (\*). Not listed at the Stock Exchange by a (†). This table includes all the Commercial banks of New York.

**BOSTON—The Financial Situation, Banking News, &c.**

(From the JOURNAL's regular Correspondent.)

Boston, Sept. 1, 1883.

In money matters the month has shown a steady firmness, with Clearing-House rates at 3 per cent. all through, and demand loans to bankers 4 to 4½ per cent. Good business paper has ranged from 5 to 6 per cent., with exceptions of choice factory at 4½ to 5 per cent. Our market has been more or less disturbed by the heavy failures during the month, but mainly confined to a special ring, and banks have naturally closed the stable door after some of the best horses have been lost.

Still our monetary affairs are by no means in an unhealthy state, and no bank or banking house is known to be in an unsafe condition. "Single name" paper, once in favor, now meets with the "cold shoulder" from lenders who seek the added strength of an endorser, though not always the security it should be, in fact a weakness in some instances.

Bank shares have felt the effect of losses by the failures alluded to, and even those institutions believed to have none of the paper in question, suffer indirectly from the situation of their more unfortunate associates. Some of the worst sufferers have been the Blackstone, Commerce, Exchange, Hide & Leather, North, and Shoe and Leather. A comparison of the quotations we give to-day of bank stocks with those in last month's JOURNAL will show the general depreciation.

The Clearing-House exchanges are now very light, footing up only \$48,862,453 for the week, and one day ran as low as \$7,286,730, the first time under \$8,000,000 for more than two years and a half, with the single exception of Sept. 9, 1881, when they were \$6,820,114, but stood over \$11,000,000 the day following or preceding, and for the week ending September 10, were \$66,820,114.

Boston represents the manufacturing interests of New England, and nearly all the great mills of Lawrence, Lowell, Manchester (N. H.), Dover, Portsmouth, Saco (Me.), Biddeford, Lewiston and elsewhere have been built with Boston capital, aggregating many millions, and during a long series of years no small sum has been entirely sunk, while in other instances the gains have well re-imbursed the investments. At present great dullness prevails and some of the stocks on which no dividends have been paid for some time sell under par, while others pay handsomely, and in several instances the stocks command fully 200 per cent., a large number 150 to 175, many others 100 to 150, and a few, not over six in all, under par.

Generally the stock market shows an improved tone, and prices, which fell off early in the month, have rallied toward the close. A feature among investments is city securities which command handsome prices, selling principally by auction, but also largely at private sale "over the counter." A city which cannot now negotiate a 4 per cent. loan at a premium is not considered in first class borrowing credit, and yet it is not many years since a 6 per cent. bond of some of our best cities sold under par. In 1877, for instance, not a single city in the country had a 4 per cent. loan, while few outside of Massachusetts could borrow better than 6 per cent., and a large number then had loans out at 7, 8, 9, and 10 per cent. Within ten years it was not an easy matter to negotiate a loan of Boston 6 per cents at par; and during 1873-1874 such bonds sold as low as 96. Cambridge 6's touched 91¾, Bangor (Me.) 6's 86¾, and Chicago 7's 92, which list might be largely extended, but the securities named are sufficient to show the general course of the market at that period.

The following is the weekly statement of the Boston national banks as returned to the Clearing-House on September 3: Capital, \$50,400,000; loans, \$143,730,900; decrease, \$537,500; specie, \$5,173,100; decrease, \$37,200; legal-tender notes, \$4,213,300; decrease,

\$147,100; 5 per cent. fund, \$1,423,200; decrease, \$26,200; due from reserve agents, \$11,394,400; increase, \$415,700; due from other banks, \$9,732,200; increase, \$379,700; due to other banks, \$27,164,100; decrease, \$1,508,200; deposits, \$57,145,000; decrease, \$218,300; circulation, \$27,803,300; decrease, \$275,600; excess of reserve, \$1,170,728; gain for the week, \$52,514.

The following table shows the highest, lowest and closing prices of the most important railway and miscellaneous stocks sold at the Boston Stock Exchange during the month of August:

| Railroads.               | Low.               | High.             | Clos.            | Railroad Bonds.                                     | Low.              | High.             | Clos.             |

\* Ex. dividend.

**BENJAMIN BURGESS & SONS**, the suspended sugar firm, made an assignment on September 5 to Drexel, Morgan & Co., of New York, as most of their indebtedness is in this city and abroad. Only a small part of their paper is held by the Boston banks.

**THE TELEPHONE COMPANIES.**—The latest news is to the effect that the consolidation of the New England telephone companies with the Bell Company will never take place under the present plan. In fact, the Executive Committee will immediately advise the superintendents of the several local companies to go about their regular business just as though the consolidation was never thought of.

**THE SOUTHEASTERN RAILROAD AND THE ST. ALBANS BANKS.**—A dispatch from Montreal of September 5, says that the negotiations between the Chapman syndicate and directors of the Southeastern Railroad are broken off. This would indicate that there is no immediate relief for Mr. Barlow, and the St. Albans banks which are in difficulties.

The Supreme Court of Massachusetts rendered a decision (Sept. 5) in favor of the Credit Mobilier against the Union Pacific R. R., for \$2,200,000. The full bench decided that there was no constructive fraud, and entered judgment against the railroad.

The opening exercises of the American Exposition of the Manufacturers and Mechanics' Institute, Boston, took place Sept. 5. Governor Butler presided. An oration was delivered by General Francis S. Walker, and other speeches were made by Judge Semmes, of Denver, Julia Ward Howe and Mayor Palmer.

## BOSTON BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The following table gives the latest quotations of Bank Stocks in the Boston market. The Capital and Surplus given are from the last official report, June 22d, and all the banks are National. The surplus includes the undivided net profits. All the banks belong to the Clearing-House, except Bunker Hill, First Ward, Mechanics', National Market of Brighton, People's, and Rockland, which are located out of the city proper, but within city limits, and they clear through other banks.

| BANK TITLE.                      | PAR. | CAPITAL.  | SURPLUS.  | INT. PAYABLE. | SEPT. 1, 1883. |       | LAST DIV'D. |            |

(a) Quarterly. (b) Ex-dividend.

**CHICAGO—The Financial Situation, Banking News, &c.**

(From the JOURNAL's Correspondent.)

CHICAGO, SEPTEMBER 4, 1883.

— Mr. Lyman J. Gage, Vice-President of the First National Bank of Chicago, has just returned from a two months' journey to Europe.

— The Corn Exchange Bank of Chicago is preparing to return to the national banking system. Its title will be the Corn Exchange National Bank. The capital will continue to be \$1,000,000.

— The Farmers' Bank at Richmond, Ind., a small private institution, was closed August 17. It was understood that the depositors would be paid in full, and that the concern would not resume business.

— Chicago Board of Trade bonds were listed on the local stock exchange about the first of August. They sold quite freely at 97¼@98½. Investors have taken the bulk of these bonds, and it is not expected that the remainder of the authorized issue will soon be put on the market.

— The returns to the Illinois State Auditor from the assessors throughout the State, give \$756,422,291 as the total assessments of 1883, against \$750,635,758 for 1882. The assessment returns from Cook County (Chicago) give \$133,639,806 for 1883, being \$8,092,766 more than in the preceding year.

— The telegraphers' strike had a depressing effect on Chicago's business in August, especially in speculative articles. The transactions on the Board of Trade were much below the average in volume, and this told on the business of the banks and clearing-house. Trade is expected to increase henceforth, and a large crop movement is looked for in the fall.

— The janitor of the Chicago National Bank came near being lynched by an excited crowd one evening recently, having been detected in the act of forcing his way into the main banking room. He had locked himself out, and was so anxious to retrieve his blunder as to batter down some of the transoms. His identity was discovered after he had been roughly handled by the crowd.

— The Receiver of the Farmers, Merchants & Mechanics' Savings Bank, the "Bee Hive" of Chicago, has paid out over \$43,000 since August 1, on the first dividend, which will require in all about \$65,000. Since the bank closed its doors six or more years have elapsed, and it is now difficult to find many of the depositors. Only about 150 books were sold by the original owners to speculators.

— The First National Bank, and the Indiana Banking Co., of Indianapolis, Ind., closed their doors on the morning of August 10. The withdrawal of \$500,000 of State funds is reported to have caused the suspension of the first, and the banking company held stock of the former. On the same day the First National was reorganized. Some of the stock changing hands, the capital was doubled, and the institution resumed business, prepared to meet the demands of the depositors. Efforts are being made to place the Indiana Banking Co. in the hands of a Receiver.

— The examination of D. D. Spencer, ex-President of the State Savings Institution, Chicago, was concluded at his present residence, Crefeld, Germany, on August 22. The examination was made in accordance with an order from the Circuit Court of this city, to learn before the Receiver winds up the affairs of the bank, if some of the trustees were not still liable. Spencer left two large notes behind, one for \$40,000, and another for \$500,000. He testified that his memory of events which occurred six

years ago was impaired, and he could not tell how the notes were made up, but that they represented first purchases of stock which had been carried by banks for him before he took charge of the State Savings Institution. He canceled his old notes with the money in the bank, and left two notes in the vault with the stock as collateral when he suddenly ran away in 1877. Spencer's indebtedness to the bank including interest amounts to about \$750,000. It is not believed that any valuable information was obtained from the ex-President.

— During August the Chicago money market was abundantly supplied with funds, which were offered freely at 4@5 per cent. on call, and 5½@7 on time. The market stiffened up after the first week on account of the distrust occasioned by the Eastern failures, and in anticipation of a sharp demand from the country after harvest. The interior banks made applications for re-discounts a little earlier this season than usual, expecting to see dearer rates in the autumn. Country deposits are generally smaller than they were two years ago, because so many farmers have invested their surplus funds in the new lands further West, and owing to the lack of banking facilities in the newly settled regions, the money does not drift back readily to the money centers.

#### CHICAGO BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, AND LAST DIVIDEND.

Following is a statement showing (1) the Capital and Surplus of the Chicago banks on and since June 22, 1888 (the date of the last official statement), (2) the bid and asked price of their Stock and, (3) the rate and date of last dividend. The Surplus includes the undivided profits. The Clearing-House banks are indicated by a star (\*).

| BANK TITLE.                        | PAR. | CAPITAL.  | SURPLUS. | DIV'D PAYABLE. | JULY 1, 1888. |        | LAST DIV'D. |            |

The Bank of Montreal, Canadian Bank of Commerce, and Bank of British North America are branches of Canadian institutions, and do not make a separate local report.

‡ Dividend for 6 months on capital stock. † New. § Earnings added to surplus.  
¶ Not reported.

PRESIDENT ARTHUR was evidently much pleased with his reception at Chicago, September 5, on his return from the Yellowstone trip. Accompanied by several members of the reception committee, he appeared on the trading floor of the Chamber of Commerce, where he met with a splendid ovation. Fully 4,000 persons were on the floor and in the galleries, and the appearance of the President was the signal for continuous cheering, lasting several minutes. He was introduced by Vice-President French and spoke as follows:

Gentlemen:—I thank you for the warmth of this greeting. I am glad to have the opportunity of meeting so many of the representative business men of this magnificent city. I shall always recall with pleasure the warmth and cordiality with which I have been welcomed, and leave you with my best wishes for your future prosperity and welfare.

## DAILY RECORD OF FINANCIAL EVENTS.

JULY, 1883.

2. **MONDAY.**—Decrease in the public debt in June, \$18,098,201; since June 30, 1882, \$187,822,253.
4. **WEDNESDAY.**—A legal holiday.  
Eight thousand iron workers in South Staffordshire and East Worcestershire, England, struck work owing to a reduction in wages.
6. **FRIDAY.**—Destructive floods occurred in the district of Surat, India.
7. **SATURDAY.**—Discount on commercial paper in New York, 5@6½ per cent.; call loans, 2@2½ per cent.  
Discount in London on 60 days to 3 months' bank bills, 3¼ @3½ per cent., and trade bills, 3¼@4 per cent.
10. **TUESDAY.**—An agreement made between M. de Lesseps and the English Government providing for a new Suez Canal parallel to the present one.
12. **THURSDAY.**—The new Suez Canal agreement condemned by commercial organizations in Great Britain.  
The treaty of commerce between Germany and Spain was signed.
13. **FRIDAY.**—Nearly one-quarter of the town of Rostov, Russia, was destroyed by fire.
14. **SATURDAY.**—Discount on commercial paper in New York, 5@6½ per cent.; call loans, 2¼@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 3½ per cent., and trade bills 3¼@4 per cent.
15. **WEDNESDAY.**—The New York Stock Clearing-House began operations.  
The Cincinnati Oil Exchange opened for business.
19. **THURSDAY.**—A general strike of the employees of the Western Union Telegraph Company was begun.
21. **SATURDAY.**—Discount on prime commercial paper in New York, 5@6½ per cent.; call loans, 1@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 3½ per cent; trade bills, 4@4¼ per cent.  
The Spanish Senate ratified the Treaty of commerce between Spain and Germany.
23. **WEDNESDAY.**—The American Rapid Telegraph Company yielded to the demands of the striking operators. The other companies held out.
24. **THURSDAY.**—A revolution having succeeded in Ecuador, Pedro Carbo was proclaimed chief of the Government of Guayaquil.  
The Ward Iron Co., at Cleveland, O., suspended, with \$300,000 estimated liabilities and \$5,000 assets.
27. **FRIDAY.**—Diplomatic relations between Mexico, and France and England have recently been resumed.
28. **SATURDAY.**—Discount on prime commercial paper in New York, 5@6½ per cent.; call loans, 1¼@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 3½ per cent.; trade bills, 4@4¼ per cent.  
An earthquake on the island of Iachia, near Naples, Italy, destroyed three towns, with an estimated loss of 3,000 or 4,000 lives.
30. **MONDAY.**—F. Shaw & Bros., tanners, of Boston, etc., assigned with \$3,500,000 liabilities and about \$5,000,000 nominal assets.  
Charles W. Copeland & Co., shoe manufacturers of Boston, suspended, with \$750,000 liabilities and about the same of estimated assets.

RECORD OF FINANCIAL EVENTS—*Continued.*

AUGUST, 1883.

1. **WEDNESDAY.**—Reduction in the public debt during July, \$7,900,591.

The new British act relative to the conveyance of parcels by post came into operation and promises to be a great success.

The Exposition at Louisville, Ky., opened.

2. **THURSDAY.**—Cholera is raging in Egypt but is declining in virulence.

3. **FRIDAY.**—War is feared between France and China, on account of Tonquin difficulties.

4. **SATURDAY.**—Discount on prime commercial paper in New York,  $5@6\frac{1}{2}$  per cent.; call loans,  $3@1\frac{1}{2}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{4}$  per cent., and trade bills,  $3\frac{1}{2}@4\frac{1}{4}$  per cent.

6. **MONDAY.**—A regular bank holiday in Eng'and.

9. **THURSDAY.**—Telegraph wires are being cut in various districts by strikers.

Constitutional guarantees are suspended in Spain, and a state of siege is to be declared where necessary on account of republican revolutionary outbreaks.

11. **SATURDAY.**—Discount on prime commercial paper in New York,  $5\frac{1}{2}@7$  per cent.; call loans,  $2@3$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3@3\frac{1}{2}$  per cent., and trade bills  $4@4\frac{1}{4}$  per cent.

14. **TUESDAY.**—George W. Ballou & Co., bankers and brokers, of New York and Boston, suspended.

15. **WEDNESDAY.**—A holiday in Paris; the Bourse closed.

E. C. Stedman & Co., bankers and brokers, of New York, suspended.

16. **THURSDAY.**—An Electrical Exhibition opened at Vienna.

17. **FRIDAY.**—The telegraphers' strike practically at an end, the operators being defeated.

18. **SATURDAY.**—Discount on prime commercial paper in New York,  $5\frac{1}{2}@7$  per cent.; call loans,  $2@1\frac{1}{2}$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{4}$  per cent.; trade bills,  $4@4\frac{1}{4}$  per cent.

22. **WEDNESDAY.**—A cyclone did great damage at Rochester and other parts of Minnesota.

The Haytian Government has repealed the import duty on Mexican coin.

The ends of the Northern Pacific railroad connected, forming through communication.

The Comte de Chambord, head of the elder branch of the House of Bourbon and pretender to the French throne, died.

25. **SATURDAY.**—Discount on prime commercial paper in New York,  $5\frac{1}{2}@7$  per cent.; call loans,  $2\frac{1}{2}@3$  per cent.

Discount in London on 60 days to 3 months' bank bills,  $3\frac{1}{2}@3\frac{3}{4}$  per cent.; trade bills,  $3\frac{1}{2}@4\frac{1}{4}$  per cent.

The English Parliament prorogued.

A treaty of peace between France and Annam signed.

27. **MONDAY.**—Violent outbreaks against the Jews occurred in Hungary and Russia.

Tidal waves caused by volcanic disturbances destroyed three towns in Java.

29. **WEDNESDAY.**—The German Reichstag convened for the purpose of acting on the Spanish commercial treaty.

# RHODES' JOURNAL OF BANKING.

---

NEW SERIES. }  
VOLUME X. }

OCTOBER, 1883.

No. 10.

---

IN this number is republished Senator N. P. Hill's article on "Gold and Silver as Standards of Value," from the October number of the "North American Review." Of course, we do not by this intend to endorse all the conclusions of the writer, but it is worth a reading as a temperate and reasonable statement of the views of a leading advocate of the silver coinage. It happens that we have just received a communication from a subscriber, on the silver coinage question, as follows :

*To the Editor of Rhodes' Journal of Banking:*

It strikes us, after years among the gold and silver mines of the great West, that the position taken by your JOURNAL, as well as the Eastern press in general, on the silver question, is both simple and short-sighted. We would ask you, would the Government of the United States have been able to resume specie payment had it not been for the silver production within her borders? What has been largely instrumental in the building of the thousands of miles of railroad during the past few years? We answer: The silver mines. What has peopled the territories of Colorado, Utah, Idaho, Montana and Arizona? We answer: The silver mines. To whom do your Eastern manufacturers and merchants sell their goods? We answer: Largely to silver-producing territories. To whom do the farmers of Nebraska and Dakota sell their corn, oats and barley? We answer: To the silver-producing territories. Who are the greatest consumers in the West to-day. We answer: The people who are opening up and developing the great mineral belts of territories named.

We assert, without any fear of contradiction from any well-informed source, that were it not for the silver mines of the West to-day business in those regions would be dead, and the population would not be much greater than it was before the completion of the railroads. We think it would be well for your JOURNAL to send out a prospector and let him buckle down to work among these ragged ridges and snow-clad peaks, endure the hardships and privations of nearly a lifetime looking for a rich silver mine, and, when fortune at last smiled upon him (if it did), you would turn upon him and say your metal is not wanted, and that "two events bearing upon the matter occurred during the past month which cannot pass without notice. First, it has transpired that the silver dollars have accumulated to such an extent that the storage capacity of the several mints and sub-treasuries have once more proved insufficient to accommodate them" (see your

September number). Now picture the disgust upon that weather-beaten face at the reason you assign for not receiving his silver and converting it into money. *No storage room.* We speak freely, and say this is the most shallow argument for a journal of your standing to make ever submitted to readers of any sense. As well might the banker complain to the public that he must decline to receive further deposits as he could not find room on earth to construct vaults. But you say the other reason is more important: "Treasurer Wyman has invited the people of the South and West to deposit their 'good gold' in exchange for silver certificates, and it is only one more move in the conspiracy that has been entered into between the Government and the men who are interested in silver bullion, by which they are each making a paltry profit while the currency of the country is rapidly degraded to a permanent silver standard." Will you kindly tell us where the paltry profit comes in? If it is the difference between the value of the gold and silver dollar, then why do you not, as a financial journal, work for the adjustment of this money to an equal value, dollar for dollar, and have it so issued by the Government, and not seek to cripple the industry of mining by treating silver as you do iron? Silver is and must always remain and perform the function of money. The interests of the great West are so far identified with this metal that it can never be ignored as money, and your JOURNAL should recognize this fact and aim to protect the rights of the West as well as the East.

UTAH SUBSCRIBER.

It is easy for persons living in Utah, where silver is the most valuable product, to exaggerate the importance of that product. We are accused of treating silver as we do iron, but the argument of our correspondent is almost solely based on its importance as a product of the country, and the coinage of it is considered as regards its effects upon the producers. But, it should not be forgotten, while the annual output of silver in this country is valued at only \$46,800,000, the value of the iron and steel product was, in 1880, \$296,557,685; the total value of all the manufactures was \$17,720,000,000; products of the mine, \$1,135,000,000; of agriculture, \$14,490,000,000. Now, as the currency of the country is the measure of the value of all these products in the course of their distribution, and any change in it has, consequently, an immediate effect on all business, we prefer to always first consider the silver coinage in its relations to the currency, its effect upon the silver producer being a matter of inferior importance. The "paltry profit" meant is, to the Government, the difference between the 85 or 86 cents which it pays for the silver in the standard dollar and the 100 cents at which it passes it out; the profit to silver mine owners is the difference between the price they now get for their product and what they would receive should the coinage be stopped, which we believe is small. It is a mistake to suppose that the opposition to the further coinage arises from any desire to injure any industry. But it is now the conviction of some of the most pronounced bi-metallists that the continuance of our silver dollar coinage is calculated to throw the finances of the country into confusion, while it has no real effect in re-instating silver throughout the world, but rather the contrary. France is a bi-metallic country, but it stopped the silver coinage some years ago, as did the rest of the countries composing the Latin Union. The United States should do the same, at least, until some international agreement can be arrived at.

THE St. Louis "Globe-Democrat" publishes a significant interview with Assistant United States Treasurer Edwards of that town on the matter of the exchange of gold coin for silver certificates. "The banks of the Mississippi Valley do not want gold," he says; "they are getting rid of it as rapidly as they can. It is too bulky for them to handle, and it accumulates, they think, with greater rapidity than the old paper money did." This curious difficulty of the money "accumulating" is ascribed to the fact that men do not like to carry, say, \$1,000 in gold about in their clothes and so they take their money to the banks and "in the course of a short time the chambers of the vaults become loaded." Therefore, the Government had come to the relief of the banks, and had made "abundant provision for their relief, in establishing the monetary rights of silver and gold certificates." This is explained to mean that upon a deposit of gold at the New York Sub-Treasury, the amount will be paid in silver certificates at any other Sub-Treasury that the depositor may designate, and that silver certificates are also furnished in exchange for gold coin by any Assistant Treasurer. Mr. Edwards is reported as saying that the banks are taking every advantage of this "relief" that they can:

"They are using both the means provided for their relief. Some of them come directly to me with their gold and have it exchanged for the silver certificates. But a majority of them obtain their certificates through New York. The banks here all have deposits with their correspondents in the metropolis. When they want to get rid of their gold they telegraph the New York correspondent to deposit to their account a specified amount of gold with the Assistant Treasurer. The Assistant then notifies the Treasurer of the deposit, and the Treasurer directs me to issue the certificates to correspond to the amount of the deposit."

It is doubtful if the Assistant talked such nonsense as this, for if the vaults of St. Louis banks are over-run with gold, it would not relieve them to withdraw their New York bank deposits in order to lodge them in the Sub-Treasury. But the report goes on to say that the amount of silver certificates issued by this means "is large, and has been for some time," some \$400,000 having been paid out in two days. So that this ingenious scheme for getting the silver dollars into circulation seems to be succeeding very well. It is very plain that the "relief" to the banks from the accumulation of gold is a false pretense. The reason why gold is exchanged for silver certificates is that expressage on shipments of money is saved by the use of the latter, as the Treasury Department offers to save this expense to bankers if they will only part with their gold coin for silver certificates. A curious feature of the matter is that the banks have been harshly criticised for making use of this privilege by the very people who accuse them of keeping silver out of circulation. Again, why does the Department discrimi-

nate against gold certificates? Why not offer to deliver gold certificates at distant points in exchange for gold deposited in New York?

---

THE statistics of the "Railroad Gazette" indicate that only 3,584 miles of new track were laid in this year up to the second week of September, against 6,940 miles at the same time in 1882, 4,235 miles in 1881, 3,288 miles in 1880, and 1,863 miles in 1879. This shows a very decided falling off in railroad extension from the last two years, although steel rails are selling at a lower price than ever before. It is estimated that the quantity of land under cultivation has increased at the rate of two per cent. every year since 1879, and the population at about the same rate, while the railroad mileage has increased at the annual rate of nine per cent. The railroad construction seems, therefore, to have lately outstripped the actual needs of the country, and it is satisfactory to know that a slackening in the progress has occurred without causing any vital disaster so far.

---

THE too rapid extension of railway lines has been charged with being the cause of the long-continued depression in the stock market, and very likely the opinion is partly correct. But we conceive that it is due also in a great measure to the distrust entertained by the public of the railway management of the country generally. The almost reckless manner in which bonds and stocks are issued in immense amounts, is a matter of public notoriety. A common and well-founded belief is prevalent that new railroads are generally built entirely from the proceeds of bond issues, the stock representing the profits of the promoters. But even in old and settled companies in how many cases are they managed with a single view to the profit of the shareholders and benefit of the public? The New York Railroad Commission recently resolved that the railroad companies of the State should make quarterly reports of earnings and condition, and this most reasonable requirement was vigorously opposed by some of the companies, on the most trivial pretexts. There has been a great outcry in recent years for protection for the public from discriminations and overcharges by railroads, but there is at least as much need for protection for the interest of shareholders, and the investing public who may at any time become such.

---

WE have on several occasions alluded to the fact that foreigners were very chary of investing in our general securities for some time past. The evidences of this have come through various channels, one of the most recent being Dr. Green, President of the Western Union Telegraph Company, who recently arrived from London. He ascribes his failure to place a large amount of his company's stock there, and to have it listed on the London Stock Exchange, in a great measure "to the mistrust of American securities as a whole, and the fluctuations

which occurred while the negotiations were in progress." He says: "Business on the Exchange there is done in an entirely different manner from that pursued here. There is no dealing on margins, and comparatively no speculation. The English are too conservative for that. They are not speculators; they are investors. Sales made on the Exchange are *bona fide* transfers for cash. The stocks listed are actual investment stocks, and a listing is a guarantee of the solidity of a security. In order to list Western Union it would have been first necessary to place a large block of stock in the hands of English investors." He says further regarding American securities that "the people have no confidence in them. They were frightened by the break in New York Central and Lake Shore last spring, and by the retirement of Mr. Vanderbilt." There is no immediate prospect of a change in the feeling. "England is full of money awaiting investment, but the conservative people who depend upon their dividends for their living prefer consols at three per cent. to stock which fluctuates beyond the fractions. And they will continue to do so, in my opinion, so long as their conservatism exists. The only exceptions will be those who will occasionally invest a portion of their capital in seemingly secure stocks or bonds in hopes of obtaining a higher rate of interest and more money to live on." It is this latter class whose capital has for many years been at the disposal of our people, at a low rate of interest, so long as our enterprises have been carried on in such a manner as to gain their confidence.

---

IN SPITE of the tax reduction law of last spring the Treasury receipts have accumulated so rapidly that a new call had to be issued on September 19. It will be remembered that the last previous call, issued on July 26, was for the remainder of the 3 1-2 per cent. continued bonds, then amounting to about 32 million dollars. The present call for 15 millions begins, therefore, on the new 3 per cents. It is estimated at the Treasury Department that partly owing to the previous payments falling short of the estimates, 45 millions more of the 3 per cents may be called during the current<sup>9</sup> fiscal year. These three amounts make a total of 92 million dollars, against 125 millions of bonds paid in the last fiscal year. If the debt reduction is kept up at this rate the 3 per cents are destined to have only a short existence. They amounted to \$305,529,000 on September 1, and if they be redeemed at the rate of 90 millions a year the last of them will be paid off by July 1, 1877. The bonds next falling due are the 4 1-2 per cents., on September 1, 1891, over four years later. This condition of the debt suggests a further reduction of taxation, or else wasteful expenditure of the Government's resources. But the effect of the rapid payment of the bonds is calculated to have a most important effect on the national banks and their circulation, and it behooves our financiers to devise a new method for insuring the bank issues, if the system is to endure.

THE Department of State has taken the trouble to appoint a commission to examine into the health of the swine of the country. In the absence of any evidence that infection has been spread in this country by means of diseased hogs, it can only be supposed that the inquiry is undertaken on account of the exclusion of American pork from Germany and, to a great extent, from France. But neither the officials of the State Department, nor any intelligent person who is acquainted with the subject supposes that the action of those Governments was taken solely on the ground that our hogs were diseased. It was rather in order to protect their own producers. Now, the diplomatic relations of this country with other commercial nations are hardly on such a footing that any protest against a policy of exclusion will come with grace from us. We have either failed, or declined, or refused to enter into the usual commercial treaties that most other nations are ready and eager to make. Even the proposed treaty with Mexico hangs fire. We have refused to negotiate with France, have declined the overtures of Spain, and have alienated Canada by refusing to renew the Reciprocity treaty which expired nearly ten years since. It cannot be expected that under these circumstances other countries will consult our interests in their internal legislative or executive acts.

---

THE annual convention of the Bankers' Association is being held at Louisville, Ky., as we go to press, and any remarks on the proceedings must be deferred until next month, when we hope to be able to give a full account of them. The eminent usefulness of this organization is pretty generally acknowledged. But, nevertheless, every year brings forth a fresh little crop of criticisms from some quarters, and inquiries whether the conventions are really practical and just what they ought to be. To listen to some of these critics one might suppose that they expected as many practical results from a two days' convention of a few hundred bankers as from a session of Congress. Of necessity the range of matters upon which the association can take practical action is very limited. The main objects of the meetings are the diffusion of information and sound views on the financial and banking interests of the country, as well as the formation of acquaintances between bankers from distant places. If these objects are accomplished the conventions may fairly be considered successful, and we do not believe that any intelligent person who attends them will deny that they are. To be sure, many of the subjects treated cannot be considered as matters of dollars and cents to most bankers. For instance, many people will consider the attempt to assimilate the laws of the various States regarding commercial paper as too visionary for them to take part in it. But the fact is that there are only too few business men in this country who are willing to give their time and attention to matters of the first importance to the public interest. Those who are willing to do a little deserve the thanks of others, at least.

### \*GOLD AND SILVER AS STANDARDS OF VALUE.

In the contest which has been waged for a number of years, between the advocates of mono-metallism and bi-metallism, it has become apparent that the majority of the people of this country desire that silver, as well as gold, should be coined, at least to the limited extent provided for by the act of 1878. They desire it, not for the purpose of inflating the currency, nor for the purpose of benefiting certain sections of the country in which silver mining constitutes an important and profitable industry, as has been so often derisively charged by the mono-metallists, but for the broader and more equitable purpose of preserving uniformity in the value of metallic money, and more especially to prevent such a contraction of the total volume of money as would fatally depress prices, pervert the equity of contracts, ruin debtors and tax-payers, aggrandize moneyed capital, and impoverish the masses of the people.

Justice to all classes of people—to the poor and the rich, to the laborer and the capitalist, to the debtor and the creditor—requires that we should so legislate as to preserve for money, as nearly as possible, a uniform value; or, in other words, a steady purchasing power. The money which the borrower should pay the lender, at the maturity of the debt, should be of the same value as that which was received when the debt was made.

Since the passage of the act of 1878, by the coinage of silver, the United States have added about \$150,000,000 to the metallic money of the country. That it has not thereby created an inflation of the currency, and that none is threatened, but that the volume of money is too small rather than too large, is shown by a tendency to falling prices.

The address of Mr. Goschen, April 8, 1883, before the London Institute of Bankers, upon the increase of the purchasing power of gold, or, in other words, upon the fall in the gold price of commodities, within ten years, has excited lively discussion in Europe and in this country. The criticisms upon his address have been varied and numerous; but none of his critics have denied his proposition that prices have fallen, or that Mr. Goschen is right in assigning, as

\* This paper, by U. S. Senator Nathaniel P. Hill, of Colorado, is reprinted from the October number of the "North American Review." The subject is ably and fairly treated from the Senator's stand-point, and his deductions will claim careful attention. Under editorial comments in this issue the subject is further considered.

one of the conspicuous causes of the fall, the increased demand for gold arising from the demonetization of silver by several countries. They have not, so far as I have observed, gone beyond the attempt to show that Mr. Goschen has somewhat overstated the new demand for gold, and that the other causes for a fall in prices are more numerous than he supposed them to be.

The London "Times," which, upon the whole, does not regard the fall of prices as a thing to be deprecated, or as affording an occasion for measures to relieve the constriction of gold, says in its issue of May 7, 1883:

"Prices at the present day are, on the whole, lower than they were ten years ago. They are as low, or nearly as low, as they were in the old days before the great gold discoveries had been made. \* \* \* It is certain, as Mr. Goschen says, that prices of commodities are affected by changes in the volume of the circulating medium in which they are expressed. \* \* \* Germany, Italy and the United States have, during the past ten years, been absorbing in their currency more gold than the available supply. They have taken between them not less than £200,000,000, and a large part of this has necessarily been obtained at the expense of the general stock. The result has been that, as the stock of gold has diminished, the price of gold has gone up; or, in other words, that the prices of commodities have fallen. It is impossible that so large a drain of gold can have failed to affect prices. Mr. Goschen must be admitted to have made out his case thus far. He has laid his finger on a cause, and it is demonstrably a *vera causa*, capable of the effect he assigns to it. But an examination of his figures will show that other causes have been concurrently at work."

It is difficult to compute the exact rise and fall of the general range of the prices of commodities, and persons desirous of ascertaining the truth may differ somewhat in the results at which they arrive. The method lately adopted by esteemed English authorities, as affording the closest approximation to accuracy, is that of comparing the prices in different years of all the articles imported into and exported from Great Britain, in respect to which the Custom House statements admit of tracing the relation between quantity and money valuation. This is true of about three-fourths of the whole mass of imports and exports. Considering the immense magnitude of British foreign commerce, and that it embraces almost everything that is bought and sold by mankind, either for consumption or as raw materials for manufactures, it would seem that the prices of commodities could not be more reliably ascertained.

Robert Giffen, Secretary of the British Board of Trade, in a paper read March 21, 1882, before the London Statistical Society, said in respect to the fall of prices in Great Britain during six years ending with 1879: "The range of difference in the aggregate values of the exports of the United Kingdom, owing to the difference of price alone, amounted to thirty per cent. between 1873 and 1879."

The determination of the German Government to adopt a single gold standard was announced by decrees in December, 1871, but during 1872 nothing was done beyond coining about \$100,000,000. It

was in 1873 that the demonetization of silver, the melting of silver coins, and the sale of bullion, by the German Government, actually began. The six following years were marked by a continuous and extraordinary fall in prices and depression of industry throughout the whole commercial world. There may have been other and contributory causes for this fall and depression; but it cannot be successfully controverted, and I believe it has never been denied by financial writers upon the subject, that among the principal causes was the silver demonetization of Germany, followed by a similar policy in Denmark, Sweden, Norway, and the United States.

Since 1877 the London "Economist" has made semi-annual and annual comparisons of the prices of imported and exported articles. In its issue of January 27, 1883, it exhibits the prices for each of the five calendar years ending with 1882. The starting point of its comparison is \$1,422,200,000 of imports and \$714,550,000 of exports in 1877. It then proceeds to show the changes in the aggregate money valuation of the same articles in each of the next five years, as compared with the immediately preceding year, which resulted from changes in price, and excluding the effect of changes in quantity.

From the figures of the "Economist" it appears that there was, in 1880, an increase of \$105,450,000; but, in each of the other four years, a decrease as follow:

| <i>Years.</i> | <i>Decrease of Prices.</i> | <i>Years.</i> | <i>Decrease of Prices.</i> |
|---------------|----------------------------|---------------|----------------------------|
| 1878.....     | \$138,250,000              | 1881.....     | \$48,800,000               |
| 1879.....     | 113,300,000                | 1882.....     | 30,650,000                 |

The comparisons of the "Economist," which cover articles dealt in by the British foreign trade, of the enormous value of \$2,137,750,000 in 1877, are the best attainable evidence of the fluctuation of prices throughout the commercial world. The year 1877 was itself the fourth year of a period of falling prices which commenced in 1873, the date of the German demonetization of silver.

When the agitation for a single metallic standard was commenced by Chevalier and others in 1855-6, immediately after the great out-turn of gold by California and Australia, the sole ground upon which it was based was the danger, if the world continued to use both the metals as money, of a depreciation of the money standard and of a hurtful inflation of prices; but now, in the presence of a large and continuing fall in prices, it has become apparent that the use of both the metals will be required, and may not even be adequate to prevent a monetary constriction, which will lower the value of all forms of property.

The New York "Public," although it ably and persistently advocates the discarding of the use of silver money, is forced to admit that gold is growing dearer and the gold prices of merchandise lower. I quote from its issue of March 23, 1883:

"The year 1882 was one of remarkably general and important decline in

prices, both in this country, in Great Britain and on the Continent. Generally speaking, the purchasing power of gold was decidedly increased during the year 1882 throughout the western world.

The rise of prices, commencing in this country in 1879 and a little later in Europe, proved to be only a temporary reaction, such as will occur in any general course of the markets whether up or down. It was assisted undoubtedly by the resumption of silver coinage in this country, under the act of 1878, notwithstanding the hostile, halting and partial administration of that law.

The writer of the article in the London "Times," already quoted from, endeavors to allay the fears of mankind as to a further rise in gold by making the following observations:

"Mr. Goschen's calculations do not help us to forecast the purchasing power of gold. The drain of gold has been temporary. The supply goes on, and, apart from the exceptional demand of the last ten years, it is in excess of the world's wants. How, then, will the case stand when the world at large has recouped itself for its late losses? The tendency of things seems to point to a lower value of gold, unless, indeed, some other nations are to be found to do what Germany, Italy and the United States have been doing, and to absorb, or more than absorb, the whole future yield. If nothing of that kind happens, we may look for a return to higher money prices. It is more certain that the supply of gold will continue than that the demand will rise in proportion. Again, a rise in the value of gold serves as a stimulus to the production of gold."

It is quite impossible to mistake the animus of the organ of British opinion when it makes so many gratuitous assumptions and overlooks so many obvious facts. There is no ground for the affirmation that the out-turn of the gold mines during the last decade would have been in "excess of the world's wants;" or, in other words, would have done anything more than keep prices steady if silver had not been demonetized in Germany and the United States.

It is true that "a rise in the value of gold serves as a stimulus" to mining for it; but it is also true that the production cannot be enlarged at will, as can be the production of wheat or cotton, but is limited by such fortuitous circumstances as the discovery of mines; and, in point of fact, its actual production has been declining during the last ten years, while its value has been rising.

That the fall in prices during the last ten years may be accounted for in part by the demonetization of silver does not admit of a doubt, but there are other conspicuous causes for the fall which have been generally overlooked by writers upon this subject. I refer to the large increase in the consumption of gold in the arts and manufactures and to the decrease in the production of the mines.

Soetbeer, who has been the principal writer and statistician of the supporters of the gold mono-metallic policy of Germany, printed two exhaustive essays in 1881, the first upon the world's production of gold during the fifty years ending with 1880, and the second upon the consumption of that metal in the arts during the same time in Europe,

America, and Australia, and exclusive of Asia and Africa. No living statistician enjoys a higher reputation for industry and care, and, of course, he cannot be suspected of a desire to underrate the annual supply of gold for monetary purposes, which is the excess of its production above its consumption in the arts. He gives the following table:

| <i>Decade ending with,</i> | <i>Gold produced in the world.</i> | <i>Gold consumption in the arts in Europe, America, and Australia, exclusive of old materials used.</i> |
|----------------------------|------------------------------------|---------------------------------------------------------------------------------------------------------|
| 1840 .....                 | \$134,915,830                      | \$119,629,100                                                                                           |
| 1850 .....                 | 864,206,280                        | 182,922,000                                                                                             |
| 1860 .....                 | 1,341,182,290                      | 186,090,800                                                                                             |
| 1870 .....                 | 1,352,789,850                      | 282,150,750                                                                                             |
| 1880 .....                 | 1,131,830,830                      | 556,092,070                                                                                             |

During the decade ending with 1880 the average annual consumption of gold was \$55,609,207, but inasmuch as there has been a constant and large increase of consumption, in recent years, the actual consumption must have been much greater at the end than at the beginning of the decade. We may fairly estimate that \$55,609,207 was the consumption of the middle year of the decade, and that the increase during the eight years that have since elapsed has been \$13,915,304. This is, of course, assuming that the annual increase of \$1,739,413, which is shown by comparing the decade ending with 1880 with the decade ending with 1870, has continued through the past eight years. There are many facts going to show that the increase for the past eight years has been more rapid.

If the figures of Soetbeer are correct, and they are generally admitted by statisticians on this subject to closely approximate correctness, the annual consumption of gold in the arts in Europe, America and Australia is at the rate of \$69,524,511. In reaching these figures, Soetbeer has made an allowance of from ten to twenty-five per cent. in the different countries for gold obtained from old articles of ornamentation which have been re-manufactured.

In no country has the effort to ascertain the consumption of the precious metals in the arts, by government authority, been more thorough than in the United States. It was undertaken here for the first time by Mr. Burchard, Director of the United States Mint, and has been executed with creditable industry, care and skill. In addition to obtaining from the assay offices the delivery of gold to jewelers, he has received replies to thousands of letters addressed to persons engaged in all the arts in which the precious metals are used. His conclusion, as given in his last annual report, is that the gross consumption of gold in the United States during the fiscal year ending June 30, 1882, exceeded \$12,000,000. He says the statistics do not justify a larger deduction than ten per cent. for old jewelry and plate, in arriving at the net consumption of gold in the arts in that year, which therefore exceeded \$10,800,000 of new gold. This is \$1,827,765 more than the average annual net consumption of this country during the decade ending with 1880, as given in Soetbeer's tables.

The Director of our Mint, in his annual report for November, 1881, says: "From a review of the information published in this and preceding reports and other authorities, I estimate that, including the annual consumption in the United States of \$11,000,000 of gold and \$6,000,000 of silver, the annual consumption of the world in ornamentation, manufactures and the arts is at least \$75,000,000 of gold and \$35,000,000 of silver."

To the consumption of gold in the arts in Europe, America, and Australia is to be added the steady importation of that metal by British India, where it is not used as money, but is worked into ornaments by the native artisans. It is so common to speak of that country as an absorbent of silver that we have overlooked the fact that it is also a large absorbent of gold. The official figures of its foreign trade show that, during the thirty years ending with 1880, the average annual excess of Indian imports of gold over exports was \$16,018,330.

The importation of gold by India continues unabated, and may be expected to increase with the rapidly advancing wealth of that country. But taking it at the average rate for thirty years, we have the following results:

|                                                                |              |
|----------------------------------------------------------------|--------------|
| Annual gold consumption in Europe, Australia, and America..... | \$69,524,511 |
| In India.....                                                  | 16,018,330   |
| Total .....                                                    | \$85,542,841 |

The average annual gold production of the world, during the decade ending with 1880, was, according to Soetbeer's table, \$113,183,083; but, as it was at a declining rate, it was less in 1880. Soetbeer estimated it for that year at \$101,000,000, and Sir Hector Hay at \$95,000,000. The estimates of Mr. Burchard, Director of the United States Mint, are higher, being, for three calendar years, as follows:

|           |               |
|-----------|---------------|
| 1879..... | \$108,578,807 |
| 1880..... | 106,438,786   |
| 1881..... | 107,773,157   |

Wells, Fargo & Company estimate the production of the United States in 1882 at \$2,768,782 less than Mr. Burchard. The New York "Mining Record" insists that the world's production of gold in 1882 did not exceed \$90,000,000, the difference between the "Record" and other authorities being most marked in respect to the yield of the Russian mines. Without claiming exact correctness, the total gold yield of the world may be approximately stated at \$100,000,000. Of this total production of gold, the arts and manufactures swallow up fully five-sixths, and this consumption, being almost wholly for objects of luxury and display, must increase in about the ratio in which wealth increases.

The consumption of gold for other than monetary purposes in Europe, America, and Australia has more than quadrupled in thirty years, and has quite trebled in twenty years. It is more than five times what it was half a century ago. The great mass of gold which has flowed from the mines has been absorbed in the same opulence and

luxury of the times which have swallowed up the flood of gems, great in volume beyond any former precedent, from the diamond fields of South Africa, and increasing prices will be quite as likely to whet the appetite for both as to check it. Five-sixths of the current production of gold is absorbed in the arts and manufactures, in the western world and in British India. A part of the remaining sixth is lost in the wear of coins and by fires, shipwrecks and forgotten hoards. What is left to increase the stock of gold money in proportion to the increase of population, exchanges and wealth of the world? It is possible that the production of gold may increase. It is also possible that it may decrease, as it actually has been decreasing for many years; but there is no uncertainty about the consumption of gold, which is sure to grow *pari passu* with the growing opulence and luxury of the world. It has trebled within the past twenty years; and, if it only doubles within the next twenty years, it will exceed the production, even at the extreme rate which it attained when the California and Australia out-turn was at its highest point. \* \* \* \* \*

[Mr. Hill continues here by saying that the conditions have changed since the beginning of the agitation of the subject of a monetary standard. The gold production was greater then, and the consumption smaller. Many people then honestly believed that a single gold standard would insure steadiness in prices; but a continuance of that policy now cannot but cause a disastrous fall of prices, to the injury of the debtor class. The evil results would in time be also felt by the creditors and capitalists.—ED. JOURNAL.]

The conditions, it must be admitted, are modified where creditors and debtors do not live in the same country. The London "Economist" of April 21, 1883, closes its comments upon Mr. Goschen's address by saying :

"There is some consolation to us in the fact to which he directs special attention; that any increase in the purchasing power of gold is a benefit to creditors. Nearly every nation on the face of the earth is indebted to us, and the result of an appreciation of gold is, that we obtain a larger quantity of their commodities in settlement of our claims."

This view of the "Economist" is one of the explanations of the support given to gold mono-metallism by classes which are powerful and, perhaps, dominant in some other countries of Western Europe besides Great Britain. It shows how idle the suggestion is, that we can force the English and similarly situated nations into bi-metallism by again demonetizing silver ourselves, and thereby precipitating a still further decline in prices. Such a decline is precisely the object which, as international creditors, they desire. We know by an experience too fresh to be forgotten, that when the depression of 1878-9 was at its worst, the adherence of the governing classes in England and Germany to a gold standard only became more determined and aggressive.

It is not by co-operating with them, but by resisting and defeating

their scheme of dislodging silver from its immemorial place as one of the money metals of the world, that we shall compel them to abandon it. The present and prospective position of the United States is so strong, and silver is now the favorite currency of so large a part of mankind, that gold cannot be made the exclusive money of the world without our consent. In 1900 we shall have more population and more wealth than Great Britain and Germany combined. We have only to remain firm in our present position. Europeans are too dependent upon foreign trade, and have too much fear of the United States, as a commercial rival, to persevere in a gold policy which would tend to isolate them if we refused to join them in it. We cannot bring upon them the coercive power of low prices without submitting ourselves to the same prices and to all the ruinous consequences which they entail. The success of that species of coercion is, to say the least, too doubtful to justify the enormous sacrifices on our own part which a trial of it must involve.

---

A NUMBER of respectable authorities, among whom are some of our best known business men, have long doubted whether it would not be better to abolish all laws for the collection of debts. Such laws as we have, they say, afford little real protection to creditors, while they hold out a false inducement to trust men who would not otherwise be trusted. While this is an open question as it applies to transactions between man and man, we are strongly inclined to think the view mentioned is correct when applied to debts owed by States to individuals. Without doubt, the opinion that such debts are recoverable by law has gained States a measure of credit, whereas we have yet to hear of the first case in which the law has effectually aided the collection of a repudiated State debt, although large sums have been spent from time to time by bondholders for legal expenses. The recent decision of Judge Bond, declaring that the matured coupons of the Virginia bonds, issued under the Funding Act of 1871, are a legal-tender for taxes, gives a renewed hope to the bondholders, which will, perhaps, survive until the next move is made by the repudiating element of the State. But while we may deprecate these attempts to compel States to be honest, as mere efforts to make a sieve hold water, yet the moral influence of all honest people should be exerted with a view to bringing the misguided delinquents to a sense of what is due to their own dignity and reputation in the world. Viewed even in the light of self-interest repudiation is the grossest folly. The whole United States is to-day suffering on account of the default of a few States. There is no doubt that a good deal of the distrust with which our general securities are regarded abroad is owing to this cause.

## COIN RESERVES IN ENGLAND AND THE UNITED STATES.

There is no part of our financial system which should be more carefully watched than the amount and quality of coin upon which the paper issues of the country depend. The fact should always be kept in mind that the national banks are at liberty to keep as reserve legal-tender notes, just the same as gold and silver, no special coin reserve being required by law. That the banks have ever since the resumption of specie payments taken care to retain a fair reserve of gold is one of their strong claims upon the gratitude of the country. It will be readily seen that the effect of the system is that one kind of paper is to a certain extent based on another kind of paper. In so far as the national bank notes are based on greenbacks the Treasury coin reserve is the sole coin basis of both kinds of paper. Should the banks from any cause become depleted of coin, in which case their reserve would be greenbacks alone, the Treasury reserve would form the only coin basis of the paper circulation. For this reason it is a matter of pressing interest to note the amount of the coin reserve in both the banks and the Treasury.

Some statistics were recently compiled in England for the purpose of showing on what a slight basis of coin the vast financial system of that country is carried on. These data will no doubt be useful with a view to comparing the condition of the English currency with ours. It appears that for some time past the worn condition of the gold coin in circulation in the United Kingdom has attracted much attention, and in the course of the investigation of the subject the Coinage Committee of the London Institute of Bankers obtained returns of the amount of gold held by all the banks of the country. Regarding the report of the committee Mr. Thomas B. Moxon, of Manchester, says:

"The valuable report made by the Coinage Committee of the Institute of Bankers demonstrates the wonderful economy and delicacy of our financial system. From the complete returns that have been submitted to them, the Committee estimate the average gold held by the whole of the banks in the United Kingdom at £25,000,000. After making every deduction for re-deposits, etc., the liability of these banks to the public for deposits and uncovered notes must be at least £575,000,000, so that the "hard cash" reserve is only equal to 4 1-2 per cent. The Bank of England, however, holds

£11,000,000 of this store of gold against its liabilities of, say, £30,000,000. Deducting these items, we find that the ordinary commercial banks only hold £14,000,000 of coin, against deposits, etc., for £545,000,000, equivalent to a trifle over 2 1-2 per cent. The English banks, with £8,100,000 in gold, are believed to hold deposits, etc., for about £430,000,000, giving a gold reserve of about 2 per cent. The Scotch banks are represented as holding £3,100,000 in gold, but from this must be deducted about £2,800,000, held as cover for their circulation in excess of their authorized issue, leaving £300,000 as their cash reserve, against net deposits of at least £80,000,000, which is only a trifle over one-third of 1 per cent. The Irish banks are believed to hold £2,800,000 gold, but from this must be deducted about £1,200,000, held as cover for excess circulation, leaving £1,600,000 gold, against deposits, etc., £35,000,000, or a little over 4 per cent. Is it not marvelous that capital has been economised to such an extreme degree?"

In comparing the figures for the United States with the above it is practicable to take into account at present only the Treasury and the national banks. A more complete showing, including all the banks, may be made at some more favorable opportunity, when the statistics are obtainable. Taking then the report of the national banks of June 22 last, being the latest published, we find the following items of liability to the public:

TABLE A.

|                                                    |               |                 |
|----------------------------------------------------|---------------|-----------------|
| National bank notes outstanding.....               | \$311,963,302 |                 |
| Dividends unpaid.....                              | 1,454,232     |                 |
| Individual deposits.....                           | 1,042,987,763 |                 |
| United States deposits.....                        | 10,130,757    |                 |
| Deposits of United States disbursing officers..... | 8,743,326     |                 |
| Due to State banks and bankers.....                | 84,744,668    | \$1,454,974,046 |

From this we deduct the following items:—

|                                                     |              |             |
|-----------------------------------------------------|--------------|-------------|

| Silver coins.....                                                | 7,208,858            |
| Silver treasury certificates.....                                | 3,121,130            |
| Legal-tender notes.....                                          | 73,832,458           |
| United States certificate of deposit for legal-tender notes..... | 10,645,000           |
| Five per cent. redemption fund with Treasurer.....               | 15,611,578           |
| <b>Total.....</b>                                                | <b>\$215,809,905</b> |

Upon calculating from these figures we find that the national banks held on June 22 last a cash reserve against their immediate liabilities to the public of 16 per cent. The coin reserve, including gold and silver coin and certificates, was 8 1-2 per cent. of the liabilities.

We shall next endeavor to show what proportion of coin reserve the banks and the Treasury taken together keep of their immediate liabilities, in the case of the Treasury only the liabilities represented by the greenbacks and gold and silver certificates being taken into account: The Treasury figures are of the date July 1, a week later than the others, but this discrepancy will not materially alter the result :

TABLE B.  
IMMEDIATE LIABILITIES.

Treasury, July 1, 1883:—

|                                        |               |               |
|----------------------------------------|---------------|---------------|
| Old demand and legal-tender notes..... | \$346,740,001 |               |
| Certificates of deposit.....           | 13,375,000    |               |
| Gold and silver certificates.....      | 170,995,471   | \$531,110,472 |

National Banks, June 22, 1883:—

|                                                  |               |                 |
|--------------------------------------------------|---------------|-----------------|
| Total notes outstanding* .....                   | \$356,073,281 |                 |
| Individual deposits and unpaid dividends.....    | 1,044,391,985 |                 |
| Due to State banks and bankers, on balance... .. | 66,298,168    | 1,465,759,444   |
| Total.....                                       |               | \$1,926,868,916 |

Deduct :

| Remainder total immediate liabilities.....        |              | \$1,757,398,810 |

COIN RESOURCES.

Treasury :

|                              |               |               |
|------------------------------|---------------|---------------|
| Gold coin.....               | \$141,824,496 |               |
| „ bullion.....               | 56,254,072    |               |
| Standard silver dollars..... | 111,914,019   |               |
| Fractional silver coin.....  | 28,486,001    |               |
| Silver bullion.....          | 4,482,216     | \$342,960,804 |

Banks:

|                                       |              |               |
|---------------------------------------|--------------|---------------|
| Gold coin.....                        | \$44,863,816 |               |
| Gold Clearing-House certificates..... | 27,369,000   |               |
| Silver coin.....                      | 7,206,658    |               |
| Fractional currency. ....             | 456,447      | 79,896,121    |
| Total coin resources.....             |              | \$422,868,925 |

According to this showing the coin resources of the Treasury and the national banks taken together are 24 per cent. of their immediate liabilities. If we consider the Treasury as a great bank of issue, which it virtually is, then this 24 per cent. was the proportion of coin which the issuing banks of the country carried against their immediate liabilities to the public about the first of July last. But the Treasury

\* In table A we give only the amount for which the banks were responsible. The amount now given is the total in circulation.

in its proper capacity has a large amount of other liabilities against which the amount shown above is the only coin reserve, and due allowance for this fact will, of course, be made in the mind of the reader.

Practically the Treasury reserve is used indifferently against coin certificates and other liabilities. But as, according to law, a full coin reserve has to be held against the certificates, perhaps the certificates outstanding (and not in the banks) should have been left out of the above table on the one side and the same amount of coin from the other. The result would then have been as follows:

|                                  |                 |
|----------------------------------|-----------------|
| Total immediate liabilities..... | \$1,660,577,974 |
| “ coin resources.....            | 326,843,589     |

By this mode of reckoning the reserve was a little less than 20 per cent of the immediate liabilities. In either case the figures here brought together show that the finances of this country are not carried on upon nearly so narrow a margin of coin as England's are.

RECOVERY OF LOST BONDS.—Early last June, Anna Chute, in the service of the George W. Wheelwright Paper Company, at their Leominster mill, found in a bale of old writing paper two United States Treasury notes, one for a thousand and the other for five hundred dollars, both of the earliest issue. As the papers in the bale indicated that they came out of the National Bank of Commerce, in this city, a letter was written to the officers to see if they had met with any loss.

The reply came that for a great many years they had met with but one loss, and this occurred in the fall of 1873, when \$1,500 disappeared from one of the teller's trays, and had never been traced, although diligent search had been made for it. If the money found proved to be the sum lost they would be very glad, as it would relieve innocent parties from suspicions which had rested on them all these years.

It seems that the bank had become burdened with an accumulation of files of old papers, and directed their janitor to sell the oldest and those they were least likely to require.

On Decoration Day he had a dealer in such merchandise send his men to the bank and remove them to his packing-house, where they were bailed, tagged with the proper address, numbered and shipped to their destination. As this was the only waste paper the dealer packed that day, and the bale was carefully marked and numbered, it rendered the tracing of the notes easy and certain.

The money has now been surrendered to the bank, which has rewarded the girl with the liberal sum of three hundred dollars.

Miss Anna Chute, who voluntarily informed her employer of the “find,” is entitled to high praise. It is true that she did only what she ought to have done, but there are so many who fail to recognize another's right in any thing thus found, that we regard her as a young woman of rare virtue. The bank recognized this and gave her a handsome testimonial. We gladly put the story on record, and hope that it may have a wide circulation for the benefit of our common humanity.—*New York Journal of Commerce.*

## BANKING LAW—LATEST CASES.

### REPLIES TO LAW AND BANKING QUESTIONS.

[The Editor of the Law Department of RHODES' JOURNAL will furnish, on application of subscribers, further information regarding any case referred to herein, and will answer such questions in banking law as may be of sufficient general interest to warrant publication. A charge is made for special replies when not to be published.]

### PLEDGE TO NATIONAL BANK OF ITS OWN SHARES AS SECURITY.

#### STEWART vs. FIRST NATIONAL BANK OF XENIA.

(*Supreme Court, U. S., April 30, 1883.*)

Where a national bank receives certain of its own shares as security for a loan, which it afterward sold, and applied the proceeds to the payment of such loan or indebtedness,

*Held*, That the representative of the owner of the shares could not recover the amount realized by claiming that the Statutes forbid a national bank from taking its own shares as security.

This is an action by the Administrator of Daniel McMillan to recover the sum of \$4,200 and interest, the proceeds of certain stock alleged to have been received by the defendant and wrongfully converted to its own use.

In April, 1876, deceased was the owner of thirty shares of the capital stock of the First National Bank of Xenia, a corporation organized under the National Bank Act of the United States. This stock he transferred to the defendant as collateral security for a loan to him *at the time* of the transfer. The bank continued to hold the stock until October, 1876, when they sold the same and applied the proceeds toward the indebtedness, which left a balance still due in their favor.

By section 5201 of the Revised Statutes, it is declared that "No association shall make any loan or discount on the security of the shares of its own capital stock, nor be the purchaser or holder of any such shares, unless such security or purchase shall be necessary to prevent loss upon a debt previously contracted in good faith; and stock so purchased or acquired shall, within six months from the time of its purchase, be sold or disposed of at public or private sale, or, in default thereof, a Receiver may be appointed to close up the business of the association."

The court (per Field, *J.*) *Held*, That while this section in terms prohibits a banking association from making a loan upon the security of

shares of its own stock, it imposes no penalty either upon the bank or borrower if a loan upon such securities be made. If, therefore, the prohibition can be urged against the validity of the transaction by any one except the Government, it can only be done before the contract is executed, while the security is still subsisting in the hands of the bank. It can then, if at all, be invoked to restrain or defeat the enforcement of the security. When the contract has been executed, the security sold, and the proceeds applied to the payment of the debt, the courts will not interfere with the matter. Both bank and borrower are, in such case, equally the subject of legal censure, and they will be left by the courts where they have placed themselves.

### BOND OF RECEIVING TELLER—WHEN LIABLE.

DETROIT SAVINGS BANK *vs.* H. H. ZEIGLER *et al.*

(*Supreme Court of Michigan, 1883.*)

Where a receiving teller of a savings bank temporarily occupies the post of paying teller, and, while in such position, embezzles the funds of the bank,

*Held*, That his bond can be rendered liable for this default.

This is an action upon a bond wherein the defendant Zeigler is principal, and the other defendants, sureties, to secure to the plaintiff the faithful performance of his duties as teller. The condition of the bond reads:

"The condition of this obligation is such, that whereas the above bounden Herman H. Zeigler has been appointed receiving teller of the savings department, and, by the terms of the by-laws of said bank, is made responsible for all such sums of money, property and funds of every description as may from time to time be placed in his hands by the Cashier or otherwise come into his possession as receiving teller: now, therefore, the condition of the foregoing obligation is such, that if the said Herman H. Zeigler shall faithfully and honestly discharge the duties of his said office, and shall faithfully apply and account for all such moneys, funds and valuables, and shall deliver the same, on proper demand, to the Board of Directors of said bank, or to the person or persons authorized to receive the same, then the foregoing obligation shall be void, otherwise to remain in full force and virtue."

It was proved to be customary, when the general teller of the bank was temporarily absent, to put the receiving teller of the savings department in the position while the absence continued. On one occasion, while occupying this position, Zeigler embezzled a sum larger than the penalty of the bond.

At the trial, objection was made by the defendant that there had been no breach of the bond. That the money which Zeigler was alleged to have received did not come to his hands as receiving teller of the savings department, or in the performance of his duties as such, but, on the contrary, while he was temporarily performing the duties of another office. That the bond was not conditioned that he should faithfully perform the duties of any other office, or account for moneys

that might come to his hands by virtue of any other trust, and that the sureties could not be supposed to have contemplated, when undertaking to be responsible for his conduct as receiving teller, that they were making themselves responsible for his conduct in some other position.

The court *Held*: We think this view too restricted and narrow. Every such appointment is made with the general course of business in such institutions in mind. If it is customary for one officer to assist another when the need arises, we must assume that he expected to render such assistance, and that, by implication, he undertook to do so as a part of his official duty. And if he was bound to have this understanding of his undertaking and his duty, his sureties were bound to have the like understanding. We think any such interchange of assistance as temporary need may require is fairly within the contemplation of any appointment to such a place, of the undertaking in accepting it, and of any official bond that might be given by the appointee.

### TRANSFER OF STOCK—LIEN.

#### ANGLO-CALIFORNIAN BANK *vs.* GRANGER'S BANK.

(*Supreme Court of California, May, 1883.*)

F transferred to plaintiff thirty shares of stock of defendant corporation. At the time of the transfer he was indebted to defendant in a sum greatly exceeding the value of the stock; but, of this indebtedness, plaintiff had no actual notice. Defendant refused to transfer the certificates on their books until such indebtedness should be paid, claiming a lien thereon.

*Held*, That the shares of stock held by F, being in his possession, and personal property, the defendant had no general lien thereon for the indebtedness due them.

The facts, as found by the court below, were that prior to, and at the time of the transfer of the thirty shares of the capital stock of the defendant corporation by Fowler to plaintiff, Fowler was indebted to defendant in a sum largely exceeding the value of the stock transferred. That, by a by-law of defendant, it was provided that "all transfers of stock shall be subject to all debts and equities in favor of the corporation against the persons or corporations making such transfer and existing or arising prior to the regular transfer thereof upon the books of the corporation, and no transfer of shares shall be made upon the books of the corporation until all dues and demands thereon, due to the corporation from the party or parties representing such shares, shall have been paid."

The plaintiff had no actual knowledge of such by-law, nor had it ever made any inquiry or attempt to acquire such knowledge.

Many of the banking corporations throughout the city, including the plaintiff, had by-laws similar to the one quoted; and, upon the back of certificates of stock issued by the plaintiff, such a by-law was printed. No such by-law was printed upon the back of the stock issued by the defendant.

It was claimed, and found by the court below, that "the corporation plaintiff, its manager and other officers, had actual notice of circumstances sufficient to put a prudent man upon inquiry as to the contents of the code of by-laws of the corporation defendant herein," and that, by virtue of the by-law above quoted, the defendant was justified in refusing to enter the transfer upon its books until said indebtedness had been paid.

On appeal, however, the judgment of the lower court was reversed, and it was

*Held*, That under the provisions of the Civil Code (Sec. 324), the certificates of stock are personal property, and may be transferred by endorsement and delivery of the certificate. The defendant, not being in possession of the certificates, had no general lien upon them for any balance which might be due it from Fowler in the course of business. "The lien, if any, must have been created by the by-law above quoted, and it seems to us that no lien could be created in that way which would affect a *bona fide* purchaser for value, without notice, to whom the stock was transferred."

The court further *Held*, that as the defendant did not print a copy of such by-law on any stock certificate issued by it, the circumstance of the plaintiff's having a similar by-law, coupled with the fact that a copy thereof was printed upon all certificates of stock issued by it, was not equivalent to actual notice of the fact that the defendant had such a by-law, although the plaintiff neglected to make any inquiry, and might have ascertained, if it had, that the defendant had such a by-law.

---

## DEPOSIT IN BANK TO MEET OBLIGATION—CONTINUING LIABILITY OF DEPOSITOR.

### ADAMS *vs.* HACKENSACK IMPROVEMENT COMPANY.

(*New Jersey Court of Errors and Appeals, November Term, 1882.*)

Where municipal bonds were issued, payable at a specified bank, and money deposited to meet them on the day they became due, and 11 days thereafter, before said bonds have been presented for payment, the bank failed,

*Held*, That the bank was not the agent of the bondholder, and the liability of the corporation on the bonds continued.

The plaintiff brought suit on three bonds issued by the Hackensack Improvement Commission for \$500 each, payable at the Bank of Bergen County, Hackensack, N. J., five years from their date. The said bonds were regularly and legally issued, and were valid obligations of the defendant. These bonds, as well as other bonds of the defendant, matured on the first day of November, 1880; and, previous to that date, defendant placed on deposit with the Bank of Bergen, to the credit of the Hackensack Improvement Commission, a sum of money sufficient to pay all such bonds. The officers of the bank were authorized by the defendant to pay such bonds on presentation at

said bank. The plaintiff had no knowledge of such arrangement or other information as to the mode of payment except such as was contained in the bonds. The bank suspended on the 11th day of November, 1880, at which time sufficient funds remained of said deposit to pay such bonds. The bonds were not presented for payment until after the suspension and insolvency of the bank.

The court says : I think those cases which affirm the continuing liability of the maker, acceptor or obligor on paper, made payable at a banker's where the debtor had provided funds for payment at maturity, which the holder might have received if he had demanded payment when due, and which were lost by the subsequent failure of the banker, were correctly decided. Emancipated from the doctrine of *Rowe vs. Young* that the contract to pay at a particular place is a conditional contract, the question becomes simply one of agency. As custodian of the money wherewith to pay, whose agent is the banker? The contract of the maker, acceptor or obligor is to pay the holder of the paper, and the place of payment is designated simply for the convenience of both parties. Making a bill or note payable at a banker's is authority to the banker to apply the funds of the acceptor or maker on deposit to the payment of the paper. (1 Daniel Neg. Inst., 326 A). If maturing paper be left with the banker for collection, he becomes the agent of the holder to receive payment ; but, unless the banker is made the holder's agent by a deposit of the paper with him for collection, he has no authority to act for the holder. The naming of the bank in a promissory note as the place of payment does not make the banking association an agent for the collection of the note on the receipt of the money.

---

#### MUTUAL BENEFIT SOCIETY—DESIGNATION OF THE BENEFICIARY.

##### REBECCA DEADY *against* THE BANK CLERKS' MUTUAL BENEFIT ASSOCIATION.

(*N. Y. Superior Court, General Term, June, 1883.*)

A member of a Mutual Benefit Society designated his mother as beneficiary, and the society thereupon issued a certificate, agreeing to pay her a certain sum in case of his death. The mother delivered this to the son for safe keeping, and he afterward surrendered it to the society, and had a new certificate made out in favor of another person. Subsequently he died.

*Held*, That the power of designating a person to whom the money should be paid was not exhausted by one designation, and that the certificate first delivered was not binding as a contract between plaintiff and defendant.

The defendant is a corporation, organized and existing under and by virtue of Chapter 319 of the Laws of New York of 1848 and the several amendatory acts, having for its object the benefit of the families of deceased officers and clerks connected with the banks of New York and vicinity, and also to relieve the necessities of the aged

and disabled among its members. A fund is created by contribution and assessment, and from this fund, at the death of a member in good standing, the sum of \$500 is paid to any person previously designated by such member to receive it, and an additional sum, equal to fifty cents *per capita* for each existing member. On October, 25, 1875, Richard J. B. Deady, a son of the plaintiff, and a clerk in the employ of the Merchants' Exchange National Bank of the city of New York, became a member of the said association, duly paying his initiation fee, and continued as a member in good standing, paying all dues and assessments down to the time of his death.

Pursuant to the provisions of the by-laws of said association, the said Richard J. B. Deady, on the day last aforesaid, made a designation in writing of the person to whom the said sum so due or to become due, should be paid, and thereupon this defendant, at the request of the said Richard J. B. Deady, issued its certificate as follows:

"(No. 1784.) "BANK CLERKS' MUTUAL BENEFIT ASSOCIATION }  
OF THE CITY OF NEW YORK. }  
"New York, October 25, 1875.

"This is to certify that Richard J. B. Deady, having paid the initiation fee as required by the constitution, is hereby created a member of the Bank Clerks' Mutual Benefit Association of the City of New York, and the said association hereby agrees to pay to his mother, Rebecca Deady, within thirty days after satisfactory proof of his death, or to himself if permanently disabled, as many dollars as he may be entitled to under the provisions of the constitution regulating the same, provided he shall be a member in good standing at the time of his death or disability.

"C. D. BALDWIN,  
"President.

"Countersigned:

"JOHN H. BRENNAN,  
[L. S.] "Corresponding Secretary."

Said certificate was, on the same day, delivered by the said Richard J. B. Deady to this plaintiff.

On the 23d day of January, 1882, Richard J. B. Deady surrendered said certificate, which had been given him for safe keeping, to the defendant, and received in its place a certificate, wherein one Emma L. Deady was designated as the person to whom the money should be paid.

This surrender was made without the knowledge or consent of the plaintiff, and three days afterward, to wit, on the 26th day of January, 1882, the said Richard J. B. Deady died.

The court (per Sedgwick, J.) Held that the wording of the by-law, "that any member might, by written notice to the Board of Management, designate to whom the sum due at the time of his death shall be paid," means a designation from time to time. That the power of designation is not exhausted by one designation. To hold that it is, would be contrary to the exigencies of most of the clerks.

"To me it is manifest that the certificate in question is not legally operative as a contract between the plaintiff and defendant. It has, as one of its terms, implied if not expressed, the by-law that has been referred to. The defendant had no power to make any other contract than such as would be justified by the charter and by-laws. Such a contract would express the obligation of the defendant to the member to pay to the appointee as appointee. The present certificate is no further valid than it embodies evidence that the plaintiff was the appointee. The rights of the plaintiff are not greater than they would be if she never had the certificate—that depended solely upon the fact that she had been designated to the bank."

Verdict for the plaintiff set aside.

#### NOTES OF CASES.

##### NATIONAL BANK—SPECIAL DEPOSIT—LIABILITY FOR LOSS.

The First National Bank of Mansfield, an association organized under the Act of Congress entitled "An Act to Provide a National Currency," approved June 3, 1864, received by its Cashier certain United States bonds for safe keeping. These bonds were afterwards demanded by the owner, and their delivery refused on the ground that the bank had no such bonds in its possession. An action was brought to recover their value, wherein the bank claimed that if any arrangement had been made it was made with the Cashier individually and not as an officer of the bank; that if he made such an arrangement without the knowledge of the directors, it was *ultra vires*, and did not bind the bank. It was proved to have been part of the ordinary business of the bank to receive United States bonds for safe keeping.

*Held*, That the bank had power to receive such deposits under the construction of the National Banking Act by the Supreme Court of the United States in *First National Bank of Carlisle vs. Graham* (100 U. S., 699), and that the Cashier acted within the scope of his authority in receiving such deposit.

It was further *Held* that the ordinary rule, holding a bailee without reward liable only for gross negligence, does not apply, and, that "where securities are deposited with persons accustomed to receive such deposits, they are liable for any loss occurring through the want of that care which good business men would exercise in regard to property of such value."

First National Bank of Mansfield, Ohio, &c., Plaintiff in Error,  
vs. David Zent and another, Defendants in Error (Supreme  
Court of Ohio, 1883).

##### MARGINS—NOTICE TO PRINCIPAL.

Where a purchase of pork and lard for future delivery was made at the Board of Trade for a customer, who advanced the required

margin, and no agreement was made as to notice in case the commission merchant was compelled to sell the property to save himself from loss,

*Held*, That the transaction will be governed by the rules of the Board of Trade. If those rules require a notice to the customer before making a sale, such notice must be given; and, in a case where there is no contract with regard to such notice, and no rule of the Board of Trade, the common law will require the broker to give a reasonable notice and opportunity to make the margin good before the sale.

Denton *vs.* Jackson (Supreme Court of Illinois, May, 1883).

#### PREFERRED STOCK—PRIORITY.

The Ohio & Mississippi Railway Company issued certificates of preferred stock, containing the following language :

"The preferred stock is to be and remain a first claim upon the property of the company after its indebtedness, and the holder thereof shall be entitled to receive from the net earnings of the company 7 per cent. per annum, payable semi-annually, and to have such interest paid in full for each and every year before any payment of dividend upon the common stock; and, whenever the net earnings of the corporation which shall be applied in payment of interest on the preferred stock and of dividends on the common stock shall be more than sufficient to pay both said interest of 7 per cent. on the preferred stock in full and 7 per cent. dividend upon the common stock for the year in which said net earnings are so applied, then the excess of such net earnings, after such payments, shall be divided upon the preferred and common shares equally, share by share."

*Held*, That the preferred stockholders of the company had no claim upon its property superior to that of creditors under debts contracted subsequently to the issue of the preferred stock, and that the only claim which could be made by them was one to a priority over the holders of the common stock.

Warren *vs.* King (U. S. Supreme Court, May 17, 1888, Blatchford, J.)

#### LIABILITY OF STOCKHOLDERS.

A stockholder of an insolvent bank was sued upon his liability as such by an admitted creditor. The bank was organized under a special charter, which provided (Sec. 9), that "whenever default shall be made in the payment of any debt or liability contracted by the corporation, the stockholders shall be held individually responsible for an amount equal to the amount of stock held by them respectively."

The plaintiff brought suit upon certain certificates of deposit of the bank, amounting to \$950, which were due and unpaid. Before the defendant was summoned, however, he bought up, at a discount, certain other certificates of deposit of the bank, aggregating an amount

equal to his stock, which he delivered to the assignee, who accepted them as a payment of the bank indebtedness and marked them paid. These facts defendant set up as a defense to any further liability to the plaintiff.

*Held*, That the defendant was only discharged from liability to the extent of the amount paid for such certificates in good faith, and not to the extent of their full face value.

Gauch *vs.* Harrison (Appellate Court, Fourth District, Ill., March, 1888).

#### NATIONAL BANK—LIABILITY OF STOCKHOLDER.

A holder of shares in a national bank, whose stockholders were individually liable under the Act of June 3, 1864, in case of its insolvency, becoming possessed of information which led him to apprehend the failure of the bank, made a transfer of his stock before the bank failed to an irresponsible transferee to escape liability.

*Held*, That such transfer was a fraud upon the creditors of the bank, and that the transferer would be held to the same liability to the creditors as before the transfer.

Bowden *vs.* Johnson (Supreme Court of the United States, March, 1888.)

#### STOCK SPECULATION—CONTRACT TO PAY MONEY LOST IN, UNENFORCEABLE.

C and N engaged in buying stocks on margin, C furnishing the money and N buying the stocks. The transactions were entirely on margins, no stock being actually bought or sold. They incurred heavy losses, and, on a settlement, N was found indebted to C in the sum of \$20,131, that being his share of the losses. For this amount he gave a bond and warrant of attorney, upon which C entered judgment. Afterwards, upon a motion to open judgment,

*Held*, That the transaction was illegal, and that the fact of a judgment bond being given did not preclude the defendant from going behind it and showing the illegality of the consideration.

Motion granted.

Collins *vs.* Nevin (Allegheny, Pa., Common Pleas, January, 1888.)

#### LOANING RAILROAD STOCK.

A loaned C 100 shares of the stock of the Jersey City & Albany Railroad Company, which C agreed to return within three months, or, at his option, to pay A the sum of \$2,500 therefor. On the back of the certificate A executed a power of attorney to C to transfer the same on the books of the company and substitute any person for that purpose. Before the expiration of the three months, C offered to return the stock, and asked A if he should have the certificate made out in his (A's) name, or in his own name, and assign it in

blank to him, to which A replied that he did not know yet, he did not care for the stock then, and that he should let him (C) know later on. Some time thereafter A called upon C and demanded the return of the identical certificate of stock loaned A.

*Held*, In an action by the assignee of A to recover such certificate, or, in lieu thereof, the \$2,500 specified in the agreement of C, that the defendant was not bound to return the identical certificate received from A, and that the contract was satisfied by the return of 100 shares of the same kind of stock.

Barclay vs. Culver (New York Supreme Court, General Term, June, 1883).

#### REPLIES TO QUESTIONS.

FARMVILLE, Va., September 10, 1883.

*Question*.—Mr. Lawton represents himself as the advance agent of a circus company, and after making all his arrangements for his circus, is brought into the bank by a gentleman of the town and is introduced and identified, and he presents a check on the City National Bank of Bridgeport for \$120 to be cashed. The check purports to be certified by the President of the bank, and by reason of this certification the gentleman introduced is not required to endorse. The check is returned protested and the certification is a forgery. Is the gentleman introducing in any way responsible to the bank cashing said check?

JOHN H. KNIGHT, Cashier.

*Answer*.—We think not. To maintain an action for false representations, there must be a misrepresentation of a material fact made with intent to deceive, and which the party relied on to his injury. In the case put there was no misrepresentation, unless it was as to the man's honesty, and this at best could only be taken as an expression of opinion, upon which the bank relied at its peril.

LYKENS, Pa., October 1, 1883.

*Question*.—Some time ago we received a note payable at our bank (Miners' Deposit Bank) from the First National Bank of Philadelphia for collection (they having received it from another bank) without any instructions as regards protesting in case of no funds. We received the note at 2 P.M. next day after the last day of grace. The party having no funds, we had it protested at once and returned it next day; the aforesaid bank refused to pay us the protest fees, stating that the paper was overdue when we received it, and we had no legal right to protest. As a subscriber to your worthy JOURNAL will you please give us your legal opinion on the subject. Had we not even a legal right to protest a note under the same circumstances, payable at the bank, if not provided for, any time after it was matured, if we had no instructions not to protest? This latter, however, I am doubtful about. Thanking you in advance for this and also for past favors of the same nature.

EDWARD DEIBLEN, Cashier.

*Answer*.—The protest of a note which is not presented for payment at the time and place it is payable, is not a valid paper—it is not in law a protest. The Miners' Deposit Bank, therefore, cannot charge the protest fees against its correspondent. The question of instructions as to protesting does not arise.

ST. JOHNSBURY, Vt., September 18, 1883.

*Question*.—When national bank stock is held as collateral security for a personal note payable on demand, and while thus held the bank fails and an assessment is made upon the stockholders, is the holder of the note liable for the assessment? An answer through your columns will greatly oblige

BANK.

*Answer*.—The matter depends upon whether the stock has been transferred on the books of the banks to the holder of the note and collateral. Until there

is a transfer of shares on the books of the bank, the shareholder whose name there appears is liable for the debts of the bank. Even an actual sale and signing the ordinary power of attorney on the back of the certificate will not relieve the seller, if the transfer is not entered on the books of the bank. In determining who are shareholders, the court will not look beyond the legal title, unless the transfer of the stock was made fraudulently for the purpose of avoiding responsibility. The transferee of shares, when such transfer is absolute on the books of the bank, is liable to creditors to the amount of such shares, although in fact he holds them as collateral security for a loan to the shareholder who transferred them.

RATON, New Mexico, September 1, 1883.

*Question.*—Is not a notice of non-payment at maturity of a note made and payable within this Territory, sufficient to hold endorser? In your August number you say that protest and notice is necessary. In Indiana, Illinois, Georgia, Mississippi and several other States protest is not necessary on promissory notes made and payable within the State. There is no statute in this Territory in regard to the point and you will greatly oblige me by giving me your opinion either by letter or through your valuable JOURNAL.

H. L. MCCARN, Cashier.

*Answer.*—Protest of a promissory note is not necessary, though it is usual. It is sufficient if the note is presented for payment at maturity, and notice of refusal immediately given. Protest is indispensable only in the case of a foreign bill of exchange. These are well-settled principles of the law merchant, and obtain wherever unchanged by statute. In many of the States statutes permitting the protest of inland bills and promissory notes have been enacted, and it is the usual custom so to do, the protest thereby becoming evidence of the fact, but these statutes are not compulsory, and the holder may omit the protest, and prove the demand and refusal by other evidence. In New Mexico such is the rule.

GRAFTON, Neb., Sept. 8, 1883.

*Question.*—May I ask you for advice upon the following, which shall be much appreciated: A, one of our customers, drew a sight draft upon B, payable to order of C—ourselves. As usual we credited draft to account of A, endorsing and forwarding same to D, our correspondent, for collection and credit to our account, accompanying same with instructions to protest, as instructed by customer A. After five days the draft was returned to us by D, marked "Refused." I immediately returned draft to correspondent, asking why it had not been protested. The answer was as follows—verbatim: "We did not protest, because sight draft can be protested at any time. No one to hold—will attend to it to-day." Now, am I not right in saying that, by Nebraska State laws, the draft should have been protested for non-acceptance if acceptance was refused; and had it been accepted and not paid at expiration of days of grace should it not have been protested for non-payment? Again, can a sight draft be rightfully protested three or four days after acceptance or payment has been demanded and refused, and without obtaining drawer's consent the second time? And, again, inasmuch as definite instructions were given to correspondent to protest, and they having failed to do so, cannot we look to them for payment with just as much right as though draft had been endorsed by half a dozen other persons?

ROBT. C. PRICE, Cashier.

*Answer.*—The general rule of law is that the drawer should have prompt notice of the non-acceptance or non-payment of a bill of exchange, otherwise he is discharged from liability. In the statute of Nebraska, however, there occurs this provision (Ch. 32, Stat. 1873.) "All notes, bonds or bills made negotiable by this chapter, shall be entitled to three days grace in the time of payment, and the demand of payment from the maker on the third day of grace,

or of acceptance if the instrument is a sight draft, and notice of non-payment or acceptance thereof, to the endorser *within a reasonable time*, shall be adjudged due diligence under the provisions of this chapter, unless the endorsement shall express in writing other conditions." We are unable to find any decision by the Nebraska Court holding what would be a reasonable time. It will probably vary according to the facts and circumstances of each particular case, but the provision is undoubtedly a relaxation of the rule requiring immediate notice. Although it is the usual practice in Nebraska, as elsewhere, to protest all negotiable paper, there is no statute making it compulsory, and, providing the requirements of demand and notice are complied with, an omission to protest will forfeit none of the rights of the holder. It only deprives him of a means of proof in a court of justice. Foreign bills of exchange, however, must be protested immediately upon dishonor, and each State is regarded as foreign to the other for this purpose. Your correspondent, of course, can be held answerable in damages for any loss sustained by you by reason of any neglect of duty on his part.

FALL RIVER, Mass., Sept. 22, 1883.

*Question.*—Will you kindly give me your opinion on the following: Does the fact that a note is made payable at a certain bank in which the maker has funds, give the bank authority to charge the note to the maker's account without further instructions from him? So far as I know it is the custom to do so, but I am informed by one who should be "booked up" that a bank makes itself liable by so doing. For instance: Jones gives a note made payable at the First National Bank, where he has a deposit sufficient to take up the note on the day it becomes due. If for any reason he prefers not to pay, and the bank does so according to custom, can he hold the bank responsible?

*Answer.*—In the case of National Bank vs. Smith (66 N. Y., 271) it was held that where, after the maturity of a note *held by a bank*, and due notice thereof, the maker makes a general deposit in the bank of an amount sufficient to pay the note, this does not, as between the bank and an endorser, operate as a payment. In the absence of any express agreement or directions, it is optional with the bank whether or not to apply the money in payment; but it is under no legal obligation to do so. Again, in Egerton vs. Fulton National Bank (43 How. Pr. Rep. 216) it was held that a bank is not authorized to pay a note of its depositor, made payable at the bank, and charge him with the amount, when the depositor has, before the maturity of the note, notified the bank not to pay it. In the case instanced in the above query we think that the bank is not responsible, if it had no notice that the maker of the note desired not to pay it.

---

LINCROSTA-WALTON.—The financial value of patents relating to articles of universal consumption or application is well illustrated in the case of the new wall decoration called Lincrusta-Walton. A large sum was paid to the inventor, Mr. Walton, of England, for his English rights, and \$200,000 by a French company. Recently a business corporation in the United States paid a quarter of a million dollars for the right to manufacture Lincrusta-Walton in this country, nearly the whole payment being in cash. Lincrusta-Walton presents the interesting feature of a wall decoration in solid relief, which is thoroughly water proof and can be washed at pleasure. The designs are all in the highest style of art, the various beautiful effects of wood carving can be produced, also elegant mouldings and exquisite panels in relief. The Lincrusta-Walton is quite moderate in price, and when the fact is considered that the material is almost indestructible, it proves to be the cheapest as well as the most beautiful of all mural decorations.

## BANKING AND FINANCIAL NEWS.

(With Comments on the more important matters. This Department also includes General Business News—Notes from Foreign Banking Centres, including Canada—A Complete List of New Banks, Changes in Officers, Dissolutions and Failures—Banking and Monetary Tables—Bankers' Obituary Record, &c.)

**A Uniform Bankruptcy Law.**—At a dinner of the Boston Bank Presidents' Association on September 17 the question of a national bankrupt law was discussed. A communication was read from the New York Board of Trade, in relation to the enactment by Congress at its next session of the Lowell bill in its amended shape, providing for an equitable law in regard to bankruptcy. A resolution, indorsing this bill, was considered, and referred to the association's October meeting for action.

Former experience with national bankruptcy laws has not been satisfactory, but it is a pity if a law cannot get passed which would be better than the present conflicting State laws. The British Parliament, just before the recent adjournment, passed a new act which goes by the name of the Chamberlain Bankrupt Act, and which will take effect on January 1st. It is described as follows: It was framed expressly to prevent fraudulent composition between the debtor and favored creditors and to deprive professional receivers of opportunities of enriching themselves at the expense of creditors unjustly. The measure also guards against fraudulent bankruptcies by providing penalties for professional bankruptcy. All agreements between debtors and creditors in future must be made under a double supervision—that of the Judge of the Bankrupt Court and the Inspector, or Official Receiver, as he is to be called, of the Board of Trade. The business of the latter will be to inspect the books, accounts, stock, etc., of the bankrupt and to report to the Judge of the Bankruptcy Court. When composition is determined on, the proxies of all absent creditors are to be lodged with him, and as his promotion and advancement depend on his discretion and faithfulness, his interest is best served by acting fairly. On the report of the Official Receiver the court will determine whether the bankrupt shall be discharged and on what conditions. There is no chance for collusion between the debtor and favored creditors. Any attempt at fraud on the part of a bankrupt will be considered a misdemeanor punishable by imprisonment. The Bankruptcy Court commits for trial, and it becomes the duty of the Public Prosecutor to institute proceedings promptly. No discharge can be had until the offender purges himself of the charge of fraud. Nor can any bill of discharge be granted to a bankrupt whose bankruptcy is due to "rash and hazardous speculations or unjustifiable extravagance in living." Pending discharge, no bankrupt can borrow a sum exceeding \$100, unless he plainly states that he is an undischarged bankrupt, and as that fact carries with it a stigma he is not likely to obtain many loans.

**The Chicago Banks and Gold Certificates.**—Some time ago the President of the Chicago Clearing-House applied to the Treasury Department for an issue of distinctive gold certificates for Chicago, which application was denied. It is now reported from Washington that Secretary Folger has written to say that he would reconsider his refusal so far as to say that he would again give the subject careful consideration.

The report continues as follows: "This change is caused by the earnest remonstrances from the Clearing-House, and from Chicago Congressmen, who maintain that their city is entitled to a gold certificate as much as New York is; that it is unjust to compel banks to cart gold about the city under the escort of armed men, in order to effect their clearances, and that there is no more reason why this should be required in Chicago than in any Eastern city. Other Western cities it is expected will make like demands, and, while it is said that the law is discretionary, there has been strong objection to an increase of the kinds of certificates. Among the reasons urged is the fact that it would tend to discredit Government paper, inasmuch as the certificates current in one city might be accepted only at a discount in another, and that it would add very much to the clerical labor of the Treasury."

This seems to imply that Chicago is deprived of the use of gold certificates, which is not the case. The difficulty between the Chicago banks and the Sub-Treasury arose last spring on a matter of exchanging the certificates for others of different denomination at pleasure. It would seem that it might be overcome by a better method than the issue of distinctive certificates.

**Redemption of Revenue Stamps.**—Numerous inquiries as to why the money value of stamped checks, adhesive check stamps and general proprietary medicine stamps, forwarded to the Internal Revenue Bureau for redemption since the repeal of the stamp taxes by the passage of the new internal revenue act, has not been returned to the persons forwarding them have been recently received by Commissioner Evans. The Commissioner says that, owing to the large number of claims which have been presented, and which are now pending it will be several months before the cases can be disposed of, and the money remitted therefor by the Department. Much of the delay in disposing of claims is caused by parties failing to comply with instructions in stating when the stamps were purchased, and whether from the Government or from a Government agent for the sale of stamps, or whether they were imprinted by the Graphic Company of New York.

The Commissioner has recently made a decision on the subject of the redemption of unused stamps, which, although it may be in conformity to the letter of the law, is certainly unjust. He claims that the present redemptions are being made under the act of March 1, 1879, which provides for the redemption of stamps which "may have been spoiled, destroyed or rendered useless or unfit for the purpose intended, or for which the owner may have no use," etc. That act provides also, "that claims for allowance on account of stamps arising under Section 3,426 of the Revised Statutes \* \* \* may be allowed, if presented within three years after the purchase of said stamps from the Government or a Government agent for the sale of stamps, and not otherwise." Now, there are persons holding unused stamps and stamped checks, which were issued more than three years previous to July 1, 1883, which they did not redeem, for the reason that they expected to use them in the course of business. But the repeal of the tax leaves them with the unused stamps which the Commissioner refuses to redeem. This is a matter which Congress ought to redress.

**Condition of Mexico.**—In the message of President Gonzalez, delivered at the opening of the Mexican Congress on September 16th, he said: The foreign relations of the country become every day more satisfactory. The condition of the country is generally good, although there exist some financial troubles, which will be speedily overcome. The progress of internal improvements is highly satisfactory and visible to everybody. The Central Railroad Company has constructed more than 1,500 kilometres of road, the National Construction Company more than 1,000, and the Huntington Railroad 117 kilometres. There have been constructed in the Republic in all 4,800 kilometres. It was found necessary to modify the agreement made by an official agent with the British bondholders, and negotiations in that regard are progressing. The negotiations for a \$20,000,000 loan abroad the President hopes will soon terminate satisfactorily. The revenues of the fiscal year ended June 30, 1883, amounted to \$33,500,000—an increase of \$1,500,000 over the previous year. The revenues of the present year bid fair to exceed the sum mentioned. Modifications in the customs tariff are nearly completed. The new postal code will soon go into effect. Overland mail communication with the United States will be improved. Public instruction is in a flourishing condition. Every effort is being made to attract a good class of emigrants to the country, and large contracts to this end have been made. The army is in good condition, and peace reigns throughout the Republic.

For convenience sake we may mention that a kilometre is nearly five-eighths of a mile. There are many indications that the English are making active efforts to gain the Mexican trade, now that Germany has concluded a commercial treaty with Mexico. The more progressive of the Mexican newspapers are agitating a reform of the present semi-barbarous custom-house system. Now is the time for the United States to obtain that supremacy in Mexican commerce to which it is naturally entitled. The interests opposed to the treaty are insignificant as compared with the benefits to be gained from it.

**Trust Companies of New York.**—The semi-annual reports of the trust companies of New York State, showing their condition on July 1, 1883, have been received at the Bank Department. The number of institutions of this class in operation in the State is 15, of which 13 are in the cities of New York and Brooklyn. One of the latter, however, the German-American Loan & Trust Company, which was chartered last winter, only began active business late in June. The companies held deposits on July 1, aggregating \$123,627,193. Of the \$157,716,638 of assets reported, \$3,113,308,61 was loaned on bond and mortgage, \$98,067,143 on collaterals, and \$3,813,288 on personal securities. The investments were \$24,711,880 in stocks and \$5,663,245 in real estate; cash on hand and deposited, \$9,432,656; other assets, \$2,925,074. The business of the institutions is conducted on a capital of \$12,700,000, and they have already accumulated surplus and undivided profits, in the aggregate, of \$12,023,314.

The wonderful growth of these institutions is shown in the fact that their deposits have increased \$18,730,008 since July 1, 1882, and on July 1 they held deposits of \$123,627,193 in the aggregate. The business of the trust companies is largely confined to loaning on collaterals and personal securities, and their organization seems to have supplied a want in the financial system of the State.

**Gold Production of the United States.**—According to a statement recently made by the Director of the Mint, the gold production of this country has fallen from \$51,000,000 in 1878 to \$32,500,000 in 1882. But, of this fall, \$13,000,000 occurred in a single year, between 1878 and 1879, and was caused by the sudden giving out of the Comstock Lode. Since 1879 the production has fallen only \$5,500,000, and it seems to be the opinion of the Mint Director that it will be likely to recover itself. Of the prospects of mining in California, which is still the chief source of our gold supply, he speaks very hopefully. The yield of the placers has been checked by the controversies between

the miners and the farmers, whose lands have been injured by the washing operations. An adjustment in some way of these controversies is expected, and in the meantime the gold-quartz mining is being steadily and successfully increased.

A report, which will soon be issued, on "The Mineral Resources of the United States," prepared by Mr. Albert Williams, Jr., Chief of the Division of Mining Statistics and Technology, United States Geological Survey, will give the following regarding the gold and silver production: "The Mint authorities furnish the following statistics for 1882: Gold, \$32,500,000; silver, \$46,800,000; total, \$79,300,000, or an increase of \$1,600,000 over the output of 1881. For the first six months of 1883 the production is estimated at \$16,250,000 gold, \$23,400,000 silver, and \$39,650,000 total, the rate of production being assumed to be the same as in 1882."

**St. Albans (Vt.) Trust Company.**—The committee of the depositors have made a detailed statement of the result of their investigation of the affairs of the St. Albans Trust Company. The total assets amount to \$709,545; worthless paper, \$15,000. The committee consider \$193,000 of the assets to be perfectly good and \$501,545 as doubtful. If all the doubtful assets could be collected the depositors could be paid in full, and if one-half could be realized there would be assets enough to pay 75 cents on the dollar. The committee's report shows L. Brainerd to be responsible as principal surety for \$401,028. Brainerd's property turned over for the benefit of the creditors is valued at about \$400,000. The report concludes by saying that some of the worthless paper ought to have been charged to profit and loss many years ago, as the signers were released by bankruptcy proceedings.

The above statement was made on October 1, but Receiver Rich, in a statement of September 20 says he is led to believe that at least a 33 per cent. dividend is assured to the creditors. There are bonds, mortgages, etc., amounting to \$193,000. Add to this the sum due from the Norwood Lumber Company, which can probably be realized, viz.: \$312,000, and there is \$505,000 with which to pay \$580,000 indebtedness. Indorsements to the amount of \$78,000 have been found, but the prospect of their collection is not known. Lawrence Brainerd, A. O. Brainerd and Charles Wyman, officers of the failed company, and also Herbert Brainerd and A. P. Brainerd, have been indicted by the Grand Jury for an alleged violation of a penal clause of the company's charter. There are twenty-five counts against Lawrence Brainerd. He gave bail in \$50,000, and the others in \$2,000 and \$10,000 respectively.

**Money in Circulation in the United States.**—The following statement, showing the amount of money in circulation, has been compiled by the First Comptroller of the Treasury:

|                                                                    |               |
|--------------------------------------------------------------------|---------------|
| National bank notes outstanding September 1, 1883.....             | \$353,834,543 |
| Legal-tender notes outstanding September 12, 1883.....             | 846,681,016   |
| Silver certificates outstanding September 8, 1883.....             | 75,969,071    |
| Gold certificates outstanding September 8, 1883.....               | 55,272,440    |
| Total paper circulation.....                                       | 881,757,069   |
| Gold coin in circulation February 1, 1883.....                     | 517,378,992   |
| Silver (legal-tender) in circulation February 1, 1883.....         | 135,406,080   |
| Silver (other than legal-tender) in circulation February 1, 1883.. | 80,563,501    |
| Total gold and silver circulation.....                             | 743,347,573   |
| Total paper circulation.....                                       | 881,757,069   |
| Total coin circulation.....                                        | 743,347,573   |
| Grand total.....                                                   | 1,575,104,642 |

Assuming the total population to be 52,000,000, the distribution per capita would be \$30.29. In 1879 the estimated circulation per capita was only \$23.64. The following shows the amount of gold and silver (including bullion in the

Treasury) in the country, at the dates mentioned, according to estimates of Comptroller Knox, and beginning with the date when specie payment was resumed: January 1, 1879, \$1,055,356,619; November, 1879, \$1,165,573,503; November 1, 1880, \$1,302,718,726; November 1, 1881, \$1,455,681,602; November 1, 1882, \$1,483,838,554.

**New York Clearing-House.**—The regular annual meeting of the New York Clearing-House Association was held at the Clearing-House on October 2d. The following are the officers and committees chosen for the ensuing year: Edward H. Perkins, Jr., *Chairman*; William A. Nash, *Secretary*; William A. Camp, *Manager*.

**Clearing-House Committee.**—Wm. L. Jenkins, Richard King, William Dowd, O. D. Baldwin, George S. Coe.

**Conference Committee.**—Charles F. Hunter, Frederick D. Tappen, Robert Bayles, George Montague.

**Nominating Committee.**—Wm. J. Quinlan, Jr., E. Kellogg Wright, John W. Crane, Thomas Monahan, Wm. H. Oakley.

**Committee on Admissions.**—J. L. Jewett, A. S. Frissell, N. F. Palmer, William H. Cox, W. A. Hall.

**Arbitration Committee.**—D. C. Hays, W. A. Thomson, Arthur B. Graves, Wm. M. Bliss, Robert Buok.

The following shows the volume of the transactions during the year ended Oct. 1, 1883, and since the organization of the institution:

|                                                      |                             |

The Association consists of sixty-three members, including the Assistant-Treasurer of the United States at New York. There are seventy-four banks in the City of New York (48 national and 26 State); of these, two national and ten State are not members of the Association.

**Freedman's Savings Bank.**—The National Convention of Colored Men, held at Louisville, Ky., on September 27, adopted an address containing the following section:

*Sixth*—The failure of the Freedman's Savings Bank and Trust Company is a marvel of our time. It was established to receive the earnings of persons heretofore held in bondage and the descendants of such persons. It was established by the Government and thought to be solvent. In changing its charter the Trustees transcended their authority, and thereby made themselves liable. The Government, in appointing special machinery to close the insolvent institution, violated the United States statutes on bankruptcy, and should therefore reimburse the creditors of the bank.

The history of the management of this institution is a disgrace to the country, not because the Government provided a means for winding up its affairs, however, as this was done in the interest of the depositors. The New York "Times" says: "The colored people have a real grievance against the Government of the United States in the disgrace of the Freedman's Savings Bank failure. Whatever the legal obligations in the case may have been, there is no doubt that this institution was implicitly trusted, in the belief that it was under the care of the Government. No proper provision was ever made for its supervision, and in the final settlement of its affairs little regard was paid to the equities of the case. It would be a small matter for the Government, in view of the exceptional circumstances under which it existed and was mismanaged and brought to ruin, to reimburse the losses of the poor depositors. Many claims have been paid which had a much less equitable basis."

**New Orleans National Bank.**—Postmaster-General Gresham having learned that the New Orleans National Bank was receiving letters and money orders for the lottery company in that city, on September 19 directed the postmaster there to deliver to that bank no registered letters, and to redeem no money orders for it.

Regarding the attempts to prevent people by force from wasting their money in lotteries we may say with the poet: "It is very evident, these intentions are well meant." But it is surprising how little effort is made to show people what a foolish thing lottery gambling is. The profits of the Royal Havana Lottery for the last economic year were \$5,502,519, against \$5,295,679 in the previous year; and this in spite of the efforts to suppress its business in this country.

**New Dimes and Half-Dimes.**—The Director of the Mint Bureau, on September 29, authorized the purchase by the Superintendent of the Philadelphia Mint of 100,000 ounces of fine silver for coinage into dimes. This amount of silver will make, it is estimated, about 130,000 dollars worth of dimes.

The Director of the Mint thinks that not a very large amount of new five-cent pieces will be called for. Of 126,000,000 five-cent pieces coined, he said, more than 100,000,000 were minted prior to 1873. In 1877 the coinage was suspended, there being at the time about 12,000,000 pieces in the Treasury. This supply became exhausted a little more than a year ago, and then coinage was resumed. Last year about 11,000,000 five-cent pieces were coined. Probably 10,000,000 more will be required before the supply again exceeds the demand.

**Post Office Business.**—The following statement showing the gross revenues of the Post Office Department for the last two fiscal years has been prepared by the Sixth Auditor: Gross revenues for the year ended June 30, 1883, \$44,827,473; gross revenues for the year ended June 30, 1882, \$41,285,317—increase for 1883, \$3,562,156; stamps sold in 1882, \$39,533,317—increase for 1883, \$3,390,244; stamps sold for quarter ended June 30, 1883, \$10,582,212; stamps sold for the

quarter ended June 30, 1882, \$9,389,612—increase for 1883, \$602,600. The free delivery system was established in 42 cities and towns during the fiscal year ended June 30, 1883. Only four Post Offices have been added to the list since that date. Although many urgent applications have been received for the establishment of the system the department has been unable to accord the privilege except in rare instances, because of a meagre appropriation, which has been absorbed to a considerable extent by the operations of the law providing for the yearly promotion of letter-carriers.

The large increase in receipts of the department, arising from the regular demands of trade, is an indication that there will be no deficiency under the reduced postage, at any rate, not after the first few years.

**The Postal Savings Bank Idea.**—The Post Office Department at Ottawa have been asked by the Postmaster-General of the United States to forward him complete information regarding the working of the savings bank in connection with the Post Office Department, and the request has been complied with. This fact may account for the statement that the Postmaster-General at Washington would urge in his next report the establishment of Post Office savings banks in the United States on the system in operation in Canada.

Possibly a well-managed postal savings system might be a benefit to the poor in some parts of the country, especially the South. But this Government is so peculiarly situated at present that it is less in a position to establish such a system than any other civilized country. It is paying off its debt so rapidly that, if the deposits in the bank were invested in Government bonds, there would be no prospect of permanence to the system, and, besides, the bank could not afford to pay over 2 per cent. interest per annum.

**The Produce Exchange Bank,** New York, was opened for business on September 12. It occupies a space 45 by 55 feet, adjoining the main entrance of the new Produce Exchange building.

We have already noticed from time to time the progress of the organization of this bank. It has been designated as one of the official depositories of margins on contracts for future delivery, of the Produce Exchange. Its first report to the Bank Superintendent, made a few days after it started, shows that it had already secured a large business. It is reported that 110 is frequently bid for the stock.

**Cost of the Customs Service.**—A table prepared in the Treasury Department of the business in the several customs districts in the United States during the fiscal year ending June 30, 1883, shows that \$216,780,869 were collected at an expense of \$8,422,127, the average cost of collecting \$1 in all the districts being .029.

A glance over the table shows that in 30 out of the 128 districts it cost over \$1 to collect each dollar; in 31 it cost under 10 cents, and in 67 it cost from 10 cents to \$1 to collect each dollar. In New York it cost 18-10 cents and in Atlanta \$50.84 to collect each dollar of customs, these being the extremes. No doubt many custom houses could be closed without detriment to anyone but a few office-holders.

**A Use for Confederate Bonds.**—There has recently been transferred from the War Department to the "abandoned property" division of the Treasury Department a large quantity of Confederate scrip bonds, etc., representing several millions of dollars, which it is said is now to be macerated and converted into pulp on the order of Secretary Folger.

The above contains a hint which should be availed of by foreign holders of Confederate bonds. By proper manipulation the bonds may be converted into useful paper, whereas at present they are worse than useless.

**Business in Mobile, Ala.**—The "Mobile Prices-Current Annual Statement" for the year ended September 1, 1883, shows that the condition of general business in the city was very satisfactory. Regarding monetary affairs, it says: "The fiscal year closes, with this resumé, in a most satisfactory manner. During the entire year money has been plentiful; in fact, more so than during any previous year since peace and the re-establishment of the South brought our section back to the normal condition of legitimate commercial and business pursuits. At no time during the year which closes with this review has there been any real tightness in the money market. The cry of "hard times," which has become a proverb with the thriftless and impecunious in ages long ago, has been confined to those who deserve no credit. To others, whose character and prospects warranted the bestowment of credit and confidence, money has at all times been easily accessible, and at an average rate below that fixed by law. Conventional rates have been rare, and then only for limited periods of a few days at most, except in cases where these conventional rates have been lower than those established by law. The banks and insurance companies have carried a plethora of funds, and as we write to-day there are at least half a million in cash in the aggregate seeking borrowers on good paper at the rate of 8 per cent. per annum. There is a better feeling in all circles. A spirit of husbandry prevails with all classes; and our financial institutions and business men stand to-day first class in all the moneyed marts of the world in which they are known as above suspicion, much less reproach. It is a fact of which Mobile may be justly proud that business integrity has won for her institutions and her business men a reputation for reliability that is equalled by few communities."

"Those who deserve credit can get it, at home and abroad; and the largely increased volume of our commercial pursuits has left its impress on the body politic, which can but increase with the impetus already gained. The day for complaints as to want of moneyed capital commensurate with the public demands has happily passed; and Mobile stands to-day the peer of any community in all that constitutes the legitimate purposes of a financial and commercial city."

**Business at the Sub-Treasuries.**—The following table is a summary of the financial statements of the several named Sub-Treasuries of the United States, which have been received at the Treasury Department:

|                    | <i>Balance on hand,<br/>June 30, 1882.</i> | <i>Receipts,<br/>1882-3.</i> | <i>Disbursements,<br/>1882-3.</i> | <i>Balance on hand<br/>June 30, 1883.</i> |
|--------------------|--------------------------------------------|------------------------------|-----------------------------------|-------------------------------------------|
| Philadelphia.....  | \$17,298,327 .....                         | \$53,372,251 .....           | \$45,803,111 .....                | \$23,864,467                              |
| Baltimore.....     | 5,054,201 .....                            | 21,357,883 .....             | 16,546,922 .....                  | 9,865,112                                 |
| St. Louis.....     | 9,219,466 .. ..                            | 38,783,016 .....             | 34,990,221 .....                  | 13,052,260                                |
| Chicago.....       | 14,391,180 .....                           | 43,120,877 .....             | 42,667,642 .....                  | 14,853,415                                |
| San Francisco..... | 41,021,950 .....                           | 52,936,144 .....             | 23,952,510 .....                  | 70,005,614                                |
| New Orleans.....   | 7,264,729 .....                            | 27,599,409 .....             | 23,672,700 .....                  | 11,191,437                                |

**Nathaniel Thayer's Estate.**—The estate of Nathaniel Thayer, of Boston (or Worcester, where his will was probated), is appraised at \$16,076,822. But his household furniture, horses, carriages, silver-plate, and live stock in Boston and Lancaster amount to only \$23,000. His real estate is valued at \$314,310. He held large blocks of railroad stocks and bonds, the largest amount in any one road being 0,168 shares of the Chicago, Burlington & Quincy Railroad stock, appraised at \$126 a share, amounting to \$1,146,000. He held shares in 88 railways, manufacturing, stock-yard, and land companies. It will be seen that he was economical in his furniture, silver-plate, and horses and carriages, considering his great wealth. He did not go into the twenty-thousand-dollar-horse and two-hundred-thousand-dollar-yacht indulgence, but he bought paying stocks and let his income accumulate. In this quiet way he became rich.

**Long Island Savings Bank.**—The next payment to depositors of this institution, which closed its doors some six years ago, will soon be made and will be the final one. The sum to be paid out is about \$20,000, and the depositors among whom it is to be divided are those who agreed to wait a certain time and receive dollar for dollar rather than accept eighty per cent. on a speedy settlement. Should the bank property at the corner of Boerum and Fulton streets be disposed of to advantage the trustees will not lose anything.

**State Banks of New York.**—Following is a statement showing the aggregate of resources and liabilities of the State Banks of the City of New York, on Sept. 23, 1883, as exhibited by their reports to the Superintendent of the Bank Department, together with the totals on June 23, for comparison:

| LIABILITIES.          |                |                     |                      |
|-----------------------|----------------|---------------------|----------------------|
|                       | June 23, 1883. | September 23, 1883. | Comparisons.         |
| Capital.....          | \$12,910,000   | \$13,912,700        | Inc..... \$1,002,700 |
| Net profits.....      | 7,128,000      | 7,092,100           | Dec..... 35,900      |

| Totals.....                                | \$80,099,600   | \$82,412,000        | Inc..... \$2,312,400 |

**The Electric, Manufacturing and Miscellaneous Stock Exchange** is a new concern started in New York for the purpose of affording a market for stocks and securities described in its title. Two hundred memberships have been subscribed for, and the following were elected a Board of Directors on October 1st: George M. Hard, Arthur B. Graves, Charles Heygendorff, Thomas Barclay, M. Frederick Christensen, N. P. Lassen, W. L. Bailey, Hugo Smith, Albert H. Jocelyn.

**Woodbury (Conn.) Savings Bank—Securities Recovered.**—Burglars broke into the Woodbury Savings Bank one night about the middle of August, and, driving from the village with a stolen horse, carried away nearly \$10,000 worth of property, mostly bonds and mortgages, of which \$4,500 worth of bonds were negotiable. Through the mediumship of a Litchfield County lawyer the bank has now recovered all but about \$1,000 worth of bonds. Detective Taylor, of Bridgeport, who has been working on the case, tracked the thieves so closely that it is supposed they were anxious to turn over the booty to escape arrest. The bonds and a large amount of cash were found packed in a fruit can hidden in an old stone wall within a rod or two of the Bridgeport Jail.

**The Market Savings Bank, New York.**—Mr. John H. Platt, the assignee of the Market Savings Bank, declared a dividend of 1 1-2 per cent. to the creditors in July, amounting to \$16,000. More than one-third of the creditors have not called for it, although a special office was opened for the purpose. These creditors are requested to call upon Mr. Platt at No. 69 Wall street, where they can get their money without trouble or expense.

#### MISCELLANEOUS BANK ITEMS.

—The Rev. W. E. Knox, D.D., a brother of the Comptroller of the Currency, died recently at Elmira, N. Y.

—L. M. Longshaw, banker, of Princeton, Ky., has failed, and will, it is thought, pay about 75 cents on the dollar. The liabilities are stated to amount to \$25,000.

—“Excuse me, madame, but your account is rather overdrawn.” “Oh, Mr. Cashier, that can't be possible. I've got lots of checks left yet.”

—The defunct Dime Savings Bank, of Newark, N. J., has declared an additional dividend of 5 per cent., making 85 per cent. in all thus far paid the depositors.

— Mr. A. H. Baldwin, a New York stockbroker, while rushing from the Stock Exchange to his office recently, tripped and, falling, broke his arm.

— It was reported on September 29 that the Bank of Chenoa, Ill., of which J. R. Snyder is President and Lester H. Snyder cashier, had closed its doors.

— The Dickey County Bank, at Ellendale, Dak., has suspended. The Capital Bank, of St. Paul, had sworn out an attachment of \$7,000, and this is alleged to have been the final cause of the suspension.

— The Philadelphia "Ledger" recently sent 200 trade dollars to the Mint to be sold as bullion. They weighed 173.9 ounces, and were valued at \$172.16, or 86.08 cents each, a discount of 13.92 cents.

— The Warren Savings Bank of Warrenton, N. C., has suspended. The bank commenced business about thirteen years ago with an authorized capital of \$50,000 and a paid-in capital of \$15,000.

— At the annual election of the Boston Stock Exchange on September 24th, the old officers were chosen with the exception of H. W. Dodd, of the firm of Richardson, Hill & Co., who was elected Vice-President in place of Francis V. Parker.

— The Citizens' Savings Bank, at the corner of the Bowery and Canal street, New York, has been enlarged to twice its original size, the addition being a twin brown-stone front building.

— A movement is on foot in Columbus, Ga., to put one cent pieces in circulation. It is a matter for surprise that, in a part of the country where there are so many poor people, it was not done years ago.

— The London "Post's" Berlin correspondent says that speculators are introducing American railway stocks on the Bourse, but that their admission meets with strong opposition.

— Among the assets of the ruined City Bank of Jersey City was a note for \$4,000 bearing the name of Jasper Cadmus as drawer, which he claims is a forgery. The trustees have sued him.

— The Hon. Stephen A. Northway, formerly President of the broken Second National Bank of Jefferson, Ohio, has been bound over to the United States Circuit Court on a charge of embezzling \$50,000 of the bank's funds.

— Five dollar notes of the "Irish Republic," payable six months after the acknowledgment of its independence, are being passed in various localities for \$5. They resemble United States Treasury notes.

— S. E. Kennedy, bookkeeper of the Commercial National Bank of Youngstown, O., being short in his accounts to the amount of \$14,500, decamped for Canada early in September. He voluntarily returned soon after, and his friends promised to make good so much of the loss as his property will not cover.

— A. E. Bateman, of Washington, and J. S. Bache, of the firm of Leopold Cahn & Co., New York, have been elected members of the New York Stock Exchange. It is said that about \$25,000 was paid for each seat. Mr. Gerald L. Hoyt has also been admitted, and W. P. Tuttle, who failed over a year ago, has also been re-admitted.

— On September 10, Williams, a colored porter of the First National Bank of Las Vegas, N. M., developed signs of insanity. He made a raid on the bank with firearms, compelling the teller, clerks and accountants to stand in a row while he drilled them in military tactics. He was finally captured and sent to an asylum.

— Habeas corpus proceedings have been begun in the case of F. M. Kerr, the clerk of Preston, Kean & Co., of Chicago, who absconded with \$50,000, was captured in Lima, Peru, and brought back in a United States man-of-war. It is claimed that he was kidnapped.

— The United States Mint is about to supply new silver coins to the Hawaiian Government. They are in denominations of one dollar, one-half, one-quarter and one-eighth dollar, all but the last corresponding in weight and fineness to United States coins. The one-eighth dollar is equal to one-half of the quarter-dollar.

— The new postal notes, which came into use on October 3d, have not been well received everywhere. They should be given a fair trial. Something of the kind has been found very useful in Great Britain. They are merely a simpler and less troublesome sort of money order.

— Schulte, Hill and Nall, bankers, of Fredericktown, Mo., have assigned, with liabilities of \$90,000, and nominal assets of \$140,000. Messrs. Hill and Nall were connected with other firms which failed at the same time. The banking business had been established for a number of years and was supposed to be successful.

— Treasurer Wyman has issued a circular, saying: As the appropriation for the transportation of fractional silver coin will be exhausted by October 1 prox., the express charges on such coin forwarded from the Treasury on and after that date will not be paid by the Government, but must be borne by the consignees.

— At the opening of the Congress of Commerce and Industry, at Amsterdam, on September 14th, a resolution was adopted declaring that the principal cause of the depreciation of silver results from the decrease of its coinage in Europe. The resolution also expresses a wish for the adoption of a common double-standard throughout Europe and America.

— The Grand Jury of Jasper County, Iowa, has found five indictments against Robert C. Anderson, on charges of obtaining money under false pretenses. He was Cashier of the Bank of Monroe, and a member of the firm of Anderson Brothers, coal operators. It is reported that he obtained \$25,000 from persons in the neighborhood to develop mines at Knoxville Junction, but the firm failed, owing nearly \$50,000.

— Mr. S. De Jonge has retired from active partnership in the New York firm of De Jonge & Co., and becomes a special partner for \$100,000. The general partners are now Mr. Max Herzog, who has been associated with De Jonge & Co. over five years, and Fitch W. Smith, an old Stock Exchange member, who was for seventeen years a partner in the late firm of Robins, Parell & Co.

— The acquittal of Frank James at Gallatin, Mo., is not calculated to encourage the influx of banking capital to that part of the country. It is said that he is to be tried again on other charges in Missouri, however; and, besides, the prosecuting attorney of Rice County, Minn., wants to send him to join the Younger brothers in the Stillwater Penitentiary.

— The judgments, property and claims held by Charles E. Strong, as Receiver of the Atlantic National Bank of the City of New York, were sold at auction recently. The judgments and property sold for \$1,365, eleven shares of the Merchants' National Bank of Norway sold at 63¼ per cent on the face value, and sixty-nine shares of the Phoenix National Bank sold at 100¼ per cent. The total sales realized about \$8,000.

— The St. Mary's Church and parsonage and five acres of land, the property of the insolvent Augustinian Society, at Lawrence, Mass., and valued at \$30,000, have been sold at auction under a \$50,000 mortgage held by the Essex Savings Bank, and purchased by Peter Hallihan, representing the St. Mary's Society, for \$73,700. This sum is just sufficient to pay the mortgage and accumulated interest, leaving nothing for the depositors. Judge Choate has refused to admit the Augustinian Society to insolvency, ruling that the depositors in the savings institution are not creditors of the society.

— The national bank capital of Boston is \$52,352,000, divided among fifty-nine national banks. This amount is more than the combined capital of the eighty-seven national banks of the seven cities of Philadelphia, Baltimore, Chicago, Cincinnati, St. Louis, Detroit and Indianapolis. New York city has fifty national banks, with a capital of \$51,650,000, which is less than the national banks' capital of Boston; but she has many State banks which swell the capital represented at the New York Clearing-House to \$61,162,700. The amount of capital directly represented at the Boston Clearing-House is but \$50,400,000, seven of the Boston banks making their exchanges through other banks. The amount of capital invested in State banks and trust companies and by private bankers is, however, constantly growing, and is proving a powerful competitor to the national banks. The capital of the State banks in New York city amounts to \$10,967,700, and, adding the trust and loan companies, savings banks and private bankers, the amount is swollen to \$51,654,464, while Boston has but \$6,088,250, and Chicago has \$8,604,618.—*Boston Advertiser.*

**NATIONAL DEBT REDUCTION IN ENGLAND AND THE UNITED STATES.**—The "Pall Mall Gazette" says that it will be very lamentable if one consequence of the waste of parliamentary time should be the dropping of the National Debt Bill. England, it says, must reduce its debt, and that on a large scale, if she is not to lose caste among nations and abandon her foremost place. "Already," the "Gazette" adds, "it is open to question whether we have not by our remissness in the matter, as compared with the United States, distinctly fallen to a second position." The journal referred to then enumerates some of the secondary reasons which should help to convince wavering minds of the necessity of reducing the debt, touching lightly upon the primary reason, the prospect of improved national credit. Prominent among those secondary reasons is the so-called "exhaustion of coal" argument. The "Gazette" points out that England's present prosperity as an industrial and manufacturing nation is largely based on a supply of cheap coal and iron, and that her rapid growth is accompanied by a constantly increasing consumption of these articles. It is obvious that one of the conditions of England's present prosperity and growth is changing to her disadvantage. In every direction England is losing special advantages which she once had. Another reason for reducing the national debt is found in the fact that whatever the country does in that direction is insufficient to compensate the growing indebtedness of the community in another form. Of late years, it seems, while Great Britain has been paying off as a nation seven or eight millions of debt a year, the local authorities have been borrowing from fifteen to twenty millions a year. As the journal quoted remarks, this is certainly a reason for not relaxing the national debt, since the credit of the nation tends to be weakened by local borrowing. Another special reason for paying off the debt is found in the fact that a considerable portion of the national revenue is derived from taxes on capital, and thus the capital of the nation is being diminished through the operations of the national exchequer. Looking at all the circumstances, the "Gazette" says, it is most unsatisfactory, to say the least, that hardly any part of the national revenue is now being applied to reduce debt, except what is derived from taxes on capital.

**NATIONAL BANK CIRCULATION.**—Mr. Knox, the Comptroller of the Currency, made (October 10), at the Bankers' Convention, a suggestion which has, at least, the merit of novelty, and will probably be found to have others on further discussion. In view of the approaching disappearance of the United States bonds, on which the currency of the national banks is now based, and the strong probability that in the near future no State will have any outstanding bonds worth mention for this purpose, he proposes that the banks should be allowed to deposit the securities of certain foreign governments—such as English consols, French and Italian rentes, which are very certain not to be paid off within any period we need think about, and are at the same time perfectly safe and can always be disposed of in open market. The use of them, too, would save us the necessity of troublesome legislation, and remove one debatable and not easily settled question from our politics. The easiest bond to manage is, undoubtedly, somebody else's bond, if it is perfectly safe.  
—*New York Evening Post.*

## NEW BANKS, CHANGES, FAILURES, ETC.

**New National Banks.**—The Comptroller of the Currency furnishes the following statement of National Banks organized since our last report:

(Names of officers and further particulars regarding new National Banks will be found under their proper State headings in this list.)

- 3042—First National Bank, Elizabethtown, Kentucky. Capital, \$75,000.
- 3043—First National Bank, Petersburg, Illinois. Capital, \$50,000.
- 3044—Second National Bank, Clarion, Pennsylvania. Capital, \$50,000.
- 3045—First National Bank, Shamokin, Pennsylvania. Capital, \$100,000.
- 3046—Hill County National Bank, Hillsboro, Texas. Capital, \$50,000.
- 3047—First National Bank, Watkins, New York. Capital, \$50,000.
- 3048—First National Bank, Griswold, Iowa. Capital, \$50,000.
- 3049—First National Bank, Cherokee, Iowa. Capital, \$50,000.
- 3050—First National Bank, San Diego, California. Capital, \$50,000.
- 3051—National Bank of Brookville, Brookville, Pennsylvania. Capital, \$50,000.
- 3052—Third National Bank, Lexington, Kentucky. Capital, \$100,000.
- 3053—First National Bank, Rockford, Iowa. Capital, \$50,000.
- 3054—First National Bank, Phoenix, Arizona. Capital, \$50,000.
- 3055—Red Oak National Bank, Red Oak, Iowa. Capital, \$100,000.
- 3056—Consolidation National Bank, San Diego, California. Capital, \$100,000.
- 3057—First National Bank, Minden, Nebraska. Capital, \$50,000.
- 3058—State National Bank, Denison, Texas. Capital, \$100,000.
- 3059—First National Bank, North Bend, Nebraska. Capital, \$50,000.
- 3060—Jones National Bank, Seward, Nebraska. Capital, \$50,000.

### ALABAMA.

**MONTGOMERY.**—First National Bank; W. L. Chambers, Cashier, in place of S. Molain.

### ARIZONA.

**PHOENIX.**—First National Bank has been authorized to commence business. Capital, \$50,000. President, Samuel A. Murphy; Cashier, William Christy.

### CALIFORNIA.

**SAN DIEGO.**—Bank of Southern California; now First National Bank. Capital, \$50,000. President, Jacob Gruendike; Cashier, C. R. Thomas.

Consolidation National Bank of San Diego succeeds Consolidated Bank. Capital, \$100,000. President, Oliver Spencer Witherby; Cashier, Bryant Howard.

### COLORADO.

**LEADVILLE.**—Carbonate Bank has been recently established. Capital, \$100,000. President, David H. Dougan; Cashier, John L. McNeil.

**SOUTH PUEBLO.**—South Pueblo National Bank; M. Sheldon, President, in place of H. L. Holden; L. T. Holden, Assistant Cashier.

## CONNECTICUT.

EAST HADDAM.—National Bank of New England; Julius Attwood, President, in place of T. Gross, Jr.; Thomas Gross, Jr., Cashier, in place of A. H. Dayton.

HARTFORD.—Hartford Trust Co.; William Faxon, President, deceased.

SHARON.—Reed, Bates & Co.; E. B. Reed succeeds.

WINSTED.—First National Bank; D. Strong, President, in place of E. E. Gilman; L. R. Norton, Vice-President, in place of D. Strong.

## DAKOTA.

EGLENDALE.—Dickey County Bank; suspended.

MANDAN.—Northern Pacific Bank is reported here. President, Elbridge C. Cooke; Cashier, Charles E. Meech.

MENO.—Hutchinson County Bank is reported here. Capital, \$50,000. President, M. H. Rowley; Cashier, W. S. Sinclair.

## DISTRICT OF COLUMBIA.

WASHINGTON.—Bateman & Co.; A. E. Bateman admitted to New York Stock Exchange.

## FLORIDA.

PENSACOLA.—F. C. Brent; capital increased from \$40,000 to \$60,000.

## GEORGIA.

FORSYTH.—Bascomb Myrick, D. J. Proctor, and Charles J. Zellner have formed a copartnership under style of Myrick, Proctor & Co.

## IDAHO.

GALENA.—I. Morris & Co. are reported here.

## ILLINOIS.

CHENOA.—Bank of Chenoa; suspended.

GRIGGSVILLE.—Griggsville National Bank; Benjamin Newman, President, in place of J. McWilliams; W. H. Yates, Vice-President, in place of B. Newman.

PETERSBURG.—First National Bank succeeds John A. Brahm. Capital, \$50,000. President, John A. Brahm; Cashier, James M. Robbins.

TAYLORVILLE.—W. W. Anderson & Co.; dissolved.

## IOWA.

CHEROKEE.—First National Bank succeeds Scribner, Burroughs & Co. Capital \$50,000. President, Nelson T. Burroughs; Vice-President, W. A. Sanford; Cashier, Roderick H. Scribner.

EXIRA.—Bank of Exira; L. E. Born, President, in place of J. B. Henshaw.

GARDEN GROVE.—C. L. Stearns & Bro. are reported here.

GRISWOLD.—First National Bank succeeds Bank of Griswold. Capital, \$50,000. President, Theo. H. Brown; Assistant Cashier, Frank L. Brown.

NEVADA.—W. H. Gallup is reported here.

OSKALOOSA.—Oskaloosa National Bank; W. H. Seevers, President, in place of W. E. Cutts.

RED OAK.—Red Oak National Bank has been authorized to commence business. Capital, \$100,000. President, Justus Clark; Cashier, Paul P. Clark.

ROCKFORD.—First National Bank succeeds Mathews & Lyon. Capital, \$50,000. President, Orlo H. Lyon; Cashier, Harry A. Merrill.

ROCK VALLEY.—H. H. Case, formerly at Caseville, Michigan, is now located here.

## KANSAS.

AXTELL.—Exchange Bank is reported here. Proprietors, Cane Brothers.

BURR OAK.—J. B. Wilbur & Co. are in business here.

ERIE.—Will T. Allen, formerly of Sullivan, Ind., has formed a partnership with J. M. & R. N. Allen, under style of Allen & Allen.

LEAVENWORTH.—Leavenworth National Bank; John Nilson, Vice-President.

OLATHE.—Hunt, Arnott & Co. (Bank of Olathe); succeeded by Miller, Ott & Co.

#### KENTUCKY.

CYNTHIANA.—National Bank of Cynthiana; no Vice-President in place of J. McKee.

ELIZABETHTOWN.—First National Bank has been authorized to commence business. Capital, \$75,000. President, J. W. Hays; Cashier, J. S. Grimes.

LEXINGTON.—Third National Bank has been authorized to commence business. Capital, \$100,000. President, John W. Berkley; Cashier, O. L. Bradley.

NEWPORT.—First National Bank; Samuel C. Wendt, Assistant Cashier.

PRINCETON.—L. M. Longshaw; assigned.

#### MAINE.

ORONO.—Orono National Bank; Samuel Libbey, President, in place of E. Webster.

#### MASSACHUSETTS.

ATTLEBOROUGH.—Attleborough National Bank; A. Chisholm, Assistant Cashier.

BOSTON.—Boston Stock Exchange; H. W. Dodd, Vice-President, in place of Francis V. Parker. Other officers unchanged.

#### MICHIGAN.

ADRIAN.—Smith & Tobey; succeeded by T. J. Tobey & Co.

ALMA.—Turck, Winton & Co.; W. S. Turck & Co. succeed.

CASEVILLE.—H. H. Case; removed to Rock Valley, Iowa.

HANOVER.—H. N. Rowley is in business here. Style, Hanover Bank.

IONIA.—Second National Bank; no Cashier in place of V. Van Vleet.

PLYMOUTH.—First National Bank; Geo. A. Starkweather, President, in place of E. J. Penniman; no Vice-President in place of G. A. Starkweather.

QUINCY.—First National Bank; C. L. Trusdell, Cashier, in place of J. W. McCausey.

UNION CITY.—Union City National Bank; J. W. McCausey, Cashier, in place of C. T. Allen.

#### MINNESOTA.

MINNEAPOLIS.—Scandia Bank of Minneapolis; applied for State charter. Paid-up capital, \$60,000. President, R. Sunde; Vice-President, Anthony Kelly; Cashier, A. C. Hangan.

**ULYSSES.**—Ulysses State Bank; succeeded by North-Western Banking Co.

**SEWARD.**—Jones National Bank has been authorized to commence business. Capital, \$50,000, President, Claudius Jones; Assistant Cashier, Edward O'Keefe.

## NEW HAMPSHIRE.

**CONCORD.**—Ex-Senator Rollins and son are about to engage in banking business here.

## NEW MEXICO.

**LORDSBURG.**—Hart Brothers are reported here.

## NEW YORK.

**ALBANY.**—First National Bank; Matthew H. Read, President, deceased.

**BINGHAMTON.**—Binghamton Savings Bank; Charles Watson Sanford, President, deceased.

**BROOKLYN.**—Brooklyn Savings Bank; Henry P. Morgan, President, in place of Hosea Webster.

**CAMPBELL.**—George R. Sutherland; succeeded by Bank of Campbell. No change in management.

**ITHACA.**—First National Bank; Josiah B. Williams, President, deceased.

**NEW YORK CITY.**—A. E. Bateman (Bateman & Co., Washington, D. C.); admitted to Stock Exchange.

A. Campbell & Co.; Alexander Campbell deceased.

De Jonge & Co.; dissolved. Max Herzog and Fitch W. Smith form a partnership, with S. De Jonge as special, under same style. Special capital, \$100,000.

Wm. Fitch & Co.; dissolved. Fitch & Lorillard succeed. Partners—William Fitch, Louis Lorillard.

Fliess & Hoy; dissolved; Hoy & Gibert succeed. Partners—Robert T. Hoy, F. E. Gibert.

P. W. Harding & Co.; Eugene D. Hays admitted to firm.

Wm. Heath & Co.; Thomas E. Davis admitted as a partner in London firm, in place of William Russell Wise, retired.

Kelley & Little; Albert Kelley and Wm. C. Little are in business at 37 and 39 Wall street under above style.

Lapeley & Gallup; Latham G. Reed contributes \$25,000 as special capital.

Leopold Cahn & Co.; J. S. Bache admitted to Stock Exchange.

Scranton & Willard; dissolved, Gerard B. Scranton retiring. Remaining partners continue under style of E. K. Willard & Co.

Stout & Co.; dissolved by death of A. V. Stout, special partner. General partners continue under same style.

**UTICA.**—T. O. Grannis & Co.; dissolved. C. K. Grannis and Geo. Curtis continue under same style.

**WATKINS.**—First National Bank succeeds Schuyler County Bank. Capital, \$50,000. President, Josiah D. Payne; Cashier, Edgar S. Payne.

## OHIO.

**AKRON.**—City National Bank; John F. Uhler, not Ohler, Cashier

**CANAL DOVER.**—Exchange Bank; capital increased to \$100,000.

**GENEVA.**—First National Bank; A. J. Ford, President, in place of H. S. Munger.

**KINGSTON.**—Scioto Valley Bank has been established. Capital, \$30,000. President, James May; Cashier, H. F. Moore.

**MIDDLEPORT.**—Moore & Co. are reported here. Capital, \$8,000. Cashier, F. L. Moore.

**YOUNGSTOWN.**—Commercial National Bank; Mason Evans, Cashier, in place of G. J. Margerum.

## PENNSYLVANIA.

**BRADFORD.**—Bradford National Bank; no Cashier in place of J. F. Merrill; T. H. Tomlinson, Assistant Cashier.

**CLARION.**—Second National Bank succeeds the Discount and Deposit Bank. Capital, \$50,000. President, James T. Maffett; Cashier, M. Myers.

**MERCER.**—First National Bank; C. S. Burwell, Cashier, in place of W. C. Alexander.

**PHILADELPHIA.**—Union National Bank; W. H. Carpenter, Cashier, in place of P. A. Keller.

**SCOTSDALE.**—Scottdale Bank; Henry McClay, Cashier, in place of J. M. Stauffer.

**SHAMOKIN.**—Shamokin Banking Co.; succeeded by First National Bank. Capital, \$100,000. President, Conrad Graeber; Cashier, George C. Graeber.

**ZELLENOPLE.**—N. Dambach & Son; succeeded by Amos Lusk.

## RHODE ISLAND.

**PROVIDENCE.**—National Exchange Bank; N. Sheldon, President, in place of H. L. Kendall.

## SOUTH CAROLINA.

**CHARLESTON.**—First National Bank; William E. Breese, Cashier, in place of W. C. Breese; no Assistant Cashier in place of W. E. Breese.

## TENNESSEE.

**KNOXVILLE.**—East Tennessee National Bank; R. S. Payne, Vice-President, in place of W. W. Woodruff; F. L. Fisher, Cashier, in place of J. L. Glover.

## TEXAS.

**DENISON.**—State National Bank has been authorized to commence business. Capital, \$100,000. President, Jesse Newport Johnson; Cashier, Wilnot Saeger.

**GAINESVILLE.**—Gainesville National Bank; C. Chambers, Acting Cashier.

**HILLSBORO.**—Hill County Bank (C. E. Phillips); now Hill County National Bank. Capital, \$50,000. President, J. H. Bemis; Cashier, C. E. Phillips.

## VERMONT.

**FAIR HAVEN.**—First National Bank; Zenas Clark Ellis, President, deceased.

## ONTARIO.

**STRAATHROY.**—Alexander Johnston; closing.

**ST. THOMAS.**—Merchants' Bank of Canada; William Pringle, Manager, in place of J. Pottinger.

## QUEBEC.

**HUNTINGDON.**—Somerville & Co.; succeeded by Huntingdon County Bank. Manager, Andrew Somerville.

**MONTREAL.**—Exchange Bank of Canada; suspended.

## NOVA SCOTIA.

**NORTH SYDNEY.**—Bank of Nova Scotia; Daniel Waters, Agent, in place of T. D. Archibald.

## MANITOBA.

**EMERSON.**—Ontario Bank (Branch); discontinued.

---

## BANKERS' OBITUARY RECORD.

---

**Curtis.**—Joseph Curtis, a prominent citizen of Rochester, N. Y., and President of the "Union and Advertiser" Company and of the Monroe County Savings Bank, died September 14, from the effects of a paralytic stroke received while in London a few years ago.

**Campbell.**—Alexander Campbell, senior partner of the firm of A. Campbell & Co., bankers and brokers, New York, died September 15, aged 63 years. His decease occurred at Richfield Springs, whither he had gone in search of health. Mr. Campbell was born in Philadelphia, and received his business education in the banking house of Thomas Biddle & Co. While yet a young man he was appointed Secretary of the Philadelphia, Wilmington & Baltimore Railroad Company, and at the age of 33 years he came to New York and established the well-known firm of Ward, Campbell & Co., bankers and brokers. When this firm went into liquidation about a year ago, he associated his son with him in the present firm of A. Campbell & Co. Mr. Campbell was one of the oldest members of the Stock Exchange, and had been Treasurer of the Gratiuity Fund since it was created.

**Ellis.**—The Hon. Zenas Clark Ellis, President of the First National Bank of Fair Haven, Vt., died September 26, aged 63 years. He was born and always resided in Fair Haven. He was made a Director of the above bank on its first organization in 1864, and became its President in March 1878.

**Faxon.**—William Faxon, President of the Hartford (Conn.) Trust Company, died suddenly of heart disease on September 19. The deceased was one of the best known business men in Connecticut. He was born in West Hartford 62 years ago, and began life in a newspaper office. He at one time owned the Hartford "Courant," and was at times connected with various other newspapers. For eight years he was Assistant Secretary in the Navy Department under Secretary Wells. In 1878 he was appointed Bank Commissioner of Connecticut, and held the position two terms. He was elected President of the Hartford Trust Company in April, 1881, and at the time of his death he also held several other positions of trust.

**Read.**—Matthew H. Read, President of the First National Bank, of Albany, N. Y., died September 7, at the age of 79 years. He for many years carried on a flour and grain business in Albany, and was at one time President of the Board of Trade. At the time of his death he had been President of the First National Bank for fifteen years. He was also one of the few surviving charter trustees of the National Savings Bank, and a Director of the Commerce Insurance Company.

**Sanford.**—The officers of the Binghamton (N. Y.) Savings Bank send a copy of a minute passed in memory of the late President, Charles Watson Sanford, who died on July 30 last, in the 76th year of his age. He was one of the oldest and most active members of the Board, having been a Trustee for over sixteen years, and President for the past ten years. They pay a high tribute to his faithfulness as an officer and their regard for him as a man.

**Truax.**—Major E. A. Truax, book-keeper of the National Branch Bank and a prominent Presbyterian, of Madison, Ind., died very suddenly at midnight, September 6, of heart disease. He was Paymaster in the late war, and was well and favorably known at Cincinnati and in the West. He was 56 years old, and leaves a wife and three grown children.

**Williams.**—Josiah B. Williams, President of the First National Bank of Ithaca, New York, died September 26, 1883, at the age of 73 years. He was one of the most enterprising and able men in business and public affairs in his district. Besides holding the above position he was a Trustee of Cornell University, a Trustee of the United States Trust Company, and a Director of national banks in New York and Albany. During his eventful career, Mr. Williams was identified with many of the political and business interests of the State.

## RAILROAD AND INVESTMENT NEWS.

(A synopsis of information regarding Railroad and other Corporation affairs of interest to Bankers, Investors, &c. *Classification*: I. New Issues. II. Reports. III. Miscellaneous Investment News.)

### I. NEW ISSUES.

**ROCHESTER AND PITTSBURGH.**—The entire amount of \$1,400,000 of consolidated first mortgage bonds was recently awarded to New York persons at 90 and accrued interest. Bids to the amount of \$1,900,000 were received, ranging from 85 to 90.

**NEW YORK AND PHILADELPHIA.**—A collateral trust indenture for \$2,800,000 has been filed in the Recorder's office at Erie, N. Y., by the Buffalo, New York & Philadelphia road, in favor of the Union Trust Company of New York. It represents the two mortgages which were issued for the construction of the Oil City & Chicago and the Olean & Salamanca, the former being for \$1,600,000 and the latter for \$1,200,000. At the time of the merger of the roads with the Buffalo, New York & Philadelphia, the new mortgage was issued to cover the amount. It is represented by 1,000 six per cent gold bearing interest bonds, due in forty years.

**ATCHISON, TOPEKA & SANTA FE.**—It is reported from Boston that 23,000 shares of this stock, of the par value of \$2,300,000, have been transferred to Baring Bros. & Co. of London, for investment purposes.

**NEW YORK CITY.**—Comptroller Grant recently accepted bids for \$1,000,000 city revenue bonds at 3 per cent., and could have disposed of more at the same rate.

The Sinking Fund Commissioners have resolved, that the bonds authorized to be issued by chapter 490 of the Laws of 1883, and entitled "Additional water stock of the city of New York," shall be free from city and county taxation, pursuant to the provision contained in section 34 of said act.

**CENTRAL OF NEW JERSEY.**—The Directors at a meeting held on September 10, authorized an issue of debenture bonds to take up the income bonds, in accordance with a plan previously accepted by the holders of the latter. A new debenture bond is to be issued in place of the income, drawing interest from May 1 last at 6 per cent. and running for 25 years. The company cannot issue any stock until 1885, but after that time the bonds will be convertible into stock. Eleven of the bonds will be issued for ten of the income bonds. The income bonds drew 7 per cent. when earned or any part thereof, but no interest has been paid on them during the five years they have run. They expire in 1908, but could be taken up before that date. The extra bond is to make up for back interest.

**THE WEST SHORE AND ONTARIO TERMINAL COMPANY,** a corporation existing under the laws of the State of New Jersey, obtained on September 22 a loan of \$12,000,000 upon its franchises, rolling stock, &c., in lieu of which the company has issued to the Central Trust Company, as Trustee, first mortgage bonds of the denomination of \$1,000 each, payable Aug. 1, 1923. As security for the loan the corporation has executed a trust deed transferring all of its interests and equipments to the Central Trust Company.

**MEXICAN CENTRAL RAILWAY.**—The Trustees of this company recently received a requisition for \$3,000,000 of the mortgage bonds of the company, which have been

recently placed among parties in this country as collateral for a loan of \$2,000,000. The transaction, embracing the above amount, was consummated some time ago.

**GEORGIA PACIFIC RAILROAD.**—The stockholders have authorized the President and Board of Directors to issue second mortgage bonds on the company's line from Atlanta to Birmingham, and from the latter place to Coalburg, for an amount not to exceed \$15,000 per mile.

**TENNESSEE BONDS.**—Up to September 1 the Funding Board receipted for State bonds valued at \$1,500,000, and issued new bonds to the amount of \$900,000. Fully one-half of the amount received are railroad bonds, and the other half are State debt proper bonds. The Controller says there is a misapprehension on the part of the public with reference to the law pertaining to the funding of the railroad bonds. The holder of a thousand-dollar bond imagines that when he comes to have it funded under the present law he will only receive about \$500 for it. The Controller says the law does not deduct the war interest from railroad bonds, while it does deduct the war interest from State debt proper bonds. Hence, instead of the holder receiving only about \$500 for his railroad bond he receives about \$750. The law under which war interest is deducted from the State debt proper bonds provides that such part of the debt as now bears interest at the rate of 6 per cent. per annum shall be funded by adding to the sum of the face of the existing bond the matured interest thereon evidenced by the coupons attached thereto, including the coupons maturing 1883, and from the total sum of the face of the bonds and matured interest thereon, evidenced by the coupons attached, 24 per cent. will be deducted, and the remainder funded in coupon bonds bearing interest at the rate of 6 per cent. per annum.

Those desiring to fund Tennessee bonds under the recent act of the Tennessee Legislature can apply to the American National Bank of Nashville, who will make special rates for large amounts, attend to exchanging for the new bonds, etc.

**LONG ISLAND CITY.**—New York was authorized by the last Legislature to issue bonds for its floating indebtedness amounting to \$261,000. The Common Council determined on the issue, but the vote on the question was disputed. Bids were called for, however, and offers for only \$2,000 were received up to September 20, when the stated time expired.

**CITY OF ELIZABETH, N. J.**—The exchange of the old defaulted bonds for the new 4 per cent. forty-year bonds of this city is now going on at the Mercantile Trust Company of New York. The attempts recently made by private individuals to induce the over-burdened city to pay its obligations dollar for dollar having failed, many holders of the defaulted bonds are availing themselves of the proposition which was submitted sometime ago through President Fitzgerald, of the Mercantile Trust. That proposition allowed the holders of the old bonds 50 per cent. of their claims, the interest on their bonds to be figured up to July 1, 1882. The new 4 per cent. bonds are issued to take up the old ones on this basis.

**PHILADELPHIA AND READING RAILROAD.**—It is stated that this company will offer its consolidated 5 per cents for the outstanding income bonds. There are 2,000,000 of these, and until they have been redeemed the company cannot make a dividend. When they are controlled again by the company the covenant in them providing for redemption will be removed, and shareholders will be privileged to subscribe for them and receive a cash dividend.

**THE KANSAS CITY, FORT SCOTT AND GULF RAILROAD COMPANY,** anticipating a large increase in its business upon the completion of its Memphis extension, has determined to issue \$525,000 worth of 6 per cent. equipment bonds to its stockholders at 25 per cent., payable in installments as called for, but not more than 25 per cent. at one time. A subscription right attaches to each 100 shares of Fort Scott stock, and the subscription closes October 3. The road has a right to call the bonds at 10 per cent.

**SECURITIES LISTED AT THE NEW YORK STOCK EXCHANGE.**—At a meeting of the Governing Committee on September 26, being the first since the summer vacation, the following business was transacted:

The application of the Canada Southern Railway to have \$6,000,000 second mortgage bonds listed was granted. These bonds have 31 years to run and bear 5 per cent. interest.

The change of name of the Elizabeth City and Norfolk Railroad Company to the Norfolk Southern Railroad was ordered to be noted on the records of the Stock Exchange.

The first mortgage bonds of the Shenandoah Valley Railroad Company, from No. 1 to No. 2,270, inclusive, amounting to \$2,270,000, were listed. These are 7 per cent. bonds which mature January 1, 1909, and the interest coupons are payable semi-annually in either Philadelphia or London. They are secured by a deed of trust to the Fidelity Insurance Trust and Safe Deposit Company, by the terms of which bonds are issuable at the rate of \$15,000 for each mile of completed single track, and \$10,000 additional for each mile of double track. The last financial statement (May 31, 1888) of the Shenandoah Valley Road shows the assets of the company to be \$12,881,867.49. Also were listed of the same company general mortgage bonds Nos. 1 to 6,212 inclusive, and income bonds Nos. 1 to 2,500 inclusive.

## II. REPORTS.

**NORTHERN PACIFIC RAILROAD.**—The report of President Henry Villard for the year ended June 30, 1888, is prefaced by the announcement of the completion of a continuous line from Lake Superior to the Pacific Ocean. The two ends of track actually met on August 22d, but the formal opening did not take place until September 8. During the year covered by the report the Syndicate had taken \$20,000,000 of the general mortgage bonds, and on June 30 the entire option for 1883 was declared; all the bonds could not be delivered, however, as a sufficient mileage had not been accepted.

The excess of expenditures on account of construction and equipment (\$7,966,507) over the cash receipts from the proceeds of the \$40,000,000 general mortgage bonds, sales of preferred stock, etc., arose from several causes. The cost of construction exceeded the estimates; three great bridges were required; and the traffic and construction required more motive power and rolling stock than was expected. Up to June 30, \$9,250,536 of the original \$57,000,000 of preferred stock was canceled from the proceeds of land sales east of the Mississippi River.

Following is a comparative statement of the earnings, the mileage for 1882-3 being 1,701, against 1,296 in the previous year:

|                                                | 1882-3.      |     | 1881-2.      |
|------------------------------------------------|--------------|-----|--------------|
| Total gross earnings.....                      | \$7,855,459  | ... | \$5,430,305  |
| Total operating expenses.....                  | 5,336,939    | ... | 3,572,839    |
| Net earnings.....                              | \$2,518,520  | ... | \$1,857,466  |
| Stock and bonds at the end of the fiscal year: |              |     |              |
|                                                | 1882-3.      |     | 1881-2.      |
| Common stock.....                              | \$49,000,000 | ... | \$49,000,000 |
| Preferred stock.....                           | 41,749,464   | ... | 41,909,132   |
| Funded debt.....                               | 36,522,200   | ... | 24,616,500   |

**CINCINNATI, INDIANAPOLIS, ST. LOUIS AND CHICAGO RAILWAY.**—The report for the year ended June 30, 1888, says that the road suffered a large decrease in earnings from the breakage of the line by floods, and light shipments of corn. The July dividend had, therefore, to be passed. Following is a comparative statement of the earnings on the 362 miles operated:

|                                   | 1882-83.    |     | 1881-82.    |
|-----------------------------------|-------------|-----|-------------|
| Total gross earnings.....         | \$2,617,457 | ... | \$2,525,991 |
| Operating expenses and taxes..... | 1,643,805   | ... | 1,525,382   |
| Net earnings... ..                | \$973,652   | ... | \$1,000,609 |
| Summary of income account:        |             |     |             |
|                                   | 1882-83.    |     | 1881-82.    |
| Net earnings.....                 | \$973,652   | ... | \$1,000,609 |
| Total disbursements.....          | 938,501     | ... | 968,068     |
| Balance, surplus.....             | \$65,151    | ... | \$42,541    |

Of these disbursements, \$621,150 were for interest on bonds, against \$591,326 in the

previous year; and \$315,000 for dividends (4½ per cent.), against \$308,000 (6 per cent.) in the previous year.

**Stock and bonds :**

|                  | 1882-83,    | 1881-82,    |
|------------------|-------------|-------------|
| Stock.....       | \$7,000,000 | \$7,000,000 |
| Funded debt..... | 7,633,287   | 7,488,650   |

**ST. PAUL, MINNEAPOLIS & MANITOBA RAILWAY.**—The report for the year ended June 30, 1883, shows that, in addition to a large amount of new equipment purchased, the old equipment was rebuilt and repaired. The double track to accommodate the business of the Breckenridge division, and the summer to Lake Minnetonka, between Minneapolis and Wayzata, was completed and put in operation in July, 1883. The replacement of iron with steel rails between St. Paul and St. Vincent was completed, and is progressing on other parts of the lines. Various extensions were completed, making the mileage operated at the end of the fiscal year 1,350, against 1,068 in the previous year.

**Comparative statement of earnings:**

|                               | 1882-83,    | 1881-82,    |
|-------------------------------|-------------|-------------|
| Total gross earnings.....     | \$9,148,524 | \$6,629,604 |
| Total operating expenses..... | 4,595,066   | 3,515,778   |
| Net earnings.....             | \$4,553,468 | \$3,113,916 |

**Summary of income account :**

|                          | 1882-83,    | 1881-82,    |
|--------------------------|-------------|-------------|
| Total income.....        | \$5,459,519 | \$4,008,852 |
| Total disbursements..... | 3,802,888   | 3,023,787   |
| Balance, surplus.....    | \$1,656,631 | \$985,065   |

**Stock and bonds :**

|------------------|--------------|--------------|
| Stock.....       | \$20,000,000 | \$15,000,000 |
| Funded debt..... | 20,791,720   | 18,646,000   |

### III. MISCELLANEOUS INVESTMENT NEWS.

**RICHMOND AND DANVILLE.**—At a general meeting of the stockholders held at Richmond September 12, a proposition to increase the capital stock of the company from \$5,000,000 to \$7,000,000 was unanimously defeated. The promoters of the scheme, it is stated, did not appear. On the motion of Mr. George S. Scott, of New York, who stated that he held three-fifths of the whole Danville stock and represented a majority, John A. Rutherford, M. B. Brown, and R. Baring Gould, all of New York, were displaced as Directors of the Danville Company, and H. C. Fahnestock, Gen. Samuel Thomas, and John McAnerney were elected as their successors.

The bankers, merchants and capitalists of Norfolk held a meeting on September 13, and resolved to subscribe whatever sum was necessary to build a railroad to bring the Richmond and Danville system of roads into Norfolk.

**PHILADELPHIA.**—The annual report of City Comptroller Page, recently completed, sets forth that the appropriations for 1883 were \$14,920,457, and the estimated expenses for the coming year \$17,735,484. The valuation of property in the city is \$583,612,683. He recommends the adoption of a rate of \$1 80 on the \$100. During 1883 a rate of \$1 85 on the \$100 yielded \$8,339,520 79; but he says a tax of \$1 80 for 1884 will produce \$301,044 22 in excess of that, owing to the advance of \$12,129,428 in the valuation of taxable property. The Comptroller felicitates his fellow-citizens upon the improvement of the city credit: "These gratifying results have been brought about by the untiring conscientious labors of Councils, the operation of the Act of June 11, 1873, limiting expenditures, an increasing sense of official responsibility, and the awakened interest of the people in city affairs, demanding strict accountability in public place. As a rule, a greater intelligence in administration is seen on all sides, and the business of the city is each year being brought more and more upon a business basis and under business principles." The Common Council fixed the tax rate at \$1 85 per \$100.

**NEW ORLEANS.**—Annual statements of the commercial year ending August 31, show a healthy condition of the trade of the city and an increase of business in almost all branches. The export trade has been largely augmented, being \$27,045,082 in ex-

cess of that of last year, while the imports have decreased to \$1,579,837. The articles chiefly contributing to the increase of exports are cotton, corn and wheat. The value of the cotton exported is \$11,474,742 more than last year. The exports of corn were 6,897,788 bushels, valued at \$4,365,875, against 827,870 bushels, valued at \$655,661, last year. During the year 6,849,770 bushels of wheat, valued at \$7,458,961, were exported, against 1,384,758 bushels valued at \$1,705,247 last year.

CHARLESTON.—“The News and Courier’s” annual review of the trade and commerce of Charleston, for the year ended September 1, shows that a business of \$75,000,000 has been done, and a large number of new undertakings of different kinds have been started. Local manufacturers employed 6,500 persons, and the value of their productions was over \$9,250,000. The phosphate and fertilizer business has been the largest ever known, the amount of Carolina phosphates exported and manufactured being 350,000 tons. The exports of cotton and naval stores have been the largest ever recorded, with one exception. The city debt has been reduced, and the value of city property has increased from 20 to 140 per cent. during the year. A full statement of the cotton mills in the State shows that 4,500 persons were employed, and that the value of the annual product was \$6,000,000. Special reports from the whole State show that corn and cotton are not likely to exceed two-thirds of a crop.

CALIFORNIA RAILWAYS.—In a series of tax cases brought against the Central Pacific Railway Company by several counties, the court rendered a decision on September 17, that under the new State Constitution the railroad companies shall only be taxed on the value of their property after deducting the amount for which they are mortgaged. In another case, involving the right of railroad commissioners to regulate the fares and freight on steamers and on other vessels hailing from Californian ports, Judge Field decided that all sea-going vessels were under the jurisdiction of the United States and outside of the control of individual State governments.

VIRGINIA.—An important decision was rendered at Richmond on September 4, by Judge Bond of the United States Circuit Court, concerning the State debt. After a decision was rendered by the United States Supreme Court last spring in the Virginia debt case, counsel for foreign bondholders of London, through their attorneys, William and Royal, of New York, instituted a number of suits in the Circuit Court of the United States at Richmond, to test the conclusions which Mr. Royal insisted that decision led to.

Judge Bond has now decided these cases. He holds: First, that a tender of coupons for taxes is a legal tender, that all consequences which flow from any other legal tender flow from this, and that this is the effect of the Supreme Court decision; second, that officers of the State will be enjoined from levying on a taxpayer’s property after a tender of coupons has been made; third, that as the questions in these suits depend upon the constitutionality of the State’s legislation, the suits arise under the Constitution, and that Circuit Courts of the United States have the jurisdiction of them, without regard to the citizenship of the parties. Judge Bond’s jurisdiction extends over the entire State. If his decision is not reversed, it would seem that the State can collect no more revenue until she provides for the coupons.

A WELL EQUIPPED ROAD.—“Is your railroad well equipped?” Railroad President —“Well equipped! I should say it was. Splendidly equipped, sir, splendidly. For instance there are our first mortgage evens, and our second mortgage sixes, and our equipment bonds, and our land grant bonds, and our common stock, and our preferred stock, and the biggest floating debt of any road in the country. We’ve got the finest lobby that any corporation can show; a perfect daisy, sir. If you know of a road that’s better equipped than ours is, name it, sir, name it, if you please.”—*Boston Transcript*.

---

#### CANADIAN NEWS.

THE EXCHANGE BANK OF CANADA, at Montreal, became embarrassed recently and on September 15, the Directors determined to suspend payment temporarily. The bank continued to partially redeem its circulation, paying one-half in gold to each holder, until, on September 24, it stopped entirely. The direct cause of the suspension is stated to be that a large portion of the capital was loaned to a few private

enterprises, and other banks were not willing to help the bank out of its difficulty, on account of the way in which its business had been conducted. Numbers of rumors were started, after the suspension, that other concerns were in difficulty, but they have proved untrue, and late accounts indicate that the troubles of the Exchange Bank arose from mismanagement, and that its shareholders will be the principal sufferers. According to the statement of September 1, its paid-up capital was \$500,000; reserve, \$300,000; notes in circulation, \$467,385; total liabilities, \$2,868,884; total assets, \$3,779,493. The statement showed Directors' liabilities to be only \$19,133, but a report comes on October 4, that Thomas Craig, the President, had made advances to himself, amounting to \$150,000 to \$250,000.

**MONTHLY BANK STATEMENT.**—The statement of the banks in Canada at the close of August presents several changes of more or less importance in the accounts that in the main are of a favorable character. The circulation (\$32,118,912) increased only \$25,000, and at the close of the month was less than on June 30. The lack of expansion is to be attributed wholly to the late period at which the harvest is being reaped this season, but in the present month and until the close of navigation currency will flow out freely from banks for the purchase of the crops. The normal circulation of the country appears to be now about \$32,000,000, while six years ago it was not more than twenty-one to twenty-two millions. The foreign exchange accounts are hardly so favorable, the net balance due to Canadian banks being \$14,744,606, against \$14,973,295 at the close of August; it is proper to add, however, that the specie and Dominion notes reserve was increased nearly \$800,000 during the month, and that the net balance due from abroad at the close of June was only \$11,855,347, or about \$3,000,000 less than now. Current discounts are down \$308,700, but loans to commercial corporations increased \$713,000, and overdue debts \$259,000 during the month.

**ATTEMPT TO DEFRAUD.**—A report from Winnipeg says that John Woltz, a jeweler, was arrested on September 20 for conspiracy to defraud the branch of the Imperial Bank out of \$13,000. Mr. Andrews, Teller in the bank, became indebted to Woltz for a large sum for diamonds, and it is charged that Woltz induced Andrews to advance \$13,000 of the bank's funds, giving him 23 checks as security. Andrews has left, and is probably over the border.

**RATES OF POSTAGE.**—In view of the large excess of expenditures over revenue on account of the Postal Service, the Dominion Government has decided that for the present it will be impracticable to reduce the rate of postage to a uniform rate with that in operation in the United States. The revenue derived from the Postal Service last year amounted to \$2,022,000, the expenditure being \$2,456,000, or 21 per cent. more than the revenue. A clause in the agreement with the United States provides that the regulations governing the transmission of domestic correspondence are applicable to correspondence exchanged with Canada. Under the operation of this clause after October 1 a two cent stamp will carry a single rate from the United States to Canada, but unless there is some change in the Canadian postal laws a three cent stamp will be required to carry a similar letter from Canada to the United States.

**DOMINION REVENUE AND EXPENDITURES.**—Notwithstanding the large reduction made in customs and excise duties at the last session of Parliament, the surplus in the revenue of the Dominion over expenditures was larger during the fiscal year ending June 30 last than ever before in Canada. The consolidated revenue collected from all sources during the year in round numbers amounted to \$35,880,000, and the expenditures \$23,800,000, leaving a surplus of \$7,080. The surplus last year, at that time the largest known to Canada, was \$6,318,000. The redemption of portions of the 5 and 6 per cent. loans, which was made by deposits in the Post Office Savings Bank bearing 4 per cent. interest, reduced the interest of the national debt over \$150,000. About \$30,000,000 5 per cent. bonds will mature next year, and they will be replaced by 3½ and 4 per cent. bonds, making a further annual saving of about \$325,000 in interest. With regard to the revenue for the current year, there has been a falling off equal to 5 per cent. A larger decline than this, however, was looked for by the Government, owing to the reduction of duties last Spring, the Finance Minister at that time having stated in Parliament that in making his calculations he had allowed for a shrinkage of 8 per cent.

**RENEWAL OF GOVERNMENT LOANS.**—Sir Leonard Tilley, Minister of Finance, recently returned from England, where he went to consult the financial agents of Canada on the best means of renewing certain loans shortly to become due. £6,500,000 will fall due on the 31st December, 1884, against which there stands to the credit of the Sinking Fund about £1,000,000. For these maturing five per cent. securities, it is proposed to substitute debentures bearing respectively four and three and a half per cent. interest. Next November, it is proposed to issue from £1,500,000 to £2,000,000 sterling of 4 per cents to replace debentures maturing at the end of the year 1884, and to bear interest from July, 1883. Next year three and a half per cent. debentures are to be issued to replace the balance of the fives falling due. The four per cents are to be issued before the three and a half. In addition to the renewal of this maturing loan, it is proposed to issue a \$1,000,000 loan, payable in Canada.

The prospectus of the last-mentioned loan of \$4,000,000 of 4 per cent. currency bonds has been issued. The bonds will bear interest from November 1st next, and are redeemable at Ottawa in twenty years. Subscription lists open on Wednesday, Oct. 17th, and close on Saturday, Oct. 20th; tenders to be addressed to the Minister of Finance, Ottawa. Tenders must be made for not less than \$1,000, and in multiples of \$1,000. The object of the loan is partly to provide for the payment of debts maturing or redeemable in the course of the current fiscal year, and partly for expenditure upon public works.

**SWINDLING BY FORGED BILLS OF LADING.**—C. J. Dewey came to Montreal from England, in August, with good references. He ordered large quantities of goods which were shipped to England, Molson's Bank advancing \$25,000 on the bills of lading. He afterwards obtained \$30,000 on bills of lading from the same bank, which it is feared are forged, as he is said to have defrauded persons in New York and Boston to large amounts.

**THE POSTAL SAVINGS BANKS.**—During the month of August the amount deposited in the post-office savings banks of the Dominion was \$495,379; interest placed to the credit of depositors' account was \$55,183; amount withdrawn was \$330,170, and the balance on hand was \$12,244,369. This is the largest amount ever placed to the credit of depositors since the inauguration of the system in 1868.

**NATIONAL BANK STATISTICS.**—Statement of the Comptroller of the Currency on Oct. 1, 1883, showing the amounts of the National Bank Notes and of Legal-Tender Notes outstanding at dates of the passage of the Acts of June 20, 1874, January 14, 1875, and May 31, 1878, together with the amounts outstanding at date, and the increase or decrease.

JOHN JAY KNOX,  
Comptroller of the Currency.

**CEREAL PRODUCTS OF THE UNITED STATES.**—From the special report of Professor W. H. Brewer, of New Haven, on the cereal products of the United States, prepared for the Census Bureau, and just about to be issued, the following information has been compiled: The total production of the six principal cereal grains in the United States for the census year amounts in round numbers to 2,698,000,000 bushels, an average of 53.8 bushels per head of the population, and an increase of over 94 per cent. since 1870. It is an interesting fact that this increase is not chiefly due to the cultivation of new lands in the West and Northwest, but is more largely due to gain in farming regions already occupied in 1870. The tables of production show that the chief gain is in regions for some time in cultivation and on lands ranging in value from \$30 per acre and upward. The grain consumption per capita in the United States is a fraction over 40 bushels, but in Europe it is less than 18 bushels. It is 13 bushels in Austria, 30 in Denmark, 24 in France, 23 in Germany, 20 in Great Britain, 6 in Holland, 9 in Italy, 17 in Russia and 17 in Spain. The crop of five contiguous States, Ohio, Indiana, Illinois, Missouri and Iowa, amounts to over 50 per cent. of all our grain. Most of the grain of the United States is grown in regions where mixed farming is practiced, and on farms of moderate size. By mixed farming, Professor Brewer means the growing of green and grain crops and the production of animals on the same farm. The tables of distribution by topographical features show that the "prairie region" produces over 37 per cent. or about three-eighths of the whole. The "central region" follows. These two produce nearly as much as all the other nineteen topographical divisions into which the country is divided for this investigation. Each of the grains has its largest production at an elevation of between 500 and 1,000 feet above the level of the sea, where over 52 per cent. of the whole product is grown. Over 90 per cent. of the grain of the country is grown between the elevation of 100 and 1,500 feet. The production of bread-grains belongs chiefly to the belt where, owing to winter's cold, comforts are secured only by labor. A little less than 70 per cent. of the whole grain production is in regions where the mean temperature of January is below 30 degrees, and nearly three-fourths where the average for that month is below the freezing point. Over 40 per cent. is produced where the annual temperature is between 45 and 50 degrees; 74 per cent. where it is between 45 and 55 degrees; 84 per cent. where it is between 45 and 70 degrees; and over 91 per cent. where it is between 40 and 60 degrees. Thirty per cent. is produced where the annual rain-fall is between 40 and 45 inches; 60 per cent. where it is between 35 and 45 inches; 85 per cent. where it is between 30 and 50 inches; and 94 per cent. where it is between 25 and 55 inches. Forty-seven per cent. is produced where the mean July temperature is between 75 and 80 degrees; and 86 per cent. where it is between 70 and 80 degrees. In all the greater grain-growing States, except Pennsylvania, more than four-fifths of the grain farms are farmed by their owners. Professor Brewer says that it is very probable, in the light of all our present knowledge, that not less than 80, and probably more than 85 per cent. of the total grain produced in the United States, one year with another, is grown upon farms which are occupied and managed by their owners. The greater portion of the grain is grown on farms of over 100 acres.

## \* THE BANKER'S GAZETTE.

### The Money Market and Financial Situation.

NEW YORK, October 2, 1883.

The present condition of general business and of monetary affairs confirms the predictions heretofore ventured here regarding the outlook. The important crops of the country will yield only fair returns, and for our staple products there is no very sharp demand abroad. The latter fact will prevent the farmers from obtaining high prices for their produce, but consumers generally will reap the benefit of it. In view of the appearance of affairs at the middle of the year, the fairly prosperous condition of the internal trade now is very gratifying. The railroad earnings, in the case of nearly all the companies which report regularly, show an increase over the earnings last year, which, while it does not keep pace with the increase in the mileage, indicates a steady movement of commodities.

The bank clearings, however, indicate that there is a smaller amount of transactions than at this time last year, but very likely this arises from a decrease in speculations pure and simple. During September there were not so many business disasters of note as in August, but the large failures which occurred in New York prove how general it is in these times to grant accommodation on ordinary credit, or by discounting commercial paper to extravagant amounts. The ease with which money can be borrowed tempts many merchants to enter into speculative transactions which very often turn out ill, and sometimes ruinously to their legitimate business. The only remedy is more caution on the part of those who loan the money.

The returns received by Dun's Mercantile Agency show that the business failures in the United States during the quarter just closed numbered 1,808, against only 1,300 in the corresponding quarter of 1882. The aggregate liabilities were 52 million dollars, against only 19 millions in 1882. The number of failures in the first nine months of 1883 was 6,440, against 4,897 in 1882. The aggregate liabilities in the first nine months of 1883 were \$118,000,000, against \$69,000,000 in 1882. A similar increase is shown in the case of Canada. These figures serve as a measure of the effect of the continuous reduction in prices that has occurred for about two years past, from the inflated and speculative prices which prevailed in 1881.

THE FOREIGN TRADE since the beginning of the fiscal year (July 1) has been disappointing to those who see only evil in it unless there is a large excess of exports over the imports, and in fact the export movement of wheat has been remarkably small of late. The total merchandise exports in July were valued at \$52,394,094, against

\* *The financial situation at Boston and Chicago also appears in this department, the reviews being written by the JOURNAL'S correspondents at those cities.*

\$51,617,541 in July, 1882. The imports last July were valued at \$56,860,683, against \$65,804,878 in July, 1882. The full returns for August are delayed, but the exports of breadstuffs in that month were valued at only \$18,816,129, against \$28,951,320 in August 1882. For July and August the total was \$29,083,110, against \$45,419,589 in the corresponding time last year, the falling off being entirely in the item of wheat. On the other hand the exports of provisions in August were valued at 12 millions, against 6½ millions in August, 1882.

These figures do not indicate a probable import movement of coin of any extent, but as we have said before this will depend largely upon the trading in American securities abroad. Money is easy in London, and the Bank of England has reduced its discount rate to 3 per cent. The London "Economist" of September 29th (as appears from the telegraphic report) says: "The market for American securities looks healthier." A previous recent number said: "With regard to the future movements of the American exchanges, these will depend largely on the purchase made of American securities on this side. We find it believed that the public here is beginning to buy such securities. Should these operations continue, their influence on the American exchange would, coincidentally with the movements of produce from the other side, be very strong. But the operations of the investing portion of the public are always most uncertain, especially where securities of this description are concerned. And while it is desirable to note the matter, it is impossible to form any definite opinion as to the effect of it on the American exchange at present."

THE PUBLIC DEBT was reduced \$14,707,229 in September, against 6½ millions in August and 8 millions in July, the increased reduction being due to a decrease in the pension payments. Up to noon on October 2d the 3½ per cent. bonds presented for redemption under the 121st call amounted to \$22,652,050. This call included the 32 millions outstanding of the 8½s. The rapid payment of these bonds, and the accumulation of the revenue, has resulted in the following call, being the 122d.

TREASURY DEPARTMENT,  
WASHINGTON, D. C., September 19, 1883. }

By virtue of the authority conferred by law upon the Secretary of the Treasury notice is hereby given that the principal and accrued interest of the bonds herein below designated will be paid at the Treasury of the United States in the city of Washington, D. C., on the 1st day of December, 1883, and that the interest on said bonds will cease on that day—viz., 3 per cent. bonds issued under the act Congress approved July 12, 1881, and numbered as follows:

- \$50—Original number 972 to original number 1,303, both inclusive.
  - \$100—Original number 6,720 to original number 9,450, both inclusive.
  - \$500—Original number 2,927 to original number 3,977, both inclusive.
  - \$1,000—Original number 18,975 to original number 22,635, both inclusive.
  - \$10,000—Original number 27,040 to original number 28,208, both inclusive.
- Total, \$15,000,000.

As required by the following provision of the authorizing act, viz.: "The last of the said bonds originally issued under this act, and their substitutes, shall be first called in, and this order of payment shall be followed until all have been paid." The bonds described by numbers above are the bonds of the original issue which were last dated and numbered, or their substitutes, *i. e.*, bonds which have been issued on transfers of exchange for national bonds, and which bear an original as well as a substitute number.

All of the bonds of this loan will be called by their original numbers only.

Many of the bonds originally included in the above numbers have been transferred or exchanged into other denominations on "waiver," the original numbers being cancelled, and leaving outstanding the amount above stated.

Bonds forwarded for redemption should be addressed to the "Secretary of the

Treasury, Division of Loans, etc., Washington, D. C.," and all the bonds called by this circular should be assigned to the "Secretary of the Treasury for redemption n."

Where checks in payment are desired in favor of any one but the payee, the bonds should be assigned to the "Secretary of the Treasury for redemption for account of" (here insert the name of the person or persons to whose order the check should be made payable.)

(Signed)

CHARLES J. FOLGER, Secretary.

It seems probable, now, that the total reduction in the debt for the current fiscal year will be from 90 to 100 million dollars.

**NEW YORK CITY BANKS.**—The remarkable ease of loanable capital at present allows the banks to show a small surplus reserve above 25 per cent. of the deposits, at a period of the year when there is generally a marked stringency. A year ago, and two years ago, there was a deficit, instead, of over 2 millions. The drafts upon the reserve of late have affected the specie almost entirely, the legal-tenders remaining about the same.

The following shows the condition of the New York Clearing House banks for a number of weeks past, as well as about this time in 1882 and 1881:

| 1883.         | Loans.        | Specie.      | Legal-tenders. | Deposits.     | Circulation. | Surp. Res. |

**MONEY AND DOMESTIC EXCHANGE.**—Notwithstanding the usual tendency of money to the West and South at this season and the consequent reduction in the bank reserves here, there is no sign of a scarcity of loanable capital. Call loans on railway stock are readily obtained at 2 to 3 per cent. per annum, and time loans, on collateral, at 5 per cent. The discount rates on commercial paper are not low, on account of recent business failures, and it is subjected to sharp scrutiny. The quoted rates on first class double-named paper are  $5\frac{1}{2}$  @ 6 per cent. and on first class single-named, 6 @ 7.

The following table shows the range of call loans, and rate on prime paper, for the past five weeks:

|                         | Sept. 1.                        | Sept. 8.                        | Sept. 15.                       | Sept. 22.                       | Sept. 29.                       |

**THE NATIONAL BANKS** have reduced the amount of their bonds deposited with the United States Treasurer to secure circulation nearly 2 million dollars during the past month. Over 3 millions of 3 $\frac{1}{2}$  per cents have been withdrawn for redemption. These have been only partially replaced with 4 $\frac{1}{2}$  and 4 per cents, and, to a somewhat larger amount, with 3 per cents, which last are now being called in turn.

The following will show the amount of each description of bonds held by the Treasurer to secure national bank circulation, on or about the dates indicated :

|                                    | July 1.       | August 1.     | Sept. 1.      | Oct. 1.       |
|------------------------------------|---------------|---------------|---------------|---------------|
| Currency 6 per cents.....          | \$3,552,000   | \$3,452,000   | \$3,463,000   | \$3,463,000   |
| 5 per cents .....                  | 15,000        | 15,000        | .....         | .....         |
| 4½ per cents.....                  | 39,408,500    | 39,797,500    | 40,631,700    | 40,970,200    |
| 4 per cents .....                  | 104,954,650   | 104,693,650   | 105,207,000   | 105,463,500   |

| 6 per cents extended at 3½ }       |               |               |               |               |
| 3 per cents.....                   | 200,832,850   | 201,989,850   | 201,611,250   | 202,237,250   |
| Total. ....                        | \$356,551,500 | \$357,151,500 | \$353,619,150 | \$353,675,150 |

GOVERNMENT BONDS.—The market is very strong for the long issues, while the call for 3 per cents has been followed by a marked decline in the price.

The following table shows the closing bids for the principal issues of Government bonds on each day of the month of September, and the highest and lowest during the month :

| Sept. | 4½s. '91. | 4s. 1907. | 3 per cents. | C'y 6s. 1895. | C'y 6s. 1899. | Sept. | 4½s. '91. | 4s. 1907. | 3 per cents. | C'y 6s. 1895. | C'y 6s. 1899. |
|-------|-----------|-----------|--------------|---------------|---------------|-------|-----------|-----------|--------------|---------------|---------------|
| 1     | 112¼      | 119½      | 108¼         | 129           | 134           | 19    | 112½      | 119½      | 108½         | 129           | 134           |
| 2     | 112¼      | 119½      | 108¼         | 129           | 134           | 19    | 113       | 120       | 102½         | 130           | 134           |
| 3     | 112¼      | 119½      | 108¼         | 129           | 134           | 20    | 113       | 120       | 102½         | 130           | 134½          |
| 4     | 112¼      | 119½      | 108¼         | 129           | 134           | 21    | 113¼      | 120¼      | 102½         | 130           | 134½          |

| Fine gold bars par @ ¼ per cent. premium. |              | Fine silver bars, per oz.. | 1 10½ @ 1 11½   |

RAILROAD AND MISCELLANEOUS STOCKS.—On the whole the market has recovered somewhat from the severe decline of August, and, at times, considerable strength has been manifested. This has been reflected abroad, as has been mentioned before. The statement issued by the Northern Pacific showing that the road cost some 10 millions above the estimate has been used for the purpose of bearing the stock and the kindred securities, with an unfavorable effect on the general market. While there is no prospect of an immediate rise in stocks the appearances indicate that the period of extreme depression is about past.

The following table shows the highest, lowest and closing prices of the active stocks at the New York Stock Exchange in the month of September, the highest and lowest since January 1, 1883, and also during the year 1882:

|                           | September, 1883. |      |         | Since Jan. 1, 1883. |                | 1882. |      |

**WOMEN BANK CLERKS.**—Of late years the employment of women as clerks has greatly increased in England as well as in France, and in both countries it is generally agreed that the system works satisfactorily. At the Bank of France there are now 160 female clerks, who receive three francs a day to commence with, and whose annual salary, after a year or two of service, rises to 1,800 francs; and, at the Paris offices of the Credit Foncier, where there is a large staff of women, the remuneration, beginning at 8.50 francs a day, rises, in some cases, to as much as 4,000 francs (\$800) a year. In both establishments the hours of attendance are from 9 to 4 on six days of the week, and the male and female clerks sit in different rooms—the women being superintended by officials of their own sex, thus enjoying the greatest possible degree of privacy.

**THE NATIONAL BANK NOTE CIRCULATION.**—Statement of the Comptroller of the Currency, showing by States the amount of National Bank circulation issued, the amount of Legal-Tender Notes deposited in the United States Treasury to retire National Bank circulation, from June 20, 1874, to October 1, 1883, and amount remaining on deposit at latter date.

Legal-Tender Notes Deposited to Retire  
Nat'l B'k Circulat'n since June 20, '74.

JOHN JAY KNOX,  
Comptroller of the Currency.

## Bank, Government, Railroad and Miscellaneous Stocks and Bonds.

### LATEST QUOTATIONS AND OTHER INFORMATION.

The following tables give the latest quotations of stocks and bonds at the New York Stock Exchange. In the case of all but the New York bank stocks the highest and lowest actual prices of a year ago are also given, for comparison. The quotation tables on the following pages include *all securities listed at the Stock Exchange*.

#### NEW YORK CITY BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The Capital and Surplus are as given in the latest official reports, *viz.*: the National banks June 22, as reported to the Comptroller of the Currency; the State banks, Sept. 22, as reported to the State Banking Department. The Surplus includes the undivided profits on the dates given. The Banks which are not members of the New York Clearing-House Association are indicated by a (\*). Not listed at the Stock Exchange by a (†). This table includes all the Commercial banks of New York.

# **BOSTON—The Financial Situation, Banking News, &c.**

(From the JOURNAL's regular Correspondent.)

Boston, October 2, 1883.

The money market, or rather the rate between banks, has stiffened up and is now 5 per cent. From July 23 to September 27 the rate held at 3 per cent., with the exception of once in August 4 per cent., and twice in September  $2\frac{1}{4}$  per cent. The present advance is mainly due to an expected "call" from the Comptroller, for which it is necessary for some of the weaker banks to prepare. The Comptroller has been so much in the habit of calling with great regularity, that it is quite an easy matter for the banks to make a shrewd guess as to the time. By law, he is required to make at least five calls within the calendar year, and has, we believe, never exceeded that number. To show the regularity of these calls we give the dates of each for ten years past:

|                                                  |                                                  |
|--------------------------------------------------|--------------------------------------------------|
| 1874. Feb. 27, May 1, June 26, Oct. 2, Dec. 31.  | 1879. Jan. 1, Ap. 4, June 14, Oct. 2, Dec. 12.   |
| 1875. Mar. 1, May 1, June 30, Oct. 1, Dec. 11.   | 1880. Feb. 21, Ap. 23, June 11, Oct. 1, Dec. 31. |
| 1876. Mar. 10, May 12, June 30, Oct. 2, Dec. 22. | 1881. Mar. 11, May 6, June 30, Oct. 1, Dec. 31.  |
| 1877. Jan. 20, Ap. 14, June 22, Oct. 1, Dec. 28. | 1882. Mar. 11, May 19, July 1, Oct. 3, Dec. 30.  |
| 1878. Mar. 15, May 1, June 29, Oct. 1, Dec. 6.   | 1883. Mar. 13, May 1, June 22, Oct. 2.           |

The general rate for first class business paper is  $5\frac{1}{4}$  to 6 per cent., with exceptions above and below according to circumstances. Very little, however, is done below 5 per cent., and it is only the choicest of manufactory paper that can be passed as low as  $4\frac{1}{4}$  per cent., and at the latter low rate only to special customers. The general condition of the market is good and but few failures are now occurring, and these of small amount which ordinarily attract little attention.

Insurance stocks with us, the same as in your market, are little sold in public, creeping into auction occasionally, but never appearing at the Brokers' Board. Previous to the great Boston fire of 1872, our companies were very successful, many of them averaging 15 to 20 per cent. dividends per annum. That fire swept out of existence between two days twenty out of twenty-two companies. About two-thirds of them at once re-organized and have mainly paid dividends since of 10 per cent., the law of the State making that a limit, but allows a deficiency in any one year to be made up from earnings in future years. Also allows of an increase of capital by stock dividends from actual surplus. Those of the companies which divide in October pay as follows: Eliot, 5 per cent., Firemen's, 5 per cent., Manufacturers', 4 per cent.; Neptune, 5 per cent., North American, 5 per cent. The Dwelling House and Prescott pass. The Manufacturers' resumes dividends at this time, the first since October 1881. Previously the dividends were 10 per cent. per annum, since the company was re-organized after the great fire. But really the Manufacturers' dates back to 1822, when the old company was first chartered, and has been very successful. Previous to 1872 its average payments were over 20 per cent. per annum.

The general condition of the stock market is one of sluggishness, which is clearly shown by the movement of leading stocks as given in the table. The New York and New England Railroad securities have been a prominent feature owing to unrefuted statements that the net earnings will show a large deficiency in the amount of fixed charges, which are about \$1,100,000. The Boston and Albany Railroad has declared a stock dividend of 10 per cent. The Commonwealth of Massachusetts was an original owner of stock in this company, and about a year ago the State proposed to sell to the company its 24,115 shares at \$160 per share, taking in payment 5 per cent. twenty-year bonds at par, which terms were accepted, and \$3,858,000 bonds issued. That reduced the capital from \$20,000,000 to \$17,588,500, which is now increased to \$19,347,300, by this stock dividend, and the company still owns 6,527 shares of its capital stock.

Oregon Short Line Co's have declined from 97 to 93½ and American Bell Telephone 242 to 224 ex-dividend, but, otherwise than those named, prices are generally nearest the highest point at the close of the month. There is, however, an entire lack of vigorous movement.

The dividends of the Boston banks are all payable April 1 and October 1. As compared with six months ago the Market alone increases from 2 to 2½ per cent. The Boylston reduces from 3 to 2½ per cent., City 3 to 2 per cent., and Massachusetts \$6 to \$5 per share of \$250. The Central, Shoe & Leather, Traders' and Tremont pass. The new Lincoln National has been in operation since January 10, 1883, and accumulated a surplus of \$21,000, but it was not deemed advisable to commence paying dividends at this time. The following tabular statement shows the semi-annual dividend of each bank for three years past.

| Banks.          | 1881. |      | 1882. |      | 1883. |      | Banks.           | 1881. |      | 1882. |      | 1883. |      |

**BOSTON BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.**

The following table gives the latest quotations of Bank Stocks in the Boston market. The Capital and Surplus given are from the last official report, June 23d, and all the banks are National. The surplus includes the undivided net profits. All the banks belong to the Clearing-House, except Bunker Hill, First Ward, Mechanics', National Market of Brighton, People's, and Rockland, which are located out of the city proper, but within city limits, and they clear through other banks.

**POSTAL SAVINGS BANKS.**—The twenty-ninth annual report of the Postmaster-General of Great Britain and Ireland for the fiscal year ended March 31, 1883, shows the condition of the Postal Savings Banks as follows:

The total amount due to depositors, including interest, was £40,000,000, an increase of £3,000,000 over the previous year. This is the largest annual increase since the establishment of the system. The deposits during the year were 6,000,000 in number and £12,000,000 in amount, and the withdrawals were 2,000,000 in number and £10,000,000 in amount. The amount of interest credited to depositors was £891,629. On March 31 there were 7,081 post office savings banks and money-order offices. There were 788,868 accounts opened during the year, and 537,494 closed, leaving 2,858,976 accounts open at the end of the year, as against 2,607,612 in the previous year. The accounts were apportioned as follows: England and Wales, 2,643,785 (proportion 1 to 10); Scotland, 106,701 (1 to 35); Ireland, 106,490 (1 to 48). The savings banks' business in Ireland again showed a large increase, the number of deposits during the year having been 278,727, amounting to £752,673, as against 251,143, amounting to £262,170 in 1881. The total amount, including interest due to depositors, at the end of the year, was £1,925,460, as against £1,723,305 in 1881.

**CHICAGO—The Financial Situation, Banking News, &c.**

(From the JOURNAL's Correspondent.)

CHICAGO, OCTOBER 2, 1883.

— The customs receipts in the district of Chicago were \$4,969,112 last year, being an increase of more than \$1,500,000 over those of the previous year. The total expenditures the past season were \$124,398.

— The Board of Trade Clearing-House has been in operation a few days, and promises to be successful. It is estimated that this institution will reduce the bank clearings about \$100,000,000 a year.

— Manager C. H. Lunt reports the total business for the week ending September 29, as follows: Clearances, \$1,631,797.50; balances, \$495,517.75; number of items, 33,302.

— A new financial institution to be known as the Metropolitan Trust Co., is being organized in this city. The capital will be \$1,600,000. The institution will probably not be opened before January 1.

— The Chicago banks decided on September 6 not to receive on deposit the postal notes recently issued by the Post Office Department. The banks declined to take these notes because they often contained clerical errors which caused the Post Office officials to refuse them till corrected. And, also, because the time for paying the notes was limited to three months after the last day of the month of issue, thus making them valueless after that date. The banks found that handling the notes caused them much trouble and risk, hence decline to take them over the counter. This leaves the first receivers of the postal notes to get them cashed at the Post Office themselves.

— The Chicago Sub-Treasury for some time past has been paying 50@60 per cent. of the claims presented with silver certificates, instead of 10 per cent., as was the practice formerly. Despite this the circulation of these certificates does not seem to be increasing. They are sorted out by the banks, and the merchant and others having customs and revenue taxes to pay return them to the Government. These silver certificates were offered by the Sub-Treasury in exchange for gold, and to increase the supply of small bills, but the banks are unwilling to encourage the circulation of them and the silver dollar, and have thus far supplied their country customers without accepting this alternative.

— Chicago bankers and business men have asked the Secretary of the Treasury to extend the facilities of the Chicago Sub-Treasury. They request that gold certificates be issued which are made redeemable in Chicago. Then the gold could be deposited by the banks in the Sub-Treasury, and the certificates be taken in exchange. The present inconvenient and unsafe practice of carrying gold through the streets in order to pay bank balances at the Clearing-House could be dispensed with, and if the certificates were in the smaller denominations they could be sent into the country and used as currency, thus increasing the supply of small bills which are already scarce. At present these gold certificates, being redeemable in gold in New York and Washington only, occupy a position similar to that of Eastern exchange. If the latter were down to a currency shipping point (80c.), and the gold certificates were sent East for redemption, the express charges, counting both ways, would amount to \$1.60 per \$1,000, which would place the Government paper at a discount in a theoretical sense. The banks claim that the Northwest needs these bills, and that it is the duty of the Government to meet its wants. The Treasury Department, it is understood,

has determined to withdraw the letter refusing to issue these gold certificates, pending a reconsideration of the whole matter. The request, being a reasonable one, will probably be granted.

— W. S. Smith, Esq., Manager of the Chicago Clearing-House, reports the transactions for the week ending September 29 as follows: Clearings, \$44,788,211.36; balances, \$4,776,090.66. Corresponding week, 1882: Clearings, \$46,901,917.66; balances, \$3,353,676.30. Clearings for September, 1883, \$212,855,584; September, 1882, \$224,043,768.

#### CHICAGO BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, AND LAST DIVIDEND.

Following is a statement showing (1) the Capital and Surplus of the Chicago banks on and since June 22, 1883 (the date of the last official statement), (2) the bid and asked price of their Stock and, (3) the rate and date of last dividend. The Surplus includes the undivided profits. The Clearing-House banks are indicated by a star (\*).

#### OPINIONS OF THE JOURNAL.

(From J. W. Huston, Cashier of the Citizens' Bank, Connersville, Ind.)

"I am very greatly pleased with your JOURNAL. It is surely a real aid to bankers generally."

(From the "Normal Teacher," Danville, Ind.)

"RHODES' JOURNAL OF BANKING should be read by every business man, and especially every banker in the country. It will keep its readers posted in the financial world."

## DAILY RECORD OF FINANCIAL EVENTS.

OCTOBER, 1883.

1. **SATURDAY.**—Reduction in the public debt during August, \$6,671,852; since July 1, \$14,572,442.  
Discount on prime commercial paper in New York, 6@7½ per cent; call loans, 2½@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 3¼ per cent.; trade bills, 3¼@4 per cent.  
The foot and mouth disease is increasing alarmingly among the cattle in England.
3. **MONDAY.**—A foreign exhibition opened in Boston.
5. **WEDNESDAY.**—The Mechanics' Exposition opened at Boston.  
There are indications of war between France and China on account of the Hue (Annam) treaty.
8. **SATURDAY.**—Discount on commercial paper in New York, 6@7½ per cent.; call loans, 2½@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 3½@3¼ per cent.; and trade bills 3¼@4 per cent.  
Heavy frosts are reported in Minnesota, Dakota and Northern Wisconsin.  
The opening of the Northern Pacific Railroad formally celebrated at Gold Spike, Montana.
11. **TUESDAY.**—A postal money-order convention between the United States and the Hawaiian Islands signed.  
H. D. Nathan & Co., and C. G. Sæht & Co., bankers, of Copenhagen, Denmark, stopped payment.
13. **THURSDAY.**—The American Rapid consolidated with the Bankers' and Merchants Telegraph Company.  
The Bank of England's minimum rate of discount reduced to 3¼ per cent.
15. **SATURDAY.**—Discount on commercial paper in New York, 6@7½ per cent.; call loans, 2½@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 2½@2¾ per cent., and trade bills 3@3¼ per cent.
16. **SUNDAY.**—The Mexican Congress convened.
17. **MONDAY.**—The Chicago Board of Trade Clearing-House began operations.
19. **WEDNESDAY.**—A Treasury call issued for \$15,000,000, 3 per cent. bonds, the first of this class.
20. **THURSDAY.**—The Importers' and Grocers' Exchange organized in New York.
22. **SATURDAY.**—Direct telegraphic communication opened from the United States to Brazil by the Central and South American lines.  
Discount on prime commercial paper in New York, 6@7½ per cent.; call loans, 2@3 per cent.  
Discount in London on 60 days to 3 months' bank bills, 2¼@2¾ per cent.; trade bills, 2¼@3¼ per cent.
27. **THURSDAY.**—The Pacific railroads form an agreement with the Northern Pacific to prevent competitive charges.  
The Bank of England reduced its rate of discount from 3¼ per cent. to 3 per cent.
29. **SATURDAY.**—Discount on prime commercial paper in New York, 6@7½ per cent.; call loans, 2@2¼ per cent.  
Discount in London on 60 days to 3 months' bank bills, 2¼ per cent.; trade bills, 2¼@3 per cent.

# RHODES' JOURNAL OF BANKING.

NEW SERIES. }  
VOLUME X. }

NOVEMBER, 1883.

No. 11.

---

**I**N our August number we commented upon the subject of the bank bills in circulation in Canada, which was attracting the attention of some of the newspapers there. In conclusion we recommended the adoption of a system similar to our "national banking system, which is formed on a similar basis to the Bank of England and the other great national banks of the world, differing from them principally in the fact that under it there is no monopoly of banking privileges." We argued that it afforded "the very elements now lacking in the Canadian bank bills; it would bring the issuing banks under more direct supervision of the Government, and would supply a currency that would circulate freely at par throughout the Provinces." The papers did not take up this suggestion, but we find that an equally good authority (if they will excuse us for saying so), fully agrees with us. A correspondent of the Toronto "Mail" has been interviewing some of the capitalists and bankers of Montreal on the question—What change in the Dominion Bank Act is necessary to make banking more secure for the public and for the banks themselves? He writes: "Mr. Hugh McLennan, the great produce exporter here, who is a Director of the Bank of Montreal also, and has given great attention to the matter, expressed himself frankly but briefly on the subject. He said the remedy lay in the Parliament of the Dominion absorbing some of the provisions of the American Banking Act, which he thought was the most practical and judicious of any in the world. The two clauses which he would extract as an addition to our own, are those which authorize a Government finance official to enter and take charge of a bank when it succumbs to a state of insolvency. He pointed in forcible language to the advantages derived from having an independent authority to supervise everything, and furnish a statement

that would be relied on by the creditors, instead of leaving the assets and books at the mercy of the incompetent and unreliable management, which was the means of disturbing the stability of the bank. The other section, which he thinks of more importance still, is that which requires a deposit of bonds or gold with the Government for the circulation. He said this would be equally good for the public and the banks. In the first place he drew attention to the security which bill-holders would have; for it would be practically Government circulation, whilst nominally that of the banks. This would set people's minds at perfect ease as to the gold value of the paper, and would assuredly prevent a panic and run upon banks, which are the first causes to bring them to grief. He said, let reports go out about the strongest financial institution and forty or fifty people gather in the morning about the doors, and then see what will be the effect. It is always, the venerable merchant said, the bill-holder who creates a run, and not the depositor in any case ever known. On the other hand, the banks would be vastly strengthened, as they could not be embarrassed at a moment's notice when a run takes place. Mr. McLennan did not enter upon the question of loss the introduction of the latter clause into our banking system would entail upon our banks, which have seventy or eighty millions of circulation out, which they have not had to put up any security for."

---

THE case of *Juilliard vs. Greenman*, which was made up some years ago between Mr. S. B. Chittenden and General B. F. Butler, in order to test the constitutionality of the greenbacks, has been reached on the docket of the United States Supreme Court, and been postponed until after the Christmas holidays. The cause of the delay was that the learned counsel were not ready to argue the case, and it is said that there is no likelihood that they will be any more ready at the time fixed than they were before. It is very generally supposed that the point at issue in this case is virtually the same as that which was decided in 1870, but there is enough difference to make it well worth while to have the new case heard and adjudicated. The former case was brought to test the constitutionality of the original Legal-Tender Acts. Only three of the members of the Supreme Court, at the time of that decision, are still on the bench—Justices Bradley, Miller, and Field—the two former sustaining the decision, and the latter dissenting. Justice Bradley, in concurring, said: "The power to make Treasury notes a legal-tender, while a mere incidental one to that of issuing the notes themselves, and to one of the forms of borrowing money, is nevertheless a power not to be resorted to except upon extraordinary and pressing occasions, such as war or other public exigencies of great gravity and importance, and should be no longer exerted than all the circumstances of the case demand." The case

just postponed (*Juilliard vs. Greenman*), was brought to test the constitutionality of the Fort law, approved by President Hayes, May 31, 1878. It provides "That from and after the passage of this act it shall not be lawful for the Secretary of the Treasury or other officer under him to cancel or retire any more of the United States legal-tender notes. And when any of said notes may be redeemed or be received into the Treasury under any law from any source whatever, and shall belong to the United States, they shall not be retired, canceled or destroyed, but they shall be reissued, and paid out again and kept in circulation." It is as certain as anything can be in law, that if the present members of the Supreme Court should agree with the opinion of Justice Bradley, the Fort law would be declared invalid, for there is now no "public exigency of gravity and importance" to necessitate the issue of legal-tender notes. It would probably make no immediate difference in our finances if such a decision was rendered, for the greenbacks have been redeemable in specie since the beginning of the year 1879, and yet the total amount redeemed has been only about 12 million dollars. If these notes were declared to be not a legal-tender, they would probably remain in circulation; but there would be a sort of guaranty against the attempts of those who favor an irredeemable paper currency.

---

LAST month, in the course of some remarks on the causes of the long-continued depression in the stock market, and the distrust entertained by the public, at home and abroad, of the management of our railways, we alluded to the bad effect of the opposition which the New York railroad managers were making to the requirement that they should render quarterly reports. Our views are confirmed by the London "Bullionist," which treats the matter in the following strain: "We regret to learn, for the sake of investors, that the idea has not been favorably received by the officials of the various companies, and that the officials of several leading lines have presented a variety of reasons why they should not publish quarterly reports as to the financial position of their individual companies. Prominent amongst the objectors to what we consider a very necessary measure are the representatives of the Vanderbilt and the Erie lines. It is to be regretted that such objections should emanate from the very companies whose operations in the past have called for the reform now suggested. We can quite understand that the publication of quarterly reports will entail a vast increase in the office work of the companies; but, as the expenses of this will be borne by the stockholders and not the managers, we fail to see the grounds of objection. We are perfectly certain that investors on this side of the Atlantic would be pleased to see this reform rigidly insisted on. It is obvious that in companies that are honestly conducted there can be no harm in open confession; but the fact that the change will materially prevent 'insiders' specu-

lating in certain stocks, and making money at the expense of the public, is probably the root of all these threatened objections."

---

MR. WARNER, member of Congress from Ohio, has recently expressed the opinion that no action will be taken at the coming session upon the silver coin matter, excepting such as will provide for the retirement of the trade dollars. It is generally believed that Mr. Warner enunciates the sentiments of the rest of the silver men (so-called), and there is no reason to suppose that they will not be able to carry their point, as they have done heretofore. The opponents of the silver coinage generally base their arguments on the danger that it entails that the currency of the country will be debased to the silver standard. This reasoning has no effect whatever upon the silver men, excepting to confirm them in their purpose, for a purely silver standard is the very thing that they desire. But they have the passive support of a number of public men who think that the dangers arising from the silver coinage have been exaggerated. Now, there is no doubt that although the coin is inconvenient, yet a certain quantity of the standard dollars can be circulated without danger to the currency. If, in view of this, a measure should be proposed to direct the Secretary of the Treasury to stop the coinage as soon as the silver dollars in the country amounted to, say one-third, or even one-half of the gold, it might get passed. In any case, it would have a better chance than a bill to stop the coinage immediately, and its enactment would have a tendency to restore the confidence in the future which the present condition of things is destroying.

---

THE Bank Presidents' Association of Boston have resolved that, in their opinion, "a speedy enactment by Congress of a national bankrupt law, equitable in its provisions for the debtor and the creditor in all sections of the country, is indispensably necessary to the maintenance of confidence between banks and their constituents," and they "indorse the Lowell bill so-called, with possibly some needed amendments, as most expedient and best adapted to the wants of the people of the United States." The New York Board of Trade and Transportation has also taken up the same matter again, and it is reported that over one hundred favorable responses have been received to its proposition to hold a National Convention on the subject from commercial organizations throughout the country. Especial interest is taken in the matter in New York in consequence of the freedom with which advantage has recently been taken of the provision of the State law which places no limit whatever upon the amount or kind of preferences that may be allowed by insolvents. It is easy to see that this is almost an invitation to fraud, and the Chamber of Commerce has taken action looking to the amendment of the State law. The laws of Massachusetts and New Jersey differ from those of New York

in the particular mentioned, being much more stringent in allowing the preference of certain creditors at the expense of the rest. This, however, is only one illustration of the differences between the insolvency laws of the various States. It is true that none of the previous national bankruptcy laws have worked satisfactorily after a time, but it is hard to imagine anything worse than to have the matter under the control of 35 or 40 different and conflicting State laws, especially in a country with such a large internal commerce as has the United States.

---

IN A RECENT number we had occasion to reply to a question put by a subscriber regarding the liability of national banks for circulating notes that were stolen before being signed. An article in the September number of "Underwood's Counterfeit Reporter" seems to throw some additional light on the matter. It being required by law that every national bank, upon reorganizing, shall deposit with the United States Treasurer greenbacks to the full amount of the circulating notes originally issued to it, it is argued, that as the banks will gain nothing by refusing the notes, they would do better to redeem them. A case in point is that of the First National Bank of Detroit, which some time ago lost \$2,080 in \$10 notes. The bank reorganized before the bank extension act was passed, and deposited with the late Treasurer legal-tender notes to the full amount of its circulation. The Treasurer, however, refused to redeem the stolen notes, although held by innocent holders, without the express permission of the bank. Under the circumstances, the bank having nothing to gain by refusing, it gave the required authority. We may remark that the course recommended comports better with the dignity of the banks than would the opposite one, and will tend to keep up their notes in the estimation of the community. The action of the Treasurer was in accordance with decisions already quoted, but it is evident that, to relieve the banks from all responsibility for notes that may be stolen when in complete condition, excepting as to the signature, may lead to serious difficulty.

---

WE published last month an estimate of the amount of money in circulation in the United States, prepared by the First Comptroller of the Treasury. This gave the total circulation as \$1,575,104,642. This month we publish on another page the estimate of the Director of the Mint, which gives a total of \$1,730,597,823. We shall soon probably have the calculation of the Comptroller of the Currency, showing the total circulation to be much less than the smaller of the above amounts. The large differences between these totals is, of course, only to a small degree owing to the difference between the times at which these figures are made up, and neither are they caused, as might be supposed, by the fact that the sources of information are various. They arise, instead, from the different view which each of

the three officials seems to take as to what items should be included in the estimate. The Director of the Mint includes everything in the shape of money, gold and silver bullion, and coin certificates in the Treasury, among the rest. The First Comptroller excludes these items, but includes coin certificates in general circulation. All the certificates have heretofore been omitted by the Comptroller of the Currency, who, however, includes the bullion in the Treasury.

---

THE figures of the Mint are probably useful for statistical purposes, but the total given cannot by any process of reasoning be shown to represent the circulation of the country. Coin certificates in the Treasury are not even representative currency like the ones in circulation. A man might as well count among his assets his own notes or checks which have not been paid out, as the Treasury officials count this paper as currency. There is more room for question regarding the certificates that are in circulation, but it is manifest, that, as they cannot circulate at the same time as the coin they represent, the amount of them should be deducted from the totals as given in order to estimate the actual circulation for any practical purpose. When the certificates are issued the coin they represent is bound to lie idle, and when they are redeemed with coin the paper lies idle. There is room for doubt, also, whether the Treasury bullion should be reckoned in, but there is so little difference, to all intents and purposes, between it and coin in the Treasury, that it is probably right to include it.

---

THE "Daily Indicator" replies to a correspondent who had asked the names of the prominent bears in Wall street: "The woods are so full of them that we brush against them at every corner. Our correspondent will know them by their growling. They are chronic spreaders of false intelligence, and everlastingly expressing disbelief in published statements, or intimating in bald inuendoes that rascality exists, and who trade upon the capital of more responsible people, reckless of the consequences, and frequently have but small margins for the transaction of their business." Perhaps this language does not do full justice to the bears. They perform a useful function in times when speculation for the rise is rampant by checking the advance, and also by questioning the correctness of the statements of managers and promoters of corporations, which are too often calculated to deceive. But circulators of false intelligence are an unmixed curse. At certain times during the present year the financial horizon has looked very cloudy, and some people have taken full advantage of such opportunities to exaggerate every unfavorable statement and rumor in order to destroy the confidence of business men in the value of their property. While predicting financial revulsions and panics, they have strained every nerve to bring such disasters to pass. A man who tries to start a panic is no better than an incendiary.

## PERPETUATION OF THE NATIONAL BANKS.

It is generally acknowledged, that if the national banking system is to be perpetuated, now is the time when the plan for that purpose should be brought forward. The fact that the 3 per cent. bonds (of which the banks hold 200 millions as security for circulation) are being paid off at the rate of about 100 millions a year makes it imperative that some action must be taken soon in order to prevent a serious reduction in the circulation. The attention of some of our best newspapers has recently been directed to the subject, but they generally appear to concede at the outset that it is impossible to do more than to give the present system a few more years of lingering existence. In view of the difficulty and importance of the subject, it is not surprising that the late Bankers' Convention was not prepared to take any action upon it, leaving it for the consideration of a committee. The views of Comptroller Knox, as expounded on that occasion, will, doubtless, receive from them the earnest consideration which they deserve.

His proposal to substitute the bonds of solvent foreign nations for United States bonds that have been redeemed, as a basis for circulation, has one thing to recommend it which most other plans that we have seen lack, and that is that it provides for a permanent arrangement and is not a temporary expedient. But, although the eight thousand millions of public debt of England, France, Holland and Germany will be permanent enough and probably safe enough, yet it is doubtful if the idea will be well received in Congress. This, to be sure, is an objection that may fairly be brought against any plan whatever for continuing the national banks.

The proposition made by some parties to repeal the tax on circulation is open to the double objection, however, that while it is unpopular, it offers no permanent relief to the banks or guaranty of the stability of the system. Some writers have urged the replacement of the Government by State or railroad bonds; but it is very evident that the practical working of any scheme formed on this basis is surrounded with difficulties.

According to accounts received from Washington, some of the Treasury officials are busy with schemes to refund the present long bonds into others bearing a lower rate of interest in such a way that the banks could issue a larger amount of circulation against the same

amount of capital invested in bonds. The matter of the expediency of any further attempts to reduce the interest on the outstanding bonds is one which we do not wish to discuss at present ; but, so far as the perpetuation of the national banks is concerned, the proposal is calculated to do more harm than good in the present exigency. It is only a temporary expedient at best, and, if it were tried, the question of providing for the continuation of the banks would only come up for settlement again in a short time, probably with less chance of a satisfactory outcome than at present. Before these temporary arrangements are tried, every effort should be exhausted to effect a permanent one.

The idea, which is supported here and there, to discontinue the payment of the Government bonds, either by an immediate reduction of taxation or the expenditure of the surplus in public improvements, or its distribution among the State governments, involves a very dubious financial policy, and, besides, it is opposed to the sentiments of the best class of the common people.

If all the methods mentioned here have been objected to, it is not that they are by any means considered totally impracticable, but rather that it is believed that a better way is open to the object in view. Being more radical than any of the plans mentioned, it may possibly be received with less favor than any of them. But we believe that the friends of the national banks should agree upon some plan like the one briefly sketched below, and endeavor to have it adopted.

It is commonly taken for granted that the sole advantage which the national banking system affords lies in the present safe and convenient currency, from which, besides, the Government derives a revenue. While this certainly forms its chief recommendation to public favor in ordinary times, it should not be forgotten that the banks have another public function to perform of the first importance in times of war or extraordinary calamity. They were organized during the civil war in order to aid the credit of the Government by assisting it in disposing of its bonds. In any period of particular stress in the future the Government will have the same need for the banks. And how much better to have the system in full operation than to have to begin the organization of a new system at such a time. There has been a good deal of discussion for some time past on the importance of improved coast defences and a navy, but the importance of a provision for the "sinews of war" appears to be overlooked.

Taking up the question now, from the standpoint of the importance of the national banks to the Government, we come to ask, What is the difficulty about continuing their existence? The ready answer is, that the bonds that form the basis of their circulation are being rapidly paid off. Now, in order to meet this difficulty, most of the plans offered propose some other kind of bond to take the place of the Government bonds. But, in view of the difficulty in finding a desirable

security in these times, why not find some way of securing the circulation without a deposit of bonds with the Treasurer, until such time as the Government shall have occasion to again call on the banks for assistance?

For instance, let the present arrangements for Government supervision and the redemption fund in the Treasury be continued. Then allow those banks that will agree to mutually guarantee the payment of all their notes each to withdraw its bonds down to—say five per cent. of its circulation—which shall be limited in amount to one-half its capital. The notes of the banks accepting this arrangement might be made a first lien upon their assets, and the banks might be required to keep an ample cash reserve against all their immediate liabilities, as at present. But the requirement might be increased, in the case of the banks outside of the reserve cities, above the present legal requirement, if necessary. These provisions for the security of the circulation being under the constant supervision of the Comptroller of the Currency, would it not be placed on a safer basis than under any State system yet devised or possible?

Under this, or, in fact, under any other plan that may be devised for the continuation of the national banks, it might be proposed, that as the Government, by establishing the national banks, deprived the States of a source of revenue, it might, now that it does not need the money, relinquish the proceeds of the tax of one per cent. on circulation to the States until it may have need for additional revenue.

Of course, it would be superfluous to attempt to give the details of this scheme at present, but it is offered for the consideration of those who are interested in the national banking system, whose criticisms of it are invited, and will receive respectful attention.

---

THE German statist, Dr. Soetbeer, in a series of articles contributed to the "*Deutsches Handelsblatt*," to some extent confirms the views of Mr. Goschen, as expressed in the paper which was recently published in this magazine. According to tables given by Dr. Soetbeer, there was a pretty steady rise in the prices of commodities from the year 1847, and following the great gold discoveries, until 1873, when the increase over 1847 was 41 per cent. After 1873 prices declined, until, in 1879, they were only 19.9 per cent. over those of 1847, and, in 1882, they were only 23.8 per cent. higher, a decrease of 17.2 as compared with 1873. Dr. Soetbeer's figures show only a slight change in prices in 1881 and 1882, but it is certain that there has been a steady decline in this country since 1881, and we believe the English statistics prove that the same fact applies there.

## COMPTROLLER KNOX ON THE CURRENCY.

---

\* ADDRESS OF HON. JNO. JAY KNOX BEFORE THE CONVENTION OF THE AMERICAN BANKERS' ASSOCIATION, AT LOUISVILLE, KY., OCTOBER 10, 1883.

When I first received your cordial invitation to attend this convention, I declined, for I did not suppose it would be possible to leave my official duties during the present month. I have had the pleasure heretofore of addressing this association at Saratoga and Niagara, and similar gatherings of business men in New York, Boston and Baltimore, but the desire to meet the members of the Bankers' Association, and to visit the good State of Kentucky, so long the home and now the final resting place of Henry Clay, has induced me to leave the Capital at considerable inconvenience, and I bring with me the greetings of the Secretary of the Treasury, who, with the President of the United States and other members of his Cabinet, recently visited this State for the purpose of opening the very successful Exposition now in progress in this city.

The State of Virginia is justly proud of being called the Mother of Presidents; but it is a much greater honor to have been the mother of this great, thriving, hospitable Commonwealth of Kentucky, and of the good city of Louisville, which was first organized by an act of the Virginia Legislature, receiving its name in honor of Louis XVI. of France, whose troops were then aiding the struggle for American independence.

I accepted your invitation with the understanding that I was not to be called upon for an address. It was suggested, however, that I might be able sometime during the session of the convention to report to you the progress of the national banking system during the present year, its present situation, and to offer a few suggestions in reference to the prevention of the rapid reduction of bank circulation, which is now imminent.

The national banking system has happily survived the first period of twenty years of its existence. It has maintained its ground by a

---

[\* The address of the Comptroller of the Currency before the Bankers' Association has attracted wide attention on account of his views on national bank circulation. The part of the address referring to this subject is given here in full, having been revised especially for the JOURNAL OF BANKING. The Comptroller was very cordially received by the bankers at Louisville.—EDITOR.]

vigorous struggle, both in and out of Congress. Its enemies have been bitter and merciless in warfare against it, and have presented arguments so plausible to those unacquainted with the true principles of political economy that it was necessary, by continued and patient discussion, to satisfy the country that there was really no saving to the Government by the substitution of demand Treasury notes in place of the circulating notes of the banks. In the course of this controversy, it has been charged that the Comptroller was acting the part of an attorney for the banks. I acknowledge that I was educated as a banker under the New York State system ; that I had experience in other systems of banking in the West ; that I was an ardent advocate of the present system before it was adopted, and since its adoption have not ceased at any time to recommend and to endeavor to obtain such legislation as was deemed most advisable for the maintenance of a sound currency, and for the continuance of the present system of banking.

The members of this convention and the banks generally will, I think, bear witness that I have not hesitated, when necessary, to use authority to prevent violation of the law and of the true principles of banking. While I have been the friend of the system, I have been the friend only of those banks which have conformed to the law, and in endeavoring to prevent such violations, it has sometimes seemed as though the title of "the scolding Comptroller" would be more appropriate than that of "an attorney for the banks."

The experience of twenty years has shown this banking system to be better adapted for a country like our own than any other known, and many of those who were formerly its strongest opponents have become its friends, having become convinced not so much by argument, or by any appeal to the reason, as by the logic of events.

Finally the Congress of the United States, by the repeal of the onerous taxation at its last session, upon which I offer you my heartiest congratulations, and by the passage of the bill extending the corporate existence of the banks, has conformed to the wishes of the people, and made the system by legislation, it may be said, almost perpetual. So strong has it become by attracting deposits, that at times it has seemed that banks were being organized in localities where additional banking facilities were not needed.

During the year ending November, 1882, 171 additional banks were organized, with a capital of \$15,767,300 and circulation of \$6,500,680, and during the eleven months ending October 1, 1883, a still larger number, 251 banks, have been organized, with a capital of \$28,077,500 and circulation of \$7,593,280.

The number of banks organized in the New England States is seven, with capital of \$1,275,000, and circulation of \$886,500 ; in the Middle States, thirty-eight, with capital of \$3,033,000, and a circulation of \$1,518,390 ; the Southern States, forty-two, with capital of \$3,479,000,

and circulation of \$963,000; Western States, 127, with capital of \$18,120,500, and circulation of \$3,549,880; Pacific States and Territories, thirty-seven, capital of \$2,170,000, and circulation of \$675,040.

The circulation issued to these banks in the aggregate is almost precisely twenty-five per cent. of the capital, showing that the banks have taken advantage of that provision of the Act of July 12, 1882, which authorizes banks of small capital to be organized upon deposit of bonds to the amount of one-fourth of the capital. The banks in the Western States and Southern States, where the rates of interest are highest, and consequently the lowest profit on circulation, have received the smallest proportionate amount of circulation, while the banks in the Eastern and Middle States, where the rate of interest does not exceed six per cent., have taken from fifty to seventy per cent. of their capital in bank notes.

It is necessary that the large excess of revenue of the Government beyond its expenditures should have some outlet, or a serious contraction of the circulation would ensue, and the Secretary of the Treasury has been forced to call in rapidly for payment that portion of the bonded indebtedness which is payable at the pleasure of the United States, thus rendering the profit on circulation merely nominal, and in some cases even a losing business, unless the capital was invested in long bonds, which bear a premium so high that many bankers decline to make the investments.

During the past year the bonds held by the banks as security for circulation have been reduced from 362 millions to 353 millions, a reduction of 9 millions. The amount of lawful money now held for the purpose of retiring the notes of liquidating and other banks desiring to diminish their circulation is \$36,821,501, showing a reduction of \$2,229,131 during the year ending October 1.

All of the three and a half per cent. bonds have been called for payment, including more than \$40,000,000 held by the banks on November last. The three per cents have, since that date, increased \$22,000,000, and the four and four and a halves only about \$8,000,000.

There are \$290,000,000 of three per cent. bonds, not including the \$15,000,000 recently called, payable at the pleasure of the Government, now outstanding, of which the national banks hold about \$200,000,000, and unless there shall be new legislation, which shall reduce the receipts of the Government, it is probable that the whole remaining three per cent. bonds will be called for payment during the next three or four years, thus reducing the circulation of the national banks from 353 millions to 171 millions, and causing a contraction of the currency of from 50 to 60 millions annually.

\* \* \* \* \*

New legislation may, however, postpone the payment of the public debt, and defer for many years any great reduction of the bank circulation. This necessary legislation may be of various kinds—first,

contraction may be prevented by the reduction of the redundant revenue, and that this is the true policy is so plainly shown by those who are familiar with the subject of the tariff that it is the marvel of the times that such reduction has not already taken place; second, it may take place by the conversion of the long bonds into three per cents by offering inducements to the holders of these bonds to exchange them for three per cents to mature in 1907, the Government paying to the holders thereof a reasonable amount for the difference in value.

Other suggestions have been made worthy of consideration, one of which is by an eminent banker in Boston, that the national banks shall issue circulation upon a plan similar to the issues of the Bank of England; first, having the right to issue circulation, at a given rate, upon such United States bonds as may be deposited, and subsequently the right to increase that circulation by deposits of gold in the Treasury, the amount of circulation to be issued upon the gold to be 25 per cent. in addition to the gold deposited, the whole circulation being a first lien upon all the assets of the bank.

[Mr. Knox then considered briefly several propositions for preventing too rapid a contraction of the national bank currency as a consequence of the rapid reduction of the bonded debt, and spoke in favor of a reduction of the tax on circulation. He also suggested that banks might be authorized to deposit, as one-half of the security for their circulating notes, the bonds of States and cities on which interest had always been regularly paid.]

\* \* \* \* \*

If no legislation of this kind shall transpire, how is the vacuum to be filled? It is said that it may be filled by the issue of silver certificates, or by an additional issue of Treasury notes. If it is done by the issue of silver certificates, the result will shortly be the payment of all debts upon the basis of a silver standard. If by the issue of Treasury notes, it is difficult to understand by what process they can be placed in circulation so long as the revenue shall continue to supply more money than is needed for its expenditures; and the receipts have so largely exceeded its expenditures that nearly one hundred and five millions (\$104,723,750) of the public debt were paid during the year ending October 1. But if it were possible to increase the Treasury notes, such issues would soon be prevented by the issue of notes under the authority of the different State Legislatures; and upon this point I can not express myself more plainly than by quoting from an address made before this association in the midsummer of 1879:

"The proposition now advocated in certain quarters is to substitute United States notes in place of bank notes. This is impossible of accomplishment. I mean, that while this project may seem to many judicious and plausible, it is an impracticable one. \* \* \* \* \* When I say this, I mean that such legislation would be likely to be followed by the repeal of section 3,412 of the Revised Statutes,

consisting of four lines in the Statute Book, which provide: 'That every national and State bank shall pay a tax of ten per cent. on the amount of notes of any person or of any State bank issued for circulation and paid out by them.' Many of the Southern States have long desired the repeal of this section because they believe that State banks and State bank issues would be more advantageous to their business interests. The East and the North, in that event, will join the South for the repeal of this section, but for a different reason, viz. : because they believe that the increase and decrease of paper currency should not be controlled by Congress. The Eastern and Middle States suffered comparatively little loss by the issue of such notes previous to the organization of the national banking system, and they believe that the evils which will result from the issue of Government currency, exclusively, will be much greater than those arising from the issue of State bank notes under some such plan as the Suffolk system."

One of the most distinguished leaders in the Greenback party has substantially acknowledged to me that the issue of bank notes authorized by State laws would be the probable result of the attempt to increase the amount of the Treasury notes ; but, at the same time, he believes that the evils may be, and probably will be, prevented by a decision of the Supreme Court reversing the decision in the case of *Briscoe vs. The Bank of the Commonwealth of Kentucky*, rendered in the year 1836, thus holding what I believe to be the true interpretation of the Constitution, that no State shall issue or authorize any corporation to issue bills of credit.

According to the census of 1880, there were about 268 millions of State bonds in existence, including the bonds issued by the District of Columbia, and about 682 millions of debts of cities and towns having a population of 7,500 and upward. If a commission should be authorized to select from these debentures bonds of such States and cities as have for a long series of years never failed to pay their interest promptly, an abundant amount of satisfactory security could be obtained from this source to supply for the next twenty years a basis for the issue of national bank notes, particularly if the receipts of such debentures should be limited to one-half the bonds deposited by each bank. This suggestion is made with the more confidence for the reason that the Secretary of the Treasury in his last report recommended the receipt of 3.65 bonds of the District of Columbia, which are substantially the issues of the City of Washington, although indorsed by the Government, for this purpose. One of the principal objections to this proposition is that it would be necessary to make invidious distinctions in selecting the different kinds of State and municipal securities.

I have but one other suggestion to make in closing these remarks, which have been continued already perhaps too long, and this suggestion is made not without considerable diffidence, and not as a recommendation, but as a suggestion for your consideration.

The early archives of the Treasury show that De Beaumarchais, a brilliant French writer of high social standing, of wonderful conversational powers and great energy of character, espoused the cause of America at the outset of the revolutionary struggle, with all the ardor of his nature, and rendered the most important service in inducing his Government to come to our assistance. He was sent to London in 1776 as a diplomatic agent, in order to confer with our representative. He said that it was the wish of the French Government to assist us to the extent of 200,000 Louis d'or, in arms, ammunition and specie, but wished to do it secretly, and suggested that a small quantity of tobacco should be returned, in order to give it the air of a mercantile transaction. This plan was to be communicated to Congress. Upon his return to Paris he made the acquaintance of the American agent sent by the United States to France, whose mission was to obtain cannon, with ammunition, and arms and uniform for 25,000 men.

Through his kind offices and that of his friends, not less than 3,000,000 livres were immediately advanced as a gratuitous gift to the Government, at a time when even a much smaller amount would have been of immense service to our cause. Eight ships were employed in transporting the precious cargoes to this country for our use. Subsequently, 18,000,000 livres were loaned by the French Government to the Colonies to continue the struggle with Great Britain. The money is said to have been advanced without any expectation of payment, though with stipulation that it should be repaid, and a contract to that effect was drawn some years after. The interest named in the contract was at the rate of five per cent. Article 3 of the contract specified that, although the rate of interest was five per cent., "His Majesty, wishing to give the United States a new proof of his affection and friendship, has been pleased to make a present of and to forgive the whole arrears of interest to this date, and from this date to the treaty of peace." A favor which the Minister of the Congress of the United States acknowledged to flow from the pure bounty of the King, and which he "accepts in the name of the said United States, with profound and lively acknowledgments"

This loan was all subsequently paid, the last installment being in five and a-half per cent. stock in 1795, this stock being accepted in lieu of all demands by the agent of the French Government.

Subsequently, at a time when the American army was almost destitute of clothing and meat and bread, and when Continental money had ceased to be of value, and when the army was in danger of disbandment, the King of France, through his Minister at the Hague, obtained a loan of 10,000,000 of livres from Holland. The money was obtained on the credit of France, and became a debt due to the latter country, and was subsequently provided for in the contract of July 16, 1782. The rate was four per cent., and it was to be paid in ten equal annual payments of 1,000,000 livres—the King, "on

account of his affection for the United States, having been pleased to charge himself with the expense of Commissioners and bank for the loan, of which expense his Majesty has made a present to the United States."

The last installment of this loan, amounting to \$176,000, was arranged by the issue of four and a-half per cent. stock of 1795, which stock was, of course, subsequently paid.

Other loans were subsequently made by Holland and France, and the whole foreign debt of the United States, at the organization of the present form of Government, was about twelve millions of dollars.

Of late years I have not infrequently heard thoughtless persons speak lightly of that illustrious citizen, the first President of the United States. I trust, therefore, that you will bear with me while I read a word from the report of the French Minister, Moustier, who was present at the inauguration of George Washington, and who thus writes home to the King, from whom the city of Louisville derives its name :

"Every one, without exception," so reports the French Minister to his Government, "appears penetrated with veneration of the illustrious Chief of the Republic; the humblest was proud of the virtues of the man who was to govern him. Tears of joy were seen to flow in the hall of the Senate, in the church, and even in the street, and no sovereign ever reigned more completely in the hearts of his subjects than Washington in the hearts of his fellow-citizens! Nature, which had given him the power to govern, distinguished him from all others by his appearance; he had, at once, the soul, the look and the figure of a hero; he never appeared embarrassed at homage rendered him, and in his manners he had the advantage of joining dignity to great simplicity."\*

The bearing of this reference to early times and to the early friendship of the French and Dutch nations, will be evident when we recall the fact that the present debt of the republic of France is nearly 3,830 million dollars, and of Holland 389 million dollars.

Baron Gerolt once said to me that at least one-third of the people of the United States were of German descent. The present debt of the German empire is less than \$50,000,000.

The debt of the English people, who are now bound to us by the strongest social and commercial ties, is 3,766 million dollars. The public debts of these nations, as given in the census returns for 1880, are as follows:

|                    |                 |
|--------------------|-----------------|
| France.....        | \$3,829,982,000 |
| Great Britain..    | 3,766,671,000   |
| Holland.....       | 389,320,000     |
| German Empire..... | 49,817,000      |
| Total.....         | \$8,085,290,000 |

making a grand total of more than eight thousand millions of debt,

\* Bancroft's History of the Constitution of the United States, vol. II, pp. 363-4.

bearing interest, for the most part, at a rate ranging from three to five per cent. Would any banker hesitate to lend his money upon the debts of France or Holland, our old and true friends in the early history of the nation? The English consols, for years, have been better known in every country than any other debenture, and if the national bank notes were secured by these, and by United States bonds in equal amount, it is probable that these notes, particularly those of the larger denominations, would, like the issues of the Bank of England, be current in every part of the world.

The faith of the French nation has been preserved inviolate for years, notwithstanding the change of dynasties and forms of government.

Would it not be gratifying if we were bound to these nations by additional ties of commerce and friendship in these centennial years; and would not the holding of this debt as security for circulating notes, serve as a bond to insure that all differences which may hereafter arise between this nation and the great nations of the Old World, shall be settled by arbitration and not by an appeal to the sword?

I do not suppose it probable that Congress would consider such a proposition at present; but, certainly, in view of the rapid payment of our public debt, of the numerous banks yearly established, the future magnitude of the system and the importance of preserving it in its present form, the employment of foreign debts as security for one-half or one-fourth of the circulation of the banks, would seem to be a proper subject for the consideration of this association.

The relations of the different great powers of the world toward this country have greatly changed of late by the use of the telegraph and the cable, and the business and commercial relations of this country with foreign countries will certainly become more and more intimate from year to year.

The amount of foreign bonds annually imported for this purpose, should the necessary legislation be authorized, would not be so great as to derange our public finances or injuriously affect the balance of trade. The citizens of England and Germany, particularly, for many years have not hesitated to invest largely in United States bonds when they could do so to advantage; and the purchase and deposit of their debentures, as security for the circulation of the national banks, would certainly tend to increase the demand and strengthen the prices of the best American stocks and bonds in every foreign market.

The closing paragraph in an address I had the honor to deliver before the Chamber of Commerce in New York city, in the month of May, 1882, was as follows:

"I expect not long hence to see in the newspapers of this city the

advertisements of your eminent bankers for the purchase and sale of English consols and French rentes and the securities of the other nations of the globe; and the quotation of their funds in your commercial journals, and their purchase and sale, will be among the first indications that New York will contest with London the right to be the monetary center of the world."

---

THE ITALIAN SAVINGS BANKS.—A paper presented by M. Luzzatti to the recent International Congress of Provident Institutions at Paris gives much valuable information regarding the working of the savings banks of Italy, especially with respect to the investment of deposits. It appears that the system resembles neither the English nor the French method, in that the Italian savings banks are quite independent of the State, which neither assists them nor exercises any control over them. The number of institutions is 387, holding 758 millions of francs of deposits, and in addition there are 112 people's banks, with 270 millions due to the depositors. The savings banks in general invest one-fourth of their deposits in Treasury bonds; one-fourth in the Rente of the State; one-fourth is employed in discounting trade bills, and the remaining fourth is lent on mortgages. The fourth invested in Treasury bonds, easily realizable, is found to be sufficient to meet all demands by depositors, and under that system, M. Luzzatti says, the banks passed safely through the crises of 1848, 1859 and 1866. They did not incur greater risks than the French savings banks, which are managed by the State, for in France there is no guaranty, either by the Government or the management, the State being responsible only for the sum it receives, and not covering losses through the intermediaries between the depositor and itself. The security in Italy is as effective in fact, and more extended in law. This is not, however, the only superiority he claimed for the Italian system. The savings banks created industrial and agricultural credit for the laboring classes, by aiding in the formation of people's banks, shares of which are issued to the workman and the peasant on payment of a small weekly installment. The people's banks accept their paper if it bears the signature of two members of a mutual aid society, re-discounts it to the savings banks, which in turn may discount it afresh with the national banks. The savings of the people thus, instead of being concentrated in the hands of the Government, circulate throughout the country, promoting industry and agriculture. This is also in some measure the practice in the United States, where sixty per cent. of the deposits are employed in mortgage loans direct, forty per cent. in Federal or State bonds. M. Leon Say and M. de Malarce, however, defended the French system of State management, although M. Say apprehended evil effects from the absorption of the great mass of deposits by the State, and the facilities they afforded for extravagant expenditure. But he remarked that it was the savings banks that had solicited the State to undertake the management of their funds, and that the Government had only intervened in the interest of the public.

## BANKING NEEDS—RECIPROCITY AND FRATERNITY.

---

INTRODUCTORY ADDRESS OF GEORGE S. COE, PRESIDENT OF THE  
AMERICAN BANKERS' ASSOCIATION, BEFORE THE CONVENTION  
HELD AT LOUISVILLE, KENTUCKY, OCTOBER 10, 1883.

---

*Gentlemen, Members of the Bankers' Association :*

In asking attention to the business that may be presented for your consideration at this convention, it is natural that I should first felicitate the Association upon the fact that the industry of the country has at length been relieved of the special taxes which the civil war indirectly imposed upon its various products, as they passed into market, through the medium of banks and bankers. Thus has been removed one of the most prolonged and vexatious reminders of that great struggle whose record has now so far receded into the past that even those who were once engaged in the deadly conflict can now together calmly and dispassionately review it like other students of history throughout the world. In laboring to secure that long-sought relief from special taxes, this Association rendered most important service in diffusing information by means of its documents scattered over the country, and by the wide personal influence of its members among practical business men, who were either themselves bearing the burthen of those taxes, or were distributing them among dealers and consumers within the limits of their trade.

Having accomplished that important work, the question now presents itself for consideration : Has the Bankers' Association thus fulfilled all the purposes of its organization, and is it now ready to be dissolved ? or are there still other and greater reasons for its permanent existence ?

It cannot be denied that in this new country there is urgent need of a higher education in economic science, and that this is especially required by men like ourselves, closely engaged in the practical application of its principles, under circumstances without precedent in older countries. This can be most effectually promoted by the interchange of views among men of similar experience, who are acting under similar conditions, and whose interest will be naturally quickened by personal contact and social intercourse. Banks cannot exist as isolated and exclusive bodies. They are indissolubly bound to

each other and to the public by a community of interest and interdependence. Their special function of exchanging and distributing the productions and property of the people, as demanded by trade and commerce, necessitates their co-operation and mutual trust. Banks are the embodiment of the nation's industry, as it moves onward to market, from place to place, and from one institution to another, by means of paper representatives of its value, which thus practically convey substantial wealth. Like railroads, the service of banks between each other must be reciprocal, and, like them, they cannot patiently permit any one member to compete for business, by introducing unsound or vicious practices, which, if adopted by all, would impair the entire system and endanger the community. They are, therefore, under the highest obligation to jealously guard the profession against that degree of independence that amounts to license, and this can be best secured by creating a sound public sentiment among members from every section of the land, by personal interchange of views and opinions. An interest of such magnitude, scattered over so wide an area, and so largely identified with the happiness and prosperity of the nation, may, with great profit and propriety, not only convene once a year to confer upon and promote the common welfare, but it is their duty also to inquire how they may voluntarily organize into a more compact system for the greater security and facility of trade, and how they may elevate the tone, dignity and usefulness of their own profession.

But, aside from these general considerations, there are others of a more special nature which call for the highest collective wisdom. This vast land, unparalleled in extent of the field embraced in one national and social life, has been providentially reserved from the full occupation of civilized men, until modern science and ingenuity had invented facilities for its highest utilization, and until the errors incorporated into the original organization of its Government had been extirpated by the violence of war.

No longer impeded by adverse and dismembering influences, this nation has since sprung forward with a native vigor, of the possession of which it was before unconscious. New States have been opened to human labor, upon territory hitherto hidden in obscurity, and old States have been started afresh upon a career of productiveness of which they themselves never conceived. Labor, re-enforced by novel machinery of agriculture and applied to newly discovered lands, already rich with natural fertility, has drawn from the earth vast treasures of commercial value, forcing idle acres into productive capacity exceeding the grain-growing fields of Europe. The New World has suddenly revealed a capacity to sustain population and to develop wealth, that the Old World never experienced. These sudden and marvellous acquisitions of substantial prosperity, in the briefest period of time, have permitted us with apparent impunity to set at

naught many sound financial theories, and to defy natural consequences, such as human experience elsewhere has repeatedly verified. Old World creations of real wealth required centuries for their growth. Here they have come at once, by transplanting older germs into newer soil, where they immediately re-appear in full maturity—villages, towns, cities and States continually come into being, endowed with all the powers and capabilities of long-matured communities, and they come demanding immediate admittance into the currents and exchanges of commerce, for the productions of their soil and the creations of their industry. These changes in the relations of the various sections of country to each other are daily presenting larger financial problems to banks and bankers for solution, and they require the most watchful attention intelligently to compass and digest them. Our profession is no longer a quiet and monotonous employment of elderly gentlemen, limited to a few dreamy hours, but it requires men of trained activity and vigor, alive and alert to the ceaseless changes around them. The annual and regularly returning dependence of interior and western States in former years upon the larger eastern cities, for financial facilities and capital, has, in like measure, as rapidly changed by the growth of newer cities, which have themselves become depositaries of accumulated wealth and reservoirs of reserved financial power.

Within the business experience of many of us, the whole interior country drew its motive power of currency for marketing the annual crops, from New York and New England, without whose help they could do nothing. All this has greatly changed, and is continually changing. So unconsciously, and yet so rapidly, does the national and financial power and social life develop before our eyes, from silent, unoccupied fields, into busy, populous and perfected communities and refined society. The banking system, an indispensable element of all industrial life, has as rapidly followed this human advance, and taken shape by the surrounding conditions. By its constitution and purpose each bank is a link in the chain of national, financial and social progress and operations. 'Ought they not altogether to seek coherence and strength, by counsel and advice, among their constituent elements?

While the production of wealth and prosperity among us has thus bountifully rewarded human toil and enterprise, the same restless spirit has been displayed in its expenditure. Every mode of communication by which time is saved, and things and thoughts are interchanged between the scattered members of this wide land, every invention by which labor can be made more effective and material elements substituted for human muscle, every device to promote comfort and convenience, or minister to taste and luxury, is here prosecuted to the fullest extent of the national capability, and all these varied forms of activity are expressed in the machinery of our

banks, and are represented in their incessantly changing assets. In them the resources and savings of the people are gathered together, and through them they are again disbursed, exchanged, renewed and utilized. Perpetual activity and barter of useful things are the essential conditions of sound banking; while heavy, slow and irresolvable property is the bane and obstacle that is to be most studiously avoided. Whether, therefore, in creating or in expending wealth, banks are alike demanded. In every possible step of human progress they are the servants of industry, and wait upon its movements. They are wanted to assist in the removal of its products from the ground, in carrying them to market, in distributing the proceeds. In every enterprise they are needed to gather together contributions of capital and the elements that compose the structure, to protect the profits and to divide them among the owners. After the smaller rewards of manual labor have most conveniently been paid in money, bank machinery comes in and best serves this purpose of exchanging industry, through every process of its growth, preservation and reproduction. We travel from place to place with bank paper transfers of labor in our pockets to save us from loss, and at home they alike shield us from danger and violence. The documents, records and expedients of banks attend commercial operations as servants, companions, friends and protectors, and they are good just in the degree that they are covered by labor in its diversified forms and fruits. Not by coin alone nor chiefly, but only by it as one of the results of useful labor. And because the soundest banking consists in adhering most tenaciously to such forms of industry as are most useful to life, the conservative influence of such institutions in society becomes apparent. They are necessarily allied to thrift and good order, and are the natural foes of all extravagance and waste. Their interest makes them so. The best security of banks is the most perfect system of industry. Every bad or uncompensating enterprise that seeks public support by stealing an entrance into bank loans, is, to them, a menace and a danger. All useful workers are their natural allies, and the popular prejudice against banks as protectors and custodians of wealth, is as equally vulgar and blind as if directed against every industrious laborer by whose toil wealth is created.

An organism of such universal and all pervading utility and importance, that moves concurrently with the best interests of society, may well command the earnest and combined study of its members to improve its machinery and to bring it up to the highest possible utility and perfection.

In a system of industry thus rounded and symmetrical, there is an element so essential to its very existence, that it will well repay our passing consideration. How is it, that while banking operations consist not in movements of money, but, as we have seen, mainly in exchanging things produced by human labor for other like things,

and that this is actually done through the operations of banking and commerce, to such an extent as to comprise more than nine-tenths in amount of the aggregate transactions among civilized men, that the respective value of those productions is determined with such precision that no jar or violence occurs in their great movements between the millions concerned for long periods of time, but that commerce incessantly proceeds with order and regularity throughout the world? It is because behind them all stands coined money, the recognized and universal measure of value and quality; the solvent to which every transaction must be submitted so soon as it enters into the channels of trade; the north star around which commerce revolves, the compass by which efficient industry is guided in its course. Two things equal in value to a third thing of steady and determined value and name, are equal to one another or to the multiple of that value as expressed by the name. That third thing in trade is money. People want comparatively little of the thing itself, so long as they are engaged in useful industry, excepting as a test and an assurance of the value of what they really do possess. Banks hold as their substantial assets every variety of other things that are actually required, together with only enough of money to meet the balances of trade and to insure their own fidelity. What they absolutely need is the certain command of pure merchandise, readily convertible into money, and of pure money convertible back again into merchandise, or into bullion of full market value. Therefore, commercial exchanges, stated by their money's worth in dollars or other coins, proceed despite all human greed and selfishness. Any dilution or substitution is manifestly a fraud against industry and against humanity. Money is the admonisher, the reminder, the restraint in the conduct of industrial affairs. A panic is only the sudden and contagious fear lest banks have not thus wisely performed their office, and then the holders of their obligations wildly rush in to claim temporary security by the possession of the universal money, which they do not really want. And so society is secured and kept in check from the constant tendency to excess by abuse in trade.

The fundamental idea of commerce among men lies, after all, in the universal necessity of fair dealing. No power on earth can make it fair, to set afloat as money or as its pretended representative in property, any form of paper promise which does not attach itself to and convey the then existing thing. The first one issued is a discordant note in the sacred harmony of industry, and every added one but tends to the general jargon. And it is because money is also itself the product of industry, and the expressed value measured by the hours or days expended in its production, that it has an inherent right to be what it is, the criterion of labor bestowed by men upon all other forms of labor. Convertibility into coined money is, therefore, the ultimate claim for justice and judgment in the trial of all commercial obli-

gations. A claim acknowledged and sanctified by law in all civilized lands the world around. Not that law gives, or can give, to money its essential value, but because that value being first ascertained and then attested by the image and superscription of Government, whether Kingdom, Empire or Republic, it can go from land to land upon its beneficent service, everywhere the equivalent of the labor which it represents—changing its dress, but never its character.

It is the same substantial thing, whether issued in the first, tenth or twentieth century. In this aspect money is the friend and protector of man, gives him personal independence, promotes a community among nations and makes all the world akin. Contracts between men can be rightly enforced and made compulsory only by payments in such a medium, because it alone confers upon the possessor the power to command anywhere the equivalent human service, and gives true value for value received. Any thing less than this but renews the strife, and does not reach the limit of justice nor vindicate the dignity of human law. Any thing less than this is an arrest of natural by statute law, which can only be excused in a constitutional Government when the constitution itself is impaired, and the laws are silenced by overwhelming calamities of war. Only when Government can create value can it make money. "*To coin money and fix the value thereof, and of foreign coins,*" can only be fairly interpreted to mean, to ascertain the value of foreign coins, and then to *fix* or adjust our own so as to bring us into equitable relations with them.

Standing in this place, gentlemen, and speaking for our profession, I am led to the reiteration of these elemental principles, because, while we have left behind us most of the evil consequences in which our own sad experience has verified their truth, they have not yet secured that full and final confirmation by the decision of the supreme tribunal of the nation, as they should have done, to prevent their disregard for all future time.

On the contrary, there has been no judgment yet pronounced that stands as a solid barrier against the unlimited issue hereafter of baseless promises to pay, nor against the practical debasement of coined money at the caprice of Congress. There are ultimate truths and laws in economic science as sacred and as obligatory as are those of the decalogue, with which they are inseparably allied in all the business of every-day life, and while we may except to either of these laws in practice, we cannot modify their beneficent conditions nor abate their universal claim upon men. It is the highest function and duty of Government to guard the people from the inevitable consequences of the infraction of both these moral and material obligations.

As we meet here in convention, each one of us the pilot of his own independent craft, and all freighted with the industry of the nation, it may be well to take an observation as to the common posi-

tion and course of the whole fleet, and to consult upon the prospect before us.

We are confronted with the fact that not only the paper circulation and currency of the country, but also its coined money, is subject to early and radical change and revolution. The crisis may not be immediate, but it is sufficiently imminent to awaken attention, and we are none too early for its serious consideration. The National Currency Act, passed in 1863, permitted banks to organize for twenty years. Many of them have reached the limit of their life—and about one-half the existing institutions (983), representing more than half (\$186,000,000) the outstanding national bank circulation, will expire in 1884 and '85, and it is a coincidence of great significance that more than half this amount of circulation is secured by three per cent. bonds (\$202,000,000), which can be, and are being, paid off at the pleasure of the Government, and which will to a great extent be called in within the intervening period, under the necessary operation of existing revenue laws. Will these banks renew their existence under the national system, with the necessity of investing capital to protect circulating notes under their new life at the rate of 20 to 30 per cent. premium for four per cent. bonds, or will they to a large extent prefer to relinquish their currency and retire from the system? And if so, with what commercial results to the country, or what substitute will be permitted for such purpose? The idea of nationality throughout this broad land has been strengthened by the eventful history of the last few years, and much more so by the immense extension of railways and telegraphs, which, paying no respect whatever to State lines, and traversing them in all directions, have woven diverse parts of the nation inseparably together into social, commercial and financial unity. This national sentiment, now so potent and all-prevailing, will make it forever difficult, if not impossible, to remove the existing restriction upon private currency issues, and will prevent a return to the ancient and heterogeneous State systems, and it is hoped that the people of this great country have irrevocably pronounced against the greenback heresy which crept in during the agonies of a dismembered nation, when its Constitution was strained and tortured by civil war. The danger lies in delaying the subject until necessity compels some hasty and rash legislation.

It is well, also, to bear in mind, that the thread of affiliation so ingeniously introduced into the national system, whereby banks in the country at large are bound by interest to those in the redemption cities, when once weakened by many retiring members, may suddenly dismember the whole organization. If so, what will take its place? The present indication points to an adherence to the national system, by establishing banks of smaller capitals and limited issues, but this does not meet the public demand for a substantial and reliable currency.

The questions involved in these brief suggestions are of the utmost gravity, and may well invite the earnest counsel of men who can appreciate their importance. If a system of circulating notes is an absolute necessity of trade and commerce, it is equally certain that commerce contains within itself the powers, guards and checks, and all the essential requisites for the perfect protection of such notes, as it does for the protection of its operations of greater magnitude, without wandering for expedients far away into other forms of security. Otherwise, it is an exception to the general perfection of natural law, which is not admissible. The power is certainly there. It is for trained and sagacious bankers to develop it. It must be admitted that the existing paper currency of the country is not the result of a deliberately formed plan. One-half of it is the remainder of legal-tender notes, the amount of which happened to be arrested by Congress when the public tendency was strongly towards greater expansion, and the other half is that of national banks, now fast tending towards dissolution. The importance of the subject demands the most careful investigation, and the combined attention of banks and Congress.

But equally, if not the more important financial question before this nation, is the silent progress of the congressional mandate by which two million dollars, containing each 412 1-2 grains of silver bullion, are minted every month and buried in the vaults of the Treasury as cash in hand. These dollars are not created in response to any commercial demand. In fact, commerce repels them. Yet the mandate is imperative and inexorable. They must be produced in defiance of all rules which govern supply and demand. Congress has solemnly decreed that commerce *shall* want, at least, two million silver dollars a month. These coins have accumulated, and are accumulating, in overwhelming quantity, until new vaults of extraordinary capacity, like artificial silver mines, have had to be constructed to contain them. They lie side by side with gold dollars, under the reign of law commanding them to be of equal value. Yet the Treasury, which executes the law, declares that they are not, because it is daily purchasing the contents of one of them for 81 to 85 cents, with that of the other for 100 cents, and with seven dollars of the one it is making more than eight of the other. And the newspapers all over the land daily declare this to be the difference in the commercial value of the two coins. So patent is the absurdity of the claim, that two pieces of metal of such confessedly unequal intrinsic value can, by any miraculous force of a Government stamp, be instantly endowed with equal power for paying just debts. Here, then, are two coins of the same denomination, yet of such varying inherent power, contending for supremacy, the weaker one sheltering its acknowledged defect under the strong arm of this great nation. The American eagle against justice and against the world. Can such an anomaly constitutionally exist in this free Government?

Here are two weights of different ponderosity, two measures of varying length, both legally required to mete out equal justice ; two chronometers keeping different time, both legally appointed to regulate the hours of labor, and this most remarkable act is done before the world, in the Nineteenth Century, by a nation overflowing in wealth, and holding commercial relations of vast magnitude with other nations of the earth ! The change was inaugurated under the assumption that by launching boldly into the experiment, these two, once equal, but now differing values, would return again to their ancient unity ; but they do not. On the contrary, they obstinately further separate, and refuse to obey the mandate even of the American Congress. It was an open question whether the somewhat sudden change in the commercial value of silver bullion was brought about by natural events, such as the cost of its production in labor, or by the restrictive legislation of European States. But there can be no doubt that if the relative value of the two precious metals to each other was so disturbed or changed by the suspension of the coinage of silver in one great European State, the attempt to restore it by a counter movement, in the compulsory act of the United States Congress, could only give a market *here* to the thing prohibited *there*, and so not only relieve Europe from the absolute necessity of reconsidering the situation, but throw upon this nation the whole inconvenience and responsibility of changing its measure of value from gold to silver standard, and subject us to the immeasurable consequences of the social discord, and to the international disadvantages which our commerce must suffer by the change. While, therefore, commerce securely holds on its independent way, these dollars increase in volume, and the impending conflict of standards casts its long shadow over the business of the nation.

In enforcing the introduction of silver dollars as a new commercial standard, against the natural and instinctive repugnance of banks to become the medium of this great revolution, Congress has decreed "that no national bank shall be member of a Clearing-House Association, which refuses to receive silver certificates in payment of balances."

This law is expressed in ambiguous words, which render its meaning at least doubtful. But accepting them for their probable intent, a greater difficulty becomes apparent, because—

1st. Silver certificates are not legal tender in payment of debts.

2d. Congress certainly cannot deprive banks of their right to claim lawful money of each other, or compel them to accept through Clearing-Houses, what they cannot enforce over their counters upon their own creditors as money payment.

3d. These balances to be absolutely *legal money*, must therefore be paid in silver dollars themselves. These coins, as a general medium of commerce, are the subject-matter of this legislation. Any device

or outside contrivance by which the inconvenience of the thing itself may be evaded, cannot enter into the enforcement of the statute. That such devices as *certificates* are a necessity and yet are not legal money, is at once an admission of weakness both in the law and in its object. What, then, is the practical difficulty in dealing with the thing itself?

4th. The average daily balances in the New York Clearing-House are about six millions.

5th. Six million silver dollars weigh about 375,000 pounds avoirdupois. To move this mass would require 7,500 men every day, each one carrying 50 pounds, or a train of 375 wagons, each drawing 1,000 pounds, through the crowded streets, attended by the necessary convoy of police protectors. The effort of Congress to overcome this physical obstacle by an artifice in legislation, presents a novelty in law, and a coined money that requires the creation of an attendant paper currency to make it practicable or even possible as a commercial medium, is a strange and striking exhibition of the impotency of local legislation in controlling that which is governed by natural law of higher and more universal power.

Of what use then is this strange measure, and why should it continue? If any productive interest can possibly be promoted by a measure which gives less than a dollar's worth for a dollar in trade, the evil result to the whole people infinitely outweighs them all.

With this steady stream of two millions a month running into the Treasury, it is manifestly only a question of time when these silver dollars must become the preponderating quantity in the cash reserve, and when the swelling volume will exceed the limits beyond which they cannot longer there accumulate, but must, from obvious necessity of Government, be paid out and become the current money of the nation.

When that unfortunate moment arrives, the governmental measure for all business of the country will suddenly descend from the standard of to-day, to one of about *five-sixths its value*, and all debts and commercial obligations, and the prices of all property and merchandise must become adjusted to the change. Two standards of so widely different purchasing power cannot simultaneously prevail. Gold coin will be hidden away and be exchanged with other nations whose standard money it is, and who will eagerly seize the occasion to make the trade for it, for their own relief, at the difference in market value, and this great nation will be then irretrievably launched into a *single metallic money, and that of silver*. All this, so self-evident, must have been in contemplation when the measure was adopted. Is the prospect brighter now as the time draws near? Let us view it more minutely. The daily exchanges of property through the medium of banks of the New York Clearing-House alone, average more than one hundred and fifty million dollars. The commercial

difference in the price of this property, whether measured by gold dollars or by silver dollars of this enforced coinage, is about twenty-five millions in one day. Add to this the aggregate sum exchanged through all banks and bankers of the land, and also the large amounts passed between private persons and merchants. Then multiply these enormous figures by the number of days before this new measure of value shall have become equitably adjusted by the adoption of new and corresponding prices of property. To this vast aggregate still further add the total of debts and obligations due from one portion of the people to another, all incurred in the one standard and legally payable by the other; and then consider, if the mind can grasp it, the infinite confusion and injustice in the settlement of business affairs, the unexpected losses incurred, the deep disappointments, the failures and consequent agony and social demoralization involved in this capricious and gratuitous legislation. Remember, also, the enhanced prices, in cheaper dollars, of all articles of necessity purchased by the people, and the always slow progress of the wages of labor in rising to a corresponding height, and the consequent meantime commotion and discontent. Then say whether the men or the Congress who imposed this measure upon the country, in a time of its highest prosperity, or who now refuse to arrest it, as they can, before these certain and inevitable consequences begin, will not meet the popular retribution? Why needlessly repeat in peace and plenty the desperate and doubtful devices of war? Rather than bring again the deplorable evils of a depreciated and deranged currency upon the country, it would be better that the whole amount of these rejected dollars that now encumber the Treasury vaults, be sunk into the sea; or, better still, that they be returned to their original condition of uncoined bullion, and thrown upon the market, a dollar's worth for a dollar, to be retained in this country or carried away, wherever free commerce demands it either for money or otherwise, until it is absorbed in the great tide of exchanges throughout the world, like other productions of human labor. Remove this legal restriction, restore the freedom of coinage, and let the precious metals go forth like all other fruits of the earth, subject to the greater law of supply and demand.

There is an important domain of trade, not included in commercial exchanges, which is filled by that great class of the community who can only give their personal service for compensation required for their simple subsistence. They have nothing in reserve to exchange. It has always been a question whether paper documents of commerce should be issued in small denominations so as to embrace this class, or that they should incur the risks, who do not participate in the benefits of commerce. They include the great retail trade. Here is a substantial reason why paper currency of small denominations shall be restricted and its place filled by coined money. In the minute subdivisions of labor throughout the world, *silver* coin has always and

everywhere served this indispensable purpose, and there is no reason to doubt that it always will. It is an absolute necessity. There is a reasonable question whether in this country commercial documents have not thus encroached upon the legitimate domain of silver money, and whether here is not to be found a full and natural measure of relief.

This would necessitate a large amount of coined silver money, and would require that it be issued in fractional denominations suited to the minuter details of life. It would add financial strength to the country, to the extent of the coin reserve so held by the people. We may thus give room for a *natural* demand in advance of the supply. Whereas, with the present gratuitous coinage of silver dollars, a most *unnatural* supply is to be forced upon the country, without precedent and *without* demand.

Disavowing all partisan spirit, I have suggested reasons enough why the bankers of the country should continue to meet in council, and retain and cherish their organized association, and even make it more compact and effective. We are happily in the enjoyment of an era when peace and order in the land everywhere prevail, when sectional feeling and conflict are in a remarkable degree suppressed. The leading questions before the country to-day, are those only which relate to public economy, industry, thrift and social progress. Among these, and more or less including them all, are those of currency and banking, subjects which, by the lapse of existing institutions, demand early and patient attention. These questions refuse to be sectional. They will not be bound even by *national* restrictions, because they lie subject to the law of labor, which, by the unity of the human race, the diversity of climate and conditions, is continually demanding more and more of human fellowship, reciprocity and fraternity throughout the world.

---

ADVENTURES OF A BANK BOOK.—In 1872, Henry Vail, a farmer of West Chester County, N. Y., was convicted of theft and sent to Sing Sing. He died in prison three years later. Afterwards his wife, Phoebe H. Vail, sold out the farm, upon which was a haystack. The purchaser of the haystack, in moving it, found hidden away a small piece of stovepipe flattened together, inside which was a bank book of the Third Avenue Savings Bank, showing a credit of \$2,909 to Henry Seaman. The book was retained by the finder until after the death of Mr. Vail, when it came into the hands of the widow. She claimed that Henry Seaman and her husband were the same persons, and applied to the Receiver (the bank having failed in the meantime) for a dividend upon the deposit. This was not granted her, and she obtained from the court an order to compel the payment of the dividend. The case was sent to a Referee for trial, who decided against the widow. The court affirmed that decision, and from that an appeal was taken to the General Term.

## BANKING LAW—LATEST CASES.

### REPLIES TO LAW AND BANKING QUESTIONS.

[The Editor of the Law Department of RHODES' JOURNAL will furnish, on application of subscribers, further information regarding any case referred to herein; and will also answer questions in banking law which may be of sufficient general interest as to warrant publication in this Department. A reasonable charge is made for special Replies to be furnished direct to correspondents by mail or otherwise.]

NOTICE.—Owing to want of space, several Law Cases and Notes prepared for this number are crowded out. It is not essential, however, that a certain number of pages should be devoted to Banking Law in every number. Frequently throughout the year all that is of real value may be condensed and published in a page or so. We intend, however, to give in this Department *all the latest decisions* of substantial value to bankers, and notes on new banking and financial law which may be of practical importance. The decisions given are the judgments of the United States Supreme and Circuit Courts and State Courts of last resort, while the notes may be from the lower Courts.

### LIEN OF A BANK ON ITS SHARES.

[*Notes on an important banking case.*]

In addition to the decision in *Anglo-Californian Bank* against the Grangers' Bank, contained in our last issue, there have been several other late decisions on this question. In the case of the *Merchants' Bank of Easton vs. Shouse*, decided by the Supreme Court of Pennsylvania, April 16, 1888, it was held, at common law a corporation has no lien on its stock for a debt due by the stockholder, and that although such a lien was given by statute to banks of issue, it did not embrace savings institutions.

In the case of *Robinson vs. The National Bank of New Berne*, Supreme Court of New York, General Term, decided in April, 1888, it was held that a by-law of the bank forbidding the transfer of stock by one indebted to the bank, and creating a lien thereon, was void, and gave the bank no lien upon the stock.

In *Bohmer vs. City Bank of Richmond*, in the Supreme Court of Appeals of Virginia, decided in April, 1888, where the charter of the bank provided that the bank should have a prior lien upon any stock held by a stockholder for any debt due by him to the bank, and a stockholder borrowed money on his stock from a third person while indebted to the bank, and then became bankrupt, it was held that the charter lien was superior to that of the lender.

In view of the frequency with which this question has been presented for adjudication, we give a brief statement of the law bearing thereon.

In the first place, it is well settled that at common law no such lien exists

independent of possession. The policy of the common law is opposed to what are termed "secret liens," and no corporation can at common law uphold a lien upon its shares for any indebtedness of the stockholder, where the shares are not in its possession.

*Mass. Iron Co. vs. Hooper*, 7 Cush., 183.

*Heart vs. State Bank*, 2 Dev. Eq., 111.

*Steamship Dock Company vs. Heron's Adm'rs*, 2 Penn. St., 280.

Where such a lien exists it is given by statute, and must be created either by a general statute, or some particular act of incorporation, as in the case of the Bank of Richmond above cited.

Where the lien is given by charter or act of incorporation, an assignee of the stock is bound to take notice of its existence.

*Union Bank vs. Laird*, 2 Wheat., 390.

A corporation cannot, under the power to make by-laws for the regulation of the transfer of stock, create or declare a lien upon the stock by by-law, nor refuse to permit a transfer until the indebtedness of the stockholder to the company be paid.

*Bullard vs. Bank*, 18 Wall., 589.

*Driscoll vs. West, Bradley & Cary Manufacturing Co.*, 59 N. Y., 96.

In the case of banks organized under the National Bank Act, not only is there no statutory provision providing for the creation of such a lien, but it has been held that the section prohibiting the making of any loan or discount by an association upon the security of the shares of its own capital stock, expressly restricts the acquiring of such a lien, and that a by-law of a bank organized under that act, declaring such a lien, is void.

*Conklin vs. Second National Bank of Oswego*, 45 N. Y., 655.

*Robinson vs. National Bank*, *Supra*.

## REPLIES TO LAW AND BANKING QUESTIONS.

### A QUESTION OF PROTEST AND RE-PROTEST.

RIDGEWAY, PA., October 2, 1883.

As one of your patrons for several years we would like to have your decision upon the following facts:

A check having been forwarded for collection and remittance, after passing through several banks reaches the bank upon which it is drawn, and the drawer not having funds in the bank to meet it, the holder duly protests for non-payment, and then returns it through the same channel as received, and as thus received by each bank their endorsement is cancelled, and in this way it reaches the original payee.

A few days later the same check, with certificate of protest attached, is again forwarded for collection, and new endorsements made upon it by the banks through which it passed, and this time comes into the hands of a bank in the place of payment other than the one upon which it is drawn, and when presented to the paying bank payment is refused.

*Query*.—Is the holder obliged to again protest it to legally protect itself, or will its full duty have been performed when it makes the demand for payment, and, being refused, returns the check without protest? The second endorsements are made by the same banks that first endorsed it, but do not such second endorsements make *prima facie* a new contract obliging the holder to protest if not paid?

M. S. KLINE, Cashier.

*Answer*.—We are unable to find any authority on this point. In the absence of any adjudged precedent our opinion is that if protest was necessary in the first instance, a second protest would also be necessary. The check was an

order on the banker to pay certain money of the maker. When it reached the bank on which it was drawn it had performed its office, namely, directing the banker to pay. The fact that the banker did not pay occasioned the protest and notice. Now, if the maker again transmits the check to the bank, it in effect becomes, a new order, and the signing afresh by each endorser constitutes a new contract to pay the holder in case the bank does not, and he is entitled to the right to protest and notice in case of non-payment. The former protest would not answer the purpose. That merely certifies to the fact of non-payment on a day which is previous to the time when the new order is transmitted and the new endorsements made. Of course we assume that the check was drawn on a bank in another State, otherwise protest would be unnecessary.

---

#### REPLIES TO QUESTIONS.

*Question.*—Can you explain the process and effect of “crossing” checks, as it is practiced in England? Would it be useful in this country?

*Answer.*—Perhaps this request can best be complied with by quoting a recent English writer, T. R. R. Davison. He says: “Amongst the peculiar features of checks, that which, in all probability, is of the greatest importance, is the power of preventing their payment, unless through the medium of some other banker, *i. e.*, to prevent absolutely their payment in cash over the counter of the drawee. This arrangement adds enormously to the value of checks as commercial instruments, inasmuch as it obviates the dangers and inconveniences to which their negotiation would otherwise be exposed. In order to indicate the above limitation of payment, recourse is had to the so-called ‘crossing,’ *i. e.*, by two parallel lines drawn across the face of the check, thus: | either with or without the name of the collecting banker. Let us suppose, as an example, that B, in London, remits to C, in Liverpool, a check for £2,000, in favor of the latter, on B’s London banker. If this check were uncrossed, the drawee banker would pay the amount of the same to any apparently *bona fide* holder, whose signature corresponded with that of the payee; but, being ‘crossed’ as above, the check in question could not be collected by the holder in person, but would necessarily be presented to B’s London banker by some other bank, who, on their part, would be sufficiently acquainted with the person from whom it was received. As a matter of fact, the experience of many years, and of amounts of fabulous importance, have set the seal of success on this excellent arrangement.” It should be understood that the English law compels the banker to pay any good check, on presentation, if it is endorsed in regular form, even though he may not know the payee. If the endorsement is a forgery, such a payment will hold good against the drawer. As to whether the plan would be worth introducing in this country, practical bankers are able to judge for themselves.

---

THE Secretary of the Treasury has decided not to authorize the redemption of any portion of the gold certificates at the Chicago Sub-Treasury. One of the principal objections was that other cities would demand the same privilege. Western people think the Secretary has erred in failing to recognize that Chicago is the financial centre of the Northwest, and on that account deserves facilities which are now restricted to New York.

**LIABILITY OF BANK OFFICERS.**—Chancellor Runyon recently delivered an opinion in the New Jersey Chancery Court, of interest as affecting the liability of officials of insolvent banks. It was in the suit of Ackerman against Halsey and others. The suit was brought by a stockholder of the defunct Mechanics' National Bank of Newark, against the President and Directors of the bank for neglect of their duties and mismanagement, whereby the bank was ruined through the Cashier's abstraction and misappropriation of its funds. The opinion held that the matter was within the jurisdiction of the court, and that the bank officials were personally liable in equity for the neglect to discharge their duties, and that when the corporation was insolvent and the Receiver refused to bring suit, a stockholder might maintain it. The demurrer of the defendants was overruled. This opinion will enable stockholders to bring suit to recover the amount of their losses from the bank officials.

---

**SWINDLING BY FORGED BILLS OF LADING.**—Among the Canadian news last month was mentioned the fact that Molsons Bank, of Montreal, had been swindled of a large amount by a man known as C. J. Dewey, by means of forged bills of lading. It appears that Kidder, Peabody & Co. and the Maverick National Bank, of Boston, have likewise been involved to some extent. The firm named has procured an attachment on the property of Molsons Bank in New York State, in the course of a suit to recover a balance of \$30,462 paid on the Molsons Bank's drafts to Dewey. The latter has been arrested in San Francisco, and efforts are making to recover the amount of drafts that were found upon him, drawn on Rosheim & Co., of Berlin, for over \$50,000.

---

**IOWA STATE BANKS.**—Forty-eight banks doing business under the Iowa law, have reported to the State Auditor as Comptroller, showing an aggregate capital of \$2,866,793, and total deposits of \$4,439,658. This relative proportion of nearly \$2 of deposits to \$1 of capital, is rather uniform throughout the list, but one bank in a country town makes the ratio six to one. The largest capital is reported from Storm Lake, a Dubuque bank coming next, the latter having the largest deposit line of any in the list.

---

**NOTICE.**—The new **BANKERS' REFERENCE BOOK**—published October 30th—shows a marked improvement over the former numbers. In New York City and Boston the banks are reported by comparative statements for 1881, 1882 and 1883, with all the important items given separately.

By this arrangement subscribers can see at a glance the condition of a bank, at a late date, compared with its condition on certain dates of the two previous years.

It is proposed to follow out the same plan in the next (First '84) issue of the book for all Clearing-House cities, and thereafter as soon as possible for all incorporated banks in the United States.

The book just published will remain in the hands of subscribers until March, 1884, when the First '84 Number will be ready. It is probable that thereafter the numbers will appear in April and October, instead of February and August, as heretofore announced.

The use of the **REFERENCE BOOK** will furnish a valuable safeguard to banks and bankers generally.

Subscriptions received by Bradford Rhodes & Co., 78 William street, New York.

## BANKING AND FINANCIAL NEWS.

(With Comments on the more important matters. This Department also includes General Business News—Notes from Foreign Banking Centres, including Canada—A Complete List of New Banks, Changes in Officers, Dissolutions and Failures—Banking and Monetary Tables—Bankers' Obituary Record, &c.)

### CONVENTION OF THE AMERICAN BANKERS' ASSOCIATION.

The Convention of the Bankers' Association for the year 1883, held at Louisville, Ky., October 10 and 11, was different in some respects from the former meetings of that organization. It was the first meeting of the Association in a Southern city. Chicago, Cincinnati, Saratoga, and other places were proposed, but from the growth and activity of banking interests in the South, and with the hope of having a large delegation from that section and the West, the city of Louisville was chosen.

Then, again, it was believed that a little Southern fire introduced into the meeting, especially the spirit of fraternity and good fellowship which abounds there, was very much needed to give new life and vigor to the association, and insure its further usefulness.

**REPORT OF THE PROCEEDINGS.**—On the opening day, October 10, the delegates began to gather at the Masonic Temple about 10 o'clock. The President of the Association, Mr. George S. Coe, of New York, called the convention to order at 10:30 o'clock, and prayer was offered by Rev. Dr. Craik, of Louisville. Mr. Coe then delivered his introductory address, which was listened to with careful attention and merited expressions of approval from the audience at various points.

Mr. Coe's excellent address is published in full on another page.

The Executive Committee was then called upon to report, but the Chairman stated that they were not ready, and the report was postponed.

The Treasurer of the Association, George F. Baker, of New York, read his report, showing a balance carried forward from last year of \$5,914.30; receipts during this year, \$10,530; total assets, \$16,444.31; expenditures, \$12,046.95; leaving a balance on hand of \$4,397.36.

Hon. John Jay Knox, Comptroller of the Currency, was then introduced and delivered one of the most important addresses of the convention. He was very cordially received, and his remarks were frequently interrupted by applause.

The Comptroller's address is given elsewhere in this issue of the JOURNAL.

Senator Joseph R. Hawley, of Connecticut, was then called upon and made a few well-chosen remarks.

Mr. J. H. Lindenberg, President of the Merchants' National Bank of Louisville, then read a paper upon "Our Banking System and its relations to the people and the Government." Mr. L.'s paper showed careful study and research; if space permits it will appear in our next number.

At the conclusion of his paper, Mr. Lindenberg offered the following resolutions:

**Resolved,** That the adherence by the Government to a policy which will attract to us an abundant supply of gold and silver, the recognized money of the world, and cause its general diffusion among the people in the currents of business, will

encourage the most rapid development of our resources, stimulate to activity our productive industries, and promote the greatest steadiness and stability in the business of the country.

*Resolved*, That a bank-note circulation, absolutely secured, and issued under ample safeguards for its redemption on demand in coin, is necessary for the convenient transaction of the business of the country, and such circulation can best be provided through the continued operation of the National Bank Act, as has been attested by the experience of the past twenty years.

*Resolved*, That the retirement of the United States legal-tender notes by a gradual process, not liable to embarrass the business of the country, will be in accord with the purposes of the Government at the time of their issue; will be the final step accomplishing the full return by the Government to a coin basis; will tend to an increased supply of coin; will give free course to gold and silver in commerce and financial currents, and afford an ample basis for the redemption in coin on demand of bank-note issues.

On motion, the resolutions were made the special order of business for the next day, at 12 o'clock.

A committee of Southern bankers was then appointed to discuss matters pertaining to banking affairs in the South, the discussion to begin the next day, at 12 o'clock.

The committee was as follows: Messrs. John B. Smith, Louisville, Chairman; J. W. Lockwood, Virginia; C. T. Walker, Arkansas; R. M. Nelson, A. G. Parish, and Thomas Henry, Alabama; J. C. Printup, Georgia; Mr. Parkley, Tennessee; General John Echols, Virginia; C. P. Moorman, and Thomas L. Barrett, of Louisville; J. R. Carroll, Texas; Mr. Tarleton, Louisiana; Samuel Norment, Washington, D. C.

The Chair appointed a committee on nominations, with instructions to report the following morning. The following gentlemen composed the committee: Messrs. George H. Stuart, Philadelphia; C. T. Smith, Boston; Thomas Henry, Mobile; William Means, Cincinnati; William P. St. John, New York; J. W. Lockwood, Richmond; Samuel Miller, Minneapolis.

Mr. E. C. Bohné, Cashier of the Third National Bank of Louisville, then read an interesting paper under the following comprehensive title: "The appreciation of gold, as money, or representative of all value and all property; the consequent depreciation of commodities; the influence of that depreciation upon bonds, stocks, commerce, and traffic, with some suggestions as to the action of banks in the premises."

Mr. Bohné's address was replete with statistics, information, and good practical suggestions; it will be published in the next number of the JOURNAL.

The last address of the day was read by Mr. William P. St. John, President of the Mercantile National Bank of New York, on "National Banks and the Currency of the Future." It was listened to with marked attention. Mr. St. John is not old in years, yet he has had wide experience, and ranks among the most active, progressive bankers of the metropolis.

Before the convention adjourned, it was announced that an informal reception would be tendered the members that evening in the parlors of the Galt House.

A large number of prominent gentlemen called during the evening, and the rooms were thronged. The time was very pleasantly spent in friendly intercourse, and everything of a formal nature was removed. Among those present were: Mr. George S. Coe, New York, President of the Association; Hon. John Jay Knox, Washington, Comptroller of the Currency; Mr. William P. St. John, New York; Mr. George F. Baker, New York; J. W. Lockwood, Virginia; C. T. Walker, Arkansas; Mr. Tarleton, New Orleans; R. M. Nelson, Alabama; Samuel Norment, Washington; Senator Jos. B. Hawley, Connecticut; Samuel Miller, Minneapolis; William Means, Cincinnati; George H. Stuart, Philadelphia; J. A. Carroll, Texas; Logan C. Murray, New York; J. Reynolds, New Mexico; H. H. Camp, Milwaukee; Messrs. J. H. Lindenberger, W. B. Belknap, Hon. Henry Watterson, T. L. Barrett, James Leech, E. C. Bohné, H. Verhoeff, Jr., George M. Davis, Col. Clinton McClarty, Louisville, and many others.

On the evening of the second day's session, a reception was tendered the delegates to the convention, and their families, at the Great Southern Exposition.

## SECOND DAY'S PROCEEDINGS.

The second day's session of the Banker's Convention was called to order by the President at 10.30 o'clock.

The attendance was much larger than on the first day, a number of new delegates having arrived since the opening session.

Throughout the day quite a number of spectators came in, so that during most of the proceedings the lower floor of the hall was fairly filled.

After the usual preliminaries, the President said a paper had been prepared by Mr. George M. Davie, on the subject of a substitute for a general bankrupt law, but in deference to the other and regular business of the convention, he had consented to waive the reading of it.

Mr. Davie was introduced, and outlined the idea of his paper, which is to have some legislation by Congress in pursuance to the constitutional provision investing Congress with the control of all commerce. He believed a law could be framed so as to circumvent the evils of unjust preferences, collusive attachments, &c., and avoid the conflict of the various State laws without entailing the ruinous and vicious attendants upon every ordinary bankrupt law.

The paper was laid before the convention, and a resolution bearing on the subject was adopted.

[The resolution will be found, among others, at the close of this report.]

At this point the President read a telegram from Wm. H. Foster, Cashier of the Asiatic National Bank of Salem, Mass., the oldest bank officer in the United States, expressing his regret at not being able to be present.

In accordance with the programme, the next business was the discussion of the general welfare of the South and the particular welfare of the individual States, the speeches to be made by the Southern delegates, and not to exceed five minutes in length.

*Texas.*—Judge Joseph A. Carroll, of Denton, President of the Exchange National Bank, was the first speaker. He said that the "Lone Star State" was so vast in area and resources, that he would not attempt to cover it in his remarks, but would confine himself to his own section of the great State. The varied resources of Texas, he said, were a standing invitation to capital and brains to come there and locate. The richness of the soil, the splendor of the climate, and the vast tracts of land suitable for herding and raising cattle, were all points in its favor. The only things needed were money and energy to push it forward. The State was growing rapidly, but not as fast as the circumstances would warrant. Denton, the place in which he lived, was, ten years ago, a town of only 7,000 inhabitants, and now it had close on to 20,000.

Judge Carroll's remarks were well received, and made a very favorable impression.

*Georgia.*—Mr. J. C. Printup, of Rome (Printup Brothers & Co., bankers), spoke in favor of his State. He referred especially to the great strides she had made in all branches of industry, and the great fields that yet remained unopened and unexplored by commerce. The nearly boundless fields of iron wealth that slumbered in her mountains, and the rich cotton lands which yielded so abundantly, were, in themselves, sufficient to cause Georgia to rank among the foremost States of the South.

Mr. Printup spoke with good effect for this "fair sister of the South."

*Virginia.*—Mr. J. W. Lookwood, of Richmond, of the National Bank of Virginia, was the third speaker, and said that he had not expected to be called upon (Gen. Echols was expected to speak), and was prepared to say but little in behalf of his State, which was, however, old, and able to speak for herself; but though old, was neither blind nor superannuated. It was only of late years that Virginia seemed to arouse and push forward to the front, and she had, probably, made as great strides as any State in the Union. Her material progress of late years had been very great. The curse of the State, however, had been that she was overrun by politicians and sharps, who retarded her progress rather than aided it. When these were once rooted out, as was being done, the effect would be noticeable immediately.

Mr. Lookwood struck the key-note of the situation exactly.

*Kentucky.*—Mr. S. K. Sneed, of Henderson, Cashier of the Henderson National Bank, responded in behalf of his State. He also spoke in a more general sense, and referred to the new South as a vigorous young boy, not mature yet, but with every promise of becoming a giant. He believed that the condition of commerce and the people was better now than had ever been hoped for, and was continuing to advance.

Mr. Sneed's remarks were brief, but to the point.

**Alabama.**—Mr. R. M. Nelson, of Selma, President of the Commercial Bank, spoke in behalf of Alabama. He believed that her condition was better now than it had been before the war, when the State and people had abundance of wealth. After that period came the time of adversity, when the State seemed crushed to earth, never to rise again. She had arisen, however, and now had pushed completely out of the shoals and was sailing in the calm, smooth waters of prosperity.

Mr. Thomas Henry, of Mobile, President of the Mobile Savings Bank, was also called for, and responded in a terse speech. He referred especially to a great project which was being pushed forward in his State—the proposed union of the Coosa and Tennessee rivers by means of a canal, which would open up an entirely new highway of trade, practically another Mississippi, from Kentucky to Mobile.

The remarks of Mr. Henry and Mr. Nelson were apparently well received by the audience.

**Arkansas.**—Hon. Logan H. Roots, of Little Rock, President of the Merchants' National Bank, was next called on, and, in an enthusiastic and vivid style, spoke of the wonderful natural advantages of that State. He spoke glowingly of the opportunities open to capital. "You can have the coal there for the mining of it, so abundant is the supply, and the soil would beat the blue-grass country by far. If you were to deduct all the timber in Alabama, which had been spoken of, from that in Arkansas, you could not possibly notice the difference. The very water flowing from the springs equaled the noted Kentucky whiskey, and was much more beneficial in its results. The cotton produced in the State had never failed to take the first prize at any great fair or exhibition where it was placed." He claimed that another great feature to be proud of was, that they have a free school system, by means of which a boy or a girl can get as good an education as in any State in the Union. No matter what any other State said about her specialties, Arkansas could repeat with emphasis and add "much more." He asked every one present to visit the great Louisville Exhibition, and see the Arkansas display there which speaks for itself.

The address of Mr. Roots made a strong impression.

This closed the discussion by the Southern delegates. Each speaker was closely listened to and repeatedly applauded. It was the South pleading for material aid and encouragement from the richer North and East; it was the magnificent raw products appealing to quickening capital, and it was evident that the voice fell upon listening and appreciative ears.

The business next in order was the report of the committee on nominations, which was made by the Chairman, Mr. George H. Stuart, of Philadelphia. In doing so, he said that the committee had urged upon Mr. Coe to accept the office of President again, but he had positively declined to serve, and the list of officers they selected was: President, Lyman J. Gage, of Chicago; First Vice-President, Logan C. Murray, of New York; the balance of the officers were re-elected.

Mr. Lyman J. Gage, the newly-elected President of the Association, is Vice-President and chief moving spirit of the First National Bank of Chicago, one of the most successful banking institutions in the country. Mr. Gage is well and favorably known as a conservative, and, at the same time, a progressive and public-spirited banker. He is President of the Chicago Bankers' Club, an organization for the interchange of views on the practices of banking, and the consideration of the various financial questions which arise from Congressional legislation.

Mr. Gage not being present, Mr. Murray was called to the chair, which Mr. Coe gracefully relinquished in a few appropriate remarks, expressing his regret at severing his connection with the office, but stating that he would still remain an active member of the Association and do everything in his power to serve it.

Mr. Murray then addressed the convention, and expressed his thanks for the honor of being called to preside over the deliberations of so able a body. Mr. Murray is Vice-President and chief executive officer of the United States National Bank of New York; he was formerly connected with a Louisville bank, and is well and favorably known there as well as throughout the South.

Following is a complete list of the officers of the association for 1883-84:

## PRESIDENT.

LYMAN J. GAGE, Vice-President First National Bank, Chicago, Illinois.

## FIRST VICE-PRESIDENT.

LOGAN C. MURRAY, Vice-President United States National Bank, New York, N. Y.

## VICE-PRESIDENTS.

ALABAMA—Thomas Henry, President Mobile Savings Bank, *Mobile*.  
 ARIZONA—M. W. Kales, of Kales & Lewis, *Phoenix*.  
 ARKANSAS—Creed T. Walker, Cashier German Bank, *Little Rock*.  
 CALIFORNIA—William Alvord, President Bank of California, *San Francisco*.  
 COLORADO—William B. Berger, Cashier Colorado National Bank, *Denver*.  
 CONNECTICUT—George A. Butler, Cashier National Tradersmen's Bank, *New Haven*.  
 DAKOTA—E. C. Eddy, Vice-President First National Bank, *Fargo*.  
 DELAWARE—Edward Betts, President First National Bank, *Wilmington*.  
 DISTRICT OF COLUMBIA—J. A. J. Creswell, Pres't Citizens' Nat'l Bank, *Washington*.  
 FLORIDA—D. G. Ambler, of Ambler, Marvin & Stockton, *Jacksonville*.  
 GEORGIA—L. J. Hill, President Gate City National Bank, *Atlanta*.  
 IDAHO—John Huntton, Cashier First National Bank of Idaho, *Boise City*.  
 ILLINOIS—Calvin T. Wheeler, President Continental National Bank, *Chicago*.  
 INDIANA—W. H. English, President First National Bank, *Indianapolis*.  
 IOWA—F. H. Griggs, President Citizens' National Bank, *Davenport*.  
 KANSAS—John R. Mulvane, President Topeka Bank, *Topeka*.  
 KENTUCKY—J. W. Proctor, Cashier Central National Bank, *Danville*.  
 LOUISIANA—J. J. Tarleton, Cashier Citizens' Bank of Louisiana, *New Orleans*.  
 MAINE—William W. Thomas, President Canal National Bank, *Portland*.  
 MARYLAND—Douglas H. Thomas, Cashier Merchants' National Bank, *Baltimore*.  
 MASSACHUSETTS—William H. Foster, Cashier Asiatic National Bank, *Salem*.  
 MICHIGAN—Henry P. Baldwin, President Detroit National Bank, *Detroit*.  
 MINNESOTA—Henry P. Upham, President First National Bank, *St. Paul*.  
 MISSISSIPPI—W. H. Perkins, Cashier Capital State Bank, *Jackson*.  
 MISSOURI—Rufus J. Lackland, President Boatmen's Savings Bank, *St. Louis*.  
 MONTANA—Samuel T. Hauser, President First National Bank, *Helena*.  
 NEBRASKA—H. Kountze, President First National Bank, *Omaha*.  
 NEVADA—J. W. Eckley, Agent Bank of California, *Virginia City*.  
 NEW HAMPSHIRE—J. E. Fernald, Cashier National State Capital Bank, *Concord*.  
 NEW JERSEY—E. F. C. Young, President First National Bank, *Jersey City*.  
 NEW MEXICO—Jefferson Reynolds, President First National Bank, *Las Vegas*.  
 NEW YORK—H. G. Nolton, Vice-President Bank of Commerce, *Buffalo*.  
 NORTH CAROLINA—William E. Anderson, President Citizens' National Bank, *Raleigh*.  
 OHIO—Hon. Benjamin Eggleston, President Second National Bank, *Cincinnati*.  
 OREGON—Henry W. Corbett, Ex-Senator U.S. & V-President First Nat. Bank, *Portland*.  
 PENNSYLVANIA—Joseph Patterson, President Western National Bank, *Philadelphia*.  
 RHODE ISLAND—J. W. Vernon, Cashier Merchants' National Bank, *Providence*.  
 SOUTH CAROLINA—Andrew Simonds, President First National Bank, *Charleston*.  
 TENNESSEE—Nathaniel Baxter, Jr., President First National Bank, *Nashville*.  
 TEXAS—Benjn. A. Botts, President City Bank, *Houston*.  
 UTAH—L. S. Hills, Cashier Deseret National Bank, *Salt Lake City*.  
 VERMONT—Hon. L. P. Polaud, President First National Bank, *St. Johnsbury*.  
 VIRGINIA—John P. Branch, President Merchants' National Bank, *Richmond*.  
 WASHINGTON—Dexter Horton, of Horton & Co., *Seattle*.  
 WEST VIRGINIA—J. Nelson Vance, President Exchange Bank, *Wheeling*.  
 WISCONSIN—N. B. Van Slyke, President First National Bank, *Madison*.  
 WYOMING—Edward Iverson, President Wyoming National Bank, *Laramie City*.

## EXECUTIVE COUNCIL.

JACOB D. VERMILYE, President Merchants' National Bank, New York City.  
 GEORGE S. COE, President American Exchange National Bank, New York City.  
 EDMUND D. RANDOLPH, President Continental National Bank, New York City.  
 MORTON McMICHAEL, JR., Cashier First National Bank, Philadelphia, Pa.  
 EDWARD TYLER, Cashier Suffolk National Bank, Boston, Mass.  
 J. W. LOCKWOOD, Cashier National Bank of Virginia, Richmond, Va.

HENRY MARTIN, President Manufacturers and Traders' Bank, Buffalo, New York.  
 WILLIAM G. DESHLER, President National Exchange Bank, Columbus, Ohio.  
 EDWARD B. JUDSON, President First National Bank, Syracuse, N. Y.  
 FREDERICK D. TAPPEN, President Gallatin National Bank, New York City.  
 WILLIAM E. GOULD, Cashier First National Bank, Portland, Maine.  
 CHARLES PARSONS, President State Savings Association, St. Louis, Mo.  
 HOEL H. CAMP, President First National Bank, Milwaukee, Wisconsin.  
 WILLIAM H. REAWN, President National Bank of the Republic, Philadelphia, Pa.  
 LOGAN H. ROOTS, President Merchants' National Bank, Little Rock, Arkansas.  
 AUGUSTUS H. MOSS, President Moss National Bank, Sandusky, Ohio.  
 J. H. LINDENBERGER, President Merchants' National Bank, Louisville, Kentucky.  
 R. M. NELSON, President Commercial Bank, Selma, Alabama.  
 EDWARD S. BUTTS, President Vicksburg Bank, Vicksburg, Miss.  
 J. THOS. SMITH, Cashier National Bank of Baltimore, Baltimore, Maryland.  
 R. B. LANGDON, Vice-President City Bank of Minneapolis, Minnesota.

*Treasurer:* GEORGE F. BAKER, President First National Bank, New York; *Secretary:* EDMUND D. RANDOLPH, President Continental National Bank, New York; *Corresponding Secretary:* GEORGE MARSLAND, 247 Broadway, New York.

After the election of officers, Mr. Henry Watterson, editor of the "Courier-Journal," was brought forward, and made a very happy and timely speech on the New South.

Mr. Lindemberger, of Louisville, then brought up his resolutions, which were offered at the close of his address, at the first session of the convention, and supported them in some explanatory remarks.

After quite an animated discussion, the resolutions were finally adopted. [These are embodied in resolutions 3, 4 and 5, below.]

Shortly after 3 o'clock the convention adjourned *sine die*, to meet next year at the call of the Executive Council.

#### RESOLUTIONS OF THE CONVENTION.

Subjoined is a recapitulation of the principal resolutions passed by the Convention of the American Bankers' Association, October 10th and 11th, 1883:—

1. *Resolved*, That the President, Vice-Presidents and Executive Council of this Association be instructed to prepare and digest a plan, to be presented to Congress, for the continuance of the national banking system.

2. *Resolved*, That the interests of the country demand the enactment by Congress of some regulation of commerce among the States, equivalent to a National Bankrupt Law, equitable in all its provisions for debtor and creditor in all sections of the country.

3. *Resolved*, That the adherence by the Government to a policy which will attract to us an abundant supply of gold and silver, the recognized money of the world, and cause its general diffusion among the people in the currents of business, will encourage the most rapid development of our resources, stimulate to activity our productive industries, and promote the greatest steadiness and stability in the business of the country.

4. *Resolved*, That a bank note circulation, absolutely secured, and issued under ample safeguards for its redemption on demand in coin, is necessary for the convenient transaction of the business of the country, and such circulation can best be provided through the continued operations of the National Bank Act, as has been attested by the experience of the past twenty years.

5. *Resolved*, That the retirement of the United States legal-tender notes by

a gradual process, not liable to embarrass the business of the country, will be in accord with the purposes of the Government at the time of their issue; will be the final step accomplishing the full return by the Government to a coin basis; will tend to an increased supply of coin; will give free course to gold and silver in commerce and financial currents, and afford an ample basis for the redemption in coin on demand of bank note issues.

6. *Resolved*, That it is the sense of the American Bankers' Association, that the compulsory coinage of the standard silver dollar of 412 and a-half grains, is against the welfare of the country, and that they recommend to Congress the discontinuance of such coinage, except in such quantities as the demands of the business of the country may require.

7. *Resolved*, That the retirement of the United States legal-tender notes, as rapidly as these notes can be retired, without, at the same time, contracting the legal-tender circulating medium, will be the final step accomplishing the full return by the Government to a coin basis.

---

*Whereas*, Many persons throughout the country, whose capital consists principally of printed letter heads, a round table and blank checks, are obtaining credit by adopting the name of bank or bankers; and

*Whereas*, It is the duty of the law-making powers, whether National or State, to protect the citizens of their respective States from fraudulent practices; be it

8. *Resolved*, That the Executive Council be requested to inquire what legislation is necessary to suppress these fraudulent practices, and suggest such remedies as will require all persons seeking public patronage as bankers, or receiving deposits as such, to make such exhibits, by publication or otherwise, under some general license system, as will satisfy the proper officials that they are possessed of the amount of capital represented by such person or firm to be liable for the debts created in their capacity as banks or bankers.

9. *Resolved*, That the Executive Council be authorized, if, in their judgment, deemed advisable, to make such suggestions to the Legislatures of the several States, or to Congress, as they may deem best calculated to carry out this resolution.

---

*Whereas*, Many collections are presented for payment and returned unpaid because the drawees refuse to pay exchange; and

*Whereas*, Every business should provide for its own collection expenses; therefore,

10. *Resolved*, That we recommend banks and bankers throughout the country to discourage the practice of city merchants or others in making drafts on their customers in other places payable with exchange and cost of collection, or either; and that we recommend such inclusion of exchange in said drafts be disregarded by banks in making such collections, substituting therefor a reasonable charge for services rendered, except where reciprocal accounts are kept.

---

*Whereas*, The force of circumstances, alike beyond our control and contrary to our wishes, has severed the ever-pleasant relations between our late

presiding officer, Geo. S. Coe, and the members of this Association; therefore, be it

11. *Resolved*, That we tender to our retiring President our sincere thanks for his uniform, courteous, faithful and intelligent manner of presiding over the deliberations of the Association during the entire period of his incumbency.

---

The basis of all bank circulation should be capital, and as the bonds of the national and State Governments are founded upon debt, indorsed by the good faith of the community, it may be well to consider that the possibility exists that the country may become agitated by internal strife, and the moral support withdrawn from the national bonds, in which case the value that attaches to them at present may become a thing of the past. The greatest industry of the country upon which national bank circulation might be based is the transportation interest. The country is growing and railroads are multiplying. The money invested in their construction is secured for the most part by first mortgage bonds upon a real property, which represent capital, and if issued under Government supervision, at the face value of the actual cost of construction, and the Treasury Department should have the power to regulate their issue, and also to compel the payment of the interest, as well as to provide for a sinking fund by the railroad corporations, we should have a basis for the bank circulation superior in every way to that of to-day. The adoption of some such a plan as suggested, would prevent the promoters of a railroad property from deceiving the public, and would tend to improve the investment value of all railroad securities, and might prove to be the solution of the railroad problems of the day, as well as giving us a bank circulation founded upon real property. We think the question worthy the consideration of financier, railroad official, and politician.—“*Daily Indicator*,” *New York*.

At this time any proposal of a sensible plan to preserve the bank circulation is welcome. The above has the merit of offering a permanent basis for it, and at the same time providing for an improvement in the management of the railroad companies. An amendment that at once occurs to us, to the plan as above stated, is that the mortgage bonds should be issued to (say) one-half of, instead of the full cost of construction. Again, it does not appear in what way the Government supervision could be brought about. Perhaps it might be accomplished without difficulty by leaving it optional with the companies; those who did not comply with the terms proposed being denied the privilege of having their bonds accepted as a basis for circulation. It is evident, however, that it would be hard to get the legislation necessary to the accomplishment of the scheme.

**The Barron Case.—Report of the Auditors.**—The auditors in the celebrated case of the Dexter Savings Bank against the estate of the late J. Wilson Barron, the former Cashier of the bank, have made their report to the Supreme Court. The report states that the balance due from the Barron estate to the bank is \$2,011, including interest, and concludes as follows:—“We do not feel called upon to form any opinion upon the question of murder or suicide of Barron, because we are satisfied from the evidence that there was substantially no money in the bank at the time of Barron's death; and whether Barron came to his death by murder or otherwise, the amount of money in his possession in the bank at that time was so inconsiderable as not to materially affect the situation of the parties litigant, or change the result of our conclusions.”

Of the amount which the auditors decide that the Barron estate is indebted to the bank, \$567.91 is for interest. Among the principal items is \$378, necessary to balance the account on the cash-book; \$650 for five special deposits, made at the bank, but not entered by Barron; \$520 charged for a United States

bond just prior to Barron's death, and which the auditors decide was not purchased. The report of the auditors does not settle the case, and either party has the right to ask for a trial by jury.

**Government Receipts.**—The officers of the Treasury will not be able to make an estimate of the receipts for the present fiscal year until about the middle of November, as the returns from the remote Custom-Houses will not be received until that time. Although the receipts have been large thus far, the officers say that they are not necessarily a fair guide to the receipts of the year, as there were many causes which would explain a large income for the first quarter which might not exist afterward. The Commissioner of Internal Revenue will make his estimates on the returns for the first three months of the fiscal year, July, August and September, and not include October, as has been the previous custom in his office.

The amount of the Treasury receipts is a matter of much interest at present, as affecting the payment of the debt and the national bank circulation, as well as future legislation on taxation, but the official estimates of the probable surplus are generally of slight value. There are several causes for this, but the principal one probably is the lack of any responsibility for errors in the estimates, which is a natural result of the fact that Congress pays hardly any attention to the figures or recommendations of the executive branch of the Government.

**Postal Matters.**—A statement prepared for the use of the Post-Office Department shows that the total receipts from the postal service during the fiscal year ended June 30, 1888, were \$45,508,022. The expenditures were \$42,816,700, the principal items being railway transportation, \$155,180; compensation of postmasters, \$10,315,394; Star Route service, \$4,661,526; post-office clerks, \$4,367,079; letter carriers, \$3,173,306; railway postal clerks, \$3,688,082. The surplus revenue during the year was \$2,691,992.

The report of C. F. McDonald, Superintendent of the Money Order Bureau of the Post-Office Department, for the fiscal year ended June 30, 1888, shows that the total number of money orders of all kinds issued was 9,273,882, of an aggregate value of \$125,047,238. The total number paid was 8,751,077, of the value of \$120,407,468, and the amount of fees received was \$1,272,060.

It is reported that the Postmaster-General has been considering suggestions, in connection with his annual report, to increase the limit of the weight of letters paying single postage. Mr. Davis, Acting Third Assistant, thinks that if letters weighing less than an ounce were carried for a single postage, that the Department would not suffer. We think that if a sliding-scale rate were adopted it would inure to the benefit of the Department, and, which is more important, to the public: That is, say, two cents should be charged on the first ounce or half ounce, and one cent on each extra ounce. Certainly city postage should be reduced to one cent.

**Pacific National Bank of Boston.**—The report of Receiver Price to the Comptroller, which was made public on October 15, shows that \$414,000 in cash has so far been collected, \$291,000 by the Receiver and the rest by the Treasury Department. Of this \$100,791 has been paid to depositors; the Treasury holds something over \$40,000, and Mr. Price has enough in his hands to make up \$60,000. The rest has been paid out in various ways for expenses, except an item of \$42,000 spent in buying up first liens to save the bank's interest in various real estate on which it held secured mortgages. Of the assets not yet realized, Mr. Price estimates \$190,000 as "good," \$112,600 as "doubtful," and \$155,600 as "worthless." Besides these assets, there are the pending suits against the stockholders, amounting to \$961,800. This is the 100 per cent. assessment on the stock, of which only \$5,000 has been paid in. No doubt is felt in the Treasury Department that these suits will all be won ultimately. It is understood that the suits against the stockholders will be pushed at once.

The fact that the amount paid out by the Receiver for expenses amounts to

\$171,000, or 41 per cent. of the amount of cash received, has been severely commented upon. The Boston "Standard" says it "shows that the management of the Receiver is as weak and extravagant as that of the ex-President of the bank. With such figures as these before them, what hope have the depositors, or stockholders, of anything like a just settlement?"

**A Reminder of the Last "Distribution."**—Messrs. Willoughby & Alexander, who, as counsel for the State of Virginia, recently filed in the Treasury Department a claim for a large sum of money said to be due that State under the Deposit Act of June 23, 1836, have prepared a like demand in behalf of the State of Arkansas.

Possibly the States have a technical right under the act of October 2, 1837, to call upon the Secretary for the remainder of the loan made under the Deposit Act, but the wisdom of this course is doubtful. Under the Deposit Act, the Government lent to the States three-quarters of its surplus of 37 million dollars, but before the other quarter became payable the financial revulsion of 1837 swept over the country, making the further payment impossible. The Government has never asked for the return of the sums lent, and to now lay claim to the benefit of the act of 1836 might bring up the matter of liability of the States for the amounts they already owe.

**Taxation of Bank Stock.**—"Governor Butler shows his ignorance, or worse, by telling the farmers of Northampton that while their farms are always taxed at their full value, bank stock is often hidden and escapes taxation. The fact is that no property is more sure to be taxed than bank stock. Every share is returned to the tax commissioner and taxed at its full market value. The bank pays the whole, and the amount is reckoned among the expenses and the dividends reduced to that extent."—*Worcester, Mass., "Spy."*

We have no inclination to join in the campaign against Governor Butler, any more than in any other political contest of a partisan nature; but it is often necessary to expose the falsity of demagogic attacks against the banks that are addressed to the least intelligent of the people so often in these times. We believe that the assertion of the "Spy," that bank stock is more certain to be taxed than any other property, will apply to the country generally as well as to Massachusetts.

**Chicago Gold Certificates.**—Secretary Folger has decided that it is incompatible with the interests of the public service and with public convenience, to provide a distinctive issue of gold certificates for Chicago.

It is stated that the refusal was made on the ground that if this privilege should be granted to Chicago it would be impossible for the Treasury to refuse to grant the same privilege to other cities, and this would be entirely impracticable. The clerks who have charge of this branch of accounts would not be able to keep the necessary books for separate certificates of all the Sub-Treasury cities. It is supposed the Chicago bankers will endeavor to secure legislation which will grant what the Secretary has refused.

**Church Banking Institutions.**—The Assignees of the Augustinian Society have presented a final account to the Insolvency Court of Salem, Mass., showing the amount received from the sales of personal and real estates to be \$161,141; allowances, \$155,577; balance for creditors, \$5,564.

The outcome of this, and of Archbishop Purcell's plan of combining religion and banking, should be a warning to all who may ever contemplate such a thing again. It is announced that priests are to be forbidden by the head of the Romish church from engaging in banking enterprises; but the State bank-

ing laws should provide for uniform supervision and rules for all savings institutions.

**An Easy Swindle.**—William K. Rice, engaged in the grain business at Audubon, Iowa, has decamped, leaving the local banks in the lurch to the extent of \$5,325. He began by getting money on his bills of lading. After the banks had acquired measurable confidence he began to neglect to attach his freight vouchers, handing them in a day or two later. Then he made a general haul.

This is a comparatively easy and safe method of swindling, and one which the banks can only prevent by constant vigilance and rigid adherence to business-like methods.

**National Bank Statements.**—On another page will be found the statement of the condition of the national banks of New York City on October 2. The statement of the condition of the national banks of Chicago shows little change in their financial condition compared with the June report. The loans are about the same in the aggregate. The deposits exhibit a falling off of about \$7,000,000, which may be attributed to the withdrawal of balances by interior banks. The cash means of the institutions are equal to about 48 per cent. of the liabilities. Their amount of United States bonds on hand has been slightly reduced, and other securities increased. The earnings of the banks indicate an active and profitable business, exceeding those reported one year ago by \$300,000. The report as a whole reflects a conservative course, and exhibits financial strength. It also indicates that they are in a condition to assist those interests which necessarily require financial aid during the winter months—the live stock and packing branches of trade.

Compared with the June statement, the October statement of the Philadelphia banks shows the aggregate capital of the banks to be unchanged at \$17,558,000, and the aggregate surplus to be \$8,710,808, an increase of \$20,000. The aggregate surplus of the thirty-two national banks is about 49½ per cent. of their aggregate capital. Thirty of these thirty-two banks form the Philadelphia Clearing-House, the two not members being the Germantown and the Second National.

**New York Sub-Treasury.**—Last month we gave a summary statement of the business done at most of the Sub-Treasuries during the last fiscal year. Following is the record of the New York Sub-Treasury, which has been received since: During the fiscal year ending June 30, 1888, the receipts reached \$856,212,454. The disbursements, including the various amounts sent to the Department, were \$731,821,761, leaving on hand a balance of \$124,390,708. The receipts on account of customs were \$151,869,018; gold certificates, \$71,350,000; internal revenue, \$2,728,890; Post-Office Department, \$8,299,509; transfers, \$141,888,031; disbursing accounts, \$274,154,756; interest accounts, \$42,398,464. The principal disbursements were as follows: Account of Treasury drafts, \$315,073,315; disbursing accounts, \$267,464,449; Post-Office drafts, \$7,153,975; account of bullion (assay office), \$11,048,820.

**Stock Exchange Rules.**—The Governing Committee has adopted the following new rule for the New York Stock Exchange: "That parties receiving stocks have no right to deduct damages for non-delivery without the consent of the parties delivering the same. That when stocks are loaned at a premium, the said premium applies (in the absence of a renewal) only to the day on which they are loaned." Section 1 of Article VIII. of the by-laws, which provides that in cases of non-delivery of securities at the prescribed time, the party in default shall be liable for the damages that may accrue, was amended by adding the words: "And all claims for such damages must be made before 3 o'clock on the next business day after the default."

**Extending the Clearing System.**—The Chicago Board of Trade Clearing-House was started in the last week of September, being managed on the Osterberg system, which was tried at the New York Stock Exchange some months ago. The Manager, Mr. Charles H. Lunt, sends us a statement of the business done in the second week. It shows that the total clearings were, \$1,538,890; balances, \$452,626. The number of items cleared was 29,896, which, Mr. Lunt says, relieved the banks from handling that many checks. The New York Produce Exchange is about to try the system.

**The Bank of Del Norte, Col.,** of which Mr. Asa F. Middaugh is proprietor, has just completed a new and handsome bank building. About the time the Bank of San Juan removed to Alamosa, leaving Del Norte without any banking facilities, Mr. Middaugh opened a banking branch to his mercantile business. It has proved a great convenience, as well as very successful. This has been especially noticeable since it has been in charge of the Cashier, Mr. S. M. Janney, formerly for a number of years with Kountze Bros., of New York.

**New York Savings Bank.**—Mr. Stephen W. Jones, a Trustee, was recently elected President of this institution in place of Richard H. Bull. The new office of Treasurer has been created, to which Mr. Frederick Hughson, also a Trustee, has been elected, while Mr. John Webber has been appointed Counsel in place of Mr. Hughson. The amount due depositors on July 1st was \$5,165,586; excess of assets over liabilities, \$1,202,412.

**Nevada Bank of San Francisco.**—At the annual meeting of the stockholders, held in October, Messrs. J. C. Flood, J. G. Fair, J. W. Mackay, J. S. Flood, and J. L. Brander, who hold all of the stock, were re-elected Directors. The net profits for the year were \$750,000. Half a million of the profits were carried to the reserve fund, making the total present reserve fund \$5,000,000.

**The Legal-Tender Test Case.**—In the Supreme Court of the United States on October 9th, the long pending legal-tender case of Julliard against Greenman was again postponed upon motion of William Allen Butler, of New York, and set for hearing on the first day the court shall be in session after Christmas.

**Commercial National Bank of Reading, Pa.**—The President, William Young, has confessed judgment in favor of the bank for \$72,857, for borrowed money. It is said to be the intention to wind up the bank's affairs, and it is expected that any loss will fall upon the stockholders only.

**William J. Best,** of New York receivership fame, is now President of the Midland North Carolina Railway Company. He has been charged by the Treasurer with misappropriating funds of the company, and with concealing the books for the purpose of covering up the delinquencies.

#### MISCELLANEOUS BANK ITEMS.

— It is reported that Andrew J. Miller, stock-broker, of Augusta, Ga., has assigned.

— Bradley Barlow, President of the failed Vermont National Bank, at St. Albans, has been adjudged insolvent.

— The Fifth National Bank of New York has become a member of the Clearing-House Association.

— Frederick Sylvester and Frederick Bain, members of the Philadelphia Stock Exchange, have suspended.

— Nathaniel Niles, Vice-President of the Tradesmen's National Bank, has been elected President, to succeed the late Richard Berry.

— The Board of Managers of the Fifth Ward Savings Bank, of Jersey City, are paying a third dividend of 10 per cent. to the depositors.

— The Seventh Ward Bank of New York has sold its old building to the New York Metal Exchange, for \$42,000.

— E. A. Des Marets, stock-broker of New York, was unable to meet his engagements on October 24th. His liabilities are said to be not large.

— Bachman Brothers, Portland, Oregon, brokers and bankers in a small way, have failed, with \$70,000 liabilities, and no assets.

— The Corn Exchange Bank of New York recently lent the Produce Exchange \$125,000 on notes running for one year, at 2 70-100 per cent.

— The Exchange Bank of Tupelo, Miss., has assigned. It has been doing business since 1875, with a paid-in capital of \$20,000. F. M. Goar was President.

— Mr. Henry P. Morgan, formerly Vice-President of the Brooklyn (L. I.) Savings Bank, has been chosen President, in place of Mr. Hosea Webster, recently deceased.

— The Philadelphia Mint Superintendent, Col. Snowden, recently bought 20,000 pounds of nickel, at 91 cents per pound, the lowest price ever paid by the Government.

— Mr. J. Elliott, Manager of the Indianapolis Clearing-House, severed his connection with that institution on October 6, to enter into new business relations. Mr. W. W. Wollen is the new Manager.

— Spurious half and quarter dollar pieces have been freely circulated in Atlanta, Ga., recently. They are said to be of correct weight and true ring, and well executed, excepting the letters, which are ill-formed.

— The First National Bank, of Chicago, has notified its 180 clerks to furnish bonds of surety, desiring them, at the same time, to procure the bonds of the Guarantee Company of North America.

— The Bank of Farmington, Minn., has made an assignment. The assets are estimated at \$50,000, and liabilities (principally to depositors), \$30,000. It was started in 1876, with \$25,000 capital, Daniel Underwood being President.

— The new Electric, Manufacturing and Miscellaneous Stock Exchange has leased rooms in the Duncan Building, corner of Pine and Nassau Streets, New York, with a view to beginning active business.

— George William Ballow & Co., bankers and brokers, of New York and Boston, who suspended in August, resumed business on October 8, being prepared to pay all obligations in full.

— The deposits in the savings banks of California on July 1st, last, were \$56,507,163, an increase of more than \$3,000,000 within a year. The number of depositors, Jan. 1, was 74,250, about one in twelve of the population.

— The Wall Street National Bank has been changed to a State bank, under the title of The Wall Street Bank. The officers, location and capital (\$500,000), remain unchanged. The capital may be increased to \$5,000,000 if desired.

— The banks of Watertown, N. Y., have given notice that after Nov. 1 they will receive Canadian bank bills only at a discount of 2 per cent., and Canadian subsidiary silver coin at a discount of 20 per cent.

— Edward J. Dunning, the Wall Street note-broker, has again been sued on a claim of taking notes to dispose of and not accounting for the proceeds. The plaintiff is James E. Miller, and the amount involved \$122,142.

— Samuel G. Rogers, President of the Farmers' Bank of Carlisle, Ky., recently, in the course of some litigation over his father's will, thought that his two brothers were about to attack him, and shot them both.

— Sheldon B. Shaw, Charles N. Foster, of Henry Clews & Co., T. B. Baldwin, formerly of Peters & Pell, and Duncan D. Parmly, of Marquand & Parmly, have been admitted to membership in the New York Stock Exchange.

— The United States Grand Jury has indicted Kirtland M. Fitch, the defaulting Cashier of the Warren, O., Second National Bank, for "embezzlement and perjury." The lightest penalty for these offenses is five years' imprisonment.

— Check forgers are busy in various parts of the country. A man has been operating in the South with checks signed B. C. Vincent, drawn on the City National Bank of Bridgeport, Conn., with a spurious stamped certification.

— It is reported that W. S. Kirker, Teller of the Second National Bank, Ironton, O., has disappeared, and that the officers have discovered that \$16,625 is missing, as well as the Teller's own notes and securities to the amount of \$4,100.

— John K. Snyder, President of the Exchange Bank of Chenoa, Ill., which made an assignment at the end of September, has been arrested on a charge of swindling and embezzlement, preferred by two of his creditors, who assert that he received funds, knowing the bank was insolvent.

— The corner-stone of the new Dime Savings Bank building was laid recently at Court and Remsen Streets, Brooklyn, N. Y. A box, placed in the stone, contained the

original charter of the bank, the banking laws of the State, a copy of Mayor Low's message of 1883, and a number of other public documents. The building will be of granite and brown stone, and will cost \$260,000.

— Counterfeit ten dollar silver certificates were recently put in circulation at Grand Forks, Dak., and James McGovern, Charles Chambers and Walters were arrested. At their headquarters in Duluth, Minn., were found plates for printing \$5 and \$10 notes of the Bank of Montreal.

— The young lady money counters (or countesses) at the National Bank Redemption Agency, in Washington, are apt to have sores on their hands, wrists and heads. These are caused by the arsenic in the money. They work from 9 until 4 o'clock, and receive \$75 a month.

— Further proceedings have been taken against Lawrence Brainerd, President of the St. Albans (Vt.) Trust Co., based on charges of misappropriation of funds belonging to others. He was, on October 17, discharged from custody, being under arrest for refusing to answer questions regarding the failure.

— William G. Barritt, a broker of Philadelphia, has been held to answer a charge of conspiracy made by Captain Augustus Boyd, who alleges that securities to the value of \$23,000 were deposited with Cattell & Barritt, for the purpose of carrying a quantity of Reading railroad scrip for him, and that they were misappropriated.

— There are glowing reports of gold discoveries in Dakota, and the Schieffelin exploring party are satisfied that the Yukon River country, Alaska, contains quantities of gold, which is, however, in a region so remote, that it will not yet pay for mining. Who can tell when a discovery will be made that will upset all the present calculations involved in the silver question?

— A. H. Burley, Receiver of the Cook County National Bank of Chicago, has petitioned United States District Judge Blodgett for permission to sell the remainder of the real estate and other assets belonging to the defunct bank. One dividend of 5 per cent. has been paid, and from the proceeds derived from the above sale (about \$40,000) a second and final dividend will be paid.

— In June last, John L. Colby obtained a judgment for over \$18,000 against Augustus S. Peabody, a member of the New York Stock Exchange, whereupon the latter transferred his seat to his son. Mr. Colby has now procured an injunction against the Messrs. Peabody, to prevent a further transfer of the seat during the pendency of proceedings to have it sold in order to liquidate the judgment.

— The First National Bank of Union Mills, Union City, Pa., failed in 1882. A report from there says that the stockholders, who were all men of wealth and position, are now penniless. Some of them have obtained situations as day laborers. One, a Mr. Harmon, worried over his losses to such an extent that it has affected his brain, and he recently attempted to commit suicide.

— The money of Tonquin is made of lead, and very bad lead at that. The coins are thin disks strung on twine, and for a gold or silver piece the traveller receives more of them in exchange than he can carry away. A lady going shopping is followed by a coolie, who carries her purse and groans under the load. Of course such a cumbersome medium hampers commerce, and one of the first reforms which the French hope to introduce is a silver currency.

— The New Orleans National Bank has instituted a suit for \$100,000, in the District Court at Washington, against the Postmaster-General, on account of the latter's order of September 19, forbidding the delivery to the bank of registered letters and the payment to it of money orders, on account of its relations with a lottery company. A petition, signed by many bankers and business men of New Orleans, requests the President to revoke the order.

— Mr. Alexander Mitchell, of Milwaukee, was received by his townsmen with many demonstrations of welcome on the recent occasion of his return from an extended European tour. He is said to be the wealthiest man in the Northwest, his fortune being estimated at \$80,000,000, but is respected chiefly for the enterprise and shrewdness which have been instrumental in building up the industries of his town and State.

— A writer describes the personal appearance of Comptroller Knox, thus:—"His personal appearance is quite striking. His tall, well-nourished figure, dignified carriage, topped by a head as massive as a maul, gray moustache and hair, bright eyes twinkling behind golden-rimmed glasses, heavy jaws, expressive of resolution, and under lip slightly pursed, apparently by habits of calculation, constitute an *ensemble* calculated to attract a second look at the man, aside from the knowledge of his fame."

— An interesting suit has just been decided in the New Jersey Court of Chancery. It was brought by W. B. Williams, the Receiver of the broken Mechanics' and Laborers' Savings Bank, to recover \$3,000 on a mortgage assigned to the bank by O. T. W. McDonald, one of the bank's Directors. It was shown that Mr. McDonald was desirous of assisting his friend, Michael Murphy, to purchase a piece of property in Jersey City. He took a mortgage on the property, but when he went to the bank for money to make the advance, he was induced to let the bank make the advance, and he assigned the mortgage. It was not paid, and hence the suit. The Chancellor held that the risk was the bank's, and gave judgment for the defendant.

— A New York Custom-House broker had occasion, not long ago, to pay \$1,000 in duties for one of his patrons. He went to a bank in Wall Street, presented a check for \$1,000, and received ten bills, each of the denomination, as he supposed, of \$100. He carried the money to the Custom-House and handed it to Cashier Newell, who carefully counted it over and shoved back to the broker nine of the bills, with the quiet remark: "You seem to have made a little mistake." The broker scanned the numerals on the bills, and was astonished to find that the Teller had given him ten one thousand dollar bills instead of ten one hundred dollar bills. The error was rectified at the bank. This was not a case of "No mistakes corrected after leaving the counter."

**NATIONAL BANK STATISTICS.**—Statement of the Comptroller of the Currency on November 1, 1888, showing the amounts of the National Bank Notes and of Legal-Tender Notes outstanding at dates of the passage of the Acts of June 20, 1874, January 14, 1875, and May 31, 1878, together with the amounts outstanding at date, and the increase or decrease.

\*Circulation of National Gold Banks not included in the above, \$743,984.

JOHN JAY KNOX,  
Comptroller of the Currency.

## NOTICES OF NEW BOOKS.

---

*Congested Prices.* By M. L. SOUDDER, JR. Chicago: Jansen, McClurg & Co. 1883.

We are indebted to Mr. J. P. Wintringham, broker, of Pine street, New York, for a copy of this neat work, which is comprised within the modest compass of 52 pages, bound in flexible cloth. By "*Congested Prices*," the author means the condition of prices at times when trade is in an abnormal and unhealthy state, and his work is an inquiry into the causes of commercial crisis and panics. The subject is an interesting one alike to the practical business man and the economist, and it is here treated with that care and absence of dogmatism which proves the writer to be an earnest seeker after truth. In the course of his investigation he shows how the theories of cycles in trade (such as the theory that a crisis may be expected in England once in ten years, and in this country once in twenty years) are not founded upon any reason. No great revulsion in prices has been a repetition of others: each has its own peculiar characteristics and causes. To the question, why are business men so blindly unreasonable in times of panic? the author replies that it must be because the business world is a mob of ill-taught and ill-trained novices. "When the business of the country is controlled by men of sound courage and good training, financial panics will be impossible." We think he might have added that when our business men keep themselves better informed regarding the general course of trade, and regarding commercial history, it will become almost impossible for crises to occur. The book is well worth a reading for what it suggests as well as what it contains.

*Prison Labor. Some Considerations in Favor of Maintaining the Present System.*

This is the title of a thick pamphlet, seemingly prepared by John S. Perry in view of the November election in New York State. It has much more than the ordinary value of ephemeral productions of the kind, and contains many strong arguments against changing the present contract system of managing the prison industries (under which the prisons have become self-sustaining), for the old public account system, which always entailed an immense annual loss.

In the "American Counting-Room" for October, the book-keeping department is well represented in an elaborate article on the "Comparative Anatomy of the Cash-Book," a suggestive paper on "E. E." (errors excepted), and a study of the mathematics of the equation of payments. A sketch, with portrait, is given of the present able Comptroller of New York City. The excuse for this is found in the fact that this important office happens to be held by Mr. Grant, who is at once a gentleman, a scholar and an excellent man of business, but nothing at all of a professional politician. There are other articles of interest.

*Facts about Silver in a Nutshell*, is the title of a card, containing in the space of 8x14 inches a large amount of information and figures regarding silver. The compiler is George W. Edelman, formerly connected with the Philadelphia Mint, and afterwards with the Assay Office, New York. The tables make it possible, at a glance, to determine the value in cents, of the ounce of standard silver and pure silver, subsidiary coins, the standard dollar, trade dollar, etc., at any British market price. Besides this, there is a digest of useful information about silver, its price, coinage, and value of the £. It is a timely and useful production. (Sold by John Polhemus, printer, New York. Price 50 cents.)

## NEW BANKS, CHANGES, FAILURES, ETC.

---

**New National Banks.**—The Comptroller of the Currency furnishes the following statement of National Banks organized since our last report:

(Names of officers and further particulars regarding new National Banks will be found under their proper State headings in this list.)

- 3061—First National Bank, Holton, Kansas. Capital, \$50,000.
- 3062—Farmers' National Bank, Franklin, Tennessee. Capital, \$50,000.
- 3063—People's National Bank, Langhorne, Pennsylvania. Capital, \$50,000.
- 3064—First National Bank, Princeton, Kentucky. Capital, \$50,000.
- 3065—First National Bank, Texarkana, Texas. Capital, \$50,000.
- 3066—First National Bank, Concordia, Kansas. Capital, \$50,000.
- 3067—Quarryville National Bank, Quarryville, Pennsylvania. Capital, \$80,000.
- 3068—Marshall National Bank, Unionville, Missouri. Capital, \$50,000.
- 3069—Whitney National Bank, New Orleans, Louisiana. Capital, \$400,000.
- 3070—German-American National Bank, Peoria, Illinois. Capital, \$100,000.
- 3071—First National Bank, Greene, Iowa. Capital, \$55,000.
- 3072—First National Bank, Clay Center, Kansas. Capital, \$50,000.

### ALABAMA.

**SELMA.**—City National Bank; W. P. Parrish, Assistant Cashier.

### CALIFORNIA.

**CAMPTONVILLE.**—J. P. Brown & Co.; succeeded by Bank of Camptonville (incorporated). Capital, \$30,000. President, A. G. Miller; Cashier, J. P. Brown.

**OAKLAND.**—First National Bank; A. D. Thomson, Cashier, in place of C. H. Twombly; no Assistant Cashier in place of A. D. Thomson.

**SACRAMENTO.**—National Gold Bank of D. O. Mills & Co.; converted into a currency bank under provision of the Act of Congress of February 14, 1880, authorizing the conversion of gold banks.

**SAN FRANCISCO.**—First National Gold Bank; James Moffitt, Vice-President, in place of G. A. Low.

**STOCKTON.**—Stockton National Bank; in voluntary liquidation.

### COLORADO.

**TELLURIDE.**—Bank of San Miguel (W. E. Wheeler); incorporated. President, T. A. Davis.

### DAKOTA.

**BISMARCK.**—Capital National Bank; E. H. Wilson, Cashier, in place of W. G. Nixon; E. H. Bly, Vice-President.

**CEDARTOWN.**—Hardnicke & Co. are reported here.

**ELLENDALE.**—Wm. Becker transacts a general banking business, in connection with his law practice, during suspension of Dickey County Bank.

**LA MOURE.**—Robinson, Button & Co. are in business here. Style, Bank of La Moure.  
**SHELDON.**—Bank of Sheldon; Cashier, I. C. Gaylord.

**WHITE LAKE.**—Aurora County Bank has been recently opened.

Bank of Mitchell has located a branch here. Cashier, Herman Huysen.

#### DELAWARE.

**MIDDLETOWN.**—People's National Bank; G. D. Kelley, Cashier; Wm. R. Cochran, Vice-President.

#### GEORGIA.

**AUGUSTA.**—Andrew J. Miller (Broker); assigned.

**GREENSBORO.**—Copelan, Seals & Armor succeed E. A. Copelan.

#### IDAHO.

**LEWISTON.**—Lewiston National Bank; N. W. Brearley, President, in place of J. Brearley; W. F. Kittentbach, Cashier, in place of N. W. Brearley; Jasper Rand, Vice-President.

#### ILLINOIS.

**ASSUMPTION.**—Hight Bros. & Moore are in business here, under style of Bank of Assumption. Cashier, Benj. F. Hight.

**PEORIA.**—German Banking Co.; now German-American National Bank. Capital, \$100,000. Same officers.

**STERLING.**—Sterling National Bank; James R. Bell, President, in place of B. C. Church.

#### INDIANA.

**BROOKVILLE.**—Brookville Bank (John R. Goodwin & Son); John C. Shirk, formerly of Merchants' Bank, Petoakey, Michigan, purchases a one-half interest. Style of firm after January 1, 1884, Goodwin & Shirk.

**INDIANAPOLIS.**—Clearing-House Association; W. W. Woollen, Manager, in place of Jonathan Elliott.

#### INDIAN TERRITORY.

**VINITA.**—A company has been organized here to establish a national bank with a capital of \$50,000. Comptroller Knox has had application for authority to organize as soon as charter is granted by the Council of the Nation.

#### IOWA.

**CLINTON.**—Farmers' and Citizens' Savings Bank; James P. Gage, President, in place of J. P. Gage, deceased; R. C. Van Kuran, Cashier, in place of Bidwell Gage, resigned.

**COUNCIL BLUFFS.**—Council Bluffs Savings Bank; Charles E. Dix, Cashier, deceased.

**ESSEX.**—B. M. Webster; now Commercial Bank. President, B. M. Webster; Cashier, I. H. Foskett.

**GREENE.**—Shell Rock Valley Bank; succeeded by First National Bank. Capital, \$55,000. President, A. Slimmer; Cashier, C. H. Wilcox.

**MT. PLEASANT.**—First National Bank; W. E. Keeler, Assistant Cashier.

**NORA SPRINGS.**—Exchange Bank; reorganized. President, T. Woodford; Vice-President, D. A. Wheeler; Cashier, E. S. Wheeler.

#### KANSAS.

**BURTON.**—J. E. Howard; now Bank of Burton. Capital, \$20,000. President, W. A. Dally; Cashier, J. E. Howard.

**CLAY CENTER.**—First National Bank has been authorized to commence business. Capital, \$50,000. President, H. H. Taylor; Cashier, F. H. Head.

**CONCORDIA.**—First National Bank has been authorized to commence business. Capital, \$50,000. President, Hamilton M. Spalding; Cashier, F. J. Atwood.

**GREAT BEND.**—Barton County Bank; G. H. Young, Cashier, in place of J. F. Rogers

**HANOVER.**—The Hanover Banking Co. has been incorporated, and opened for business October 10. President, Chas. E. Sumner; Vice-President, W. H. Sumner; Cashier, T. B. Crewitt.

**HOLTON.**—Holton Exchange Bank; succeeded by First National Bank. Capital, \$50,000. President, Thomas P. Moore; Cashier, James P. Moore.

**MOUND VALLEY.**—Condon & Gandy are reported here.

**WASHINGTON.**—First National Bank; J. S. Long, President, in place of J. C. Lowe; A. S. Raoe, Cashier, in place of F. H. Head.

**WILLIAMSBURG.**—Finley & Ohlson (Williamsburg Bank); succeeded by W. S. Finley.

#### KENTUCKY.

**LEBANON.**—National Bank of Lebanon; F. Wilson, President, in place of R. M. Spalding; no Vice-President in place of F. Wilson.

**PRINCETON.**—First National Bank has been authorized to commence business. Capital, \$50,000. President, R. B. Ratliff; Cashier, G. E. Hamilton.

#### LOUISIANA.

**BATON ROUGE.**—First National Bank; G. T. Webster, Acting Cashier.

**NEW ORLEANS.**—Whitney National Bank has been authorized to commence business. Capital, \$400,000. President, James T. Hayden; Cashier, James M. Pagaud, Jr.

#### MASSACHUSETTS.

**CONCORD.**—Concord National Bank; Henry F. Stone, Cashier, in place of H. J. Walcott.

**MALDEN.**—First National Bank; Arthur T. Tufts, Cashier, in place of C. Merrill.

#### MICHIGAN.

**BROCKWAY CENTRE.**—John W. Lamon is reported here.

**DETROIT.**—State Savings Bank has been recently organized. President, D. Hamilton; Cashier, Robert S. Mason.

**IONIA.**—Second National Bank; Thomas M. Loomis, Acting Cashier.

**ISHPEMING.**—Joseph Sellwood & Co. are in business here.

**MIDLAND.**—First National Bank; in liquidation.

**PAW PAW.**—First National Bank; E. Smith, President, in place of A. Sherman.

**PETOSKEY.**—Shirk Brothers (Merchants' Bank); transfer business to Curtis, Wachtel & Co.

**ROSCOMMON.**—Converse & McKenna are reported here.

**SAULT DE ST. MARIE.**—Meade & Fowle are in business here. Style, Chippewa County Bank.

#### MINNESOTA.

**BENSON.**—Bank of Benson; applies for State charter. Capital, \$25,000; President, John Clague; Vice-President, Peter Sutherland; Cashier, Frank M. Thornton.

**FARMINGTON.**—Bank of Farmington; assigned to Dennis Follett Hastings.

## BANKERS' OBITUARY RECORD.

---

**Alley.**—George Bolton Alley, who died in New York, in October, was formerly a member of the New York Stock Exchange, having joined in 1868. For some years he acted as broker for the late Cornelius Vanderbilt, but retired from active business some years ago. He was one of the best known and best liked of the amateur sportsmen of this section.

**Berry.**—Richard Berry, President of the Tradesmen's National Bank, of New York, died October 22, 1883. Mr. Berry was for many years identified with financial and other interests of New York, and in every capacity possessed the esteem and regard of those with whom he came in contact. Here he was born in the year 1804. At the age of 20 he was employed in the office of Nevins & Co., Wall street brokers. Three years later he was engaged as a clerk in the Tradesmen's Bank, his connection with this institution extending over a period of 56 years. He was successively Teller, Cashier, and President, holding the last-named office for 33 years. He was one of the organizers of the Clearing-House; was one of the founders of the Union League Club, and was credited with mainly inducing the New York banks to assist the Government during the war. Mr. Berry was a Director in the Broadway Fire Insurance Company, the Williamsburg City Fire Insurance Company, and the First National Bank of Brooklyn. He was a prominent member of the Reformed (Dutch) Church. His death was sudden, as he was busy at the bank as late as the preceding Saturday. He leaves two sons, Oliver F., who is Cashier of the Tradesmen's Bank, and Jacob, a broker in Broad street. Two testimonials of respect to the deceased are published, herewith.

**Brearley.**—John Brearley, President of the Lewiston (Idaho) National Bank, died August 4th, at the age of 41 years.

**Coe.**—Charles E. Coe, Vice-President of the Metropolitan Savings Bank, and Vice-President of the Stuyvesant Safe Deposit Company, of New York, died October 12. He was born in New York in 1821, and was one of its best known business men. He was for many years a partner in the firm of Coe & Anderson, cotton merchants, but retired over 30 years ago, in order to superintend his estate, being a large owner of warehouse and dock property. Besides being connected with the above institutions, he was for many years a Director of the Bowery Savings Bank, and was a member of the Produce Exchange.

**Cutts.**—The Hon. Marcena E. Cutts, President of the Oskaloosa (Iowa) National Bank, died September 1, 1883. He was born in Orwell, Vt., in 1833, where he received a common school education, afterwards supporting himself through an academical course. In 1853 he went to Wisconsin, where he taught school and read law, and in 1855 removed to Oskaloosa, Iowa, where he was admitted to the bar. He was elected to the State Legislature in 1861, and to the State Senate in 1863, and held the office of Attorney-General of Iowa from 1872 to 1877. In the political canvass of 1880 his health was shattered and he never fully recovered. His career is an example of what may be accomplished by the exercise of rare courage and perseverance.

**Glover.**—J. L. Glover, Cashier of the East Tennessee National Bank, of Knoxville, Tenn., died August 12, aged 47 years.

**McWilliams.**—James McWilliams, President of the Griggsville (Ill.) National Bank, died July 31, aged 81 years.

**Moore.**—William D. Moore, a member of the New York Stock Exchange, and of the firm of W. D. Moore & Co., brokers, died October 8th, at the age of 37 years. He was born in New York, and became a member of the Exchange in 1869.

**Smith.**—C. Farquharson Smith, Manager of the Bank of British North America, Quebec, died September 12, 1883, aged 55 years.

At a meeting of the Board of Directors of the Tradesmen's National Bank of New York, held October 26, 1883, the following resolutions were adopted :

WHEREAS, Death has removed from our midst our late President, Richard Berry, Esq., after an uninterrupted connection with this bank extending through 56 years, during which time he has served its interests in varied offices, and for the past 23 years as its executive head ; therefore,

*Resolved*, That we recognize the loss of an able counselor, a considerate chief, a skillful financier, who united in his business conduct the best early traditions of banking in this city, with the enlightened and broad views required by the more complex commerce of later years. That in the management of this bank through many periods of commercial disaster he has exercised a zeal, sagacity and prudence which have maintained its prosperity unimpaired, and have gained the confidence alike of shareholders and the public.

*Resolved*, That we feel that in his relations with ourselves as Directors his uniform courtesy, candor and confidence have strengthened the ties of official intercourse during the many years into warm personal regard, and we mourn him as a friend no less than as a business associate.

*Resolved*, That we tender to his family our sincere sympathy in their bereavement, and desire to convey to them this expression of our esteem and sorrow for the departed.

SAMUEL HUNT, }  
WM. A. POND, } *Committee.*  
JOHN GREENOUGH. }

At a meeting of the Clerks of the Tradesmen's National Bank, held October 23, 1883, the following preamble and resolutions were unanimously adopted :

WHEREAS, Death has suddenly removed from among us Richard Berry, President of the Tradesmen's National Bank ; therefore,

*Resolved*, That in the decease of Richard Berry we mourn the loss of an honest, conscientious, faithful and upright man.

*Resolved*, That we cannot let this opportunity pass without, in this manner, publicly testifying to the uniform kindness, regard and consideration which, during a period of more than fifty years, he exhibited to all those with whom he came in contact, and especially to the clerks of the institution of which he was the honored and respected head.

*Resolved*, That we shall ever cherish the most sincere and heartfelt esteem and admiration for one whom we not only recognized as a faithful and efficient officer, but also as a firm and lasting friend.

*Resolved*, That a committee from this body attend the funeral, and that a copy of these resolutions be forwarded to the family of the deceased, and that the Directors be requested to enter them upon the records of the institution.

B. S. RAYNER,  
L. HALSEY,  
R. I. NEVINS,  
*Committee on Resolutions.*

## CONDITION OF THE NATIONAL BANKS.

Abstract of reports made to the Comptroller of the Currency, showing the condition of the National Banks in the United States, at the close of business on Oct. 2, 1883; and, for comparison, an abstract of the report of June 22, 1882.

## RAILROAD AND INVESTMENT NEWS.

(A synopsis of information regarding Railroad and other Corporation affairs of interest to Bankers, Investors, &c. *Classification:* I. New Issues. II. Reports. III. Miscellaneous Investment News.)

### I. NEW ISSUES.

**NORTHERN PACIFIC RAILROAD.**—A circular has been issued to the preferred stockholders, calling a meeting on November 20, to act on a proposition to issue \$20,000,000 second mortgage bonds. The Directors have ratified an arrangement with a syndicate represented by Drexel, Morgan & Co., August Belmont & Co., and Winslow, Lanier & Co., to take \$18,000,000 of the bonds at 87½, less 5 cents commission. Two suits have been begun in the New York Superior Court to restrain the issue, and a temporary injunction was granted, returnable on November 1. The case has been removed to the United States Circuit Court.

**SAVANNAH, ALBANY & GULF RAILROAD.**—Sherman, in his march to the sea, tore up the Savannah, Albany & Gulf, now the Savannah, Florida & Western Railroad, and when the war was over \$450,000 of new bonds were issued, endorsed by the city of Savannah, to put the road in repair. The road defaulted and the city refused to pay them. A suit, begun in behalf of the bondholders, resulted in favor of the bondholders. This brought the city to terms. New bonds are now to be issued, \$1,300 to every \$1,000 of the old issue, covering principal and unpaid interest. These run thirty years and bear 5 per cent. interest.

**SOUTH PENNSYLVANIA RAILROAD.**—This company, belonging to the Vanderbilt system, has filed notice of an increase of capital stock from \$14,000,000 to \$20,000,000, and an issue of \$20,000,000 of bonds.

**DENVER & RIO GRANDE RAILROAD.**—Since the election of Mr. Frederick Lovejoy, of Philadelphia, as President, the Vice-President, L. H. Myers, has resigned, and Adolph Engler has been chosen in his place. The Directors have issued a circular to say that it has been determined to issue general mortgage bonds to provide means for the capitalization of rental for rolling stock. These will be 30 year, 5 per cent. bonds, convertible into stock, and issued "up to such an amount that the bonds of the company issued, or the issue of which is authorized by the terms of prior mortgages, together with the bonds of the company issued under said general mortgage outstanding at any one time, shall never exceed either \$30,000 per mile of finished road, or \$50,000,000 in the aggregate." The stockholders were offered as follows, the option closing on October 30: "\$5,000,000 in said 5 per cent. general mortgage bonds, convertible into stock, and \$5,000,000 in the capital stock of the company, on the following terms and conditions: Subscribers will receive securities in the following proportions: For every \$750 cash subscribed and paid in instalments as hereinafter stated, they will receive \$1,000 in said 5 per cent. general mortgage bonds, and \$1,000 in said capital stock. Fractional certificates will be issued."

**THE LEHIGH COAL & NAVIGATION COMPANY** have arranged with Drexel & Co. for the extension of their first mortgage loan, known as the Lehigh 6s of 1884, maturing April 1, 1884, for 30 years and 3 months, till July 1, 1914. The amount thus extended is five millions of dollars at par, and the rate of interest 4½ per cent., payable quarterly.

The present rate of interest on this loan is 6 per cent., so that the company will save by this arrangement \$75,000 per annum. The privilege of the extension is first offered to the present holders until December 31, 1883, upon presentation of their certificates at the company's office before that date. After that date the option will absolutely cease, the remainder being taken by Drexel & Co. The properties upon which this mortgage is secured are the coal lands and improvements of the company near Mauch Chunk; also, the Lehigh and Susquehanna Railroad above Mauch Chunk; and also the Lehigh Canal.

**ROCHESTER & PITTSBURGH RAILROAD.**—Application has been made to the New York Stock Exchange to list \$3,250,000 of the consolidated first mortgage 4 per cent. bonds of this company. The bonds are numbered from 1,301 to 5,100, and are a lien on the Buffalo and Pittsburgh Division.

**THE PHILADELPHIA & READING RAILROAD COMPANY** has asked to have \$24,300,000 of deferred income bonds placed on the regular list of the New York Stock Exchange. These bonds are entitled to the earnings of the company up to 6 per cent., after the payment of 6 per cent. dividend on the common stock. They sold in London, New York, and Philadelphia, under the regular prospectus of the company, each shareholder being entitled to subscribe for a proper proportion.

**CANADA & ATLANTIC RAILROAD.**—An injunction has been granted to David Stanton and A. P. Balch, American railroad contractors, against the Grand Trunk Railway Company's issuing for sale \$3,000,000 worth of first mortgage bonds of the Canada & Atlantic Railroad. The arguments will be heard in the Superior Court at Montreal on November 30.

**PITTSBURGH, FORT WAYNE & CHICAGO RAILROAD.**—It is officially stated that at the next meeting of this company, a proposition will be submitted by which the 7 per cent. stock guarantee by the Pennsylvania Railroad Company as lessee of the former, will be made exchangeable for 7 per cent. first mortgage bonds, guaranteed by the lessee to an equal amount, and to run 499 years, or until the termination of the lease.

**THE PULLMAN PALACE CAR COMPANY** has sent a formal notice to the New York Stock Exchange of an intention to increase the capital stock 10 per cent. The stockholders of the company, at their recent annual meeting, authorized an increase of the stock not to exceed 20 per cent. The new stock, amounting to \$1,323,000, is to provide for 121 additional cars.

**ADDITIONS TO THE NEW YORK STOCK EXCHANGE LIST.**—The Governing Committee of the Stock Exchange listed a large number of new stocks and bonds on October 24th.

The application of the Northern Pacific Railroad Company, to have \$3,750,000 additional of its first mortgage and land grant gold bonds placed on the regular list, was granted.

The committee listed \$1,500,000 of 5 per cent. gold bonds of the Chicago, Milwaukee & St. Paul Railway Company, and \$820,000 of the 6 per cent. consolidated mortgage bonds of the Chicago, St. Paul, Minneapolis & Omaha Railway Company.

The Oregon Short Line Railway Company asked to have \$8,500,000 of additional stock and \$4,500,000 of new 6 per cent. first mortgage bonds placed on the regular list. Both requests were granted.

New first mortgage 6 per cent. bonds of the Milwaukee, Lake Shore & Western Railway, to the amount of \$479,000, were listed.

It was decided that hereafter the bonds of the Cleveland, Columbus, Cincinnati & Indianapolis Railway shall be designated on the stock-list as follows: Those stamped as released from sinking fund provision to be called consolidated mortgage bonds. Those without stamp to be called consolidated mortgage sinking fund bonds. The latter may be stamped "released," on presentation to the United States Trust Co.

Mortgage bonds Nos. 1 to 6,676, inclusive, of the Chesapeake, Ohio & South-Western Railroad Company were placed on the regular list. These bonds are for \$1,000 each, dated Jan. 23, 1882, and due Aug. 1, 1911. They will bear interest at the rate of 5 per cent. per annum until Aug. 1, 1887, and 6 per cent. thereafter. The mortgage securing the first series of bonds covers the railroad between Louisville and Memphis, about 400

miles, and all interest in the Cecilian Branch, and is issued at the rate of \$19,000 per mile. The mortgage to secure the second series covers the same premises, and is for a gross amount of \$4,250,000, or at the rate of \$11,000 per mile.

**GREELEY, SALT LAKE & PACIFIC RAILROAD.**—A first mortgage deed of trust from the Greeley, Salt Lake & Pacific Railroad Company to Frederick L. Ames and Ezra H. Baker, of Boston, has been filed in Colorado. This is to secure coupon bonds to be issued by that company to an amount not exceeding \$15,000 per mile. It is a Union Pacific corporation.

**AMERICAN RAPID TELEGRAPH.**—A mortgage of this company to the Boston Safe Deposit & Trust Company, for \$3,000,000, payable on September 15, 1883, at 6 per cent. interest, has been filed in the Register's office at White Plains, N. Y.

## II. REPORTS.

**OHIO & MISSISSIPPI RAILWAY.**—The result of the recent election of Directors is to leave the Baltimore & Ohio party in control. The books of the Receiver show that the net earnings for the year ended June 30, 1883, were \$1,121,364; 1882, \$844,612; 1881, \$1,118,626; 1880, \$1,280,261. On account of the increase in earnings, the Directors have proceeded to execute the mortgage and print 3,000 of the bonds, ready for issue when the condition of the market will warrant it. There are now outstanding \$12,452,000 mortgage bonds, and \$14,532,800 of other debts, of which \$2,080,800 are now due. The issue of \$3,600,000 of bonds is intended to meet this indebtedness and to procure needed facilities. The annual interest charge on the funded debt will then be \$1,032,700. Adding \$78,000 per annum for the sinking fund makes the total fixed charges \$1,110,700, which is not quite \$20,000 more than the average earnings for the last four years.

**CENTRAL RAILROAD & BANKING CO. OF GEORGIA.**—The report for the year ended August 31, 1883, shows that the total earnings from all sources amounted to \$4,977,807, the total expenses were \$2,950,115, leaving the net earnings \$2,027,691. Out of this were paid fixed charges, amounting to \$1,382,517, and \$600,000 in dividends. The surplus for the year was \$45,174. A dividend of 8 per cent. was paid. In view of the good standing of the company, the Board decided not to reduce the usual dividend, although the surplus was small. Under the railway laws of Georgia, with a largely increased business, the Central and Southwestern roads earned only 4½ per cent. on their combined capital stock.

**MOBILE & OHIO RAILWAY.**—The report for the year ended June 30, 1883, shows the following earnings:

|                               | 1882-83.    | 1881-82.    |
|-------------------------------|-------------|-------------|
| Total gross earnings.....     | \$2,271,058 | \$2,164,274 |
| Total operating expenses..... | 1,641,024   | 1,602,145   |
| Net earnings.....             | \$630,034   | \$562,129   |
| Summary of income account:    | 1882-83.    | 1881-82.    |
| Net earnings.....             | \$630,034   | \$562,129   |
| Total disbursements.....      | 616,626     | 562,000     |
| Balance, surplus.....         | \$13,408    | \$129       |

The amount of stock, \$5,320,600, and bonds, \$16,290,000, were unchanged during the year. There were added to the sinking fund \$55,500 of the first preferred debentures, costing \$45,314. The amount of the sinking fund invested in these securities on June 30, 1883, was \$256,000.

**WESTERN UNION TELEGRAPH CO.**—At the annual meeting in October, the old Board of Directors were re-elected, excepting that John Hay was chosen in place of E. D. Worcester, and Frank Work in place of L. G. Simmons. The report for the year ended June 30, 1883, shows that there was an increase of 13,234 miles of line (or 10 per cent.) and 58,358 miles of wire (or 15½ per cent.) as compared with the previous year. The earnings increased \$2,340,937 (about 14 per cent.) and the net profits \$542,279 (about per cent.) over those of the preceding year. The company has 432,726 miles of wire and 12,917 offices; 40,581,177 messages were handled during the year, the receipts from

which were \$19,454,902, against \$17,114,165.32 last year. The expenses for the year just closed were \$11,794,553, leaving a net profit of \$7,660,349. Out of this were paid \$467,000 for interest and sinking fund, and \$5,199,000 in dividends to stockholders, leaving \$1,994,000 to be added to the surplus, making the total surplus \$3,658,553. In addition to the stocks of leased companies, aggregating about \$12,000,000, most of which is owned by the Western Union, that company also holds assets of the market value of \$10,023,054.

On October 2, the New York Court of Appeals decided that the issue of \$15,000,000 of stock, to purchase the Atlantic & Pacific and American Union Companies, was legal. The stock of the Western Union is therefore definitely settled at \$80,000,000.

**EAST TENNESSEE, VIRGINIA & GEORGIA RAILROAD.**—The report for the year ended June 30, 1883, shows that 1,086 miles were operated at the latter date, the mileage having been increased 197 miles during the year. The total earnings were \$3,776,754; total expenses, \$2,388,701; net earnings, \$1,388,052.

**GULF, COLORADO & SANTA FE.**—The report for the year ended July 31, 1883, shows that there were 538 miles complete at that date, against 430 miles on July 31, 1882. In order to complete and equip the road, the Directors found it necessary to issue a second mortgage, 6 per cent. 40 year bond of \$13,000 per mile, the issue to be limited to \$2,000 per mile the first year. This has been authorized by the stockholders, and the proceeds will cancel the floating debt. The further issue is limited to \$1,000 per mile per year. The earnings were as follows:

|                            | 1883.       | 1882.       |
|----------------------------|-------------|-------------|
| Gross earnings.....        | \$2,068,957 | \$1,251,073 |
| Operating expenses.....    | 1,328,463   | 836,980     |
| Net earnings.....          | \$740,494   | \$414,093   |
| Summary of income account: | 1883.       | 1882.       |
| Net earnings.....          | \$740,494   | \$414,093   |
| Total disbursements.....   | 430,001     | 305,358     |
| Balance, surplus.....      | \$310,493   | \$108,735   |
| Stock and bonds:           | 1883.       | 1882.       |
| Capital stock.....         | \$4,560,000 | \$3,480,900 |
| Bonded debt.....           | 6,840,000   | 5,505,000   |

**CHICAGO & EASTERN ILLINOIS RAILROAD.**—The report for the year ended June 30, 1883, shows that the earnings of the two divisions were as follows:

|                         | Main Line.  |             | Terre Haute Div. |           |
|-------------------------|-------------|-------------|------------------|-----------|
|                         | 1882-3.     | 1881-2.     | 1882-3.          | 1881-2.   |
| Total earnings.....     | \$1,389,179 | \$1,310,440 | \$369,952        | \$381,825 |
| Operating expenses..... | 788,080     | 790,645     | 200,880          | 238,535   |
| Net earnings.....       | \$601,099   | \$519,795   | \$169,072        | \$143,290 |

The net earnings for the whole line for the last fiscal year were \$806,870, against \$693,444 in the previous year, an increase of \$113,425. The balance to the credit of income account on June 30th last was \$722,329. Following is a summary of the income account:

|                          | 1883.     | 1882.     |
|--------------------------|-----------|-----------|
| Net earnings.....        | \$770,190 | \$663,065 |
| Total disbursements..... | 477,304   | 503,993   |
| Balance, surplus.....    | \$292,886 | \$159,192 |

The amount of stock is \$2,998,268; funded debt, \$4,268,811.

**LOUISVILLE & NASHVILLE RAILROAD.**—At the recent annual meeting, the stockholders elected the following new members into the Board of Directors: Jay Gould, Russell Sage and Thomas F. Ryan. The report for the year ended June 30, 1883, shows that the mileage operated increased from 2,023 to 2,065 miles, of which 1,616 miles were owned. Following were the earnings:

|                         | 1882-83.     | 1881-82.     |
|-------------------------|--------------|--------------|
| Gross earnings.....     | \$13,234,915 | \$11,987,745 |
| Operating expenses..... | 8,099,566    | 7,429,370    |
| Net earnings.....       | \$5,135,320  | \$4,558,375  |

The net earnings from traffic for the year were \$5,135,320; realized from investments, \$124,770; total credited to income account, \$5,270,090; interest, rentals and taxes, \$4,547,303; net surplus, \$722,697. The fixed charges against income account for the years 1883-84 are \$4,416,754; subject to credits of \$148,377; balance, \$4,268,377.

| Stock and bonds: | 1882-83.     | 1881-82.     |
|------------------|--------------|--------------|
| Stock.....       | \$30,000,000 | \$18,133,513 |
| Bonds.....       | 57,903,230   | 58,067,778   |

The total stock outstanding and listed at the New York Stock Exchange is \$25,000,000. The remaining \$5,000,000 is in the Treasury.

NASHVILLE, CHATTANOOGA & ST. LOUIS.—The report for the year ended June 30, 1883, shows that 554 miles were operated. Following is a comparative statement of earnings.

|                            | 1882-83.    | 1881-82.               |
|----------------------------|-------------|------------------------|
| Total earnings.....        | \$2,283,523 | \$2,074,583            |
| Operating expenses.....    | 1,274,855   | 1,240,991              |
| Net earnings.....          | \$1,008,668 | \$833,592              |
| Summary of income account: | 1882-83.    | 1881-82.               |
| Total income.....          | \$1,085,915 | \$872,598              |
| Total disbursements.....   | 755,437     | 2,098,189              |
| Balance..... (Surplus)     | \$330,478   | ... (Def.) \$1,223,571 |

The capital stock remains at \$6,670,331; the bonded debt was increased \$108,000, to \$8,757,000, during the year.

### III. MISCELLANEOUS INVESTMENT NEWS.

ILLEGAL CITY BONDS.—The legal contest between the city of Corry, Pa., and the holders of \$100,000 worth of city bonds, ended in October, in favor of the city, the debt being declared illegal and the bonds null and void. The bonds were issued ten years ago for the purpose of raising \$100,000 to give as a bonus to Gibbs & Sterrett for locating iron-works in Corry and employing 175 men for five years. The bonds sold readily, but all the holders must lose their money. Gibbs & Sterrett recently failed. The bonds are now due.

TOWN BONDS DECLARED VOID.—The Court of Appeals has rendered a decision in the case of David Craig against the town of Andes, Delaware County, N. Y., in favor of the town, declaring void the bonding and bonds of the town issued in aid of the construction of the Delhi & Middletown Railroad.

CITY OF BROOKLYN.—The Comptroller has just issued his annual report showing the financial transactions for the year ending December 31, 1882. The debt of the city at that time was \$37,493,723, a decrease during the year of \$680,698. New loans were made to the amount of \$4,396,000, and the bonds and certificates paid amounted to \$4,398,000. The increase in the sinking fund was \$648,698. The tax rate for the next year will be \$2.67 on each \$100 in the Western District, and \$2.38 in the Eastern District, which is not taxed for Prospect Park.

STATE OF TEXAS.—The assessment rolls of 155 counties received up to October 20 show an increase in taxable values in the State of over \$95,010,000 above last year, with fifteen counties to bear from, which will doubtless make a total increase of \$100,000,000.

THE "RAILWAY AGE" shows that the amount of main track added to the railways of the Union during the nine months ending September 30, was 4,244 miles, against 8,075 miles for the same period last year.

TENNESSEE BONDS.—Chancellor Merritt, on October 19, dismissed the suit of John H. Wright and others against Gov. Bates and the Funding Board, to enjoin the board from carrying out the provisions of the act passed at the last session of the Legislature, authorizing the funding of State bonds at 50 cents, with 3 per cent. interest. It was stated by the court that the bill was without equity, and it was therefore dis-

missed at the cost of the plaintiffs. In deciding the case, Chancellor Merritt said the only point made by the complainants, necessary to notice, was that it is not lawful to appropriate taxes to the building of railroads, and that the bonds of this State for such purposes are void. The Chancellor said that as this question had been before the Supreme Court of the State in a large number of cases, and had been uniformly decided against the views of the complainants, it was unnecessary to discuss the question. The Funding Board are still at work, but their operations are confined to small batches of bonds. The case has been appealed to the Supreme Court.

**GEORGIA BONDS.**—The Legislature of Georgia having failed to create a New York depository, State Treasurer Speer recently said that he should refuse to send funds to meet the bonds and interest payable in New York, as he should decline to assume the risk. Governor M'Daniel has directed the Treasurer to forward the money, and it will be sent to the Fourth National Bank.

**VIRGINIA BONDS.**—The United States Supreme Court has granted a motion to advance in the Virginia coupon tax case of Smith against Greenhow, which involves the legality of an order to remand from the Federal to the State courts; but denied the same motion in three other cases, which involve simply the question whether the Virginia tax collector has the legal right to seize personal property for taxes after having refused to take coupons in payment.

**OHIO CENTRAL.**—The default in the payment of interest on the bonds, and the appointment of John E. Martin as Receiver, has given rise to litigation. E. L. Andrews, attorney for holders of the first mortgage (River Division) bonds, has begun a suit in equity in the Sixth Judicial District Court. The complainant charges that the default was causeless, and that the Robinson suit to foreclose the mortgage was instigated by the Directors. Application for a new Receiver will be made before Judge Baxter, of the Circuit Court, on November 15th.

---

**THE TREASURY AND THE POSTAL NOTES.**—It recently transpired that the Treasury Department had declined to receive one of the new postal notes. The matter has been explained in a letter of Treasurer Wyman, as follows: "I beg to say, that but in one instance has a postal note been sent to this office for the purpose named, or any purpose whatever. A bank, in sending United States notes for redemption, enclosed a postal note for the amount of the express charges, which, under present regulations, must be paid by the bank. It is the custom of this office to deduct from the proceeds the amount due for express charges, and in this instance the note was returned to the sender, and the charges deducted, as usual.

"In this action it was not intended to discredit in any way the postal notes, which may be a convenience to the public for many purposes, but these notes are not by law made receivable by the Treasury; their collection can only be made by presentation at the city post-office, and their receipt, to any considerable extent, would entail upon the Treasury officers a risk in sending out to make collection, which cannot be required of them, and a labor of keeping records of the notes, which might become burdensome."

The sender of the postal note has doubtless been convinced of his unreasonableness in expecting our over-burdened Government to send a messenger to the post-office, and to keep a record of his note. But, why keep any record, if the money was paid? The above letter gives an insight into a condition of things in the Department which is appalling to contemplate.

## \* THE BANKER'S GAZETTE.

The Money Market and Financial Situation.

NEW YORK, November 2, 1893.

The general condition of trade shows no particular improvement, although, as the comparative depression seems to result from a general decline in prices, it is presumable that the minimum point must be approaching, after which a decided improvement may be expected. The depression is generally displayed in the small profits realized, and in the large number of business failures, but in the stock market there has been for a long time a ruinous lack of confidence with a nearly steady fall in prices. In this fall the best as well as the poorest securities have participated. We think that the extreme depression in stocks is reasonably accounted for by the fact, abundantly verified, that foreign holders have been "unloading" American stocks on this market. In this view it is a matter of great interest to know when this movement will be stopped or reversed.

To show the extent of the decline in the market the "Financial Chronicle" gives, in a recent number, a table of 24 active stocks, some of them the best on the list, with comparative prices since the beginning of 1891. It shows that not one of the 24 has fallen less than 25 points in the three years (nearly), and some have declined between 60 and 70 points. Only four of them did not fall lower in the present year than during the two former years, the decline in the present year ranging from 10 to 50 per cent. A glance at the stock table in this article will show that about the middle of the past month a large proportion of the stocks reached the lowest point of the year.

Since that time there has been some improvement; but, of course, it is useless to base any expectations upon it yet. There are indications, however, of a renewal of confidence abroad. The London "Economist" of October 27th says: "There has been an increased business on the Stock Exchange, and some departments have been active. Home and American railway securities are attracting purchasers, money being cheap and carrying rates very light \* \* \* speculation in American railway securities has also revived."

How far this improvement may have led to a shipment of securities abroad it is impossible to determine, but it may be that this has aided the movement of gold in this direction, which has occurred to a moderate amount so far. The "Economist" looks for a continuance of the movement, giving as a reason "that the heavy fall in the prices of American securities has now attracted

---

\* The financial situation at Boston and Chicago also appears in this department, the reviews being written by the JOURNAL'S correspondents at those cities.

purchasers on this side, whose operations should, if continued, tend to influence the American exchanges against us."

How far the gold movement has been caused by the settlement of mercantile transactions can be better judged when the returns of the Bureau of Statistics for October are received. The merchandise exports for September amounted to only \$54,286,908, against \$62,815,827 in September, 1882; but there was a still greater falling off in the imports, which amounted to only \$51,089,851 in September last, against \$68,409,587 in the corresponding month last year.

THE PUBLIC DEBT, less cash in the Treasury, was decreased \$10,804,799 during October, making the total decrease since the beginning of the fiscal year (July 1) \$39,584,470. During the first four months of the last fiscal year the reduction was \$60,423,418. The present indications confirm the estimate already made that the surplus for the current fiscal year will be not far from one hundred million dollars.

Up to the close of business on November 1 there had been received for redemption \$26,241,650 of bonds under the 121st call, being 3½ per cents. Last month we published the 122d call, for \$15,000,000, 3 per cents, on December 1st. Following is the 123d call, for an additional \$15,000,000, on December 15th:

TREASURY DEPARTMENT,  
WASHINGTON, D. C., October 18th, 1883. }

By virtue of the authority conferred by law upon the Secretary of the Treasury, notice is hereby given that the principal and accrued interest of the Bonds hereinbelow designated will be paid at the Treasury of the United States in the City of Washington, D. C., on the fifteenth day of December, 1883, and that the interest on said bonds will cease on that day, viz:

*Three Per Cent. Bonds*, issued under the Act of Congress approved July 12, 1882, and numbered as follows:

\$50—Original No. 888 to Original No. 971, both incl., and Original No. 1,304 to Original No. 1,307, both incl.

\$100—Original No. 6,041 to Original No. 6,719, both incl., and Original No. 9,451 to Original No. 9,464, both incl.

\$500—Original No. 2,566 to Original No. 2,926, both incl., and Original No. 3,978 to Original No. 3,979, both incl.

\$1,000—Original No. 17,402 to Original No. 18,974, both incl., and Original No. 22,636 to Original No. 22,645, both incl.

\$10,000—Original No. 27,659 to Original No. 27,039, both incl.

Total \$15,000,000.

As required by the following provision of the authorizing Act, viz.: "The last of the said Bonds originally issued under this Act, and their substitutes, shall be first called in, and this order of payment shall be followed until all shall have been paid," the Bonds described by numbers above are the Bonds of the *original issue*, or their substitutes—i. e., Bonds which have been issued on transfers in exchange for original bonds, and which bear an original as well as a substitute number.

*All of the Bonds of this loan will be called by the original numbers only.*

Many of the Bonds originally included in the above numbers have been transferred or exchanged into other denominations on "waiver"—the original numbers being cancelled, and leaving outstanding the amount above stated.

Bonds forwarded for redemption should be addressed to the "Secretary of the Treasury, Division of Loans, etc., Washington, D. C.," and all the Bonds called by this Circular should be assigned to the "Secretary of the Treasury for redemption." Where checks in payment are desired in favor of any but the payee, the Bonds should be assigned to the "Secretary of the Treasury for redemption for account of"—(here insert the name of the person or persons to whose order the check should be made payable.

CHAS. J. FOLGER, Secretary.

**MONEY AND DOMESTIC EXCHANGE.**—The rates for call and time loans on collateral continue low, ranging from 2 to 3 per cent. per annum; but there is no noticeable improvement in the status of commercial paper, which is still suspiciously watched in the loan market. The quoted rates are  $5\frac{1}{2}$  to 6 per cent. on first class double-named paper, and 6 to  $7\frac{1}{2}$  per cent. on single-named.

The following table shows the range of call loans, and rate of prime paper, for the past five weeks :

|                                               | Sept. 29.                          | Oct. 6.                            | Oct. 13.                           | Oct. 20.                           | Oct. 27.                        |
|-----------------------------------------------|------------------------------------|------------------------------------|------------------------------------|------------------------------------|---------------------------------|
| Range of call loans ... 2 @ $2\frac{1}{2}$ .. | $1\frac{1}{2}$ @ 4 ..              | $1\frac{1}{2}$ @ $2\frac{1}{2}$ .. | $1\frac{1}{2}$ @ 4 ..              | $1\frac{1}{2}$ @ 4 ..              | $1\frac{1}{2}$ @ $4\frac{1}{2}$ |
| Rate of discount .....                        | $5\frac{1}{2}$ @ $6\frac{1}{2}$ .. | $5\frac{1}{2}$ @ $6\frac{1}{2}$ .. | $5\frac{1}{2}$ @ $6\frac{1}{2}$ .. | $5\frac{1}{2}$ @ $6\frac{1}{2}$ .. | $5\frac{1}{2}$ @ $6\frac{1}{2}$ |

The rates of domestic exchange on New York on November 1, were as follows: Savannah, buying  $\frac{1}{2}$  discount; selling par @  $\frac{1}{2}$  premium. Charleston, buying 5-16 discount; selling par @  $\frac{1}{2}$  discount. New Orleans commercial, \$1.25 @ \$1.50 per \$1,000 discount; bank, par. St. Louis, 75c. per \$1,000 premium. Chicago, 50c. per \$1,000 premium. Boston, 10 @ 17c. per \$1,000 premium.

**FOREIGN EXCHANGE** has been down to the specie importing point within a few days, but the rates have advanced a trifle since. Following were the posted and actual rates on November 1: Bankers' sterling, 60 days, nominal, \$4.82; sight, nominal, \$4.84 $\frac{1}{2}$ ; 60 days, actual, \$4.80 $\frac{3}{4}$  @ \$4.81; sight, actual, \$4.83 $\frac{3}{4}$  @ \$4.84; Cable transfers, \$4.84 $\frac{1}{4}$  @ \$4.85; Prime commercial sterling, long, \$4.80 $\frac{1}{4}$  @ \$4.80 $\frac{1}{2}$ ; Documentary sterling, 60 days, \$4.79 $\frac{1}{2}$  @ \$4.79 $\frac{3}{4}$ ; Paris, bankers', 60 days, 5.24 $\frac{3}{8}$  @ 5.23 $\frac{3}{4}$ ; sight, 5.21 $\frac{1}{8}$  @ 5.21 $\frac{1}{4}$ ; Antwerp, commercial, 60 days, 5.26 $\frac{1}{2}$  @ 5.26 $\frac{1}{4}$ ; Swiss, bankers', 60 days, 5.23 $\frac{1}{2}$  @ 5.23 $\frac{1}{8}$ ; sight, 5.21 $\frac{1}{4}$  @ 5.20 $\frac{5}{8}$ ; Reichsmarks (4), bankers', 60 days, 94 $\frac{1}{4}$  @ 94 $\frac{3}{8}$ ; sight, 94 $\frac{1}{8}$  @ 95; Guilders, bankers', 60 days, 39 $\frac{3}{4}$  @ 39 $\frac{3}{8}$ ; bankers', sight, 40 @ 40 $\frac{1}{4}$ . Paris dispatches quote exchange on London 25f. 21c.

The following shows the posted rates for prime bankers' sterling bills on London at 60 days, on sight, cable transfers, and prime commercial sterling at 60 days, together with exchange on Paris on October 1, the changes in the rates as they occurred during the month, and the highest and lowest during the months of September and October :

| Sept.—       | Bankers            |                    | Cable Transfers.   | Commercial.        | Paris              |                    |
|--------------|--------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
|              | 60 days.           | Sight.             |                    |                    | 60 days.           | Sight.             |
| Highest..... | 4.84 $\frac{1}{2}$ | 4.88               | 4.88 $\frac{1}{4}$ | 4.82 $\frac{3}{4}$ | 5.24 $\frac{3}{8}$ | 5.22 $\frac{1}{4}$ |

**THE NATIONAL BANKS.**—The Comptroller's figures show that there was a decrease of \$1,834,884 in the total bank circulation outstanding, during October, against a nearly like amount in the previous month. There will probably be a much larger reduction in the following two months :

The following will show the amount of each description of bonds held by the Treasurer to secure national bank circulation, on or about the dates indicated :

|                                    | August 1.            | Sept. 1.             | Oct. 1.              | Nov. 1.              |
|------------------------------------|----------------------|----------------------|----------------------|----------------------|

THE NEW YORK CITY BANKS have recently, for the first time since last April, allowed their cash reserve to fall below 25 per cent. of the deposits, but the amount of the deficit was trifling, and the indications point to an immediate return of cash from the interior. The loans and deposits are somewhat larger than at this time last year in spite of the comparative dullness in some departments of business.

The following shows the condition of the New York Clearing-House banks for a number of weeks past, as well as about this time in 1882 and 1881:

| 1883.         | Loans.        | Specie.      | Legal-tenders. | Deposits.     | Circulation. | Surp. Res.  |

\* Deficit.

RAILROAD AND MISCELLANEOUS STOCKS.—Since the extreme depression in the middle of October there has been a decided improvement in prices up to a few days ago. But the market has remained rather quiescent since. Some remarks on the outlook have been made above.

The following table shows the highest, lowest and closing prices of the active stocks at the New York Stock Exchange in the month of October, the highest and lowest since January 1, 1883, and also during the year 1882:

|                           | October, 1883. |       |         | Since Jan. 1, 1883. |                | 1882. |      |
|---------------------------|----------------|-------|---------|---------------------|----------------|-------|------|
|                           | High.          | Low.  | Clos'g. | Highest.            | Lowest.        | High. | Low. |

**INSURING A CASHIER'S LIFE.**—The action of the Muskegon (Mich.) National Bank against the North-Western Mutual Insurance Company of Milwaukee, Wisconsin, for the recovery of \$20,000 and interest upon the life of Erwin G. Comstock, came up before Judge Shipman and a jury, in the United States Circuit Court at New York, on October 22. Mr. Comstock was connected with the bank as its Cashier, but becoming addicted to liquor, his salary was reduced, whereupon he resigned and came East. While Cashier, he had advanced about \$20,000 on indorsement of his father-in-law's paper, and to protect themselves the institution insured his life for that amount. The insurance company sought to vitiate the policy on the ground that Comstock was a habitual drunkard, and had destroyed his own life by acts of intemperance. The complainants showed that while Comstock went on periodical sprees, he was not a habitual drunkard, and the jury returned a verdict of \$23,905 for the bank, which includes interest. The case may be appealed.

NEW YORK CITY NATIONAL BANKS.—The following is an abstract of the reports made to the Comptroller of the Currency, showing the condition of the national banks in the City of New York at the close of business on October 2, 1883, the number of banks being 48. The figures for June 22, 1883, are also given for comparison:

## Bank, Government, Railroad and Miscellaneous Stocks and Bonds.

### LATEST QUOTATIONS AND OTHER INFORMATION.

The following tables give the latest quotations of stocks and bonds at the New York Stock Exchange. In the case of all but the New York bank stocks the highest and lowest actual prices of a year ago are also given, for comparison. The quotation tables on the following pages include *all securities listed at the Stock Exchange*.

#### NEW YORK CITY BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The Capital and Surplus are as given in the latest official reports, viz.: the National banks Oct. 2, as reported to the Comptroller of the Currency; the State banks, Sept. 22, as reported to the State Banking Department. The Surplus includes the undivided profits on the dates given. The Banks which are *not* members of the New York Clearing-House Association are indicated by a (\*). Not listed at the Stock Exchange by a (+). This table includes all the Commercial banks of New York.

# **BOSTON—The Financial Situation, Banking News, &c.**

(From the JOURNAL's regular Correspondent.)

Boston, November 1, 1883.

— Three months ago I gave your readers a brief description of the new quarters of the Clearing-House. They have now moved in, and find them admirably adapted for the purposes of the association, on the street floor, thoroughly lighted and ventilated, with all modern improvements. The wonder is, that for twenty years the business was carried on in the third story of an old and low studded building, with as few conveniences as possible.

— The general business situation is not materially changed from last month, except in the fact that the market is no longer disturbed by fears of increased failures. The crash which came upon us so suddenly in the latter part of summer, proved of an exceptional character, as was suggested at the time, for our merchants and business people were then known to be sound and doing business on a safe basis. The failures referred to were almost of an exceptional character, and had no serious influence beyond a circle within which they appeared to move.

— The stock market has been without special features; but, generally speaking, prices close up better than the lowest points of the month, and in some cases close on to the highest. The month, however, has been a tame one, but towards the close the indications of a better tone were apparent. In my last letter, the statement was made that the net earnings of the New York & New England road were reported to fall short of the fixed charges. This, in a degree, certainly may be misleading; although no official figures have been given out, it is generally understood that the earnings would show a net sufficient to meet all fixed charges, but for extra expenditures put into operating expenses, which in most roads are carried to construction account. I can say this, that the road is in excellent condition, with a steadily increasing business, which promises exceedingly well for the future. Now that the matter is better understood, the bonds and stock of the road are gaining in public favor, and are likely to advance materially in price.

— Pullman's Palace Car Company, in addition to its quarterly dividend of 2 per cent., will also pay, November 15, an extra annual of 1½ per cent. "out of the manufacturing profits." The stockholders voted to increase the capital stock 20 per cent., to meet the cost of additional improvements. Ten per cent. of this increase will be issued December 1, to holders November 1, each 10 old shares being entitled to one new share at \$100. "Rights," as they are called here, that is the "privilege" attaching to one old share, sell at \$2 each. The present stock is \$13,200,500, and the 10 per cent. added will bring it up to \$14,900,400.

The following is the comparative statement of the Boston Clearing-House Exchanges the past month, by weeks, also the full month and year to date, during three years past.

|                   | 1881.         | 1882.         | 1883.         |

**BOSTON BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.**

The following table gives the latest quotations of Bank Stocks in the Boston market. The Capital and Surplus given are from the last official report, October 2d, and all the banks are National. The surplus includes the undivided net profits. All the banks belong to the Clearing-House, except Bunker Hill, First Ward, Mechanics', National Market of Brighton, People's, and Rockland, which are located out of the city proper, but within city limits, and they clear through other banks.

| BANK TITLE.                      | PAR. | CAPITAL.  | SURPLUS.  | INT. PAYABLE. | NOV. 1, 1883. |       | LAST DIV'D. |            |

\* Ex. dividend.

— The Hon. Franklin Haven will, in January next, resign the presidency of the Merchants' National Bank of Boston, a position which he has held for half a century. He will probably be succeeded by his son.

— The figures compiled by the "Post" show the clearings of the 27 leading Clearing-Houses of the United States for the week ending November 4, to be \$1,107,276,793, against \$1,303,470,289 for the corresponding week last year. The total for October, 1883, was \$5,130,340,657, against \$5,655,519,820 in October, 1882; the amount outside of New York was, for October, 1883, \$1,299,611,842; October, 1882, \$1,270,827,215.

— The following is the statement of the Boston national banks as returned to the Clearing-House October 29: Capital, \$50,600,000; loans, \$143,946,000; decrease, \$1,109,800; specie, \$5,765,100; increase, \$321,100; legal-tender notes, \$5,517,800; increase, \$719,100; 5 per cent. fund, \$1,369,500; increase, \$3,400; due from reserve agents, \$13,081,100; decrease, \$1,096,000; due from other banks, \$11,436,100; increase, \$194,400; due to other banks, \$23,899,300; decrease, \$771,800; deposits, \$63,887,300; increase, \$909,300; circulation, \$27,111,200; decrease, \$60,000; excess of reserve, \$2,241,000; gain for the week, \$593,414.

— The tendency of the money market has been a little unusual, for Clearing-House funds have steadily declined from 5 to 2 per cent., while discounts have varied little, and are almost as high now as when the rate between banks was plump 5 per cent. At present, choice six months' paper commands 5½ to 6 per cent., with exceptions for Factory acceptances at 5 per cent., but of this class there is little offering, and such borrowers can always take advantage of the market, rarely ever permitting themselves to get into a "close corner." There is evidently an abundance of idle money, but somehow the holders prefer to keep, or loan temporarily at low figures, rather than put it out on time.

The following tabular statement shows the semi-annual dividends of the Boston banks for three years past :

| Banks.           | 1881. |       | 1882. |       | 1883. |       | Banks.            | 1881. |      | 1882. |       | 1883. |       |

\* 2½ per cent. quarterly.

— The semi-annual dividends payable in Boston in October aggregated \$7,480,601. Last April they amounted to \$3,144,776, and in October of last year to \$7,055,825. The falling off in the bank dividends is less than was feared at the time of the recent business failures in the city, and nine-tenths of the banks pay the same as in April last. One increases, three fall off, and four pass. Of the 59 banks within the limits of the city, 5 pay 5 per cent. (1, 2½ per cent. quarterly), 5, 4 per cent., 2, 3½ per cent., 23, 3 per cent., 16, 2½ per cent., 3, 2 per cent., 4 pass, and 1 is a new bank.

**HIGH-PRICED SHARES.**—Recently, in London, two remarkable shares were sold at a rare if not unique price. In 1613, Sir Hugh Myddleton established, with the aid of King James the First, the New River Company. Of the £17,000 required for the undertaking, His Majesty contributed £3,000. Consequently one-half (that is, thirty-six) of the shares were set apart for the King, but on the understanding that he should have no part in the administration. A few weeks ago, two of these shares were disposed of by public auction. One of them (the royal) brought the sum of £92,258 sterling, and the other (which may be called "Old Myddleton money") was sold for £98,250. Such a price is, for a share, believed to be without precedent.

## CHICAGO—The Financial Situation, Banking News, &amp;c.

(From the JOURNAL's Correspondent.)

CHICAGO, NOVEMBER 2, 1883.

— In the Chicago Sub-Treasury there is now about \$8,000,000 in silver, about five-eighths of which consists of standard dollars. This is an increase from \$3,000,000 in two years. The vault is overcrowded, but the new one will soon be ready for use.

— The Chicago money market was quiet and comparatively easy in October. There was a good general commercial demand for funds, but the speculative inquiry was small. Currency orders were light. Money ranged from 5@6 per cent. It is now a little closer, and more activity is expected on account of the opening of the hog-packing season.

— The First National Bank has notified all of its employés that they must procure bondsmen. The amounts range from \$1,000 for book-keepers to \$2,500 for collection clerks, and \$5,000 for assistant cashiers. In order to relieve the executive officers of the bank from the responsibility of inquiring into and passing judgment upon the reliability of private bondsmen, the notice says, it is desired that employés should procure bonds of the Guarantee Company of North America. The aggregate of sureties required from the employés of the First National is over \$300,000. They all furnished private sureties.

— D. D. Spencer's deposition on the affairs of the defunct State Savings Institution contains the interesting statement that the last dividend paid the stockholders was on May 12, 1875. President Spencer opposed paying it, but the stockholders authorized him to pay them for their services as trustees such amounts as, in his discretion, he considered expedient. They received \$25,000, or 5 per cent. on \$500,000, as a consideration for their services, which Spencer says was really a dividend. Only about \$450 was paid out in cash, however, the balance being credited to the stockholders' indebtedness to the bank.

— Mr. A. H. Burley, Receiver of the Cook County National Bank, filed a petition, October 6, in the United States District Court, stating that he had paid a dividend of 8 per cent., and had before him a prospect for endless litigation. The assets at that date amounted to about \$9,000 of real estate and some desperate accounts. Polk & Hubbell, of Des Moines, Ia., who held a large proportion of the claims against the estate of Allen, also against the bank, offered \$40,000 for the remaining assets of the Cook County National, agreeing also to dismiss two suits, one for \$213,000 and another for \$48,000, and to assume a suit pending in the United States Supreme Court. The Receiver considered this offer a good one, and the judge entered an order requiring parties interested to show cause, by October 20, why such a compromise should not be effected. No objections being made, this offer was accepted, the assets sold, and it is expected that the final dividend will be made in a few days. The total dividend received by the creditors of the institution will be about 15 per cent. The Cook County National Bank failed eight and a-half years ago, on January 18, 1875. The total claims proved against the bank to date, are \$1,777,147.

— Eddy, Harvey & Co., wholesalers of hats, caps and furs, suspended Thursday, October 25. The liabilities are estimated at \$225,000, due mostly at the East, and largely on commercial paper discounted in the usual manner. Commenting on this Eastern system of discounting notes, a local banker characterizes it as a very dangerous plan, to which is due many failures. It leads a house, having such fields of credit, to overstep the boundaries of prudence. The firm's credit gets into the hands of parties who have no interest in helping or indulging it, and, on the slightest sus-

picion, take steps which destroy or injure its standing. The much safer way is to obtain credit from firms or merchants who, as customers, are interested in the welfare of the house. This way also tends to keep a firm from spreading out too much, and, therefore places it in a sounder condition. The bulk of the paper goes East to be discounted, because, money, especially in New York, is more abundant, and, relatively, cheaper, than in Chicago. Of course, Western and local paper is discounted in Chicago, and it sells readily if the rating is good; but the capital here can usually be employed more directly and with greater profit.

— The Chicago Bankers' Club held its seventh annual election and banquet at the Grand Pacific Hotel, on Wednesday evening, October 24. The Chairman was Mr. L. J. Gage, Vice-President of the First National Bank. There were covers for seventy-six. Among the guests from abroad were:—Albert S. Bolles, of New York; Mr. Town, of Elgin; Mr. St. John, of New York; Mr. Yates, of Omaha; Messrs. Fitch & Houghton, of Milwaukee; Mr. Van Blarcom, of St. Louis; Mr. Forbes, of Cincinnati; Mr. Easton, of Decorah, Iowa; Messrs. Hart & Taylor, of Boston; Mr. Hollister, of Grand Rapids, Mich.; and Mr. Sanford, of Rockford. After the serving of an elegant repast, the guests were called to order by President Gage, who explained that the club was an association for the purpose of exchanging views on banking and discussing the various financial questions before the public. The club had no theory of its own. Its membership comprised four representatives of foreign banks, three of private institutions, eight of trust companies, and thirty-five of national banks. Mr. Albert S. Bolles read a paper on "The Currency of the Future." Among those who took part in the subsequent discussion were: C. B. Farwell, Joseph Medill and W. P. St. John, of New York. Mr. Sanford, President of the Second National Bank of Rockford, gave a short history of the shinplasters and stump-tail currency which were in vogue in the West before the war. The election of officers of the club resulted as follows:—President, L. J. Gage; Vice-President, J. O. Rutter; Secretary and Treasurer, J. J. P. Odell; Executive Committee, C. J. Blair, George L. Otis.

#### CHICAGO BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, AND LAST DIVIDEND.

Following is a statement showing (1) the Capital and Surplus of the Chicago banks on and since June 22, 1883 (the date of the last official statement), (2) the bid and asked price of their stock and, (3) the rate and date of last dividend. The Surplus includes the undivided profits. The Clearing-House banks are indicated by a star (\*).

¶ Not reported.

## DAILY RECORD OF FINANCIAL EVENTS.

OCTOBER, 1883.

1. MONDAY.—Decrease in the public debt in September, \$14,707,229; since June 30, \$29,279,671.  
Two cent letter postage went into effect throughout the United States.
2. TUESDAY.—Annual meeting of the New York Clearing-House Association.  
The increase of Western Union Stock by \$15,526,590, declared valid by the New York Court of Appeals.
3. WEDNESDAY.—Jay Gould and Russel Sage elected Directors of the Louisville & Nashville Railroad.
6. SATURDAY.—Discount on prime commercial paper in New York, 6@7½ per cent.; call loans, 2@2¼ per cent.  
Discount in London on 60 days to 3 months' bank bills, 2½@2¼ per cent.; trade bills, 2¾ per cent.
10. WEDNESDAY.—The annual convention of the American Bankers' Association opened at Louisville, Ky.
13. SATURDAY.—Discount on commercial paper in New York, 6@7½ per cent.; call loans, 1½@2 per cent.  
Discount in London on 60 days to 3 months' bank bills, 2@2½ per cent.; and trade bills, 2½@3 per cent.  
A new Spanish Ministry formed.  
The 123d Treasury call issued for \$15,000,000 3 per cent. bonds.
16. TUESDAY.—Zembroma & Co., of Monterey, one of the principal firms of Northern Mexico, suspended.
17. WEDNESDAY.—A number of the New England telephone companies agreed to consolidate.
20. SATURDAY.—Discount on prime commercial paper in New York, 6@7½ per cent.; call loans, 3@4 per cent.  
Discount in London on 60 days to 3 months' bank bills, 2¼ per cent.; trade bills, 2½@3 per cent.  
A treaty of peace signed between Peru and Chili.
27. SATURDAY.—Discount on commercial paper in New York, 6@7½ per cent.; call loans, 2½@3 per cent.  
Discount in London on 60 days to 3 months' bank bills, 2¼ per cent.; trade bills, 2½@3 per cent.  
Some gold shipments arrived from Europe.
31. WEDNESDAY.—A disastrous fire occurred at Savannah, Ga.  
A number of failures occurred in the cotton trade at Liverpool.

# RHODES' JOURNAL OF BANKING.

NEW SERIES. {  
VOLUME X. }

DECEMBER, 1883.

No. 12.

THE twenty-first annual report of the Comptroller of the Currency published herein, gives much useful information in regard to the State and private banks. The figures which it contains respecting the State banks and trust companies of the 24 States in which returns are required by law to be made to some official, afford a basis for a comparison between the conditions under which they do business with those obtaining in the case of the national banks. We find, for instance, that the 788 State institutions reporting have an aggregate capital and surplus of 160 million dollars (in round numbers), while the 2,501 national banks had on October 2, 652 millions. But the State banks held 500 millions of deposits, against 1,065 millions held by the national banks, the proportion being for the State banks, three times the amount of the capital and surplus, while for the national banks it is only one and 2-3 of the amount. In other words, the State bank capital was only 32 per cent. of the deposits, while the national bank capital was 61 per cent. of the deposits. Thus, it is shown, that, the matter of circulation aside, the national banks in the aggregate are in a safer condition as regards the liabilities to depositors than the State institutions. This showing results partly from the fact that the trust companies, which have grown so rapidly in recent years, do a very large business on a comparatively small capital. The Comptroller's table shows that the State institutions of the States reporting increased in number in the last three years from 650 to 788; the aggregate capital from 109 million dollars to 125 millions; the deposits from 299 millions to 500 millions, and the loans and discounts from 281 millions to 462 millions. It will be noticed that the business done

\*.\* The JOURNAL OF BANKING for 1884 will keep fully abreast of the banking needs of the country. It will be PRACTICAL and COMPREHENSIVE, including in its (5) departments every point of important information required by those engaged in the banking business.

See the Prospectus on another page.

increased in a much larger ratio than the capital. During the same period the national bank capital, including surplus, increased from 578 million dollars to 652 millions; the deposits from 884 millions to 1,065 millions, and the loans and discounts from 1,041 millions to 1,303 millions. Which shows that the business of the national banks has not increased in nearly as large a ratio as the business of the State institutions, and that the capital has kept better pace with the business done.

---

THE estimate of the Director of the Mint of the money in circulation in the United States, referred to in our last number, is given in detail in the present number, the tables having been crowded out before. In comparing Mr. Burchard's figures with those of the First Comptroller of the Treasury we said: "We shall soon probably have the calculation of the Comptroller of the Currency, showing the total circulation to be much less than the smaller of the above amounts." The former was \$1,730,597,823, and the latter \$1,575,104,642. The estimate contained in the report of Comptroller Knox, just published, gives the total circulation on November 1, last, as \$1,523,366,989. He includes just four items, viz:

Gold coin and bullion, \$581,970,254; silver coin, \$242,701,932; legal-tender notes, \$346,681,016, and national bank notes, \$352,013,787. The gold and silver certificates, which were included in the other two estimates, are omitted in this one. For all ordinary purposes for which such statistics are used, this appears the more correct method. The certificates and the coin they represent are never in circulation at the same time, and therefore either the one or the other should be left out in estimating the total circulation. The First Comptroller of the Treasury included only the certificates that were issued, but Mr. Burchard reckoned all the certificates in and out of the Treasury. Comptroller Knox reckons the bullion in the Treasury, which was omitted by the First Comptroller. It may be remarked that Comptroller Knox estimates the gold in the country at about 25 million dollars less than Director Burchard's estimate, which has been frequently called in question by some able statisticians. The most remarkable part of the Comptroller's showing is the estimated amount of gold in the hands of the people—outside of the banks and the Treasury. This was on November 1, last, \$308,791,137, against \$119,629,771 at the time of the resumption of specie payments on January 1, 1879. The increase in that time is 189 million dollars, which appears to have been hoarded for the most part, as not much is used in ordinary transactions. The amount increased 22 millions during the past year.

---

THE present report of Comptroller Knox contains probably the last table showing the number, capital, deposits, etc., of the private

banks of the country. As has been mentioned before, the complete statistics presented regarding the State, savings and private banks, have been made up from the returns made to the Internal Revenue Bureau for purposes of taxation, but now that the taxes on capital and deposits have been abolished these figures will no longer be forthcoming. The Comptroller has therefore prepared an elaborate bill providing that returns of the condition of the institutions mentioned shall be made to some State officer, which bill he proposes shall be adopted by all the Legislatures of the States in which such returns are not at present required by law. The figures which the Comptroller desires to obtain are of great value for statistical purposes, but the reports are even more necessary for other reasons which were explained in a resolution passed at the Banker's Convention in October. This resolution was to the effect that in order to suppress the practice of banking without capital, as it is carried on to a considerable extent in obscure places, the State Legislatures ought to provide that banks and bankers shall render statements of their condition so as to satisfy the proper official of their soundness.

---

IN the address of Mr. E. C. Bohné at the Bankers' Convention (which will appear in the next number), he follows the general line of argument of Mr. Goschen's paper, which we published some months since, on the appreciation of gold. Considering the proposition that the partial demonetization of silver in the world has caused an appreciation in the value of gold and a general decline in prices for ten years past, to be proved, he proceeds to discuss what should be the best policy for business men under the circumstances. We may remark that, granting the decline in prices, the advice given is just as useful, whether the decline has resulted from the cause mentioned or any other. A decrease in prices tells against the debtor class, therefore, debts ought to be decreased, instead of increased. Mortgage bonds ought not to be filed upon corporate property, for the bonds will not decrease with the decrease in the value of the property, or in its earning power as measured in money. Production should be pushed forward with caution, lest the product decline before it is disposed of, and losses be realized. These are matters which affect bankers as much as any class. It is probable that the many and increasing business failures are largely due to the causes mentioned, and it is extremely difficult to forecast the ultimate result.

---

It appears that the three Scandinavian States of Denmark, Sweden and Norway, have adopted a uniform law to govern commercial paper, which is said to resemble the German code on the same subject. It will be remembered that the British Parliament only recently adopted a Bills of Exchange Act, so that it is evident that there is a strong

tendency throughout the commercial world towards uniformity and definiteness in the laws governing business transactions. Probably no country has suffered more from the opposite evils of diversity and indefiniteness than this, but the difficulties in the way of a reform are so great that it would almost be considered chimerical to propose it. True, some action was taken on the matter of securing uniformity in the State laws on commercial paper, at the Banker's Convention of 1882, but it seems to have been dropped since. One improvement which the Scandinavian law enacts is the abolition of days of grace. This is a measure which was brought up in the New York State Legislature last winter, and it is hoped that time will be found, this winter, to act upon it. We ought not to allow Scandinavians to be more enlightened and progressive than ourselves.

---

IN view of the recent London and River Plate Bank fraud, in which George Warden, the manager of the bank, abstracted securities left in its charge, the London "Economist" has been discussing the matter of the liability of banks for the loss of such property. It cites the case of *Giblin vs. McMullen*, which was decided on appeal by the Privy Council of Victoria. The Union Bank of Australia had taken charge gratuitously of a box of securities for a customer, which box was stolen by the cashier. It was held that the bank being a gratuitous bailee of the property, it was only bound to take the same care of it that a reasonably prudent man would take of his own property, and, therefore, the plaintiff (the owner of the securities) was not entitled to recover the value from the bank. In the case of Johnston's claim in the winding up of the United Service Company, which was decided by a high English tribunal, it was shown that the plaintiff deposited with the company, which did a banking business, certain stock certificates. The company was to receive the dividends, charging a small commission for doing so. The certificates were kept with the company's securities in its strong box, and were stolen by the manager. It was held that the company was a bailee for reward, that the deposit was made under such circumstances as would have entitled the bank to a lien upon the property for its general banking account, and it would therefore have been liable to its customer, if the damages claimed in the case had not been too remote. The only other case cited is one in which a bank claimed a lien upon securities left with it without charge, in boxes of which the customer kept the keys. It was decided that the bank was a gratuitous bailee and its claim was denied. It appears that in France the banks never take charge of a customer's property without being paid for it, and their full liability is generally acknowledged. No case is remembered in which the question of their responsibility was raised.

THERE is an unusually large number of important financial and business questions demanding the action of Congress at this session, but unfortunately there will be more than the usual reluctance to deal with them in the right spirit. It is generally conceded, that every subject is to be acted upon more or less with a view to the effect it will have upon the Presidential election next year; which is only one among many evidences that in these times the parties seek to control not for the sake of any policy. Every policy has to give way which will interfere with the party's chances for the control, so that it is evident that there is a stronger incentive at work than the pursuit of any policy or principle. Probably the matter which demands the most immediate attention is the reduction of the bank circulation, and providing some means to overcome it. If, however, a measure were passed to reduce the present taxes, and, consequently, the surplus revenue, this would partly meet the difficulty for the present. But it is at once evident the question of tax reduction is surrounded with difficulties, to politicians who are sensitive to every breath of popular disapproval. To again meddle with the tariff will be certain to offend a large party, and, on the other hand, to reduce the tax on spirits and tobacco, which are now the only internal taxes of moment, in order to save the tariff will offend another large class. The demand for some kind of a national bankruptcy law is one which calls for much more attention than Congress will be likely to afford it, and although the matter of establishing a Government telegraph will probably be brought up, it is doubtful if any decisive action will be taken on it. The standard silver dollar coinage question is in about the same condition as the tax reduction matter. The majority would rather not touch it. Under the circumstances it behooves the people who are interested in other than political (or rather, partisan) questions to keep up the agitation for, and compel attention to the matters of such vital importance to the welfare of the country as those we have mentioned.

---

THE first attempt to enforce the provision of the National Bank Extension Act against the over-certification of checks has been made in the action brought against Mr. Graff, paying teller of the late Wall Street National Bank. This bank has recently been reorganized under the State law, so that it is no longer in danger of violating the Act mentioned. The information upon which the charge is laid was obtained from the Comptroller of the Currency, who discovered that when a firm of stock-brokers failed in August last, the bank had certified their checks for nearly \$200,000 more than their deposits. It seems rather hard that the bank should be prosecuted for an act which had already cost it so dear, but as the case was clear, there was certainly nothing else to be done. Some indignation has been expressed because one bank is prosecuted while others are allowed to transgress

the law with impunity, but this feeling is not justifiable. A beginning had to be made somewhere, and matters would certainly be in no better condition if half a dozen tellers had been arrested. The Comptroller is reported to have said that he deferred action under the law for some time in the hope that a stock clearing-house would be established, which would relieve brokers from the necessity of having checks certified to large amounts in order to carry on their business; but that as soon as it became evident that this was not to be done, he considered it his duty to report violations of the law. This is about the ground that we have heretofore taken in the matter. By certifying brokers' checks to amounts above their deposits the banks have, in a sense, made themselves partners with the brokers, taking a share in their risks. If they had mutually agreed to refuse to do this business after a stated time, the brokers would have been more willing to give the clearing-house a fair trial, and it would probably have proved to be a success. In any case, the proper thing for the banks to do is to comply with the law.

---

THE Secretary of the Treasury recommends the redemption of the trade dollars with standard silver dollars, dollar for dollar of nominal value. The reasons given agree substantially with those which have been set forth here several times, and which disagree with the views of many of the respectable papers in this part of the country, while the rest have had little to say in favor of the trade dollar. There seems to exist a little dread of appearing to be in the service of a clique of brokers on the one hand, while, on the other hand, to oppose the full redemption of the coin gives an air of independence and public spirit. But the Secretary will not be accused of being swayed by either consideration. He says, "the act of 1873 made the silver coins of the United States, and hence the trade dollars, a legal-tender at their nominal value for any amount not over \$5. Thus the reading of the laws taught the people that the trade dollar was a coin of their sovereignty, and for the redemption of which, at an unabated value, their Government was bound." He argues the matter fully, but this is the chief point, and we have seen nothing to refute it. Most of the arguments that have been brought against the recognition of the coin would answer in any case of repudiation.

---

THE recommendations of the Secretary in regard to the continuation of the national banks are almost identical with those of the Comptroller of the Currency. The main features are the abolition or reduction of the tax on circulation, and granting the privilege of issuing circulation up to 10 per cent. of the average market price of the bonds held as security. Among all the proposals that the need of the time has brought forth, perhaps this is the most practical, as very little legislation will be needed to carry it into effect.

### THE REPORT OF COMPTROLLER KNOX.

THE report of the Comptroller of the Currency contains the usual valuable information relative to the banks and currency of the country. The principal chapter in the report—that upon the contraction of the national bank circulation, which it is anticipated will result from the speedy retirement of the three per cent. bonds—is a comprehensive review of all the points involved. The information given, and the remedies suggested, will enable bankers to see clearly the possibilities of the situation.

The bonds held as security for national bank circulation consist, to the extent of more than one-half, of three per cents, which, at the present rate of payment of the debt, will be paid within the next two or three years; and of the whole amount of threes outstanding (\$305,529,000), the national banks hold about two-thirds. A very large number of new banks has been organized during the year, and their usual action in depositing threes indicates how both bankers generally are to deposit the higher priced long bonds. The reason of this is pointed out by the Comptroller, as being the small proportion of circulation received, under present laws, upon the actual market value of the security. With further calls of three per cents, this antipathy to lock up so great a margin of good security will be likely to increase, and the result will be the reduction of bonds deposited and circulation issued to a minimum.

The remedies proposed are, first, a reduction of the revenue. This, involving, as it does, so many difficult questions as to the tariff, is of doubtful immediate value, even if the action of Congress should be in that direction. The reductions in taxation must be sweeping in their nature to accomplish anything before the threes are paid. The second remedy is to increase the amount of circulation to be issued to 90 or 95 per cent. of the market value of the bonds. This, with the repeal of the tax on circulation, will increase the profit on circulation sufficient to induce the deposit of the fours and four-and-one-halves in place of the threes. The profit on circulation based on fours and four-and-one-halves is shown to be, at present, very small. This second proposition, it is believed, will afford immediate relief with entire safety to the circulation.

Other suggestions are then considered. First, the hope that the place of the national bank notes will be supplied by the increase in the

coin circulation of the country. It is shown that a constant increase in the gold circulation is not a certainty; that the gold in the country is liable to be affected by serious changes. Any change in the balance of trade might render large exportations necessary. The silver coin, on the contrary, under the operation of the law for the coinage of the silver dollar, is steadily increasing, and in case of dependence on coin alone to supply the place of national bank notes, the danger will be the substitution of silver coin or silver certificates, and not gold coin, for the notes now of gold standard value; and, the final result, a silver standard for the country. The substitution of Treasury notes, apart from any consideration of the constitutional question as to authorizing their issue in time of peace, would tend in the same direction. If such notes should be substituted for national bank notes, it would be necessary to increase the coin reserve held for their redemption. If any great exportation of gold should take place, doubts would arise in reference to their redemption in gold; and, if demand were made, the Government would be driven to a redemption in silver, thus again reaching the silver standard. Furthermore, under the present condition of things, it would be impossible to place Treasury notes in circulation, the great difficulty being to dispose of the surplus money now in the Treasury. This increase of means, involved in a new issue of Treasury notes, would go to increase this embarrassment.

While expressing the sound view that no circulation should be issued to national banks without the previous deposit of adequate security, the Comptroller gives interesting data as to the redemption of the notes of national banks which have been closed, either by voluntary liquidation, or by becoming insolvent during the last twenty years. The gain from notes lost or destroyed, which have failed to be presented for redemption, is shown in the case of these banks to be quite large. This gain has always, and does now, accrue to the profit of the Government, and it is a security in addition to the bonds deposited. The information given in reference to the circulation of these banks also shows, that if the proportion of the circulation issued on the bonds deposited had been larger than was actually issued under the law, there would still have been no loss to note holders. All of these data go to show the superabundance of security now required.

The amount of gold and silver in the country is the subject of another important chapter. The aggregate of gold is smaller than the estimate on the same subject by the Director of the Mint. The estimate of the Comptroller is based upon the estimates of the Director of the Mint for January 1, and November 1, 1879, and is completed for the succeeding years by adding, for each year, the production of the mines as estimated by the Director of the Mint, and the excess of gold imports over gold exports, as given by the Bureau of Statistics. The deductions are the amounts estimated to have been used in the arts,

and gold exports in excess of gold imports. There may be some errors in these estimates, and the result cannot necessarily be precisely accurate. If anything, the amount of gold as given is, perhaps, too large.

Other interesting chapters in the report are that on "Losses on unredeemed bank notes," before referred to in connection with the chapter on the contraction of the currency, and that on "Illegal certification of checks." As a remedy for the alleged necessity which exists in New York City of the national banks certifying or accepting checks for amounts larger than the balances then due drawers, Mr. Knox recommends the establishment of a stock clearing-house. The information in regard to the State banks, trust companies, and savings banks, as well as private bankers, is complete as usual. There is not much space devoted to taxation, the repeal of the law taxing capital and deposits having tended to render it less necessary than formerly to press this subject on the attention of Congress. The statistics given in previous reports by Mr. Knox have been the principal argument for the partial removal of the very onerous burden of taxation which, since the commencement of the system, has been borne by the national banks.

The extension of the corporate existence of national banks under the law of July 12, 1882, has proved a practical success, the law being well adapted for the purpose for which it was intended. Full information is given by the Comptroller in the chapter on this subject. The main part of the report itself is printed in this number of the JOURNAL, and the remaining sections will appear in the January number.

### AMOUNT OF THE CIRCULATION.

The Director of the Mint has prepared tables, showing the amount of the specie and paper circulation in the United States on October 1. The following shows the respective amounts in the Treasury and in the banks and general circulation :

| <i>Description.</i>      | <i>In the Treasury.</i> | <i>In banks and general circulation.</i> | <i>Total.</i>   |
|--------------------------|-------------------------|------------------------------------------|-----------------|
| Gold bullion.....        | \$61,683,816            | .....                                    | \$61,683,816    |
| Silver bullion.....      | 5,107,911               | .....                                    | 5,107,911       |
| Gold coin.....           | 144,446,728             | \$400,065,973                            | 544,512,699     |
| Silver dollars.....      | 114,587,372             | 39,783,527                               | 154,370,899     |
| Fractional silver.....   | 26,750,161              | 54,170,263                               | 80,920,424      |
| Gold certificates ..     | 27,480,300              | 55,014,940                               | 82,495,240      |
| Silver certificates..... | 15,568,280              | 78,921,961                               | 94,490,241      |
| United States notes ..   | 37,194,420              | 309,496,596                              | 346,681,016     |
| National bank notes..... | 6,017,710               | 347,324,961                              | 353,342,671     |
| Fractional currency ..   | 5,803                   | 6,987,103                                | 6,992,906       |
| Total .....              | \$438,842,499           | \$1,291,755,324                          | \$1,730,597,823 |

It may be noticed that the total circulation here given, \$1,730,597,823, differs widely from the estimate of the First Comptroller of the Treasury, given in our last number, which was \$1,575,104,642. The difference is partially accounted for by the fact that the latter estimate was based on the amount of gold and silver on February 1st, last. But it is much more largely owing to the fact that Mr. Burchard's table, above, contains the amount of gold and silver bullion, and also the coin certificates in the Treasury, which items the First Comptroller excluded. In this table the Director of the Mint estimates the trade dollars in the country at \$5,000,000.

Assuming that the amount and character of the circulation in the national banks was the same on the first of October as in July last, the United States circulation held by the public and banks other than national shows the following changes :

| <i>Description.</i>      | <i>Oct. 1, 1887.</i>   | <i>Oct. 1, 1888.</i>   | <i>Increase and Decrease.</i> |
|--------------------------|------------------------|------------------------|-------------------------------|
| Gold coin.....           | \$320,902,688          | \$327,833,157          | Inc.. \$6,930,469             |
| Silver dollars.....      | 30,801,231             | 35,783,527             | Inc.. 4,982,296               |
| Fractional silver.....   | 49,687,535             | 50,961,405             | Inc.. 1,273,870               |
| Gold certificates.....   | 313,140                | 22,223,350             | Inc.. 21,910,201              |
| Silver certificates..... | 61,397,180             | 75,900,831             | Inc.. 14,403,651              |
| United States notes..... | 251,419,341            | 235,654,138            | Dec.. 15,765,203              |
| National bank notes..... | 330,104,018            | 315,576,957            | Dec.. 14,527,061              |
| Fractional currency..... | 6,623,253              | 6,530,656              | Dec.. 92,597                  |
| <b>Total .....</b>       | <b>\$1,061,248,386</b> | <b>\$1,070,364,041</b> | <b>Inc.. \$9,115,655</b>      |

The deduction from this table is that the money in the hands of the people and the banks other than national increased during the past year by 19 million dollars. But it is pretty certain that there will be a decrease of bank circulation soon, as the Comptroller of the Currency has found that \$12,500,000 of the bonds called for payment on Dec. 1st and 15th are held to secure bank circulation.

THE PRESIDENT says in his Message: "The trade dollar was coined for the purpose of traffic in countries where silver passed at its value as ascertained by its weight and fineness. It never had a legal-tender quality. Large numbers of these coins entered, however, into the volume of our currency. By common consent their circulation in domestic trade has now ceased, and they have thus become a disturbing element. I recommend that provision be made for their reception by the Treasury and the Mints, as bullion, at a small percentage above the current market price of silver of like fineness." The trade dollars were made a legal-tender for sums not larger than \$5, in the act which authorized their coinage, and the statement that they "never had a legal-tender quality" needs this modification in order to present the whole truth.

THE SAVINGS BANK ALMANAC, to be issued by Bradford Rhodes & Co., early in 1884 (as soon as the January reports are ready), will be a valuable hand-book of information relative to the savings institutions of the country. JOURNAL subscribers will receive a copy without additional charge. See the announcement opposite title page in this number.

## THE REPORT OF THE TREASURER OF THE UNITED STATES.

The following are the principal points of general interest in the annual report of the Treasurer:—

On the first day of November, 1883, the reserve amounted to \$160,822,545.42, an increase over that of the previous year of \$25,670,856.43, due chiefly to an increase of \$8,918,286.36 in the gold assets, and of \$4,831,403.59 in the silver assets, and to a decrease of \$9,486,490.52 in the liabilities on account of matured bonds and interest.

The total assets amounted to \$408,644,089.50, made up as follows:

|                                     |                  |
|-------------------------------------|------------------|
| Gold coin and bullion .....         | \$209,429,989.90 |
| Silver coin and bullion.....        | 147,685,249.01   |
| Notes and deposits with banks ..... | 51,528,910.59    |

Included in the liabilities which on the same date amounted to \$247,821,544.08 were certificates *actually outstanding*, as follows:

|               |              |
|---------------|--------------|
| Gold.....     | \$52,076,180 |
| Silver .....  | 85,334,381   |
| Currency..... | 12,545,000   |

The percentage of the reserve to the amount of United States notes outstanding, (now and since the resumption act amounting to \$346,681,016) is shown to have fluctuated during the thirteen months ending November 1st, from 32.2 per cent. to 46.4 per cent., the latter being the percentage on the first of November last. The average for the fifty-nine months since resumption was 39 per cent. In the same table are given the cash in the Treasury, the current liabilities including and excluding the outstanding notes, and the percentage of the cash to the liabilities, including notes. The latter fluctuated from 48.8 per cent. in January, to 58.2 per cent. in November, and averaged 52.5 per cent. since resumption.

### THE CURRENCY.

United States notes were redeemed during the fiscal year to the amount of \$109,764,714, which included, however, \$32,000,000 of \$5,000 and \$10,000 notes never actually in circulation. The same amount of new notes was issued, and it appears that the increase in the number of notes outstanding at the close of the year was chiefly due to the demand for ones and twos, there having been issued over \$21,500,000 of such notes against a redemption of

\$18,740,000. The total number of notes outstanding was nearly \$66,000,000, and the increase nearly \$3,000,000.

The issue of silver certificates amounted to \$35,040,000 and the redemption to \$12,519,879 ; at the close of the year \$88,616,831 was outstanding—the Treasury holding \$15,996,145 of that amount in its cash. \$13,095,000 of these certificates were issued at western and southern offices of the Treasury upon gold deposits made in New York ; and during July, August and September, the amount so issued averaged more than \$1,000,000 in each month.

Gold certificates were issued during the year to the amount of \$86,710,000 ; \$7,834,900 of which were redeemed ; the amount held by the Treasury at the close of the year was \$22,571,270, leaving the amount actually outstanding, of the *new* certificates, \$56,303,830 ; the amount held by the Treasury increased to \$28,288,390 on September 30, and the amount actually outstanding was only \$51,355,810.

The Treasurer urges Congress to appropriate for the payment of the express charges, not only on notes, but as well on the certificates, when sent to the Treasury for the purpose of being replaced by new pieces. The condition of each of these three kinds of currency is becoming worse week by week, excepting where, as in cities where Treasury offices are located, the redemption may be obtained by such. But in the greater portion of the country this facility does not exist, and unless the express charges are paid by the holders, the notes continue to circulate. Attention is here called to the fact that of the first issue of notes, from 1862 to 1869, nearly \$12,000,000, or nearly 2 per cent., is still outstanding, of the total issue of \$669,000,000 ; probably a large portion will never be presented.

#### STANDARD SILVER DOLLARS.

A statement of the annual coinage and distribution, and the amounts in the Treasury, is presented. The total coinage to September 30, was \$154,370,899, of which \$115,249,663 was in the Treasury. The amount outstanding on that date, though only 25 1-3 per cent. of the total coinage, was greater than at any date since the coinage was begun in 1878. A table showing the coinage by months, as well as the distribution, shows that during the period from January to June or July the dollars are received into the Treasury in greater amounts than they are paid out or otherwise distributed. During the fiscal year only 11.6 per cent. of the coinage of the year was distributed.

In addition to this vast store of silver dollars, the Treasury held of fractional silver \$26,792,519.83, and of minor coin \$523,437.33, on September 30.

The Treasurer recommends an appropriation for the payment of transportation charges on fractional silver coin shipped to those desiring such coin, the last appropriation having been inadequate ; and

an appropriation for the recoinage of the worn and mutilated coins in the Treasury.

He also recommends that the three cent nickel piece be retired from circulation and its coinage discontinued; its similarity to the dime outweighing any supposed convenience of a coin of that denomination.

It appears that the transactions with the New York Clearing-House, during the sixteen months ending October, 1883, aggregated \$422,208,423.47, the balances paid by the Assistant Treasurer in that city amounting to \$254,611,987.02, of which \$231,245,000 was paid in gold or gold certificates, and nearly \$4,000,000 of the remainder in notes; during the same period the customs receipts at New York amounted to \$198,085,000; about \$138,000,000 was paid in gold or gold certificates, \$47,000,000 in silver certificates, and about \$12,000,000 in notes.

Since the resumption of specie payments over \$210,000,000 in notes have been received in payment of customs duties at all ports, to September 30, 1883, an average of \$3,690,000 per month.

#### NATIONAL BANKS.

The amount of bonds deposited by banks during the fiscal year, to secure circulation and public deposits, amounted to \$268,035,400, and the amount withdrawn to \$270,970,600.

Attention is directed to the fact that since the date of the first call for the 6 per cent. bonds, in 1871, the banks had on deposit at the dates when calls matured \$70,000,000 of the 6 per cent., and \$57,000,000 of the 5 per cent. bonds; in addition they had \$210,000,000 of the 5 per cent. and 6 per cent. bonds which matured in 1881, and were continued at 3 1-2 per cent.; subsequently, however, partly called, and the remainder exchanged for 3 per cents. Each change required a substitution of new bonds or the retirement of circulation issued on bonds called, and the present high premium on United States bonds would probably cause a material reduction of bank circulation, as the 3 per cent. bonds are called.

The amount of duty assessed and collected during the fiscal year from national banks was \$6,175,773.62; that for the latter half-year, having been on circulation only, was \$1,564,521.59, barely one-third of the amount for the first half-year.

The 140 banks acting as depositaries received during the year over \$145,000,000 of public moneys, holding at the close of the year about \$10,000,000, to secure which \$17,116,000 of bonds were held by the Treasurer. The Treasurer says that the transactions with his office were conducted in a satisfactory manner.

The expenses of redeeming national bank notes were decreased during the year from \$1.80 to \$1.55 per \$1,000 redeemed, although the aggregate expenses increased by \$18,063.89, chiefly in express charges, due to the increase of notes received from \$76,000,000 in 1882 to

\$102,700,000 in 1883. Over \$23,500,000 in notes of failed, liquidating and "reducing" banks were redeemed during the year.

The present system of redemption gives general satisfaction, and the expense of redemption is equitably divided between the holder and the issuer.

#### GENERAL NOTES.

\$134,009,750 of bonds were redeemed, of which \$44,850,700 was for the sinking fund. The amount of fractional currency outstanding, which for several years has been between \$15,000,000 and \$16,000,000, was reduced by a redemption of \$46,556.96 during the year, and stood at the close at \$15,376,629.14. It appears that the foreign holders of registered bonds to whom checks for interest are sent decreased during the year from 1,131 to 495, and the amount held from \$30,000,000 to little more than \$17,000,000. The number of holders of 4 per cent. bonds decreased to 48,154 in October, 1883, from 50,850 the same month last year.

---

THE HON. WILLIAM D. KELLEY, of Pennsylvania, in explaining the reason for introducing his bill to reduce the silver dollar coinage to \$1,000 a month, quotes from a report of a recent speech of Mr. Cross, the English Under-Secretary for India, which concludes as follows: "He did not venture any prophecy on this matter, but he certainly thought that disturbance was not further off than it was four years ago, and he confessed that it was not without anxiety that he looked forward to the possible or probable stoppage of the American coinage of silver, and the effect which it would certainly have on our exchange transactions with India." Mr. Kelley says: "Should Congress pass my bill, the apprehension of the Under-Secretary for India, 'that when America had absorbed as much silver as she required, they should have a recurrence of the disturbance of exchange,' would be fulfilled. Exchange with India would drop rapidly, as the price of silver would fall in the London market, and Parliament could not refuse to listen to the combined appeals of the Indian Government and the manufacturers and starving working people of Lancashire. To restore the old rate of exchange, she would have to invoke an international monetary conference, the effect of which would be to restore silver to the price at which it ranged under the bi-metallic law of France for more than seventy years, namely, more than 60*d.* per ounce. We now sell our silver as a commercial product at 50*d.* the ounce, while but for the haughty determination of England to let the world suffer rather than confess that her monetary law of 1816 was a mistake, every ounce that we have mined since the mono-metallic craze set in 1871-3 should have brought us at least 20 cents or 10*d.* an ounce more than it has done. To restore silver to its ancient value, and to give it its stability of value, is the object of my bill proposing to limit the further coinage of silver."

---

A FEATURE of the JOURNAL in 1884 will be a synopsis of the laws affecting banking interests in each State. In view of Comptroller Knox's plan regarding reports of banks and bankers to be made in each State under a general form, an outline of the laws now in operation will be interesting.

## MINNESOTA—STATE AND NATIONAL BANKS.

### PROGRESS OF THE CORPORATE BANKS OF THE STATE.

By a happy coincidence, the Comptroller of the Currency and the State Auditor of Minnesota (under the new act of 1883) recently called upon the banks for reports for the same day—October 2, 1883. Taking advantage of the fact, Hon. H. M. Knox, State Bank Examiner, compiled the reports of both the national and the State banks, and from his abstract the appended table has been prepared. The number of corporate banks in the State on the day for the reports was seventy-seven, of which forty-three were chartered under the national act and thirty-four under the State banking laws.

The table will prove of interest to financiers and business men, and, indeed, to all who regard exact figures, as indicating the rapid growth of the State in wealth and material resources. It shows the condition of the seventy-seven Minnesota banks at the close of business on October 2, 1883 :

### STATEMENT OF RESOURCES AND LIABILITIES.

| <i>Resources.</i>                        | <i>National<br/>Banks.</i> | <i>State and<br/>Savings<br/>Banks.</i> |

| <b>Totals.....</b>                       | <b>\$34,127,107</b>        | <b>\$14,366,830</b>                     |

| <i>Liabilities.</i>                               | <i>National Banks.</i> | <i>State and Savings Banks.</i> |
|---------------------------------------------------|------------------------|---------------------------------|
| Capital stock .....                               | \$9,151,600            | \$3,095,300                     |
| Surplus fund .....                                | 1,439,484              | 374,349                         |
| Other undivided profits .....                     | 890,844                | 219,598                         |
| Circulation outstanding .....                     | 2,126,524              | .....                           |
| Dividends unpaid .....                            | 7,830                  | 34,839                          |
| Individual deposits .....                         | 17,086,350             | 10,842,534                      |
| United States deposits .....                      | 78,934                 | .....                           |
| United States disbursing officers' deposits ..... | 323,502                | .....                           |
| Due to other national banks .....                 | 1,172,067              | 214,091                         |
| Due to State banks and bankers .....              | 1,583,887              | .....                           |
| Notes and bills rediscounted .....                | 305,385                | 360,479                         |
| Bills payable .....                               | 50,710                 | 8,000                           |
| Other liabilities .....                           | .....                  | 18,970                          |
| Totals .....                                      | \$34,127,107           | \$14,369,830                    |

The grand totals obtained by the combining of the above columns, resources or liabilities respectively, reach \$48,496,937. Among the latter the capital stock amounts to \$12,246,900 and the individual deposits to \$27,080,284.

#### DEDUCTIONS.

The seventy-seven banks have a paid-in capital stock of nearly \$12,250,000, and if to this amount is added the surplus and undivided profits, the amount is increased to \$15,172,000. These banks hold individual deposits amounting to over \$27,000,000, and Government deposits of over \$400,000 more. They show an aggregate of loans amounting to more than \$34,750,000. They have in their vaults, or on deposit in reserve agencies or in other banks, \$3,267,000, or 24 6-10 per cent. of all their immediate liabilities. From a similar summary prepared by the State Examiner for his annual report of last year, and taken from the official statements of the banks rendered on October 2, 1882, an opportunity is given for noting the growth of the banking business of Minnesota for another year. The main items of increase have been as follows :

|                                                   |             |
|---------------------------------------------------|-------------|
| Increase in capital stock .....                   | \$3,843,150 |
| Increase in surplus fund .....                    | 323,856     |
| Increase in undivided profits .....               | 141,873     |
| Increase in individual deposits .....             | 4,293,978   |
| Total .....                                       | \$8,578,857 |
| Increase in loans and discounts .....             | \$7,640,568 |
| Increase in cash on hand and due from banks ..... | 890,069     |
| Total .....                                       | \$8,530,637 |
| Increase in number of corporate banks, 14.        |             |

This showing does not include the large number of private banks in the State, as they make no official reports. In the amount of capital stock and in loans the increase has been much greater than for any former year of which record has been made.

## A NEW CLEARING-HOUSE SYSTEM.

### CHICAGO BOARD OF TRADE CLEARING-HOUSE.

The Clearing-House of the Chicago Board of Trade had its inception in the demand for relief from the operation of the lately-adopted rules regulating settlements of the speculative contracts of the board. The volume of trading of three hundred and fifty houses is immense, and without some plan of settling the contracts for future delivery, the business would be immensely curtailed, as no house would be able to fully protect all trades made to the extent of ten per cent. of the contract price of the purchase and of the sale. To avoid the delivery of the same property over and over again, through the same hands, "rings" are made by which the purchases and sales are settled—i. e., A has sold to B, B to C, C to D, D to A, the same property, and if delivery was made by any one of these four, the same property would, after passing through the hands of the other three, return to the party that made the first delivery. A rule, lately adopted, changed the old manner of settling, in that the parties to the rings should sell back to the seller and buy back of the buyer the same property at the market price. But, as in the interim of the first purchase and sale, and the ringing of the same, the market might have advanced or declined considerably, the parties in the rings would have to pay out and collect back large sums, where there was really but a small profit or small loss. Suppose 5,000 bushels of wheat, for December delivery, be rung up, at 95 cents, and the trades were made at a time when the market was 15 cents a bushel higher, and the ring was: A sold B @ \$1.10, B to C \$1.11, C to D \$1.09, and D to A at \$1.08—here A would pay to D \$650, and collect of B \$750; B would pay A \$750, and collect of C \$800; C would pay B \$800 and collect of D \$700, and D would pay C \$700, and collect of A \$650. Suppose we put this into another form, thus:

|                     | <i>Collects.</i> | <i>Pays.</i> |                      |          |
|---------------------|------------------|--------------|----------------------|----------|
| A bought @ \$1.06.. | \$750.00         | \$650.00     | Balance collected... | \$100.00 |
| B " @ 1.10..        | 800.00           | 750.00       | " " ...              | 50.00    |
| C " @ 1.11..        | 700.00           | 800.00       | " paid.....          | 100.00   |
| D " @ 1.09..        | 650.00           | 700.00       | " " ... ..           | 50.00    |
| Settled @ .95.....  | \$2,900.00       | \$2,900.00   |                      |          |

Thus we see that \$2,900 would have to be paid out, and \$2,900 collected; while, if we should allow each party to apply his collections against his payments, C would only have to pay \$100, D to pay \$50, and A to collect \$100, and B to collect \$50. This, then, is the idea and operation of the Clearing-House: that each member may use that due him by one portion of the members to pay what he owes to the remainder of the members. A printed blank

is used by each member clearing—this blank contains the names of all the members, and is ruled so that all sums claimed shall be in one column and all sums owing in another column.

The two columns are footed, the balance struck, and, if the report shows a payment, a check is given to the Clearing-House for said balance; and, if the result is the opposite, the Clearing-House gives a check; of course, the totals of the sums claimed, and the sums owing, are equal.

The system, considering the immense bulk of the business done, works well; and, if the rules of the Clearing-House were strictly followed, the whole thing would be done in  $2\frac{1}{2}$  hours each day; 5,000 to 8,000 collections and payments made, by the passage of 150 to 175 checks to the Clearing-House, and the giving out of about the same number by the Clearing-House.

In the first four weeks, which may be considered as an average, the number of items\* cleared amounted to 181,916, representing \$7,558,271.25, which was accomplished by the Clearing-House receiving 3,720, and paying out 3,945 checks, to the amount of \$2,128,761.25.

---

**LIABILITY OF SURETY—AN IMPORTANT DECISION.**—When the embezzlement of Cashier Hedden (First National Bank, Newark, N. J.), first came to light, Louis Dovell, the Teller, was charged with being an accessory, because he was cognizant of, and concealed the frauds. Mrs. Dovell, the mother of the Teller, therefore, placed property in the hands of the Directors to make good any loss that might arise from his acts to the amount of \$100,000. Dovell being acquitted, his mother has sued Receiver Hobart for the return of the property, which was refused.

The Vice-Chancellor filed an opinion in the case recently (September 26), in which he holds that while Dovell was under a moral obligation to expose Hedden, Mrs. Dovell is not a surety for a merely moral delinquency. The burden of proof is upon the Receiver to show Dovell's liability, and he has failed to do so. While it has not been shown how the discrepancy occurred, yet not a dollar of it has been traced to Dovell's hands. "There is no proof against him," says the opinion, "and when there is such abundant proof against another, the court cannot force conclusions as to this Teller in order to reach the property of his mother. Mrs. Dovell knew nothing of any crime, and only pledged her property to secure the bank against her son's default, and she cannot be held for the default of another of which she had no knowledge, and which was no part of the contract." The opinion concludes by holding that the complainant, Mrs. Dovell, is entitled to a reconveyance of all the lands which the bank holds, and to an accounting of all moneys received by the bank for lands sold to bona-fide purchasers, and for all rents of any of these lands received, and for all other moneys received, etc. The opinion establishes an important legal principle relative to the liabilities of inferior officers and employees. [The case will probably be taken up to the Court of Errors and Appeals for review.—ED.]

\* An item is a collection or a payment.

Trades are rung either by or without the delivery of the property.

## REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,  
OFFICE OF THE COMPTROLLER OF THE CURRENCY, }  
WASHINGTON, December 1, 1883.

I have the honor to submit for the consideration of Congress the twenty-first annual report of the Comptroller of the Currency, in compliance with section 333 of the Revised Statutes of the United States.

Two hundred and sixty-two banks have been organized during the year ending November 1, 1883, with an aggregate authorized capital of \$28,654,350. Circulating notes have been issued to these new associations amounting to \$7,909,190. This is the largest number of banks organized in any year since 1865.

These banks are located by geographical divisions as follows: Eastern States, seven banks, with capital of \$1,275,000; Middle States, forty, with capital of \$3,115,200; Southern States, forty-six, with capital of \$3,798,650; Western States, one hundred and thirty-two, with capital of \$18,295,500; Pacific States, eleven, with capital of \$620,000; and Territories, twenty-six, with capital of \$1,550,000.

Forty banks, with aggregate capital of \$7,736,000 and circulation of \$4,137,033, have voluntarily discontinued business during the year, twelve of which were succeeded by other banks, located in the same places, with nearly the same shareholders. Two national banks, with an aggregate capital of \$250,000, during the year ending November 1, 1883, have been placed in the hands of Receivers, making eighty-nine in all since the establishment of the system.

The total number of banks which have voluntarily closed their affairs by a vote of shareholders owning two-thirds of their stock, under sections 5220 and 5221 of the United States Revised Statutes, has been 450, of which 67 were placed in liquidation, in anticipation of the approach of the termination of their corporate existence, for the purpose of organizing new banks as their successors.

The shareholders of ten banks in all have permitted their corporate existence to expire, and these associations are in liquidation under section 7 of the act of July 12, 1882. National banks are organized in every State of the Union and in every organized Territory. The total number in operation on November 1 was twenty-five hundred and twenty-two, the largest number that has been in operation at any one time.

The following table gives the number of banks organized in each State and Territory, with their aggregate capital and circulation :

| <i>States and Territories.</i> | <i>No. of Banks</i> | <i>Capital.</i> | <i>Bonds deposited.</i> | <i>Circulat'n issued.</i> |
|--------------------------------|---------------------|-----------------|-------------------------|---------------------------|
| Texas.....                     | 23                  | \$1,741,000     | \$487,500               | \$404,900                 |
| Ohio.....                      | 22                  | 2,850,000       | 1,213,000               | 1,091,700                 |

[Here is introduced a table, showing the resources and liabilities of the national banks for eleven years, at nearly corresponding dates—about October 1—from 1873 to 1883, inclusive. The table is referred to in the following paragraph.]

The different items of resources and liabilities have generally increased during the last eleven years, but the items of United States bonds and circulation have decreased considerably during the past year. The item of individual deposits has largely decreased. This

large reduction is chiefly in the city of New York, and is to be accounted for by the fact that those banks doing business with brokers have, during the past year, exchanged checks to a large amount among themselves, instead of sending them through the Clearing-House for payment as heretofore, thus causing a reduction of 105 millions in the item of exchanges for the Clearing-House, under the head of resources, and a reduction of 104 millions in the individual deposits, under the head of liabilities.

The following table exhibits the resources and liabilities of the national banks at the close of business on the 2d day of October, 1883, the returns from New York City, Boston, Philadelphia and Baltimore, from the other reserve cities, and from the remaining banks of the country, being tabulated separately :

## RESOURCES.

**NUMBER, CAPITAL AND DEPOSITS OF NATIONAL BANKS, STATE AND SAVINGS BANKS, AND PRIVATE BANKERS.**

Section 333 of the Revised Statutes of the United States requires the Comptroller to present annually to Congress a statement of the condition of the banks and savings banks organized under State laws. Returns of capital and deposits have hitherto been made by these institutions and by private bankers semi-annually to this department for purposes of taxation. From these returns the following table has been compiled, exhibiting in concise form, by geographical divisions, the total average capital and deposits of all the State and savings banks and private bankers of the country for the six months ending November 30, 1882 :

| Geographical divisions.            | State banks and trust companies. |         |           | Private bankers. |         |           | Savings banks with capital. |       |           | Sav'g bks. without capital. |           |

The capital of the 2,308 national banks in operation on December 30, 1882, was \$484,883,492, not including surplus, which fund at that date amounted to more than 135 millions of dollars ; while the average capital of all the State banks, private bankers and savings banks for the six months ending November 30, 1882, was but \$232,435,330. The latter amount is less than two-fifths of the combined capital and surplus of the national banks.

The following table exhibits the capital and net deposits of the national banks on December 30, 1882, together with the aggregate average capital and deposits of all classes of banks other than national for the six months ending November 30, 1882 :

| Geographical divisions.           | State banks, savings banks, private bankers, &c. |              |              | National banks. |              |              | Total. |              |              |

| United States..                   | 5,140                                            | 232. 44      | 1,782. 70    | 2,308           | 484. 88      | 1,119. 82    | 7,448  | 717. 32      | 2,902. 52    |

The total number of banks and bankers in the country at the date named was 7,448, with a total banking capital of \$717,318,822, and total deposits of \$2,902,522,245.

On a subsequent page in this report, under the head of "State banks, savings banks, and trust companies," will be found tables showing the resources and liabilities of these corporations for the present year.

The following table exhibits, for corresponding dates nearest to May 31, in each of the last seven years, and to November 30, 1882, the aggregate amounts of the capital and deposits of each of the classes of banks given in the foregoing table :

| YEARS. | National banks. |              |              | State banks, private bankers, &c. |              |              | Savings banks with capital. |              |              | Savings banks without capital. |              |       | Total. |              |              |

| 1882*  | 2,308           | 484. 9       | 1,119. 8     | 4,473                             | 228. 4       | 779. 0       | 42                          | 4. 0         | 43. 5        | 625                            | 960. 2       | 7,448 | 717. 3 | 2,902. 5     |              |

It will be noticed that the first two tables of this chapter are for the six months ending November 30, while all similar tables in previous reports have been for the six months ending May 31. The law repealing the tax on capital and deposits of State banks and private bankers went into effect on November 30, 1882, in accordance with the opinion of the Attorney-General, and for this reason the Comptroller has given the returns to that date, which will be the last data to be obtained from this source.

\* To November 30, 1882.

In the last table of the series, the returns are given for the six months ending May 31, 1882, and also for the six months ending November 30th of the same year.

#### EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

At the date of my last report, the corporate existence of 86 national banks had expired, and 30 of these banks had extended their existence under act of July 12, 1882; 52 banks went into voluntary liquidation, and were succeeded by other associations organized in place thereof, chiefly previous to the act of July 12, 1882, which authorized the extension of the corporate existence for a new period of twenty years of national banks whose franchises were about to terminate. The 4 remaining banks expired by limitation and did not effect new organizations. The number of national banks organized under act of February 25, 1863, which were in operation at the date of my last report, December 2, 1882, was 307, as follows:

| DATE.               | No. of<br>banks. | Capital.    | Circulation. |
|---------------------|------------------|-------------|--------------|
| December, 1882..... | 10               | \$1,420,000 | \$1,278,000  |
| January, 1883.....  | 8                | 400,000     | 380,000      |
| February, 1883..... | 294              | 69,793,250  | 53,222,170   |

Of these banks, 273 have extended their corporate existence under act of July 12, 1882; 17 have been placed in liquidation by vote of shareholders of the bank, and 4 have expired by limitation. All of these banks which have been placed in liquidation and have expired by limitation, with the exception of two, have been succeeded by new associations, organized in the same localities with different titles.

All of the banks organized under act of February 25, 1863, ceased to exist by the terms of the act on or before twenty years from the date of its passage; but the banks organized under act of June 3, 1864, have succession for twenty years from the date of their organization, section 8 of that act providing that each association

Shall have power to adopt a corporate seal, and shall have succession by the name designated in its organization certificate, for the period of twenty years from its organization, unless sooner dissolved according to the provisions of its articles of association, or by the act of its shareholders owning two-thirds of its stock, or unless the franchise shall be forfeited by a violation of this act.

The provisions of the act of July 12, 1882, authorizing national banking associations to extend their corporate existence, are readily understood, and have proved to be well adapted for the purpose. Stockholders have not always assented to the proposed extension of corporate existence under the law; but, up to this date, such differences have been amicably arranged without the appeal to the Comptroller, provided for in section 5 of the act. Banks whose corporate existence does not expire until 1885 have already applied to the Comptroller for authority to extend their corporate existence, but

he does not consider that, under the law, he would be justified in issuing a certificate to a bank so long previous to the expiration of its first period of succession.

Before granting the extension, the law requires that he shall, in every case, make an examination of the bank applying therefor, and satisfy himself with regard to the character of the assets held by the bank. It would be manifestly not in accordance with the spirit of the law for the Comptroller to make an examination, and, upon such an examination, issue a certificate for the extension of the existence of a bank, to take effect many months thereafter, as it is possible that a bank in excellent condition at that time might, before the extension became operative, experience a serious impairment of its capital stock. The Comptroller has therefore declined such requests, and no certificate authorizing extension will be given to any bank until within a period of about four months previous to date of expiration of its franchise.

The whole number of banks now in operation, which organized under the act of June 3, 1864, whose periods of succession will terminate during each year previous to 1900, is 1,595, with capital and circulation as follows :

| YEARS.     | No. of<br>banks. | Capital.      | Circulation.  |
|------------|------------------|---------------|---------------|
| 1884.....  | 249              | \$89,611,570  | \$80,528,825  |
| 1885.....  | 727              | 185,938,715   | 124,807,450   |
| 1886.....  | 19               | 2,715,300     | 1,758,250     |
| 1887.....  | 6                | 1,100,000     | 976,500       |
| 1888.....  | 11               | 1,300,000     | 719,100       |
| 1889.....  | 3                | 600,000       | 540,000       |
| 1890.....  | 63               | 9,290,500     | 6,419,950     |
| 1891.....  | 104              | 13,193,900    | 9,120,880     |
| 1892.....  | 103              | 12,879,600    | 8,300,870     |
| 1893.....  | 39               | 4,740,000     | 3,849,400     |
| 1894.....  | 67               | 7,638,000     | 5,819,150     |
| 1895.....  | 82               | 10,517,000    | 7,695,180     |
| 1896.....  | 23               | 1,968,800     | 1,525,500     |
| 1897.....  | 29               | 3,019,000     | 2,151,000     |
| 1898.....  | 27               | 2,649,800     | 2,208,600     |
| 1899.....  | 43               | 4,930,000     | 3,910,900     |
| Total..... | 1,595            | \$352,089,985 | \$240,329,555 |

#### CONTRACTION OF NATIONAL BANK CIRCULATION.

The Secretary of the Treasury has been compelled, on account of the large receipts of revenue in excess of expenditures, to call in rapidly for payment that portion of the bonded debt which is payable at the pleasure of the United States. During the year ending November 1 more than 105 millions (\$105,322,450) of the public debt has been paid, and all of the remaining three-and-a-half per cent. bonds, amounting to \$91,596,250, have been called for payment, and ceased to bear interest on November 1. Notwithstanding the fact that 262

new banks were organized during the past year, with a capital of \$28,654,350, depositing \$9,375,550 of bonds as a security for circulating notes, the aggregate amount on deposit for that purpose has diminished from \$362,490,650 to \$352,907,300, a reduction of \$9,583,350. More than 40 millions of three-and-a-half per cents held by the banks on November 1, 1882, have been withdrawn or called for payment; the threes have increased less than 22 millions, and the fours and four-and-a-halves less than 9 millions.

During the month of September fifteen millions of three per cents were called by the Secretary, and during October fifteen millions, and on November 17 ten additional millions, an aggregate of forty millions, of which about eighteen millions belong to the banks. The remainder of the bonds outstanding payable at the pleasure of the Government consist of 265 millions of threes, and of these the national banks hold more than two-thirds. Unless there shall be legislation by the present Congress which shall reduce the receipts of the Government, it is probable that the United States bonds will continue to be paid at the same rate as during the past year, in which event all the threes will be called for redemption within the next three years. This will reduce the bonds held by the banks from 353 millions to 151 millions, and cause a contraction in the national bank circulation of about 60 millions per annum. This large contraction will be somewhat reduced by the action of those banks which substitute four and four-and-a-half per cents in place of the threes; but the amount of long bonds held by the banks may also be reduced by that class of banks which may conclude that it is for their interest to avail themselves of the premium at the time when, in their opinion, the value of said bonds shall reach their maximum price in the market.

The total amount of bonds outstanding, held by the banks and by the people, which are available for circulation, and not payable at the pleasure of the Government, and which cannot be redeemed except by purchase in the market, is as follows:

|                                                           |                 |
|-----------------------------------------------------------|-----------------|
| Four per cents, payable July 1, 1907.....                 | \$737,946,550   |
| Four and a half per cents, payable September 1, 1891..... | 250,000,000     |
| Pacific Railway sixes, payable September 1, 1895.....     | \$3,002,000     |
| Pacific Railway sixes, payable September 1, 1896.....     | 8,000,000       |
| Pacific Railway sixes, payable September 1, 1897.....     | 9,712,000       |
| Pacific Railway sixes, payable September 1, 1898.....     | 29,388,000      |
| Pacific Railway sixes, payable September 1, 1899.....     | *14,526,512     |
|                                                           | <hr/>           |
|                                                           | 64,623,512      |
|                                                           | <hr/>           |
|                                                           | \$1,052,570,062 |

It is evident that unless there is additional legislation the bonds held as security for circulation will rapidly diminish. New legislation may, however, postpone the payment of the public debt, or cause the profit on circulation to increase sufficiently to induce the national banks to invest in the long four per cents, which are not to mature

\* \$483,512 of this amount is payable in 1900, and \$4,680 in 1902.

for a period of twenty-four years. The contraction of the bank circulation may be avoided by reduction of the redundant revenue, and there is no doubt that this is the true policy. "The radical cure for the evil" of an accumulation of a large surplus, says the Secretary in his last report, "is in the reduction of taxation, so that no more will be taken from the people than enough to carry on the Government with economy, to meet all its obligations that must be met from year to year, to pay off with reasonable celerity the part of the debt which it may pay at pleasure, and to provide, through the sinking fund, for the payment of that which will become payable by and by. The evil comes from the likelihood of the Government holding, from time to time, a large surplus to be poured out in volume at uncertain and unforeseen times, and at times often inopportune for the business of the country. There could not be that surplus, surely not so great a one, if the subjects of taxation were lessened, and the rates made smaller upon those retained."

The contraction of the bank circulation may also be avoided by the conversion of the long bonds into three per cents, by offering inducements to the holders of these bonds to exchange them for three per cents to mature in 1907, the Government paying to the holders thereof a reasonable amount for their difference in value. The principal objection made to this proposition is, that the Government would pay to the holders a large premium upon the bonds held by them, but it is evident that in the course of two or three years, after the three per cents are paid, if there is no reduction in the revenue, the surplus will enormously increase, unless the long bonds are then purchased by the Government at a rate to be then fixed by the holders thereof, which will be a rate much higher than that now proposed. The premium to be paid to the holders of these long bonds may be considerably reduced by providing that the circulation to be issued upon the proposed bonds when deposited by the national banks as security therefor shall not be subject to the present tax of 1 per cent. per annum, or by postponing the time for their payment. Such legislation would make the new bonds more valuable for this purpose than for any other, and would be likely to prevent their withdrawal until maturity, if once deposited, and for this reason the bonds would be more desirable as a basis for circulation than any which have heretofore been issued.

The contraction would also be avoided by providing for the removal of the tax on circulation, and the increase of the amount of circulation to be issued to the banks upon the bonds deposited by them.

The Comptroller, in discussing this subject in his report for 1882, said:

If the public debt is to be paid hereafter as rapidly as during the past three years, all of the interest-bearing bonds will soon be surrendered and canceled, and there is danger that the bank circulation will be so rapidly retired as to cause a contraction

of the currency, which will affect the price of commodities and create embarrassments in business; but there is now no such pressing necessity for a speedy payment of the public debt as there is for the reduction of the redundant revenue. It is believed that Congress will soon provide for so large a reduction of the revenue that a sufficient amount of bonds will remain for the security of the bank circulation. \* \* \*

If the whole public debt were reduced to a uniform rate of 3 per cent., the present high premium upon bonds would almost entirely disappear, and the volume of circulation would respond more readily to the demands of business. The temptation to sell such bonds for the purpose of realizing the premium would no longer remain. A proposition for refunding all the bonds, not payable at the pleasure of the Government, into three per cents, was suggested during the last session of Congress. The proposition is that inducements be offered to the holders of four and four-and-a-half per cent. bonds to surrender them to the Government, receiving in payment therefor three per cent. bonds having the same dates of maturity as the bonds which are to be surrendered. The new three per cent. bonds issued would themselves bear a small premium, and it is believed that the holders of four per cents would consent to such an exchange if accompanied by an offer of not more than 15 per cent. premium. The amount of the premium upon this class of bonds, say 700 millions, now outstanding at 15 per cent., would be 105 millions of dollars, and this premium could be paid, as the bonds are surrendered for exchange, from the surplus revenue of the Government, thus in effect reducing the debt of the Government 105 millions by a prepayment of interest which must be paid at a greater rate each year until their maturity.

The benefits of this plan both to the holder and to the Government are apparent. The holders would receive, in the shape of 15 per cent. premium upon the bonds, a portion of their interest in advance, which would be available for loans at rates greatly exceeding the borrowing power of the Government, which is now less than 3 per cent. The Government would be enabled by this use of its surplus to save a portion of the interest which otherwise it would be compelled to pay hereafter. \* \* \*

One alternative would be to reduce the tax upon circulation, and another to amend section 12 of the act of July 12, 1882, so as to authorize the banks to receive circulation at the rate of 90 per cent. upon the average current market value of the bonds for the six months previous. If the bonds shall decline in the market, additional bonds may be required to be deposited, or the interest may be retained by the Treasurer, upon notice from the Comptroller, to make up the deficiency. Such an amendment has frequently been suggested, and, in fact, the original national bank act authorized the issue of circulating notes to the amount of 90 per centum of the current market value of United States six per cent. bonds deposited, provided that such 90 per centum was not in excess of the amount of the bonds at their par value, or in excess of the paid-in capital stock. The law also provided for the deposit of additional bonds or money upon their depreciation, to remain so long as the depreciation should continue.

It is submitted that the issue of circulation upon four and four-and-a-half per cents at 90 per cent. upon their current market value, under a restriction similar to that last mentioned, is equally safe with the issue of 90 per cent. upon the three per cents now outstanding at par; or that a reduction of tax upon circulation to one-half of 1 per cent., or to an amount sufficient to reimburse the Treasury for the whole expense of the issue of bank circulation and all expenses incident thereto, is not unreasonable in view of the fact of the large reduction upon the income derived from United States bonds, amounting to more than 2 per cent. since this tax was imposed.

Other propositions have been suggested in order to postpone or prevent the contraction of national bank circulation which is now imminent, but the Comptroller considers that, so long as there is a sufficient amount of United States bonds outstanding, legislation should be so shaped as to continue them in use as a basis for national bank circulation. When the national bank act was passed twenty years ago, it authorized the issue of bank notes equal in amount to

90 per cent. of the current market value of the bonds, but not exceeding par, nor above the amount of the capital of each bank. The only Government bonds then in existence bore interest at the rate of 6 per cent., and the amount of circulation was limited to 300 millions. Subsequently, on March 3, 1865, when this section of the act was amended so as to issue circulating notes at the same rate, but also in proportion to capital, the amount of circulation was also limited to 354 millions, and the amount of bonds then outstanding bore interest at the rate of either 5 or 6 per cent. The bonds held by the national banks on November 1 of that year consisted exclusively of five and six per cents, amounting in the aggregate to \$387,549,412, of which \$128,503,212 were sixes and \$239,046,200 were fives. The great change, since that date, in the securities held by the banks may be seen by reference to the following table, which gives the kind and amount of bonds held on November 1, 1882 and 1883:

| 1882.                   |                      | 1883.                   |                      |
|-------------------------|----------------------|-------------------------|----------------------|
| Four-and-a-halves.....  | \$33,754,650         | Four-and-a-halves.....  | \$41,319,700         |
| Fours.....              | 104,927,500          | Fours.....              | 106,164,850          |
| Three-and-a-halves..... | 40,006,950           | Three-and-a-halves..... | 632,000              |
| Threes.....             | 179,075,550          | Threes.....             | 201,327,750          |
| Pacific sixes.....      | 8,526,000            | Pacific sixes.....      | 8,463,000            |
|                         | <u>\$362,490,650</u> |                         | <u>\$352,937,300</u> |

The interest upon bonds deposited was then from 2 to 3 per cent. greater than at present, and the profit on circulation about 2½ per cent. There is now only a nominal profit on circulation issued upon United States bonds, and many of the banks which have organized during the past year whose bonds have already been called for payment have experienced a loss of the amount of premium paid for such bonds.

The yearly profit on circulation based upon 4 per cent. bonds may be seen in the following table: \*

|                                                               |                                |
|---------------------------------------------------------------|--------------------------------|
| \$100,000 fours at 2½ per cent. premium, annual interest..... | \$4,000                        |
| Circulation 90 per cent. on par value.....                    | \$90,000                       |
| Deduct 5 per cent. redemption fund.....                       | 4,500                          |
| Loanable circulation.....                                     | \$85,500 at 6 per cent., 5,130 |
| Gross receipts.....                                           | \$9,130                        |
| Deduct 1 per cent. tax.....                                   | \$900                          |
| Deduct cost redemption.....                                   | 30                             |
| Deduct 2-47 premium.....                                      | 894                            |
|                                                               | <u>1,824</u>                   |
| Net receipts.....                                             | \$7,306                        |
| \$121,000 loaned at 6 per cent.....                           | 7,280                          |
| Profit on circulation.....                                    | \$46                           |

\* In this computation the premium is deducted in 23½ equal annual installments, and the 5 per cent. fund is regarded as reducing the loanable circulation. But if the principle of the sinking fund be applied in arriving at the annual amount, which, placed at interest and compounded until the maturity of the bonds, will make good the premium paid, would be smaller, thus increasing the profits. Experts estimate that if the 5 per cent. redemption fund is not deducted, and the premium paid compensated for on the sinking fund principle, the annual profit on 4 per cent. bonds at 122 premium is, when the current rate of interest is 6 per cent., \$725, when 7 per cent., \$461, and when 8 per cent., \$191 on each \$100,000 of the bonds deposited to secure circulation.

If the rate of interest was 7 per cent. there would be no profit. The annual profit on \$100,000 four-and-a-half per cent. bonds at 14 per cent. premium, the rate of interest being 6 per cent., would be \$110, and at 7 per cent. there would be no profit.

At the time of the organization of the system, and since that time, the law has authorized the issue to a bank of \$100,000 capital, circulation at the rate of 90 per cent. upon securities having a market value equal to the capital. The value of \$100,000 of four per cents is now \$121,000, upon which only \$90,000 of bonds are issued, the margin being 31 per cent. instead of 10 per cent. as formerly, while the banks at the same time, under act of June 20, 1874, are required to keep on deposit with the Treasurer a five per cent. redemption fund, which amounts in the aggregate to an average of about 15 millions of dollars. Thus it will be seen that with the decrease of interest and decrease of profit upon circulation, the amount of issue upon the value of the bonds has also decreased. There is no propriety or justice in authorizing the issue of ninety dollars upon every one hundred dollar three per cent. bond worth par, and refusing to issue a like proportion upon a four per cent. bond worth one hundred and twenty-one dollars. The holder of a Government bond can readily borrow money upon it as a pledge from a bank to the amount of 95 per cent. of its market value, and it is not surprising that banks should prefer to relinquish their circulation rather than deposit as security bonds having a margin of more than one-third of the circulation issued.

The law authorizing increase of issue to 90 or 95 per cent. upon the lowest market price during the calendar or fiscal year previous to the deposit, together with the repeal of the tax upon circulation, would result in the deposit of a sufficient amount of the four and four-and-a-half per cents to maintain the circulation at about its present aggregate.

Section 6 of the act of July 12, 1882, provides that any gain that may arise from the failure to present the circulating notes of the national banks shall inure to the benefit of the United States; and in order to ascertain the amount of such circulating notes, it is provided that new circulation, readily distinguishable from the circulating notes before issued, shall be issued to such banks as shall, under the law, be authorized to renew their corporate existence. It is believed that the gain arising from the accidental loss or destruction of circulating notes will amount to from 1 to 1½ per cent. upon the highest amount outstanding during each period of twenty years. The amount of gain to the Government at the present time, arising from this source, is probably about four millions of dollars. This gain does not properly belong to the United States, or to the banks issuing the notes. It really belongs to those parties only who were the owners of such circulating notes at the time of their loss or destruction. The Government of the United States receives the circulating notes of the national banks in payment

of all dues except duties on imports, and guarantees the payment of their issues at the Treasury, on demand, holding a paramount lien upon all the assets of each bank to make good any deficiency which may arise after the sale of the bonds pledged for such notes.

The amount of the gain accruing from the non-redemption of lost national bank notes can soon be approximately estimated, and should be authorized to be carried to the credit of an "insolvent bank redemption" account in the office of the Treasurer. If this fund should be used for the purpose of redeeming the notes of insolvent national banks, the avails of whose bonds might be insufficient for that purpose, the issue could safely be increased to a rate not exceeding the lowest market value of the bonds during the calendar or fiscal year previous to the deposit. Experience has shown that if instead of ninety dollars upon each one hundred dollars of bonds, one hundred dollars of circulating notes had been issued upon every seventy dollars of United States bonds deposited, there would not have been any loss to the Government, or to the holders of the circulating notes of any of the national banks which have failed during the last twenty years; but that there might have been an additional loss to the depositors, depending upon the character of the assets held in place of the portion of bonds which on this supposition would have been released. If circulation had been issued to these insolvent banks, which had a capital of about twenty millions, to the amount of their capital, the value of the bonds being the same, and there had been just previous to failure a decline in the market of 5 per cent. upon the value of the bonds, the losses would not have exceeded one million of dollars. These possible losses would have fallen upon the holders of the notes of such few banks only as became insolvent, or upon the creditors of these banks or the Government; and if the gain arising from lost notes could have been used as proposed, these possible losses would have been provided for. A very large proportion of the national banks are strong in assets and in the wealth of their shareholders, and no losses can arise either to creditors or note holders from their issues. Circulation could, in fact, be safely issued to many of the national banks, which have an accumulated surplus of more than 20 per cent. of their capital to an amount exceeding their capital or bonds deposited. But the present system is a free banking system, under which any association of persons may organize a bank. The increase in the wealth of the country has been rapid, and associations are being rapidly organized in such localities as offer good business inducements, by persons of undoubted means and good financial standing; but human nature remains the same, and Congress would not be justified, under the present system, in authorizing the issue of circulation beyond the amount of security deposited, as such legislation would offer inducements to unprincipled men to organize banks, and issue circulation for fraudulent purposes.

A proper limit to the issue of the circulating notes of each bank,

and adequate security for the amount to be issued, does more to prevent the organization of fraudulent institutions, in such a broad territory as our own, than any penal provision however stringent.

Legislation authorizing such an account as has been suggested to be opened in the office of the Treasurer would insure the Government against any possible loss, and the increase of circulation upon bonds, together with the repeal of the tax upon circulation would undoubtedly have the effect of supplying the country with bank circulation for the next twenty-four years, or until the maturity of the four per cent. bonds, and probably without affecting the safety fund thus provided to the amount of a single dollar. This legislation would have the effect to advance the price of the bonds, but the advance would bring them into the market, still leaving a sufficient profit to make the investment desirable as a pledge for circulation.

If beyond any anticipated contingency the bonds should largely decline in value, the amount of security could immediately be required to be increased, under section 5167 of the Revised Statutes, which provides that:

Whenever the market or cash value of any bonds thus deposited with the Treasurer is reduced below the amount of the circulation issued for the same, the Comptroller may demand and receive the amount of such depreciation in other United States bonds at cash value or in money from the association, to be deposited with the Treasurer, as long as such depreciation continues.

If considered desirable, in anticipation of a gradual decline of premium, the proposed law could require the amount of circulation issued to be reduced to one per cent. yearly, or such per centum that the total amount outstanding could not at any time exceed the value of the bonds on deposit, and the Treasurer also could be authorized to retain the interest upon bonds when necessary, upon the request of the Comptroller.

The proposition to convert the long bonds into threes, is more desirable than the proposition to increase the rate of circulation, for the reason already referred to, that the new three per cents, payable in 1891 and 1907, would bear but a comparatively small premium in the market and that the Government would be enabled to use its surplus revenues to advantage. They would be the only bonds available for circulation, and would not be likely to be withdrawn for sale for the purpose of realizing the market price; and the profit on circulation would be sufficient to induce banks to deposit them whenever additional circulation is required.

From time to time, as the present three per cents are called for payment, the fours and four-and-a-halves are likely to advance in the market, and subsequently to decline gradually until the day of payment. There will be a diversity of opinion in reference to the date when they will reach their maximum price in the market, and for that reason they will be deposited and withdrawn, not when a greater or less amount of circulation is needed, but when the holder believes

that he can realize the greatest profit from their purchase or sale. The new long three per cents would give that elasticity to the circulation which is greatly needed, and which cannot be obtained from the Government securities worth a premium nearly equal to one-fourth of their par value.

While the Comptroller is of opinion that the addition to the circulating medium of the country during the last three years has been more than sufficient to supply the legitimate demands of business, he believes that the large contraction of the country now imminent, should not be allowed to take place too rapidly, or the deficiency caused by such contraction be replaced by a substitute less desirable than the bank notes now in circulation. It is said that if the deficiency arising from the retirement of national bank notes during the next three years should amount to about 60 millions per annum, it may be supplied by the gold imported from abroad, by the annual product from the mines, or by the coinage of the silver dollar upon which silver certificates are now issued.

By reference to the next chapter of this report it will be seen that there has been a large increase in gold coin, and also a large and steady increase in the amount of silver, chiefly of standard silver dollars, since the date of resumption.

But in the fiscal years from 1868 to 1877 there was an excess of gold exports as follows :

|           |              |           |              |
|-----------|--------------|-----------|--------------|
| 1868..... | \$63,658,901 | 1873..... | \$36,174,268 |
| 1869..... | 21,870,980   | 1874..... | 14,539,283   |
| 1870..... | 21,579,012   | 1875..... | 53,284,184   |
| 1871..... | 59,802,647   | 1876..... | 23,184,341   |
| 1872..... | 40,831,302   | 1877..... | 344,140      |

while during the succeeding fiscal years there was an excess of gold imports, as follows :

|           |             |           |              |
|-----------|-------------|-----------|--------------|
| 1878..... | \$4,125,760 | 1881..... | \$97,463,127 |
| 1879..... | 1,037,334   | 1882..... | 1,789,174    |
| 1880..... | 77,119,371  | 1883..... | 6,133,261    |

The gold production from the mines is estimated to have been about 32 millions annually during the last six years, from which must be deducted about 11 millions, the amount estimated to have been used annually in the manufactures and arts.

The annual increase or decrease of gold in this country is subject to great variations, depending largely upon the value of its products exported and the amount of its imports. It may at any time be largely to the advantage of trade and the business of the country to send gold abroad for the purchase of commodities, and if the experience of former years, not only in this country but elsewhere, is repeated, the amount of gold now held by us will not long hence be greatly diminished. Under existing laws, the increase in standard silver dollars cannot be less than 27 millions annually, and to that extent

the contraction caused by the withdrawal of the bank circulation may be supplied by the introduction of an inferior currency.

It is also urged that Treasury notes as well as silver certificates may be issued in place of the bank notes which are to be retired.

This latter proposition was fully discussed in the reports of the Comptroller previous to the resumption of specie payments on January 1, 1879. It has been discussed in nearly every village and city of the Union, at a time when a large amount of five and six per cent. bonds was payable at the pleasure of the Government, and when the receipts of the Government did not so largely exceed its expenditures. Even under such favorable circumstances the constitutional right to issue legal-tenders in time of peace was questioned; and it may be added that this question is now before the Supreme Court of the United States for its determination. If Treasury notes not a legal-tender were to be issued for the amount of the present paper circulation, in all about 700 millions, the Government, as was then said, must hold a large amount—not less than 250 millions—of coin as a reserve, a considerable portion of which must be purchased; and the interest upon this reserve and the expense of issuing the notes and the cost of redemption were then considered more than equal to the advantage or profit derived by the banks from the issue of circulating notes, while the obvious advantages of the present system of paper currency, composed of bank and Treasury notes in nearly equal proportions, and of having the monetary institutions of the country large holders of the public debt, would be lost.

The most serious objection to the proposition was that if the entire paper money of the country was issued by the Government, its amount would depend, not upon the demands of business, but upon the action of political parties and of Congress, and could be increased and diminished at its pleasure. No country which has continuously maintained specie payment has burdened itself with direct issues of paper circulation. Such issues in England and France are not the issues of the country, but the demand promissory notes of great banking institutions organized for this purpose. The act to provide for the resumption of specie payments, of January 14, 1875, provided for the reduction of the legal-tender Treasury notes, and the act of May 31, 1878, fixed the limit of such notes, leaving a conviction in the minds of the people that the amount was not to be increased. If the amount is to be increased, it cannot be done without reopening again the discussions which took place previous to resumption, and which finally resulted in the passage of the act extending the corporate existence of the national banks during the last session of Congress. If reopened it is more likely to result, as has been said by the Comptroller in previous reports, in the repeal of the act taxing the notes of State banks out of existence than in any considerable increase of Treasury notes.

Since the date of the commencement of this exhaustive discussion in every part of the country, its situation has greatly changed. Specie payments have been resumed, and the revenue of the Government has so greatly increased that the funded debt has been diminished more than four hundred millions, and the borrowing power of the Government increased from 5 per cent. to about 2.80 per cent. More than 1,700 millions of five and six per cent. bonds have been replaced by fours and four-and-a-halves, and the remainder converted into three-and-a-halves; while during the last two years five hundred and seventy millions of the three-and-one-half per cents have either been refunded, converted into threes, or paid, or called for payment, and the Treasury is embarrassed, not for want of the funds with which to pay the expenses of the Government, but with a revenue greater than it needs, and greater than it can judiciously disburse. Under such circumstances, authority of Congress to print additional Treasury notes would lead to still greater embarrassment, and place in the Treasury circulating notes at a time when the most important subject before Congress is the reduction of a redundant revenue and the employment of the surplus of an overflowing Treasury. If it were possible to issue additional Treasury notes when the revenues of the Government are so much greater than its expenditures, and simultaneously with the yearly addition of silver dollars now authorized by law, it is evident that such steps would lead plainly from a gold to a silver standard. The gold balance belonging to the Treasury is large, but the silver balance has increased rapidly, and the laws now in force will continue to increase the silver and reduce the gold.

The issue of additional Treasury notes will weaken the Treasury, and be likely to create doubts on the part of some of the holders as to the ability of the Government to pay gold on demand, and the Government, by declining to pay in gold, thus taking from the holder the option of payment, may at any time bring the nation upon the silver standard, advancing the price of products and demonetizing the entire gold coin of the country. In such a crisis, the reserve of gold in the Treasury will be continually diminished on the one hand by the presentation of its notes for payment, while its revenue, on the other hand, will not be increased by customs duties paid in gold, as at present, but by the return of silver dollars and silver certificates, which will under existing laws sooner or later drive every dollar of gold coin out of circulation, bringing upon the country a much greater contraction than that which it is now proposed to prevent.

#### DISTRIBUTION OF COIN AND PAPER CURRENCY.

In previous reports tables have been giving showing the amount of coin and currency in the country and its distribution in the Treasury, in the banks, and among the people on January 1, 1879, the date of the resumption of specie payments, and on November 1, of that and

each succeeding year. These tables have been thoroughly revised, and are again presented, the amounts on November 1, 1879, being omitted, while those on November 1, 1883, are added.

The amounts of gold and silver in the country available for circulation are based upon the estimates of the Director of the Mint for January 1, 1879, and November 1, 1879. The amounts of gold for the succeeding dates have been obtained by adding the gold production of the country, less the amounts used in the arts, from estimates of the same officer, adding the excess of gold importations during the year or deducting the excess of gold exportations for the same period, according to the reports of the Bureau of Statistics. The amounts of silver are obtained by adding for each year the amount of silver dollars and fractional coinage, less amounts recoined. For the year 1883 the silver bullion purchased by the Government for coinage, and on hand on November 1, is included.

From November 1, 1882, to November 1, 1883, the production of gold by the mines of the United States is estimated to have been \$32,000,000. During the same period the amount of gold—foreign and domestic gold coin and bullion—imported in excess of the amount exported has been \$13,613,992, making an increase in the stock of gold in the country of \$45,613,992. From this amount must be deducted the amount used in the arts during the same period (\$11,000,000), leaving \$34,613,992 as the increase in the stock of gold coin and bullion in the country.

The total excess of imports of gold over exports of the same from the date of resumption to November 1, 1883, has been \$186,195,510, and the total estimated gold product of the mines of the United States for the same period has been about \$167,600,000. The total amount of silver coined during the year has been, after deducting the recoinage, \$29,021,143, of which \$28,391,069 were standard silver dollars. The total amount of the latter coined since the passage of the act of February 28, 1878, authorizing that coinage, up to November 1, 1883, has been \$156,720,949.

The following table, based upon the estimates and figures given above, shows the amount of coin and currency in the country on January 1, 1879, and on November 1 of the years named :

|                                | January<br>1, 1879. | November<br>1, 1880. | November<br>1, 1881. | November<br>1, 1882. | November<br>1, 1883. |
|--------------------------------|---------------------|----------------------|----------------------|----------------------|----------------------|
| Gold coin and<br>bullion ..... | \$278,310,126       | \$449,327,404        | \$550,922,308        | \$547,356,282        | \$581,970,254        |
| Silver coin .....              | 106,573,803         | 153,653,630          | 181,476,144          | 206,744,424          | 242,701,932          |
| Legal-tender<br>notes .....    | 346,681,016         | 336,681,016          | 346,681,016          | 346,681,016          | 346,681,016          |
| National - bank<br>notes ..... | 323,791,674         | 343,834,107          | 380,344,250          | 362,727,747          | 352,013,787          |
| Total.. ...                    | \$1,055,356,619     | \$1,283,496,157      | \$1,439,423,808      | \$1,465,509,449      | \$1,523,366,989      |

There has been no change in the aggregate of legal-tender notes outstanding, which still remains as fixed by the act of May 31, 1878. National bank notes have decreased \$10,713,960 during the year; the amounts of gold and silver have increased \$34,613,992 and \$33,957,508, respectively, making the total increase during the year in gold, silver, and currency, \$57,857,540.

The table below gives the portion of the gold, silver, and currency held by the United States Treasury and by the national and State banks. The amounts in the United States Treasury are for the corresponding dates with those in the preceding table. The amounts in the national banks are for the corresponding dates nearest thereto on which returns were made to the Comptroller, viz: January 1, 1879; October 1, 1880 and 1881; October 3, 1882, and October 2, 1883. The amounts in the State banks, trust companies, and savings banks have been compiled in this office from official reports for the nearest obtainable dates.

| Grand totals. ..                         | \$406,935,902               | \$485,668,362                | \$537,583,083                | \$552,447,473                | \$606,682,964                |

If the aggregates of gold, silver, and currency for the several dates in the above table be deducted from the amounts of the same items at

corresponding dates in the table which precedes it, the remainders will be, approximately, the amounts in the hands of the people at corresponding dates.

|               | <i>January<br/>1, 1879.</i> | <i>November<br/>1, 1880.</i> | <i>November<br/>1, 1881.</i> | <i>November<br/>1, 1882.</i> | <i>November<br/>1, 1883.</i> |
|---------------|-----------------------------|------------------------------|------------------------------|------------------------------|------------------------------|
| Gold.....     | \$119,629,771               | \$195,694,893                | \$256,016,829                | \$286,900,965                | \$308,791,187                |
| Silver.....   | 67,693,895                  | 69,181,004                   | 78,377,937                   | 77,332,723                   | 84,768,767                   |
| Currency..... | 459,097,051                 | 542,951,898                  | 567,445,959                  | 548,828,288                  | 523,124,121                  |
| Totals... ..  | \$646,420,717               | \$807,827,795                | \$901,840,725                | \$913,061,976                | \$916,684,025                |

The gold in the Treasury, including bullion in the process of coinage, has increased during the year \$8,918,287, and in the banks \$3,805,533. The paper currency in the Treasury has increased \$4,771,969, and in the banks \$10,218,238. The increase of gold outside of the Treasury and the banks has been \$21,890,172, and of silver coin \$7,436,044, and the decrease of paper currency, exclusive of silver certificates, \$25,704,167. In the foregoing tables the silver certificates issued by the Treasury have not been included, but the standard silver dollars held for their redemption on presentation form a portion of the silver coin in the Treasury. The silver certificates in the hands of the people and the banks, at the dates corresponding to those given in the tables, were as follows:

|                       |            |
|-----------------------|------------|
| January 1, 1879.....  | \$418,300  |
| November 1, 1880..... | 19,780,240 |
| November 1, 1881..... | 58,838,770 |
| November 1, 1882..... | 65,620,450 |
| November 1, 1883..... | 85,334,381 |

It will be seen that the amount of these certificates in circulation has increased \$19,713,931 during the year.

The gold certificates issued under section 12 of the act of July 12, 1882, outstanding in the hands of the people and banks on November 1, 1882, and November 1, 1883, not including the amount in the Treasury, were \$6,962,280 and \$48,869,940, respectively.

As before stated, the total amount of standard silver dollars coined up to November 1, 1883, was \$156,720,949; of which, as shown in one of the foregoing tables, \$116,036,450 was then in the Treasury, although an amount equal to \$85,334,381 was represented by certificates in the hands of the people and the banks, leaving \$30,702,069 then held by the Treasury. Of the \$156,720,949 coined, \$40,684,499 was therefore evidently outside of the Treasury, and \$85,334,381 of the amount in the Treasury was represented by certificates in circulation. The remainder of the silver, \$85,980,983, consisted of subsidiary coin, trade dollars, and bullion purchased for coinage, of which \$31,648,789 was in the Treasury, and about \$49,993,256 was in use with the people and the banks, in the place of the paper fractional

currency for which it was substituted, as against \$53,232,520 similarly employed November 1, 1882.

The increase of gold and silver coin and paper currency, exclusive of silver certificates outside of the Treasury and the banks since the date of resumption, is thus estimated to have been \$270,263,338, and the increase during the year ending November 1, 1883, \$3,622,049. To these sums the amount of silver certificates in the hands of the people may be added. On November 1, 1883, the amount of these certificates held by the people and the banks was, as has been seen, \$85,334,381; but the proportion of this amount in the hands of the people cannot be exactly determined.

AMOUNT OF INTEREST-BEARING FUNDED DEBT IN THE UNITED STATES,  
AND THE AMOUNT HELD BY NATIONAL BANKS.

The public debt reached its maximum on August 31, 1865, at which time it amounted to \$2,845,907,626. More than 1,275 millions of this debt were in temporary obligations of the Government, of which 830 millions bore interest at 7.30 per cent. per annum. The average rate of interest on 1,725 millions of the debt at that date was 6.62 per cent. This large amount of temporary obligations was funded within the three years which followed the close of the war, chiefly into 6 per cent. bonds. The 6 per cent. bonds were gradually reduced during the year 1869 and the seven years following by payment and refunding into 5 per cents. The 6 per cents, together with the 5 per cents, were subsequently rapidly replaced by 4½ and 4 per cent. bonds, which were authorized to be issued by the act of July 14, 1870. In the year 1881 all of the unredeemed five and six per cent. bonds, amounting to \$579,560,050, were continued payable at the pleasure of the Government, with interest at three-and-one-half per cent, by agreement with the holders. The act of July 12, 1882, authorized the refunding of the three-and-one-halves into three per cents, and since its passage all of these bonds have been converted into three per cents, or called for payment. The last call was made on July 26 for \$30,753,350, and the interest on these bonds ceased on November 1, last. The Secretary also, during the months of September, October and November, called for payment forty millions of the threes. The interest on the last call of ten millions is to cease on February 1.

The report of 1879 and subsequent reports contain tables exhibiting the classification of the unmatured interest-bearing bonded debt of the United States, and of the bonds held by the national banks for a series of years.

\* \* \* \* \*

[The table exhibiting the classification of the unmatured interest-bearing bonded debt of the United States is omitted here, the substance of it having appeared in a former number.—ED.]

The operations of the Treasury Department for a series of years

have largely reduced the amount of interest receivable by the national banks on the bonds held by them. During the last year, the three-and-one-half per cents were reduced more than two hundred millions (\$200,769,200), and during the present year ending November 1 more than forty millions (\$40,606,950) have been called, and have been chiefly replaced by three per cents.

Sixteen years ago the banks had on deposit as security for circulation 327 millions in United States bonds, of which amount 241 millions bore interest at six per cent. and 86 millions at five per cent., and on July 1, 1882, they held 227 millions of three-and-one-half per cent. bonds. These bonds have now entirely disappeared from the list of securities held by the national banks, with the exception of \$632,000, which have been called. The average rate of interest now paid by the United States on the bonds deposited as security for circulating notes is about three-and-one-half per cent. upon their par value, but is equal to about 3.19 per cent. only of the current market value of the bonds. The banks now hold 41 millions of four-and-one-halves; 106 millions of fours; and 201 millions of three per cents, which have been refunded from three-and-one-half per cents. This will be seen from the following table, which exhibits the amount and classes of United States bonds owned by the banks, including those pledged as security for circulation and for public deposits on the first day of July in 1881, 1882 and 1883, and upon November 1 of the present year:

[The part of the table here omitted gives the same items from July 1, 1865, to July 1, 1881.—ED.]

| Date.       | United States bonds held as security for circulation. |                           |                     |                    |               | United States b'nds held for other purposes at nearest date. | Grand total.  |
|-------------|-------------------------------------------------------|---------------------------|---------------------|--------------------|---------------|--------------------------------------------------------------|---------------|
|             | 6 per cent. bonds.                                    | 5 per cent. bonds.        | 4½ per cent. bonds. | 4 per cent. bonds. | Total.        |                                                              |               |
| July 1, '81 | \$41,901,800                                          | \$172,348,350             | \$32,600,500        | \$93,637,700       | \$360,488,400 | \$63,849,950                                                 | \$424,338,350 |
|             | Contin'd at 3½ per cent.:                             | Contin'd at 3½ per cent.: |                     |                    |               |                                                              |               |
| July 1, '82 | 25,142,600                                            | 202,487,650               | 32,752,650          | 97,429,800         | 357,812,700   | 43,122,550                                                   | 400,935,250   |
|             |                                                       | 7,402,800                 |                     |                    |               |                                                              |               |
| July 1, '83 | 385,700                                               | 3 per cents 200,877,850   | 39,408,500          | 104,954,650        | 353,029,500   | 34,094,150                                                   | 387,123,650   |
| Nov. 1, '83 | .....                                                 | 3 per cents 201,327,750   | 41,319,700          | 106,164,850        | 348,812,309   | 30,674,050                                                   | 379,486,350   |

The banks also held \$3,463,000 of Pacific Railroad six per cents. They also held \$632,000 three-and-a-halves, which ceased to bear interest on November 1.

More than one-half of the bonds now held by the national banks are three per cents. If the public debt continues to be paid as rapidly as it has been during the past year, all of these bonds will certainly

be called within the next three years. Those of the lower numbers which it is safe to estimate will not be called within the next two years, cannot be purchased for a premium of much less than two per cent., and at that price there will be a loss upon circulation based on this class of bonds if they are redeemed within three years. The profits on circulation based on other bonds held by national banks are merely nominal.

AMOUNT OF UNITED STATES BONDS HELD BY THE NATIONAL BANKS,  
AND BY THE BANKS ORGANIZED UNDER STATE LAWS, AND BY  
PRIVATE BANKERS.

Through the courtesy of State officers, the Comptroller has obtained official reports made to them under State laws by State banks in 22 States, by trust companies in 5 States, and by savings banks in 14 States, at different dates during the year 1883, and from these returns the following table has been compiled:

|                                                   |               |
|---------------------------------------------------|---------------|
| Held by 754 State banks in twenty-two States..... | \$5,287,006   |
| Held by 34 trust companies in five States.....    | 17,437,990    |
| Held by 630 savings banks in fourteen States..... | 219,917,313   |
| Total.....                                        | \$241,742,909 |

The interest-bearing funded debt of the United States was, on November 1, last, \$1,273,475,450. The total amount of bonds held by the national (\$379,486,350) and State and savings banks (\$241,742,909) was \$621,229,259, which is not greatly less than one-half of the interest-bearing debt. The amount of United States bonds held by State banks is given by geographical divisions for the years 1880, 1881, 1882, 1883, as follows:

| <i>Geographical Divisions.</i> | <i>1880.</i>  | <i>1881.</i>  | <i>1882.</i>  | <i>1883.</i>  |
|--------------------------------|---------------|---------------|---------------|---------------|
| Eastern States.....            | \$45,230,096  | \$40,468,340  | \$42,667,248  | \$37,599,519  |
| Middle States.....             | 157,563,757   | 176,373,889   | 197,135,239   | 182,847,586   |
| Southern States.....           | 968,470       | 1,073,400     | 268,350       | 646,500       |
| Western States.....            | 2,672,242     | 5,735,518     | 8,369,414     | 3,105,024     |
| Pacific States.....            | 7,240,835     | 14,874,832    | 20,030,175    | 17,743,978    |
| Total .....                    | \$213,665,402 | \$238,525,539 | \$263,460,426 | \$241,742,909 |

In previous reports the Comptroller has given the amount of United States bonds held by banks organized under State laws, and by private bankers, as returned to the Commissioner of Internal Revenue for purposes of taxation. The tax on deposit and capital having been repealed, no further returns of this kind will be available hereafter. The last returns to the Commissioner were for the six months ending November 30, 1882, and from these returns the following table has been compiled for the purpose of comparison with previous tables presented since the year 1880:

| <i>Geographical Divisions.</i>      | <i>Amount invested in United States bonds.</i>                             |                              |               |
|-------------------------------------|----------------------------------------------------------------------------|------------------------------|---------------|
|                                     | <i>By State banks,<br/>private bank-<br/>ers, and trust<br/>companies.</i> | <i>By savings<br/>banks.</i> | <i>Total.</i> |
| <b>May 31, 1880:</b>                |                                                                            |                              |               |
| New England States.....             | \$3,737,093                                                                | \$37,693,200                 | \$41,430,293  |
| Middle States.....                  | 20,564,834                                                                 | 146,801,155                  | 166,865,989   |
| Southern States.....                | 2,541,991                                                                  | 1,000                        | 2,542,991     |
| Western States.....                 | 8,137,554                                                                  | 2,474,557                    | 10,612,111    |
| Pacific States and Territories..... | 3,883,816                                                                  | 2,717,904                    | 6,601,720     |
| United States.....                  | \$38,865,288                                                               | \$189,187,818                | \$228,053,104 |
| <b>May 31, 1881:</b>                |                                                                            |                              |               |
| New England States.....             | \$2,985,496                                                                | \$36,640,795                 | \$39,626,291  |
| Middle States.....                  | 21,908,703                                                                 | 168,617,049                  | 190,525,752   |

| Southern States.....                | 1,147,881                                                                  | .....                        | 1,147,881     |
| Western States.....                 | 6,528,666                                                                  | 2,143,118                    | 8,671,784     |
| Pacific States and Territories..... | 5,781,749                                                                  | 14,380,007                   | 20,161,756    |
| United States.....                  | \$35,686,133                                                               | \$229,929,283                | \$265,615,416 |

The data, which has heretofore been obtained from the Commissioner of Internal Revenue, included the returns from private bankers, and was, therefore, more complete than that obtained from the reports of State officers, but the amounts held by State and savings banks have not greatly differed.

#### ILLEGAL CERTIFICATION OF CHECKS.

Section 13 of the act of July 12, 1882, provides:

That any officer, clerk, or agent of any national banking association who shall wilfully violate the provisions of an act entitled "An act in reference to certifying checks by national banks," approved March third, eighteen hundred and sixty-nine, being section fifty-two hundred and eight of the Revised Statutes of the United States, or who shall resort to any device, or receive any fictitious obligation, direct or collateral, in order to evade the provisions thereof, or who shall certify checks before the amount thereof shall have been regularly entered to the credit of the dealer upon the books of the banking association, shall be deemed guilty of a misdemeanor, and

shall, on conviction thereof in any circuit or district court of the United States, be fined not more than five thousand dollars, or shall be imprisoned not more than five years, or both, in the discretion of the court.

Upon the passage of this act those banks which were accustomed to certify large amounts of checks, accepted those checks which were drawn upon them, instead of certifying them, and assumed that such acceptance was not in violation of law. The banks claimed that they had power to accept checks after the 3d and 7th paragraphs of section 5136 of the United States Revised Statutes. The former authorizes national banks to "make contracts," and the latter provides for the "exercise of all such incidental powers as shall be necessary to carry on the business of banking."

The Comptroller being in doubt in reference to the proper construction of the section, the matter was referred to the Attorney-General, who rendered an opinion on November 24, 1882, (1) that a national bank cannot legally accept checks drawn upon it where the drawer has not already deposited therewith the amount stated in the check; and (2) that the limit imposed by section 5202 extends to liabilities incurred by the certification of checks, and that such acceptance by a bank, without the existence of funds on deposit therewith, to an amount exceeding in the aggregate the amount of its paid-in capital, would be a violation of that section.

The proposition for the establishment of a stock clearing-house, such as is in operation in London, Vienna, Berlin, and other large cities in Europe, was in the mean time brought forward and discussed. An organization was formed and the plan was twice placed in operation, and it is said by those who are well acquainted with such transactions to have been practicable. It was abandoned during the last few weeks, chiefly, it is said, through the fears of some of the banks and stock brokers that it would diminish the magnitude of their business. In the month of August it was rumored that the failure of a firm of brokers had resulted in a loss to the stockholders of the Wall Street National Bank by an over-certification or acceptance of checks, and an examination of this bank during the following month confirmed the rumor, and furnished evidence of an over-certification of the checks of this firm in excess of their balance of cash on hand to the amount of \$199,899. The Comptroller thereupon, on September 27, addressed a letter to the Secretary, inclosing a certified copy of the examiner's report, with the request that he would transmit the same to the Attorney-General for his action, under section 13 of the act of July 12, 1882. This information was soon brought to the attention of the United States District-Attorney in the city of New York, the result of which was the indictment of the teller of the above bank, who, on being notified of that fact, appeared before the United States Commissioner, and was held to bail to plead at the December term of the court. As soon as this proceeding became known to the bank it went

into voluntary liquidation on October 17, and immediately thereafter was converted into a State bank, under the laws of the State of New York.

The trial, under this indictment, will test the law, which provides for a fine or imprisonment of any officer of a national bank who shall certify checks in violation of section 5208, United States Revised Statutes.

This proceeding should result in the organization of a stock clearing-house, or of some other action by the Stock Board and the banks, through whom this kind of business is transacted, which will render it unnecessary for national banks to certify brokers' checks, or lend their credit for such large amounts in the future.

It is respectfully submitted that the law, as it now stands, makes it a criminal offense for an officer of a bank to certify the check of a dealer who may inadvertently overdraw his account for a few dollars in the payment of an ordinary obligation; and it certainly should be amended so as to exempt such ordinary business transactions from the penalty imposed.

\* \* \* \* \*

[In this connection the Comptroller calls attention to the successful operation of the Stock Clearing-House in the city of London, which the "London Economist" says, "as a piece of time and labor-saving mechanism, has undoubtedly achieved success." A paragraph from an article in that journal, of October 6, is also quoted, giving a history of the establishment of a stock clearing-house in that city, from which it appears that operations of equal magnitude with those in New York are successfully conducted, although the settlements are made fortnightly instead of daily, as in New York.—ED.]

#### LOSSES ON UNREDEEMED BANK NOTES.

Section 5222 of the Revised Statutes requires that all national banks which go into voluntary liquidation, and all insolvent banks, shall deposit in the Treasury an amount of lawful money equal to the amount of their circulating notes outstanding. Thus it will be seen that no association can close up its affairs without first providing for the payment of all of its circulating notes. The amount deposited must remain in the Treasury until the last outstanding notes shall have been presented for payment. Section 6 of the act of July 12, 1882, provides that at the end of three years from the date of the extension of the corporate existence of each bank the association so extended shall deposit lawful money with the Treasurer sufficient to redeem the remainder of the circulation which was outstanding at the date of its extension. It also provides that any gain that may arise from the failure to present such circulating notes for redemption shall inure to the benefit of the United States, and that the new circulating notes to be issued in the place of the old shall bear such devices as

shall make them readily distinguished from the circulating notes previously issued. In the Comptroller's report for 1875, he prepared a table from data obtained from a series of reports of the Superintendent of the Bank Department of the State of New York, exhibiting the amount of notes which had been issued to banks organized in the State, and the amount remaining at the expiration of the six years' notice required to be given by the banks, before they were by law relieved from the obligations to redeem them. Returns were in this way obtained from 286 banks either incorporated or organized under the safety fund or the free banking system of the State of New York.

The maximum amount of circulation issued to them was \$50,754,514, and the amount of unredeemed circulation at the date of the report named was \$1,336,337, or 2.63 per cent. of the highest amount issued. The maximum amount of circulation issued to 30 State banks in the city of New York, which are still in operation either as national or State associations, was \$7,763,010, while the amount remaining unredeemed in October, 1875, was \$142,365, or only 1.83 per cent. of the highest amount issued. The amount of circulation issued to 240 State banks in Wisconsin was \$7,565,409, and the amount unredeemed is \$134,747, the percentage of unredeemed notes being 1.78 only. The maximum issue to 210 State banks in the six New England States was \$39,245,380, while the amount remaining unredeemed is but \$792,767, the proportion of the latter to the former being 2.02 per cent. The returns from 332 State banks in New York, New Jersey, Delaware and Maryland show their maximum circulation to have been \$65,664,176, while the amount unredeemed is \$1,707,428, and the percentage 2.60. The percentage of unredeemed notes of 25 State banks in Ohio, having a circulation of \$2,196,381, was 2.79. The greatest amount of circulation issued to 707 State banks, in 12 States, was \$114,671,346, the amount outstanding \$2,696,282, and the proportion unredeemed 2.4 per cent.

It is probable that, under the national system of redemption, the proportion of national bank notes which will ultimately be redeemed under the national banking system is much greater than that of the State bank notes under previous systems.

The highest amount of circulation issued to 15 national banks which failed previous to 1870 was \$1,554,400, and the amount outstanding on November 1, 1883, was \$9,289, and the percentage unredeemed 0.60 per cent of the amount issued. These notes had had a circulation of from five to six years only, which accounts for the small amount remaining outstanding. The highest amount of circulation issued to 8 national banks which failed previous to 1873 was \$1,642,293, and the percentage outstanding was 1.47 per cent., and these notes had had a circulation of from four to nine years.

[A table in corroboration of above facts is here introduced, giving the date of the organization of each bank, the circulation outstanding

and the percentage unredeemed in the years 1875, 1878 and 1883. The Comptroller also refers to a table which will appear in the appendix of his report, giving similar information relative to 51 national banks, which were placed in liquidation prior to 1870, whose notes had been in circulation six years previous to those which failed previous to 1872. The largest circulation of these 51 banks outstanding was \$5,846,740, and the amount unredeemed on November 1, 1883, \$82,827, being 1.42 per cent. The appendix will contain a further table, giving similar information in regard to 165 national banks in liquidation which had a circulation of \$18,587,365, of which \$48,315 is still outstanding, a percentage of 2.36.—ED.]

The issues of Treasury notes of the series of 1869 and 1874 have not been so largely reduced. The national bank notes for years have done the work, while a considerable portion of the legal-tender notes have been held for years in the vaults of the national banks as reserve. These legal-tender notes held by the banks have recently been replaced by coin to a considerable extent, but the banks yet held on October 2 \$80,642,997. When these are assorted a considerable amount of the three first issues will be returned for redemption.

The highest amount of the first issue of legal tender notes outstanding at any one time was \$449,479,222 on February 3, 1864. These notes were first issued on April 2, 1862, and the issue ceased on April 19, 1869. The amount outstanding and the amount redeemed since November 1, 1882, are shown in the following table, from which it will be seen that the amount outstanding on November 1, 1883, was \$11,473,855, being a percentage of 2.55 on the highest amount outstanding:

| DATE.                 | Outstanding. | Redeemed during the year. | Percentage unredeemed. |
|-----------------------|--------------|---------------------------|------------------------|
| November 1, 1878..... | \$18,312,584 | .....                     | 4.07                   |
| November 1, 1879..... | 16,271,277   | \$2,041,307               | 3.62                   |
| November 1, 1880..... | 14,947,895   | 1,323,382                 | 3.33                   |
| November 1, 1881..... | 13,833,300   | 1,114,595                 | 3.08                   |
| November 1, 1882..... | 12,518,833   | 1,314,467                 | 2.79                   |
| November 1, 1883..... | 11,473,853   | 1,044,980                 | 2.55                   |

The amount of demand Treasury notes payable in gold issued from July 17, 1861, to December 31, 1862, was \$60,000,000, in denominations of five, ten and twenty dollars; and the amount remaining outstanding on the 1st of November last was \$58,800, the proportion unredeemed, being a little less than one-tenth of 1 per cent., having been redeemed within the last two years.

[THE remaining sections of the Comptroller's report will appear in the January JOURNAL. The most important topics will be given in full, viz.: "National Bank Failures," "State Banks, Trust Companies, and Savings Banks," "Private Bankers," &c., together with the Act recommended "for obtaining and publishing reports of banks, savings institutions, and trust companies organized under State laws," and the form (blank) under which the reports shall be made.—ED.]

## BANKING LAW—LATEST CASES.

### REPLIES TO LAW AND BANKING QUESTIONS.

[The Editor of the Law Department of RHODES' JOURNAL will furnish, on application of subscribers, further information regarding any case referred to herein; and will also answer questions in banking law which may be of sufficient general interest as to warrant publication in this Department. A reasonable charge is made for special Replies to be furnished direct to correspondents by mail or otherwise.]

### JURISDICTION OF STATE COURT OVER NATIONAL BANK DOING BUSINESS IN ANOTHER STATE.

#### HOLMES & DURHAM *vs.* NATIONAL BANK.

(*Supreme Court of South Carolina, 1883.*)

An action was brought in the State Court of South Carolina against The First National Bank of Wilmington, N. C.

*Held*, That the court had jurisdiction.

This was an action for damages for breach of warranty, in a sale of chattels. The defendant was the National Bank of Wilmington, N. C., and had funds in a bank of Charleston, S. C., which plaintiffs attached before judgment. The defendants demurred upon the ground that the court of South Carolina had no jurisdiction. Section 5198 of the Revised Statutes of the United States, provides: "That suits, actions and proceedings against any association under this title (National Bank) *may* be had in any circuit, district or territorial Court of the United States, held within the district in which such association may be established, or in any State, county or municipal court in the county or city in which said association is located, having jurisdiction in similar cases."

Counsel for defendant contended that the enumeration of certain courts in the Act was intended to give them exclusive jurisdiction, otherwise such enumeration would be useless. The court however, reversing the decision of the court below,

*Held*, That the word "may" was a permissive word, and not exclusive, and that the jurisdiction of the State courts was not taken away by implication. They say "the decisions in other States are not uniform on this question. The two most prominent cases in which the question has been discussed are the cases of *Crocker vs. Marine*

National Bank, 101 Mass., 240, and the case of *Cooke vs. State National Bank of Boston*, 52 N. Y., 97. These cases reached directly opposite conclusions, Gray, *J.*, in Massachusetts, holding that by force of the Act of Congress, such associations could be sued only in the county or city where the association was established, and Church, *C. J.*, in New York, that an intent to take away jurisdiction from the State courts, should not be deduced from the doubtful and ambiguous language employed in the Act of Congress," and in the absence of any decision of the Supreme Court of the United States on this question, the court adopts the New York rule, and overrules the demurrer.

---

ASSIGNMENT OF NEGOTIABLE PAPER—SUBSEQUENT  
INDORSEMENT—DEFENSE.

---

OSGOOD *vs.* ARTT.

(*U. S. Circuit Court, Northern District of Illinois, June, 1883.*)

Where a promissory note, payable to order, was assigned by the payee before maturity, as security for the payment of a bond, and subsequently on the holder learning of a defense thereto, the same was indorsed by the assignor,

*Held*, that such assignment was not an indorsement, and the holder took subject to any defense which might be made against the payee, and that the subsequent indorsement, after notice of such defense, did not constitute the holder a *bona fide* purchaser for value and without notice.

The defendant, Artt, on the 14th of May, 1856, executed and delivered to the Racine &c., Railroad Company his promissory note, payable to their order for the sum of \$2,500 and interest, payable in five years from date, at the same time executing and delivering a mortgage on certain real estate as security therefor. Subsequently the company made its bond, under date of June 10, 1856, whereby it acknowledges its indebtedness to and promises to pay Charles Osgood, or bearer, the sum of \$2,500, on the 10th day of May, 1861, with interest. This bond, together with the note and mortgage aforesaid, were fastened together with eyelets and delivered to the plaintiff herein, the bond containing the following provision :

"To the payment whereof, the said company herein bind themselves firmly by these presents ; and for the better security of such payments being made to the holder thereof, the said company have assigned and transferred, and by these presents do assign and transfer to the said holder of this bond, a certain note for the sum of \$2,500, executed by Robert Artt of Carroll County, together with a mortgage given collateral to and for the purpose of securing the payment of the same, dated on the 14th day of May, 1856, payable in five years from the 10th day of May, 1856, with interest at the rate of ten per cent. per annum, which said note and mortgage are hereto appended, and are transferable in connection with this bond, and not otherwise, to any parties or purchasers whomsoever."

The bond also contained a provision authorizing the holder in case of any neglect or failure to pay or comply with its terms on the part of the company, to proceed and foreclose the mortgage, or take such other legal remedy on the note and mortgage against the mortgagor, or against the company on the bond, as might be deemed expedient.

The note when transferred was unindorsed, and at the time of the transfer Osgood had no notice of any defense to the note. Subsequently, he had notice that the execution of the note and mortgage was obtained by fraud on the part of the railroad company, and that there was an entire failure of consideration therefor, and thereafter the words, "Racine & Mississippi Railroad Company, by H. S. Durand, President," were placed on the back of the note by authority of the Company.

In a suit against the maker on the note, the court

*Held*, That such transfer was an assignment and not an endorsement, and the purchaser took the same rights only as the payee, and the endorsement not being made until after notice to the holder, the facts do not authorize a judgment in its favor.

---

#### NOTICE—BONA FIDE HOLDER.

---

##### MANN vs. SECOND NATIONAL BANK OF SPRINGFIELD, OHIO.

(*Supreme Court of Kansas, September 6, 1885.*)

M made his promissory note, which he delivered to the C. M. Co. They endorsed the same to the Second National Bank, who discounted the note before maturity, and credited the payee with the amount on their books. Before the endorsement to the bank for discount, notice had been given to the general agent of the C. M. Co. of a failure of consideration of the note. One W was, at this time, the business manager of the C. M. Co., and also a member of the discount committee of the bank who discounted the note.

*Held*, That whether or not the bank had notice. *Query?* but in any event, the simple giving of credit on their books did not entitle them to take the position of holder for value, and they could not recover.

The facts are these : The defendant, Mann (the present plaintiff in error), executed his promissory note for the sum of \$142.14 to the Champion Machine Company, in payment of a champion harvester and corn-binder, which had been sold with warranty. The note was in form to the order of Amos Whitely, President, and became due on January 1, 1882. The consideration of the note having failed by reason of a breach of the warranty, the maker communicated the fact to the general agent of the company in St. Louis, Mo., while the note was still in the possession of the company. Thereafter, before its maturity, on December 14, 1881, Whitely enclosed the note to plaintiff, who discounted the same, and passed the amount to the credit of the Champion Company on their books. Whitely was the President and general business manager of the Champion Company, and also a

director of plaintiff, and one of a committee of three, termed the discount committee. The note was never formally presented to the discount committee of the bank, but to its Cashier, who discounted the same under a general direction to discount any paper offered by certain customers of the bank, among them the Champion Company. The Champion Company was a depositor of plaintiff, and was in the habit of having its notes, given for machines, discounted by plaintiff and passed to its credit, and at the time of the maturity of the note in question had a considerable sum on deposit there. It was claimed that as the company had notice of the failure of consideration of the note, and its manager, being one of a committee of plaintiff, whose office and duty it was to superintend the discounting of all notes presented to it, that therefore the bank had notice of the want of consideration of the note, and was not a *bona fide* holder. This question the court did not decide, remarking: "We think it a question of grave doubt whether public policy will permit an officer of a bank, charged with a special duty, to surrender the actual performance of that duty to another officer, and thereby relieve the bank from the responsibility which would have rested upon it had he properly discharged his duty."

The court, however,

*Held*, That even conceding the bank a *bona fide* holder, without notice, the mere discounting of a note and giving a credit on their books, was not a sufficient purchase for value to entitle them to recover. It was not a case where money had been advanced on good faith, whereby loss would result, but a simple giving of credit which, proving bad, could be cancelled.

---

#### NOTES ON CASES.

##### MORTGAGE TO SECURE FUTURE INDEBTEDNESS.

Where a mortgage was given to a national bank "as collateral security for the payment of any indebtedness of the said first parties to the said parties of the second part by note or otherwise," and such mortgage was executed solely to secure any future indebtedness which might accrue, no present indebtedness existing by the mortgagors, and a subsequent mortgagee brought suit to declare void the first mortgage and set aside a sale of the mortgaged premises thereunder,

*Held*, That such mortgage was valid, and plaintiff could by actual notice have prevented subsequent advances by the mortgagee of the first mortgage to his prejudice, and that a national bank may lawfully take a mortgage to secure future indebtedness.

Simons *et al*, appellants, *vs.* The First National Bank of Union Springs *et al*, respondents, N. Y. Court of Appeals, Oct. 2, 1883.

##### BINDING PROMISE TO ACCEPT—INSTANCE OF.

Defendants were the New York consignees of Van Assche & Co., of

Havana, and from time to time received certain consignments of sugar. Van Assche & Co. were in the habit of drawing on defendants at 60 days, and these drafts were accepted by the defendants under an agreement that when they fell due they would be renewed, and it was the custom of Van Assche & Co. to make new drafts and remit the proceeds to defendants, with which they paid the previous drafts at maturity. In July, 1880, Van Assche & Co. becoming embarrassed, wrote defendants stating their condition and asking that they might be allowed to draw on them as formerly. To this letter defendants replied asking for a fortnight to give a definite reply, and saying that in the meantime they naturally relied upon the renewal of the \$37,000, falling due on July 29th. Hereupon Van Assche & Co. drew on defendants for \$15,000 in favor of plaintiff and remitted the proceeds to them. This draft they accepted. Subsequently, Van Assche & Co. drew on them for the remaining \$22,000 which was sold to plaintiff, and remitted the proceeds as before. This draft defendants refused to accept, and plaintiff brought suit to recover the amount.

*Held*, That their letter asking for a renewal of the \$37,000 falling due on the 29th constituted a sufficient promise to accept the drafts for \$15,000 and \$22,000 to bind them, and that having accepted the first draft of \$15,000, they could not afterwards insist upon a different interpretation of their letter. Judgment for the plaintiff affirmed.

Luciano Ruiz *et al*, respondents, *vs.* Charles Renauld *et al*, appellants,  
N. Y. Supreme Court, General Term, First Department, August 7, 1883.

#### TRANSFER OF NOTE—RIGHTS OF HOLDER.

One Wood executed his promissory note for the sum of two hundred dollars to the firm of Twogood & Elliott, and as collateral security for its payment transferred to them a past due negotiable note made by one Thurston for the sum of five hundred dollars. At the maturity of the note for \$200, Thurston paid the amount to Twogood & Elliott, and the same was credited upon his note for \$500 held by them as collateral security. Subsequently, they transferred the Thurston note for value to defendant, who had no knowledge of the interest of plaintiff therein. In an action to recover possession of the note, or its value,

*Held*, That the defendant had the legal title to the note, and being a good faith purchaser, without notice of plaintiff's claim to the note, could hold it as against plaintiff.

Wood *vs.* McKean, Supreme Court of Iowa, June, 1883.

#### LIABILITY FOR STOLEN GOVERNMENT BONDS.

A verdict has been returned by order of the court in favor of the defendants, in the United States Circuit Court, in a suit of the United States Government against Jay Cooke & Co. to recover \$2,000 on three 7-30 United States Treasury notes. The notes had been purchased by Jay Cooke & Co., and redeemed from them by the Government. Afterward it was discovered that they had been stolen and the endorsements forged. The United States Treasury Department, however, were, the court held, guilty of laches fatal to the Government's case in not informing the defendants of the facts within a reasonable time.

## BILL OF EXCHANGE—CONSIDERATION.

One D owed B a sum of money. To extend the time of payment, a bill of exchange was drawn by B upon D and one L, and payable at a future time to himself as payee. This was accepted by D, and also by L, each writing his acceptance thereon unconditionally. In an action by B against L to recover the amount,

*Held*, that L was not an accommodation surety to the drawer, but the accommodation was for the benefit of his co-acceptor D. That the extension of time for payment of the debt was a good and sufficient consideration to support L's contract, and he was liable thereon.

Law vs. Brinker, Supreme Court of Colorado, May 11, 1883.

## REPLIES TO LAW AND BANKING QUESTIONS.

*Question*.—A check, of which the following is a disguised copy, was presented at this bank on Saturday, November 24th :

THE UNNAMED BANK,

\$80.

BUFFALO, N. Y., October 10, 1883.

Pay November 25th.

Pay to Thomas Robinson, or order, Eighty Dollars, JOHN SMITH.

Although John Smith's account was good for the amount, I allowed the check to be refused, claiming that it was not yet due. The bank holding the check had it protested for non-payment. Please remember that November 25th was a Sunday. The question is whether the paper should be regarded and treated as a check, a draft, or a bill of exchange.

CASHIER.

*Answer*.—The instrument in question should have been paid when presented, on the 24th of November. There has been much conflict of authority upon the question of whether a check, post-dated, or made payable at a future date, should be considered as a bill of exchange, and entitled to days of grace, or simply a check. The weight of authority holds to the view that no allowance of days of grace should be made.

40 Maine, 60; 4 R. I., 30; 2 Story, 503; 14 Conn., 306; 11 Met., 44.

There are cases, however, which hold, that by the law-merchant, such checks are entitled to days of grace. Such are the decisions in Ohio, Tennessee, California, Delaware, and New York.

5 Ohio State, 13; 11 Id., 89; 4 Yerg., 210; 4 Cal., 35; 5 Harring (Del.), 305; 3 Kern., 290.

But the decision in New York has been superseded by statute (chap. 416, Laws 1857), which says : " All checks, bills of exchange or drafts, appearing on their face to have been drawn upon any bank, or upon any banking association or individual banker, carrying on banking business under the Act to authorize the business of banking, which are on their face payable on any specified day, or in any number of days after the date or sight thereof, shall be deemed due and payable on the day mentioned for the payment of the same, *without any days of grace being allowed*, and it shall not be necessary to protest the same for non-acceptance."

And by chapter 27, Laws of New York, 1875, it is enacted that bills of exchange, bank checks, and promissory notes, presentable for acceptance or payment on certain enumerated holidays (said holidays being treated as Sunday), shall be deemed to be presentable for acceptance or payment on the secular or business day *next preceding* such holidays.

The statutes govern the instrument in question; the statute of 1857,

enacting that no days of grace shall be allowed, and the subsequent statute of 1875, making it payable on the day preceding the due date, and it is therefore clear that, there being funds in the bank to meet it, it should have been paid when presented, on the 24th of November.

*Question.*—A draws a note payable to the order of B, who endorses it, writing "Waiving demand and notice" over his name. It is in turn endorsed by C and D in blank, and finally falls into the bank for collection. When due, should it be protested for non-payment? In other words, does B's waiving demand and notice have any effect on the endorsements of C and D? A SUBSCRIBER.

*Answer.*—The waiving of demand and notice by B in no way affects the rights of C and D.

*Question.*—We credit in a depositor's bank-book a deposit composed of foreign checks. Next morning we receive a telegram that one of the checks is not good. The same morning's mail brings the depositor's own check on us for nearly the total amount. We immediately notify him of the non-payment of the other check, and request him to deposit enough to meet the check he has drawn. We protest his check at 3 P.M.; but he claims that, as the deposit was carried out in his bank-book as cash, we had no right to protest his check drawn against it, notwithstanding the notice hereceived of the non-payment of the deposited check. Who is right? S. E. C.

*Answer.*—The bank was perfectly justified in refusing to honor the check of their depositor, and allowing it to go to protest. Where a deposit of checks is made with a bank, they are under no legal obligation to pay out the amount until the checks have been cashed; and, in case the checks credited as cash in the pass-book are not paid, the amount is charged back to the depositor. The usage is almost universal, however, to allow a depositor to check out such a deposit, as soon as made, unless the bank has reason to apprehend the non-payment of the whole or a part thereof, in which case the depositor would be limited to the extent of the checks supposed to be good. In this case, however, the bank having been notified of the non-payment of a part of the deposit, they were not obliged, nor could they be expected, to honor the check of their depositor drawn against it.

### OPINIONS OF THE JOURNAL.

A STAUNCH FRIEND OF THE BANKING INTEREST.—"One of the best publications for bankers and business men, if not *the* best, is RHODES' JOURNAL OF BANKING, published by Bradford Rhodes & Co., 78 William St., New York. It is ably conducted, replete with reliable information, and a staunch advocate and friend of the banking interest."—*Railway Age*, Oct. 11, 1888.

PRACTICAL AND SOUND.—"The current number of RHODES' JOURNAL OF BANKING is one of the best publications of its class we have seen, and contains much valuable financial information. The supplement which accompanies this issue, giving an analysis of the principal of the public debt of the United States from July 1, 1856, to July 1, 1888, should be in every banker's office in the country. The JOURNAL is practical and sound all through."—*Daily Indicator* (N. Y.), Nov. 15, 1888.

## BANKING AND FINANCIAL NEWS.

(With Comments on the more important matters. This Department also includes General Business News—Notes from Foreign Banking Centres, including Canada—A Complete List of New Banks, Changes in Officers, Dissolutions and Failures—Banking and Monetary Tables—Bankers' Obituary Record, &c.)

**Franklin Haven's Retirement.**—The resignation of Mr. Franklin Haven as President of the Merchant's National Bank of Boston, is announced. His son, Franklin Haven, Jr., who is Actuary of the New England Trust Company, and was formerly Assistant-Treasurer of the United States at Boston, will succeed him.

Mr. Haven is 79 years of age and has been President of the above bank for more than fifty years. At the time when the Government deposits were removed from the United States Bank, by order of President Jackson, this bank was selected as one of the depositories of public money, and continued to be a national fiscal agent until the separation of the Government and the banks occurred. Mr. Haven's ability as a financier was recognized more than once by men of the earlier national administrations. In 1842 he was invited by the administration to go to Europe to negotiate a Government loan, but declined because he thought the project would fail unless part of the loan was taken in this country. The event proved that he was right. He was appointed Pension Agent for Massachusetts by Van Buren, and General Taylor made him Assistant-Treasurer at Boston, a position which he resigned in 1858. Mr. Haven had charge of large railway interests at times, which have been managed with great success. He is the last survivor of the incorporators of the Illinois Central Railroad, of which he was appointed a Director by the Legislature.

**Coinage Matters.**—A special purchase of fifty thousand ounces of silver bullion has been made by the Treasury Department to be used in coining "dimes."

A petition signed by all the banks in the city of Cincinnati, O., and by a large number of merchants, has been forwarded to Secretary Folger. It asks that the Government receive all light-weight or mutilated gold or silver coin after deducting from the face value 5 cents for every grain or fraction of a grain missing from gold coins, and from silver coins 5 cents for each pennyweight missing. The petition argues that as the Government carried to the credit of the silver profit fund during the last fiscal year nearly \$4,000,000, the Treasurer can afford to be liberal in providing means for exchanging and redeeming these coins.

It would be simple justice for the Government to accede to the principle upon which this petition is based. The minor silver coins now cost the Government little, if anything, over 80 cents on the dollar. Say a new half-dollar contains 40 cents in silver. If three cents' worth have been abstracted by punching or otherwise, the Government will redeem it at only 87 cents, thus mulcting the probably innocent holder in a quadruple penalty. The

Government ought to give a good coin for every mutilated one, charging only the actual difference in the bullion value of the two, and the cost of coining.

United States Treasurer Wyman has recommended to Congress an appropriation for the distribution of fractional silver and minor coin, the last appropriation having been exhausted about the first of October.

**Scrutiny of Commercial Paper.**—The Importers' and Traders' National Bank, of this city, has taken an important step to protect itself against the large amounts of comparatively worthless mercantile paper which the recent heavy failures have shown to be in existence. Whenever paper is offered to this bank for purchase it addresses a series of inquiries to the makers, asking them to state the amount of their bills payable, amount of their accounts payable, amount of mortgage on real estate, and other liabilities. They also ask information as to the value of merchandise on hand, amount of good bills and accounts receivable, cash on hand, value of real estate and other assets, and similar information by which the bank can judge of the solvency of the makers.—*New York "World."*

The extremely easy condition of the loan market for a long time past has been a great temptation to merchants to use the capital of others in ventures which have too often proved disastrous. The banks have found this out to their cost, and for some months past they have been very chary of handling paper bearing unfamiliar names. The fact that a business firm is compelled to go for accommodation to other sources than to their own bank is itself a fact that calls for caution on the part of other banks.

It is somewhat remarkable that the bill-brokerage business does not appear to flourish in New York to anything like the same extent that it does in London.

**Treasury Notes in Place of National Bank Notes.**—At the annual dinner of the Chicago Bankers' Club on October 23d, an address was delivered by Mr. Albert S. Bolles, editor of the "Bankers' Magazine," on the subject: "What Kind of a Currency Shall we Have?" In view of the attention which it has received, and the present interest of the subject, we give a brief synopsis of it: He began by alluding to the danger of the contraction of the bank circulation, and by showing that the national debt ought not to be perpetuated in order to save it. But how could a sound paper circulation be established otherwise? Mr. Coe's idea, given at Saratoga in 1882, of a currency secured by the property and productions it represented, and running concurrently with them, was open to the objection that it might be issued to excess. "In a perfect system of bank-note issuing a check is needed which shall prevent the issue of too many notes in the beginning." Mr. Hewitt's plan, mentioned in Congress in 1881, was to "deliver to banks ninety per cent. in circulating notes on the amount of their capital;" make the notes a first lien on the bank's assets, and on the 100 per cent. above the capital for which the shareholders are liable; the banks to keep a redemption fund of 10 per cent. in Washington, and to mutually guarantee all the notes. This would make the notes safe enough, but it made no provision for regulating the amount. Under the former State bank system there were immense fluctuations in the amount of bank notes. To be sure, the national bank issues were not limited by law, but "the cost of Government bonds has been so great and the taxes demanded of the banks have been so excessive, that only very small profits could be made on bank circulation, and consequently additions have been very slight." The great superiority of the present notes lies (1) in their being amply secured, and (2) in that "the amount has been kept within safe limits through the working of various causes which are quite beyond the control of any class of men."

The plan proposed by Mr. Bolles, which is supposed to embody these two principles, is for the Government to issue all the circulating notes, the quantity to be the same as at present; the Government to issue a certain fixed sum solely on its promise to redeem it, and every note in excess to be represented by a similar amount of coin set apart to secure it; coin would be kept to redeem only a specific amount, on the supposition that in no probable emergency would the amount of notes presented exceed this reserve of coin. The amount of the notes issued solely on the promise of the Gov-

ernment should be the smallest amount which it is likely will ever be needed to effect our exchanges. This might be \$600,000,000, and it should hold a dollar in coin for every dollar in paper issued above that amount. The notes might be declared simply Treasury notes, and they would circulate the same as if they were a legal-tender. To guard against an over-issue the law might provide that a full coin reserve should be held against all notes above the stated amount, or else that they should draw not less than 8 per cent. interest. Such conditions would operate as a sacred contract between the holders and the Government.

Any necessary expansion could be provided for by extra issues against an equal coin reserve. Also, the amount might be increased according to the increase of population. To provide against panics the Government might issue extra notes and loan them to the banks at a high rate of interest, against collateral security deposited permanently with the Government for the purpose. We should thus have a safe and elastic currency, and the Treasury would be relieved from holding so much money as at present.

In the course of an article treating the above project, under the heading "Fiat Money Again," the "Public" says: "Mr. Bolles and the Chicago 'Times' do not seem to contemplate any reserve of gold whatever for the redemption of \$600,000,000 of notes. But it does seem rather hard to argue with anybody who does not see, at this late day, that a reserve for redemption is absolutely necessary to give stability to the currency and safety to business. No doubt there are some people upon whom all the discussions of the years 1874-9, inclusive, produced no sort of effect. The events of these and subsequent years taught them nothing. Intellectually they can boast that they are on a level with the old Egyptian obelisk in Central Park; the civilization of this century makes no impression on its silent and stolid stupidity. But we can hardly believe that the Chicago 'Times' will seriously maintain that United States notes, of the volume now outstanding, would retain their present value if it should become known that the Treasury had no money with which to redeem them. Indeed, we suppose sane people will not doubt that a depreciation of these notes would at once set in, if the specie reserve should be diminished by one-half. We cannot see that the case would be essentially different if, instead of cutting down the reserve one-half, the Government should double the issue of its notes."

This language may sound harsh, but it has doubtless caused an unpleasant surprise to many others to see the proposal come from so respectable a quarter, to substitute an irredeemable fiat currency for the national bank notes. We say irredeemable, because no provision is proposed for its redemption. But, aside from this, the plan is impracticable and self-contradictory. For instance, it includes careful precautions to prevent Congress from increasing the amount of the proposed issue; one being an implied contract that the excess should bear interest. But if implied contracts are of any avail, the scheme is ruined at the start, for the Government is now in honor bound to keep a reserve sufficient to guarantee the stability of its notes.

Again, while on the one hand it is proposed that the Government shall pay interest on all over-issues, on the other hand the borrower of the notes is to pay the Government a high rate of interest. To provide for the elasticity of the circulation by issuing notes against a deposit of coin, would be like proposing to a man in need of money to lend him \$100 in greenbacks on condition of his leaving \$100 in coin as security. It is not clear why a bank circulation could not be kept within proper bounds (as at present) as well as a Treasury currency.

**Pacific National Bank of Boston.**—A plan to settle the affairs of this bank has been agreed to by creditors to the amount of \$1,500,000. According to this plan all the assets of the bank go to its creditors, and will be divided as fast as they are realized. The directors are to be released on the payment of \$100,000 in cash, and the return to the Receiver of about \$150,000 in securities. The scheme contemplates securing to the creditors, in addition to the 5 per cent. dividend already made, 20 per cent. on or before April 1st, and such further dividend as may be realized thereafter from the assets.

Of course the consent of the Comptroller has to be had to any settlement of the kind mentioned, in order to withdraw the suit against the stockholders. Besides, to make the plan effectual, the agreement of all the creditors is necessary. The Boston "Journal" says that Benyon, the ex-President, is living in Canada on the bounty of Boston parties who want to keep him out of the way, and that if this source of income were shut off he would immediately return and make startling developments. If any persons are being blackmailed as stated they must be foolish, as the truth will come out sooner or later.

**Over-Certification of Checks.**—When the firm of Cecil, Ward & Co., stock brokers, of New York, failed in August, last, it transpired that the Wall Street National Bank had certified their checks for \$196,689, while the firm did not have that amount on deposit. The Comptroller of the Currency notified the Secretary of the Treasury of the fact, requesting that the Attorney-General be informed of it. The consequence was that an indictment was found against George P. Graff, paying teller of the bank, who appeared on November 19 before United States Commissioner Osborn, and gave bail in \$1,000 to plead to the indictment at the December term of the court.

The act charged against Mr. Graff was contrary to a law passed in 1869, but the penalty was indefinite and the law was ignored. The National Bank Extension Act of July 12, 1882, however, declares that any bank officer, clerk, or agent of a national bank, who shall certify a check before the amount shall be entered to the credit of the dealer on the books of the bank, shall be deemed guilty of a misdemeanor, and shall, upon conviction in any Circuit Court of the United States, be fined not more than \$5,000, or imprisoned not more than five years, or shall be subject to both penalties, at the discretion of the court.

**Pension Payments.**—The annual report of Pension Commissioner Dudley for the fiscal year ended June 30, 1883, shows that there were at the close of the year 303,658 pensioners. The average annual value of all pensions was \$32,245,192, an increase over the value for the previous year of \$2,974,090. The amount paid for pensions was \$60,064,009, the excess over the annual value being made up of arrears. The whole number of claims filed since 1861 was 886,137, of which 510,938 were allowed. The total amount paid for pensions since that time, including costs of disbursement, is \$621,073,297.

The Pension Commissioner estimates that \$40,000,000 will be required for pensions in the fiscal year 1885. For the last fiscal year \$100,000,000 were appropriated at his recommendation, and of this \$89,000,000 were unexpended, and were carried over to the current year, making the total appropriation 124 millions. There will probably be a large balance left of this on June 30, next, and this, with the \$40,000 now asked for, is expected to suffice for the fiscal year 1885. It is evident that very broad ideas are held about the importance of millions or scores of millions, in the Pension Office.

**The Trade Dollar.**—The Cincinnati Board of Trade has formally adopted its Finance Committee's report declaring that "the trade dollar has become a nuisance

and a source of much complaint against the Government, and that the only just and proper course to take is for the Government, which created it, to redeem it."

The opinion that the trade dollars should be disposed of is about unanimous, but there is a decided disagreement as to the method in which it shall be done. Many respectable papers contend that the Government should redeem them at their bullion value, but they fail to say how the holders can be induced to sell the coins at this value. As we understand it, the Treasury has always been ready to purchase them the same as any other silver.

**The Clyde Banking Company**, at Clyde, Ohio, closed its doors on November 3, and D. A. Heffner was appointed Receiver.

The company consisted of P. W. Parkhurst, A. Richards and D. E. Harkness, Mr. Parkhurst being the Cashier. An investigation showed that there were \$74,000 of deposits; \$50,000 of doubtful assets, and \$24,000 of overdrafts by two firms which have failed. Parkhurst had a good reputation heretofore. It is said that his bondsmen and his partners are rich, and that the affairs of the concern may be straightened out in time.

**Senator Sherman's Bill to Continue the Circulation.**—Following is the text of a bill introduced into the United States Senate (among the first of the present session), by Senator Sherman:

A BILL to provide for the issue of circulation to national banking associations:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That upon a deposit of bonds as required by law, any national banking association making the same shall be entitled to receive from the Comptroller of the Currency circulating notes of different denominations, in blank, registered and countersigned as provided by law, equal in amount to 90 per cent. of the average current market value of the United States bonds so transferred and delivered for the previous fiscal year; and at no time shall the total amount of such notes issued to any association exceed the amount at such time actually paid in of its capital stock, nor shall they exceed 95 per cent. of the market value of such bonds. And that all laws and parts of laws of the United States inconsistent with the provisions of this act be, and the same are hereby, repealed.

This bill is directly in accordance with the recommendations of the President, the Secretary of the Treasury and the Comptroller of the Currency. It stands Number 20 on the Senate calendar, and it is supposed to have a good chance of being passed.

**Central Park Savings Bank, and People's Savings Bank, of New York.**—These institutions failed in 1875, and Mr. Isaac V. French was appointed Receiver of both. When he died Mr. Marcus T. Hun, of Albany, was appointed as his successor. He sued the Directors of the Central Park Savings Bank for violation of the law, and recovered \$17,000 in cash, and had a mortgage for \$11,000 held by one of them canceled. He obtained \$19,181 in cash, out of which a dividend of 25 per cent. has been paid. Judge Donohue has now made an order, allowing him 5 per cent. of the assets, or \$950, and directing his discharge after the distribution of the remaining sum of \$2,008, as a final dividend.

When Mr. Hun became Receiver of the People's Savings Bank, \$86,791 had already been distributed to the creditors. He prosecuted suits in this case also, against the Directors, and two of them compromised by paying \$16,000, while the rest won. He got altogether \$23,421, of assets, and is allowed a fee of 5 per cent., or \$1,171. After the payment of other fees, etc., there will remain \$10,528 which he is directed by Judge Donohue to distribute to depositors, and then he will be discharged.

Mr. Hun has been highly commended for the energy and fidelity with which he discharged his trust, and for the moderate fees charged.

**Liability of Bank Stockholders in Iowa.**—Two cases affecting the vitality of corporate banks in Iowa are now pending in the courts of Iowa. Allen against Clayton and others has just been appealed to the Supreme Court. The creditors of

the insolvent Merchants' Bank of Bloomfield brought suit against the stockholders, under the Constitution, to recover double the value of the stock subscribed. The defense seek to avoid the force of this by the terms of the articles of incorporation, which limit the liability to the extent of the unpaid assessment, a clause that is invariably inserted by Iowa corporations. The defendants insist that this clause of the Constitution refers only to banks of issue, which theirs was not, while the plaintiffs insist that banks of deposit and loans are to be included. Attorney-General McPherson recently brought an action to wind up the Monroe County Bank. The Receiver appointed sued the individual stockholders not only for twice the value of their subscriptions, but for the whole indebtedness of the bank. This is under Section 5, Article IX. of the Constitution, which provides that all banking laws or amendments thereto passed by the Legislature shall be submitted to popular vote, which has never been done. If this view of the Attorney-General is held to be good when the case reaches the Supreme Court, every insolvent corporate bank under the Iowa law can be held liable for its entire indebtedness the same as a copartnership. Both questions are raised for the first time.

**Bank of Salem, N. Y.**—The Salem "Press" says there was a pleasant gathering at the recent final closing of the affairs and division of the remaining assets of this old bank. It was organized in 1853 and closed in July, 1885, on the organization of the National Bank of Salem. During the twelve years of its existence it never paid less than a 4 per cent. semi-annual dividend, the total dividends being 99 per cent., and there have since been divided 51 per cent. of surplus earnings, besides the original capital. A resolution was passed thanking Mr. Benjamin B. Bancroft, the Cashier, for "his long-continued sagacity and faithfulness in its management and closing."

The "Press" says: "The successor of this bank, the National Bank of Salem, has now passed through eighteen years of business under, virtually, the same management, Benjamin F. Bancroft, President, Mark L. Sheldon, Cashier, with results even more marked and successful than those of its predecessor."

**The Mississippi Valley Bank, of Vicksburg, Miss.**, closed its doors on November 21, having made an assignment to George S. Irving. General E. S. Butts, President of the Vicksburg Bank, was subsequently appointed Receiver by the Chancellor. The principal owners of the failed bank, George M. Klein, the President, and J. A. Klein, Jr., the Cashier, are men of wealth. The suspension is attributed to difficulties caused by large grain speculations by A. K. Bonham & Co., of St. Louis, in which firm George M. Klein was interested. The deposits in the bank are loosely estimated at \$700,000 to \$1,000,000. The capital was \$100,000. It is said the proprietors are fully liable for the debts. Preferences were made for about \$400,000 when the assignment was executed.

**The New Electric, Manufacturing and Miscellaneous Stock Exchange** was formally opened at its rooms, at the corner of Pine and Nassau streets, New York, on December 3d. At the opening exercises the President, Mr. George M. Hard, who is also President of the Chatham National Bank, introduced Mr. Wm. Dowd, President of the Bank of North America, who presided. Secretary Alfred H. Jocelyn gave a brief description of the plan of the new organization, and said that a very general co-operation of bank Presidents had been secured. The Hon. Demas Barnes made a congratulatory speech. Mr. O. D. Baldwin, President of the Fourth National Bank, also made a short address in which he eulogized the Stock Exchange as a civilizing power.

**Legality of Dealings in Futures.**—The case of Calvin Morgan against S. S. Bell and others has been decided in the Chancery Court, at Nashville, Tenn., a decree of \$3,340 being rendered in favor of the complainant. This suit was instituted some months ago, during the existence of the Tennessee Brokerage Association, to recover money lost by the complainant by dealing in wheat futures with the association. The defendants appealed from the decision of the Chancellor to the Supreme Court.

**The National Bank of Rahway, N. J.**, suspended payments on November 22, after a run of several days' duration. The President, Mr. Abram F. Shotwell, is reported as ascribing the suspension to malicious rumors started to injure the bank. On October 2, the loans and discounts were reported to the Comptroller at \$224,475, and the individual deposits at \$217,869. A large part of the assets is said to be the notes of local tradesmen. Deputy Bank Examiner Adams of Baltimore has been sent to examine the affairs.

## MISCELLANEOUS BANK ITEMS.

— Ex-Gov. John B. Page has resigned the Presidency of the National Bank of Rutland, Vt.

— The Bank of Odebolt, Iowa, has failed. It was started in 1878, being owned by John Wright.

— Attempts have been made to pass counterfeit ten pound notes of the Provincial Bank of Ireland, in New York, Boston and Philadelphia.

— Ellery H. Andrews, a clerk in the North-Western National Bank, of Chicago, Ill., was arrested recently on a charge of embezzling \$10,000.

— Homer N. Choate, Paying Teller of the Seaboard Bank, of New York, shot and killed a burglar in his house at Newark, N. J., one night recently.

— A national bank with \$50,000 capital is being organized by nine citizens of the Cherokee Indian Nation, at Vinita, Indian Territory.

— Edward Payne, Cashier of the Rushville, (Ind.) National Bank, was killed on the morning of November 22d, by a burglar who had entered his house, and whom he attempted to seize.

— Charles N. Dewey, who recently defrauded parties in Montreal, Boston and New York, by means of forged bills of lading, has pleaded guilty in Boston to nine counts of an indictment for forgery.

— As Mr. L. R. P. Stockton, Paying Teller of the American Exchange National Bank, New York, was closing the large bank safe recently, his left hand was caught and the ends of two of his fingers were cut off.

— Mrs. Anna Safford, widow of a former Cashier of the City National Bank of Cairo, Ill., is to erect and endow a public library building in that city as a memorial of her husband. The building is to cost about \$25,000.

— Kirkland M. Fitch, the defaulting Cashier of the Second National Bank of Warren, Ohio, has pleaded guilty of embezzling \$80,000, and been sentenced to five years' imprisonment.

— The New York Produce Exchange, after a partial trial of the Osterberg system of clearing transactions, has added nine members who are opposed to the idea of the committee having the matter in charge, in order to confer on the subject and report.

— On the occasion of the recent celebration of the anniversary of the evacuation of New York by the British, a statue of Washington, which had been erected upon the steps of the New York Sub-Treasury building, was unveiled with appropriate ceremonies.

— Frederick M. Ker, Cashier for Preston, Kean & Co., bankers, Chicago, who fled in February last, leaving \$40,000 short in his accounts, and was captured after a long chase, in Peru, has been convicted and sentenced to ten years in the penitentiary at Joliet.

— Comptroller Knox has appointed Augustus M. Scriba National Bank Examiner for the City of New York. Mr. Scriba was the assistant examiner of Charles A. Meigs, recently deceased, for twelve years, and was recommended by the principal members of the Clearing-House in New York.

— A bold attempt was recently made to rob the Merchants' National Bank of Des Moines, Iowa, by two men, one of whom engaged the attention of Mr. Newell at the counter, while the other entered the back door and snatched up \$600 in bills. Mr. Newell pursued the thief, who dropped most of the money and escaped.

— A forged draft for \$4,522.40, purporting to be drawn by the Merchants' National Bank of Evansville, Ind., upon the Leather Manufacturers' National Bank of New York, was intercepted at the latter bank recently. It came for collection from the Laclede Bank of St. Louis, and bore only the endorsement of E. D. Webster.

— William C. Little, H. C. Tinker, Thomas Reed, Jr., and Campbell C. Brown, have been admitted to membership in the New York Stock Exchange. The seat lately held by W. D. Moore, of W. D. Moore & Co., has been transferred to Frank Curtis of the same firm. C. M. Schott, Jr., who was suspended some weeks ago has been reinstated. F. M. Lockwood and William H. Bingham have been readmitted.

— Edward B. Darlington, Richard Davis and Charles Fisher, were recently arrested for forging the name of J. J. Smith to three checks, which were drawn upon Howes & Co., bankers, of Wall street, and certified by them. Two of the checks, for \$400 and \$700 respectively, were cashed at the Continental National Bank, but payment of the third, for \$1,500, was refused. Crimes like this are becoming noticeably frequent throughout the country of late.

— William M. Goodrich was arrested in Boston, on November 26th, for passing a worthless check for \$1,235. Upon his person were found Cashier's checks on the American National Bank of Nashville, Tenn., for \$3,000, payable to and indorsed by Paul Bruce, on the Boone County National Bank of Columbia, Md., also for \$3,000, payable to and indorsed by Paul Bruce, and blank cashiers' checks on the City Bank, State of Iowa, the Miners' National Bank of Prescott, Arizona, and the First National Bank of Atchison, Kan.

— Chancellor Merritt (Tenn.) has decided the case of the State against the Merchants National Bank, in favor of the defendant. This suit was instituted some time ago by the State to recover \$57,560 from the bank, which, it was claimed, was due according to the books of M. J. Polk, State Treasurer. The bill filed at the time alleged false entries in the books of the bank and the State Treasurer to this amount, which misled the Legislative Committee appointed to investigate the Treasurer's books, and it was on these grounds that the suit was begun to recover the amount.

— Mr. H. Victor Newcomb, President of the United States National Bank, New York, has sold his interest in the bank and intends to retire some time before next January. Mr. Newcomb owned a controlling interest in the bank, and the gentlemen who have purchased his stock are his personal friends, headed by Logan C. Murray, the present Vice-President of the bank. Mr. Newcomb is said to have sold shares of the par value of \$300,000 at about 150. Mr. Murray will succeed the retiring President. Mr. Newcomb says that he has no particular enterprise on hand which will demand his constant attention. Since his retirement from the Presidency of the Louisville and Nashville Railroad, a few years ago, he has taken a more or less active interest in railroad matters, and is now a Director of the New York, West Shore and Buffalo Railroad.

**NATIONAL BANK STATISTICS.**—Statement of the Comptroller of the Currency on December 1, 1883, showing the amounts of the National Bank Notes and of Legal-Tender Notes outstanding at dates of the passage of the Acts of June 20, 1874, January 14, 1875, and May 31, 1878, together with the amounts outstanding at date, and the increase or decrease.

## RAILROAD AND INVESTMENT NEWS.

(A synopsis of information regarding Railroad and other Corporation affairs of interest to Bankers, Investors, &c. *Classification*: I. New Issues. II. Reports. III. Miscellaneous Investment News.)

### I. NEW ISSUES.

**NEW YORK STOCK EXCHANGE LIST.**—The Governing Committee of the New York Stock Exchange has voted to place an additional \$5,000,000 of the first mortgage 5 per cent. coupon bonds of the New York, West Shore & Buffalo Railroad on the regular list.

Also, an additional \$100,000 6 per cent. first mortgage bonds of the Pittsburgh, Bradford & Buffalo Railway Company.

The Committee listed the entire issue of first mortgage bonds of the Southern Pacific Railroad Company (of Arizona), amounting to \$9,604,000. These bonds are issued in two series—Series A, dated March 1, 1879, and Series B, dated March 1, 1880. All of the bonds have 30 years to run and bear 6 per cent. interest. The mortgage which secures these bonds covers the whole of the railroad line from the easterly terminus on the east bank of the Colorado River at Yuma, to the eastern boundary of the said Territory.

The application of the Chicago & Western Indiana Railroad Company to have \$3,300,000 of its first mortgage gold 6 per cent. coupon bonds and \$10,500,000 of its general mortgage gold 6 per cent. coupon bonds listed, was granted. This company furnishes an entrance into the city of Chicago, together with all terminal facilities, to the Chicago & Eastern Illinois Railroad, Wabash, St. Louis & Pacific Railway, Chicago & Grand Trunk Railway, Louisville, New Albany & Chicago Railway, and Chicago & Atlantic Railway, who pay rentals under their various leases, based upon the facilities furnished.

The Committee has approved of the second mortgage bonds of the Louisville & Nashville Railroad, but has deferred action upon them until a trust company could be substituted for the persons who were named as Trustees in the mortgage bonds. There was no objection to the persons named, but it was thought that a trust company was more desirable as a Trustee on the ground of permanency.

**CANADIAN PACIFIC.**—Notice was given in the Stock Exchange, November 21, of the intention of the Canadian Pacific Railroad Company to issue the balance of its authorized capital within 30 days from date. The amount to be issued is \$45,000,000, of which \$35,000,000 will remain on deposit with the Canadian Government.

**THE ST. LOUIS, IRON MOUNTAIN & SOUTHERN RAILROAD COMPANY** has asked the New York Stock Exchange to strike from the regular stock and bond list its entire issue of second preferred income bonds, amounting to \$4,015,720. The said bonds have been retired, and the officers of the company state that steps are being taken to have the mortgage which was issued to secure them canceled.

**TOLEDO, CINCINNATI & ST. LOUIS.**—A circular has been issued asking for the consent of the bondholders to a plan for the reorganization of this company, which embraces the issue of \$3,500,000 of Receiver's certificates; the foreclosure of the first mortgage bonds; the issuance of a preferred 6 or 7 per cent. mortgage to take up the Receiver's certificates, and the issuance of \$10,625,000 of new consolidated 5 per cent. bonds to take up the \$10,500,000 outstanding first mortgage bonds, all at par

(save main lines to be taken at 150 and Avondales at 50), and no account to be made of income bonds or stock.

**KENTUCKY UNION.**—The stockholders of this railroad company have resolved to float \$2,500,000 in bonds, as per arrangement by Vice-President Dodge. The proceeds will be used to construct sixty-five miles of road from Hedges to the mouth of Troublesome Creek.

**MISSOURI, KANSAS & TEXAS.**—The following plan has been agreed upon by the Directors to issue bonds in order to retire the income bonds: New bonds are to be issued under the provisions of section 6 of the general consolidated mortgage of December 1, 1880, whereby \$10,000,000 of bonds, numbered from 18,213 to 28,217 were reserved for the purpose of retiring second mortgage income bonds and coupons and scrip representing interest accrued thereon. The new bonds are to run for the same period as the six per cent. general consolidated mortgage bonds, to December 1, 1924, and bear interest from October 1, 1883, at the rate of 5 per cent., payable semi-annually, on the 1st days of June and December, the first coupon attached to fall due December 1, 1883, and to be in payment of two months' interest at 5 per cent. per annum from October 1, 1883, the date of the coupons last maturing on the income bonds. The new bonds are to be issued in exchange for income bonds dollar for dollar, in even sums of \$1,000 and upward. Pending the preparation of the 5 per cent. bonds, the income bonds assenting to the proposed exchange are to be stamped with the assent. The 5 per cent. bonds are to be ready for exchange not later than February 5, 1884. All the income bonds received in exchange for the new bonds are to be deposited with the Mercantile Trust Company as Trustee, and held uncanceled, as security for the new bonds until all the income bonds have been retired. Outstanding income coupons and scrip therefor are to be retired at 60 per cent. of their face value, flat, payable in the new 5 per cent. bonds at par. Mr. Hicks, a leading banker of Amsterdam, who holds a large block of the bonds, has given in writing his assent to the plan.

**BANKERS' AND MERCHANTS' TELEGRAPH COMPANY.**—A 2 per cent. quarterly dividend has been declared, and the stockholders of record are at liberty to subscribe for \$1,000,000 of new stock at par. The money obtained by this issue of new stock is to be expended in extending the lines and facilities of the company. The six new wires between New York and Washington are nearly ready for use.

**PENNSYLVANIA RAILROAD.**—The Board of Directors have passed the following resolution:

*Resolved*, That the Board of Directors do hereby declare a semi-annual dividend of  $4\frac{1}{2}$  per cent. upon the capital stock of the company out of the profits, clear of all taxes, payable in cash on and after November 30, 1883, to shareholders as they stood registered on the books of the company at 3 o'clock P. M., October 31, ult., and in order that shareholders may have the option of converting 2 per cent. of this dividend into the capital stock at par, certificates shall be issued at the time the dividend is collected representing such amount, which shall be exchanged for the capital stock at par prior to February 1, 1884, when presented in sums of fifty dollars.

**LITTLE ROCK JUNCTION RAILWAY AND BRIDGE COMPANY.**—The stockholders of the Little Rock & Fort Smith and of the Mississippi River & Texas Railways are offered the right to purchase bonds and stock, which latter will be issued as full-paid stock in the Little Rock Junction Railway and Bridge Company. The amounts allotted to each company are \$200,000 bonds and \$200,000 stock. The proportionate amount which all the stockholders of each company have the right to subscribe for is approximately the one-twentieth part of the amount of stock held by each in the stock of either company.

**NORTHERN PACIFIC.**—Judge Wallace, of the United States Circuit Court, has denied the injunction asked for to prevent the issue of \$20,000,000 second mortgage bonds, and the preferred stockholders have authorized the issue. They will be subject only to the priority of the general mortgage bonds on all the company's property, excepting the lands in Minnesota and Dakota east of the Missouri, which were appropriated for the benefit of the preferred stock.

## II. REPORTS.

**PULLMAN'S PALACE CAR COMPANY.**—The annual report for the year ended July 31, 1883, shows the following results :

|                           | 1882-83.    | 1881-82.    |
|---------------------------|-------------|-------------|
| Total revenue .....       | \$4,068,245 | \$3,737,538 |
| Total disbursements ..... | 3,069,932   | 2,597,866   |
| Balance, surplus .....    | \$1,058,313 | \$1,011,536 |

The disbursements above include dividends on capital stock, \$1,235,142, and interest on bonds, \$171,074. The stock and bonds outstanding at the end of the last two fiscal years were as follows:

|             | 1883.        | 1882.        |
|-------------|--------------|--------------|
| Stock ..... | \$13,269,500 | \$12,574,600 |
| Bonds ..... | 2,269,500    | 2,255,500    |

**BOSTON & ALBANY.**—The report for the year ended September 30, 1883, has been published. The following shows the earnings for the last two fiscal years:

|                          | 1882-83.    | 1881-82.    |
|--------------------------|-------------|-------------|
| Total earnings .....     | \$8,539,875 | \$7,790,372 |
| Operating expenses ..... | 6,158,904   | 5,600,991   |
| Net income .....         | \$2,380,971 | \$2,189,381 |

The net income of \$2,380,971 was disposed of as follows: rentals, \$75,000; interest on funded debt, \$662,900; dividends, \$1,407,100; added to surplus, \$165,873; miscellaneous, \$70,098.

**EVANSVILLE & TERRE HAUTE.**—The report for the year ended August 31, 1883, shows that the mileage operated remains at 146 miles. The main line, from Evansville to Terre Haute, 109 miles, has all been replaced with 60 lb. steel rails. The earnings for the last two fiscal years were:

|                                | 1882-83.  | 1881-82.  |
|--------------------------------|-----------|-----------|
| Total gross earnings .....     | \$751,690 | \$626,427 |
| Total operating expenses ..... | 387,228   | 451,645   |
| Net earnings .....             | \$364,462 | \$374,782 |

Summary of income account:

|                           | 1882-83.  | 1881-82.  |
|---------------------------|-----------|-----------|
| Net earnings .....        | \$364,462 | \$374,782 |
| Total disbursements ..... | 194,770   | 238,920   |
| Balance, surplus .....    | \$169,692 | \$135,862 |

Stock and bonds:

|                    | 1882-83.    | 1881-82.    |
|--------------------|-------------|-------------|
| Common stock ..... | \$3,000,000 | \$3,000,000 |
| Total bonds .....  | 4,297,000   | 3,000,000   |

Of the bonds outstanding September 30th, \$1,097,000 were held in the Treasury. The disbursements, \$194,770, were solely for interest, no dividend being paid. Balance of income account at end of fiscal year, \$460,552, against \$290,861 in the previous year.

**OLD COLONY.**—The report of this railroad company for the year ended September 30, 1883, shows that the mileage owned was 428 miles, against 303 miles in the previous year, the Boston, Clinton, Fitchburg & New Bedford Railroad having been absorbed on March 6, 1883. The mileage operated was unchanged at 470 miles. The earnings on the whole road for the last two fiscal years were:

|                                    | 1882-83.    | 1881-82.    |
|------------------------------------|-------------|-------------|
| Gross earnings .....               | \$4,249,179 | \$4,126,256 |
| Operating expenses and taxes ..... | 3,020,738   | 2,820,809   |
| Net earnings .....                 | \$1,228,441 | \$1,305,449 |

Summary of income account:

|                        | 1882-83.    | 1881-82.    |
|------------------------|-------------|-------------|
| Total income .....     | \$1,303,117 | \$1,382,947 |
| Disbursements .....    | 1,803,117   | 1,879,696   |
| Balance, surplus ..... |             | \$3,252     |

Stock and bonds:

|                   | 1882-83.     | 1881-82.    |
|-------------------|--------------|-------------|
| Stock .....       | \$10,248,620 | \$7,533,800 |
| Total bonds ..... | 8,886,900    | 5,324,000   |

The disbursements included dividends paid, \$608,006, against \$489,697 in the pre-

vious year, the difference being on account of the consolidation mentioned above. The balance of surplus account at the end of the fiscal year was \$762,516.

**OREGON RAILWAY AND NAVIGATION COMPANY.**—The annual report for the year ended June 30, 1883, says that the company and the Union Pacific are pushing forward their lines to the junction near the eastern boundary of Oregon, according to the agreement of February 23, 1883. There was \$6,000,000 of new stock subscribed for new construction. The expenditures on construction and equipment during the year were \$4,997,276; total means for construction purposes in the year, \$6,478,724. The mileage owned on July 1, 1883, was 462 miles, against 337 a year before. Miles operated 1882-3, 612 miles, against 487 in the previous year:

|                                                                                       | 1882-83.     | 1881-82.     |
|---------------------------------------------------------------------------------------|--------------|--------------|
| Gross earnings.....                                                                   | \$5,100,512  | \$4,947,980  |
| Operating expenses and taxes.....                                                     | 2,706,468    | 2,612,541    |
| Net earnings.....                                                                     | \$2,394,046  | \$2,335,439  |
| Summary of income account:                                                            | 1882-83.     | 1881-82.     |
| Total income.....                                                                     | \$2,489,213  | \$2,516,164  |
| Total disbursements.....                                                              | 2,262,929    | 1,867,103    |
| Balance, surplus. . . . .                                                             | \$226,284    | \$649,061    |
| Stock and bonds:                                                                      | 1882-83.     | 1881-82.     |
| Common stock.....                                                                     | \$21,800,283 | \$16,200,000 |
| Scrip certificates.....                                                               | 1,200,000    | 1,200,000    |
| Total bonds.....                                                                      | 5,788,000    | 5,851,000    |
| Included in the disbursements were dividends at the rate of 9 per cent., \$1,584,000. |              |              |

In addition to the surplus above shown, there were \$63,000 bonds retired by the sinking fund.

**BOSTON & PROVIDENCE.**—During the year ended September 30, 1883, the mileage remained at 68 miles. The reduced fares since January 1st caused increased outlay, which was offset by increased receipts. The earnings for the last two fiscal years were:

|                                   | 1882-83.    | 1881-82.    |
|-----------------------------------|-------------|-------------|
| Gross earnings.....               | \$1,669,134 | \$1,584,839 |
| Operating expenses and taxes..... | 1,323,555   | 1,232,509   |
| Net earnings.....                 | \$345,579   | \$352,330   |
| Summary of income account:        | 1882-83.    | 1881-82.    |
| Net earnings.....                 | \$345,579   | \$352,330   |
| Total disbursements.....          | 335,689     | 342,816     |
| Balance, surplus.....             | \$9,890     | \$9,514     |

The disbursements included dividends at the rate of 8 per cent., \$320,000. The balance to credit of profit and loss, at the end of the fiscal year, was \$412,457.

**ERRATUM.**—After part of this number was printed, we received a note from the Comptroller's office, at Washington, giving a revised computation of the profit on circulation, based upon 4 per cent. bonds. The foot-note on page 1022 should read as follows:

\* In this computation the premium is deducted in 23¼ equal annual installments, and the 5 per cent. fund is regarded as reducing the loanable circulation. If the interest to be derived from successive re-investments of all receipts be taken into the computation, the profits are greater.

E. B. Elliott, Esq., Government Actuary, computes that the *entire* profit on circulation during the twenty-four years from July 1, 1883, which the bonds have to run to maturity, based on the four per cent. bonds of 1907, the realized rate of interest being assumed at five per cent. per annum, and re-invested quarter-yearly, is 11.14 per cent. on the amount invested. If the realized rate of interest be assumed at six per cent., the *entire* profit will be 7.47 per cent. If the realized rate of interest be taken at seven per cent., the *entire* profit will be 4.33 per cent.

The *yearly* profit on circulation on these bonds, the realized rate of interest being assumed at five per cent. per annum, re-invested quarter-yearly, is 80-100 of one per cent. on the amount invested. If the realized rate be assumed at six per cent., the corresponding *yearly* profit will be 56-100 of one per cent. If the realized rate be taken at seven per cent., the *yearly* profit on circulation will be 37-100 of one per cent.

### The Money Market and Financial Situation.

---

NEW YORK, December 3, 1883.

THE CONDITION of general business shows no important improvement as yet, although the outlook is certainly not worse than it was a month or two ago. The market for stocks and bonds is very dull, both here and abroad, while loanable capital is easily obtained on first-class security. The earnings of the principal railroads, as shown by such of their statements as have been recently published, are generally very satisfactory, and they prove that the increased business of the country is gradually overcoming the drawbacks to which these properties have been subject. We mean, the heavy bonded indebtedness of most of the railroads, and the increased competition caused by newly-constructed roads.

Of course, just at present, the attention of business men is largely directed toward Congress, and the chances for legislation upon many important financial questions. Fortunately, the necessity for stopping the coinage of the standard silver dollars is becoming recognized by some of those who have hitherto been its strong supporters; and, in this respect, at least, there is a probability that wise action will be taken. Regarding the course of legislation on the continuation of the national banks, which is perhaps more pressing than the other matter, it is hard to guess what will be the outcome. There is one consideration, however, which is calculated to sustain the opinion that some measure will be passed to relieve the banks. Hardly any other practicable means is at hand for preventing a sudden contraction of the currency, and it is doubtful if any considerable party in Congress will be willing to bear the onus of this, and its probable result. The other financial and business matters that will be brought up are less pressing, although it is very desirable that a further reduction of taxation should be had soon.

The export movement of merchandise has been very heavy of late in view of the moderate crops, but the rate of foreign exchange is above the specie importing point. There have, it is true, been some considerable sums of gold received during the past month, and in October the import amounted to \$4,261,430. But the figures prove that there has been no movement of American securities abroad of any consequence. United States bonds are

---

*\* The financial situation at Boston and Chicago also appears in this department, the reviews being written by the JOURNAL's correspondents at those cities*

being returned here for redemption, and other securities are not taken proportionally.

THE PUBLIC DEBT was decreased only \$1,721,676 during the month of November. The smallness of this amount is accounted for by the fact that the pension payments amounted to over twelve million dollars. The total reduction since June 30th, being for the five months of the current fiscal year that have expired, was \$41,306,147.

Owing to the accumulation of money in the Treasury, the Secretary, on November 22d, authorized the payment of the bonds embraced in the 122d call on presentation, without rebate of interest. This call was for \$15,000,000, 3 per cents, on December 1. He also authorized the payment of the 8 per cent. bonds embraced in the one hundred and twenty-fourth call, whenever presented for redemption, prior to the date of their maturity (February 1, 1884), with interest to date of presentation. The amount of bonds received for redemption, up to the close of business on December 1, is as follows:

|                  |              |
|------------------|--------------|
| 121st call ..... | \$28,230,450 |
| 122d call .....  | 6,923,800    |
| 123d call .....  | 1,060,750    |
| 124th call ..... | 171,800      |

The following is the 124th call, mentioned above:

TREASURY DEPARTMENT,  
WASHINGTON, November 17, 1883. }

By virtue of the authority conferred by law upon the Secretary of the Treasury notice is hereby given that the principal and accrued interest of the bonds herein below designated will be paid at the Treasury of the United States, in the City of Washington, D. C., on the 1st day of February, 1884, and that the interest on said bonds will cease on that day, viz.:

Three per cent. bonds issued under the Act of Congress approved July 12, 1882, and numbered as follows:

\$50, original No. 847 to original No. 887, both inclusive.

\$100, original No. 5,447 to original No. 6,040, both inclusive.

\$500, original No. 2,854 to original No. 2,564, both inclusive.

\$1,000, original No. 16,451 to original No. 17,401, both inclusive, and original No. 22,646 to original No. 22,665, both inclusive.

\$10,000, original No. 24,726 to original No. 25,258, both inclusive.

Total, \$10,000,000.

The bonds described above are either bonds of the "original" issue, which have but one serial number (duplicated at each end), or "substitute" bonds, which may be distinguished by the double set of numbers (also duplicated at each end of the bond), which are marked plainly "original numbers" or "substitute numbers."

All of the bonds of this loan will be called by the original numbers only.

The three months' interest, due February 1, 1884, on the above-described bonds, will not be paid by checks forwarded to the holders of the bonds, but will be paid with the principal to the holders at the time of presentation. Many of the bonds originally included in the above number have been transferred or exchanged into other denominations on "waiver," the original numbers being cancelled, and leaving outstanding the amount stated.

The provision of law governing the order in which the bonds shall be called in is as follows: "The last of the said bonds originally issued under this Act, and their substitutes, shall be first called in, and this order of payment shall be followed until all shall have been paid."

Bonds forwarded for redemption shall be addressed to the "Secretary of the Treasury, Division of Loans, &c., Washington, D. C.," and all the bonds called by this circular shall be assigned to the "Secretary of the Treasury for redemption."

Assignments must be dated and properly acknowledged, as prescribed in the note printed on the back of each bond.

Where checks in payment are desired in favor of any one but the payee, the bonds should be assigned to the "Secretary of the Treasury for redemption for account of"—(herein insert the name of the person or persons to whose order the check shall be made payable). (Signed,) CHARLES J. FOLGER, *Secretary*.

THE NATIONAL BANKS.—The Comptroller's monthly statement shows that the amount of national bank notes outstanding on December 1 (not including the gold bank circulation) was \$350,175,977, a decrease of \$1,088,826 during the past month. The total decrease during the past twelve months was \$11,616,192.

The following will show the amount of each description of bonds held by the Treasurer to secure national bank circulation, on or about the dates indicated :

|                                                              | Sept. 1.      | Oct. 1.       | Nov. 1.       | Dec. 1.       |
|--------------------------------------------------------------|---------------|---------------|---------------|---------------|
| Currency 6 per cents.....                                    | \$3,463,000   | \$3,463,000   | \$3,463,000   | \$3,388,000   |
| 4½ per cents.....                                            | 40,631,700    | 40,970,200    | 41,319,700    | 41,820,700    |
| 4 per cents.....                                             | 106,207,000   | 106,463,500   | 106,209,000   | 106,702,850   |
| 5 per cents extended at 5¼ }<br>6 per cents extended at 5½ } | 4,706,200     | 1,541,200     | 782,000       | 422,000       |
| 3 per cents.....                                             | 201,611,250   | 202,237,250   | 201,287,750   | 196,841,050   |
| Total.....                                                   | \$355,619,150 | \$353,675,150 | \$353,061,450 | \$351,174,600 |

FOREIGN EXCHANGE.—The market is dull, and the rates for sterling are a trifle higher than they were a month ago. The following were the posted and the actual rates on December 1: Bankers' sterling, 60 days, nominal, \$4.83; sight, nominal, \$4.85½; 60 days, actual, \$4.82@ \$4.82½; sight, actual, \$4.84½@ \$4.85; Cable transfers, \$4.85½@ \$4.86; Prime commercial sterling, long, \$4.81½@ \$4.81¾; Documentary sterling, 60 days, \$4.80¾@ \$4.81; Paris, bankers', 60 days, 5.22½@ 5.21½; sight, 5.19½@ 5.18¾; Antwerp, commercial, 60 days, 5.26¼@ 5.25; Swiss, bankers', 60 days, 5.21½@ 5.21¼; sight, 5.18¾@ 5.18½; Reichsmarks (4), bankers', 60 days, 94½@ 94¾; sight, 95½@ 95½; Guilders, bankers', 60 days, 40@ 40½; sight, 40¼@ 40½. Paris dispatches quote exchange on London 25f. 20½c.

The following shows the posted rates for prime bankers' sterling bills on London at 60 days, on sight, cable transfers, and prime commercial sterling at 60 days, together with exchange on Paris on November 1, the changes in the rates as they occurred during the month, and the highest and lowest during the months of October and November :

| Oct.—        | Bankers  |        | Cable Transfers. | Commercial. | Paris    |        |
|--------------|----------|--------|------------------|-------------|----------|--------|
|              | 60 days. | Sight. |                  |             | 60 days. | Sight. |
| Highest..... | 4.83½    | 4.86   | 4.86¾            | 4.81¾       | 5.24½    | 5.21½  |
| Lowest.....  | 4.81½    | 4.84½  | 4.84½            | 4.80¼       | 5.22¾    | 5.20¼  |
| Nov. 1.....  | 4.83     | 4.84½  | 4.84½            | 4.80½       | 5.24     | 5.21½  |
| " 2.....     | 4.83     | 4.84½  | 4.84½            | 4.80½       | 5.23¾    | 5.20½  |
| " 5.....     | 4.82½    | 4.85   | 4.85¼            | 4.80½       | 5.23½    | 5.20½  |
| " 9.....     | 4.83     | 4.85½  | 4.85¾            | 4.81½       | 5.22½    | 5.20¼  |
| " 10.....    | 4.82½    | 4.85   | 4.85¾            | 4.81½       | 5.22½    | 5.20¼  |
| " 15.....    | 4.83     | 4.85½  | 4.85¾            | 4.81½       | 5.22½    | 5.20¼  |
| " 20.....    | 4.83½    | 4.86   | 4.86¼            | 4.81¾       | 5.22¼    | 5.19   |
| " 23.....    | 4.83     | 4.85½  | 4.85¾            | 4.81¾       | 5.22¼    | 5.19   |
| Highest..... | 4.83½    | 4.86   | 4.86¾            | 4.81¾       | 5.24     | 5.21½  |
| Lowest.....  | 4.82     | 4.84½  | 4.84½            | 4.80½       | 5.22¼    | 5.19   |

**MONEY AND DOMESTIC EXCHANGE.**—Call loans on stock collateral in this market have been very easy of late, the general rate being about 2 to 2½ per cent., while time loans on the same collateral have been about twice as high. Advices from Chicago and St. Louis report a good, but not by any means a pressing demand for loans. Altogether there has been a remarkable absence of the scarcity of loanable capital which is so usual during the fall. The quoted rates on first-class, doubled-named paper are 5½@8 per cent., and on single-named 6@7½ per cent.

The following table shows the range of call loans, and rate of prime paper, for the past five weeks :

|                         | Oct. 27.   | Nov. 3.    | Nov. 10.   | Nov. 17.  | Nov. 24. |
|-------------------------|------------|------------|------------|-----------|----------|
| Range of call loans ... | 1¼@4¼ ..   | 2 @ 3¼ ..  | 1 @ 3 ..   | 1¼ @ 3 .. | 1¼ @ 2¼  |
| Rate of discount .....  | 5¼ @ 6¼ .. | 5¼ @ 6¼ .. | 5¼ @ 6¼ .. | 5 @ 6¼ .. | 5 @ 6    |

The rates of domestic exchange on New York on December 1 were as follows : Savannah, buying ¼ discount; selling par @ ¼ premium, Charleston, buying 3-16@7-32 premium; selling ½ premium. New Orleans commercial, 50c.@\$1 per \$1,000 discount; bank, par. St. Louis, 50c. per \$1,000 premium. Chicago, 25c. per \$1,000 discount. Boston, par@5c. per \$1,000 discount.

**UNITED STATES BONDS.**—There has been an advance in prices for the long issues, which are very firmly held.

The following table shows the closing bids for the principal issues of Government bonds on each day of the month of November, and the highest and lowest during the month :

| Nov. 1 | 4½s. '91, coup. | 4s. 1897, coup. | 3 per cents. 1895. | C'y 6s. 1895. | C'y 6s. 1890. | Nov. 17  | 4½s. '91, coup. | 4s. 1897, coup. | 3 per cents. 1895. | C'y 6s. 1895. | C'y 6s. 1890. |

**NEW YORK CITY BANKS.**—The Clearing-House statements show that there has been a large amount of money returned from the interior, so that now there is a surplus of over 6 million dollars above a 25 per cent. reserve. The deposits and loans are much larger than they were a year ago, or two years ago, indicating a greater volume of business in spite of the comparative dullness of general trade.

The following shows the condition of the New York Clearing-House banks for a number of weeks past, as well as about this time in 1882 and 1881:

| 1883.          | Loans.        | Specie.      | Legal-tenders. | Deposits.     | Circulation. | Surp. Res.  |
|----------------|---------------|--------------|----------------|---------------|--------------|-------------|

\* Deficit.

**RAILROAD AND MISCELLANEOUS STOCKS AND BONDS.**—There have been two considerable attempts at an advance within a month, but not much indication of a genuine interest by the outside public. On the whole, prices are a little better than in October. There is a visible improvement in railroad and State bonds, showing a renewal of the tendency to invest capital in these securities, which is an encouraging sign.

The following table shows the highest, lowest and closing prices of the active stocks at the New York Stock Exchange in the month of November, the highest and lowest since January 1, 1883, and also during the year 1882:

|                           | October, 1883. |      |         | Since Jan. 1, 1883. |               | 1882.    |      |

THE LAST statement of the Bureau of Statistics (December 1). shows that the excess of the value of exports over imports of merchandise of the United States was as follows: Month ended October 31, 1883, \$15,081,586; four months ended October 31, \$17,076,410; ten months ended October 31, \$61,159,429; twelve months ended October 31, \$122,410,944.

## Bank, Government, Railroad and Miscellaneous Stocks and Bonds.

### LATEST QUOTATIONS AND OTHER INFORMATION.

The following tables give the latest quotations of stocks and bonds at the New York Stock Exchange. In the case of all but the New York bank stocks the highest and lowest actual prices of a year ago are also given, for comparison. The quotation tables on the following pages include *all securities listed at the Stock Exchange.*

#### NEW YORK CITY BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The Capital and Surplus are as given in the latest official reports, viz.: the National banks Oct. 2, as reported to the Comptroller of the Currency; the State banks, Sept. 22, as reported to the State Banking Department. The Surplus includes the undivided profits on the dates given. The Banks which are *not* members of the New York Clearing-House Association are indicated by a (\*). Not listed at the Stock Exchange by a (†). This table includes all the Commercial banks of New York.

## BOSTON—The Financial Situation, Banking News, &amp;c.

(From the JOURNAL'S regular Correspondent.)

BOSTON, Dec. 3, 1883.

—The New England railroads, or more practically those leading out of Boston, New York & New England excepted, are all showing better results, both in the gross and net earnings, than for last year. Our roads have no open construction account, consequently the net earnings are on hard pan. The lease of the Eastern by the Boston & Maine still hangs fire, although long since approved by the stockholders in both roads. It is believed that action will be taken at the annual meeting of the Eastern, Dec. 12, looking to a speedy consummation of the lease, as a large majority of the stock in the Eastern is held by parties who feel confident that a lease is the best thing for the road.

—The negotiation of city loans has always been a special feature of the Boston market, and not only our home New England cities, but numerous western municipalities find a ready sale for securities which rank first-class. A city security, backed by good credit, will sell at par to a small premium, for a 4 per cent. bond, the price being influenced by the length of time to run. Bonds bearing a higher rate of interest will sell at a premium sufficient to bring them down to a 4 per cent. investment held to maturity, and in a few instances, of extra choice bonds, even to  $3\frac{1}{4}$  per cent. Within two or three years city borrowers have had a glorious opportunity to secure new loans and refund old ones at rates most favorable to them.

—The money market has continued remarkably quiet and even in rates through the month, and particularly so for this closing period of the year. The Clearing-House rate has stood "fixed" at 2 per cent. since Oct. 23, until this week, when a few loans were made at  $1\frac{1}{2}$  per cent., a rate touched only twice before this year, January 10 and 16, and only on four days in 1882, June 9, 10, 15, 16. In fact, many of our banks refuse to loan at so low a figure, finding there is little, if any, profit in the transaction. One year ago money at the Clearing-House ruled firm at 4 per cent., and held close to that figure all through December. There is an abundance of idle capital, as the above facts show, but discounts have been maintained at 5 to 6 per cent., lenders being very exacting in the quality of the paper offered, and demand higher rates as a consequence; to this, borrowers have been compelled to submit, or get no money. There is, however, a tendency to lower figures of late, and now good bankable paper is passed at 5 and  $5\frac{1}{2}$  per cent., with choice sometimes as low as  $4\frac{1}{2}$  per cent. Manufacturing paper goes at  $4\frac{1}{2}$  per cent., and if very short, at 4 per cent. Trade paper with New York endorsement, rules at 5 per cent. Demand loans to bankers 4 per cent., and in sound lots to some of the best houses, 3 to  $3\frac{1}{2}$  per cent.

—What may prove an important factor in the future of the money market, is the continued withdrawal of circulation by national banks. One year ago the circulation of the banks in the United States was \$361,792,166, against \$350,175,977 now, a reduction of \$11,616,192. This week the Shawmut Bank of this city has withdrawn its entire circulation of \$800,000, and it is understood that other banks will follow, unless some action is taken by Congress favoring the banks regarding the present burdens on circulation. An abatement of the tax and raising the percentage of circulation issued on bonds deposited, from 90 per cent. to at least par, could be done at once and arrest the further reduction of circulation. Then would be required some legislation respecting bonds to be held against circulation, to provide for the now probable call of the entire \$250,000,000 of 3 per cents held by banks. The circulation of the Boston banks is now \$26,265,800, against \$30,107,500 one year ago: a reduction of \$3,831,700, or nearly 13 per cent.

—The stock market was more vigorous during November than in any month for some time past, and the movement was decidedly active. In almost every instance the closing prices are higher than the lowest points within the month, and in many instances largely so. It has been a bull market all through, and although a little slack just now, there is a very fair tone, and most brokers are hopeful that after New Year's, at least, we shall have a steady, permanently advancing market. The bonds of the New York & New England Railroad, as suggested last month, have been a feature, making an advance of over 8 points, but a little off at the close. The earnings of this road for the year ending Sept. 30, show a net largely below the

amount of fixed charges, but within the last three months the earnings have largely increased, and to-day are understood to be in excess of all charges. The first mortgage 6 and 7 per cent. bonds are therefore an undoubted security. A disappointing feature is the continued depression in Atchison & Topeka, which touched within a half per cent. of the lowest point of the year, and is but little above it now.

— The following table shows the highest, lowest and closing prices of the most important railway and miscellaneous stocks sold at the Boston Stock Exchange during the month of November:

| Railroads.               | Low. | High. | Clos. | Railroad Bonds.                                     | Low. | High. | Clos. |

#### THE OLDEST BANK OFFICERS OF BOSTON.

Hon. Franklin Haven, in the fullness of years (being now in his eightieth), has resigned the Presidency of the Merchants' National Bank, after a service of 52 years (the first six years as Cashier), but still retains his directorship; he has been succeeded by his son, Franklin Haven, Jr., formerly Sub-Treasurer of Boston for ten years, and more recently, Actuary of the New England Trust Co.

Mr. Haven, senior, also served as Sub-Treasurer under the administration of President Tyler, and his nomination was confirmed by the Senate without the usual

reference to a committee, a very high compliment to his well known abilities and integrity. Mr. Haven commenced his service in the line of banking as Teller of the Globe Bank, Aug. 2, 1824, and has therefore been in the banking business 59 years. In 1831 he resigned his position as Teller and became the first Cashier of the Merchants' Bank, which commenced business July 1, 1831. On the first of January, 1837, then 34 years of age, he was elected President, holding that office for 46 consecutive years, and at the date of his resignation had been a bank President for a longer term of years than any other in this city.

It has been stated that Mr. James W. Converse had served longer, but that is not correct. When the Mechanics' Bank of South Boston was organized, Aug. 18, 1836, Mr. Converse was elected a director, but was not chosen President until 1847, which office he still holds, and has therefore served in that capacity only 36 years against Mr. Haven's 46. There is a remarkable fact connected with the Mechanics' Bank, which is, that during the 47 years of its existence it never had but one Cashier (Alvan Simonds), and, excepting the first 11 years as above named, only one President, but he was a director from the start.

Cashier Simonds, now in his 76th year, has been a model officer, and still performs all the duties of his position in a manner that would do credit to any of his younger associates. Mr. Simonds now ranks as the oldest Cashier, both in age and term of service (47 years), of any bank in Boston.

The next longest term of service, and still in harness, is that of Cashier Amos T. Frothingham, of the Tremont National Bank since 1844 (39 years), and he has been connected with the bank 49 years.

Samuel Carr, of the Shoe and Leather Bank, has served since 1847 (36 years), and been connected with the bank 37 years. Charles C. Barry, of the City Bank, 32 years Cashier, and in the bank 48 years.

Edward Tyler, of the Suffolk, 30 years Cashier and 46 years in the bank.

John B. Witherbee served as Cashier of the North Bank from 1850 to 1882 (32 years), and has since been its President; and in various banks, in all, 51 years. No other Cashiers have served as long as 25 years, though several come near it.

Thomas Lamb, of the New England Bank, a gentleman of the old school, now in his 87th year, honored and respected by everyone, has been its President since 1846 (37 years); therefore he has served longer than any President of a Boston bank now in office, and has been a director of the bank since 1838, a period of 45 years. Six others, however, have served a longer term as directors—Marshall P. Wilder (Hamilton) since 1832 (51 years); Charles O. Whitmore (Market) since 1832 (51 years), and President from 1860; Josiah M. Jones (Shoe and Leather) since 1836 (47 years); John H. Rogers (Freeman's) since 1836 (47 years), and President from 1866; James W. Converse (Mechanics') since 1836 (47 years), and President from 1847. The above named have all served from the original organization of their respective banks.

Franklin Haven (Merchants') has been a director since October, 1836 (47 years), and still continues in that capacity; Edward Lawrence (Bunker Hill) a director since 1843 (40 years), and William Perkins (Tremont) since 1843 (40 years), and President from 1876. The above nine are all who have been directors for as long as 40 consecutive years.

In this connection it may be mentioned that James H. Champney, the present book-keeper of the Washington Bank, has faithfully served that institution in one capacity and another, for a period of nearly fifty consecutive years. Mr. Champney is 76 years of age. Charles Evans, messenger of the Market, has served that bank for 49 years, and is now 78 years old. Benjamin F. Sawyer, messenger of the Columbian Bank, has been in service 36 years, and is now 82 years of age.

In Maine there are two Cashiers who outrank, both in age and term of service, any in Boston. Edward Gould (National Traders', Portland) has served since April 8, 1833 reaching a term of nearly 51 years, and is now 79 years old. Elvaton P. Butler (Orono National) has served since March 21, 1835 (nearly 49 years), and is aged 73. These two are the only Cashiers in Maine of longer than 40 years' service, but William S. Dennett (Second National, Bangor) comes within a few months of that term, and George Allen (Medomak National, Waldoboro) lacks a little over a year of it, and is now 82 years of age, perhaps the oldest Cashier in service in the country.

## BOSTON BANKS.—CAPITAL and SURPLUS, QUOTATIONS OF STOCK, and LAST DIVIDEND.

The following table gives the latest quotations of Bank Stocks in the Boston market. The Capital and Surplus given are from the last official report, October 23, and all the banks are National. The surplus includes the undivided net profits. All the banks belong to the Clearing-House, except Bunker Hill, First Ward, Mechanics', National Market of Brighton, People's, and Rockland, which are located out of the city proper, but within city limits, and they clear through other banks:

| BANK TITLE.                      | PAR. | CAPITAL.  | SURPLUS.  | INT. PAYABLE. | DEC. 1, 1888. |       | LAST DIV'D. |            |

(a) These banks carry "premiums paid" as follows: Commerce, \$40,000; Everett, \$3,250; Exchange, \$171,573; Faneuil Hall, \$9,989; First Ward, \$3,750; Fourth National, \$3,000; Hide & Leather, \$54,250; Lincoln, \$12,000; Market, \$33,019; North America, \$15,500; Republic, \$20,500; Shoe & Leather, \$11,000; State, \$50,000.

## CHICAGO—The Financial Situation, Banking News, &amp;c.

(From the JOURNAL's Correspondent.)

CHICAGO, Dec. 1, 1888.

— The Corn Exchange Bank people have decided not to change their corporation into a national bank.

— Receiver Turpin, of the bankrupt Fidelity Savings Bank, has made his final report and received his discharge. The money he had left on hand, \$6,561, was placed in the Illinois Trust and Savings Bank for distribution among the creditors.

— A counterfeit of the standard silver dollar has recently been found in Chicago. In weight, ring and workmanship, it is a perfect imitation, the only noticeable defect being the milling. On its surface this dollar stands the acid test, but it is thought to be heavily plated. There are probably not many of these counterfeits in circulation in the West.

— The Chicago money market is firm at @7 per cent. Funds are plenty enough, and money is generally well employed. Bankers are scrutinizing business paper closely, and often insist on two indorsements instead of one. The country banks are borrowers. They complain of poverty, and report that the bad shape of much of the corn is likely to make business dull.

— The recent sales by bankrupt concerns, of their assets, have weakened confidence and curtailed the giving of credits. This trick of selling out to some favorite is said to be spreading in the country towns. Lawyers, high in the profession, say there is no available remedy for the creditors. So long as such a state of affairs exists, money lenders feel afraid to do business.

— Ellery H. Andrews, for five years correspondent in the North-Western National Bank, confessed to having stolen \$10,000 from the institution. The President of the bank discharged Andrews because he saw him enter a saloon, which is against the rules of the bank. Andrews afterwards confessed his theft to his young wife, a noble little woman, who told him he must go to the North-Western and tell what he had done. She sent a note to the President informing him that Andrews had taken money which did not belong to him, and subsequently the faithless employee made a written confession. Five days after the exposure Andrews was sentenced to serve three years in the penitentiary.

— In a recent interview, Mr. H. C. Burchard, Director of the Mint at Washington, says he will recommend, in his annual report to Congress, that the coinage of the gold dollar and the three-cent nickel piece be discontinued; also that the Act creating the trade dollar be repealed. He thinks that as the Government gave the trade dollars to the people, and by their very existence made their circulation compulsory, it is simply justice that Congress should afford some relief. He recommends that the Government buy the trade dollars at par, and send them to the Mint to be recoined into subsidiary silver, or into the standard dollar. He considers it doubtful if Congress will take such action, but thinks a law may be passed which would relieve the public of the trade dollar nuisance, by calling in the \$1.00 notes to force the trade into circulation.

— Chicago bankers are discussing the necessity of a new bankrupt law. They favor it, as conducive to a healthy condition of credits. The recent heavy failures in this city, and the assignments by bill of sale, which preferred one or two creditors to the exclusion of all the others, is a way of doing things which is yet to be tested in the courts, and will doubtless have to face all the resources of litigation. If the time has come when a business house, finding itself hopelessly involved, can sell out its stock, bills receivable, good will and all other assets, leaving nothing for itself but its liabilities, it is very evident that there is need of a national bankruptcy act, which shall place all the creditors of an insolvent concern on the same footing, and at the same time facilitate the settlement of estates, and prevent the absorption of the assets in fees and salaries.

— The trial of F. M. Ker, for the embezzlement of \$44,700 from his employers, Preston, Kean & Co., bankers, was concluded in the criminal court last month. The

jury found Ker guilty, and assessed his punishment at ten years in the State prison at Joliet. Under the "good behavior rule," if observed by Ker, his sentence will be shortened to seven years. It is expected that the case will be carried up to the State Supreme Court, and finally to the United States Supreme Court. The attorney for the bank says the defense have no valid grounds on which to reverse the verdict of the court, but the case will be taken probably to Washington, because questions of international law are involved. During the period that Peru and Chili were at war, Ker was arrested on a requisition from the Government of Peru, though at the time the prisoner was at Lima, within the lines of the Chilian forces. Application for his detention was made to the Chilian commander, who caused Ker to be turned over to the United States steamer *Essex*. It was claimed by the defense that Ker was kidnapped. The two questions of international law to be decided in this case, the bank's counsel claims are, that the Chilian general was, de facto, the Government of Peru, and for the time being executed its laws, and that it makes no difference how a man is obtained who fled the country, provided he is taken home and once arrested under the process of the indictment. In an interview, Ker says his fall was due to speculations in grain.

#### CHICAGO BANKS.—CAPITAL AND SURPLUS, QUOTATIONS OF STOCK, AND LAST DIVIDEND.

Following is a statement showing (1) the Capital and Surplus of the Chicago banks on and since October 2, 1883 (the date of the last official statement), (2) the bid and asked price of their Stock and, (3) the rate and date of last dividend. The Surplus includes the undivided profits. The Clearing-House banks are indicated by a star (\*).

| BANK TITLE.                     | PAR.      | CAPITAL.  | SURPLUS.  | DIV'D PAYABLE. | DEC. 1, 1883. |       | LAST DIV'D. |             |

The Bank of Montreal, Canadian Bank of Commerce, and Bank of British North America are branches of Canadian institutions, and do not make a separate local report.

? Dividend for 6 months on capital stock. † New. § Earnings added to surplus. ¶ Not reported.

NOTICE.—The JOURNAL OF BANKING for 1884 will keep fully abreast of the banking needs of the country. It is a discreet yet faithful friend of the banking system—jealously guarding the interests of the banks as a whole.

A special correspondent of the JOURNAL is employed at Washington during the sessions of Congress, and all financial legislation will be correctly reported, and receive timely and intelligent discussion.

A feature of the JOURNAL in 1884 will be the history, in outline, of banking in each State, with a synopsis of the State banking laws now in force.

## DAILY RECORD OF FINANCIAL EVENTS.

NOVEMBER, 1883.

1. **THURSDAY.**—Reduction in the national debt in October, \$10,304,799; since June 30, 1883, \$39,584,470.
2. **SATURDAY.**—Discount on prime commercial paper in New York,  $60\frac{1}{2}$  per cent.; call loans,  $2\frac{1}{2}$  per cent.  
Discount in London on 60 days to 3 months' bank bills,  $2\frac{1}{2}$  per cent.; trade bills,  $2\frac{1}{2}$  per cent.
6. **TUESDAY.**—Elections took place in ten States.
8. **THURSDAY.**—The Spanish Government received a note from France settling the difficulty caused by the insult to King Alfonso.
9. **FRIDAY.**—The British Parliament further prorogued until December 19.
10. **SATURDAY.**—Discount on commercial paper in New York,  $60\frac{1}{2}$  per cent.; call loans,  $1\frac{1}{2}$  per cent.  
Discount in London on 60 days to 3 months' bank bills,  $2\frac{1}{2}$  per cent.; and trade bills,  $2\frac{1}{2}$  per cent.  
The quarter-centenary of Luther's birth was celebrated in Germany and elsewhere.
12. **MONDAY.**—Bar silver is quoted in London at 50 13-16d. per ounce. Value of the standard dollar, 86 cents.
13. **TUESDAY.**—The tracks of the New York, West Shore and Buffalo Railroad completed between New York and Buffalo.  
The agreement for a Government guaranty of the Canadian Pacific Railway executed.
16. **FRIDAY.**—A lunatic attempted to shoot M. Ferry, Prime Minister of France.
17. **SATURDAY.**—Discount on commercial paper in New York,  $5\frac{1}{2}$  per cent.; call loans,  $1\frac{1}{2}$  per cent.  
Discount in London on 60 days to 3 months' bank bills,  $2\frac{1}{2}$  per cent.; trade bills,  $2\frac{1}{2}$  per cent.  
The 124th call issued, for \$10,000,000 3 per cent. bonds on February 1, 1884.
18. **SUNDAY.**—The new time standard went into very general effect throughout the United States.
21. **WEDNESDAY.**—The annual convention of the National Cotton Planters' Association began at Vicksburg, Miss.
22. **THURSDAY.**—Specie continues to arrive from Europe.  
News arrived of the terrible defeat of the Egyptian army under Hicks Pasha by El Mahdi, the false prophet, near El Obeid, in the Soudan.  
Hon. James Russell Lowell, Minister to Great Britain, elected Rector of St. Andrew's University.  
The Importers' and Grocers' Exchange of New York formally opened.
24. **SATURDAY.**—Discount on prime commercial paper in New York,  $5\frac{1}{2}$  per cent.; call loans,  $1\frac{1}{2}$  per cent.  
Discount in London on 60 days to 3 months' bank bills, 2 per cent.; trade bills,  $2\frac{1}{2}$  per cent.
26. **MONDAY.**—Celebration of the 100th anniversary of the evacuation of New York; a general holiday.
27. **TUESDAY.**—The French decree against the importation of American pork rescinded.
29. **THURSDAY.**—Thanksgiving Day.
30. **FRIDAY.**—M. de Lesseps entered into a convention with the English shipowners to enlarge the Suez Canal, or construct a new one.

---

**BANKERS' OBITUARY RECORD.**

---

**Ackley.**—Elijah Ackley, President of the Middletown (Connecticut) Savings Bank, and also of the Middlesex County Assurance Company, died very suddenly on Monday, October 29.

**Adams.**—Alexander H. Adams, President of the Detroit (Michigan) Savings Bank, died suddenly on December 1st, from cardiac asthma, aged nearly 71 years. Mr. Adams had been connected with the bank, first as Cashier, and latterly as its President, from within a short time after its organization in 1849, and attended to the duties of his position up to and including the very day of his decease. His name had become, throughout Detroit and Michigan, a synonym for sound judgment, fair dealing and upright character, no man in the community being more generally beloved and respected.

**Church.**—Bradford C. Church, President of the Sterling (Illinois) National Bank, died September 20th, at the age of 48 years.

**Conly.**—John Conly, President of the Bank of Chico, California, died September 27, aged 58 years.

**Cross.**—Hugh N. Cross, President of the First National Bank of Jerseyville, Illinois, died November 21, in his sixty-sixth year. Mr. Cross was born in Somerset County, New Jersey, and at the age of eighteen he went to Illinois, where he worked as a laborer in order to earn money with which to engage in farming. In time he became well known as a farmer and stock raiser. In 1866 he entered the banking business in partnership with Colonel George R. Swallow, and was, in all, connected with five different banks in Illinois. In 1876 he organized the First National Bank of Jerseyville, of which he was President at the time of his decease, his son, A. W. Cross, being the Cashier, and Edward Cross, the Vice-President.

**Cundiff.**—James Cundiff, Cashier of the Reno County State Bank, Hutchinson, Kansas, died on September 19, at the early age of 22 years.

**Dix.**—Charles E. Dix, Cashier of the Council Bluffs Savings Bank, shot himself in the head, on November 6th, dying instantly. The act is ascribed to temporary insanity, caused by long illness.

**Fletcher.**—We are informed of the death, on September 21, of George C. Fletcher, President of the Farmers' Savings Bank of Marshall, Missouri, at the age of 73 years.

**Hale.**—Joseph P. Hale, the successful piano manufacturer of New York, whose death on October 15th was widely noticed, was President of the New York, New England and Western Investment Company.

**McCurdy.**—Thomas McCurdy, Cashier of the Jersey Shore (Pennsylvania) Banking Company, died November 7th, aged 65 years.

**Meigs.**—Charles A. Meigs, United States Bank Examiner for New York city, died November 3d, in his sixty-seventh year. He was born in this city, and in 1832 entered the American Exchange Bank. Here he remained about twenty-five years, when the brokerage firm of Meigs & Greenleaf, was organized. He acquired a fortune, which was freely spent in charities and patriotic uses during the war. On Black Friday his house, then Meigs & Son, was carried down. In 1871 President Grant appointed him Bank Examiner, which post he filled with great credit.

**Payne.**—In the News Department is mentioned the fact that Mr. Edward Payne, Cashier of the Rushville (Indiana) National Bank, was fatally wounded on November 21, by a burglar who had entered his house.

**Prince.**—John D. Prince, of the firm of Prince & Whitely, stock-brokers, of New York, died November 20th, of consumption, from which he had suffered for a long time, aged forty years. He was born at Paterson, New Jersey, and his youth was spent at Lowell, Massachusetts. He came to New York in 1850, and was introduced

into Wall street by his uncle, William R. Travers, and was very successful. In 1866 he became a member of the Stock Exchange, and in connection with Mr. James Whitely, and Mr. Travers as special partner, he built up one of the largest houses of the kind on the street. He was respected and liked in both social and business life.

**Russell.**—Joel Russell, President of the Holyoke (Massachusetts) Savings Bank, died October 30, at the age of 75 years.

**Scott.**—Dr. W. H. Scott, who died in New York on November 5th, in his 82d year, was formerly for a number of years President of the Hanover National Bank, and had many friends in New York financial circles.

**Silver.**—Peter Silver, President of the Salem (Massachusetts) Savings Bank, died October 6, aged 72 years.

**Stryker.**—James D. Stryker, President of the Lambertville (New Jersey) National Bank, died September 17, last, at the age of 83 years.

**Tuthill.**—Hector H. Tuthill, President of the First National Bank of Moravia, New York, died October 26, aged 57 years.

### BUSINESS NOTICES OF BANKS, BANKERS, ETC.

**BANK OF MINNESOTA, ST. PAUL.**—This bank was established about a year ago with a paid-up capital of \$600,000, succeeding the firm of Dawson, Smith & Scheffer, which was the successor of the old and favorably known firm of Dawson & Co., which was established in 1859. The deposits with this firm in 1879, amounted to \$500,000, but the deposits of the Bank of Minnesota on October 2, last, amounted to \$1,527,000. This great increase is an indication of the rapid growth of the business. During the year ended November 1st, the bank sold about seven million dollars of exchange.

**FIRST NATIONAL BANK OF HELENA, MONTANA.**—The report of this bank on October 2d makes a very gratifying showing.—The total resources were \$2,841,562 and the individual deposits amounted to \$1,762,514. The capital stock is \$300,000; surplus fund, \$60,000, and undivided profits, \$211,358, making a total, at the date mentioned, of \$571,858. The net profits of the bank for the past year were \$108,000, which amount was allowed to accumulate according to its custom hitherto. This gratifying exhibit by a bank in such a new part of the country shows energy and good judgment on the part of its management.

**MCCORMICK, ADAMS & Co.**—This firm stands among the first, if not at the very head, of the Chicago produce commission houses. It was established in 1850, being composed of Mr. Cyrus H. McCormick, who is well known throughout the world as the inventor of harvesting machines, and Mr. Cyrus H. Adams, who has had a long experience in the produce business. The house makes a specialty of dealings in grain and provisions, handling all shipments consigned to them which have a market value. During their long career their strict adherence to fair dealing and legitimate transactions have gained them the perfect confidence of the trade, while their ripe experience makes their opinions on the market of great value. The large capital of the firm is an additional guaranty of its responsibility.

**THE AMERICAN SAFE DEPOSIT COMPANY,** which very recently began business at the corner of Fifth avenue and Forty-second street, New York, is one of the most commodious and complete establishments of the kind in the city. The building was specially designed for banking and safe deposit purposes by Mr. Elliot F. Shepard, its owner. The President of the company is the Hon. H. H. Van Dyck, formerly Assistant-Treasurer of the United States, and among the Trustees are Mr. Shepard, Judge Brady, Mr. J. Seligman, and other well-known capitalists.

**MR. C. BLACKWOOD,** of Birmingham, Ala., is a money broker and dealer on commission in real estate and miscellaneous stocks or bonds. He makes a specialty, however, of placing mortgage loans on real estate in that part of Alabama, on which 8 per cent. per annum is realized by the investor. We are informed that he is doing a careful and rapidly increasing business, which accrues to the benefit of his clients as well as himself.
