The reduction in the rate will reduce the income of hundreds of Tory annuitants and pensioners in every English shire. The interest of the thrifty patrons of the Post Office savings banks will also be reduced. It is not likely that those persons will be as enthusiastic supporters of the existing Government as they have been.

Metropolitan National Bank of Cincinnati, O.—The stockholders of this institution, on the 18th of March, had a meeting with a view to having the Receiver in charge of its assets discharged, and having the Comptroller of the Currency permit the stockholders to resume control of the bank. A majority of the stock was represented. It was stated that there would be enough realized from the assets of the bank to pay all of its indebtedness and leave a good surplus. A resolution was passed requesting the Comptroller to permit the stockholders to take possession of the assets after the indebtedness of the bank had been provided for. Inasmuch as the law provides specifically that the surplus assets remaining after the debts of an insolvent National bank have been paid shall belong to the stockholders, and also provides how the transfer to them shall be made, this action on the part of the shareholders of the Metropolitan National seems somewhat superfluous. The law of June 30, 1876, provides that after all the debts of an insolvent National bank are paid by the Comptroller and Receiver, the stockholders may elect an agent to whom all the assets remaining in the Receiver's hands may be turned over. To undertake to forestall this process of law is beyond the power of the stockholders or the Comptroller.

Boston Bankers' Association.—The third annual dinner of the Bank Officers' Association of Boston took place on April 18th, at the United States Hotel in that city. President F. B. Sears was at the head of the table, and the guests were Rev. Phillips Brooks, D. D.; A. R. Turner, City Treasurer; Hon. A. W. Beard, Treasurer of the Commonwealth, and Rev. E. A. Horton. The last-named gentleman was the first after-dinner speaker. He began in humorous style. Continuing in a more serious vein, he considered briefly the proper use and value of money. Concluding, he quoted a saying of Dr. Brooks, "Whenever I think of my church I think of my country." "This is a sentiment," said the speaker, "which must vibrate in every heart. In whatever walk of life we may be, we are working for a common end. Let us work faithfully and ever be grateful that we live in this our beloved Republic."

The President extended to the members of the Association the greetings of H. W. Pickering, President of the Old Boston National Bank, and then presented Hon. Alanson W. Beard, State Treasurer, who was warmly received. Mr. Beard said that he found himself, after all, at a meeting of a labor association, and one that was co-operative and benevolent in its character. If he were a member of the association, he thought he should like to feel that he had done a benevolent act toward the family of an associate when he paid his assessment rather than that he was paying a graduated life insurance on himself. As representing the State, he was glad, he said, that the late unpleasantness between the National banks and the tax collectors was settled. Then he turned to State finances. The State debt and sinking fund were now less by \$3,000,000 than they were last year, he said, and next year there would be a reduction of about a similar amount. In 1900 the sinking fund would be probably sufficient to meet the debts of the State. He hoped that the influence of the association would be to prevent the State from making further debts that would require another sinking fund. Mr. Beard continued by speaking of the democratic character of this assembly, with employes and capitalists who were themselves employes at the same table, and then he spoke of the question of the currency as requiring earnest thought from men connected with the financial world.

City Treasurer Turner said that in his official capacity he had deposits in forty-two of the fifty-nine National banks in the city, and he referred at length to the growth of the National bank system and to the great growth in wealth of the municipality.

President Sears spoke of the absence of Postmaster Corse, on account of sickness, and then presented Arthur F. Luke, Cashier of the Bank of North America. Mr. Luke, an ex-President of the association, spoke of one of the greatest advantages of this association as being the opportunity afforded for enlarging one's acquaintance and cementing older friendships.

Secretary E. A. Stone reported progress, and the exercises closed with the singing of a song to the tune of "Auld Lang Syne," written for the occasion by E. O. Church, of the Boylston National Bank.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- Rapid City, Manitoba, wants a bank.
- Dakota has 299 banking institutions.
- Tulare, Cal., is soon to have a National bank.
- A new bank is being organized in Terre Haute, Ind.
- C. S. Brooks is Cashier of Rideout & Smith, Marysville, Cal.
- The book, which is the greatest help to a business man, is his bank-book.
- Joseph A. Hyde is doing a banking business at Phillipsburg, Montana.
- The North Texas National Bank, at Dallas, is erecting a building to cost \$75,000.
- The total capital of the Duluth (Minn.) banks is \$1,650,000—\$200,000 more than on January 1, 1888.
- The average deposit of each investor in the savings banks of this country is said to be \$360.
- A movement is on foot in Brooklyn, N. Y., to start a new bank in Fulton street, near De Kalb avenue.
- The smallest money order perhaps ever issued was by the St. Charles (Mo.) Post Office, and is for two cents.
- The Willimantic Savings Institute, of Willimantic, Conn., will, it is claimed, be able to pay its depositors in full.
- It is reported that C. A. Vallee, Cashier of the Montreal branch of La Banque Nationale, is to be succeeded by M. Brunet.
- The Bank of Glenoee, Minn., reports at close of the last fiscal year \$8,000 profits in addition to surplus, and \$185,000 deposits.
- A pound of the ordinary bronze pennies of the United States is worth \$1.42. A pound of nickel 5-cent pieces is worth \$4.55½.
- Two leading capitalists, in conjunction with the citizens, are organizing a National bank with \$50,000 capital in Cuthbert, Ga.
- The Bay State Trust Company, of Boston, Mass., has opened a Safety Deposit Company on the Back Bay, at No. 87 Boylston street.
- The Trenholm codification of the National banking laws has been reported to the House by the Committee on Banking and Currency.
- Messrs. Henry Clews & Co. have for the seventh time had a favorable decision in their certified check case against the Bank of New York.
- The Massachusetts House of Representatives has rejected the bill to increase the salary of the Savings Bank Commissioners of that State.
- Mortgages on farms in ten Western States aggregate \$3,422,000,000, of which \$701,000,000 are on Ohio farms, and \$360,000,000 on Michigan farms.
- The banking house of Parker & Allen, of Gilman, Ill., was burglarized on March 12th. The safe was blown open and \$1,000 obtained by the burglars.
- A new bank is being organized at Gloucester City, N. J. It will occupy the old Savings Bank building, and be ready for business about June 1st.
- Myron B. Wright, Cashier of the First National Bank of Susquehanna, has been nominated for Congress from the Fifteenth District of Pennsylvania.
- The Land Title & Trust Company of Philadelphia, Pa., have moved into a new building recently erected by the company at 608 and 610 Chestnut street.
- The fourth annual Convention of the Dakota Bankers' Association will be held at Redfield, May 23d and 24th. An unusually interesting session is expected.
- Good financiers are quietly talking up a new bank in Louisville, Ky., with \$1,000,000 capital, to be devoted, principally, to strengthening the tobacco interest.
- A certain bank wrote, not long since, to the office of the Comptroller of the Currency, asking whether a boy could legally serve as Director of a National bank!
- On the first day of May the Mexican Government will assume charge of all mints in that country, and hereafter coin all the money put into circulation. Heretofore the

mints have been in the hands of private individuals or corporations, to which the Government guaranteed the entire bullion product of the country.

— A new State institution, styled The Franklin Bank, \$250,000 capital, is being organized in New York city. It will be located on the corner of Franklin and Hudson streets.

— The Bank Clerks' Mutual Benefit Association of New York city has received a bequest of \$10,000, by the will of the late Joshua Jones, who was a Director of the Chemical National Bank.

— It was recently announced that the Express lines of the Erie system had been purchased by Wells, Fargo & Co.'s Express. The latter had the option, but finally concluded not to purchase.

— The Pasadena National Bank, Pasadena, Cal., has recently increased its capital from \$50,000 to \$100,000, fully paid up, making it one of the strongest financial institutions in Southern California.

— In an address at the opening of a railroad in England, the Earl of Derby predicted that the next generation would see a railroad from Paris to Peking. The speech was given in the JOURNAL for March.

— The claim is made that Chauncey Winobell, President of the Rockville National Bank, Rockville, Conn., is the oldest bank President in the Nutmeg State, and perhaps in the country. He is in his ninety-third year.

— Eighty-two National banks were designated as United States depositories from October 7, 1887, to February 7, 1888. They deposited \$16,795,000 in United States bonds of which \$2,755,000 were withdrawn as security for circulation.

— The new Argentine Bank, at Argentine, Kan., does a general banking business, and also has ample facilities for the safe custody of valuable papers. G. A. Taylor, formerly Assistant Cashier of the Armourdale Bank, is Cashier.

— The permanent fund for the relief of aged and disabled officers and clerks of banks was established, largely through the efforts of Mr. J. C. Parsons, Paying Teller of the Chemical National Bank. In 1887 the fund amounted to \$102,586.

— The Comptroller of the Currency declared on April 9th a second dividend of 15 per cent. in favor of the creditors of the Fifth National Bank of St. Louis, Mo., making in all 65 per cent. on claims amounting to \$937,562. The bank failed November 7, 1887.

— Of the sixty-six savings banks of New Hampshire, twenty-two of them paid last year five per cent., which is the largest ordinary dividend allowed by law, thirty-five paid four per cent., one paid three and one-half per cent., one paid three, and one paid two.

— Johnston, Buck & Co., of Ebensburg, Pa., have opened a branch at Carrolltown, which will be under the management of Mr. Thomas A. Sharbaugh. A fine bank building will be erected and first-class banking facilities furnished to this long-suffering community.

— The Comptroller of the Currency has declared a second dividend of 25 per cent. in favor of the creditors of the Stafford National Bank, of Stafford Springs, Conn., making in all 75 cent. on claims proved amounting to \$247,436. The bank failed October 12, 1887.

— The Commercial National Bank of Dubuque, Iowa, suspended on March 21st. The cause of the suspension was the protest of the paper of the Church-Graves Manufacturing Company, of Minneapolis, Minn., with which R. E. Graves, President of the bank, was connected.

— The report of the condition of the National banks in the United States of the 14th of February, made to the Comptroller of the Currency, shows an increase in the amount of lawful money held of \$22,069,610, \$14,560,971 being gold and \$7,468,639 greenbacks. Individual deposits increased \$16,199,903.

— On February 15th, the shareholders of the Bank of British Columbia held a meeting. The net profits of the half year were \$155,925, exceeding those of any previous half year. A dividend at the rate of six per cent. per annum was declared and a bonus of 2¼ per cent., making 8¼ per cent. for the year.

— The Treasury officials decided to procure an opinion from the Attorney General of the United States before enforcing payment of the tax alleged to be due from banks handling Canadian bank currency. If this opinion is unfavorable to the banks, a bill will probably be passed by Congress relieving the banks involved from the payment of the tax.

— At a dinner at the Mansion House, London, three foreign consuls were present whom the Lord Mayor wished to honor by drinking their healths. He accordingly directed the toast-master to announce the healths of "the three present consuls." He, however, mistaking the words, gave out the following: "The Lord Mayor drinks the healths of the Three per cent. Consols!"

— When the propensity of the "shinplaster" to wear out or get lost is considered, it must be conceded that this is a decidedly costly form of currency. It is neither so convenient nor so satisfactory for the average person as is the subsidiary silver. If this were the only objection, it ought to be sufficient to defeat the scheme for the issue of the fractional notes which is now before Congress.

— California wine-growers are, it is said, projecting a bank, the principal feature of which will be advances on wines. A cellar is to be connected with the bank, where any wine maker may store his product and obtain a loan of ten cents per gallon, and at the same time be enabled to look after the liquid until the maturing process affords him the opportunity of a favorable market.

— A movement has been started looking toward the organization of a State German bank in Lincoln, Neb. The officers and Directors are to be Germans, and the bank is to be conducted with special reference to the convenience of the people of that nationality. The capital stock is to be \$100,000, half of which will be taken by Illinois parties. The bank will probably be organized within thirty days.

— The Attorney General of South Carolina, in an opinion given in response to the question whether shares of the National Banks of Charleston, S. C., should be taxed at their full value, has replied that the shares of the banks should be taxed at their full market value, whether the resources of the bank are invested in non-taxable United States bonds or not. This is in accordance with the previous rulings of the Supreme Court of the United States.

— A depositor in a Texas bank received his passbook balanced with the vouchers. "They seem all O. K.," he thought, as he put them into his cash box. Several months thereafter he discovered that some of the checks which had been cashed by the bank were forgeries. He whisked around there in double quickstep time and demanded the money paid on the checks. Not getting it, he brought suit. The Court said in substance: "Had you come earlier you might have had a show, but it is too late now. The bank no longer has the means of recovering the money."

German Mints and Coins.—The present mints in Germany, as indicated alphabetically, are the following, viz.: Berlin (A), Hanover (B), Frankfort-on-Main (C), Munich (D), Dresden (E), Stuttgart (F), Karlsruhe (G), Darmstadt (H), and Hamburg (J). A mark being equal to 0.1996 pound of fine gold, 189 $\frac{1}{4}$ 10-mark gold pieces make one pound; the proportion of the alloy is one part copper to nine parts gold. Out of one pound silver 100 1-mark, or 200 50-pfennig, or 500 20-pfennig pieces are struck. All former coins, of which, as late as 1866, no less than 92 denominations were current, have been withdrawn from circulation, with the exception of between 400,000,000 to 500,000,000 marks in thaler pieces (equal to 3 marks each). In October, 1886, the circulation of imperial coins consisted of gold, 1,967,399,655 marks; silver, 448,896,636 marks; nickel, 36,159,778 marks, and copper, 9,839,629 marks.

The Monon Route has just put on an additional fast train to accommodate the large passenger traffic between Chicago and Indianapolis. The train, composed of Pullman Buffet Sleepers, leaves Chicago daily at 11:40 P.M., reaching Indianapolis at 7:30 A.M., and Cincinnati at 3:20 P.M. Passengers may occupy their berths at 9:00 P.M. to Indianapolis. This makes three trains each way between the above cities, and two each way between Chicago and Louisville. The Monon Route Pullman Buffet Sleeper and Chair Car system is of the very highest order. For proof, correspond with E. O. McCORMICK, General Passenger Agent, Chicago.

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

NATIONAL BANKING—MR. JORALMON'S PLAN.

Editor Rhodes' Journal of Banking:

SIR:—The plan suggested in the April issue of the JOURNAL by your correspondent, Mr. H. M. Joralmon, seems to me to be open to some serious objections. The entire system, as I understand Mr. Joralmon, is to be under a Board of Control, to be appointed "as the Supreme Judges now are," *i. e.*, by the President, by and with the advice and consent of the Senate. That this Board of Control would, under the present Administration, be entirely Democratic goes without saying, and just the reverse as to any member hereafter appointed by a Republican President. That is to say, "politics" would inhere in the system from the beginning. Politics could not be kept out of it, and would in the end be the ruin of it. The Justices of the Supreme Court are appointed for life; it is probably meant to give the members of the Board of Control a more limited tenure, say, six years—two going out every other year.

The members of this Board of Control are to be "capable men." None but the best financial minds in the country are "capable" to fill such a position, and such men are getting from ten to twenty thousand dollars a year as bank Presidents and Presidents of the great corporations; some are getting even more. The Government would not be willing to pay so much, and "capable" men are not to be had for less.

The enormous power which the Board could exercise would seem to be a fatal objection. Practically it could make or break any bank at pleasure, and in any town or city could make the banking business a virtual monopoly. Apart from its power over the banks themselves, this Board would have almost absolute control over the amount of currency in circulation—could inflate or contract the same at pleasure. Indeed, under such a system, free banking, which is the chief distinction of the National system, would be at an end. Well may it be said that the plan proposed would "necessitate an entire remodelling of the present law." It would not be so much the remodelling of a present law as the substitution of an entirely new and different law. That an ability to increase the circulating medium in time of great strugency would be a great gain to the commercial world and to the whole country cannot be denied, but it can scarcely be thought that to place every bank in the country under the despotic power of a Board of Control would be a very good way to get at it.

I say *every* bank, for the Board would soon manage things so that every bank would either have to come into the Association or go out of business. Though, to be sure, the liability of the stockholders for double the amount of their stock would somewhat dampen the first outburst of enthusiasm. While a National Clearing-House for the settlement of country checks would be a most desirable institution, I cannot see how it would grow out of the proposed any more than out of the present system. These are objections that appear at first sight; perhaps further consideration might tend to modify them.

NATIONAL SYSTEM.

BALTIMORE, April 25, 1888.

FRACTIONAL CURRENCY.

Editor Rhodes' Journal of Banking:

SIR:—In an article on the re-issue of fractional currency in the March JOURNAL, page 225, the writer says: "There is a large number of enterprises that depend for their success on small contributions from all parts of the country. This would be much encouraged by the revival of fractional notes." That is exactly the point of the whole discussion. The re-issue of fractional notes would be a very great encouragement to the commerce of the country. It would act as a distinct aid to the intercourse of business, and would not only be a convenience, but would also go very far toward encouraging a large number of most useful and most necessary enterprises. Let us consider what some of these enterprises are. The sale of books, periodicals and

stationery is largely carried on by direct communication between the publishers and buyers. Literary people, as a rule, do not keep bank accounts, and many of them are quite remote from convenient banking centers, even if they had sufficient surplus funds to open an account with an institution of that character. Remittances frequently have to be made in small sums by mail, and very often remittances would be made in this way were it not so extremely inconvenient under the present system to make them at all. The new-fangled postal notes are not only inconvenient, but are really a nuisance to everybody who has to handle them, while the postal money orders are restricted to the offices issuing them. A very large business is carried on in the sale of flowers and seeds. This business would not only be encouraged, but largely increased, if proper facilities were offered to the consumers for remitting small amounts by mail. Numerous small novelties and notions, which are continually advertised, would be more largely bought but for the inconvenience in transmitting fractional silver. Especially would the issue of fractional currency be convenient to persons who live in the rural districts, and more especially to those who live on the Western ranches and in other sparsely settled sections. To persons such as these, the issue of fractional currency would be a great convenience, and the wonder is that they have consented to forego that convenience for such a length of time. In answer to the objection that the fractional currency would become extremely soiled, there is no reason to suppose that this would be the case with fractional currency any more than National bank notes. With similar provisions for redemption, the fractionals could be kept in as good a condition as National bank notes. If it should be thought unwise to inflate the currency (whatever that may mean), why could not silver certificates be issued for quarters and halves as well as for sums of even dollars. In this way the fractional currency could be supplied and the amount of currency in the country could be saved from that inflation which seems to be the bugbear of theoretical financiers. In other words, if the people want the fractional currency, and it will tend to develop the internal commerce of the country, by all means let us have it.

PHILADELPHIA, April 30, 1888.

FRACTIONAL.

THE NATIONAL BANKING SYSTEM EXTENSION SCHEME.

Editor Rhodes' Journal of Banking:

SIR:—The scheme proposed for an extension of the National Banking System by Mr. C. W. Yost, and approved by Mr. J. L. Waring, Danville, Va., in the March issue of the JOURNAL, seems to me rather too extensive to be carried into practical operation, unless, as Messrs. Latham, Alexander & Co. express it, "one had the wealth of a Vanderbilt." The object aimed at, however, might be reached in a more practicable way, if there were some means of ascertaining where the bulk of the idle money is at any given time of the year. The requirements for active money vary so much in different parts of the country, and with the different seasons, that there is hardly any time that money is not wanted in one section, and at the same time is hard to lend out in other sections of the country. The difficulty seems to be in obtaining accurate information as to the exact condition of the amount of loanable funds at any special time. There can be no doubt that the publication of statements by the National banks in New York is a great assistance, not only to the commerce of that city, but also to the banking operations all over the United States. If the banks in all the larger cities could be induced to adopt a similar system of publishing their aggregate resources and liabilities, the compilation of these returns appearing in the press, would be of vast assistance both to lenders and borrowers, the former perceiving where funds are most wanted, the latter where they can be most readily obtained. Other advantages would attend the general publication of banking statistics, but they are not pertinent to the subject under discussion.

CHARLESTON, April 20, 1888.

GUARANTY.

LIABILITIES OF SHAREHOLDERS IN NATIONAL BANKS.

Editor Rhodes' Journal of Banking:

SIR:—It has come to be so generally understood that stockholders in National banks are liable in case of the failure of the bank to make good their stock to the amount of its par value that it seems to have been lost sight of that there are occasions when stockholders do not respond to the requests of the Comptroller of the Currency

to make good their liability. It was long ago settled that in assessing shareholders for liability the assessment must be made upon the shareholders "equally and ratably, and not one for the other;" that is to say, that the Comptroller could not make an allowance for such shareholders as may be insolvent, and compel the solvent shareholders to make up the deficiency by increased assessment upon their own stock. Now, it sometimes happens that in the case of a failed National Bank the greater portion of the stock, or at any rate a large portion of it, is held by the defaulting officers themselves, and they, having plundered the bank, are not likely to make up the deficiency out of their own resources. Consequently, while the theory of the law remains, that after the original capital is exhausted a fresh capital will be supplied to make good any further loss, yet in actual practice, even where 100 per cent. is assessed upon the shareholders, the new capital falls considerably short of the expected amount. This point has not been alluded to heretofore in discussions of the subject, nor do I recollect having seen a statement in the reports of the Comptroller of the Currency as to what proportion of the actual assessment of the stockholders is finally collected by the Receiver.

LIABILITY.

CHICAGO, April 16, 1888.

COMPETENCY OF BANK EXAMINERS.

Editor Rhodes' Journal of Banking:

SIR:—The somewhat unusual number of National bank failures during the past eighteen months has called forth a corresponding amount of censure upon the Comptroller of the Currency and his assistants, the National Bank Examiners. Without discussing anew the point that it is not the duty of a Bank Examiner to act as a private detective, and that it is not competent for the stockholders to place upon the Comptroller of the Currency the performance of the plain duties which belong to the Directors, their own chosen agents, it may not be out of place to submit a few remarks in regard to the general competency of the National Bank Examiners and their fitness for the peculiar and difficult duties which they are called upon to discharge. It is not a very difficult task to make an ideal sketch of the Examiner as he ought to be just as it is easy to sketch out the ideal of a President, Cashier and so on; but, as is not seldom the case, the reality differs from and falls far short of the ideal, and perhaps, if some of those writers who are so given to stating what a National Bank Examiner ought to be, and what he ought to do, would essay the task themselves for six months or a year upon an Examiner's salary, they might, perhaps, take a more charitable view of the duties of those officials and the manner in which they perform them. As a matter of fact, many of the Examiners are extremely competent and skillful men, thoroughly fitted for the discharge of the duties of their position; but the main difficulty lies not in securing competent men, but in retaining their services after they have been secured. A man competent to be a good Bank Examiner will, in the course of two or three years' practice, become equally competent to become a good bank President or Cashier, or to fill some equally responsible and lucrative position in a large corporation. The technical skill which is acquired in the course of a few years' practice in examining banks is, of itself, highly valuable, but much more valuable is the extended and practical knowledge of methods of bank management which comes from the close practical examination of so many different institutions. When one can see for one's self the methods of management pursued by each one of a large number of banks, and can likewise see what banks are prosperous and what are not, there is afforded material for very extended knowledge of the proper conduct of banking affairs, and one can perceive very clearly what are the general causes of success or failure. In addition to this technical skill and general knowledge of the banking business, there is also acquired a very valuable and special knowledge of the business of banking as conducted in the special section under the Examiner's charge. One becomes acquainted not only with the management of the banks themselves, but also, to a great extent, with the operations of capitalists in that section of the country; and especially is there acquired a very large and valuable stock of information in regard to the promissory notes which are usually put upon the market. In the course of the performance of his duties an Examiner sees many things which are not known to the outside world, and he of all men must illustrate by his conduct the homely adage that a still tongue marks a wise head. Upon these considerations it would seem that the position of a National Bank Examiner is really extremely valuable as a training school

for a bank Presidency—a position which is to be preferred to that of an Examiner, not only on account of its permanency, but also on account of the large remuneration attached to it; for in these degenerate days most men go upon the principle that the pay is to be considered of equal importance as the work; that is to say, pay first, work second. Indeed, when one considers the ability which is absolutely necessary to make an intelligent examination of the banks in the larger cities, one is constrained to admit that a man competent to do work of that sort could, most likely, earn a much better living as an expert accountant, and therefore the Comptroller of the Currency justly complains that the salary at present given to the National Bank Examiners is not always sufficient to retain the best men in the service. It would seem to be a happy solution of the difficulty if the banks and the people generally would come to understand that the business of the Bank Examiner is simply to ascertain whether the provisions of the law are complied with, and not to detect defalcations, and that the duties of the Comptroller of the Currency are confined within the same limit, and it is not his affair whether the Directors in a bank are stupid, wise or otherwise. If the stockholders wish to ascertain at any time whether the business of the bank is properly conducted and whether the institution is in a healthy condition, let them employ an expert examiner to make such an examination of the affairs of the bank as will reveal its true condition. An accountant from another city, and therefore perfectly independent of local bias, ought to be able to make such an examination of the institution as would necessarily detect any existing frauds or irregularities, and certainly it would be better for stockholders and Directors to adopt such a plan as this on their own responsibility rather than to constantly depend upon the arm of the Government, and to cry out when they have allowed themselves to be imposed upon by dishonest or reckless officials.

FAIR PLAY.

BUFFALO, April 18, 1888.

The Panama Canal Lottery Loan.—The report of the Committee of the French Chamber of Deputies which considered the Panama Lottery Loan proposal, recommends that permission be immediately given to the company to issue the loans, and expresses confidence in the early completion of the canal.

Thomas J. Ross, one of the most prominent bankers in the State of Kansas, established the Greensburg Bank at Greensburg, Kan., in 1865. In 1866 he incorporated it as a State bank under the laws of Kansas. In February, 1867, he obtained a charter for a National bank, and opened the First National Bank of Greensburg for business on April 14th of that year. This bank was eminently successful, but as the National Bank Act prohibits the taking of real estate security, Mr. Ross, in order to accommodate many of his customers, changed the institution to the private banking firm of Ross & Emmert.

National Bank Cashiers.—The Supreme Court of Pennsylvania has decided that the Act of the Pennsylvania Legislature prohibiting bank Cashiers from engaging in business does not affect Cashiers of National banks. The case in question was as follows: Thomas H. Carter was Cashier of the First National Bank of Tamaqua, and was also engaged in the foundry business. The firm of which he was a member dissolved, and he applied for an injunction to restrain the other partners from interfering with him in the collection and distribution of the firm's assets. His application was resisted on the ground that the Court would not aid him in doing what the law prohibited his doing. The County Court held that the Act applied only to Cashiers of State banks, and in affirming this judgment Judge Paxson says: "The National banks are the creatures of another sovereignty. The National Banking Act and its supplements create a complete system for the government of those institutions. Conceding the power of Congress to create this system, I am unable to see how it can be regulated or interfered with by State legislation. The Act of 1860, if applied to National banks, imposes a disqualification upon Cashiers of such institutions where none is imposed by Acts of Congress. If the State may impose one qualification, why not another? If upon the Cashier, why not upon the President or other officers? If we could apply to National banks any Act which the Legislature should pass, such institutions would have a precarious existence, they would be liable to be interfered with at every step, and it might not be long before the whole National Banking system would have to be thrown away as so much worthless lumber."

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

THE KIND OF MONEY A NATION WILL USE.

[David A. Wells, in *Popular Science Monthly*.]

One needs but to stand for a brief time at the marts of trade in countries of varied degrees of civilization to quickly recognize and understand that the kind of money a country will have and use depends upon and will vary with the extent and variety of its productions, the price of its labor, and the rapidity and magnitude of its exchanges; and investigations will further inform him that when mankind, savage, semi-civilized, civilized or enlightened, find out by experimentation what metal or other instrumentality is best adapted to their wants as a medium of exchange, that metal or instrumentality they will employ, and that statute law can do little more than recognize and confirm the fact. In truth, legislation in respect to money, as is the case in respect to other things, never originates any new idea, "but merely enacts that which has been found beneficial or prejudicial in many cases, shall be used, limited or prohibited in all similar occasions within its jurisdiction." Thus, in all countries where prices are low, wages small, transactions limited, and exchanges sluggish, nothing more valuable can be used as money for effecting the great bulk of the exchanges than copper; and in countries like Mexico and China even the copper coin corresponding to the American "cent," the English "half-penny," and the French "sou," is often so disproportionate in point of value to the wants of retail trade that in the former country it is made more useful by being halved and quartered, and in the latter is replaced with some even cheaper metal, as iron or spelter. The wages in all such countries do not in general exceed twenty to twenty-five cents per day, and the sum of such wages, when represented in money, must be capable of division into as many parts in order to be exchanged for the many daily necessities of an individual or a family. But with wages at twenty-five cents per day, the use of coined gold would be obviously impracticable. The equivalent of a day's labor in gold would be too small to be conveniently handled; the equivalent of an hour's labor would be smaller than a pin's head. And in a lesser degree would be the inconvenience of using coined silver for effecting the division of similar small wages.

BRANCH BANKS.

(*Philadelphia Financial Critic*.)

Banks with branches in various cities and towns are no new feature in American banking. Under the old State Bank system, in vogue before the National Bank Act, it was quite common in many States for banks to have branches in all the prominent cities and towns of the State, but each had a local Board of Directors and officers acting under the general Board and officials of the parent bank, which held a controlling interest in the branch institution. To all practical purposes, a depositor or borrower at each branch had all the facilities, advantages and security of an independent bank. As a depositor, he had the assurance of knowing his money was under the control of business men and neighbors in whom he had confidence; the officers were his friends and acquaintances; as a borrower, he knew his application would be passed upon by those who were familiar with his necessities, as well as his responsibilities: in fact, the branch, so far as the relationship of depositor and borrower were concerned, differed in no respect from any other bank, except in the matter of security, the parent bank being responsible for the liabilities of the respective branches.

The attempt to establish branch banks upon any other system is false in principle. The capital of a bank must of necessity consist of confidence as well as cash paid in on capital stock; confidence in the individual clerk who may have charge of a branch is not sufficient, he is without authority, has no discretion, and is merely the tool of those who place him in charge. Confidence can only be secured by a distribution of the capital stock among the community where the branch is located and their representation in a Board of Directors for the control and management of the moneys

belonging to that particular branch. Banks are established in various localities for the convenience of the people residing there. Would a manufacturer or tradesman doing business in Philadelphia think of transacting his banking business at the Philadelphia branch of the Workingman's Bank of Georgetown, knowing that Georgetownians controlled the moneys deposited and that all applications for discount had to be forwarded there to be acted upon? No, a bank to be a success must be a local institution, managed and controlled by men of known responsibility in the particular locality, and who are thoroughly acquainted with the wants and necessities of the people who patronize the institution.

BANK RUNNERS IN PARIS.

[Paris Correspondence *New Orleans Picayune*.]

Certain employes of the Bank of France wear a gray livery that is well known in every part of the city. I refer to those who are intrusted with the work of presenting and collecting notes and checks. They carry a leather wallet, fastened to the body by a stout steel chain, that is pretty sure to be filled often with a very large sum of specie, and occasionally they are called on to defend this wallet at the risk of their lives, as was the case of a "habit gris" who was attacked and stabbed in the neck the other day in a house of rue Tiquetonne where he had gone to collect a note, or draft, or something of that sort. Some days in the month these "garçons de recettes" have to be more than usually active, as, for instance, on the 1st and 15th, when there is always a deal of paper falling due; and besides these there are four or six other "jours d'écheance." It is not at all unusual for a runner to have 150 such notes to present in a single day, and, as in most cases he has to go up several flights of stairs to do this, he has plenty of hard work by 8 o'clock, at which hour he must be back at the bank to receive those whom not finding at home he has notified by means of a slip that he holds a note for collection which must be paid that day or it will go to protest. At the bank each "garçon de recette" has an office, a sort of an iron cage just large enough to hold him and an assistant. These "bureaux" are in a large room called the galerie, and to which no one is admitted who cannot show a "fiche," as the slips are called. Each "habit gris" has a district of the city assigned to him, and unless there be some special reason he never changes it. The salary he receives is small, and, although he gives no security, it is a rule with the bank not to appoint any one to the position who is not able to show that he possesses some private means of his own. He is held responsible for all mistakes made, and if his cash does not balance at the end of the day, he must make the deficiency good. If unable to do this himself, there is a fund or deposit at the bank formed by contributions made by all the collectors on which he can draw; and it is but due to the corporation to add that such a thing as the bank losing anything through the dishonest act of one of these habits is as yet unknown in the history of the institution.

BANK NOTE LITERATURE.

[*St. James' Gazette*, London, England.]

The practice of scribbling moral reflections, often from an immoral point of view, on the backs of bank notes seems to be dying out. Certainly, the bank note rhymester is less in evidence on English paper money than he used to be; because bank notes circulate more than formerly, or perhaps because they are nowadays renewed at such short intervals. The Scotch bank note, being of smaller value and circulating for a longer time, passes through the hands of more needy persons, and soon becomes so grimy that the term "filthy lucre" applied to it has an added significance.

In Lockhart's "Life of Scott" there is a reference to bank note literature. Lady Louisa Scott had sent to the novelist an original verse that was found on the back of a bank note by Lady Douglas. It is chiefly notable as a rare instance of the bank note rhymester's parting with his money in a Christian spirit. "Go, poor devil, get thee gone!" is the kind of parting salutation most in favor; but the note that fell into Lady Douglas's hands said:

Farewell, my note, and wheresoe'er ye wend
Shun gaudy scenes, and be the poor man's friend.
You've left a poor one, go to one as poor,
And drive despair and hunger from his door.

These lines recalled to Scott's recollection the murder of Begbie, a bank reporter, because it was thought the notes stolen at that time might be traced through an "idle

young fellow," to quote Scott's reply to Lady Louisa Scott, "having written part of a playhouse song on one of them." Many of them were discovered, but accidentally, and this one was among the number. In fiction, of course detectives have followed up the same clue more successfully.

Though the backs of some bank notes are more interesting than a book, and even rise to the dignity of tragedy, there are certain stereotyped phrases which recur so frequently on them that they are familiar to everybody. Such are: "Here to-day and gone to-morrow," "The best of friends must part," and a very common adaptation of a well-known couplet:

It comes as a boon and a blessing to men,
Like the Pickwick, the Owl and the Waverley Pen.

As a tag, suggested by this, has been noticed:

They come as a boon—this is perfectly true;
But all that come here are damnably few.

A business gentleman in Edinburgh, through whose hands a large number of Scotch notes pass, took a copy of the following:

O Lord of Love, send from above
A sword with two sharp edges,
To cut the throats of wicked men
Who grudge poor clerks their wages.

Beneath that was inscribed, in another hand:

Why call on God for such a blade,
Because your wage is small,
Or why assume your pay is grudged
Without en proof at all!
Rather give thanks with fervent heart
Unto the Lord of heaven
Who weekly sends this one-pound note
When much less might be given!

It would be interesting to know whether he was himself a "poor clerk" who wrote these additional lines, or only an employer of clerks. The following also passed through the same gentleman's hands on one-pound notes:

Ye ugly, dirty little scrap,
To look at hardly worth a rap,
An' yet I'll gie my hearty vote
Nane can produce a sweeter note.

With this may be compared:

It's odd that any man should wish
A dirty scabbit rag like this;
Yet mony a one would cut a caper
To get a wheen sic bits o' paper.

What seems most to strike the bank-note scribe is the transitoriness of all human pleasures. I have seen a note from Burns' "Pleasures Are Like Poppies Spread" adapted in this way:

Pound notes are like poppies spread,
You get them changed, and, lo, they've fled;
Or, like the flies upon the river,
One moment there, then gone for-*ver*.

"The trail of the serpent is over them all," says another melancholy moralist; but an optimist wisely adds:

'Tis better to have had and lost
Than never to have had at all!

The last couplet is another of the common-places on bank notes. This is better though less generous:

The Devil hath power
To assume a pleasing shape.

And better still is:

They are the abstracts and brief chronicles of the time,
Perdition catch my soul,
But I do love thee.

has been met with, and also, "This is the very ecstasy of love." "Not of an age but for all times" does not, it may be feared, mean that the writer is to put his bank note out to usury.

Perhaps the most interesting bank notes are those whose inscriptions are autobiographical. "After keeping this for ten years," said one that I was told of lately, "it is gone at last. Such is life." "This is the first £5 I ever earned," appeared in a handwriting that was not boyish. "To pay the rent" is brief but sufficient. So, perhaps, is the Scotch: "I will be married to-morrow; God help me!—J. D." The most dismal story I ever heard of being read on a bank note, however, was: "The last of a large fortune spent on drink."

An historical interest attaches to the inscription, "When shall we three meet

again?" which used to be common on bank notes. Who the third of the trio referred to was has puzzled some people; but no doubt it was Abraham Newland. Newland was Cashier to the Bank of England ninety years ago, and in that capacity signed the notes of the bank. He was much talked of and written of on that account in his own day, which is another proof that people had then more respect for bank notes than they have now, or, at least, more time to scrutinize them. How many persons could tell off-hand who signs the Bank of England notes of to-day? Newland was quite a famous character, and is immortalized in verse in "The Whim of the Day," published in 1800. He was "Invincible Abraham Newland," and there were

No arguments found in the world half so sound
As the logic of Abraham Newland.

The logic so well spoken of was, of course, the bank note, specifically referred to in these lines:

There ne'er was a name so handed by Fame
Through air, through ocean, or through land,
As the name that is wrote upon every bank note
And you all must know Abraham Newland.
O Abraham Newland! Notified Abraham Newland!
I have heard people say, sham Abraham you may,
But you mustn't sham Abraham Newland.

To "sham Abraham" was to pretend to be needy and debilitated when one was able to work, and shamming Abraham is still in vogue. Abraham Newland's name disappeared from the notes in 1807.

Abraham Newland's connection with the Bank of England and its general notoriety have been immortalized by Marryat in his "Japhet in Search of a Father." The little foundling was named Newland in consequence of a fifty-pound Bank of England note being hung up with him in the basket, and many dialogues through the course of the narrative show that Abraham Newland's signature was then popularly regarded as the outward and visible sign of the Bank of England.

Irish Savings Banks.—The statistics of deposits in Irish savings banks, given in the Registrar-General's recent report, prove the truth of the statement that, speaking generally, Irish poverty is a myth. Ever since 1881 the deposits have been increasing continuously, the total increase amounting to nearly a million and a quarter sterling. The precise figures are, on December 31, 1881, £3,765,000, and on December 31, 1887, £4,975,000. The money in these banks represents small savings, and comes almost entirely from the agricultural population, which, be it observed, has diminished during the period. The startling statement may therefore be made with confidence that the tenant farmers of Ireland, as a class, are considerably richer than they were six years ago, and it may be asserted with equal confidence that the same could not be said of any other class of the community in the United Kingdom.

What They Think of the "Journal."

L. Keller, President Bank of Winamac, Ind., writes as follows: "Enclosed find draft to pay for JOURNAL for 1888. Thought we would try and do without it, but *guess we cannot.*"

John D. Haskell, President Park Bank of Stromsburg, Neb., writes: "Enclosed find draft for subscription. This is a very satisfactory investment, and your JOURNAL is a welcome arrival."

Scott County Bank, Scott, Kan.—"I have been a reader of the JOURNAL for several years, and have gained much valuable information from it. It pays for itself many times over during the year." **G. A. DUNHAM**, *Asst. Cashier*.

C. B. Wismer, Cashier of the Bank of Lisbon, Dak., in renewing subscription for 1888, writes: "I am very much attached to your JOURNAL, and find in it things that help me almost every day. I consider it *the best book* of the kind that comes to our office."

Wm. H. Moore, Cashier Citizens' Savings Bank, Owensboro', Ky., in renewing subscription, writes: "Send me the JOURNAL all the time. I look forward to its arrival with great pleasure. I regard it the brightest, neatest, spiciest and newsiest publication of the kind edited, and think no banker can afford to be without it."

NEW BANKS, CHANGES IN OFFICERS, FAILURES, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

New National Banks.—The Comptroller of the Currency furnishes the following statement of National banks organized since our last report. Names of officers and further particulars regarding new National banks will be found under their proper State headings in this list.

- 3860—First National Bank, Grand Junction, Colorado. Capital, \$50,000.
 3861—National Bank of Commerce, Hutchinson, Kansas. Capital, \$100,000.
 3862—Yakima National Bank, North Yakima, Washington Territory. Capital, \$50,000.
 3863—National Exchange Bank, Kansas City, Missouri. Capital, \$250,000.
 3864—German National Bank, Vincennes, Indiana. Capital, \$100,000.
 3865—Sumner National Bank, Wellington, Kansas. Capital, \$75,000.
 3866—First National Bank, Boundbrook, New Jersey. Capital, \$50,000.
 3867—Ellensburg National Bank, Ellensburg, Washington Territory. Capital, \$50,000.
 3868—First National Bank, Rockland, Massachusetts. Capital, \$50,000.
 3869—National Bank of Jacksonville, Jacksonville, Florida. Capital, \$150,000.
 3870—Fresno National Bank, Fresno, California. Capital, \$100,000.
 3871—Cedar Falls National Bank, Cedar Falls, Iowa. Capital, \$50,000.
 3872—First National Bank, Albany, Georgia. Capital, \$50,000.
 3873—Central National Bank, Columbia, Pennsylvania. Capital, \$100,000.

ALABAMA.

BIRMINGHAM.—American National Bank; Vice-President, Geo. C. Kelley. — People's Savings Bank; capital, \$50,000. President, B. A. Thompson; Vice-President, J. A. Going; Cashier, F. W. Dixon.

LA FAYETTE.—Andrews & Co.; succeeded by Bank of La Fayette.
TALLADEGA.—Bank of Talladega; President, T. S. Plowman; Vice-President, J. T. Dumas; Cashier, J. C. Bowie. — Citizens' Bank; W. H. Skaggs, formerly of Bank of Talladega, has opened above bank. Cashier, J. L. McLane.

TUSCALOOSA.—First National Bank; Vice-President, P. Bryce.

ARKANSAS.

BEAR.—Miners' Exchange Bank has been re-opened. President, J. W. Barnes; Cashier, C. S. Rogers; Assistant Cashier, J. P. Durham.

LITTLE ROCK.—First National Bank; 2d Vice-President, N. Kupferle.

CALIFORNIA.

FRESNO.—Fresno National Bank has been authorized to commence business. Capital, \$100,000. President, J. H. Hamilton.

GRASS VALLEY.—First National Bank; no Vice-President in place of E. E. Clinch.

PASADENA.—Pasadena Savings Bank; discontinued.

SAN BERNARDINO.—Farmers' Exchange Bank; Cashier, S. F. Zombro.

SAN DIEGO.—Consolidated National Bank; E. W. Morse, Vice-President, in place of James M. Pierce; W. H. Clarke, Assistant Cashier, in place of O. S. Hubbell. — Bank of Commerce is new bank here. Capital, \$100,000. President, J. L. Hornung; Vice-President, S. J. Higgins; Cashier, J. C. Long; Assistant Cashier, H. D. Gaus.

SAN JACINTO.—State Bank; J. A. Green, President, in place of A. P. Anderson; James McLaren, Cashier, in place of John A. Green.

SAN JOSE.—Garden City National Bank; Geo. M. Bowman, Vice-President, in place of J. B. Randol.

SANTA BARBARA.—First Nat. Bank; Hugh D. Vail, Vice-Pres., in place of M. Sanger.

SANTA CRUZ.—City Savings Bank is reported here. Capital, \$50,000. President, L. K. Baldwin; Cashier, W. E. Hoffman.

SANTA PAULA.—Bank of Santa Paula is reported here. Capital, \$100,000. President, G. H. Bonebrake; Vice-President, C. H. McKevitt; Cashier, J. R. Hough.

WHITTIER.—Ricker, Mason & Lindley are reported here. Cashier, D. Henry.

COLORADO.

CENTRAL CITY.—First National Bank; A. N. Rogers, Vice-President, in place of Charles W. Ladd.

COLORADO SPRINGS.—First National Bank; Assistant Cashier, Charles A. Noble.

DENVER.—City National Bank; no Assistant Cashier in place of P. C. Conroy. — Denver National Bank; Assistant Cashier, E. L. Raymond. — State National Bank; C. S. Howard, Vice-President, in place of J. C. Lewis. — McMann & Kittredge; succeeded by R. H. McMann & Co.

GRAND JUNCTION.—Geo. Arthur Rice & Co.; succeeded by First National Bank. Capital, \$50,000. President, George Arthur Rice; Vice-President, T. M. Jones; Cashier, J. F. McFarland.

HOLYOKE.—Farmers & Merchants' Bank is in business here. President, L. W. Tulleys; Vice-President, J. N. Brown; Cashier, W. E. Johnson.

RICO.—Dolores County Bank has been opened. Capital, \$30,000. President, E. L. Davis; Vice-President, T. A. Davis; Cashier, Alfred H. Munde.

CONNECTICUT.

BRIDGEPORT.—Pequonock National Bank; no Vice-President in place of John L. Weesele.

DAKOTA.

ABERDEEN.—Union Banking Co. has been organized.

ARDOCH.—Bank of Ardoch; E. R. Jacobi, Cashier, in place of F. L. Strett.

ASBTON.—First National Bank; succeeded by First Bank. President, S. F. Hammond; Cashier, F. W. Kammann.

DEADWOOD.—Merchants' National Bank; no Assistant Cashier in place of M. G. Lincoln. DE SMET.—Kingsbury County Bank; John Armstrong, President, in place of A. W. Newman.

DOLAND.—First National Bank; J. E. Labrie, Jr., Vice-President, in place of A. Munger. FREEMAN.—C. Buechler is in business here. Style, Bank of Freeman. — D. Reiff is in business here. Style, Farmers' Bank. Cashier, Charles Donders.

GILBY.—Bank of Gilby is reported here. Capital, \$15,000. President, H. L. Whithed; Vice-President, M. S. Titus; Cashier, F. L. Strett.

HILLSBORO.—E. M. Paulson & Co., formerly reported here, are located at Mayville.

LANGDON.—Bank of Langdon; President, R. C. Donovan; Cashier, J. McPhall.

MADISON.—First National Bank; W. A. Mackay, Vice-President, in place of Chas. K. Hallard. — Madison National Bank; Assistant Cashier, J. I. Hubbell.

MAYVILLE.—E. M. Paulson & Co., formerly reported at Hillsboro, are located here instead.

MITCHELL.—First National Bank; Assistant Cashier, H. R. Kibbee.

RAPID CITY.—Black Hills National Bank; no Assistant Cashier in place of W. E. Stephens. — Pennington County Bank will shortly be opened. Capital, \$50,000.

President, Samuel H. Mills; Cashier, Frank R. Davis; Assistant Cashier, George F. Schneider.

STOIX FALLS.—Citizens' National Bank; merged into Minnehaha National Bank.

WATERTOWN.—Watertown Banking & Investment Co.; President, W. D. Wayne; Cashier, Wm. M. Reed.

DISTRICT OF COLUMBIA.

WASHINGTON.—National Safe Deposit Co.; E. Francis Riggs, Treasurer, in place of T. Lawrason Riggs, deceased. — Jacob Rich; succeeded by Rich & Co.

FLORIDA.

DAYTONA.—Bank of Daytona; now owned by Robert B. Wolseley.

JACKSONVILLE.—Bank of Jacksonville; succeeded by National Bank of Jacksonville. Capital, \$150,000. President, William E. Barnett; Cashier, Bion H. Barnett.

GEORGIA.

ALBANY.—First National Bank has been authorized to commence business. Capital, \$50,000. President, John A. Davis; Cashier, Henry H. Collier.

SAVANNAH.—Merchants' National Bank; Jno. L. Hammond, President, in place of Geo. L. Cope; Samuel P. Hamilton, Vice-President, in place of Jno. L. Hammond.

ILLINOIS.

CAIRO.—City National Bank; no Assistant Cashier in place of John S. Aisthorpe.

CHICAGO.—Fort Dearborn National Bank; no Vice-President in place of E. E. Crepin. — National Live Stock Bank; Elmer Washburn, President, in place of John B. Sherman; R. Z. Herrick, Cashier, in place of Geo. E. Conrad; Assistant Cashier, Charles Jameson. — J. D. Harvey & Co. are in business here. — Francis B. Peabody & Co.; succeeded by Peabody, Houghtaling & Co.

CLINTON.—De Witt County National Bank; J. F. De Land, Assistant Cashier, in place of Norman Nelson.

EDWARDSVILLE.—West & Prickett; succeeded by Wm. R. Prickett & Co.

FLORA.—First National Bank; E. H. Hawkins, Vice-President, in place of Wm. Hopkins.

GALVA.—Farmers & Merchants' National Bank; Assistant Cashier, V. A. Wigren.

HENRY.—First National Bank; no Assistant Cashier in place of T. L. Jones.

LA SALLE.—La Salle National Bank; M. A. McKey, President, in place of I. H. Norris.

LINCOLN.—Lincoln National Bank; Mark W. Barrett, Vice-President, in place of J. A. Hudson.

LOVINGTON.—Hardware Bank (Drake & Smith); Isaac Smith, deceased.

PARIS.—Edgar County National Bank; Vice-President, Joshua Davis.

PEORIA.—Central National Bank; no Assistant Cashier in place of F. E. Leonard.

PRINCETON.—Citizens' National Bank; Assistant Cashier, Douglas Mosely.

QUINCY.—A Clearing-House has been established here.

INDIANA.

CROWN POINT.—First National Bank; James W. Youche, Vice-President, in place of James H. Luther.

JEFFERSONVILLE.—Citizens' National Bank; George W. Lewman, President, in place of John F. Read.

LA FAYETTE.—First National Bank; no Assistant Cashier in place of F. W. Spencer.

LIBERTY.—Union County National Bank; Frank Husted, Assistant Cashier, in place of A. E. Johnson.

NORTH MANCHESTER.—Lawrence National Bank; Assistant Cashier, Jno. W. Mills.

PRINCETON.—People's Nat. Bank; W. W. Blair, Vice-Pres., in place of W. P. Welborn.

SOUTH BEND.—South Bend National Bank; D. H. Baker, President, in place of John Brownfield, resigned; no Vice-President in place of D. H. Baker.

VALPARAISO.—Farmers' National Bank; W. H. Gardner, Vice-President, in place of J. R. Hill; no Assistant Cashier in place of W. H. Gardner.

VINCENNES.—German National Bank has been authorized to commence business. Capital, \$100,000. President, S. Gimbel; Vice-President, Gerard Reiter; Cashier, George R. Aisop.

IOWA.

- BOONE.**—National Bank of Boone; title changed to First National Bank. Assistant Cashier, J. H. Herman.
- BURLINGTON.**—National State Bank; Vice-President, Chas. Starker.
- CEDAR FALLS.**—Cedar Falls National Bank has been authorized to commence business. Capital, \$50,000. President, James Miller; Cashier, Roger Leavitt.
- CRESCO.**—Cresco Union Bank; succeeded by Cresco Union Savings Bank. Capital, \$100,000. President, J. J. Lowry; Vice-President, C. K. Berg; Cashier, Robert Thomson.
- DES MOINES.**—Merchants' National Bank; W. R. Graham, President, in place of Adam Howell.
- DE WITT.**—First National Bank; E. W. Price, Cashier, in place of J. H. Price; no Assistant Cashier in place of E. W. Price.
- DUBUQUE.**—Dubuque National Bank; G. A. Burden, Assistant Cashier, in place of T. P. Guernsey.
- HAMPTON.**—First National Bank; succeeded by Bank of Hampton. Capital, \$100,000. President, J. F. Latimer; Cashier, D. D. Ingills.
- HAVELOCK.**—Gill & Potter are in business here. Style, Citizens' Bank. Capital, \$9,000.
- IOWA CITY.**—First National Bank; Peter A. Dey, Vice-President, in place of G. W. Marquardt.
- LEHIGH.**—Hall & Sons (Lehigh Valley Bank); succeeded by Hall, Son & Co.
- LE MARS.**—First National Bank; no Vice-President in place of J. W. Myers.
- OELWEIN.**—H. C. Sturgis & Co. are in business here. Style, Citizens' Bank. Cashier, H. C. Sturgis.
- OGDEN.**—Bank of Ogden; A. Clark, President, in place of F. Sylvester; S. W. Clark, Cashier, in place of F. B. Moore.
- OSKALOOSA.**—Farmers & Traders' National Bank; J. G. Jones, President, in place of John Siebel; R. P. Bacon, Vice-President, in place of L. E. Blanchard.—Frankel, Bach & Co.; succeeded by I. Frankel.
- OTTUMWA.**—City Savings Bank has been organized. Authorized capital, \$100,000; paid capital, \$50,000. President, Samuel Mahon; Vice-President, Thomas D. Foster; Cashier, Carey Inskip.
- PERRY.**—First National Bank; no Vice-President in place of Allen Breed; H. J. Holmes, Cashier, in place of O. Mosher.
- RIPPEY.**—Bank of Rippey is reported here. Capital, \$20,000. President, Chas. H. Suydam; Cashier, Charlotte L. Suydam.
- WEBSTER CITY.**—First National Bank; no Assistant Cashier in place of P. M. Banks.
- WEST UNION.**—Fayette County National Bank; S. B. Zeigler, President, in place of Joseph Hobson; H. B. Hoyt, Vice-President, in place of S. B. Zeigler.

KANSAS.

- ARKALON.**—Arkalon State Bank has been incorporated. Capital, \$100,000.
- ARKANSAS CITY.**—Snyder, Hutchinson & Co.; not in the banking business.
- ASHLAND.**—State Bank; A. M. Van Laningham, President, in place of Thomas O. Moffett; Vice-President, T. O. Moffett.
- ATOHISON.**—Farmers' Exchange Bank; discontinued.
- BELOIT.**—First National Bank; Alex. Campbell, President, in place of M. S. Atwood; L. J. Best, Vice-President, in place of Geo. H. Francis; E. Brion, Assistant Cashier, in place of L. J. Best.
- CALDWELL.**—First National Bank; Wm. Corzine, Vice-President, in place of Wm. E. Malaley.
- CAWKER CITY.**—First National Bank; Assistant Cashier, E. M. Bergen.
- CHENEY.**—Bank of Cheney; closed.
- CHERRY VALE.**—State Bank; J. Y. Finley, Vice-President, in place of Jasper Gordon; R. T. Webb, Cashier, in place of S. B. Engle.
- DIGHTON.**—People's Bank; closing.
- FLORENCE.**—State Bank; discontinued.
- GARDEN CITY.**—Bank of Western Kansas; E. M. Hutoher, Cashier, in place of T. M. Dickey.
- GLEN ELDER.**—Bank of Glen Elder; O. F. Page, President, in place of E. E. Parker.
- GYPSUM.**—Gypsum Investment Co.; President, D. A. Eagle; Secretary, J. W. Amos; Treasurer, C. R. Williams.
- HAVEN.**—Citizens' Bank; Louis O. Smith, President, in place of C. E. Bush; J. E. Lang, Cashier, in place of Louis O. Smith.
- HERNDON.**—Bank of Herndon; President, E. S. Kirtland. — German Bank has been opened here as a branch of State Bank of Oberlin. President, Owen Phillips; Vice-President, R. O. Kindig; Cashier, J. H. Krider.
- HORACE.**—Greely County Bank; succeeded by Citizens' Exchange Bank. President, W. G. Shaffer; Cashier, A. H. Shaffer.
- HOWARD.**—Howard State Bank; J. J. Pyle, President, in place of W. S. Lambert; W. S. Lambert, Vice-President, in place of A. W. Kirby; A. W. Kirby, Cashier, in place of T. P. Campbell.
- HOXIE.**—Bank of Hoxie; succeeded by Hoxie State Bank. Paid capital, \$125,000. President, W. P. Rice; Vice-President, E. K. Streeter; Cashier, J. R. Reed; Assistant Cashier, Geo. E. Crane.

BRITISH COLUMBIA.
 NEW WESTMINSTER.—Bank of Montreal has opened a branch here; Sub-Agent, Geo. D. Brymner.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, May 2, 1888.

During the month of April money has been more freely loaned than for some time. The feeling of uncertainty as to the future has, to some extent, been modified by the vote of confidence in both Houses of Congress in the purchase of bonds with the surplus, and also by the fact that the public are becoming accustomed to existing conditions. Money grew easier through the week ending April 7th. Banks and Trust companies sought to maintain 4 per cent. as the rate for call loans, but such loans were freely made at 3 per cent. on good collateral. During the week ending April 14th, money could be had as low as $1\frac{1}{2}$ per cent. through brokers on account of foreign and domestic houses but only on first-class collaterals. The stock market continued dull. For the week ending April 21st, there was a still greater disposition to lend. Call loans could be had from $2\frac{1}{2}$ to 3 per cent. on fairly good collateral. The stock market was strong and active. During the last week in the month the tendency was still in the same direction, rates were about the same but less particularity as to collateral, and there was more freedom in granting lines of discount to customers. This week there was an influx of currency from the West and South, and the money expended by the Treasury in bond purchases had some effect. The deposits of public money with National banks has remained *in statu quo*. They amounted to \$61,812,647, April 1st, and to \$61,921,294 on May 1st.

FOREIGN EXCHANGE.—During the first week in April the sterling exchange market was quiet, the demand not being active at any time. The pressure of bills drawn against foreign purchases of stock caused weakness, though commercial bills were scarce. Although still quiet, sterling exchange was somewhat stronger for the week ending April 14th, the conditions of the previous week—plenty of stock purchase bills, but scarcity of commercial bills—still continued. Rates were steady. For the next week the demand for sterling exchange for remittances was much better and the market was active. The supply of all kinds of bills was rather limited and this, coupled with the demand, has made the market stronger. The rates were some higher. During the last week in April, although stocks continued to be bought on foreign account, security bills were not offered in any quantity and all other bills were scarce. The demand for sterling exchange was quite active at times. The market was strong and rates were higher. From March 29th to April 26th the Bank of England lost £1,672,000 in specie, the reserve at the latter date being 40.84 of the liabilities. The Bank of France gained 1,525,000 francs in gold and lost 725,000 francs in silver. The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, $\$4.86\frac{1}{2}$ @ $\$4.87$; sight, nominal, $\$4.88\frac{1}{4}$ @ $\$4.89$; 60 days, actual, $\$4.86\frac{1}{2}$ @ $\$4.86\frac{1}{2}$; sight, actual, $\$4.87\frac{3}{4}$ @ $\$4.88$; Cable transfers, $\$4.88\frac{1}{4}$ @ $\$4.88\frac{1}{2}$; Prime commercial sterling, long, $\$4.85\frac{1}{4}$ @ $\$4.85\frac{1}{2}$; Documentary sterling, 60 days, $\$4.85$ @ $\$4.85\frac{1}{4}$; Paris bankers', 60 days, $5.19\frac{3}{4}$ @ $5.18\frac{3}{4}$; sight, $5.18\frac{1}{2}$ @ $5.17\frac{1}{4}$; Paris, commercial, 60 days, $5.21\frac{1}{4}$ @ $5.20\frac{5}{8}$; sight, $5.19\frac{3}{4}$ @ $5.18\frac{3}{4}$; Antwerp commercial, 60 days, $5.21\frac{1}{4}$ @ $5.21\frac{1}{4}$; Swiss bankers', 60 days, 5.20 @ $5.19\frac{3}{4}$; sight, $5.18\frac{1}{2}$ @ $5.17\frac{1}{4}$; Reichsmarks (4), bankers', 60 days, $95\frac{1}{2}$ @ $95\frac{5}{8}$; sight, $95\frac{3}{4}$ @ $95\frac{5}{8}$; Reichsmarks (4), commercial, 60 days, $95\frac{1}{2}$ @ $95\frac{5}{8}$; sight, $95\frac{1}{2}$ @ $95\frac{5}{8}$; Guilders, bankers, 60 days, 40 5-16@ $40\frac{3}{8}$; sight, $40\frac{1}{2}$ @ 40 9-16; Guilders commercial, 60 days, 40 8-16@ $40\frac{1}{4}$; sight, $40\frac{3}{8}$ @ 40 7-16; Copenhagen, Stockholm and Christiana, krona, 60 days, 26 11-16@ $26\frac{3}{4}$; sight, 26 15-16@27. Paris dispatches quote exchange on London 25f. 28c.

The following shows the posted rates for prime bankers' sterling bills on

London, at 60 days, and sight, and prime commercial sterling bills on London, at 60 days; and sight, and prime commercial sterling, together with exchange on Paris on April 1st, the changes in rates that occurred during the month and the highest and lowest during the months of March and April:

MARCH, 1888.	BANKERS		Cable		PARIS	
	60 days.	Sight.	Transfers.	Commercial.	60 days.	Sight.
Highest ..	4.86½	4.88½	4.88½	4.85	5.19½	5.17½

" 26	4.87	4.89	4.88½	4.85½	5.19½	5.17½
Highest	4.87	4.89	4.88½	4.85½	5.19½	5.17½
Lowest	4.86	4.88	4.87½	4.85½	5.20½	5.18½

COINS AND BULLION.—Bar silver is quoted in London at 42½d. per ounce. At this quotation for silver the bullion value of the standard dollar is 69.85 cents. The following are New York quotations in gold for other coins and bullion:

Trade dollars ..	\$ 72 @ \$	Twenty marks ..	4 74 @	4 80
New (412½ grains) dollars ..	99¾ @ 1 00	Spanish doubloons ..	15 60 @	15 80
American silver ½s & ¼s ..	99¾ @ 1 00	Spanish 25 pesetas ..	4 80 @	4 90
American dimes ..	99¾ @ 1 00	Mexican doubloons ..	15 55 @	15 75
Mexican dollars ..	78¾ @ 75	Mexican 20 pesos ..	19 50 @	19 65
Peru soles & Chilian pesos ..	78 @ 75	Ten guilders ..	3 96 @	4 00
English silver ..	4 82 @ 4 88	Com'l silver bars, per oz ..	93½ @
Five francs ..	93 @ 96	U. S. Assay silver bars ..	93½ @ 94½
Victoria sovereigns ..	\$4 84 @ \$4 90	Fine gold bars par @ ¼ % premium on the Mint value.		
Twenty francs ..	3 85 @ 3 90			

NEW YORK BANKS.—During the week ending April 7th, the combined gold and currency received from the interior by the New York banks was \$1,468,000, and they shipped \$2,229,000, making a loss for the week of \$766,000. By Sub-Treasury operations they gained however during the same week \$2,800,000, and their net gain for the week was therefore \$2,034,000. During the week ending April 14th, the banks gained \$74,000 from the interior and lost \$1,000,000 by Sub-Treasury operations, a net loss of \$126,000. During the week ending April 21st, the banks gained \$3,454,000 from the interior and \$1,000,000 by Sub-Treasury exchanges. Their net gain was \$3,554,000. During the week ending April 28th, the banks gained \$1,850,000 from the interior and \$1,000,000 by Sub-Treasury operations making a net gain of \$2,850,000. The total loss from March 30th to April 28th, was \$4,244,000.

The following table shows the condition of the New York Clearing-House Banks for a number of weeks past:

1888.	Loans.	Specie.	Legal-tenders.	Deposits.	Circulation.	Surp. Res.
April 28	\$393,523,900	\$76,789,800	\$33,387,100	\$376,041,500	\$7,784,300	\$16,116,525
April 21	363,672,200	74,948,800	33,027,100	374,918,400	7,720,700	14,246,300
April 14	368,532,000	71,351,300	31,124,000	373,318,900	7,602,700	9,145,575
April 7	368,349,400	71,774,100	29,939,700	371,571,700	7,728,500	8,620,875

HOME MONEY MARKET.—For the week ending April 7th the open market rates for call loans on stock and bond collaterals were from 1½ to 5 per cent. Prime commercial paper was quoted at 5 to 6 per cent. For the week ending April 14th the open market rates on stock and bond collaterals ranged from 1½ to 8 per cent. Prime commercial paper was quoted from 5 to 6 per cent. During the week ending April 21st, the open market rates for loans on stock and bond collateral were from 1½ to 3 per cent. the same as the previous week, and the quotations for prime commercial paper also ruled the same, viz.: from 5 to 6 per cent. For the last week in April open market rates

on stock and bond collaterals were from $1\frac{1}{2}$ to 4 per cent., and the quotations for prime commercial paper from $4\frac{3}{4}$ to $5\frac{1}{2}$ per cent.

The following are the latest rates of exchange on New York: Savannah, buying par; selling $3-16@1/4$ premium. Charleston, buying $1/8$; selling $1/4$ premium. New Orleans commercial 75c. per \$1,000 premium; bank, \$1 premium. St. Louis, 90c. per \$1,000 premium. Chicago, 40c. per \$1,000 premium.

GOVERNMENT BONDS.—The following table shows the closing prices or closing bids at the New York Stock Exchange for the principal issues of Government bonds on each day of the month of April, and the highest and lowest during the month. Actual sales marked *:

APR.	$1/2$ cs, '91, coup.	1s, 1907, coup.	1s, 1907, Reg.	C'y 6s, 1895.	C'y 6s, 1899.	High	$1/2$ cs, '91, coup.	1s, 1907, coup.	1s, 1907, Reg.	C'y 6s, 1895.	C'y 6s, 1899.

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange.

The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

BANKERS' OBITUARY RECORD.

Barry.—Chas. C. Barry, formerly Cashier of the City Bank of Boston, now the National City Bank, died on April 30th. He was 82 years of age.

Bently.—Peter Bently, Director of the Hudson County National Bank of Jersey City, N. J., died April 30th. He was also a Director in the Provident Institution for Savings, and counsel for the Lehigh Valley Railroad Company.

Black.—Jacob Black, President of the First National Bank of Clarion, Pa., died on April 21st.

Brewer.—J. P. Brewer, a well-known member of the Boston Stock Exchange, died on April 16th, at the age of 53 years.

Brown.—Amos Brown, who in past years has been connected with the Charlestown Five Cents Savings Bank as Trustee, Vice-President and member of the Investing Committee, died in April, at the age of 76.

Bryan.—Guy Bryan, Cashier of the First National Bank of Vincentown, N. J., died suddenly on April 17th, aged 78 years.

Cary.—Hon. Otis Cary, at one time President of the Savings Bank of Foxboro, Mass., and of the National Bank of Wrentham, Mass., died April 25th, at the age of 84. He had served in both branches of the Legislature of that State.

Casselberry.—John W. Casselberry, head of the banking firm of John W. Casselberry & Co. of Pottstown, Pa., died on April 15th of pneumonia, at the age of sixty-six years.

Danforth.—Isaac W. Danforth, one of the Directors of the National Eagle Bank of Boston, Mass., died on April 16th.

Deblois.—Stephen G. Deblois, who was formerly Secretary of the Boston Penny Savings Bank Corporation of Boston, Mass., died on April 5th, at the age of 71. He was widely known as the Treasurer of Trinity Church.

Doty.—Leonidas Doty, President of the Farmers' Bank of Batavia, N. Y., died on April 21st. He was interested also in banks in Buffalo and Attica.

Emerson.—A. C. Emerson, of the banking firm of Emerson & Co., of Warrens burgh, N. Y., died on February 27th, at the age of fifty-eight years.

Farmer.—Chas. Farmer, connected with the banking firm of Wemple Brothers, Waverly, Ills., died suddenly while at his post in the bank on April 24th.

Goadby.—J. H. Goadby, for many years agent of the Canadian Bank of Commerce in the city of New York, died April 26, 1888.

Halsted.—James M. Halsted, President of the American Fire Insurance Company, of New York city, died on March 23d, at the age of 80, of paralysis. He was a Director of the Mercantile Trust Company, and also of the Equitable Life Assurance Society.

Hospea.—Louis Hospea, President of the First National Bank of Stillwater, Minn., died April 9th. He had resided in Stillwater since 1864.

Jones.—Joshua Jones, one of the largest stockholders of the Chemical National Bank, of New York city, died on March 23, of pneumonia, at the age of 82.

Maish.—Geo. H. Maish, a prominent citizen of Des Moines, Iowa, died on May 2. He was one of the organizers of the Iowa National Bank of that place in 1875, and was its Cashier until last January, when he retired on account of ill health. He was 53 years of age.

Mason.—Orion A. Mason, of Medway, Mass., died on April 6th, at the age of sixty-three years. He was the first Treasurer of the Medway Savings Bank.

Merrill.—Charles Merrill, who was Cashier of the Malden, Mass.—afterwards the First National Bank of that place—from 1861 to 1883, when he resigned on account of ill health, died April 18th, at the age of 75 years.

Page.—A. A. Page, of the broker's firm of Hornblower & Page, died April 17th, at the age of 49. He was a member of the Boston Stock Exchange.

Phippard.—W. T. Phippard, a well-known member of the New York Stock Exchange, killed himself on May 2.

Potts.—Geo. H. Potts, President of the National Park Bank of New York city, died April 26th, aged 77 years. Mr. Potts was one of the incorporators of the National Park Bank, of which he was a Director from the organization of the bank, about thirty years ago, and President for the last eight years. He was a man of the highest moral character and soundest business principles. To his wise counsels and able judgment the bank is largely indebted for its success.

Raff.—Geo. W. Raff, President of the Central Savings Bank of Canton, Ohio, died on April 14th, at the age of 63 years.

Smith.—Isaac Smith, a member of the banking firm of Drake & Smith, of Livingston, Ills., committed suicide by hanging on April 8d. The act is said to have been due to insanity.

Streit.—F. L. Streit, Cashier of the Bank of Ardoch, Dakota, died recently.

Walker.—Jesse W. Walker, Secretary and Treasurer of the People's Savings Bank of Evansville, Ind., died April 26th, of Bright's disease.

Wheeler.—Increase Sumner Wheeler, President of the Framingham National Bank, of Framingham, Mass., died on March 21st, of apoplexy, aged 83.

MONETARY CHRONOLOGY.—APRIL, 1888.

1. **SUNDAY.**—William A. Smith, Assistant Secretary of Treasury under Daniel Manning died on March 31st. — Cross and White, absconding bank officers, of Raleigh, N. C., indicted on March 30th. — Incorporation of Garfield Safe Deposit Company announced. — Caucus of Democratic Senators on Bond purchase bill, held on March 31st.
2. **MONDAY.**—Surplus reserve of New York city banks decreased \$267,650 during previous week. — It is announced that the alleged Dexter Bank robbers will have a new trial.
3. **TUESDAY.**—The Senate debating on the bond buying bill. — Secretary Fairchild's reply to resolutions of House asking information as to deposits of public money sent in.
4. **WEDNESDAY.**—Chemical Bank shares sold at 3,995. — Holland Trust Company of New York city authorized to do business.
6. **FRIDAY.**—E. C. Kline, of Brooklyn, arrested in Pittsburgh for passing a bogus check for \$1,000 at the Diamond National Bank of that city. — Examiner Tate reports assets of State National Bank of Raleigh, \$280,000; liabilities, \$400,000.
7. **SATURDAY.**—A new National bank is to be organized in Salem, N. J. — An Italian Bank in New York city at No. 72 Thompson street failed.
9. **MONDAY.**—James D. Fish is not likely to secure his pardon. — Cross and White brought back to Raleigh, N. C., and their bail fixed at \$15,000 each. — The bank will it is said pay 66 cents on the dollar.
10. **TUESDAY.**—It is thought the bond purchase bill with the Beck amendment will pass the House. — The Newburgh bankers, Wiltale and Pollock, indicted. — Geo. White, *alias* Milce and Bliss a notorious bank and safe robber released from prison at Windsor, Vt., having served a sentence of fourteen years. — There was a squeeze in pork at Chicago. — Christopher Nugent, at one time the largest morocco manufacturer in the world, and who failed through his connection with Oscar Baldwin, of the Mechanics' National Bank of Newark, N. J., died.
12. **THURSDAY.**—The State National Bank of Omaha became embarrassed and was taken possession of by the National bank Examiner.
13. **FRIDAY.**—Henry Schumacher was arrested at Dayton, O., for forgery. — The First National Bank of St. Johnsville, N. Y., was robbed by burglars, loss about \$10,000. The vault was blown to pieces.
14. **SATURDAY.**—E. L. Bliss, arrested at Berryville, Ark., for forgery and robbery committed in Nebraska. — The Savings banks object to bills in the New York Legislature giving unclaimed deposits to the State and taxing Savings bank deposits.
17. **TUESDAY.**—Mr. Stewart offered a resolution in the Senate calling on the Secretary of the Treasury for information as to amount of public money deposited with National banks. — John J. Hazzard, of the Fort Pitt National Bank of Pittsburgh, fled to Canada with \$20,000 to \$40,000 of the bank's money. — Two well known hotel keepers of Winnipeg, Manitoba, arrested for complicity in bank robbery. — Secretary of the Treasury invited proposals for sales of bonds to the Government. — Surplus, \$105,000,000. — John Baring, of Baring Bros., London, England, died to-day.
18. **WEDNESDAY.**—It is denied that John J. Hazzard of the Fort Pitt National Bank of Pittsburgh is a defaulter.
19. **THURSDAY.**—The creditors of the Marine National Bank of New York city have received an additional dividend of 5 per cent., making 60 per cent. in all.
21. **SATURDAY.**—J. B. Hurst was arrested for forging checks at Barbourville, Ky.
23. **MONDAY.**—Offers of United States bonds: \$1,152,000 4's at 124.7-125.75, and \$37,000 4½'s at 107¼ to 108¼. — The Secretary accepted \$85,000 4's at 124.7-125. — N. P. B. Wells, Treasurer of the Seneca Falls Savings Bank arrested for defalcation. — Mr. Graves, of the Bureau of Engraving and Printing estimates cost of printing 25,000,000 of fractional currency at \$350,000.
24. **TUESDAY.**—Offers: \$1,642,000 4's at 125¼-127, and \$1,040,000 4½'s at 107.6-108. — The Secretary accepted \$600,000 4's at 125¼-125¾. — Secretary Fairchild opposes the passage of the fractional silver certificate bill.
25. **WEDNESDAY.**—Offers: \$440,000 4's at 125-126. No 4½'s. — The Secretary accepts \$440,000 4's at 125 125¾. — Wilson McCandless, President of the Allegheny National Bank of Pittsburgh, Pa., reported dying.
26. **THURSDAY.**—Offers: \$508,150 4's at 125-126¼, and \$413,700 4½'s at 107½-108. — The Secretary accepts \$156,150 4's at 125-126¼. — James H. Goadby, one of the agents of the Canadian Bank of Commerce, at No. 16 Exchange Place, New York city, died. — Verdict of \$147,000 against Kissam & Whitney, brokers, of New York city, in favor of the failed First National Bank of Albion, N. Y.
27. **FRIDAY.**—Offers: \$308,000 4's at 125¼-127, and \$540,900 4½'s at 107¾. — The Secretary accepts \$4,500 4's at 125, and \$90,000 4½'s at 107¾.
28. **SATURDAY.**—Offers: \$1,321,600 4's at 126-126¾, and \$612,500 4½'s at 107½-107¾. — The Secretary accepts \$600 4's at 126, and \$100,000 4½'s at 107¾.
30. **MONDAY.**—Offers: \$2,713,000 4's at 126 126¼, and \$11,000 4½'s at 107¾. — The Secretary accepts \$2,719,000 4's at 125-126¼. — Geo. H. Potts, President of the National Park Bank of New York city died. — John Joseph McMahon, who embezzled \$20,000 from the Leather Manufacturers' National Bank of New York city in 1884, pardoned by President Cleveland.

RHODES'
JOURNAL OF BANKING.

Vol. XV.

JUNE, 1888.

No. 6.

IT is every day becoming more apparent that the effort to reduce the surplus by bond purchases is not proving a success. Nor has the Secretary of the Treasury at any time seemed to regard this method of expending public moneys for the reduction of the debt as any thing more than a temporary measure. The market has perhaps been beneficially affected by the feeling that danger of stringency would be averted by the knowledge that the Treasury could at any time be unlocked by offers of bonds at reasonable prices. The moral effect has therefore been good. When bond purchases are considered as a means of utilizing an anticipated surplus of nearly two hundred millions of dollars during the next year their inadequacy is at once seen unless it be admitted that the Treasury is willing to pay extravagant premiums. Besides the authority to purchase bonds, the Secretary has, as the only other method of getting the locked-up currency into circulation, power to deposit public moneys with the National banks. The use of either of them to any great extent increases the price of bonds. Moreover, if the Secretary's action increases the price of bonds unduly, the National bank depositories may become inclined to realize on their deposited bonds. Never before in the history of the country has so much financial power been placed in the hands of one man. It would be easy for Mr. Fairchild to force bonds up to almost any price, but he is acting with judgment and decision. There is no necessity of worrying about the National bank depositories, there could not be a better thing for them than the course the market is slowly taking under the pressure of Treasury purchases. Bonds bought at 124 and less already realize 127 and over. Under ordinary circumstances, the prospect of a gradual rise of Governments, would induce speculation in them that would still further raise the price, but the state of uncertainty that prevails seems so far to have prevented this. It is felt that while on the one side, the price of fours and four-and-a-halves must continue to rise so long as the money market continues favorable, on the other, the constant drain produced by the excessive revenues makes a stringency imminent under which

the price would be sure to fall. We can see from this on what a narrow margin Secretary Fairchild is working. If he undertakes to buy bonds sufficient to visibly affect the surplus, he will force up the price and induce over speculation. If he undertakes to squeeze the market by refusing to purchase except at low prices, he incurs a certain political danger. There would at once be an outcry from one end of the country to the other. Inasmuch as the Presidential election is at hand it is plain there will be very little fluctuation of the market from any action of the Secretary. A different condition of things may be expected if there should be a decided tendency to gold exportations.

THE SUCCESS OF Mr. Goschen's plan for refunding the English Three per cents and the credit he has gained, in some degree indicate the triumph it would be to the present administration of the Treasury to successfully fund the fours and four-and-a-halves at lower rates of interest. If a financier of such high standing as Mr. Goschen can add to his reputation by the skillful manner in which he has brought an operation of such magnitude to a successful termination, much more could the present Secretary of the Treasury enhance confidence in his financial acumen by seeking to effect a reduction of the interest on the outstanding bonded debt of the United States. The conditions existing are, of course, different from those in England, but the general principle governing the operation is the same. The refunding of the public debt with the consent of the holders without the appearance of force is an American invention. It was first successfully employed in 1881 by Secretary Windom, in refunding the 6's and 5's then due and payable into bonds bearing three-and-a-half per cent. Mr. Goschen evidently had the success of Mr. Windom in mind when, without any special Act of Parliament he undertook the reduction of the interest, on the English three per cents. He did not have surplus funds belonging to the State to aid him in bringing the bondholders to terms, but he had the assistance of the Bank of England, and the support of the banks and bankers of the kingdom. A former Chancellor of the Exchequer, Mr. Childers, a few years ago attempted a similar conversion of the funds, but was unable to carry it through, although he offered a higher premium than that paid to the consenting fundholders by Mr. Goschen, simply because he could not, at that time, induce the banks to give him their support. The banks would not then accept it themselves nor would they advise their customers and clients to accept it. One reason of this was the higher rates for money that prevailed at that time. During the pending of Mr. Goschen's proposition to the fundholders the Bank of England reduced its discount rate to two per cent. and, immediately as the success of the measure became assured, raised the rate to three per cent. One very interesting point connected with this success of the English Chancellor of the Exchequer is the large amounts involved.

The three per cents subject to the terms of Mr. Goschen's proposition amounted to £558,000,000, or about \$2,790,000,000, a greater amount than the bonded National debt of the United States reached at its highest point. The amount held by those not consenting to the terms offered is not yet precisely known, as holders of the stock who are out of England and those who hold it as trustees have a longer time within which to make their consent known, but the amount will not exceed \$425,000,000.

IF THERE IS ANY cessation or intermission to the tariff discussion it is probable that some plan for refunding the fours and four-and-a-halves at lower rates of interest or some other plan for an immediate use of the surplus in payment of the debt may get some chance to be considered in Congress. It has been intimated that if the Finance Committee of the Senate will bring forward some practical measure, it would receive the support of the administration. This is about the only measure that will be of any practical benefit in keeping down the surplus. It will employ a large amount of money in paying a portion of the advance interest, and it is possible that if a still larger amount of the surplus were used that the payment of the principal of the debt might be made optional with the consent of the holders. The surplus would be well expended in either way. If, in payment of the present value of a portion of the interest that under the present contract with bond holders must continue to be paid until September, 1891, on the four-and-a-halves, and until July, 1907, on the fours, the future interest charge on the debt will be reduced, and the bonds themselves remain at low rates in the market. If the surplus is used not to purchase advance interest, but to buy the option bond holders now have, it would be immensely preferable to the present method of purchasing bonds. For, assume that all the holders of fours now worth 127, hold their bonds until 1907, this premium will be lost to them and for the nineteen years they will realize only a little over two per cent. Section 3, of the Act of July 14, 1870, provides that the four per cent. bonds bearing the highest numbers shall be paid first. It is highly probable that, if the Government would offer a four per cent. bond, payment optional after the four-and-a-halves are all paid, in exchange for the present four per cents., paying a difference in cash in each case calculated on the rate of interest now realized by the holder of fours, a very large number of holders would make the exchange, especially if the new bonds first issued were the last to be called. There would be an opportunity to realize most of the present premium and at the same time continue to draw four per cent. on the bonds. A plan of this kind would successfully utilize the surplus until 1891, when the payment of the four-and-a-halves would begin, and after the latter were paid, the revenues could be used to call the optional fours. As long as the United States has a public debt, and public sentiment is in favor of

paying it, and, if anything, against the reduction of revenues by the reduction of the tariff, a plan to use the revenue in the immediate payment of the debt with the consent of the bondholder is the great desideratum.

THE DEBATE in the Senate upon the silver question was long and interesting, and showed that a majority of the Senate are willing to go great lengths to extend the circulation of the country based on silver. The manner in which the Bond Purchase bill, with Senator Beck's silver amendment, was treated in the House, indicates that if the bill, as amended, had been brought to a vote, it would have passed by a large majority. It is plain to every observer that the passage of the measure by both Houses would have placed the President in a difficult position, in view of the approaching Presidential campaign. If he had signed the bill it would have given offense to a large party who fear the danger of an increased silver coinage; and if he had, in accordance with his convictions as expressed in his message, vetoed it, he must have offended the very powerful party in favor of the complete remonetization of silver. It is useless to neglect the evident fact that the great object of the present Administration is to preserve the *statu quo* on the silver question, and leave its settlement to a time when it will be less a question of party politics and may be arranged on a purely scientific basis, if it can be so arranged. The most extreme of those who favor the coinage of silver, such as Senators Teller and Stewart, seem to believe that if free coinage is authorized in the United States, that silver would rise in price, and that the old market relation between the metals would be restored. The great point of difficulty is as to what this relation was. As established by the law authorizing the coinage of the silver dollar, the relation is 16 to 1, but the relation established by the Latin Union is $15\frac{1}{2}$ to 1. The valuation of silver by the coinage of the Latin Union is therefore greater than that established in this country by the Silver Coinage Act of February, 1878. The relation between the values of gold and silver, as expressed by the present market price, is about 22 to 1. If the extreme views held by Senators Stewart and Teller are correct, and the free coinage of silver by the mints of the United States will produce the favorable effect on the price of silver predicted by them, at what point will this effect stop and the hoped for equilibrium be restored? If the price of silver rises until it reaches such a point that the pure silver in the 412.5 grain dollar becomes the exact market equivalent for the pure gold in the 25.8 grain dollar, will the effect stop at this point? If the effect of the free coinage of silver by the mints of the United States be sufficient to change the market relation between the two metals from 22 to 1 to 16 to 1, what will prevent this effect from going further and raising the price to a point where the relation is $15\frac{1}{2}$ to 1, as under the coinage of the Latin Union? If this is to be the result, what a waste of silver in making

the present standard dollar as large as it is! At a relation of 15.5 to 1 the standard dollar should contain only 359.91 grains of pure silver, or 399.9 of silver nine-tenths fine instead of 412.5 grains nine-tenths fine. The extreme silver men, whether they advocate the free coinage of the standard silver dollar, or whether they advocate a free use of silver through the issue of silver certificates based on silver bullion, both subject themselves to the danger of having a mass of silver coined at a rate disadvantageous to the metal as compared with gold, to face after they have accomplished the object of raising the price. Several hundred millions of silver dollars will have to be called in for recoinage, if their predictions as to the effect of the legislation they advocate prove correct. The only way to obviate the difficulty is to stop the coinage of the silver dollar and to issue certificates based on silver bullion deposited in the Treasury, treating the dollars already coined as bullion, except in amounts under twenty dollars. Previous to this, however, all the silver dollars now outstanding should be made exchangeable at their face value for certificates of the kind now in use, and these certificates should be made exchangeable for the new silver bullion certificates. The bullion certificates should call for an amount of silver bullion equal in gold market value to the number of dollars called for by the face of the certificate. The market value should be fixed each month by a Commission appointed for the purpose. The Government would lose, of course, the difference between the face and bullion value of the silver dollars called in, and would have to purchase some millions of dollars of silver bullion to make good the deficit; but the price necessary to pay for this could well be afforded out of the surplus money in the Treasury, in order to restore a sound and abundant currency. The new bullion certificates would be based first on the called-in silver dollars treated as bullion, and such additional bullion as it might be found necessary to purchase to afford an absolute gold value to the silver bullion held, equal to the face value of the bullion certificates. It would be necessary to purchase about \$100,000,000 of silver bullion for the purpose. This would give an upward turn to the market and control the price for a time. After the Government had placed all the silver certificates now outstanding on a par with gold, permission should be given to any one who desired to deposit properly tested silver bullion and receive new certificates for it. After a few years the market price would settle at some point that would enable an international conference to determine a relation between gold and silver that would virtually be a permanent one.

THE BANKS AT THE FINANCIAL centres very frequently complain of the trouble and expense they are put to in the collection of country checks, that is, checks drawn against individual accounts in country banks and remitted to creditors at the centres, who deposit such checks for collection in their banks. That this method of remitting is

one of great convenience to the country dealer can admit of no doubt, and also that it tends to increase business. There is also much truth in the assertion that the banks that collect these checks for their customers are not adequately paid. Many suggestions have been made for avoiding the inconvenience suffered by the banks, among others that they should combine and agree to make a reasonable charge in all cases for collecting such checks. The difficulty in the way of such a combination is the competition that prevails in the banking business. To secure deposits, the banks vie with each other in offering inducements, and one offer almost universally made is to make collections for customers free of charge. Attempts on a limited scale to make any change are apt to be attended by loss of business to some one. On the 1st of April, the Clearing-House of St. Joseph, Mo., began to make a charge of from 15 to 25 cents on all sums of \$100 or less drawn on country banks and passed through that institution. The wholesale dealers of that city immediately began to receive letters from their customers, stating that they would not pay the charge. The wholesale houses must either pay the exchange charged for the collection of the checks or their customers would withdraw their business from them and buy elsewhere. It comes to this, then, that if the banks persist in charging exchange for such collections, their immediate customers, the wholesale dealers, must pay the bill or lose their own customers, the country merchants. The banks and dealers in a place where exchange is charged for the collection of country checks are at a disadvantage with those of a place where no charge is made. The only remedy is a combination among the banks of the principal money centres.

IN A PREVIOUS NUMBER of the JOURNAL a decision in England was referred to affecting the negotiability of American railroad shares in that country. The certificates bear upon their face the statement that a certain number of shares are registered in a certain name, and on their reverse a transfer form by which the registered owner agrees for value to transfer the shares represented in the certificate. It is clear from this that a re-registration is required on each change of ownership. But in practice the English dealers in shares have disregarded this necessity. It has been the custom for the owner to append his signature to the form, and the certificate has afterwards been treated as transferable from hand to hand as if owned by the bearer. Some time since American railroad shares were entrusted by the executors of an estate to a firm of brokers in London to be sent to New York to be re-registered. Instead of doing this the brokers hypothecated the shares, and afterwards became bankrupt. The executors brought an action to recover the shares from the bank that held them as security. The first decision was in favor of the bank on the ground that the certificates were negotiable securities the title to

which vested in a holder for value. This judgment has been recently reversed on appeal, the higher Court holding that the certificates, notwithstanding the custom to the contrary, were not negotiable, and that an owner wrongfully deprived of them can follow them up and recover them. The effect of this decision will be to restrict English dealings in shares of this character. It will be necessary to have them re-registered to secure a valid transfer. It is very inconvenient to send the certificates across the ocean for registration. Many American railroads provide facilities for registration abroad, and those who desire an English market for their securities will, since this decision, find themselves more than ever obliged to do so.

AS WAS ANTICIPATED in the May number of the JOURNAL, Governor David B. Hill vetoed the Half-holiday bill as it passed the New York State Senate and Assembly. This was Senator Walker's bill, and restricted Saturday half-holidays to June, July, August and September in each year. In his veto message the Governor intimated that he would have signed the modification bill Mr. Rhodes introduced in the Assembly, making the Saturdays of June, July and August whole holidays, but it was then too late to recall the bill and pass it through both Houses with the whole Saturday amendment. Before the veto message was sent in it was known that the Governor would allow the bill to be recalled, but Mr. Rhodes was unwilling, at that late day, to take the responsibility of its passage, as only five days of the session remained in which to act on it. As has been stated before in the JOURNAL, the best way to cure the evil is to test in the Courts the constitutionality of that portion of the Holiday Act making Saturday a legal half-holiday, so far as banking is concerned. It is unconstitutional because it compels banks alone to cease doing business. A test case should be made by protesting a note on Saturday afternoon, and carried to the Court of Appeals of the State, if the banks really believe the law as damaging to them as is asserted.

THE HOLDERS OF five hundred franc notes of the Bank of France have been badly frightened by the discovery that a number of forged or counterfeit notes of this denomination have been put in circulation. The difference between the estimation in which paper money is held by the people of France and those of the United States is shown by the run made on the Bank of France in consequence of the discovery. United States legal-tender notes and National bank notes of various denominations have been counterfeited to some extent, but no one ever heard of a run on the Treasury or on any particular bank from this cause. In two days the Bank of France cashed 23,300 notes of the counterfeited denomination, and of these only one proved to be counterfeit. The whole number of counterfeits discovered was about seventy. The French Government, as it had the legal right to do in

order to allay the excitement and stop the run on the bank, required the latter to cash all notes presented whether counterfeit or not. The justice of this requirement is founded on the principle that the bank exercising the privilege of issuing notes, should either print them in a manner rendering it impossible to counterfeit them, or bear the loss that successful counterfeits inflict on an unsuspecting public. In this matter the bank and the public are equally innocent of the crime, but it is a maxim of law that where the loss must fall upon one of two innocent parties, it should fall on the one by whom the loss was rendered possible. The bank by exercising the privilege of issuing notes—which privilege is for its advantage—made it possible to impose on the public by counterfeiting the notes, and should therefore bear the loss. This principle is too much lost sight of in this country. The Government takes the responsibility of printing all the notes, and should, in like manner with the Bank of France—but of its own volition because there is no one to compel it to do so—redeem counterfeits innocently taken by honest people. Instead of doing so, the Government by inferior work at its Bureau of Engraving and Printing, renders counterfeiting more easy than it is in France. The notes of the Bank of France are prepared with the utmost care and it has hitherto been supposed in a manner impossible to imitate. The counterfeiters, it seems, grow in skill, the same as honest engravers.

THE FEAR that some embarrassment might be caused by a sudden demand on the National bank depositories for the public moneys held by them has subsided to a very great extent. In fact, there was very little foundation for it. Only need of money on the part of the Government would have warranted a demand on the banks, and with a constantly accumulating surplus such a necessity was not likely to occur. Some of the depositories are, however, surrendering their holdings in whole or in part. This is not due to any fear of being inconvenienced by a sudden call upon them, but probably to the wish to realize upon the bonds deposited to secure the Government. If the bonds were four per cents. deposited last fall, and then bearing a premium of about 24 per cent., they have steadily risen under the bond purchasing operations of the Treasury to about 128, a difference of 4 per cent. This is sufficient inducement to many banks that perhaps borrowed the bonds deposited to desire to again secure possession of them. This influence will probably gradually reduce public deposits with National banks to the usual amount at which they were wont to stand prior to the extraordinary offers made by the Secretary of the Treasury last fall.

ON FRIDAY, May 18th, the bond offerings announced by telegraph were \$5,020,100 4½s and \$268,150 4s. Of these, \$5,000,000 4½s at 108 and \$265,000 4s at 127 purported to be the offer of one firm doing business in Philadelphia. Both of these offers were accepted, and it

soon transpired that they were both bogus. The name of the Philadelphia firm had been forged, and the hope probably was that the acceptance of so large an amount of bonds would have some effect on the stock market. For several days previous to the 18th the offers had been light, and the prices at which the bonds were accepted made it evident that the Secretary would receive the bogus offer of that day favorably. The originators of the scheme certainly accomplished the purpose they had in view. The acceptance of the straw bid was widely announced, and it was as good as genuine, so far as the public was concerned, for any effect the schemer might have had in view on Saturday. This little incident, while of comparatively small importance in itself, is but a reflection of the immense power wielded by the Secretary of the Treasury in making bond purchases. It indicates with what eagerness the operations of the Treasury are watched by speculators, and of what importance it is to have advance knowledge of the offers and the acceptances. As a means of keeping down the surplus it is confessedly imperfect.

THE DISAPPEARANCE of a package containing \$41,000 in mutilated currency somewhere between the American Exchange National Bank of New York city and the Treasury Department at Washington was most mysterious, and it is still more mysterious that in the time which has elapsed since its disappearance no trace of the criminal has been discovered. The number of persons who could, in ordinary course, have come in contact with the money is small and it would seem that the search must of necessity have been included within such narrow limits as to preclude the escape of the thief if there was one. This occurrence recalls to mind the robbery in the cash room of the Treasury at Washington, when a package, containing about fifty thousand dollars in \$500 bills of the National Park Bank of New York city, was taken. The bills were such as had been redeemed by the National Redemption Bureau of the Treasury, and being fit for circulation were in course of return to the bank for reissue. A dummy package was substituted but was discovered before it left the cash room. It was some time before the perpetrator of that robbery was discovered. It turned out that Halleck, an employe in the cash room, took the package containing the money and turned it over to a confederate—an outsider—who concealed the stolen property for some time. The size of the bills and the uniformity of denomination led to the discovery of the criminals. The occurrence at the American Exchange National Bank has many points of resemblance to the Treasury robbery to which reference has been made, except that in the more recent case the dummy package appears to have got a little further on its travels.

DURING THE LAST MONTH the price of silver bullion in the London market has dropped lower than ever before known, having reached 41½ pence per ounce—the price for the month varying from 41½ to 42

pence. The decline is due, to a great extent, to the large amount of bills on India offered by the Government of India in London. These bills are payable in silver, and are therefore preferable to bar silver for export to India. The continued low price of silver has had the effect of forcing greater economy in silver mining operations and cheapening production. But this very fact must eventually result in a still lower price for the metal. Unless some international agreement is entered into, it is probable that the tendency will continue toward lower prices. The Act of February, 1878, requiring the Secretary of the Treasury to buy for coinage into silver dollars has had little or no effect in sustaining the market, inasmuch as the purchases are made at the lowest market figures. The purchases by the Treasury have been made with so much regularity and their action on the market is so well understood, that the fluctuations in the price of silver are in no way affected by it. Even if the law should be changed so as to make it mandatory on the Secretary to purchase four millions per month instead of two, the market would soon accommodate itself to the new condition of affairs, and the price in London would fluctuate as before. Free coinage of silver by the combined mints of the civilized nations of the world might possibly have a favorable and permanent effect on the silver market, but there is little hope of such a combination so long as the coinage of the standard silver dollar continues.

IT WAS RATHER a queer defalcation that occurred in the Greek Treasury and it is said made a great sensation at Athens. It seems that, 5,000,000 francs in bank notes more than the books called for were discovered. The chief Cashier was the one at fault. He insisted the Treasury was nearly empty, but the Minister, Tricoupis, thought that could not be so as there had been large collections for duties and taxes, and instituted an inquiry with the result mentioned. Most people with errors in their accounts have a deficiency instead of a surplus in cash. The doubt in the minds of the Greek officials probably is not, as to what was found, but as to how much was not found that ought to have been.

SENATOR SPOONER'S bill, introduced on May 14th, authorizes the Secretary of the Treasury to issue a series of bonds bearing 2½ per cent. interest, payable fifty years from date of issue, the bonds to be exchanged at their face value with interest, for National bank notes, United States legal-tender notes and any other class of bonds now outstanding. The bill also provides that the National debt shall not be reduced below \$1,000,000,000, keeping this amount as a basis of National bank circulation. The legal-tender notes would be rapidly funded into these bonds, but the holders of fours or even four-and-a-halves, would hardly consent to exchange for them without a bonus. Such a law would give an impetus to National banking, but we cannot see how it would reduce the surplus.

THE SURPLUS AND THE NATIONAL DEBT.

Whatever may be the views expressed for or against the reduction of the tariff or in behalf of or opposed to the use of the surplus in increased expenditures, all seem to agree that the payment of the National debt should proceed as rapidly as possible and that the use of all moneys otherwise unappropriated, for this purpose is legitimate and praiseworthy. The bonded debt of the United States is payable at par at certain fixed dates that have not yet arrived, and therefore the only direct way that interest can now be stopped is by making some bargain with the bondholders. The Government can go into the market as a buyer and make, if possible, the same terms as any other buyer. It is not, however, possible for the Government to make the same terms as any other buyer, because what the Government buys, decreases the general stock, whereas when bonds are dealt in by private parties there is no reduction of the general stock but simply a transfer from hand to hand. Government buying constantly increases the percentage of demand to supply in a way totally unlike private dealings in the same bonds. The reduction of the debt by purchase in the market is, therefore a very slow and costly way of payment. The experience so far is that although purchases have been conducted with the utmost circumspection, the bonds have increased gradually in price and are, notwithstanding the time that must elapse before they become payable is growing shorter, reaching a figure they have never touched before.

Another way of using the surplus in the reduction of the outstanding bonded debt is in the purchase of a portion of the interest which must accrue and be paid before the bonds become due. This proposition was first made in the report of the Comptroller of the Currency for 1882. It has been spoken of very highly since both in this country and in Europe, as one calculated to satisfy the bondholders and secure to the Government a profitable use of its surplus money. There have been many modifications of the original plan, but all of them in principle are alike.

Refunding the fours and four-and-a-halves at lower rates of interest and paying a bonus to those who consent to the exchange is simply purchasing a portion of the interest in advance.

This plan is the most favorable to the banks of any yet proposed, and also most favorable to the Government, in providing a profitable use of the surplus. It has not, however, as yet received the consideration of Congress.

Without adverting to the merits of the tariff question, and admitting that an adequate reduction of the tariff may remove the difficulties resulting from a revenue in excess of expenditures, it can only be said that it is very improbable that any serious change in the laws regulating import duties will be made. The discussion, so far, shows a plentiful want of agreement. If the plan for the reduction of the surplus by removal of duties succeeds, there is little doubt but that the final payment of the National debt would be much deferred if not indefinitely postponed, inasmuch as the present high credit of the United States is to a great degree dependent on the surplus revenue of the country, that for other reasons is now so often deplored. If the revenues

were reduced to an extent making them barely adequate to pay the ordinary expenditures, where is the money to come from to meet the bonds due in 1891 and in 1907? It will be no easy matter to again build up another system of taxation after the present one has been destroyed, and under some circumstances it is possible that in 1907 the bonds then becoming due may have to be refunded at higher instead of lower rates of interest. But assuming it, from present appearances, to be highly improbable that any tariff bill will pass making reductions sufficient to appreciably affect the customs revenues, and that the internal revenue system will still be maintained, what is to be done with the continuing accumulation of funds in the Treasury? Is it intended that the country shall be kept for another and still another year in the same suspense as it has been for the year past? The bond-buying plan is no more than a pretense, and no real remedy for the dangers of the situation.

It is possible that when it is found that it is futile to look to a change in the tariff for relief, other measures may be considered. The refunding plan seems to be regarded with some suspicion as likely to benefit the National banks, the much greater benefit it will prove to the Government being entirely overlooked by very many. It is also objected to it that the holders of fours who hold for the long investment will not change their present bargain with the Government for anything else. This difficulty is much exaggerated, because every investor, whatever his condition, is always ready to better his investment, and the situation of the Government is such that it can afford to better the investment of all who hold fours. It is also objected that the plan of refunding at lower rates of interest does not give the Government any advantage as to the ultimate payment of the principal. That is, the new low-rate bonds cannot be called any sooner for payment than those which they replace, and with a constant accumulation of funds the Government, after the refunding has been effected, will be in precisely the same situation as before. The answer to this is three-fold: First, refunding of the fours and payment of the four-and-a-halves would employ the surplus for the next four years. During that time it is possible some notable reduction of the revenue laws might be made. Second, even if no reduction in the revenue laws were made, and the surplus after four years began again to accumulate, the low-rate bonds then outstanding would not command such a premium as the fours now do, and bond purchases could be made to greater advantage. Third, there would be nothing to prevent a further refunding at still lower rates, if it was then found desirable and practicable. Assuming, however, that the foregoing objection is the main one to the plan of refunding bonds at a lower rate of interest without changing the option, the following modification of it might remove this difficulty: If the option of payment is the main thing that is wanting in order to secure the speedy payment of the debt by the use of the surplus, why not purchase this option? Instead of refunding fours into long-term bonds at low rates of interest, why not refund the long-term fours in fours payable at option after a certain less distant date? It can be shown that this can be done for much less than the fours can be purchased, and perhaps for less than the same bonds could be refunded into long-term bonds at low interest. If the four per cent. bonds were payable within two years after September, 1891, or say within five years from September, 1888, namely, after September, 1893, the accumulations of the surplus for the five years could

readily be kept within safe and appropriate limits by the amount expended in securing the exchange of the present fours into those payable after September, 1893, and in paying the four-and-a-half per cent. bonds coming due after September, 1891.

The following computation will show approximately how much this change in the time of payment of the four per cent. bonds would cost. Assume that a four per cent. \$100 bond due July 1, 1907, is on July 1, 1888, worth \$127.9 in the market. At this market rate a purchaser realizes an annual rate of interest on his investment for the whole nineteen years of 2.20-100 per cent. The present value of the principal of the bond is \$65.912, and that of the 76 quarterly payments of \$1 each is \$61.988. Taking a realized rate of 2.20-100 per cent. as a basis, a four per cent. \$100 bond payable in five years should command a premium of \$108.5, of which \$89.61 represents the present value of the principal, and \$18.89 the present value of the 20 quarterly payments of \$1 each, payable on and before the maturity of the bond. Therefore, the Government in exchanging a five year \$100 four per cent. bond for a nineteen year \$100 four per cent. bond should give about \$20 difference. Inasmuch as the five year optional fours could not all be paid as soon as due, the difference paid should not perhaps be as great as this. But to reduce the difference to be paid still further it would be necessary for the Government to give a promise not to reduce interest on the optional fours, but to continue to pay four per cent. on them until all were paid. If this were done, and the holders of the optional fours were relieved of any fear of being forced after the expiration of the five years into new refunding operations, the bonds, although payable after five years, would have a longer average life. Assuming \$700,000,000 of the fours and a surplus of \$100,000,000 a year, the last would not be paid until seven years had elapsed after the date on which they became payable, and the average life of all would be about four years subsequent to 1893. This last period added to the five years after which the bonds became payable would make the new fours virtually a nine year bond. A nine year four per cent. bond computed on the basis of a realized rate of 2.20-100 per cent., as before, should command a premium of \$115, and the difference between a four per cent. bond having nineteen years to run and one having nine years to run would be about thirteen per cent. Assuming, however, the strict difference between the value of a nineteen year four and a five year four, *viz.*, \$20 on the hundred, as the amount that the Government might have to pay to secure the exchange, the total amount required to purchase the option of paying off the fours at any time after five years would be about \$140,000,000. This will be as soon as the Government will have the money to finally begin the payment of their principal, and the amount mentioned as the price of the option is much less than the cost of carrying out either the purchase plan or that for refunding the fours at lower rates of interest.

It does not, however, appear as beneficial to the banks as the plan for refunding at lower rates of interest, as it reduces the time the bonds have to run, but it may, on the contrary, by bringing the debt business to a definite conclusion, put our legislators in a frame of mind favorable to a National bank circulation on some other basis. A large amount of money in the aggregate would be released by it, but the exchanges could be made from time to time, as bond purchases are now made. The offers of terms on which the holders.

of fours would exchange their nineteen year fours for five year fours could be made to the Secretary of the Treasury in the same manner as bonds are now offered to that official for sale. Many holders would be glad to realize a portion of their premium, especially the National banks. It is believed that insensibly, in this manner, a very large amount of fours due in 1907 could, with a profitable use of the surplus, be converted into five year fours, sufficient, indeed, to relieve the Treasury from all fear of undue accumulation of money for many years to come.

COMPTROLLER TRENHOLM'S PLAN FOR A NATIONAL BANK CURRENCY.

Hon. W. L. Trenholm, Comptroller of the Currency, presented in the May number of the *Rand-McNally Bankers' Monthly* a plan for supplementing the present National bank currency. It is in the form of a law, consisting of twenty-seven sections. Briefly, it provides for Unions, among National banks, having in the aggregate not less than three nor more than ten millions of capital. Each bank in the Union is to appoint a Deputy, and the Deputies are to form a Board of Control. When the Board of Control meets and organizes the Union they apply to the Comptroller of the Currency for registration. Each bank in the Union is to furnish to the Board of Control a certified copy of a resolution of its stockholders, authorizing the bank to enter the Union, and binding it to make the notes issued by the Union a first lien on all its assets. The Board has a Chairman and employs a Manager, selected subject to the approval of the Comptroller of the Currency, and the latter, on his part, appoints a Register of Currency, subject to the approval of the Board. These officers are to furnish personal bonds. The Register of Currency is to receive currency from the Comptroller of the Currency, and turn it over to the Manager when the latter furnishes the security required. This security is to consist of unmatured business paper of the banks to the amount of not less than one and one-third times the amount of currency issued in exchange for it. The Manager receives the paper from the banks through the Board of Control, who must approve its solvency, and the Manager then turns it over to the Register of Currency and receives the notes. Before these notes are given to the banks they receive the imprint of a seal of the Union made in two parts, one kept by the Manager and the other by the Register of Currency. There are various regulations providing for the manner in which business shall be done by the Board of Control, the appointment of Deputies, the preparation of incomplete currency in advance by the Comptroller, the withdrawal and replacement of business paper—security—as it matures, etc. In addition to this security there is to be always kept a redemption fund of 5 per cent. with the Treasurer of the United States, and a reserve of United States gold coin in bank equal to 20 per cent. of the outstanding circulation. There are also other provisions for the retirement of these Union notes by the deposit of lawful money in the Treasury for the winding up of single banks that become insolvent, or of Unions the capital of which is reduced from any cause to less than the required amount, or are dissolved in any other way. The notes are not to be issued in excess of three-fourths of the unimpaired capital of the banks in the Union, and they are to constitute a part of the National banking currency now authorized by law. Such is an outline of the plan proposed by

the Comptroller, and it would not be fair to criticize it, as printed in his article, as being more than a sketch wherein very many of the working details remain to be elaborated.

The three sets of machinery intervening between the bank and the Government very clearly indicate what complicated processes will be necessary to carry this plan into practice. The currency comes from the Comptroller at Washington to the Register of Currency, at the location of the Union, and is by him given to the Manager on the receipt from the latter of the bills payable taken as security. The Manager turns over the currency to the bank. A large number of guards and checks, with officers and clerks to enforce them, will be required to run this machinery.

The main feature in the Comptroller's plan is the setting apart of the commercial paper of the banks as security for the notes of issue, which are moreover to be a first lien on all the assets of the banks composing the Union—each bank being to the extent of its assets liable for all notes issued by any of the banks. This unity of interest is the same in principle with that of the Hong system by which the Safety fund banking system of New York State is supposed to have been suggested. In his report for 1876 a former Comptroller of the Currency remarked, "It (the Safety fund system of New York), is said to have been suggested by a system which originated with the Hong merchants in China, by which members contributed to uphold and cherish the weak members of the Hong." As far as the simple sequestration of its bills receivable as security for notes of issue is concerned, each bank might perhaps stand on its own basis without the intervention of a Union. But if the machinery of the Union were not used and every National bank in the country were permitted to issue notes on the security of its bills receivable, placed in the custody of the Government, it would be necessary to have one or more Government bureaus at different points to attend to the paper received, to watch its solvency and to send it back for payment as it matured. Such bureaus would exercise a species of official espionage over most all of the commercial paper in the country, but would still be at a disadvantage in trying to determine its solvency. The Union, in addition to giving increased strength, localizes the inspection of the paper presented by each bank, and has it performed by those best able to judge of its character, *viz.*: representatives of the local banks. The representative of the Government, *viz.*: the Register of Currency, does not pass on the goodness of the security, he merely receives it, watches the date of its maturity and returns it for payment on the receipt of other paper of like amount. The Union draws all the banks into a community, each of them becomes, to a very great degree, acquainted with the business of all the others; each guarantees the notes of the others. The paper of the community is retained at the place where it is made and is conveniently at hand for collection, etc. The Manager and the Register of the Union are the local *media* through whom the Union deals with the Government. In fact, the arrangement is perhaps as convenient and safe a method as could be devised for *setting apart* bills receivable as a security for circulating notes. It may, however, be objected that it confers a privilege upon certain National banks that is not conferred on others—that even the banks in the places where the capital is sufficient to enable a Union to be formed might not desire to lay open their private business to their neighbors. When the banks of a place entered into a Union of the kind proposed there

could be very little competition among them. Nor would the strong banks wish to continually sustain the credit of the weak ones.

In large places, where more than one Union was permitted, there might be competition between Unions, but there would not be such competition as now exists between individual banks. Virtually, therefore, the Union plan, if it went into successful operation, would result in the consolidation of existing banks into larger institutions having the privilege of issuing circulation upon their bills receivable. Although it is probably not so intended, there is nothing in the Comptroller's plan to prevent any National bank with a capital of \$3,000,000 from becoming a Union of itself and having its own deputy, Chairman, Manager, Register of Currency, etc., and issuing circulation on the security of its bills receivable. In practice, therefore, if its capital is sufficient, any bank may issue notes on the security of its general assets, provided it sets apart an adequate portion of such assets to secure the notes. The officers of the Union, whether it consist of one bank or more, including even the Register of Currency, being paid by the banks, would tend to have a higher interest in the latter than in the security of the public. A tendency to make paper for the purpose of securing circulation upon it might creep in, as well as an accompanying tendency to increase banking capital fictitiously, so as to secure the advantages enjoyed by the stronger localities, to smaller places. The sequestration of so much business paper might perhaps interfere with the freedom of large business operations, although this might be compensated for in other ways. There are other objections of similar character that might be suggested, both against the necessity of such a system of banking and against its practical operation.

On the whole, therefore, it does not appear that the Comptroller's plan, if it could be put in practical operation, varies much from or is in any way preferable to one permitting banks with large capital to issue an amount of circulating notes proportionate to capital on the security of their general assets, further providing against loss to the public by a safety fund derived from a tax on the notes and kept in the Treasury at Washington. The machinery required by this last-mentioned plan is much simpler, and consists of the existing regulations guarding the printing, the issue and the redemption of bank notes, together with the present system of bank examinations, enlarged and improved. The objections to both plans are to some extent similar. In both cases the requirement of large capital, whether that of one bank or of a number of banks united for the purpose, would be regarded as a monopoly. The danger of fictitious capital is equal under each plan.

If the National banks of the country are to be permitted to issue circulation on any other basis of security than that of United States bonds deposited in the United States Treasury, we are in favor of a system modeled on the New York State safety fund system, but guarded by the experience gained during the time that law was in operation, in order to avoid the errors then committed, which, more than the principle of the law, were responsible for the apparent lack of success of that system.

How it is Working.—A Cincinnati correspondent writes that some of the local bankers have put their entire surplus into four per cents., and then, when the Government shall advance the buying price to 128, will unload.

*** BANK BOOK-KEEPING.****A TREATISE ON KEEPING AND AUDITING THE BOOKS OF STATE AND NATIONAL BANKS, PRIVATE BANKING FIRMS, SAVINGS INSTITUTIONS, FINANCIAL AGENTS, ETC.**

Prepared for the JOURNAL by an experienced Bank Accountant.

DEPOSITORS' ACCOUNTS.

The Cashier of the new bank at Farmer fills many places which in larger institutions demands the services of other employes. He receives the deposits and pays the checks of customers, and thus acts as Teller, or as both Receiving and Paying Teller. He also fills the position of Book-keeper, and likewise a number of other less important stations, attending to discounts, collections, etc. In fact, he performs, in addition to the usual duties of a Cashier, the clerical service of the bank. He is assisted by a young man who performs some of the work usually done by the Note-Teller or the Discount Clerk, and who also acts as the Runner for the bank—although there is comparatively little of this service to look after. The presence of an assistant, however, is advantageous beyond any real service he may perform. Bank thieves and ruffians are not so ready to try their hands where two able-bodied men are on guard over a bank vault as where they find the opportunity more favorable.

For many days before the doors of the new bank had been thrown open for business the enterprise had formed the basis of many comments by the villagers. The farmers, too, within a wide radius had been apprised of the undertaking, and many were the premonitions and prophecies expressed upon the future of the institution. More than one conservative old farmer, whose prejudice was greater than his intelligence, had been heard to speak disparagingly upon the utility of banks and the genuine integrity of those who conducted them. Bankers, they believed, were a class of wealthy aristocrats who lived well and made fortunes without labor, but out of the pockets of the working people and the farmers. The circumstances in this case were, however, somewhat in favor of the bank—the characters of its promoters going far to mitigate the offense of the business. The previous good standing of the bankers, and the fact that one of the three proprietors was himself a farmer, tended greatly to modify the distrust which, under less favorable circumstances, would have existed against the new venture. These conservative yeomen, considering the characters of those who would stand at the head of the concern, were prepared to indulge in some confidence that a banking business under such management might be honorably conducted. The farmers, they were liberal enough to believe, would not countenance barbarous extortions should they even apply for accommodations to Messrs. Brown & Co.

The opening day of the new bank has arrived, and the scene at the Teller's window in the small but neatly arranged establishment gives evidence that

* A series of papers on Practical Bank Book-keeping: will be continued through the year 1888, or until the subject is exhausted. When required the articles will be illustrated by photo-engraved plates made from pen drawings, showing some new ideas in blank books, and other labor-saving forms.

the business is to have the willing and hearty support of all the best townspeople. Many of the good country-folk had also honored the day with their presence, and brought with them for safe-keeping in the new bank safe enough cash to demonstrate their confidence in the proprietors.

The principal duty of the Cashier during the day consists in making arrangements with those who desire to become depositors, or "dealers," as they are usually called. The work is not arduous or difficult here. Performing so important a trust in a large bank of some metropolis, the care and attention would have been far more considerable. It was unnecessary for the Cashier of the new bank to make special and particular inquiries into the character and standing of every applicant.

The country banker is not, for his protection against fraud, obliged to take as much precaution in opening new accounts with depositors as that observed in the large institutions of the metropolitan cities. Circumstances frequently arise, even in the banks of some of the chief commercial centres, which demonstrate not only the necessity of this precaution, but show that the rule for strict inquiry into the character and standing of proposing dealers is not sufficiently adhered to. A stranger in New York, or in any of the larger cities,

might experience some difficulty in becoming a depositor at any one of the prominent banks. The stranger must be introduced and his respectability vouched for by some one favorably known to the officers of the bank. Even when this is done, the question is often asked :

"About what, as nearly as you can judge, will be the average balance of your account?"

And if the applicant is not able to satisfy the Cashier that the usual balance will be at least a few thousand dollars, the proposition to deposit will be politely declined. There are two important features, as we see, connected with an inquiry concerning the proposition to become a depositor—one, the respectability of the applicant, and the other the average balance of his bank

account. The first is, of course, the most important, but the second, by many of the large concerns, is particularly inquired into. It costs a bank something to take charge of a customer's cash, receive his deposits, and pay his checks. Where the rate of interest is low and there exists no special advantage in call loans, a depositor's account must present a good credit for the average balance in order that the bank shall not be really out of pocket in attending to the business.

The Cashier of the bank at Farmer is not annoyed with considerations and inquiries upon the probable amount any applicant shall have as a general balance, nor is it necessary that he exercise great vigilance in ascertaining the standing and respectability of those who present themselves as would-be depositors. His duties in this respect are comparatively simple—the mere following of an ordinary routine. The applicant presents himself to the Cashier, and makes known his wish. The Cashier may at once ask the applicant to place upon the signature-book the name as it will appear upon

the checks, or may at first request that a deposit-slip be made up. From the deposit-slip the bank pass-book is made out. The slip is put upon the Teller's file and the pass-book is given to the dealer.

The Cashier, now acting as Teller, does not stop to record upon his own books the deposits as they come in, but permits the slips to accumulate until the doors of the bank are closed for the day, when they are taken from the file and entered up, the process followed varying according to circumstances.

Where there is but one Teller, or where the Cashier acts also as the Teller, the amount of business would scarcely be sufficient to require that the cash for paying checks be kept entirely separate during banking hours from that received from depositors. There is no doubt, however, that pursuing such a course, in all cases, furnishes a most valuable key to the detection and quick correction of errors if any are made.

In this connection, we present, on pages 534-535, forms for Teller's Memorandum of Receipts and Disbursements. These are for use where it is desired to enter the slips and test them with an actual count of the cash and checks deposited, and also for the purpose of posting from the memorandum to the depositors' accounts. It is a plan to be recommended for the use of one who has had only a limited experience at the Teller's desk, and which enables him to prove each class of deposits separately. These forms cannot be adopted with any special advantage where the same till is used for both receipts and disbursements. Upon the forms as they appear provision is made for separating under their respective classes the coin, currency or bills, and checks, and also space for writing in full the names of depositors. To keep up a record of this character in a bank where there were any large number of depositors would entail an amount of labor that might reasonably be criticised as unnecessary.

The time required for writing the titles of the depositors' accounts in the memorandum may, however, be saved, though the other features of the plan be adopted. The postings may be made direct from the deposit-slip, and the amounts only, as they appear on the slips, be carried to the memorandum. It is not necessary that the record of deposits should show anything more than simply for the purpose of adding up to test the cash and for posting the sum of deposits for the day to the general account of depositors.

(To be Continued.)

Runs on Banks.—At times, when there is some latent anxiety in the air, "runs" on banks have been known to take place without the slightest justifying cause. Banks have sometimes been threatened because institutions bearing somewhat similar names have been in danger. The credit of a bank has been doubted because a neighboring bank within a few doors has been in difficulties. There is a historical example of a run on a bank because a fruit vendor's stall was overturned near its door, and the assembled crowd could imagine no other cause for the unwonted concourse than that the bank itself could not meet its liabilities. Runs have been caused by malicious persons, acting not from any impulse which might have made them feel a grudge against the bank, but from simple malevolence; in one instance, it is said, from having laid bets that a bank would fail by a given date, and being anxious to save their wagers.

**Notes and Comments on
BANKING PRACTICE.**

**SOME NEW IDEAS ON HOW TO CONDUCT A BANK WITH SUGGESTIONS AND HINTS
REGARDING THE OLD METHODS.**

Written for RHODES' JOURNAL OF BANKING by a Bank officer—supplemented by
occasional contributions from others who are interested in the subject.

Confidence of the Board.—There is one unwritten rule—and of a force all the more binding because it is unwritten—which imposes the seal of secrecy upon the proceedings of the Board of Directors. Yet, necessary and well understood as this rule is, it must, like all rules, be taken with certain limitations. Formal votes and resolutions, special orders, and so on, are properly recorded in the minute-book, which is open to inspection by all proper persons. Again, every bank has a little *coterie* of friends and supporters who are of service in various ways and who are, to a certain extent, entitled to the confidence of the Board.

What is meant by the general rule that the proceedings of the Board are confidential is, that what is said at Board meetings is not to be repeated in the public ear—it is not public property. The reasons of this rule are obvious. At such meetings there is discussed that most delicate thing, a merchant's credit, and that most precious possession which a man has, namely, his reputation and good name. This discussion must necessarily be had, and it is equally proper that it must be full and free. Now, men will not speak their minds freely about each other if they are to be called to account and compelled to make their statements good. Very often a Director may have received important information in such a way that he can reveal neither the information nor the name of his informant, but must content himself with the statement that he cannot consent to the discount of such and such a note. Experienced bank Directors, especially Presidents, often have a favorable or an unfavorable opinion of a man's credit or general solvency, and yet, for the life of them, could not in support of their opinion give a single good reason. Long practice gives a sort of instinctive judgment, as it were, and that wisdom which comes from experience is proverbially said to be the best. All this may seem rather unfair to the person whose credit and reputation are so freely discussed; but how can it be avoided? Business men view these matters from a practical and unsentimental standpoint.

When a note is offered for discount, the main question is: Will it be paid? That question answered satisfactorily, there is really little else to be said. In answering it, however, as has been intimated, there is apt to be a pretty free discussion of all circumstances affecting the responsibility of the parties to the instrument, and such discussion must be confidential in order to be full and impartial.

Balances on Individual Ledgers.—The form here given is intended to show a convenient and compact method of showing the balances of individual

ledgers where a statement of the bank's condition is taken off less often than every day and individual accounts are kept on the old style of ledger and cash book. The form proper, as it is intended to be used, runs only to the line with a * at the top; the rest is intended merely as an explanation:

1888.			EXPLANATION.
MAY	23	683 409 71	Balance at close of business May 23d.
	24	325 134 57	Deposits May 24th.
	25	371 908 31	Deposits May 25th.
	26	450 431 27	Deposits May 26th.
		1 830 883 86	Total Deposits for three days added to balance.
	24	313 198 71	Checks May 24th.
	25	369 643 27	Checks May 25th.
	26	437 897 60	Checks May 26th.
		1 120 739 58	Total Checks for three days.
	23	641 773 41	Balance at close of business May 23d.
	24	413 568 98	Deposits May 24th.
	25	311 733 44	Deposits May 25th.
	26	464 987 35	Deposits May 26th.
		1 832 063 18	Total Deposits for three days added to balance.
	24	321 734 81	Checks May 24th.
	25	430 675 16	Checks May 25th.
	26	477 813 57	Checks May 26th.
		1 230 223 54	Total Checks for three days.
	23	711 414 77	Balance at close of business May 23d.
	24	396 986 74	Deposits May 24th.
	25	319 731 22	Deposits May 25th.
	26	467 697 33	Balance May 26th.
		1 895 830 06	Total deposits for three days added to balance.
	24	401 954 61	Checks May 24th.
	25	376 731 89	Checks May 25th.
	26	431 645 37	Checks May 26th.
		1 210 331 87	Total Checks for three days.
A		710 144 28	Balance on A to L at close of business May 26th.
M		601 839 64	Balance on M to S at close of business May 26th.
T		685 498 19	Balance on T to Z at close of business May 26th.
		1 997 482 11	Total balance.

It will be observed that about three forms can be ruled on one page of an ordinary blank book, so that fifty leaves will show, in close space, the run of deposits, checks and balances for the year. The balances are made up from the cash book, and are proved with the ledgers themselves as often as proof

sheets are taken off, say once a month. In order to save expense the form is ruled without any printing of letters, such as **A** to **L**, etc., though this could be added if desirable.

The form, as here shown, is made up on the supposition that a statement is taken off twice a week—Wednesdays and Saturdays.

The first Book-keeper (**A** to **L**) commences with his balance at close of business on May 28d; to this he adds his deposits for the next three days; immediately below are added together the checks for the three days; the latter total is subtracted from the former, and the remainder, which is the total balance of ledger, is placed opposite the letter **A** in the lowest compartment. The other Book-keepers sum up in the same way, and the sum of the three balances makes up the total balance of the individual ledgers.

An advantage of this method is that one can see at a glance how the individual deposits have been running for any desired length of time.

“Cut Guaranteed.”—In a recent law suit in Pennsylvania (April JOURNAL, page 349), much argument was indulged in as to the exact meaning of the words “cut guaranteed,” indorsed on a check by the bank on which it was drawn. This circumstance shows the importance of carefully choosing phrases which are to be used as technical expressions. The words “cut guaranteed” no doubt conveyed a perfectly distinct and uniform meaning to the bank officers in the particular town where it was the customary expression to signify that the check had been cut under a misapprehension of facts, or, perhaps, through a simple mistake; but when the phrase came up for judicial interpretation it was found that it was susceptible of more than one meaning. The whole trouble could have been avoided by the use of the expression, “cut in error,” which means one thing and one thing only. As Cobbett’s Grammar puts it, it is necessary that one should not only say what one means, but also that it should be said in such a way that one cannot possibly be made to mean anything else.

The Bills Receivable Statement.—In order to prepare regularly for every meeting of the Board of Directors a bills receivable statement as shown in the May JOURNAL (p. 441), it is, of course, necessary that the discount books should be kept in such a way that the statement may be easily and quickly taken off. This can be readily accomplished by using a small ledger ruled in the usual way. The sum total of items being posted twice a week or oftener, as the discount days in any particular bank may require; posted on the debit side as the items are discounted, and on the credit side when they are paid. The difference of the two sides will thus show the exact state of that particular subdivision of the bills receivable at any one time. To make up the statement as shown would require fourteen ledger headings, the postings to which in a business indicated by the statement would take about fifteen minutes a day.

Two Tellers—Transfer Book.—The accompanying forms show the use of a transfer book where a bank employs a Paying and Receiving Teller. It is intended more as a suggestive than a practical form for daily use, as the exact shape it would assume must necessarily depend upon the nature and volume of the business transacted. The theory is that the Second Teller takes in all funds and pays over the same every day to the First Teller, who is the custodian of all the funds. The transfer book serves as a credit book for the

Second Teller and a debit book for the First Teller, so that each is enabled to settle his cash separately, any error in the work of one not interfering with the work of the other. The advantage and necessity of such an arrangement is easily apparent at a glance :

Let us examine the above forms in detail. It will be noticed that the Second Teller began his day's work with a small amount of "cash on hand" (\$715.09); this represents sundry cash items held over for special reasons; as, for example, sight drafts held for arrival of goods, no-protest notes, payment of which is shortly expected, and so on. The other four items are summarized here for convenience; in actual practice they are entered in detail on their proper books. The transfer book is rather an extensive affair, the various items being entered in detail in their respective column or columns, and a

summary made on the outside column. The object of entering the items thus is to make a proof with entries in other books, the out-of-town items proving with the General Book-keeper's original cash entries, the bank's own checks with the individual account books, and the Clearing-House items with the Clearing-House slips. The Clearing-House items are usually sufficiently numerous to require a separate proof-book, and in that case appear on the transfer book only as a total amount. The First Teller begins the day with the cash on hand, and the entries from the transfer book are made on both sides at the end of the day in total amounts. The other out-of-town checks and the bank's own checks which are entered on the disbursement side are cashed over the counter in the regular course of business. All these checks appear in detail on the proper books.

Available Cash.—There is one point of which a prudent Manager never loses sight, *viz.*, the exact amount of his available cash; not simply the cash actually in the vault, but the total amount which can be gotten together at short notice. It is true that under ordinary circumstances, when there is no general demand for money, a well-managed bank might realize enough on its various securities, by merely pledging them, to pay off its liabilities; but, unfortunately, it not infrequently happens that a run on one bank causes general apprehension among its neighbors, for a panic is the most contagious of all things, and there at once ensues a general tightening of funds, and it is hard to gather sufficient on any security. The cash in sight, then, consists first, of the actual cash money in the vault, which is instantly available under any circumstances. Next, may be placed money on call loans, which is usually available at once, though there are times when funds from this source cannot be realized except at a too great sacrifice of values. Balances with correspondents are, by means of the telegraph, within comparatively easy reach, and may be fairly counted as available cash. These three items—cash in the vault, call loans and balances with correspondents—seem to constitute what may be legitimately considered cash in sight, available at any time. When put to the utmost limit of its ability, a bank can, as has been intimated, raise a large amount, probably all that could be required, by pledge of securities on hand; but such means would scarcely have to be resorted to except under very extreme circumstances, for it must be a very persistent “run” that will last against immediate cash payment of all claims on demand. The items specified, however, must be constantly before the Manager's eye. He must know how much and what kind of funds are in his safe, for not every kind of money is available to meet Clearing-House balances; how much is to be realized from call loans under ordinary and under extraordinary circumstances, and how long it will actually require to obtain in cash the amounts outstanding with correspondents. As to the amount of cash money necessary to be carried as reserve, experience shows that the ratio to deposits as fixed by the National Bank Act lies within prudent limits, but it is always better to err on the side of safety; and though the temptation is strong to lend now and then beyond the limit on exceptionally good security, to make a “turn,” as it is called, the careful Manager will always bear in mind that the day of reckoning ever comes unlooked for, and to be taken unawares is to lose to a certain extent that public confidence which is as essential to the life of a bank as the air around us is to our own.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

MISAPPROPRIATION OF TRUST FUNDS BY BANKER—INSOLVENCY—WHEN CAN BENEFICIARY RECOVER IN FULL FROM ESTATE ?

This was an action by Maggie Bowers against Jonathan H. Evans, assignee of Isaac Hodges, to be paid in full from the estate of Hodges the proceeds of certain bonds deposited with him for safe-keeping. The facts were as follows:

In October, 1882, Isaac Hodges was a banker doing business at Platteville, Wis., and in that month the plaintiff deposited with him for safe-keeping, and not otherwise, six United States Government bonds, each of the denomination of \$500, bearing interest at the rate of four per cent. per annum, and being negotiable by delivery. On August 1, 1883, Hodges, in the course of his regular business, deposited the bonds with the National Bank of Galena, Ill., as collateral security on his note for \$7,000 to that bank, with other collaterals. In January, 1884, plaintiff directed Hodges to sell the bonds and immediately remit the proceeds to her at San Buena Ventura, California, where she then resided. On February 7, 1884, Hodges directed the National Bank of Galena to sell said bonds and apply the proceeds on his note to it, which was not then due; and on February 11, 1884, the bank notified Hodges that the bonds were sold for \$3,710.90 and the proceeds indorsed on the note. On February 8, 1884, Hodges closed his doors as a banker, and on February 11th, assigned all his property to the defendant for the benefit of his creditors, and defendant immediately accepted the trust and took possession as assignee, and, at the time of the bringing of this suit had assets of Hodges in his hands to the value at least of \$20,000. On May 6, 1884, plaintiff made proof of a claim against Hodges based on the foregoing facts for the sum of \$3,710.90, which was duly filed, receiving on June 4, 1884, a six per cent. dividend thereon amounting to \$222.65. When Hodges made the assignment, he stated the value of his property and assets assigned by him under oath at the sum of \$226,000, and in like manner stated the amount of his liabilities at \$164,554.11, and listed the plaintiff as one of his creditors in the sum of \$3,710.91, growing out of the facts aforesaid, but Hodges was then, in fact, largely insolvent, as the plaintiff discovered after filing her claim.

On the foregoing facts the Court below found as conclusions of law that the plaintiff was entitled to judgment against the defendant for the sum of \$3,710.91 with interest from February 11, 1884, less the sum of \$222.65 paid June 4, 1884, together with the costs of the action, and that the same be paid out of the estate of Hodges in the hands of the defendant. Defendant appealed.

Held, This case is clearly ruled by the decisions in *McLeod vs. Evans*, 66 Wis., 401, and *Francis vs. Evans*, 33 N. W. Rep., 93, unless those cases are to be overruled. A majority of the Court are not disposed to disturb them or modify the doctrine laid down in them. The equities of the plaintiff to a preference over the general creditors are certainly as strong, if not superior, to the equities of the plaintiffs in those cases. Here the plaintiff left her United States bonds with Hodges for safe-keeping in October, 1882. In August, 1883, Hodges, in the course of his regular business as banker, deposited the bonds with a Galena bank as collateral security for the payment of his note, then made, of \$7,000. The proceeds of the Hodges note were put into his general

* All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL'S Law Department as early as obtainable.

Attention is also directed to the "Law Notes and Comments" and "Replies to Law and Banking Questions," which are included in this Department.

banking business. On February 6th or 7th, Hodges directed the Galena bank to sell the bonds and apply the proceeds on his note, which had been renewed, and which was not then due. The Galena bank informed Hodges that they had sold the bonds and applied the proceeds as directed. The Hodges note is indorsed February 11, 1884, with a payment of \$8,710.90, the proceeds of the bonds. Hodges' bank closed on the 8th of February, and he made an assignment of all his property for the benefit of his creditors on the 11th. It appears that some time in January, 1884, the plaintiff directed Hodges to sell her bonds and immediately remit the proceeds to her in California, where she then resided. It is not pretended that Hodges assumed to act, in directing the bonds to be sold, under any instructions given him by the plaintiff. He simply misappropriated or wrongfully converted the bonds to his own use without the least color of right or authority. They were left with him for safe-keeping merely, and he sold or pledged them to raise money to put into his banking business. This is the fair inference from the testimony.

The question then is, must the plaintiff, whose property has been wrongfully misapplied, stand upon the same footing as the general creditors as to the assets assigned? We think not. We say, as we did in the McLeod case, that it is an irresistible conclusion from the facts that the proceeds of these bonds found their way into the Hodges estate, and went to increase the assets of the bank which were assigned. It seems inequitable that the general creditors should profit by or have the benefit of the fraud committed by the assignor in respect to these bonds, for Hodges never owned them; they were never a part of his estate by right, but by a gross violation of trust amounting to a crime he mixed this trust property with his own, and the assignee seeks to hold it for the benefit of all the creditors. The plaintiff has a paramount right to be first paid out of the assets. This is the doctrine of the cases decided by the Court, which we see no sufficient reason for changing. It is not our purpose, at this time, to enter upon a discussion of the principles upon which these cases rest. Enough is said in the opinions to indicate our views upon that subject. We shall make but one further remark. Among the authorities cited to sustain the decision in the McLeod case was *People vs. Bank*, 96 N. Y., 32, which, as reported, would seem to be in point. In that case the Court says that the object of Sartwell, Hough and Ford in drawing and depositing their checks with the bank was to provide a fund for the payment of the specific notes mentioned, and the engagement of the bank was thus to apply the fund. "Thus a trust was created, the violation of which constituted a fraud, by which the bank could not profit, and to the benefit of which the Receiver is not entitled. * * * * The checks were impressed with a trust, and no change of them into any other shape could divest it so as to give the bank or its Receiver any different or more valid claim in respect to them than the bank had before their conversion." The decision of the same Court in *Cavin vs. Gleason*, 105 N. Y., 256, would seem to be in direct conflict with that in the bank case. The Court, however, say in *Cavin vs. Gleason* that the case of *People vs. Bank* seems to have been misunderstood; that it was not claimed in the latter case that the proceeds of the checks of Sartwell & Co., the petitioners, had not gone into the general funds of the bank, or that they had not passed in some form to the Receiver. In fact, what the case does show upon that point is that these checks were marked paid, and the amounts were deducted from the deposits of the drawers in the bank. But the notes themselves, which the checks were intended to pay, were not owned by the bank, but had been previously sold, and the avails used in its business, as we infer. These are the facts as we understand them. We shall not attempt to reconcile these cases in New York. It is sufficient to say that a majority of this Court adhere to the decisions which we have made and which clearly dispose of every point relied on in the case at bar for a reversal of the judgment of the Court below.

Judgment affirmed.

Taylor and Cassoday, *J. J.* (dissenting): While approving of the "progressive" or "modern rule" of equity as affirmed *in re Hallett's Estate*, 13 Ch. Div., 696, we are forced to dissent from the conclusions of a majority of this Court in *McLeod vs. Evans* for the reasons there given, to the effect that,

in our judgment, that decision was a departure from a well-established rule of equity, and not supported by any well-considered adjudication. It is true that some things were said in *People vs. Bank*, 96 N. Y., 32, and *Peak vs. Ellicott*, 30 Kan., 156, cited in the majority opinion, which seemed to support such new departure, but the report of those cases left the facts upon which each turned so obscure that we were constrained to believe that the trust fund was still on hand, and either capable of identification or traceable into a still present, existing fund, and not, as in these Evans cases, previously paid out to such trustee's or agent's indebtedness; but if otherwise they ought not to be followed. In the case of *Francis vs. Evans* we attempted to expose what we regarded as a fallacy in assuming that, if an insolvent debtor used funds which he held in trust or in a fiduciary capacity in payment of his debts, he thereby benefited his estate, when as a matter of fact the wrongful conversion of the money so held in trust created a new indebtedness of precisely the same amount as the one paid; and hence the result must always be that by such misappropriation the insolvent's volume of indebtedness is not diminished a penny nor his assets increased a penny. We there stated the equitable rule thus: "That rule, as we understand, was never based upon any supposed right of preference of one creditor over another, as sometimes provided by statute, but upon the supposed equitable right of the person whose property has been wrongfully converted to trace and re-take his own property; and when its identity has been lost by being mixed with other funds, then to re-take its equivalent from the property or funds it has so enriched, and to the extent of such enrichment."

Soon after the decision in that case there appeared in the reporters two decisions of Courts of conceded ability upon the very questions here involved and holding the true rule to be substantially as stated above. One was by the Court of Appeals of New York in *Cavin vs. Gleason*, 105 N. Y., 256, and the other by the Supreme Court of Pennsylvania in *Appeal of Hopkins*, 9 Atlantic Rep., 867. In the New York case the authorities are reviewed to some extent by Mr. Justice Andrews, and *People vs. Bank* is explained as not involving the question thus assumed to have been decided; and saying that "we know of no authority for such a contention." The opinion in that case, as well as the conclusions reached by the several judges *in re Hallett's Estate supra*, are so clearly in harmony with our views that we refrain from adding anything; and we have written this merely to relieve ourselves from the responsibility of the decision in this case.

Bowers vs. Evans, Supreme Court of Wisconsin, February 23, 1888.

DEPOSIT OF DRAFT WITH BANK FOR COLLECTION—DELAY IN PRESENTMENT
—FAILURE OF BANK WHERE PAYABLE, HOLDING FUNDS OF DRAWEE
SUBSEQUENT PAYMENT BY DRAWEE UNDER PROTEST—LIABILITY OF
COLLECTING BANK TO DRAWEE FOR NEGLIGENCE.

Alcorn was purchasing agent for Harvey, and in payment of certain sheep bought for the latter drew a draft upon him payable at the Shackamaxon Bank in Philadelphia, in which bank Harvey had sufficient funds to pay the draft, and had left instructions with that bank to honor it when presented. Upon receipt of the draft the seller, on May 27, 1885, deposited it with the Girard National Bank for collection. This latter bank was also located in Philadelphia, about three miles distant from the Shackamaxon Bank, and the time required for a Messenger between them did not exceed thirty minutes. During the 27th and the 28th of May the Shackamaxon Bank paid all demands made upon it, but upon the 29th of May it suspended and closed its doors. Had the draft been presented and payment demanded on the 28th it would have been paid. Instead, however, of sending it by a Messenger on that day, the Girard Bank sent it by mail, and it was received by the Shackamaxon Bank on the day of its suspension, payment was refused, and on June 1st it was returned to the Girard Bank. On the 2d of June Harvey paid to the Girard Bank, under protest, the amount due on the draft, for the purpose of protecting his credit, and thereafter sought to recover back the amount so paid in an action against said Girard National Bank. When he so paid the draft he was aware that it

had been received by the Girard Bank on the 27th of May, and that the Shackamaxon Bank did not close its doors until the 29th.

Held, It needs no argument to show that the presentation by the Girard National Bank was not sufficient, and rendered it liable to the holder of the draft for neglect of duty. This was conceded. This liability grows, not only from the neglect of duty by said bank, but by virtue of the contractual relation between it and the holder. It was the agent of the latter for collection. This suit, however, was brought by the drawee who claims to recover, not by reason of any contractual relation between himself and the collecting bank, for none exists, but by reason of the breach of duty on the part of the latter in not making proper presentation and demand for payment of the draft, it being alleged that the duty of a bank in this respect was of a public character, for the neglect of which any person injured thereby may have his remedy. The particular injury in this case was the loss of the money deposited by the plaintiff in the Shackamaxon Bank to meet the draft, and which would have been so applied had proper presentation and demand been made.

As a general rule, the drawee of a draft cannot be said to be injured by a neglect to present it. The person damnified is the holder. But it is alleged there are circumstances in this case which take it out of the general rule. We are in no doubt as to the facts. The drawer was the agent of the plaintiff for the purchase of live stock. He bought a quantity of sheep at Buffalo, N. Y., and in payment thereof drew this draft on Harvey, his principal, and the plaintiff in this case. This draft was drawn with the authority of Harvey, and may therefore be said to be, substantially, a draft drawn by the plaintiff upon himself. This was the position of the matter on June 1st, when the draft was returned unpaid to the Girard Bank. On the 2d of June the defendant bank sent the following letter to the plaintiff :

Thomas Harvey, Esq.:

PHILADELPHIA, June 2, 1885.

DEAR SIR:—Thomas R. Alcorn's draft upon you for \$700.22 was received through the Bank of North America, of New York, on May 27th. Payment was refused. The Shackamaxon Bank returned to us, and received by us June 1st, on account of failure of the bank.

WHITEMAN, Cashier."

On the same day plaintiff paid to the defendant bank, under protest, the amount due on the draft, and took up and received the same. He knew, when he so paid it, that the Girard Bank had received it on the 27th, and that the Shackamaxon Bank had not suspended until the 29th of May. In any view we may take of the case, therefore, the plaintiff knew, or was chargeable with knowledge, on June 2d, that he was not liable on the draft, even had he accepted it in writing. If, under the peculiar circumstances of the case, we were to treat the draft as a check drawn by the plaintiff upon the Shackamaxon Bank, the failure of the latter, after the time when, by due course of commercial usage, it ought to have been presented, relieved the plaintiff from all liability thereon. On the other hand, treating it as a draft, it is equally clear that no recovery could be had against him thereon.

It was alleged, however, that if not liable upon the draft, the plaintiff remained liable for the sheep which his agent had bought, and for the payment of which the draft was given, and that the payment was not voluntary, inasmuch as he paid under protest and for the purpose of protecting his credit. We are unable to see the force of this proposition. In the first place, the liability of the plaintiff to the holder of the draft for the price of the sheep is more than doubtful. The latter, having received the draft, could not sue the plaintiff upon the original consideration until after acceptance or payment had been refused by the drawee. Neither occurred. It was his duty to collect the draft. He attempted to do so. The plaintiff provided the money to meet it, and that money was lost through the negligence of the holder. We say the negligence of the holder because the collecting bank was his agent, and its negligence was his negligence, so far as the plaintiff is concerned. The holder had his remedy against his collecting agent for the negligence of the latter; but, as between the holder and the plaintiff, the latter was discharged, both as to the draft and the consideration therefor, by the negligence of the former, resulting, as it did, to the prejudice and loss of the plaintiff. This is a familiar principle of commercial law. (Chit. Bills, 854.) Even if we are mistaken in

this we do not see that it affects the case. The plaintiff paid his money upon the draft, *qua* draft, and not upon the debt or consideration which it represented; and he claims now to recover solely for a breach of duty by the defendant in relation to the draft. He paid as a volunteer, unless there be that in the fact of paying under protest, and to protect his credit, which will relieve him from that position. The plaintiff might well have stood upon his legal rights. He was not liable upon the draft, as before stated, and we incline to the opinion that he was not liable upon the consideration for which it was given. Was the payment under protest, and to preserve his credit, sufficient to convert a payment, otherwise voluntary, into an involuntary one? The protest was of no importance in a legal sense. A voluntary payment of money under a claim of right cannot, in general, be recovered back. There must be compulsion, actual, present and potential, in inducing the payment by force of process available for instant seizure of person or property, when the party so paying must give notice of the illegality of the demand, and of his involuntary payment. The element of coercion being essential, mere protest or notice will not change the character of the payment, or confer of itself a right of recovery. (*Peebles vs. City of Pittsburgh*, 101 Penn., St. 304.) However desirable to the plaintiff may have been the preservation of his credit, a voluntary payment for that purpose could not give him a standing, as a party injured, to sue for the negligence of the defendant bank. Nor is it by any means clear that he might not have preserved his credit in some other way. Had he allowed the draft to go back protested, with an explanatory letter, he would doubtless have preserved his credit, as well as the remedy of the holder of the draft against the defendant bank for its negligence. As it stands, the holder has no remedy because he has been paid. The plaintiff has no remedy because he is a volunteer.

Judgment for defendant affirmed.

Harvey vs. Girard National Bank, Supreme Court of Pennsylvania, March 19, 1888.

CERTIFICATE OF DEPOSIT—IN LEGAL EFFECT A PROMISSORY NOTE—MAY BE EITHER NEGOTIABLE OR NON-NEGOTIABLE—WHEN NOT NEGOTIABLE, CERTIFICATE IS SUBJECT TO EQUITIES BEFORE NOTICE OF TRANSFER.

(A certificate of deposit possessing the essential elements, namely, an acknowledgement of a present debt and a promise to pay, is a promissory note. Such a certificate, headed with the name of the banking house where issued, and payable "on return of this certificate properly indorsed," does not contain a sufficient designation of the place of payment to bring it within the meaning of the statute of Alabama, providing that "bills of exchange and promissory notes, payable in money at a bank or private banking house, or at a certain place of payment therein designated, are governed by the commercial law," and the certificate is consequently not governed by the commercial law and not negotiable. Being non-negotiable, it is subject, in the hands of a transferee for value, before maturity and without notice, to all equities existing against the same in the hands of the transferrer previous to notice of such assignment or transfer.)

The Merchants & Mechanics' Bank, as transferee, sued Renfro Brothers upon a certificate of deposit in the following form:

RENFRO BROTHERS, BANKERS.

OPELIKA, Ala., August 6, 1884.

T. E. Ragland has deposited in this bank one hundred dollars, payable to the order of self on return of this certificate properly indorsed.

The defendants pleaded the general issue, payment, set-off, and that they had been garnished before the suit was brought. The Court charged the jury that the paper sued on was negotiable and governed by the law-merchant, and was subject neither to set-off by the makers nor liable to garnishment at the instance of a creditor of the depositor, in the hands of the transferee for value, before maturity, and without notice. Defendants excepted to this charge and carried the case to the Supreme Court of Alabama for review.

Held, Though there are respectable authorities holding otherwise, it may

be regarded as supported by the great weight of authority that a certificate of deposit, possessing the essential elements—an acknowledgment of a present debt, and a promise to pay—is, in legal effect and operation, a promissory note. (*Miller vs. Austen*, 18 How., 218; *Hunt vs. Divine*, 37 Ill., 137; *Drake vs. Markle*, 21 Ind., 433.)

A certificate of deposit may or may not be negotiable. Whether or not governed by the commercial law depends upon the possession of the characteristic requisites to the negotiability of a promissory note, though these may be statutory. Under a statute of Indiana, which provided that "all promissory notes signed by any person who promises to pay money, or who acknowledges money to be due, shall be negotiable by indorsement thereon," it was held that a certificate of deposit was within the statute, and was negotiable. (*Drake vs. Markle*, *supra*.)

Section 2,094, Code of Alabama of 1876, provides: "Bills of exchange and promissory notes payable in money at a bank or private banking house, or at a certain place of payment therein designated, are governed by the commercial law." Therefore, whether the certificate of deposit is governed by the commercial law, depends on the question whether it is payable at a bank or private banking house, or at a certain place therein designated in the meaning of the statute. In order that a promissory note may be brought under the influence of the statute—may be of the character entitling it to special protection afforded by the law to commercial paper—the place of payment must appear on its face, or by a contemporaneous memorandum made on the same paper. (*Crossam vs. May*, 68 Ind., 242.) The place of payment must not be merely inferential or an implication of law. While the place of the date of a note is inferentially the place of payment, such heading is not sufficient to impart the character of commercial paper. The heading of the certificate of deposit, with the names of the bankers by whom issued, and the city or town in which they do business, though payable on the return of the certificate, is not such naming of the place of payment as to relieve the makers—if they desire to claim a return of the certificate—from finding it out and offering to pay it. (*Morse, Bank*, 65.) Such naming is intended to identify the bankers by whom issued, and for the direction of the holder as to the place where they may be found. The purpose of the statute is to require the place of payment—whether at a bank, or private banking house, or other place—to be designated with certainty, and not to leave it to inference or implication. To construe it otherwise would impair the validity of commercial paper. The heading of the certificate is not a sufficient memorandum to bring it within the meaning of a note payable at either of the places prescribed by the statute, and the condition, "on return of this certificate when properly indorsed," was intended to protect the makers against payment without an opportunity to take up the certificate, and as security against payment to a person not entitled to receive it, and operates to make it payable on demand.

The certificate of deposit, not being payable at a bank or private banking house, or certain place of payment therein designated, in the meaning of the statute, is subject to the operation of Section 2,100 of the Code, which provides:

"All contracts and writings, except bills of exchange and promissory notes payable in money at a bank or private banking house, and paper issued to circulate as money, are subject to all payment, set-off, and discount had or possessed against the same previous to notice of the assignment or transfer."

Reversed and remanded.

Renfro vs. Merchants & Mechanics' Bank, Supreme Court of Alabama, February 23, 1888.

BANK AND DEPOSITOR—ASSIGNMENT BY DEPOSITOR WHILE INDEBTED TO BANK ON IMMATURE PAPER—RIGHT OF BANK TO OFFSET INDEBTEDNESS AGAINST DEPOSITOR'S BALANCE, IN SUIT BY ASSIGNEE THEREFOR.

On September 3, 1887, the firm of Chipman & Holt assigned all their property to the plaintiff in trust for the benefit of their creditors. At the time this assignment was made they had on deposit in defendant bank a cash balance of \$3,069.81, subject to their check. Formal demand on the bank for that amount was made by the assignee on the second day thereafter, but

payment was refused. Thereupon, on the 5th of November, this suit was brought by the assignee to recover the amount of such balance.

At the time of the assignment, the bank held several pieces of the assignors' immatured commercial paper, some of which, amounting to over \$7,000, matured after demand and before suit by the assignee, and the bank sought to avail itself of that amount as a set-off in this action. Whether it had a right to do so or not, was the question presented to the Court for decision.

Held, It is clear that, at the date of the assignment, the bank had no lien on or set-off against the amount then on deposit to the credit of Chipman & Holt, the assignors; and, as was held in Marks' Appeal, 85 Pa. 231, the assignee, in virtue of the assignment, and as trustee for the creditors, was then entitled "to assert his and their rights to any property of the assignors which passed by the assignment, against any person claiming by subsequent transfer, attachment, judgment, execution or any other lien." The reason of this is that the status of the assignors' debtors, as well as their creditors, is fixed by the assignment in trust for the latter. Their creditors can neither attach nor levy on any of the assigned assets; nor can their debtors buy up claims against them, and set-off the same against their indebtedness to the assigned estate; but, as was held in Jordan *vs.* Sharlock, 84 Pa., 366, in a suit by the assignee upon a note to his assignor, matured after the assignment, the defendant may set-off a debt due to him by the assignor at the time of the assignment, for the reason that when the note in suit passed to the assignee, by virtue of the assignment, the defendant had a demand against the assignor on which he had an immediate right of action. The defendant bank in this case had no such right at the date of the assignment; and as a creditor of the assignor, holding notes that matured after all the property, including the money on deposit, had passed to the beneficial plaintiff in trust for all the creditors, the bank is in no better condition than they are.

The general principle, as stated in Burrill on Assignment, Sec. 403, appears to be, that "a claim acquired after the assignment cannot be set-off against the assignee, nor a liability existing, but not due at the time of the assignment, even if it becomes due before suit commenced." Beckwith *vs.* The Union Bank, 9 N. Y., 211, recognizes the same principle, and it appears to be a reasonable one. In that case, an insolvent firm, having money on deposit in bank, made a general assignment for the benefit of creditors. Shortly thereafter, but before notice of the assignment, a bill against the firm, held by the bank, exceeding the sum on deposit, matured and was charged by the bank to the account of the firm. In a suit brought by the assignee for the deposit, it was held that as against him the bank had no right to apply the money on deposit to the payment of the dishonored bill, notwithstanding the fact that it was the holder of the bill at the date of the assignment. The reason given is that at the time of the assignment the bank had no lien on the deposit that would have interfered with the right of the assignors to draw the same; that by virtue of the assignment their right to do so passed to the assignee in trust for the creditors. It was also held that to perfect that right notice of the assignment was unnecessary, save only that in default of notice the bank might have so dealt as to have affected his rights by its subsequent acts. We are therefore of opinion that the affidavit of defence is insufficient.

Judgment for assignee.

Chipman & Holt, *vs.* Ninth National Bank, Supreme Court of Pennsylvania, April 23, 1888.

CHECK ON BANK—NEGOTIABILITY—WHEN CONSIDERED OVERDUE SO AS TO SUBJECT HOLDER TO EQUITIES—DELAY IN PRESENTING FOR PAYMENT.

Defendant drew a check in favor of Turner & Co. or bearer, which was by them indorsed to plaintiff. The check was delivered to Turner & Co. on Friday, the 31st day of December, 1886, and was on the same day indorsed by the payees to plaintiff, who paid them cash therefor. Plaintiff immediately deposited the check with his bankers. The following day, Saturday, being a legal holiday, and the next day being Sunday, it was not presented for payment until Monday, January 3, 1888, when payment was refused. On the same

day the check was returned to plaintiff by the bank with notice that payment had been stopped, and plaintiff immediately gave notice of dishonor. In a suit by plaintiff against the drawer, the latter attempted to set up equities against the payees in defense, and also claimed exoneration from liability by reason of delay in presenting the check for payment.

Held, The check upon which suit was brought in this case had been transferred by the payee to a *bona fide* holder for value without notice, and the first defense to it, endeavored to be set up, was an equity existing between the drawer and the payee. While it was admitted that this could not be done in the case of a bill of exchange or a promissory note, it was contended that a check was not thus protected. Without discussing the subject of negotiable instruments generally, it is perhaps enough to say that this very point will be found to be decided in the cases of *Walker vs. Seisse*, 4 Wharton, 252, and in *Laber vs. Steppacker et al.*, 108 Pa. State Reports, p. 81, where this quality of negotiability in checks is expressly affirmed. A similar decision will also be found reported in 98 Mass. Reports, 294, in the case of *Ames and Mirram*.

It was further contended that the delay in the presentation of the check for payment by the plaintiff absolved the drawer. The undisputed facts in the case were, that the check was drawn and delivered on Friday, the 31st day of December, 1886, by the maker to the payee, and on the same day he received from the present holder, the plaintiff, the full amount of it in cash. It was immediately deposited by the plaintiff in the bank in which he kept his account, and on Monday, January 8d, the bank on which it was drawn refused to pay it. As Saturday and Sunday were legal holidays, it was presented on the first business day after it was drawn.

The rule of law on this subject is well stated by Mr. Justice Story, in his work on Promissory Notes, Sec. 16, and has been followed in Pennsylvania in the cases we have already cited. He says: "In the first place, it is a well known rule of law that a bill of exchange or a promissory note taken after the day of payment, or, as the common phrase is, when it is overdue, subjects the holder to all the equities attaching to it in the hands of the party from whom he receives it. But this rule does not apply to a check; for it is not treated as overdue, although it is taken by the holder some days after its date, and it is payable on demand. On the contrary, the holder in such a case takes it subject to no equities of which he has not at the time notice; for a check is not treated as overdue merely because it has not been presented as early as it might be, or as a bill of exchange is required to be, to charge the drawer, or indorser, or transferrer. One reason for this seems to be that, strictly speaking, a check is not due until it is demanded, and, therefore, it is not overdue until it has been presented for payment and payment refused. Hence a *bona fide* holder purchasing a check six days after its date for a valuable consideration, is entitled to hold it against the drawer, and to claim payment from the banker, notwithstanding it had been obtained by fraud from the drawer."

It is true that a check may be retained so long after its date, without presentation, as to cast discredit on it, but no such length of time has elapsed in the present case.

Judgment for plaintiff.

Matthews vs. Foederer, Court of Common Pleas, Philadelphia, April 28, 1888.

PROMISSORY NOTE — STIPULATION FOR ATTORNEY'S FEE — JUDGMENT BY DEFAULT.

The Winship Machine Company sued J. P. Wood & Brothers on a guaranty contained in a promissory note containing a waiver of exemptions, and a stipulation to pay ten per cent. of the face of the note for such reasonable attorney's fees as the payees "may have to incur." Judgment was rendered for plaintiff by default in the Court below, and defendants, claiming that the judgment by default was error, appealed to the Supreme Court of Alabama.

Held, The action is founded on a written instrument, ascertaining the plaintiff's demand, and the judgment is one by default. The note obligates the maker to pay principal, interest and ten per cent. attorney's fees. This we construe to mean ten per cent. on the amount of the note as attorney's fees in

any suit brought to enforce its collection. Such a demand will support a judgment by default for the entire amount due, including the attorney's fees, without the intervention of a jury. (Code 1886, Sec. 2,740; McKenzie vs. Clanton, 33 Ala., 528; Burns vs. Howard, 68 Ala., 352.) It is not a case of recovery for a mere penalty stipulated to be paid by written promise, as in McPherson vs. Robertson, 82 Ala., 459, where it was held error to render judgment by default without writ of inquiry by a jury to determine the amount of damages.

Judgment affirmed.

Wood vs. Winship Machine Company, Supreme Court of Alabama, February 21, 1888.

ALTERATION OF INSTRUMENT—INSERTION OF WORDS "OR BEARER" AFTER NAME OF PAYEE IN A PROMISSORY NOTE BY STRANGER—EFFECT.

In a suit on a promissory note by the payee against the makers, the proof showed that the note, as originally drawn, was non-negotiable in form, but that after it became due the words "or bearer" were interlined after the name of the payee. The interlineation was not in the handwriting of the payee, and he testified that he knew nothing whatever about it, and that it was not made by his procurement or with his knowledge or consent. It was not shown by whom it was made. The Circuit Judge, sitting as Chancellor, found that the interlineation was a spoliation or mutilation of the note by a stranger, and found for the plaintiff. On appeal

Held, If the plaintiff's testimony is true, the interlineation did not alter the legal effect of the note, whether the change should be regarded as material or not; for it is now the settled doctrine of the Courts that an alteration of an instrument by a stranger (an act commonly called "spoliation") has no effect upon the rights or liabilities of the parties. (1 Greenl. Ev., Sec., 566; 2 Daniel, Sec., 1,378 a; United States vs. Spalding, 2 Mason, 478; Bank vs. Roberts, 45 Wis., 378; Brooks vs. Allen, 62 Ind., 401; Langenberger vs. Kroeger, 48 Cal., 147.)

Further *Held* (after discussion of the evidence), That plaintiff's testimony is to be believed.

Judgment for plaintiff affirmed.

Andrews vs. Calloway, Supreme Court of Arkansas, March 31, 1888.

PROMISSORY NOTE—WHAT SUFFICIENT TO CONSTITUTE—PLACING AMOUNT IN FIGURES IN CORNER, BUT OMITTING FROM BODY OF INSTRUMENT—LEGAL EFFECT.

This action was brought upon the following instrument as if it was a promissory note for the payment of money:

\$1,000.

GRASS VALLEY, July 8, 1882.

Three years from date I promise to pay to Daniel Strickland, for value received in United States gold coin, at the rate of 10 per cent. per annual.

DANIEL P. HOLBROOKE,

ELLEN E. HOLBROOKE.

The prayer of the complaint was a judgment against Ellen E. Holbrooke for \$1,000 and interest at the rate of 10 per cent. per annum from date. A demurrer to the complaint being overruled, an answer was filed denying all the allegations of the first-mentioned pleading. The instrument above set out was offered in evidence. It was objected to, but admitted by the Court. It was read, and the plaintiff offered evidence which tended to prove that no portion of the principal sum of money or interest thereon had ever been paid. The defendant offered no evidence whatever. Plaintiff had judgment and defendant appealed.

Held, The question for determination is, What is the legal effect of the alleged promissory note? To us it seems that by the terms thereof, at Grass Valley, on the 8th of July, 1882, Daniel P. and Ellen E. Holbrooke, \$1,000, three years after said 8th of July, 1882, promised to pay Daniel Strickland,

for value received in United States gold coin, with 10 per cent. per annum; or, what is the same thing, at Grass Valley, on the 8th day of July, 1882, Daniel P. and Ellen E. Holbrooke promised to pay, three years after the said 8th day of July, 1882, Daniel Strickland \$1,000 in United States gold coin, for value received, with interest at the rate of 10 per cent. per annum from said last-mentioned date.

Taking the whole instrument in all its terms, it is evident that it was a written engagement, by the signers thereof, to pay a certain sum of money at a certain time, with interest from the date of the instrument for value received. The sum or amount of such an instrument need not necessarily be expressed in words; if expressed in figures or ciphers it has the same effect. (Story, Prom. Notes, Secs. 20, 21.) No particular form of words is necessary to constitute such a writing. The form of it may be varied at the pleasure of the individual executing it, provided that in all cases the form adopted amounts, in legal effect, to a written promise for the payment of money, absolutely and at all events, and it interferes with no statute regulation. (Id., Sec. 12.)

The instrument in question needed no correction or addition to or subtraction of words therefrom to make it a promissory note. It was just as certainly a promise to pay, for value received, \$1,000 in gold coin, three years after a certain date, with interest at a certain rate, as if the \$1,000 had been written after the word "pay" in the body of the note, instead of being written, as it was, before the word "three." For these reasons we are of opinion that judgment should be affirmed.

Strickland vs. Holbrooke, Supreme Court of California, March 20, 1888.

PROMISSORY NOTE—INDORSEMENT—LIABILITY OF INDORSER—ORAL AGREEMENT TO CHANGE.

Renshaw sued Braithwait upon his indorsement of a note made by one Magee to the order of Braithwait, and the latter interposed the defense that when defendant parted with the note to plaintiff, plaintiff agreed not to look to him as indorser. The Court below having directed a verdict for Renshaw for the amount of the note, defendant carried the case to the Supreme Court of Pennsylvania.

Held, The defense that plaintiff agreed not to look to defendant as indorser was to contradict the legal effect of the indorsement; in other words, to reform the instrument. He attempted to do this by his oath alone. This will not do. He was flatly contradicted by the plaintiff. There was only oath against oath, and the note must stand.

Judgment affirmed.

Braithwait vs. Renshaw, Supreme Court of Pennsylvania, April 2, 1888.

PROMISSORY NOTE—NOTICE OF DISHONOR—WHEN INSUFFICIENT TO CHARGE INDORSER—REASONABLE DILIGENCE.

This was an action by the indorsee against the indorser of a promissory note which had been dishonored. The note was made and payable at Cincinnati, Ohio, and was indorsed by the defendant at Newport, Kentucky, for the accommodation of the maker. Subsequently it came into the possession of Hubbard Brothers, of Philadelphia, and then was transferred to the plaintiff. On October 4, 1886, when the note became due, the address of the defendant was at Lewiston, Maine, and defendant had, in the preceding May, had correspondence under that address with Hubbard Brothers. The notices of protest were sent to plaintiff by the bank in which he had deposited it for collection, and were received by him on the 6th of October, 1886, when he was sick at his house. He directed his book-keeper to inquire of Hubbard Brothers for the address of the defendant, and the book-keeper made the inquiry at the office of Hubbard Brothers, of an employe there, and was informed that the address was Auburn, Maine. The notice was then placed in the hands of the attorney of the plaintiff, who immediately forwarded it to the defendant at Auburn, Maine, and it was subsequently returned to him

"uncalled for" in compliance with the special request on the envelope. It was finally received by defendant while at Farmington, Maine, October 22, 1886, by mail from the plaintiff's attorney. Defendant claimed that the notice was insufficient to preserve his liability as indorser.

Held, A careful consideration of the evidence fails to show legal notice to the defendant of the dishonor of the note. The notice, seasonably mailed, was not addressed to a post-office in the city of defendant's residence, nor was reasonable diligence used to ascertain the defendant's proper address.

Hart vs. McLellan, Supreme Judicial Court of Maine, January 27, 1888.

ABSTRACT OF CASES.

PAYMENT OF DRAFT BY ACCOMMODATION ACCEPTOR — RIGHT OF ACTION AGAINST DRAWER FOR REIMBURSEMENT—LIABILITY OF PARTNER WHERE DRAFT ISSUED BY CO-PARTNER WITHOUT HIS KNOWLEDGE.

The right of action of an accommodation acceptor of a draft, and who pays and retires the same with his own means, against the drawer, is for reimbursement, and it rests on the implied or conventional promise of the drawer to indemnify him. By such a transaction the draft has no longer any value as such, and the drawer is entirely discharged of all obligations thereon, his liability being to the acceptor for indemnity, and the draft being an item of evidence.

The fact that a member of a commercial firm, in whose name negotiable paper has been issued by the managing partner, is ignorant of the transaction, and that no entry of the same has been made in the partnership books, will not release him from liability if it is in proof that the transaction had been made for, and had inured to the benefit of, the firm.

The acceptor who has paid such draft can recover legal interest on the promise of indemnity.

Martin vs. Muncy, Supreme Court of Louisiana, February 13, 1888.

ACCOMMODATION PAPER—EXECUTION ON CONDITION—RIGHT OF BONA FIDE HOLDER TO ENFORCE.

A drew a bill of exchange upon B, payable to the order of A, which was accepted by B, and then indorsed in blank by A, the drawer. The bill was drawn for the accommodation of B, and was delivered to B on condition that it should be negotiated at a particular bank. The bank refused to discount it, and B retained possession of the bill. The drawer, A, ascertaining that B was embarrassed, notified the bank not to discount it, and went to the home of B to obtain the paper, but failed to do so. B subsequently transferred the bill to a *bona fide* holder, who took it in payment of a pre-existing debt. Such holder sued A, as drawer, who made the defense that one of the conditions of its execution, namely, that it should be discounted at a particular bank, had not been fulfilled.

Held, That such a condition, unknown to a *bona fide* holder, could not affect the validity of the bill in his hands, and he could recover although the bill was taken for a pre-existing debt.

Frank vs. Quast, Court of Appeals, Kentucky, February 9, 1888.

PROMISSORY NOTE — ALTERATION BY FILLING BLANK AFTER EXECUTION — LIABILITY OF MAKER TO INNOCENT HOLDER—CREDIBILITY OF WITNESS.

If a blank is left in a promissory note by the maker, he cannot be heard to complain if the blank is filled before it reaches an innocent purchaser of the note for value.

Where an action is brought upon a promissory note by an innocent holder for value, and the note offered in evidence is regular and without any interlineations or any evidence of alterations, the maker, testifying to an alteration, need not be credited, as a matter of law, although no other evidence than the note is offered to impeach or contradict him; his manner, the

improbability of his story, and his self-contradictions may justify the jury in wholly rejecting his testimony.

Lowden vs. Schoharie Co. National Bank, Supreme Court of Kansas, February 11, 1888.

PROMISSORY NOTE — PRESENTMENT FOR PAYMENT — EXCUSE FOR NON-PRESENTMENT AND DEMAND—NOTICE BY MAIL—EFFECT OF WAIVER OF PROTEST AND NOTICE—ALTERATION.

1. Where the holder of a negotiable promissory note does not know the place of residence or business of the makers, and makes diligent inquiry without obtaining knowledge thereof, a demand for payment of the makers is excused if he has the note when due ready to be presented at the place where it is dated.

2. Where notice of the dishonor of a note is sent through the mails, directed to the indorser at the post office where the note was dated and indorsed, it will be deemed sufficient when the only evidence about his residence is that he testified he lived in "Jefferson Township," but said nothing, when a witness, concerning his post office address.

3. The placing of "waive notice and protest" over the name of an indorser in blank of a promissory note converts his contingent into an absolute liability.

4. Any material alteration, although innocently done, in the indorsement of a promissory note, made without the knowledge of the indorser, invalidates the indorsement.

Davis vs. Eppler, Supreme Court of Kansas, February 11, 1888.

PROMISSORY NOTE — INDIANA — NOT NEGOTIABLE IF NOT MADE PAYABLE IN BANK—TENDER OF PAYMENT BEFORE MATURITY.

A note, executed in Indiana, but not made payable in bank, is not governed by the law merchant, and defenses thereto, existing before notice of its assignment, are available against such a note in the hands of the assignee. A premature tender of payment of a promissory note is of no effect, as a creditor is not bound to accept money until it is due.

Abshire vs. Corey, Supreme Court of Indiana, February 29, 1888.

PROMISSORY NOTE — DEMAND AND NOTICE OF NON-PAYMENT — WAIVER BY INDORSER BY AGREEMENT FOR EXTENSION.

On the 16th of January, 1877, G executed to B, or order, his promissory note payable one day after date, with interest. On the 9th of March, 1877, B indorsed and delivered the note to M. At the time of indorsement it was mutually agreed between the indorser, indorsee and maker, that the maker should have an extension of time in which to pay the note "to about the 1st of April, 1877." *Held*, That the indorser waived demand and notice of the non-payment of the note.

McMonigal vs. Brown, Supreme Court of Ohio, January 10, 1888.

PROMISSORY NOTES—AGREEMENT BY HOLDER NOT TO SUE—EFFECT.

The payee of two promissory notes agreed with the maker of the notes before they had matured that she would not sue him for the amount thereof so long as he remained the assignee of her husband. *Held*, That this agreement postponed the due date of the notes, and constituted a legal defense to an action upon them brought by the payee while the maker was still assignee.

Brick vs. Campbell, Supreme Court of New Jersey, March 20, 1888.

ACTION ON NEGOTIABLE INSTRUMENT — DEFAULT — JUDGMENT WITHOUT EVIDENCE—KANSAS.

In an action to recover an amount due on a promissory note executed by the defendant, and the defendant fails to file any answer, but makes default,

the plaintiff is entitled to judgment in his favor for the amount claimed, without the introduction of any evidence. (Civil Code, Secs. 108, 128; Cole vs. Hoeburg, 36 Kan., 263.)

Cooper vs. Brinkman, Supreme Court of Kansas, February 11, 1888.

PROMISSORY NOTE — EXECUTION WITHOUT READING — LIABILITY OF MAKER.

In an action on a promissory note the defendant pleaded *non est factum* because he did not read it when he signed it, and did not intend to execute a note containing such terms as the note in suit.

Held, If the defendant signed the note in question without any fraud, deceit, or misrepresentation being practiced on him, by which he was induced to do so, it would be no defense to the suit that he neglected to read the instrument, or have it read to him. (Citing Burroughs vs. Guano Co., 81 Ala., 255; Goetter vs. Pickett, 61 Ala., 387; Guano Co. vs. Anglin, 82 Ala., 492; Dawson vs. Burrus, 78 Ala., 111.)

Cannon vs. Lindsey, Supreme Court of Alabama, February 2, 1888.

LAW NOTES AND COMMENTS.

THE ORIGIN OF BILLS OF EXCHANGE.—Professor Diodato Liroy, of the University of Naples, in an article on "Commerce and Contracts," in the *Journal of Jurisprudence and Scottish Law Magazine* for May, 1888, speaking historically of bills of exchange, says:

"In Athens the idea was already formed of a Bill payable to order, and the Letter of Exchange was not entirely unknown. In a harangue of Isocrates against Pasion we find that a certain Stratocles, when about to set out for Pontus, preferred to leave a sum with a young man of that country then residing in Athens, receiving a letter to his father that he should pay him it in Pontus, and the banker Pasion guaranteed the contract. Cicero, writing to Atticus, asked him if he should convey a sum to his son in Athens by way of exchange or in kind. In ancient times transference by indorsement was unknown, so that it is rightly held that the Bill of Exchange was invented in the Middle Ages, and probably by the Jews."

ATTACHMENTS AGAINST NATIONAL BANKS BEFORE JUDGMENT.—The late Chief Justice Waite, in one of the last opinions delivered by him (case of Butler vs. Coleman, in the Supreme Court of the United States, February 20, 1888), discusses the question of the remedy by attachment against a National bank before judgment, either in a State or Federal Court. Section 5,242 of the Revised Statutes contains this provision: "No attachment, injunction, or execution shall be issued against such association or its property before final judgment in any suit, action, or proceeding in any State, county or municipal Court." This is held to operate as a prohibition upon all attachments against National banks under the authority of the State Courts, and "writes into all State attachment laws an exception in favor of National banks." With reference to suits in the Circuit Courts of the United States, while the prohibition in the statute does not, in express terms, refer to them, it is provided by Section 915 of the Revised Statutes that those Courts are not authorized to issue attachments in common law causes against the property of a defendant, except as "provided by the laws of the State in which such Court is held, for the Courts thereof," and the Chief Justice argues that, as the provision in Section 5,242 eliminates all power of issuing attachments against National banks before judgment from State statutes, there cannot be any laws of the State providing for such a remedy on which the Circuit Courts may act; and that the law in this respect stands precisely as it would if there were no State law providing for such a remedy in any case. The conclusion is therefore reached that under existing laws the remedy by attachment, before judgment, against a National bank is taken away altogether, and cannot be used under any circumstances; and its operation is not confined to cases of actual or

contemplated insolvency, but the prohibition applies equally in suits against solvent National banks.

TAXATION OF NATIONAL BANK SHARES.—The opinion of the Supreme Court of the United States in the case of the National Bank of Redemption against the City of Boston, to recover certain taxes paid, is too lengthy for insertion in full in our pages. The bank paid to the tax collector, under protest in writing, the sum of \$14,464, being an assessment on its shares at \$12.80 per \$1,000 of valuation, which it claimed was illegally assessed, in violation of Section 5,219 of the Revised Statutes, of the Fourteenth Amendment to the Constitution, and of the provisions of the Constitution of the State of Massachusetts. The cause having been submitted to the Circuit Court, without the intervention of a jury, upon an agreed statement of facts, judgment was rendered in favor of the defendant, and the bank took a writ of error to the Supreme Court. The claim that the tax was illegal and in violation of Section 5,219 of the Revised Statutes, because it was imposed upon the shares of the bank at a greater rate than that assessed upon other moneyed capital in the hands of individual citizens of Massachusetts, rested in particular upon the alleged inequality in favor of the tax imposed upon savings banks. The contrast, of which this inequality was the result, was stated to be as follows: That in 1885 a tax of \$1,564,995 was collected upon National bank shares in Massachusetts of the value of \$118,000,000, while upon \$163,000,000 of savings bank deposits in the same year there was collected as a tax only \$815,930. The language of the Court in disposing of the question, adversely to the claim of the bank, is as follows:

“In view of the state of the question, as fixed by the previous decisions of this Court, it is not perhaps very material now to inquire whether this alleged contrast between the taxation of National bank shares and of savings banks in Massachusetts, is real or only apparent. There are several particulars which might be mentioned, and which, when properly allowed for, would certainly reduce the apparent inequality. There is only one, however, which we deem it important to notice. The tax on savings banks is based upon deposits merely. This is because deposits furnish the only capital which is invested and employed. The institutions themselves, although corporations, have no capital stock, and are managed by trustees, not selected by the depositors, but by public authority. The whole amount of the deposits, with the exceptions noted, are subjected to a tax of one-half of one per cent. (The exceptions referred to exclude so much of the deposits as are invested in real estate used for banking purposes, or in loans secured by mortgages on taxable real estate, and also for a certain period so much of the deposits as are invested in real estate, the title to which has been acquired by the completion of foreclosure or by purchase, and such deposits so taxed are otherwise exempt from taxation in the hands of their owners.) On the other hand, the National banks pay a tax assessed upon the market value of the shares as personal property, upon a valuation and at a rate exactly equal to that of all other personal property subject to taxation in the State. But shares of the National banks, while they constitute the capital stock of the corporations, do not represent the whole amount of the capital actually employed by them. They have deposits, too, shown in the present record to amount, in Massachusetts, to \$132,042,332. The banks are not assessed for taxation on any part of these, although these deposits constitute a large part of the actual capital profitably employed by the banks in the conduct of their banking business. But it is not necessary to establish the exact equality in result of the two modes of taxation. The question of the exemption from taxation of deposits in savings banks, as affecting the rule for the State taxation of National bank shares, was very deliberately considered by this Court in the case of *Bank vs. New York*, 121 U. S., 188, 160, and the conclusion reached in that case was reaffirmed in the case of *Bank vs. Board of Equalization*, 123 U. S., 83. In the former case deposits in savings banks in the State of New York to the amount of \$437,107,501, with an accumulated surplus in addition of \$68,669,001 were exempted by the laws of the State from all taxation, neither the bank itself

nor the individual depositor being taxed on account thereof. It was said in that case (page 161): 'However much, therefore, may be the amount of moneyed capital in the hands of individuals in the shape of deposits in savings banks as now organized, which the policy of the State exempts from taxation for its own purposes, that exemption cannot affect the rule for the taxation of shares in National banks, provided they are taxed at a rate not greater than other moneyed capital in the hands of individual citizens, otherwise subject to taxation.' It is impossible, in our judgment, to distinguish the present case from the case of the New York savings banks, or those of Iowa, considered in the case of the Davenport Bank. The principal distinction, indeed, between the case of the New York savings banks and those of Massachusetts, involved in the present inquiry, is that the latter pay a tax of one-half of one per cent. on the amount of their deposits, while the New York banks were exempt from all taxation whatever. The argument on behalf of the plaintiff in error (the bank), indeed, seeks to establish another distinction. It is alleged that in Massachusetts savings banks are permitted to transact a banking business in the way of loans upon personal securities, which assimilates them more closely to National banks, and takes away the reason for the application of the rule to them which was applied to the case of the savings banks of New York. But the difference mentioned, if it exists at all, is immaterial; the main purpose and chief object of savings banks, as organized under the laws of Massachusetts, are the same as those in New York, as considered in the case of the Mercantile Bank. They are substantially institutions, under public management, in pursuance of a great and beneficial public policy, organized for the purpose of investing the savings of small depositors, and not as banking institutions in the commercial sense of that phrase. We adhere to the rule as declared in the cases heretofore decided, which forecloses further discussion as to the present point in this case."

The bank raised a similar objection to the tax in question, founded on a comparison of the taxation of National bank shares with that imposed upon insurance companies and trust companies, the American Bell Telephone Company and the Massachusetts Hospital Life Insurance Company; but the Court held it equally untenable, saying that within the definition of the phrase established in *Bank vs. New York*, 121 U. S., 188, the interest of individuals in these institutions was "not moneyed capital."

The bank also raised the point that the taxation in question was repugnant to the fourteenth amendment to the Constitution of the United States, because it operated to deny to the taxpayer the equal protection of the laws, and also that it was disproportionate and unequal, in violation of the provisions of the Constitution of Massachusetts. As to this, the Court says: "The two branches of this proposition are equivalent; if the tax is not disproportionate and unequal, within the meaning of the Constitution of the State, the taxpayer is not denied the equal protection of the laws within the sense of the fourteenth amendment. The point is fully met by the reasoning and judgment of the Supreme Judicial Court of Massachusetts, in the cases of *Institution for Savings vs. City of Boston*, and *Jewell vs. City of Boston*, 101 Mass., 575, 585."

Lastly, it was alleged on behalf of the bank, that other National banking associations, some located in Massachusetts and others in the several New England States, were the owners of 1,448 shares of its capital stock on which the amount of tax paid was \$2,051, and it was urged in argument that these shares were not taxable by virtue of Section 5,219 of the Revised Statutes. The language of the section is: "Nothing herein shall prevent all the shares in any association from being included in the valuation of the personal property of the owner or holder of such shares, in assessing taxes imposed by authority of the State within which the association is located; but the Legislature of each State may determine and direct the manner and place of taxing all the shares of National banking associations located within the State, subject only to the two restrictions; that the tax shall not be at a greater rate than is assessed upon other moneyed capital in the hands of individual citizens of such State, and that the shares of any National banking association owned by non-residents of any State shall be taxed in the city or town where the bank is located, and not elsewhere." It was contended that no tax is thereby authorized

upon the National bank itself as a corporation, nor upon the personal property of any such, and that, therefore, these shares in the plaintiff bank were exempt from taxation by virtue of their ownership. The Court holds that this is not a reasonable interpretation of the language of the section; that the manifest intention of the law is to permit the State in which a National bank is located to tax, subject to the limitations prescribed, all the shares of its capital stock without regard to their ownership, and the proper inference is that the law permits, in the particular instance, the taxation of the National banks owning shares of the capital stock of another National bank by reason of that ownership, on the same footing with all other shares.

The questions raised by the bank having all been decided against it, the judgment of the Circuit Court was affirmed. Other questions were raised in the case by the counsel for the defense as follows: The right of the plaintiff to sue was denied on the ground that the right of action belonged to the owners of the shares taxed; and the right of recovery was denied on the ground that the payment by the plaintiff was voluntary, and the right of action, if it existed, was alleged to be against the collecting officer, and not the city of Boston. These questions, however, the Court did not examine or decide, resting its judgment upon the validity of the tax.

REPLIES TO LAW AND BANKING QUESTIONS.

Questions in Banking Law—submitted by subscribers—which may be of sufficient general interest to warrant publication will be answered in this Department.

A reasonable charge is made for Special Replies asked for by correspondents—to be sent promptly by mail. See advertisement on another page.

Editor Rhodes' Journal of Banking:

OMAHA, Neb., May 16, 1888.

SIR:—A check is made payable to Rev. C. D. Smith, and endorsed:

“per pro Rev. C. D. Smith,
Henry Brown.”

Is a banker justified in returning the above with the answer, “Endorsement irregular?”

JAMES SMITH, Cashier.

Answer.—No.

Editor Rhodes' Journal of Banking:

CHELSEA, Vt., May 2, 1888.

SIR:—Please tell me in your JOURNAL the distinction between a check and a draft.

C. (Teller.)

Answer.—The chief points of difference are that a check is always drawn on a bank or banker, and no days of grace are allowed. The drawer is not discharged by the laches of the holder in presentment for payment, unless he can show that he has sustained some injury by the default. It is not due until payment is demanded, and the statute of limitations runs only from that time. It is by its face the appropriation of so much money of the drawer in the hands of the drawee to the payment of an admitted liability of the drawer. It is not necessary that the drawer of a bill should have funds in the hands of the drawee. A check in such a case would be a fraud. (Merchants' Bank vs. State Bank, 10 Wall, 604, 647.)

Editor Rhodes' Journal of Banking:

HONESDALE, Pa., May 12, 1888.

SIR:—In the May number of your JOURNAL, in reply to “Banker” of Williamsport, Pa., in regard to the protest of paper maturing on Good Friday, you say: “Good Friday is not a legal holiday in Pennsylvania, and paper falling due and being dishonored on that day should be treated in exactly the same way as if it fell due on any other day.”

You are in error, as you will see by turning to the Act of April 12, 1860, Pamphlet Laws of 1860, page 26, entitled “An Act to declare Good Friday a public holiday,” which provides that “the payment of all notes, checks, bills of exchange, or other instruments negotiable by the laws of this Commonwealth, and becoming payable on said Good Friday, shall be deemed to become due on the secular day next preceding the aforementioned day, on which said secular day demand of payment may be made, and in case of non-payment or dishonor of the same, protest may be made and notice given in the same manner as if such notes, checks, bills of exchange, or other

instruments fell due on the day of such demand, and the rights and liabilities of all parties concerned therein shall be the same as in other cases of like instruments legally proceeded with; provided that nothing herein contained shall be so construed as to render void any demand, notices or protest made or given as heretofore at the option of the holder." * * *

The protest is therefore good on either day, and this optional provision applies also to Decoration Day, which is made a legal holiday by Act of May 25, 1874, Pamphlet Laws of 1874, page 222; but it does not apply to the 1st of January, the 2d of February, the 4th of July, the 25th day of December, "and any day appointed or recommended by the Governor of this State or the President of the United States as a day of fasting or thanksgiving, or for the general cessation of business," as these days are made legal holidays under the Act of April 2, 1873, Pamphlet Laws of 1873, page 58, which expressly provides that they "shall be regarded as legal holidays, and shall for all purposes whatsoever, as regards the presenting for payment or acceptance, and of the protesting and giving notice of the dishonor of bills of exchange, bank checks, drafts and promissory notes, made after the passage of this Act, be treated and considered as *the first day of the week, commonly called Sunday.*"

On these days there is no option in the matter; the protest must be on the day preceding.

E. F. TORREY.

Answer.—We are much indebted to our correspondent for the correction, and cheerfully acknowledge the error. It was caused by the fact that neither in the index nor under the title "Holiday," in Brightly's Purdon's Digest, is any mention made of Good Friday, although all the other holidays are mentioned under that title. On closer examination we find the provision inserted in the chapter on "Promissory Notes." The statement of the law, as given by our correspondent, we indorse.

Editor Rhodes' Journal of Banking:

DEMING, New Mex., May 22, 1888.

SIR:—We have been very much interested in your JOURNAL, and particularly in your Banking Law and Replies to Law and Banking Questions, but would like to trouble you in regard to payment of certificates of deposit. In your first answer, on page 460, May JOURNAL, you say a bank has a right to require a bond of indemnity when holder claims certificate is lost. On pages 793-796, August, 1887, JOURNAL, you give decision of Ohio Supreme Court, which would seem to conflict with your answer referred to above.

Also, can the Cashier of a National bank, who is a notary, protest checks drawn on the bank of which he is Cashier?

SUBSCRIBER.

Answer.—1. There is no conflict between the answer published in the May number and the decision of the Supreme Court of Ohio referred to. In the Ohio decision published in the August, 1887, number, the certificate of deposit when lost was not indorsed by the payee, and as it could not be enforced by any one without his indorsement, no indemnity was held necessary as a prerequisite to a recovery by the payee. The Court in that case, after holding that the certificate was a negotiable promissory note, said: "If a negotiable note payable to bearer, or to order and indorsed in blank, is lost before maturity, it is right that the maker upon paying its contents should be made secure against being compelled to pay the same a second time. But when the lost instrument is not payable to bearer, or is payable to order and is unindorsed by the payee, as no legal title in such a case could pass so as to vest any one with the privileges of a *bona fide* holder in the usual course of trade, no indemnity would be necessary. If one should find a note negotiable by indorsement, and forge the indorsement, the holder by this title could make no valid claim against any one, because the written transfer would confer no title upon him; and if the finder should not forge the indorsement, his action or demand of payment must needs be in the payee's name, and the maker might then plead any judgment already rendered against him on the note in favor of the payee, or any payment thereon made by him to the payee.

"Among the exceptions as to indemnity, it is said by an approved text writer, there are some cases in which the defendant can run no risk, and in which the plaintiff may therefore proceed in a court of equity or law without

giving a bond of indemnity; that is, where the note is not negotiable, and where, though negotiable, it is payable to order and unindorsed, or has been specially indorsed."

In the case in the May, 1888, number it is assumed, of course, that the certificate when lost bore the indorsement of the payee and was not yet due, in which case the bank, as stated, would have the right to require a bond of indemnity before paying the amount to the payee.

2. We think so, in the absence of a statutory prohibition. The National Bank Act contains no provision prohibiting a Cashier from holding the office of notary public and performing its functions. In the State of Ohio, however, the Legislature have enacted that "no banker, broker, Cashier, Teller or clerk of any bank, banker or broker, shall hold the office of notary public in this State."

Editor Rhodes' Journal of Banking:

CANASTOTA, N. Y., May 18, 1888.

SIR:—Banks in this locality do not close Saturday P. M. Should a check presented on Saturday P. M. and payment be refused on same, be protested, or be presented on Monday, or next succeeding business day? Please give answer in June JOURNAL and greatly oblige

SUBSCRIBER.

Answer.—Presentment on Saturday afternoon would be ineffectual, and the check should be again presented and protested on Monday or the first succeeding secular or business day.

Editor Rhodes' Journal of Banking:

HAMMONTON, N. J., May 18, 1888.

SIR:—Will you kindly answer the following questions:

1. Are sight drafts entitled to three days in this State?
2. Can a check, post dated, be protested at maturity, or must three days of grace be given?
3. Should a stock certificate be properly transferred when delivered as collateral on inclosed form of note, or is the transfer and power sufficient in note:

\$1,000.

HAMMONTON, N. J., May 18, 1888.

Three months after date I promise to pay to the order of John Smith one thousand dollars, for value received, without defalcation. As collateral security I have delivered ten shares of the X. Y. Z. Company to the payee above named, which I hereby authorize and empower the holder hereof, on default in payment at maturity, with a view to its liquidation, and all interests and costs thereon, to sell and transfer, in whole or in part, without any previous demand upon or notice to me, either at Brokers' Board or at public or private sale, with the right of becoming the purchaser and absolute owner thereof, free of all trusts and claims, should such sale be made at Brokers' Board or be public. Furthermore, I agree that so often as the market price of these and subsequently deposited securities shall, before maturity of this note, fall to a price insufficient to cover its amount, with ten per cent. margin added thereto, I will, on demand, within two hours thereafter deposit with the holders additional security, to be approved by said holders, sufficient to cover said amount, and margin; and that, in default thereof, this note shall become instantly due and payable precisely as though it had actually matured, and all the foregoing rights to sell and transfer collaterals shall at once be exercisable, at my risk, in case of any deficiency in realizing proceeds. And I further agree that the sureties hereby pledged, together with any that may be pledged hereafter, shall be applicable in like manner to secure the payment of any past or future obligations held by the holders of this obligation, and all of the securities in their hands shall stand as one general continuing collateral security for the whole of my obligations, so that the deficiency on any one shall be made good for collaterals for the rest.

Payable at the People's Bank of Hammonton.

(sg) PETER JONES.

4. Should the indorsement on a check drawn to order be always written, or will a stamp answer the purpose? For instance, when worded, "For deposit to the credit of — payee?"

W. R. TILTON, Cashier.

Answer.—1. Three days of grace are allowed, except when drawn upon a bank or banking association.

2. No days of grace are allowed on a post-dated check. It is payable on demand on the day of its date.

3. The delivery of the stock certificate with the above form would be sufficient to constitute a pledge of the stock, without a registry or transfer being made on the corporate books. In some States, however, an attachment

of the stock for the pledgor's debt would take precedence of the claim of a previous, unregistered pledgee, and in that case the pledgee, by not registering, would encounter that risk.

4. Such a stamp would probably be sufficient, but speaking generally of indorsements, it is always better for the indorser to write at least his name.

A reply to the fifth question asked us cannot be given without further particulars.

Editor Rhodes' Journal of Banking:

WASHINGTON, D. C., May 14, 1888.

SIR:—In your "Replies to Law and Banking Questions" in the May JOURNAL your answer to E. Keator, Cashier, as to when a note dated November 30, 1887, matures has excited some controversy in our bank. Will you kindly explain your method of working, and oblige

R. W. BULKLEY.

Answer.—The question referred to was: "When does a note fall due dated November 30, 1887, drawn for four months?" The answer was: "April 2, 1888."

By the law merchant in the United States a month is construed to mean a calendar, and not a lunar, month in all cases of negotiable instruments, and a note made payable a specified number of months after date falls due on the corresponding day of the last month of the stipulated number, to which is added the three days of grace, unless grace is abolished. Thus a note dated January 1st, payable three months after date, would fall due April 1-4, and the fact that February is a shorter month than January or March would make no difference. So a note dated January 31st and payable one month after date would not be carried over into March, but the month would expire on the 28th or 29th of February, as the case might be, and with grace would be payable on March 3d. In leap years, however, a note dated on January 28th and payable in one month would fall due February 28-March 2d.

The foregoing will explain the method by which the answer referred to was worked out. The note was dated November 30, 1887, and the four months for which it was drawn expired on the corresponding day of the fourth month thereafter, or March 30, 1888, and the addition of three days of grace made the due date April 2, 1888.

Editor Rhodes' Journal of Banking:

SALINA, Kansas, May 15, 1888.

SIR:—In your May number you give some Missouri decisions as to how a party should be considered who wrote his name upon the back of a note before it was indorsed by the payee. We have had some controversy in this bank as to how such a party is regarded in our State, and have concluded to ask your opinion. Have there been any decisions by the Supreme Court of Kansas covering this particular point?

SUBSCRIBER.

Answer.—The question as to the status of a party who places his name on the back of a note before delivery to the payee was first considered in Kansas in the case of *Firman vs. Blood*, 2 Kansas Reports, 496, where it was held that a stranger who places his name on the back of a note at the time it is made, and before assignment to the payee, in the absence of proof, is a *guarantor*. After discussion of the conflicting decisions, the Court says:

"The contrariety of decisions makes it a perplexing and somewhat vexed question. We think the rule making him by presumption a guarantor, while it is equally supported by authority as that making him an original promissor, is more in conformity with reason and the general understanding of business men. It would not be the first impression of any man that one placing his name on the back of a note thereby becomes primarily liable. If all the parties to the note intended this, why not sign the note on its face in the usual way in which such obligations are perfected? The payee of such a note looks only to the signatures on the back of the note as sureties, and the law does all that can be required of it when it gives effect to the intention of the parties at the moment the instrument takes effect and becomes operative.

"If the note is designed for the payee, then he cannot be held as indorser. He is a stranger to the note. He must be held either as an original promissor or guarantor. Nor does the subsequent assignment of the note change the

responsibility of the parties bound. Whatever character they receive when the note is completed, is not changed by the transfer.

"Holding then, that in settling this question for the first time, it is well to follow those decisions that seem best to interpret the original understanding of the parties, we think, in the absence of proof, Wilder and Morrow (the parties who placed their names on the back of the note before delivery to the payee) should be held as guarantors."

In a later case, *Fuller vs. Scott*, 8 Kans., 25, the Court, in its opinion, lays down the following principles :

1. The indorsement of the name of a third person in blank upon the back of a promissory note is *prima facie* evidence of a contract of guaranty.

2. Such an indorsement gives to the holder of the note full authority to fill up the blank at any time, before or during the trial, with the implied contract of guaranty, unless the same is inconsistent with the understanding of the parties.

3. It is necessary that there be a consideration to support the guaranty. An agreement to extend the time of payment of the note is a sufficient consideration to sustain the guaranty.

4. Such an indorsement is such a contract in writing as will import a consideration ; and if the party who made the indorsement claims that there was no consideration for the guaranty, the burden of the proof will rest upon him to show it, and he must show it by a preponderance of the evidence.

5. The said indorsement is such a contract in writing as is valid under the statute of frauds.

6. The guarantor is not released from liability for want of presentment, demand and notice, unless he can show negligence in the holder of the note, and actual loss sustained by himself.

Railroad Bonds as a Basis for Bank Circulation.—There have been a number of propositions to use railway bonds as a basis of bank circulation. If all railroad bonds were issued with a Government guarantee, and were consequently of some uniform character and value, the proposition might be one to be regarded as safe. The great diversity in character and value of railway bonds, as they actually are, would prevent any circulating notes based on such security from having that uniformity of value which forms the chief merit of the National bank notes. There are many railroads whose bonds are to-day above par and, for the time being, such bonds are as good security as can be desired. But all railroad lines are subject to private manipulation, and to the vicissitudes of private business. There are combinations, pools and freeze-outs that seriously affect the value of the bonds of the lines involved and no railroad, whatever its reputation to-day, is absolutely safe from such influences. If railway bonds, as security for bank notes, were permitted by law, each bank would insist that those offered by them as security were as good as those tendered by any other bank. Those familiar with the influences brought to bear on public officers, know that the temptation would be very great in the case of those who had to pass on the value of bonds offered, to establish a conventional standard under which very inadequate securities might be admitted.

THE AMERICAN BANKERS' ASSOCIATION.

CONVENTION OF 1888.

The Executive Council of the American Bankers' Association, at a meeting held on June 2d, selected Cincinnati as the place for the next annual Convention, to be held on Wednesday, October 3d. This choice was made on account of the central location of Cincinnati, and in response to the earnest and unanimous invitation of the bankers of that city expressed through the Clearing-House Association. Last year the annual convention of the Association was held at Pittsburgh, on October 12th and 13th. That occasion was rendered a peculiarly enjoyable one by the warm welcome extended by the Pittsburgh bankers. The meeting at Cincinnati will take place during the Centennial celebration to be held there which opens on July 4th and continues during one hundred business days thereafter.

DEVELOPMENT OF NUMERATION.

The origin and gradual development of the art of numeration is something interesting to the student as well as the practical business man. In the March number of the *Journal of the Institute of Bankers*, London, the subject is discussed at great length in a paper read by Edwin Guthrie, Esq., from which we make copious extracts. The diagram referred to is on the following page:

"It might appear in our day ludicrous to lead off a treatise upon an art, the knowledge of which has become so common as to be essential to social fitness; but we can appreciate the fervent feeling of one engaged in adapting to popular use what had hitherto been among the mysteries of learning.

"In tracing the development of numeration we have to go back over the footsteps of man to his earliest conditions—to the time, indeed, when he first began to feel the necessity of some mode of indicating or symbolizing the idea of numbers.

"The devising of a system of symbolization in numbers and of a formula, whereby the idea of numbers in complex arrangements as well as in vastness might be realized with precision, was as essential to civilized existence as language itself. * * * Researches upon the subject conclusively identify the human fingers and toes as the original instruments of numeration. Therefore the basis is termed a natural one, and at the same time, accidental one.

"According to the authorities quoted, there are very few exceptions—out of some hundreds of the languages of barbarous peoples which have been investigated—to the four scales in the range of expression, namely, the scales of five, ten, fifteen and twenty of the units of numbers. Of these the decimal greatly preponderates. * * * This, by the universal admission of authority, may be regarded as the first rudimentary stage in the development of the Art of Numeration.

"In the examination of these records from an arithmetical point of view, we must be content to sacrifice some of our schoolday veneration of alleged ancient civilizations, at least in this department of learning. For instance, the Assyrian and Egyptian hieroglyphic system of symbolization of numbers was of a primitive character, little, if at all, in advance of actual barbarism. The diagram, which will be found on the following page, illustrates this and exhibits the various systems in the four orders of merit from the most primitive to the crowning Arabic system, ancient in its wonderful conception though modern in its Western popular application.

"It will be observed that the diagram is in tabular form, and therein the six illustrations display four systems of numeration. They are displayed according to their order of merit. First, the Assyrian and Egyptian hieroglyphic are grouped together, being identical in principle. Secondly, the Roman, which is considered but a slight advance upon the preceding group. Thirdly, the Hebrew and Greek, identical in principle, and exhibiting a pronounced advance by Jerusalem and Athens over Babylon and Thebes, as also over Rome. Finally, the Arabic system, standing alone in every sense—alone in affording a system complete in ten simple symbols—the nine digits and the cipher—alone as enabling us to *calculate*, and to indicate the result of our calculations, as against all other systems, which only enable us to count and indicate the result of our counting.

"In the Assyrian and Egyptian columns we observe the repetition of the symbol of one, to indicate all numbers up to nine. From the numbers one to nine, from one to nine figures are needed to express the number required. A new symbol is then devised to indicate the complete scale of the decimal, the unit sign being added to carry the number up to nineteen, * * * the two signs being repeated up to ninety-nine, when a new device is made to indicate the hundred. To express the number, say 876, which requires the use of three unit symbols in the Arabic, twenty-four symbols have to be employed in Assyrian and twenty-one in the Egyptian system of notation.

"The Roman system differs in the fact of employing certain letters of the alphabet rather than special characters. While the Assyrian and Egyptian repeat the unit sign up to the number nine, the Roman repeats it only up to four, and gives a simple symbol for the number five, V, which is not a letter itself, but half of X, the symbol of ten, * * * and so on up to fifty, when, by the use of the sign L, which is not a letter, but half of the letter C (L), which serves for one hundred. Five hundred is indicated by the sign D, which is not a letter, but one-half of the letter M (M), which represents one thousand. Notice the contrast between the Arabic and Roman methods in the last two lines of the diagram. While the number 876 is expressed in Arabic by employing three symbols of the decimal scale, the Roman mode of expressing that number requires nine letters in irregular order. In Arabic, 1,000 is expressed by the unit symbol suitably placed, that is, in the fourth place given it by the three ciphers behind it, while the Roman statement of that number falls away to a single symbol, the letter M.

"In the Hebrew and Greek the letters of the alphabet are employed to indicate the decimal scale, and each successive decimal period up to one hundred, and beyond that with certain marks indicative of tens, hundreds and thousands. In Hebrew, the statement of numbers follows the language, being written from right to left, while in the Greek it is from left to right. They lack the recognition of place value and the cipher; hence computations in those systems cannot be made under arithmetical rules."

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Texas—Merchants' National Bank, Fort Worth.—Attention is directed to the card of this bank on inside page of front cover of the JOURNAL. In the May number we published a *fac simile* letter from the Cashier of this bank, in which the word "leaf" is made by the electrotype to appear as if spelled incorrectly. In the original the word is spelled as it should be, and the indistinctness, as it is printed, was caused by the carelessness of the artist.

New Jersey Savings Banks.—From the report of Hon. Henry C. Kelsey, Secretary of State, it appears that the total number of live savings banks in the State of New Jersey is twenty-six, having, at the close of 1887, total deposits of \$29,060,189, and surplus over all liabilities of \$2,482,129. Number of depositors on January 1, 1888, 105,895. During the last year the number of depositors has increased over 7,000, and the deposits are over \$1,500,000 greater than in 1887.

Dakota Bankers' Association.—The fourth annual Convention of the Dakota Bankers' Association was held at Odd Fellows' Hall, Redfield, on May 23d and 24th. Nearly every bank, mortgage, trust and investment company was represented. Four papers—prepared by well-known bankers in the Territory—were read and various interesting topics discussed. The close of the Convention was celebrated by a banquet at the Foster House. We will give a detailed report of the proceedings in the next number of the JOURNAL.

Kansas—The Kansas State Bank, Scott, is erecting a large brick block, which will contain, besides commodious banking rooms, an opera house, suites of offices, etc. Dr. F. Hall, one of the largest capitalists in the State, has recently become a principal stockholder, while the President and Directors are all substantial business men. When the new block is completed, they will have one of the best appointed banking rooms to be found anywhere, and with capital and business ability, will rank second to no like institution in the West half of the State.

Kansas Bankers' Convention.—About two hundred and fifty of Kansas' bankers and representative business men met at Wichita on May 7th. An address of welcome was delivered by Hon. W. E. Stanley, which was ably responded to by Hon. A. L. Redden, President of the Exchange National Bank of El Dorado. M. W. Levy addressed the Convention on the "Chronology of Banking," and S. S. Sisson, of Harper, portrayed the "Typical Banker." H. W. Lewis illustrated "Safe and Unsafe Banking." In the evening the Wichita Clearing-House Association entertained the Convention at the Hotel Carey.

Wm. C. Knox & Co., Topeka, are known throughout the country as one of the most reliable and enterprising firms in Kansas. Their business, in connection with their Eight Per Cent. Investment Company, has grown to such mammoth proportions that the initial steps have been taken for the erection of a new business block which will be one of the finest in the city, and be ready for occupancy about December 1. As a firm with which to do business, Wm. C. Knox & Co. have no superiors. Their financial career has been marvellously successful, and it is safe to assume that no firm doing a similar business stands higher in the estimation of the general public.

Retired from Business.—William Ernst, for the past fifty-two years President of the Northern Bank of Kentucky (branch), at Covington, Ky., has resigned on account of age and a desire to escape from the active duties of the position. His son, John Ernst, succeeds him. It is matter of record that, during all the financial crises through which the country has passed in the last half century, the old Northern Bank never

was in trouble. Very complimentary resolutions were adopted by the stockholders, setting forth that the bank owed much of its position and prosperity to the integrity, fidelity, personal devotion and efforts of the late President.

The National Bank of Salem, N. Y., now the First National Bank, reorganized in 1885 on account of expiration of charter. On the 1st of May last the old stockholders received a final dividend of 3 per cent., making a total of 208 per cent. paid since the bank ceased to exist, and the affairs of the bank are now finally closed. M. L. Sheldon, President of the First National, entered the old bank as a clerk in 1870. The Vice-President, Jas. Gibson, has been a Director of this bank and its predecessor since 1857. The institution has been greatly prospered in all its changes, having paid dividends—free of all taxes—of 9 per cent. annually for twenty years.

Condition of Omaha National Banks.—From a neat circular issued by the Union Stock Yard Bank, of South Omaha, Neb., we glean a few figures which show the National banks of Omaha to be in a very prosperous condition. These banks—seven in number—have an aggregate capital of \$2,400,000, with surplus and profits of \$721,800 and individual deposits of \$4,664,000. Additional deposits swell the grand total to \$12,000,000, which is a fine compliment to the management of these institutions. The Union Stock Yard Bank, occupying a field peculiar to itself, makes a fine showing. Having special facilities for making collections in Iowa, Nebraska and throughout the Northwest, bankers will do well to avail themselves of the services of this bank.

California—Fresno National Bank.—This institution opened its doors for business on May 1st. It has a paid-in capital of \$50,000, principally owned by local capitalists and business men in that section. The President, J. H. Hamilton, will take an active part in the management of the bank, which, on account of his extensive acquaintance, will be of great advantage. The Cashier, Geo. H. Andruss, commenced his banking life as Teller in the Hanover National Bank, New York city, holding that position for nine years. For the last thirteen years he has been connected with Tallant & Co., San Francisco, Cal., and comes to his new position filled with experience of the highest order. While there were already four banks in this town, there seemed to be a demand for this additional one, which will, without doubt, do a large and successful business.

New York City—American Loan & Trust Co.—Some very important changes have recently been made in the management of this company which will, if possible, place it on a stronger footing than ever. At the late election, Thomas C. Platt, John P. Townsend and O. D. Baldwin were added to the Directory, each one of which is a tower of strength. Mr. Platt is President of the United States Express Company, Mr. Townsend Vice-President of the Bowery Savings Bank, and Mr. Baldwin formerly President of the Fourth National Bank. Mr. R. N. Hazard, President of the Company since its organization, having, on account of ill health, resigned, Mr. O. D. Baldwin was selected for the position. It is safe to assume that the choice could not have fallen upon an abler or more worthy man, and the company is to be congratulated upon its good fortune.

The Great Buffalo Exposition.—Work is well advanced upon the main building for the Buffalo International Fair and Exposition, which is to be held on September 4 to 14, 1888, at Buffalo, N. Y. The schedule of premiums of this Exposition is the most liberal ever offered by any fair in the world. Buffalo is a great railroad and manufacturing centre, and is admirably situated for an International Exposition. Being midway between the seaboard and the great Northwest; having *twenty-four* lines of railway leading out of the city in every direction, over which 248 passenger trains arrive and depart daily; and is the largest American city upon the Canadian frontier and in direct connection with the Dominion by steamship lines and by several trunk lines of railroad, etc. Persons desiring fuller information should correspond at once with Mr. C. W. Robinson, Secretary, International Exposition, Buffalo, N. Y.

Chamber of Commerce of the City of New York.—At the annual election of officers and committees of the Chamber of Commerce, held at the rooms of the Chamber on May 8, 1888, the following officers were chosen: President, Charles S. Smith; First Vice-President, Josiah M. Fiske; Second Vice-President, Cornelius N. Bliss; Treasurer, Solon Humphreys; Secretary, George Wilson; Executive Committee, Morris K. Jesup, Henry Hentz, John H. Inman, Seth Low, Alexander E. Orr; Committee on Finance and Currency, George S. Coe, Cyrus W. Field, John Jay Knox,

Edmund W. Corlies, William P. St. John; Committee on Foreign Commerce and the Revenue Laws, James W. Elwell, Gustav Schwab, William L. Strong, Henry F. Hitch, Anson W. Ward; Committee on Internal Trade and Improvements, Franklin Edson, William H. Webb, Henry F. Dimock, Francis B. Thurber, Sigourney W. Fay. Hon. John Jay Knox, President of the National Bank of the Republic, was elected a member of the Committee on Finance and Currency to fill the vacancy caused by the death of George H. Potts, late President of the National Park Bank.

Philadelphia, Pa.—Wanamaker's Savings Bank.—One of the largest and most prosperous mercantile houses in America is that of John Wanamaker, of Philadelphia. At a recent gathering of his four thousand employes, Mr. Wanamaker stated the result of his profit-sharing plan after the first year's trial, and the figures showed that the grand total of \$109,439 had been distributed among them during the past year over and above salaries. The Wanamaker Savings Bank has also been reorganized, and although a strictly private institution, has done much to stimulate habits of saving. Some of the rules of this bank are as follows:

Sums of two dollars and upwards will be received on deposit, and all deposits may be withdrawn any day.

The rate of interest on all general deposits will be five per cent. per annum. The deposits of those on the Seven Year Honor roll will be considered special deposits, and will have added, beside interest at rate of five per cent. per annum, a special premium of five per cent., providing the full amount remains on deposit an entire year.

The Savings Bank accepts all deposits with the reserved right to close any account at the pleasure of the firm, and the depositor agrees to receive the amount of principal and interest whenever tendered.

Prompt Payment by a Guarantee Company.—Nothing can be more conducive to the increased adoption by banking institutions of the advantages of corporate security for the integrity of their employes than the assurance that a guarantee company will make prompt and equitable adjustment of claims. In this connection, fresh evidence of the well-known reliability and satisfactory methods of the Guarantee Company of North America is afforded by the following letter from a prominent source:

GERMAN-AMERICAN BANK, OF ROCHESTER, }

The Guarantee Company of North America. ROCHESTER, N. Y., April 21, 1888. }

GENTLEMEN:—Cheque of your Co. for \$5,000 in full payment of our claim under your Co.'s Bond of Guarantee on our late defaulting Ass't Cashier has been duly received. I take the opportunity to say that the methods of your Company in their steps to estimate and discharge their liability have been business-like, prompt and liberal, and without any tendency to avail themselves of technical issues—not infrequently the case with private sureties.

The principles of your Co. as evidenced in this transaction, reflect in a highly satisfactory degree upon both the system of Corporate Bonds, and the Guarantee Co. of North America as its exponent. Yours Resp'y, FREDERICK COOK, Pres't.

This was the original company to introduce corporate suretyship into the United States, and its present management is the same as that which first transplanted an established English system of guarantee into America twenty-five years ago. It is the only company strictly confining its business to guaranteeing the fidelity of officers and employes of financial and commercial corporations, and its large and increasing extent of operations attest its well-earned success.

Financial Matters in Congress.—There has been no financial legislation during the past month of any importance. The debate on the Mills Tariff bill has occupied the greater part of the time in the House. In the debate on the bond purchase bill so many delicate and trying financial topics were touched upon, and so much strength was shown in favor of a radical increase in the use of silver, that the more conservative members both of the House and Senate have since appeared to avoid calling up any measures that might start similar discussion. The wonder is that those in favor of currency inflation have not made greater use of their opportunity. They have undoubtedly been restrained by political reasons. The precipitation of any measure favorable or unfavorable to the banks might have great weight in the coming election, and each party is anxious to make no mistake at this critical time. Senate Bill 2,923, for funding United States notes, National bank notes and all outstanding bonds into fifty year bonds drawing 2½ per cent. interest was introduced by Senator Spooner on May 14th. It provides also that the National debt shall not be reduced below \$1,000,000,000. It has been intimated that if the Finance Committee of the Senate would prepare a refunding bill, that would combine the best suggestions in regard to this plan for using the surplus, the bill recommended by them would receive the

support of the Executive. Probably this will be the last resort when it has been found impossible to agree on an adequate reduction of the revenues by tariff legislation.

Minnesota State Banks.—The Hon. M. D. Kenyon, Bank Superintendent of the State of Minnesota, has issued his abstract, showing the condition of the State banks on March 24, 1888, from which the following summary is taken :

RESOURCES.	59 Banks.	57 Banks.	CHANGES.
	March 24, 1888.	Dec. 31, 1887.	
Loans and discounts	\$15,359,022 21	\$15,103,968 10	Inc., \$255,054 11
Overdrafts	79,939 56	73,303 00	Inc., 6,636 47
United States bonds on hand	24,952 37	24,952 37	Unchanged
Other stocks and bonds	978,155 78	1,093,862 56	Dec., 115,706 78
Due from other banks	2,370,842 26	1,652,749 00	Inc., 718,093 26
Banking house, furniture and fixtures	638,673 00	618,105 97	Inc., 20,567 12
Other real estate	333,478 26	346,374 15	Dec., 12,895 89
Expenses paid	102,014 14	99,954 58	Inc., 2,059 56
Taxes paid	68,542 62	3,951 68	Inc., 64,590 94
Checks and cash items	48,700 43	49,730 05	Dec., 1,029 62
Exchanges for Clearing-House	142,966 10	257,437 61	Dec., 114,471 51
Cash on hand	1,485,423 00	1,820,868 48	Dec., 335,445 48
Other resources	531 17	99 76	Inc., 431 41
Total resources	\$21,621,241 19	\$21,085,368 30	Inc., \$535,872 89
LIABILITIES.			
Capital stock paid in	\$5,528,000 00	\$5,453,000 00	Inc., \$75,000 00
Surplus fund	722,131 70	710,410 30	Inc., 11,721 40
Other undivided profits	693,767 75	702,410 20	Dec., 8,642 45
Dividends unpaid	7,566 00	61,322 00	Dec., 53,756 00
Due to depositors	13,264,890 77	12,585,046 20	Inc., 679,844 57
Due to other banks	861,081 40	813,280 73	Inc., 47,799 67
Notes and bills rediscounted	396,687 97	457,645 55	Dec., 60,957 58
Bills payable	146,928 10	296,663 49	Dec., 149,735 39
Other liabilities	247 50	6,589 83	Dec., 6,342 33
Total liabilities	\$21,621,241 19	\$21,085,368 30	Inc., \$535,872 89

In December last the percentage of cash reserve to liabilities was: in banks 12.3 and in cash 13.5 per cent. According to the recent statement the percentage is: in banks 21.4 and in cash 11.2—a total of 32.6 per cent., or a gain of nearly 7 per cent. As the legal requirement is only 20 per cent., the foregoing statement shows the banks to be in a very healthy condition.

New York City—New Vaults and Safes of the Chemical National Bank.—

When the Chemical National Bank found that its increasing business made it necessary to secure additional vault room it gave Herring & Co., of 251 and 252 Broadway, a contract to build, in its newly-acquired quarters fronting on Chambers street, a two-story safe, and it has recently entered into full possession of the immense strong boxes which that firm had constructed for the safe keeping of its securities. These safes are larger and more completely fire and burglar proof constructions than those possessed by any other bank in the country. The lower vault, which is in the basement of the Chambers street building, has an inside capacity of 15 feet in length, 10 feet in depth, and 9 feet in height. The upper vault, which stands on the bank floor, is not so deep, but is otherwise of identical proportions. The vaults are built upon a masonry foundation, and weigh with the safes inside, 259,840 pounds. Of this vast weight 40,685 pounds, or more than 20 tons, are taken by the doors of the two vaults. Each safe has two inner and outer burglar proof doors eight inches thick, and each of the doors is supplied with two combination locks which can be so adjusted that either both or only one is necessary for opening the door. Besides this, each of the outside doors is supplied with a time lock. Part of the upper vault in the rear is set aside as a receptacle for books, but all the rest of the structure is devoted to the safe storage of gold and silver, bonds, and other valuables. The bank officials are satisfied that with such an impenetrable cover for their valuables, and with a building fire-proof in all its parts, the bank's possessions are safe alike from the ravages of fire and the machinations of the

burglar. A representative of the JOURNAL called at the bank a few days since and, under the guidance of Cashier Wm. J. Quinlan, Jr., made an inspection of the new safes, which are ornamental as well as useful. The 20-ton doors were especially fair to view, their ponderous, solid steel bolts and wrought brasswork being peculiarly impressive. Mr. Quinlan was exceedingly courteous and explained, in a very satisfactory manner all the ins and outs of the combinations which make these safes such a marvel of perfection and security. He further stated that the bank was well pleased with the investment and, while not giving the exact cost, it is safe to assume that it would absorb the entire capital of some out-of-town banks to indulge in such a luxury. On the whole, the Chemical Bank's new safes are a triumph of the art which sets the efforts of burglars at naught and robs fire of its destructive powers, and, Herring & Co. are justly proud of their latest triumph.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- Japan is building thirty-four new railroads.
- A new bank is being organized in Macon, Miss.
- The Harris Banking Co. is reported at Harris, Mo.
- The National bank circulation is steadily falling off.
- The banks of Los Angeles, Cal., have over \$18,000,000 on deposit.
- The fifty-nine banks of Boston, Mass., have a capital of \$52,450,000.
- The surplus in the United States Treasury at present is \$100,450,000.
- The National bank circulation now outstanding amounts to \$236,863,790.
- Three new loan and trust companies are being organized in Boston, Mass.
- Prof. Leone Levi, the eminent Italian economist and banker, died recently.
- Chifton Rodes Barret & Co., is a new banking firm reported at Louisville, Ky.
- Oil Springs, Ont., has a thousand or more inhabitants and wants a bank badly.
- The Security Savings Bank, Kansas City, Mo., will increase its capital to \$100,000.
- The Holyoke National Bank, Holyoke, Mass., has added \$7,000 to its surplus fund.
- The Western Investment Bank is a new State Institution reported in Chicago, Ill.
- A new National bank, with \$100,000 capital, has been organized at Leavenworth, Kansas.
- The Pratt County National Bank, at Pratt, Kansas, was robbed on May 11th of \$4,000.
- The Montana gold and silver output for 1887 is valued at between \$23,000,000 and \$24,000,000.
- An exchange says that a loan and trust company will soon be established in San Diego, Cal.
- Lead twenty-five and fifty-cent pieces are said to be in circulation in New Brunswick.
- It is reported that another bank, with \$200,000 capital, is being organized in St. Cloud, Minn.
- Wells, Fargo & Co. have been granted by the Treasury the privilege of shipping goods in bond.
- A savings bank, with \$50,000 capital and 152 stockholders, has been organized in Meridian, Miss.
- The progress toward a currency exclusively made up of silver certificates is quiet but rapid.
- Hereafter the bond offers will not be opened by the United States Treasurer until 12:30 P. M.
- Jay Gould's second son, Edwin, has offered \$20,000 for a seat in the New York Stock Exchange.
- The American Trust Company, with \$100,000 paid-up capital, has been organized at Concord, N. H.

- The Farley Bank is a new institution recently organized at Marquette, Neb., with \$50,000 capital.
- The Mutual Trust Company is a newly organized institution at Omaha, Neb., with \$250,000 capital.
- The Cashier of the First National Bank, St. Paris, Ohio, has been arrested for alleged embezzlement.
- The Bank of Socorro, at Socorro, N. M., has closed its doors on account of alleged defalcation of the Cashier.
- The National Bank of Mexico paid 11 per cent. in dividends last year, against 10 per cent. the year before.
- W. E. Steele & Co., bankers, of Minneapolis, Minn., are erecting a banking house, ten stories high, to cost \$75,000.
- The banking capital of Natchez, Miss., is \$350,000, represented by one National and one private banking house.
- Port Gibson, Miss., is a town which needs a bank, and one with \$50,000 capital would do a prosperous business.
- A City of Mexico special says, that the Wells Fargo Express Co. will soon establish in that city the first American bank.
- The Bank of Yazoo City, Miss., is one of the strongest institutions in that State. Its last statement is very flattering.
- The Lowry Banking Company succeeds W. M. & R. J. Lowry at Atlanta, Ga., with \$600,000 capital, \$300,000 paid in.
- The amount of the defalcation by the Teller of the Union National Bank, Chicago, is reported to be only \$3,700.
- The capital of the Merchants' National Bank, Duluth, Minn., has been increased to \$200,000, and the State National to \$100,000.
- A State bank, with \$30,000 capital, has been organized at Huntington, N. Y. It succeeds the private bank of Jas. M. Brush & Co.
- There are over \$600,000,000 more currency in the United States than there was when specie payments were resumed in January, 1879.
- The United States Treasury Statement of May 31st, shows the total debt to be \$666,315,440.85. The decrease for the month is \$4,000,000.
- Mr. Henry Clews, of New York city, has just published a book of 800 pages, giving his Wall street experiences for the last twenty years.
- Burglars recently entered the First National Bank, Portland, Conn., but all the booty they secured was one dollar's worth of postage stamps.
- Henry F. Royce, Treasurer of the Willimantic Savings Institute, Willimantic, Conn., has been arrested for alleged falsification of accounts.
- The People's Home Savings Bank is a new financial institution in San Francisco, Cal. The Directors and officers are drawn from the best citizens.
- The First National Bank of St. Paris, Ohio, was obliged recently to suspend temporarily on account of alleged embezzlement of the Cashier.
- The Bank of Philadelphia has recently been opened in Philadelphia, Jefferson County, N. Y. It is a State institution with \$25,000 paid up capital.
- Good financiers say there is room in Louisville, Ky., for another bank with \$1,000,000 capital, to be used in the interest of the tobacco trade.
- The First National Bank of Beaver, Pa., which opened about two months since, is doing an amount of business which is surprising even to its projectors.
- An attachment has been granted to the National Park Bank, New York city, against the property of Chas. I. De Baun, the defaulting Assistant Cashier.
- A fourth dividend—making 45 per cent. in all—has been declared in favor of creditors of the Exchange National Bank, Norfolk, Va., failed April 9, 1886.
- President Lathrop E. Reed, of the Capital Bank, St. Paul, Minn., began life as a school teacher in Todd County. He had not as many cents then as he now has

thousands of dollars, and it is told of him that when he went to St. Paul to make his start there he made the journey on foot and carried his boots to save them.

— Valentine G. Hush, formerly a banker of Minneapolis, Minn., is reported to be located at Oakland, Cal., as Manager of the Syndicate Investment Company.

— J. E. Franklin, formerly President of the Portia Bank, Portia, Kans., has organized a bank in Jackson, Mo. It will open as soon as a building can be obtained.

— The Deutsche Bank, Berlin, has increased its capital from 60,000,000 to 75,000,000 marks. This follows a recent increase of 28,000,000 marks by three other banks.

— William L. Bull has been elected President of the New York Stock Exchange. It does not follow, however, that a bull market will be the rule during the year.

— A new institution, styled the Commercial Bank, has been organized in Boston, Mass. Capital, \$250,000. Otis Hinman is President. Cashier not yet announced.

— It is rumored that the Cincinnati National and what there is left of the Metropolitan National Bank of Cincinnati, Ohio, will consolidate and take a new name.

— The Senate Finance Committee reported adversely on the fractional currency bill, but has reported a bill reducing the fee on postal notes for less than \$1 to 1 cent.

— The Comptroller of the Currency has declared another dividend of 12 per cent. in favor of the creditors of the National Bank of Sumter, S. C., making in all 62 per cent.

— The statement of the incorporated banks of St. Louis, Mo., at the close of business April 30th, shows an increase in resources of \$2,600,000 over the January statement.

— The total amount of money on deposit in the banks of New York city on June 1st, to the credit of the Chamberlain was \$2,584,000, of which the Importers & Traders' National Bank held \$1,274,000.

— The last published statement of the National banks in Gainesville, Tex., shows: Gainesville National Bank, surplus and profits, \$194,000; First National Bank, \$54,000; Red River National Bank, \$14,000.

— W. P. Rice, of Kansas City, Mo., in conjunction with capitalists from New Bedford, Mass., is organizing a new bank to be known as the Manufacturers' National Bank, \$150,000 capital, in Leavenworth, Kansas. It will open July 1st.

— President Gustave Jarrecki, of Erie, Pa., President of the Humboldt Safe Deposit & Trust Company, which failed for \$423,000, and who was indicted two years ago for taking deposits knowing the institution was insolvent, has been acquitted.

— The Directors of the Hudson County National Bank, Jersey City, N. J., have elected Cornelius Zabriskie as temporary President, to act during the absence of ex-Congressman A. A. Hardenbergh, who has gone to Europe for a brief pleasure trip.

— Three ex-bank Presidents of Cincinnati, Ohio, are now in the brokerage business. They are John Cochnower, S. S. Davis and J. F. Larkin. Charlie Rice, who is associated with Davis, used to be in a bank, and was later with George Eustis. When he and Davis opened up at the new stand he called it the "junk shop," because they dealt in every thing, from a comb and needle to Kansas lands.

— North & Co., bankers, of Unadilla, N. Y., recently commemorated the establishment of their banking house twenty years ago. The business was started by North, Siver & Co., in 1868, afterwards became known as the "Banking House of Thomas G. North & Co.," and since 1885 by its present title. The firm has a cash capital of \$25,000 and surplus of \$6,500, and a total deposit line of \$107,000. It was an inflexible rule of one of the founders of this bank "that, under no circumstances, shall stocks be bought or speculation engaged in," to the faithful observance of which the success of the institution is largely due.

NOTICE.—The July Edition of the **BANKERS' DIRECTORY & COLLECTION GUIDE** is well advanced and delivery will begin on or about July 8th. Corrections received up to June 25th will appear in the new Edition. Handsomely bound in red cloth, \$2 a copy; indexed by States on edge, \$3 a copy.

The best arranged and most reliable Directory published. *Order in advance if you want a copy.*

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

A PLAN FOR NATIONAL BANKING—"NATIONAL SYSTEM" REPLIED TO.

Editor Rhodes' Journal of Banking:

SIR:—I think that your correspondent, "National System," misunderstands some of the provisions of the plan for a banking association suggested by me in the *JOURNAL* for April. The intention was that the members of the Board of Control should have a life tenure on the office, in every respect as the Supreme Justices now have. This would involve but one—or at most two—appointments during any one Administration, and the appointees would therefore not necessarily be of like politics. But who has ever accused the United States Supreme Court of yielding to political prejudice? No more would such a Board of Control as I have proposed. Under our form of Government no men are chosen with more regard for capability, irrespective of party lines, than the Judges of the United States Supreme Court. An error in these appointments would result in most serious popular clamor and caustic criticism of the Chief Executive. As evidence, note the wide-spread comment upon the recent nomination of Mr. Fuller as Chief Justice. The selection of the members of a Board of Control of the finances would be attended with the same care and mature deliberation for precisely the same reason.

Quite true it is that capable men cannot be secured upon small salaries, and it is also true that the parsimonious policy of the Government would not permit it to pay large ones; but "National System" will observe that I provided for the payment of all expenses of the Association by a tax upon the individual banks thereof. The compensation of the Board could therefore be made little less than munificent by reason of the greater profits accruing to the banks under this system than under the present one. The Government would not be asked to contribute a farthing. The fact, too, that the appointments are for life, with the future provided for beyond a doubt, would serve as an additional inducement to capable men. With these provisions, does it not seem probable that capable men can be had? Even with the contemptible salaries now given the Judges of the Supreme Court, does "National System" presume to say they are incapable men?

While at first glance the Board of Control may seem to have great power, it will, upon thoughtful consideration of the subject, be found to possess far less opportunity for creating financial disturbance than has the Treasury Department of the United States during the past year. By liberal or restricted purchases of bonds money may have been made plentiful—or rather, more correctly, the knowledge that more money was being put in circulation would have made credit more elastic, thus increasing the circulation many times the real cash addition—or scarce, as the case might be, with far-reaching influence upon all financial transactions and upon the enormous amount of capital invested in fluctuating securities, while the responsibility for such disturbing influence could not be laid at the door of any one. Even assuming the Board of Control to possess a similar power, is it to be for a moment presumed that men of such high character as they would necessarily be, with their future assured, would be more likely to abuse their power and prove recreant to such a trust? I think not. But the fact is, the power of this Board would be but little more than that of the Comptroller of the Currency, and certainly not more than that of the Governors of the Bank of England, which institution is the pulse of the financial world.

How the Board of Control could "make or break a bank" I cannot comprehend. True, it could deny a bank the right to organize as a member of the association upon the grounds of superabundance of banking capital in the place of its projection, but this would be only a salutary measure, for the good alike of the projected bank and those already established. I cannot see but that such action would be a wholesome restriction upon the system of free banking, which is not by any means perfection. Right here in Chicago, at least two banks have gotten themselves into trouble during

the past year by reason of their overstepping the bounds of conservative banking, which action was directly traceable to the plethora of banking capital in proportion to legitimate business. Every prosperous business community has its busy season and its dull season. In times of activity money becomes scarce, discount rates advance, there is a demand for more banking capital, and new banks are organized to meet this demand. Then comes the reaction; business falls off, discounts diminish, the cash in the bank vaults increases and the reserve mounts rapidly far above the legal point. The fear of diminished dividends and consequent censure takes hold of the officials, and they commence to accept questionable paper and float enterprises in which the only tangible things are the stock certificates. The result is not difficult of discernment, as many of your readers no doubt know by experience. Would it not be wiser, then, to restrict the banking capital and allow sound banks to inflate their circulation during times of financial stringency, while the banking capital of the community should remain at such a point that illegitimate practices during dull times would not be necessary to provide for the regular dividends. In view of these facts, I cannot understand how the refusal of the Board of Control to grant a bank a charter will tend to break banks. No more will the granting of charters make banks. Neither, as might be supposed, would the inflation of its circulation by one bank injure those whose stability would not warrant it. This inflation would take place only in times of stringency, when every bank has decreased its reserve nearly to the safety point. Were they then able to obtain relief elsewhere for their needy customers, they would not be obliged to go beyond this safety point in their endeavors to save themselves and their customers by further advances.

In the above I think I have considered all of "National System's" objections, and as that was the sole object of this letter, I will conclude by merely adding, as a post-script to my former communication, that I ascribe the continued and remarkable freedom from banking failures in Chicago during this last decade to the zeal of each bank to preserve, at all hazards, the financial integrity of the community. The plan I have proposed would make this mutual interest National. H. M. JORALMON.

CHICAGO, May 22, 1888.

PAY OF BANK EXAMINERS.

Editor Rhodes' Journal of Banking:

SIR:—We are not much on the literary order in this part of the country, and don't do a very great deal in the way of reading books and magazines; maybe it would be better for us if we did; but we take your JOURNAL because of the lively way you have of handling things and hitting the nail on the head, so to speak. I think you are a little off on the silver question; but that's not what I wanted to drop you a line about. We were reading what you said last time about the National Bank Examiners and the pay they get. We all thought it was more than that; but if your figures are correct, we guess that friend of yours down at Flagstaff, Arizona, had better hold on to his \$1,000 per the year and stay where he is. Living's pretty cheap down there, and there's not much to do in the way of traveling. You see a Teller's job in a good bank is a pretty solid place, and unless the institution goes under (which isn't likely with money at Arizona rates), it's apt to last. And then there's the chance of being Cashier, or maybe President, or a fellow might set up a little bank of his own. Whereas a Bank Examiner's is more or less a political job, and the civil service rules don't apply, and wouldn't do much good if they did. And then, too, a man's away a great deal from his wife and family, which is a very bad thing, especially if he has growing boys. Besides, it's pretty wearing on a man, jogging all around the country and putting up at all kinds of hotels, good, bad and indifferent. No, indeed; I'm with you on that, Mr. Editor. Stick to your desk, old Flagstaff, and you'll get there just the same. You keep the bank and the bank will keep you every time. INQUIRER.

PASSAIC, N. J., May 17, 1888.

THE BOND-BUYING BUSINESS.

Editor Rhodes' Journal of Banking:

SIR:—I send you a brief argument on the bond-buying. I have always believed that the practice of paying extra bonus for terminating the contract for the forbearance to demand money loaned the United States both unlawful and unwise, and I think I demonstrate it. If you read the Act of June 30, 1882, in regard to the

purchase of bonds, you must conclude that the word "purchase" there is used in the sense of to redeem, or to pay.

Although the use of the word is unfortunate, it does no more than authorize the Secretary of the Treasury to pay bonds now which mature in 1907; and I think that that must have been the intention of the Senate; for surely it is a monstrous proposition "to borrow money on the credit of the United States," as the Constitution authorizes, and then proceed "to pay the debt" by giving the debtor more than he agreed to take.

As the bonds draw interest from date, the Act is essentially an offer to allow men, who might think their money worth more than they are receiving, to receive the par of their investment and devote it to something better.

That theory is sound, financially and legally, but the Secretary of the Treasury has departed from it, or been led by Congress later to do so.

The "present worth"—arithmetically, but not economically or catalectically speaking—of a sum of money, payable at a future time, and drawing interest from maturity, instead of from date, is whatever sum of money will, at the current, or market rate, yield the face of the bond, or note, by the said future time.

If money is worth four per cent. per annum, a bond drawing four per cent. interest from date, payable in 1907, is worth par now—its "present worth" by the rule.

If, then, the Secretary pays, as he has, \$7,964,677 for \$8,306,450 in bonds, he pays out a sum which, at four per cent., would yield by 1907, the year the bond matures, \$14,178,000.

It is true that the interest of this \$8,306,450 would, by 1907, be \$5,044,860, or a total of \$11,349,810, which \$7,964,677 will pay now, but the money with which the Secretary buys them, in advance, is taken from the people, taxpayers, to whom it is worth at least four per cent., and perhaps six per cent. In fact, in the commercial world here sixty and ninety day bills are always discounted more than six per cent., so in the late operation the Government has collected and paid eight millions to save paying eleven in 1907, while the eight millions, if left in the channels of business, would likely be worth to the business world \$17,000,000 by the year 1907. The expedient of buying bonds at the tremendous premium of twenty-seven per cent.—nearly equal to seven years' interest on the bond—may be necessary to prevent the panic which might result from accumulation of money in the Treasury, but it ought to be manifest that it were better not to collect it—not to take more from the business world than is necessary to carry on public affairs "economically administered."

This argument gains in force when we consider that all tax is waste and wear of the social machine, and that the Government is not a business enterprise.

Nothing speaks more eloquently for a reduction of taxation than this bond-buying.
WASHINGTON, D. C., May 18, 1888. W.

Good, if True.—The *Boston Post* says that Mr. T. Brigham Bishop of Florida, formerly of Boston, is negotiating with counsel of his creditors, with a view of returning to the city of his early triumphs, re-entering the banking business and eventually settling in full his financial obligations.

How Bank Tellers Amuse Themselves After Hours.—"Do you know what a good many bank Tellers and men who handle large amounts of gold and silver coins do at the close of the day?" queried a former bank clerk. "Go home, probably." "Yes, but not until they have looked through their metal cash for rare coins." "Do they ever find any?" "Certainly they do some times, though not so very often. It is a lottery. The fact that some of the rarest of American coins have been picked up in ordinary circulation keeps their eyes peeled. They know values pretty well, and the sanguine cherish the hope of unearthing one of the missing dollars of 1804, which are worth \$200. In fact as high as \$800 has been offered and refused. The half-dollar of 1862, representing Liberty seated, is in circulation. It is worth \$1.75. The quarter of 1854, with rays, is also occasionally met. It brings \$2. Among silver dollars of recent coinage, the 1856 dollar, representing Liberty seated, is the most valuable. It is worth \$15. The 20-cent piece of 1877 is worth \$1.50 and of 1878, \$1.25. The valuable dimes and half-dimes were all coined before 1846. The silvered 3-cent pieces of 1873, with the large star, bring 60 cents; the copper 2-cent pieces of the same year are worth the same. The flying-eagle cent of 1856 sells for \$1. All the gold coins coined prior to 1896 command premiums."

THE WORLD OF FINANCE.*Current Opinion on Monetary Affairs from many sources.***IT WAS A GREAT WEEK.***[Journal, Kansas City, Mo.]*

The average daily clearings of the associated banks of Kansas City last week (May 21st) were over \$1,600,000. The total clearings for the week were \$9,655,647. If all the banks in the city were members of the Clearing-House Association the record would have been about \$10,000,000.

But the record as it stands is marvellous. It is not approached by that of any other city in the country with a population equal to that of Kansas City. There are no two cities in the country of about equal population with Kansas City whose combined clearings for a week amount to as much as Kansas City's.

Our clearings were large a year ago this time when the real estate activity was at its height and the weekly transfers amounted to much more than they do now. But with no wild boom, though a wholesome activity in the real estate market, the clearings show a steady increase over those of 1887.

BANK OF MONTREAL.*[Monetary Times, Toronto.]*

Considerable discussion has been taking place as to this bank contenting itself simply with paying a dividend of 10 per cent. for the year, without declaring a bonus. Many inconsiderate remarks have been made with regard to this. A bonus in the nature of things is a gift, bestowable from time to time, which may or may not be bestowed as circumstances fall out favorably or otherwise. There are such numerous chances and unforeseen events in the course of a year's banking when carried on on such an enormous scale, as is the case with our leading bank, that no one can be surprised at these chances sometimes going against the bank as at other times in its favor. It is to be regretted that the position and management of the bank have been criticised, evidently with strong political bias, in one of our daily journals. A reasonable and business-like discussion of bank management would be serviceable. But when the criticism becomes a mere matter of politics it ceases to be either serviceable or worth serious notice. The stockholders and customers of the Bank of Montreal have evidently rated this criticism at its true value.

THE SUPPLY OF CONVENIENT CURRENCY.*[Commercial Bulletin, New York.]*

There is gratifying assurance that there is to be less difficulty for some time to come in securing the most convenient forms of currency from the Sub-Treasuries than has been the case during recent seasons. The delays and inconvenience suffered in this connection have exercised no inconsiderable influence upon the financial condition of the entire country. The magnitude of the demand upon the currency-issuing branches of the Government can be inferred from the fact that the amount of the new silver certificates of denominations of one and two dollars, which has thus far been issued, is greater than the average circulation of one and two-dollar legal-tender notes maintained during previous years. The void in the circulation of the country, created by the retirement of the old ones and twos, was so great that it is not surprising that the Treasury has been unable to meet at all times the demands made upon it. It is nevertheless a striking commentary upon the imperfection of the laws governing the matter, that within the past two years there have been times when the Government has been unequal to meet the requirements for each of the various forms of currency, except the useless silver dollar, which has unceasingly continued to multiply, without reason or benefit, and to overflow vault after vault.

The demand for silver certificates of small denominations for legal-tender notes and for fractional coin has all at times been such that the applicants were required to submit to serious delay. Besides the unusual demands upon the Treasury for currency,

the past year has witnessed unprecedented demand for internal revenue stamps, which are printed from the same presses, and restrict the capacity of production of Government notes. There are several circumstances pointing to decreased difficulty hereafter in meeting the demand for convenient forms of currency. Larger appropriations are available for the purpose, the demand for other securities, stamps, etc., produced by the same forces, has decreased, and the rate of production of notes is now more rapid than ever before, and is likely to continue as long as the demand warrants.

There is no apparent reason why the Sub-Treasuries should not, with much greater facility than during the past year, meet the requirements of all localities for the forms of currency best adapted to their wants. Many of the difficulties heretofore encountered are, however, inherent in a system which the country is rapidly outgrowing, and their complete and permanent correction will require statesmanship and a reformation of the entire system by which the supply of currency is regulated.

SECURITY OF BANK CIRCULATION.

[Daily Indicator.]

In further expounding our proposed plan for creating a sound and enduring basis for bank circulation, we will refer to Mr. Farwell's modified proposition. Although at first he proposed railroad bonds, with State, county and municipal bonds as substitutes for Government bonds, subsequently he abandoned the railroad bond feature. In this we claim that he let go the most desirable and practical part of his plan and retained that which was least useful. The same objection will lie against State, county and municipal bonds that is to be found with reference to Government bonds. They are simply debts representing merely money expended, and are based upon no existing property. As compared with railroad mortgage bonds, they stand in the relation of a note which the maker may or may not be able or willing to pay to a mortgage upon property good for the lien upon it, and whose value depends not upon the solvency or honesty of the debtor.

We have seen States repudiate their debts, and cities default, to the serious loss of creditors. We have had no National repudiation, but that is not impossible. A political revolution would sweep away all obligations of the Government. In the case of first mortgage railroad bonds no such possibility exists. Except by act of God, or through most exceptional circumstances, the property which such bonds represent will not be destroyed. The bonds stand for fixed capital which will be as enduring as the country itself.

Limiting the issue of such bonds, as we propose, to 80 per cent. of the actual amount of cash expended for construction of the road, it is apparent that no safer basis for the issue of bank notes could be devised. The intrigues and ambitions of men seeking political power could have no effect upon the value or the stability of such securities. Political mismanagement would not shade their value a penny. Take the experience of the public with reference to the bonds of the city of Elizabeth as an illustration of the danger of making municipal bonds a basis for circulation. These bonds were eagerly taken by investors, and for a time were considered gilt-edged securities. Their fate our readers well know. Had any National bank made a deposit of those bonds with the Government to secure its notes, every depositor would have lost his money. The Government, to have secured itself against loss, would have taken all the assets of the bank with which to redeem the notes.

That the plan of making railroad bonds the basis of bank circulation has not received greater consideration in Congress, we believe, is due to the persistency of the banks in advocating an issue of a long-termed low-interest bearing Government bond. We were prepared to accept this plan in preference to nothing, but we are satisfied that no measure looking to any extension of the public debt will ever become a law. Nor do we think it ought to, for such a plan has nothing to commend it, and everything to condemn it. It neither cures nor arrests the disease, but lengthens out the torture.

A Kansas Bank's Enterprise.—A neat little enameled leather *porte-monnaie* for silver, with the legend indorsed on it—"I do business with the Farmers & Merchants' Bank, Bird City, Kansas," is the way that enterprising bank pleases its patrons. Although unincorporated, this bank has an individual responsibility of \$100,000.

NEW BANKS, CHANGES IN OFFICERS, FAILURES, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

New National Banks.—The Comptroller of the Currency furnishes the following statement of National banks organized since our last report. Names of officers and further particulars regarding new National banks will be found under their proper State headings in this list.

- 3874—Monongahela National Bank, Pittsburgh, Pennsylvania. Capital, \$250,000.
 3875—Holdrege National Bank, Holdrege, Nebraska. Capital, \$50,000.
 3876—First National Bank, Miamisburg, Ohio. Capital, \$100,000.
 3877—First National Bank, Port Allegany, Pennsylvania. Capital, \$50,000.
 3878—First National Bank, South Amboy, New Jersey. Capital, \$50,000.
 3879—First National Bank, Canon City, Colorado. Capital, \$50,000.
 3880—First National Bank, Burr Oak, Kansas. Capital, \$50,000.
 3881—Watkins National Bank, Lawrence, Kansas. Capital, \$150,000.
 3882—Prairie State National Bank, Chicago, Illinois. Capital, \$300,000.
 3883—First National Bank, Harrington, Delaware. Capital, \$50,000.
 3884—Citizens' National Bank, Green Bay, Wisconsin. Capital, \$100,000.
 3885—First National Bank, Hays City, Kansas. Capital, \$50,000.
 3886—First National Bank, St. Ignace, Michigan. Capital, \$50,000.
 3887—First National Bank, Snohomish, Washington Territory. Capital, \$50,000.
 3888—First National Bank, Dighton, Kansas. Capital, \$50,000.
 3889—Preble County National Bank, Eaton, Ohio. Capital, \$50,000.

ALABAMA.

BIRMINGHAM.—Central Trust Co.; succeeded by Birmingham Trust & Savings Co. — Steiner Bros. is new firm here.

MOBILE.—R. H. Manly & Co. are in business here.

UNIONTOWN.—J. H. White & Co. are in business here.

WARRIOR STATION.—Bank of Warrior has been opened here. President, T. M. Davidson; Cashier, J. A. May.

ARKANSAS.

HARRISON.—Boone County Bank; H. C. King, President, in place of R. S. Armitage.

HOT SPRINGS.—A. B. Gaines is in business here.

LITTLE ROCK.—Exchange National Bank; Assistant Cashier, J. W. Mandelbaum.

SPRINGDALE.—Springdale Investment Co. has been incorporated. Capital, \$10,000.

President, L. D. Petross.

CALIFORNIA.

ELSI NORE.—Exchange Bank; W. F. Baird, Cashier, in place of Larkin Wright.

FRESNO.—First National Bank; E. F. Dabnan, Cashier, should be E. F. Oatman. — Fresno National Bank; Vice-President, H. D. Colson; Cashier, Geo. H. Andrus.

LOS ANGELES.—California Bank; H. C. Witmer, Vice-President, in place of M. L. Wicks.

SAN DIEGO.—San Diego National Bank; no Assistant Cashier in place of G. W. Jones.

SAN PEDRO.—Bank of San Pedro has been recently opened. Capital, \$15,000. President, Wm. G. Kerckhoff; Vice-President & Cashier, Geo. H. Peok, Jr.

SANTA CRUZ.—City Savings Bank; Assistant Cashier, W. D. Haslam.

COLORADO.

CANON CITY.—First National Bank has been authorized to commence business. President, Stephen Smith Talcott; Vice-President, J. H. Peabody; Cashier, Alfred M. Hawley.

CENTRAL CITY.—J. Mellor & Co.; in liquidation.

DENVER.—City National Bank; C. S. Burwell, Assistant Cashier, in place of P. C. Conroy. — Denver National Bank; no Assistant Cashier in place of E. L. Raymond.

— State National Bank; E. L. Raymond, Vice-President, in place of C. S. Howard;

Fred. C. Kilham, Cashier, in place of E. P. Wright; Acting Cashier, John L. McNeil.

— Charles M. Kittredge is in business here on his own account.

GLENWOOD SPRINGS.—First National Bank; W. B. Devereux, President, in place of J. J. Hagerman; H. R. Kamm, Vice-President, in place of W. B. Devereux.

GOLDEN.—Bank of Golden; closed.

LA JUNTA.—Bank of La Junta has been reorganized and is now open for business.

Capital, \$30,000. President, M. C. Stephens; Cashier, R. Phillips.

LAMAR.—Bank of Lamar; not in operation. — Lamar State Bank; succeeded by

Citizens' Bank. Capital, \$15,000. Same officers. — Merchants' State Bank will

shortly open.

PUEBLO.—South Pueblo National Bank; Assistant Cashier, C. A. Hammond.

CONNECTICUT.

NEW HAVEN.—Merchants' National Bank; Vice-President, H. J. Morton.

DAKOTA.

ASHTON.—Bank of Billingshurst Bros.; now incorporated. President, C. B. Billingshurst.
ASSARIA.—Vinson & Conkle; removed to Cimarron.
DEADWOOD.—Merchants' National Bank; E. W. Martin, President, in place of W. R. Stebbins; John McNab, Vice-President, in place of E. W. Martin; F. E. Ickes, Assistant Cashier, in place of M. G. Lincoln.
REDFIELD.—First National Bank; Wm. J. McMaster, Cashier, in place of H. M. Benedict; Assistant Cashier, H. A. Taylor.
SIOUX FALLS.—Minnehaha National Bank; J. N. Bailey, Jr., President, in place of E. A. Sherman; E. M. Hills, Cashier, in place of C. E. Johnson.
WABPETON.—Farmers & Merchants' Bank; assigned.—North-Western Bank; closed.
WATERTOWN.—Sioux Banking Co. is reported here. Capital, \$25,000. President, Foster R. Clement; Vice-President, Herman Deepton; Cashier, Chas. G. Church.

DELAWARE.

HARRINGTON.—First National Bank has been authorized to commence business. Capital, \$50,000. President, E. Sapp; Cashier, W. T. Sharp.
WILMINGTON.—Union National Bank; Victor Du Pont, President, deceased.

DISTRICT OF COLUMBIA.

WASHINGTON.—Tanner & Harmon are in business here.

FLORIDA.

GAINESVILLE.—First National Bank has been organized. Capital, \$50,000. President, J. W. Ashby; Cashier, James M. Graham.
JACKSONVILLE.—National Bank of Jacksonville; Vice-President, Joseph H. Durkee; Assistant Cashier, Wm. L. Gibson.
ORLANDO.—Orlando Loan & Trust Co. has been organized. Capital, \$100,000. President, C. E. Grannis.

GEORGIA.

ATLANTA.—Atlanta National Bank; Charles E. Currier, Assistant Cashier, in place of Geo. R. De Saussure. On July 1st, Paul Romare, now Cashier, will succeed R. H. GREEN BAY.—Citizens' National Bank has been authorized to commence business. Capital, \$100,000. President, John Paley; Vice-President, J. H. Elmore; Cashier, W. P. Wagner.

ST. CROIX FALLS.—Bank of St. Croix Falls has been organized. President, William J. Vincent; Vice-President, John Perley.

ONTARIO.

FOREST.—Standard Bank of Canada will open a branch here.

HAMILTON.—Bank of Hamilton; James Turnbull, Cashier, in place of E. A. Colquhoun.

QUEBEC.

ST. ROCHS.—Banque Jacques Cartier has opened a branch here. Manager, Narcisse Dion.— Banque du Peuple has a branch here.

NEW BRUNSWICK.

ST. JOHN.—J. M. Robinson is reported in business here.

A Word to the Wise.—No body of business men are more in need of the very best of Periodical Literature than Bankers.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, June 2, 1888.

The money market has been easy during the month of May and rates have been low. There has been a return of currency from the West to the Eastern money centres. This is ascribed to the check given to railroad building due to strikes and the action of Western Legislatures hostile to corporations. This inflow of currency would have made rates much lower on loans on good security were it not for the counteracting tendency of the demands of the Treasury on account of payment of revenue and quite important shipments of gold that have occurred during the month. The bond purchases by the Secretary of the Treasury although tending in the opposite direction, have not had much effect, because the low prices for money have checked offers of bonds, except at prices the Secretary is not disposed to give. The holders have about made up their minds that the Secretary has practically made a limit, and feel there is no use offering unless within that limit which seems to be about 128 for fours and 108 for four-and-a-halves. As a matter of fact, there can be very little real stringency in the money market when rates are as low as they are now, and the Secretary has no reason to feel under any especial pressure to get out the surplus money. He doubtless feels that by waiting until more stringency exists, he can then better assist the market when it is really in need and at the same time make purchases at more advantage to the Treasury. The Government, like any one else, must watch the changes of the market to gain the greatest advantage in the purchase of bonds. The danger is that the practical cessation of buying by the Secretary will cause a large accumulation in the Treasury, and if at the same time large drafts should, from any cause, be made on the money centres, the demand might suddenly become very great. There is not as far as can now be foreseen any liability of this. The shipments of gold abroad appear to have ceased. Foreign exchange has during the last of the month fallen some. There have been considerable purchases of American securities on foreign account. The prospect seems to be that the coming season will be rather dull in a business way. The activity in politics owing to the Presidential election is more or less responsible for this.

FOREIGN EXCHANGE.—During the first week in May there was some lack of demand, but sale of stocks in London counteracted this, commercial bills were limited in supply and this also tended to strengthen the market. For the second week the demand continued slight although rates advanced somewhat on account of the advance of the discount rate of the Bank of England. About \$500,000 in gold was shipped this week. For the week ending May 18th, sterling exchange was rather irregular. There was not much demand, and both commercial and security bills were in limited supply. The rates toward the close of the week were 487 and 489½. Gold was shipped to the amount of \$500,000. During the week ending May 25th, the sterling exchange market was very firm owing to the increased demand from importers and the falling off in supply. Commercial bills were very scarce. Rates advanced one-half per cent. Gold shipments increased, over \$5,000,000 having been exported during the week. During the last week in May the demand fell off though the market continued firm on account of the continued scarcity of commercial bills. From April 26th to May 29th the Bank of England lost £978,000 in specie. The Bank of France lost 2,200,000 francs in gold and gained 15,550,000 in silver. The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, \$4.87½; sight, nominal, \$4.90; 60 days, actual, \$4.86½@ \$4.86¾; sight, actual, \$4.88½@ \$4.89; Cable transfers, \$4.88¾@ \$4.89¼; Prime commercial sterling, long, \$4.85¾@ \$4.86;

Documentary sterling, 60 days, \$4.85½@4.85¼; Paris bankers', 60 days, 5.19¾@5.18¾; sight, 5.18¼@5.17½; Paris, commercial, 60 days, 5.21¼@5.20¾; sight, 5.19¾@5.18¾; Antwerp commercial, 60 days, 5.21¾@5.21¼; Swiss bankers', 60 days, 5.20@5.19¾; sight, 5.18¼@5.17½; Reichsmarks (4), bankers', 60 days, 95¼@95%; sight, 95¼@95%; Reichsmarks (4), commercial, 60 days, 95¼@95%; sight, 95¼@95%; Guilders, bankers, 60 days, 40¼@40 5-16; sight, 40 7-16@40¼; Guilders commercial, 60 days, 40¼@40 8-16; sight, 40 5-16@40¾; Copenhagen, Stockholm and Christiana, krona, 60 days, 26 11-16@26¾; sight, 26 15-16@27. Paris dispatches quote exchange on London 25f. 30c.

The following shows the posted rates for prime bankers' sterling bills on London, at 60 days, and sight, and prime commercial sterling bills on London, at 60 days; and sight, and prime commercial sterling, together with exchange on Paris on April 1st, the changes in rates that occurred during the month and the highest and lowest during the months of April and May:

NEW YORK BANKS.—During the week ending May 5th, the combined gold and currency received from the interior by the New York banks was \$3,776,000, and they shipped \$1,951,000, making a gain for the week of \$1,825,000. By Sub-Treasury operations they made a further gain of \$5,000,000, and their total gain for the week was therefore \$6,825,000. During the week ending May 12th, the banks shipped \$927,000, and received \$3,750,000 from the interior, gaining \$2,823,000 thereby. They further gained \$750,000 by Sub-Treasury operations making a total gain of \$3,573,000. During the week ending May 19th, the banks shipped \$1,130,000 to the interior and received from there \$2,870,000, making a gain of \$1,740,000. From the Sub-Treasury they gained \$6,700,000, making a total gain for the week of \$8,440,000. During the week ending May 26th, the banks received \$4,025,000 from the interior and shipped \$988,000, gaining \$3,039,000. This week they lost \$4,500,000 by Sub-Treasury operations, making a net loss of \$1,461,000 in their holdings. During the week ending June 1st, the banks sent out \$792,000 and received \$3,828,000, gaining \$3,031,000 thereby. For the same time they lost \$3,500,000 by Sub-Treasury operations making a loss for the week of \$469,000. From April 28th to June 1st, the New York city banks made a gain of \$16,908,000. The following table shows the condition of the New York Clearing-House Banks for a number of weeks past :

<i>1888.</i>	<i>Loans.</i>	<i>Specie.</i>	<i>Legal-tenders.</i>	<i>Deposits.</i>	<i>Circulation.</i>	<i>Surp.Res.</i>

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange. The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

BANKERS' OBITUARY RECORD.

Anderson.—Joseph R. Anderson, President of the National Bank of Bristol, Tenn., died suddenly May 18th at the age of 67. He commenced business life as a clerk on a small salary, and died one of the richest men in the State. He was nominated by the Prohibition party for Governor of Tennessee only two days before his death.

Burke.—Col. W. H. Burke, formerly President of the First National Bank, Osborne, Kan., died May 17th at Hot Springs, Ark., whither he had gone for the benefit of his health. He was one of the early settlers and a heavy capitalist of Osborne, and was largely identified with its business interests and prosperity.

Cope.—Caleb Cope, President of the Philadelphia Saving Fund Society, died May 18th, at the age of 91. He had been President of that institution for 25 years. In 1839 he was elected a Director of the old United States Bank on the ticket headed by Nicholas Biddle, and frequently acted as President in the absence of Mr. Biddle. He was manager of and connected with a great many charitable and other institutions.

Du Pont.—Victor Du Pont, President of the Union National Bank, Wilmington, Delaware, died recently at the age of 61 years.

Elliott.—E. B. Elliott, for many years Government Actuary in the United States Treasury Department at Washington, died May 24, aged 64 years.

Emmerton.—George R. Emmerton, of the firm of Ropes, Emmerton & Co., Salem, Mass., died May 22d, aged 52 years. He was prominently identified with several local institutions, among them the Merchants' National Bank, of which he was President, and the Salem Savings Bank, of which he was Vice-President.

Gary.—Erastus Gary died on May 17th, at his home in Wheaton, Ill., aged 82 years. He came from Pomfret, Conn. He was one of the pioneers in that part of Illinois, was a soldier in the Black Hawk war, was senior member of the firm of Gary & Wheaton, bankers, and also one of the founders of Wheaton College.

Hurd.—Silas Hurd, President of the Bank of Edgerton, Wis., died April 7th, aged 71 years. He was born in Cayuga County, N. Y., and moved to Wisconsin in 1838. He was a large property owner, and held title to 1,600 acres of the best farming lands in Rock County. When the Bank of Edgerton was organized, in 1880, he was made President, holding that position until his death.

Kent.—Alonzo Kent, President of the First National Bank, Jamestown, N. Y., died May 25th, aged 73 years.

Ottley.—Joshua P. Ottley, for many years Vice-President of the Defiance National Bank, Defiance, O., died recently at the age of 65.

Powell.—Colonel Columbus Powell, formerly of the banking firm of Powell, Green & Co., of New York city, died recently in Knoxville, Tenn. He was largely interested in various business enterprises.

Rockwell.—Judge Julius Rockwell died at his residence in Lenox, Mass., May 19th, at the age of 83. The immediate cause of his death was being thrown from his carriage about a week previously, from the effect of which he never recovered. He had not been confined to his bed for a single day before since 1835. Mr. Rockwell was prominently identified with the political and business interests of his State. He had been in political life for twenty-five years as a member of the Legislature, Speaker of the House, a member of the first Board of Bank Commissioners, a member of Congress, a member of the Massachusetts Constitutional Convention, and for twenty-seven years a Judge of the Superior Court, which latter position he vacated only two years ago on account of his age. He was also President of the Pittsfield National Bank and the Berkshire County Savings Bank, both of which positions he held actively at the time of his death. His son, Francis W. Rockwell, is a member of the present United States Congress.

Seymour.—W. T. Seymour, Cashier of the Manufacturers' Bank, Cohoes, N. Y., died at his residence in Waterford, May 13th, aged 73 years.

Slifer.—Col. Eli Slifer, President of the Lewisburg National Bank, Pa., died May 26th from injuries received by being thrown from his wagon a few days previous. He had held the offices of State Treasurer and Secretary of the Commonwealth.

Strong.—I. M. Strong, senior member of I. M. Strong & Son, bankers, Bancroft, Mich., died recently at the age of 68.

Taylor.—W. T. Taylor died recently at Fayetteville, N. C. He was Cashier of the Bank of Fayetteville, which succeeded the Fayetteville National Bank, of which he was Assistant Cashier.

Walker.—William Walker died recently at his residence in New York city, aged 87 years. He was for many years a member of the old banking firm of Corning & Co., and also one of the charter Directors of the Equitable Life Assurance Society, which place he resigned last year on account of his advanced age.

Warren.—Samuel D. Warren, senior member of the firm of S. D. Warren & Co. Westbrook, Me., died in Boston, Mass., May 11th. He was a Director of the First National Bank and also of the Provident Institution for Savings in Boston.

Wing.—Charles Tudor Wing, for many years engaged in the bond and banking business, died suddenly at his residence in New York city, May 24th, aged 53. He was a member of the Union League, Loyal Legion, New England Society, and also one of the founders of the Ohio Society in New York.

Four and a half per cent., registered—\$50 at 108, \$16,500 at 108, \$9,100 at 107½ and accrued interest, \$50,000 at 108¼, \$18,000 at 108½ ex interest; total, \$93,650, and grand total, \$329,550. Accepted \$198,650 bonds as follows: Four per cent., registered—\$20,000, \$800, \$10,000, \$50,000, \$5,000, \$5,100, \$4,200, \$700; total, \$95,800, at 127. Four per cent., coupon—\$10,000, \$100; total, \$10,100, at 127. Four and a half per cent., registered—\$16,500, \$18,000, \$55,000, \$200, \$50; total, \$89,750, at 108.
17. **THURSDAY.**—Bond offerings aggregated \$2,097,750, as follows: Four per cents, coupon—\$10,300, \$7,500, \$1,200, \$10,000, all at 127; total, \$29,000. Four per cents, registered—\$1,600, \$4,150, \$2,000,000, at 127½; total, \$2,005,750. Four and a half per cents, registered—\$63,000 at 108¾, ex interest. Accepted \$223,150 bonds, as follows: Four per cents, registered—\$4,150, \$5,000, \$6,000; total, \$15,150, at 127. Four per cents, coupon—\$10,300, \$7,500, \$1,200, \$10,000; total, \$29,000, at 127. Four and a half per cents, registered—\$63,000, \$2,000, \$100,000, \$15,000; total, \$180,000, at 108.
18. **FRIDAY.**—Offers of bonds, as follows: Four per cents, registered—\$15,000 at 127, \$5,000 at 127¼, \$11,000 at 127½, \$50,000 at 127¼; total, \$81,000. Four per cents, coupon—\$263,000 at 127, \$3,150 at 127; total, \$266,150. Four-and-a-half per cents, registered—\$5,000,000 at 108, \$10,000 at 107, ex interest, \$1,000 at 108, \$9,100 at 108; total, \$5,009,100. Grand total, \$5,369,250. Accepted, \$5,369,250 bonds as follows: Four per cents, registered—\$15,000 at 127. Four per cents, coupon—\$266,150 and \$3,150 at 127; total, \$269,300. Four-and-a-half per cents, registered—\$5,000,000 and \$10,000, \$9,100—total, \$5,109,100—at 108. Of these offers it turned out that \$5,000,000 4½'s and \$265,000 4's which were accepted by the Secretary were bogus, the name of the firm offering them, Maris & Smith, of Philadelphia, Pa., having been forged on the offers.

19. **SATURDAY.**—Offers of bonds, as follows: Four per cent. registered—\$5,000 at 127; \$5,000 at 127. Four per cent. coupon—\$100 at 127; \$1,150 at 127. Total offerings, \$11,250. All bonds offered accepted.
20. **MONDAY.**—Offers for the sale of bonds, as follows: Four per cent. coupon—\$100 at 127. Four per cents. registered—\$4,000 at 127½; \$50,000 at 127½; \$5,000 at 127½; \$5,000 at 127½, and \$50,000 at 128. Total, \$114,000. Four-and-a-half per cents. registered—\$15,000 at 108½; \$2,000 at 108, \$500 at 108 and \$50,000 at 108½. Total offerings, \$181,600. Accepted, \$5,000 four per cents. registered, at 128½; \$200 four coupon—127, and \$500 four-and-a-half per cents. registered, at 108.
21. **TUESDAY.**—Offers for the sale of bonds, as follows: Four per cents. coupon—\$20,000 at 128. Four per cents. registered—\$1,500,000, at 128; \$80,000 at 128; \$100 at 127. Four-and-a-half per cents. coupon—\$4,000 at 108; \$500,000 at 108½; \$15,000 at 108½; \$5,500 at 107½, ex-interest, \$2,500 at 108. Total offerings, \$2,127,100. Accepted, \$6,600 bonds.
22. **WEDNESDAY.**—Counterfeiters of silver coin were arrested at Geneva, Ind. — Bond offerings aggregated \$724,000, as follows: Four per cents. coupon—\$75,000 at 127½; \$20,000 at 127½. Four per cents. registered—\$20,000 at 127½; \$50,000 at 127½; \$50,000 at 128; \$175,000 at 128; \$80,000 at 128. Four-and-a-half per cents. registered—\$40,000 at 108½; \$100,000 at 108½; \$4,000 at 108; \$100,000 at 108½.
23. **THURSDAY.**—E. H. Bradley, margin clerk of the Union National Bank of Chicago, defaulter to amount of \$3,700. — Bond offerings aggregated \$684,000, as follows: Four per cent. coupon—\$40,000 at 128; \$100 at 127. Four per cent. registered—\$20,000 at 128; \$400 at 127 and accrued interest, \$1,000 at 127; \$2,500 at 127½; \$50,000 at 127½. Four-and-a-half per cent. coupon—\$2,000 at 108½. Four-and-a-half per cent. registered—\$100,000 at 108½; \$40,000 at 108½; \$85,000 at 108; \$3,000 at 107½ ex-interest. Accepted, bonds aggregating \$684,100.
24. **FRIDAY.**—Excitement in France over discovery of counterfeit notes of the Bank of France of the denomination of 500 francs. — Offerings of bonds amount to \$478,000, as follows: Four per cents. coupon; \$50,000 at 128. Four per cents. registered, \$10,000 at 127½; \$50,000 at 128; \$2,000 at 127½; \$500 at 127½; \$100,000 at 128 and \$75,000 at 127½. Four-and-a-half per cents. registered, \$150,000 at 108½; \$40,000 at 108½ and \$500 at 108. Accepted \$10,000 registered four-and-a-halfs and \$500 do., both at 108.
25. **SATURDAY.**—Bond offerings aggregated \$446,000, as follows: Four per cent. coupon, \$25,000 at 127½; four per cent. registered, \$1,000 at 128; \$20,000 at 127½; \$50,000 at 127½; \$50 at 127; four-and-a-half per cent. registered, \$150,000 at 108½; four-and-a-half per cent. coupon, \$200,000 at 108½. The Secretary of the Treasury this afternoon accepted one \$50 four per cent. registered bond at 127.
26. **MONDAY.**—Bond offerings aggregated \$160,000, as follows: Registered fours—\$10,000 at 128; \$100,000 at 128; registered four-and-a-halfs—\$50,000 at 108½. None of the offers were accepted.
27. **TUESDAY.**—E. V. Rhoads, Cashier of the First National Bank of St. Paris, Ohio, was arrested and gave bail. — Bond offerings aggregated \$227,000, as follows: Four per cents. coupon—\$40,000 at 127½; \$40,000 at 128; four per cents. registered, \$1,000 at 127½; \$110,000 at 128; four-and-a-half per cents. registered, \$1,000 at 108; \$45,000 at 108½. Accepted, \$1,000 four-and-a-half registered bonds at 108.
28. **THURSDAY.**—Bond offerings aggregated \$154,550, as follows: 4 per cents. coupon—\$2,200 at 127½; 4 per cents. registered—\$1,000 at 127½; \$50,000 at 127½; \$1,000 at 128; 4½ per cents. coupon, \$100 at 109; 4½ per cents. registered—\$100,000 at 108½; \$250 at 108. Accepted, \$250 four-and-a-half per cent. registered bonds at 108.

NOTICES OF NEW BOOKS.

Pratt's Manual of Banking Law: A Treatise on the Law Applicable to the Every-day Business of Banks. Prepared for and published by A. S. PRATT & SONS. Sold by BRADFORD RHODES & CO., 78 William street, New York. Price, \$1.50 a copy.

This seems to be just such a work as should have been published long ago, and it certainly is something which every banker should have on his desk. The main purpose of the book is to furnish bankers, and all persons having dealings with banks, as well, with such information as will enable them to act intelligently on the questions which are constantly arising in the daily routine of business. Some of the topics treated are: Deposits, to whom should be paid; Special Deposits, Deposits when Bank is Insolvent, Payment of Deposits, Payment of Customer's Notes and Acceptances, Certification of Checks, Clearing-House, Banker's Lien, Directors, Cashier, Officers' Bonds, etc. The work was prepared by a lawyer thoroughly familiar with the subjects treated, and the statements of law are pronounced not only clear but correct.

WANTED—OFFICERS AND CLERKS, POSITIONS, BANKS FOR SALE, LOCATIONS WANTING BANKS, ETC.

[Notices under this head—space not over four lines—cost \$2 an insertion. If replies are to be sent to this office the advertiser must send us two stamped envelopes addressed to himself, in which the replies will be forwarded.]

BANK FOR SALE.—Wishing to enter into other business, I shall sell the Bank of Ashby, Ashby, Minn., on reasonable terms. The property consists of the bank building and fixtures and a commodious residence. Will be sold with or without discounted bills. A good point for a paying business. H. THORSON, Cashier.

RHODES' JOURNAL OF BANKING.

Vol. XV.

JULY, 1888.

No. 7.

THE deposit of public moneys with the National bank depositories has been criticized on the ground that a sudden call made on the banks might result in great pressure to the money market. It is certain that at the time the Secretary of the Treasury adopted the plan of largely increasing these deposits, his action resulted in a great relief to the money market. The Government is constantly receiving into its Treasury large amounts in the payment of customs duties and taxes on spirits, tobacco and other objects of internal taxation. Under the law as it now stands customs duties cannot be deposited with the banks but amounts collected under the internal revenue laws may be. The actual payments to the Government are made at the money centres, and such payments day by day reduce the available cash at those centres. Consequently when there is any stringency in the money market these payments going into the Treasury at a much greater rate than they come out serve often to create great distress. The people of the country transact the bulk of their business through the banks. What is drawn out by one set of bank customers to make payments, except to the Government, goes back into the banks through the hands of others; but when the bank dealers draw to make payments to the Government, the money does not come back to the banks. It is certainly an anomaly in our present financial system that the Government should not use the same financial methods as the people. In some degree, at least, it is due to this that the excess of revenues over expenditures, causes such a dislocation in the circulation of currency. Among individuals the surplus of one is for the benefit of the others. Formerly, before banks became an acknowledged means of utilizing in the best way the financial resources of a community, each individual as the Government has now, had his own strong box in which he kept his cash. This ancient system, has as far as the people are concerned, been abandoned, and the Governments of other countries have also as a rule abandoned it, but the Government of the United States still continues under the barbaric Sub-Treasury system to lock up its wealth in its own strong box. In this respect it has

reverted to the customs of the Medes and Persians. It was the custom of Xerxes, Darius and their successors to require the tribute they exacted from the various satrapies and provinces to be paid in gold. This gold was melted and run into earthen amphorae which, when the metal had cooled, were broken leaving the solid ingot of the shape of the jar. These ingots were accumulated and hidden away in the treasure houses at Susa and Persepolis. Historians have informed us that if Darius had used even a small portion of this piled up wealth to hire Grecian soldiers to oppose the phalanx of Alexander the Great that the Persian empire might never have been conquered. The gold, however, became the spoil of Alexander who put it into circulation, and thereby introduced an era of enterprise and civilization that sustained the power of his successors for centuries. The revenues of France are deposited with and distributed through the Bank of France, the revenues of England through the Bank of England. A temporary surplus does not trouble the community at large because the cash is always available for loans. The Government of the United States alone keeps its own idle cash in its own cash box, and the larger its accumulations the worse for the business community. One remedy for this is never to have revenues in excess of expenditure, but even if a balance were maintained, payments to, and out of the Sub-Treasury create an eddy and delay in the circulation that would not exist were the banks exclusively used to transact Government business. The deposit of the internal revenue receipts with the National banks to the extent of sixty millions of dollars afforded great relief to the money market, at the time it was made, and there has no evil so far resulted from it. The worst that can possibly happen if the worst come to the worst would be the redemption of the bonds deposited as security. As a parallel case the outstanding National bank circulation may be cited. This circulation may be considered as a Government loan to the banks. Yet it is being rapidly reduced without friction or trouble. How there would be more danger in recalling Government deposits made with the banks and amply secured by Government bonds, than in retiring National bank circulation similarly secured is hard to understand.

THE NATIONAL BANKING SYSTEM was instituted for the purpose of furnishing the country with currency. At the outbreak of the war the people of the United States were entirely dependent on the notes issued by State banks for a circulating medium. According to the report made December, 1861, by Mr. Chase, Secretary of the Treasury, the circulation of the State banks on January 1, 1861, was computed to be \$202,000,000. Of this sum \$150,000,000 was of banks in the loyal States. The Secretary said, "the value of the existing bank note circulation depends on the laws of thirty-four States and the character of some sixteen hundred private corporations. It is usually furnished

in greatest proportions by institutions of least actual capital. Circulation, commonly, is in the inverse ratio of solidity." Two plans were proposed in order to furnish a substitute for State bank circulation—that of issuing United States notes redeemable in coin in demand, out of which subsequently as anticipated by Secretary Chase grew the irredeemable legal-tender notes; and that of the issue of notes bearing the impress of the Government, to be delivered for issue to banking associations upon the deposit^a of United States stocks as a security for their redemption. This latter plan was favored by Mr. Chase. It must be noticed that it was not at first proposed to organize new banks under a general United States law, to have exclusively the privilege of issuing notes delivered to them by the Government. The original and simple idea was to deliver the notes to such existing State banks as would purchase bonds and deposit them as security. The State banks were to purchase the bonds with the existing currency—gold, silver and State bank notes, and as the new Government notes came into circulation they were to supersede the notes previously issued by the State banks, which latter were to be gradually forced out of circulation by a constantly increasing tax. This plan the Secretary said "avoids, almost if not altogether, the evils of a great and sudden change in the currency, by offering inducements to solvent, existing institutions to withdraw the circulation issued under State authority, and substitute that provided by the authority of the Union. Thus, through the voluntary action of the *existing institutions*, aided by wise legislation, the great transition from a currency heterogeneous, unequal and unsafe, to one uniform, equal and safe, may be speedily and almost imperceptibly accomplished." If this idea had been adhered to and carried out there would not have commenced that rivalry between National banks and State institutions which has been the real cause of the decline of the National system. The desire to centralize and bring everything under the control of the central Government, led to the enactment of a law, which virtually prevented any banking institutions other than those organized under it from receiving the new circulation for issue. A much less degree of force than was found necessary to compel State banks to become National banks would have led them while remaining associations under State laws to abandon the circulation received from the States and issue that delivered to them by the United States. The Bureau of the Comptroller of the Currency would have had no other relation to the banks of the country than such as was necessary to secure the proper deposit of bonds before circulation was issued, and the proper redemption of notes by the sale of the bonds when the bank itself failed to provide for such redemption. In reality it would have made no difference whether the institution receiving and issuing the notes were solvent in other respects or not, after the solvency of the notes had been secured by a deposit of bonds. The Treasury department would have protected

note holders only. It would have been relieved from the odium of failure of the banks to pay depositors, and from that of making imperfect examinations. All questions as to the doubtful constitutionality of the organization of banks for other purposes than to control the currency of the country would have been set at rest. As the National debt was paid, and the expense of issuing National currency becomes no longer desirable, a gradual reduction on State bank circulation would restore affairs to their previous condition. As the National currency had once superseded State bank currency, so again the latter would gradually supersede the former. The change made in the original and simple plan of Secretary Chase, necessitated the drafting and discussion of an elaborate set of laws not only for the issue of currency but for the organization and supervision of the banks to issue it. The delay inseparable from this, afforded the opportunity for the substitution of a direct issue of legal-tender notes by the Government, and this issue of legal-tender notes and other Government paper following in the same line, will for a long time deprive the country of the benefits of a bank circulation.

DURING THE YEAR of a Presidential election, the financial conditions are usually not exciting. Dullness is the rule, and the present year is not exceptional. There is abundance of money and little use for it as indicated by the large proportions assumed by the surplus reserve of the New York city banks—this surplus now being between four and five times what it was a year ago. The readiness of the Treasury Department to buy bonds in the event of any pressure occurring tends to avert alarm. Although entirely inadequate as a measure for reducing or preventing the accumulation of surplus revenues, it is effective as an averter of panic. The present dullness in business cannot be altogether ascribed to political conditions in this country. There is equal uncertainty as to the future prevailing abroad. The death of the German Emperor, and the succession of one whose peaceable intentions are distrusted, and who has the power to throw all Europe into a devastating war, has served to paralyze foreign markets. This condition abroad, added to the political uncertainty and excitement felt in the United States, tends to depress all enterprise. Congress has done absolutely nothing with any financial question. Both political parties are waiting for the result of the election before taking any measures for the reduction of the surplus. One class of manufacturers and those dependent on them, fear that this reduction may be brought about by a radical change in the tariff. Another class dread the abolishment of the tax on whisky and tobacco. Every one fears some serious change in the conditions now existing, and will not take even ordinary risks in any new direction until the question of the financial policy of the Government is permanently settled. This cannot be deemed a prosperous state of

things. The amount of money available for circulation is perhaps as large as it has been for years, but the amount actually circulating is smaller—the current is languid. The banks, as barometers indicating the pressure of business, now show, by the amount of idle money held by them, an era of stagnation. Government securities are high both here and abroad, but railroad bonds are lower than can be satisfactorily accounted for in view of the abundance of money. The Secretary of the Treasury thinks there is no danger of any financial difficulty arising during the summer, and the Comptroller of the Currency pronounces the banks of the country to be in good condition. The prospect for the crops throughout the United States is good. There is nothing in the financial situation to excite alarm. The great question is as to the profits to be expected, and just at present there is nothing very hopeful in this direction. The Clearing-House returns, the railroad earnings, all indicate a decrease of business. Some companies have passed and reduced dividends, and serious strikes have inflicted loss on many roads. Conditions may change, a war in Europe may arise at any time, the crops may be large and business may suddenly revive ; but it now looks as if there would be no material recovery for some time to come.

THE FRENCH ASSEMBLY has authorized the Panama Canal Company to issue a lottery loan. It was concluded, by the Assembly after a careful study of the reports of the company, that the Canal with locks can be completed by 1890, that the locks will enable the canal to be continuously navigated, and that the great difficulties in the way of controlling the Chagres river can be overcome. On the 26th of June the company availing themselves of this vote of confidence on the part of the Government, offered for subscription in connection with a syndicate of Paris banks, two million bonds of 400 francs each, amounting to 800 million francs in all, at the price of 360 francs, of which 60 francs is to be invested in French Government securities and with which the punctual redemption of the bonds in ninety-nine years is to be secured. A lottery loan pre-supposes the drawing of a certain number of the bonds for redemption each year. Of the bonds so drawn for redemption, a certain number also selected by lot receive, in addition to the principal, a certain premium. If such a loan is well secured, the holder of a bond has in view the ultimate redemption of the principal of his bond at the end of the period fixed for the loan—be it thirty, forty or one hundred years. During that period he regularly receives a fixed amount of interest. So far, such a loan is like any other. In addition, the holder has, first, a chance that his bond will be drawn at some of the annual drawings and redeemed at an earlier period than the fixed termination of the loan and, second, if his bond is so drawn, that it may luckily draw a bonus to be paid with the principal. The new Panama loan, as has been stated, is to

consist of two million bonds of 400 francs each, to be paid certainly in ninety-nine years, bearing four per cent. interest. For the first twenty-five years after the issue of the loan there are six drawings to take place annually—one every two months. At these drawings 366 bonds will be drawn for payment, and there will be apportioned among those 366 bonds 366 varying payments, *viz.*: Three of 500,000 francs, three of 250,000 francs, six of 100,000 francs, twelve of 120,000 francs, twelve of 60,000 francs, thirty of 2,000 francs, and three hundred of 1,000 francs. The least any holder of a 400 franc bond, for which he paid 360 francs, will receive, in addition to his interest, if his bond is drawn any time within the first twenty-five years, is 1,000 francs, and he is liable to receive as high as 500,000 francs. After the first twenty-five years the prizes will be reduced to 236 per annum, aggregating 2,200,000 francs, and decrease thereafter every ten years. It is calculated that the sixty francs, of the amount received for each bond invested and reinvested to secure the loan, will pay all of the drawings as they take place. The ingenuity with which this scheme is drawn up and its attractiveness to an investor, are apparent. It has been asserted that the Government does not in any way guarantee this loan ; but when it is considered that the success of the plan depends upon the investment of some 120 million francs of the proceeds of the loan in Government securities to be invested and reinvested by a separate company organized for the purpose, the close connection with which this loan will, in a few years, be brought to the Government debt can at once be seen. It is calculated that after paying all intervening charges, the investments and accumulations will reach a sum of 185 millions of francs, and in fifty years over 300 millions. The French Government, by authorizing this scheme, has bound up its own debt with that of the company, and, in fact, has virtually pledged itself to bring the canal to completion.

THE CODIFICATION of the National banking laws prepared by the Comptroller of the Currency last Fall, and introduced in Congress in the form of a bill has, we believe, been favorably reported by the Committee on Banking and Currency. The feature of this codification that is of the greatest interest to the National banks is that permitting a reduction of the minimum of United States bonds that must be deposited with the Treasurer of the United States as a preliminary to the commencement of business by a National banking association. There is nothing in it which can, in any way, avert the continued retirement of National bank currency. The codification can therefore excite but very little living interest. It doubtless may in some respects make the language of the law more definite, but this advantage is not so much for the banks as for the Comptroller of the Currency. It will lighten the labors of the latter, in that it may enable him to deal more easily with some questions that occasionally

arise. The law as it stands has, where ambiguous, been very thoroughly construed by the courts, and it is to be feared that if superseded by the attempted codification, while some ambiguities may be cleared up, others will arise out of the new language used, affording further material for litigation.

The temper of the present Congress seems to be hostile to the National banking system, and there is certainly no inclination in that body to give a codification of the National banking laws the time and attention it requires. Nor does Congress, with its present predilection for Government paper money, feel inclined to go into a wholly unnecessary discussion of laws which were originally framed to furnish and secure a currency which they now look upon as not longer required.

THE PRINTING of Government notes and National bank notes, and all other Government securities by the Government itself, to the exclusion of private enterprise in the same direction, seems to be contrary to the principles that underlie Republican forms of Government. It is just as much a monopoly for the Government to assume the exclusive manufacture of the paper currency of the country as for it to give the exclusive right to manufacture such currency to any one private bank note company without regard to the competition of others. The situation of the Government is different from that of a private individual. The latter has the right to buy any article he may need for his own from whomsoever he chooses, and has also the right to manufacture for himself any legitimate article he may choose to make. Wisdom, however, would lead an individual to buy an article he needs, or make it for himself, as the greatest advantage to himself dictates. Individuals, however, are not always guided by wisdom, though a Government is expected to be. Several things have to be considered in determining whether it is better for the Government to manufacture its own currency, or for it to have such paper securities manufactured by private companies. The general proposition, however, is that companies run by private enterprise and competing with each other are more likely to produce better designs and better results in the complete manufacture of them, than one private company having a monopoly, or than the Government's own monopoly of the same manufacture. Even if other things were equal, the mere encouragement of private enterprise is a consideration of importance. There are certain functions of Government that naturally belong to it and that cannot be delegated to private parties. But all mechanical and manufacturing processes are not necessarily connected with the Government, and it is better to have them, when needed to carry on the latter, performed in whole or in part by private parties. As against this particular business of preparing the paper securities of the United States, assumed to be done solely by the Bureau of Engraving and Printing, it is alleged that the notes are not as well or

as cheaply executed, nor are they prepared in the quantities necessary to public convenience within reasonable time as they would be if part of the work were permitted to be done by private enterprise. In a Government bureau everything tends to become crystallized, and there is little room for improvement or new ideas. The designs on the currency printed of late years have shown little originality and beauty. The printing has been complained of, and in one instance, at least, notes were so poorly executed that after having been in circulation they were pronounced counterfeits by a Government detective. On the part of the Bureau it is claimed that by having all work on paper securities done there, greater safety, cheapness and a better quality of work are secured. It has been so long since private bank note companies have been permitted to enter into competition that these claims amount to mere assertions, made *ex parte* by those favoring the Bureau, and such as cannot be brought to any present test. If, however, the history of the past is invoked, we find that when a portion of the work was given to private companies there were no losses of importance incurred. The power of checking dishonest practices was as great in those days as since. The investigations of the Bureau of Engraving and Printing itself in former days revealed many disgraceful facts in connection with its internal management, and not in the process of the work done for the Government by private companies. The present management of the Bureau is, no doubt, honest and efficient; but this is due more to the man at its head than to any inherent perfection in the system. Mr. Graves could secure better work and have it done even more safely and cheaply than now if the law permitted him to avail himself of the aid of private enterprise. When Mr. Sherman was Secretary of the Treasury, Mr. Graves, together with two others as a committee, made an investigation of the Bureau of Engraving and Printing as then constituted. This committee reported in favor of taking away a portion of the work from the Bureau and giving it to private bank note companies on the grounds that the feeling of exclusive possession insensibly led those who managed the business of the Bureau to become less exacting, both as to the method of doing the work and the quality of the work done.

MR. DUNN, the legal adviser of Mr. Scott, who some time ago deprived the Manhattan Company Bank of \$150,000 in cash may, according to the testimony on his recent trial, be looked upon as the Hoyle of embezzling bank employees. He advised Mr. Scott to take enough to cripple the bank, so that the latter would be more willing to effectuate a settlement. Mr. Dunn is an authority on extradition laws, and his directions to absconders are so minute as to include the clothes they can with propriety wear. The only point in his advice that might have a deterring effect, is the alleged advantage of leaving the bulk of the plunder with an accomplice, in order to avoid complica-

tions growing out of taking stolen money to Canada. This portion of Mr. Dunn's advice was not perhaps defective in theory, but Scott, in carrying it into operation, did not show good judgment in the selection of his depository friend.

It is not strange that the well considered directions, which it appears Dunn gave to Scott, should be followed by others so soon after they became public. Teller Pitcher of the Union Bank of Providence is a case in point. He has followed the rules laid down by the absconders' Hoyle in almost every particular. He has taken enough to seriously affect the bank and make it, in all probability, ready to settle as far as it can do so. He has gone to that happy, contiguous country where simple larceny does not constitute an extraditable offense. He was very careful to avoid the semblance even of forgery, and making no false entries, he merely stole in a purely unadulterated way without complicating circumstances. As to the old clothes and appearance of poverty, which Dunn advises should be assumed to disarm suspicion, there is no definite information that Pitcher conformed to the rule laid down; but the probability is that he did, inasmuch as he appears to have only been detected by his handwriting on the hotel register. He should have put his arm in a sling and asked the hotel clerk to write his name down.

The contiguity of Canada, and the shelter it affords to embezzlers, are no doubt responsible for many disgraceful breaches of trust. Congress should take action in this matter. It is the fashion to blame the banks and corporations losing money for endeavoring to recover it by effecting settlements with absconders. There is much more excuse for such compositions than there would be if there were no city of refuge to which the delinquents can retire and bid defiance to the law. When the law fails to protect, it becomes the duty of each one to protect himself. It is all very well to talk of suffering great losses rather than to compound a felony. Sure punishment would render such composition unnecessary, but there can be no sure punishment unless the extradition treaty between this country and Canada is properly amended.

THE RESOLUTION of Senator Stewart requesting information from the Secretary of the Treasury in regard to the names of those who have sold bonds to the Government, seems to have had very little object except a political one. Mr. Stewart intimated that there might be gross favoritism shown. We have never seen how this could be. The records of the Treasury department are open to Members of Congress and Senators, and they contain from day to day a full history of these bond transactions. The bidders see the results whether their own bids are accepted or not and they can judge whether their bids have been unfairly treated or not. No complaints appear to have been made by any party offering bonds for sale—at least Mr. Stewart did not appear to base his resolution on any such.

It was simply introduced on suspicion merely, with perhaps the hope, though this to us seems a very foolish one, that something might be discovered derogatory to the bond purchase dealings of the Treasury department. Resolutions of this kind are frequently introduced in Congress and are agreed to because of the general argument that publicity is better than secrecy. The fact that certain information either on account of its voluminousness, its inconvenience, or its uninteresting character is not published, is asserted as indicating a desire to conceal something. Those who know the ridiculousness of this deduction, think the best way to kill unfounded suspicion is to permit the resolver to resolve. The Secretary's letter in response to the resolution shows conclusively what a mare's nest Senator Stewart has discovered. There are many real objections to the publication of the names of offerers of bonds, among others the injury that may thereby be done to private parties. The purchase of bonds is not a very effectual way of reducing the surplus but under some circumstances it has a good effect on the money market. There is not much chance of bond dealings with the Treasury department as now conducted being used for speculative purposes.

SOME TIME AGO Mr. W. W. Flannagan proposed to create a safety fund to protect depositors in National banks by setting aside, in the Treasury of the United States, a tax on deposits. The objections urged to this plan at the time of its promulgation were two-fold. The Government has no right to guarantee the business of banks any more than the business of any other class in the community, and, moreover, such a plan would to some extent offer a premium on dishonesty. A somewhat similar idea is found in the recent organization of a Depositors' Guarantee Company, the stock of which is to be taken by banks, and to amount to \$5,000,000. In addition, each bank is to pay in an annual amount equal to one-fifth of one per cent. of its gross deposits. In return the company guarantee the deposits of the bank so paying and becoming a member. There are to be examinations by the company's agents to determine the condition of its members. While there is not the same objection to a guarantee by a company as to a Government guarantee of deposits, nevertheless, there is danger that by this plan, as well as by Mr. Flannagan's, banks intrinsically weak may be given a factitious strength. It may be answered to this that good banks only will be admitted as members. But the sound banks are not the ones that are anxious to be guaranteed, and moreover, they do not care that their strength should be used to uphold the weaker brethren. If all the banks of the country entered into such a trust among themselves that would be the end of all competition. Experience and capital would go for nothing. It would be as the celebrated motto of the "Three Guardsmen" has it—"All for one and one for all."

UNITED STATES TREASURERS AND REGISTERS.

The financial history of the United States for the last hundred years is replete with interest, and, if properly published, would read more like a romance than the mere, matter of fact account of the dollars and cents which have passed in and out of the Treasury since the organization of the Government. Not less interesting would be a sketch of the officials who have guided the financial policy of this country from the day of small beginnings down to the present mammoth proportions now assumed by the Treasury as the custodian of almost countless millions. We have had many inquiries about the names and antecedents of those men, and are at last able to furnish our readers with a list below which is, we believe, the first reliable one of the kind ever published, and will be found very valuable for future reference.

Editor Rhodes' Journal of Banking:

BAXTER, Iowa, June 7, 1888.

SIR:—If not too much trouble, will you kindly answer the following question in your next issue: "Have we ever had a Register of the Treasury by the name of N. S. (or H.) Jeffries? His name is signed as if it read N. S. Jeffries, and I find that signature on a bank note issued by the National Bank of Raleigh, N. C. Francis E. Spinner was United States Treasurer at that time. The note is signed by Jno. G. Williams, President,—no signature of Cashier; but I think the latter has been rubbed off by use. The date of the note is Sept. 10th, 1868, and denomination is \$20. The bank number 1,682 is right. The name of Jeffries is not familiar to me, so I ask for information. I prize your JOURNAL very highly. Why not publish a list of all Treasurers and Registers of the Treasury of the United States? I think it would be a great help to many Cashiers, and know it will to me.

W. C. W., Cashier.

Answer.—The Jeffries referred to was Noah L. Jeffries. He was appointed Register of the Treasury in 1867, and held the office for nearly two years.

Following is a complete list of United States Treasurers and Registers during the past century, with date of appointment:

Treasurers of the United States.	Registers of the Treasury.
Samuel Meredith, Sept. 11, 1789.	Joseph Nourse, Sept. 11, 1789.
Thomas Tudor Tucker, Jan. 1, 1801.	Thomas L. Smith, June 1, 1820.
M. Nourse (ad interim), May 3, 1828.	Ransom H. Gillett, April 1, 1845.
William Clark, July 1, 1828.	Daniel Graham, June 4, 1847.
John Campbell, July 1, 1829.	Michael Nourse (acting), Mch. 6, 1849.
William Selden, July 22, 1839.	Allan A. Hall, April 9, 1849.
William B. Randolph (ad interim), Nov. 24, 1850.	Michael Nourse (acting), Jan. 18, 1850.
John Sloan, Dec. 1, 1850.	Townsend Haines, Feb. 13, 1850.
Samuel Casey, April 7, 1853.	Nathan Sargeant, Nov. 1, 1851.
Wm. C. Peirce, April 4, 1860.	Finley Bigger, April 20, 1853.
Francis E. Spinner, March, 1861.	L. E. Chittenden, April 27, 1861.
John C. New, July 1, 1875.	Stoddard B. Colby (died in 1867), August 12, 1867.
A. U. Wyman, July 1, 1876.	Noah L. Jeffries, Sept. 3, 1867.
James Gilfillan, Oct. 29, 1877.	John Allison, April 3, 1869.
A. U. Wyman, Dec. 19, 1883.	Glenni W. Schofield, March 28, 1878.
Conrad N. Jordan, May 1, 1885.	Blanche K. Bruce, May 19, 1881.
James W. Hyatt, May 24, 1887.	Wm. S. Rosecrans, June 5, 1885.

* **BANK BOOK-KEEPING.**

A TREATISE ON KEEPING AND AUDITING THE BOOKS OF STATE AND NATIONAL BANKS, PRIVATE BANKING FIRMS, SAVINGS INSTITUTIONS, FINANCIAL AGENTS, ETC.

Prepared for the JOURNAL by an experienced **Bank Accountant.**

DEPOSITORS' ACCOUNTS (Continued).

The plan for keeping the accounts of depositors to be adopted by Cashier Payson, is an important consideration with the proprietors. The Cashier himself recognizes this fact, and more thoroughly perhaps than do either of the principals. Mr. Payson wisely determines at the outset that every person whose connection with the enterprise renders him liable to service in the bank shall, so far as in the power of the Cashier, be made familiar with the general method of his bookkeeping. It is not at all difficult to imagine circumstances that may arise whereby either of the proprietors of the new bank, and possibly all of them, may be required to step in temporarily and perform the duties of a Cashier. Mr. Payson fully appreciates such a possibility, and he proposes to use his best efforts in preparing his respected employers for an emergency of that kind.

A knowledge of how the accounts of depositors are kept to one summoned hastily to fill the position of Cashier or Teller is of paramount importance. Some little time may be taken to examine and become acquainted with the plan of keeping the general accounts, but such an opportunity cannot be relied upon for gaining an insight into the accounts of depositors. It is important that the bank should be open during every business day, and the payment of checks are transactions that cannot be postponed to a convenient time nor otherwise parleyed with. Should the Cashier be taken ill or other circumstance occur rendering it impossible for him to perform his regular duties some other person must be, for the time, pressed into service. A person who has made himself familiar with the general routine of the bank and the plan pursued in keeping the depositors' accounts is, in such a case, fairly qualified for discharging the duties of Cashier or Teller.

But there is another consideration that bears upon Cashier Payson's motive. There shall not be, while he holds this important and exacting position, the shadow of a suspicion against him. There shall not be the appearance of a wish to conceal an official act. His books shall not only be open for examination at all times, but he will insist upon having his employers make frequent inspections of the accounts, and no efforts shall be spared in making them familiar with the details of the business. To accomplish this wish only the simplest of time and labor-saving methods shall be put into use. Having got his plan well mapped out, and the method of recording the operations fairly

* A series of papers on Practical Bank Book-keeping; will be continued through the year 1888, or until the subject is exhausted. When required the articles will be illustrated by photo-engraved plates made from pen drawings, showing some new ideas in blank books, and other labor-saving forms.

inaugurated, Mr. Payson introduces the subject of his intentions to Mr. Brown, in whom he finds an apt and willing student.

"The arrangement, Mr. Brown, for keeping the accounts of our depositors, is the first I wish you to examine carefully."

"I imagine," said Mr. Brown, "that these accounts are not materially different from the accounts of customers as we keep them in a mercantile business, though I see there is a demand here for something not required in

our business. It is important to know at a glance and with the least possible inconvenience the actual condition of an account any day or at any hour of the day. That is a circumstance we do not have to take into consideration in most kinds of business."

"I have here, Mr. Brown, a Daily Balance Register, which is devised for

Fig. 10 Skeleton Form of Three-Column Daily Balance Register.

the very purpose you mention. You observe that the names of the depositors are arranged in this in alphabetical order, and that the transactions of each day as to these accounts are kept by themselves. In this book, under the division for a day's business, I have four columns—the first two for balances, the third for checks paid, and the fourth for deposits. Of the balance columns the first represents overdrafts, and the second the credit balance of the customer's account. I may say here that it is not strictly necessary to have two balance columns, though for my own convenience, I prefer it. Overdrafts, it may be said, are rare exceptions, and therefore occasion for debit balances will not frequently arise."

"And when they do, Mr. Payson, I should presume they could be entered

Fig. 9, on page 621, is an illustration of a portion of a page of the Daily Balance Register. The names of depositors are recorded in this book in alphabetical order, therefore, upon a single page but a small portion of a day's transactions can be shown. The line of asterisks in the illustration is intended to convey the idea that not only a part of the page is omitted, but that the omission includes several pages; in fact, all the names commencing with letters between B and W. A form similar to this will appear in another part of the series where the idea is used in a metropolitan bank.

Fig. 10 is a skeleton form representing the two pages of the Daily Balance Register. This serves to explain how the depositors accounts are extended from day to day for a week without rewriting the titles. But it is not necessary to rewrite the titles even once a week unless such a course is preferred. By cutting away a portion of every third leaf of the book the accounts may be extended through two weeks without rewriting; and further still, if two or more pages be cut down far enough for the titles of accounts to

appear at the edge from underneath, the original titles may serve for extending the accounts indefinitely. To accomplish this a column must be provided upon the outer edge of each page for numbering the lines, or by having the number to the lines printed in at the time the book is made. The numbers will serve as a guide to the eye while posting to the right hand page, where the columns are some distance from the titles of the accounts.

in the single balance column with red ink, so as to distinguish them from the others, could they not ?”

Precisely. That is the manner in which it is often done. But there is sometimes an objection to the use of red ink for that purpose. I once knew a bank president who was color blind to such an extent that he could not distinguish red from black in an account book. It was necessary in that case to have something to rely upon for the expression of a debit balance, besides a change in the color of the ink. Such instances are very infrequent, I know, but the additional cost of having one more small column in a book is trifling, and it certainly affords some advantage in this register. You observe the several columns are added and the footings carried forward.”

“So I observe; but is there anything to be gained by this ?”

“I use this as a proof that the balances for the day are correct, thus :

The balances this morning were :*

<i>Amount due depositors,.....</i>	<i>\$40,000</i>	<i>Footing of column for credit</i>	
<i>Overdrafts deducted,.....</i>	<i>1,000</i>	<i>balances for to-morrow,</i>	<i>\$42,500</i>
		<i>Deduct column footing of over-</i>	
<i>Net credit balances,.....</i>	<i>\$39,000</i>	<i>drafts,</i>	<i>1,500</i>
<i>Deduct checks paid,.....</i>	<i>8,000</i>		
<i>Leaving,</i>	<i>\$31,000</i>		
<i>Add new deposits,.....</i>	<i>10,000</i>		
<i>New credit balance,.....</i>	<i>\$41,000</i>	<i>New credit balance.....</i>	<i>\$41,000</i>

“Then you have for each customer a ledger account independent of this Balance-book, do you not, Mr. Payson ?”

“I do. And you may see by this that I enter here only the total of checks paid during the day for each depositor. This total of checks paid I obtain from the account in the Depositors' Ledger. There are several forms of rulings for a ledger of this kind. The ordinary form of single debit and credit columns is the one I use. Then there are the three-column and the four-column forms. There is no special advantage in keeping columns for balances in the ledger when the Daily Balance Register is used, at least I do not consider it of sufficient advantage to warrant the additional labor it requires.”

“And why, Mr. Payson, do you not make the Balance Register serve the purpose of a ledger as well as a daily balance-book ?”

“Indeed I might do so, but for the fact that I want an accurate record of the checks each day as they come in and are paid, and to keep such a record in the Balance Register would prove detrimental to the purposes for which the Register is kept. It would be necessary, as you see, to leave sufficient space somewhere for entering the amounts of the checks in such a manner that they could be easily added; and this, of course, would require much additional space, thus reducing either the number of accounts to a page or the number of days that could be brought upon the two pages. The form is not calculated to meet such a service in a bank of this character. A form somewhat similar

* The figures here given do not correspond with those in the accompanying illustration. It is not necessary they should in order to explain the method of testing the correctness of the balances.

to this is used in many savings banks in such a manner that no other ledgerized account is kept with the depositors."

"You have in this book then the accounts arranged alphabetically, and I see you have left many lines blank after the names, in some cases two or three lines, and in others more; then I see you have left spaces for names commencing with letters for which, as yet, there are no accounts at all. Can you tell me how you have made these alphabetical divisions, or by what rule, if any, have you arranged the spaces for accounts in this order?"

"Persons who have given the subject of indexing much attention, and who have devoted much time to experiments and investigations, find that the proportionate number of names that will come under each letter of the alphabet in any given quantity differs according to the differences existing in localities where the experiments have been made. A careful investigation, taking in a large number of classes, and including experiments in many different localities, has resulted in forming a basis of calculation for the purpose of indexing personal names according to the relative importance of each letter to any given number of names. In a thousand names it has been found that this table will serve the purpose of a careful apportionment."

A	24	I and J	28	R	49
B	93	K	52	S	105
C	73	L	48	T	28
D	46	M	101	U and V	13
E	19	N	19	W	61
F	42	O	22	X, Y, Z	6
G	46	P	39		
H	83	Q	3	Total	1,000

"From this table you will observe that **D** and **G** rate alike; that taking **I** and **J** as one letter they are the equivalent of **T**, and that **E** and **N** have the same numerical values. By combining **X, Y** and **Z**—a thing quite common in indexes—they have double the value of **Q**. The letter **Y** taken by itself would, in many cases, prove equal to **Q**. In some localities **Z** would be found oftener as the initial letter than either **Q** or **Y**. In some localities again more names would be found to commence with either **Y** or **Z** than with **Q**. Where it is found advisable to combine some of the less frequently occurring initials, as **I** and **J**, there can be no objection to placing **Q** in company with **P** or **R**. The combination of **P** and **Q** would be preferable in most cases. You observe that **S** stands at the head of the list in numerical importance, and it is closely followed by **M** second, **B** third, **H** fourth, and **C** fifth. This table, I believe, is one that may be relied upon in the majority of cases to meet the requirements for indexing ledger accounts. Where there are not more than a thousand names to be indexed or subdivided, as in the Register before us, no serious inconvenience will be experienced in arranging for them in the ordinary alphabetical divisions. But with two thousand and more accounts in such a book where there would be one hundred and upwards of titles in many of the single letter divisions, a simple arrangement of the alphabetical order would scarcely prove commensurate with the needs for promptness and dispatch."

"Then, I suppose," said Mr. Brown, who had become interested in this phase of a bookkeeper's knowledge, "you have some regular system for making subdivisions for the letters, and what plan in such cases do you recommend?"

"There are a number of inventions," said Mr. Payson, "for meeting this requirement. It may be difficult to say just which of the plans in vogue is the best, but I will give you a table arranged in accordance with the device, taking the first two letters of the names as indicative of the sub-divisions. It

Fig. 11. Indexing Depositors Accounts, Consonant Table.

is thought by some that this is the most natural, and therefore, the most easily followed basis of sub-dividing. Using for illustration the letter S, we find by experiment that in the greater number of names this letter is followed by c, h, m, or t. Now, if in our sub-division we have classifications for names commencing with Sc, Sh, Sm, St, and one for all others, we shall have, in all, five sub-divisions for this letter, and there need be no hesitation as to where any name should be placed or sought for. These, however, are not all the sub-divisions possible to make for the letter S, because this letter is followed many times by letters other than those given, as : Sa, Se, Si, Sk, Sl, Su, So, Sp, Sq, Ss, Sw, Sy, and in very rare cases Sr, Sv, and Sz. The natural sub-divisions for the letter M upon this basis are not so various. There are not more than eight, thus : Ma, Me, Mi, Mo, Mu, My, Mc, and Mac. These same

sub-divisions will serve for a large number of consonants, but they do not cover the ground thoroughly with many others as with M. Take for example

	a	b	c	d	e	f	g	h	ij	k	l	m
S	66		195		54			124	50	10	19	120

Vowel Table.

e combines also with L, and the r with T, and W, K, and S are the only consonants that are followed by n, and P the only consonant followed by f. This, I will say, is the result of an extended investigation with several hundred thousand names. It is not impossible that other combinations may be found."

"In preparing tables as a basis for a large number of names in a Depositors' Balance Register, or to arrive at the proper space to be allotted each letter or combination in arranging an index or any book upon the plan followed in this Depositor's Balance-book, I found the work best accomplished by first placing the letters or combinations in three distinct classes. These classes I

designate as the Consonant class, the S and Mc class, and the Vowel class. Omitting Q, S and X, there are 18 consonants which are almost invariably followed by one of the vowels in the commencement of persons names. Q is followed only by U. S is followed not only by all the vowels but by 13 of the consonants. The combination Mc is followed by nearly every letter in the alphabet."

"I have here three tables arranged in accordance with the classification of combinations to which I refer. The first of these (Fig. 11) is the consonant table, the second (Fig. 12) the S and M table, and the third (Fig. 13) the vowel table.

The figures in these tables are used to indicate the relative value of each combination, or class of combinations, in a list of 10,000 names. They are not, of course, presumed to be absolutely correct, but they are as nearly an average of what has been arrived at after several years of close inquiry as can be ascertained. The capital letters, which are in the first column at the left of each table, are the commencement or initial letters, and the small letters at the top are those following the first letter of the name. The figures in the square at a right angle of the two letters, give the average number of this combination in an ordinary list of ten thousand names. For example,

165				<i>Thomas Mellowbank</i>				<i>Richard Potts</i>			
Debit Bal.	Check	Dr	Cr	Debit Bal.	Check	Dr	Cr	Debit Bal.	Check	Dr	Cr

									12012		20

Fig. 14.—Proposed Form for Four Column Ledger Account.

the figures in the first square opposite b, which is under a, indicate that of such a list of names 286 would commence with the combination Ba. Those in the second square indicate that 138 commence Be, etc.

"The S and Mc table is formed upon the same arrangement of combination as that of the consonants. The vowel table is constructed upon the order of classification or division instead of giving the relative value of each combina-

tion. Thus: the combinations for names commencing Aa, Ab, Ac, Ad, are

Thomas Millowbank									
Date	Items	P.	Checks	Deposits	Balances				
May 5				1000	1000	-			
6	20 17 ⁵⁰ 173		250 50	500	1289 50				
8	25. 50. 100		175 -	351 50	1466 -				
9	200. 110. 200		560 -	275 10	1181 10				
10	1000 100. 400		1500 -	200 50	118 10				
				50 -	68 40				
			275 50	450 50	106 60				
				1040 80	1147 40				
			175 20		972 20				

only 47 out of an ordinary list of 10,000, and are placed in a division by themselves. Were the combination carried out by letters instead of by classification we would have the following:—

- Aa, 2
- Ab, 13
- Ac, 8
- Ad, 24
- Total, 47.

“ But such an extended classification for the vowels would be uncalled for in connection with the consonant sub-division of combinations. We observe that there are almost as many names commencing with Ba as there are commencing with A. Also, that while there would be only 230 names

Fig. 14, on the preceding page illustrates only a portion of the ledger page referred to in the text. Instead of two full accounts to the width of the page, the cut shows only one and a part of the other. This form, it will be observed, gives two columns for balances, one for debit balances and one for credit balances; a column for checks or debits, one for deposits or credits and a column for dates with spaces for pages on either side. The date column is placed in the centre, so that the entries extend in both directions.

Fig. 15 shows the same account as the one presented in full in the preceding illustration, but in a somewhat different form. It is intended that this account will occupy in width the entire page of the book. It has only three money columns, viz.: Checks, Deposits and Balances, a date column and a space for items or checks paid in detail. In the other form no space for this purpose is provided. By omitting the column for debit balances in this form it is presumed such balances, or which in other words are overdrafts, will be written in red ink. In the drawing these entries are emphasized by being written in a back hand style—see the items \$118.10 and \$68.40 in the column headed “ Balances.”

commencing with E, there are 275 commencing with Co, and 285 commencing with Ha. From this you will observe that a more thorough sub-division of names commencing with the consonants may be advantageous. When that is desired we extend the combinations to three letters, as Bab, Bac, Bad, etc."

"But you were saying, Mr. Payson, that you use also a ledger for the depositors' accounts."

"Yes; I will show you some forms for a ledger which I think are an improvement over the usual arrangement for such a book. The rulings of an ordinary ledger permit only one account to a page, at least, the account occupies the entire width of the page. For a mercantile business that arrangement is generally satisfactory, as space is required in which to write the items as well as the dates and amounts. In a depositor's account dates and amounts are all that are necessary; the space, therefore, which is usually given up to items may be used to better advantage by dividing the page in the centre, forming two accounts instead of one, or by adding to the usual form additional columns for balances. The forms I have here will illustrate the idea."

(To be Continued.)

Why Business is Unsettled.—The continued reductions in bank clearings at all the leading cities of the country, as compared with a year ago, tells of restricted business, the cause of which at first sight is not apparent. There certainly seems to be no good reason why the general business interests of the country should not be in an active and healthy condition. The financial situation is all that could be desired. Money is easy at all the leading financial centres, and the weekly reports of the New York associated banks have for some time been of a very favorable character. There is not present, however, the feeling of healthy activity and confidence which the situation would seem to warrant. Capitalists with money to invest seem rather disposed to hold off and await developments. This is particularly true of those contemplating investments in manufacturing enterprises, while many well-established manufactories have either shut down or are continuing business in greatly restricted lines. What is the reason for it, for certainly some good reason exists? It is quite probable that what Mr. Andrew Carnegie recently said to a New York *Tribune* reporter will be received by thoughtful observers as the true explanation of the situation. There is no person more competent to pass an intelligent opinion upon the situation than Mr. Carnegie, and he sizes up the situation to a dot. It is the vexed tariff question that is responsible for all the sluggishness and lack of confidence that pervades the business world. If the Mills bill should become a law the business interests of the country would be compelled to adjust themselves to conditions which would revolutionize present methods. Whether they are to be allowed to continue under the same conditions that have resulted so beneficially, or be compelled in the interests of foreign manufacturers to radically change their methods or shut up shop are questions which, until definitely settled, will work to the great detriment of all the business interests of the country. This continual agitation of the tariff is doing more to unsettle business than all other causes put together. This country has prospered under the old methods, and it is generally better to let "well enough" alone.

Notes and Comments on
BANKING PRACTICE.

SOME NEW IDEAS ON HOW TO CONDUCT A BANK WITH SUGGESTIONS AND HINTS
REGARDING THE OLD METHODS.

Written for RHODES' JOURNAL OF BANKING by a Bank officer—supplemented by
occasional contributions from others who are interested in the subject.

Education of Bank Clerks.—In this country we are somewhat given to underrate the importance of thorough preliminary training for any special calling, unless it be for the so-called learned professions. Up to a comparatively recent date the cry has been for workers; and, provided the workers came, there was not much question made as to competency or special fitness. As a people, we Americans had so much work to do, and there were so few to do it, that any help was welcome. Honesty, industry, and ever so small a portion of natural ability sufficed to push a man ahead in the world and, if not to provide a fortune, at least to ensure a competency. But now we seem to have reached another phase in our growing civilization; for nations, like natural persons, have their phases of growth and development. Affairs move in more settled grooves, competition is keener, and it is not so easy as it once was for beginners to gain a foothold in the world of work. One cannot now go haphazard into anything that offers and hope to compete successfully against men who have been prepared for that particular occupation by special training. True, there are instances of men who succeed in anything they undertake, but such men are rare and no general rule can be laid down from their example. They are, at best, but unsafe guides to follow. These general remarks apply no less to the subject of this paper, namely the education of bank officers, than to preparation for those callings which are usually classed as professional. Perhaps it was some such thought as this that led the American Bankers' Association, a short time ago, to issue a scheme for the education of bank clerks—it is to be regretted that the matter has not been more vigorously pushed. In England and Europe the necessity of special preparation for banking life has long been recognized, and the effect is seen in the superiority, in certain respects, of English and European banking methods to our own. Where it is a matter of originality of invention or of adaptation of old ways to new circumstances we are not, perhaps, left far behind: but there undoubtedly is about the foreign methods a finish and thoroughness which we sadly lack, and which we would do well to imitate. To begin at the beginning, the education of boys in the English and European schools is more thorough than it is with us. In both the Government and the private schools the course is more scientifically laid out. Teaching there is a profession, followed, honored and rewarded, and not, as is too often the case with us, a mere occupation to be put aside as soon as something more profitable is found; consequently, when a boy reaches an age when special training is to begin, there is already laid a broad and solid foundation on which to build. If foreign languages

are aimed at, for example, the true accent has been acquired at the early age when the organs of speech are tender and easily trained to utter unaccustomed sounds. And so it is with everything. There is always a careful looking ahead, a shaping of lines to one focus, so to speak. We are in the habit, in this country, of speaking in a general and somewhat indefinite way about giving a boy a good education and then letting him make his own way in the world.

What is meant by the term, a good education, is not, perhaps, always very clear. This happy-go-lucky method may do very well for a few strong independent natures, but for by far the greater number of men it does very badly. It is not the way that things are managed across the water. And which is more to the point; it is not the best way nor even a good way at all. But why, it may be asked, this constant comparison of our way with the ways of foreign lands? What have we to do with them? We do not have so much to do with them as they are having to do with us. Modern inventions are knitting the nations more and more closely together, and we are all becoming as one people. To pass from Europe to this country does not seem, even as much as it did twenty-five years ago, an emigration to foreign lands. One immediate consequence of this ease of international communication is that we are brought more and more into direct and immediate competition with the skilled labor of foreign lands. What this already means for the mechanic and artisan is but too well known; what it will mean for skilled clerical labor the near future will surely show.

In view, then, of the position stated, it behooves those who intend to follow the profession of banking for a livelihood to be up and doing, to consider well the requirements of banking life and to prepare themselves, as best they may, to fulfil them. To take a rapid survey of the field: What are these requirements? We speak not now of automaton clerks, but of men thoroughly up to the mark in every respect. Deeming a thorough foundation in the elementary English branches essential in any case, the inquiry will be restricted to those special lines of study and work which are more peculiarly fitted to prepare for the banking life. It goes without saying, that a thorough knowledge of commercial arithmetic and book-keeping is essential. By the former is meant not merely the decidedly minor course, which is embraced in the ordinary text-books on the subject, but the wider range, which includes all the problems that may come up in the ordinary course of banking experience. We say ordinary course, because there are some problems in stocks and bonds which require for their accurate solution quite a high degree of mathematical knowledge. A constant drill on long addition and transcribing accounts is absolutely necessary. By book-keeping is meant the whole science of accounts, especially in its application to the department of banking. This may seem rather an extensive programme, but if young Americans are not willing to prepare themselves in this way there are plenty of English, French and German young men who are willing, nay, who are actually doing so now, and it is the thoroughly prepared men who are coming to the front. A knowledge of banking law, at least of so much as is contained in the standard text-books, would necessarily be included in such a course as we are now considering. The list of desirable text-books in this department is neither long nor formidable; but they are of the kind which must, as Bacon says, be "chewed and digested." The foreign trade of the United States is not at

present (unfortunately) a very important factor in the banks generally throughout the country. But as our foreign trade enlarges, and it is to be hoped that it will enlarge considerably in the near future, the banks must be prepared to do their part, and those banks that are so fortunate as to be provided with a force of clerks able to handle foreign business will get the lion's share, and a very profitable share it is; this by way of preface to the statement that a knowledge of foreign languages is considered abroad essential to a thorough banking education. It may be said that any defects in these several respects which may exist in our American system may safely be left to time to cure; that the law of supply and demand will, as the occasion may arise, bring about the remedy. This, in one sense, is true, but the remedy will be had at the expense of the American clerk, and to the advantage of his thoroughly trained foreign competitor.

Working at Night.—Burning the midnight oil seems to be as confirmed a habit with some bank clerks as it is said to be with so many of the fraternity of students and scholars. In almost every bank there is some clerk who is never able to get through his work in the usual hours; but must needs remain laboring away long after his companions are safe at home. Why is this? The reasons are various. Sometimes it is because there really is too much work on the desk for one man to attend to properly. This is often the case with the general ledger. It is not that the work is so difficult in itself, but the volume is so great that one man cannot get through it in any reasonable time. Why, then, does he not apply for assistance or to have his work lessened? Sometimes because he has applied and been refused, or knows by the experience of his predecessors that the application would be in vain. This may be the case where the executive officer is a man who, by reason of a certain narrow-mindedness, is not altogether suited for his position. It is seldom, indeed, that the President and Directors are unwilling to provide ample force to do the necessary work. At times it is the clerk's own fault that he is not relieved. Some men, by a peculiar "kink" in their nature, are utterly unwilling to admit that any task is beyond their strength; they must be an Atlas and bear up the world. When a man becomes thus possessed with an over-weening opinion of his own abilities one can only exclaim: "Ephraim is joined unto his idols; let him alone."

A frequent cause of unseasonable hours, however, is found in the lack of a proper system in the way the work is done. There is a long way and a short way, as well as a right way and a wrong way to do everything, and some there are who will still do the long way though the short way lay ever so plain before them.

Did any one ever notice how some men flourish the pen half-a-dozen or more times before they begin to write; or how others make ever so many rapid, twinkling motions with the fingers when counting money or sorting notes? That's the way that time is lost. Some clerks seem to have no faculty whatever for inventing special methods for special work, or adapting existing methods to new conditions; they seem to be, as it were, impervious to new ideas.

Again, some are genuine wasters of time and seem unable to apply themselves steadily for half-an-hour to any one thing. "Procrastination is the thief of time," as we used to write in the copy-books. And this same sly

rogue finds as ample a field of plunder among bank clerks as among other mortals. Another proverb of ancient standing is that which tells us to "make haste slowly," and there is no surer way to lose time than to do one's work hurriedly and then be kept after hours hunting up mistakes; mistakes which a little care in the beginning would have prevented.

There is one feature, not a very pleasant one, about working long hours at night, which has not been touched upon, and which it may not be amiss to consider, *viz.*: the disastrous effects upon the health. Every man has a limit to his strength, beyond which neither strength of will nor willingness of heart will carry him. When this limit has been reached either the work must be lightened or the physical health must give way. No one can stand up under a strain for an indefinite length of time. Who cannot recall instances where men have broken down under the pressure of over-work, and then been sent, perhaps, on long sea-voyages at the expense of the institution; but, alas! too late. The man remains a mere wreck of what he once was, and all for lack of that ounce of prevention which is worth a pound of cure. But, whatever may be the cause, work at night ought not to be permitted in any well-regulated bank. In most cases there is no necessity for it, and where it cannot be avoided in any other way an addition should be made to the clerical force.

Public Money in National Banks.—On April 19th the Secretary of the Treasury, in response to a resolution of Senator Stewart, of Nevada, transmitted to the Senate a report showing in detail the amount of money deposited by the Government with the various National banks. The report specifically states that no interest is allowed the Government on the funds, and the place of deposit is entirely discretionary with the Secretary. The report shows that on the date given (April 7th) the total amount of public funds on deposit with the National banks was sixty million dollars, of which four million was to the credit of disbursing officers and fifty-six million to the credit of the Treasurer of the United States. Eleven banks held over a million apiece, of which five were in New York city, *viz.*, First, American Exchange, Chase, Hanover and Western; three in Cincinnati, *viz.*, First, Third and Citizens; the other three being Fourth Street, of Philadelphia; Shawmut, of Boston, and Thames, of Norwich, Conn. Sixteen held from half a million to nine hundred thousand apiece, and of the remaining banks, one hundred and sixty-nine held each over one hundred thousand dollars. The total number of banks holding public funds was two hundred and ninety-one.

New Bankers' Directory—Now Ready.

The July BANKERS' DIRECTORY AND COLLECTION GUIDE is ready for delivery. It is carefully corrected to date and contains all the new banks, changes in officers, capital and surplus, correspondents, etc., reported up to July 1st. The new DIRECTORY is a book of 384 pages octavo, printed on fine paper and handsomely bound in red cloth. By all odds the *best arranged for easy reference*, as well as the most reliable Directory ever issued.

Price \$2 a copy; indexed by States on edge \$3 a copy.

Only a limited number printed in excess of edition required to fill advance orders. If you want a copy order early.

FINANCE—AN ESSAY.

WHICH IS BETTER AS A CIRCULATING MEDIUM—COIN OR PAPER?

BY POSEY S. WILSON (MEMBER AM. ECON. SOC.)

I.

Finance was one of Abraham Lincoln's favorite studies, although he never found time to go into it systematically. He predicted, in advising a younger man and politician to pursue it, as a question in politics, that it would be the leading question for fifty years to come. While Mr. Lincoln was right in advising his friend to study it, he was wrong in his prediction.

It is so generally held that we have reached perfection in our circulating medium—in fact, in all our polity and practices, that no one now pauses to study or reflect: "Is this not a silver dollar, and will it not buy as much as any other dollar? Is this not a National bank note, a greenback, a gold dollar, gold or silver certificate (as the case may be), and will they not equally buy things and pay debts? The only fault I find with them is that I have not more of them."

I have recently talked with several Senators and with three ex-Secretaries of the Treasury; all insist that a Governmental issue of paper bills of credit is indispensable to the business of the country; that it ought to be maintained forever, because of its convenience to the pocket; because of scarcity of the metals; but chiefly because of its safety. To which answer may be made, that it is not a duty, nor an intended function of this Government to relieve people from any part of the care of their money; and that no paper bills of credit can, in the long run, be as safe as the gold and silver, into which they must be convertible to be sound; and that mere convenience in handling, while a desideratum, must not be the predominant idea attached to a circulating medium, and that some degree of care and inconvenience is inseparable from the ownership of money.

Moreover, if scarcity of the metals is to be balanced, or made up by paper issue, the latter must exceed the quantity of metal on which it is based, else the objection of scarcity can be urged against the paper bills, also—exactly as it is against the exclusive use of gold and silver.

This is a summary of financial knowledge, and opinion, which I have found to be held by almost every one with whom I have conversed on the subject. In view of this serene indifference and this juvenility of thought, it seems ill-judged to attempt to go to higher questions in Finance, and one is inclined to seduce his own soul to quiet, and pass the question by with the thought:

"Waste not your hour; nor in the vain pursuit
Of this or that, endeavor and dispute—
Better be jocund with the fruitful grape
Than sadden after (none or) bitter fruit."

II.

Let us bear in mind that all paper money, whether of real or fancied necessity, is but credit, or indication of deferred payment; and that, though it is often directly profitable, to use it always *costs*; for on this I construct my main thesis, namely, that in view of the peculiar conditions possible to, and partly present in, our country, there is no necessity, either for incurring the cost of, and involving the National credit in extending and perpetuating a system of bills of credit, issued by private corporations—and indorsed by the Government, nor by the Government itself—and intended to supplant or supplement the circulating medium of gold and silver.

The principle that has come to be known as Gresham's Law of the Coinage, but which applies to all degrees of that which may be used as money, is namely: "When two sorts of coin are current in the same nation, of like value

by denomination, but not intrinsically, that which has the least value will be current, and the other, as much as possible, hoarded or exported ;" or, in other words, a worse money drives out a better.

Though special conditions may arrest the operation of this law, its tendency is from everlasting to everlasting. Sometimes it seems untrue, but if strict watch be kept, it will be seen to assert itself as surely as the law of gravity.

III.

In the storm and stress of 1861, and later, both North and South used means of borrowing money, both for the Confederacy and the United States, which, though confessedly against sound fiscal principles, have often, in fact, almost invariably, been resorted to by nations in extremity; that is, issuing evidences of deferred payment, or paper bills of credit, and making them legal-tender for the payment of private and sometimes public debt, though this latter is equivalent to repudiation.

As the Confederacy is still deferring payment, we will drop her from further consideration.

IV.

It was deemed of vital need that the United States, instead of continuing as she had begun—borrowing specie in the open market—should make a forced loan; this was done by the legal-tender Act—an ancient and favorite way with monarchs.

Possibly this was the circumstance which determined the war's result. Though these notes perverted the judgment of men, they tempted them, as nothing else but gold itself would have done, to enlist their energies in behalf of the Government.

Their very abundance made us wish for more; their abundance grew out of their depreciation, their depreciation led to their abundance.

Had they not been made Legal-tender; had not that clause of the Constitution which says "Congress shall have power to coin money" been interpreted, "Congress shall have power to engrave bills of credit and make them legal-tender for public and private debt," affairs might have taken a less favorable turn than they did.

Men, burning with patriotism, would neither enlist nor furnish material without "an exceeding great reward," as the history of bounty-giving and contracts tells, and as the scramble for pensions, for every possible, and impossible, ill that flesh is heir to, indicates to us now.

Rheumatism of to-day is connected, as an effect, with a night-march or battle of twenty-five years ago, as its cause, with a certainty nowhere else to be found in all the catalogue and calendar of human vicissitudes. So, I admit, *provisionally*, that the Legal-tender Act was a necessity. It must not be forgotten, however, that had there been sufficient coin on hand or obtainable, it would have been paid out instead of the paper evidences of deferred payment, bearing indefinite promises to pay coin.

But because credit was had through paper notes—albeit at ruinous rates, considering the depreciation, interest, counterfeiting, cost of printing and recording, impairing of contracts, and fluctuations in prices and expulsion of gold and silver from that time to this—it is maintained that this, or a similar system, must be perpetuated and extended as the soundest and most beneficial.

Senator Allison and John Jay Knox, in the *North American Review*; Senators Beck, Bowen, McPherson and Farwell, in several bills; President John Thompson of the Chase National Bank, in a letter to the Comptroller of the Currency, are instances, which I take at random, besides the legal-tender opinion of the Supreme Court, to indicate how general is the heresy of the necessity for and benefit of deferred payment, and how widespread the opinion that we must couple a promise to the evidences of such deferred payment, and ordain that these shall be the circulating medium and legal-tender for debt. It is noticeable, too, that the more intricate and the nearer total incomprehensibility any plan approaches, the more acceptable it is. The more it connects with fractions, sinking-funds and functionaries, the more the applause, notwithstanding all these things mean cost and tax. A sinking-fund is foreign to a sound currency, although it may be a sound expedient; a currency which

needs that precaution is not the very soundest. It implies distress, disaster and inconvertibility to be imminent, or that they are the present effect of disaster and distress already past; and implies a compounding for time. The fund must be earned before it can be "sunk," and it must be earned from the patrons of the banks; yet it is spoken of as though it necessarily creates wealth, when it is only a method of conserving a part of earnings with which to pay debt which the advocates of perpetual paper credit declare is better than payment in metal money. Does it not seem strange to provide a sinking-fund against payment of paper bills-of-credit which it is assumed are so good, or it is proposed to make so good, that none will ever demand payment on them!

V.

The National banking system, though held to be successful and beneficial, was a passive cause, at least, that specie payment was long delayed and is precarious now—precarious because the Treasury is guarantor of payment-on-demand of all the outstanding bills of National banks.

For example, I loaned the Government \$100,000, receiving a paper which "owned the debt and named the sum," as well as the time and the compensation. To encourage further loaning, the Government gave me, and others of my category, exclusive privilege to issue bills of credit, as bank notes, equal to \$90,000, payable in its own dishonored bills (legal-tender notes), and bound itself to pay our bills of credit, on demand, if we could not, although it could not, and cannot to-day, pay its own on demand—yet it is paying me, besides interest, a bonus of \$28,000 more than I can demand.

Herein lies the unsoundness of the system; that the Government must always stand ready to pay, on demand, a debt indefinitely large and elastic, notwithstanding it has but one resource, the taxing power, and notwithstanding it may at any time need all its credit and all its power for the public good, or even to maintain itself; for we see that the National bank note is, in reality, only a United States obligation, whether based on a United States bond, held by the United States as indemnifying security, or whether the United States borrows bullion or coins, for which it has no need, and hoards it, as trustee, or warehouseman, issuing negotiable evidence of it and promises to pay.

Another objection to it, as it has existed, is the same as to John Law's Land-banks, which were founded on what may be called the "Eat-your-cake-and-have-it" principle. It is the unsound method of issuing currency (paper) based on something else than bullion, connected with the extraordinary principle that a purchaser can buy a thing and have the money also. That is to say, he can have his bond and the money he paid for it—for the money given him is as much a Government liability as the original (bonds) debt, and both represent but one sum obtained by the Government.

Here we see a Nation, after twenty-three years of peace, its floating debt still extant, and only thirty per cent. in real money laid up against its redemption; at the same time it has guaranteed to pay, on demand, all the National bank notes issued and to be issued, against which promises it holds, in trust, nothing but some other promises of its own making. It is thought by some, with true Hibernian incoherency, that to apply this thirty per cent. of real money, or \$100,000,000 of gold coin, set aside to secure payment of the greenbacks—so far as it will go—will contract the circulating medium, when its only effect will be to lessen the expense of maintaining the paper. In place of \$100,000,000 of the greenbacks now extant, there will be \$100,000,000 in gold. With equal inconsistency, the Supreme Court has decided that promises to pay, when made by the United States, are not binding. There is no way of making the Government guarantor of bank paper, whether the bank borrows it on a written obligation of its officers, or on an engraved and printed piece of paper, without both a perversion of the objects for which government is instituted, and an ever-present danger of a suspension of specie payments and return to inconvertible bills of credit, as greenbacks and National bank notes; neither is it statesmanship nor sound finance to make the Treasury a warehouse for bullion and the Secretary a bailee, as the certificate system contemplates, nor is there any indication of present need for the Government's

making bills of credit and delivering them to private corporations to issue on coins or bullion in their vaults, or in the Treasury vaults, for par or more or less than the par of the security, even were there any profit to the banks in such system. In addition to these and to the further objection that it is not a function of government to guarantee payment of bills of credit issued by banks, it appropriates a large proportion of the National credit to private uses; it contravenes the principle that bullion is the only sound basis for paper issues, and is open to an objection that the National bank circulation is not now necessary, as I shall show.

VI.

The rapidity with which the National bank circulation is decreasing is an indication that it is neither desired nor needed. There must be a profit or advantage in convenience to banks in issuing paper or they will not issue it; and it must be necessary to the business world or it will not want and cannot afford to allow the issuer to make a profit; that is to say, the use of any of the forms of sound credit must be necessary to business or they will be unprofitable to it; if necessary to it, both creditor and debtor may be gainers thereby.

VII.

That, in the interchange of material things for material things; of services for services, rights for rights, or any one of these for any part or more of the others, a medium is necessary, is self-evident.

The inter-relations of these three classes of wealth are infinite in their permutation, as they vary through the agency of demand, and it is the function of money to indicate these relations when they are referred to it.

To avoid the confusion which would result from each man's using a term of his own, as "lots" or "heaps," or "chunks," the statute makes a general term called "dollar." It ordains that contracts shall be expressed in dollars; and when tendered in payment for any past transaction, or proposed interchange, an offer of dollars shall be final. To complete its work the statute, which has named "dollar" as a unit of value, or divisor of value, in the abstract, goes into the material world and selects that which shall be the dollar in concrete. This, it decrees, shall be a given quantity of gold of certain fineness, with a Government mark indicating these attributes. This, in our financial system, is the standard of its characteristics: 23 22-100 grains of fine gold or 25 8-10 grains of gold, 9-10 fine; *i. e.*, standard gold. Actually, this may vary a little, owing to our faculties being finite, but theoretically it cannot vary in the smallest degree. Even in practice there must be a relation as close as possible between the quantity and fineness, or value, of the bullion in coins, and the stamp, or denomination—the mint value as to gold, the market value as to silver. Even so wild a financier as John Law admitted "it is not the sound of the denomination, but the value of the metal which is to be considered," and the metal in coin derives its value solely from demand, and the demand grows out of its fitness to stand as the material sign of the abstract Unit of Value, though it would, without doubt, have a value for use even if it were not used as money.

Many misguided, as well as many designing men, sometimes called by the inexact term bi-metallists, have sought in vain to prove that this concrete sign of the Unit of Value, which is incidentally the Measure of Value, Standard of Value, and Medium of Exchange—or as Voltaire calls it, "the Pledge and Agent of Exchange," and as Turgot called it, "the certificate that the holder is entitled to something in return for some act or thing"—is exactly equal to 371½ grains of pure, or 412½ grains of standard (alloyed) silver, "if all would admit it." Hence, they argue that two standards, or tests of the attributes of this concrete sign of the Unit of Value are possible; and, also, because Debt is large, necessary.

For want of space I refer the double standard argument; the three-tailed cat argument, the argument that black is white, and the proof that one is equal to two—by means of $a^2 - a^2 - a^2 - a^2$ —to a later time; for the double standard argument assumes that things which are not equal to the same thing may be

made, by law, equal to each other ; and, conversely, that things which are not equal to each other may be equal to the same thing.

Besides, in the United States, the clamor for free coinage of silver, as the question now stands, does not represent the opinion of intelligent students and disinterested men, but is merely a conspiracy on the part of mine-owners, their agents and allies, to induce the people to consent that, through perpetual Governmental interference, an artificial demand for silver shall be created, and through that demand the price of this metal placed beyond the influence of the natural laws of value, and the price thereby kept at an arbitrary figure already set by themselves.

If let alone they will probably insist, after awhile, that silver be made the equal of gold, ounce for ounce, and, indeed, that is the logical end of their demand.

VIII.

The course and result of the debates in the Constitutional Convention, even the Constitution itself, seems to mark the line of legal-tender at gold and silver ; the framers of that instrument made no discrimination between the two metals, neither did they impose upon after times the duty of making or maintaining them equal—nor proportional in any ratio. The forms and policies for later times were left free within the large limit which the Fathers indicated. It is not a duty, therefore, of the present time, from anything the founders of the Government said or did, to attempt to adopt a double-standard of values, nor to coin unlimited quantities of either full-weight or short-weight silver dollars, and make them legal tender in unlimited sums. Our vast store of silver, our capacity to produce it, making us peculiarly and distinctively the leading silver-producing country, introduces, not a new principle in the silver question, but a new manifestation of its importance, and imposes the duty of an attempt through which this abundant and useful product may, under the operation of natural laws of value, better adjust itself both to human needs and to the new conditions under which it finds itself, and to allow the natural market ratio between itself and gold to obtain. Concerning the question of ratio between the two metals, it seems that no two nations can agree as to what it shall be ; as nearly as I remember, eight different ratios have been called for by as many nations.

IX.

The *desideratum* of every nation, in every age, seems to be a circulating medium of gold and silver—which is the mere truism that man ever prefers payment to evidence that payment has been deferred. The United States, almost alone in this good fortune, is able to enjoy a metallic money, as I will show farther on. The amount of money, *per capita*, required in any given country, is beyond the power of any one to predetermine, and is as much a fool's task as a solution of the question what name Achilles took when he hid himself among women to avoid "the carnage and the Lycian troops," or to name the assailant of the Honorable William Patterson. To solve it were to foretell how many times every person's wants have acted, toward whom they have acted, and the extent, how many times they will act, and the range and effect. I challenge any "statesman" to tell how much the "demands of business" will be, expressed in dollars, in the smallest town in the United States, and the amount of money, *per capita*, required there.

The only possible method of successfully treating the currency question on the *per capita* theory is to allow each man to issue his own currency as he may need, and to make it legal-tender, each for himself, independently of all others. A plan like this is elaborated and refined upon in Cooper's novel, "The Monikins," where promises to pay were so numerous, and so generally accepted, that they were made orally and in quantities "equal to the demands of business." The Monikins simply said : "I promise to pay you—so much" which ended the matter. This neat and expeditious system saved the care and cost of printing, engraving, recording, redeeming, guarding against counterfeits, and at the same time furnished money exactly "in proportion to the demands of business."

X.

It is a singular thing, in the history of financial legislation of recent years, that no public man has taken an unequivocal stand for that soundest of all currencies—a metallic one. It has a strange sound when men say that paper, not necessarily convertible, is now necessary because gold and silver are so abundant; when they formerly demanded it because they were so scarce; and yet, in the next breath, they will say that the unlimited coinage of silver is necessary because gold is so scarce; others insist that the unlimited coinage of silver is necessary because silver is so abundant, or because it is depreciating. As to the convenience of metal money; the machinery of banking is so complete that by the science of book-keeping, credits and debits, money-of-account, bills of exchange, checks, certificates of deposit, together with the absolute responsibility of common carriers, every facility is afforded to the requirements of credit; every facility is offered for conveying large sums of money that paper-money affords; indeed, paper-money, itself, is dependent on these very agencies for record and movement. Few men find it necessary to carry large sums of money; and, for travelers, there has never been a time, and probably never will be, when some of the means I have indicated cannot be availed of for transferring money.

Multiplying pieces of paper, multiplying pieces of metal, in whose coining strict regard is not had to coincidence between the stamp and the market value of the bullion contained in it, is simply inflation and disturbance. So the argument for petty convenience, as well as the argument for abundance-for-its-own-sake, and to maintain prices, must fall to the ground. Were we to melt every dollar, and recoin the metal it contains into two dollars, and stamp them with the same mark "One Dollar" that were but to raise and inflate, prices without adding anything to wealth, without supplying any want, and without conferring good equally on all.

The products of human energy, debts, credits, past and present, all the transactions of man with man, are measured in successive portions, so that a single dollar, in a year's time, pays many thousands of debts, establishes and extends many thousands of credit, and makes many more thousands of exchanges.

To return to the evidences of the quantity of gold (1887), available for money we find that the United States have produced \$1,750,000,000 of gold and about \$750,000,000 of silver; they have a growing annual yield, a great surplus of products which can, at need, be exchanged for these metals.

And here one argument of mine owners is brought to naught, namely: that the great quantity and value of silver in the United States imposes on the Government the obligation to give it artificial value; for we see that the quantity and value of the aggregate gold product as well as of its annual product is greater than that of silver, yet there is no need that 20 grains or 15 grains of fine gold be alloyed, fit for common use, and stamped that it is worth 23 22-100 grains.

It seems hardly necessary to argue as to the quantity. We have, in all, coined \$1,400,000,000 of gold, and nearly \$600,000,000 of silver; there is an untold quantity in plate and jewelry, and vast quantities are used in the arts which would not be used had there been more urgent demand for it as coin. Neither would we so far have fallen into the use of so much jewelry and plate, were not these two metals more abundant than is needed for money. It must be borne in mind that while the diminished demand for them, as money, lessened their purchasing power, there was a counter-acting circumstance in the demand for them for articles of use and luxury. It may be said that where the precious metals are needed for coin more than they are desired in plate and jewelry they will seek the Mints, by the natural law of demand; but where they are desired more for jewelry, than they are needed for paying debts, establishing credit and effecting exchanges of things and services, they will seek the jeweler. It seems plain, when we reflect, that, *ceteris paribus*, the precious metals go, as other things go, where the demand is strongest; if we had not lessened demand for them by substituting evidences of deferred payment—i. e. paper notes—either they would have remained with us in larger

proportion, or we would have obtained greater price in exchange for them, and if need and demand at home had been strong enough all would have remained.

The estimate (1887), of the Director of the Mint, of coin, and bullion, about to be coined, and in the United States, is almost a billion, and increasing, by mining alone, nearly one hundred millions per year. This, with the sum extant and in store, the sum obtainable by trading with other nations—under a tariff solely for revenue—probably is, as I have shown, so large that there can hardly be a question that there is sufficient to effect interchange of all things offered in the markets of our country, whether material things, immaterial things, or services, to say nothing of the increased convenience and advantage of a metal-money in foreign exchanges. And if any shrinkage in market prices should occur in a change from paper to metal it would first be felt in immaterial wealth, such as shares, franchises, rights, *etc.*, generally owned by the speculating classes, or affected by speculative demand. As to the effects on creditors and debtors, to result from a resort to metal money, it is as futile to attempt either to foretell, or to regulate it, as it is to forecast the volume of money necessary to a country, for there never will come a day of general settlement. Like the sun which is somewhere always rising, and somewhere always setting, debt is never-ending, still-beginning; it ends but to begin, and begins but to end: A's credit is B's debit, and the credit of to-day is the debit of to-morrow.

Well considered bankruptcy and stay-laws might supplement actions-at-law and private settlements to an extent that would avert wide-spread disaster, in the change from our present complex, heterogeneous currency to a simple and homogeneous system; for only when a redundant currency has led in over-trading and speculation, does abnormal shrinking occur, when money is scarce it tends to move rapidly, compensating scarcity; when redundant, and over-trading is not present, sometimes where it is present, money, being cautious, congests in large centres, and leaves the country towns embarrassed by scarcity, for the country affords less chance for speculation, nor yields the quick returns which speculators desire.

XI.

A return to a purely metallic money calls for a revision of the coinage. It is suggested to use five and ten-dollar gold pieces only; these would answer every purpose for which gold is used, just as the sovereign and half-sovereign in England are used, the napoleon and half-napoleon in France, and as the five and ten-mark in Germany. Our twenty-dollar gold coin is barbaric, the two-and-a-half piece and the three-dollar coin are unnecessary, irregular and annoying. Few men need to carry more than \$200; but some of the practices in banking will perfectly serve their wants when it becomes necessary to convey larger sums. The sum of \$200 in five and ten-dollar gold pieces is more convenient to carry than five dollars in silver. Many a man prefers to be the keeper of his own money, and this would give him the chance and means to be such, while enabling the country to do with fewer banks, and therefore with less expense to society. Here I might end with the expression of my belief that all we need is, \$5 and \$10 gold pieces, of *unlimited* coinage and legal-tender function, with silver legal-tender for sums of \$5 or \$10, with *limited* coinage, all supplemented by tariff laws as nearly granting free trade as possible.

A revision of the silver coinage is dealt with later on in this paper.

It is the theory of the mint, not that it is an institution of profit, but only that the cost of bringing bullion to the degree of fineness pre-requisite to coinage shall be borne by the owner of the bullion.

Owing to the Bland law, the heavy seigniorage on silver coin and the low price of silver, the mint appears to have earned, in 1887, nearly seven millions of dollars; that is, the Government has made this profit by debasing the coinage—an act which in other times and other countries has given rise to bitter complaints. This profit, however, is apparent rather than real, for the Treasury must some day make good the value of these debased silver dollars.

The real expense of the mint for 1885 was, as given me by Mr. Conrad N. Jordan, then Treasurer of the United States, nearly \$1,600,000. This could

probably be reduced one-third by abandoning unnecessary mints and assay offices, as New Orleans, St. Louis, Carson City, Boise City, Helena, Denver and Charlotte, N. C.; the mints at Philadelphia and San Francisco, with the assay office in New York, having capacity far beyond the work to be done. Then there are many private refineries which do as good refinery work as the Government refineries, and whose stamp on bullion is ample warrant to its current sale in the market. The direct cost of all the gold bought by the mints is, a Treasury official tells me, three per cent. above par, and I found, in going over the records of the Denver Mint, as high as ten per cent. above par, in gold, has been the cost of bullion there in some years, though the average is about three per cent., and at Carson, Nevada, in 1887, it was eighteen per cent. above par.

The cost of the paper currency, beside that part borne directly by the banks, is \$400,000 per annum. Mr. John Jay Knox, in the *Review* for January, estimates the irretrievable losses at \$225,000 on National bank notes alone; that on the greenbacks, gold and silver certificates, at the same rate, is \$300,000 per annum. So we have a paper currency costing nearly a million dollars per year, which, added to the cost of the mint and of extra banks, resulting from a redundant and mixed currency, makes our circulating medium of heavy cost when added to the abrasion of coin and express charges for shifting it from place to place, when the metals alone are sufficient to our needs, and would afford a sound, simple and cheap currency, and, above all, one that can be understood by the people. Every proposition to return to a healthy condition of the currency is met with the remonstrance that it is against the interests of the debtor class, but those who offer it forget that there is no debtor class; we are all debtors and all creditors, creditors to-day and debtors to-morrow, and these relations go on, in ever-shifting play, forever. So it will be seen to be impossible to regulate the public finances in the interests of any class; the old, simple and tried principles should be followed, and the business classes of the country would adapt their affairs thereto.

The National debt, like every National debt, is not a debt in the ordinary sense, but is merely a record of what private wealth has been devoted to public use and destroyed for public good. It is paid, not by the debtor's creating, or even earning, wealth and devoting it to payment, but by slowly taking private property from A, B and C and giving it to D or his assigns or heirs, in compensation for his property previously taken or his services had.

Even if all private and public debts were to be repudiated on any given day, there would be no loss to society as a whole beyond the disturbance or interruption resulting in a loss of confidence and end of credit, for every loss would be compensated by an exactly equal gain, as a release of debt is equivalent, in economics, to payment of debt.

XII.

Owing to the warrant which the Constitution gives Bi-metallists for believing in the right of silver bullion owners, equally with the gold bullion owners, to the unlimited coinage and legal-tender function of their metal, and owing to the plain reluctance of public men to depart from the policy of inflation, and the idea of the people that the pieces of metal with which we keep the *tally* of wealth is *wealth*, a method is here proposed in the hope that it would confer a maximum of the benefits of inflation, leaving a minimum of its evils, whether that inflation be by paper bills, issued on coins of silver or on silver bars and used as legal-tender in unlimited sums, or by coining short-weight silver dollars or debased silver dollars. The plan is as follows: to pay all Treasury notes, so far as there is coin in the Treasury appropriate to it, and fund the remainder. The proceeds of whatever securities held, in trust, by the Treasury for the payment of National bank notes as have become due should be applied to the payment of the National bank notes. Withdraw all the worn and varied mass of silver now extant; re-issue it by coining, at the owner's expense, any and all quantities of silver—offered at the mints—full-weight silver coins at their nominal value; abraded ones by weight. Then, in order to prevent the operation of Gresham's law, quoted before, limit the legal-tender function to sums of \$5 or \$10. I am led to name the latter sum as the

limit of what I have noticed men receive without protest or give without apology. They could not conveniently carry even this sum, only they pay out small money faster than large, because minor transactions are infinitely more numerous and urgent than large ones; and these coins would tend to widen their own use and swell the volume of cash transactions because of their very inconvenience, thus diminishing some of the cost and improvidence which everywhere attaches to the use of credit, and which ever attends a redundant currency.

As "It is not the sound of the denomination, but the value of the metal that is to be considered," I would bring the denomination of and quantity in each coin as near as possible, without incurring the danger that a slight rise in the market price of bullion would put the silver coins above par and cause the inconvenience from sudden loss of the medium in which the most important, as they are the most numerous, transactions are borne. On the other hand, they should be as *high* as possible in value relatively to the gold dollar, so as to prevent loss to the holder when coins, by any means, lose their form. If the holder of one hundred silver dollars, or two hundred half-dollars, should have his house burned, go into a foreign country, or have it in a railroad accident, he would find the metal of his money worth, at average quotations for 1886, 74 cents on the dollar in one case, and 71 cents in the other. The danger of deficiency in silver coin were slight, however, since the whole stock of silver would be open to coinage. Nor could an excess easily occur so long as there should stand a limit to the legal-tender function of these coins; for when demand were supplied, excess would be indicated by a slight discount at the banks on large offerings of them. Add to this the cost of coining borne by the owner of the silver bullion and the inconvenience of keeping and transporting, and the preference given to silver bars for exporting, and there would be an incentive to the bullion owner to use it as coin *only when demand would indicate the benefit of it*, and to keep it in the form of bullion when that were most profitable.

The plan is put forth tentatively, and the weight and fineness of the silver stated hypothetically; and only in the hope that some years, in financial affairs, have saved its author from running to anything more absurd than Allison's, Beck's, Bowen's, Farwell's, Knox's and Anderson's plans for making money of other things than gold and silver, at a time and in a nation rich in these metals and richer in things exchangeable for them.

This system of coins would omit the barbarous silver dollar along with the double-eagle and the awkward two-and-a-half and three-dollar pieces; then raise the standard of silver coin to 950 thousandths fine, and coin a 240-grain half-dollar, alloyed weight, 252 grains, equal, by the market value of bullion at the present time (1887), to 95 per cent. of its face or stamped value—47½ cents; 20-cent pieces, intrinsically worth 19 cents, having 96 grains of fine, or 100 grains (about) total weight; 10-cent pieces worth 9½ cents, weighing 50 grains alloyed weight. The percentage of loss possible to such small pieces would be very small, whether by abrasion or accident; there would be a wide diffusion of them, and, outside of banks, no great value of them *en masse*. In this, as in any other system, all injured coin should be received at the Mint by weight, as the severe but only guard against clipping and sweating. In contemplating the exportation of these coins, when in excess, by raising the fineness and limiting the legal-tender, we see how naturally the question of the currency combines with the tariff question; for it is necessary to this system, as to every metal-money system, that there should be, in the tariff, absence of aim to block, by prohibitory duties, or hinder by restrictive duties, any movements of commerce. A tariff laid solely with the intent to meet the needs of the Government, economically administered, is a necessity to this system to prevent redundancy in the currency; in fact, redundancy is one of the least probable evils where peace and natural laws of trade prevail. Excess of bullion, whether in coins or bars, will be remedied by export and exchange, or by being diverted to use as plate, *etc.*; deficiency supplied by sales of products from mines, farms and factories and fish-nets, or by the melting of plate. Still, our tariffites may never admit that obstructive tariffs prevent

instead of create wealth ; that they can only redistribute it in an artificial way, and that there is no point at which trade becomes dangerous, if left to be governed by the ability of men to produce and their capability to demand.

Practically, the foregoing plan makes some discrimination in favor of gold, but only in harmony with the differing nature of the two metals ; but we cannot deny the right of Congress, under the very liberal clause in the Constitution respecting metals, to be led by whatever is shown, within that large limitation, to be the most expedient for us, not as for the passing day, but for the *novus ordo seculorum*, whatever that order shall be, or whatsoever the ages may demand or indicate.

As the Constitution says that no State shall make anything but gold and silver legal-tender for debt, it is inferable that any State can make silver legal-tender, in unlimited sums, *between its own citizens*; and it is probable that the "Silver States" would make it legal tender in unlimited sums to demonstrate their frequent and loud assertion that the people are crying for it and suffering without it ; and a further use of it might be made as a basis for paper-money issues, under the control of the several States. It is to the interest of each State and all its citizens that there shall be no abuse of credit in the form of bills. It is possible for the States to supervise their banking systems as efficiently as the Treasury Department, which bids fair to become, if it has not already become, the great central bank of the country.

Possibly this, or some similar system, would afford the only practical demonstration of and perpetual guard against the fallacies of the double-standard advocates. It would, by consequence, rather than by aim, steady the market price of silver as well as its ratio to gold, by widening its use so far as the people might feel a wider use to be necessary or beneficial ; it would tend to avert panics by bringing the stock of silver in the country into a more available relation to demand. Much of the work of a Bankruptcy Act would be averted by voluntary settlements, possible and likely to be made in silver, in sums beyond its legal-tender range. Through use of this form of silver many new enterprises might be inaugurated, just as in Scotland, when paper was first introduced and credit by that means extended—through the use of paper issued in excess of bullion, though not in excess of assets and credit, and still redeemable in coin, on demand, as its sponsors were careful to be prepared, and as they were required to be.

The late Professor Jevons expressed the hope that some day the nations may have an international denomination for coins. It ought not to be forgotten that coins, weights and measures are the expression of influences and customs peculiar to the people using them, and that their causes may be beyond analysis. At any rate to try to learn why £ is £, \$ is \$, and franc is franc, were but to waste £, \$ and francs. But if that hope is ever to see fruition it will be after an international ratio of fineness of coinage metal is disposed of. One can readily see the relief in making calculations, in the foreign exchanges, from a universal standard of fineness, by noticing that of forty countries, there are six grades of fineness in gold coins :

Four nations use gold .875 fine ; twenty-five nations use gold .909 fine ; seven nations use gold .916-66 fine ; two nations use gold .917 fine ; one nation uses gold .988 fine ; one nation uses gold .986 fine.

There are twenty grades in the fineness of silver coins, to wit : two sets of coins of .400 fineness ; one set of coins of .500 fineness ; one set of coins of .520 fineness ; two sets of coins of .600 fineness ; two sets of coins of .640 fineness ; two sets of coins of .720 fineness ; two sets of coins of .750 fineness ; six sets of coins of .800 fineness ; one set of coins of .810 fineness ; one set of coins of .830 fineness ; one set of coins of .838 fineness ; twelve sets of coins of .835 fineness ; two sets of coins of .868 fineness ; twenty-four sets of coins of .900 fineness ; one set of coins of .902-7 fineness ; two sets of coins of .916-66 fineness ; one set of coins of .917 fineness ; four sets of coins of .935 fineness ; one set of coins of .945 fineness.

International variation in denomination, as well as in fineness, may at first have been intended to prevent outflow, but that is a rule which works in opposite ways, besides, it is a fact in economics that bullion is only exported

when it ceases to be profitable to carry anything else. When bullion goes out of a country it is not necessarily a loss, as it goes in exchange for something, though much of it may go for luxuries, of good or bad influence, or in way of travel, profitable or not to the paying nation. Inasmuch as the metals go whenever it is to their owners' benefit it avails little, to prevent them, that the relative value, or fineness is not plain at sight to every one. There are, in the countries alluded to, 96 varieties of denomination in gold, and 167 in silver coins. International coinage, therefore, presupposes the removal of all difference in the fineness of metal, as well as a resort to the use of coins of the same denomination, a condition so difficult as to be practically impossible. This may indicate to those who hope to secure international action on the ratio of gold to silver, at the Mints, how much their scheme involves and, also, that universal bi-metallism is yet far distant.

Inasmuch as the American Economic Society is, as Professor Johnston of Princeton says, "making an attempt to prevent the formation of any crust on the development of economics, and to assert the right of attempt to develop in every direction, unhampered by any accusation of heterodoxy, with the assurance that unlimited freedom of individual attempt to develop will bring about the truest, most natural and healthiest development," I have, among many old things set out a new proposition in finance which aims, while yielding to the overwhelming sentiment in favor of money made artificially abundant, to provide against its inevitable evils, by making the secondary metal so available that in time of need, demand can so avail itself of it as to prevent, or at least mitigate disaster.

The chief danger from this system would be that some Congress might take the easy, fatal step, in some time of turmoil, of making the silver, so extant, unlimited legal-tender, but even that were a far less evil than an inconvertible paper currency; not so perilous as the hoarding of immeasurable sums in the Treasury and Sub-Treasuries to tempt foreign foes to seize our defenceless cities; not so bad as to leave it to tempt Congress to its abuse.

The Bank of France.—The Bank of France was established in 1800, but it is only since 1848 that it has had the exclusive right of issuing bank bills. The bank occupies the old Hotel de la Vrillière, which was built by Mansard in 1620. The only part of this building open to visitors is the celebrated golden gallery, which was constructed for the Count of Toulouse, Mme. de Montespan's son, and decorated with marvellous taste and luxury by the artists who had ornamented the Versailles Palace for the Count's father, Louis XIV. The golden gallery was destroyed during the Revolution, and only restored a dozen years ago. The bank vaults are less known, for permission to visit them is rarely accorded. They have been constructed so as to resist even the explosion of a mine. To open the first door requires the presence of the Governor, the principal Cashier, and the *censeur*, each one of whom has a key for one of the three secret combination locks. The safe which contains the cash in daily use has an electric alarm, so that at the least touch of a stranger the bell notifies the guardians. A second door, leading to the "conservatory," or safety-deposit room, also has three locks, and requires the presence of the three functionaries before it can be opened. When the Duke of Brunswick traveled he used to deposit his famous collection of diamonds here, preferring this mode of security to the method followed by Mme. Hortense Schruider of "Grande Duchesse" fame, who always carried her jewels with her. The entrance to the vaults where the coin is kept is concealed in a wall. Like the other doors it has three combination locks. This door opens before a narrow spiral staircase, itself closed by three iron doors, each having three locks. At the foot of this staircase is another door, equally furnished with three locks, and when this door is open we enter into an immensely long room, each side of which is filled with large iron boxes; the cover of these boxes is lined with lead, and in case of alarm this lead would be used to seal the covers. All the boxes are labeled, showing that some contain twenty-franc pieces, others fifty-franc pieces, and so on for each denomination and for the bullion.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

DISCOUNT OF DRAFTS BY BANK WITH BILLS OF LADING ATTACHED—BANK'S RIGHT OF RECOURSE UPON PROPERTY ON DISHONOR OF DRAFTS—THE PRACTICE OF DRAWING DUPLICATE BILLS OF LADING CONDEMNED.

This was an action brought by the First National Bank of Batavia against Horatio N. Ege and Benjamin W. Otis to recover the value of certain personal property of which the bank alleged the ownership, and which it claimed had been wrongfully converted by defendants. The bank claimed the property as discount of certain drafts, with bills of lading attached, drawn by the shipper upon his consignees, who refused to honor them. It appeared that in like cases of non-acceptance during a long course of similar dealings between the parties, plaintiff had claimed no such recourse upon the property, and that its first communications to the defendants, after the non-acceptance which gave rise to the present suit, did not indicate that it considered itself entitled to such recourse. The plaintiff bank had judgment below, and defendant appealed.

Held. The conversion is claimed to have been established by proof that the defendants had in their possession on the 9th day of June, 1881, the property claimed, and that the plaintiff then demanded the same and they refused to deliver it. Such evidence would, of course, authorize the finding by the referee of a conversion of the property, and, if accompanied by evidence of title, would justify a recovery. The claim of title by the plaintiff is somewhat confused by reason of the peculiar mode adopted by one Williams, the general owner, in consigning produce purchased by him to the defendants to sell on commission. Williams was a produce dealer residing at Batavia, N. Y., and had for several years been in the habit of sending his property by railroad to the defendants, commission merchants in New York, to sell. He was accustomed, when shipping goods, to obtain from the carrier two bills of lading—one called an "original," and the other marked as a "duplicate." The originals were sent directly to the defendants, and the duplicates were retained by Williams and attached to drafts drawn upon the defendants, which he procured to be discounted by the plaintiff. These drafts were frequently drawn without particular regard to the value of the property described in the bills attached thereto, and were usually accepted or rejected by the defendants according to the condition of Williams' account, and the value of the consigned property in their possession. This was the general course of business pursued by the parties, and was known to and apparently acquiesced in by all. The particular transaction in question grew out of the dealings occurring between September 29, 1879, and February 18, 1880. During that period Williams had drawn 145 drafts, accompanied by the same number of bills of lading, upon the defendants, aggregating in amount \$59,025. The first 135 drafts, amounting to \$53,725, were accepted and paid by the defendants; but the last ten, drawn between January 31, 1880, and the 13th of February thereafter, and aggregating \$5,300, were not accepted and, together with the bills of lading accompanying them, were returned to the plaintiff as dishonored bills. The entire property covered by the 145 bills of lading, as shown by its subsequent sales, produced but \$52,065.52, so that by

* All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL'S Law Department as early as obtainable.

Attention is also directed to the "Law Notes and Comments" and "Replies to Law and Banking Questions," which are included in this Department.

the payment of the first 185 drafts the defendants had paid to the plaintiff an amount in excess of the total proceeds of the property consigned.

The claim of the plaintiff is that the defendants had no right to apply the proceeds of the property received by them under the last ten bills of lading to the payment of liabilities incurred through the acceptance of previous drafts, and we are of opinion that this contention is correct. The practice of carriers in issuing duplicate bills of lading to consignors for property shipped for sale has been much disapproved of by the courts for the reason that it affords a convenient opportunity for the commission of frauds by the consignors, as well as subjecting the carrier to the hazard of making incorrect delivery of the property. (*Glyn vs. Dock Co.*, 7 App., Cas. 591.) No copies of the bills of lading issued in these transactions appear in the case, but we must assume that in accordance with the usual custom in regard to such instruments, they authorized the delivery of the property by the carrier to the consignees named therein, according to the order in which they were presented to it. (*Kemp vs. Falk*, 7 App., Cas. 578; *Glyn vs. Dock Co.*, *supra*.) No question, however, arises in this case over conflicting claims between holders of respective bills of lading, as there can be no claim that the defendants acquired title to the property consigned by virtue of the receipt of any bills by them. It was said by Lord Westbury in deciding the case of *Barber vs. Meyerstein*, L. R., 4 H. L. 336: "There can be no doubt, therefore, that the first person who for value gets the transfer of a bill of lading, though it be only one of a set of three bills, acquires the property; and all subsequent dealings with the other two bills must, in law, be subordinate to that first one, and for this reason, because the property is in the person who first gets the transfer of the bill of lading. It might possibly happen that the ship-owner, having no notice of the first dealing with the bill of lading may, on the second bill being presented by another party, be justified in delivering the goods to that party. But, although that may be a discharge to the ship-owner, it will in no respect affect the legal ownership of the goods."

These expressions were approved in *Glyn vs. Dock Co.*, *supra*, and undoubtedly state the condition of the law in England on the subject at this time. See also *Lickbarrow vs. Mason*, 2 Term R., 68, and notes to that case in *Shir. Lead.*, Cas. (Bl. Ser. 204). The possession of these bills, therefore, gave the defendants no title to the property described therein, but simply conferred on them the right to receive it from the carrier and hold it subject to an accounting with the consignor when sold, or with the true owner when he should appear. If, however, before incurring liabilities upon the credit of such consignment, they received notice of its previous transfer to another party for value, they could not thereafter deal with the property to the prejudice of the rights of such party. By taking the transfer of a bill of lading from the consignor and discounting a draft upon the faith thereof, the plaintiff acquired title to the property described therein to the extent of the draft discounted by it, paramount to the claims of any other party. This would clearly be so unless such party had in good faith parted with value in reliance upon the possession of the property lawfully acquired. (*Bank vs. Pfeiffer*, 108 N. Y., and cases therein cited.)

When the consignee of property to sell accepts drafts upon the faith of such consignment, he acquires the right to sell the property and apply its proceeds in payment of such drafts; but if such proceeds are insufficient for such purpose he must rely upon the responsibility alone of the drawer to repay any deficiency. By the mere receipt of subsequent shipments he acquires no lien thereon to the prejudice of those who have advanced money upon them, and taken transfer of bills of lading to secure such advances. The defendants have had notice, by the uniform course of dealing between the parties, and the invariable practice of Williams in raising money of the plaintiff to make purchases, that the consignments in question had been transferred to the plaintiff, and they could not prejudice its rights thus acquired except by incurring, in good faith, new liabilities upon the faith of Williams' apparent ownership, and their possession of the property, even if they could do so under such circumstances. It was the duty of the defendants when they

received notice of the ownership of their consignments by the plaintiff, to hold and dispose of them on its account, applying the proceeds to the payment of the specific drafts accompanying the consignment, and, if insufficient for that purpose, to charge the deficiency to their consignor. The plaintiff, however, never incurred any liability to the defendants on account of the acceptance and payment of the drafts by the defendants for a greater amount than the value of the property consigned, and had the right to consider each subsequent consignment as a new dealing to be treated according to the specific rights thereby acquired. With respect to the ten bills of lading in question, the evidence shows that the plaintiff advanced money upon the transfer thereof to it, and acquired title to the property therein described, before any other right or claim could have attached thereto; and it is clear that it had the right to have the proceeds applied in satisfaction of the respective drafts accompanying the respective consignments, or to have the property delivered to it upon demand.

Some proof was given tending to show that the plaintiff was ignorant of its legal rights until after all the consignments were received by the defendants; but there is no evidence showing that the defendants were prejudiced by this conduct of the plaintiff, or that it was estopped from asserting its legal ownership by any steps taken by the defendants in reliance upon plaintiff's conduct. It is quite possible that defendants might thereby have felt authorized to pursue a course of business which would not otherwise have been adopted; but this affords no reason why courts should disregard the plain legal rights of parties, unless some element of estoppel, as against such parties, is introduced into the transaction. The fact that a party has on other occasions omitted to enforce his clear legal rights as to some property, affords no reason why he should be defeated as to legal claims upon other property when he does finally assert them.

Judgment affirmed.

First National Bank vs. Ege, Court of Appeals, New York, April 10, 1888.

PROMISSORY NOTE—DISCOUNT BY BANK FOR PAYEE BY GIVING CREDIT FOR AMOUNT—SUCH DISCOUNT AND CREDIT, WITHOUT MORE, DOES NOT CONSTITUTE BANK A BONA FIDE PURCHASER FOR VALUE, AND MAKER, BY SHOWING FAILURE OF CONSIDERATION, MAY DEFEAT RECOVERY—BANK, HOWEVER, DOES NOT LOSE CHARACTER OF BONA FIDE PURCHASER FOR VALUE SIMPLY BECAUSE SOME OF ITS OFFICERS AND DIRECTORS ARE ALSO OFFICERS AND DIRECTORS OF PAYEE.

This was an action on a promissory note discounted by the plaintiff, the Manufacturers' National Bank of Racine, against the makers thereof. The facts were as follows:

On August 25, 1884, the J. I. Case Threshing Machine Company, a corporation doing business at Racine, by its agent, sold to P. F. Newell, one of the defendants, at Hammond, St. Croix County, a separator and steam engine for threshing grain. At that time, and in part consideration therefor, a note bearing that date and purporting to be executed by said P. F. Newell and his brother, M. J. Newell, was made, wherein they promised to pay on or before November 15, 1885, to J. I. Case Threshing Machine Company, or bearer, \$800 at the Bank of New Richmond, with interest at seven per cent. per annum from that date until paid. This action was commenced December 12, 1885, to recover the amount of the note which the complaint alleged to have been duly sold, assigned and transferred to the plaintiff, a banking corporation at Racine, by said company for a valuable consideration before the same became due. The defendant, M. J. Newell, separately answered and denied that he ever signed, executed, or delivered the note. The defendant, P. F. Newell, separately answered and admitted that he executed, signed and delivered the note. He also alleged in effect that he purchased the separator and steam engine at the agreed price of \$1,400 upon a warranty, upon which he relied, as to its good quality and efficiency; and that the machine was worthless, and that he had in consequence suffered loss greater in amount than such price of the machine; and that the plaintiff took and received the

note with fair notice, and a knowledge of such breach, and all the facts therein stated.

After the close of the testimony the court directed a verdict in favor of the defendants, and from the judgment entered thereon plaintiff appealed.

Held, The name of M. J. Newell was signed to the note in question by his brother, Peter F., in the presence of the agent of the Threshing Machine Co., but apparently without any authority, express or implied. The most that is claimed is that when Peter F., some months afterwards, told him he had so signed his name, he made no response. There is no claim that M. J. Newell was in business with his brother, nor that he had any interest in the purchase, nor that such agent was induced to believe, or had any expectation of holding him liable in any other capacity than as mere surety, solely by virtue of his name being signed as stated. Upon these admitted facts it is evident that if the defense made by Peter F. Newell, as principal defendant, is available to him, then it is equally available to M. J. Newell, and the direction of the verdict was justifiable. For the purposes of this case it must be assumed that had the action been brought by the company instead of the bank, the defense to the note made by Peter F. Newell, under the breach of the warranty on the purchase of the machines, would have been a complete and perfect bar to any recovery.

The only question for consideration, therefore, is whether it appears conclusively from the undisputed evidence that the plaintiff was not a *bona fide* purchaser of the note in suit for value before maturity? If it was not such *bona fide* purchaser, then the court was justified in directing a verdict in favor of both defendants; otherwise the judgment must be reversed.

The testimony on this point is undisputed. It consists of the depositions of B. B. Northrup and J. I. Case, taken on the part of the plaintiff and offered and read in evidence by the defendants. These depositions, as far as material here, are to the effect that during the times in question, Northrup was Cashier and Case was President of the plaintiff bank; that during the same times Case was Director and President and Northrup a Director of the company; that during the same times M. B. Erskine was a stockholder and director in the company and also in the bank; that during the same times the Baker estate was a stockholder in the company and also in the bank, and was represented by Northrup as trustee thereof; that during the same times Charles E. Erskine was a stockholder, director and treasurer of the company, and also a stockholder in the bank; that during the same times the bank had a capital stock of \$250,000, of which \$79,000 were owned by stockholders of the company, and of that amount Case owned \$33,000; that during the same times the company did its banking business at the bank, and the bank was in the habit of collecting, and also discounting notes taken by the company for machinery manufactured and sold by it; that on October 8, 1885, Charles E. Erskine, as such treasurer of the company, took said note to the bank to be discounted, and for that purpose left the same with Northrup, as such cashier, who received the same and stamped it as "Bills Discounted" and credited the amount thereof, including the interest thereon to that date, in the then current account of the company with the bank; that on that day there stood to the credit of the company on the books of the bank in that account a balance of \$42,095.55; that on October 9, 1885, there stood to the credit of the company on the books of the bank in that account a balance of \$52,614.47; that on December 9, 1885, there stood to the credit of the company on the books of the bank in that account a balance of \$147,911.86; that on December 12, 1885, there stood to the credit of the company on the books of the bank in that account a balance of \$141,676.65; that Case had no personal knowledge of the note in suit nor of any of the circumstances under which it was given, nor of either of the defendants, until long after the commencement of this action; that Northrup had no personal knowledge or information concerning the sale and purchase of said machinery nor of said warranty, nor any of the circumstances under which said note was given, nor the consideration thereof, until after the note was so credited to the company on the books of the bank.

Upon these facts can we hold that the plaintiff became a *bona fide* purchaser

of the note for value before maturity, by virtue of the amount thereof being credited to the company on the books of the bank, under the principle of the law merchant, or must we hold the reverse? The acts of the agent in selling the machine and taking the note were, in legal effect, the acts of the company. This being so, the company must be presumed to have had constructive notice of the infirmity of the note in question. But it does not appear that, prior to its receipt of the note, any of the directors or officers of the bank had any actual knowledge or information respecting such infirmity. The mere fact that some of the directors and officers of the bank were also directors and officers of the company did not import to the bank the same constructive notice as was chargeable against the company. (President *vs.* Cornen, 87 N. Y., 320; Bank *vs.* Savery, 82 N. Y., 291; Mann *vs.* Bank, 34 Kan., 746.) The fact, of itself, therefore, was not such in law as to preclude the bank from becoming a *bona fide* purchaser of the note at the time of giving the credit, had it then actually paid the amount of the note. The mere fact that the officers of the bank knew, in a general way, that the company was in the habit of selling machinery and taking notes therefor, and then discounting the same at the bank, was not equivalent to actual notice of the infirmity attaching to this particular note. The ruling in Gill *vs.* Cubitt, 3 Barn. and C., 466, to the effect that a mere suspicious circumstance would prevent a party becoming a *bona fide* purchaser for value, seems to have been disapproved by later authorities, not only in this country but England. (Goodman *vs.* Harvey, 4 Adol. and E., 870; Goodman *vs.* Simonds, 20 How., 367-369; Murray *vs.* Lardner 2 Wall, 110; Brown *vs.* Spofford, 95 U. S., 478; Farrell *vs.* Lovett, 68 Me., 326; 28 Amer. Rep., 59; Phelan *vs.* Moss, 67 Pa. St., 59; Comstock *vs.* Hannah, 76 Ill., 530; Fox *vs.* Bank, 30 Kan., 441.) This is in harmony with the rulings of this court. (Kelley *vs.* Whitney, 45 Wis., 110; Patterson *vs.* Wright, 64 Wis., 289.)

But here it conclusively appears that the bank did not pay the company the amount of the note at the time of giving the credit to the latter on its books, nor any part thereof; on the contrary, it was then owing the company over \$40,000 on its bank account. The taking of the note and giving the credit simply increased the amount of that indebtedness. The relation of the bank to the company continued to be that of debtor and creditor as well after the receipt of the note as before. (Bank *vs.* Millard, 10 Wall, 155; Foley *vs.* Hill, 2 H. L., Cas. 28.) Of course there was an implied obligation on the part of the bank to honor the checks and drafts of the company to the extent of such indebtedness. (Id.) But there is not a particle of evidence that any such check or draft was ever given. On the contrary, we have the evidence of the officers of the bank to the effect that on the next day after the credit was given the indebtedness of the bank to the company had increased \$10,000; and that on the day this suit was commenced such indebtedness was nearly \$100,000 greater than when the note was received and the credit given. Whether the company checked the money out of the bank during the sixty intervening days between the dates given does not appear. If it did, the fact could easily have been stated by the officers of the bank in giving their depositions in the case. Not having been thus stated, and it appearing affirmatively that the plaintiff received the note on a mere credit, which continued to increase, we must assume that the credit given to the company on account of the note was not paid by the bank when this action was commenced. At the time of the commencement of the action the note was several weeks past due. Up to that time the bank had parted with nothing of value for it. The defense interposed was substantial and went to the merits. It was sufficient to bar any recovery unless the bank is to be regarded as a *bona fide* holder for value of the note, by reason of the mere discount and credit. Such being the facts, we are constrained to hold that the plaintiffs' remedy was to tender the note back to the company and to cancel the credit. The right to do so is certainly sanctioned by courts of high authority. (Bank *vs.* Huver, 114 Pa. St., 216; Dougherty *vs.* Bank, 93 Pa. St., 227; Dresser *vs.* R. R. Co., 93 U. S., 92; Scott *vs.* Bank, 23 N. Y., 289; Bank *vs.* Valentine, 18 Hun., 417; Bank *vs.* Bank, 52 Barb., 592; Platt *vs.* Chapin, 49 How. Pr.,

318; *Payne vs. Cutler*, 18 Wend., 605; *Bank vs. Bank*, 1 Hall, 562; *Mann vs. Bank*, 30 Kan., 412; *Balbach vs. Frelinghuysen*, 15 Fed. Rep., 675.)

These adjudications are to the effect that such mere discount and credit does not constitute a *bona fide* purchaser for value. To be such, the holder of the note must actually part with something of value for it. If after such discount and credit such holder receives notice of the infirmity of the note, he is thereby incapacitated from becoming such *bona fide* purchaser by any subsequent payment. We have not overlooked the remark of the late learned Master of the Rolls, cited by counsel, in *Ex parte Richdale*, 19 Ch. Div., 417. But that was under a bankrupt act, and the rights of third parties were involved. We must hold that the bank was not a *bona fide* purchaser for value so as to be protected against the infirmity of the note.

Judgment for defendants.

Manufacturers National Bank of Racine vs. Newell, et al., Supreme Court of Wisconsin, March 27, 1888.

PROMISSORY NOTE—DEFAULT IN PAYMENT—NOTICE TO INDORSER—WHEN INSUFFICIENT TO PRESERVE LIABILITY.

Suit was brought by James Cassidy, the indorsee, against Charles Kreamer, the indorser, on a promissory note as follows:

<p>“LOCK HAVEN, Pa., September 1, 1886.</p> <p>“Four months after date I promise to pay to the order of Charles Kreamer, at the First National Bank of Lock Haven, seven hundred and two and 5-100 dollars, without defalcation. Value received.</p> <p style="text-align: right;">E. E. BRILLHART.”</p>
--

Indorsed: “Charles Kreamer; James Cassidy, Curwensville; Bank of Curwensville, Pa.; Third National Bank of Philadelphia, Pa.; Lumberman's National Bank of Williamsport, Pa.”—which last named bank sent it to the State Bank of Lock Haven, Pa., for collection.

The note was not paid at maturity and was placed in the hands of T. M. Stevenson, a Notary Public, residing in Lock Haven, for protest. On the day of the maturity of the note, *viz.*: January 4, 1886, it was presented for payment to the bank where payable by the notary, and protested for non-payment. Notices of protest to all the indorsers upon the note were mailed by the notary upon the evening of January 4, 1886, to the Lumberman's National Bank at Williamsport, Pa., the last indorser. In the ordinary course of transmission by mail, the notices would be received by the Lumberman's National Bank on January 5, 1886. The bank had until the 6th day of January, 1886, to mail the notices to its immediate indorser, the Third National Bank of Philadelphia who, in the ordinary course of transmission by mail, would receive it on the 7th day of January, 1886. The Third National Bank had until the 8th day of January, 1886, to send the notices to the Curwensville Bank, who received them on the 9th day of January, 1886, which was in due time. The Curwensville Bank did not undertake to notify James Cassidy, its immediate indorser, although he had his residence in Curwensville, had a family there, and was keeping house at the time. It alleged as a reason for not notifying Cassidy that he was in the woods engaged in lumbering, and the cashier expected to see him on his return home. On the 9th day of January, 1886, the day on which the notices of protest were received by the Curwensville Bank, the cashier of the bank mailed the notice of protest to Charles Kreamer, received by it from the Philadelphia bank, to T. M. Stevenson, Esq., the Notary Public at Lock Haven, Pa., and directed him to serve the notice on Kreamer. Stevenson received the letter on the 12th day of January, 1886, and on the same day enclosed the notice of protest in an envelope addressed to “Charles Kreamer, City,” and deposited it in the Lock Haven post office. Kreamer did not receive the notice until the 18th day of January, 1886.

Under this state of facts the Court of Common Pleas of Clinton County, Pa., where the case was tried, directed the jury to find a verdict for the defendant, being of opinion that the notice to Kreamer was insufficient in

point of time, and that he was discharged as indorser. In the opinion rendered by Mayer, *P. J.*, it was

Held, The liability of an indorser is strictly conditional, dependent both upon due demand upon the maker of the note, and also due and legal notice of non-payment. The purpose and object of such demand and notice is to enable the indorser to look to his own interest and take immediate measures for his indemnity. The demand and notice being conditions precedent to the indorser's liability, it is incumbent on the holder to make clear and satisfactory proof of them before he can recover. The law does not require the utmost diligence in a holder in giving notice of dishonor of a note. All that is requisite is ordinary and reasonable diligence. But what amounts to due diligence or reasonable notice is, when the facts are ascertained, a question of law for the court. (*Brenzer vs. Wightman*, 7 Watts & S., 266.) When the Curwensville bank received the notice of protest and undertook to resort in the first instance to Charles Kreamer as indorser, by sending notice of protest to him, it was bound to send the notice in the same time as it would have been obliged to have done if it had resorted at first to its own immediate indorser, James Cassidy. The bank, having received the notices of protest on the 9th day of January, 1886, which was Saturday, was not obliged to give notice until Monday, the 11th day of January, 1886. It had one day after receiving notice, to give notice to its immediate indorser; but as Sunday intervened it had until Monday, the 11th inst., to mail the notices, and on that day it was bound to mail the notice to Kreamer in order to charge him as indorser, and it would be immaterial whether Kreamer received the notice or not, if deposited in the post office on that day. The duty of the bank would have been discharged by mailing it on that day, and the liability of the indorser fixed. But instead of mailing the notice of protest to Kreamer on the 11th day of January, the bank transmitted the notice by mail to the notary public at Lock Haven, with directions to hand it to Kreamer. This the notary undertook to do, but the notice was not deposited in the post office, and in course of transmission to Kreamer, until the 12th day of January, being a day later than it should have been mailed at Curwensville. Of course, if Kreamer had received the notice on the 12th day of January it would have been in time, and sufficient to hold him as indorser. The evidence shows that a letter mailed at Curwensville on the 11th day of January would have reached Lock Haven on the night of the 11th at 10 o'clock and 10 minutes, and would have been delivered on the morning of the 12th. The bank, having undertaken to send the notice of protest to the notary, and employing him as its agent or messenger to give notice of the protest, assumed the risk of its delivery to Kreamer in due time, and the burden of proof is thrown upon the plaintiff to prove such delivery. "So it lies on the plaintiff to show that notice was given and received before action brought. Therefore, where the notice was given and the action brought on the same day, the plaintiff was non-suited because he did not show by affirmative evidence that notice was received before the writ issued." (*Byles, Bills*, 3d ed'n, 831.)

"The holder is not bound to send notice by mail, and he may, if he pleases, in all cases, send it by a special messenger. In such case it will be sufficient if the notice reaches the party entitled thereto on the same day that it would have reached him in due course of mail, although later, if within business hours. And the holder is responsible if his messenger did not deliver the notice within the necessary time, and the party is discharged." (*2 Dan'l Neg. Inst.*, 76, 77.)

For the reasons here given, we are of opinion that the defendant was discharged from his liability as indorser.

Plaintiff, having taken the case to the Supreme Court of Pennsylvania, that court in affirming the judgment,

Held, The law concerning notice of protest of negotiable paper has been so well disposed of by the opinion of the learned judge of the court below that further comment on that branch of the case is unnecessary. Indeed, the only exception we have for consideration is that which complains of the ruling

of the court in refusing to submit to the jury the alleged disputed fact of the time when the defendant actually received notice of the dishonor of the note. But the burden of proof was on the plaintiff. Had the Curwensville bank mailed the notice to Kreamer on the 11th of January, proof of that fact would have been sufficient. Instead of this, it mailed the notice to a special messenger residing in the same town with Kreamer who, instead of delivering it, as he might have done, on the 12th, dropped it into the postal box, which was no delivery at all. (Kramer *vs.* McDowell, 8 Watts & S., 138.) Had Kreamer received it, the delivery would, of course, have been complete; but of this there was no evidence, while he testifies that he did not get it until the 18th, one day too late. It follows that there was nothing to submit to the jury, and the court could do nothing but direct a verdict for the defendant.

Judgment affirmed.

Cassidy *vs.* Kreamer, Supreme Court of Pennsylvania, April 28, 1868.

PROMISSORY NOTE—LIABILITY OF MAKER FOR ACCOMMODATION—PLEDGE FOR ANTECEDENT DEBT BY PAYEE AFTER INSOLVENCY—RIGHT OF PLEDGEE TO ENFORCE AGAINST MAKER.

This was an action brought by the United States Trust Company of New York, as indorsee of two promissory notes made by the defendant, William R. Hart, to the order of M. Kalbfleisch's Sons, and by them indorsed. An affidavit of defense was filed setting up that the notes were made by William R. Hart for the accommodation of the payees and loaned to them without the maker receiving any consideration therefor; that while the notes still remained in the possession of the payees, they became insolvent and suspended payment; that they then, still holding the notes made by the defendant, promised him not to use them but to return them to him, but in violation of this promise deposited the notes with the plaintiff as security for an antecedent debt.

Judgment was given for plaintiff for want of a sufficient affidavit of defense and defendant took a writ of error.

Held, The affidavit of defense sets out the following facts: *first*, that the notes were without consideration, having been made for the accommodation of the payees; *second*, that before their negotiation the payees becoming insolvent, suspended payment; *third*, after such suspension the payees promised Hart not to use but to return the notes; *fourth*, notwithstanding such promise the payees did not return them but turned them over to the Trust company as collateral security for an antecedent debt. The Court below entered judgment against the defendant for want of a sufficient affidavit of defense and this ruling is here assigned as error.

The general rule as to the liability of the maker of an accommodation note was laid down with clearness in Lord *vs.* Bank, 20 Pa. St., 384. It was there said, "He who chooses to put himself in the front of a negotiable instrument for the benefit of his friends must abide the consequences, and has no more right to complain if his friend accommodates himself by pledging it for an old debt than if he used it in any other way." Proof therefore that the bill or note sued on was given as an accommodation will not put the holder on proof of the consideration paid. The legal presumption is that he is a holder for value. This presumption is rebutted by proof that the bill was negotiated after its maturity, and the maker is let into any defense that he might make against the payee. (Bower *vs.* Hastings, 36 Pa. St., 285; Hoffman *vs.* Foster, 43 Pa. St., 137.) So where the note was procured by fraud, the holder is affected by the fraud unless he shows himself to be a holder for value, before maturity, and without notice. So, if one not a party to the bill or note is entrusted with it, indorsed in blank, for the purpose of getting it discounted for the benefit of the maker and payee, and fraudulently appropriates it to his own use by pledging it as security for an existing debt, the maker may set up the want of consideration and the fraudulent diversion of the note as a defense against the holder. (Royer *vs.* Bank, 83 Pa. St., 248.) Where the note was given as a memorandum, and not for negotiation, but the payee fraudulently pledged it

as collateral security for an antecedent debt it was held that the holder, not being a purchaser for value, could not recover. (*Carpenter vs. Bank*, 106 Pa. St., 170.)

These exceptions rest on the proposition that fraud in the procurement or misappropriation of the note, as against one not a purchaser for value, is a defense. We are now asked to take one more step in the way of impairing the commercial value of accommodation paper by holding that the insolvency of the payee happening between the procurement and negotiation of an accommodation note, gives the maker the right to have his note retired; and that the promise of the payee to deliver it up to him makes the subsequent negotiation of it a fraud on the maker, which he can set up against the holder who has taken it as security for an existing debt of the payee. But one who lends his credit, like one who lends his money, takes the risk of the continuing solvency of the borrower. If insolvency happens, it is not easy to see how the lender of his credit is placed in a worse position where it happens before, than where it happens after the negotiation of the note. If it be conceded, as perhaps it should be, that where the insolvency happens before the note is negotiated, the maker has the right to recall his loan by credit, yet such right, like the vendor's right of stoppage of goods sold while in transit, must be effectually exercised, or it is lost. A request that the note be returned is not enough, nor is the promise of the payee that it will be; it must be taken up. So long as it is left in the hands of the payee it must be presumed in favor of one having no notice to the contrary, that it is left on the same terms on which it was originally given, and his power to use it continues. The duty of the maker in such cases is stated by Chitty, in his work on Bills, at page 457, in these words: "Upon payment or satisfaction of a bill or note, the party making such payment should take care that the instrument be delivered up to him or his payment indorsed thereon, or he may be liable in an action by a third party who has become the holder of the note before it became due." On page 458 of the same work an illustration is given in which it was held that not taking up an accommodation bill which A had given to B and which B had pledged to C for the payment of certain acceptances, but permitting it to remain in C's hands after the acceptances were paid, raised the presumption that A had left his acceptance or security for advances subsequently made by C to B.

In the case now before us, Hart lent his note to Kalbfleisch's Sons for their accommodation. Whatever conversation he may have had with them after their failure he did not take back his note but left it in their possession. They made use of it before its maturity to secure an antecedent debt and perhaps saved themselves thereby from legal proceedings at the instance of the creditor. The Trust company appear to have taken it without notice of the alleged agreement, in the ordinary course of business, before maturity, as security for an antecedent debt, and we can see no reason why they should not be permitted to collect it. It is better not to extend the exceptions to, or go further in the impairment of, the negotiability of accommodation paper. A note fairly obtained and properly used cannot be defeated in the hands of the holder because the payee had promised to deliver it up, but did not do so; and that is the substance of the defense set up in this case. If the maker had the right to recall it when the payee became insolvent, he did not do so, and he cannot ask us to do, after the negotiation of the note, what he should have done, but failed to do, while it was in the hands of the payee.

Judgment affirmed.

Hart vs. United States Trust Co. of New York, Supreme Court of Pennsylvania,
February 18, 1888.

PROMISSORY NOTE—ACCOMMODATION MAKER—RIGHTS OF BONA FIDE HOLDER WITHOUT KNOWLEDGE OF CHARACTER OF PAPER UNTIL AFTER DISCOUNT OF NOTE—RIGHT TO RELEASE PAYEE AND HOLD ACCOMMODATION MAKER.

The President, Directors and company of the Union Bank brought an action at law against Henry Crine, to recover the amount due upon six negotiable promissory notes, all made by Crine to the order of the Valley Worsted Mills, a corporation, which indorsed them for value, and before

maturity, to the Union Bank, a *bona fide* holder, which discounted them for the benefit of the payee. At the trial a verdict was directed for the plaintiff, and the case came before the Court on a motion for a new trial.

In his answer defendant alleged that said notes were made by him purely for the accommodation of the Valley Worsted Mills, to which corporation they were delivered upon the express condition and agreement with it and with the plaintiff, as defendant was informed and believed, that all said notes should be taken up and paid at maturity by the payee "but that the defendant should in no wise be liable upon the same, or any of them." That said notes were discounted by the plaintiff, under and by virtue of said agreement, and with its agreement that the defendant should not be liable thereon, and that his name was used for the accommodation of the plaintiff, and because, under its rules, all paper discounted by it must contain at least two names. That before the commencement of this suit the payee paid to the plaintiff, in full settlement of all its claims upon said notes, a sum equal to 40 per cent. upon the amount thereof. The answer concluded with a demand of judgment that the complaint be dismissed with costs, and that said notes be delivered to the defendant to be cancelled.

The only defense which was attempted to be proved at the trial was that the plaintiff, which had discounted the notes for the payee and indorser in ignorance that the notes were accommodation paper, was, after the insolvency of both maker and indorser, and about the time of the maturity of the notes, informed, for the first time, that the defendant claimed to be an accommodation maker, and that the payee had promised to hold him harmless; that the plaintiff subsequently released the indorser upon the payment of 40 per cent. of the amount due upon said notes; that they were accommodation notes, and therefore the defendant was discharged. This offered testimony was, upon the plaintiff's objection, excluded, and, there being no other defense, a verdict was directed for the plaintiff.

On the motion for new trial defendant contended (1) that the defense which appeared in the answer was an equitable defense, which could not be received in an action at law in the Courts of the United States; that, according to the rules of the Court, a repleader should have been required by the plaintiff, and that, none having been asked for, there was a mistrial; (2) that the facts which were attempted to be proved constituted a complete defense in Courts of law.

Held, 1. The defense which was alleged in the answer was purely a legal defense, *viz.*: that before and at the time the notes were discounted it was agreed by the plaintiff that the defendant should not be liable to it, but that it would rely entirely upon the payee. This defense is not inconsistent with the notes, does not seek to vary their terms or the contract which they contain, but sets up a valid agreement by the plaintiff which freed the maker from his liability. This discharge of the maker, if proved, would have been a fact entirely independent of the contract which is shown by the notes, and would have been, without question, a legal defense. (Manly *vs.* Boycot, 2 El. & Bl., 46.) The fact that the pleader asked, at the end of the answer, for a surrender of the notes, does not turn a purely legal defense into an equitable one.

2. The defendant next says that the facts which were attempted to be proved constitute a complete defense in a Court of law. Although the defense upon the alleged facts is borrowed from a Court of Equity, and is, in that sense, an equitable one, I do not regard it as a defense which can be administered only by a Court of Equity, upon the ground that the relief which is sought must be granted by an injunction, or by some other remedy which a Court of Equity only can furnish, or that the defense contains matter which can be considered only at equity. If the sole defendant is not liable to pay the notes, there is no difficulty in an examination by a Court of law, and it is not necessary to resort to the form or mode of relief peculiar to a Court of Equity. There is quite a large class of cases pertaining to the discharge of sureties, upon the principles of which cases this defense rests, in which Courts of law take cognizance of defenses which had their origin in the Courts of Equity, but which are administered by Courts of law, without disregarding the inherent distinctions between the two Courts. Many of the earlier distinctions in regard to the rights of

sureties to defend at law do not now seem to be regarded. The cases upon this point are collected in 2 Amer. Lead. Cas., 448.

Upon the theory that it is a defense which can be examined in a Court of law, and confining myself exclusively to the question as it relates to the rights of an indorsee and holder of a negotiable instrument, who took the note or bill for value, in ignorance that it was accommodation paper, I am still of the opinion that the defense is inconsistent with the principles which have generally been considered as settled in regard to the rights of *bona fide* holders of negotiable paper, and, if the accommodation maker permits the note to go into the hands of *bona fide* holders, for value, without knowledge of the relations between the maker and payee, that he has abandoned all right to enforce his equity as against the ignorant holder. "He who makes a note or accepts a bill for the accommodation of another virtually authorizes those who take the instrument subsequently to make such terms or arrangements with the drawer or indorsers as may be most conducive to their mutual interests, and cannot revoke the authority thus given to the injury of those who have acted upon it." (2 Daniel, Neg. Inst., § 1,336-1,338; Bank vs. Rathbone, 26 Vt. 19.)

I do not think it advisable to make an extended argument upon this question, which is an important one, and upon which there is a conflict of opinion, because this case will probably go to the Supreme Court, where the question will be authoritatively settled. Meantime, the numerous conflicting authorities will be found collected in 2 Daniel, Neg. Inst., 316-321; 1 Pars. Bills & N., 233; and *in re* Goodwin, 5 Dill., 140. It may be added that the only decision of the Court of Appeals of New York directly upon the point in question in regard to negotiable paper, is against the validity of the defense. (*Hoge vs. Lansing*, 35 N. Y., 136.)

Motion denied.

Union Bank vs. Crine, United States Circuit Court, S. D., New York, February 7, 1888.

INDORSEMENT OF DRAFT—PAROL EVIDENCE INADMISSIBLE TO CHANGE LEGAL EFFECT OF BLANK INDORSEMENT—BANK CASHIER—NO POWER TO BIND BANK BY AGREEMENT THAT INDORSER SHALL NOT BE LIABLE ON HIS INDORSEMENT.

This was an action brought by J. Leslie Thompson, as Receiver of the First National Bank of Sioux Falls, upon a promissory note bearing date April 21, 1885, executed by defendant to the order of said bank for \$1,000.

The incorporation of the bank, execution and delivery of the note by the defendant, and the appointment of the plaintiff as Receiver, were admitted by the answer. As matter of defense it was alleged in the answer in substance that the note in suit was given in renewal or to take the place of another of like amount, made April 8, 1884, between the same parties; that the last mentioned note was given for the amount of a draft which plaintiff had cashed in June, 1884, for one Henry Wolfe, and on which defendant's name appeared as indorser; that the defendant went with said Wolfe to said bank for the purpose of identifying him, and while there, and when Wolfe presented the draft, the Cashier asked defendant to indorse it, which he at first declined to do, but upon the Cashier's statement to him that he only desired his name for the purpose of showing who identified Wolfe and that he should not be held liable on said draft if he indorsed it, he did put his name on its back; that the first note was given by the defendant to the bank with the understanding and agreement that defendant's liability thereon should not be greater than it was on said draft, and that in any event he should not be called upon to pay more than \$600 upon said note; and that the note in suit was given under similar circumstances and with a like agreement and understanding between the President and Cashier of said bank and the defendant, and in renewal of said first note.

Upon the trial of the action the plaintiff produced the note in suit, read it in evidence, proved he found it among the assets of the bank when he took possession, that payment of it had been duly demanded of the defendant, and rested his case. Plaintiff then objected to the admission of any evidence upon

the part of defendant, on the ground that the answer did not state facts sufficient to constitute a defense. The objection was overruled and the plaintiff excepted. The defendant was sworn in his own behalf and testified substantially to the facts as alleged in the answer. At the close of his testimony the defendant rested, and thereupon the plaintiff moved the Court to direct the jury to return a verdict for the plaintiff upon the ground, among others, that the facts as established by the defendant's evidence did not constitute a defense; which motion was also overruled and plaintiff excepted. No other evidence was offered by the defendant and at the close of all the evidence the plaintiff renewed his motion for the direction of a verdict in his favor upon the grounds heretofore stated; which was again denied and the plaintiff excepted. The case was then submitted to the jury under instructions from the Court and the jury returned a verdict in favor of the defendant. The plaintiff moved for a new trial upon the grounds, among others, stated in the motions aforesaid and the motion being denied, plaintiff appealed to the Supreme Court of Dakota.

Held, 1. There is no pretense that there was any ambiguity about the draft or the indorsement of it by the defendant which requires evidence to explain its meaning; nor is there any claim that it was indorsed by the defendant through mistake, fraud or inadvertence. On the contrary the draft seems to have been in the usual form of such instruments, and was indorsed by the defendant, unaccompanied by any words of explanation or limitation as to his liability thereon. He thereby made a contract with the bank which was absolute and unequivocal on its face, and was to the effect that the draft was genuine, and would be paid upon presentment at the time and place it was by its terms made payable, or that in default thereof he would himself pay it on demand. The allegations of the answer, and the evidence which the defendant was permitted to introduce against the plaintiff's objections, are to the effect that he did not make such agreement. The general rule of law that parol evidence is inadmissible to vary, contradict or explain an agreement which has been reduced to writing is well understood and has found expression in Section 921 of the Civil Code of this territory. Proof of the facts alleged in the defendant's answer could have no other effect, and could have been offered for no other purpose, than to contradict, vary and impair the written agreement which the defendant made with the bank when he indorsed the draft. In no other way than by contradicting this agreement could the defendant have established the defense alleged in his answer. The Court erred therefore in admitting the testimony of the defendant. A similar question was before the Court in the case of *Davis vs. Randall*, 115 Mass. 547, where the defendant offered to prove as a defense that he accepted certain drafts, on which the action was brought, for the accommodation of another, and that before they were accepted the President of the bank agreed orally that he should not be called upon to pay the draft; and it was held that proof of such an agreement was incompetent for the reason that it violated the rule of law that oral evidence was inadmissible to vary or control the terms of a written contract. This precise question has been the subject of judicial investigation in several cases very analogous to the one at bar and the decisions have uniformly sustained this view. (*Bank vs. Dunn*, 6 Pet. 57; *Bank vs. Jones*, 8 Pet. 14,) and the general rule is well established.

2. Another vital objection to the defendant's position is that, assuming that the facts alleged by him are true, and that the evidence in support of them was admissible, still they constitute no defense to his liability on the note in suit, for the reason that the Cashier or President of the bank had no right or authority to make any such contract that would bind the bank. Officers of banks are but its agents, and like other agents can only bind their principals when acting within the scope of their authority. It is not within the province of a Cashier or President of a bank to excuse the obligations of persons liable to it, either as principal debtors or accommodation makers or indorsers, without payment. And it has been repeatedly held by the highest judicial tribunals that the officers of banks have not the power to excuse or limit the legal obligations of persons to the banks they represent, by agreeing with them that they shall not be held liable or called upon to pay the obligations which

they make, either as principal debtors or accommodation makers or indorsers, and on the credit of which the bank has parted with its funds. In the case of *Bank vs. Dunn*, 6 Pet. 57, it was so held, and in the case of *Bank vs. Jones*, 8 Pet. 14, where this question was under consideration the Court made use of this language: "The discharge of the indorser was urged on the ground that certain statements had been made by the officers of the bank which induced the indorser to sign the paper under the belief that by doing so he incurred no legal responsibility. As the ground already is clear, it is unnecessary to add in this case, as was stated by the Court in the case of *Bank vs. Dunn*, that the officers of the bank had no authority as agents of the bank to bind it by the assurances which they gave." The same doctrine was held in the case of *Bank vs. Tisdale*, 84 N. Y. 655, and *Wyman vs. Bank*, 14 Mass. 58, and is decisive of the case at bar.

Judgment reversed and new trial ordered.

All concur, except Francis, J., dissenting.

Thompson vs. McKee, Supreme Court of Dakota, February 24, 1888.

PROMISSORY NOTE—ONE DATE OF MATURITY SPECIFIED IN THE BODY OF THE NOTE, AND ANOTHER IN THE MARGIN—WHICH GOVERNS?—THE STATUTE OF LIMITATIONS.

Action upon the following promissory note :

<p>"\$50. "Ten days after date I promise to pay to the order of D. B. Fisk & Co., Chicago, Ill., fifty dollars at ten per cent. interest from date. Value received. "No.—, Due September 30, 1878.</p>	<p>FRANKLIN GROVE, Ill., July 1, 1878. M. J. MINOR."</p>
--	---

The plaintiffs commenced their action on the 18th day of September, 1883, which was more than five years after the date of maturity as specified in the body of the note, but within five years from the due date placed in the margin. Defendant pleaded the statute of limitations.

The question presented for decision was: Does the filling of the blank in the lower margin of the note, naming a date for its maturity, make the note payable on such date, instead of the date named in the body of the note?

Held, As may be seen by the note, it fixes a definite time within which it matures—"ten days after date." It cannot be said, as matter of law, that the marginal note or memorandum could any more control the body of the note than could the marginal figures, when different from the amount expressed in the body or written portion of the note, control the amount which a holder would be entitled to upon payment or judgment. Upon this point we think the American cases are substantially uniform, that, where a difference appears between the words and figures, evidence cannot be received to explain it; but the words in the body of the paper must control. (1 Dan'l, Neg. Inst., §86, and cases there cited.) Hence, if an alteration is made in the marginal figures, so as to make them correspond with the writing, it is not such an alteration as to vitiate the note. In *Smith vs. Smith*, 1 R. I., 398, the court said: "We do not think the marginal notation constitutes any part of the bill. It is simply a memorandum or abridgement of the contents of the bill for the convenience of reference. The contract is perfect without it. If this is so, any alteration in the figures cannot avoid the contract, because it is no alteration, either material or immaterial, in the contract." (See, also, *Rand. Com. Paper*, Sec. 105.)

So we think it must be in this case. The marginal memorandum is only for convenience in the matter of ascertaining the date of the maturity of the note, without the necessity of reading it. It might serve, also, as an important aid in the case where, by accident, the body of the instrument was rendered illegible, or where it was so imperfectly written as to render the intention of the maker doubtful. But we have no such case here. No question can arise as to the true time of the maturity of the note when read from the written portion. Suit might have been instituted at any time after the expiration of the ten days, with the three days of grace added; and it must be held that the

statute began to run at that time, and that the action was barred at the time the suit was commenced.

Judgment for defendant. All concur.

Fisk vs. McNeal, Supreme Court of Nebraska, March 23, 1888.

ACCEPTANCE OF DRAFT BY RAILWAY COMPANY ON CONDITION—WHERE CONDITION FULFILLED, RECOVERY BY HOLDER DECREED.

Scheffelen & Co. brought their action against the Savannah, Dublin & Western S. L. Ry. Co. upon a draft accepted by it, the draft and acceptance being as follows :

"SAVANNAH, Ga., August 1, 1886.

"T. F. Johnson, Treasurer Savannah, Dublin & Western S. L. R. R.:

"Please pay to Theo. Basch or order, one thousand six hundred and ten 15-100ths dollars, and charge to the account of W. H. FERGUSON & Co.

"By S. T. FERGUSON."

"Accepted; payable when chief engineer estimates for grading done, if the amount found to be due Ferguson & Co. is not consumed by acceptances bearing prior date to this one. T. F. JOHNSON, Treasurer."

The case was submitted to the City Court of Savannah without the intervention of a jury, and the court found in favor of the plaintiffs. Defendant took the case to the Supreme Court of Georgia.

Held, The only grounds of error assigned are that the finding of the court below was contrary to law and to the evidence. The testimony submitted to the court showed that before the commencement of the action the engineer had made an estimate of the grading done by Ferguson & Co., who were the contractors engaged in grading the road-bed of the company, and, according to his estimate, the company was indebted to them in some \$16,000, while the prior drafts amounted to some \$10,000. The testimony clearly showed that the company was indebted to Ferguson & Co. greatly more than the amount of these drafts. We think the evidence demanded the verdict, and the judgment of the court below is affirmed.

Savannah, etc., Ry. Co. vs. Scheffelen, Supreme Court of Georgia, April 9, 1888

ABSTRACT OF CASES.

PROMISSORY NOTE—STIPULATION FOR ATTORNEY'S FEE—NEGOTIABILITY.

The note in suit promised to pay the amount "and attorney's fees."

Held, Such an instrument is not a negotiable promissory note.

Altman vs. Fowler, Supreme Court of Michigan, April 27, 1888.

PROMISSORY NOTE—INADMISSIBILITY OF PAROL EVIDENCE TO VARY INDORSEMENT.

The rule that it is not competent to prove a contemporaneous parol agreement to vary the effect of a blank indorsement of a negotiable promissory note, adhered to.

Knoblauch vs. Crossman, Supreme Court of Minnesota, April 30, 1888.

NEGOTIABLE INSTRUMENT—TRANSFER—BONA FIDE HOLDER.

The transferee of a negotiable instrument, such as a promissory note, made payable to the order of the maker, and by him indorsed in blank, holds the instrument clothed with the presumption that it was negotiated for value in the usual course of business, before maturity, and without notice of any equities between the prior parties to the instrument.

That presumption is not rebutted by proof that the notes had been negotiated by an agent of the maker, contrary to the latter's instructions, who had left them in the possession of the agent for future negotiation, according to

special instructions to be given, and which were never given, without proof that such circumstances were made known to the transferee at the time, or in default of evidence tending to show that the transfer was not in good faith.

Cochrane vs. Dickenson, Supreme Court of Louisiana, February 12, 1888.

PROMISSORY NOTE—CONSIDERATION—PURCHASE OF TOWN LOTS.

The purchaser of town lots, receiving a warranty deed therefor from one having no title, and taking possession of said lots, and retaining possession, and not ousted by any superior title, receives some consideration for a note and mortgage given on said lots to the grantor to secure a deferred payment, and there is not a total failure of consideration for said note.

Sunderland vs. Bell, Supreme Court of Kansas, March 10, 1888.

PROMISSORY NOTE—ACTION ON BY HOLDER AGAINST MAKER—NOTICE OF EQUITIES WHEN NOTE TAKEN FROM PAYEE HELD TO DEFEAT RECOVERY.

Where H and L are partners, and for the purpose of protecting the partnership property from being attached by the creditors of L, a contract is made between them that H shall conduct the business in his own name, and account to L for one-half the proceeds thereof, and H, to secure L in such arrangement, executes to L his promissory note, and L indorses the note as collateral security to G, and afterwards H and L make a settlement of their partnership, by the terms of which settlement L is to turn over said note to H; and G received the note with full knowledge of all the facts, *Held*, in an action by G against H, such allegations, if true, are a complete defense to the note.

Gafford vs. Hall, Supreme Court of Kansas, April 7, 1888.

PROMISSORY NOTE—PAYMENT OF USURIOUS INTEREST—APPLICATION TO PRINCIPAL—CONSIDERATION—AGREEMENT FOR REDUCED RATE OF INTEREST—VALIDITY.

Under Section 3, Chapter 51, Comp. Laws, Kansas, 1885, all payments of money made by way of usurious interest, or of inducement to contract for more than 12 per cent. per annum, whether made in advance or not, must be deemed and taken to be payments on account of the principal and 12 per cent. interest per annum.

All contracts in writing, signed by the party bound thereby, import a consideration.

Where the payee and owner of a promissory note, bearing upon its face interest at 12 per cent. per annum, enters into a written agreement with the maker of the note to take only 8 per cent. interest per annum from a specified date; and it is not shown that the agreement is without consideration, or induced by fraud: *Held*, that the note should draw interest at 8 per cent. per annum only from the specified date, in accordance with the terms of the written agreement.

Warner vs. Johnson, Supreme Court of Kansas, March 10, 1888.

PROMISSORY NOTE—MAKER, UPON PAYMENT, IS ENTITLED TO SURRENDER OF NOTE FOR CANCELLATION—ENFORCEMENT OF HIS RIGHT BY A COURT OF EQUITY.

The plaintiff, who had executed a promissory note to the defendant, afterwards fully paid the same to defendant, but the note was not delivered up at the time it was paid. Repeated demands for the surrender of the note proving of no avail, plaintiff brought an action against defendant in a Court of Equity to compel its surrender. Defendant claimed that as plaintiff had a complete defense at law against the note, his refusal to surrender afforded no ground for the equitable relief demanded.

Held, That a Court of Equity would enforce plaintiff's right to the surrender of the note for cancellation, notwithstanding he had a complete defense at law,

the Court saying that the holding of the note by defendant after payment "constituted an element of disturbance between the parties, and a standing menace as well as a cause of embarrassment" to plaintiff "entitling him to immediate equitable relief." "To have required plaintiff, under such circumstances, to await the pleasure of Fitzmaurice (the defendant) or his executor, administrator or assignee in bringing suit on the note might have resulted injuriously to his interests. The lapse of time often makes it more difficult to prove an affirmative defense. Courts of Equity have, in an especial manner, jurisdiction of all matters involving fraud, mistake, or accident.

Judgment for plaintiff.

Mosier vs. Fitzmaurice, Supreme Court of Indiana, March 24, 1888.

LAW NOTES AND COMMENTS.

CRIMINAL LIABILITY OF NATIONAL BANK OFFICER FOR MAKING FALSE ENTRY.—In the case of *United States vs. Creclius*, recently decided in the Federal District Court in Missouri, an interesting discussion is had as to what is sufficient to constitute a "false entry" by a National bank officer in order to support an indictment under section 5,209, U. S. Rev. Statutes. The part of that section material to be stated is as follows :

"Every president, director, cashier, teller, clerk or agent of any (National banking) association * * * * who makes any false entry in any book, report or statement of the association, with intent in either case to injure or defraud the association, or any other company, body politic or corporate, or any individual person, or to deceive any officer of the association, or any agent appointed to examine the affairs of any such association, * * * shall be deemed guilty of a misdemeanor," etc.

The indictment accused the defendant of having made a false entry on three several occasions in the "General Balance Book of the Association," whereby the actual amount of cash on hand at the close of business on said three days was largely exaggerated. The manner of making these false entries, as particularly described in the indictment, consisted in the erasure of certain figures of numbers previously written, and the substitution of different figures in their place. For example, it was alleged that the first two figures of the number "136,302," representing the amount of cash on hand on a given day, were erased and the figures 2 and 9 substituted, whereby the number became "296,302."

The defendant demurred to this indictment, and the question was thereby raised whether the erasure of one or more figures, constituting a number already written on the books of account of a National bank, and the writing of different figures in the place of those erased, constituted "making an entry" within the meaning of the section above quoted.

The contention on behalf of the defendant was that the indictment merely charged an alteration of an entry previously made, which was correct when made, and that the statute had not made it an offense to *alter* an entry, even though the books of the association were thereby falsified. As to this the court holds: As there are no adjudications applicable to the question at issue it must be decided by a fair interpretation of the phrase, "make any false entry," and also by a due consideration of the purpose of the statute, and the mischiefs intended to be guarded against. In section 5,209 the word "entry" is used with reference to books of account, reports and statements. When used in such connection Webster defines the word as "the act of making or entering a record;" that is to say, the act of making a record of a fact or transaction. But in section 5,209 it is obviously used to denote the result of the act, rather than the act itself. It signifies that which is written, be it words or figures, and if that which is so written misrepresents the fact or transaction which it was intended to authenticate, then it is a false entry, within the meaning of the statute. When a person makes an entry in books of account the act may involve, and oftentimes does involve, an alteration of an entry previously made; but the act does not lose its character on that account. An entry is made, notwithstanding the fact that a previous entry is

altered. Adopting the definition before stated of the words "entry" and "false entry," it appears to us that a person makes a false entry, within the meaning of the statute, who erases one or more figures from a number already written in a book of account, and writes other figures in lieu thereof, so that the fact intended to be recorded is falsified. We can see no substantial difference between erasing certain figures of a number and writing different ones in their place, and making an entry, every part of which is in the writer's handwriting. The act in question, as we conceive, may be correctly termed either the alteration of an entry or the making of an entry. It may appropriately be said of such an act that "an entry has been made" rather than "altered," because a new number is the result of the act, and for the reason that a new record is created which bears different testimony as to the fact or transaction intended to be authenticated. If attention is paid to the purpose which underlies the law under which the indictment is framed, there is ample ground to base an inference that the construction above given is in accordance with the legislative intent. The statute was obviously enacted to prevent bank officials and employes from concealing the actual financial condition of National banking associations by means of a falsification of any of the books of account or statements or reports which they are by law required to make. With this purpose in view, it cannot be supposed for a moment that the law was framed with a view of punishing persons who made original false entries, and, at the same time, of exempting from punishment those who falsified correct entries previously made, by erasing figures and substituting different ones in their stead. We think it is too clear for argument that Congress intended to punish such acts as are described in the indictment, and we are furthermore of the opinion that by prohibiting "the making of any false entry" and imposing a penalty for so doing, they have used language fully adequate to that purpose.

For the purpose of showing that Congress did not intend, by section 5,209, to make it an offense to alter entries in the books of National banks, defendant, on the argument, directed the attention of the court to numerous sections of the Revised Statutes, whereby it had been made an offense against the United States to *alter* public books, documents and instruments, such as court records, surveys, maps, patents, bonds, treasury notes, powers of attorney, money-orders, etc.

In disposing of this contention the court says:

"An examination of each of those sections—5,394, 5,411, 5,414, 5,415, 5,416, 5,418, and 5,468—shows, however, that in every instance the word "alter" was aptly used, in every instance there was an apparent necessity for the use of the word "alter," as it described an act not distinctly covered or embraced by any preceding word. But in the section under consideration there was no apparent need of making use of any additional words or phrases. The section prohibits every officer or employe of a National bank from making "any false entry in any book, report or statement." The language so used was sufficiently comprehensive to forbid a falsification of the books of a National bank in any manner, whether it was accomplished by an original false entry or by changing an entry already made. In either event it would be necessary to write in the books,—to make an entry of some sort,—and if the words or figures so written falsified the fact or transaction intended to be authenticated, the act would necessarily be within the prohibition of the statute."

As a further reason for sustaining the demurrer it was suggested that the acts described may have amounted to forgery, and if a forgery, defendant could not be punished under section 5,209, although the act falls within the provisions of that section.

With reference to this the court says that if it be conceded that a falsification of the books of a National bank, committed under such circumstances as to amount to a forgery, could not be punished under section 5,209, yet such concession cannot avail the defendant on demurrer, for the reason that the demurrer admits the facts pleaded in the indictment; and as the offense is there stated, it clearly did not amount to a forgery. (Citing *in re Windsor*, 6 Best

and S., 522, 10 Cox Crim. Cas., 118; State vs. Young, 46 N. H., 266; 1 Bish. Crim. Law, Sec. 586.)

The court having reached the conclusion that the indictment was sufficient, the demurrer of the defendant was ordered overruled.

REPLIES TO LAW AND BANKING QUESTIONS.

Questions in Banking Law—submitted by subscribers—which may be of sufficient general interest to warrant publication will be answered in this Department.

A reasonable charge is made for Special Replies asked for by correspondents—to be sent promptly by mail. See advertisement on another page.

Editor Rhodes' Journal of Banking:

TAYLOR, TEXAS, June 8th, 1888.

SIR:—Does a check drawn "Pay to myself or order" and presented by signer, require an endorsement?
C. MENDEL, Cashier.

Answer.—It is customary for the party to indorse in such a case, though not required as a matter of law.

Editor Rhodes' Journal of Banking:

TARFON SPRINGS, Fla., June 14, 1888.

SIR:—Does a bank, by certifying a check, make itself liable for the payment of the same when presented, or does the certification simply signify that at the time the check is presented for certification there are sufficient funds to the credit of the drawer?

An answer in your next issue will oblige.

CASHIER.

Answer.—By certifying a check the bank incurs the obligation to pay it when presented.

Editor Rhodes' Journal of Banking:

NEW WINDSOR, Md., June 19, 1888.

SIR:—A note, payable at this bank, came for collection marked "No Protest," matured May 3-6 (6th was Sunday). There not being sufficient funds, the note was returned to the bank from which it came on the 8th—should have been returned on the 7th. On the 7th the maker assigned. The parties to whom the note was payable say they will hold this bank for the amount.

Explanation.—Had the note been returned on Monday (that being the first mail after the close of the bank Saturday) the note could not have gotten home in time to have prevented the assignment, as it was above \$100, and a judgment could not have been obtained under six months. If the note had come direct it could have gone home (to drawer) on Monday; but, having come through two other banks, it could not have gotten back to payee until 4 o'clock P. M. on the 7th—assignment having been made that date. Can they hold the bank?

SUBSCRIBER.

Answer.—We do not see how, in the case stated, any damage has accrued to the payees by the action of the bank.

Editor Rhodes' Journal of Banking:

CINCINNATI, O., June 8, 1888.

SIR:—I would like to have your views on the legal point involved in accompanying statement for publication in July JOURNAL.

A sight draft, subject to protest, which shows the stamped endorsements of two National banks, comes to us for collection, and is refused because of said stamped endorsements. We protest and return the draft, payment of the fees is refused, "on the ground that a legal protest cannot be made for refusal to pay a draft with a stamped endorsement."

H. P. C., Cashier.

Answer.—We think the draft was properly protested. Although a stamped indorsement is certainly inadvisable and could be reasonably objected to because of the difficulty of proving it, it is by no means settled in the law-merchant that such an indorsement is not legal. In Pennington vs. Baehr, 48 Cal., 565, a printed fac-simile of an autograph was held to be a sufficient signature of a coupon; and in Bennett vs. Brumfit, L. R. 3 C. P., 28, a person who stamped his name was held to have sufficiently complied with a statute requiring a paper to be "signed." Had the bank omitted the protest, and the stamped indorsement subsequently been held legal, much loss might have resulted.

Editor Rhodes' Journal of Banking:

GALVESTON, Tex., June 7, 1888.

SIR:—Will you be kind enough to give your opinion in your next issue on the following point: A note is made by a party here payable at his office here, in favor of a party in New York. In the body of the note are the *printed* words "protest waived." The New York party placed the note in one of the banks there for collection; that bank in turn deposited it in another bank there who sent it here for collection. There was nothing said by either of the indorsers about protest. Before the note matured the maker failed, and the holder here protested the note for non-payment. The bank in New York refused to pay the protest fee, holding the bank here was in error for protesting by reason of the *printed words* in body of note "protest waived." Was protest proper or not?

D. B. H.

Answer.—The words "protest waived" embodied in the instrument affected and became a part of the contract of all parties thereto, whether maker or indorsers, and no protest should have been made.

Editor Rhodes' Journal of Banking:

SOUTH BEND, Ind., June 8, 1888.

SIR:—1.—A, who is a regular depositor advises us that his note for \$2,000 and interest payable at this bank will mature May 4th, and instructs us to charge to his account if presented. On May 4th his account is good for this amount but the note does not come to hand until June 4th, and in the meantime A has checked out his balance but requests us to notify him by telephone or messenger the moment the note touches the bank and he will at once care for it. The note comes to us by mail for collection and remittance, and is promptly taken up by maker.

QUERY.—Do we collect interest to maturity, May 4th, or to date of payment, June 4th? Of course if amount to cover note had remained with us all of the time interest would cease May 4th.

2.—A is not a depositor and does not at any time have money with us but advises that he will care for the note promptly, and takes it up the day it comes to bank. Interest to May 4th or June 4th?

ASST. CASHIER.

Answer.—Mr. Randolph, in his work on "Commercial Paper," at §1,119 states: "If after the maturity of the note, the maker has withdrawn the fund which he had deposited at the place of payment to meet the note, he will be liable for interest as well as principal."

Mr. Daniel, in his work on "Negotiable Instruments," at §643, also says: "If the maker has funds in the bank, and withdraws them after time of payment, the holder is entitled to principal and interest against him."

If these rules are correct, although the precise question here presented has never been thoroughly considered by any Court to our knowledge, (*Hills vs. Place*, 48 N. Y., 520, being the only case cited by either text-writer) the maker would be liable for the interest to June 4th.

Editor Rhodes' Journal of Banking:

SALINA, Kansas, June 1, 1888.

SIR:—An account in the Metropolitan Bank, this city, was garnished while its clerk was making the exchanges with the other banks. The clerk making the exchanges paid three checks on the garnished account. The Metropolitan Bank paid the checks and claims it had a right to do so, from the fact that its clerk had taken the checks from the other bank before the garnishee was served on the cashier, notwithstanding the checks did not reach the garnished bank until some twenty minutes later. Do you consider the position taken by the Metropolitan Bank tenable?

F. C. MILLER, Cashier.

Answer.—We do not know that the precise question here raised has ever been adjudicated upon. The point made is a nice one. If the transaction at the clearing house wherein the clerk accepted the checks was binding as a payment on the bank, the attachment would not take precedence. All clearing houses, however, have a rule that checks not good are to be returned by the banks receiving the same to the presenting banks before a certain hour on the day of presentment or on the following day. Under this rule the taking of the checks at the clearing house can only be regarded as a conditional, and not an absolute acceptance or payment, and the bank would have the right to return them if they proved not good for any reason. This being the case, and

the attachment coming in ahead of the checks to the bank, we think the bank should have returned and not paid them. In Illinois, however, where the drawing of a check operates as an assignment of the amount specified, it has been held that a check drawn by a depositor before attachment, though not presented until afterward, should be paid by the bank.

114 Ill., 483; 118 Id., 47.

Editor Rhodes' Journal of Banking:

SALINA, Kansas, June 9, 1888.

SIR:—Under date of May 5th the J. W. Rush Bank of Dighton, Kansas, send us a one day sight draft for \$50 on J. G. Mohler, an attorney here, with instructions to *wave protest*, and being refused by Mohler, the draft was promptly returned with reasons duly endorsed. Under date of May 21st they send us a \$50 one day sight draft on Mohler with the following instructions, *vtz.*:

"Protest and return if not paid." As acceptance was refused, our notary protested the draft for non-acceptance, and four days afterwards, not hearing anything from our notice of non-acceptance to the Bank of Dighton, and payment of the draft being refused by Mohler, our notary protested the draft also for non-payment.

Under date of June 1st the Dighton Bank writes us that they will cheerfully remit fees if we will refer them to any law that would warrant us in making a *double protest*. We wrote them to refer to page 126 of Kansas Statutes, Section 584 on part of notary, and to pages 387 and 388 in "Morse on Banking" for our position in the matter. In reply, this morning, they say they have written the *Bankers' Magazine* and will abide their decision. As we are not subscribers to the *Bankers' Magazine*, we concluded to give you a statement of the facts from our point of view, and ask your opinion as to whether we are correct in making a protest for both non-acceptance and non-payment.

While we feel confident of our position being correct, we do not know whether the case has been properly presented to the *Bankers' Magazine*, and for that reason have referred our case to you.

SUBSCRIBER.

Answer.—Where a bill of exchange has been presented for acceptance and acceptance refused, it is then dishonored, and it has been held unnecessary to present the bill afterwards for payment.

De La Toney vs. Barclay, 1 Stark., 7.

Hickling vs. Hardy, 7 Taunt., 812.

Being unnecessary, the notarial fees on a second protest, after presentment for and refusal of payment, could not be charged to the holder unless he specially instructed the collecting bank to hold after non-acceptance, and present again for payment. Whether the words "protest and return if not paid" imply such a direction, is difficult to determine. To us this language would seem to be simply an instruction that the bill should be protested and returned if dishonored, and in such case the second protest should not have been made.

Runs on Banks.—In Ireland recently a run is stated to have been made on one bank, not because there was the smallest reason to doubt its solvency, but because the excited people thought, or were induced to think, that it had not given sufficient assistance to another bank which had been compelled to stop payment. In this case it was abundantly shown that those who withdrew the money did not act in any respect from timidity, as the moment they received their deposits from the one bank they placed them again with another close by in the same street. The veterans, who still remember the days when communication between one part of the country and another was less frequent and rapid than now, can relate stories of the means resorted to for giving confidence to customers when gaining time was important, and tell of the barrels tightly screwed to the floor filled with rubbish and a thin stratum of sovereigns strewed at the top, which it was found impossible to move, as was believed, from the weight of their contents. And a legend lingered long of the timidity of an agent at a branch bank, who was not to be pacified till he was provided not only with funds sufficient to pay off at once all the depositors in the books of his branch, but with a good lumping sum more to enable him to meet any further contingencies that might arise.

THE NEVADA BANK.

HISTORY OF A FAMOUS SAN FRANCISCO INSTITUTION.

In view of the recent reorganization of the Nevada Bank of San Francisco, Cal., the following sketch is both interesting and timely :

The history of the Nevada Bank, which for fourteen years has been the outward and visible sign of the power of the Bonanza mining kings of San Francisco, probably presents stranger vicissitudes than that of any other financial institution in the country. Its history reads like a chapter of romance, as full of defiance of the ordinary rules of life as the careers of its lucky founders. It was founded when they were in the heyday of their prosperity and influence, and it has reflected with the faithfulness of a barometer the changes that have cast these millionaires down from their pre-eminence in the money world of the Pacific Slope, until now, when their fortunes are sadly shrunken by disastrous speculation, the bank is changed into an ordinary commercial bank, with new men in charge and an entire transformation in character.

It was in 1875, when the Comstock mines were sending a stream of gold and silver to San Francisco amounting to many millions every month, that the four Bonanza millionaires decided to open a bank for the transaction of their business. None of them knew anything about banking; but that did not deter them. The scheme was organized by Flood, whose ambition was to be the head of the largest and richest bank in the country, which should sustain the same relation to the Pacific Coast that the Bank of England does to Great Britain. It was estimated at that time that Flood was worth \$25,000,000, O'Brien \$25,000,000, Fair \$25,000,000, and Mackay \$40,000,000. They all went into the bank on the same footing that they occupied in the ownership of the Comstock mines. A fine building was erected convenient to the two mining stock exchanges, and the bank was given the whole lower floor, with the offices of Flood in the rear of the bank.

The new building was opened with a great flourish of trumpets. Everything was on a regal scale. The great windows were full plates of French glass, 15 by 20 feet; the fixtures were mahogany; the trimmings of the furniture were choice California woods, while back of the Cashier was spread out a glittering array of a half million in gold coin, on which the eyes of the public could gloat and which was supposed to represent a small share of the profits of Comstock mining. The bank started with a paid-up capital of \$5,000,000, all in hard coin actually deposited in its vaults. This was an undoubted fact and no empty brag, as many representative citizens beheld this wealth with their own eyes. With the prestige enjoyed by the Bonanza managers, they had no lack of depositors, \$500,000 having been received on the opening day. All the mining companies banked there; all the stock brokers made it their headquarters, and a large number of capitalists and stock speculators intrusted their funds to an institution which was the fountain head of legitimate deep mining on the Comstock as well as of stock gambling in San Francisco.

In 1878, three years after the bank was opened, a branch was started in New York, and the capital stock was increased from five to ten millions. O'Brien in the meantime had succumbed to the excitement of speculation and too much whisky, leaving the other three partners as sole owners. A few other people served on the Board of Directors and acted as dummy stockholders, but this unique bank was really owned by Flood, Mackay and Fair, as much as any of the mines they worked on the Comstock lode. About this time, however, dark hints began to be given out of the exhaustion of the Comstock mines. Of course, the Bonanza managers were the first to learn that the mines were giving out. They shrewdly continued to pay dividends for some time in order to bolster up the market, but they sold all the stock they could float, and in this way managed to gather in several millions each, which were salted away in Government bonds and other choice securities. They lost heavily by the fall in the prices of stocks, and at last they were unable any longer to prevent the disastrous drop which brought ruin to so many credulous investors and sanguine specu-

lators. Their fortunes shrunk one-half within a year, but they still had large revenues from the working of the mines, and they began the system of assessments, which it is estimated has taken more money out of the pockets of the people of California and Nevada than was ever paid by the Comstock mines in dividends. When the crash came the Nevada Bank was the center of the financial cyclone. It weathered the storm in good style, but the managers were forced to reduce the capital stock to \$3,000,000, and to confess that for several years that was all the paid-up capital there had been in the vaults of the institution. This was the first great blow to the prestige of the bank, and it never fully recovered from it.

In 1881, when the life was fairly out of the Comstock mining market and shares had dropped down below the \$20 limit and the assessment mill was remorselessly grinding out the substance of an army of poor speculators, Louis McLane, the President of the bank from its foundation, retired. He was an able financier, and with him went out the man who had preserved the Bonanza managers from making any bad mistakes. Flood succeeded him as President and held the position until last fall.

As Vice-President, was installed a young Scotch bank clerk named James L. Brander, who at the time he entered the bank was working for a small salary as private secretary of Charles De Young, the founder of the San Francisco Chronicle. Brander had gone there to try his fortune, and being completely without funds, he accepted newspaper work and the secretaryship for Editor De Young merely as a makeshift until something more advantageous should arise. This opportunity came with the retirement of McLane, and Brander, who had been working a few months in the bank as assistant cashier, was promoted, and became the actual manager of the institution. He changed much of the style of the institution, introduced young English and Scotch clerks, who he claimed were better trained than American youths, and he treated with great brusqueness many of the old mining patrons of the bank. He succeeded in discouraging loans on stocks, and made every effort to divorce the bank from the stock market. He naturally made many enemies, but even his opponents were forced to admit that he had great executive ability and financial shrewdness. His methods, however, irritated Senator Fair, and, in connection with quarrels that Fair had with Flood and Mackay, led to the splitting up of the original Bonanza partnership.

In the spring of 1885 financial circles of San Francisco were surprised to learn that Fair had retired from all interest in the Nevada Bank. A long-standing quarrel between the old partners had broken out with fresh violence and Fair was forced out of his holdings. He swore to have revenge, and he predicted disaster should Flood and Mackay carry on the concern without the balance-wheel of his good judgment. His prediction came true, as the great wheat deal of last year demonstrated. Flood was led by two San Francisco wheat brokers to invest heavily in wheat, with the plan of making a corner in the grain market. This move was to be aided by a big corner in Chicago. Controlling the wheat crop of the New World, the two syndicates were to force prices up, break the shorts and clear up \$10,000,000 or \$12,000,000 before the new crop of wheat came in. It was a well-planned deal, but the projectors underestimated the amount of wheat which was held outside. This surplus mixed the deal in Chicago, and to save themselves from loss, Flood and his associates were forced to keep prices up in San Francisco nearly one dollar above the Chicago quotations. All this took time, and before they knew it new wheat began pouring in. The strain was more than even a Bonanza millionaire could stand, and Flood called aloud on John Mackay for help. The Nevada Bank had become involved in these wheat transactions to the extent of more than \$20,000,000. When Mackay arrived by special train he saw the case was desperate, and at once ordered the brokers who had done business for the Nevada Bank to make an assignment. Then was seen the curious spectacle of men who were not worth \$250,000 failing for from \$6,000,000 to \$8,000,000. The ridiculous pretense that Flood and Mackay knew nothing of the heavy speculations of the bank in wheat was kept up, but it deceived no one.

The immediate need of the bank was at least \$5,000,000 in cash to meet pressing demands. It is known that Mrs. Fair advanced bonds on which the bank secured ready money, and ex-Senator Fair put up \$2,300,000 in hard cash. For this he stipulated that he should have the management of the institution and that Mackay should retire. This was done, and Fair set about bringing order out of chaos. He managed very cleverly to get a large number of bad debts partially paid, among which was a

long-standing loan to W. T. Coleman & Co., who failed recently. It was his efforts to get all the coin from Coleman that was owing the bank which brought about the failure of this old-established commission house. Fair went to the relief of his old partners partly through a feeling of compassion and partly to satisfy his injured pride. There was not lacking also the desire to make his money earn good interest, for if "Uncle Jimmy," as he is familiarly called, was dealing with his own double he would be sure to get the better of him. So, with Fair disinclined to manage the affairs of the bank, with Flood sick almost unto death, and Mackay overwhelmed with mining and Postal Telegraph business, there was nothing to be done except hand the Nevada Bank over to other people. It has been the bitterest blow to Flood, because he alone of all the partners had the affection of a father for this pet institution. Whatever may be the future changes in it, it will always stand to old Californians as a symbol of the Bonanza millionaire at the height of his great wealth and power.

The St. Paul and Duluth Railroad Co.—The following extract from a circular recently sent out by Wm. H. Rhawn, President of the National Bank of the Republic, Phila., and also prominently identified with the road in question, gives a clear and concise illustration of the situation in connection with the projected new enterprise:

"If, however, the owners of the Saint Paul and Duluth road do not believe that their interests are to be subserved by the construction of the new road, or by affiliating with it upon some fair and proper terms, the Directors would certainly not wish to impose or force it upon the present Company. They had hoped that the stockholders of the Saint Paul and Duluth Company would see the value of the enterprise to them in the same light in which it is regarded by the Directors. It will be a subject of very great regret to myself and my co-Directors if this opportunity of benefiting the Saint Paul and Duluth Company and of upholding and maintaining its business and securing for it the large advantages to be derived from the construction of the proposed line, should not be embraced by the parties who may control the Saint Paul and Duluth Road. Our propositions have been made with that view, but if the owners of the property should differ with us and the opportunity should be allowed to pass without being availed of, we shall feel that we have discharged our duty to those whose property has been confided to our management. *In making the suggestions and propositions referred to, it has not at any time been contemplated that the Saint Paul and Duluth Road would itself be involved in any pecuniary responsibility for the construction of the new line.*"

Texas Bankers' Association.—The fourth annual Convention of Texas bankers was held at Galveston, June 19th, 20th and 21st. The gathering was larger than on previous occasions and of unusual interest. In addition to the regular routine work of the Convention addresses were made and papers read by the following bankers on the subjects named: "Should not Texas Banks Require Regular Borrowers to Maintain Credit Balances Equal to a Fair Percentage of Their Accommodations?" by A. B. Smith, of Fort Worth; "The Advisability of Accumulating a Special Fund to be Expended in Prosecuting Bank Robbers, Forgers, etc.," by Ed. J. L. Green, of San Marcos; "The Benefits of a Good Warehouse Law, Both to Farmers as well as Bankers," by H. A. Bland, of Paris; "Should Not Texas Have Savings Banks? The Advantages to be Derived by the State from a First-Class State Bank Law," by John Caro Russell, of Terrell; "Bank vs. Depositor," by J. E. McAshan, of Houston; "Cotton Buying in the Interior," by T. J. Wood, jr., of Rockwall; "The Future of National Banks," by N. B. Sligh, of Waco; "The Wool Industry of Texas; Its Magnitude and Room for Growth," by T. C. Frost, of San Antonio; "The Cattle Interests of Texas, with Reliable Data," by W. W. Seely, of Waco; "Cotton Seed Interest of Texas," by Sampson Heidenheimer, of Galveston; "Texas as an Agricultural State," by Hon. Henry Exall, of Dallas; "The Timber Interest of Texas; Its Magnitude and Value," by Col. T. R. Bonner, of Tyler; "The Mineral Resources of Texas," by A. P. Wooldridge, of Austin; "The Field Texas Offers Manufacturers," by Hon. J. F. Miller, of Gonzales; "Importance of Deep Water to Texas and the Great Northwest," by Hon. Walter Gresham, of Galveston; "Reminiscences of Banking in Texas at an Early Day," by M. B. Lloyd, of Fort Worth; J. H. Hutchings, of Galveston; John Withers, of San Antonio; J. H. Raymond, of Austin; W. H. Thomas, of Dallas; B. A. Shepherd, of Houston.

On Tuesday the visiting bankers and invited guests were treated to an excursion to Deep Water. On Wednesday there was an entertainment at Gartenverein, and a grand ball on Thursday night, fittingly closed the Convention which was pronounced by all to be the most successful bankers' meeting ever held in Texas.

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Minnesota—St. Paul National Bank.—At a recent meeting of the Directors of this institution, Hon. C. W. Griggs resigned as Vice-President on account of his contemplated removal to Tacoma, W. T., and F. W. Anderson, former Cashier, was elected to the position. A. C. Anderson, formerly Assistant, was promoted to the Cashiership.

New York City—National Shoe & Leather Bank.—Mr. Augustus M. Scriba, who has so acceptably held the position of Cashier of the National Shoe & Leather Bank, has resigned. William D. Van Vleck, formerly Assistant Cashier, was promoted to the vacancy. It is reported that Mr. Scriba will, in a short time, assume the active management of a new bank to be organized in this city.

Chicago—Banking House of S. A. Kean & Co.—One of the best known private banking firms in the Northwest is that of S. A. Kean & Co., of Chicago. This firm has recently refitted and remodelled their banking house throughout, and it is now one of the handsomest and most convenient to be found in any city. The marvellous increase of this firm's business has induced them to look for better accommodations in their New York city office also, their present quarters not being large enough for the volume of business transacted there.

Washington Territory—Tacoma.—The Merchants' National Bank of this city celebrated its fourth anniversary on May 14th last. This bank commenced business in 1884 with \$50,000 capital, which has just been increased to \$100,000 and, with its surplus of \$25,000, gives it the handsome working capital of \$125,000. Henry Drum, who has been Cashier since the bank organized, was promoted to the Vice-Presidency, and his place is filled by Samuel Collyer, son of Rev. Robert Collyer, of New York city. Mr. Collyer has been for the last three years in charge of the Bradstreet Mercantile Agency at Portland, Oregon.

A Prosperous Institution.—The Farmers & Mechanics' Savings Bank of Minneapolis, Minn., is one of the most prosperous institutions of the kind in the Northwest. It was organized fifteen years ago, and during all those years has never made a loss, but, on the contrary, has paid dividends ranging from 5 to 8 per cent. per annum, and has to-day, besides, a surplus fund of \$150,000, with deposits aggregating \$2,500,000, owned by 3,000 depositors. The bank is a purely mutual one, without capital, similar to the savings banks in New York and the New England States—that is, all profits, after paying expenses, belong to the depositors.

New National Banks.—The Comptroller of the Currency has furnished the following comparative statement showing the number and capital of new National banks organized during each of the spring months of 1887 and 1888:

Number Aggregate of Banks. Capital.		Number Aggregate of Banks. Capital.	
Organized in March, 1887....	23 \$2,080,000	Organized in March, 1888....	11 \$709,000
Organized in April, 1887....	24 2,650,000	Organized in April, 1888....	15 1,475,000
Organized in May, 1887.....	26 6,767,000	Organized in May, 1888.....	17 1,200,000
	<hr/> 78 \$11,507,000		<hr/> 43 \$3,384,000

In comparison to 78 banks, commencing business with capital of \$11,507,000, during the spring of 1887, this spring there have been but 43, with capital of \$3,384,000.

The Bank of North America, New York city, recently sold its banking house, which it has occupied for thirty-seven years at No. 44 Wall street, for what is said to be the largest price ever paid for real estate on that street. On the 1st of August the bank will remove to the premises in the Mills building recently vacated by the

Metropolitan Trust Company, and next spring it will occupy an elegant banking room, 40 feet by 85, in the building to be erected by the Equitable Life Insurance Company at the corner of Cedar and Nassau streets. The property of the Bank of North America has been bought by the Bank of America, which will erect on it, and on the site now occupied by them, a fine structure in modern style of architecture. Ninety-six years ago the land on which the Bank of North America now stands was sold for £10 sterling.

Washington Territory—Traders' Bank, Tacoma.—The latest financial institution reported in this "City of Destiny," is the Traders' Bank. It is an incorporated bank with \$50,000 paid-up capital. The President, A. N. Fitch, and Cashier, H. L. Achilles, were former residents of Rochester, N. Y., the latter being Receiving Teller for many years in the Monroe County Savings Bank. H. C. Bostwick, Vice-President, was a surgeon in the late war, and afterwards became President of the first banking institution in the city, styled the Bank of New Tacoma. Besides the National banks of this city, this is the only regular commercial bank in Tacoma. It is, therefore, incorporated in such a way that it will be permitted to make loans on real estate. The institution will also do a safety deposit business. It has two large, spacious fire-proof vaults, in one of which will be fitted small steel boxes, securely locked. These boxes will be rented to residents for depositing valuable papers and securities.

The Nassau Trust Company, Brooklyn, N. Y.—One of the latest, but by no means the least, of Brooklyn's financial institutions is the Nassau Trust Company which, on June 18th, opened its doors for business at 101 Broadway. The capital stock is \$500,000 and, under the laws of New York State, is required to be fully paid before business can be transacted. As every stockholder is liable for an amount equal to his stock, the security furnished by this institution may be summed up at a round million. In its choice of officers this company has been singularly fortunate. The President, Adam D. Wheelock, has been for fifteen years connected with the Brooklyn City Treasurer's office—during four of which he was the City Treasurer. For Secretary, the services of O. F. Richardson have been secured, whose many years' connection with the Banking Department of New York State as Bank Examiner fits him in an eminent degree for the duties of his new position. The stockholders comprise many of New York and Brooklyn's substantial business men. Deposits to the amount of nearly \$200,000 made on the opening day show that there is plenty of room for this new undertaking and that its success is already assured.

Wrecked by Poker—An Old Cashier Accused of Using Funds of His Bank in Play.—That "a man's sin will surely find him out" even after the lapse of years, has a practical illustration in the following dispatch which appeared in a late issue of the *Montreal Gazette*. The fact of the defalcation was made public at the time, but it is only in the light of recent developments that the true inwardness of the cause became known:

TROY, N. Y., June 21st.—Several months ago the fact leaked out that Asa W. Wickes, who for twenty-five years had been Cashier of the Central National Bank, was a defaulter. He resigned a few days after the exposé, and when the latter was made Wickes was seriously ill from a stroke of paralysis. The Guarantee Company of Montreal was on Wickes' bond, and had to make good the \$9,000 that the Cashier had taken from the bank, but that sum did not include personal funds that Wickes appropriated. On account of the ex-Cashier's great age, the bank officials did not prosecute, and it was thought that the old man was to be let alone, but to-day he was arrested by a Deputy United States Marshal at the instance of the Guarantee Company. He was taken before United States Commissioner Landon this afternoon and arraigned on a charge of violating the United States Banking Laws in appropriating to his own use \$9,000. He pleaded not guilty and bail was fixed at \$5,000. This the ex-Cashier was unable to procure, and he was lodged in the jail, pending an examination on July 6th. The old Cashier was too fond of playing "poker."

The foregoing also shows, in an emphatic manner, the value of Guarantee companies as a restraint or check upon the commission of crime; for, when they are subjected to a loss, no expense or lapse of time however great, is spared in bringing the offender to justice.

Cleaned Out by the Teller.—The latest sensation in banking circles is the victimizing of the Union Bank, Providence, R. I., by the Teller who, on June 24th, took all the available cash in the bank and left for parts unknown. He took every dollar in the vault, the total amount of cash taken being \$20,000, besides which he appropriated notes and bills receivable aggregating in value \$500,000. The greater portion of these

notes and bills, however, are unavailable, but the loss of them will embarrass the bank temporarily, at least. Some securities were also taken. The Doyle monument fund, for the building of a memorial to the late Mayor Doyle, which had reached \$4,000 was in the vault. Those who are acquainted with financial matters find one interesting fact in the method of his crime. They say the notes taken cannot be possibly converted into money. Why then did he take them? It is thought that his plan is to hold the notes for a compromise. Without them the bank might go down and the Directors lose very heavily, some of them, it is said, fatally to their private fortunes. Pitcher can bargain for a relief from prosecution, and will be in a position to practically bring the bank to terms. The Union Bank is one of the oldest in the city or State. It was founded as a State institution in 1814. It has a capital of \$500,000. Its officials are: President—Henry G. Russell; Cashier—Joseph C. Johnson; Directors—Henry G. Russell, Elisha Dyer, Jr., John H. Congdon, William H. Duncell, Joseph C. Johnson, William H. Tucker and John W. Slater. The bank suspended payments as soon as the defalcation was discovered, but the Cashier says the depositors will get their money if they are but content to wait until affairs are straightened out. Pitcher was subsequently arrested in Montreal. He refused to give up the stolen securities declaring he would hold them for a compromise. The bank's loss, it is claimed, will not exceed \$10,000.

Banking Matters in Massachusetts.—Banking matters will make a pretty good showing in the blue book for 1888. First of all, new savings banks have been established in the towns of Whitman, Ludlow and West Boylston. There is a smaller number of new banks than has usually been asked for in recent years, but there has been enough restrictive legislation thrown about those already in existence to balance things. During the year 1889 and every third year thereafter, savings banks and institutions for savings must call in the books of deposit of their depositors for verification, and where such institutions are connected with a National bank the savings banks commissioners will make arrangements with the National bank examiner, so that their annual visits to the respective institutions shall be simultaneous. The reason is obvious. The banks' field of investments has also been enlarged by including the bonds of the States of Pennsylvania, Ohio, Michigan, Indiana, Illinois, Wisconsin and Iowa, and of the District of Columbia, and the legally authorized bonds for municipal purposes of any city of the aforesaid States and the State of New York which has at the date of such investment more than 30,000 inhabitants, and whose net indebtedness does not exceed five per cent. of the valuation of the taxable property therein. Provision has been made for regular meetings "as often as once in three months" of the trustees of these institutions, and every such corporation may, at a legal meeting, elect any citizen of the Commonwealth a member thereof, but such a person can only cease to be a member at an annual meeting after having given the treasurer three months' notice of his intention. But the act which will impose the most labor on the bank official is that which prescribes a large amount of detailed information to be incorporated in the annual reports. This was a measure pushed through by the labor men, who hope thus to find out just how far the banks serve the wage-earners. The Collateral Loan Company of Boston has been put under the supervision of the savings banks commissioners, and the number of authorized copies of the Board's annual report has been increased from 2,000 to 2,500. Loan and Trust companies, which may most conveniently be classified under this head, have found favor. The Commonwealth Safe Deposit and Trust Company has had its name changed to the United States Deposit and Trust Company, and the Manufacturers' Loan and Trust Company of Holyoke, will be hereafter known as the Manufacturers' Trust Company, with a capital stock increased to \$1,000,000.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- Salina, Kansas, now has a Clearing House Association.
- Of a bank check it may be truly said, "Its face is its fortune."
- The First National Bank of St. Paris, Ohio, has resumed business.
- The Armourdale Bank, Kansas, is reorganizing as a National Bank.
- The Nicollet County Bank, St. Peter, Minn., now has \$50,000 capital.
- The State Bank has succeeded the Loan & Trust Bank at Norcatur, Kansas.

- The Preston National Bank, Detroit, Mich., has increased its capital to \$1,000,000.
- The Union Loan & Trust Company has been organized in Boston, Mass., with \$1,000,000 capital.
- The Mortgage Trust Company of Philadelphia reports undivided profits for the last fiscal year of \$50,000.
- The State National Bank, Omaha, Neb., has resumed business after a temporary suspension of three weeks.
- The Kansas Investment Company, headed by Lloyd W. Garrison of Boston, has been incorporated at Topeka.
- The latest addition to the banking institutions of Kansas City, Mo., is the Midland National Bank, \$250,000 capital.
- Two Denver capitalists have opened a banking institution in San Francisco, Cal., to be known as the Market Street Bank.
- Hon. A. P. Frowein, Cashier of the Henry County Bank, Clinton, Mo., is the Republican nominee for State Treasurer.
- The Seymour Bank, Chippewa Falls, Wis., has added a saving's department, making it the first savings bank in that city.
- The English court has ordered the winding up of the American Exchange in Europe (Limited), which recently suspended.
- W. B. Bell, formerly Cashier of the Bismarck National Bank, Dak., is now Cashier of the Bell & Eyster Bank, Duluth, Minn.
- On and after June 23d all the associated banks of Minneapolis, Minn., will close their doors at two o'clock each Saturday afternoon.
- The Iron County Bank, a private institution, opened at Ironton, Mo., June 1. J. B. Waller and Charles E. McGinness are the owners.
- The Bank of Socorro, New Mexico, closed its doors June 2d. The Cashier is alleged to be a defaulter, and has left for parts unknown.
- The New York city trust companies hold a very large amount of foreign money which the best known borrowers are getting at 2% on call.
- The Union Loan & Trust Company, with \$500,000 capital, is reported at Wellington, Kansas. The principal stockholders are from Philadelphia, Pa.
- The National Bank of Genesee, at Batavia, N. Y., has reorganized as a State Bank under title of the Bank of Genesee. The officers are unchanged.
- George W. Toms has been elected President, and Lester M. Hall, Vice-President and Counsel of the Wilson & Toms' Investment Company, St. Louis, Mo.
- The Receiver of the Fidelity National Bank of Cincinnati, Ohio, has brought a suit for an accounting against the Chemical National Bank, New York city.
- In Iowa there are now, according to the last report of the State Bank Examiner, 100 State banks, 120 National banks, and about 150 private banks and bankers.
- Helena, Montana, claims to be the wealthiest city in the country in proportion to its population. It has twenty-seven millionaires and many others near there.
- John D. Moore, formerly Manager of the Union Pacific Railroad, has resigned his position to become President of the Bank of Commerce, at Grand Island, Neb.
- The Commercial Bank of Columbus, Neb., has contracted for the erection of a three story fire-proof bank building, to be constructed and completed by September.
- The youngest bank President in the world is said to be J. M. Bailey, Jr., who, although only 23 years old, has been elected President of the Minnehaha National Bank, Sioux Falls, Dak.
- The report of Receiver McConville of the Metropolitan National Bank, Cincinnati, Ohio, shows that seventy-five per cent. will be paid out to the stockholders, although no one expected more than fifty.
- A fine portrait of Mr. James H. Beal, who was for thirty years President of the Second National Bank, Boston, Mass., has been hung in the Clearing-House. The painting is an admirable likeness, and gives general satisfaction to the banking

community, among whom Mr. Beal was a recognised power. The painting is by Vinton, himself an ex-bank official.

— It is stated that the Montreal bucket shop proprietors have taken legal advice as to the operation of the bill against them passed by the Canadian Parliament, and that a plan has been prepared which enables them to transact business without coming under the provisions of the act.

— The Comptroller of the Currency has declared an eighth dividend of five per cent. in favor of the creditors of the Pacific National Bank of Boston. This makes in all fifty-five per cent. on claims proved amounting to \$2,330,651.

— The Louisiana Board of Liquidation has made arrangements with the Louisiana National Bank and New Orleans Canal & Banking Co., of New Orleans for the payment of all coupons of State bonds up to July, 1890, at 4 per cent. interest per annum.

— The suits which have been pending in the United States Court at Indianapolis between the Receivers of the old First National Bank and of the Indiana Banking Company have been compromised. The Indiana Banking Company's Receiver pays to the other \$25,000.

— Counterfeit National bank notes are again in circulation, several having been discovered by the Boston banks during the last few weeks. The public is especially cautioned against receiving National bank notes of the old issues, particularly those of the five-dollar denomination.

— At the recent annual meeting of Trustees of the Willimantic Savings Institute, Willimantic, Conn., a few friends of ex-Treasurer Royce attempted to oust Hon. Edwin A. Buck from the presidency of the Institute, and also to reinstate Royce in his old position as Secretary and Treasurer. Mr. Buck was, however, re-elected by a large majority.

— The annual report, recently published, of the Bank of Montreal, Canada, shows the balance of profit and loss account on April 30, 1887, was \$406,740, and that the profits for the year ending April 30, 1888, after deducting charges of management and making full provision for all bad debts, were \$1,284,501, making a total of \$1,890,241. After deducting a dividend of 10 per cent., or to \$1,200,000, a balance of \$690,241 was left.

Dakota Bankers' Association.—The fourth annual convention of the bankers of Dakota convened at Odd Fellows' Hall, Redfield, on Wednesday evening, May 23d, President Judd in the chair. About forty bankers and loan men were in attendance, representing every section of the territory excepting the Black Hills. The session Wednesday was devoted to addresses and the appointment of committees. The address of welcome was delivered by F. A. Dawes, and the response by C. E. Boyden, of Watertown. President C. E. Judd, of Canton, delivered the annual address. A. W. Edwards, of Fargo, made a short address. The following committees were appointed: Nominations—Messrs. Drew, Sessions and Hughes; on Time and Place—Messrs. Brown, Scarrett and Shepard; Auditing—Messrs. Schuyler, Hale and Kelsey; Resolutions—Messrs. Preston, Kemmerer and Carroll. On Thursday the following essays were delivered: "Banking—Its Origin, Growth and Utility," by R. S. Lyon, Brookings; "Dakota Banking, and the Ghost of Usury," by Charles L. Shelley, Gary; "The Honest Settler," by E. Reiff, Marion; "The Moral and Religious Aspect of the Usury Question," by Herbert Root, Valley City.

The relations between the borrower and lender was the subject of a spirited discussion. W. E. Scarrett, of Watertown, denominated the men who are traveling over Dakota inciting and inflaming the people against bankers on account of interest as arch fiends, anarchists and enemies of Dakota's progress. The following officers were elected: W. E. Scarrett, Watertown, President; Charles E. Judd, Canton, First Vice-President; M. P. Beebe, Ipswich, Treasurer; Eugene Steere, Pierre, Secretary. Fargo was designated as the next place of meeting and May 25th and 26th of next year as the date. After adjournment the members were driven in carriages to Redfield College and shown through that institution. M. P. Beebe, of Ipswich, was the youngest banker in attendance. A large number of the bankers departed for their homes in the afternoon. Those remaining were banqueted by the resident bankers in the evening.

FINANCIAL MATTERS IN CHICAGO.

[From the JOURNAL's Chicago Correspondent.]

June is always quiet in financial and commercial circles, but the month just ended has been unusually dull. This is attributable to several causes, chief among which has been the excitement incident to the opening of the political campaign. Another factor is the suspense caused by the slowness of the legislative action upon matters of vital importance to investors, which suspense is even more harmful than unwise legislation, for the latter would work its own remedy, while the present conditions are rapidly tending toward a complete stagnation of healthy business activity.

The clearings at the Chicago Clearing-House for the month of June were \$274,921,216 against \$284,724,575 for the corresponding month last year. It must be remembered, however, that the clearings for June, 1887, were abnormally augmented by the transactions in the Fidelity Bank wheat deal. Allowing for this unhealthy increase, the loss is not great, and certainly much less than at other large financial and commercial centers.

Money is obtainable at the Chicago banks upon good paper at 5 per cent., and this in good quantity. Time loans on inside real estate command 6 per cent., while loans on outside real property command 7 per cent. In view of the large amount of money lying idle, it is rather surprising how well rates are maintained. The month closed with New York exchange at 70 cents per \$1,000 premium.

This plethora of money has had a tendency to encourage the inception of many schemes and projects, both feasible and impracticable. One of the latest of these, and one which is entirely practicable and meritorious, is the proposition for building an underground railway to connect the suburbs with the center of the city and avoid the river crossings. A company has been formed with a capital stock of twenty-seven millions under the style of the Chicago Tunnel Railway Co. This is a somewhat pretentious beginning, but if we may judge of this project from the snail-like progress of the one to build our elevated roads, it will be several decades before the citizens of Chicago ride upon subterranean trains.

The litigation against the consolidation of the gas companies of the city in the Chicago Gas Trust still continues; but the outcome cannot be foretold at the present writing. Gas Trust certificates have declined several points during the last month.

During the past year much Chicago capital has been invested in the Michigan iron mines, and by far the greater portion of that already put in has been lost, due partly to bad management, partly to manipulation, and partly to the dullness of the iron trade by reason of the uncertainty attendant upon the tariff agitation. When this last question has been settled, and the facilities for cheap transportation have been perfected, it will undoubtedly be a valuable industry and Chicago should become quite an iron center. Certainly with unequalled ore on the one side, abundant coal on the other—and possibly natural gas—and with her known superior transportation facilities, the outlook is encouraging.

In this connection it might be well to mention a plan which has been talked of among the iron and coal men of the city looking toward the establishment of a bank which should be devoted exclusively to their interests. While it is true these important industries have no bank devoted particularly to them, it is equally true that the organization of another bank in Chicago would not be wise policy at the present time. The organization of several new banks during the past two years has amply supplied any deficiency in banking capital which might have existed prior to their advent, and any addition to the city's banking capital now, when all indications point to dull times and consequent easy money, would aggravate the competition for business and lead to much unwise and reckless investment. Our embryonic bank presidents should "bide a wee," or, in accord with Horace Greeley's advice, go West—or South.

As money became more plentiful this spring speculation increased, and the Board of Trade exhibited not a little of its old-time life and activity, although it was chiefly speculative. However, the disastrous manipulation of the deals in produce

during recent years has driven away the more conservative traders and speculators, and many of them are turning their attention to stocks. Memberships on the Board are now quoted at \$1,750. On the other hand, while the stock business in Chicago has never amounted to very much, it is steadily increasing and bids fair in time to rank well with the grain and produce traffic.

The trading in stocks in Chicago is now chiefly confined to local securities, with the standing of which everyone is familiar, and which can be depended upon to pay a fair interest on the investment. A few railroad shares are bought through brokers on the New York Stock Exchange, but here, as everywhere else in America, there is a reluctance to take hold of railroad stocks in the face of the hostile legislation, the ruinous strikes, and the uncertainty of the action upon the tariff. Combined with these unfavorable conditions are the doleful croakings of those who seek to depress valuable properties by dark hints of decreased dividends and diminished earnings. These influences very naturally have a tendency to make people afraid of the securities thus affected. Hence, shut out from grain and railroad stock speculation, and deterred from investing in real estate by reason of the exceedingly high figures at which it is held, people who have money to spare are led to put it into banks, street railways, gas companies, factories, etc., or they allow it to pile up to their credit at their banker's. This last just now seems to be the favorite way, much to the detriment of a healthy activity.

Notwithstanding the assertion of a gentleman prominent in New York brokerage business that Chicago can never do anything in stocks, and that the Chicago Stock Exchange is a failure, the business is growing, and the Stock Exchange is prospering as never before. There is no reason why Chicago should continue to be dependent upon the New York Stock Exchange any more than is Boston or Philadelphia. The anxiety of the New York gentleman is, however, not surprising. J.

Little Banks.—There are too many small banks of limited capital coming into existence in this State, especially in the second and third-rate towns of the interior. The parent bank should be in San Francisco, the center of commerce and exchange. Branches should be established wherever necessary. The experience of bankers is against institutions of limited means. Any city banking house attempting to do a modern business, with facilities for sustaining its constituents' credits in the Atlantic States, in Europe, China and Australia, should have an actual capital of \$5,000,000. This city (with the country tributary to it) offers an ample field as the head center of ten such institutions, guaranteeing, if properly managed, dividends on the capital employed far in excess of what can be obtained for mortgage loans. The evils arising from a large number of petty banks and bankers are patent to every one who has given thought to the subject. Small and weak banks scatter capital and reduce confidence. Hence merchants are inclined to be their own bankers, and only use financial corporations as a means of effecting exchange. On the other hand, had we fewer little banks and more of unquestioned stability, millions of dollars now lying in burglar-proof safes would swell the deposits of the banks whose resources place them beyond the shadow of doubt. But the evil of small banks is more applicable to the country than to the city. They have started up all over the State like so many mushroom. Given a showy office, with plate-glass windows, large gilt letters for a sign, a dude for a cashier, and a capital (paid up or otherwise) of \$50,000, and forthwith we have a first-class country bank. So far there have been no disastrous consequences. The attractions of the boom bring depositors from the East, and for the present all is well, apparently. These little money shops go on increasing all the time. Every small country town, especially in the Southern counties, has from one to half a dozen of them, keenly contesting the business of their district, each jealous of the other, and quite willing to damage the reputation of a competitor, if it were only quite safe from assault upon its own. Had we, instead of this countless host of untrained financiers, a limited corps of gentlemen educated, in the first instance, to a knowledge of their business in the head office in San Francisco, the State as a whole would have a banking system more worthy of confidence than it has at present. San Francisco is old enough, her capitalists are rich enough to inaugurate a system of banking commensurate with the demands of the interior towns and of the whole State.—*News Letter*, San Francisco, Cal.

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

SENATOR ALDRICH'S POSTAL NOTES.

Editor Rhodes' Journal of Banking:

SIR:—Senator Aldrich's plan for issuing postal notes in denominations of five, ten, twenty-five and fifty cents, as explained in your issue for May, seems to me to be open to both general and special objection. The money used in the everyday transactions of a people, especially of a commercial people, should be as uniform and homogeneous as it is possible to make it. To a currency which is far from fulfilling these conditions the Senator's plan adds another element of confusion. For my part I am unable to see why these postal notes would not drive fractional silver coin out of circulation just as much as fractional silver certificates would, nor do I see what would be the harm if it did. People generally certainly prefer silver certificates to the bulky silver dollar, and would most likely prefer fractional silver certificates to the somewhat numerous halves and quarters. If the fractional certificates and fractional silver coin were made freely interchangeable at the Sub-Treasuries that question would soon adjust itself. That there is a general demand for fractional paper notes is obvious, and it is doubtful policy for them to be issued by the Post Office Department instead of by the Department of the Treasury. The feature of making these postal notes redeemable at all money order offices will tend only to prevent too great an accumulation at any point and will practically give them the quality of legal tenders. A special objection of much force is found in the necessity which will arise for keeping at every money order office a sufficient sum to meet all probable demands for redemption of these notes from whatever source they may come. This will throw on money-order offices a function properly belonging to the Sub-Treasuries. EUCLID.

CLEVELAND, June 8, 1888.

DIRECTORS' SONS AS CLERKS.

Editor Rhodes' Journal of Banking:

SIR:—It has been the occasion of unfavorable, and, at times, severe comment that the managing officers of a bank should appoint to clerical positions in their institutions, relatives or the sons of personal friends. It has been claimed that such policy is directly hurtful to the interests of the bank. If, by nepotism is meant an unwise or selfish foisting upon the bank's staff of incompetent or otherwise undesirable persons in order to provide friends or relatives with a comfortable berth, then the censure is well taken; so much so, that it would be idle to justify it by argument.

But the censure, it must be observed, proceeds upon the assumption that the relatives and young friends of bank officials are generally incompetent or undesirable, an assumption as indefensible in theory as it is unjustified by experience. For my own part I think that there is some reason for judging a clerk to be all the more suited for his position for the reason that he has "influence" in the Board room. It is hardly to be supposed that the many defalcations and breaches of trust which have been so common of late could have gone on without more or less knowledge on the part of the clerks—usually more. Why such knowledge should be kept from the Board of Directors is plainly because the President or Cashier who was contemplating an excursion to Canada had contrived to monopolize all the "influence" himself and stood as an impassable barrier between the clerks who knew, or, at any rate, suspected, and the Directors who neither suspected nor knew. It is just here that the element of relationship and close friendship comes into service. Young men who enjoy close personal relations with the Directory have a claim to be heard, which cannot be ignored. They have the ear of the Board, so to speak, and moreover are frequently in a position to be quite independent as to what anybody may say or do. Men, especially young men, in such a position are not easily quieted, either by threats or persuasions; and, no doubt, in many a bank one or two such men stand to-day a more effective check upon wrong-doing than a whole system of book-keeping checks and

contrivances. A young man whose father or uncle is a Director at the Board will not see stealing going on under his very eyes and sit quietly gazing at the spectacle; but a man who is friendless and poor must be made of sterner stuff than is usually the case to go before the Board with his accusation in one hand and his resignation in the other. It may often happen that there is no actual knowledge of wrong-doing, but only well-founded suspicion. In such a case all one can say is—watch. Unless there be some other ground of confidence what subordinate would venture to say to a superior officer in reference to another superior officer—watch. This may be a novel view to take of the subject, but it seems to me to be the correct one. BANK CLERK.

BOSTON, May 23, 1888.

A WORD FOR SILVER.

Editor Rhodes' Journal of Banking:

SIR:—While I should be the last to underrate the value to the banking community of a periodical devoted exclusively to banking interests, and as cheerfully concede the right and even the duty of the Editor to maintain such opinions as may seem to him best calculated to advance those interests, at the same time it appears to me only fair play to allow those who may differ with the Editor an opportunity to state their side of the case. This would seem to be all the more reasonable where the periodical in question (as is the case with the JOURNAL) is widely circulated and reaches all who take an interest in financial affairs. To come at once to the point; I have never been able to agree with the JOURNAL in its position on the silver question. In the first place, Mr. Editor, allow me to enter a respectful protest against the expression, "a selfish silver interest," which I noted in a recent letter to the JOURNAL. Pray, why should those who advocate the use of silver as a circulating medium be stigmatized as selfish any more than the bondholders who, having bought their bonds when the country was on a greenback basis now insist on full payment in gold coin of the standard weight and fineness, and intend, if they can, to keep the country on a gold basis until they get it? But why are the advocates of silver styled "selfish?" "Oh!" you reply, "the silver men own the mines." Do they, indeed? I fancy I might name not a few advocates of silver who would be very glad to own ever so small a share in a good paying silver mine. But, really the question of motive may be allowed to take care of itself. The matter at issue is not the selfishness or unselfishness of any one class but the interests of the whole people. It will be remembered that in 1878 when the act requiring a monthly coinage of two million standard dollars was passed there was a great cry raised by the anti-silver men, i.e., the bondholders and creditor class generally. It was predicted that the finances of the country would shortly be on a "silver basis," and that gold would rise to a high premium; so high, in fact, that Comptroller Knox gravely stated that as an investment gold bought by the National banks at par would, in a few years, realize more from the premium alone than the same amount invested in United States bonds would bring in premium and interest together.

Has this been the case? That was nine years ago. Are any of the fearful evils that were to come so shortly as yet even in sight?

But I shall not, at this time, Mr. Editor, trespass upon your valuable space with a full statement of the argument for silver, but shall content myself with the expression of the hope that when the silver question again comes before the public you will spare some space for an "open letter" from

A SILVER MAN.

DENVER, June 20, 1888.

MODERN BANKING METHODS.

Editor Rhodes' Journal of Banking:

SIR:—It is certainly an encouraging sign of the times to observe the very marked interest taken by the banking fraternity at large in what may be termed improved methods in handling bank work. I apprehend that the days of the old-school, blue-stocking banker—and a grand old party he is, too—are about numbered. The young American banker is death on "red tape," and chafes under the endless and needless detail that has always been a prominent characteristic of the "old school." Then, too, bankers, especially in large cities, can no longer sit back in dignified unconcern among their money bags and wait for the public to come to them. If they want business now-a-days, they've got to "hustle" for it. Competition has at last gotten into the banking business. Dignity is one thing, dividends another. This "pretty state of

things," doubtless, accounts for the strange shifts frequently noticeable in methods employed by country banks in making collections, and which have been the occasion of so much scornful criticism at the hands of the readers of the JOURNAL. However, the heavy depositors of most banks are an arrogant lot. They want interest on balances, New York exchange at par, and collections made in all parts of the country for nothing; and you, gentlemen, who are in a cold sweat from year's end to year's end for fear you won't get all the banking business in your town, are to blame for it. That accounts for Bismarck, Dak., sending drafts on Pierre, Dak., etc., to Chicago for collection and credit, and Monroe, Mich., sending theirs on East Saginaw, Mich., via the same route, for the purpose of saving the expense of exchange which would be incurred if sent direct. I mention these cases because they are extremes; it is, however, a common thing for New York city banks to send items collectible in Ohio, Michigan and Indiana to Chicago for collection and remittance. I fail to "catch on" to the utility of this last plan, for they frequently pay two fees on items that could be collected with perfect safety and great saving of time if sent direct.

I suppose, however, it would be only fair to bear in mind that extremes and eccentricities are to be expected in a class so heterogeneous as that represented in banks throughout the great West. The successful farmer, speculator, miner, or heir rushes into banking as into the arms of a long-lost friend, and the big city bank that, with such becoming modesty, "solicits a portion of their business," gets it, and thereupon assumes the delightful role of teaching the new bank how to do business properly, as the following illustrations from real life will show: To the new, and very much befuddled cashier: "We supply your endorsement on all the items in your letter of the 25th; please confirm our action." "Your letter of the 26th reached us via ——— Bank, St. Louis; doubtless sent them in error." "Yours 29th received with \$500 for credit. Kindly list the items you send in future letters." "Yours 28th received with draft on N. Y. for \$1,500. We return herein for signature." "Yours 29th received with item \$100 on ——— Bank (your own town), sent us in error and returned herein."

I have an idea that banks suffer from too much method. The detail of commercial business has been copied too closely. Most banks receive checks and drafts on outside points and credit them the same as cash, subject to payment. Large banks stipulate on the pass-book cover to act only as agent of depositor, assuming no responsibility beyond proper diligence, etc. Now, as the check or draft in illustration is really the property of the depositor until it is paid, it is fair to assume that the owner has a complete record of it. Hence, what is the utility or necessity of so elaborate a record as is called for by the various collection forms proposed from time to time in these columns? None, whatever. Take a book properly ruled, and on one line record date, last endorser (depositor), drawn on, sent, No., amount, when paid, remarks. Use a rubber dater under heading "when paid." If an item is lost or destroyed, charge depositor's account with it, and have him get a duplicate. If you do a large collection business, divide the record alphabetically, giving each large city a dozen pages, or enter all places under their proper letter. You will find, by this plan, that reference to any particular item can be made in one-tenth the time required to trace it out with patient finger and straining eye through pages of miscellaneous collections, with the chances in favor of missing the item after all. The above is not intended to apply to notes or other paper of special value; make your record as elaborate as you like for them.

HARD CASE.

CHICAGO, June 23, 1888.

JOINT STOCK BANKS.

Editor Rhodes' Journal of Banking:

SIR:—It is seldom that any great change occurs in public affairs without many premonitory symptoms which, to the observant, serve as warnings and signals by which to shape one's course. That "coming events cast their shadows before" is no mere poet's fancy; there are too many instances to show, and, though to prophesy with certainty is ever a difficult task, and at best we see into the future but dimly, yet it is well to discern the signs of the times, and so to prepare ourselves that, whatever may come, we may not be taken wholly unawares. There has been a good deal of discussion of late about the National banking system, and various theories have been put forth as to its probable future, some even going so far as to assert that it has lived its life, and, therefore, in point of fact, really has no future at all. However this may

be, scarcely anyone would have the hardihood to seriously argue that banking itself is to come to an untimely end, and that banks are soon to be a thing of the past. I say, scarcely anyone, advisedly, for, as to financial matters, some men's minds seem to be so fearfully and wonderfully made, that one is prepared to hear them argue for anything. That the National system has stood the test of time with great credit to itself, and that it was to the Government the friend in need, that is the friend, indeed, cannot be denied. But we are not a sentimental people, and excepting a limited class, we care little to live on the memories of the past. The question is not, what have the National banks done in times gone by? but what are they capable of doing now? It is evident that the system, as it stands at present, is not generally satisfactory.

There must be change of some sort. Whether that change will be beneficially effected by a wise and well-considered law, or whether it will be left to work itself out as best it may, cannot now be determined. In the current discussions on the subject there seem to be two distinct tendencies at work: One, to abolish the National system and to return to banks under State control; the other, to develop the National system into something like the joint stock banks of Great Britain. Apart from the note-issuing function the joint stock bank presents some features which, it must be admitted, are of great value. It has in a much greater degree, than any single bank can have, the element of strength. Especially is this shown in time of panic. If such be local in its nature funds can be drawn from other branches to help those in need; if it be general, a bank with many branches, all working in harmony, and under one controlling head, is better calculated for resistance than a small, or even a large bank, left to breast the storm alone. On the other hand, it may be argued, that nothing is more common than to see ruin brought on by entangling alliances, and that in the end it is better to let the weak banks go to the wall than to run the risk of having strong banks broken by trying to hold up those that cannot stand by themselves. Again, it is urged that banks which stand alone, each carrying its own reserve, are not in sufficiently close sympathy with each other to communicate the panic; that the failure of one does not mean the failure of a number of "branches" with it, and that there is cultivated under the separate system a certain spirit of independence and self-reliance, which is not only desirable in itself but is also in accordance with our national spirit.

That monopoly is the crying evil of the day is too evident to be gainsaid, and the community at large will be disposed to look with small favor on tendencies of this kind in the banking community. The cry of "Bank Trust" would be too potent in the halls of Congress to be long unheeded, and would prove an effectual weapon against any legislation looking to the development of joint-stock banks out of the present National system. Whatever may be the value of joint-stock banks under the financial conditions which obtain in Great Britain, it is doubtful whether in this country they would be of any special service to our commercial prosperity. BANKEE.

BOSTON, June 6, 1888.

The Kentucky Court of Appeals recently decided a suit brought originally four years ago by Stephen E. Jones, assignee of the Savings Bank of Louisville, against John Caperton, President, and the Directors, to force the Directors to make good the deficit caused by the defalcation in January, 1880, of J. P. Rhorer, Cashier. The Court held that the defalcation was not due to the Directors' negligence, and were not liable.

Diversity of Enjoyments.—Colorado, with its magnificent scenery, delightful climate, mineral springs, good hunting, good fishing, and fine hotels, presents more attractions as a summer resort and abounds in facilities for a greater diversity of enjoyments than any other section of the country. Denver, the gateway to all Colorado resorts, is reached from Chicago in thirty-three hours *via* the Burlington Route, and "The Burlington's Number One" fast train. It is the only line by which one can go from Chicago to Denver without being more than one night on the road. It is the only line running through sleeping cars between Chicago and Denver. During the summer months the Burlington Route, C. B. & Q. R. R., sells round-trip excursion tickets from Chicago, Peoria and St. Louis to Denver, Colorado Springs, Pueblo, Salt Lake and Ogden at a low rate. They can be obtained of any coupon ticket agent of connecting lines, or by addressing P. S. Eustis, General Passenger and Ticket Agent, C. B. & Q. R. R., Chicago, Ill.

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

DELUSIONS CONCERNING THE CURRENCY.—Quite recently the *Globe-Democrat*, in commenting on Senator Stewart's proposition to double the volume of the silver coinage, said that the supply of silver dollars uncovered by certificates now lying in the Treasury is so great that it could hardly be absorbed in the circulation within two years from the present time even though not a cent's worth of the metal should be coined in the interval. A newspaper published in the interest of the silver producers finds fault with this remark, and says, among other things:

"In 1865 the amount of money in circulation per capita was \$46.37. In 1879 it was down to \$19.76 per capita, while in 1888 we have only \$17.20 per capita; and yet the gold-bug papers dare to tell us that nobody wants the silver dollars that are locked up in the Treasury."

These figures are faulty for several reasons. They are faulty because no allowance is made for the fact that the currency mentioned as being in circulation in 1865 was very far below par as compared with gold. They are faulty also because they are not correct for the more recent dates mentioned. We have often shown that the increase in the volume of the circulating medium in recent years has been much greater than the growth in population. On January 1, 1879, for example, the amount of money in circulation—that is to say, in the hands of the people and in the banks, and exclusive of the sum held in the Treasury—was \$227,716,559. The amount in circulation on May 1, 1888, was \$1,378,519,490. The population of the country increases at about the rate of 3 per cent. a year. Between January 1, 1879, and May 1, 1888, therefore, the number of inhabitants in the country grew to the extent of 28 per cent. The increase in the volume of the currency in circulation in that time, however, has been much more than twice as great, or 67 per cent.

The date January 1, 1879, has been selected for one point in the comparison for two very good reasons. Specie payments were resumed on that day. Then, for the first time in over seventeen years, the exchangeable value of the entire body of the country's paper substitutes for money became equal to its nominal value. That is one of the reasons. Here is the other: General trade and speculation in 1879 and 1880 were as active as they had ever been before, and much more active than they are now, or than they were in 1887. Nobody whose opinion is worth anything on this subject has ever said that the currency in trade channels in 1879 was too "contracted." Indeed, there are the very best of reasons for the belief that the circulation at that time was fully adequate to meet all the demands of business. As a matter of cold, precise fact, it did fully and fairly perform its function in the exchanges. We have seen, however, that the currency has increased since that time more than twice as fast as population. Undoubtedly it has increased nearly three times as fast as general business and speculation. And yet our silver and greenback friends are not happy!—*Globe-Democrat*, St. Louis.

Raised Drafts and Checks.—The raising of drafts and checks has long been the cause of much trouble to the business world, and the skillful check-raiser as well as the forger must be accorded a high niche in the temple of criminal fame. A guaranty of security against the machinations of those whose ability enables them to deceive even experts has recently been invented, and is styled the Abbott Check Protector. The beauty and simplicity of the machine render it superior to all others. Instead of cutting out the figures in full form, the paper is perforated, thereby preventing a figure from being torn and the mutilating or weakening of the paper, which has proved an objection to other similar machines. This Protector is endorsed by leading bankers throughout the country, and at the recent session of the Dakota Bankers' Association was pronounced the best device ever seen for protecting bank paper. A cut of the machine is shown in the advertisement in another part of this issue of the JOURNAL.

NEW BANKS, CHANGES IN OFFICERS, FAILURES, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

PRINCE EDWARD ISLAND.

CHARLOTTETOWN.—Bank of Nova Scotia; D. C. Chalmers, Agent, in place of George Macleod.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, July 2d, 1888.

During the month of June the general tone of the money market has been dull. There has been an influx of funds from the West and South that has counteracted the drain caused by the tax-gathering operations of the Government. The bond purchases as a rule have been light and have had very little effect in any direction. It is plain that there is little prospect of any stringency or excitement during the summer. There has been some attempt to cause a stir about a danger of a coming premium on gold on account of the increasing silver coinage but such talk is premature. The immense gold surplus in the Treasury dominates and controls the metallic standard in the United States. There was some talk about favoritism in the purchases of bonds by the Government, but the debate on Senator Stewart's resolution of investigation and Secretary Fairchild's letter in response thereto have made it clear that the purchases have been conducted with the utmost care and impartiality. Financial legislation in Congress is at a standstill awaiting the result of the debate on the Mills Tariff bill. The supporters of this measure seem determined to secure its passage even if it be necessary to exclude all other legislation. The majority in the House may possibly effect this, but the chances of an equally hard contest in the Senate seem to make the probabilities in favor of the Mills bill very adverse to its becoming a law in its present form. Some compromise measure affecting the revenues may be enacted, but no compromise measure is likely to make much reduction in the surplus. A moderate reduction of tariff will be followed by an increase of importations that will leave the aggregate amount of the revenues unchanged. To reduce the surplus by reduction of duties necessitates a radical change in the customs and it will be a difficult thing to get a majority in Congress to vote for more than cheese-paring reductions. It seems to be much easier and more popular to lay taxes than to remove them. For these reasons it seems that for a long time yet the operations of the Government will control the Government. There is however one remedy that might be tried without interfering with taxation and that is to abolish the Sub-Treasury system, and let the business of the Government as well as that of the people be done through the banks and financial institutions. It would make little difference how great the surplus was were it not for the necessity under the Sub-Treasury system of segregating the cash paid for taxes, in a pool separate and distinct from the rest of the cash of the country. But we suppose the barbarous Sub-Treasury system will not be disturbed being a political fetish of the first importance. A great improvement in the hide-bound ways of managing Government payments was made when the Treasury authorities began to accept certified checks in payment of duties instead of requiring coin or coin certificates as heretofore. There is a prospect that the semi-annual dividend payments due at this season may have some effect in bracing up the market, but the result of these payments depends on whether they are the results of earnings or legitimate revenue, or whether the money has to be borrowed to make them.

FOREIGN EXCHANGE.—During the week ending June 9th, sterling exchange was dull. This was due to the abundant offerings of bills on account of sales of securities abroad, especially of Reading. The discount rate of the Bank of England was reduced from 8 to $2\frac{1}{2}$ per cent. For the week ending June 16th, exchange was higher. The demand increased; commercial bills were scarce; the rates for long bills were stronger than those for short. Gold exports were made amounting to \$2,283,000. For the week ending June 23d, gold shipments were made to the amount of \$506,000. The market continued

strong. Most of the bills against sales of American securities were out of the way. For the week ending June 30th, exchange was dull, the demand being very light. Shipments of gold ceased. From May 29th to June 21st, the Bank of England gained £1,886,000 in specie. The Bank of France lost 5,350,000 francs in gold, and gained 5,475,000 francs in silver. The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, \$4.87 @ \$4.87½; sight, nominal, \$4.89 @ 4.89½; 60 days, actual, \$4.86½ @ \$4.87; sight, actual, \$4.88¼ @ \$4.88½; Cable transfers, \$4.88½ @ \$4.88¾; Prime commercial sterling, long, \$4.85¼ @ \$4.86; Documentary sterling, 60 days, \$4.85¼ @ \$4.85¾; Paris bankers', 60 days, 5.19% @ 5.18¾; sight, 5.17¼ @ 5.16¾; Paris, commercial, 60 days, 5.21¼ @ 5.20¾; sight, 5.19% @ 5.18¾; Antwerp commercial, 60 days, 5.21% @ 5.21¼; Swiss bankers', 60 days, 5.19% @ 5.18¾; sight, 5.18¼ @ 5.17¼; Reichsmarks (4), bankers', 60 days, 95% @ 95%½; sight, 95¼ @ 95%½; Reichsmarks (4), commercial, 60 days, 95% @ 95%½; sight, 95¼ @ 95%½; Guilders, bankers, 60 days, 40¼ @ 40 5-16; sight, 40 7-16 @ 40¼; Guilders, commercial, 60 days, 40 1-16 @ 40 1/8; sight, 40¼ @ 40 5-16; Copenhagen, Stockholm and Christiana, krona, 60 days, 26 11-16 @ 26¾; sight, 26 15-16 @ 27. Paris dispatches quote exchange on London 25f. 26¼c.

The following table shows the highest and lowest posted rates for bankers' sterling at 60 days and sight and the average for prime commercial bills and for exchange on Paris in June and for the first five months of the year :

JANUARY, 1888.	BANKERS		Cable		PARIS

Legal-tender notes.....	348,681,016	348,681,016	348,681,016
Totals.....	\$1,051,420,945	\$1,587,488,550	\$1,681,075,391
• In Treasury.....	\$223,704,386	\$278,488,822	\$308,447,523
In hands of people.....	827,716,559	1,268,944,728	1,372,627,868

* Gold and silver certificates are included in gold coin and silver dollars.

The statement of the Comptroller of the Currency shows that during the month ending June 30th, National bank circulation decreased \$3,436,697, and during the last twelve months it decreased \$26,797,120. The total lawful money on deposit to redeem National bank notes was on June 30th, \$92,517,977. This item shows a decrease during the past month of \$1,951,016, and during the past twelve months of \$14,816,436.

The following table shows the net gold and silver held by the United States Treasury on the dates given :

	<i>July 1, 1888.</i>	<i>June 1, 1888.</i>	<i>Jan'y 1, 1888.</i>
Gold coin and bullion.....	\$313,753,616	\$309,882,858	\$305,342,187
Gold certificates outstanding.....	119,887,870	109,581,730	96,734,067
Gold owned by Treasury.....	\$193,866,246	\$200,301,128	\$208,606,120
Silver dollars and bullion.....	\$248,022,218	\$243,389,988	\$222,150,173
Silver certificates outstanding.....	200,387,376	196,645,406	176,855,423
Silver owned by Treasury.....	\$47,634,842	\$46,744,582	\$45,294,750

NEW YORK BANKS.—During the week ending June 8th, the combined gold and currency received from the interior by the New York banks was \$2,711,000, and they shipped \$976,000, making a gain for the week of \$1,735,000. By Sub-Treasury operations they gained \$200,000 additional, and their total gain for the week was, therefore, \$1,935,000. During the week ending June 15th, the banks shipped \$1,841,000, and received \$2,499,000, gaining \$1,158,000 thereby. By Sub-Treasury operations they lost \$1,250,000, making a net loss for the week of \$92,000. During the week ending June 22d the banks shipped \$1,563,000 to the interior, and received \$2,817,000, gaining in transactions with the country at large \$1,254,000. They paid \$3,000,000 to the Sub-Treasury and received \$11,600,000 from it, gaining \$8,600,000, a total gain for the week of \$4,854,000. During the week ending June 29th the banks shipped \$4,762,000 to the interior, and received \$3,111,000, losing \$1,651,000. They paid \$11,400,000 to the Sub-Treasury, and received \$11,800,000 from it, gaining \$400,000 from it. This reduced the loss for the week to \$1,251,000. From June 1st to June 29th the banks from all sources made a net gain of \$7,181,000. The following table shows the condition of the New York Clearing-House Banks for a number of weeks past :

<i>1888.</i>	<i>Loans.</i>	<i>Specie.</i>	<i>Legal-tenders.</i>	<i>Deposits.</i>	<i>Circulation.</i>	<i>Susp. Res.</i>

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange.

The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

NATIONAL BANK STATISTICS.—Statement of the Comptroller of the Currency on June 30, 1888, showing the amount of National Bank notes outstanding and the amount of lawful money on deposit with the Treasurer of the United States to redeem National Bank notes:

NATIONAL BANK NOTES.		
Total amount outstanding May 31, 1888.		\$255,603,331
Additional circulation issued during the intervening month:		
To new banks.	\$208,150	
To banks increasing circulation.	1,914,545	
Total.	\$2,122,695	
Surrendered and destroyed during the intervening month.	5,559,392	
Decrease in total circulation during the month.		3,436,697
Total amount outstanding* June 30, 1888.		\$252,166,634
Decrease in total circulation during the preceding 12 months. .	26,797,120	
Circulation secured by United States bonds (as below):		159,648,657
Decrease during the preceding month.	1,485,681	
Decrease during the preceding 12 months.	11,980,684	
Amount of outstanding circulation represented by lawful money on deposit with the Treasurer of the United States to redeem notes of—		
Insolvent National banks.	1,135,883	
Liquidating National banks.	7,012,738	
National banks reducing circulation under Section 4 of the Act of June 20, 1874.	33,212,247	
National banks retiring circulation under Section 6, Act of July 12, 1882.	51,157,109	
Total lawful money on deposit.		\$92,517,977
Decrease in aggregate deposit during the preceding month.	1,951,016	
Decrease in aggregate deposit during the preceding 12 months. .	14,816,436	

Who Hold Property.—A local statistician in an Eastern town recently quoted some suggestive facts about the holders of wealth in his vicinity. He said, of one hundred and four capitalists in that city who either died or retired with property between 1840 and 1880 only seventeen of their sons now had property or had died leaving anything. Few observers of the fate of fortunes in America but can verify his statements from their experiences. As a rule the men who have fortunes in this country have them because they make them.

BANKERS' OBITUARY RECORD.

Baker.—Ezra H. Baker, for many years President of the American Loan and Trust Company, Boston, Mass., and Vice-President and a Director of the Union Pacific Railroad, died June 7th. He was a Trustee of the Provident Institution for Savings, and was also a Director in the Tremont National Bank for twelve years and held many private trusts.

Burdick.—Samuel C. Burdick, a prominent merchant of New York City, died suddenly at his residence in East Orange, N. J., June 23. He was a Director of the Hanover National Bank.

Coffman.—Christian Coffman died at Mechanicsburg, Pa., June 27th, at the age of 84. He had been a Director of the Second National Bank since its organization, twenty-four years ago. At a meeting of the Directors, resolutions expressing the high appreciation in which he was held were passed and ordered placed upon the records.

Garrett.—T. Harrison Garrett, brother of Robert Garrett and Manager of the famous banking house of Robert Garrett & Sons, Baltimore, Md., was drowned June 7th, by the collision and sinking of his yacht by a steamer in the Patasco River. After John W. Garrett's death the bank business devolved on Harrison and Robert. As Robert was Vice-President of the Baltimore & Ohio, the bank was practically conducted by Harrison, though both were about equally interested in it. Charles Mitz, the present active Manager of the bank, has been with the house for over twenty years. Harrison Garrett was also a Director of the Baltimore & Ohio. He was very charitable. About two years ago he gave a piece of property valued at \$20,000 to the Society for the Protection of Children. He established a free library, and opened his pocket-book liberally to any worthy enterprise. He was devoted to his home.

Goss.—G. Walton Goss, for twenty years Teller and Assistant Cashier of the First National Bank, Clinton, Mass., died June 18th, aged 37 years. He had been for many years actively identified with the business interests of his town, as Town Treasurer and tax collector and a member and Treasurer of the Board of Water Commissioners; he was also chief engineer of the Clinton Fire Department and actively interested in it; was President of the Clinton Gas Light Company, a member of the Board of Investment of the Clinton Savings Bank, Treasurer of The Twenty Associates from the date of its incorporation, Vice-President of the Clinton Board of Trade, a Director of the W. B. Clark Investment Company of Minneapolis, Minn., and in the Massachusetts Mutual Aid Society of Fitchburg. No business or social enterprise had been entered upon in Clinton for many years in which Mr. Goss had not taken an active part. A shrewd business man of the strictest integrity, he was widely known and universally popular, and will be greatly missed by an unusually large circle of acquaintances.

Gray.—Richard C. Gray, of Pittsburgh, Pa., died in N. Y. city, May 28th. He was a Director of the Peoples' National Bank, and was also largely interested in the steel and other manufacturing interests of Pittsburgh.

Hill.—Hon. Alexander T. Hill, ex-President of the Decatur National Bank, Ill., and at one time Mayor of that city, died June 8th, aged 79 years.

Hyde.—William Hyde, died at Ware, Mass., June 24th, aged 82 years. He was elected Cashier of the Ware Bank in 1834, and after reorganizing as the Ware National Bank, he became its President in 1864, which position he held until his death.

Lamson.—Nathan P. Lamson died in Boston, May 29th. He was well known as an expert accountant and had held many prominent positions, among them the Cashiership of the old Everett Bank while it was at the South End, and was also, at one time Treasurer of the Boston Penny Savings Bank.

Markell.—Louis Markell, President of the Frederick Town Savings Institution, Frederick, Md., died recently.

Maynard.—Isaac H. Maynard, Manager of the New Orleans Clearing-House, died recently in that city.

Olcott.—Horatio J. Olcott, President of the National Central Bank of Cherry Valley, N. Y., died June 23d, at the age of 79. He was one of the oldest and was considered also one of the ablest bankers in New York State—his bank having never missed or delayed the payment of a dividend during the fifty-seven years in which he was President. He was a brother of Dudley Olcott, President of the Mechanics & Farmers' Bank of Albany, N. Y., one of the founders of the Dudley Observatory, and father of Horatio Olcott of the New York Stock Exchange.

Pratt.—John C. Pratt, a well-known business man of Boston, Mass., and formerly President of the Jamaica Plains Savings Bank, died June 8th, aged 70 years.

Smith.—Richard M. Smith, for ten years Manager of the banking house of L. & C. H. Bull, of Quincy, Ill., and one of its most prominent citizens, died May 24th.

Studabaker.—Peter Studabaker, member of the firm of John Studabaker & Co., proprietors of the Exchange Bank, Bluffton, Ind., died after a brief illness at his daughter's residence in Farmland. He was prominently identified with the business interests of his town and business was generally suspended on the day of his funeral.

Van Nest.—Abraham R. Van Nest, one of the oldest and best known merchants of New York city died June 25th, aged 79 years. He was one of the active managers of the Farmers' Loan & Trust Company and also a Director of the Seventh National Bank.

Welling.—D. C. Welling, Vice-President of the Merchants' & Manufacturers Bank, Columbus, Ohio, is dead.

MONETARY CHRONOLOGY.—JUNE, 1888.

1. **FRIDAY.**—Bond offerings were: Four per cents, registered—\$50,000 at 127, \$100,000 at 128, \$30,000 at 127½. Four-and-a-half per cents, coupon—\$1,000 at 107¼. Four-and-a-half per cents, registered—\$10,000 at 107¼, \$100,000 at 107¼, \$4,000 at 107, \$185,000 at 107¼. Total offerings, \$450,000. None accepted.
2. **SATURDAY.**—Bond offers: Four per cents, registered—\$50,000 at 127; \$100,000 at 128; \$30,000 at 127½. Four-and-a-half per cents, coupon—\$1,000 at 107¼. Four-and-a-half per cents, registered—\$10,000 at 107¼; \$100,000 at 107¼; \$4,000 at 107; \$185,000 at 107¼. Total offerings, \$450,000; \$50,000 registered 4's were accepted at 127.
4. **MONDAY.**—Bond offers: Four per cents, registered—\$1,000 at 128; ½ per cents, coupon—\$18,000 at 108. Neither of these offers were accepted.
5. **TUESDAY.**—Bond offers: Registered 4's, \$50,000 at 127½; registered 4½'s, \$1,000 at 108 and \$100,000 at 107. None of the offers were accepted.
6. **WEDNESDAY.**—Bond offers: Four per cents, registered—\$1,500,000 at 128, \$550 at 127. Four-and-a-half per cents, registered—\$1,500,000 at 107½, \$5,000 at 107, \$1,000 at 107, \$1,000 at 107. Accepted, \$24,000 4 per cent, registered bonds at 127.
7. **THURSDAY.**—Bond offerings: Coupon 4's, \$10,000 at 128, registered 4's, \$105,000 at 128, \$50,000 at 127, \$2,000 at 128½, registered 4½'s, \$15,000 at 108½. Accepted, \$35,000 registered four-and-a-half per cent, bonds at 108½ in two items.
8. **FRIDAY.**—Bond offerings: Four per cents, registered—\$10,000 at 127; \$127,000 at 127½. Four-and-a-half per cents—\$194,000 at 107¼; \$15,000 at 107; \$3,000 at 107, and \$37,500 at 107. Accepted, \$10,000 4 per cent, registered bonds, at \$127; \$37,500 ½ per cent, registered, at \$107, and \$3,000 ½ per cent, registered, at 107.
9. **SATURDAY.**—Bond offerings: Registered 4's, \$300 at 128, \$140,000 at 127½, \$100,000 at 127; registered 4½'s, \$160,000 at 107¼. None accepted.
11. **MONDAY.**—Bond offerings: Four per cents, coupon—\$500 at 127 and interest. Four per cents, registered—\$400 at 127 and \$140,000 at 127¼. Four and one-half per cents, registered—\$160,000 at 107¼, \$1,200 at 107 net, and \$5,000 at 108. Accepted, \$400 four per cent, registered at 127.
12. **TUESDAY.**—Bond offers: Four per cent, coupons—\$4,000 at 127½ and \$7,000 at 127½. Four per cent., registered—\$1,000 at 127, \$18,000 at 128½ flat, \$2,000,000 at 127½ and \$140,000 at 127½. Four-and-a-half per cent, registered—\$100,000 at 107½, \$350,000 at 107½ and \$3,000 at 107¼. Accepted, registered fours—\$1,000 at 127, \$13,000 at 127½, \$2,000,000 at 127½ and \$140,000 at 127½. Coupon fours—\$4,000 at 127½ and \$7,000 at 127½.
13. **WEDNESDAY.**—Bond offerings four per cents, coupon, \$20,100 at 127½; \$2,300 at 127½; \$2,300 at 127½. Four per cents, registered, \$500 at 127 and accrued interest, \$3,000 at 127½; \$1,000,000 at 128; \$1,700 at 128½. Four-and-a-half per cents., coupons, \$2,000 at 107¼. Four-and-a-half per cents., registered, \$2,000,000 at 107¼; \$204,000 at 107¼; \$300,000 at 107¼. Accepted a total of \$43,600 of bonds, coupon fours, \$20,100 at 127½, \$2,300 at 127½; registered fours, \$500 at 127 and accrued interest; \$3,000 at 127½; \$1,700 at 128½, and \$16,000 at 127½.
14. **THURSDAY.**—Bonds offered—four per cents.—\$500,000 at 128, \$30,000 at 127½, \$2,000 at 127, \$500 at 127, \$500 at 127, \$2,000 at 127, \$500 at 127¼, \$2,000,000 at 128, ½'s—\$500,000 at 107¼, \$225,000 at 107½, \$2,000,000 at 107¼; \$500 at 108, \$15,000 at 107½; total, \$5,280,000. Accepted—four per cents.—\$30,000 at 127½, \$5,000 at 127½, \$5,000 at 127, \$500 at 127¼, \$50,000 at 127½; ½'s—\$15,000 at 107½; total, \$107,500.
15. **FRIDAY.**—Bond offerings—four per cents., coupon—\$300 at 127½, \$300 at 127½. Four per cents., registered—\$400,000 at 128¼, \$10,000 at 127½, \$50,000 at 128½ and interest, \$45,000 at 127½. Four-and-a-half per cents., registered—\$2,150 at 107¼, \$200,000 at 107¼, \$175,000 at 107¼, \$100,000 at 107¼, \$5,000 at 107, \$6,200 at 107½, \$1,000 at 107¼, \$282,000 at 107¼. Accepted \$400,300 bonds as follows: Four per cents., coupon—\$300 at 127½, \$300 at 127½. Four per cents., registered—\$10,000 at 127½, \$50,000 at 127½, \$45,000 at 127½. Four-and-a-half per cents., registered—\$5,000 at 107, \$6,200 at 107¼, \$1,000 at 107¼, \$282,000 at 107¼.
16. **SATURDAY.**—Bond offerings—four per cent, coupons—\$5,000 at 127½, \$12,000 at 127½, \$100,000 at 128, and \$5,000 at 127½. Four per cent, registered—\$10,000 at 127½, \$1,500 at 127½, \$500 at 127½, and \$400,000 at 128¼. Four-and-a-half per cent, coupon—\$3,350 at 107¼, \$5,000 at 107½, \$5,000 at 107 and \$2,500 at 107¼. Four-and-a-half per cent., registered—\$39,000 at 107¼, \$225,000 at 107¼, \$15,000 at 107¼, \$5,500 at 107, \$20,000 at 107½, \$8,000 at 107½, and \$5,450 at 107¼. Accepted four per cent, registered—\$10,000 at 127½, \$1,500 at 127½, \$500 at 127½, and \$50,000 at 127½. Four per cent, coupon—\$5,000 at 127½, and \$12,000 at 127½. Four-and-a-half per cent, coupon—\$5,000 at 107. Four-and-a-half per cent, registered—\$3,500 at 107. The following statement in regard to the purchase of bonds under the circular of April 17th was prepared at the Treasury Department: Amount purchased 4 per cents., \$15,743,950; amount purchased ½ per cents., \$7,925,450. Total, \$23,714,400. Cost 4 per cents., \$19,974,163; cost ½ per cents., \$3,580,098. Total, \$23,555,161. Cost at maturity 4 per cents, \$27,875,642; cost at maturity ½ per cents, \$9,215,021. Total, \$37,090,663. Saving 4 per cents, \$7,901,473; saving ½ per cents, \$634,023. Total, \$8,535,501.
18. **MONDAY.**—Bond offerings—four per cent, coupons—\$500 at 127½ and \$30,000 at 128. Four per cent, registered—\$400,000 at 128¼ and \$20,000 at 128. Four-and-a-half per cent, coupon—\$2,500 at 107½. Four-and-a-half per cent, registered—\$200,000 at 107¼, \$11,000 at 107¼, 1,000 at 107½, \$5,000 at 107, \$112,000 at 107½, and \$5,450 at 107¼. Accepted four per cent, coupon—\$500 at 127½ and \$30,000 at 128. Four per cent, registered—\$20,000 at 128. Four-and-a-half per cent, registered—\$11,000 at 107½, \$5,000 at 107, \$112,000 at 107½, \$2,500 at 107½, and \$5,450 at 107¼.

RHODES' JOURNAL OF BANKING.

Vol. XV.

AUGUST, 1888.

No. 8.

THE growth of trusts has within a year or two attracted much attention. These manifestations of business enterprise are the result of a desire to overcome the injurious effects of competition. The question as to the relative advantage or disadvantage of trusts cannot be easily decided. It does not do to accept without much qualification the ordinary view that these combinations are entirely against public policy. When competition is open, each one of those who are rivals in any particular business, seeks to secure the greater portion of that business. This may be accomplished by more extensive advertising, by doing the work better, or by doing the work at a cheaper price. If the business is one supplying or manufacturing some article or commodity competing firms may secure success as against their rivals by furnishing a superior article at an equal or lower price ; or the same object may be effected by giving inferior articles at less prices. The tendency is to bring about cheapness of price, without regard to the character of the article ; and, very often, the more unscrupulous, in this respect, are the most successful. Where unlimited competition produces this result the public suffers. A trust or combination of manufacturers or business men is not formed, as is often asserted, for the purpose of fleecing the public, but to protect those engaged in any particular business or manufacture from the more unscrupulous members of that business or manufacture. The result for the public may be good. A uniformity of quality in the work done or in the article furnished, as well as a uniformity of prices will be established. The price cannot be raised beyond reason without again inviting competition from outsiders, which is the very thing the trust is created to avoid. The principal cry against business combinations does not come from the public as a whole, but from that portion of the public desiring to compete with the members of the trust. The evils of trusts are those of monopolies ; but in the United States such monopolies as trusts possess are not directly protected by law. That is, no one is forbidden to undertake the same business if he chooses. It is a question of capital and facility of accomplishing the end in view.

Many manufacturing trusts do, however, have an indirect legal protection, in that they secure exclusive patent rights enabling them to perform their work more cheaply and fitly than others can without those patent rights. The success of the Standard Oil Trust is due largely to the possession of patents for the handling and refining of oil—and it is not alone in this respect. The combination of capital, skill, and acquired rights which constitute a trust, certainly blocks the way to the success of outsiders in the same line of business; but whether this detriment to certain ones is greater than the benefit conferred on the general public heretofore mentioned is the real question at issue. The outcry about trusts is largely based on ignorance, but it has been sufficient to make these combinations a bugbear. The free traders point at them as the disastrous outgrowth of a protective policy, while the protectionists assert, with truth, that many of the most formidable trusts now existing concern only branches of commerce and manufacture not liable to foreign competition. No doubt there are trusts in branches of business which benefit by the protective tariff; but after carefully weighing the evidence on this point, it is clear that trusts exist without regard to the tariff and might continue even if that were modified or altogether abolished.

THE REPORTS FROM THE OFFICE of the Comptroller of the Currency continue to show the organization of new National banks, notwithstanding that there is little or no profit in the issue of circulation when the ordinary rate of interest is over six per cent. Capital put into State banking will, in sections of the country where the rate of interest is high, pay better than if the same amount were invested in a National bank. If two banks are started in the same place, one a National and the other a State bank, with equal capital, and each securing a similar line of deposits, the State bank would have the advantage. The reason why National banks are still organized is because of the belief on the part of the public that the National banking laws afford protection to depositors. Therefore, in a locality previously without banking facilities where a new bank is established, it is more likely to attract deposits if working under a National charter than if under the State or Territorial banking laws. An examination of the list furnished by the Comptroller of the Currency between November 1, 1887, and July 1, 1888, shows that 112 National banks have been organized, of which 68 were started with the minimum capital of \$50,000. They are, as a rule, located in newly settled sections of the country where the rate of interest is high. Banks with this capital usually deposit the minimum amount of bonds, *viz.*: \$12,500, and take out in circulation \$11,250. Assuming that the \$50,000 is all paid in, in cash, within the six months from date of commencement of business as required by law, the purchase of \$12,500 in 4½ per cent. bonds at, say 108, locks up the amount paid in premium and the ten per cent.

margin between the face value of the bonds and the circulation received, not taking into account the delay in receiving the circulation, etc. It is plain, therefore, that profit on circulation is not the inducement that leads to taking out a National banking charter. There is an actual loss in complying with the law requiring a deposit of bonds. This loss is undergone in the hope of compensation in the form of increased deposits. But if the requirement as to the deposit of bonds were reduced or abolished, the number of banks entering the National system would be much larger. The Comptroller of the Currency in his report of last year recommended the reduction of the amount of the bond deposit, as a method of recruiting the system. He was right in his views on this point, but did not appear to give much attention to the important consideration whether such a course does not tend to weaken the banks. The bond deposit had a two-fold effect—it secured the circulating notes and it guaranteed the payment of the capital of the bank. When a National bank is organized, before it can commence business the officers and directors prepare and make oath to a certificate that the capital required by law is paid in. When, in addition to this certificate, United States bonds to the full amount of the capital are deposited with the Treasurer of the United States, there can be no doubt that some one has furnished the capital to buy the bonds. When the requirement as to the amount of the bond deposit is reduced, there is no way to prove the payment of capital in excess of bonds, except by examination of the bank from time to time, and there is opportunity for various deceptions which may be practised on the Comptroller or his examiners. The danger to the system from the organization of weak banks at distances from the money centres, where it is difficult to watch their operations has, in the past, been commented on by several of the predecessors of the present Comptroller. That it is not an imaginary one is to some extent proved by the fact that of the 33 banks which were placed in the hands of receivers since 1882—the year in which the minimum deposit of bonds was reduced from one-third to one-quarter of capital—half were banks of \$50,000 capital, very many of them in distant sections of the country. Failures since have more than sustained this proportion.

THE SINKING FUND LAW requires that a certain amount of United States bonds shall be purchased and cancelled during each fiscal year. The amount called for on account of the present year is upwards of forty-five millions of dollars. This law is contained in Section 3,694 of the Revised Statutes of the United States which sets apart as a special fund the coin paid for duties on imported goods. This fund is to be used, first, in the payment in coin of the interest on the bonds and notes of the United States, and second, to the purchase or payment of 1 per centum of the entire debt of the United States. The 1 per centum thus purchased during each fiscal year is set apart as a fund on which

interest is calculated, and the calculated interest of all the previously accumulated sinking fund is each year added to the 1 per cent. of the debt existing that year, and the sum represents the amount of debt to be paid on account of the sinking fund of that year. The 1 per centum of the debt decreases each year as the debt decreases, but the interest on the fund increases. The general tendency is to increase the amount of bonds that must be purchased and cancelled under the sinking fund law. The law does not operate however unless there is sufficient coin collected from duties on imports, over and above the amount required for interest, to purchase the necessary bonds. If, therefore, the revenues of the Government derived from imports should be so reduced that the coin so collected should be sufficient to pay the interest only, on the debt, the sinking fund law would then become inoperative. There is no law compelling or requiring any other portion of the revenues of the Government to be used to sustain the sinking fund, and legislation would be necessary to authorize the application of any portion of the internal revenues to this purpose. There is not of course any immediate danger of the reduction of customs duties to an extent that would interfere with the sinking fund, but the reduction of revenues from this source has a tendency in this direction. The purchases already made by the Secretary of the Treasury under the Act of March 3, 1881, do not take the place of the purchases rendered necessary by the sinking fund law, for the Act of March 3, 1881, provides that the bonds purchased under it "shall constitute no part of the sinking fund but shall be cancelled." The bonds now being purchased are paid for from any surplus money in the Treasury not otherwise appropriated from whatever source derived, but the bonds purchased for the sinking fund must be paid for from the special fund created by setting apart the coin received for duties on imports.

SECRETARY STEWART'S resolution requiring the Secretary of the Treasury to furnish to Congress among other information relating to bond purchases the names of the parties making the sales to the Government, was criticised on the ground that the publication of such information might work some injury to private individuals and thus retard many from offering sales as freely as they might otherwise do. It is rather curious that one of the earliest financial acts of the Government—that of May 8, 1792—which among other things established a sinking fund for the payment of the revolutionary debt, provided for this purpose, that a commission should be established consisting of the President of the Senate, the Chief Justice, the Secretary of State, the Secretary of the Treasury, and the Attorney General, who should with the approbation of the President make purchases of United States stocks and bonds. Until a certain amount had been purchased they were to buy them at a price not to exceed par, but after this limit had been reached they were authorized to make purchases of bonds, etc.,

“at the lowest price at which the same can be obtained by open purchase or sealed proposals, to be opened in the presence of the commissioners, or persons authorized by them to make purchases, and the persons making such proposals.” Within the first fourteen days of its session the commissioners were to lay before Congress a complete account of their proceedings, including “the sums purchased or redeemed under their direction and specifying dates, prices, *parties* and places.” How much more complete and satisfactory are the checks and precautions of this old law than those of the law under which the Secretary of the Treasury is now making purchases? Instead of the power to perform this important function being delegated to one man or to one department of the Government as now, it was performed by a commission representing the Legislative, Judicial and Executive branches. The provision permitting the appointment of representatives allowed the presentation of bids in any place of sufficient importance, and did not require all the bids to be sent on to Washington. The bids were opened not only in the presence of Government representatives but in that of the parties making them, and every chance of fraud or concealment was obviated. Under the terms of the Act of 1792, no fraudulent offer such as that purporting to come from a Philadelphia firm which caused so much excitement in June, could have been made. The requirement that the parties making the bids should be present when such bids were opened, prevented frauds of this description on account of the danger of immediate detection. We believe it would be more satisfactory to all concerned if the law authorizing the purchase of bonds were remodelled somewhat after the good and ancient form, embodied in the Act of May 8, 1792.

THE DIRECTOR OF THE MINT has recently issued his statement of the production of the precious metals in the United States during the calendar year 1887. This appears to have attracted renewed attention to the silver question. The combined production of the two metals for the year was \$86,501,800, of which \$33,093,000 was gold, and \$53,408,800 was silver. For 1886 the combined production was \$86,190,500, \$34,869,000 being gold, and \$51,321,500 silver. The value of the gold appears to have been calculated in gold dollars and of the silver in silver dollars. On the basis of the present gold value of silver bullion, *viz.*, 42 pence per ounce, the silver dollar is worth about 68 cents in gold, and the \$53,408,800 silver dollars produced, according to the statement of the director of the mint, were worth on a gold basis—and this is the basis on which the Government purchases silver bullion for coinage—\$36,317,984, which is only about \$3,000,000 in excess of the gold value of the gold production. To reverse this computation and value the gold on the basis of the bullion value of the silver dollar, each gold dollar is equal to \$1.47 in silver dollars, and \$33,093,000 gold dollars are equal to \$48,646,710 silver dollars. It seems as if the

comparison, for fairness sake, should be made either by one standard or the other. To continue to represent the production of silver as increasing when, as measured by its bullion value, it is decreasing, is, unless some explanation is made, deceiving. In July, 1887, the silver dollar was worth 74 cents in gold, and the silver produced during the calendar year 1886, equaling, according to the Director of the Mint, \$51,321,500 in silver dollars at their legal value, was worth in gold \$37,977,910. Therefore, measured by a gold standard, the silver production has not increased during the calendar year 1887 over that of 1886, the production in 1887 having been \$36,317,984 as against \$37,977,910 in 1886. This is a fair comparison because, as has already been said, it is on a gold basis that the producers of silver sell it. This constant fall of price in an article of so much importance to the country should excite apprehension in view of the fact that the proportion of money based on silver is rapidly increasing. The coinage of the silver dollar, though it increases the use of silver in the United States, does not sustain, as was expected, the bullion price. It may be, as is claimed by bi-metallists, that gold alone does not and will not afford a sufficient basis for the monetary operations of the world, but it is equally certain that silver alone will not. The advocates of silver in the United States are at variance with those who desire to restore the price of this metal by establishing a fixed relation of money value between it and gold through international action. The continued coinage of the silver dollar at a relation of 16 to 1 tends to postpone if not to utterly defeat the international agreement by which alone silver may be restored to its former position in the monetary world.

THE IMPORTANCE OF THIS to producers of silver is emphasized by the gradual but sure decline of the bullion price. Silver equal in weight to \$53,408,800 standard dollars was produced in the United States in 1887, and in 1886 equal to \$51,321,500. Yet the greater weight produced in 1887 owing to decline in bullion price was worth \$36,317,984 only in gold, while the lesser production of 1886 was worth \$37,977,910 in gold. Although silver miners selling bullion to the Government have to take the bullion price as decided on a gold basis they do not actually get even this rate in gold, but are largely paid in silver dollars or certificates. It would seem that those having the silver interests of this country at heart, would, whether they approve of the cessation of the coinage of the silver dollar or not, take more interest in bringing about an international conference. The objection to stopping the coinage of the silver dollar seems to arise from the feeling that if the Government ceased to be a purchaser of silver bullion the price would sink even more rapidly than now; that the Coinage Act, sustains the price *pro tanto*, and while many of the advocates of the silver dollar do not object to an international agreement, they fear to surrender the surface advantage assumed to be derived by the continued coinage.

This feeling must be taken into account if any compromise between the bi-metallists of the United States and those of other countries is ever reached. It is certain, however, that if the coinage of the dollar and the production of silver continue as at present the decline in the price of silver bullion will continue. The effects of this decline are beginning to be felt in India, the great stronghold of silver money. It is stated by the London *Economist* that the purchasing power of the silver rupee in exchange for wheat has declined 25 per cent. since 1884, and this in the face of the utmost exertions to stimulate the production of that grain. The standard dollar in this country is artificially sustained at a point of value equal to the gold dollar. The credit of the Government and the large proportion of gold held in the Treasury are the sustaining causes. If from any cause the gold reserve grows weak there will be a discrimination in favor of gold funds. The reserve may grow weak from a continued balance of trade against the country or from an undue preponderance of money based on silver coming into circulation. An increase in the amount of silver certificates received for customs has already been noted. When silver dollars increase by the continued coinage to an extent required to do all the business of the country, no gold coin will be paid in for customs. The coin received from customs constitutes the fund from which the interest and principal of the public debt is to be paid. When at length this fund is entirely of silver, either the principal and interest of the public debt will be paid in silver or, if it is decided that it must be paid in gold, the gold will have to be purchased at a premium. Just as certain as it is that the drops of water and flakes of snow falling on the mountain tops will ultimately form the ocean, just so sure is it that the continued coinage of the silver dollar will ultimately make that dollar the sole currency of the United States. When this occurs, free coinage of silver will be easily brought about. As has been before remarked the objections to a silver mono-metallic standard are greater than those to a gold mono-metallic standard. If gold alone does not form a sufficient basis for the monetary transactions of the present day silver certainly will not. The gold produced in the United States very nearly equals the silver in value and it is strange that we do not hear anything from those representing gold mining interests. Probably the miners paraphrase the old proverb, and believe that if the silver is taken care of, the gold will take care of itself. It generally does, and goes where it is most used.

THE AMOUNT OF CIRCULATION of the country based on silver is not only increasing but it forms the portion of the circulation that most frequently passes from hand to hand. The amount of silver certificates outstanding exceeds \$200,000,000. They and the National bank notes do the actual work. The legal-tender notes are largely held as reserves by the banks and there is always quite a large amount

of them held by the Treasury. Moreover the bulk of the small notes, under five dollars, in circulation are silver certificates and on these small notes fall the innumerable petty transactions of daily life. The average life of the one dollar note as shown by figures given in the report of the Comptroller of the Currency for 1886, is 4.3 years, that of a two dollar note 4.5 years, that of a five dollar note 4.9, and that of a ten dollar note 5.3. The longest life is reached by the ten and twenty dollar notes, and for denominations higher than twenty dollars the length of life decreases because there is not as much demand for the circulation of the higher denominations. The shorter life of the ones and twos as compared with the fives and tens is doubtless largely due to the greater wear and tear to which they are subjected. The figures given by the Comptroller of the Currency apply to the National bank notes and are a fair criterion by which to judge the silver certificates which have acted as a substitute for the bank notes. This wear and tear, as well as the fact that the smaller the note the more any loss on its account falls on the poorest of the people, are arguments in favor of the most careful preparation of small silver certificates. It appears, however, that these are the notes in the making of which the cheap steam printing process has been used by the Bureau of Engraving and Printing. The loss by counterfeits generally falls on the poorer classes.

WE HAVE RECEIVED A COPY of a Union Labor Prohibition Greenback paper, bearing date July 27, 1888, published at Yates Center, Kansas, which contains two alleged circulars, asserted to have been issued by capitalists and bankers in aid of a conspiracy among themselves against labor, and the people at large. One is called the "Hazzard" circular, and the other the "Bankers'" circular. The former would appear from its style, to have been issued at the beginning of the war, and purports to be the signal for a grand rally among capitalists to take advantage of the times to enslave labor and gobble the wealth of the country. It is without date or signature, and reads as follows :

"Slavery is likely to be abolished by the war power, and chattel slavery be destroyed. This, I and my European friends are in favor of, for slavery is but the owning of labor, and carries with it the care of the laborer, while OUR PLAN IS FOR CAPITAL TO CONTROL LABOR BY CONTROLLING WAGES. This can be done by controlling the money.

The great debt (that capital will see to it is made out of this war), must be used as the means to control the volume of money. To accomplish this, the money must be bonded, and the bonds must be used as the banking basis. We are are now waiting for the Secretary of the Treasury to make the recommendation to Congress. It will not do to allow the greenbacks to circulate as money any length of time, for we cannot control them, but we can control the bonds, and through them the bank issue."

This would give the impression that the men who had capital in 1861 hailed the war with delight as a means of imposing a yoke worse

than slavery on their less fortunate fellow-citizens. Everyone knows that capitalists in the North at that time were not so sure of the outcome of the war that they were very eager to invest in Government securities, and the result has shown that capitalists in the South lost about all they possessed. The circular is absurd and bears in its contents the marks that it is a slander concocted to influence very ignorant people, and a paper publishing such nonsense insults its readers. The circular alleged to have been issued by the bankers of the country reads as follows :

"DEAR SIR.—It is advisable to do all in your power to sustain such daily and prominent weekly newspapers, especially the agricultural and religious press, as will oppose the issuing of greenback paper money, and that you also withhold patronage of favors from all applicants who are not willing to oppose the government issue of money. Let the Government issue the coin and the banks issue the paper money of the country, for then we can better protect each other. To repeal the law creating National bank notes, or to restore to circulation the Government issue of money will be to provide the people with money, and will, therefore, seriously affect your individual profit as bankers and lenders. See your Congressman at once, and engage him to support our interest that we may control legislation."

The foregoing is also without date or signature, and an alleged confidential communication among bankers. It does not distinguish between National and State banks, and the latter as well as a large number of the former have never been opposed to the issue of legal tender notes, otherwise greenbacks. Nor has there ever been any need of restoring to circulation the Government issue of paper money because it has never ceased to circulate, and is, to-day, in the form of greenbacks, gold and silver certificates, driving National bank notes out of circulation. The banks have never sought to oppress the people; they are dependent for their own prosperity upon the prosperity of the latter. They do not and cannot control legislation, and they do not combine with each other in any true sense, because individual banks are more or less rivals in business.

The absurd forgeries above referred to may do some injury. The information we can obtain about the true origin of these alleged circulars, which were first published as campaign documents some years ago, is very meagre. We will be glad to have readers of the JOURNAL, who know anything about them, inform us, both as to their enterprising authors and where and when they first entered on their merry existence as campaign lies.

THE DEPOSITORS' GUARANTEE COMPANY in America, organized in the city of New York with a West Virginia charter, does not seem to be getting the anticipated encouragement from the banking community. The only banks that need insurance are the weak ones, and even these will be chary about joining the guarantee company unless it can induce the stronger banks to go in also. Insurance or assurance

of the safety of bank deposits is supposed to be given by the character and strength of the management of the bank itself. If anything additional were necessary, it would seem more appropriate for the depositors to get together and insure each other than for the banks to associate to insure depositors. The larger and stronger banks which need the least insurance under the prospectus pay the largest contributions. The small banks for a comparatively small fee get all the benefit of the credit, capital and business skill of their larger compatriots. The scheme, if it were practical to carry it fully into operation, would virtually create a banking trust the success of which would be of doubtful benefit both to the public and the banks.

THE CONVENTION of the American Bankers' Association at Cincinnati on October 3, will be one of unusual interest. The bankers and business men of that city are taking great interest in the matter and are preparing a programme for the entertainment of the visiting members of the Association that will leave nothing to be desired. For a number of years the methods of entertainment adopted have taken a practical form which has met the approval of the bankers of the country. In Louisville, in Boston, in Chicago and Pittsburgh, the visiting bankers have been instructed in a very profitable way as to the manufactures, business, commerce and resources of the cities named. The same thing will occur at Cincinnati, and at a particularly opportune time—during the continuance of the Centennial Exposition which has been held there since July 4th, and will not close until after the bankers' convention. Those who were at Pittsburgh last year and remember the enjoyable nature of that occasion will look forward with pleasant anticipations to the meeting at Cincinnati.

IF MONEY IS EASY, there is little necessity for the Secretary of the Treasury to exercise the extraordinary power he possesses to purchase bonds. The philosophy of bond purchases is that the surplus is dangerous because it locks up currency in the Treasury, and the purchase of the United States debt gets it out. As long as money is easy the surplus is not dreaded. It is only when a real stringency occurs in the money market that there is any necessity of affording relief by the use of the surplus in reducing the debt. If the stringency is real, the Secretary can obtain the bonds at reasonable prices. Criticisms for not accepting offers in the present easy condition of the money market, are unwarranted. There are, doubtless, speculators who like to have large purchases reported simply on account of the influence such reports have on the stock market. The discretion of the Secretary is to be exercised, and by going slow in making purchases at the present time he is acting as any prudent business man would under the same circumstances.

THE BUREAU OF ENGRAVING AND PRINTING.

INCREASE OF COUNTERFEITS.

While the Sundry Civil Appropriation bill was under discussion in the Senate recently, an amendment of the Appropriation Committee was reached to strike out a proviso added by the House to the appropriation of \$398,000 for wages of plate printers in the Bureau of Engraving and Printing, and for the payment of royalties on the use of steam plate printing presses. The proviso added by the House was "That there shall not be an increase of the number of steam plate printing machines in the Bureau of Engraving and Printing." This prohibition was the result of the attention that has lately been attracted to the inferior manner in which the printing of paper money—particularly silver certificates—is being done by the Bureau of Engraving and Printing. Within a year past there have been a larger number of new counterfeits put in circulation than for some years previously, the counterfeiters evidently taking advantage of the lowering of the standard of its work on the part of the Bureau. The inferior work done is the result of a use to some extent of steam instead of hand-plate presses. The attempt of the Senate Appropriation Committee to strike out the prohibition to use more steam presses, caused an interesting discussion and the prohibition was finally suffered to remain. In the debate, much light was thrown upon the present attitude of the Bureau of Engraving and Printing on this question of steam or hand-plate printing and also on its own *raison d'être*. It has previously been contended in the JOURNAL that the exclusive printing of the paper money of the Nation was bad in principle, tending to develop the disadvantages of a monopoly, in that all the motives that produce the best work when competition is allowed were withdrawn. The following abbreviation of the debate, and comments thereon will, it is hoped, give an intelligent view of the matter :

Mr. Blair said that the striking out of the House proviso "raises the question involved in the controversy between the hand press and the steam press printing of Government notes." A resolution had been introduced by him early in the session to obtain information on that point which was referred to the Finance Committee, but that there had not been a full investigation, although there had been either a partial investigation or representations made from the Superintendent of the Bureau of Engraving and Printing, who was in favor of steam presses, to that committee, but that there had been no opportunity of hearing on the part of those opposed to the machines. Mr. Blair continued :

"It is charged and with certainly a great degree of proof in support of the charge, that the currency of the country is exceedingly depreciated since the employment of the steam presses in the performance of the work, as compared with what it was in the earlier days when the work was done by hand roller presses and by the hand engravers, so that the forging or counterfeiting of the paper money of the country is now comparatively very easy, and is carried on in consequence of the deterioration of the work to a much greater extent than formerly. New counterfeits are being put forward with greater and still greater rapidity. I have been informed that since the

reference of that resolution to the Committee on Finance, several very dangerous counterfeits have appeared and since the Superintendent of the Bureau justified the nature of the work he was doing with his steam presses, to the committee, there have been several, and notably, a one dollar counterfeit, which it is very difficult to detect, or rather which it is very easy to make by reason of the general imperfection of the work. The subject has been investigated by the House of Representatives, and a report of the proper committee of the House has been made which maintains these charges as to the imperfect and exceedingly dangerous nature of the work which is done at the Bureau of Engraving and Printing."

Mr. Blair then had read the following editorial from a New York newspaper :

"Before this session closes Congress ought to do something effectual for stopping the now altogether too flourishing business of counterfeiting National bank notes. The first and most effectual step toward the achievement of this most desirable object would be the abolition of the now wretchedly managed Bureau of Engraving and Printing, which has become a scandal to the Government. When the engraving of the National bank notes was given to private parties, the work was so excellent that successful counterfeits were out of the question. The finest artistic talent in the country was employed and in their general appearance and perfection of details the National bank notes were beyond the reach of successful imitation by any skill that counterfeiters can engage. In those times the National bank notes were accepted without special scrutiny. It did not require expert skill or careful examination to tell the difference between the genuine and the counterfeit notes. The genuine were as perfect works of art as were ever produced in their line. The counterfeits were comparatively few and were readily detected."

The foregoing editorial, quoted by Mr. Blair, is perhaps rather too strong, but it states the truth as to the superiority of former work upon the National bank notes. The inference is to a degree correct that the employment of private bank note companies in the work led to the least results, but in advocating the entire abolition of the Bureau of Engraving it goes too far, in that the greatest safety and the best and cheapest work would be attained by a division of the work between the bureau and private bank note companies. If either has the monopoly it tends to inferiority of product and extravagance in price. Mr. Blair also presented a letter from the Knights of Labor who are opposed to steam presses as reducing the number of plate printers that the Bureau would otherwise be required to employ. If the work done by the presses was as good as hand work, this motive alone would not, perhaps, have much weight; but the reasons for the inferiority of the steam work given on behalf of the plate printers have a great deal of force. The steam press, they say, wipes out the fine lines of the engraving and thus destroys the full effect. The impression produced is more available for counterfeiting by photography because there are no lights and shadows. There is a greater wastage of sheets by the steam than by the hand press. The adoption of the steam press has led to the acceptance of a lower standard of work. The comparative cheapness of steam press work has not been demonstrated. The plate printers criticize the statements of Mr. Graves, the Superintendent of the Bureau, made to prove the cheapness of the steam press work. They claim he suppresses certain sources of expense, and that an element of fraud has entered into the measurements of the comparative performances of hand and steam presses, made in the bureau, in that orders were given to so execute steam work as to secure results more favorable to it than are secured in the course of ordinary work; that all the predecessors of Mr. Graves had pronounced against steam presses as not successfully performing the higher class of work.

The plate printers are of the opinion that the head of the Bureau should be a practical engraver, but this of course is more in the nature of a personal attack on Mr. Graves, whose training, however good in other respects, was not in that line.

It seems Mr. Graves, in his last report, took occasion to defend his own position in the following language :

"A plate printer is a mechanic, apprenticed to the trade at an early age without any requirement of education or special intelligence, and spending all his working hours in a narrow mechanical routine. He has little taste or opportunity for the acquirement of general knowledge. It is impossible to conceive what qualifications to manage a great and intricate bureau, in which perplexing questions of the administration, of legal construction and of departmental practice are continually arising, and the chief officers of which must have frequent official intercourse with the high officers of the Government, would be furnished by men skilled in performing the purely mechanical operations of plate printing. Such a craftsman might, indeed, free himself from the trammels of his trade and turn to other pursuits which would qualify him for other things ; but just to the extent he should do so he would fall short of the 'practical' working required."

A more refreshing piece of official cant was never penned, but the representative of the plate printers demolishes Mr. Graves in the following delightful manner :

"After reading this," he says, "one unconsciously calls to mind the fact that one Benjamin Franklin, brought up in a narrow, mechanical routine, afterwards became a successful manager of printing offices and even held 'intercourse with the high officials of the Government' and from time to time hobnobbed with kings. William Orton, a printer, also freed himself from the trammels of his trade and became President of the Western Union Telegraph Company. The Harper Brothers were also practical printers, and became business managers of, perhaps, the model office of this country. Horace Greeley, a printer, distinguished himself as a practical newspaper manager, was received upon terms of equality by 'high officials' and even ventured to become a candidate for the presidency. A former carpenter was but recently regarded as a prominent candidate for the position of chief justice of the United States, and has been known to entertain on equal terms men holding higher positions than that of the chief of the Bureau. Members of Congress in their own persons attest the stupendous falsehood of the assumptions in which Mr. Graves indulged when he penned the paragraph."

This of course only goes to show Mr. Graves' own peculiar narrowness due, doubtless, to the official routine out of which he has seldom if ever cared to expand ; but the other evidences brought forward by Mr. Blair tend to prove that the steam press printing, evidently championed by Mr. Graves, is inferior to hand printing and so inferior that the resulting work has been dangerously counterfeited.

Mr. Hawley, who is a printer himself, followed Mr. Blair and described at length the process of plate printing. He said : "I do not believe that the best work can yet be possibly done by machinery—the best work in plate printing. We see very respectable chromos done by machinery, it is true, but nobody supposes that a first class work of art can be done by a machine. It requires the mind and the individual finger, hand, soul, and eye of the artist to do it. * * * This is not an ordinary case of objecting to a labor saving machine because it might dispense with workmen. * * * While in this instance the plate printers may have some prejudice against a machine because it reduces the number of employed artisans, I think that most decidedly they have the judgment of true artists on their side." Senator Allison, of the

Appropriation Committee, said that the object of the committee in striking out the prohibition to use more steam presses inserted in the bill by the House, was to leave the discretion of using more or not to the Secretary of the Treasury. He admitted he was convinced of the superiority of hand work to that done by the steam press. Mr. Blair objected to the discretion being left to the Secretary of the Treasury, inasmuch as he already had much discretionary power in the matter, and yet notwithstanding the complaints of the inferiority of the work and the number of counterfeits had done nothing.

Mr. Beck made an effort in behalf of steam presses, and declared himself unable to distinguish any difference between the hand printed and steam printed notes. He planted himself squarely on Mr. Graves' assertion that there was no difference. He claimed the Bank note companies when in competition with the Bureau broke down the latter and then put up prices. He asserted Mr. Graves had no political object in supporting the steam presses, and spoke highly of him as an officer and a man and claimed that as outside companies used these presses, the Government should use the machinery used by outside parties. Mr. Hawley replied:

"The truth is that to those who advocate this press it does not make so much difference whether it is good work or not; it will be good enough they think for that part of the bills. There I differ from them, and I think a careful examination of thirty or forty bills by the Senator himself although he says he is not an expert will satisfy him that the machine presses do not exhibit the best work. Mr. Graves says one or more of these presses is used by every outside company. Why only one or two? Because only second class work can be entrusted to them. I say the whole of our work ought to be the best that can be done. The Senator over-estimates the saving in my judgment. That has been stated sufficiently in the memorial of the plate printers themselves. Again—and it is all I shall say—it is not a question of saving \$25,000 or \$50,000. It is a question of excellence, and I think that a trial before a competent tribunal will demonstrate we are right in stopping the increase of these presses. While I think nobody desires now to go to so radical a measure as throwing them away, yet my own private judgment is that they ought not to touch our paper money at all."

Mr. Hawley is right when he says that "it is a question of excellence." The only way to reduce counterfeits to a minimum is to print all our paper money in the best way known to science. But the cause of the lapse from the highest standard lies deeper than the mere use of steam presses. If the Bureau had been kept in competition with private companies, no one there would ever have dared to suggest the use of steam presses. It was because the officials of that Bureau felt that they had a practical monopoly not only of the work but of the ear of the Secretary that they began to try experiments at the expense of the currency of the country. The introduction of the Homer Lee steam plate printing press may have been undertaken from correct motives, but the extension of its use has been directed by very bad judgment. The falling off of the quality of the work of printing the notes has not, however, been noticed in that only which has been done by steam. There has been a retrograde in the character of the designs used and in the printing done by hand since the Bureau has ceased to dread the work of outside companies. The only way to check mismanagement in the Bureau is to expose it to searching competition in all the branches of the work—a competition not based on cheapness alone but on excellence of design and execution.

* BANK BOOK-KEEPING.

A TREATISE ON KEEPING AND AUDITING THE BOOKS OF STATE AND NATIONAL BANKS, PRIVATE BANKING FIRMS, SAVINGS INSTITUTIONS, FINANCIAL AGENTS, ETC.

Prepared for the JOURNAL by an experienced Bank Accountant.

DEPOSITORS' ACCOUNTS (*Continued*).

"As I am able to see, Mr. Payson," observed Mr. Brown, eyeing with interest the books which lay before him on the well-regulated desk, "you manage to keep the departments of work here as carefully classified and as much by themselves as if there were both Paying and Receiving Tellers occupying separate desks. Would it not materially reduce and simplify the labor to concentrate the entries and keep a less number of account books? You perform so nearly the whole of the clerical work yourself I should suppose you would keep as few books as possible. You have here, for example, a record of the deposits in a book separate from the disbursements and from the record of checks paid. Would it not be an advantage to unite these in one general account, inasmuch as one person handles the money?"

"It is a mistaken idea, Mr. Brown, many people have that the number of books in a system of accounts have something to do with complicating or extending the work of the book-keeper. Custom has introduced into general book-keeping a style of record known as a 'Cash-book.' The common arrangement of this book is to have the cash receipts and cash disbursements upon opposing pages, and so entered that the account may be balanced or closed up at stated periods—daily, weekly or otherwise—and this without reference to the number of entries upon either side within the day, week or month. Thus, as you have often noticed in the Cash-book of a merchant, there may be ten entries upon one side of the account to one upon the other, necessitating a loss of nearly one-half of the entire book. This, I claim is an unnecessary waste. But the waste in the book is a comparatively small item. Account-books accumulate, at least they ought not to be destroyed until they have been at least ten years out of use, and in ten years there will naturally have accumulated in a business of any magnitude a large stock of old records. A prudent and careful book-keeper will so economize space that these old books shall require as little room as possible, and at the same time be as convenient as may be for reference."

"And you see no special necessity for both the cash receipts and disbursements appearing in the same book?"

"No reason whatever, further than the influence caused by tradition. There is no objection to such a plan, however, where the entries upon the two sides are very nearly equal in numbers, though custom has discarded in banking the ordinary Cash-book, and wisely so, too. Every book in a bank

* A series of papers on Practical Bank Book-keeping: will be continued through the year 1868, or until the subject is exhausted. When required the articles will be illustrated by photo-engraved plates made from pen drawings, showing some new ideas in blank books, and other labor-saving forms.

is, in a very proper sense, a Cash book ; the entire trade and traffic of a bank is cash. It may be argued that while we have no occasion for an account such as merchandise, and therefore no use for a purchase

or sales-book, we do, practically, buy and sell commercial paper. There is, I admit, an element of speculation in banking, but the entire course of the business is so unlike a mercantile enterprise that a decidedly different arrangement for the book-keeping is demanded, and usage has introduced forms in the books of account which take an advance step in the arrangement of cash entries. Let us first consider the receipts and disbursements of cash in connection with the depositors. You have seen the memorandum forms for the Teller or Tellers to make up their daily balances by.*

I have found these memorandums of much service at times, though I have not followed the practice of writing in them the names of the dealers. I will show you now forms for this class of entries, such as are more commonly used and which require less time in preparation, and serve equally as well for the purpose of a systematic record. First, here is a record of deposits. This, you will observe, is a book with a single column for the amounts ; a column for the ledger folio of the depositor's account, and a space for the name or title of account. The total of the deposit-slip only is entered here. As to its component parts, whether bills, coin or checks, this does not show. After the deposits have been entered in this book and the columns added, other credits for the depositor's accounts are entered. These may be collections which have been reported, or loans made by the bank, the

Fig. 16.-Depositors Register.

* These forms appeared in the June number, on pages 534 and 536, and the explanation given in the text showed the memorandums to be purely auxiliary. They have no direct connection with the regular records, and it is optional with the person who has the balancing of the cash whether such a basis of calculation be used or not. They were introduced as a suggestive convenience for one not thoroughly familiar with the Teller's work.

passing of which by the officers, Directors or proprietors has been decided upon, and of which notice is given to the depositor. The collections to be credited and the loans passed in favor of depositors are not deposits, technically speaking, for which the Receiving Teller must account in his statement of the day's receipts, but they are credits to the depositor's accounts."

"And for what purpose do you add these items to the list of deposits? You say, Mr. Payson, the Teller does not account for them, and I do not see that they represent actual receipts, do they?"

"It is not necessary. Mr. Brown, that I should do so, though the entries here serve to complete the record. You observe the credits to depositors for this day are divided into five classes, thus: *

- "1. Cash, currency and coin.
- "2. Checks in favor of one depositor drawn by another depositor of our own bank.
- "3. Checks drawn by depositors of another bank.
- "4. Collections either received or reported as paid by some other bank.
- "5. Loans made by us which are here placed to the credit of the depositor's account.

"You will now see by the Teller's 'Register of Deposits' that the total of the column is the full credit to the general account of depositors, and that this corresponds with the amount credited to this amount in the Statement Journal."

"And where are your original entries for the items called 'Collections Credited?'"

"That item comes from entries in the book called 'Passed Collections.' But, in examining this, we will also observe the functions of the 'Collection Register.' This book contains in consecutive order a list of the notes and bills

Collection Register: Bank of Farmer. 18-

No.	Date	Maker	Where payable	Owner	Amount	Remarks
1	25 Feb	Smith	Chickton	W. J. Perrin	350 10

left with us for collection, and also such facts concerning the paper as may be important for us to know. These entries have no connection with the monetary affairs of the bank. Whether they ever will have depends upon future events. If they are paid, so the money passes through our hands, the transactions become directly associated with our accounts. When bills come into our hands, payable at some other bank, or abroad in any way, whether they are our own property or those left with us for collection, our plan is to send them immediately forward, either to the bank where they fall due, or to our most convenient correspondent, who will make the collection and forward the proceeds. In case the bills are sent to a correspondent, we await the notifi-

Fig. 17.—Coll'on Register.

* See "Statement-Journal;" Credit side.

cation of payment before we charge the amount and credit the dealer. Should the correspondent, however, neglect to notify us, after waiting sufficient time for notice of protest to reach us after the bill matures, we consider the payment made, and upon that belief make the entry charging the correspondent and crediting the dealer. When a bill is sent for collection to a bank not a correspondent we expect the remittance of the money to come with the advice of payment, and we do not charge it up to the bank."

"And where do you make the entries charging the bank and crediting the dealer?"

"Those appear in the 'Passed Collections' book. The 'Collection Register' contains a statement of all collections received by us, but this book gives a record only of such as are paid.* I may say here that it is customary with some banks to make a distinction between collections left by strangers, that is, persons who have no account with the bank, and the dealers. Collections received from strangers or non-dealers, when paid, or notice of payment being received, are not, of course, credited up to the account of the owner, as we wouldn't open an account for that particular purpose. But we keep a list of the 'Special Deposits,' and open a general account under this head, and which is credited with all of such collections and debited when the proceeds are remitted or turned over to the owners."

"You have here also an item entitled 'Loans Credited.' This, I presume, comes from the 'Discount Register,' but, referring to that book, Mr. Payson, I notice the amounts do not correspond."

"The amount credited to accounts this day for loans and discounts which have been allowed is \$1,000, but the full amount of the loans and discounts is \$1,700. Referring to the Discount Register, you will see that there was paid in cash and not credited to account two items—No. 85 for \$450; and of No. 87 \$200 of the \$450 was credited to account, but \$250 was paid in cash. It is very seldom, I must say, that a circumstance of this kind occurs. The usual course would be to credit the full amount, \$450, and let the dealer draw his check for the amount he desired in cash. This circumstance will serve to show that exceptions to the usual plan of work do sometimes occur."

"And I observe the total now of the Teller's Register of Deposits is made to show the amount in one item that is to be credited to the general account

* Other forms of the Collection Register will be given in subsequent parts of these papers.

of 'Depositors;' the first footing being the amount the Receiving Teller must account for, and the subsequent entries being an augmentation from affairs connected with the workings of the bank, but not actual deposits."

"You are correct in that, Mr. Brown, and by reference to the Statement-Journal, which we will come to very soon, you will find how these entries have been useful in making an intelligent exhibit of these transactions for the day. But, while dealing with this particular class of accounts, let us turn for a few moments to the records of the Paying Teller, or rather, as we have it, the disbursements against depositors' accounts. The great majority of disbursements of this character are, of course, the payments of checks over the counter.* But the operations here, that is, the charges to depositors, are properly divided into classes, as follows :

1. Cash payments of checks.
2. Certification of checks.
3. Checks received on deposit by the Receiving Teller.
4. Collections previously credited, but returned unpaid and charged up to the account.
5. Loans matured and charged up to the account.

Where Payable	When Due	Amount	Discount	Remarks

Peoples Bank	July 25 . 1	450 -	6 17	Cash
		\$1700 -	25 74	

Fig. 19.—Passed Collections; right-hand page.

The only item in the list affecting the actual cash, as you will see, is the first, the cash payments of checks. The amount of checks certified is obtained from a record made at the time the certification takes place. I have chosen to connect this service with the duty of the Paying Teller, or I may say with that branch of the work which I presume to belong to the Paying Teller. It is not, however, universally the custom for the Paying or First Teller of a bank to certify to checks when presented for that purpose; in some places the custom carries the duty to the Cashier. In whichever way it may be done, it is quite proper to bring the amount of such certifications into this book of checks paid, as it is one of the elements that go to make up the amount charged each day to the depositors' accounts. The amount entered as checks from depositors is obtained from the records of the Receiving Teller, and the

* When we reach the subject of metropolitan banking, or the accounts of banks in cities where banks deal largely through a Clearing-House, this department of a Teller's duty will receive more elaborate explanation.

checks thus received are placed, for classification and entry with those paid in cash. The other one item for the day that appears here is the one for a returned unpaid collection. The collection having been previously credited to the depositor, I made out at the time the letter enclosing the paper to us came to hand a 'charge check,' and placed it on the file with the checks paid. When we come to the Statement-Journal we will find the corresponding credit for this charge to the depositor."

"And may we not very properly look into this Statement-Journal, Mr. Payson, before going further? I think it will aid in comprehending more thoroughly the subjects we have already passed over."

"Indeed, there is no reason why we may not look into this general summary at this juncture, for what we are to go over of the subservient records may

as well come after as before we have some general understanding of the compilation of transactions. In introducing this Statement-Journal, I will say it is a form not in general use among bankers or bank book-keepers. It is a

Fig. 21.—Certification Register.

form, however, applicable to many other kinds of business, and one I have found of much practical value in our little institution at Checkton. I made a remark a short time ago to the effect that nearly all the records of a bank might properly be termed Cash-books, for cash was the chief commodity of

trade. This book, in one sense, is a Cash-book, though it is arranged, as to the pages and their entries, exactly the reverse of an ordinary cash account. The debit side of the book represents cash credits, and the credit side cash debits."

"Then are there only cash entries made in this book?"

"The entries are a combination of cash and journal transactions. The principle involved is that the actual cash transactions appear only on one side or one page, while the other transactions are recorded upon both pages. Take, for example, the Debit to Depositors; the item of checks paid (\$9,600) is a cash disbursement, and is not, therefore, entered but once, but the following item of checks certified (\$5,000) does not represent a disturbance of the cash balance, and you will, therefore, find on the opposite page the equalizing entry, 'Checks Certified, \$5,000.' This is equivalent to the journal entry

Depositors' Account (Dr.).....5,000.

To Checks Certified Account (Cr.).....5,000.

The item of Checks from Depositors is the counter balancing of the item opposite, Checks on Us. Collections Returned is the equalization of the credit to the account of M. Weatherbub & Co., or, journalized, would be:

Depositors' Account...186.

To M. Weatherbub & Co. 186.

Collection returned unpaid.

As a matter of convenience and to facilitate the work of the book-keeper, a large number of these ledger titles or accounts may be printed in the book, a reasonable space being allowed for miscellaneous titles as occasion may require. Besides the general accounts, to which there are frequent additions or subtractions, it is advisable to have printed the names of the corresponding banks, and some space left for additions to the list.

The book I have had made for our business, which is limited, and therefore requiring only a small number of general accounts, and a small space for additions to the list of correspondents, provides for two days' business to the two pages of the book. Should we have a large number of active accounts, either general accounts or of correspondents with whom we

"You have then, I observe, three money columns on each page. There must be some advantages in that, though I do not appreciate them from what I can see of the work. The first column on each side I understand is for the several items which form the amount to be entered to some general account, but why the other two columns?"

"This book, Mr. Brown, is not only the journal and general cash-book, but is also a partial exhibit of the business of the bank. The two columns upon each page, headed respectively 'Ledger' and 'Profit

and Loss,' afford an opportunity for classifying our accounts—that is, separating the accounts which show results from those which represent our actual

resources and liabilities. By separating the accounts of profits and losses, or income and expense, from the others, and balancing these two corresponding columns, the amount carried forward each day shows exactly what the loss or income has been to that day from the

date when the books were last closed, and the net loss or gain either carried to the dividend account or credited to the proprietors, as circumstances may require."

"The balance then, of \$480.20, which we see here brought forward from

the first of April and with which the column of 'Profit and Loss' stands credited on the opening of April 2d is the net profit of our business since the first of May when we closed the books? Is that correct?"

"It is. And you observe also that the balance for the following day is arrived at by adding the receipts from 'Exchange 5.10' and 'Interest and Discount 50.75,' then deducting the item of 'Expense for Stationery and Postage 27.50' giving us a net profit for April 3rd of 508.55."

"That is now quite clear to me. And the columns headed 'Ledger' are, I presume, the amounts to be posted from this book to the Ledger accounts as indicated under the space entitled 'Accounts?'"

"You are correct, and these columns, as you see, are also balanced, the balance being the difference between the debit and credit entries for the day, including the cash-balance, and, by adding the balance of the Profit and Loss accounts, gives the correct balance for cash for the day."

(To be Continued.)

Clearing House at Providence.—The city of Providence, R. I., has established a bank Clearing-House, which has been considered a feasible project for some time. There are thirty-four banks that have associated themselves with the new organization, and the two trust companies of the city have also done so. This number includes all the banking institutions of the city except the Butchers & Drovers' Bank, the savings banks and the private bankers.

The Government Receipts.—The Government receipts for the fiscal year ending June 30, 1888, were \$379,829,425, and expenditures for the same period \$269,089,989. The surplus of receipts over expenditures was \$110,239,436. As compared with the last fiscal year, receipts show an increase of \$7,926,148, and expenditures show an increase of \$1,157,759; but in the expenditures of the fiscal year 1888, are included \$8,270,842 of premiums paid on the purchase of bonds—an item not in the expenditures of the fiscal year of 1887. The receipts from customs during the year just ended were \$219,897,076 as against \$217,286,893 during the preceding year, and from internal revenue \$124,828,978 against \$118,823,391 for the preceding year.

Taxation in Texas.—The following amendment to the law taxing personal property in Texas—passed at the recent extra session of the Legislature in May last—is of interest to our readers:

ARTICLE 4674a.—It shall be the duty of the Assessor of taxes to list on his rolls for taxation all property temporarily removed from the State on or before the first day of January of each year, and all property removed from the State for the purpose of evading taxation prior to January first of each year shall be liable to taxation at any time after the same shall have been returned to the State before the Assessor has completed his rolls, and all notes or bonds executed for money loaned in the State and sent out of the State before the first of January shall be subject to assessment for each of the years during which the notes and bonds remain unpaid: *Provided*, That said property so returned and brought into the State after the first day of January shall not be the proceeds of any moneys or property already assessed for said year.

SEC. 2.—Whereas the early adjournment of this session renders it impossible to read this bill on three several days, therefore an emergency exists and an imperative public necessity requires that the rule requiring bills to be read on three several days be suspended and that this act take effect and be in force from and after its passage, and it is so enacted.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

FAILURE OF NATIONAL BANK—LIABILITY OF STOCKHOLDER, WHO IS ALSO AN ACTIVE OFFICER AND DIRECTOR, FOR ASSESSMENT ON SHARES TRANSFERRED TO HIM WITHOUT HIS KNOWLEDGE—DUTY AS TO REPUDIATING TRANSFER WHEN APPRISED THEREOF.

Samuel Brown, as Receiver, sued Nicholas Finn, upon the statute of the United States to recover a sum due from the defendant as stockholder in the First National Bank of Leadville, which had failed, and the question which arose upon the trial and upon the motion for a new trial was whether Finn was in fact a stockholder in that bank at the time of its failure.

It appeared in evidence that one DeWalt, as President of the bank, some time in the Fall of 1888, transferred a number of shares to the defendant Finn, and thereupon the latter became Vice-President of the bank and entered into the active management of its affairs. At or about that time one Sauer, who had been Cashier of the bank, resigned from that position, and Mr. Finn became Acting-Cashier, although not chosen to that position. He also became a Director at the same time, as was necessary to qualify him as Vice-President of the institution. A month or two later the defendant, Finn, purchased twenty shares from the former Cashier, Sauer.

The position of Finn was, and he offered evidence to show that during all this time, and afterwards until January, 1884, he knew nothing of the matter of the transfer of the shares to him by DeWalt. In January, 1884, about the first of that month, he became aware of the transfer of these shares by the circumstance that there was declared by the Board of Directors a dividend of twenty-five per cent. upon all of the shares, as well as those which were transferred to him by DeWalt as the shares which he had purchased from Sauer, and this dividend was put to his account. In that way he became apprised of it. Finn then, within a few days, sought to repudiate the transfer of these shares, not by having the transfer enrolled upon the books, but by informing Mr. DeWalt that he did not assent to that transaction, and paying to him the amount of the dividend which was attributable to those shares.

Upon these circumstances defendant insisted that he was not to be charged in respect of the shares which came from DeWalt. He admitted his liability as to the others which he obtained from Sauer and paid to the Receiver the amount chargeable against him under the statute upon those shares, but declined to pay the amount charged upon the shares transferred by DeWalt to him. This suit was thereupon brought by the Receiver for the amount upon those shares, and also for the dividend which was paid him on the 20 shares.

The jury found a verdict for the Receiver by the direction of the court, and the case then came before the court on defendant's motion for a new trial.

Held, Upon the facts the question obviously turns upon whether Mr. Finn, acting as Vice-President and as Cashier of the bank, and active in its affairs during the time when these shares transferred to him by DeWalt stood in his name upon the book, is to be charged thereon; and if not, whether, when he ascertained that the shares were in his name, in the early part of January, 1884, he was bound to do more than he did towards repudiating the transfer to him.

Now, upon the first proposition that he is chargeable with notice of the

*All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL's Law Department as early as obtainable.

Attention is also directed to the "Law Notes and Comments" and "Replies to Law and Banking Questions," which are included in this Department.

transfer of these shares to him, although he knew not of it, we think the principle is clear enough ; and there are several authorities which sustain that view—two in particular we shall refer to. The first is *Ex parte Brown*, 19 Beav., 97. Doctor Brown was a Director of an insurance company called the "Newcastle-upon-Tyne." He had owned some shares in this company and, as in the case of the Leadville bank, a man named William Henry Brockett had assumed chief control over the affairs of the company. In the language of counsel in discussing the case before the court, he had become the company. He was managing its concerns, and no one else who had been interested in it was giving much attention to its affairs. Doctor Brown sold his shares to Brockett, and gave him directions in respect to the transfer of them ; but these directions were not carried out, and certain provisions in the certificate of incorporation of the company were not followed in respect to the transfer of the shares. In July, 1848, Brockett offered to buy Brown's shares at £1 each. Brown accepted the offer, and on the 9th of the same month gave notice, according to the usual practice, that he had sold his shares to Brockett, to whom he requested them to be transferred. On the 1st of August he received £75 from Brockett and handed him his certificate, and afterwards had nothing to do with the company. Brown in his affidavit stated that during all the time he was a director he never recollected any certificate being produced at the meeting of the Directors for the purpose of being cancelled, and so far as he knew he had complied with all the formalities. There was, however, no entry in the register book, the old certificates had not been cancelled, new ones had not been issued, there was no approval of the transfer, and, in short, none of the requisite formalities had been complied with. The clerk in his affidavit stated that before 1848 the mode of procedure as to transfers was to give notice to the Board of the proposed transfer and of the name of the purchaser, and on the purchaser being approved his name was entered in the register-book, the old certificates were cancelled, and new ones issued ; but after 1848 the proper number of Directors never attended, and the approval was by a less number ; and on and after 1848 Brockett was himself the entire Board.

It is contended in this case that DeWalt was the entire Board, and he made the dividend and did all things that were done there without authority from any one.

At the time of Brown's transfer Brockett, it was alleged, had 100, or, at least, such a number of shares, as together with Brown's, to exceed the prescribed limit of 100 shares. The significance of that was, by the charter or some regulation of the company, no one of the members could hold more than 100 shares. And that is the matter of which the Master of the Rolls talks first in his opinion. Afterwards he says : " But the circumstance which has materially influenced my judgment, and to which I principally refer in this case, is this : Mr. Brown was one of the Directors of the company ; he therefore knew that by the eighth clause of the company's deed no business could be properly transacted unless five Directors were present, and consequently that it was not in the power of the Managing Director alone to transact any business of this description for the company. In a former case (and there are other authorities establishing the same principle) I held that a stockholder of the company is not bound to have knowledge of what is contained in the books of the company ; that he is not bound by any acquiescence in entries in books, which are merely produced at public meetings, and which he might, if he pleased, then look at ; but as regards the Directors of the company the case stands on a totally different footing. A person when he becomes a Director accepts a trust which he undertakes to perform for the benefit of the company. If, in the due performance of that trust, he must necessarily have acquired certain knowledge, it appears to me to be but fit that he should be charged with the knowledge of those facts which it was his duty to become acquainted with. It is merely saying that a person shall be held to know that which it was his bounden duty to know. It appears to me that Mr. Brown was bound to know what took place at the meetings of the Board of Directors, of which he was a member, and that when he agreed to sell Mr. Brockett seventy-five

shares he knew that Mr. Brockett could only hold one hundred shares in the company, and that an entry of more was irregular and improper; that it was his duty to know, and that he had the means and opportunity of ascertaining how many shares Brockett then held; and that he was not entitled to hold seventy-five additional shares. I must hold Mr. Brown to have had knowledge of that which he ought to have known, and whether he had actual knowledge of it or not is, in my opinion, immaterial for the present purpose."

The other case is from the Supreme Court of Nebraska (Merchants' Bank vs. Rudolph, 5 Neb., 527) This was an action by the Merchants' Bank against Rudolph and others: and Rudolph, one of the defendants, was a Director of the Bank. Lewis & Marsh, who were concerned in the transactions out of which the liability of the defendants arose, also had one member of their firm in the bank. Rudolph & Co. pleaded, among other things, that these defendants were sureties, as the plaintiff bank well knew; that after maturity of the note Lewis & Marsh requested these defendants to become surety on other paper, which they refused to do unless this note had been paid; and for the purpose of ascertaining this fact in that regard, went to the plaintiff bank to the Cashier there in charge, stating the purpose of the inquiry, and inquired in reference to the payment of the note in suit, and were by the Cashier informed that the note was all paid except a small balance, against which the bank held ample security; and that Eaton, the Cashier, had a number of other times when engaged in the negotiation of the business of the bank, to induce these defendants to become surety for Lewis & Marsh on other paper, the proceeds of which went to the bank on account of Lewis & Marsh, said this note had been paid; and that these defendants on the faith of these representations, went upon the paper of Lewis & Marsh in the sum of more than \$7,692, on which they have since been required to pay, and have paid, sums amounting to \$7,692; that these defendants at the time these representations were made, and for long after, were indebted to Lewis & Marsh in the sum of \$6,223, from which indebtedness, but for the faith and credit given to such statements, these defendants could and would have saved themselves harmless and have paid this note; that this indebtedness these defendants paid to Lewis & Marsh long before any notice that this note was yet unpaid, and Lewis & Marsh before said notice had become utterly insolvent and these defendants are remediless; that Lewis & Marsh after maturity of the note made large deposits of money and collections with the plaintiff, and that the plaintiff took and held ample collateral security from Lewis & Marsh for the payment of the note, which might have been by the plaintiff realized and retained; and particularly that just before the note in suit was due, Lewis & Marsh deposited with the plaintiff certificates of deposit of the Washington Bank of Iowa in the sum of \$4,847.35 directed to be collected and credited on the note; that plaintiff knew the defendants to be sureties only, and that it allowed Lewis & Marsh to check out their moneys and also applied the proceeds of the Washington Bank certificates to payment of other indebtedness of Lewis & Marsh without the consent or knowledge of defendants and to their prejudice as sureties, depriving them of their right to subrogation; and that Lewis & Marsh were insolvent and defendants remediless.

Now this defense on the part of strangers to the bank obviously would be perfectly good, and so the court holds; but the defendants were not strangers to the bank, on account of one member of the firm being of the Board of Directors; and as to their standing in that respect and how this circumstance affected them, the court says:

"But while this is conceded to be the general rule, it is urged on the part of the plaintiff that these defendants were not in a situation to claim its protection, in consequence of the relation which Rudolph bore to the bank and also to his co-defendant, Deck. It is insisted that, being the last President and one of the Directors of the bank, he was in a situation which required him to know the condition of its business, and must be conclusively presumed to have known whether said note had been paid or not. No case directly in point has been cited, but we apprehend that the rule contended for is the correct one. In *Morse on Banks and Banking* it is said that the general control

and government of all the affairs and transactions of the bank rests with the Board of Directors. For such purpose the Board constitutes the corporation, and uniform usage imposes upon them the general superintendency and active management of the corporate concerns. They are bound to know what is done beyond the merest matter of daily routine, and they are bound to know the system and rules arranged for its doing. Whatever knowledge a Director has or ought to have officially, he is, or will be conclusively presumed at law to have, as a private individual. In any transactions with the bank, either on his own separate account or where others are so jointly interested with him that his knowledge is their knowledge, he and his joint contractors will be affected by this knowledge which he has or which he ought, if he had duly performed his official duties, to have acquired."

Now, it must be assumed that Mr. Finn, when he became a Director of this bank, and its Vice-President, and assumed the duty of active management was advised of the statute which required him to be a stockholder to a certain extent; that is, as to a certain number of shares. It must also be assumed that he had knowledge, or immediately became acquainted with the condition of the books; not only as to whether any shares were held by himself, but who were the stockholders in the bank—whether there was the requisite number of stockholders and who they were. Any investigation upon that subject would have led to the discovery that he was a stockholder to the extent of these fifty shares. And, therefore, upon the authority of these cases it must be assumed that he had the knowledge that the shares were standing in his name; and that is a presumption, whether it stands upon estoppel or otherwise, which rests in the general policy in relation to these concerns—the general policy of the law, which must hold those who are active in setting up and maintaining the corporation to some knowledge of the condition of its affairs.

So also as to his duty when he became apprised of the condition of things early in January. In the condition of the bank, with a flagrant and most outrageous act of swindling in declaring a dividend of 25 per cent. in an insolvent concern upon the record, of which it must be presumed he had knowledge, it was his duty to repudiate the transfer of these shares at once; he could not allow it to remain for a day. But he allowed his name to stand there and all he did was to return the money to Mr. DeWalt, whom he supposed was the owner of these shares; he did not return the money to the bank from whence it came.

We do not think the case touches upon the question whether a party shall be charged as a stockholder in a bank or other corporation without his consent. It is conceded that as a stockholder only, one cannot be so charged. The authorities are numerous and stand upon the soundest reason that if one be put upon the books as a stockholder without his consent, he shall not be held in respect to such stock; but when he concerns himself in the management of the corporation he vouches for its integrity, stands before the world as indorsing and maintaining it, and he must be liable for whatever the books show in respect to its condition.

Motion for new trial overruled and judgment entered for plaintiff on verdict.

Brown vs. Finn, United States Circuit Court, D. Colorado, March 6, 1888.

BANK AND DEPOSITOR—PAYMENT OF CHECK BY BANK WHEREON PAYEE'S INDORSEMENT IS FORGED—DEPOSITOR'S RIGHT OF RECOVERY AGAINST BANK—THE QUESTION OF DEPOSITOR'S NEGLIGENCE AS A BAR TO RECOVERY CONSIDERED.

The plaintiff Brixen sued the Deseret National Bank of Salt Lake City for \$752 alleged to be on deposit in the bank to the credit of the plaintiff, and which defendant refused to pay to plaintiff. The bank, in its answer, denied that that sum, or any sum, remained on deposit with it to the credit of plaintiff.

The facts upon which the liability of the bank was claimed were as follows: The plaintiff was a customer and regular depositor at the bank. While he was so, on the 10th of November, 1884, a real estate agent named C. J. Smith was,

as other real estate agents in Salt Lake City, acting as a broker in obtaining and making loans of money upon real estate security. In that capacity he presented himself to the plaintiff and asked him if he had any money to loan upon such security, and being answered in the affirmative he took the plaintiff to see the property belonging to W. A. Dunbar, which was unimproved city property. Plaintiff then went to the County Recorder's office to learn about the title. Being satisfied with the title he told the real estate agent that he would make the loan and that the agent could have the papers made out and brought to him, and he would give his check for the amount. Nothing against the character of the real estate agent appeared up to this time and the manner of transacting the business was not uncommon. The agent brought the note and mortgage to the plaintiff. They appeared to have been duly executed and the plaintiff handed the real estate agent a check for \$752, the amount of the loan, less six months' interest deducted. The check was drawn payable to the order of W. A. Dunbar, the person to whom the drawer supposed he was loaning the money. The bank, in accordance with its practice as to all depositors, delivered to the plaintiff once each month all the checks which had been paid up to that time. He received the check in question, among others, about the first of December, 1884. He continued to be a depositor and customer of the bank until about the first of May, 1885. In September, 1885, the interest being overdue on the loan, the plaintiff called at the residence of Dunbar in Salt Lake City in regard to the matter. Dunbar was absent in Idaho and his wife, knowing nothing of the matter, said that she would write to Mr. Dunbar. Early in November following Dunbar came home and called to see the plaintiff about the matter. Upon the note and mortgage being shown him, Dunbar pronounced both the note and mortgage to be forgeries. This was on November 7, 1885. The plaintiff then brought out the check and Dunbar pronounced his name indorsed thereon to also be a forgery. It appeared from the evidence that Dunbar was not in the territory at the time the loan was effected and knew nothing of the transaction. The plaintiff immediately, on the same day, November 7th, went to the defendant bank and asked if the signature of Dunbar was a forgery, and the Cashier, after inspecting it, said that he believed it was. The plaintiff then went to his attorney and they together went to the bank and the plaintiff told the defendant that he would hold the bank responsible. But at the suggestion of the Cashier he delayed action for some days. On the first of December he went to the bank and formally offered back the check with the forged name upon it and demanded the money claimed to be due him. The bank refused to receive back the check and refused to pay the sum claimed. Plaintiff then brought this action to recover the amount.

The District Court gave judgment for the plaintiff for the amount claimed and thereupon the defendant appealed to the Supreme Court of Utah. The bank contended that the judgment was erroneous, that it was not liable to pay plaintiff the amount claimed in the action for the reason that the money had already been paid out upon the check of plaintiff drawn in favor of W. A. Dunbar; that, although the payee's name indorsed upon the check was a forgery, the loss should fall upon the plaintiff because it was through his negligence that the check was put into circulation—he having delivered it to a stranger and not to the payee.

Held, It is a well-recognized general rule that where a party has money in a bank, and draws his check therefor, payable to the order of a particular person, it gives authority to the bank to pay the money to such person or to his order, unless in due time notified not to do so. But the check so drawn does not give authority to the bank to pay it to any other person; and if the bank fails to follow the direction specified in the check, and assumes to pay to some one else, it does so at its own risk. When the payee's name indorsed on the check is a forgery, and the check is paid on such forged indorsement, it is not a payment to the order of the payee. The general rule referred to is recognized by the defendant, but it contends that this case presents an exception to the rule in that it shows such negligence on the part of the drawer as to preclude his recovery in this action. The check was drawn payable to W. A.

Dunbar, but was handed to C. J. Smith, a real estate agent, who was assuming to represent Dunbar, although in fact he had no authority whatever to do so. The party (Dunbar) for whom Smith was pretending to act and the party (plaintiff) from whom the money was being obtained, were not brought together. They did not meet, but the negotiations were wholly between Smith, the real estate agent, on the one side, and the plaintiff on the other. The making of loans in that manner was a common and ordinary practice in Salt Lake City. At the time of this transaction nothing had appeared against the character of Smith, the real estate agent, and the plaintiff followed an ordinary course of business men. He used ordinary care. No greater care was required of him. He made the check payable to Dunbar. The fact that he handed it to Smith to be delivered to Dunbar was not, under the circumstances, negligence on his part. We see no reason whatever to say that the general rule shall not apply in this case. The facts do not warrant us in saying that it is an exception thereto. In paying the money on the forged indorsement, the bank paid out its own money, not that of the drawer. The money of the drawer still remained in the bank subject to his order. (*Bank vs. Whitman*, 94 U. S., 347; *Bank vs. Morgan*, 117 U. S., 112; *Bank vs. Bank*, 91 N. Y., 111.)

It is further contended by the bank that the plaintiff was negligent in not discovering the forgery earlier than he did, that for such purpose he should have made an early and thorough examination of the pass-book and the returned checks. The Supreme Court of the United States in speaking upon this subject in the case of *Bank vs. Morgan*, 117 U. S., 107, said: "The drawer was not presumed to know the signature of the payee. His examination of the account would not necessarily have disclosed the forgery of the payee's name. Therefore his failure to discover that fact sooner than he did was not to be attributed to want of care." And again in the same case (page 117), the Court said: "As the depositor was not presumed to know, and as it did not appear that he in fact knew, the signature of the payee, it could not be said that he was guilty of negligence in not discovering, upon receiving his pass-book, the fact that his clerk, or some one else, had forged the payee's name in the indorsement."

In the case at bar there is nothing to show that the drawer knew the signature of the payee of the check, and, if not, an examination of the returned checks and the pass-book would not have disclosed to him the forgery. But the Supreme Court of the United States in the same case further said: "Of course if the defendant's officers, before paying the altered checks, could, by proper care and skill, have detected the forgeries, then it cannot receive a credit for the amount of those checks, even if the depositor omitted all examination of his account." The evidence clearly shows in the present case that the officers of the defendant, before paying the check could, with proper care, have discovered the forgery of the payee's name on the check. They had Dunbar's genuine signature in the bank, and accessible. From the evidence it is manifest that had they made a comparison between the genuine signature in their possession and the signature on the check, the forgery would have been detected. A simple inspection satisfied the Cashier of the forgery at a subsequent date and no doubt would have done so at the time the check was presented.

It is further said that the plaintiff was negligent in not tendering back to the bank the check immediately upon the discovery of the forgery, instead of waiting twenty-four days thereafter. The evidence shows that the plaintiff immediately, upon the same day that the forgery was discovered, went to the bank and notified it of the discovery of the forgery and that he would hold the bank responsible, and at the same time threatened suit, but at the request of the bank he delayed action. The bank having failed to pay, he, unwilling to longer delay, on the first of December made a formal offer of the check to the bank. If it was necessary for plaintiff to have tendered back the check, such tender within a reasonable time was sufficient. (*Cooke vs. United States*, 91 U. S., 402; *Schroeder vs. Harvey*, 75 Ill., 639; *Ellis vs. Trust Co.*, 4 Ohio St., 662; *Daniel Neg. Instr.*, Sec. 1,372.)

There cannot be said to have been an unreasonable delay in this case, as whatever delay occurred was attributable to the defendant itself. If however

the plaintiff was negligent in tendering back the check, the fact would not justify the bank in refusing to pay the money to the plaintiff until it should show some actual damage caused thereby. (U. S. *vs.* Bank, 6 Fed. Rep., 853; Bank *vs.* Bank, 91 N. Y., 110; Welch *vs.* Goodwin, 123 Mass., 71.) By the introduction of the evidence as to the solvency of Walker Brothers it was made clear that no damage could result to the defendant by reason of having lost its recourse, or the advantage of it. The introduction of that evidence was objected to as not upon any issue in the case. It was claimed that the defendant was injured by the negligence of the plaintiff in discovering the forgery and in notifying the bank. This evidence shows that they had lost nothing as to recourse upon the parties to whom the bank had paid the money. We do not see that the evidence was improper.

Judgment affirmed.

Brixen *vs.* Deseret National Bank, Supreme Court of Utah, February 18, 1888.

BANK AND DEPOSITOR—COLLECTION OF NOTE—DELIVERY TO AND COLLECTION BY TELLER—LIABILITY OF BANK TO DEPOSITOR WHERE PROCEEDS HAVE BEEN DEPOSITED BY TELLER IN HIS INDIVIDUAL ACCOUNT AND HE DIES A LARGE DEFAULTER TO THE BANK—THE AUTHORITY OF TELLER TO BIND BANK IN MAKING COLLECTION AND TO CHARGE IT WITH NOTICE OF DEPOSITOR'S OWNERSHIP CONSIDERED.

This was an action by D. C. Martin against the City National Bank of Fort Worth to recover the amount collected by defendant's teller, John Nichols, on a note made by Boaz & Battle.

John Nichols was the Receiving and Paying Teller, also a Director and Vice-President of the bank, and died insolvent on the 17th day of August, 1885, a defaulter to the bank in the sum of \$30,000. During the year 1884, and up to the time of Nichols' death, Martin was a customer of the bank, and in the month of December deposited with it the sum of \$1,800; Nichols receiving it for the bank. At the time of making this deposit, Martin requested Nichols to assist him in making a loan of this money. In January, 1885, Martin called at the bank and was informed by Nichols, who was then occupying his place as Teller, that he had loaned \$1,500 of the money, and at the same time exhibited to Martin a note for that amount, signed by Boaz & Battle, payable to John Nichols or order at the bank, indorsed by Nichols and others in blank. Martin directed Nichols to hold it for collection, the understanding of Martin being that Nichols was to hold the note in his capacity of agent of the bank. On the 27th of June Boaz & Battle called on Nichols at the bank, and gave him a check on the Traders' National Bank, payable to the order of the defendant bank, for the sum of \$1,588.50 in payment of this note and accrued interest. This check was paid to the bank on the 29th. Nichols received the check from Boaz & Battle and delivered their note to them. Nichols then made a deposit check in his own name for the amount of the check so secured, and caused the same to be entered on the books of the bank to his individual credit. The bank never accounted to Martin for this note, or the \$1,500 that Nichols claimed he had advanced of Martin's money for the note. After these transactions had occurred, Martin, not knowing of them, authorized Nichols to extend the time of the payment of the note till Fall, upon payment of the interest. Soon after this, Nichols represented to Martin that he had collected the interest, and extended the time of the payment of the note. Martin, upon the strength of these representations, drew several small drafts on the bank for the interest that he supposed had been collected on the note, which were paid by Nichols, and suppressed without being reported to the bank. No officer of the bank except Nichols was informed of any of these matters, and Martin did not discover that there were irregularities about the transactions until after the death of Nichols.

Upon this state of facts the district court rendered judgment in favor of Martin for the amount of the note and interest. The bank appealed.

Held, It is no part of the business of a bank to loan money for the public or for individuals; and, in the absence of proof that the defendant bank was

engaged in such business, it must be presumed that Nichols, in making the loan of Martin's money, was acting outside of the scope of his authority as agent of the bank, and no liability would attach to the bank for the act of Nichols in making the loan. In this case the complaint is not in reference to the making of the loan, but that the proceeds of the loan were appropriated by the bank to its own use after it had notice, through Nichols, that the money belonged to Martin.

It is insisted in the first place that there is no competent evidence that the note in controversy was the property of Martin; and in the second place it is insisted that, if the note was shown to belong to Martin, there is no evidence that the bank had notice of this fact, and that it had a right to apply the money in its possession to the credit of Nichols in payment of his defalcation.

The declarations of Nichols at the time he exhibited the note to Martin were not objected to, so far as the record shows; and it must be considered by this court that no objection was made in the court below, though it is claimed in the brief of counsel that there was; and any objection that could have been made to the admission of the evidence must be held to be waived. Parties have the right to object or not, as they may see fit, to the admission of testimony that may be offered during the progress of a trial. If they fail to do so, the testimony is to be weighed by the court or jury, and such probative force should be given to it as it may be entitled to. Any other rule would lead to great confusion and uncertainty in determining causes upon appeal. The question then is, was the evidence sufficient to satisfy a reasonable mind that the note was the property of Martin? Nichols certainly knew to whom the note belonged. It was payable to his own order and indorsed by himself in blank. The declarations of Nichols were corroborated by Boaz & Battle to the extent that, at the time the loan was made, Nichols stated to them that the money belonged to an outside party. So there can be no doubt of the sufficiency of the testimony on that point. The note about which the declaration was made then being in the possession of Nichols, and payable to his order, the presumption was that it belonged to him, and for that reason the declaration was against his interest when made, and, he having competent knowledge of the subject, and having been shown to be dead, the evidence was admissible on this ground. (1 Greenl. Ev., 198, §147.) At the time of these declarations the defendant bank had no interest in the subject-matter, but its claim attached long subsequent thereto.

It clearly appears from the testimony that Martin was the owner of the note, and that he delivered it to Nichols as agent of the bank for collection. It is objected that Nichols had no authority to receive the note for collection in behalf of the bank; his business as Teller being to receive and pay out money over the counter. Let it be conceded that the duties of a Teller, by the rules of banking, are thus limited. It was shown that Nichols on other occasions had made collections for the bank. But, if it had not been shown, it is a well-known fact that the collection of money for others is a part of the regular business of all banks; and when a bank opens its doors for business with the public, and places officers in charge, persons dealing with them in good faith, and without notice of any want of authority in such officer, and the act done is in the apparent scope of the officer's authority, whether the officer was actually clothed with such authority or not, the party so dealing would be protected. (Bank vs. Bank, 10 Wall, 550.) If a bank does not wish the public to deal with any particular one of its officers at its regular place of business in a particular line of that business, it would be its duty to so notify the public in some effectual way. The public certainly could not be expected to know, without being informed, that a person that was in the habit of daily receiving and paying out money in sums great and small had no authority to receive a note for collection, or receive the money for it when offered at the counter. It may be that no one except the bill collector was authorized to make collections in this bank, or to receive notes for collection. Still, it would be most unreasonable that an ignorant third party, who had acted in good faith, should suffer in consequence of this rule. At the time Nichols received

payment of the note in controversy, he was acting for the bank in the apparent scope of his authority, and knew, to an absolute certainty, that the money belonged to Martin, the knowledge of which, we think, under the circumstances, must be imputed to the bank. And, having held him out to the world as worthy of confidence, it would be monstrous to allow it to profit by the frauds that he was thus enabled to perpetrate. There is no doctrine of the law better settled than that a corporation or other person is liable for the frauds of its agents perpetrated in the scope or apparent scope of their authority. If the bank had received the money without being chargeable with notice that it belonged to Martin, it might have been entitled to hold it; but such is not the case, and we think the judgment should be affirmed.

City National Bank of Fort Worth vs. Martin, Supreme Court of Texas, May 8, 1888.

INDIVIDUAL LIABILITY OF STOCKHOLDERS TO DEPOSITORS OF THE GERMAN SAVINGS BANK OF CHICAGO UNDER THE CHARTER OF THAT INSTITUTION—THE STATUTE OF LIMITATIONS—DEPOSITOR HAS TEN YEARS WITHIN WHICH TO BRING ACTION.

Valentine Schalucky brought suit in the Superior Court of Cook County, Ill., against Marshall Field, as a stockholder in the German Savings Bank of Chicago, to recover the balance due upon certain amounts deposited by him in said bank. Judgment was rendered for defendant, which was affirmed on appeal to the Appellate Court of the First district, and plaintiff took the case to the Supreme Court of Illinois.

The provision in the bank's charter (being Section 9 of the Act of the Legislature of Illinois, incorporating the bank, to be found in Private Laws, 1869, vol. 3, p. 393), upon which the individual liability of the stockholders is founded, and upon which this suit was brought, is as follows: "When default shall be made in the payment of any debt or liability contracted by said corporation, the stockholders shall be held individually responsible for an amount equal to the amount of stock held by them respectively," etc.

This suit was begun on September 19, 1883, and an amended declaration was filed on December 26, 1883. The declaration averred that the defendant was on January 1, 1874, the owner of fifty shares of the stock of said bank, amounting to \$5,000, and that since July 1, 1887, the bank had been utterly insolvent, and that demand had been made on it, etc. The declaration also averred that plaintiff made a number of deposits of money in the bank between August 8, 1874, and July, 1877, and received a number of payments out of these deposits during that period, leaving a balance due him on July 1, 1877, upon which a payment of \$359.62 was subsequently made. It was further averred that the deposits and interest thereon were entered by the bank in a bank or pass-book issued by it to the plaintiff, wherein the bank, when such deposits were made, and the interest became due, made entries in writing, as evidence of its indebtedness to the plaintiff. The amount sued for was the balance shown to be due by the written entries in the pass-book. The defendant pleaded three pleas to the amended declaration: (1), *nil debet*; (2), that the cause of action did not accrue within two years next before the commencement of the suit; (3), that the cause of action did not accrue within five years next before the commencement of the suit.

The plaintiff joined issue on the first plea, and demurred to the second. He filed a replication to the third plea, setting up a payment to him on June 30, 1883, of \$359.62, by a Receiver of the bank, appointed in a chancery proceeding brought against the bank at the suit of certain creditors. This sum was the amount of a dividend of 70 per cent. upon plaintiff's claim declared in said proceeding and paid under the order of the Court. The defendant demurred to the replication. The cause was heard upon plaintiff's demurrer to the second plea, and upon defendant's demurrer to the replication to the third plea. The lower Court sustained both demurrers and rendered judgment in favor of the defendant for the costs. On appeal to the Supreme Court of Illinois,

Held, Even though the replication to the third plea be defective, yet the

demurrer must be carried back and sustained to the third plea, if the latter is defective. (Railroad Co. *vs.* Neill, 16 Ill., 269.)

The only matter, then, which is presented for our consideration is the validity of the third plea. The question to be determined is whether or not the cause of action in this suit is barred by the five years limitation of the statute. Section 15 of the limitation law provides that "actions on unwritten contracts, express or implied, * * * and all civil actions not otherwise provided for, shall be commenced within five years next after the cause of action accrued." Section 16 provides that "actions on bonds, promissory notes, bills of exchange, written leases, written contracts or other evidences of indebtedness in writing shall be commenced within ten years next after the cause of action accrued," etc. The period of ten years named in the latter section was sixteen years under the law of 1849, which was in force before July 1, 1872. In *Jasoy vs. Horn*, 64 Ill., 379, the action was *assumpsit* and the evidence of the indebtedness produced by the plaintiff was a depositor's bank book kept in the usual form. The bar of five years was pleaded, but it was held that the account evidenced by the bank book was not barred until the lapse of sixteen years after the cause of action accrued. In that case we said: "The entries in the book were made by the bankers, and they charged themselves with the money deposited. They constituted 'evidences of indebtedness in writing' within the meaning of the statute." Therefore as between plaintiff and the German Savings Bank, this action was not barred by reason of its not being brought within five years, but must be regarded as having been brought upon such an "evidence of indebtedness in writing" as would not be barred until after the lapse of ten years.

Does it make any difference that the action is against a stockholder and not against the bank itself? This Court has frequently held that an action at law by a single creditor will lie against any stockholder of an insolvent corporation to enforce an individual liability created by its charter. (*Culver vs. Bank*, 64 Ill., 528; *Corwith vs. Culver*, 69 Ill., 502; *Tibballs vs. Libby*, 87 Ill., 142; *Fuller vs. Ledden*, Id., 310; *Arenz vs. Weir*, 89 Ill., 25; *McCarthy vs. Lavasche*, Id., 270; *Buchanan vs. Meisser*, 105 Ill., 638; *Thompson vs. Meisser*, 108 Ill., 359.) In the last two cases the section of the charter of the People's Bank, of Belleville, under which suits were brought by creditors against Meisser as a stockholder, was exactly the same as Section 9 of the charter of the German Savings Bank above quoted. The stockholders, with respect to their personal liability under such a provision as Section 9, are in effect partners, and are liable as such to the creditors of the corporation, to an amount equal to the amount of stock held by them respectively. The stockholders in the German Savings Bank assumed a primary liability to the creditors to pay the indebtedness of the bank to the amounts stated in Section 9. When a debt was contracted by the bank the liability of those who were then stockholders, attached, and from that moment they became bound in the same manner and with like effect as if they had been doing business as partners unincorporated, except that the liability of each stockholder was limited to an amount equal to the amount of stock held by him. (*Fuller vs. Ledden*, *supra*; *Thompson vs. Meisser*, *supra*.) Inasmuch as the liability of the stockholders to the creditors is primary, and must be regarded as that of partners unincorporated, it follows that the stockholders occupy the same relation to the creditors as the bank does, so far as the statute of limitations is concerned. The stockholders owe the same debt to the depositor which the bank owes. He can be sued for that debt just as the bank may be sued and as soon as the bank may be sued. There is no reason why the remedy should be pursued within a shorter time in the one case than in the other. It is true that the entries in the pass-book are made by an officer of the bank, and not by the stockholder. But such officer, in making the written entries, acts as the agent and representative not only of the corporate entity known as the bank, but of the stockholders regarded as unincorporated partners. The written evidence of indebtedness is as binding upon the latter as upon the former. (*Wood, Lim.*, § 149; *Conklin vs. Furman*, 8 Abb. Pr. (N. S.), 161.) The liability of the stockholders "ends at the same time that liability on the part of the corpo-

ration ends" and not sooner. We are therefore of the opinion that this action against defendant was not subject to the bar of the statute of limitations until after the lapse of ten years according to the terms of Section 16, as above quoted. In the consideration of this case we have not been aided by any argument on behalf of defendant.

Judgment of Appellate and Superior Courts reversed.

Schalucky vs. Field, Supreme Court of Illinois, May 9, 1888.

PROMISSORY NOTE—LIABILITY OF SURETY—EXTENSION GIVEN WITHOUT HIS CONSENT DISCHARGES HIM—CONSTRUCTION OF CLAUSE IN NOTE THAT "ALL THE SIGNERS AGREE TO BE HOLDEN SHOULD THE TIME OF PAYMENT BE EXTENDED"—SUCH CLAUSE MEANS A REASONABLE EXTENSION FOR A DEFINITE TIME AND NOT AN INDEFINITE SERIES OF EXTENSIONS.

The Rochester Savings Bank brought suit against the makers upon the following promissory note:

<p>\$900.</p> <p>Six months after date, for value received, we jointly and severally promise to pay the Rochester Savings Bank nine hundred dollars. <i>All the signers agree to be holden should the time of payment be extended.</i></p>	<p>ROCHESTER, N. H., April 1, 1877.</p> <p>(Sg.) S. S. CHICK & Co., JOHN S. HAINES, JOHN B. CLARK.</p>
--	--

The defendant Clark, who was surety for Chick & Co., and was known to plaintiff to be such when it took the note, alone defended. He pleaded the general issue and the statute of limitations. The evidence showed that plaintiff, by agreement with Chick & Co., had extended the time of payment of the note eleven different times, for periods of from two to nine months each, the last of which expired April 1, 1886. These extensions were all made without the knowledge of Clark, and without his consent except that expressed in the note as above shown. The writ in the action was made and bore date January 18, 1887. On January 14, 1887, Clark, upon presentation of the note by the plaintiff's attorney, promised to pay it. The writ was served by attaching Clark's property on the 15th of January and was served upon Clark personally on January 20, 1887.

Held, The extension of the time of payment of the note by the plaintiff, by a valid and binding contract with the principal makers, and with knowledge that the defendant Clark signed the note as surety, had the effect of discharging Clark unless he assented to the extension. (*Bank vs. Woodward*, 5 N. H. 99, 105; *Wheat vs. Kendall*, 6 N. H. 504; *Watriss vs. Pierce*, 32 N. H. 560.)

The agreement between the plaintiff and defendants Chick & Co. for an extension of time, in the absence of anything in the case to the contrary, must be taken to be a valid agreement, and one upon a good consideration, and binding upon the parties making it. Such an agreement, made without the consent of the surety, Clark, was a discharge of him from further liability. Clark had no knowledge of any of the extensions and did not consent to any of them except by the agreement in the note. That agreement could not have been intended for an indefinite extension of the time of payment, nor for a series of extensions from time to time, indefinitely, so that the creditor and principal makers could, at their pleasure, always keep the surety liable, and forever prevent his enforcing payment against the principal, or using the statute of limitations as a defense. Such a construction of the agreement in the note with such consequences cannot be adopted without a clearly expressed intention to that effect in the agreement itself. The time of payment fixed upon in the note is six months, and the agreement "to be holden should the time of payment be extended," naturally, and by the ordinary force of language and taken in connection with the first part of the note, means a reasonable extension for a definite time, and not a series of extensions indefinite in number and endless in repetition. When the plaintiff, at the end of six months from the date of the note, extended the time of payment for a definite period of time, the extension was in accordance with the agreement of all parties; all

parties were bound by it, and the defendant Clark was not thereby discharged. But the agreement in the note was met and satisfied by such an extension. Any further extension, upon a valid consideration and binding upon the plaintiff, made without the consent of the surety, had the effect of discharging him.

Clark being discharged from liability as surety, his subsequent promise to pay the note, with no knowledge of the extension by which he was discharged nor of the circumstances under which the agreement for extension was made, did not have the effect to renew or re-establish his liability without a new and valid consideration. (*Bank vs. Colcord*, 15 N. H. 119, 125; *Edwards vs. Tandy*, 86 N. H., 540; *Norris vs. Ward*, 59 N. H., 487.)

The defendant Clark is entitled to judgment.

Rochester Savings Bank vs. Chick, et al, Supreme Court of New Hampshire, Strafford, March 16, 1888.

PROMISSORY NOTE EXECUTED FOR CERTIFICATE OF SCHOLARSHIP—BREACH OF COLLATERAL CONDITION—LIABILITY ON NOTE.

This was an action on a promissory note by the plaintiff, Ridgeville College, against the maker thereof, Alexander Wood. The note was executed by Wood for a perpetual scholarship in the college, and at the time of its execution the plaintiff issued to the defendant a certificate of scholarship and appended to it the following agreement: "The above-named note is to be returned if ten thousand dollars' worth of scholarships from No. 17 are not sold in Randolph and Jay counties within the next college year." Defendant pleaded the failure to obtain \$10,000 worth of scholarships as an absolute defense to the note, but did not return or offer to return the certificate issued to him. Judgment was given for plaintiff and defendant appealed.

Held, The note and the agreement having been executed at the same time, constitute one contract. (*Hickman vs. Rayl*, 55 Ind., 551; *Allen vs. Nofsinger*, 18 Ind., 494.) But while we agree with the defendant on this point, we cannot agree that he can defeat this action without returning, or offering to return, the certificate issued to him. Conceding, but not deciding, that the stipulation in the contract constitutes a condition, it is, if a condition at all, a condition subsequent, and not precedent. (*New Haven Co. vs. Hayden*, 107 Mass., 531.) The title to the perpetual scholarship passed to the defendant and he was entitled to make such use of it as he saw proper. It bound the college to furnish tuition for one scholar, and the only method in which the defendant could avoid his note was by an answer averring that he had not used the certificate, and had returned or tendered it to the plaintiff. In such a case as this, the consideration for the promise is the right to a scholarship, and this right the promisor may elect to avail himself of, and, if he does, he waives the condition. As he does not aver that he did not use the certificate, nor that he offered to return it, his answer is bad. It may, perhaps, be true that he might retain the certificate and recoup the damages, if any, caused by a failure to sell \$10,000 worth of certificates as agreed; but the answer before us presents no such question, for the failure to procure \$10,000 worth of certificates is pleaded as an absolute defense to the note.

Judgment affirmed.

Wood vs. Ridgeville College, Supreme Court of Indiana, April 10, 1888.

LOST NOTE—ACTION AT LAW THEREON—WHEN MAINTAINABLE.

The note upon which the plaintiff claimed to recover in the action at law was payable to his order and was lost soon after its execution, and a copy was made and proved in the case. The note had never been negotiated and had never been paid. There was no proof that the note had ever been destroyed. The only question for determination in the case before the appellate court was whether the plaintiff's remedy was at law, or whether he must go to equity.

Held, It is said that "the mere loss of an instrument will not be sufficient to give equity jurisdiction, but the party must show that he has no remedy, or no sufficient remedy, at law." The loss "must obstruct the right of the

plaintiff at law, or leave him exposed to undue peril in the future assertion of such right." (Bisp. Eq., §177.) The main object of the equitable jurisdiction seems to be that a recovery may be had, and at the same time the defendant may be indemnified against any possible liability growing out of the subsequent discovery of the lost instrument. (*Id.*) We have already held that an action at law may be maintained, and is the proper action, on a lost note not negotiable, or not negotiated. (*Lazelle vs. Lazelle*, 12 Vt., 448; *Hopkins vs. Adams*, 20 Vt., 407; *Hough vs. Burton*, Id. 455.)

In *Lazelle vs. Lazelle*, *supra*, it was decided that to defeat an action at law upon a note the defendant must show affirmatively that the note was negotiable, and had been actually negotiated, or that it was payable to bearer, so as to pass by delivery. In *Hopkins vs. Adams*, *supra*, the grounds of the equitable jurisdiction were exhaustively considered by Judge Redfield in the opinion, where he says that in the case of promissory notes "not negotiable, or not negotiated, where the loser may sue at law, the principal ground of the jurisdiction must be the necessity of discovery, and the accident, by which that, which the parties have constituted their contract, has become incapable of performing its destined office.

It remains only to consider whether the recent decision in *Adams vs. Edmunds*, 55 Vt., 352, is in conflict with the principle announced in the former decisions, and ought to govern this case. The note there was payable to bearer, and a note so payable, as remarked in *Lazelle vs. Lazelle*, passes by delivery. The consequence is that any finder might demand payment, and, against such liability to an unknown finder, the maker should be indemnified. But the maker is subjected to no such risk in the case of a lost note payable to order, and not negotiated; for, if ever found, it cannot be negotiated by any one,—not by the payee, for he has been paid; nor by a third party, for that would presuppose the commission of a forgery, which the law will not presume. Another consideration to be borne in mind in this connection is that the note in suit, being on demand, and the statutory period of sixty days having long since expired, is overdue; and any one into whose hands it might come, by finding or otherwise, would hold it subject to all the infirmities of such paper. He would take only the rights of his assignor and could not be a *bona fide* purchaser. We cannot see how the defendant will be subjected to any risk by the payment of this note, and so do not consider him entitled to indemnity; and as no other objection is urged of the law jurisdiction, we must hold that the action is well brought.

Judgment for plaintiff.

Clark vs. Snow, Supreme Court of Vermont, May 22, 1888.

ABSTRACT OF CASES.

NEGOTIABLE INSTRUMENT—EQUITABLE DEFENSE—AGREEMENT TO TRANSFER.

A payee in a promissory note who agreed with the maker, for a valuable consideration, to transfer such note to a third person named by him, cannot, after full performance by the maker, turn around and enforce the collection thereof against him, in violation of his contract. Such executed agreement is a valid equitable defense both against the payee and his assignee with notice.

Nunnemacher vs. Johnson, Supreme Court of Minnesota, May 11, 1888.

EXECUTION OF BOND TO SECURE ADVANCES—SURETY OR GUARANTOR—ALTERATION OF INSTRUMENT.

A person who executes a bond with another, as his surety, conditioned for the payment of moneys advanced to the principal by the obligee therein, is a surety, and not a mere guarantor, and is not entitled to notice of the acceptance of the bond by the obligee.

When a person executes a bond as surety, and leaves it with his principal for delivery to the obligee, and before doing so the former procures a person to attest the signature of the surety, who is not authorized to do so, such attestation is not an alteration of the instrument that impairs or affects its

value as an instrument of evidence in the hands of the obligee, because it was made before delivery.

Hall vs. Weaver, United States Circuit Court, D. Oregon, February 20, 1888.

NEGOTIABLE INSTRUMENT—LIABILITY OF PARTY SIGNING AS ADMINISTRATOR.

If an administratrix make, indorse, or accept negotiable paper, she is, *prima facie*, liable individually, even if she signed as administratrix, and the estate is not bound, and in this case a *prima facie* case is made against her as to her individual interest which she is called upon to meet.

Jones vs. Lamar, United States Circuit Court, S. D. Georgia, W. D., April 20, 1888.

PROMISSORY NOTE HELD BY BANK—INDORSEMENT BY CASHIER TO HIMSELF—VALIDITY.

A bank Cashier can transfer a promissory note, the property of the bank, by indorsement, to any party but himself without special authority (41 N. H., 24; 51 Id. 116, 121;) and if he indorses it to himself, the indorsement is voidable only, and will operate to pass the legal title until avoided by the bank (31 N. H., 70, 89; 185 Mass. 367, 376, 377.)

Preston vs. Cutter, Supreme Court of New Hampshire, March 16, 1868.

PROMISSORY NOTE—SIGNATURE BY "A. H., PRESIDENT"—PERSONAL LIABILITY.

A promissory note read "we promise to pay" and was signed "A. Hassett, President." The maker, Hassett, was sued personally thereon and he claimed that the instrument was the note of the Granger's Business Association, and did not bind him personally.

Held, by signing the note as he did, defendant made himself personally responsible for its payment. There is nothing on the face of the note to show that there was any principal back of the defendant. He signed his own name, and wholly failed to indicate, if he had a principal, who or what the principal was. The word "President" which he added to his name must therefore be regarded as a mere *descriptio personae*.

Hobson vs. Hassett, Supreme Court of California, May 19, 1868.

PROMISSORY NOTE—NEGOTIABILITY—STIPULATIONS FOR PAYMENT OF COUNSEL FEES, FOR DECLARING NOTE DUE, AND FOR PAYMENT WITH EXCHANGE ON NEW YORK, AS AFFECTING NEGOTIABILITY.

The negotiability of the note in suit depended upon the effect of three stipulations therein contained, *viz.*:

(1) For the payment of "all counsel fees and expenses in collecting this note, if it is sued or placed in the hands of counsel for collection."

(2) A provision whereby the payees were invested with "full power of declaring this note due, and take possession of said engine and saw-mill, at any time they may deem this note insecure, even before the maturity of the same."

(3) A promise to pay the amount named "with exchange on New York."

Held, So far as we are informed, we have no direct authority in this State as to the effect of either the first two stipulations inserted in a paper which is in form of a note. In *Bank vs. Gary*, 18 S. C. 287, it was intimated, though not decided, that an agreement to pay counsel fees would deprive a paper of its negotiability, because it imparted into the contract an element of uncertainty as to the amount agreed to be paid. So in *Wallace vs. Dyson*, 1 Speer, 127, and *Barnes vs. Gorman*, 9 Rich. Law, 297, obligations in the form of notes, promising to pay specified sums of money for the hire of slaves, and also to furnish clothing, pay taxes, etc., were held not to be promissory notes under the Statute of Anne, and, of course, therefore not negotiable. So also in *Read vs. McNulty*, 12 Rich. Law, 445, a promise in writing to pay a certain sum of money at a specified time "with current rate of exchange," was held not to be a promissory note, under the Statute of Anne, by reason of the uncertainty imparted into

the contract by the words quoted, as the rate of exchange was variable. It will be observed, however, that in the three cases last cited, the stipulations inserted rendered the amount payable at maturity of the paper uncertain; whereas, in the case under consideration, the only uncertainty as to amount arises after maturity, and after the paper would thereby lose its negotiability, and hence these cases are not precisely in point. But, inasmuch as the first requisite to the negotiability of the paper is that it should be a note, anything that would deprive it of that character must necessarily deprive it of any negotiability; and as a note must be an obligation for the payment of a certain sum of money, if the paper, in addition to an obligation to pay a specified sum of money, contains also an obligation to pay another undefined sum of money, even upon a contingency, that, it seems to us, will deprive it of the character of a note under the Statute of Anne. Accordingly, we find that, in several of the States, papers of this character, containing stipulations to pay counsel fees, have been held to lose thereby their negotiability, though there are some cases in other States in which a different view has been taken.* For cases holding that a stipulation to pay counsel fees destroys the negotiability of the paper, see *Bank vs. Larsen*, 60 Wis., 206; *Bank vs. Gay*, 68 Mo., 33; *Woods vs. North*, 84 Pa. St., 407; *Johnston vs. Speer*, 92 Pa. St., 227; and *Bank vs. Bynum*, 84 N. C., 24. *Contra*, see *Gaar vs. Banking Co.*, 11 Bush, 180, 21 Amer. Rep., 209, and cases cited in note.

As to the other stipulation whereby the payee is invested with authority to declare the so-called note due whenever it is deemed insecure, it seems to us clear that it is sufficient, not only to deprive the paper of its negotiability, but also of its character as a note; for it renders the time of payment altogether uncertain, and dependent only upon the option of the payee. (See *Bank vs. Bynum*, *supra*; *Glidden vs. Henry*, 104 Ind., 278; *Mahoney vs. Fitzpatrick*, 133 Mass., 151; *Woodbury vs. Roberts*, 59 Iowa, 343.)

If, however, there was any doubt as to the effect of either of these stipulations, there can be none as to the effect of the provision whereby the maker promises to pay the amount specified "with exchange on New York," which has been distinctly held in *Read vs. McNulty*, *supra*, to deprive the paper of its character of a note.

The paper upon which the action is founded is therefore not negotiable.

Carroll County Savings Bank vs. Strother, Supreme Court of South Carolina, April 19, 1888.

DEPOSIT OF FUNDS BY EXECUTOR IN BANK—AUTHORITY TO BENEFICIARY TO DRAW THEREON—DRAFTS BY BENEFICIARY AFTER DEATH OF EXECUTOR NOT RECOVERABLE BY RECEIVER OF BANK.

S, executor of W, deposited certain funds in the bank of S., belonging to the estate. S died, but previous to his death he gave to defendant, a beneficiary of said estate, permission to draw at her pleasure upon the fund so deposited, and the permission so given was unrevoked at the time of the death of S. After S died, defendant, acting under the permission drew out, as she had also done before such death, certain of the funds so on deposit, the bank honoring her checks therefor. The bank having subsequently failed, this action was brought by the Receiver for the benefit of the bank's creditors, to recover the sum drawn out by defendant after the death of the executor. The lower Court gave judgment for the Receiver holding that by the death of S the permission so given was revoked; and the sum in bank passed to the control of an administrator *de bonis non* whenever appointed, and until such appointment was in abeyance, and no one had a right to meddle with it; and therefore any payment made by the bank out of the fund, to the defendant, was void and without authority of law, and recoverable by the plaintiff. On appeal to the Supreme Court of North Carolina this judgment was reversed, and it is

Held, This fund so deposited, and showing the trust upon which it was held, or at least one-half of it, beyond which the defendant had not gone at the time of the death of the executor, in equity belonged to her, and was in this

* NOTE.—In the JOURNAL for December, 1887, at page 1,199, we review the decisions on both sides of this question.

indirect way paid to her by the executor and trustee, as it was meet should be done. Assuming that, upon strict legal principles, the money would be recoverable only by the personal representative of the depositor (or the administrator of the testator *de bonis non*, perhaps,) it is plain that a Court administering the rules that are recognized in equity, (as do our Courts as well under their present constitution,) would not permit a trust fund like this to be collected from the equitable owner and applied to the general indebtedness of an insolvent corporation. And if this were not permitted, still less could it, when it reached the hands of the rightful owner be taken from such owner to be misapplied and lost. The old action of *assumpsit* was, in some of its features, an equitable proceeding, and the promise upon which the action rests is implied and arises *ex aequo et bono*. (2 Greenl. Ev. § 102.) The equitable right of a holder of a bond, to whom it has been transferred and delivered unindorsed by the payee, in whose name suit has been brought and judgment recovered, to receive the money when collected, is decided in *Hoke vs. Carter*, 12 Iredl. 824, in which *Pearson, J.*, thus explains the relations between the parties: "The legal effect of the contract of sale and delivery of the bond was to constitute the testator an agent of Fleming (the obligee) to receive the money; but the money vested in the testator as legal owner the moment it was received, for the chose in action of which Fleming was the legal owner was extinguished by the act which he had authorized to be done, *viz.*, the reception of the money; and the money vested in the testator as legal owner by force of the contract of sale, which thereby became executed in the same way as if Fleming had himself received the money and handed it to the testator in execution of the contract." This ruling recognizes the right of an equitable owner of an unindorsed sealed security for the payment of money to take and hold the money paid under it against the claim of the legal owner of it, and such is very much the relation occupied by the defendant in the present controversy; and the defendant's position is strengthened by the new practice, which allows the party who is entitled to the money, and to receive it unconditionally, to assert the right in his or her own name in an action instituted to recover it. If the executor did not need the fund in process of administration, but was bound to pay it over to the *cestui que trust*, as would be his administrator in discharging the attached trusts, why should such *cestui que trust* be required to surrender it when voluntarily paid her by the officers of the bank, and use it for the benefit of the creditors of the latter?

And again, if it could not have been recovered by the defendant in an action prosecuted against the bank or the executor as trustee, yet it was in fact paid to her as the owner under no misapprehension of the facts; and no implied promise to return or to account for the money, except as a payment in part, can arise out of the transaction, and most unquestionably no right of action can accrue to the bank or to the Receiver, who is its representative. (*Devereux vs. Ins. Co.*, 98 N. C., 6.)

Bank of Statesville vs. Waddell, Supreme Court of North Carolina, May 14, 1888.

LAW NOTES AND COMMENTS.

PERSONAL LIABILITY OF DIRECTORS TO DEPOSITORS FOR FALSE REPRESENTATIONS IN CASE OF INSOLVENCY OF BANK.—A case of more than ordinary interest has been decided by the Supreme Court of Texas growing out of the failure of the City Bank of Houston, with reference to the liability of the Directors of that institution, at the suit of a depositor for damages, where the depositor has been induced to place his money with the bank by false representations as to its solvency, made by such Directors. The opinion of the court, as in many other cases of importance, is too lengthy to be given in full, and we must be content with a summary, which will furnish the gist of the decision. The action was by A. B. Seale, a depositor in the City Bank of Houston, against the Directors for damages growing out of deceit and breach of trust on their part. (*Seale vs. Baker, et al.*, Supreme Court of Texas, March 30, 1888.) The action was commenced in the District Court of Harris County and that court sustained general demurrers to Seale's petition and dismissed

the suit. The Supreme Court of Texas, however, reverses the judgment of the court below, and holds that upon the facts alleged in the petition, if true, the Directors are personally liable. The court, for the purpose of conciseness and simplicity, formulated the questions involved in the appeal as follows :

1. Are the Directors of a banking corporation personally liable, at the suit of an individual depositor, for damages sustained by reason of the insolvency of the corporation, when the depositor is induced to place money in the hands of the corporation solely by representations of solvency made to the general public by the Directors, who ought to have known, and by the use of ordinary care, such as it was their duty to have exercised, might have known that such representations were false ?

2. Are such Directors so liable to such depositor when such false representations are knowingly made with intent to defraud the public generally ?

3. Are such Directors so liable when such false representations are made in pursuance of a fraudulent combination and common design upon their part to give to the corporation a fictitious credit, that the business might be continued for the purpose of enabling such Directors to collect certain pretended loans claimed to have been made by them to the corporation ?

The court states that it has made a more than ordinarily careful investigation of the above questions, and the conclusion is reached that each and all of them must be answered affirmatively. It will thus be seen that the directors are held liable for false representations, not only where such representations have been made *knowingly with intent to defraud*, but also in cases, without regard to actual knowledge or fraudulent intent, where the directors "*ought to have known, and by the use of ordinary care might have known, that such representations were false.*"

An extended quotation of authorities is given in the opinion in support of the conclusions reached. Speaking generally of the position, duties, and liabilities of bank directors, the court says :

"Directors of banking corporations occupy one of the most important and responsible of all business relations to the general public. By accepting the position, and holding themselves out to the public as such, they assume that they will supervise and give direction to the affairs of the corporation, and impliedly contract with those who deal with it that its affairs shall be conducted with prudence and good faith. They have important duties to perform towards its creditors, customers, and stockholders, all of whom have the right to expect that these duties will be performed with diligence and fidelity, and that the capital of the corporation will thus be protected against misappropriation and diversion from the legitimate purposes of the corporation. Customers are invited to business relations, and are induced to accept and act upon such invitation, by the representations that the institution is solvent and owns a certain amount of capital, and that this capital is under the supervision and control of certain directors. It is the duty of directors to know the condition of the corporation whose affairs they voluntarily assume to control, and they are presumed to know that which it is their duty to know, and which they have the means of knowing. If the representations are false, but relied and acted on by a customer to his damage, to hold that in such case the directors who made such false representations are not liable because they were ignorant of the falsity of the representations would be to award a premium for negligence in the performance of important and almost sacred duties voluntarily assumed, and to license fraud and deception of the most flagrant and pernicious character. It is a familiar principle of law that an action for damages lies against a party for making false and fraudulent representations whereby another is induced to do an act from which he sustains damage. If the representations are untrue, it is immaterial that they may have been made without fraudulent intent, and it is sufficient that they were made to the general public if the depositor was induced thereby to deposit money in the bank. We think it can make no difference as to their liability that they made the representations as directors of the corporation."

In the case as presented by the petition, the false representations consisted in the publication by the Directors in the *Houston Daily Post*, the Houston City

Directory, upon conspicuous sign-boards exposed to the public at and near the place of business of the bank, and upon printed letter-heads, circulated among correspondents of the bank, of statements and representations in substance that the bank had a capital of \$500,000, was in sound financial condition, fully solvent and wholly reliable, and well deserving of public confidence.

It is for the falsity of these statements by directors who, if they did not know, might and should have known the true condition of the bank, that such directors are held personally liable to a party who relied thereon to his detriment, providing the facts set forth in the petition are proved.

REPLIES TO LAW AND BANKING QUESTIONS.

Questions in Banking Law—submitted by subscribers—which may be of sufficient general interest to warrant publication will be answered in this Department.

A reasonable charge is made for Special Replies asked for by correspondents—to be sent promptly by mail. See advertisement on another page.

Editor Rhodes' Journal of Banking:

SAN FRANCISCO, July 14, 1888.

SIR:—A check is presented for payment drawn to the order of the "Western Milling Co." and endorsed "J. Smith, Sec'y." Smith is known to us to be the Secretary of the concern, and as such, authorized to indorse for it.

Is the endorsement correct, and will it bind the corporation without the addition of its name.

SUBSCRIBER.

Answer.—The endorsement is sufficient to bind the corporation.

Editor Rhodes' Journal of Banking:

ST. LOUIS, Mo., July 5, 1888.

SIR:—A note is made payable to the order of James Brown and Walter Roberts. Brown and Roberts are partners and do business under the name of James Brown & Co. Is an endorsement of the firm name by one partner sufficient, or must each partner indorse individually?

BANKER.

Answer.—It has been held that a note payable to partners individually may be endorsed over by using the firm name.

Mick vs. Howard, 1 Ind., 250.

Dudley vs. Littlefield, 21 Me., 418.

Editor Rhodes' Journal of Banking:

BUFFALO, Wyoming, June 19, 1888.

SIR:—Will you kindly give an answer in the JOURNAL to the following questions:

1.—In the case of a "joint and several note," the first signer is presumably the one for whom the money is borrowed; the second is, an accommodation signer—probably.

Is it necessary to protest the note to hold the second signer? Of course, in the majority of cases, the bank can at least infer from the manner in which the application is made that one of the parties signs merely as security. Does such knowledge compel them to protest the note, or are both signers equally held unless the bank is formally notified that one of them is surety? It has never been customary to protest such notes in this Territory, but the question has come up for discussion several times lately.

2.—If the bank acts on the hypothesis that the signers are joint-makers, is it necessary to notify both parties in order to preserve that hypothesis?

W. J. THORN, Cashier.

Answer.—Even assuming that the bank holding the note has actual knowledge that the second signer is a surety, or an accommodation maker, no protest is necessary under the law-merchant to preserve his liability in either case, and there is no legislation in the Territory which requires it.

Editor Rhodes' Journal of Banking:

DETROIT, Mich., July 16, 1888.

SIR:—A note is made payable "on or before" a certain date. Do the words quoted make it non-negotiable, and can the party holding the note demand payment before the date specified?

SUBSCRIBER.

Answer.—It has been held in Michigan that a promise to pay "on or before" a day named, states the time for payment with sufficient certainty for the

purposes of a promissory note; and consequently these words do not deprive it of its negotiability.

The holder of such a note cannot require payment before the date specified. A note so drawn is due on the day named, and not before. The maker may pay it sooner, if he chooses, but there is no legal liability on his part so to do.

See *Mattison vs. Marks*, 81 Mich., 421.

Editor Rhodes' Journal of Banking:

OIL CITY, Pa., July 21, 1888.

SIR:—Will you kindly favor us with replies to the following questions in an early number of the JOURNAL:

1. Is a check dated on Sunday a valid voucher against the maker?
 2. Is it proper to protest a check refused by reason of improper filling in the amount? as, for example, the body of a check reading "Pay John Smith or order two sixty-one 19-100 dollars," while the figures show "\$261.19"—the paying bank admitting plenty of funds to pay \$261.19, or four times as much. F. W. MITCHELL & Co.

Answer.—1. It is valid, if delivered on another day.

2. Protest, or whatever steps may be necessary to preserve the liability of prior parties, should be made or taken on such a refusal to pay.

Editor Rhodes' Journal of Banking:

PHILADELPHIA, July 20, 1888.

SIR:—Would a check on a bank, certified by the bank, be a legal-tender in payment of debt?

W. B.

Answer.—Not if objected to.

Editor Rhodes' Journal of Banking:

SOUTH BEND, Ind., June 28, 1888.

SIR:—Would the enclosed note draw six per cent. interest from date or maturity?

\$100.

SOUTH BEND, Ind., June 28, 1888.

Six months after date I promise to pay to the order of John Doe one hundred dollars, payable at the South Bend National Bank, for value received, without any relief whatever for valuation or appraisal laws, with interest from until paid, at the rate of per cent. per annum, payable annually, and attorney's fees.

RICHARD BOE.

MYRON CAMPBELL, *Ass't Cashier.*

Answer.—The language of the note as to the payment of interest is incomplete and ambiguous, by reason of the omission to either fill the blanks or to erase the whole clause with reference to the interest. It is therefore a case where parol evidence would be admissible, in any suit on the instrument, to show the true intention of the parties.

In the May number of the JOURNAL at page 461, in reply to a question whether a note "payable with interest at — per cent." bore interest, we answered that we thought it did, and that the omission to designate a rate was not sufficient to nullify the whole clause as to the interest. We find no legal decision, however, to back up the opinion thus expressed, and a more proper answer would have been one similar to that given above, *viz.*: that where the contract of the parties contains such an ambiguity, parol evidence would be admissible to supply the defect and show the true intention, whether it be interest or no interest.

Editor Rhodes' Journal of Banking:

SALINA, Kans., July 20th, 1888.

SIR:—Your decision in the "double protest" case has been carefully read in July JOURNAL.

1.—We neglected to state that when the draft was presented by our messenger for acceptance, and also by our notary, that the party was out of the City, and that his clerk who was in charge of the office said he had no authority to accept the draft, and under those circumstances we felt bound to hold draft until maturity.

If the party had been at home and absolutely refused either to pay or accept the draft, we should have returned protested to the Bank of Dighton, requesting them to return promptly if they wanted draft also protested for *non-payment*.

2.—If your decision is against us, on the ground that we should have construed our instructions to protest for *non-payment only*, please inform us how we could have

protested an item for non-payment before its maturity? The draft was drawn at so many days' sight, and *maturity* must first be determined by its proper presentation.

3.—If acceptance had been declined and we had returned protested for non-acceptance, that would certainly have been contrary to our instructions to protest for non-payment only. As the date of payment *must* be determined by its presentation we cannot but understand that the instructions also implied that it should go through the ordinary business course of presentation for non-acceptance as well as for non-payment.

4.—Don't you think that we would have made ourselves liable not to have held draft until day of payment and made a legal protest for non-payment when we had positive instructions to *protest for non-payment*?

5.—Would you have advised us to protest for non-acceptance only?

6.—Will you kindly inform us whether we should not have made a double protest if the instructions had simply been "subject to protest?"

7.—This item having been refused only a few days before, they return same to us to "*Protest if not paid.*" Our natural construction of these instructions was that they had some special reasons for protest of this particular item—not that they wished to waive protest for non-acceptance.

SUBSCRIBER.

Answer.—The question and reply published in the July JOURNAL were substantially as follows:

Our correspondent had received a one-day sight draft for collection with instructions to "*Protest and return if not paid.*" Acceptance having been refused the draft was protested for non-acceptance, and notice thereof given to the transmitting bank. No word having been received from the latter, the draft was, four days later, again presented for payment, and a second protest made for non-payment. The transmitting bank thought that a double protest should not have been made, and the question referred to us was whether our correspondent was entitled to receive the notarial fees on the second protest.

Our reply was, in brief, that after a refusal to accept a bill it is then dishonored and it is unnecessary to present it afterwards for payment. This being so, the second protest was unnecessary and the collecting bank could not charge the notarial fees thereon to the holder unless it had been specially instructed to hold after non-acceptance and present again for payment. In this connection we considered whether the words "*Protest and return if not paid*" implied such a direction, and came to the conclusion that they did not, saying: "*To us this language would seem to be simply an instruction that the bill should be protested and returned if dishonored, and in such case the second protest should not have been made.*"

To this reply our correspondent takes issue, and the statements and questions contained in his communication will be considered in the order presented.

1.—The fact here stated that when the draft was presented for acceptance the drawee was out of the city, and his clerk had no authority to accept the draft for him, adds a new feature to the question as previously put. The inquiry published in our last number contained the statement that "*acceptance was refused*" which implied that the draft had been presented to the drawee and he had refused to accept it. Upon this we stated that after acceptance had been refused, it was unnecessary to subsequently present for payment and protest again for non-payment. Under the facts as now presented it is very doubtful whether there was such a refusal to accept when first presented as would authorize a protest for non-acceptance. Mr. Daniel, at § 931 of his work on Negotiable Instruments says: "*But absence from home or place of business, without leaving any one to accept a bill, is not a refusal to accept, for the drawee may not be aware that the bill is drawn, and is not bound (in the absence of a promise to accept) to be prepared for its presentation.*" (Citing *Bank of Washington vs. Triplett*, 1 Pet. 25.)

Under this, the first protest for non-acceptance was probably unauthorized so that the first refusal to pay or accept which called for a protest was when the draft was presented to the drawee in person four days later and by him refused; and taking this view of the case, only the fees for the second protest could be claimed. If, however, there was a valid refusal to accept when first presented, then, as stated in our former answer, it was not necessary to present

it again for payment and protest it separately for non-payment, unless the transmitting bank specially instructed our correspondent to hold after non-acceptance and present again for payment; and, as there stated, we do not think the words "protest and return if not paid" implied such an instruction or authorized a double protest.

2.—Of course a draft drawn at so many days sight must be first presented for acceptance to fix the date of its maturity. When so presented, however, and acceptance is refused, the law holds it unnecessary to wait until its maturity and again present for payment, but regards the draft as dishonored at the time of the refusal to accept. Our correspondent says, "If your decision is against us on the ground that we should have construed our instructions to protest for non-payment only, please inform us how we could have protested an item for non-payment before its maturity?"

Our opinion was not based on the ground that the protest should have been for "non-payment only." It was based on the ground that when a sight draft is refused acceptance it is dishonored, and a protest for non-acceptance is sufficient without a second presentment and protest for non-payment; and that "protest and return if not paid" meant nothing more than "protest and return if dishonored." Our correspondent could not protest the item for non-payment before its maturity, nor was it necessary to protest it for non-payment at all after acceptance had been refused.

3. We do not agree with our correspondent that if the draft had been returned protested for non-acceptance, such return would have been contrary to instructions. The instructions were to "protest and return if not paid;" not "protest for non-payment only." When a draft is presented and acceptance is refused, it necessarily follows that the drawee not only declines to accept, but does not intend to pay; and though the draft, if accepted, would not be payable until a future day, yet where acceptance is refused, the holder is not obliged to wait until the day of actual maturity, but the draft may be treated at once as dishonored and the holder may immediately proceed to enforce his rights thereunder. In the absence then of any positive instructions to make a second presentment and protest, it must be inferred that the transmitting bank when it instructed that the draft should be protested and returned if not paid meant simply that on a refusal by the drawee to honor the collecting bank should cause it to be protested and returned.

4.—No.

5.—Yes.

6.—No.

7.—The transmitting bank simply wanted a protest made and draft returned when dishonored. That dishonor occurred when the drawee refused to accept. They said "protest and return if not paid," but they certainly did not intend to incur the expense of two protests on a fifty-dollar draft, when the single protest for non-acceptance would furnish the holder all the evidence of dishonor.

The foregoing replies (after No. 1) have all proceeded on the supposition that acceptance of the draft was refused by the drawee when first presented, as the questions are framed on that supposition, and the original answer was grounded thereon. In case, however, there was not such a presentment or refusal to accept by the drawee when first presented as to authorize a protest, then when presented to him four days afterwards, it was his first sight thereof, and his refusal to accept or pay then made was the first act on his part to authorize a protest. If this theory is correct there has been only one presentment to him and one valid protest.

In either view of the question, therefore, we do not see how our correspondent is entitled to charge but one protest fee in the matter.

Mortgages and Crop Outlook.—A resident of Osage, Iowa, writes that the farmers of that State have mortgaged their property up to fully 40 per cent. of its full value, and that the greater part of this money has come from New England. They all feel woefully poor, but are at the present time greatly encouraged by the excellent outlook of the crops. If present indications are fulfilled, the Iowa farmers will have one of the best years ever known.

THE THREE SQUIRRELS.

England is celebrated for its quaint institutions. Something over two hundred years ago there was founded in London a banking house which boasted the queer title of the "Three Squirrels." It was famous in its day and the names of many prominent personages are recorded in its books. A correspondent of the *Journal of the Institute of Bankers*, London, furnishes the following interesting data, from which we make liberal extracts:

"Can any of your readers supply me with references to this old Fleet Street banking house? Those of an early date would be especially acceptable. The Gosling family became connected with banking at the "Three Squirrels" in 1742, when Sir Francis Gosling joined Thomas Ward in partnership. The firm then became, for a short time, Ward & Gosling. Previously it had stood as follows, *viz.*: Simpson & Ward (1737-1742); Fowler & Simpson (1734-1737); Fowler, Roocke & Simpson (1728-1734); Fowler & Roocke (1723-1728); Nicholls & Fowler (1720-1722); Wanley & Cradock (1717-1719). George Cradock appears to have died in 1719, and his partner, George Wanley, according to the settlements* in the ledgers, conducted the business for a short time in his sole name. It does not appear that the ledgers have been preserved beyond 1717, but down from that time they are intact, and from the earlier of these we learn (from the settlements alluded to above) that certain notes were outstanding in the name of James Chambers & Co. But to return for a moment to Nicholls & Fowler. Mr. Hilton Price, in his "Hand Book of London Bankers," mentions this firm as having been in existence from 1713 to 1720. Thus it would appear that they were co-existent with James Chambers & Co., but their place of business previously to their coming to the "Three Squirrels" is not known. It may, however, be mentioned that amongst a great number of old cheques discovered about two years ago, which revealed the names of Messrs. Gosling's predecessors, and led to this enquiry, was one addressed to Mr. Abraham Fowler, at the "Golden Key," near Temple Bar. Perhaps some of the readers of the *Journal* can give some information about this old sign and its connections.

George Wanley married Dorothy, sister of James Chambers, who retired from business some years before his decease, which occurred in 1733.

The business of Chambers & Usborne was not carried on at the "Three Squirrels," as has been stated, although they were related to the several families of Chambers, Wanley, and Nicholls.

James Chambers was a bachelor; he had, however, a great number of relatives, as appears from his will. Their names, and those of their descendants, can be traced in the accounts for a considerable period, but if there are any now existing the connection has been lost sight of.

In 1717 the account of the executors of Mrs. Esther Chambers receives the rent of the "Three Squirrels," and is also charged with the payment of the ground rent to Mrs. Elizabeth Thorold, less a small sum which had to be paid to the poor of the parishes of St. Dunstan's in the West, and Eccleston and Croston in Lancashire, bequeathed by one Walter Meredith, the codicil of whose will bears date 1603.

There is reason to believe that James Chambers succeeded Abraham Chambers—a family name of some antiquity. It is not unlikely that this family migrated from the neighborhood of Lombard Street.

From an advertisement in the *London Gazette*, we find that Mr. Chambers was at the "Three Squirrels" in 1684. He was probably the successor to the Pinckneys, who, as a family of goldsmiths, established themselves in the neighborhood of Temple Bar

* The following is a copy of the old form of settling accounts between a banker and customer:

"Then this account was stated between myself and Geo. Wanley and George Cradock, and upon the balance they owe me Seven hundred and seventy-seven pounds 5, 6/4, for which I have their note payable on demand. (Signed) RICH'D SLEECH,

(of Windsor).
(Signed) WANLEY & CRADOCK."

during the middle of the seventeenth century. The patronymic Abraham, in the case of the Chambers family, and Philip, in that of the Pinokneys, makes it a little difficult to trace relationships.

From a list of goldsmiths, we learn that Mr. Pinokney was at the "Three Squirrels" in 1650; we also know that the premises were destroyed in the great fire of 1666. At that time they were held, by Major Henry Pinokney, as he was sometimes called, from Thomas Thorold, on lease dated 1663. From the survey of the ground staked out after the fire, we learn that Mr. Morrice Wait, of "Ye Lute," and Mr. Green were his neighbors on the east, and that Mr. Graham held four houses on the west side. Mr. Thorold, to encourage his tenant to re-build, included the ground previously occupied by the adjoining house, known as the "Holy Lamb," which, at the time of the fire, had been in the occupation of Thomas Langridge.

Henry Pinokney died about 1678, leaving his business to his brother William, who was also a goldsmith, carrying on business at the "Golden Dragon." It may be here mentioned that the ground occupied by the present bank includes, in addition to that of the "Golden Dragon," "The Crown," "The Wheatsheaf," "The Three Daggers," and the "Gun" in Hand Alley, otherwise Hercules Pillars Alley. Stow, in his *Survey*, describes Hercules Pillars as "but narrow, and altogether inhabited by such as keep public houses for entertainment, for which it is noted."

William Pinokney died about 1680, leaving his business to his widow, Sarah, who appears to have died the following year. Whether or not it passed into the hands of their nephew, Philip, we cannot determine. Each of the Pinokneys above-named refer, in their wills, to one Philip or more. Henry left a small legacy to a brother of that name in New England. William mentions Philip, his nephew, "who now lives with me." In 1704 we find his name as of the "Sun" without Temple Bar, but after that date the name disappears from the neighborhood. The Salisbury bankers do not, it is believed, claim to be connected with the family formerly at Fleet Street. There may, however, be a connection between the Shrewsbury bankers, Roche, Eyton & Co., and the James Roche alluded to above, as his brother Richard's drafts are drawn thence; and, further, there are members of the Eyton family keeping banking accounts with Messrs. Goslings & Sharpe at the present time, which lends color to the probability. The facts here recorded relate to a period between 1650 and 1742."

New Counterfeits.—The Secret Service Division of the United States Treasury Department reports the following new counterfeits:

Counterfeit \$5 Silver Certificate.—It is of department series, 1886, letter D, has the appearance of a lithograph, and the engraving is very coarse and scratchy. The face of Grant is almost devoid of expression, and has a small lump at the end of the nose, on the right side of face, instead of a wrinkle as appears in the genuine. The words "This certificate is receivable for customs, taxes, and all public dues" printed near the top, in border of back are scarcely discernible and hard to decipher, while on the genuine they are clearly cut and easily read. The back of the note has a blurred appearance, and should be easily detected. There are no parallel silk threads in the note.

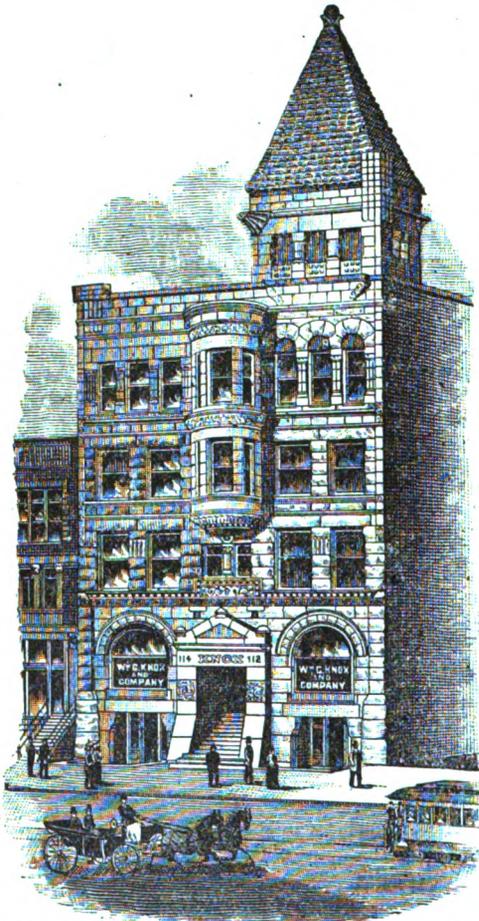

Counterfeit \$1 Silver Certificate.—It is of department series, 1886, letter D. The general appearance of the note is very good. The vignette of Martha Washington is very coarse and scratchy. The words "United States" have the appearance of being a wood-cut production, and the shading is very coarse. The back of the note, at first glance, looks remarkably well, but upon inspection, numerous defects in the lathe work can be discovered. There are no parallel silk threads in the note. The seal is very pale.

The above counterfeit notes have recently made their appearance in the East.

The Abbott Automatic Check Perforator.—By reference to their advertisement in another part of the JOURNAL, it will be seen that the manufacturers of this useful machine have changed its name which will hereafter be known as the *Check Perforator* instead of *Protector*. Apropos of this, the following extract from a recent letter of F. H. Kilbourn, Secretary and Treasurer of the Abbott Machine Company is not only timely but illustrates, forcibly, the value of the JOURNAL as an advertising medium: "We have already received many inquiries from the patrons of your JOURNAL and we believe our advertisement will do us much good."

THE
UNITED STATES SAVINGS BANK,
 Topeka, Kansas.

(NOW ORGANIZING.)

*In course of erection by Wm. C. Knox & Co., Negotiators of
 Real Estate Mortgages and Investment Brokers.*

capital, \$500,000.00, shares \$100 each. They intend that this bank shall be their successor, absorbing their entire mortgage and savings department business. The

UPON this page is presented to our readers a cut of a handsome office block now being erected by Wm. C. KNOX & Co. at Nos. 112 and 114 W. Sixth Avenue, Topeka, Kansas. These gentlemen are now organizing the UNITED STATES SAVINGS BANK, which will occupy a portion of the building. During the past few years their loan business has grown to such proportions that a capital of \$100,000 is not sufficient to handle it to the best advantage. They have for some time had a savings department, which is also in a flourishing condition and needs better facilities for expansion.

Topeka now has a population of 50,000. A strong savings bank there, besides obtaining a large local business, would doubtless supply a pressing need throughout Kansas and the adjoining States by furnishing a savings headquarters where the very large number of mortgagors can make accumulations drawing interest to offset interest upon their mortgages, and to pay them at maturity. Wm. C. KNOX & Co. have filed a charter for the UNITED STATES SAVINGS BANK

Wm. C. Knox Guaranteed Eight Per Cent. Investment Company is interested in real estate only, and its affairs will remain in the hands of Wm. C. KNOX & Co. Their mortgage loan business can be handled much more profitably with more capital, and in this way the somewhat unusually large capital of a bank of this character can be very profitably employed.

Another feature of the bank will be the issuance of long time Certificates of Deposit drawing from five per cent. to six per cent. interest, payable semi-annually. It is believed that a strong savings bank in the capital of Kansas can better afford to pay from one per cent. to two per cent. more on deposits than institutions of like character in the Eastern States. Doing a mortgage loan business, the bank will get the ruling rates of interest in the West, and the ordinary loan commissions in addition. This institution will also be able to command larger amounts of cheaper money than private firms. A large block of the capital stock will be taken by members of the firm of Wm. C. KNOX & Co. and others of their friends, and the balance placed among their friends and customers in the Eastern States.

They are now organizing and hope to be ready for business by the first of October next. They have a rich field in which to operate, a large and prosperous business to start with, and the prospective officers have large experience in the mortgage loan and savings business, to which the operations of the bank will be confined. A prominent feature of the bank will be the negotiation of Western mortgages for similar institutions and private investors further East.

Persons desiring to obtain some stock in the bank can address the above firm for any further information desired. Bank stock is considered an investment of the highest standard, and opportunities to obtain it at par, with a prospective rapid advance in value, do not often occur. They submit the following list of references, who, from experience, will indorse their financial standing and business methods:

CHASE NATIONAL BANK, New York City.

FRANCIS HEERMANS, Cashier Bank of Kingwood, Kingwood, W. Va.

GRANT GREEN, Cashier Farmers' Bank, Frankfort, Kentucky.

A. H. WILCOX, Wilcox Specific Medicine Co., 238 S. Eighth St., Philadelphia, Pa.

GEORGE M. BLAKE, Lawyer, Rockford, Ill.

Rev. L. M. GATES, A. M., Lena, Stephenson Co., Ill.

Rev. L. D. WHITE, Utica, N. Y.

Rev. M. F. MCKIRAHAN, Topeka, Kansas.

Hon. JOHN MARTIN, Topeka, Kansas.

GEORGE B. PHELPS, Director Jefferson County Savings Bank, Watertown, N. Y.

JOHN J. REDMOND, 326 E. 114th Street, New York City.

Rev. J. C. HAMMOND, 55 Ninth Street, Pittsburgh, Pa.

Rev. C. F. BURDICK, Jonesville, N. Y.

J. N. SHERWOOD, 740 E. 142d Street, New York City.

HIRAM PATCH, President Francestown Savings Bank, Francestown, N. H.

These well-known names give ample recommendation—should any be needed—to those who are unacquainted with the firm of Wm. C. KNOX & Co., and at the same time they furnish an indication that the new enterprise will be a success.

Meets His Approbation.—C. M. Sprague, Cashier of the First National Bank, Sauk Centre, Minn., under date of July 6th, writes: "I am very much pleased with the JOURNAL. Have had it since we commenced banking and would not do without it. Send us the DIRECTORY, also."

DE LESSEPS' PET PROJECT.

LAW AUTHORIZING PANAMA CANAL CO. TO ISSUE LOTTERY BONDS.

Readers of the JOURNAL will remember the recent attempt of the Panama Canal Company to raise enough additional money to ensure the completion of its canal by means of the Lottery Bond scheme. We are indebted to the Hon. S. T. Merrill of Beloit, Wisconsin, for the following literal translation of the bill as it passed the French Assembly and which subsequently became a law. We believe it has never before been published in English in this country; and it is interesting as showing the curious devices which De Lesseps employed to secure money for his pet project:

ARTICLE I.—The Panama Canal Co. is hereby authorized to make a loan not exceeding 600 million francs, and to issue bonds therefor, payable with prizes by drawing on the following conditions:

- 1st. The bonds must bear interest at a rate not less than three per cent.
- 2d. The total amount of prizes shall not in any case exceed 1 per cent. of the loan.
- 3d. The par or nominal value of each bond shall not be less than 300 francs—fractional divisions forbidden.
- 4th. The maximum time for the bonds to run shall be 99 years, and the payment of the loan with the prizes shall be guaranteed by a deposit, sufficient for the purpose, with a trust company of Government bonds (Rentee) or bonds guaranteed by the French Government. And in order to meet this obligation thus imposed the Panama Canal Co. is authorized to increase the aforesaid loan of 600 million francs by an amount sufficient to create the necessary guaranty fund; said increase, however, shall not exceed 20 per cent. of the loan made.

ARTICLE II.—If the said Company shall hereafter determine to convert any or all its old bonds the provisions of article 1st shall be applicable to the new bonds created by such conversion.

ARTICLE III.—All machinery and tools necessary for the accomplishment of the work shall be made in France, and the raw materials therefor shall be of French production.

ARTICLE IV.—Every prospectus, handbill, publication or other advertising document shall bear in letters of the same size as those employed to announce the loan, and immediately under the same the following notice:

“Loan authorized, conformably to the requirements of the law of May 31st, 1856, by law of June 8th, 1858, but without any guaranty or responsibility of the Government.”

The same notice shall be inscribed at the head of all bonds, provisional or definite, issued.

A simple order of the Minister of Finance shall suffice to make void this law in case of any infraction of its requirement.

The present law enacted by the Senate and Chamber of Deputies will be executed as the law of the State.

Done at Paris, June 8th, 1888. (Signed.) CARNOT, *President of the Republic.*
PETRAL, *Minister of Finance.*

A Brave Act.—From an exchange we learn that Mr. Thomas Fyshe, Cashier of the Bank of Nova Scotia in Halifax, was recently in Minneapolis, Minn., as the guest of his old-time friend, J. B. Forgan, Cashier of the Northwestern National Bank. The two gentlemen were riding over the stone arch bridge when Mr. Fyshe saw one of three boys who were running on a boom near the west side of Nicollet island fall into the stream. The boy's companions did not see the accident and passed down below the bridge. Mr. Fyshe jumped from his carriage as soon as the east end of the bridge was reached, and hurried down the embankment and leaped into the stream. The little fellow was being carried down the stream, and the brave Nova Scotian had to swim a considerable distance to reach him. Mr. Fyshe is an expert swimmer, and had no trouble in reaching the shore with his treasure.

FINANCIAL MATTERS IN CHICAGO.

[From the JOURNAL'S Chicago Correspondent.]

As is to be expected, July has been the dullest month of the year circles, and several of our prominent bankers have taken advantage period of inactivity to obtain a rest. Among these may be mentioned Mr. Chicago National; Mr. Gage, of the First National, and Mr. Odell, of the U

The end of the month finds money easy at 5 per cent. on call and 6 commercial paper, with some of the latter at 7. Thus it will be seen t well maintained in spite of the dullness. The banks are conservative and borrowers, for every indication points to an early and constantly increa for money when the movement of fall goods and crops begins. The cle Chicago Clearing-House for the week closing to-day (July 28) were against \$61,000,313.60 the preceding week and \$49,877,107.00 the correspond year. New York Exchange closed this week at 25 cents per \$1,000 discou

On the Board of Trade the grain and produce business has been remarkably well sustained, and owing to conflicting reports from the sources of supply and demand, some little excitement has been kept up all through the month. The quotations from day to day have fluctuated but slightly either way, but never at any time have they been steady. From reliable sources, both public and private, crops of all kinds are reported to be in excellent condition throughout the West, and the anticipation of heavy business in the Fall is favorably affecting the granger railroad stocks. The same influence should depress the grain market, and probably would were it not artificially sustained.

The only important failure of the month was the assignment of the wool house of T. W. Hall & Co., the oldest and most prominent wool concern in the city. The liabilities are estimated at \$150,000, with assets of \$180,000. Dullness in the wool business for several years past is given as the cause for the collapse, precipitated no doubt by the anticipation of a fall in the price of wool by reason of the recent action of Congress.

The contest which has been waged for several years between the Board of Trade and the bucket shops has at last practically come to an end. Judge Garnett, of the Appellate Court, in a test case, on July 19th, decided that the Board of Trade is a private corporation and is entitled to dispense or withhold its quotations as it sees fit. This is probably the death knell of a dozen or more small concerns, called bucket shops, now existing in the city. It is to be hoped the Board will continue the good work it has begun, and eliminate from its business as much as possible the illegitimate trading which has brought it into not a little disrepute.

Several years ago a railroad company was formed under the style of the Chicago & Gulf Air Line, to construct a railroad from the deep water at Dauphin Island, at the mouth of Mobile Bay, in Alabama, north through Mobile and Alabama, and across Tennessee and Kentucky, connecting at the Ohio River with some of the roads already running into Chicago. The necessary franchises have recently been acquired, and now the project will be pushed forward. After a thorough investigation of the line of the road, English capitalists have signified their willingness to take the bonds as fast as the road is constructed, and upon this basis work has already begun on portions. The line runs through the heart of Alabama's finest coal fields, and intersects the rich agricultural and great pine belts to the southward, and the business which this section assures will, by means of this road, be set down at deep water on the Gulf, directly in the line of ocean-going vessels. This will avoid the transfer by lighters made necessary at Mobile by reason of the shallowness of the Bay, and the long journey up the river which handicaps New Orleans. But no one can appreciate the feasibility of this project unless, as your correspondent has recently done, he has traversed the rich State of Alabama and discovered of what a productive region Mobile Bay is the natural seaport.

It at last looks as if the elevated railway in Chicago was about to be a reality. The Chicago Rapid Transit Company has complied with the terms of its franchise by depositing its forfeit of \$100,000 and pushing proceedings for the right of way. The Company, however, has not at the present time succeeded in placing its bonds, but that is no doubt due to the fact that it has confined itself to the home market, which, as a general thing, does not take readily to a low rate of interest, particularly in new enterprises.

The tedious litigation between the Bell and Cushman telephone companies upon the priority of the invention has been decided in favor of the former, and the concern which has so long been a monopoly in our city will therefore probably continue to be so. The city council has considered the practicability of reducing the annual tolls from \$125 to \$75, but it is quite probable, that "upon mature deliberation," the reduction will not be considered feasible!

Chicagoans are somewhat elated over the impetus given the project to connect Lake Michigan with the Mississippi River by means of Congressional appropriation for the survey and location of the route. This improvement will no doubt be an advantage to Chicago, but not a great one as far as transportation is concerned, for our superb railroad facilities present far greater advantages. Water transportation is too slow for Chicago.

It is strange that some enterprising banking firm, which has the confidence of the lending community in the financial centres, does not establish branches in some of the

flourishing Western cities, where, even during the dull season when money is plentiful in the East, exorbitant rates of interest are charged, and money scarce at any price. It would certainly be a boon to those who desire better returns than 6 or 7 per cent., but who have not absolute confidence in Western investment companies and small private banks. It would also assist wonderfully the development of the new sections of the country by placing the surplus capital where it would do the most good. I am aware that the diversion of capital into the West and South would diminish the speculative business and incur the opposition of the interests allied thereto; but I am not sure but that this would be another advantage rather than otherwise. England has long practiced this method of developing new countries, as well as providing a safe outlet for her surplus funds, and with most marked benefit to both lender and borrower.

H. M. JORALMON.

Texas—City Bank of Sherman.—With a paid-in capital of \$300,000 and a surplus of \$50,000 the City Bank of Sherman is certainly entitled to a place in the front rank of Texas' banking institutions. With a corps of officials who are not only conservative but at the same time sufficiently progressive to keep pace with the demands of business, it is not strange that this bank makes such a good showing. The officers are: Jos. Bledsoe, President; A. W. Byers, Vice-President; H. L. Hall, Cashier, and Frank Bower, Asst. Cashier. Referring to their advertisement which appears on another page of the JOURNAL the Cashier writes: "This is our first advertisement in an Eastern journal, and if, at the expiration of the year, we find—as no doubt we will—that our business has been benefited, we will continue the same on a larger scale."

In this connection it is interesting to note that a number of banks are now represented in the JOURNAL's advertising pages which never before advertised except in their local newspapers, and moreover these banks came into the JOURNAL in many instances, without solicitation, and can be found in no other Bankers' publication. It always pays to advertise in the right channel.

"We Want More Business."

The following from a leading bank in Alabama speaks, in no uncertain tone, of the value of the JOURNAL as an advertising medium. Taking into account its high character and wide-extended circulation—at least double that of any other financial publication—and the low rates charged for space therein, there is no better paying investment than an advertisement in the JOURNAL's business department. Shrewd bankers who wish to increase their business are not slow to appreciate its value. Here is the testimony of one of them:

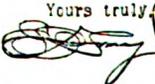

Enfants, Ala., July, 13th, 1888. 188

Mes. Bradford Rhodes & Co.

New York, City.

Dear Sirs:

In reply to yours of the 10th inst, I enclose herewith matter to be inserted in your "Special List of Banks and Bankers". Will remit \$10.00 after first insertion as per your terms. This Bank has long been a subscriber and advertiser to and in your Books, and we have no doubt but that our large list of correspondents have been greatly added to from this fact. We want more business, and gladly avail ourselves of this opportunity. Hope you can give us first place for this City.

Yours truly,

 Cashier.

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Michigan—Lenawee County Savings Bank Adrian.—The 74th quarterly report of this institution is very flattering. It will be seen that nearly the entire amount of deposits is invested in first mortgages on real estate, which fact alone assures perfect safety of funds entrusted to it. It is emphatically a sound institution.

New York City—Canadian Bank of Commerce.—Mr. William Gray, formerly Inspector of the Canadian Bank of Commerce at the head office in Toronto, Ont., has been appointed to the joint agency in New York city in conjunction with Mr. Alexander Laird, to fill the vacancy caused by the recent death of J. H. Goadby.

Texas—Corsicana.—As an evidence that those sections of our country once bitterly estranged by war have joined hands again, we refer with pleasure to the organization of the City National Bank of Corsicana, Texas, with a paid-up capital of \$300,000, three-fourths of which is Eastern money. Let the good work go on. Mr. J. H. Martin, an experienced banker, is the Cashier.

Watching the Safe.—A correspondent who has recently returned from Pineville, Ark., referring to the new bank in that place, says it has taken in, since opening, from \$4,000 to \$10,000 per day, averaging \$50,000 a week. The bank at Pineville consists of a big iron safe in a little frame shanty, having a rough, deal board counter in front of the safe for the Cashier's use. The Cashier sleeps under the counter at night to keep the safe from running away.

European Counterfeiters.—The "Rappel" says that the gang which has lately issued false French bank notes is composed of wealthy Russians and Austrians. They possess ships and crews and all the necessary apparatus. The notes are engraved at sea and the plates are thrown overboard into the water. The ships put into ports, where accomplices receive the notes, scatter them, and give back those unused. Then the whole establishment travels to another port.

New York City—The Clinton Bank.—This is a new, State organization which has been opened in the vicinity of the Mercantile Exchange. The officers are Douglas R. Satterlee—formerly Cashier of the Bedford Bank, Brooklyn, N. Y.,—President, A. C. Bechstein, Vice-President, and David W. Harkness, Cashier. The stockholders are all men of responsibility and comprise some of the best business men in N. Y. city. There is little doubt but a bank in that section will be largely patronized.

Not that Bank.—An item has been going the rounds of the press to the effect that the First National Bank of Mankato, Minn., had recently been victimized to the amount of \$2,000 by a clerical appearing swindler giving the name of Thompson. From a local exchange, which states the facts in the case, it appears that one of the banks in that town was swindled but it was not the First National, although the opportunity was presented. It seems to have been one of those cases which would deceive even the shrewdest bank manager.

London as a Clearing-House.—A recently published table of the transactions of the London Clearing-House for the past twenty years gives the clearings for 1867 at \$6,077,097,000, or more than \$30,000,000,000, and this amount was equalled in 1873 and exceeded in 1881 and 1882. The mind can scarcely grasp a sum of such magnitude, and, in comparison to it, the transactions of the Clearing-Houses of the United States, aggregating \$4,303,100,000 for 1867, seem almost insignificant, or at least indicate that the day is still far distant when New York can assume London's position as the Clearing-House of the world's business.

The Kansas City National Bank, of Kansas City, Mo., is one of the largest banks in the West. It has recently refitted its banking rooms with modern and ex-

ceedingly convenient fixtures and now has for the accommodation of its business one of the most commodious offices in the country. Its business requires the services of as large a force of employes as any institution of the kind in that section with all the appliances for utilizing and giving the best effect to their labors. The banking rooms were furnished by the well-known manufacturers of bank and office fittings, Messrs. A. H. ANDREWS & CO., of Chicago and New York.

First National Bank, Sauk Centre, Minn.—The statement of this bank on June 30, shows loans and discounts \$111,000, deposits, \$75,000, and surplus and profits of nearly \$10,000. This bank commenced business May 12, 1884, and the foregoing statement is one of which any similar institution might feel justly proud, but considering the age of this prosperous bank, it is even more remarkable, and indicates clearly that it is managed with rare ability. Its Cashier, C. M. Sprague, by his painstaking attention to detail and his broad comprehension of general financial affairs, has built up for the bank an enviable reputation at home and abroad.

Texas—Waco State Bank.—On the 16th of July the Waco State Bank declared its twenty-first semi-annual dividend of 6 per cent. Since its organization, ten and a-half years ago, it has been the custom of this bank, every six months, to pay a 6 per cent. dividend to its shareholders. This is exclusive of the surplus fund, and occasionally a partial distribution of surplus has been made, as for example last year the bank divided 25 per cent. among its shareholders and left a surplus which amounts now to \$43,900. This is indeed a substantial showing, and one that would not have been achieved save by the most sagacious, conservative and yet liberal management.

The Kansas Investment Company, of Topeka, Kansas, is offering \$200,000 of ten-year 6 per cent. bonds secured by \$210,000 first mortgage loans deposited with the Boston Safe Deposit & Trust Company, representing over \$650,000 in value of approved real estate. These bonds are sold at par and accrued interest and are considered among the choicest ever offered to investors. Many of the most conservative savings banks have already invested in similar securities and do not hesitate to recommend them as absolutely safe. The bonds are in denominations of \$200, \$500 and \$1,000. The Eastern office of this company is at 101 Devonshire St., Boston, Mass. It has a paid up capital of \$500,000 and \$75,000 surplus and profits.

North-Texas National Bank, Dallas, Tex.—In response to a request for an expression upon the advisability of passing a dividend on July 1, 1888, the shareholders of this bank were very generally heard from, and only three, owning less than one hundred, out of a total of five thousand shares, voted for a July dividend—all the others earnestly recommending that the net profits to date be placed to surplus. At a special meeting of the Board held June 30th, the earnings were, by a unanimous vote, disposed of according to the following statement: Gross earnings since opening (Jan. 10, 1888,) \$37,155.48; expenses charged off, \$9,334.81; bad or doubtful assets, none; carried to surplus, \$25,000; net profits, \$2,820.67.

Texas Bankers' Convention.—At the recent session, in Galveston, of the Texas Bankers' Association the address of welcome was made by Colonel Denson. According to the *News* when Colonel Denson concluded, calls were made for Colonel Henry Exall, Vice-President of the North-Texas National Bank at Dallas, the silver-tongued orator of the Bankers' Association. It was altogether an impromptu call. Colonel Exall, however, was equal to the emergency. He said that no one could have been present at the meeting here last year without feeling a sense of gratitude and appreciation for Galveston's hospitable treatment. That it would make him recreant to every sense of duty should he fail to respond when the people of Galveston again opened the gates of their hospitable city and bid the visitors welcome. On behalf of the widespread Panhandle and fertile Concho, the pinery of East Texas, the grain-growing district of Middle and North Texas, the cattle and sheep district of the West, he thanked Galveston for her kind welcome.

Twenty-Eight Years in Wall Street.—Mr. Henry Clews, who has for so many years been regarded as one of the most successful of Wall Street's magnates, has achieved a victory fully as brilliant and complete in his recent literary venture as in his more daring moves on the Stock Exchange. Twenty-eight years' experience with the "ins" and "outs" of dealings on the New York Stock Exchange and its accompanying incidents certainly affords a field for a ready writer; and it is no exaggeration

to say that Mr. Clews has woven the matter-of-fact routine of business transactions on the Street into a readable form with the skill of a romancer. The book consists of sixty chapters and, while dealing somewhat liberally with the author's own part in the transactions of nearly a third of a century, still devotes considerable space to other prominent personages who have, during the same time, played their part in the great Wall Street drama. Pictures of many of the personages who have made Wall Street famous adorn the pages of the book together with sketches illustrating the salient points in their financial career.

Professor Leone Levi.—A brief reference has been heretofore made in the JOURNAL to the death, on May 7th, of Prof. Levi, L.L.D., F. R. S., etc. Born at Ancona in 1821, Dr. Levi came to England in 1844, where he remained until his death. It was owing entirely to his efforts that the Liverpool Chamber of Commerce was established. For very many years his name has been familiar to the banking world in both hemispheres in connection with the Gilbert lectures on banking, with which Dr. Levi was thoroughly identified. In the commercial world also, few men have made a more influential name or held a more commanding position in the esteem of their fellow-men than Dr. Levi. He was a profound scholar, a deep thinker and student, and any statement emanating from him was certain to be received with the greatest respect. He labored much to establish an international commercial code, and, although unsuccessful, he received from the Emperors of Germany and Austria gold medals in token of appreciation of his work. Prof. Levi was well-known to the literary world as an author and to the financial world as one thoroughly versed in all financial and economic subjects.

Bank Examiner V. P. Snyder.—A timely discovery.— On Thursday, June 28, V. P. SNYDER, National Bank Examiner, with his two assistants, Messrs. Hyslop and Mellins, began an examination of the Second National Bank of Jersey City, and it was soon discovered that one of the book-keepers, John H. Van Loan, was short in his accounts to the extent of \$15,012.45. Van Loan robbed the bank through collusion with dealers whose accounts were credited with fictitious and raised credits; also through incorrect footings on the ledger. Mr. SNYDER and his assistants found that Van Loan did his stealings in petty sums ranging from \$40 to \$300 and running back to 1882. Van Loan was absent on his vacation at the time of the examination, which was made several months out of the usual order, but returning to the city and learning that the Examiner was at the bank he absconded, it is supposed, to Canada. C. N. Coykendall, Van Loan's father-in-law, and W. H. Leeker have been arrested for conspiracy.

Bank Examiner V. P. SNYDER is certainly deserving of great credit for unearthing and exposing this scheme which, in the end, might have resulted disastrously to the bank. The safety of stockholders and depositors in National banks depends, to a great extent, upon the thoroughness with which the bank Examiner performs his duty, and it can be safely assumed that, in this respect, Mr. SNYDER is the right man in the right place. His district embraces New York city, Brooklyn, N. Y., and Jersey City, N. J.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- The date side of a coin is always the head.
- The Bank of Yazoo City, Miss., reports \$82,000 surplus and profits.
- The smaller Irish farmers have about \$25,000,000 in their Savings banks.
- Stafford Springs, Conn., now boasts a National Bank with \$50,000 capital.
- The last reported sale of seats in the N. Y. Stock Exchange was at \$18,000.
- Another bank will soon be opened at Aberdeen, Dak., making four in all.
- The First National Bank, Joplin, Mo., has increased its capital to \$100,000.
- New counterfeit \$5 silver certificates are in circulation in New York city.
- A Cape Cod (Mass.) man, now a Bostonian, is a director in 87 National banks.
- The Bank of Yazoo City, Miss., will move into its new building about Sept. 1st.
- The most ancient known coins are of the fifth century, B. C., and are Macedonian.
- Illinois capitalists are organizing another National bank in Lincoln, Nebraska.

- The Elk National bank building, at Fayetteville, Tenn., was recently destroyed by fire.
- The Springdale Saving & Investment Company has been organized at Springdale, Arkansas.
- The Chatfield Bank, Chatfield, Minn., has been purchased by Everett Jones and A. L. Ober.
- E. K. Lodewick has been appointed Receiver of the Madison National Bank, Madison, Dak.
- The Bank of Carroll at Huntingdon, Tenn., has let the contract for a new banking house.
- During the last seven years the number of National banks has increased upwards of 1,000.
- A few shares of the Chemical National Bank, New York city, were sold recently at \$3,500 per share.
- Pitcher, the Providence defaulter, evidently made a mistake when he pitched his tent in Montreal.
- Portland, Oregon, has a banking capital of \$5,375,000 with surplus and profits of nearly \$2,000,000 more.
- The Merchants & Farmers' Bank with a handsome paid up capital has been organized in Macon, Miss.
- The decrease in National bank note circulation for five years ending June 30, 1888, has exceeded \$175,000,000.
- The Ness County Bank, Ness City, Kansas, has increased its capital to \$250,000 one-half of which is fully paid.
- Grover, Colorado, is a town recently laid out, which has a population of only forty but already boasts a bank.
- The People's Bank, St. Paul, Minn., has increased its paid up capital to \$200,000, and has, besides, \$10,000 surplus.
- The President of the North Side Savings Bank at Atlanta, Ga., is alleged to be a defaulter to the amount of \$20,000.
- The deposits of the Philadelphia National banks have reached \$73,990,000—an increase in a single week of \$2,496,600.
- The Secretary of the Treasury gets a few bonds occasionally, but he has to keep on advancing the price in order to do it.
- The gross public debt of the Dominion of Canada on June 30 last was \$8,134,221 more than at the end of the previous year.
- The National Bank of Kansas City, Mo., has declared a semi-annual dividend of 5 per cent. and increased its surplus to \$300,000.
- The notes, drafts, and other securities stolen from the Union Bank, Providence, R. I., have been recovered and returned intact.
- L. C. Wilmarth, who recently retired from the banking business in Ashland, Wis., is making a three months' trip in Europe.
- A new bank with a large capital has been established in Greenville, Miss. This makes the third bank in that enterprising town.
- The stockholders of the Metropolitan National Bank, Cincinnati, Ohio, will receive a dividend of 20 per cent. from the assets.
- Hon. Fred. A. Stocks, of G. B. Stocks & Son, bankers, Blue Rapids, Kansas, delivered a fine oration on the 4th of July, last.
- I. P. Baker, Manager of the Power line of steam boats, has recently purchased the well-known bank of Mellon Bros., Bismarck, Dak.
- The total number of stamped envelopes made at the United States Envelope Agency during the year ending June 30 was 433,629,000.
- The First National Bank of Rome, Ga., is putting in a fire and burglar-proof vault and making improvements in their banking house.

— Under his sentence, Harper, of the Fidelity National Bank, Cincinnati, is not required to work. His punishment is simply confinement.

— C. C. Nelson, the absconding bank President of Atlanta, Ga., has been remanded to Belleville, Ont., jail for bringing stolen money into Canada.

— The Comptroller of the Currency has declared the first dividend, 40 per cent., in favor of the creditors of the Second National Bank of Xenia, Ohio.

— When a banker fails in China all the partners and employes are beheaded. That is said to be the reason why failures seldom occur in that country.

— The Comptroller of the Currency has declared a first dividend of 20 per cent. in favor of the creditors of the State National Bank, of Raleigh, N. C.

— The Central Bank is a new State institution recently opened in Rochester, N. Y., with \$100,000 capital. Lincoln National Bank is N. Y. correspondent.

— Minneapolis, Minn., is to have still another bank, styled the Irish-American Bank. The capital is \$100,000, and it is said that Anthony Kelly will be the first President.

— The new twenty-dollar silver certificate, just issued by the Treasury Department, is a pretty note, and is so finely executed it will be difficult to counterfeit.

— The Swedish-American Bank of Minneapolis, Minn., opened for business June 27th. The list of officers and directors embraces many prominent men in Minneapolis.

— It is reported that Charles M. Kittredge, a private banker and broker of Denver, Colo., was recently robbed of \$10,000 by his confidential clerk, a youth of only nineteen years.

— The Assistant Cashier of the Patchogue Bank, Patchogue, N. Y., is reported to be a defaulter to the amount of \$3,800. The bank, however, will lose nothing—except its late official.

— The old form of gold certificates covering Clearing House balances has been cancelled at the rate of nearly \$1,000,000 a day and replaced by certificates issued by the Sub Treasury.

— The United States Trust Company's new building now in course of erection at 43-45 Wall street, New York city, promises to be one of the finest buildings in that section of the city.

— A movement is on foot looking to the removal of the Framingham National Bank, which for many years has been established at Framingham Centre, to South Framingham, Mass.

— Bilhorz Bros., of Seneca, Ill., have recently erected a fine brick block in Horton, Kansas, in one portion of which they have opened a new bank styled the Farmers and Mechanics' Bank.

— There is a prospect for an art revival in American coinage. A bill to secure an improvement in our coinage has been drawn in accordance with the views of Mr. Kimball, the Director of the Mint.

— Cross and White, recently tried for embezzling money from the State National Bank, Raleigh, N. C., were found guilty and sentenced—the former to seven and the latter to five years in the penitentiary.

— Judge W. B. Merchant, formerly President of Merchant's Exchange Bank, New Iberia, La., has removed to El Paso, Texas, and established himself in the practice of the law in connection with Major Teel.

— The American National Bank, Kansas City, Mo., recently declared a semi-annual dividend of 4 per cent. This is the third dividend this bank has declared, having paid its stockholders the sum of \$150,000.

— There is some talk as to the likelihood of a premium on gold. It has been predicted that this country will eventually find itself on a level with France, where gold occasionally commands a slight premium.

— The total holding of specie by the seven great European banks is only a little more than 2 per cent. greater than at this time a year ago. It is in the aggregate \$1,088,685,000. Of this amount more than half is gold.

— Vice-Chancellor Van Fleet has refused to accept the offer of twelve Directors of the defunct Mechanics & Laborers' Saving Bank of Jersey City, N. J., to settle their

indebtedness to the depositors by paying \$47,000 in cash. The Receiver of the bank has been notified of the decision. The suits against the Directors—twenty-six in all—will be continued.

— The Directors of the Highland National Bank, Newburgh, N. Y., recommend the reduction of the bank's capital from \$450,000 to \$300,000 on account of the limited local demand for money.

— The legal rate of interest in England is 5 per cent., but the law formerly in force against usury has been repealed and any rate of interest stipulated in a contract will be enforced by the courts.

— A bank with \$50,000 capital will be opened September 1st in Alexandria, La. It is the first bank in the town, and a local exchange, in referring to it, says "it will be an important factor and do a good business.

— It is estimated by United States officers, who have just unearthed a gang of counterfeiters in Tennessee, that upward of \$15,000 of the bogus coin has been put in circulation by them, besides a great number of \$5 silver certificates.

— The charter of the Netherlands Bank, Holland, has been extended fifteen years. The Government shares the profits of the bank. The capital of the institution will be increased 4,000,000 florins, of which 1,000,000 will be paid into the State treasury.

— The State Bank of Belvidere, Neb., reports \$7,500 undivided profits. This bank began business in June, 1886, and is in a flourishing condition. At a recent meeting of Directors Dr. H. E. McCaw was elected a Director in place of W. J. McAnally, resigned.

— The following officers were chosen at the recent election of the N. Y. Consolidated Stock and Petroleum Exchange: President, Charles G. Wilson; First Vice-President, Frank Tack; Second Vice-President, Thomas L. Watson; Treasurer, John Stanton; Chairman, A. W. Peters.

— The report of the First National Bank of Beaver, Pa., brings the business up to June 30th. The statement shows the loans and discounts to be \$104,517.10, and the deposits \$95,440.38. The growth of this bank has been rapid and its success all that its stockholders could have expected.

— W. R. Herrick who, for many years has been Cashier of the Lombard Investment Company at Lincoln, Nebraska, recently resigned in order to accept a new position in Alamosa, Colorado. He was presented with a beautiful gold-headed cane bearing the inscription: "From the L. I. Co. Boys."

— Mr. A. Hansel, for five years Cashier of O'Connor & Sullivan's Bank, San Antonio, Texas, has resigned to accept the position of Treasurer of the San Antonio and Aransas Pass railroad. He has the best wishes of hosts of friends and acquaintances for success in his new undertaking.

— It is stated that during the past two years \$51,000 has been paid to the depositors in the Augustinian Bank, Lawrence, Mass., whose suspension five years ago caused such a sensation. The priests are working hard to pay all the depositors, and confidently hope to clear off every cent of liabilities.

— The bankers of New Albany, Ind., have requested the Board of Equalization to have all bank stock owned by individuals assessed to the banks, the argument being that the stock is continually changing hands and that the tax is always collected more speedily and surely from the banks than from individuals.

— The members of the N. Y. Stock Exchange have petitioned the Governing Committee "to favorably consider a proposition to allow a rebate of commission to all incorporated and State banks." This, it is said, will, if successful, bring an appreciable increase of business to all Wall street brokers.

— It is claimed that there is a quantity of counterfeit silver certificates in circulation in various sections of the country. Every effort is being made by the Secret Service officers to suppress the issue and detect those operating its circulation, embracing \$1 and \$5 certificates, both skilfully executed, but on fibreless paper.

— The total number of forged five hundred franc Bank of France notes which have been presented for payment is 116. Since the discovery of these counterfeit notes the bank has reimbursed 153,000,000f. of its issue of five hundred franc notes. There still remain 116,000,000f. of its five hundred franc notes in circulation.

— A new plan has gone into effect in New York city, devised by the down-town banks, under which they have prepared a system of blank deposit and pay checks, by means of which merchants may hereafter draw checks for the payment of customs duties. The method is far more safe and convenient than the present one of paying duties in cash.

— Not long since a cowboy walked into the Bank of La Junta, Colo., and drew out \$28,000 without the formality of a check. He simply laid a bag upon the counter, put the end of his pistol in Cashier Phillip's face with the suggestion that the latter place the bank's funds in the bag. The Cashier responded with alacrity and then the cowboy rode rapidly away.

— The Wabash County Bank, Wabash, Ind., will be succeeded on September 1 by the Wabash National Bank, which has already been organized by the election of the following officers: J. W. Busick, President; James I. Robertson, Cashier; Harry H. McNamee, Assistant Cashier. The capital is \$100,000, and a handsome building is being erected for the use of the new bank.

— Benjamin T. O. Hubbard, the defaulting Cashier of the Monmouth National Bank, Monmouth, Ill., died in the prison hospital at Joliet, recently of heart troubles and general debility. Hubbard speculated on the Chicago Board of Trade with the bank's money, made a few lucky deals, and went in more heavily, but an unfortunate fluctuation in the market left him \$115,000 short in his accounts.

— The Second, Third, and Citizens' National Banks of Sandusky, O., having perfected plans for a savings department of the banks named, have already opened up for business in the new department. The three banks named will carry on a savings department upon a uniform basis and will, in every respect, conform to the rules of savings banks in general, and to the laws of the State upon that subject.

The Arrest, in Canada, of Pitcher, defaulting Teller of Union Bank, Providence, R. I.—The story of Pitcher's arrest is thus told by the *Montreal Star*:

The arrest of the defaulter Pitcher is owing to the fact of his fidelity bond having been guaranteed by the Guarantee Company of North America, and to the prompt action taken by Mr. Edward Rawlings, the Managing Director of that Company. The morning papers of June 28th published a telegraphic item from Providence, that Pitcher had robbed the Union Bank, and had absconded (which was confirmed by special telegraph from the Company's Providence Agent). Mr. Rawlings thereupon referred to the Company's books and found that the Company had issued a bond in favor of the Bank, guaranteeing the fidelity of Pitcher. He at once sent for their Detective Kellert, and instructed him to act in the matter. A comparison of the handwriting of the defaulter, as contained in the application for the Bond of Guarantee in the office of the Company, with the signature "James A. Roberts," in the Register of the Hotel, written by the defaulter, convinced Mr. Rawlings that "James A. Roberts" was Charles A. Pitcher, the defaulting Teller, and he at once authorized the arrest. Had the Guarantee Company not been interested in Pitcher, the chances are that he would have made good his escape from Canada with the plunder. Immediately on learning that the defaulter had purchased exchange on Paris from the Hochelaga Bank (for 780,900) the Company at once gave its check for that amount and secured the original bills in their wrappers which had been stolen from the Union Bank, with which Pitcher purchased the exchange, only just in time to save them from being distributed, whereby all trace of identification would have been lost.

In reference to the above the Guarantee Company has received the following letter from the Union Bank:

UNION BANK,
PROVIDENCE, R. I., July 13, 1888. }

Edward Rawlings, Esq., Managing Director, Guarantee Co. of North America, Montreal:
DEAR SIR,—We beg to acknowledge the receipt of your favor of 12th instant. We appreciate very fully your prompt and vigorous action in the matter of our defaulting Teller, C. A. Pitcher, and have learned of his committal to-day with great satisfaction.

We recognize the important part you played in securing this result, and have no doubt other Banks as well as Corporations in general have watched this case with much interest and noted the result to your advantage. * * * * *

Very truly yours,

WM. STANTON DONNELL,

For Directors Union Bank.

On July 17th Pitcher was formally committed, without bail, for trial at Court of Queens Bench, Montreal, in September next on the charge of bringing stolen money into Canada, and it is announced that the arrest of Pitcher has led to the recovery by the Bank of about half a million of securities which Pitcher had forwarded to London.

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

NATIONAL BANKING SYSTEM—MR. JORALMON'S PLAN AGAIN.

Editor Rhodes' Journal of Banking:

SIR:—The importance of conserving in some form or other our National banking system as distinguished from a system of banks under the varying laws of many different States is so great that every plan put forward with that end in view should receive careful consideration. It was therefore in a spirit of friendly criticism and not at all unfriendly censure that I approached the scheme suggested by your correspondent, Mr. Joralmon, in the April JOURNAL. As I understand the plan, now let us suppose it in full operation and the state of affairs will be somewhat as follows: In the first place it would be so much more profitable to be in the association than to remain out of it that all the banks would necessarily become members of it, for a bank or banking house staying out could not, for the reason cited, compete successfully with its more favorably situated neighbors. We should then have all the banks of the country interlocked in one solid association, each one responsible in its degree, for all the rest; but each one uncontrolled in any degree by the authority of the association. The authority of the Board of Control seems to be limited to regulating the amount of currency to be issued. It seems to be inherently unfair to make A responsible for B and C without giving A any control whatever over the actions of B and C. The system bears some resemblance to the joint stock banks of Great Britain, but with the essential difference that in the latter case the branches, no matter how numerous, are under the absolute control and constant direction of the parent bank, and are all managed harmoniously. The Board of Control, however, while without any authority to regulate the conduct of a bank's business is vested with power to suspend or expel any member of the association. The exercise of this power would practically close the doors of the institution against which it was directed, for no one would care to keep his account unsecured in a discredited bank in preference to transferring it to a bank where it is absolutely secured by the mutual assessment feature. This is the way in which the association could break a bank. Would not this be a very great power to lodge in the hands of men who, by the very reason of their life tenure, would be to a great extent irresponsible? Pursuing the analogy of a court of justice it must be remembered that in order to make a judge amenable to removal by impeachment it must be shown not only that wrongful acts were done but that they were *corruptly* done, to show corrupt motive in the case under consideration would not only be difficult but practically impossible. The proceedings before a judge, moreover, are conducted in open court; the evidence is given in under the strictest rules; members of the bar are heard in argument on either side, and every precaution is taken that experience can suggest or wisdom devise, in order that justice may be rendered to all "freely without sale, fully without denial, and speedily without delay." The authority of all courts of original jurisdiction is limited to a certain extent of territory, and to check their errors care is always taken to provide a thorough system of courts of appeal. Indeed, the more this line of argument is pursued the more clearly is it seen that, outside the mere manner of appointment (nothing is said about the manner of removal) there is absolutely no analogy between a court of justice and the proposed Board of Control.

The Board is given authority to increase or diminish the circulation of a bank. When rates are high and money in active demand, here is an excellent opportunity to "make" a bank or, at any rate, to greatly increase its fortunes. It must be plain that in any community the action of the Board in granting the privilege of increase to some and withholding it from others must tend to excite an unfavorable public opinion against those banks from which the privilege is wholly or even partially withheld. It would be useless to assign reasons—the mere fact of the unfavorable discrimination would be reason enough for an unreasoning public. As to the elasticity

of the volume of currency that is sufficiently provided for now if the Congress would only give us bonds on which currency could be issued with profit.

As to the chartering of new banks who is to decide whether the banking facilities of New York or Chicago, for example, are adequate for the needs of the city? In the case of a small country town with or without banking facilities, no man living can tell whether a new bank will succeed or not. It is one of those things "that no fellow can find out"—until he tries the experiment. Of course everybody interested in existing banks would be quite sure that no necessity existed for a new institution. Whether one thinks there is room for one more in the omnibus is apt to depend very much upon whether one is in or out of the vehicle. But to the life-tenure feature there is a fatal objection. Our people abhor life officers. They are not tolerated in any department of the Government except the Judiciary, and in many (?) of the States they are not tolerated even there. I do not think that any bill could possibly get through Congress that contained a provision creating an entirely new set of life-tenure officers.

NATIONAL SYSTEM.

BALTIMORE, July 20, 1888.

A Deserved Promotion.—We are pleased to note that Mr. W. O. Richardson, formerly connected with the Old National Bank, Grand Rapids, Mich., has become identified with the North-Texas National Bank at Dallas, Texas, having assumed entire charge of the Collection Department of that enterprising institution. Mr. Richardson's past experience has fully fitted him for his new position which he will, no doubt, fill with credit to himself and acceptability to the bank as well as its patrons all over the country. Send collections direct to the bank at Dallas thus saving time and expense.

Kansas—First National Bank, Hutchinson.—Truly, "salt has not lost its savor," judging from the sample recently received from the First National Bank of Hutchinson, Kans. As a specimen of native product it can be said, without fear of contradiction, that there is nothing "fresh" about it—we mean the salt, of course. As for the First National Bank, established in 1876, it has always enjoyed a prosperous business due, in great part, no doubt, to its conservative management. If it were in order to express a wish it would be that its prosperity may be equal in dollars to the capacity of the Kansas Salt Works—1,000 barrels per day.

The July 15th statement of the National Bank of the Republic shows a wonderful increase in business during the past four years. The loans on May 15, 1884, were \$3,359,523 and on July 15th they had more than doubled, amounting to \$7,875,845. The deposits four years ago were \$4,378,071, while on July 15th they were \$12,049,336 showing that they had nearly tripled within the period. The bank is a United States depository and of the deposits mentioned \$900,000 were United States deposits. Other items show an increase in strength independently of this increase in loans and deposits. The present safe and energetic management of this long-established institution is evidenced by the constant improvement in its statements.

Branding Counterfeit Money.—The following circular, addressed to Bankers, has been issued by John S. Bell, Chief of the Secret Service Division of the United States Treasury Department under date of July 27, 1888:

"Complaints having long been made concerning the indisposition of bank officers to brand counterfeit notes coming into their possession in the course of business, and assuming that the failure to do so arises from a lack of knowledge as to the law's requirements, I respectfully submit for your guidance Section 5 of 'An act authorizing the appointment of receivers of National Banks, and for other purposes,' approved June 30, 1876:

"That all United States officers charged with the receipts or disbursements of public moneys, and all officers of National Banks shall stamp or write in plain letters 'counterfeit,' 'altered,' or 'worthless,' upon all fraudulent notes issued in the form of, and intended to circulate as money, which shall be presented at their places of business; and if such officers shall wrongfully stamp any genuine note of the United States, or of the National Banks, they shall, upon presentation, redeem such notes at the face-value thereof."

"The surest way to prevent a reissue of counterfeit notes is by branding or cutting thereon either of the following words: 'counterfeit,' 'altered,' 'worthless,' 'bad.'"

"If, by inadvertence, a genuine note should be thus branded or cut, no loss can accrue to the person performing the act, every National Bank being compelled to redeem its issue."

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

ONE VIEW OF IT.—A loan of a Boston savings bank of \$100,000 on a single Western mortgage is reported. A Boston newspaper states that \$500,000,000 have been loaned by Boston banks, insurance and trust companies and others, on Western farms. About 75 per cent. of the savings banks deposits of the Nation are located in New England; but these Eastern capitalists have mortgages for four times that amount on Western farms. This is all an object lesson in the system of taxing the farmer into bankruptcy, by Eastern manufacturers and money-lenders.—*Courier-Journal*, Louisville.

NO BANKRUPTCY LEGISLATION.—The prospect for bankruptcy legislation at this session of Congress is so small that neither Senator Hoar nor Gen. Collins have thought it wise to go so far as to introduce a bill. This does not imply that they have been idle. Gen. Collins has several times gone over to the Senate wing of the Capitol to consult with the Senator about the matter, but no ray of hope has come to view yet that favorable action can be had in either house. Senator Hoar was compelled to abandon his bill in the last Congress because the Senate struck out the most essential clause, and Gen. Collins was convinced then, as he is now, that a two-thirds vote could not be obtained to suspend the rules in the House.

The fact is that the members from the extreme West and the Southwest are against any legislation in this direction just as they are against extending the National bank charters. They look upon a bankruptcy law and upon the banks as the weapons of "the money power" of the East in the oppression of the poor farmers of the West. Bland, of Missouri, in one of his rambling speeches against a public building bill, repeated the remarkable figures of Western farm mortgages, which have recently been going the rounds of the press, and made the argument that the expenditures should be kept down because their real weight falls upon the producing farmers.

This feeling of hostility towards Eastern capital thoroughly pervades the politicians of both parties West of the Mississippi, and they think they are winning popular favor when they oppose any proposition from the business men of the East—whether it be for the perpetuation of the banks, the coinage of a full-weight dollar, or a uniform bankruptcy law.—*Commercial Bulletin*, Boston.

THE RATE OF INTEREST.—The *World*, years ago, was the first journal to preach the doctrine that transatlantic rates of interest ought to obtain in Canada. In those days the rate on first mortgage was 10 per cent. The indications now all point to the likelihood that before the beginning of 1880 first mortgages on improved farm property in Ontario and on Toronto real estate (built on) will not carry more than five per cent. The security here is just as good as in England; why should there be such a difference as there is or rather was between the rates paid for the money? The lessening of the distance or time between the two continents, the cheapness of cabling and the ease of transferring money from one side to the other have all conspired to equalize the rates. The immense industrial and other development on this side have also improved our securities. The day is fast coming when the rates of interest being equal, the security of American real estate will be preferred to European.

What we next want is cheaper money for business men. Too many business men have to pay eight per cent. right here in Toronto, though there are bankers who say that on gilt-edge paper they will let out money at from five to six per cent. Other business men are paying the shaving firms $2\frac{1}{2}$ per cent a month. And some days these firms seem to let out more money than the banks. But the great bulk of commercial paper ought to be going through the banks to-day at six per cent., and the banks be glad to get that on it.

The great feature of the day in our money market is that the rate of interest is coming down with something of a rush, and that there is a plethora of money in the hands of the banks and loan companies.—*World*, Toronto.

NEW BANKS, CHANGES IN OFFICERS, FAILURES, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

New National Banks.—The Comptroller of the Currency furnishes the following statement of National banks organized since our last report. Names of officers and further particulars regarding new National banks will be found under their proper State headings in this list.

- 3906—First National Bank, La Grange, Texas. Capital, \$50,000
 3907—First National Bank, Dalton, Georgia. Capital, \$50,000.
 3908—Manufacturers' National Bank, Leavenworth, Kansas. Capital, \$150,000.
 3909—Merchants' National Bank, Topeka, Kansas. Capital, \$100,000.
 3910—Citizens' National Bank, Latrobe, Pennsylvania. Capital, \$50,000.
 3911—Commercial National Bank, Saginaw, Michigan. Capital, \$100,000.
 3912—Wallowa National Bank, Enterprise, Oregon. Capital, \$50,000.
 3913—Exchange National Bank, Colorado Springs, Colorado. Capital, \$100,000.
 3914—First National Bank, Stafford Springs, Connecticut. Capital, \$50,000.
 3915—City National Bank, Corsicana, Texas. Capital, \$90,000.

ALABAMA.

DECATUR.—Exchange Bank has been recently opened. Capital, \$100,000.

ARKANSAS.

BATESVILLE.—Hinkle & Wolf are reported here. Capital, \$12,000. President, H. H. Hinkle; Cashier, Jno. I. Wolf.

EVREKA SPRINGS.—Citizens' Bank; J. W. Freeman, President, in place of J. F. Waddill; Vice-President, R. J. Gray; Cashier, Assistant Cashier, D. F. Powell.

CALIFORNIA.

ANAHEIM.—Bank of Anaheim; Cashier, Geo. V. Horr.

COLTON.—First National Bank; John W. Davis, President, in place of John W. Roberts; Howard B. Smith, Cashier, in place of John W. Davis; E. D. Roberts, Assistant Cashier, in place of Howard B. Smith.

FRESNO.—Fresno National Bank; H. D. Colson, President, in place of J. H. Hamilton; J. M. Cory, Vice-President, in place of H. D. Colson.

LOS ANGELES.—First National Bank; John D. Bicknell, Vice-President, in place of J. F. Crank.

MURRIETTA.—G. W. Fox is reported here.

SAN RAFAEL.—U. M. Gordon & Co.; U. M. Gordon deceased.

WATSONVILLE.—Pajaro Valley Bank has been opened. Capital, \$100,000. President, J. T. Porter; Vice-President, A. Lewis; Manager, F. Gubbay; Cashier, J. J. Morey.

COLORADO.

BURLINGTON.—Bank of Colorado is reported here. President, Robert Clarke.

COLORADO SPRINGS.—Exchange National Bank has been authorized to commence business. Capital, \$100,000. President, D. Heron; Cashier, John J. La Mar.

DENVER.—State National Bank; John L. McNeil, President, in place of Charles Hallack.

HOLYOKE.—Farmers & Merchants' Bank; Assistant Cashier, E. N. McPheerlin.

LAMAR.—Merchants' State Bank; President, B. B. Brown; Vice-President, Willis G. Emerson; Cashier, W. C. Gould; Assistant Cashier, H. G. Gouchenour.

YUMA.—Bank of Yuma (Bostwick, Yerkes & Co.); succeeded by State Bank of Yuma. Capital, \$90,000. President, H. Bostwick; Cashier, J. E. Yerkes; Assistant Cashier, J. F. Ball.

CONNECTICUT.

PUTNAM.—First National Bank; James W. Manning, President, in place of G. W. Phillips.

STAFFORD SPRINGS.—First National Bank has been authorized to commence business. Capital, \$50,000. President, C. L. Dean; Vice-President, William P. Stafford; Cashier, Wm. M. Corbin.

STAFFORD SPRINGS.—Stafford Savings Bank; Wm. M. Corbin, President, in place of Gardiner Hall; Chas. F. Harwood, Treasurer, in place of H. S. Hills.

THOMPSONVILLE.—The R. D. & Robert E. Spencer Co. is reported here. Capital, \$25,000. Cashier, Robert E. Spencer.

DAKOTA.

ABERDEEN.—American Loan & Trust Co. will shortly be established. Manager, H. M. Marple.

BISMARCK.—Bismarck Bank succeeds Mellon Brothers. Proprietors: T. C. Power, Isaac P. Baker. Cashier, J. B. Keenan.

FARGO.—E. C. Eddy & Co.; Cashier, Ira Eddy.

FRANKFORT.—Bank of Frankfort is reported here. Capital, \$75,000. President, F. C. Dennett; Vice-President, E. M. Wayne; Cashier, E. J. Kaull.

MADISON.—American Mortgage & Investment Co.; reported closed.

FLORIDA.

JACKSONVILLE.—Southern Savings & Trust Co. is reported here. Capital, \$30,000. President & Cashier, S. B. Hubbard; Vice-President, J. M. Schumaker.

ORLANDO.—Orlando Loan & Trust Co.: Vice-President, Thos. J. Shine; Secretary, Jas. M. Raleigh; Treasurer, Nat Poyntz.

GEORGIA.

DALTON.—First National Bank has been authorized to commence business. Capital, \$50,000. President, R. J. McCamy; Cashier, R. I. Peak.

IDAHO.

BOISE CITY.—Boise City National Bank; Walter S. Bruce, Assistant Cashier, in place of Joseph Ferrault.

HAILEY.—McCornick & Co.; succeeded by First National Bank.

ILLINOIS.

CHARLESTON.—First National Bank; Lewis Monroe, President, in place of W. M. Chambers, Jr.; W. M. Chambers, Jr., Vice-President, in place of Lewis Monroe.

CHICAGO.—Continental National Bank; John C. Black, President, in place of C. T. Wheeler; John R. Winterbotham, Vice-President, in place of John C. Black. — Boody, McLellan & Co.; this branch closed.

EAST ST. LOUIS.—East St. Louis Bank; Cashier, Paul Wabt.

EVANSTON.—Evanston Bank; proprietor, T. C. Hoag. Cashier, Wm. G. Hoag.

LA SALLE.—La Salle National Bank; Assistant Cashier, F. B. Blish.

INDIANA.

AMBIA.—Bank of Ambia is reported here. President, Samuel Williams; Cashier, Josiah G. Williams.

LADOGA.—Farmers & Merchants' Bank is reported here. Capital, \$50,000. President, M. M. Henry; Vice-President, I. U. Miller; Cashier, Leo E. Grimes; Assistant Cashier, Chas. I. Goodbor.

MONON.—Monon Bank; closed.

NEW ALBANY.—Second National Bank; R. G. McCord, Vice-President, in place of I. P. Leyden.

PRINCETON.—People's National Bank; Cashier, W. P. Welborn.

WABASH.—Wabash County Bank; to be succeeded September 1 by Wabash National Bank. Capital, \$100,000. No change in officers.

IOWA.

CORRECTIONVILLE.—Sioux Valley State Bank; Jos. V. Hinchman, President, in place of Laf. Tinkel.

COUNCIL BLUFFS.—Anglo-American Mortgage & Trust Co., of Omaha, Neb., have opened a branch here.

HERNDON.—Herndon Bank is reported here. Capital, \$10,000. President, D. P. Oldfield; Vice-President, H. C. Booth; Cashier, S. J. Oldfield; Assistant Cashier, W. E. Grismer.

HOLSTEIN.—Farmers' Loan & Trust Co.; Cashier, E. H. McCutchen.

ONAWA.—Onawa State Bank has been incorporated. Capital, \$50,000. President, B. Richards; Vice-President, Addison Oliver; Cashier, Chas. H. Huntington.

PANORA.—Guthrie County National Bank; G. M. Reynolds, Cashier, in place of L. J. Pentecost.

ROCK VALLEY.—Sioux County Bank (B. F. McCormack); closed.

SMITH.—Post Office is Massena.

STORM LAKE.—Ballou State Banking Co. have opened an office here.

WYOMING.—Exchange Bank (Somerby & Co.); Assistant Cashier, S. Somerby.

KANSAS.

ARMOURDALE.—Citizens' Bank has been organized. President, C. E. Moss; Vice-President, Kelly Brent; Cashier, C. S. Squier; Secretary, S. S. Kirby.

AURORA.—Bank of Aurora has been incorporated. Authorized capital, \$50,000.

BAZINE.—Bank of Bazine; Cashier, A. E. Parker.

BLUE MOUND.—Bank of Blue Mound; now incorporated. Authorized capital, \$50,000.

BURR OAK.—Bank of Burr Oak (Hulbert Bros); C. D. Hulbert, Cashier, in place of O. D. Hulbert.

CLYDE.—First National Bank; N. B. Nutt, Jr., Cashier, in place of W. F. Cowell; E. D. Curtis, Assistant Cashier, in place of A. E. Morris.

CONWAY SPRINGS.—Citizens' State Bank was, through error, reported in July Journal discontinued. The bank is still doing business.

DEXTER.—Bank of Dexter County has been incorporated. Authorized capital, \$50,000.

ENGLEWOOD.—Clark County Loan & Investment Co. is reported here. Capital stock, \$50,000. President, J. G. Walker; Secretary, J. J. Littlefield; Treasurer, B. B. Bush.

EUSTIS.—The banks here removed to Goodland.

GANDY.—P. O. changed to Goodland.

GIRARD.—Ozark Investment Co. has been incorporated. Authorized capital, \$14,000.

GREELEY.—Bank of Greeley has been incorporated. Authorized capital, \$50,000.

GREENLEAF.—First National Bank; in voluntary liquidation.

HORTON.—Farmers & Mechanics' Bank will shortly be opened.

JEROME.—Smoky Hill Investment Co. has been incorporated. Authorized capital, \$40,000.

LEAVENWORTH.—Manufacturers' National Bank; President, J. C. Lysle; Vice-President, George H. Hyde; Cashier, W. B. Nickels.

LIBERAL.—Bank of Liberal; Assistant Cashier, M. A. Nelson. — Citizens' Bank; President, Wm. Grace; Vice-President & Cashier, J. S. Morse; Assistant Cashier, E. E. Wilson.

MARVIN.—Bank of Marvin has been organized. Paid capital, \$15,000. President, L. A. Wheeler; Cashier, A. R. Hayes.

MARYSVILLE.—Exchange Bank (Schmidt & Koester); discontinuance of this bank, reported in July JOURNAL, was an error.
MEADE CENTER.—Meade County National Bank; Assistant Cashier, E. F. Rieman.
MEDICINE LODGE.—First National Bank; no Vice-President in place of W. W. Cook.
OTTAWA.—R. J. Waddell Investment Co. has been incorporated. Authorized capital, \$60,000. President, R. J. Waddell; Secretary & Treasurer, W. C. Allen.
PIERCEVILLE.—Pierceville State Bank; succeeded by G. W. Wight.

RHODE ISLAND.

CENTREVILLE.—Centreville Savings Bank has been chartered.

NARRAGANSETT PIER.—Narragansett Pier Savings Bank has been chartered.

PASCOAG.—Pascoag National Bank; Vice-President, James S. Cook; P. O. Hawkins, Cashier, in place of James S. Cook; no Assistant Cashier in place of P. O. Hawkins.

SLATERSVILLE.—Slatersville Savings Bank has been chartered.

WARREN.—National Hope Bank; Vice-President, C. R. Cutler.

WOONSOCKET.—Woonsocket National Bank; John W. Ellis, President, in place of Ira B. Peck, deceased.

TENNESSEE.

HUNTINGDON.—Bank of Huntingdon is reported here. Capital, \$25,000. President, G. W. Humble; Cashier, B. F. Ross; Assistant Cashier, J. McN. Wright.

JACKSON.—Second National Bank; W. T. Nelson, President, in place of John A. Pitts;

Clifton Dancy, Vice-President, in place of W. T. Nelson.

JOHNSON CITY.—Watauga Banking Co. is reported here. President, A. B. Bowman; Vice-President, E. E. Hunter; Cashier, Jno. W. Boring; Assistant Cashier, D. H. Gifford.

LEBANON.—Second National Bank; E. E. Beard, President, in place of Selden R. Williams.

SPARTA.—Farmers' Bank; Assistant Cashier, A. E. Rhea.

WAYLER.—Waverly Bank & Trust Co. is reported here. Capital, \$15,000. President, — Dorsey Cowell; Vice-President, James M. Nolan; Cashier, W. H. Meadow.

TEXAS.

CALDWELL.—Wm. Reeves & Co. are reported here.

DENISON.—First National Bank; W. G. McGinnis, Vice-President, in place of W. M. Mick.

GALVESTON.—W. L. Moody & Co. are in the banking business here.

HILLSBORO.—Hill County National Bank; J. A. La Bryer, Assistant Cashier, in place of T. C. Phillips.

LA GRANGE.—First National Bank has been authorized to commence business.

Capital, \$50,000. President, A. J. Rosenthal; Vice-President, A. T. Bradshaw; Cashier, H. A. Gladdish.

RICHMOND.—Dyer & Moore are reported here.

SAN ANTONIO.—Bexar County Savings Bank (Patterson, Souder & Co.) reported discontinued. — O'Connor & Sullivan; A. Hanal, Cashier, resigned.

SEGUIN.—E. Nolte & Sons; Cashier, Walter Nolte.

VICTORIA.—A. Levi & Co.; Assistant Cashier, J. K. Hexter.

WICHITA FALLS.—Panhandle National Bank; no President in place of John G. James; Herm. Specht, Vice-President, in place of O. P. Wood.

VIRGINIA.

CHARLOTTESVILLE.—People's National Bank; Benj. R. Pace, President, in place of R. T. W. Duke.

STAUNTON.—National Valley Bank; Henry A. Walker, Assistant Cashier, in place of J. E. Rollins.

WEST VIRGINIA.

CHARLESTON.—Charleston National Bank; Charles P. Mead, President, deceased.

WISCONSIN.

BEAVER DAM.—First National Bank; J. E. McClure, Cashier, in place of J. H. Barrett; no Assistant Cashier in place of J. E. McClure.

BLACK RIVER FALLS.—First National Bank; Vice-President, H. A. Bright; Assistant Cashier, F. H. Elmore.

SUN PRAIRIE.—Jones & Meeker are reported here. Style, Bank of Sun Prairie.

ONTARIO.

ALEXANDRIA.—Union Bank of Canada; F. W. S. Crispo, Manager, instead of Acting Manager.

ELMIRA.—Standard Bank of Canada has a branch here. Manager, J. Nicol.

GLENCOE.—Traders' Bank of Canada; Manager, Geo. Dobie.

KINGSTON.—Ontario Bank has opened a branch here. Manager, Thos. Y. Greet.

SARNIA.—Traders' Bank of Canada; J. C. Douglas, Manager, in place of Stuart Strathy.

SEAFORTH.—Canadian Bank of Commerce; John Aird, Manager, in place of A. R. Ireland. — North American Banking Co. have opened an office here. Manager, J. C. Smith.

ST. MARY'S.—Traders' Bank of Canada; C. S. Rumsey, Manager, not G. S. Rumsey.

WATFORD.—Traders' Bank of Canada; F. J. Winlow, Manager, in place of J. L. Gower.

MANITOBA.

MANITOU (P. O.: Archibald).—Cruthers & Co are reported here.

NEEPAWA.—Beautiful Plains Banking Co. is reported here. Manager, J. P. Curran. — D. H. Harrison is reported here.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, August 4, 1888.

There has been no lack of money in the banks during the month of July and the rates have been low. For the last two months the drift of currency has been toward the East and especially to New York city. The larger banks have not, however, been inclined to place their funds out of reach; they seem to be expecting a greater demand further on. They have pursued the old policy of loaning on call and have been disinclined to reduce rates even on this class of loans. Favorable reports of the crops indicate a future demand for money on the part of Western correspondents, and a revival of business after the summer months are over is also to be expected. This has led the managers of our controlling financial institutions, both banks and Trust companies, to pursue an extremely conservative course, and they have not, therefore, loaned with the freedom that the present money in their hands would seem to warrant. When it is considered that nothing has as yet been done by Congress to change the position the United States Treasury holds to the money market, no fault is to be found with the course pursued—the managers of the large financial institutions are eminently wise. When the current of circulation turns toward New York, the heavy drafts made to pay the imposts and internal revenue duties are not so much felt; but when the demands of the new business that is sure to start up in the Fall begin to be felt, without due precaution New York may be hard pressed to meet it. The Secretary of the Treasury can, it is true, purchase bonds, and he will doubtless be willing to do so extensively when the demand for money becomes such as to reduce the price. There are, however, two things that in case of stringency may be done by the Secretary. He may increase public deposits or purchase bonds, or he may do both. Probably increased bond purchases would be the first step, and deposits of public money would only be made if the bond purchases were insufficient to afford sufficient aid. The Secretary's ability to afford relief will, in any event, give great moral strength to the money market up to a certain point, but reliance on this alone will not prevent sudden emergencies from arising that may become serious before the remedy can be applied. The Secretary should therefore reasonably increase his purchases even at present prices in order to further reassure the market. We believe the banks of the country generally should pursue the conservative course now followed by the New York city and Eastern banks and prepare themselves for the busy season of the year now approaching. It is positive that even if Congress should take action largely reducing the revenues, that the effects of such a measure would not begin to be felt until some time next year. It is therefore very certain that the currency of the country will have to sustain the obstruction to its regular flow through the coming Fall and winter, which diverts to the United States Treasury so much of what would otherwise be ready to sustain the vast credits of the country. The dividend season of the year has passed without any additional important defalcations of interest on stocks and bonds, and the good effect of this may have had something to do with the increased tendency abroad to invest in American securities. Money is plenty abroad also, but there has been there as in this country much uncertainty as to the future. The danger anticipated in France on account of the uncertainty of the Panama Canal securities has been averted for the present by the comparative success of the new lottery loan.

FOREIGN EXCHANGE.—During the first week in July sterling exchange was not in any great demand and the market was quiet. Rates continued firm owing to the scarcity of commercial and security bills. During the week ending July 14th sterling exchange was quiet, the demand being light. The

supply of bills was limited and rates remained steady, except that short bills were a little cheaper. The rates hardly warranted gold shipments, but some \$2,000,000 were shipped on account of special transactions. During the week ending July 21st the market was dull and rates firm. The figures were the same as for the previous week. Gold shipments amounted to \$1,000,000. During the week ending July 28th the tendency of sterling exchange was downward, the demand being dull and there being some increase in the offers of commercial bills. The rates for discounts were also higher in London. There were no gold shipments during the week. The Bank of England rate has remained unchanged during the month at 2½ per cent. From July 5th to July 29th the Bank of England lost £1,299,000 in specie, and the Bank of France lost 6,025,000 francs in gold and 3,725,000 francs in silver. The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, \$4.86½; sight, nominal, \$4.88½; 60 days, actual, \$4.85½@ \$4.85¾; sight, actual, \$4.87½@ \$4.87¾; Cable transfers, \$4.87¼@ \$4.88½; Prime commercial sterling, long, \$4.84¼@ \$4.84¾; Documentary sterling, 60 days, \$4.84¼@ \$4.84½; Paris bankers', 60 days, 5.21¼@ 5.20¾; sight, 5.18¾@ 5.18½; Paris, commercial, 60 days, 5.28½@ 5.20¼; sight, 5.20½@ 5.20; Antwerp commercial, 60 days, 5.28¾@ 5.28½; Swiss bankers', 60 days, 5.21¾@ 5.21¼; sight, 5.19¾@ 5.18¾; Reichsmarks (4), bankers', 60 days, 95@95½; sight, 95½@95¾; Reichsmarks (4), commercial, 60 days, 94½@94¾; sight, 95@95½; Guilders, bankers, 60 days, 40 3 16@40¼; sight, 40¾@40 7-16; Guilders, commercial, 60 days, 40@40 1-16; sight, 40 8-16@40¼; Copenhagen, Stockholm and Christiana, krona, 60 days, 26 11-16@26¾; sight, 26 15-16@27. Paris dispatches quote exchange on London 25f. 32c.

The following table shows the highest and lowest posted rates for bankers' sterling at 60 days and sight and the average for prime commercial bills and for exchange on Paris in July and for the first six months of the year :

Silver owned by Treasury.....	\$46,697,846	\$47,634,842	\$45,294,750

NEW YORK BANKS.—During the week ending July 7th the combined gold and currency received from the interior by the New York banks was \$2,583,000 and they shipped \$2,116,000 making a gain, for the week, of \$467,000. By Sub-Treasury operations they gained \$3,100,000, and the total gain for the week was therefore \$3,567,000. During the week ending July 14th the banks shipped to the country \$1,791,000 and received \$2,070,000 gaining \$279,000. They lost, however, \$2,100,000 by Sub-Treasury operations making a net loss for the week of \$1,821,000. During the week ending July 21 the banks shipped \$1,760,000 to the country and received \$1,875,000 gaining from these transactions \$115,000. The drafts made by the Sub-Treasury on them exceeded their drafts on the Sub-Treasury by \$2,700,000 and this loss made their net loss for the week \$2,585,000. During the week ending July 28th the banks shipped \$755,000 to their outside correspondents and received \$2,109,000 from them gaining \$1,351,000. By their dealings with the Sub-Treasury they lost \$1,100,000 making a net gain for the week of \$254,000. From June 30 to July 28 the banks in the aggregate lost \$585,000. This is quite a contrast with the gain of \$7,181,000 made during the previous month, and if the same tendency to loss continues during August, we may see some closeness in September when large demands from correspondents are the rule. The following table shows the condition of the New York Clearing-House banks for a number of weeks past.

1888.	Loans.	Specie.	Legal-tenders.	Deposits.	Circulation.	Surp. Res.
July 28.....	\$379,488,600	\$91,113,200	\$39,230,400	\$412,909,700	\$7,566,200	\$27,116,275
July 21.....	379,630,500	91,475,400	38,744,300	415,117,200	7,662,200	26,440,400
July 14.....	379,406,500	93,664,200	38,598,700	418,234,000	7,734,700	27,734,400
July 7.....	380,476,700	90,979,700	36,814,800	412,910,800	7,711,300	24,316,800

The following table shows the highest, lowest and closing prices of the active stocks at the New York Stock Exchange in the month of July, the highest and lowest since January 1, 1888, and also during the year 1887:

* Stands for ex-Dividend.

The total registered sales of stocks for the month of July amounted to 4,486,632 shares, of which 3,331,403 represent transactions in the twelve following stocks, viz.:

	Shares.		Shares.		Shares.
Phil. & Reading	800,312	Western Union	238,244	Louisville & N.	155,961
Chicago & St. Paul	651,268	N. Y. & N. Eng.	219,965	Lake Shore	129,185
Del. L. & W.	295,688	N. Pacific, P'd.	176,874	Chicago & N. W.	124,825
Union Pacific	280,191	Rich. & West Pt.	167,040	Missouri Pacific	111,983

Leaving 1,155,229 shares representing dealings in 106 other stocks in which transactions were made. The sales of railroad bonds amounted to \$38,853,100 of State bonds to \$336,500, and of Government bonds \$202,400. In unlisted securities the dealings in bonds amounted to \$384,000, in stocks to \$39,017, in mining stocks to \$73,890, in American Cotton Oil certificates to \$79,263, and in Pipe Line certificates to \$11,919,000. As compared with the month of June the shares of stock dealt in July showed an increase of 323,721 shares, and the amount of transactions in railway bonds increased by \$7,818,100. There was an increase of \$79,100 in the amount of dealings in State bonds and a decrease of \$132,100 in Government bonds. The transactions in unlisted securities indicated a decrease as compared with the previous month with the exception of mining stocks and Pipe Line certificates, where more activity was shown. On the whole the month of July was an improvement on June. The increase in the surplus reserve of the banks, and the reports of good crops, a good outlook in the iron industry, and freer exportations of grain and cotton have caused a more cheerful feeling. The bulls are very hopeful. We think, however, that the improvement in July has been the result of abundant money in New York, and that the very influences which are looked upon as tending to strengthen prices, viz., good crops, will draw money to the interior and make it closer during the fall months, and have quite the contrary effect on stocks. As long as the revenues of the Government so exceed its expenditures, the feeling of security in the money market, which alone can lead to higher prices of stocks, will be absent.

The stock transactions of July do not indicate that the public has taken any great interest in investments. The bulk of the deals were in twelve stocks. It looks very much as if the alleged boom during the month were the result of a combination to press the shorts. The abundance of money in the banks doubtless gave the opportunity. While, as stated above, we do not believe that there will be the same chances to bull the market, after the out-of-town correspondents begin to draw on the New York banks for their fall work, yet the conditions of July may last through August. The latter is usually a dull month in business circles.

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange.

The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

NATIONAL BANK STATISTICS.—Statement of the Comptroller of the Currency on July 31, 1888, showing the amount of National Bank notes outstanding and the amount of lawful money on deposit with the Treasurer of the United States to redeem National Bank notes:

NATIONAL BANK NOTES.		
Total amount outstanding June 30, 1888.		\$262,166,694
Additional circulation issued during the intervening month:		
To new banks.	\$232,840	
To banks increasing circulation.	922,750	
Total.	\$1,155,590	
Surrendered and destroyed during the intervening month.	3,987,651	
Decrease in total circulation during the month.		2,732,061
Total amount outstanding July 31, 1888.		\$249,434,573
Decrease in total circulation during the preceding 12 months.	28,736,960	
Circulation secured by United States bonds (as below):		158,874,208
Decrease during the preceding month.	774,454	
Decrease during the preceding 12 months.	10,420,227	
Amount of outstanding circulation represented by lawful money on deposit with the Treasurer of the United States to redeem notes of—		
Insolvent National banks.	1,098,179	
Liquidating National banks.	6,991,804	
National banks reducing circulation under Section 4 of the Act of June 20, 1874.	31,853,942	
National banks retiring circulation under Section 6, Act of July 12, 1882.	50,616,445	
Total lawful money on deposit.		\$90,560,370
Decrease in aggregate deposit during the preceding month.	1,967,607	
Decrease in aggregate deposit during the preceding 12 months.	16,344,723	

The Increase in National Banks.—An addition of a thousand new banks to the National banking system in seven years is a most remarkable record. This has been the growth since 1831, and is a wonderful commentary on the advantages of this system over all others. The increase has been due to a steady growth in the smaller towns where banking facilities have been limited. Of these new banks, four-fifths are of \$100,000 capital or less, and one-half of \$50,000. This shows better than anything else the direction that small investments are taking.—*Financial critic*, Phila.

BANKERS' OBITUARY RECORD.

Davis.—Seth Davis died recently at Newton, Mass., at the advanced age of nearly 101 years. In 1881 he, with others, organized the Newton Savings Bank, the idea being original with him.

Elliott.—Gen. Washington L. Elliott, Vice-President of the California Safe Deposit and Trust Company, died recently in San Francisco, California, aged 66.

Gifford.—Pardon A. Gifford died June 30, aged 51 years. He was one of the organizers of the First National Bank of Easton at North Easton, Mass., in 1864 and held the position of Cashier as well as Treasurer of the North Easton Savings Bank until his death.

Gilbert.—Addison Gilbert, of Gloucester, Mass., died July 2 at the age of 79. He had been identified with the business interests of the place for nearly half a century, was President of the City National Bank and also of the Cape Ann Savings Bank. He left a property estimated at \$500,000 out of which he made many public bequests.

Goodin.—Charles R. Goodin, Assistant Cashier of the State Bank—formerly the State Savings Association—St. Louis, Mo., died suddenly July 15 at the age of 46. He had been in the employ of the bank for twenty-six years.

Hamilton.—George Hamilton, Treasurer of the Dexter Savings Bank, Dexter, Me., died July 6. His name had been prominently mentioned as having favored the suicide theory in the Barron murder case.

Hudson.—Thomas D. Hudson, President of the Commercial Bank, Brooklyn, N. Y., died at his residence in that city July 30 at an advanced age. He had been identified with the business interests of Brooklyn for a great number of years.

Irvin.—Richard Irvin, formerly a member of the mercantile firm of Richard Irvin & Co., New York city and a Director of the Mechanics' National Bank—of which he had also at different times been President—died June 29, aged 89 years.

LeRoy.—William H. LeRoy died at his home in New Rochelle, N. Y., July 28, aged 98 years. He was one of the oldest members of the N. Y. Stock Exchange.

Leverich.—James H. Leverich died at Cayuga Lake, N. Y., July 17, aged 40 years. He was a member of the Stock Exchange firm of C. D. & J. H. Leverich, N. Y. city, and was also identified with several prominent social and sporting clubs.

Lowe.—Dr. Abraham T. Lowe, formerly President of the First National Bank, Boston, died at Ashburnham, Mass., July 4, aged 92 years. He had held several prominent positions, was one of the organizers of the Safety Fund Bank—which afterwards became the First National—and was also known as the author of some valuable medical works.

Mead.—Charles P. Mead, President of the Charleston National Bank, Charleston, W. Va., died July 19.

Merriam.—David E. Merriam, formerly Cashier of the Leicester National Bank, Mass., died June 22nd at the age of 74 years. He had been Cashier of that institution for nearly forty years having resigned in 1885 on account of ill health, but retained his seat in the Board of Directors until his death.

Meyer.—Christoph Meyer, the millionaire rubber manufacturer, died in New York city, July 31 at the age of 70. He came from Germany nearly forty years ago and became at once identified with the business out of which he accumulated his millions. He was a stockholder and Director of the Ninth National Bank and the American Bank Note Company, as well as largely interested in the Home Insurance Company and Union Pacific Railroad Company.

Rogers.—William C. Rogers, a well known Boston banker, died in London, July 2. He was one of the trustees of the Eastern railroad bondholders, and also a silent partner in the London banking firm of J. S. Morgan & Co.

Sibley.—Hiram Sibley, died in Rochester, N. Y., July 12 at the advanced age of 81. He was one of the wealthiest and best known citizens of Western New York, his fortune being estimated at ten millions. He was born in North Adams, Mass., and was a typical self-made man. He was the first President of the Western Union Telegraph Company and, in connection with Ezra Cornell, laid the foundation of the most magnificent telegraph organization in the world. In addition to his other business undertakings—including an extensive seed and nursery business—he was President of the Bank of Monroe and held that position until his death. His charities were numerous and his death is regretted by hosts of admiring friends.

Story.—Austin P. Story, President of the Ross County National Bank, Chillicothe, Ohio, died July 19.

Stuckslager.—Harrison Stuckslager, one of the oldest and best known bankers in central Iowa, died recently at his home in Lisbon. He was a member of the firm of Stuckslager & Auracher.

Thompson.—John H. Thompson, Cashier of the German-American Bank, Rochester, N. Y., died in that city July 25. He was very popular among the bankers and merchants of the city.

Twichell.—B. F. Twichell, President of the Bank of Commerce, New Orleans, La., died recently at Kansas City, Mo. A short time ago Mr. Twichell decided to give up business temporarily on account of impaired health and was on his way North to spend the summer at the time of his death.

CANADIAN BANKS.—Following is a summary of the assets and liabilities of the chartered banks of Canada, made from the reports furnished by them to the Department of Finance on June 30, 1888 (cents omitted):

ASSETS.	LIABILITIES.
Specie.....	Capital authorized.....
Dominion notes.....	Capital subscribed.....
Notes of and checks on other banks.....	Capital paid up.....
Balances due from other banks in Canada.....	Reserve fund.....
Balances due from agencies of the bank or from other banks or agencies in foreign countries.....	Notes in circulation.....
Balances due from agencies of the bank or from other banks or agencies in the United Kingdom.....	Dominion Government deposits payable on demand.....
Dominion Government debentures or stock.....	Dominion Government deposits payable after notice or on fixed day.....
Provincial, British or Foreign or Colonial public securities other than Canadian.....	Deposits held as security for execution of Dominion Government contracts and for insurance companies.....
Loans to the Government of the Dominion.....	Provincial Governm't deposits, payable on demand.....
Loans to Provincial Governm'ts.....	Provincial Governm't deposits, payable after notice or on a fixed day.....
Loans, discounts or advances on stocks, bonds, etc., other than Canadian as collateral.....	Other deposits, payable on demand.....
Loans, discounts or advances on current accounts to municipal corporations.....	Other deposits, payable after notice or on a fixed day.....
Loans, discounts, etc., on current accounts to other corporations.....	Loans from or deposits made by other banks in Canada, secured.....

Loans to or deposits made in other banks, unsecured.....	Due to other banks in Canada.....
Other current loans, discounts and advances to the public.....	Due to agencies of bank or to other banks or agencies in foreign countries.....
Notes and bills discounted, overdue and not specially secured.....	Due to agencies of bank or to other banks or agencies in the United Kingdom.....
Other overdue debts not specially secured.....	Other liabilities.....
Notes and bills discounted, overdue and other overdue debts secured by real estate or securities.....	
Real estate the property of the bank (other than the bank premises).....	
Mortgages on real estate sold by the bank.....	
Bank premises.....	
Other assets.....	
Total assets.....	Total liabilities.....

Loans to Directors or firms in which they are interested, \$7,608,810. Average amount of specie held during the month, \$6,576,975. Average amount of Dominion notes held during the month, \$10,702,067.

The Guarantee Company of North America shows, by its statement of June 30th, a surplus—to shareholders, on its capital of \$304,600—of nearly \$152,000, and a surplus to policy holders of \$456,000. The total resources of this company are now nearly a round million. The total of claims paid to date amounts to \$296,405. All of which goes to prove the necessity for such a company and the certainty of its success when so ably managed as the Guarantee Company of North America.

MONETARY CHRONOLOGY.—JULY, 1888.

2. **MONDAY.**—Bond offerings were: Four per cents, registered—\$50,000 at 127½, \$75,000 at 127¼, \$500 at 128, \$500 at 127, ex July interest; \$1,500 at 128½, \$5,000 at 127, ex interest; \$100 at 127, ex interest. Four-and-a-half per cents, registered—\$25,000 at 107¾, \$500 at 107½. 3. **TUESDAY.**—Bond offerings aggregated \$440,600. Four per cent. coupon—\$6,500 at 127½; \$25,000 at 127¼. Four per cent. registered—\$10,000 at 127; \$54,000 at 128; \$60,000 at 127½; \$20,000 at 127½ ex interest. Four-and-a-half per cent. registered—\$100 at 107¾; \$275,000 at 107½. Accepted \$20,500 four per cent. reg. bonds at 127.
5. **THURSDAY.**—Bond offerings were: Four per cent. registered—\$80,000 at 127½; \$35,000 at 127; \$2,500 at 128; \$100 at 128; \$35,000 at 127; \$5,000 at 128½; \$20,000 at 127½. Four per cent. coupon—\$20,000 at 127¼. Four-and-a-half per cent. registered—\$275,000 at 107½; making a total of \$452,600. Accepted \$37,000 4 per cent. registered bonds at 127.
6. **FRIDAY.**—Bond offerings aggregated \$437,000. Four per cent. registered—\$80,000 at 127½; \$20,000 at 127¼; \$50,000 at 127¾. Four-and-a-half per cent. registered—\$275,000 at 107½; \$2,000 at 107½; \$10,000 at 107¾. There were no acceptances.
7. **SATURDAY.**—Bond offerings to-day aggregated \$549,000 in lots as follows: Four per cents, registered—\$2,000 at 127, \$2,500 at 127¾; \$20,000 at 127½; four-and-a-half per cents, registered, \$275,000 at 107½, \$250,000 at 108. There were no acceptances.
9. **MONDAY.**—Bond offerings: Four per cent. registered—\$4,000 at 127¼. Four-and-a-half per cent. registered—\$100,000 at 107¼; \$15,000 at 107½, making total offerings of \$119,000. Accepted \$116,050 bonds as follows: Four-and-a-half per cent. registered—\$100,000 at 107¼; \$15,000 at 107½; \$1,000 at 107½, and \$50 at 107¼.
10. **TUESDAY.**—Bond offerings aggregated \$583,000. Four per cent. coupon—\$10,000 at 127½. Four per cent. registered—\$1,000 at 127; \$50,000 at 128; \$22,000 at 127½; \$100,000 at 127¼; \$80,000 at 127¼. Four-and-a-half per cent. registered—\$35,000 at 107¼; \$275,000 at 107½; \$30,000 at 107¾. Accepted, four per cent. registered—\$1,000 at 127. Four-and-a-half per cent. registered—\$2,000 at 107.80.
11. **WEDNESDAY.**—Bond offerings aggregated \$1,628,250. Four per cent. coupon—\$30,000 at 127½. Four per cent. registered—\$50,000 at 127¼; \$100,000 at 127¼; \$22,000 at 127½; \$100,000 at 127½; \$5,000 at 127¼. Four-and-a-half per cent. coupon—\$18,000 at 107¾. Four-and-a-half per cent. registered—\$561,750 at 107½; \$7,000 at 107¼; \$275,000 at 107½; \$35,000 at 107¾. There were no acceptances.
12. **THURSDAY.**—Bond offerings aggregated \$562,850. Four per cent. registered—\$2,800 at 127¼; \$50,000 at 127½; \$300,000 at 127½; \$22,000 at 127¾. Four per cent. coupon—\$3,250 at 128. Four-and-a-half per cent. registered—\$275,000 at 107 11-16. No bonds were accepted.
13. **FRIDAY.**—Bond offerings to-day aggregated \$1,118,000. Four per cent. coupon—\$4,000 at 127½; \$15,000 at 127¾. Four per cent. registered—\$180,000 at 127¼; \$80,000 at 127½; \$82,000 at 127; \$200,000 at 127¼. Four-and-a-half registered—\$400,000 at 107¾; \$275,000 at 107 11-16. Accepted \$32,000 4 per cent. registered at 127.
14. **SATURDAY.**—Bond offerings amounted to \$2,554,000. Four per cent. coupon—\$40,000 at 127½. Four per cent., registered—\$50,000 at 127¾; \$1,000 at 127; \$15,000 at 127¼; \$160,000 at 127¼; \$1,000,000 at 127¼; \$22,000 at 127¾. Four-and-a-half per cent., registered—\$276,000 at 107 13-16; \$1,000,000 at 107½. Accepted, \$1,000 four per cent., registered at 127.
16. **MONDAY.**—Bond offerings amounted to \$471,850. Four per cent., registered—\$200 127; \$100,000 at 127¼; \$1,500 at 128; \$250,000 at 127¾; \$18,000 at 127¼. Four per cent., coupon—\$40,000 at 127½. Four-and-a-half per cent., registered—\$160 at 107¾. Four-and-a-half per cent., coupon—\$1,500 at 107¾. Accepted, \$200 four per cent. registered at 127.
17. **TUESDAY.**—Bond offerings to-day aggregated \$1,540,100. Four per cents., coupon—\$40,000 at 127¼. Four per cents., registered—\$180,000 at 127¼; \$100 at 127; \$50,000 at 127½; \$22,000 at 127¾. Four-and-a-half per cents., registered—\$1,000,000 at 107½; \$276,000 at 107 11-16. Accepted, four per cents., registered—\$1,000 at 127; \$100 at 127.
18. **WEDNESDAY.**—Bond offerings to-day aggregated \$1,901,250. Four per cent., registered—\$200,000 at 127¼; \$22,000 at 127¾. Four per cent., coupon—\$3,250 at 127½. Four-and-a-half per cent., registered—\$400,000 at 107¾; \$276,000 at 107¾; \$1,000,000 at 107¾. Accepted, four-and-a-half per cent., registered—\$56,000 at 107 35-100.
19. **THURSDAY.**—Bond offerings amounted to \$1,500,000. Four per cents, registered—\$100,000 at 127 7-16, \$200,000 at 127½. Four per cents, coupon—\$15,000 at 127 7-16, \$50,000 at 127¼. Four-and-a-half per cents, registered—\$115,000 at 107 7-16, \$1,000,000 at 107¾, \$10,000 at 107¾. Four-and-a-half per cents, coupon—\$10,000 at 107¾. None of the offers were accepted.
20. **FRIDAY.**—Bond offerings aggregated \$1,500,000. Four per cent. registered—\$100,000 at 127 7-16; \$200,000 at 127½. Four per cent. coupon—\$15,000 at 127 7-16; \$50,000 at 127¼. Four-and-a-half per cent. registered—\$115,000 at 107 7-16; \$1,000,000 at 107¾; \$10,000 at 107¾. Four-and-a-half per cent. coupon—\$10,000 at 107¾. No bonds were accepted.

21. **SATURDAY.**—Bond offerings amounted to \$678,800. Four per cent. registered—\$800 at 127; \$200,000 at 127½; \$22,000 at 127¾. Four per cent. coupon—\$50,000 at 127¾. Four-and-a-half per cent. registered—\$10,000 at 108; \$20,000 at 107¾; \$100,000 at 107¾; \$276,000 at 107¾. Accepted, four per cent. registered—\$800 at 127.
22. **MONDAY.**—Bond offerings amounted to \$40,500. Four per cents, registered—\$10,000 at 127¾; \$5,000 at 127. \$:00 at 127, \$400 at 127¾. Four-and-one-half per cents, registered—\$25,000 at 107¾. Accepted the following bonds: Four per cents, registered—\$100 at 127, \$400 at 127¾, \$500 at 127. Four-and-a-half per cents, registered—\$25,000 at 107¾.
24. **TUESDAY.**—Bond offering aggregated \$318,000. Four per cents, registered, \$1,000 at 127¾; 4½ per cents, registered \$32,300 at 107¾; \$10,000 at 107¾; \$219,000 at 107¾. Accepted, \$307,300 registered 4½ per cents at 107¾; \$1,000 reg. fours at 127¾.
25. **WEDNESDAY.**—Bond offerings aggregated \$627,700. Four per cent., registered—\$2,000 at 127¾; \$500 at 127¾; \$22,000 at 127¾; \$1,000 at 127¾; \$250,000 at 127¾. Four per cent., coupon—\$50,000 at 127¾. Four-and-a-half per cent., registered—\$10,000 at 107¾; \$200 at 107¾; \$1,000 at 107¾; \$276,000 at 107¾. Four-and-a-half per cent., coupon—\$15,000 at 107¾. Accepted, \$1,000 four per cent. registered bonds at 127¾.
26. **THURSDAY.**—Bond offerings amounted to \$223,000. Four per cent., registered—\$200,000 at 127¾; \$22,000 at 127¾. Four-and-a-half per cent. registered—\$400,000 at 107¾; \$276,000 at 107¾. Four-and-a-half per cent., coupon—\$25,000 at 107 2-5. Accepted, \$25,000 four and one-half per cent. registered bonds at 107 2-5.
27. **FRIDAY.**—Bond offerings aggregated to \$298,800. Four per cent. registered—\$800 at 128; \$22,000 at 127¾. Four-and-a-half per cent. registered—\$276,000 at 107¾. Accepted, four and one-half per cent. registered bonds—\$500 at 107¾. Four-and-a-half per cent. coupon—\$500 at 107¾.
28. **SATURDAY.**—Bond offerings aggregated \$572,000. Four per cent. registered—\$175,000 at 127¾; \$22,000 at 127¾. Four per cent. coupon—\$25,000 at 127¾; \$4,000 at 127¾. Four-and-a-half per cent. registered—\$30,000 at 107 2-5; \$5,000 at 107¾; \$276,000 at 107¾; \$20,000 at 107¾. Four-and-a-half per cent. coupon—\$5,000 at 107¾; \$10,000 at 107¾. Accepted, four and one-half per cent. registered bonds \$30,000 at 107 2-5.
- The following statement in regard to the purchase of United States bonds under circulars of April 17, 1888, was prepared at the Treasury Department: Amount purchased of four per cents., \$18,735,500; amount purchased of four-and-a-half per cents., \$8,942,800; total, \$27,678,300. Cost of four per cents., \$23,794,600 58. Cost of four-and-a-half per cents., \$9,628,678 45; total, \$33,423,279 03.

American Securities in Germany.—The Berlin correspondent of the *London Economist*, after alluding to the conditions of the German money market and the indisposition of ordinary investors there to purchase low interest bearing securities, while large holders are indisposed to hold securities bearing a high rate of interest, says: "As the conversions of last year have created large gaps, it has been successfully attempted to fill them up by the importation of the great number of other loans which in the course of the last twelve months have been added to the list of quotations of the Berlin Stock Exchange. Yet, it would be unwise to conceal the fact that the Mexican, the converted Norwegian loan, the Transvaal, Chinese and many other loans have not become what is sometimes called 'popular.' At the risk of disturbing some illusions, I should say that they ought to be counted among the floating material with which the Stock Exchange operates. Argentine and Egyptian loans have penetrated deeper and obtained a more stable footing, though I must add that I have heard many regret that they had permitted themselves to be frightened into selling Russians and exchanging them for Argentine loans. The dissatisfaction on this score is becoming more marked since the public are advised of an approaching conversion of the Argentine. The drift of these remarks leads me to mention that efforts have been made for a long time past to popularize American railroad securities in Northern Germany. American stock always had a very good market in Frankfurt-on-the-Main, the centre for Southern and Central Germany. Various causes, the transference of the financial strength of Frankfurt to Berlin and some drawbacks in the development of the railroads in the United States had, however, the effect of stopping the progress of American railroad shares and bonds in Germany; but within the past two years, several Berlin financiers have prepared the way for a new expansion, and we have latterly witnessed a growing readiness on the part of the public, even in Northern Germany, to discard certain prejudices. Recent transactions have been successful, especially the issue of the 4 per cent. gold bonds of the Illinois Central Railroad Company, owing partly to the high reputation of the firm of S. Bleichroeder. The Deutsche Bank is about to issue the 6 per cent. third mortgage bonds of the Northern Pacific Railroad Company."

WANTED—OFFICERS AND CLERKS, POSITIONS, BANKS FOR SALE, LOCATIONS WANTING BANKS, ETC.

[Notices under this head—space not over four lines—cost \$2 an insertion. If replies are to be sent to this office the advertiser must send us two stamped envelopes addressed to himself, in which the replies will be forwarded.]

FOR SALE.—Ten thousand dollars' worth of the stock of an organized State Bank in Kansas paying an annual dividend of over 24 per cent. Will sell all or a part of the stock. Address "KANSAS," care of Rhodes' JOURNAL, New York.

RHODES'

JOURNAL OF BANKING.

Vol. XV. SEPTEMBER, 1888. No. 9.

THE QUESTION of substituting hand presses for steam presses in executing the fine work of the Bureau of Engraving and Printing has been discussed in the JOURNAL for several months past and our readers will bear witness that we have spoken plainly on this important subject. We have all along advocated that not only better work could be done but greater security afforded from counterfeiting by returning to the old system of hand work in preference to the latter-day methods of steam-power printing. It is, therefore, with considerable satisfaction that we note the recent action of the House of Representatives in passing a bill requiring that all United States notes, certificates and internal revenue stamps shall be printed on hand presses, and that steam presses shall be discarded. The JOURNAL has always insisted that the work turned out by the Bureau of Engraving and Printing was not only inferior—unworthy of the imprint of the United States—but furnishing practically no security against expert counterfeiters. It is even claimed that the notes of the Southern Confederacy were vastly superior in workmanship and quality to those turned out under the high pressure steam processes which have prevailed for some years past at Washington. We have a right, however, to expect better things in the future; and if, in addition, the work of engraving and printing the Nation's currency is left open to the honorable competition of those who are not only able but willing to do it, the day is not far distant when the paper money of this country will be elevated to its proper standard and counterfeiting become so difficult as to be unprofitable.

THE FINANCIAL PROBLEM heretofore occupying the attention of the public and the press has been the disposition of the surplus. This question has occupied the attention of all from the President down. Every financial paper has teemed with suggestions and plans. Public officers and prominent bankers have been interviewed and their views obtained and published. Money is said to be the root of all evil, and the surplus has been alleged to be the concentrated essence of the

root. The air has been full of apprehension and distrust as to the effect of this appalling monster. Congress has been appealed to to enact measures of relief. Plans for refunding bonds, for buying bonds, for depositing with the banks, and for extraordinary expenditure have been proposed. Congress, however, has continued apparently indifferent as to any of these methods. Its energies have been concentrated on the reduction of the customs duties, and after much struggle the Mills' bill was passed by the House, although without much prospect of its passage in the Senate. Looking on the surplus as a reality under existing law, the only method of reducing it and returning the money to circulation was by the purchase of bonds at a premium. This method has been supported with much warmth as the great reliance at the present time; but the Government itself has, with much wisdom, decided to move slowly in the matter. Only recently a circular has been issued by a prominent banking firm urging that \$132,000,000 of cash had, on August 1st, accumulated in the Treasury, and arguing that the purchase of bonds should be increased. It now appears, however, that all the excitement about the difficulty of reducing the surplus has been premature. Congress, while seeming to do nothing, has been at work all the time. Silently, like snow falling in the night, the appropriations have accumulated until they almost equal the amount of the anticipated revenues of the coming fiscal year. The Mills' bill becomes a work of supererogation, and the various plans for using the surplus to reduce the debt lose their charm. Congress has proved its capacity to deal with this intricate question.

IN AN ARTICLE in the July number of the "Forum" on "Moral Principle in Public Affairs" the Hon. Wm. L. Trenholm, the Comptroller of the Currency, uses the following forcible language. However injurious the accumulation of surplus in the Treasury may in some respects have been, the view taken by the Comptroller is certainly too pessimistic. It is an able paper and being prepared by an official in the high position occupied by Mr. Trenholm is calculated to attract attention :

"During the nine years since specie resumption the Government has collected from its people eleven hundred millions of dollars more than its ordinary expenditures, including pensions and sinking fund investments; about a thousand millions has been consumed in reducing the Federal debt, and we have a surplus of a hundred millions left, with no prospect of its disbursement except by paying bonds at a constantly rising premium. During these nine years the industries of the country have suffered from the cruel drain, yet Congress after Congress has been either unable or unwilling to reduce taxation.* * *

For nine years the Treasury has daily sucked in great sums of money which the Government should not take, to which it has no just title, and which is really robbed from the people; but no sense of shame flushes the cheeks of any among the hundreds in Congress and the thousands outside who can arrest this drain and abolish this wrong, but who will not do so

because of the restraints of party politics, or for fear that loss or injury may result to some investment or some enterprise in which they are interested.

Now and then some petty thief, tormented by remorse, is driven to divest himself of a few dollars or a few cents, and these are mingled with the millions which the law is systematically stealing from the people; the newspapers chronicle another contribution to the Conscience Fund, but the incident awakes no sympathetic movement of conscience among those who profit, politically or otherwise, by the despoiling of their fellow-citizens.* * *

The entire surplus revenue is wasted, so far as the individuals are concerned to whom the money rightfully belongs and from whom it has been wrongfully taken. Regarded as their money, and not, as it is not, the money of the Government, every disposition of it is hurtful, except its restitution, dollar for dollar, cent for cent, to the individuals from whom it came. Whether used to buy silver at a discount or bonds at a premium, whether consumed in unnecessary expenditures or locked in the crypt of the Treasury, what each man contributes through excessive taxation to the surplus is as absolutely lost to him as if it were 'in the deep bosom of the ocean buried.' To speak of such expenditures as 'restoring the money to the people' is either a fraud or a fallacy, according to the lights of the speaker.* * *

The citizens of the United States, as taxpayers, have been for years knowingly paying for their Government more than it actually costs; certain honored and trusted Senators and Representatives have employed the force of law to compel them to do so, and certain party leaders and newspapers have used false statements, fraudulent representations and suggestions, and insincere arguments to mislead voters and to maintain this extortion, while the people seem to 'love to have it so.' Hence, it appears that without violence to moral sensibility, we repress and punish in the individual what we exact of the citizen. We send extortioners to jail and return to Congress those who retain excessive taxation. We execrate the common liar and subscribe to newspapers that live upon economic falsehoods. We outlaw personal waste and fasten profligacy upon our Government."

A LETTER HAS BEEN RECEIVED from a Massachusetts bank enquiring whether we do not think that the Comptroller should require reports from National banks in voluntary liquidation, and also if in our own opinion the winding up of such banks should not be more under the control of the Government. Sections 5,220 and 5,221 provide that shareholders owning two-thirds of the stock of a National bank may put such bank in liquidation. It is but just that the stockholders, the proprietors of the institution, should have it in their power to go out of business when they choose. Apart from the amount due to stockholders a National bank when in business incurs liabilities to depositors and bill holders. The payment of the latter is guaranteed by the Government, and therefore when the stockholders vote to put their bank in liquidation, they are required to give notice to the Comptroller of the Currency. They may then relieve themselves, as far as the Government guarantee of the notes is concerned, by depositing within six months lawful money to redeem the notes, and are then permitted to withdraw their bonds. The liabilities to depositors are next to be provided for. Should the Government still continue to exercise a supervision over the affairs of the bank until all depositors

are paid? The law does not absolutely require the Comptroller to exercise any supervision over a bank in liquidation, after the redemption of its notes has been provided for, but the law places the Comptroller in the same position as regards reports from banks in liquidation as from other banks. He can call for their reports and he can also order them to be examined. If there is any benefit to the public in the supervision of going banks, it would seem that there would be an equal benefit in the supervision of banks in liquidation. This supervision need not in any way take the immediate management of the liquidation out of the hands of the bank's own officers any more than the supervision exercised over going banks interferes with their daily business. We think therefore that the operations of liquidating banks should be as carefully supervised and published as those of banks in operation.

ONE OF THE SIGNS of the times is the recent remarkable increase of State banks in New York and more especially in New York city. Within the last ninety days no less than ten institutions have been chartered by the State Superintendent, nearly all of them new save in one or two cases where they have succeeded National banks. It is an interesting question whether this can be taken as an indication that the financial undercurrent in New York has again turned in the direction of the old State banking system. It may be said that, except in the city of New York and the larger cities where these banks have been organized, the small amount of capital invested would indicate one of two things—either a lack of confidence in the willingness of the people to accept at the present time, the absolute surrender and the substitution of the State for National supervision of the banking system, or an abiding faith that, in spite of its enemies, the National banking system will yet overcome all opposition and eventually triumph, by securing such Congressional enactments as will extend its perpetuity indefinitely. Be that as it may, there is no disguising the fact that a banking system managed and supervised as in the State of New York at the present time is rapidly gaining confidence and strength; and, if a return must be made to the old order of things, it is safe to assume that banking capital cannot be handled more safely and discreetly and with less risk to depositors than under the New York State system as at present conducted.

WHETHER NATIONAL BANKS will ultimately cease to exist—whether they will in some as yet undefined way secure a perpetual lease of life, or whether they will, eventually, like the Arabs be obliged to voluntarily liquidate and steal quietly away, are questions which are of vital importance to the financial world. What National banks have done for the country in the past is patent to everyone—even the schoolboy is as familiar with their history as with the alphabet.

There is no doubt that the word "National" possesses a charm for all true Americans which, when imprinted on a bank note, acts like magic and is the "open sesame" to all things material.

And yet, in the face of all the popularity acquired during the twenty-five or more years of its existence—notwithstanding the great benefits to be derived from a uniform system of currency under National supervision and the facility with which such a system can be adapted to localities there is, in many minds, a doubt as to whether it has not outlived its usefulness and will, in the course of time, become a magnificent relic of the past. It cannot be denied that, all things considered, the system of National banks is nearer financial perfection than anything ever before attempted in this or any other country. Organized and inaugurated at a time when the country was in great peril—suffering from foes without and within, with a financial system that was rotten from the United States Treasury down to the smallest wild-cat bank which grew and flourished in Western wilds, the advent of National banks, furnishing, as they did, not only absolute security but a uniform currency was hailed with satisfaction by all classes. It was something new in finance that a bank note issued by a bank in Florida or Texas would be readily taken at par in Maine, New York or California. It was such a contrast to the old-time methods when bank bills could not easily be passed outside their own State or locality even—and if at all, at a great discount—that it is no wonder the people quickly acquired a liking for such a system, and it is doubtful if they will be inclined to relinquish it easily. It then becomes a grave question, why and for what reason is this apparent decline in the National banking system? We say "apparent," because it is not at present altogether real; and yet, unless there is a radical change in the methods adopted of late years by Congress—unless a different policy be pursued, the system which has been such a blessing to the entire country will, slowly but inevitably, drift back into the old and unsatisfactory channel of irresponsible banks which then existed and to-day exist in too many localities—institutions which may be said to be run exclusively on faith, hope and charity—with a large amount of faith for capital and a very small portion of charity!

With all respect and the greatest appreciation for the system of banking as at present managed in several States it cannot be denied that it will be a sorry day for this country when the last National bank is liquidated, when National supervision of banks is superseded by a multiform State system as varied as the pictures in a kaleidoscope. Doubtless banking is and would be more profitable for the parties directly interested if the National system were completely wiped out—and it has been strongly intimated that much of the opposition to any favorable legislation affecting National banks has been inspired by those who would tear down all the barriers created during the past quarter of a century for the protection of note-holders and depositors,

choosing rather to sacrifice the general good for the sake of larger profits.

While it is not well to build up and foster any class or business at the expense of the many, that certainly cannot be urged against National banks. They are acknowledged by all to *have been* and, under proper modifications, made necessary by the changed order of things—principally the rapid reduction of the National debt—will continue to be the popular system which fully embodies the American idea of “the greatest good to the greatest number” compatible with absolute security.

IT IS OFTEN SAID that truth is stranger than fiction, and a practical illustration of it has been again furnished in the case of the recent bank scandal in Hillsdale, Michigan.

Here was a man supposed to be wealthy enough, popular enough and possessing sufficient confidence of the community to found a banking institution which he christened with his own name. As usual in such cases his wealth was greatly over-estimated and the faith of confiding depositors increased in about ten-fold ratio, until Waldron's Bank soon became the synonym for all that was good and sound in banking in that section of the country. Not content with enough prosperity to satisfy the ordinary ambition of mankind another bank was opened in a near-by town in the same county, and this bank, intended doubtless as a feeder, so to speak, of the parent bank was styled a Savings Bank.

The projector well knew the value of a name, especially when applied to a bank; for individuals are, after all, very much like a flock of sheep and follow the bell wether in much the same style, whether it be in banking or other business. There is something in the very title of “Savings Bank” which exerts a drawing influence upon the public, and when that name can be used, as in many cases, without the State protection which it implies, it is all the more dangerous but none the less fascinating. And so it came to pass that this shrewd, calculating financier after a time found himself at the head and virtual controller of the large sums deposited in two banks. The outcome of it all has been already rehearsed in the daily press and the main facts are printed elsewhere in this issue of the JOURNAL. With prosperity came power, and with that, greater greed that finally culminated in great scandal. Waldron has fled, his faithful partner and over-confiding depositors left in the lurch and, as is usually the case, everybody wonders how it could have been done! It now transpires that Waldron was leading a dual existence—a life which is certain to terminate in disaster and shame.

There are too many Dr. Jekylls and Mr. Hydes in the banking business—who are one person to the public and another and far different being in their inner consciousness. The proper remedy for all this would seem to be a National or State supervision of all financial

institutions which receive deposits from the public, holding the managers to a strict accountability for all moneys entrusted to them. Above all, Savings banks should not only be so in name but have all the safeguards and protection for depositors thrown around them which are the result of years of experience and the rigid enforcement of just laws.

SOMEHOW OR OTHER there seems to be, of late, a marked falling off in the bond offerings and acceptances. One day, not long since, the offerings were only \$20,000, on another there were no offerings, and as late as August 30, only \$255,000 of bonds were offered and *none* accepted. These last-named offers included fours at 128½ and four-and-a-halves at 108½. Many persons are wondering what the Secretary of the Treasury means to do. It is evident he must do one of two things—either advance the price for bonds offered or else shut up shop. Those who own the balance of United States bonds unredeemed can afford to hold them and would rather draw the interest and wait until maturity for redemption, than sell out at a sacrifice. It looks very much as if Secretary Fairchild had found himself confronted with a dilemma having at least two horns—one, the dissolving view of the great surplus as evidenced by the recent figures furnished by the Treasury Department based on Congressional appropriations for the fiscal year, and the other, the unwillingness of holders to part with their securities except at a much greater price than the Secretary is now offering.

The question then resolves itself into this—either the Secretary wants to buy more bonds or he does not. If he buys more he must pay more. If he does not conclude to exercise his authority and extend purchases by increasing his limits, the suspicion of sincerity is at once raised.

What the public generally would like to know is, does Secretary Fairchild want to buy any more bonds?

BOSTON SEEMS, according to the reports published in the newspapers of that city, to be enjoying a monopoly of the Bucket Shop business. No less than seventy-five such concerns are in full blast at present—which rather overtops even the palmiest days of their existence in New York. Although conducted very quietly, there is said to be an amount of business much in excess of that on the Stock Exchange daily transacted in these concerns. Much of this is attributed to dullness, but the real reason can doubtless be found in the fact that better facilities are afforded for dealing in small lots of stock and at less rates of commission than is charged by reputable Stock Exchange firms. It is quite generally believed that Bucket Shops are but little better than gambling houses; but it is an open question whether or not the Stock Exchanges of the country are not, in a great measure, to blame for their inception and continuance. In New York

city, since a more liberal policy was adopted in dealing with the public—both investors and speculators—there has been a marked decline in these swindling concerns, and when business on the Stock Exchange ceases to be a monopoly then will the days of Bucket Shops be numbered.

THE LAW CREATING additional reserve cities does not appear to have fulfilled the expectations of some of those most anxious to secure its passage, in that it would foster new money centres that would reduce the preponderance of New York city as the great depository of the country. The deposits in the banks in many of the newly made cities of reserve have doubtless increased, but not more than they would have done in any event. They have increased in the New York city banks also. There is, however, no doubt but that the law has been a convenience to some of the country banks inasmuch as it permitted them to count as reserve, balances which their business required them to keep at certain moneyed centres, which the law now permits to become reserve cities.

CHARLES I. DE BAUN, former Assistant Cashier of the National Park Bank, New York city has been discovered in his Canadian hiding place, and he seems to be so well pleased with his new home that he does not care to return to the United States even under the persuasive powers of a requisition warrant. De Baun's history is well known. For twenty-two years he was in the employ of the bank in question, rising from a subordinate position to that of Assistant Cashier, and, at the time his rascality was discovered was acting as Cashier—to which position he would have soon been promoted.

In an evil hour De Baun was tempted to appropriate some of the bank's money to his own use—although receiving a large salary, and, by an ingenious system of falsifying his accounts this was continued until the sum amounted to nearly \$100,000. How much larger it might have grown no one can tell; but just then the President died, which made necessary the election of a new official, the reorganization of the entire working force of the bank and the consequent examination of its affairs. There was nothing left for De Baun but flight and no place of quick refuge but Canada.

The moral of it all is: So long as Canada affords a certain place of security for criminals just so long will crimes, like those of De Baun's, be committed. If the guilty party knew that there was no escape from his crime upon detection, if he knew that he would certainly receive the punishment merited and that there was no spot on the wide earth where he could be free from arrest, it is reasonable to suppose that he would not so readily yield to temptation.

Make an extradition treaty with Canada of such a nature that no criminal can find a harbor there, for in no other way can these scandalous bank embezzlements be stopped.

COLLECTION OF COMMERCIAL PAPER.**LIABILITY OF BANKS FOR LOSS—IMPORTANT ACTION BY THE PITTSBURGH CLEARING-HOUSE ASSOCIATION.**

[At a recent meeting of the Pittsburgh Clearing-House Association the following paper was presented by THOS. D. CHANTLER, Esq., a prominent member of the Allegheny County Bar. As will be seen, it was subsequently endorsed by the Association and recommended to all the Clearing-Houses in the United States for their co-operation.—THE EDITOR.]

In relation to the question as to the liability of banks for loss occasioned by the negligence or misfeasance of correspondents or sub-agents in the collection of commercial paper on distant points, I would respectfully submit the following opinion :

Many of the authorities on the question are in direct conflict. In New York, the doctrine is established that a bank receiving paper for collection is responsible for the acts of all subsequent agents employed in the collection of the paper. A similar doctrine is upheld in the Courts of Ohio, Indiana, New Jersey, and by the Supreme Court of the United States ; but a contrary doctrine is upheld in Massachusetts, Connecticut, Illinois, Missouri, Iowa, Tennessee, Louisiana, Wisconsin, Maryland, and in "Morse on Banking." The Pennsylvania cases can, I think, be classed with those that oppose the doctrine established by the New York Courts.

Probably the latest case holding the first receiving bank liable to its customer for default of the sub-agents, is that of the Exchange National Bank of Pittsburgh *vs.* Third National Bank of New York, 112 U. S., 276. The case was brought by writ of error to the United States Supreme Court from the Circuit Court of New Jersey, and the lower Court reversed, decision being rendered in November, 1884. The action was brought to recover damages for the negligence of defendant bank in regard to eleven drafts or bills of exchange, that had been discounted by the Exchange National Bank, plaintiff, and endorsed by it to the defendant (Third National Bank of New York) for collection. The New York bank sent them for collection to a bank in Newark, New Jersey, they being drawn on the Secretary of the Tea Tray Co. of Newark. By the neglect of the Newark bank, proper acceptances were not procured, but of which fact the Pittsburgh bank had no notice until after maturity of some of the drafts. In the meantime the drawers and endorser had become insolvent. The Supreme Court held that the New York bank was liable to the Pittsburgh bank for such damages as it had sustained by the negligence of the Newark bank.

It was inferred in the above case that the New York bank received the drafts from the plaintiff as a customer in the usual course of business. In the same case the Court held, that the taking by a bank from a customer, in the usual course of business, of paper for collection, is sufficient evidence of a valuable consideration for the service. The general profits of the receiving bank from the business between the parties, and the accommodation to the

customer, form a consideration in the absence of any controlling facts to the contrary. In such a case the bank is held to undertake to do the thing, and not merely to procure it to be done, and is answerable for any default of any sub-agent in the performance of its contract, without any express agreement to that effect. And the Court suggests that the only way to escape the liability, is for the bank either to refuse to undertake the collection, or expressly agree to receive the paper only for transmission to its correspondent, and thus become responsible only for good faith and due discretion in the choice of an agent.

The above and kindred cases are based on the theory, that the correspondent or sub-agent is the agent of the bank, and not of the customer, and thus by the law of agency the bank, being the principal, is liable for the default of its own agents; and that the consideration that supports the contract between the bank and its customer is the benefit that may accrue to the bank by the money remaining on deposit for some time after its collection, and the good will of the customer and such incidental matters arising from his dealing with the bank.

The cases holding the contrary doctrine are based on the theory that the transmission for collection is a gratuitous favor, and the correspondent or sub-agent is the agent of the depositor and not of the bank, and consequently cannot be held for the negligence of such agent. But in the latter class of cases as well as in the former, if the collection is undertaken for a *pecuniary consideration*, then the receiving bank is liable for the default of the sub-agent.

The leading case in Pennsylvania is that of *Mechanics' Bank vs. Earp*, 4 Rawle, 884 (a Philadelphia case decided in 1834). It is a fair inference from that case, that paper on distant points deposited in the ordinary course of business is left for *transmission only*, the sole duty of the receiving bank being to properly transmit the paper to a suitable sub-agent for collection; and that the receiving bank is not liable for the negligence of its correspondent or sub-agent, unless it has entered into a special contract with the depositor, for a *pecuniary consideration*, to collect the paper, and in such case the burden is on the depositor or plaintiff to show that such a contract was entered into. And the compensation for such collection must be something more than a charge to cover expense and difference of exchange.

In the Pennsylvania case of *Bellemire vs. Bank of U. S.*, 4 Wharton, 105, it was held, that a bank which receives a note for collection, and when it is overdue places it in the hands of a notary in the usual course, is not liable for the neglect of the notary to give notice to an endorser. This was the case where all the parties lived in the same locality, Philadelphia. The doctrine laid down in *Mechanics' Bank vs. Earp* is cited with approval.

If a bank be not liable for the default of a notary, why should a transmitting bank be responsible for the act of its correspondent? The rule in both cases rests on the fact that the service is substantially gratuitous, and good faith on part of the receiving bank is all that is required.

The latest Pennsylvania case, and perhaps the latest reported case, in which the question under discussion was considered, is that of *Mechanics' National Bank of Philadelphia vs. Goodman and others*, decided October 5, 1885, 109 Pa., 422. The facts in that case were in substance as follows: The defendants

in error, who were plaintiffs below, were depositors in said bank. On the first page of their bank book was the following notice :

“ NOTICE.

“ In conformity with the rules adopted by all the banks of this city, members of the Clearing-House Association, you are hereby notified that you are held responsible as endorser for the non-payment of all cheques upon other banks of this city, members of said Association, deposited as cash by you in this bank, until the close of business next day succeeding that on which such cheques are deposited. This bank receiving such cheques only for collection on your account through the exchange at the Clearing-House. Upon all other cheques and drafts deposited by you as cash, your responsibility as endorser continues until payment has been ascertained by this bank.”

They deposited as cash, a cheque on the Mississippi Valley Bank of Vicksburg, Miss. The Merchants' National Bank thereupon sent said cheque to the Mississippi Valley Bank itself, and accepted from said bank a draft on a New York bank in payment. The original cheque was cancelled, and the drawer charged with the amount thereof. On receipt of the draft on New York bank the Merchants' National Bank promptly remitted the same to the New York bank for payment, but the draft was not paid by reason of the failure of the Vicksburg bank. The Receiver of the latter refused to return the cheque, and treated it as paid ; thereupon the depositor sued the Merchants' National Bank to recover the amount of the cheque. The Supreme Court decided that they were entitled to recover, on the ground that the Vicksburg bank on which the cheque was drawn was not a proper agent to make the collection, holding that no bank can be a suitable agent, in contemplation of law, to enforce in behalf of another a claim against itself.

But the principle established by the earlier cases of *Mechanics' Bank vs. Earp*, and *Bellemire vs. Bank of U. S.*, was approved ; and the Court below, whose opinion was adopted by the Supreme Court, approved the principle, that a collecting (receiving) bank is an agent for transmission to a sub-agent to collect, and when this is properly done its duty is performed and its responsibility is at an end.

And in “*Morse on Banking*,” 410, the principle is laid down, that it is a necessary presumption that the undertaking of the bank is to transmit, in the absence of proof to the contrary.

The rule prevailing in Massachusetts is thus tersely expressed in *Fabins vs. Mercantile Bank*, 28 Pick., 330. “ When a note is deposited with a bank for collection which is payable in another place, the whole duty of the bank so receiving the note in the first instance is seasonably to transmit the same to a suitable bank or other agent at the place of payment.”

In the case of *Daily vs. Butchers & Drovers' Bank of St. Louis*, 56 Mo., 94, decided in 1874, the rule is thus expressed : “ It is the universal custom and habit of banks which receive notes and drafts for collection, the payer of which resides at a distance, to transmit the same to some bank or agency at the place of payment, and when the holder of the bill or draft in such case deposits the same with a bank for collection, without instructions to the contrary, he is presumed to do so with reference to such usage, and to authorize the bank to *transmit* the bill or draft accordingly. And when the collecting bank uses due diligence and good faith in selecting a correspondent or bank at the place of payment, to whom the bill or draft is transmitted, it has discharged its whole duty, and this, notwithstanding the draft is endorsed

to the agency to which it is transmitted for collection on account of the collection bank."

A vast amount of confusion appears in the cases arising from the indiscriminate use of the term *collection*. In a number of the States, paper left "for *collection*" means that the bank undertakes the whole business of making the collection, and is thus responsible for all agents employed. But on the other hand, in most of the other States the term "*collection*" simply means "*transmission*," so that paper left for *collection* in the ordinary course of business, means that the same is left for *transmission only*, and that the receiving bank is not liable for the default of sub-agents.

An illustration of the bewilderment occasioned by the conflict of authorities, is seen in the case of Exchange National Bank *vs.* Third National Bank of New York, wherein Justice Blatchford classes Pennsylvania as holding that the receiving bank is liable for the acts of the sub-agents; and cites, as authority for his view, Wingate *vs.* Mechanics' Bank, 10 Barr, 104, a case wherein the defendant bank agreed to *collect the draft for seven per centum*; and the Courts of other States refer to Pennsylvania as holding the opposite view, *i. e.*, that the receiving bank is *not liable* for the default or acts of the sub-agent.

Had the question not been judicially determined, a uniform usage might be created that would remove all difficulties. For the law is, as laid down in "Morse on Banking," 415, that "If the law had not been already settled by judicial determination so as to exclude any subsequent evidence of usage to subvert it, the bank may absolve itself from liability for the acts of agents other than itself, by showing that such is the established usage and understood custom in the place where the bank, the extent of whose duty and liability is in question, is situated. But the evidence must show a usage having the strictly legal traits; it must be a real *bona fide* usage, an actual practice, a general understanding, not the mere opinion of either merchants or bankers. In the case of Merchants' Bank *vs.* Goodman, the Court refused to admit evidence showing that it was the custom of bankers to send drafts direct to the banks on which the same are drawn, for collection, such usage being contrary to the principles of law.

The rule as gathered from all the cases seems to be this: if the bank undertakes to *collect*, then it is responsible for the act or negligence of the sub-agent; but if the bank undertakes to transmit, then it is not responsible for the act or negligence of the sub-agent.

In the one class of cases the Courts hold that commercial paper on distant points, left in the hands of the bank in the ordinary course of business, is left for *collection*, while the other class of cases hold that such paper, in the absence of contrary agreement, is to be considered as left for *transmission only*.

I find no decision affecting the question since the decision of the United States Supreme Court in case of Exchange National Bank *vs.* Third National Bank of New York, herein before referred to, except the said Pennsylvania case of Merchants' National Bank of Philadelphia *vs.* Goodman, the former being decided in November, 1884, and the latter in October, 1885, but in the latter case there is no reference to the United States Supreme Court case. These two cases cannot be reconciled. The one is controlling authority in all the United States Courts, and the other in the Courts of Pennsylvania.

It is indeed a vexed question, and it is unfortunate that there is no universal rule therefor. The best course for a Pennsylvania bank to pursue under all the conflict of authority, it is not easy to determine. Were all suits arising from such controversies determined in the State's Courts, the banks would be amply protected under the State decisions to which I have referred. But in those cases where the customer resides in another State suit would be probably brought in the United States Court, in which event the decisions of that Court would prevail, which decisions are antagonistic to those of the State.

I would suggest, that the banks could be largely relieved of the risks and responsibilities attending collections, indicated in the foregoing opinion, by having their respective depositors and customers enter into an agreement to that effect.

Inasmuch as the business public (by reason of long established custom) expects the banks to make collections gratuitously, it would not be practicable to charge commissions commensurate with the risks attending collections, so that the only relief is to accept paper for collection under an express agreement limiting the liability attending the same. One bank, or a few banks, could not pursue the course suggested and compete successfully with other banks, hence it would require uniform action on the part of all the banks in the same locality.

If the banks that are members of the Pittsburgh Clearing-House would adopt some such method, all other banks in the vicinity would probably, at their suggestion, adopt the same course.

The following resolutions embodying these ideas were adopted :

Resolved, By the Associated Banks of the Pittsburgh Clearing-House, that it be recommended to the banks and bankers of this city, that they hereafter receive paper for collection on points other than our own city, involving business through other banks or sub-agents, only on the following conditions, to be plainly expressed by written or printed notice in pass book, and also in a book prepared specially for that purpose, namely : " All notes, drafts, and cheques on distant points, received by this bank for collection or credit, shall be transmitted in the usual manner for collection, either direct to the banks on which the same shall be drawn, or to such banks or persons as we shall deem reliable, with the express understanding, that we do it solely for the convenience of our depositors or customers, and we shall not be liable for any loss incurred, directly or indirectly, by omission, negligence, or default of any such bank, person, or sub-agents, or for loss in transit, or from any other cause whatever, until the proceeds in actual money come into our possession."

Resolved, further, That such condition be expressly agreed to by the party leaving such paper with the bank.

The above notice to be pasted or printed in the pass book, and also in a book prepared specially for that purpose, and the depositor to sign an agreement beneath in substance as follows :

" I hereby agree, that all notes, drafts, and cheques deposited by me shall be received under and subject to all the terms and conditions of above notice."

A mere notice hung in a bank, or pasted in a pass book, would not be conclusive evidence of an agreement, according to the terms thereof, between the bank and the depositor, but an express agreement on the part of the depositor, as above indicated, would be binding and conclusive.

The following resolution was also adopted :

Resolved, That the Manager be and is hereby instructed to furnish each bank in Pennsylvania, and the Managers of all the Clearing-Houses in the United States, with a copy of the foregoing Resolutions, and request their co-operation by adopting the same.

THE SUFFOLK BANK SYSTEM.

The following interesting article written by the late CLAUDIUS B. PATTEN, Cashier of the State National Bank, of Boston, was intended by the author to form a part of his series of articles entitled "Methods and Machinery of Practical Banking" which appeared in the JOURNAL in 1884-5-6. The MSS. was laid aside with a lot of Mr. Patten's letters and was discovered recently, in looking through his correspondence with a view to getting his ideas in reference to the publication in book form of the series above named. It will be remembered that Mr. Patten died May 22, 1886.

It is proper to state here that the book on Practical Banking will be published within a few months—certainly not later than November. A friend and associate of Mr. Patten undertook the revision of the papers and their arrangement in book form over a year ago, and his part of the work is not yet completed, but it is promised at an early day. The volume will have a wide sale as soon as ready. Due notice of publication, with price, etc., will appear in the JOURNAL.—THE EDITOR.]

I have, in these papers, made occasional allusion to this old-time foreign money redemption system, — a system which to-day has, to a very great extent, its counterpart in the National Bank Redemption Bureau at Washington. The Suffolk system was of a very simple character. I was for many years a part of it, as it were, for I was an officer in the Suffolk at the time when its redemption business was at the flood, and I am therefore able to speak understandingly of the matter. Its system was this: It undertook to redeem in specie or its equivalent, whatever bills of the banks of New England presented themselves at its counters. To be able to make these par redemptions it required of every bank in New England deposits of two types. First, the bill-issuing banks were required to keep with the Suffolk, current balances sufficient to face the incoming redemptions. Second, these banks were also obliged to keep with the Suffolk, a permanent deposit of about three thousand dollars cash, upon which the Suffolk paid no interest, and which deposit was in the nature of a compensation for doing this redemption business. There were three or four hundred of these New England banks which, when the Suffolk system was at its highest tide, were keeping with the Suffolk Bank these permanent deposits thus giving it more than a million dollars steady deposits upon which it could bank, discount, etc. Then, on the current account with these depositing banks, the daily balances often footed up another million or so upon which, also, no interest was paid.

An additional source of revenue was found in its system of deferring credits. It had a practice of crediting all remittances received from its corresponding banks a day later than their receipt. Out of its connection with the country banks—a reciprocal account connection—there grew a very heavy collection business, upon which it made large profits. These are the main credit points of the Suffolk system—the sunny side of the business.

Here are what may be termed the debit views of the Suffolk methods and machinery. The labor and costs of working up the Suffolk system to a paying business—to a successful standpoint, were enormous. There were banks which long refused to redeem their notes at par at the Suffolk, and these resisting banks had to be forced into line by the tedious and expensive process of sending home their circulating notes for redemption in coin over their own counters, which coin, when collected by the runners of the Suffolk Bank,

had to be carried home to that bank by slow and costly lines of carriage, by stage-coach or private conveyance. There were pugnacious banks which resisted to the very last extremity what they termed the over-bearing tyranny of the Suffolk, throwing in its path every obstacle ingenuity could suggest.

When I first entered the Suffolk the large attics of its building were overflowing with boxes of all sizes and shapes, which had been used in the transportation of silver, large and small, that had been wilfully forced upon the Suffolk messengers in redemption of notes by them presented. Many of these boxes rattled with counterfeit remnants of invoices of this silver—base coin which had been passed upon the messengers. And when the Suffolk system was solidly established, its conduct required an immense force of clerks, a costly plant, and was of a character involving such responsibilities that again and again the Suffolk broached the subject of throwing up the whole thing—but this was mainly in those days of discouragement when their profits were being undermined, and their care and work immensely increased by mysterious defalcations in the foreign money department. The country money defalcations at the Suffolk were of a type of character well depicted by the following story of trouble and loss there :

It was when there were nearly a hundred clerks in the foreign money department of the Suffolk, and the redemptions were averaging about a million dollars a day. These redeemed bills, which were largely made up of notes of small denominations, had to pass through the mill three times. First they were counted in, next they were assorted by their banks, lastly they were counted into packages and finally strapped and labelled. There were many days when the work would extend far into the night, and few days when the hours of the department were less than from eight to eight. There came a time during this extreme pressure of business when the cash of this redemption department began to report itself short every night—short in large amounts running from hundreds to thousands. Recounts, in the weary work of searching for the deficiencies, became a thing of almost daily occurrence and would extend very late into the night. There was no possibility of closely locating the variations, for the hands of the one hundred clerks were all in one basket. Attempts were made to weed the department of clerks whose habits and appearance raised suspicions of their faithfulness. The most rigid inspection of the out-of-bank ways of life of the officers was instituted, and when this close espionage developed any facts which seemed to tell against a man, he was quietly asked to resign his position. But the outcome continued as before—night after night the short cash would face the worried managers. Somehow or other the department pulled through these days of trouble and, in time, began to run along more smoothly. When the events of these days of worry had become simply an unpleasant memory there came an explanation of the mystery connected with them. A man who had worked as counter during the period in question, and who had never been even suspected of irregularities, sent word to the directors of the bank from his sick bed, where he lay near his end, that he had been the guilty officer—the money-counter who had abstracted the missing funds. He asked forgiveness. There was nothing to do but to grant it, and let him die peacefully.

Counterfeit bank bills gave the Suffolk a deal of trouble, and no year of its redemption business failed of reporting large losses from the receipts of fraudu-

lent paper of this type. The banks of New England, under the old State system of banking, were in the habit of issuing circulating notes of fine execution—made of good paper, well engraved, and always bearing two written signatures; yet somehow or other, the counterfeiters of the period succeeded wonderfully well in imitating these bills. Here is one of these old-time counterfeits, which was so well executed as to long escape detection. I can easily recall the countenance of the genuine notes of this Marine Bank, New Bedford—Joseph Gunnell's bank—and can testify as to the skilful way in which this fraudulent note was gotten up. I introduce the bill here for two purposes, one for the object of showing the counterfeit dangers the Suffolk had to encounter; the other, for the purpose of recalling its methods of dealing with discovered counterfeits. At first the Suffolk was in the habit of marking upon the back of the bad bank bills, which presented themselves, the counterfeit and altered notes, a date and an initial showing the time when they were condemned by the Suffolk, and what clerk discovered their fraudulent character. Thus marked, the bills would be returned to the depositors from whom they came. But it would often come to pass that these rejected notes would again get into circulation. And if they came back a second time to the Suffolk, the marks upon their backs would at once betray to the initiated the name of the party who had passed them off knowing that they were not genuine.

When these "careless" persons were confronted with the facts of their discreditable course, they would redeem the notes but would generally declare that they must have slipped out of their hands accidentally. To avoid disagreeable complications of this character recourse was had to legislation and a law was enacted obliging the Suffolk Bank to brand in an uneradicable manner every fraudulent bank bill it got hold of. Under this law the Suffolk set up a system of burning into every condemned note with an iron brand and black, thick ink, the words "counterfeit" or "altered" as the cases might demand, with the added initials W. G., for William Grubb, the venerable head of the Suffolk department of redemption. Bills thus treated could travel no more. Depositors were often vexed to find such disfigured bank notes returned to them, but they had to accept the situation. Here is the bill to which we have alluded—a curious relic, nearly thirty years old.

Under the Suffolk Bank's redemption system corresponding banks whose bills they were redeeming and whose accounts they were keeping, were allowed to overdraw on payment of the then standard rate of 6 per cent.,

if their credit and standing were good. But in times of great stringency these overdrafts would become so large in the aggregate as to be an immense strain upon the resources of the Suffolk. At such periods of closeness resort would be had to the most pressing appeals to delinquent banks to pay up. And when these dunning letters ceased to be effective, when it seemed as if a bank was getting hopelessly behind in meeting its redemptions, the Suffolk would stop returning its bills redeemed and, finally, if the case grew desperate, stop redeeming them altogether. In the latter case, the first move was to send a notice to the Boston papers of this ominous character: "The bills of the Sandown Bank, Sandown, N. H., are no longer redeemed at the Suffolk Bank." A circular to the same effect was then sent to all the Suffolk's corresponding banks, and it must be understood that, after such a notice, the Sandown Bank would find it pretty hard work to keep out its circulation or get out any more, for nobody who did not personally know the bank would touch its bills, except at a discount, until the Suffolk had reinstated it. I well remember periods of financial depression and panic when notices of this sort would crop out at the rate of two or three a day.

The dimensions of the country bank overdrafts at the Suffolk were sometimes very startling. The Merchants' Bank, Providence, which was a little "Suffolk Bank" for Rhode Island, at one time ran its red ink figures—its overdrafts—up to a million. But in this case of the Merchants' as in other of the Suffolk's cases of advancing money to the country banks, it generally had in hand a security of a high class value in the shape of the collections belonging to the overdrawers, upon which they claimed to have a good lien. But occasional out-and-out and most disastrous failures of New England banks whose bills were being currently redeemed by the Suffolk and whose accounts current were kept with that institution, brought heavy losses upon the Suffolk Bank. The Suffolk was always very patient with overdrawing banks, and never failed, in times of monetary pressure, to extend all the help to its hard-pressed corresponding country banks which its resources would allow, as long as its confidence in the integrity and general soundness of these debtor banks was unimpaired. But it was, of course, its fate to be sometimes deceived in its estimate of banks which were seeking accommodation, and, as a consequence to suffer therefrom serious losses.

The story of a single experience of the Suffolk Bank with a rotten New England bank will suffice to illustrate this phase of its trials I am describing.

The —— Bank was located above the White Mountains of New Hampshire. It had long kept a very slow account with the Suffolk—had for years just managed to keep its bills good at this redemption agency in State street. There came a period when its circulating notes seemed to be pouring in upon the Suffolk more rapidly than usual, while at the same time the remittances from this —— Bank became more and more scant and infrequent. But what was missing in cash seemed to be made up in most flattering promises—promises so plausible and earnest that the Suffolk Bank kept on redeeming its notes till the bank was its debtor to the amount of about \$15,000, a sum for which it had nothing to show but the redeemed bank notes. It was at the time when the Suffolk Bank's connection with this —— Bank beyond the mountains had taken on this serious aspect that I was sent by the Suffolk to see what I could do with the delinquent—sent with the \$15,000 redeemed

bills, packed in a valise, to hunt up the debtor bank and collect the money upon the bills, or obtain some security for the overdraft. A long and tedious journey in mid-summer, by rail and stage, carried me to the town where the embarrassed bank was located. Before I reached the place, I gathered from incidental talk with fellow-travellers, who knew nothing of my character or errand, that the bank I was seeking had for a long time been a scandal in all the country round about it—had not been deemed worthy of the slightest confidence for years. The only place, they said, where its credit had been good for anything was at the counters of the Suffolk, Boston, to which they always sent all its bills for redemption whenever they got hold of them. On reaching the sought-for bank, I found it in the hands of the State Bank Commissioner, who had finally scented out its condition and taken possession of it just before my arrival. The Cashier, who was a man of little business capacity and of very intemperate habits, who had had entire charge of the bank, had absconded. Its room was shut. There was little in it of any value but an old safe. All its available assets, if it ever had any, had disappeared. In its pigeon holes were no more valuable papers than past due, worthless notes and accounts and letters from the Suffolk Bank. The man who sent his hat around among an impecunious crowd for a contribution which he did not get, said he was glad to even get his hat back. I was glad to be able to get back after a time to the Suffolk, from my collecting tour, with the bank bills with which I had started. In the end the —— Bank, of which I am writing, paid a trifling dividend.

The Suffolk Bank system of New England, a system which had become a perfect success, and which had made its name known in financial circles of all lands, was born amid stirring financial contests, and had to struggle hard at the outset for an existence. It died very quietly. The bank which gave a name to the system reaped a good reward for its labors. It paid heavy and regular dividends for a long period, and became so strong and so solid an institution that "as good as the Suffolk Bank" became a proverb. Its bills enjoyed a wide circulation, for they were looked upon as types of reliability.

The wayfarer, in Hawthorne's story, in taking a bill that was tendered to him, said he knew it was as good as the gold because it was a bill of the Suffolk Bank. The Suffolk paid, when it merged itself into a National bank, a final dividend of \$188 a share. The par of its shares was \$100. The monopoly which it had so long held—the monopoly of the management of the foreign money system—was, long before the establishment of the National system, upset by the onslaught of J. G. Carney the founder of the National Bank of Redemption. Mr. Carney was a most indomitable man—a man seemingly made to fight successfully what he termed the tyranny of the Suffolk. After a long and severe financial contest, the Bank of Redemption came out of the struggle with a large share of the Suffolk's former business in its hands. Thenceforward there were, up to the day of the setting up of National banking, two Suffolk Banks in Boston—two redemption banks, each holding nearly equal shares of the country bank business. And to-day the National Bank of Redemption, a solid and well managed institution, counts as its best hold that country bank business which has clung to it from the days when it fought the Suffolk Bank.

In the later days of the Suffolk system the circulation of New England

bank bills became very large in New York city. The Metropolitan Bank of New York, started under the management of New England men—John Earl and William and Henry L. Jacques—was the agent of the Suffolk Bank in that city. Its daily remittances to the Suffolk of New England bills redeemed were very heavy. In those days the Metropolitan was one of the most active and one of the best managed banks in New York city. Its ruin—its downfall under Seney—seemed to old bankers who had known it from the start, a very lamentable and most disgraceful thing.

In looking back over the history of the rise, progress, and final decline of the Suffolk system, one cannot help recurring to the fact that it had in its management, first and last, some of the ablest and most faithful bankers New England has ever known. Henry B. Stone, long at the head of the Suffolk system in its earlier days, was a banker of remarkable skill and power. And for at least 40 years two bank Directors whose names have ever been thoroughly identified with the Suffolk Bank's country money business served consecutively on its chief committee—the committee on the foreign money department. These were Jeffrey Richardson and John A. Lowell. The Suffolk always had an able corps of workers in its rank and file, and there graduated from this corps many of Boston's present leading bank officers. At the time of the establishment of the National Central Redemption Bureau at Washington the advice and assistance of officers who had helped to conduct the business of the Suffolk was sought and made very helpful. And the business done today in that bureau is only a Suffolk Bank business of larger growth.

Runs on Banks — TWO INTERESTING INCIDENTS.—The year 1825 was remarkable for a severe commercial crisis. The Bank of England itself trembled on the verge of bankruptcy, and the Directors gloomily murmured that they might be driven to suspend cash payments. If that event had come to pass, it is difficult to estimate the amount of evil which must have followed. An incident happening at the time shows to what a height the feverish alarm then prevailing throughout the country had risen. It was freezing hard, and an old woman slipped down outside the door of Lubbock's Bank, and broke her leg. Four or five people gathered round her, to give what assistance they could. And in consequence a rumor immediately began to flit about the Exchange that a run upon Lubbock's Bank had started. In half an hour this imaginary run became a real one, and though the firm stood as solidly as Snowden, still the having to realize their resources without delay, at any cost, is supposed to have landed the partners in a loss of £80,000.

There was another story (a more comical one) of the sharpness shown by a head clerk of a provincial bank (I rather believe it was Leatham's Bank), at Wakefield. All its customers, on a certain market day, were crowding round the counter clamoring for their money. The bullion was running low, and things looked as black as possible when this expedient suggested itself to the man of whom I have been speaking. He put a shovelful of sovereigns into the fire, and after a dexterous re-adjustment, poured them out into the hands of a farmer, who had eagerly presented his cheque. The man started back, considerably burnt about the fingers. "Good gracious, my dear sir," was the explanation, "I beg you ten thousand pardons! In my hurry I forgot to warn you, but we have to go on making these things so fast that there is no time to let them cool." The rustics, according to the legend, were perfectly satisfied as to the solvency of the firm and the run stopped itself for good and all.—*Reminiscences of Sir Francis Hastings Doyle.*

BANKING TERMS AND USAGES IN ENGLAND.

It is interesting to observe the manner in which the English language is in some points splitting in two and becoming differentiated into an English and an American dialect. Mind, we say in some points only, for in the main the language is one. The differences occur, most noticeably, in the technical phrases of those departments of human activity which have been entirely or for the most part developed since the separation of the two great branches of the English-speaking world.

We may take, for example, the railroad or railway, which is so modern a creature of the brain of man that the terms by which to call its parts and appliances came independently into existence on each side of the Atlantic. Consequently, almost everything connected with the iron horse and his course has two names—one, in the English of England; and another, in the English of America. There, the *driver*—and here, the *engineer*—is in charge of its movements; there, the *guard*—and here, the *conductor*—looks after the passengers, who, exceptionally, do not change their name when they change their sky. The *train* has also but a single name; but in England it consists of *coaches* and *luggage-vans* or else *goods-wagons*—while on this side, it is composed of *passenger-cars* and *baggage-cars*; it is *shunted* off the *line* by a *pointsman*, or *switched* off the *track* by a *switch-tender*. And so on through the list.

Banking is a subject of which the nomenclature in the two countries partly agrees and partly differs. Those particular branches of the banking business which were thoroughly established before the time when the colonies ceased to be dependent, (not merely in a political but in a commercial aspect,) have a common vocabulary, at least to those things which it is necessary for the public at large to mention as well as the members of the banking profession. Thus, the **BILL OF EXCHANGE** has a well-established set of terms to describe all the parties concerned, and all their actions in connection with it—from signature to payment; and these terms are used and understood in precisely the same sense in England and in America. But deposit-banking, the check and Clearing-House system, are more modern growths, which have had a separate development in each country; and we find, with some differences in actual methods, a still more marked difference in the words employed to express the same or corresponding things. We will mention some of these varying terms, usually putting the English word or phrase in **SMALL CAPS**, and the American equivalent in *italics*.

The *depositor* or *dealer* is a **CUSTOMER**. He **LODGES** or *deposits* money. It is usually on **CURRENT ACCOUNT**, that is *subject to check at sight*. Instead of *keeping a bank-account*, he is said to **KEEP A BANKER**. Another expression for *depositing* is **PAYING-IN**, and the *deposit-slip* is accordingly styled a **PAYING-IN TICKET**. You do not in England give the amount of your **LODGE-MENT** to the *Teller*, but to a **CASHIER**; for the **TELLER** is engaged in quite a different way, more like the *runner* here. The **MANAGER**, like our *Cashier*, is the chief of the office. **CROSSED CHEQUES** are an English, as *certified checks* are an American, idea. A crossed cheque is payable only through a certain banker, whose name

is written across the face between two parallel lines : or else it is payable only through *some* banker, which is indicated by drawing the two lines and writing between them “. . . . & Co.,” which stands conventionally for “any banker.” The *certification* or acceptance of a check is unknown in England ; cheques are sometimes INITIALED after banking-hours, which only holds good for the following day. The crossing of cheques is rendered necessary as a precaution by a difference between the law of the two countries as to the indorsement of a check payable to order. In England, if the cheque is to order and the name of the payee appears on the back, by whomsoever written, this is sufficient to discharge the bank ; while, in this country the indorsement must be known to be the genuine handwriting of the payee. It results from the English rule that all checks are, practically, to bearer, and it is the general custom to write them “or bearer.” So that if a cheque payable to order and *uncrossed* be lost or stolen, the money could, in England, be obtained on it with less difficulty than here.

A *Certificate of Deposit* is called a DEPOSIT-RECEIPT, and the word DEPOSIT is more usually applied to this kind of obligation than to current account.

A CASH CREDIT is a peculiar kind of loan, in the form of an overdrawn account, interest being paid on the debit balance.

Inside the bank, also, somewhat different language is used. The *Dealers' Ledger* becomes the CURRENT-ACCOUNTS' LEDGER. The *credit cash* is called the RECEIVED WASTE-BOOK, and the corresponding book is the PAID. Columns of figures are CAST, not *added up*, and the correctness of the work is tested by MARKING-OFF, instead of *checking-off*.

Finally, a BANK HOLIDAY is an institution whose introduction would be immensely popular in America among bank-clerks ; at least, if it gave them, like their English cousins, three of the Mondays of summer and the next day after Christmas as additional days of rest.

Taking the Signature.—An important part in opening a bank account is the taking of the depositor's signature. Along with the signature should also be noted the post-office address. It often happens that accounts are opened by persons through some friend or, it may be, by correspondence. In such a case great care should be exercised in order that the bank may be perfectly sure that the signature given is the genuine signature of the depositor. It by no means follows that a signature not genuine is necessarily a forgery. Persons entirely inexperienced in banking matters are liable to make curious blunders and sometimes to sign the names of other persons without the slightest intention of wrong-doing. Signatures of the officers of corporations should always be attested by some one, most properly the Secretary who is known at the bank or whose signature, at least, is familiar to the bank officers. When the account is opened for the depositor by another person the signature furnished should be witnessed by the person opening the account.

Banking in Eastern Roumelia.—In Philippopolis the farmer borrows money from the agricultural bank of his district at the rate of 9 per cent. per annum. He is required, however, to find three valid sureties for its repayment at the expiration of the term agreed upon. As a rule he prefers, however, to have recourse to the village usurer, who charges interest at the rate (easily calculated) of 1 para per week for each plastre (about 180 per cent. per annum) for terms of thirty-one, sixty-one, or ninety-one days.

A FAMOUS BANKER.

The London *Bankers' Magazine* for July furnishes the following interesting sketch of one of the most famous financiers of the present day :

Donald Larnach, Esq., the subject of this notice, now full of years and honor, and one of the leading authorities on banking generally, is the son of Mr. William Larnach, of Newton, Caithness. He has been identified more particularly with the Bank of New South Wales, which happened to be started in the year 1817, being the date of Mr. Larnach's birth. The bank is therefore older than the Australian Joint Stock Bank by thirty-six years ; than the Bank of Australasia by eighteen years ; than the Bank of New Zealand by forty-four years ; than the Bank of South Australia by twenty-four years ; than the Bank of Victoria by thirty-five years ; than the City of Melbourne Bank by fifty-seven years ; than the Colonial Bank of New Zealand by fifty-seven years also ; than the Commercial Bank of Australia by forty-nine years ; than the Commercial Bank of Sydney by seventeen years ; than the Federal Bank of Australia by sixty-four years ; than the Mercantile Bank of Australia by sixty years ; than the Mercantile Bank of Sydney by fifty-two years ; than the National Bank of Australasia by forty one-years ; than the National Bank of New Zealand by fifty-five years ; than the Queensland National Bank by fifty-five years also ; and than the Union Bank of Australia by twenty years. Much as this bank, then, is the *doyen* of Australian banks domiciled in London, Mr. Larnach is the *doyen* of Australian bankers. At the age of seventeen he ventured out to Sydney, New South Wales, and the voyage, fifty-four years ago, was a far different matter to the comfortable methods of the present day. When arrived he engaged in squatting and mercantile pursuits. Being a hardy, adventurous Scot, it is needless to say he was successful. His first stir of any importance in the banking world was in connection with the Bank of New South Wales, of which he became Director in the year 1848 and President in 1852. On the discovery of gold, in 1851, Mr. Larnach, in conjunction with his colleagues, entered largely into the purchase of the metal on account of his bank, and in 1858 doubled the capital out of profits. In that year he returned to England and became Managing Director of the London branch, in the founding of which he was the active spirit. For about twenty-five years he was actively concerned in the management of this branch, and during this time brought it into the highest possible standing. It was in the year 1858 he became a Director of the London Joint Stock Bank, in the management of which institution he takes constant and active interest. Mr. Larnach is also a Director of the Indemnity Mutual Marine Insurance Company. Ten years ago he was elected Chairman of the Board of the Bank of New South Wales in London, and has since enjoyed the most absolute authority as a banker on many questions. There is no one whose opinions on banking and financial matters are more generally appreciated and respected than his, which is shown by the fact that he is often consulted by leading city men when a cool head, combined with varied experience and keen observation, is especially useful.

*** BANK BOOK-KEEPING.**

A TREATISE ON KEEPING AND AUDITING THE BOOKS OF STATE AND NATIONAL BANKS, PRIVATE BANKING FIRMS, SAVINGS INSTITUTIONS, FINANCIAL AGENTS, ETC.

Prepared for the JOURNAL by an experienced Bank Accountant.

LOANS AND DISCOUNTS.

“The chief source of revenue in our business,” said Mr. Brown, addressing the Cashier, “comes from the purchase of commercial paper, does it not?”

“You would mean by that, Mr. Brown, that the income from discounts would be the principal item of revenue, though I presume you would include with that the interest on the notes purchased. The item of discount by itself will not amount to near so much in our business as that of interest providing the two were kept separately.”

“I had reference,” replied Mr. Brown, “to the income from discount *and* interest on notes purchased, for I understand that the two are united in the same account.”

“Yes, that is a common practice, but it is by no means an invariable one. It is not at all necessary that items of revenue from discounts should be classed with or treated as if belonging to the income from interest. Considering the character of our business also, Mr. Brown, I believe it will be found that the item of discount would be a comparatively small one if treated independently of an interest account. As you come to think of it you will see that we do not have a large business in discounting paper, accurately speaking I mean. We loan, as you know, more frequently than we discount and in larger amounts.”

“But in making a loan, Mr. Payson, do we not practically discount the borrower’s paper? I see you speak of loans as being something different from the commercial paper we buy. Am I correct?”

“That is true. I do speak of the two as being different methods of using money. In a general way our loans are secured either by collateral deposited with us in the shape of stocks or bonds or by mortgage on real property. Commercial paper which we discount is bought at a price less than its face value, and instead of being secured is usually endorsed by some person or persons other than the maker. Discount, then, is interest charged in advance for the use of money, or so it is commonly defined, but a more proper definition would be to say that discount is a rate or charge made for the use of money and collected at the time the money is loaned. In some transactions this would not be a correct meaning for it could not be said the money was loaned. If we buy commercial paper which the seller transfers without recourse, giving us no opportunity to look to him for the repayment of the money given it could not be said the money was loaned, except in a theoretical

* A series of papers on Practical Bank Book-keeping: will be continued through the year 1888, or until the subject is exhausted. When required the articles will be illustrated by photo-engraved plates made from pen drawings, showing some new ideas in blank books, and other labor-saving forms.

sense. It is simply the purchase of a note the same as a merchant would buy a bill of goods. In that case 'discount' would represent the difference between the price paid for the paper and the face value or the amount we expect to receive. Then in addition to this discount we may also receive interest for the use of the money."

"Then do you deem it advisable, Mr. Payson, to keep an interest account separate and independent of what you term discount?"

"Under certain circumstances I should keep the two separate, or independent each of the other; though, for the business we do and the comparatively small amount received from actual discounts I do not consider such a plan at all essential with us. The discrimination I have chosen to make is not in these accounts but in the distinguishment of the resources rather than the revenues. The actual loans I have taken as one class and the bills discounted as another class. In other words, as you will observe, in the account of loans I have treated or considered only that class of assets representing loans upon bond and mortgage or upon satisfactory and approved collateral securities

Farmers' Bank

which we hold in hand and upon which we could realize the amount of the loan at any time in case the borrower failed to pay—"

"And for the notes discounted you have kept another account?"

"I have kept an account termed 'Bills Discounted' and under this I have considered only such commercial paper as is not secured further than by a satisfactory endorsement. It is not because I look upon commercial paper,

of in another book. In the larger institutions the 'Discount Register' is the special charge of the discount clerk, and to keep it written up in some banks is quite sufficient to occupy the time of an active person. In connection with this work, however, and as a legitimate part of it, the clerk keeps the record of bills and notes in the ticklers or exchange books as the case may be, and according to where the bill is payable."

"But how about the distinction to which you referred between notes received for loans on bond and mortgage and those discounted by the bank upon satisfactory endorsement? Do not the two kinds of loans have to intermingle in these registers and ticklers?"

"Indeed the distinction is entirely a matter of book-keeping, Mr. Brown. I enter in the 'Discount Register' only the bills and notes discounted by the bank, which, of course, are accepted on the strength of the maker's name and that of his indorser. Loans on mortgage I record in a book similarly ruled, termed 'Secured Loans.' In the place of an indorser's name I use the space to give a short description of the property mortgaged. When it comes to the records for the purpose of following up the collections, I make no distinction between the two classes. In the ledger I show the difference by separate accounts, the titles of which correspond with the Registers, *viz.*: 'Bills Discounted' and 'Secured Loans.'"

"Do you journalize the transactions as they appear in the 'Discount Register' and before they find their way to the ledger accounts? I don't see in your books anything like a journal-entry."

"As I have shown you, I keep what I term a 'Statement Journal.' Everything in that book may be interpreted as a journal-entry. Some bank book-keepers keep what they call the 'Debit Journal' and 'Credit Journal' to which I have called your attention. These books are, to all intents and purposes, journals, and the entries therein are journal-entries though they appear in a specialized form. The journal-entry, technically speaking, for bills discounted would be:

Bills Discounted.

To Cash.

Interest (or Discount and Interest.)

or otherwise, to credit the individual accounts.

Bills Discounted.

To H. T. Smith.

R. L. Good.

Interest.

By entering in the Credit Journal the accounts of

H. T. Smith,

R. L. Good,

Interest,

and in the Debit Journal the accounts of

Bills Discounted,

Domestic Exchange,

carrying opposite, in each case the proper amount, the necessary work is accomplished; though the real journal-entry is divided so that a part appears in each of two separate books.

(To be Continued.)

CONTINENTAL CURRENCY.

The following enquiry concerning Continental Currency comes from a reader of the *JOURNAL* at Pittsburgh, Kansas :

" We have to-day had presented to us a piece of paper worded as follows : ' Seventy dollars. The bearer is entitled to receive seventy Spanish milled dollars or an equal sum in gold or silver according to a resolution of Congress of the 14th of January, 1779. Seventy dollars.' It has a seal on the left end of the bill, also on margin the words United States of North America. Do you know anything about such a piece ? Has it a value ? "

The bill has no value except as a curiosity. It is a specimen of the money issued by the Continental Congress of the Confederate States during the war of the Revolution. Under the articles of Confederation the Continental Congress had no power to lay taxes directly on the citizens. The expenses were paid by requisition on the States. The amount to be raised was fixed by Congress and was partitioned among the States, and each of the latter was expected theoretically to buy taxes and to raise and pay its proportion into the general treasury in coin. Through the exigencies of war and the comparative poverty of the country, the States were dilatory and Congress, being pressed for money, issued the continental currency in various amounts and denominations as they felt it to be necessary. They were to be paid to holders from the moneys to be paid in by the States. The Continental Treasury accepted its own bills from the States, by whom, as a general rule, the bills were received in payment of taxes due from individuals. The consequence was that by successive issues of greater and greater amounts coin disappeared from general circulation, and the notes depreciated until at one period of the war \$2,000 in these notes was worth only \$1 in coin. The States also issued similar notes of their own which added to the financial confusion. Various plans were adopted to increase the credit of the notes, but they failed to accomplish the desired result. After the adoption of the present Constitution in March, 1789, an act was passed by the Continental Congress for the funding of the revolutionary debt. This act bears date August 4, 1790. Section 8 provided for the issue of a loan equal in amount to the domestic debt, and among the various forms of the old indebtedness that might be received in payment of subscriptions to the loan, we find bills of credit issued by the authority of the Continental Congress at the rate of one hundred dollars in such bills for one dollar in specie. How much of this Continental currency was funded into the certificates of new debt, bearing interest at six and three per cent., we have not been able to ascertain, but doubtless during the long period that elapsed between the close of the Revolutionary war (1783) and 1790, the date of the act, during which the Continental money was regarded as absolutely worthless and faith in its ultimate redemption lost, most of it was lost or destroyed. In fact it may be said that the debt incurred in the issue of Continental money, amounting in aggregate face value to some \$200,000,000, was liquidated by the holders permitting it to perish from the face of the earth. Much interesting information in regard to this currency may be found in " *United States Notes*," by Hon. Jno. Jay Knox. Copies of the book (\$1.50) may be had at this office.

**Notes and Comments on
BANKING PRACTICE.**

**SOME NEW IDEAS ON HOW TO CONDUCT A BANK WITH SUGGESTIONS AND HINTS
REGARDING THE OLD METHODS.**

Written for RHODES' JOURNAL OF BANKING by a Bank officer—supplemented by
occasional contributions from others who are interested in the subject.

A Stock Ledger.—Herewith is presented a simple form for stock books. Form A is the book of original entry and requires to be kept with great care. It is intended to show the exact disposition of every certificate of stock issued. It is very simple, and can be easily understood by inspection. Form B represents a page from the Ledger, and shows S. Y. Harrison's account as an original shareholder and as having disposed of his entire holding ten years afterwards to the N. Y. Publishing Co., who receive an entirely new certificate :

Lightning Calculator.—Almost every book-keeper at some period in his career (usually quite an early period) has invested in a "Lightning Calculator" or similar manual. These books profess to teach the art of "how to become quick at figures," and abound in means and methods of arriving at arithmetical results without resorting to the long and often cumbersome methods of the ordinary text-books. The questions are often asked : Are these manuals of any practical use ? Do they subserve any practical purpose that will justify their presence on the book-keeper's desk ? The answer to these and similar questions depends more upon the disposition and habits of each individual than upon the intrinsic merits of the books themselves. Some persons learn

readily from books and seem to absorb something useful from everything they read; others, on the contrary, dislike to read anything for instruction and learn all they know from actual practice. To the latter class the "Ready Reckoner" is of little real value and, when purchased, is likely to serve only as a memorial of money thrown away. But to those who despise not the printed page and who are willing to go to some little trouble to learn new and better ways the calculator offers a rich mine well worth the working. To one whose attention has not been specially directed to the subject it would seem remarkable how many different ways there are of manipulating numbers. The various rules, for example, that involve the use of the number nine are extremely interesting and curious. The method of adding two or more columns at one time and of multiplying by more than one figure at a time are worth knowing and, after all, are not difficult either to learn or to put in practice. The various methods of calculating interest present a rich field for study and one that has been pretty thoroughly worked over.

Some men are naturally more quick at figures than others and have a knack of finding out short ways for themselves while others, it must be confessed, are obliged to depend for "improvements" upon the suggestions of their friends. It must be frankly stated, however, in regard to all short methods, that they require persistent practice to be of any practical advantage. It is not enough to master the theory of a new way; but that theory must be reduced to repeated practice until one forgets the reason of the rule in familiarity with the rule itself. The necessity for this is illustrated by the preference which many men display for a familiar system as contrasted with a system admittedly better but which involves the need of being learned as something new. For those, then, who are willing to read carefully, study thoroughly and by diligent practice reduce to daily usefulness what they learn, the Ready Reckoner can be of much service and from it can be derived methods which will challenge admiration for speed and accuracy; but it will serve no useful purpose for those who regard it as a toy and look upon its methods as only a means of recreation for the idle or amusement for the curious.

Choosing Directors.—Bank Directors, as a rule, form a close corporation—that is, they elect their own successors in office—and, though the election must be ratified at the annual meeting of stockholders, this ratification is usually little more than a form. No duty more responsible falls to the lot of Directors than that of filling vacancies in their own number. Upon their action in these cases depends the future prosperity of the institution. It is easier to describe the ideal Director than it is to find him. When a man who measures up to the standard is found he is often bespoken by somebody else or is so engaged in his own affairs as to be unwilling to assume the management of the affairs of other people. Good timber for bank Directors is usually pretty scarce and much sought after. A large holding of stock is certainly a recommendation to the office; but, by no means, an indispensable qualification. It is not an objection that a Director should have to purchase enough stock to qualify. The interests that cluster about a bank are so numerous and varied that it is always good policy to so diversify the *personnel* of the Board as to represent as many of these interests as possible. That "nothing succeeds like success" is a favorite maxim among business men, and therefore

successful merchants, especially such as have been the architects of their own fortunes, always add strength to the Directory. Men of independent fortune who can afford to be independent in action, are to be chosen whenever they can be gotten; yet among even such those are to be preferred who have achieved riches rather than those who have been born rich or who have had riches thrust upon them. When Senator Fair broke off his relations with Mr. Flood and Mr. Mackay and withdrew from the Nevada Bank, he is said to have warned his former partners that they would surely come to grief "without the balance-wheel of his good judgment," and the prediction came true. This illustration gives point to the remark that in the Board of Directory it is essential not only to have men of ability but also to have men whose ability is of a varied character. While energy and enterprise are very well and even necessary yet it is likewise of importance to have the "balance-wheel of good judgment." As far as it can be done Directors should be obtained whose personal and private interests will not be likely to interfere with the interests of the bank. Very few men can judge impartially where their own interests are involved, and for that reason it is not sound policy for the bank to lend its money to its own Directors. The general topic, however, of the choice of Directors might be readily enlarged beyond the limits of a paragraph, but enough has been said to show the importance of the subject and the necessity that exists for giving it the most careful attention on the part of the bank managers.

Confidence of the Bank.—Too much care cannot be exercised to preserve inviolate the confidence reposed in the bank by its customers and by all who have dealings with it. A very little imprudence will sometimes serve to betray the most important secrets, and a customer whose business has been exposed in this way has certainly a just ground of complaint. The best rule for a clerk to observe is this—when you leave the bank, leave what you know behind you. If one falls into the habit of constantly talking about the affairs of the institution it is almost impossible to avoid revealing what ought to be regarded as strictly confidential. An additional reason for observing this rule is that each employe is so closely associated with his fellow-employes that the fault of one becomes the fault of all, so that while only one may be guilty of breach of confidence all come under suspicion. Books and papers should never be allowed to lie around so that curious eyes may see what is not intended for public inspection. An open ledger, for example, may easily tell some Paul Pry an important business secret. Habitual carefulness in this respect is the only safe rule of conduct.

There is another matter which deserves mention in this connection. Nothing is more common among business men than to inquire from each other the standing of customers. Such information is freely asked and given and the custom, within proper bounds, is entirely unobjectionable. The relations, however, which subsist between a bank and its customers are of a far different character. It would be a manifest impropriety for the officers of a bank to speak freely of a customer's balance or of the nature or extent of his business relations with the institution. Indeed it is a question, whether it is not better for a bank to adopt a general rule to decline giving any information in regard to its depositors rather than to incur the risk of being thought guilty of a breach of confidence.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

**FAILURE OF BANK CAUSED BY EMBEZZLEMENT OF FUNDS BY CASHIER—
LIABILITY OF DIRECTORS TO DEPOSITORS FOR LOSS—DIRECTORS NOT
LIABLE WHERE THEY ACT IN GOOD FAITH AND WITH ORDINARY CARE
AND DILIGENCE—THE DUTIES AND LIABILITIES OF THE POSITION CON-
SIDERED.**

This action was by Gustave Meyers and others, depositors in the Louisville Savings Bank, against the President and Directors of that institution to recover the various sums due to them as depositors in its savings department, the loss having been caused by the embezzlement of the funds of the bank by J. H. Rhorer, the Cashier. The ground of recovery was the alleged negligence of the Directors in the general conduct of the bank, and particularly in their failure to inspect the books of the bank, and a want of diligence in supervising the acts of the Cashier. The bank was rendered insolvent by the defalcation and made an assignment in January, 1880.

The Louisville Savings Bank was organized in the year 1866 and was the successor of a bank called the "Louisville Savings Institution," the former taking all the assets and assuming all the liabilities of the latter. In August, 1866, James Guthrie, Jordan F. Ward, James W. Heming, Milton H. Rhorer, and Jonas H. Rhorer were elected Directors, and the Directors then elected J. H. Rhorer, the subsequent defaulting Cashier, President, and Thomas Barclay, Cashier. When this was done the President and other officials were directed to have the balances on the books of the old bank transferred to the books of the new bank. Guthrie died in April, 1869, and John Caperton was made Director in his stead. In 1871 J. H. Rhorer resigned as President and was made Cashier, Barclay having ceased his connection with the bank. Caperton was then elected President. In 1874 M. H. Rhorer resigned as Director and Andrew Sabine was placed in his stead. From the 1st of January, 1871, J. H. Rhorer filled the place of Cashier, Teller and Bookkeeper in the commercial or general department of the bank. The bank had two departments in the same building—one known as the savings department, and the other as the general or commercial department, both regarded, however, as the one bank, and money often transferred from one department to the other. The Directors sought to be made liable were Caperton, Heming, Speed and Sabine, the fifth Director being J. H. Rhorer. The books of the general department were kept by Rhorer, and of the savings department by Joshua F. Speed, Jr. In the year 1872, shortly after Rhorer was elected Cashier, the bank built a safety-vault at a cost of \$55,000. The capital stock of the bank was only \$100,000 one-fifth of which was owned by J. H. Rhorer, the Cashier. Rhorer was not only the Cashier and one-fifth owner of the stock, but, as the proof showed, was the leading spirit in controlling and directing the affairs of the bank during the series of years in which he was engaged in making fraudulent entries in its books to enable him to appropriate the funds of the bank to his own use. His entire administration of the affairs of the bank evidenced a systematic purpose in embezzling the funds of the institution and betrayed an almost unlimited confidence placed in him by the Directors. It was not until the 9th of January, 1880, that the frauds were discovered,

*All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL'S Law Department as early as obtainable.

Attention is also directed to the "Law Notes and Comments" and "Replies to Law and Banking Questions," which are included in this Department.

although practised for the nine years that he was Cashier and long before, and they were then made known by the written acknowledgement of Rhorer, found with the papers of the bank, to the effect that he had been robbing the bank and had surrendered himself into the custody of the law. The amount of his defalcation reached \$118,000.

The Louisville Chancery Court rendered judgment for the defendants, and plaintiffs appealed to the Court of Appeals of Kentucky.

Held: The only question presented in this case is whether the Directors acted in good faith and with ordinary care and diligence in conducting the affairs of the bank, or such diligence as ordinarily prudent men would have exercised with reference to the conduct of such a moneyed institution. It is not a question as to how the frauds of the Cashier might have been discovered, but were these Directors guilty of gross neglect, which means an absence of that diligence that ordinarily prudent men in the conduct of such business would have exercised. The Directors received no compensation for their services; the benefits to be derived by them from the profits of the bank flowing solely from their interests as stockholders. If their liability is to be measured by that imposed upon the President or the Director who received as compensation a sum equivalent to an undertaking to supervise the entire affairs of the bank, by an actual inspection and examination of the accounts and books of the bank as well as other duties pertaining to such a position, then there would be no question as to the liability of defendants in this case; but with services rendered that are merely gratuitous, or at least without reward, it cannot be held that a liability is to be fixed upon them for no other reason than their failure to detect the fraudulent entries made by the Cashier in the books of the bank although extending through a period of nine years. The facts, however, presented by this record must determine the question of negligence or the want of diligence on the part of the defendants.

It was incumbent on the Directors to appoint all the officers necessary to carry on the business of the bank, and to use ordinary diligence in the selection of men qualified to fill such positions. In the year 1871, when Rhorer was elected Cashier of the bank and also made its Book-keeper, his past life as a business man so far as then known, was a sufficient guaranty to the Directors of his honesty and capacity for the position. He had been made President of the bank at its organization in 1866 with, as the proof shows, some of the most successful business men as Directors — Guthrie, Speed and Heming. His experience in banking, as well as his high character for integrity, both personal and financial, commended him to all business men as well qualified for such a position. There was no reason for suspecting his fidelity to his co-directors and to the interests of the bank, whose affairs he had been called upon to manage; and yet he was, at the time he was elected President of the savings bank, a defaulter in the savings institution that had been merged into the former bank in the sum of \$17,000.

It is insisted, as one of the grounds for imputing negligence to the Directors, that Rhorer, who had been elected President of the savings bank and was directed to transfer the balances from the books of the savings institution to the new bank, failed to open new books but continued to use the old books and especially the individual ledger containing the accounts of depositors in the savings bank until its supervision in the year 1880; that this aided Rhorer to cover up his defalcations in the old bank and to practise his frauds in the new bank, when, if the accounts on the old books had been balanced and the proper entries made in the new books, the fraud already practiced might have been detected. That a proper and thorough examination of the accounts of the savings institution would have been the safest method for these Directors to have pursued with new accounts opened for depositors must be readily conceded; but Rhorer having been Cashier of the old institution and having at the time of the merger of the two banks been elected President of the savings bank, it was not unreasonable but consistent with the duty these Directors owed to all interested that Rhorer should have been selected to make the transfer and to pursue the course that in his judgment was proper in opening the books for the new bank. There was nothing to excite the

least suspicion as to his honesty, and it cannot be regarded as neglect on the part of the Directors in permitting him to use the books of the old for the purposes of the new bank. If balances had been struck and transferred from the old set of books to the new, the fraud already practiced would necessarily have entered into the books of the new bank as Rhorer, who was directed to make the transfer, would scarcely have made entries that would have resulted in an exposure of his fraudulent practices.

The frauds perpetrated by the Cashier in abstracting the money of the bank were committed in various ways.

1st. When deposits in certain instances were made he would credit them on the individual ledger, but make no charge on the blotter. In one instance, the Louisville Steel Works is credited on the individual ledger with \$5,000, and this sum not credited to the concern or charged to cash on the blotter. Again the same party is credited by several items amounting to \$2,719 in the same way.

2d. The blotter shows a deposit on January 25th of \$3,898.50 and on that day Rhorer and Cotton are credited with that amount on the individual ledger. On the same day the Metropolitan National Bank of New York is credited on the blotter with \$6,101.50. These two items amount to \$10,000, and the bank on the general ledger is credited by \$10,000. It appears that the Metropolitan Bank was entitled to a credit of \$10,000 when Rhorer only placed to its credit \$6,101.50 and gave credit to Rhorer and Cotton for \$3,898.50 when no such deposit had been made; but by crediting the bank's account in the ledger with the true amount, \$10,000, the account appeared correct and enabled the Cashier to appropriate \$3,898.50 to his own use.

Another instance is where Rhorer is credited on the blotter with \$350, and this sum is posted to his account in the individual ledger as \$2,350. Again, he would charge a depositor on the blotter with a certain sum as if paid on the depositor's check. This sum would be posted to his account on the individual ledger and when balancing the account the item would be omitted from the addition. This character of fraudulent entries in the books of the bank was practiced from the year 1871 until the close of the bank in January, 1888. The amount of defalcation concealed by the fraudulent entries amounted in the aggregate to near, if not quite, \$60,000 with the cash found short in the sum of \$58,000. The entire defalcation was \$118,228.58 as reported by the expert accountants in the examination made of the bank accounts.

The principal grounds relied on for a reversal in this case are, *first*, that the Directors in giving to Rhorer the sole control of the books of the bank, making him Cashier, Book-keeper and Teller placed it within his power to perpetrate the fraud, and for that reason they were guilty of such neglect as makes them responsible to the bank; *second*, they failed to make proper examinations as to the condition of the bank and allowed the books to be falsely kept.

We have said that it was their duty to exercise that reasonable and ordinary care with reference to the affairs of the bank that ordinarily prudent men would exercise with reference to such business affairs. If it was the duty of the Directors to examine the books of the bank in the absence of any reason for suspecting the honesty of the bank Cashier with a view of testing their correctness with the weekly statements made them, or when making their periodical investigations of the money on hand, and the notes, bills, and bonds belonging to the bank, it being manifest that the frauds could have been easily discovered at least by a book-keeper of ordinary intelligence, then responsibility would necessarily follow. It is difficult to define each and every duty pertaining to such a position, but we are satisfied that a bank Director is neither required to be an expert or a competent book-keeper nor do more in the general management of the bank with reference to its Cashier and Book-keeper than to see, in the absence of any reason for doubting his fidelity to the trust confided to him, that the weekly, daily or monthly statements made to the Board correspond with the general balance upon the books. In this case the weekly statements as to the cash on hand, bills discounted, *etc.*, corresponded with the cash account as it appeared each day or at the time the statement was

made with the cash account on the Teller's blotter, where, as in this case, the cash account was kept.

It is argued, however, and the expert so states, that these frauds could have been readily detected by comparing a balance on the individual ledger with the amount stated to be due depositors in Rhorer's weekly statements. It is plain that any Director, if at all conversant with book-keeping, could have gone to the individual ledger and running over the accounts of depositors and then comparing that with the blotter evidencing each day's transactions, could have discovered the fraud or it might have been discovered by ascertaining the amount due each depositor as appeared from that book; but we know of no rule of law or reason that would require such an investigation by Directors, and to hold them responsible for failing to discharge such a duty would be imposing a responsibility that no business man would assume without a compensation commensurate with the labor required. If they have selected a Cashier and Book-keeper regarded at the time as qualified for the position assigned, or used reasonable care and precaution in making the selection, and taken from him a bond in an adequate penalty for the faithful discharge of his duties, his weekly or daily statements, as the custom of banks may be, agreeing with the balance as found on his books connected with the periodical count of the money, notes, bonds, *etc.*, it is all the supervision required unless the Directors have some cause for suspecting, or see that he is neglecting his duties.

In the present case the Cashier made weekly statements to the Directors that were compared with the cash balances and found correct; or, if not compared at the time, those statements agreed with the general balance found on the books, that were, however, false and erroneous by reason of fraudulent entries and forced balances. They examined the general condition of the bank once in every six months by making an actual count of the cash and ascertaining the amount of bills, notes, bonds and securities on hand, all of which agreed with the statements made by the Cashier and verified by the general balance found on the books.

It is argued, however, that as one of the means of preventing such defalcations it is prudent to have different employes in charge of the books as checks upon each other, and not entrust those duties to one man. This no doubt is the safest course to pursue so as to prevent fraud and have perfect accuracy in the accounts; but the fact that these Directors saw proper to confide in Rhorer and permit him to discharge the double duty of Book-keeper and Cashier, does not evidence a want of ordinary diligence on their part. If called on to adopt that mode, which would approach nearer to absolute security against such thefts than any other, the usual custom of the banks in a city would be adopted; but the question here presented is, were the Directors, in making such an employment, doing that which men of ordinary prudence in such business would have regarded as unsafe? We think, measuring the duty of a Director by the character of the business he is supervising, that the entire testimony in this case gives a negative response to the question. Rhorer had been trusted to an unlimited extent prior to this undertaking in the conduct of financial transactions involving millions of dollars. He was regarded as a man of means and worthy of every man's confidence by reason of his supposed great moral worth as well as his financial standing, and no reasonable man, unless exercising the highest degree of care under the circumstances, would have supposed that a check on his conduct in the bank was necessary, or that an inspection of the books, by way of detecting errors, was demanded. We therefore see no reason for holding these Directors personally liable by reason of frauds concealed by a system of false entries requiring the skill of expert accountants to ascertain when no breach of duty on the part of the Cashier had been brought home to the Directors, and the defalcation resulted from no act of their own. J. F. Speed, Jr., who had charge of the books in the savings department of this bank was an inexperienced book-keeper at the time of his selection, yet his books were accurate and his fidelity to the bank and its patrons unquestioned. The evidence of honesty and the utmost good faith was found on the side of the youthful book-keeper while a systematic

concealment of fraud was being practised by the shrewd and experienced financier. Heming and Speed, two of the Directors, were in the bank daily aiding in its control and management. They were both business men with their capital invested in the stock of the institution, and to adjudge that they were indifferent to their own interests or that of the bank would be a conclusion not sustained by the facts before us. The case of *Dunn's Adm'r. vs. Kyle's Ex'r.*, 14 Bush, 134, is very similar in many of its features to the case before us, in which it is held that the Directors were not liable to the stockholders for the default of the Cashier unless occasioned by their fraud or gross neglect. The absence of ordinary care was attempted to be shown in that case because of the failure of the Directors to discover the fraudulent acts of the Cashier such as required the skill of an accountant to develop. Where Directors, by their own act, cause a loss to the bank or the corporation they represent, no doubt as to their liability can arise. Where they discount paper known to be worthless or cause the Cashier or other officer of the bank or corporation to do that which is forbidden by the charter, and loss arises, they will be held responsible. (*Spring's Appeal*, 71 Pa. St. 11; *Shakers vs. Underwood*, 9 Bush, 609; *Bank vs. Hill*, 56 Me., 385).

Here the Directors are charged not with any wrongful act of theirs by which loss has been sustained, but for neglect in failing to do that which they ought to have done. They were ignorant of the thefts being committed, but it is alleged that they could have discovered the fraud by the exercise of ordinary diligence.

If this action was against the bank it would not be allowed to say that its Directors were ignorant of these frauds, for in such a case the law presumes that the Directors know every entry made by its subordinate officers in the bank books, and therefore the misappropriation of funds by a Cashier, unknown to the Directors, constitutes no defense to the bank; but in an action against the Directors to make them personally liable no such presumption exists, and the burden is on the creditor of the bank to show a want of diligence on the part of the Directors in discovering or preventing the fraud. Directors are under no personal liability to the creditors of a bank by reason of a neglect of duty. They are the agents of the corporation and could only be sued in this case by the creditor because of the refusal of the assignee to sue. They may be proceeded against personally for a conversion of special deposits by them because guilty of a tort, as in the case of *Shakers vs. Underwood*, 9 Bush, 609, or in a case where the President and Directors are the parties to be charged, there is no reason why the creditor may not sue, making the bank and Directors defendants. So, at last, it is the bank suing the Directors in this case for a neglect of duty; and, if there were no depositors, could the bank claim that the Directors were guilty of neglect in permitting Rhorer to act as Cashier and Book-keeper, or in failing to detect the frauds so manifest after the discovery? We think not.

The plaintiffs also say that the Directors were guilty of neglect in placing certain United States bonds amounting to \$35,000 in the custody of the Metropolitan Bank, in the city of New York, that were afterwards hypothecated with that bank for money loaned to Rhorer without the knowledge of the Directors. These bonds belonged to the savings side of the bank, the books of which were under the control of Joshua Speed, Jr. This book-keeper reported in his statements these bonds as belonging to the savings side of the bank, and the Directors believing them perfectly secure and having placed them with that bank to enable the bank at Louisville, as Heming states, to draw upon the New York bank whenever it might need money, made no inquiry as to any use that might have been made of them by its bank officers. They had no reason to believe that Rhorer had pledged them as collateral to raise money that he might increase the fund in the home bank upon which to plunder, and we perceive no reason for holding them guilty of an imprudent act in depositing them with the New York bank for the purposes mentioned by Heming, one of the Directors. They, it is true, might have suspected Speed of using them for his purposes if his honesty had ever been questioned or doubted by them, or they might have suspected Rhorer of stealing the

bonds from Speed or the New York bank ; but as no cause existed for suspecting either of the book-keepers the depositing of the bonds with the bank in New York did not constitute any character of neglect as it was proper that they should do so under the circumstances.

In regard to the Semple bonds belonging to Caperton and that were used in his absence in the statements as to the condition of the bank by Rhorer, as assets of the bank, it appears that the bank was in the habit of investing in bonds, and whether these bonds were all of the series of the Semple bonds does not appear. Rhorer exhibited them to the other Directors as belonging to the bank, and how they were to know they had been charged to the account of Caperton it is difficult to perceive. They did not suspect Rhorer of deception. The bonds were in the vaults of the bank and exhibited as part of the assets. If it was their duty to examine Caperton's account in order to prevent fraud on the part of the Cashier, their liability might be asserted ; but even if Caperton had been present with a series of bonds of a like character he would doubtless not have suspected Rhorer of using his bonds as assets of the corporation.

Nothing occurred during the interval between 1871 and 1880 that called the attention of the Directors to the individual ledger or to a minute examination of any book connected with the corporation. In the case of *Scott vs. Depeyster*, 1 Edw., Ch. 542, the Cashier or Treasurer of the corporation embezzled the funds by a series of frauds running through several years in a manner much like the Cashier did in this case. The stockholders attempted to make the Directors liable on the ground of neglect, *etc.* The court, in discussing the facts of that case, said that "such subordinates (alluding to the Cashier) must be supposed to act honestly until the contrary appears, and the law does not require their employers to entertain jealousies and suspicions without some apparent reason;" and further said the court: "I think the question in all such cases must necessarily be whether they (the Directors) have omitted that care which men of common prudence take of their own concerns." In the case of *Manhattan Co. vs. Lydig*, 4 Johns, 877, it is said on this question of diligence: "The examinations of the bank, by the Committee of Directors, were in the usual way, and the fraud practised eluded detection by means of a false balance-sheet. It is not for the court to point out the mode banks are to pursue to detect frauds, but if they take the usual and uniform methods adopted, not only by this but by other banks, they cannot be subject to the charge of negligence." And if the mode adopted by business men in such cases is to fix the measure of diligence or determine the question of neglect, as said by Lord Hatherley, in *Turquard vs. Marshall*, L.R., 4 Ch., 876, then Directors are relieved from liability.

Taking the entire testimony of bankers in this case, these Directors were as diligent or more so than the Directors of other large moneyed institutions ; and to hold them responsible under the facts presented would be to deter business men from accepting the position of a Director when by so doing they are required, in effect, to secure the honesty of bank subordinates by being made responsible for their fraudulent acts. We have considered other questions of neglect made in this case, involving fraudulent overdrafts, and the fact of notice given a man, supposed to be perfectly honest, of the day on which his money as Cashier was to be counted, in all of which we perceive no want of ordinary diligence. These Directors were the principal stockholders. Their own interests were involved to a greater extent than that of the depositors. They were business men. Two of them were almost daily at the bank. The assets of the bank will pay 80 or 90 cents to the dollar, and if they paid less it could not affect the question here. They (the Directors) have conceded their neglect in the particular of failing to have ample security to the bond of the Cashier. They have made the neglect good by accounting to the bank for the penalty of the bond, which was \$20,000.

They have exercised ordinary diligence in the discharge of their official duties, and suffered loss in common with the plaintiffs, by the fraud of a Cashier in whom they had all the right to confide.

Judgment affirmed.

Meyers, et al vs. Caperton, et al, Court of Appeals, Kentucky, June 2, 1888.

STATE TAXATION OF NATIONAL BANKS—A CASE IN OHIO WHEREIN THE PROVISION OF SECTION 5,219, U. S. REVISED STATUTES, THAT SUCH TAXATION SHALL NOT BE AT A GREATER RATE THAN THAT IMPOSED UPON OTHER MONEYED CAPITAL IN THE HANDS OF INDIVIDUAL CITIZENS, IS HELD TO BE VIOLATED—THE RIGHT OF SHAREHOLDERS TO DEDUCT BONA FIDE INDEBTEDNESS FROM ASSESSMENT, CONSIDERED.

This was a bill in equity by the Mercantile National Bank of Cleveland, Ohio, against Horatio N. Whitbeck, as Treasurer of Cuyahoga County, Ohio, to restrain the latter from collecting certain taxes levied upon the capital stock of the bank.

In substance the bill alleged that upon the assessment of the value of the shares of its capital stock for the purposes of taxation, they were estimated at 65 cents on the dollar of their real value in money, while all other property in the city of Cleveland and county of Cuyahoga, including the moneyed capital in the hands of individual citizens of said city and county, was estimated at only 60 cents upon the same basis. This occurred in the following manner:

The Auditor of Cuyahoga County, in accordance with the rules and practice adopted for the valuation of other moneyed capital of individuals, fixed the taxable value of these bank shares at 60 per cent. of their true value in money, and certified and transmitted the same to the annual State Board of equalization for incorporated banks. This Board made an order increasing the valuation to 65 per cent., which latter value was certified back to the Auditor, and by him placed upon the tax duplicate for the year 1885. This was delivered to the defendant, the Treasurer of the county, for the collection of taxes thereon.

Another point made by the bill was that while the statutes of Ohio permit the taxpayer owning moneyed capital subject to taxation to make a deduction from the amount assessed against him on account of credits, for the amount of his *bona fide* indebtedness, no such provision is made in regard to the indebtedness of any holder of bank stock. The bill set up as affected by this proposition the names of certain shareholders of the plaintiff bank, who claimed that they should be allowed this deduction for their indebtedness upon the taxable value of their bank shares.

The case was tried before the circuit and district judges of the federal court, sitting together, and a certificate of division was made, accompanied by a statement of facts on which the difference arose. A decree was entered in accordance with the opinion of the circuit judge, enjoining the collection of the amount represented by the difference between 60 and 65 per cent. of the actual value of the stock, and granting the relief asked for by the shareholders who claimed a deduction on account of their indebtedness, except as to three of them.

From this decree an appeal was taken by the defendant, the Treasurer of the county, to the Supreme Court of the United States.

Held, As regards the allegation of a discrimination against the stockholders on account of the shares held by them, caused by the increase in the assessment of 5 per cent. made by the State Board of Equalization, the matter is not altogether free from difficulty; but we are of opinion that there is such a discrimination as is forbidden by section 5,219 of the Revised Statutes, U. S. It is certainly true that the tax upon personal property, including the moneyed capital of private citizens, in Cuyahoga County, is made upon an estimate of 60 per centum of its cash value in all cases except with regard to bank stocks, and that in regard to these the valuation is fixed upon the same basis at 65 per cent. It is probably the fact, as alleged by the counsel for the Treasurer, that the State Board having these stocks under consideration may have made a truer estimate, and may have equalized their assessed value over the entire State; but this equalization, from the very nature of the functions and powers of that body, merely has reference to bank shares as among themselves; that is to say, its purpose is to make the capital stock of all incorporated banks in the State equal in valuation for the purposes of taxation so far as relates to their actual cash value. This Board has no other power than this; it has no capacity to equalize the value of bank shares for taxation as compared with

other moneyed capital in the State. Such capital may therefore have a valuation very much below its real value, and even very much below the conventional rate fixed upon bank stocks by the action of this body; and that result almost necessarily follows in this case from the nature of the powers which have been conferred upon it. While it has the power and it is made its duty to take the valuation of bank shares as reported to it by the Auditor of Cuyahoga County, and make a comparison between it and the reports of the same character made to it by the 80 other counties in the State, it receives no such report in regard to any other moneyed capital. There is no means furnished to it for the purpose of making a comparison of the proportion which the assessment sustains to the true value, as between the banks and the other moneyed capital of the State, in the different counties thereof. While it is not an absolute necessity that this method should result in a discrimination against the National banks, it is one of the probabilities, as has happened in this case, that it may produce such a result which shall be unfavorable to those institutions. Section 2,804 Rev. St., Ohio, enacts that an annual county board for the equalization of the real and personal property, moneys, and credits in each county, exclusive of cities of the first and second class, shall be composed of the County Commissioners and County Auditor, who shall meet at the office of the latter in each county on the Wednesday after the third Monday in May, annually. It is provided that this Board shall have power to hear complaints, and to equalize the valuation of all real and personal property, moneys, and credits within the county. It is under this statute that the assessment was made which the Auditor certified to the State Board of Equalization. No complaint has been made that this assessment upon the capital shares of the plaintiff bank was in any wise unequal as regards the assessment upon other moneyed capital. The organization and method of proceeding of the State Board of Equalization for incorporated banks is provided for in the following sections of the Revised Statutes of Ohio, 1880:

"Section 2,808. (As re-enacted March 9, 1883, 80 Ohio Laws, 55.) The Governor, Auditor of State, and Attorney-General shall constitute a board for the equalization of the shares of incorporated banks, and for this purpose they shall meet on the third Tuesday of June annually, at the office of the Auditor of State, and examine the returns of said banks to the County Auditors, and the value of said shares as fixed by the County Auditors, as the same shall have been reported by the County Auditors to the State Auditor.

"Section 2,809. (As amended March 9, 1883, 80 Ohio Laws, 55.) Said Board shall hear complaints and equalize the value of said shares according to the rules prescribed by this title for valuing and equalizing the values of real and personal property, and if in the judgment of the Board, or a majority of them, the aggregate value of all bank property so reported to said Board by the County Auditors is below its true value in money, they may increase or diminish the value of said shares by such a per cent. as will equalize said shares to their true value in money; provided that said Board shall not increase or reduce the grand aggregate value of the bank shares as returned by the several County Auditors by more than twenty per centum."

It is obvious from these two sections that the only power of this Board is to diminish or increase the assessed values of the shares of stock by such a per centum as will make them equal among themselves, and that there is no power of equalization, so far as other personal property is concerned, or in comparison with other moneyed capital in the hands of individuals. The language directing the Board to proceed "according to the rules prescribed by this title for valuing and equalizing the values of real and personal property" does not authorize a comparison of the values of bank shares with that of real and personal property, but is only intended to have regard to the mode of procedure, such as laying before that body the reports of the County Auditors, hearing complaints, and equalizing the assessments as between the shares of different banks. Therefore, in the order by which it equalized the various bank shares as among themselves from all over the State, and certified this increase of five per cent. upon the assessment to the Auditor of Cuyahoga

County, it had no purpose to change or to equalize the assessment in its relation to other moneyed capital of the State, of the city of Cleveland, or of the county of Cuyahoga.

It is said, however, that the standard of comparison required by the act of Congress is the assessment of all the banks of the State with that upon moneyed capital all over the State, and that there is no evidence presented in this suit that there was any discrimination against the bank if the standard of comparison here suggested is the one which should govern. There is evidence that the rule which was adopted by the Board of Equalization of Cuyahoga County of fixing the assessment at sixty per cent. of the cash value of the property, prevailed in eleven other counties in the State. It is also a fact that in regard to those counties the discrimination against the National bank, as compared with other moneyed capital, is established. This alone would be sufficient to establish a discrimination as to 23.6 mills out of the entire rate of 26 mills on the dollar of valuation; it being found as a matter of fact that 26 mills was the entire tax levied upon all the property in the county of Cuyahoga under this assessment, of which the amount of 23.6 mills was exclusively devoted to county and city purposes, and but 2.4 mills was levied for State purposes. While it might perhaps be plausibly said that, in regard to taxation for State purposes the rule of comparison should include the whole State, it is equally clear that for the much larger proportion of the tax levied for county and city purposes the assessment upon the moneyed capital of the citizens in such county and city should furnish the standard by which the inequality of taxation should be determined. As it has already been shown that the Board for the equalization of the shares of incorporated banks had neither the authority nor the means to establish and equalize the assessment of the shares of all the banks of the State with the other moneyed capital of the State, we do not very well see how the oral testimony of witnesses offered to establish this uniformity of assessment could do so; and if it could, how it was competent to do it in the face of the fact that the Board had no such power.

In regard to the deduction of their *bona fide* indebtedness claimed on the part of certain owners of shares in the plaintiff bank from the assessment levied upon such shares, the court finds that no demand was made therefor "either by the complainant or by any of its shareholders until the 17th day of December, A. D., 1885; the date prior to the commencement of this action, at which time the entire process of the appraisal and equalization of the value of said shares for taxation had been completed, and the tax duplicate for said year had been delivered, in accordance with law, to the Treasurer of said county for the collection of said taxes; but the laws of Ohio make no provision for the deduction of *bona fide* indebtedness of any shareholder from the shares of his stock, and provide no means by which such deduction can be secured."

Under the decision in *Hills vs. Bank*, 105 U. S., 319, we are of opinion that the bank was entitled to relief in the cases of all the shareholders named in the bill (except James A. Barnett, Robert L. Chamberlain, and James Parmalee) and that the fact that they did not make an earlier demand for the deduction of their indebtedness from the assessed value of the shares of their bank stock does not defeat their right to have it made by this bill in chancery, for the reason that the court expressly finds that "the laws of Ohio make no provision for the deduction of the *bona fide* indebtedness of any shareholder from the shares of his stock, and provide no means by which such deduction can be secured." This was precisely the case in regard to *Hills vs. Bank*, in which this court said: "We are of opinion that, considering the decision of the Court of Appeals of New York, the action of the Assessors in the case of *Williams*, and their own testimony in this case, it is entirely clear that all affidavits and demands for deduction which could and might have been made would have been disregarded and unavailing, and that the Assessors had a fixed purpose, generally known to all persons interested, that no deduction for debts would be made in the valuation of the bank shares for taxation. It is therefore not now essential to show such an offer when it is established that there were debts to be deducted and when the matter is still *in fieri*, the tax

being unpaid." In regard to all of the shareholders claiming this deduction except Barnett, Chamberlain, and Parmalee, the court finds that the allegations of the bill are true, but as to them they are untrue. It therefore granted relief by injunction as to all of them except these three, as to which it was denied. It is to be observed however that the bank takes no appeal from the part of the decree denying relief to these three shareholders.

These principles require the affirmance of the decree of the Circuit Court; and while there will be found in them a sufficient answer to the questions certified by the judges of that court, we do not think it necessary to make a more specific answer to each of them.

Decree affirmed. Opinion by Miller, J.

Whitbeck, County Treasurer, vs. Mercantile National Bank of Cleveland,
Supreme Court of the United States, April 23, 1888.

BANK AND DEPOSITOR—DEPOSIT OF MONEY ON EVE OF FAILURE—RIGHT OF RECOVERY IN ACTION OF REPLEVIN.

The plaintiff Furber had been a customer of the Fifth National Bank for some time before its failure on November 7, 1887. Only a few moments before the bank closed its doors he delivered \$762.50 in current funds over the counter to the receiving Teller to be credited to his account in the usual course of business. The deposit was entered in the plaintiff's pass-book, and the book was returned to him; but the Teller laid the money aside, together with the deposit ticket, according to his custom when he was busy so that the money did not become mingled with the funds of the bank. Before any entry was made to defendant's credit on the books, the bank closed its doors and by direction of the bank officers the plaintiff's deposit was kept separate from other moneys, and in that shape passed into the custody of the Receiver. It was conceded that when the deposit was made neither the plaintiff nor the receiving Teller knew that the bank was about to suspend.

Plaintiff thereupon brought an action of replevin against L. V. Stephens, the Receiver of the bank, to recover the amount so deposited; the case being submitted upon an agreed statement of facts substantially as above stated.

Held, On the agreed case there is only one ground upon which the plaintiff can recover, and that is that the reception of the money under the circumstances stated was such a fraud on the part of the bank as entitles the depositor to reclaim the money in an action of replevin. Whilst it is the rule that a deposit made with a bank of current funds creates the relation of debtor and creditor as soon as the funds pass into the custody of the bank, and even before any entry has been made in the books of the bank, as distinguished from the depositor's pass-book, yet there are several well-considered cases that hold that if the bank receives money from a depositor on the eve of suspension, knowing that it is insolvent, and about to suspend, such conduct is fraudulent and entitles the depositor to reclaim the deposit if the particular money can be identified and has not become mingled with the funds of the bank. We refer to the following cases: *Cragie vs. Hadley*, 99 N. Y., 131; *Sadler vs. Belcher*, 2 Moody & R., 489; *Chaffee vs. Fort*, 2 Lans., 86.

Counsel for the Receiver lay stress on the fact that the receiving Teller did not know that the bank was about to suspend when he received the deposit, but we regard that fact as immaterial, if the officers of the bank knew that it was about to suspend business. The Teller was merely a subordinate agent of the bank, and the corporation cannot shelter itself behind his ignorance, if the managing officers of the corporation were acquainted with its condition when the deposit was made. Inasmuch as the agreed statement admits that the bank was insolvent and that it closed its doors only a few moments after the money was received, it must be taken as a conceded fact that the Directors or managing officers did know that the concern was insolvent and was about to suspend operations when the deposit was made. The subsequent action of the officers of the bank in directing the receiving Teller to keep the deposits separate so that it could be identified, is an admission of such knowledge on their part and likewise an admission that the depositor had the right at his

election to reclaim the money. The receipt of the money from the depositor under such circumstances, especially if the bank officials had made an effort to hold the money and treat the depositor as an ordinary creditor would have operated as a fraud on the depositor and would entitle him to reclaim the money deposited, if susceptible of identification. There is no possible distinction in principle between receiving money on the eve of suspension, knowing that a suspension is about to take place and the purchase of property by an insolvent person with a pre-conceived intent of not paying for it. In both cases the depositor and the vendor may reclaim that with which they have parted, if it can be identified in the one case, and has not passed to an innocent purchaser for value in the other.

As this is an action of replevin the judgment will be that the plaintiff is entitled to the possession of the money deposited, and the damages for the detention will be assessed at one cent.

Furber vs. Stephens, Circuit Court of the United States, E. D., Missouri, May 5, 1888.

OFFICIAL CHECK OF BANK CASHIER—LIABILITY OF STOCKBROKER FOR TAKING IN PAYMENT OF MARGINS DUE BY CASHIER INDIVIDUALLY—NOTICE TO BROKER BY FORM OF CHECK.

[In an action by the Receiver of a National bank against defendants, a firm of stockbrokers, who bought and sold stocks for W, its defaulting Cashier and President, it was shown that defendants received as margins, checks drawn by said W, as Cashier, on the funds of the bank in New York.

Held, That the forms of the checks were notice to the defendants that the funds so received belonged to the bank, and they were liable to the Receiver for a misappropriation thereof.

Further Held, That defendants could not prove a usage in New York city among bankers and brokers to receive Cashier's checks and drafts, as cash, upon transactions with the Cashier individually.]

This action is in substance one of trover to recover moneys of the First National Bank of Albion alleged to have been wrongfully appropriated by the defendants, a firm of stockbrokers doing business in New York city, during the years 1880 and 1881. The case was tried with a jury, and the jury found a verdict for the plaintiff for \$108,000 principal, with \$44,759 interest. The case then came again before the Court upon a motion by the defendants for a new trial.

It appeared by the evidence that in 1880 one Warner was the Cashier of the Albion bank, and for some time had been intrusted with the almost exclusive management of its affairs. In November, 1881, he became its President. In August, 1884, the bank failed, Warner absconded, and the plaintiff, who was appointed its Receiver, took possession of the assets. An examination of its affairs showed that Warner had misappropriated moneys and securities of the bank to the amount of over \$300,000, and was otherwise indebted to the bank in a considerable sum. It was further shown that Warner had been carrying on stock speculations through the agency of the defendants, who were stock brokers and bankers of New York City; that he opened a customer's account with them May 11, 1880, and continued to buy and sell stocks and securities upon margins through them, and to deposit with and draw upon them as bankers, during that year and the next; and that from time to time the defendants received large sums of money from him by checks of the Albion bank, payable to their order, drawn by Warner as Cashier, upon the Third National Bank of New York city. The defendants collected these checks and placed the proceeds to Warner's credit in his account with them.

It was also proved that for many years the Albion bank had kept a banking account with the Third National Bank of New York, and had been accustomed to draw upon it at sight and send it collections and remittances; that after Warner became the Cashier of the Albion bank he took personal charge of the correspondence between that bank and the New York bank, and intercepted the letters of advice and monthly statements sent by the New York bank to the Albion bank, and adopted other methods to conceal from the other persons

associated with him in conducting the Albion bank the true state of the account between the two banks; that from time to time he deposited with the New York bank in the name of the Albion bank funds in his possession, and from time to time drew checks and drafts in the name of the Albion bank as Cashier upon the New York bank for his own transactions and speculations; and that the checks and drafts thus drawn by Warner for his own use were not credited to the New York bank on the books of the Albion bank, nor were the deposits made in the name of the Albion bank by Warner personally charged to the New York bank on the books of the Albion bank, although they were credited to the Albion bank by the New York bank, and neither the checks or drafts nor the credit items appeared in any way upon the books of the Albion bank. The evidence was sufficient to justify the finding that Warner used the account of the Albion bank with the New York bank as the means of appropriating, without the knowledge of the Directors or other officers of the Albion bank, and clandestinely, the funds and credit of that bank for his own benefit. It appeared by the books of the two banks that the checks and drafts upon the New York bank, and charged to the Albion bank but not credited by the Albion bank to the New York bank, during the period of Warner's defalcations amounted to \$267,000, and the deposits credited by the New York bank to the Albion bank, but not charged by the Albion bank to the New York bank, during the same period amounted to \$281,000.

The checks received by the defendants between May 11, 1880, and August 26, 1881, and including those dates, aggregated the amount of \$103,000. During the same period they received from Warner from other sources \$107,703. The defendants bought and sold stocks for Warner on a margin of 10 per cent., and many of the checks in question were received by them pursuant to their request to remit for margins. The first and last checks were for \$10,000 each. One was for \$15,000. In January, 1881, they received checks for margins aggregating the sum of \$50,000. Testimony was given for the plaintiff tending to show that Warner was rated where he resided as worth from \$15,000 to \$20,000; and testimony was given for the defendants tending to show that they supposed that other persons were interested with Warner in his stock transactions, and did not suspect that he was using the funds of the bank illegitimately. It also appeared that from time to time Warner drew on the defendants, and that during the period covered by the checks in controversy they paid on his drafts into the Third National Bank, to the credit of the Albion bank, at various times sums aggregating \$89,202; and that this amount was credited to the Albion bank on the books of the New York bank, and \$25,850 thereof was charged on the books of the Albion bank to the New York bank, but the rest did not appear in the books of the Albion bank.

Upon the trial the Court excluded the testimony offered by the defendants to show that it was customary with bankers and brokers of New York city to receive Cashiers' checks and drafts drawn in favor of their own banks upon New York banks as cash, upon transactions with the Cashier individually.

At the close of the testimony the defendants requested the Court to instruct the jury to find a verdict for the defendants. Defendants also requested the Court to instruct the jury that the defendants were not liable for any sum in excess of the difference between the sums received by them from Warner upon the checks of the Albion bank and the sums paid by them on Warner's drafts to the New York bank to the credit of the Albion bank. The Court refused such instructions.

The Court instructed the jury in substance that it was incumbent upon the plaintiff to establish that the moneys represented by the checks received by the defendants were moneys of the bank which had been misappropriated by Warner, and that, when the defendants received the checks, they took them with guilty knowledge that Warner, in using them, was misappropriating the funds of the bank; and that, unless they found both these propositions established by the evidence, their verdict should be for the defendants. They were further instructed that they might find upon the evidence that Warner was permitted by the Directors of the bank to draw such checks for his own use or to use the money of the bank for his own purposes, or they might find that the

Directors of the bank were in collusion with Warner and cognizant of his transactions ; that if they found that those who represented the stockholders of the bank as its Directors or managers permitted Warner to draw such checks or use the moneys of the bank for his own purposes, not as co-conspirators or collusively, but trusting in his integrity, or believing that the bank would not be injured, or through loose management on their part, the plaintiff could not recover ; but if they did this collusively, their consent could not shelter the defendants, because they had no power, by virtue of their position, to consent to a fraud upon the stockholders. The jury were further instructed that, upon the issue whether the defendants received the checks with guilty knowledge, the question was not whether they were negligent in receiving them or in allowing Warner to deal with them as they did, but the question was whether they were guilty of bad faith ; that defendants were bound to know that a Cashier has no authority as such to loan the money of the bank or use its checks for his personal use ; that the jury were to infer that the defendants knew this when they received the checks, and therefore the question was whether the defendants believed that, by some special arrangement or confidence, Warner was permitted by those who were associated with him in the management of the bank to use its checks and moneys as he did, and if the jury found that the defendants so believed, the defendants were not guilty of *alma fides*. The jury thereupon rendered a verdict for the plaintiff, as above stated.

The defendants insisted upon the motion for a new trial, that the Court erred in excluding the testimony of custom, in refusing to instruct the jury as requested, in the instructions given to the jury, and urged other grounds for a new trial.

Hold : In some aspects this is a hard case for the defendants. If the verdict stands they are made responsible to pay over a very large sum of money which came to their hands to be invested and handed for another person in consideration of a small commission to be received by them, and which they have paid back to the person from whom they received it ; and there is no reason to suppose that they had any active or defined purpose when they received the money, or at any time, of assisting the person from whom they received it to defraud others or to injure others in any way. It is altogether likely that they could have shown, if they had been permitted to do so, by the testimony of any number of respectable bankers and brokers, that it is every day practice in Wall street for those in their line of business to buy and sell stocks for bank Presidents and Cashiers who are speculating there, and to accept drafts and negotiable paper of the corporations of these officers, made by them officially, in payment of the margins or purchase money. It is not improbable that they might have produced plenty of credible and reputable witnesses to show that such transactions are so frequent and common in Wall street that they do not attract special notice, and do not usually excite a passing suspicion that they are irregular or improper. In this view of the case it may be that the defendants are to be regarded not as intentional wrong doers, but as the victims of an unfortunate and fatal environment. The law, however, deals with acts, testing intention by the probable and necessary consequences of conduct, and pronounces them tortious or fraudulent, irrespective of the degree of moral turpitude of the offender, or of any moral turpitude, whenever they contravene its rules. Consequently, although the defendants may have been morally innocent, and although their conduct may have been sanctioned by the uniform and universal custom of Wall street, the question, nevertheless, is whether it was legally right and honest for them to take the checks in question in payment of the personal obligations of the bank officer who made them.

No usage, however common and well recognized, can be invoked to justify a banker or any one else in taking money or negotiable paper in payment of an agent's debt, known to belong to his principal, or known to belong to a trust estate, to satisfy the trustee's personal debt, or to shield the banker from accountability who wilfully closes his eyes and stops his ears to facts and circumstances which import notice that the agent or trustee is misappro-

priating the money or property intrusted to him. Therefore, if there is any significance in the fact that a bank President or Cashier offers negotiable paper of his corporation, made by him in his official character, in payment of his personal debt or to raise money for his personal use, it matters not that bankers generally do not appreciate it. If they regard the transaction as equivalent to one in which the individual comes with money in hand, they ignore its real character, because in that case he comes with what purports to be his own, having the possession which implies title and ownership and the right to use it as he sees fit. When he comes with the money obligation of a corporation, which is the contract of a corporation only because he has made it, and which is not its contract if he has made it without authority, the transaction is a very different one. Every person who takes such an obligation must ascertain at his peril that the agent who has made it was authorized to do so; and the moment it appears that the contract has been made for the agent's own use and benefit, that moment his authority is impugned and impeached. No principle of the law of agency is better settled than that no person can act as the agent of another in making a contract for himself; therefore it is that a bank President or Cashier has no implied authority to bind his corporation to negotiable paper made for his own use, and if it appears upon the face of the paper that it is payable to the individual who has made it in an official capacity, the obligation is nugatory and no purchaser can enforce it.

Upon this principle it was held in *Claffin vs. The Farmers and Citizens' Bank* (25 N. Y., 293), that a general authority to the President of a bank to certify checks drawn upon it, does not extend to checks drawn by himself; and if the face of the check shows the President's attempt to use his official character for his private benefit, every one to whom it comes is put upon inquiry, and if the certificate is false no one can recover against the bank as a *bona fide* holder. So, too, it was held in *West St. Louis Savings Bank vs. Shawnee County Bank* (95 U. S., 557), where a bank Cashier made his individual note payable to the order of his bank and indorsed it officially, that a purchaser of the note was charged with notice that the indorsement was not within the implied authority of the Cashier, and must prove actual authority in order to recover of the bank as indorser. It can make no difference whether the agent or officer appears to be the party to whom the paper is payable upon the face of the instrument, or whether it appears by extrinsic facts that he is the real party for whose benefit it was made; consequently, whenever he offers the instrument under circumstances which show that he has made it officially for his private use, the party dealing with him must take notice of his want of authority, and cannot treat it as the obligation of the principal unless he can prove the existence of some special and extraordinary authority on the part of the agent. For these reasons the testimony offered by the defendants to show that cashier's checks when used in the private transactions of bank Cashiers are by usage regarded as cash, was properly excluded. If the tendency of the testimony was to establish a usage to the effect that such payments are regarded by bankers as ordinary payments of cash made by individuals for their own account the usage would contravene well settled legal principles. In any other aspect the testimony was immaterial.

The views thus expressed are pertinent in considering whether the instructions given to the jury were correct respecting the title acquired by the defendants to the checks and the moneys the checks represented. If the instructions did not accurately present to the jury the legal principles by which upon the evidence the rights of the parties were to be determined, they certainly did no injustice to the defendants. The case was put to the jury upon the theory that the defendants, in taking the checks, occupied the position of purchasers of commercial paper, and as though their liability was to be tested by the rule applicable to actions for the wrongful conversion of such paper. If they acquired title to the proceeds, and if they were *bona fide* purchasers, their title was perfect; otherwise, they became liable for the proceeds as for a conversion (*Comstock vs. Hier*, 73 N. Y., 269). The defendants were given the full benefit of the distinction between negligence

and *mala fides* in the purchase of negotiable paper, and the jury were instructed that mere suspicion on the part of the defendants was not sufficient to charge them with notice that Warner was using the checks without authority. The doctrine of *Simmonds vs. Goodman* (20 How., 348) was adopted as applicable to the facts. The facts in evidence certainly justified submission of the question to the jury whether the defendants did not have notice that Warner was availing himself of fiduciary powers to use the funds of the corporation for unauthorized purposes. As the checks were made payable to the order of the defendants for Warner's individual use, in legal effect they were made payable to Warner's own order. The defendants knew that he was not acting within the scope of any ordinary agency when he made checks officially for use in his private transactions. The authority of a Cashier to represent a bank does not extend to a contract involving the payment of money not loaned by the bank in the ordinary way (*U. S. Bank vs. Dunn*, 6 Pet., 51; *U. S. vs. City Bank of Columbus*, 21 How., 856; *Merchants' Bank vs. State Bank*, 10 Wall, 604). As the executive officer of the bank he transacts its business under the orders and supervision of the Board of Directors. Authority to use its credit or transfer its funds for his private use cannot be implied from the fact that his official position puts it within his power to act dishonestly in this behalf.

Although the defendants were bound to know when they took the checks that the paper could be treated as the paper of the bank unless the managers of the bank had loaned him the money represented by it, there was evidence, which, unexplained, tended to show that such a loan had been, in fact, made. The evidence consisted in the circumstances that the checks were drawn upon the regular correspondent of the bank, were drawn frequently, were for large amounts, and the transactions extended over a considerable period of time. These circumstances indicated the improbability that the Cashier was acting clandestinely or criminally, and suggested that he was acting with the acquiescence of the Directors, or that the Directors were grossly inattentive to their duties. If the circumstances were sufficiently notorious and peremptory to preclude any other theory than that the Directors were aware of what was being done, and were not such as to imply that the Directors were wilfully ignoring their duties and acting collusively with Warner, they would afford sufficient evidence of Warner's authority to use the funds of the bank as he did, and would have justified the defendants in relying upon the ostensible authority evinced by the acquiescence and recognition of the Directors. As was said by the Court in *Martin vs. Webb* (110 U. S., 14): "It is clear that a banking corporation may be represented by its Cashier—at least where its charter does not otherwise provide—in transactions outside of his ordinary duties, without his authority to do so being in writing, or appearing upon the record of the proceedings of the Directors. His authority may be by parol and collected by circumstances. It may be inferred from the general manner in which, for a period sufficiently long to establish a settled course of business, he has been allowed, without interference, to conduct the affairs of the bank. It may be implied from the conduct or acquiescence of the corporation as represented by the Board of Directors. When, during a series of years or in numerous business transactions, he has been permitted, without objection, and in his official capacity, to pursue a particular course of conduct, it may be presumed, as between the bank and those who, in good faith, deal with it upon the basis of his authority to represent the corporation, that he has acted in conformity with instructions received from those who have the right to control its operations. Directors cannot, in justice to those who deal with the bank, shut their eyes to what is going on around them. It is their duty to use ordinary diligence in ascertaining the condition of its business, and to exercise reasonable control and supervision of its officers. * * * That which they ought, by proper diligence, to have known, as to the general course of business in the bank, they may be presumed to have known in any contest between the corporation and those who are justified by the circumstances in dealing with its officers upon the basis of that course of business."

The defendants could rightfully assume that the Directors of the Albion

Bank did use reasonable diligence in acquainting themselves with the state of its account with its principal agent, the New York bank, and did exercise proper control and supervision generally in the management of its affairs; and the fact that Warner was, nevertheless, able to use the funds of the bank in such large amounts, for so long a period of time, and through the medium of the regular correspondent of the bank, was inexplicable, except upon the theory of the acquiescence of the Directors, or of their guilty complicity with him, or of the existence of an extraordinary laxity on their part in the conduct of the affairs of the bank. The defendants, however, chose to rely upon appearances instead of seeking authentic information. They are not certain, and could not be from the nature of the case, whether, notwithstanding appearances, the Directors were not being deceived by Warner and were not, in fact, ignorant that he had ever made any of the checks in question. It was incumbent upon the defendants to show that the Directors knew and acquiesced in what was being done by Warner before they could rely upon his official signature. The evidence raised a presumption of such knowledge and acquiescence on the part of the Directors, but did not show it conclusively: it presented a question of fact for the consideration of the jury, and the jury found, as the evidence fully warranted them in doing, that the Directors were ignorant of Warner's acts. As is stated in Wharton on Agency (see 129), "the pretension by an agent to extraordinary or peculiar powers is by itself sufficient to arouse suspicion." When the transaction is such as should arouse suspicion of the agent's authority to represent his principal, it is the duty of those who deal with him in a representative character to apply to his principal for information. The defendants did not choose to take the safer course; they preferred to rely upon the evidence of Warner's authority, evinced by the fact and circumstances which tended to show that the Directors must have known of and consented to his use of the funds of the bank. The jury found not only that the Directors did not know this, but also found that the defendants did not believe, when they took the checks, that Warner was authorized to make them, by his co-managers of the bank. The doctrine that a purchaser of negotiable paper acquires a good title if he acquires it for value and honestly, notwithstanding he may have been grossly negligent in failing to make proper inquiries, has no application to a case like the present. A purchaser of commercial paper made by an agent cannot acquire any title to it as against the principal unless he is able to show that it is the paper of the principal made by the agent by due authorization. When he has information that the agent who has made the paper has made it in the name of the principal for his own use, he must be prepared to show that special authority in that behalf has been delegated by the principal and cannot rely upon the implied authority of the agent to make such paper in the ordinary business of the principal.

In accordance with those views, the defendants were not entitled to the instruction that they were only liable if the jury found they took the checks with guilty knowledge that Warner had no authority to use them; and it would have been proper to instruct the jury that the plaintiff was entitled to a verdict if they found that Warner had no authority, actual or ostensible, to use them.

It is insisted for the defendants that inasmuch as the checks were paid by the New York bank out of funds in part contributed by Warner himself, the Albion bank was not a loser of the face amount of the checks, and the plaintiff ought not to recover beyond the extent that the checks were paid out of the moneys of the Albion bank. The evidence did not indicate that the New York bank had any notice that the checks were not put out by Warner in the course of the ordinary business of the bank, consequently when they were presented to and collected of the New York bank the latter became a *bona fide* holder for value, and the Albion bank became liable to it for the face amount of the checks.

Several of the adjudications which decide that the maker of commercial paper can maintain an action for conversion against the person who, with notice that it has been put fraudulently into circulation, negotiates it to a *bona fide*

holder for value, also decide that he can recover the amount of the paper without averring or proving that he has paid it to the holder, and that it is enough *prima facie* that he has become liable to pay it to entitle him to recover the face amount (Decker *vs.* Mathews, 12 N. Y., 318; Evans *vs.* Kymer, 1 Barn. & Adol., 528; Payne *vs.* Pritchard, 2 C. & P., 558). It has been held that the defendant may prove the insolvency of the maker, and thereby lessen the damages; but in the absence of evidence of any want of ability of the maker to pay, the presumption is that he is able to pay the paper, and will be obliged to do so (Potter *vs.* Merchants' Bank, 23 N. Y., 641). It is enough for him to show that he has incurred a liability to pay the amount by the wrongful act of the defendant; but if the facts are such that this liability will not result in actual loss, he will only be entitled to recover nominal damages. The law presumes that loss will follow liability, consequently it is for the defendant to overcome the presumption by evidence which will take the case out of the ordinary category.

A check is not only a bill of exchange upon which an action can be maintained against the drawer by the drawee who has paid it, but is a bill which is presumed to be drawn on actual funds and appropriates the funds to the drawee upon payment. Undoubtedly in an action for the wrongful conversion of such paper if the defendant proves that payment of the check was refused by the drawee, that it has never reached the hands of a *bona fide* holder, and that he is ready to surrender it to the maker upon the trial, these facts would go in mitigation of damages and the recovery of the plaintiff would be limited to his actual loss. If, in the present case, the action was merely for the conversion of the checks, the plaintiff would be entitled to recover their face upon proof that they were paid by the New York bank, without more; but the action is for the money of the Albion bank obtained upon its checks "paid by the New York bank out of and from the moneys and accounts of the Albion bank." If the evidence established that the checks were not paid by the New York bank out of the moneys or funds of the Albion bank, but were paid out of moneys provided for that purpose by Warner, the jury should have been instructed that their verdict could be only for nominal damages. But the payment of the checks by the New York bank was none the less a payment out of its funds because the latter was put in funds without the knowledge of its officers, and its correspondent paid the checks without their knowledge. If Warner had made deposits in his own name with the New York bank, and that bank pursuant to his instructions had charged the checks when it paid them against his account, the defendants might well insist that the checks were not paid by the Albion bank, or out of its funds. Under such circumstances the plaintiff would certainly be required to prove that the deposits made by Warner were funds of the Albion bank. But when Warner caused deposits to be made with the New York bank in the name of the Albion bank the title to the fund created by the deposits vested in the latter as against Warner. When the New York bank credited the Albion bank with these deposits it assumed the relation of a debtor, not to Warner but to the Albion bank, for the amount; and when it paid checks drawn against the fund and charged them to the Albion Bank, it paid them out of the funds of the Albion bank as between itself and the Albion bank, and as between the latter and Warner. It may be that third persons whose moneys were misappropriated by Warner, and deposited with the New York bank to the credit of the Albion bank, can reclaim the amount of the Albion bank; but Warner himself could not because he relinquished his title by his own act. Whether the deposits made by him are to be regarded as the property of the Albion bank because made by a fiduciary who has willfully commingled his own funds with the trust funds in such a manner that the line of distinction between them cannot be traced, or as voluntary payments which he cannot reclaim because they were voluntary, need not be considered. He doubtless made them to conceal his use of the funds of the bank knowing that he could not overdraw the account of his bank with the New York bank without risk of detection.

The defendants have no interest in the question whether the Albion bank

paid the checks out of the moneys for which it is accountable to third persons, or even out of the money for which it may be accountable to Warner. It suffices that the checks were paid out of funds to which it had the legal title. Nor is it material that the defendants paid to Warner various sums of money which were ultimately received by the bank of Albion. It was open to the defendants to show upon the trial that the Albion bank did not eventually sustain any loss by Warner's misappropriation of its checks or moneys, and thus reduce the plaintiff's recovery to nominal damages. This they did not attempt otherwise than by showing that Warner deposited various sums of money to the credit of the Albion bank which were not charged by that bank to the New York bank. The presumption is as cogent that these deposits, secretly made by Warner, represented the money which he knew belonged to the Albion bank as that they were his own money. The case for the plaintiff was complete when it appeared that the checks which were wrongfully received and collected by the defendants had been paid by the New York bank out of funds standing to the credit of the Albion bank. He was then entitled to recover the full amount. It was unnecessary for him to assume the affirmative and show that the deposits made by Warner in the New York bank were not the funds of Warner, but consisted of misapplied funds of the bank, or the proceeds of securities belonging to it or for which it was responsible to others; but it was for the defendants to prove that, notwithstanding their wrongful participation with Warner in misappropriating the funds of the bank, the bank did not suffer loss. If they had shown that all his misappropriations had been made good by the return of what he has misapplied, it is not entirely clear that they would have been liable only for nominal damages (*Helmer vs. Wilsey*, 17 Wend., 91; *Otis vs. Jones*, 21 Wend., 394; *The People vs. Bank of North America*, 75 N. Y., 547.) These cases held that the defendant in an action for conversion of property can only claim a mitigation of damages because of a return of the property, where the owner has accepted its return or has resumed dominion over it as owner; and that it is not enough that the property, without his consent, has been applied to the satisfaction of his debts.

It is not necessary to consider whether this doctrine should be applied to a case for the conversion of money which has been returned to the owner and used by him without knowledge of the conversion or restitution. Here all the money returned by Warner was insufficient to replace his defalcations by an amount much larger than the sum sought to be recovered of the defendants, and the bank had no knowledge that he had returned anything to replace what he had misapplied until he had again misappropriated it. It is not unjust or unreasonable to compel the defendants to restore such of the funds of the bank as they received when they are unable to prove that the bank was not directly or ultimately a loser in consequence of their acts. It may be that Warner would have misappropriated the money of the bank in other ways if they had refused to receive the checks, but certainly one temptation would not have been in his path if he had found that he could not use the paper of the bank for his speculations with the same facility as though it were his own money.

Several points discussed upon the motion for a new trial, among them the point that the jury should have been instructed not to include interest in their verdict accruing before the commencement of the suit, do not seem to merit consideration. The views expressed cover all the controlling questions in the case, and lead to a denial of the motion.

George W. Wingate for plaintiff; Elihu Root and John E. Burrill for defendants.

Anderson, Receiver vs. Kissam et al, United States Circuit Court, Southern District of New York, August 13, 1888.

ABSTRACT OF CASES.

DRAFT ON BANK—WHEN NOT ASSIGNMENT OF FUND—SUBSEQUENT GENERAL ASSIGNMENT.

Where a draft is drawn upon a bank, and subsequently and before presentment the drawer makes a general assignment of all his property for the benefit

of his creditors, the giving of the draft does not operate as an assignment of the amount therein before presentation thereof, and the assignee under the general assignment has a right to the deposit as against the draft-holder.

Ray vs. Hiller, Supreme Court of Colorado, June 15, 1888.

PROMISSORY NOTE—COLLATERAL SECURITY FOR ADVANCES—RIGHT TO ENFORCE.

A note secured by mortgage, issued by a planter to the order of his merchant, to make good all advances for the working of a plantation, although received as "collateral security," may be sued on directly by the latter for the exact amount of the advances, as a pledgee could do.

In the absence of proof of want of consideration, and in the presence of evidence showing that the advances have been made, payment of the note may be enforced by the seizure and sale of the mortgaged property.

Chaffe vs. Whitfield, Supreme Court of Louisiana, June 30, 1888.

CITY WARRANT OF MUNICIPAL CORPORATION—NEGOTIABILITY.

The instrument sued on was as follows :

"\$1,306.21.

CITY CLERK'S OFFICE. No. 102.
DENVER, COLO., 7-3, 1882.

Treasurer of the City of Denver. Pay to the order of Joseph Williams the sum of thirteen hundred eight and 21-100 dollars out of the 20th St. sewer fund, on account of the 20th St. sewer cont.

By order of the city council made 7-1, 1882.

Attest: Jas. T. Smith, City Clerk: Robert Morris, Mayor."

In a suit thereon by the Travellers' Insurance Company to whom the payee had indorsed the warrant, one of the contentions of the defendant was that the warrant was not a negotiable instrument, and as the complaint contained no allegation showing any consideration for the instrument sued on, no recovery could be had. On this point

Held: We think the warrant is made negotiable by the provisions of sections 3-5, C. 9, General Statutes of Colorado. It is provided by section 3 that instruments of writing whereby one person acknowledges any sum to be due to any other person shall be taken to be due and payable to whom the said instrument in writing is made; by section 4 such instrument in writing is made assignable by indorsement of the payee thereon in the same manner as bills of exchange; and by section 5 the assignee of such instrument in writing may maintain an action thereon in his own name, which he could also do under the provisions of the Code. These provisions of our statute were adopted in this State from the statutes of Illinois, in which State they have been construed to make a county order a negotiable instrument, in *Garvin vs. Wiswell*, 83 Ill., 215; and county warrants have been held to be negotiable in this State, in *People vs. Hall*, 8 Colo., 485. For instances in which instruments in writing have, under these provisions, been held to be negotiable instruments, see *Lee vs. Balcom*, 9 Colo., 216; *Stewart vs. Smith*, 28 Ill., 397; *Archer vs. Clafin*, 81 Ill., 306-315; *Petillon vs. Lorden*, 86 Ill., 361.

Travellers' Insurance Company vs. City of Denver, Supreme Court of Colorado, June 15, 1888.

SALE OF PROMISSORY NOTE WITHOUT RECOURSE—INSOLVENCY OF MAKERS TWO HOURS BEFORE SALE—WHERE TRANSFER IN GOOD FAITH AND WITHOUT KNOWLEDGE OF INSOLVENCY, PURCHASER HAS NO RECOURSE AGAINST SELLER.

Defendants, being the owners of a promissory note which they had taken in the ordinary course of business, sold it through a broker to the plaintiffs without indorsing it or making any representation in respect to it. It was afterwards ascertained that two hours before this sale the makers of the note had made a voluntary assignment of all their assets for the benefit of their creditors. Neither plaintiffs, defendants, nor the broker knew of the assign-

ment at the time of the sale, but they all supposed that the makers were doing business as theretofore. Plaintiffs contended that they were entitled to recover upon either of two grounds:

1st. That there was a mutual mistake of the parties as to the thing sold, and therefore no contract was completed between them; and

2d. That there was a warranty, express or implied, by the defendants, that the makers of the note were then carrying on business, and had not failed or made an assignment.

Held, 1. That the sale was valid and that plaintiffs cannot recover the amount they paid as upon a failure of consideration.

2. Defendants did not expressly warrant the value of the note, and no warranty could fairly be inferred, from the circumstances, of the solvency of the makers, or that they continued in business. The loss, therefore, falls on plaintiffs.

Hecht, et al., vs. Batcheller, et al., Supreme Judicial Court of Massachusetts, Suffolk, June 23, 1886.

PROMISSORY NOTE—NOTICE OF DISHONOR—TIME ALLOWED IN WHICH TO GIVE—PROOF OF NOTICE—INSTRUCTIONS TO JURY.

1. Where the holder of a promissory note and an indorser entitled to notice of its dishonor by the maker reside in the same place, the holder has until the expiration of the day following that of its dishonor to give the notice.

2. The rule laid down in *Sanderson's Adm'r's vs. Sanderson, 20 Fla., 292*, as to notice when the parties reside in different places, and there is a mail on the day following the day of dishonor by the maker, approved. That rule is that where the indorser of a promissory note resides in a different place from the point at which it is payable, notice of the default of the maker must be deposited in the Post-office in time to be sent by the mail of the day succeeding the day of the dishonor of the note, provided the mail of that day be not closed at an unusually early hour, or before early and convenient business hours, in which case it must be sent by the next mail thereafter; and where the notice is not mailed until the second day after the dishonor of the note, and no circumstance which would extend the time is shown, it is not sufficient to bind the indorser.

3. The burden of proving that the notice was duly given is on the plaintiff, and he must show distinctly that it was given in the time required by law. Proof of the habitual promptness of the holder and his attorney in giving notice in such cases, and of the fact that the former put the note in the latter's hands for collection "in two or three days, or less time" after its dishonor, is not sufficient to fix the time at which notice was given in a particular case, and the liability of the indorser.

4. The charge of a judge as to the time within which notice of dishonor should be given to an indorser of a promissory note should state definitely the time allowed by the law, and should not leave it to the jury to determine what is prompt notice or reasonable diligence in giving notice, under the circumstances of the case.

Marks vs. Boone, Supreme Court of Florida, May 23, 1886.

PROMISSORY NOTE—CONSTRUCTION—PAROL EVIDENCE—PERSONAL LIABILITY.

Action on the following instrument:

\$1,061.24.

DETROIT, Mich., August 4, 1880.

Four months after date we promise to pay to the order of George Moebs, Sec. and Treas., ten hundred sixty-one and 24-100 dollars, at Merchants & Manufacturers' National Bank. Value received.

PENINSULAR CIGAR CO..

GEO. MOEBS, Sec. and Treas.

(Indorsed:) "Geo. Moebs, Sec. and Treas."

The action was against George Moebs personally, to charge him as indorser, the contention being that the indorsement in terms was that of Moebs person-

ally; or, at most, that it was ambiguous, and could be construed to be either that of the Peninsular Cigar Company, or the personal indorsement of Moebis, and consequently parol evidence was admissible to show who was in fact the indorser. On the other hand it was claimed that the indorsement was unambiguous, but was in plain terms the indorsement of the company, and not of Moebis individually. Consequently parol evidence would not be admissible to change the contract.

Lamar, *J.* (after discussing the conflicting authorities), delivered the opinion of the Court that there was no ambiguity in the indorsement, but on the contrary, such indorsement was, in terms, that of the Peninsular Cigar Company, and that evidence offered to explain away and modify the terms of such indorsement was rightly excluded.

Judgment for defendant affirmed.

Falk vs. Moebis, Supreme Court of the United States, May 14, 1888.

PROMISSORY NOTE—PAYMENT BY INDORSER—SUBROGATION—BY WHOM PAYMENT MADE—EVIDENCE.

Payment of a note by an indorser actually bound, produces the legal effect of subrogating him to the rights of the last holder.

Money borrowed for account of the borrower, and applied to the payment of a note, at the request of the drawer, cannot be claimed by the indorser as being his money, though he subsequently issued his check to the original lender, in the absence of proof that the money was lent to him, the indorser.

The unimpeached and positive testimony of the lender that he lent to the borrower, and that he had no previous communication with any one else on the subject, outbalances altogether that of another witness, however respectable, who practically testifies from hearsay.

Seixas vs. Gonsoulin, Supreme Court of Louisiana, March 26, 1888.

LAW NOTES AND COMMENTS.

LIABILITY OF STOCK BROKER FOR TAKING OFFICIAL CHECK OF CASHIER IN PAYMENT OF MARGINS DUE BY HIM PERSONALLY.—The decision of Judge Wallace of the United States Circuit Court for the Southern District of New York, published in the present number of the JOURNAL, is one of unusual interest to bankers and brokers, and if sustained by the Supreme Court of the United States will have a beneficial effect in inducing caution and investigation on the part of brokers before taking official checks in payment of private debts. The Cashier of the First National Bank of Albion had been for a number of years speculating in Wall street through a firm of brokers, and the margins which he put up from time to time were paid by checks of the bank on a New York bank, signed by the defaulter as Cashier. The Court, while it finds no fraud or complicity on the part of the stock brokers, holds that they had notice, by the forms of the checks, that they were receiving the funds of the bank, and the brokers are mulcted in some \$147,000 damages in favor of the Receiver of the bank which had failed. One of the features of the decision is the exclusion by the Court of testimony to show the custom on the part of bankers and brokers in New York city to receive Cashier's checks and drafts, as cash, upon transactions with the Cashier individually. The opinion of Judge Wallace, though lengthy, will re-pay a careful perusal.

PENALTY FOR TAKING USURY BY NATIONAL BANKS.—The act of Congress prescribing the rate of interest that National banks may charge provides a penalty as follows: "The taking, receiving or charging a rate of interest greater than is allowed by the preceding section, when knowingly done, shall be deemed a forfeiture of the entire interest which the note, bill or other evidence of debt carries with it, or which has been agreed to be paid thereon. In case the greater rate of interest has been paid, the person by whom it has been paid or his legal representatives, may recover back, in an action in the

nature of an action of debt, twice the amount of the interest thus paid, from the association taking or receiving the same, provided such action is commenced within two years from the time the usurious transaction occurred."

The question has recently been considered by the Supreme Court of Texas in a case involving the payment of usurious interest (Stout *vs.* Ennis National Bank) whether the penalty was recoverable before the entire debt was paid. It was insisted on behalf of the bank that the right to the penalty could not attach until the entire debt was paid, and until this occurred the bank had the power and right to abandon its claim for the usurious interest and defeat the claim to the penalty. The court said that in cases where the money was paid without any appropriation by the parties of the payment to the usurious interest, the law would appropriate the payment to that part of the demand which was legal, for neither the party making or receiving the payment would be presumed to have intended that it should be appropriated to the payment of usurious interest. In cases of this character, therefore, the right to the penalty would not attach until the entire debt was paid. Where, however, as in the case under consideration, the parties appropriated and intended to appropriate the payments to usurious interest, the court holds that the offense has been consummated, "the greater rate of interest has been paid," and the right to the penalty is then fixed and recoverable by the party paying the usurious interest though the entire debt has not been paid.

REPLIES TO LAW AND BANKING QUESTIONS.

A reasonable charge is made for Special Replies asked for by correspondents—to be sent promptly by mail. See advertisement on another page.

Editor Rhodes' Journal of Banking:

MONTGOMERY, Ala., August 5, 1888.

SIR:—A note is made payable "on call." Is this the same as making it payable "on demand?"

D.

Answer.—Y s. A note payable "on call" is the same as payable "on demand."

2 Daniel Neg. Instr., § 599; Mobile Savings Bank *vs.* McDonnell, Supreme Court of Alabama, December 7, 1887.

Editor Rhodes' Journal of Banking:

DOWNES, Kans., Aug. 15, 1888.

SIR:—Will you kindly give an answer in the JOURNAL to the following:

Is a sight draft, drawn for car load of grain, and accompanied by bill of lading, protestable until the grain arrives?

O. J. SARGENT, *Assistant Cashier.*

Answer.—We think the draft should be protested although the goods themselves have not arrived, as the delivery of a bill of lading is a symbolic and constructive delivery of the goods. This, of course, on the assumption that there is somebody to be held by the protest. Thus, should the draft be discounted by a bank on the faith of the bill of lading and sent for collection by it, protest and notice would probably be necessary to hold the drawer and any prior parties liable to the bank.

Editor Rhodes' Journal of Banking

COORSICANA, Texas, Aug. 24, 1888.

SIR:—A sight draft, with bill of lading attached, is sent us for collection. Party refuses to accept or make payment until arrival of goods. Bill of lading is not drawn to order of shipper, but is a straight bill of lading to the consignee. Unless shipped to order, the railroad agents frequently deliver goods without requiring bill of lading.

Should draft be protested for non-acceptance or payment, or should it be held for arrival of goods?

BOOKKEEPER.

Answer.—In the preceding answer we stated that generally, in our opinion, a protest should be made on the dishonor of a draft with bill of lading attached, although the goods had not arrived, where there were any parties to be held by protest and notice. In this instance, however, if the draft was

drawn by the shipper directly on the consignee and sent direct to correspondent for collection, there would be nobody to hold by a protest on refusal of consignee to honor until arrival of goods, and the matter of retaining draft to await their arrival would lie in the discretion of collecting agent.

Editor Rhodes' Journal of Banking:

OMAHA, Neb., August 20, 1888.

SIR:—In protesting a note or sight draft is it necessary to serve notice on the bank to whom the note or sight draft is sent for collection? If not necessary, is it admissible? A reply through the columns of the JOURNAL will oblige, SUBSCRIBER.

Answer.—An indorser for collection is entitled to notice as well as an indorser for value.

Editor Rhodes' Journal of Banking:

WILKESBARRE, Pa., July 27, 1888.

SIR:—Will you state through the JOURNAL the legal status of a check drawn on a form which reads "Pay to order of" and in which the words "the order of" have been crossed out?

I, in common with our general ledger clerk, claim that by crossing out those words the negotiability of the check is destroyed and payment can be made legally to the person named in the check only. But another of our fellow-clerks claims that the said alteration makes the check negotiable by delivery and is practically the same as if drawn payable to John Jones or bearer. CLERK.

Answer.—By striking out the words "the order of" the check is made to read simply "Pay to John Jones," the sum stated. Such a check is not negotiable.

Editor Rhodes' Journal of Banking:

CHATTANOOGA, Tenn., August 15, 1888.

SIR:—A. gave his note to B. payable thirty days after date with interest. On the thirtieth day B. offered to pay the note with interest to that day which A. refused to accept claiming interest for three days of grace. Who was right, and please give me decisions bearing on this case? J. A. H.

Answer.—A. was right if the instrument was a negotiable note entitled to grace. Such a note is not due, and payment need not be accepted by the holder until the last day of grace; and interest is chargeable on the three added days.

Bank of Utica vs. Wager, 2 Cow., 712; Ogden vs. Saunders, 12 Wheat., 213.

Editor Rhodes' Journal of Banking:

WHITE PLAINS, N. Y., August 16, 1888.

SIR:—Will you kindly give your opinion of the following question? Has an officer of a bank the right to certify his individual check or does the law forbid it?

H. E. FOSTER, Cashier.

Answer.—A bank officer, authorized to certify checks, has no right or authority to certify his own check and cannot bind the bank thereby. The bank cannot be made liable on such a certification because every party taking it has notice by the instrument itself, that such a certification is improper.

Claflin vs. Farmers & Citizens' Bank, 26 N. Y., 293.

Editor Rhodes' Journal of Banking:

LEICESTER, Mass., Aug. 10, 1888.

SIR:—A note is presented to a bank for discount written as follows:

\$1,338.94.	KNOXVILLE, Pa., June 26, 1888.
Six months after date I promise to pay to the order of James Peters & Co. thirteen hundred thirty-eight 94-100 dollars, payable at 320 Continental St., Boston, Mass. Value received. Collateral to tanning contract of June 11, 1888, between said James Peters & Co. and William James.	
	WILLIAM JAMES.

Is it a negotiable note?

SUBSCRIBER.

Answer.—While in some jurisdictions the words "collateral to tanning contract of June 11, 1888, between said James Peters & Co. and William James" might be held not to affect the negotiability of the note, we think, under the decision of the Supreme Judicial Court of Massachusetts in

Costello vs. Crowell, 127 Mass., 293, the note would be declared non-negotiable in that State. In that case the note contained these words, written on the margin: "*Given as collateral security with agreement.*" The action was by an indorsee against the administrator of the maker, and the Court held the note non-negotiable, and an action by the indorsee not maintainable. In its opinion the Court stated that whether, by the general law merchant, the note in suit would be deemed a negotiable note was a question upon which the authorities were by no means uniform, but that in Massachusetts it was settled by an uninterrupted series of decisions that any language, put upon any portion of the face or back of a promissory note, which had relation to the subject matter of the note, by the maker of it before delivery, was a part of the contract; and that if by such language payment of the amount was not necessarily to be made at all events, and of the full sum in lawful money, and at a time certain to arrive, and subject to no contingency, the note was not negotiable.

Referring, then, to the clause in question, the Court said: "The words written upon the face of the note '*given as collateral security with agreement,*' being incorporated in and made part of the contract, indicate with clearness that there may be a contingency, to wit, the performance of the undertaking to which this is collateral, in which it would not be payable; and so it lacks that element of negotiability which requires that at all events a sum certain shall be payable at a time certain."

The words of the present note that it is given as "collateral to a tanning contract" are sufficiently similar in import to the words "given as collateral security with agreement" to make the decision above cited applicable, and the note not negotiable.

The Bankers' Directory.—A subscriber recently asked regarding the rule observed in compiling our "Bankers' Directory and Collection Guide." The following reply will interest bankers generally:

Referring to your inquiry regarding capital and surplus of banks and bankers in the "Bankers' Directory and Collection Guide," the rule has been—

1.—Give paid-in capital and net surplus of National and State banks as last officially reported to the Comptroller of the Currency for the National banks, and to any State officer or department for State banks.

2.—For private stock banks (*i. e.*, those not making reports to any State officer) and firms, the former rule was to print, in italic type, in capital and surplus columns such figures as were sent in for publication.

The observance of the latter brought numerous errors into the book, as private bankers in many cases would send in their total worth and call it "Paid-in Capital." In the July book we omitted the capital and surplus of private banks in some cases, mainly in order to have clear sailing for the January, 1889, issue, in which we intend to follow the rule of giving the capital and surplus of Private banks just the same as National and State banks, the only condition being that a balanced statement giving assets and liabilities—same as usual bank statement, condensed—shall be sent in when corrections are requested for the new book. Such a statement would, of course, show the capital paid-in in cash, and the surplus, the same as incorporated banks. Many private banks print such statements of condition in their local newspapers or on the back of their business cards, therefore it will be but little trouble to furnish same for our use in correcting the book.

You can readily see that the plan here outlined is entirely fair to all classes of banks and will ensure correctness.

Of course the above refers to the usual arrangement of the book. Where private banks or firms order their title in prominent type and send in matter for extra lines we will publish whatever is furnished, thus enabling banks of this class to present their *total worth* in addition to paid-in capital in the business, or to omit the latter if they prefer. National and State banks may also, under this rule, furnish additional figures, if wanted, in addition to the usual extra lines referring to collections or other special features of their business.

WHAT SHALL BE DONE WITH IT?

A "SURPLUS" OF \$132,000,000 IN THE TREASURY OF THE UNITED STATES.

The following circular, issued August 23d, by Messrs. Harvey Fisk & Sons, bankers in New York city, will be read with interest by the banking community generally. The "Sinking Fund Act" and the "Act authorizing purchases of Bonds with the Surplus" are also appended:

The last statement issued by James W. Hyatt, Treasurer of the United States, under date of July 31, 1888, gives the "Surplus" then in his hands as Treasurer, including the fractional silver coin as \$132,517,751.55. In addition to this amount, by the same statement, he held: \$9,064,850.53 to cover accrued interest on bonds; \$43,607,795.30 "to meet Disbursing Officer's balances," etc., etc.; \$96,740,339.38 "for redemption of notes of National banks failed," etc.; \$100,000,000.00 "reserve for redemption of United States Notes."

In short, the Treasurer of the United States had in his custody on that date, in money, \$732,775,527.76, against which had been issued gold, silver and legal-tender certificates to the amount of \$350,844,791.00, leaving \$381,930,736.76 in his hands, of which \$132,500,000 is clear "Surplus." This does not seem right, especially as the United States Government had outstanding on that date \$1,014,138,142.00 interest-bearing debt on over a thousand millions of which it is paying interest at 4 to 6% per annum.

The Secretary of the Treasury has full authority in his hands, under Acts of Congress, to purchase of these interest-bearing bonds—and stop the interest running longer on all so purchased—up to the extent of the "Surplus." Plenty of bonds can be had to save the Government 2 per cent. per annum for the years they may have run.

Since the Secretary of the Treasury commenced to purchase with the surplus money in April last, he has, by official statements from the Department at Washington, purchased, up to August 21st, \$33,601,150 Fours and Four-and-a-halves, on which he has made a saving to the people in future interest payments upwards of \$12,000,000, and this after allowing for all premiums paid; and with the surplus money now in the Treasury, he could save the people, in addition, forty millions more of future interest payments and take this "Great Peril" and menace to every interest in the country out of the calculation of business.

The enormous crops of the land now just beginning to move, the cotton crop of the South on which we depend so much to pay the balance of foreign trade—all these demand that they shall not be imperilled by lack of action on the Administration's part.

The spirit of the law authorizing the Secretary to purchase bonds, is clear and unmistakable, that, whenever a "Surplus" accumulates over the \$100,000,000 reserve to be held against the greenbacks, it shall be used, above a fair working balance, to decrease the debt by purchasing bonds at the market price; that "Surplus," now, is \$132,500,000 over the greenback reserve. The Secretary has saved the people, as stated above, about \$12,000,000 on his purchases so far; therefore there is every good reason why, as long as he can get bonds, he should increase this saving, decrease the interest bearing debt, comply with the spirit of the law and take this "Great Peril" of a large "Surplus" from the business of the country.

The Four per cent. bonds now have nineteen years to run; two per cent. per annum for each year they have to run would be 38 per cent. If the bonds should run to maturity each bond of \$1,000 would cost the Government 176 per cent. or \$1,760. To save two per cent. per annum the Government could pay up to 138 per cent. or \$1,380 for each bond: but millions could be purchased at and under 130 per cent. or \$1,300 for each bond. The "Four-and-a-halves," to save two per cent. per annum, would have to be bought at not over 106% per cent.; it might be very difficult to secure many millions at a better price than to save the Government five per cent. gross for the short time they have to run. The "Currency Sixes," not yet included in Government purchases, could be had in fair quantities to nett the Government over 2¼ per cent. saving for each year they have to run.

Therefore, as large dealers in Government bonds, we do not hesitate to give our

opinion that the Government could invest the whole surplus of \$132,500,000 to save on the average two per cent. for each year the bonds have to run, and this is exactly two per cent. per annum better than the Government is getting on its large balances lying in the Treasury and National banks drawing no interest.

The evils of a "Surplus" are best corrected by not having any. The present "Surplus" and its evils can, in a very few months, be all done away with by using it to reduce—at the best price the bonds can be purchased—the interest bearing debt: much to the saving and comfort of the people. After this fiscal year, judging from the temper of both political parties, there will not be much "Surplus," after providing for the Sinking Fund, to trouble the business of the country.

SINKING FUND ACT.

The law in regard to the Sinking Fund is to be found in the following provisions of the Revised Statutes of the United States:

SEC. 3,689.—There are appropriated, out of any moneys in the Treasury not otherwise appropriated, for the purposes hereinafter specified, such sums as may be necessary for the same respectively; and such appropriations shall be deemed permanent annual appropriations.

Sinking Fund of one per centum of the entire debt of the United States, to be set apart as a sinking fund for the purchase or payment of the public debt, in such manner as the Secretary of the Treasury shall from time to time direct.

SEC. 3,694.—The coin paid for duties on imported goods shall be set apart as a special fund, and shall be applied as follows:

First. To payment in coin of the interest on the bonds and notes of the United States.
Second. To the purchase or payment of one per centum of the entire debt of the United States, to be made within each fiscal year, which is to be set apart as a sinking fund, and the interest of which shall in like manner be applied to the purchase or payment of the public debt, as the Secretary of the Treasury shall from time to time direct. (*Act of Feb'y 25, 1862.*)

The requirements of the Sinking Fund for the current fiscal year are estimated by the Secretary of the Treasury in his annual report at \$47,844,158.90.

The following is the

ACT OF CONGRESS AUTHORIZING PURCHASES OF BONDS WITH THE SURPLUS moneys, under which the Secretary is now acting.

ACT OF MARCH 3, 1881.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled.

SEC. 2.—That the Secretary of the Treasury may at any time apply the surplus money in the Treasury not otherwise appropriated, or so much thereof as he may consider proper, to the purchase or redemption of United States bonds; provided: That the bonds so purchased or redeemed shall constitute no part of the Sinking-fund, but shall be cancelled.

Approved, March 3, 1881.

Where Banks are Wanted.

ALABAMA.—Anniston is said to offer unusual inducements for more banking capital. At present there are only three banks in the place—one National, one State, and a Savings bank. The Vice-President of the National bank writes that they have, "in the last two years, paid full dividends and accumulated surplus of nearly twice as much as their capital. In fact, the business of the town has entirely outgrown its banking facilities, and if anybody wants to make money in banking, Anniston offers a chance rarely equalled. Heavy profits await those who engage in banking there."

ARKANSAS.—Little Rock needs more banking capital. The question of starting a bank, with a large capital, has already been discussed by several of the leading business men, but nothing definite, as yet, decided upon. Capitalists desiring to make a safe and remunerative investment would do well to correspond with us on the subject.

A CORRESPONDENT writes that Milwaukee, Wis., needs more banking capital. Its manufacturing and commercial interests have grown much in the past fifteen years, but the banking capital has not grown in any proportion to the business of the city.

NOTICE.—Readers of the JOURNAL are requested to send in particulars, for publication, regarding points where more banking capital is wanted. In doing so give the facts concisely, stating the prospects of success, probable deposits within first year, kind of bank wanted, estimated interest on capital invested, etc. Address: BRADFORD RHODES & CO., 78 William Street, New York.

REPORTS OF NEW YORK CITY SAVINGS BANKS.—Following are abstracts from the official semi-annual reports of the New York city Savings banks, showing their condition on July 1st, reported to Bank Superintendent Willis S. Paine as required by law. The increase in deposits in New York city during the year has been a little over \$10,000,000. To exhibit the increase or decrease in the several items, the amounts reported by the same banks July 1, 1887, are also given :

Bank.	Date.	Total Resources.	Due Depositors.	Surplus.	No. of Depositors.

Nebraska—Merchants' National Bank, Omaha.—In another part of this number of the JOURNAL will be found an attractive advertisement of the Merchants' National Bank of Omaha—one of the many enterprising institutions with which the Northwest abounds. It has recently introduced a new improvement styled a book vault which not only provides for the safe keeping of all the books and papers of the bank but renders them always accessible *without loss of time* as may be seen by reference to the cut shown in the advertisement. The whole arrangement is furnished by the American Shelf & Drawer Co., Chicago, Ill., who make a specialty of metallic furniture of every description for bank and book vaults.

How Bankers Push Business.

A new feature for the benefit of the JOURNAL's advertising patrons styled the "Special List of Banks and Bankers" appears in this issue, showing the title, location, names of officers, capital, surplus, correspondents, etc., of leading banks and bankers throughout the country in a convenient form for prompt reference. The fact is that a great many banks which never before advertised in any financial publication are now represented in the JOURNAL. The reason is: IT PAYS. Here is a letter from a well-known Arkansas banker which tells its own story:

July 12th 1888

Rhodes Journal of Banking,

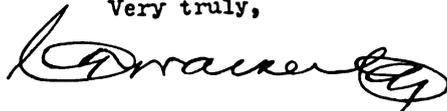

78, William St New York. N.Y.

Gentlemen:-

Your favor of the 10th is received. WE take your "Journal" and read it with pleasure and have the greatest measure of appreciation of its merits.

We seldom advertise through any medium, but believing it will be for our good to have the name of this Bank in your "Special List" I therefore ask you to insert our name with lines given on the opposite page thereto.

Very truly,

FINANCIAL MATTERS IN CHICAGO.

[From the JOURNAL'S Chicago Correspondent.]

The August financial situation in Chicago has not been characterized by much activity; in fact it has been very quiet—a sort of calm before the storm, for we anticipate a heavy business this Fall. Crops are reported good throughout the West, and prices are high, all of which contribute to the prosperity of the farmers, for when the farmers are prosperous everybody else is. Money at the local banks is still plentiful on call at 5 and 6 per cent., and 6 and 7 per cent. on time loans, with a little at 8 per cent. This shows quite a perceptible hardening of rates over last month, but is the natural result of the conservative feeling among lenders. It will be but two or three weeks before the demand will begin in earnest, when all the available funds will probably be absorbed. New York Exchange closed the month at 70 cents per \$1,000 discount.

The past month has been one of unusual activity upon the Board of Trade, the wheat pit as usual receiving the most attention. The reports of extensive frosts in the Northwest, and of a general shortage in the wheat producing countries of Europe have sent prices booming, ranging from 81 and 82 the first of the month to 94 and 95 toward the close for September, in which the chief interest has centered. Provisions and other cereals have been in a slight degree sympathetic, but in nothing like the same degree. Corn reports are very bearish. The increased activity in speculative trading has brought up the price of membership tickets from \$1,500 which was the quotation a month ago, to \$1,700 and \$1,750.

It is said that the quotation service of the Board of Trade Stock Exchange will be discontinued September 1. This is a wise move, for the two varieties of speculation are incompatible, and it is impossible to make them successful under the same management.

There is talk of a new National bank in Chicago, having a capital stock of five millions and presided over by John Sherman or some other ex-Government officer. While a new National bank in Chicago would undoubtedly be successful under proper management, it is a question whether it would be wise to commence with so large a capital stock. Chicago capitalists are not content with low rates of income from investments, and without a doubt a bank with that amount of capital would be obliged to pay very small dividends during the first years of its existence, and to do even that it would in all probability have to slight its surplus account, which, as every banker knows, is a very unwise expedient. It would be far better to commence with a capital of one or two millions and increase as occasion required.

No less than nine building and loan associations have been chartered in Chicago during August, with registered capital stocks ranging from half a million to ten millions of dollars, while one or two of those already in existence have increased their capital. These associations have taken the place of savings banks in Chicago, and their prosperity indicates a laudable disposition to save by the great mass of wage earners. So long as these institutions are properly managed they yield greater returns than savings banks, and distribute their funds among a class of borrowers who make the very best use of it in building homes for themselves. They are therefore more peculiarly institutions for the benefit of the people of small means than savings banks, for while the latter only gather from that class, building associations both gather and distribute among the same class.

In the matter of elevated railroads we seem likely to be very well supplied in the near future. In addition to the South Side road, which is now endeavoring to place its bonds in New York, there has just been incorporated the Chicago West Division Railroad with a registered capital stock of ten millions. This company, like the first mentioned, has among its projectors several of our prominent financial men, among them Mr. Odell, of the Union National Bank and Mr. McCormick, of W. G. McCormick & Co. This last is undoubtedly a much more promising project than the former, for the part of the city which it will intersect is by far the most densely populated as well as being much more deficient in transportation facilities than any other portion. It

is unknown yet what systems will be adopted finally, for several are in the field. A new one which, in the opinion of many, is the best brought forward, is the Ziegler system. It combines novel improvements which reduce the noise, obstruction of light and chances of accident. However, being new and untried it will probably not receive the consideration which its advantages over the systems now in use, merit.

Business on the Chicago Stock Exchange has had another dull month, although the last week has shown a decided improvement over its predecessors. The trading has been principally confined to gas company and street railway stocks and bonds, with a few bank stocks thrown in. The quotations of the principal active securities at the time of writing and of the business day following the corresponding day last month (Sunday) are as follows:

BANK STOCKS, PAR \$100.	Amount of the Capital Stock.	AUGUST 29.		JULY 30.	
		Bid.	Ask.	Bid.	Ask.

H. M. JORALMON.

A Progressive Institution.—We were recently favored with a call from Mr. John A. Richardson, Cashier of the Yale National Bank of New Haven, Conn., from whom we learned that his institution was never in a more prosperous condition, having just increased the surplus account nearly ten thousand dollars which now amounts to \$144,000. To accommodate their customers as well as the public generally this bank is putting in new safe deposit vaults which are being built in the best manner and, when completed, will be the finest and strongest in the city. It is expected the Safe Deposit Department will be ready for use about November 1.

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Gansevoort Bank, New York City.—Another State banking institution has been organized styled the Gansevoort Bank, \$300,000 capital. The officers are: Timothy C. Kimball, President; Charles E. Bigelow, Vice-President; Frederick G. Gedney, Secretary. The list of Directors and principal shareholders includes many prominent merchants on the West side of the city. The bank will be located near the new Gansevoort market and will open about November 1st.

Tennessee—Fayette County Bank, Somerville.—At the last semi-annual meeting held July 31, this bank added \$2,000 to its undivided profit account. The success of this institution indicates good management and at the same time shows the need of banking facilities in that section. During the first six months of its existence the profits amounted to over 20 per cent. of the capital, and the increase during the past six months indicates a still greater percentage in the future. This is the only bank in the county.

New Hampshire—American Trust Co., Concord.—The capital stock of this company (\$100,000) having all been taken and paid in, the stockholders met on August 15th and elected the following officers: President, Wm. Yeaton; Vice-President, Frank S. Streeter; Secretary, John M. Mitchell. The organization of this new company contains several well-known business men and financiers, among them Jas. B. Edgerly, Cashier of the Farmington National Bank, and W. N. Coler, Jr., of the firm of W. N. Coler & Co., dealers in municipal bonds in New York city. The company is authorized to "hold any real or personal estate on trusts duly created and execute such trust on such terms as may be agreed upon with reference thereto."

The American and Colonial Exchange, started in London about two months ago as the successors of Henry F. Gillig's "American Exchange in Europe, limited," in a very elaborate suite of offices and all the appointments on a grand scale, but it is now alleged to be in difficulty. The Sheriff's agent has taken charge of all the proceeds for the landlord, and the collapse of the enterprise is looked for daily. It was started by a New York gentleman named Golder, who advanced all the money for furniture, fittings, etc., expecting that all the business of the American Exchange, then defunct, would come to the new one. Very little business has been done, however, and the lucrative season is nearly over. Golder has lost a good deal of money, and either has no more funds or is disinclined to disburse any further.

New York City—Chemical National Bank.—It is well, once in a while, by way of a change from defalcations and failure, to take a glance at wonderful prosperity. This can be seen to no better advantage than in the case of the Chemical National Bank. With a capital of only \$300,000, this bank shows a surplus of five and a-half millions and a deposit line of twenty millions. Last year it paid dividends bi-monthly, amounting to one hundred per cent., and carried \$900,000 into surplus fund; this year its bi-monthly dividends are 25 per cent., or at the rate of 150 per annum. The stock is quoted at \$3,600 per share, but it is rarely sold except when a few shares appear in settlement of an estate. Away back in 1844 Jacob Wolfe bought 200 shares for \$20,000. That particular lot is still in the hands of his descendants, and is to-day worth \$720,000, besides having paid over \$1,000,000 in dividends to its holders.

Missouri—United States Bank, Kansas City.—Another bank has recently been organized and added to the already long list in this banking metropolis of the Southwest. This institution is styled the United States Bank, with a paid-up capital of \$100,000 and the following officers: A. T. Irvin, President; D. P. Doak, Cashier; T. A. Johnson, Assistant Cashier. The list of stockholders—which is composed of some

of the most successful bankers in Kansas and elsewhere—is as follows: A. H. Adkison, Cashier of Finney County Bank, Garden City, Kansas; A. T. Irvin, President Kendall Exchange Bank, Kendall, Kansas; W. J. Anderson, Cashier National Bank of Kansas City, Kansas City, Mo.; A. J. Hoisington, President Finney County Bank, Garden City, Kansas; Thomas Doak, President Exchange Bank, Granada, Colorado; F. N. Chiock, Assistant Cashier National Bank of Kansas City, Kansas City, Mo.; T. A. Johnson, late Cashier Johnson City State Bank, Johnson City, Kansas; Joe H. Borders, Cashier Coolidge State Bank, Coolidge, Kansas. The object of the bank is, primarily, to do a general banking business, and in connection with that, will make a specialty of buying and selling high grade investment securities. There is no doubt ample room for more banks of that kind, and when engineered by men like those above-named—practical and experienced in the business—they cannot fail to meet with substantial success.

New York—Middletown National Bank.—The failure, in 1884, of the Middletown National Bank, was one of the most disastrous that has occurred in many years in New York. The revelations now made in connection with the recent order of the Comptroller of the Currency, levying an assessment of \$100 per share, equivalent to 100 per cent. on the holdings of stock of the insolvent Middletown National Bank, are of a disheartening character to the unfortunate depositors and other creditors, who have already waited nearly four years for their money. Three dividends have been distributed by the Receiver amounting in the aggregate to 70 per cent. of the admitted claims, or \$450,886. There still remains due to the creditors \$194,966, with about \$70,000 interest, or altogether \$264,966. In order to meet this liability it is understood that Receiver Biye has to rely upon about \$200,000 in notes, bonds, and mortgages found among the assets of the bank that are practically worthless, and on about \$50,000 of assets in litigation and of doubtful value, to which will be added the proceeds of the present levy of \$200,000 on the shareholders. Up to the day when it closed its doors insolvent, November 27, 1884, the bank enjoyed the unlimited confidence of its depositors and correspondents, and, as is usually the case, the losses fall mainly and with peculiar severity on persons of slender means, who had their all, or a considerable portion of it, on deposit with or invested in the stock of the bank. The lot of the shareholders is peculiarly hard. Most of them paid a premium of \$20 to \$27 a share for the stock, regarding it as an extra desirable investment. The loss of the sum paid, and the call now made for an additional \$100 a share, bring ruin and poverty to many households.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- A bank is being organized at Summit, Miss.
- It is reported that a bank will soon be opened in Rock Mart, Ga.
- The Lombard Investment Company has increased its capital to \$1,250,000.
- The State Bank, Arcadia, Neb., \$20,000 capital, has recently been organized.
- Prominent citizens are talking of organizing a National bank in Bloomfield, N. J.
- A new bank styled the Third National is organizing in Aberdeen, Dak., with \$100,000 capital.
- The Waltham (Mass.) National Bank is to have a new building three stories high and costing \$40,000.
- Since August 1 there has been an increase in the amount of silver certificates in circulation of \$3,724,645.
- Gilt-edged bonds are scarce and high, and investors are turning their attention to the better class of stocks.
- The Western Trust & Savings Bank Company, \$100,000 capital, has been recently organized in Kansas City, Mo.
- The stockholders of the Midland National Bank, Kansas City, Mo., propose to increase their capital to \$500,000.
- Philadelphia now has a Penny Savings Bank. John Wanamaker is President and William McCouch, Cashier. Deposits are received from one cent upwards, and all money will be invested in real estate mortgages.

- President James H. Bouvé, of the Boston National Bank, Boston, Mass., is said to be recovering from his severe illness.
- Hon. Wm. G. Stewart, President of the Dubuque County Bank, Dubuque, Iowa, was recently very seriously injured in a gale of wind.
- Cox, who defrauded the Central Bank of Toronto last Fall of \$150,000, was arrested at Niagara, Ont., by the Canadian authorities.
- The July 1st statement of the Nevada Bank of San Francisco shows an individual deposit line of \$2,530,400 and profit and loss of \$87,000.
- One of the most pressing needs of the South is additional banking capital, and in many places business is seriously hampered on this account.
- Wm. E. Smith is doing a loan and investment business in Denver, Colorado. He negotiates first mortgage loans for Eastern investors at current rates.
- The Inter-State Trust Company, with \$1,000,000 capital, has been organized in Philadelphia. Its object is to do a general banking and trust business.
- The Gloucester City National Bank, Gloucester City, N. J., has been organized. It will occupy the building formerly used by the defunct Savings Bank.
- John T. McCheesney, President of the Aberdeen National Bank, Aberdeen, Dak., has been granted leave of absence for one year and J. Q. A. Braden elected Vice-President.
- The Second National Bank, Winona, Minn., has recently refitted its banking-house with all the modern improvements—including a new fire and burglar-proof safe—at a cost of nearly \$10,000.
- Since the organization of the American Savings Bank, Beatrice, Neb., sixteen months ago, its stockholders have received 14 per cent. in dividends, and \$2,600 has been placed to account of undivided profits.
- The combination of Winnipeg, Manitoba, bankers who resolved to accept American coin and bills only at 10 and 15 per cent. discount has fallen through, and money will be accepted at par as heretofore.
- An exchange says that the Hon. Silvester Johnson, banker, of New Haven, Ky., known and loved throughout that State for his munificent charity, recently gave his check for \$10,000 to the little sisters of the poor.
- Ben. Hopkins, Assistant Cashier of the defunct Fidelity National Bank, Cincinnati, Ohio, is reported to be rapidly declining in health. A few months since he weighed 205 pounds, and now tips the beam at only 165.
- Topeka, Kansas, is rapidly developing into the great money centre of the Middle West. There are more solid banking institutions already established and in progress of organization than in any other city of like size in the West.
- It is announced that John Plankinton, of Milwaukee, Wis., will retire from the packing business Oct., 1, and thereafter devote his entire time to the banking business, he being President of the Plankinton Bank of that city.
- Examination of the accounts of M. M. Small, deceased book-keeper of the First National Bank, at Miamisburg, O., discovers him to be an embezzler to the sum of \$12,000. His peculations extended over a period of ten years.
- The Central Railroad and Banking Company of Georgia recently bought the bonds of the Cincinnati, Selma and Mobile Railroad. Between \$1,200,000 and \$1,500,000 worth of bonds were bought at about 50 cents on the dollar.
- A statement published by the Canadian Government recently, shows that \$20,000,000 of Canadian Bank capital is invested in the United States, an increase of \$2,000,000 during the month. This has no reference to capital invested by private individuals.
- Charles H. Hackley, President of the Muskegon National Bank, Muskegon, Mich., who recently gave to the city \$100,000 for a public library, for which plans are now being made, has made another donation of \$25,000 with which to purchase books for the library.
- A Cincinnati exchange says that the only reason why the Cincinnati National Bank transferred its business to the Ohio Valley National was, that the latter was the

only bank that offered to loan it a decent sum of money, not to exceed \$200,000, while the others were not willing to make the sum above \$75,000.

Jarvis-Conklin Mortgage Trust Co.—The statement of this company at the close of business August 7, 1888, being for the first half of the fiscal year, shows total assets of \$3,333,534, which includes real estate mortgages and bills receivable on hand deposited for security of debentures, \$2,710,419; real estate, furniture and fixtures, \$89,000; cash on hand and deposited with company's bankers, \$194,194; stocks and bonds of various kinds—United States, State, Municipal, English Consols, etc.—\$242,223; and also ledger balances, including premium and loans, \$97,686. The liabilities show capital, \$1,000,000; surplus and profits, \$182,517; deposits for investment, \$370,345; fixed deposits bearing interest \$142,669; individual deposits, \$337,151; and debentures sold, \$1,300,860.

Under an opinion rendered by the Attorney-General of New York State, dated August 19, 1887, "foreign mortgage companies receiving deposits in this State are required to make deposits of stocks in the Banking Department."

It may not be generally known that this is the only company of its class doing business in the State of New York which is under the supervision of the New York Bank Department, and its debentures are also dealt in among the unlisted securities of the New York Stock Exchange. The following from the New York State Banking Department will explain itself:

STATE OF NEW YORK, BANKING DEPARTMENT, ALBANY, August 14, 1888.
Roland R. Conklin, Secretary, Jarvis-Conklin Mortgage Trust Co.:

DEAR SIR:—The Jarvis-Conklin Mortgage Trust Company of Kansas City, Mo., having complied with the requirements of law, to wit: Made semi-annual reports, submitted to an examination of its affairs, and deposited with the Banking Department \$100,000 in U. S. Government bonds, is authorized to receive deposits and to conduct a Trust Company business within this State, subject to the laws of this State.
Very respectfully, JOSIAH VAN VRANKEN, Deputy Sup't.

The Advisory Board of Directors comprises the following well-known New York city names: LOGAN C. MURRAY, President United States National Bank; JOHN P. TOWNSEND, Vice-President Bowery Savings Bank; EVAN THOMAS, Produce Exchange; JOHN A. MCCALL, Comptroller Equitable Life Assurance Society; COL. A. HARTSUFF, Surgeon U.S. Army; THOMAS CLARK, JR., ex-President American Exchange Insurance Co., who is Manager of the New York office.

Some Interesting Reading.—Correspondents frequently write: "I read every line in the JOURNAL, advertisements and all." The cards appearing herein furnish interesting information, and being printed in neat and attractive style they are sure to command attention. Advertisements of the following banks appear in this issue for the first time. Read them carefully:—

ALABAMA.—BERNEY NATIONAL BANK, Birmingham.

" —COMMERCIAL BANK, Selma.

ARKANSAS.—GERMAN NATIONAL BANK, Little Rock.

CALIFORNIA.—FIRST NATIONAL BANK, Fresno.

" —SOUTHERN CALIFORNIA NATIONAL BANK, Los Angeles.

COLORADO.—DENVER NATIONAL BANK, Denver.

DAKOTA.—JAMES RIVER NATIONAL BANK, Jamestown.

DELAWARE.—UNION NATIONAL BANK, Wilmington.

FLORIDA.—NATIONAL BANK OF THE STATE OF FLORIDA, Jacksonville.

GEORGIA.—ATLANTA MERCANTILE CO., Atlanta.

ILLINOIS.—FARMERS' BANK, Eureka.

IOWA.—FIRST NATIONAL BANK, Spencer.

KANSAS.—FARMERS & MERCHANTS' BANK, Bird City.

" —FINNEY COUNTY NATIONAL BANK, Garden City.

" —MERCHANTS' NATIONAL BANK, Topeka.

" —WICHITA NATIONAL BANK, Wichita.

KENTUCKY.—DEPOSIT BANK, Glasgow.

MARYLAND.—GEO. H. BIRNIE & CO., Taneytown.

MASSACHUSETTS.—SUFFOLK TRUST & INVESTMENT CO., Boston.

MICHIGAN.—STATE SAVINGS BANK, Detroit.

MINNESOTA.—STATE BANK, Minneapolis.

NEBRASKA.—MERCHANTS' NATIONAL BANK, Omaha.

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

THE HAZZARD CIRCULAR.

In the August JOURNAL reference was made to a Circular which seems to be making quite a sensation in certain sections of Kansas and Nebraska. The following letter from a subscriber is not only explanatory but will doubtless prove interesting to our readers:

Editor Rhodes' Journal of Banking:

SIR:—I see by the August number that you refer to the "Hazzard Circular" and ask for further information concerning it. I first heard of it about two years ago when it was very extensively circulated in this country (by the Chicago "Express" Printing Co. I think), and by men of limited intelligence it seems to be implicitly believed. That, and a little pamphlet entitled "Seven Financial Conspiracies" has been used in working up what is known as the Union Labor Party, and has so far succeeded in this locality that they have absorbed most of the Democratic party and a large part of the Republican party so that they expect to elect the Member of Congress from this (3rd Congressional) District, and I think they have a probability of success. I do not know whether the party is as well organized in the rest of the State as in this District as I hear but little of it except locally. * *

THAYER, Neosho Co., Kans., August 21, 1888.

COIN OR PAPER—POSEY S. WILSON'S "UNIT OF VALUE" CRITICIZED.

Editor Rhodes' Journal of Banking:

SIR:—In Posey S. Wilson's essay in your JOURNAL for July he makes the curious mistake of saying that the dollar is "the unit of value." Value means usefulness, and there is no unit of usefulness in nature. Neither has law arbitrarily chosen one, as we arbitrarily fix a unit of heat or time. He is misled by the fact that the dollar is the unit of money.

When he asserts that money in an unlimited sense is gold only, or that gold only is money and that "dollar" is the unit of value, he finds himself in the awkward position of being without a unit, for there is no gold dollar under our present law. There being no dollar in fact, he escapes from his position by postulating a ghost of a dollar in the true style of Schopenhauer's philosophy, which that foggy Teuton himself denominated a *transcendentaler idealismus*, or transcendental idealism. And I cannot imagine any place where transcendental idealism is a greater incongruity than in an essay in favor of a purely metallic currency. His transcendental foundation for that solid currency is as inappropriate as it would be to build the East River Bridge piers on ice. He is alone, so far as I know, among financialists a metaphysical financialist.

The men who perpetrated the crime against the constitution in attacking silver did so for the very material purpose of increasing the purchasing power of what they receive on contracts made before their crime was committed; and they care no more for Mr. Wilson's kind attempt to find them a justification for it than they do for the constitutional rights of the oppressed, whose labor pays them and the terms of whose contract with themselves they have fraudulently procured to be altered.

LEXINGTON, Mo., August 27, 1888.

GEO. WILSON.

[NOTE.—The JOURNAL's readers may be interested in knowing that Mr. Posey S. Wilson and Mr. George Wilson are brothers, and though not at all in accord on the silver question they are especially attached to each other.—THE EDITOR.]

They All Read It.—C. A. Williams, Cashier of the Texarkana National Bank, Texarkana, Tex., under date of Aug. 17th, sends order for Special List card in the JOURNAL and writes: "We will commence advertising in a modest way, and will add to it in proportion to any extra business it may give us. Not only myself but our entire office force—including the messenger—read the JOURNAL with much interest."

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

THE CRIMINALS' RETREAT.—Canada is the voluntary Botany Bay of the United States. It would cost the States \$100,000 a year to convict and imprison the criminals who find a welcome and protection in the Dominion. The advantage of Canada to the United States is that it furnishes a permanent riddance of a large class of dangerous criminals, which if sent to a penitentiary would be out in a few years and at their old tricks.—*Price Current*, Phila.

A COLLAPSE INEVITABLE.—The Panama Canal Company spends about \$4,000,000 to \$5,000,000 per month according to M. de Lesseps' statement last winter. It has in hand, taking its reports of last winter, its expenditures since and the receipts from its lottery loan, about \$14,000,000, it will receive \$11,200,000 from the loan this year and about \$10,920,000 in 1889. This gives it \$42,000,000 during the next eighteen months. As its expenses for interest and administration run close to \$2,000,000 a month, it has barely enough to meet even these during the two years in which M. de Lesseps proposes to finish the canal, which is not half dug. It is hard to see, says the *Philadelphia Press*, how a collapse can be postponed much over six to eight months more, and when it comes its effect will be felt on every stock market of the civilized world.—*Exchange*.

PITCHER'S CASE.—At last the moccasin train on which justice travels in her Montreal Police Court proceedings has reached the first landing station, and Pitcher, the Union Bank of Providence defaulter, has been committed to stand his trial at the next session of the Court of Queen's Bench, which will be held in September. The charge upon which he has been committed is that of bringing stolen money into Canada. In view of the possibility of any miscarriage of justice, through insufficiency of evidence or other cause, proceedings with a view to extradition on a charge of forgery have been initiated, and notification to that effect has been given to the Department of Justice. The application for the issue of the warrant was made before Mr. Justice Davidson, of the Superior Court for Lower Canada, and the notification referred to was transmitted by him in consequence. Extradition, if allowed, will, however, be contingent upon the result of the trial on the charge on which he stands committed. Pitcher, in the meantime, enjoys the Queen's hospitality, and is a guest at the Provincial temperance hotel in this city supported by the Quebec Government.—*Shareholder*, Montreal.

A GOOD EXAMPLE.—The suggestion is made that the banking houses who place bonds ought to protect their customers after they have sold the bonds; but there are very few banking houses who take the high ground that having recommended a security to a purchaser they are bound to retain their interests in the property and see that the promises which they made are fulfilled. We all remember how false was the prospectus of the West Shore road, and how the bonds were sold with an absolute unqualified statement that they were a first mortgage on everything that the company owned. And after they had been sold on that basis, all the terminal property was placed under another mortgage. The Baring Brothers, of London, placed a loan for the Eastern railroad of Massachusetts some years ago, and when the company went into bankruptcy it was discovered that the bondholders would have to take pot luck with the other creditors, for the bond was not a mortgage upon the road. A reorganization was effected and the interest upon this loan was scaled, but the Baring Brothers announced that despite the funding agreement they would pay the interest in full upon all bonds placed by their house.—*Wall Street News*.

A. S. Pratt & Sons, publishers, of Washington, D. C., under date of Aug. 16th write: "Permit us to congratulate you on the *perfection* to which you have brought your JOURNAL."

NEW BANKS, CHANGES IN OFFICERS, FAILURES, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, September 4, 1888.

From the fact that the appropriations already made by Congress will nearly absorb the estimated revenues for the present fiscal year, or until July 1, 1889, it may be concluded that the operations of the Treasury will not cut so important a figure in financial circles as it has during the last eighteen months. It matters little how much goes into the Treasury provided there is a method of exit. If, as is now contended, there will be a surplus of about twenty millions only after all appropriations are made, this cannot cause much trouble, in view of the constant addition of silver certificates to the circulation. As long as the coinage of the silver dollar continues there will of course be cause of anxiety lest there may be a serious change in the standard of value, but this change is not likely to occur for some time. The scare on account of the surplus during the eighteen months that have just passed has not been wholly bad in its effects. It has made the banks of the country, as a whole, very conservative and careful in their management. The dread of sudden demands has caused financial institutions of all kinds to keep their resources well in hand. The retaliatory message of the President has caused some slight apprehension of war with England, but as yet not enough to unfavorably affect the money market. No one believes that either Canada or England want war, more especially as the latter anticipates a reduction of the tariff, which may be favorable to her commerce. During the month there has been much dullness in the money market. As was stated last month the financial institutions of the money centres have been loth to loan except on call, and have manifested a tendency to wait for higher rates. The feeling that there would be increased drafts from the interior as soon as it became necessary to move the cotton and grain crops and the uncertainty as to the operations of the Treasury has continued, and the suspense has been increased by the lateness of the cotton crop. The Secretary of the Treasury has evidently been watching the action of Congress in regard to appropriations very closely, and has hesitated more than ever to buy bonds to any great extent when all the revenues for the year, however they may accumulate now, will hereafter be required to meet the expenditures authorized by Congress. Money has been plenty during the month, that is, the reserves have not decreased to any great extent. The loan market has, however, as before stated, been dull, although toward the close of the month there was more demand. The banks, however, are doing little except for their customers. The total imports since the first of January have been considerably larger than for any previous year—the amount having been \$433,748,000 as against \$380,137,000 for the same period of 1887, an increase of nearly \$104,000,000. This great increase indicates how inadequate to reduce the revenues of the Government is any moderate reduction of the present tariff. The chances are that the revenues will accumulate faster during the fall and winter than they can be drawn out to meet appropriations, and that the Secretary will be afraid to use a surplus, which he regards as only temporary, to buy bonds. If this condition of things should occur he would be reduced to his other resource of depositing still more largely with the National bank depositories than heretofore. The condition of the money market is favorable to the continued flow of gold to this country from abroad. There has been a comparatively small exportation during the year. The exportation of grain and cotton will soon begin, and unless the importations of foreign products and merchandise are excessively great it is almost sure that the balance of trade will be in our favor. It is said the crops abroad are below the average. Several large loans have recently

been successfully placed in Europe, and everything points to an increase of our gold balance. This being so, the silver coinage will not make any disturbance for some time yet. Everything, including the large appropriations by Congress, seems to be in favor of a rise in prices within a few months, but not until some of the anticipated conditions are realized. Two counteracting causes may perhaps develop. First, the temporary surplus may accumulate in the Treasury faster than called for to pay appropriations, and second, American securities may be largely returned from abroad. The first would cause stringency in currency, and the second will lessen gold importations.

FOREIGN EXCHANGE.—During the first week in August sterling exchange was extremely dull, there being only moderate inquiry. There was some pressure from commercial bills and this, with the dullness, made the market weak as a rule though higher prices in the open market discounts at London had a hardening effect on short sterling for a time. The tendency was however downward. For the week ending August 10th, the sterling exchange market continued very dull and there was nothing to stimulate the demand. The purchase of stocks on foreign account, though considerable, failed to have any general effect on prices as money was advancing in the open London market and the bank rate advanced to 3 per cent. Short sterling was firm and rates for long were steady. For the week ending August 17th, sterling exchange was very weak the demand being limited. The purchase of American securities for foreign account caused some increase in bankers' bills which made exchange weak and lower rates. For the week ending August 24th, there was very little inquiry for sterling exchange and the market was lifeless. In consequence of the scarcity of commercial and security bills rates remained firmer than might be supposed especially for short sterling. For the week ending September 1st, sterling exchange continued dull with very little inquiry. More security bills were offered but, notwithstanding this, rates remained unchanged. Towards the last both commercial and security bills became scarce.

On August 9th the Bank of England rate was raised from 2½ to 3 per cent. at which it has continued during the month. From July 29th to August 30th the Bank of England lost £28,000 in specie, and the Bank of France lost 13,625,000 francs in gold and gained 11,625,000 in silver. The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, \$4.85½; sight, nominal, \$4.83½; 60 days, actual, \$4.84¼ @ \$4.85; sight, actual, \$4.87½ @ \$4.87¼; Cable transfers, \$4.88¼ @ \$4.8½; Prime commercial sterling, long, \$4.88½ @ \$4.84; Documentary sterling, 60 days, \$4.83¼ @ \$4.83¼; Paris bankers', 60 days, 5.22½ @ 5.21½; sight, 5.20½ @ 5.20; Paris, commercial, 60 days, 5.24½ @ 5.23¼; sight, 5.21½ @ 5.21¼; Antwerp commercial, 60 days, 5.25 @ 5.24½; Swiss bankers', 60 days, 5.23½ @ 5.22½; sight, 5.20½ @ 5.20; Reichsmarks (4), bankers', 60 days, 94¼ @ 94½; sight, 95½ @ 95¼; Reichsmarks (4), commercial, 60 days, 94½ @ 94½; sight, 94½ @ 95; Guilders, bankers', 60 days, 40½ @ 40 8/16; sight, 40 5/16 @ 40 3/8; Guilders, commercial, 60 days, 39 15-16 @ 40; sight, 40 1/8 @ 40 8-16; Copenhagen, Stockholm and Christiana, krona, 60 days, 26½ @ 26 11-16; sight, 26½ @ 26 15-16. Paris dispatches quote exchange on London 25f. 40c.

The following table shows the posted rates for bankers' sterling at 60 days and sight and the average for prime commercial bills and for exchange on Paris in August:

January, 1898.	BANKERS		Cable		PARIS	
	60 days.	Sight.	Transfers.	Commercial.	60 days.	Sight.
August.....	4.85½	4.88½	4.88½	4.88½	5.22½	5.20½

HOME MONEY MARKET.—The open market rates for call loans on stock and bond collaterals during the week ending August 4th, ranged from 1 to 1½ per cent. Prime commercial paper was quoted at 4 to 4½ per cent. For the week ending August 11th the open market rates on call loans on stock and bond collaterals were from 1 to 1½ per cent., and prime commercial paper was quoted from 4 to 4½ per cent. For the week ending August 18th the open market rates on call loans on stock and bond collaterals ranged from 1 to 2½ per cent., and prime commercial paper from 4 to 4½ per cent. For the week

ending August 25th open market rates for call loans on stock and bond collateral ranged from $1\frac{1}{2}$ to 2 per cent., and prime commercial paper from 4 to 5 per cent. For the week ending September 1st, open market rates for call loans on stock and bond collaterals ranged from $1\frac{1}{2}$ to 2 per cent., and prime commercial paper was quoted at $4\frac{1}{2}$ to 5 per cent. The following are the latest rates of exchange on New York: Savannah, buying $\frac{1}{2}$ discount; selling $\frac{1}{2}$ discount to par. Charleston, buying par; selling $\frac{1}{2}$ premium. New Orleans commercial 50c. per \$1,000 premium; bank, \$1 premium. St. Louis, 60c. per \$1,000 discount. Chicago, 60c. per \$1,000 discount.

The statement of the Comptroller of the Currency for August shows total circulation of National bank notes outstanding on August 31st, not including circulation of National gold banks, to be \$246,233,495; a decrease since August 31, 1887, of \$27,785,405, and since July 31, 1888, of \$3,201,078. During the month just closed there has been issued to new banks circulation to the amount of \$247,510, and to banks increasing circulation, \$244,845. There has been surrendered and destroyed during the interval \$3,693,433. The amount outstanding against United States bonds on August 31st was \$158,133,712; a decrease since August 31, 1887, of \$11,817,673, and since July 31, 1888, of \$740,491. The amount of circulation represented by lawful money on deposit with United States Treasurers to redeem notes was \$88,099,783 on August 31, 1888; a decrease since August 31, 1887, of \$15,967,732; a decrease during the month of \$2,460,587. The total United States registered bonds on deposit to secure circulating notes on August 31st was \$176,508,850, and to secure public deposits, \$56,078,000.

The following shows the amount of each description of bonds held by the Treasurer to secure National bank circulation on the dates indicated:

	Sept. 1, 1888.	Aug. 1, 1888.	July 1, 1888.	Jan. 1, 1888.	Jan. 1, 1887.
Currency 6 per cents..	\$3,231,000	\$3,181,000	\$3,181,000	\$3,256,000	\$3,680,000
$4\frac{1}{2}$ per cents.....	68,620,800	69,408,300	69,670,300	68,955,050	69,636,200
4 per cents.....	104,620,050	104,812,000	105,423,850	112,102,400	113,903,200
3 per cents.....	37,500	37,500	37,500	131,500	52,218,950
Total.....	\$176,508,850	\$177,438,800	\$178,312,650	\$184,444,950	\$229,438,350

NEW YORK BANKS.—During the week ending August 4th the combined gold and currency received from the interior by the New York banks was \$1,761,000, and they shipped \$1,075,000, making a gain of \$686,000. By Sub-Treasury operations the same week they lost \$1,900,000, making a net loss of \$1,214,000. During the week ending August 11th the banks received from the interior \$1,765,000, and they shipped \$1,250,000 gaining \$546,000. By Sub-Treasury operations they lost \$1,900,000, making a net loss for the week of \$554,000. For the week ending August 18th they received from the interior \$986,000 and shipped \$2,950,000, losing \$1,964,000 by dealings with the interior. By Sub-Treasury operations they made a further loss of \$750,000, making a total loss of gold and currency for the week of \$2,714,000. For the week ending August 25th, the banks received \$1,165,000 from the interior and shipped \$3,840,000 losing \$2,175,000. They gained, however, \$1,000,000 from the Sub-Treasury reducing the net loss for the week to \$1,175,000. For the week ending September 1st, the banks received \$1,400,000 from the interior and shipped \$3,500,000, losing \$2,050,000. They made a further loss of \$2,000,000 in dealings with the Sub-Treasury—the total loss for the week being \$4,050,000. From July 28th to September 1st, the total currency and gold lost was \$9,707,000, as against a loss of \$585,000 during July, and a gain of \$7,181,000 in June. The following table shows the condition of the New York Clearing-House banks for a number of weeks past.

1888.	Loans.	Specie.	Legal-tenders.	Deposits.	Circulation.	Surp. Res.
August 25..	\$388,749,600	\$37,201,900	\$36,942,400	\$412,563,500	\$7,818,200	\$21,003,425
August 18..	387,949,700	37,736,800	38,015,300	416,063,400	7,760,400	21,736,250
August 11..	385,791,100	38,852,700	39,383,900	416,519,100	7,672,300	24,106,325
August 4..	381,703,600	30,587,300	39,743,200	414,320,500	7,644,000	23,750,375

The following table shows the highest, lowest and closing prices of the active stocks at the New York Stock Exchange in the month of August, the highest and lowest since January 1, 1888, and also during the year 1887:

	AUGUST, 1888.			SINCE JANUARY 1, 1888.		YEAR 1887.

* Stands for ex-Dividend.

The total amount of shares sold during the month of August was 4,632,932, representing dealings in 126 different stocks. Of this number of shares 3,658,581 or over three-quarters represented dealings in sixteen stocks as follows:

Shares.	Shares.	Shares.	Shares.
*Phil. & Read. 673,617	Union Pac. 266,866	Erie 145,041	Texas Pac. 94,818
Del. L. & W. 536,214	Lake Shore 218,901	C. & N. W. 142,557	R. & W. Pf 75,555

* Old stock and new certificates.

leaving 974,351 shares to represent the dealings in the remaining 110 stocks. In addition railroad bonds amounting to \$32,056,500 were sold, \$306,200 State bonds and \$301,300 Government bonds. Of unlisted securities were sold: Bonds, \$747,000, stocks, 46,448 shares, mining stocks, 21,190 shares, American cotton oil certificates, 42,665, Pipe line certificates, 18,187,000 barrels. The listed stocks sold show an increase of 148,500 shares over amount sold in July; unlisted securities indicate slight increase over the sales of the previous month. The indications are not very propitious for any permanent or decided rise in price of stocks during the month of September. The chances are that money will be very close during the month both from shipments to the interior and from heavy influx into the Treasury of duties. There may, it is true, be a large balance of trade in favor of this country, but this may take the form of a return of American securities rather than importations of gold. We think the large appropriations will make the Secretary of the Treasury timid about the use of the surplus in the purchase of bonds, and this will tend to increase Treasury holdings until the appropriations become available and are drawn out. It seems certain, however, that all the conditions are favorable for an easy money market after a month or so, but it is too soon to look for it in September.

What effect the unexpected return of Jay Gould may have on the market cannot readily, at this writing, be estimated. Naturally the "bulls" are inclined to indulge in rose-tinted visions of unlimited advances in their favorite holdings, while the "bears" regard the advent of Gould in the market as a bad omen. The recent great rise in the price of wheat has not been altogether reflected in stocks, and some croakers are contending that it bodes no good for the future of the trunk line traffic. There are times when discretion in purchasing is worth a mint of money. It may be a good plan to make haste slowly.

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange. The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

How they try to Cheat the Bank.—An experienced Receiving Teller in a large bank in New York city volunteers the following information for the benefit of the JOURNAL'S readers:

"There are any number of people, sometimes, I think, as many as nine out of ten, who seem to think it no crime to cheat a bank, or at any rate a poor clerk in the institution. If there is a streak of meanness anywhere in a man's nature it will crop out when he is put to the test on a question of money. Sometimes I have amused myself by experimenting with men to find out whether they were honest. There is an easy way of ascertaining. For instance, a depositor hands in his bank book together with a number of bills and checks, the amounts of which are to be placed to his credit. He has made out a deposit ticket which he holds in his hand while I count the money. 'How much?' I ask. 'What do you make it?' he inquires. I name a sum \$5 or \$10 larger than I have ascertained the amount to be.

"If the man is honest he will say he thinks I am mistaken, but often he will turn around and make out another deposit ticket, fixing the amount to correspond with the figures I have given. Then, of course, I count the cash again and announce that I have made a mistake, and to prove it hand back the money and let him recount it. Men whom nobody would ever suspect of crookedness in business matters are often very quick to take advantage of a little mistake in their favor. I know several wealthy gentlemen who, I truly believe, would never think of paying back any sum, large or small, that got into their hands through a bank clerk's mistake."

"Simply Suggestive."—Under the above heading the *Enquirer* refers, facetiously, to the banks of Cincinnati in connection with the approaching meeting of the American Bankers' Association:

Already the local bankers are preparing their papers to be read at the forthcoming Bankers' Convention in this city. Among the topics which might be chosen are:

Faith, hope and charity: the greatest of these is charity—Morris White, of the Fourth National.

The leading financiers of the land: me and A. S. Winslow—L. B. Harrison, of the First National.

Do not do unto others as you would be done by—J. D. Hearne, of the Third National Bank.

What I know about fooling people—John Hauck, of the German National Bank.
 Bank entrances and how to get the best of it—Briggs Cunningham, of the Citizens' National Bank.

A nice, quiet business—President of the Atlas National Bank.
 Watch the pennies and the dollars will be there—W. A. Goodwin, of the National Lafayette Bank.

Never overwork the clerks—J. M. Kirtley, of the Fifth National Bank.
 The life of a Bank President, so full of pleasures and joys—Frank Alter, of the Cincinnati National.

BANKERS' OBITUARY RECORD.

Baker.—William B. Baker, President of the Shenandoah Valley National Bank, Winchester, Va., died August 12.

Barton.—George Barton died at Warren, R.I., August 15 at the age of 81. He had held many prominent offices, and at the time of his decease was President of the National Hope Bank and also of the Warren Institution for Savings.

Crocker.—Charles Crocker, the noted California banker and millionaire, died at Monterey, Cal., August 14. He was one of the principal stockholders in the Crocker-Woolworth National Bank of San Francisco, and had been largely interested in contracts for the building of the Union Pacific railroad and the revenues derived from the operations of the road, the sale of lands given by the Government, and other percentages of the transcontinental railway.

Curtiss.—Charles Curtiss, one of New York city's widely-known merchants and successful business men, died August 22 at the advanced age of 81. In 1849 he was elected a Director of the Dry Dock Savings Bank, became its President in 1879 and held that position until his death. He was prominent in social and political circles and also actively interested in church matters.

Dain.—Nathaniel Dain, Treasurer and one of the Directors of the Peekskill, N.Y., Savings Bank, died June 19 in the 69th year of his age.

Davis.—George W. P. Davis, Cashier of the West Side Bank, New York city, was thrown from his carriage at Plainfield, N.J., August 21 and sustained injuries from the effect of which he died on the 22d.

Garlichs.—Charles Garlichs, an old member of the New York Stock Exchange, died August 5. He had been a member of the Exchange since 1869.

Gordon.—U. M. Gordon died at San Rafael, California, August 4, at the age of 57. He was born in Pennsylvania, came to California in 1852, and in 1865 founded the banking house of U. M. Gordon & Co. He also served a term as Treasurer of Marin County.

Gale.—James E. Gale, President of the Haverhill National Bank, Haverhill, Mass., died August 20, aged 57. He was elected Cashier of this bank soon after he was twenty-one years old and held the position until 1888 when he became President.

Hamilton.—David Hamilton, founder and ex-President of the State Savings Bank, Detroit, Mich., died recently.

Jerome.—Lawrence R. Jerome, at one time a prominent figure in Wall Street circles, died at Sharon, Conn., August 13.

Kirkman.—John Kirkman, President First National Bank, Nashville, Tenn., was thrown from his sulky August 1 and killed. He was over 70 years of age and one of the wealthiest men in that State.

Lucas.—John C. Lucas, President of the Keystone National Bank, Philadelphia, Pa., died at Spring Lake, N.J., August 18.

Peck.—Mr Ira B. Peck, President of the Woonsocket National Bank and one of its oldest Directors, died recently at Woonsocket, R. I., aged about eighty-five.

Park.—U. H. Park, Cashier of the Citizens' Bank, Van Buren, Ark., died suddenly at Fort Smith, August 3. He had many friends who greatly regret his untimely death.

Phelps.—Isaac Newton Phelps, a well-known New York city banker, died August 1, aged 84. He had an office for 84 years at 45 Wall Street and was one of the founders of the Mercantile National Bank, one of the founders of the Second National Bank, the principal stockholder and Managing Director of the United States Trust Company, a Director in and at one time Vice-President of the Greenwich Bank, a stockholder in the Metropolitan Trust Company, the Mercantile Fire Insurance Company, the United States Life Insurance Company, the Central Trust Company, the Fifth Avenue Safe Deposit Company, the Hamilton Bank, and a large holder of gas stocks.

Stevens.—Philip H. Stevens, an ex-member of the N. Y. Stock Exchange, died recently at Newport.

Strain.—Henry Strain, President of the Merchants' National Bank, Hillsborough, Ohio, died July 28, aged 66 years. He had been President of the bank since its organization.

Sweeny.—Myles D Sweeny, President of the Hibernia Savings & Loan Society, San Francisco, Cal., died August 17, aged 84 years. He had been President of the bank since its organization and was always prominent in business circles.

Schwab.—Gustav Schwab, a prominent citizen of New York, died at his residence in that city August 21. He was born in Germany in 1822 and came to New York city in 1844 where he has since been engaged in the shipping and commission business. He was a member of the firm of Oelrichs & Co., agents of the North German Lloyd Steamship Company of Bremen and was one of the Board of Managers of the New York Produce Exchange and a Trustee of the Gratuity Fund. At one time he served as a member of the Board of Education, discharging the duties of the office with conscientious attention. He was also the oldest Director and Vice-President of the Merchants' National Bank, a Director of the Central Trust Company, the Washington Life Insurance Company, the Orient Mutual Insurance Company, and other institutions. He took an active interest in the establishment and management of the German Hospital and Dispensary, and was always interested in many works of charity connected with the church at large.

Wintermute.—Thos. S. Wintermute died in June last, at Breckenridge, Colo., where he had been for many years engaged in banking.

MONETARY CHRONOLOGY.—August, 1888.

1. WEDNESDAY.—Bond offerings aggregated \$751,000. Accepted, \$50,000 four and one-half per cent. bonds at 107.40-100.
2. THURSDAY.—Bond offerings aggregated \$558,000. Accepted, \$25,000 four and one-half per cent. registered bonds at 107.45.
3. FRIDAY.—Bond offerings aggregated \$923,350. Accepted, \$25,000 coupon four and one-half per cents at 107.45; \$5,000 registered four and one-half per cents at 107.45, and \$3,350 registered four per cents at 127½.
4. SATURDAY.—Bond offerings aggregated \$554,500. No offers accepted.
6. MONDAY.—Bond offerings aggregated \$33,350. Accepted, \$500 registered four per cents at 127½, and \$1,000 registered four and one-half per cents at 107.45.
7. TUESDAY.—Bond offerings aggregated \$1,633,000. No offers accepted.
8. WEDNESDAY.—There were no offers of bonds at the office of the Secretary of the Treasury during the appointed hours for receiving them.
9. THURSDAY.—Bond offerings aggregated \$1,575,100. No offers accepted.
10. FRIDAY.—Bond offerings aggregated \$298,000. No offers accepted.
11. SATURDAY.—Offerings of Government bonds aggregated \$923,350. Accepted, \$3,350 fours at 127½, \$25,000 4½'s at 107.46-100 and \$5,000 do. at 107.45-100.
13. MONDAY.—Bond offerings aggregated \$365,250. Accepted, \$10,000 coupon fours 127.34-100; \$6,650 registered 4's at the same price, and \$600 registered 4's at 127½.
14. TUESDAY.—Bond offerings aggregated \$1,951,000. No offers accepted.
15. WEDNESDAY.—Bond offerings amounted to \$1,505,800. None accepted.
16. THURSDAY.—Bond offerings aggregated \$3,543,000. Accepted \$2,000,000 registered 4's at 128, \$50,000 at 127½, and \$17,000 registered 4½'s at 107½.
17. FRIDAY.—Bond offerings amounted to \$477,500. Accepted, \$1,000 reg. 4's at 128.
18. SATURDAY.—Bond offerings amounted to \$655,000. Accepted, \$25,000 at 128; \$5,000 at 128; \$5,000 at 127½; \$2,000 at 127½—all registered 4's, and \$5,000 coupon 4's at 128.
20. MONDAY.—Bond offerings amounted to \$352,250. Accepted, \$50,000 at 128; \$50 at 128; \$100,000 at 128; \$2,200 at 128—all registered fours; \$1,000 registered four and a-half at 107½, and \$1,000 coupon four and a-half at 107½.
21. TUESDAY.—Offerings of Government bonds aggregated \$5,224,000. None accepted.
22. WEDNESDAY.—Bond offerings aggregated \$650,000. Accepted, \$7,000 coupon fours at 128, and \$100,000 registered fours at 128.
23. THURSDAY.—Bond offerings aggregated \$759,500. Accepted, \$25,000 and \$500 registered fours at 128.
24. FRIDAY.—Offerings of Government bonds, \$223,500. Accepted, \$9,500 4's at 128.
25. SATURDAY.—Purchases to date of United States bonds, under circular of April 17, 1888, aggregate: 4's, \$23,087,350; 4½'s, \$10,537,300; total, \$33,624,650; cost of 4's, \$29,332,007.52; of 4½'s, \$11,343,507.57; total, \$40,675,515.39.
27. MONDAY.—Bond offerings aggregated \$94,000. Accepted, \$4,000 registered 4's at 128.
28. TUESDAY.—Offerings of Government bonds aggregated \$1,735,000. Accepted, \$50,000.
29. WEDNESDAY.—Offerings of Government bonds aggregated \$1,927,000. Accepted, \$2,000 4½'s at 107½.
30. THURSDAY.—Offerings of Government bonds aggregated \$255,000. The Secretary declined all offers.
31. FRIDAY.—Offerings of Government bonds aggregated \$463,000 as follows: \$25,000 at 128½. Accepted, \$40,200 fours at 128½ and \$300 do. at 128.

WANTED—OFFICERS AND CLERKS, POSITIONS, BANKS FOR SALE, ETC.
 [Notices under this head—four lines or less—cost \$2 an insertion; over four lines, 50 cents a line. If replies are to be sent to this office the advertiser must send us two stamped envelopes addressed to himself, in which the replies will be forwarded.]

BANK STOCK FOR SALE.—\$1,000 to \$5,000 of choice Minnesota bank stock for sale at 107, although worth more. Dividends, 8 per cent. per annum, besides surplus. Address "MINNESOTA," care RHODES' JOURNAL, New York.

TO BANKERS.—A Canadian, age 27, trained in the theory and practice of banking, is desirous of making an engagement with a first-class bank or firm of private bankers in New York, Boston or some other monetary centre in the United States. Satisfactory references in the United States and Canada. Address "S," Box 407, St. Thomas, Ont.

WANTED.—A gentleman, having 10 years' experience in an Eastern bank, wishes to secure a position in a Western bank. Will invest \$10,000 in new bank provided he can secure the position of Cashier or Assistant Cashier. Fully competent. Address: "JOHNSTON," care of RHODES' JOURNAL, New York.

WANTED.—A young man (24), graduate of Eastern Law School, for past two years Assistant Cashier in Western bank, specially conversant with Kansas and Nebraska banking and real estate loan business, desires employment in Western Bank, Collection Agency, or Investment Co. References and bond if required. Address: "STRONG," care of RHODES' JOURNAL, New York.

WANTED.—A young man, (33) with eight years' experience in a National bank in the State of New York, six years of which he filled the position of Assistant Cashier, wishes to engage in banking in some live city or town. Will invest some capital in new State or National bank where there is a good opportunity to build up a successful business. The advertiser is fully competent to fill the position of Cashier. Address: SETH A. RHODES, care of RHODES' JOURNAL OF BANKING, 78 William Street, N. Y.

RHODES'

JOURNAL OF BANKING.

Vol. XV.

OCTOBER, 1888.

No. 10.

THE subject of Trusts is a dangerous one to touch upon. The word "trust" has become a bugbear, a partisan war cry. One who attempts to write about these combinations from a non-partisan standpoint, and to fairly weigh the arguments for or against, is immediately assailed. The Louisville "Courier Journal" thus comments on an editorial on this subject which appeared in the August number of the JOURNAL:

"RHODES' JOURNAL OF BANKING begins its leader on Trusts as follows: 'The growth of trusts in the last five years has attracted much attention. These manifestations of business enterprise are the result of a desire to overcome the injurious effects of competition.' A newspaper writer who can express himself in these terms (and the sample quoted is in line with the whole writing) has mistaken his calling unless he has voluntarily sold himself to monopoly to deceive the ignorant. To call competition injurious is an exposure of utter ignorance or worse, etc., etc."

This is an example of the misrepresentation induced by blind partisanship. The JOURNAL is quoted wrong at the start, and the subsequent comment has a semblance of reason because of the wrenching of a detached phrase from its context and giving it a meaning different from the meaning the context shows it to have. The editorial in the JOURNAL really read as follows: "The growth of trusts has, within a year or two, attracted much attention. These manifestations of business enterprise are the result of a desire to overcome the injurious effects of competition. The question as to the relative advantage or disadvantage of trusts cannot be easily decided. It does not do to accept without much qualification the ordinary view that these combinations are entirely against public policy." But we refer our readers to the editorial itself in the August number of the JOURNAL. The main idea was that trusts were not necessarily formed to please the public but to limit competition among those engaged in the same business. No one denies that competition is a good thing, but many things are good when properly controlled, that become disastrous when allowed to have unbounded sway. Fire and water are useful and indispensable when properly handled, but

every one recognizes the dangers of conflagrations and deluges. It was also insisted that the cry against trusts did not come from the public as a whole but from that portion of the public who desired to enter into competition with the trust. The general public is often benefited by the control exercised by trusts both in prices and in the quality of the thing purchased. It was further claimed that trusts are not protected by law in the United States further than some of them may own patent rights, and also that they bear no relation to the tariff, some existing in branches of manufacture protected by tariff and others where the business, or manufacture, or product, the subject of the trust, is in no way protected by the tariff. Those who endeavor to make trusts a political issue are unable to consider them fairly or philosophically. They look at them as the Chinese do at their Devil Joss, as things to be sworn at or propitiated according as they seem to use influence for or against one party or the other. The JOURNAL was attempting to consider them from an economic standpoint and with no desire to exaggerate or decry their dangers to the public interest. But as was said at first it is dangerous to touch these party bugbears, which, during the campaign at least, are to be looked at through the eyes of those who set them up to terrorize the ignorant.

THE WILLINGNESS of some to give advice under any and all circumstances is only equalled by the sapiency which usually characterizes the advice given. This remark applies to the comments of that portion of the financial press which appears to look upon the Secretary of the Treasury as little less than a demi-god, and upon his bond buying policy as a manifestation of genius entitling him to be considered a sort of Financial Father of his country. There is a mournful wail that holders will not offer more freely even at the magnificent price of 130, although this price "is certainly such as to justify the surrender of bonds by all holders who desire to make other investments." Not content with this whine that, contrary to expectation, the bonds are not offered more freely, statements are made that "competent authorities who have heretofore made very conservative estimates of the amount of bonds in sight and within reach of the Treasury, now inform us that at least \$40,000,000 of fours are in the hands of parties who have indicated their willingness to sell to the Government, and have intimated that 130 was about the price they expected to secure." This is evidently inspired direct from bond-buying headquarters, and is intended to frighten holders into the belief that the market will soon be glutted. There are also vague intimations put forth that a syndicate has existed from the time bond purchases were commenced, and the business of buying bonds to sell to the Government has been constantly carried on. Why of course it has, and so has the buying of United States bonds and other securities of more or less value to sell again ever since there was a stock market.

But if there is a syndicate for selling bonds as asserted, can it be more powerful than the United States Treasury managed by so eminent and competent a financier as the Hon. Chas. S. Fairchild, the disciple and successor of the Hon. Daniel Manning? The truth is, this bond buying scheme is a make-shift to allay the apprehensions of the financial world as to the dangers of the accumulation of surplus in the Treasury—perhaps not necessarily so, but made so by the manner in which the buying is carried on. There seems to be no real intent to get rid of the surplus, and only enough bonds are purchased to give the impression that if necessary, the Treasury can relieve a temporary pressure in the money market. So far the Treasury has only bought when money was easy and there was no real necessity of buying at all. If the market should become stringent, bonds would, as a rule, go down but it is doubtful whether they would with the Treasury as a large buyer. The moment the bonds touched a low figure private buyers for investment would step in and the Treasury would be as much at a disadvantage as ever. It was prophesied from the first that this bond buying plan would afford no relief from the surplus. It is questionable whether such relief is really desired, for, if the surplus were disposed of, the present administration of the Treasury would have no further reason for being. Like the transfer of the elder Mr. Weller's "reduced counsels" to Solomon Pell, the surplus has been to the Secretary of the Treasury board, lodging and washing for the last two years.

THE LOUISVILLE "Courier Journal" thinks that the Western States where savings deposits are scanty have a substitute which is an infinitely greater incentive both to industry and economy, that is, Western farm mortgages. These mortgages represent the money loaned by Eastern money lenders to the West at from 7 to 10 per cent. The debt and the interest, says the "Courier Journal," cause the happy mortgagors "to hump themselves in industry and to scratch around in a livelier fashion in promotion of the interests of economy than all the savings bank deposits you could shake a stick at." No doubt some of the money loaned on farm mortgages comes from the East, but much of it comes from the Central States and some from the West itself. It is customary for well-to-do farmers to advance their surplus to their neighbors to enable them to improve their farms. It is a favorite sophistry to divide the country into the East and West and represent the former as the landlord and creditor of the latter. If the sources of the money that is loaned were as well understood and visible as the recorded securities given for it, it would be found that the loaners are as hard working and deserving people as the loanees. On the other hand, the borrowers, as a rule are benefited by and have the constant use of the amounts borrowed. The amount of the loan goes to increase the value of the landed security, and the development of the West is due to the sums advanced on the land and used for its improvement.

The rate of interest gradually lowers as the country improves and the country improves as capital and labor develop it. In many of the Western States the increase in the assessed value of the land has more than paid both the principal and interest of the loans which insured its development.

THERE IS SOME demand made in the press that the Secretary of the Treasury shall withdraw from the National Bank Depositories the deposits of public moneys now made with them. We think this would be a most unwise course to pursue. It will be time enough to withdraw these moneys from circulation when the Secretary can find a way to dispose of the portion of the surplus he has in the Treasury. The moneys with the banks are in circulation. They are available for loans to the business community. The moneys in the Treasury and Sub-Treasuries are locked up and useless and reduce the available currency of the country by just so much. These last moneys only come out as bonds are purchased, and bond purchases have not been, up to the present time, a very great success except in increasing the price of bonds. The surplus, however great, would cease to trouble the country if it were all deposited on good security with the banks. There would then be no withdrawal from the currents of business circulation. The rate of interest would be reduced as the surplus of the Government supplemented the surplus of citizens in the vaults of the banks. As to security, the Government would have its own bonds which in case of default could be bid in. The sensible way to dispose of the surplus is to deposit it with the banks of the country on good security.

THE AMERICAN BANKERS' ASSOCIATION which met at Cincinnati on October 3d and 4th has had an interesting history and a useful existence. The first steps toward effecting its organization were taken at Saratoga in 1875. It had long been felt that there was a necessity to have some organization that would bring the banks and bankers of the country together, secure some uniformity of action, and derive practical benefit from personal acquaintance and the discussion of subjects of importance to the banking and commercial interests of the country. No class of men have a better opportunity to study the course of trade and commerce and give valuable opinions and advice in all times of financial danger. There is, however, no class of men who as individuals are more conservative and self-reliant and who, unless some effort is made toward organization among them, are more apt to work counter to each other's interests and consequently to the general interests of the community. Almost from the very beginning of the United States as a Nation the business of the country has been carried on with the assistance of banks, and, in times of financial panic and disaster, the condition of things was often made worse by the distrust and opposition which was apt to prevail among bankers. There were

sectional jealousies and local pride that often prevented co-operation when co-operation would have saved many losses both to the banks and their customers. The want of this co-operation was from time to time felt in the eighty odd years preceding the organization of the American Bankers' Association, and, as pressure occurred, attempts were made to bring about a similar union of interests. In 1813 under the pressure of the financial wants of the Government caused by the war of 1812, Secretary of the Treasury Dallas attempted in vain to unite the State banks of the country. After the great panic of May, 1837, some of the prominent banks in New York city aided by a few banks in Philadelphia and other large cities issued a notice for a convention to be held on April 11, 1838, in New York city, and on that date 158 bank delegates, representing banks in eighteen States, met in that city to take action as to the currency and the resumption of specie payments. The result of these deliberations was a vote to resume in January, 1839. In 1865, soon after the establishment of the National banking system, a second convention of bankers was held in New York city. It was largely attended by National bank delegates but did not attract the entire banking interest. The meeting of bankers at Saratoga in 1875, out of which grew the present association was largely attended, and a committee was appointed to draw up a constitution and by-laws for the permanent organization of the American Bankers' Association which was finally completed at Philadelphia in the Centennial year. The Association is composed of National, State, and private bankers, together with Trust companies and Savings banks, and from its organization it has watched over the financial legislation of the country. It is often charged, for political effect, that the banks collectively are a body opposed to the interests of the people—that their object is to take toll of every industry, and that they fatten on the toil of others. The same accusation can as justly be made of every trade and industry that brings the products of the soil and the raw material of the mine and forest to their final consumption. The transportation and manufacture of raw material and agricultural products, can never be complete without provision for change of ownership as well as of place and form; and while railroads may transport and labor transform, the vocation of the banker is to aid in the free transfer of ownership, without which neither transportation or manufacture or even the production or preparation of raw material can go on. The change and division of title is the most important factor in modern progress, and this, the business of banks accomplishes at a rate that makes possible the wonderful material developments of this age. The prosperity of banks is so interwoven with the prosperity of all other business interests that it is absurd to talk as if the banker was in opposition to the rest of mankind. The American Bankers' Association has always taken a non-partisan position, and discusses financial questions from an economic standpoint. The conventions

have always been of great use in drawing the members together, in making them acquainted with each other and facilitating business. The effect of the association has been to secure and maintain wise and just financial laws, and to prevent wide-spread financial convulsions through the greater reliance banks and bankers have in each other. In England, there is a similar association called the Institute of Bankers which discusses banking topics both of a legal and practical character.

A full report of the proceedings of the recent Convention held at Cincinnati will be published in the next number of the JOURNAL.

WESTERN FARM MORTGAGES are in many sections of the country, more especially the New England States, a favorite investment for investors. Savings banks are probably the largest holders of these securities and for two reasons: First, they are supposed to be absolutely safe—that is, the land upon which these mortgages are given is worth much more than the amount loaned—and, secondly, the rate of interest agreed to be paid being so much in excess of that in the Eastern States it has enabled the banks investing in them to return a larger per cent. to their depositors. While there is at present no reason to distrust the value of these securities or the sincerity of the parties offering or investing in them, it would seem, according to the annual reports of the Bank Commissioners of New Hampshire and Vermont, that the amount of money deposited in the savings banks in those States which is invested in Western farm mortgages has assumed such proportions as not only to attract attention but to raise the question as to the expediency of continuing the practice on the same scale.

In both New Hampshire and Vermont a number of Investment companies have been organized, the sole object of which is to encourage investment in Western securities. These operate independently of the savings banks, and the result is that a large portion of the surplus money of New England is to-day represented by mortgages on Western farms. Of course as long as business is good and the farmer is prosperous and the interest is promptly paid, all will be well. But should a season of adversity come with interest and principal both falling due, there would be only one alternative and that, to take the land. The Commissioners openly state that to "no inconsiderable extent Eastern capital is used to boom Western localities, and money is not loaned on the intrinsic value of the property but on its prospective increase." It is easy to understand what the result would be should such a contingency ever arise. As showing the confidence in such investments the Commissioners give figures proving that not far from *forty per cent.* of the whole amount deposited in the savings banks of their respective States has been loaned in the Western States. How much is represented by the various loan and investment companies

cannot be definitely stated for the reason they are not under State supervision. And that is the weak point of the whole matter. The Commissioners express themselves very strongly on this subject and recommend the passage of a law similar to that in Connecticut which would subject all Western investment agencies to examination and license, and thus do much toward driving out irresponsible parties and placing the Western investment business upon a stable basis.

While we are not alarmists it is well for those entrusted with the investment of money for others to call a halt. As the Hon. Carroll S. Page, Inspector of Finance for the State of Vermont tersely puts it: "Whatever may be claimed in-behalf of Western mortgages, the time has certainly come when we should apply to this matter the homely maxim which teaches that we should not put too many eggs in one basket."

A CINCINNATI NEWSPAPER is authority for the statement that the rivalry between the local banks in that city to capture depositors is so great that, it is known that one or more are really thinking of adopting the plan in vogue in certain theatres, of giving away souvenirs as an inducement. It seems a little out of the ordinary line of banking to resort to such unusual methods to secure patronage. Surely the old-time bankers would not sleep quietly in their graves if they knew such things were being done—so entirely antagonistic to that idea of conservatism which is the only sure foundation of all sound banking. Seriously, there is too much of the chromo business practised by bankers now-a-days, in the struggle to outdo each other in securing deposits upon which to build big dividends. Whether this is caused by the increase in banking institutions as the result of rapid accumulation of money and low rate of interest to be obtained in other classes of business, or, whether it is because banking is gradually lowering its high standard to the level of ordinary business methods, is a question which need not now be discussed. The fact however, remains, that in the long run those banks are the most prosperous which win the confidence of their patrons and the general public by conservatism rather than by purchase. It is now generally conceded that if a bank is financially strong and well-equipped to extend its business, the best way to go about it is to state the facts in a business-like fashion in an advertisement and then be sure that it is published in a journal of recognized character and influence. That is an index to conservatism and good management.

WHEN A BANK is managed by men of secretive tendencies it is usually true that some part of the bank's assets are not up to the mark. It will be remembered that the Bank Examiners had considerable trouble in getting at the exact condition of both the Fidelity and Metropolitan National Banks of Cincinnati, during several examina-

tions prior to their collapse. Recently the Receiver of the defunct Metropolitan filed several suits in order to recover, if possible, the various amounts due. An asset, amounting to many thousand dollars, was a number of notes against the "American and European Investment Company," a concern which, according to a local paper, was "a sort of wind corporation—whose borrowings from the bank helped to wreck it." Other notes, among the assets, were of a like doubtful character, including seven against the Receiver of a Building Association. When the money of confiding depositors is loaned upon such securities is it any wonder that the managers put on a bold front and make all sorts of claims as to the value of the bank's assets to deceive the Bank Examiners and the public ?

There seems to be only one remedy for this condition of things. First, put efficient National bank Examiners in charge of smaller districts in order that they can devote more time to their work. As it is now, in many sections it is a physical impossibility for the Examiner to do more than go over the books in a superficial manner. The same holds true as regards the supervision of banks under State control. Then, in addition to the regular official statements let the law be so amended that not only the few items of assets shall be reported but their nature and quality as well. Depositors have a right to this information and if all is right no harm can come of it. Banks managed by men of the non-secretive kind would welcome such a change, while those who strive to hide their business under a bushel would be more promptly discovered and in some cases the shock of disaster would be averted.

A WOMAN was recently arrested in Indiana for defacing and raising money. The plan was very old and very simple. One dollar United States silver certificates were the base of the scheme. A common segar box stamp was next obtained, the figure "O" cut out and, by ingeniously pasting it on the aforesaid note with the white of an egg, the one dollar piece of deformed paper was instantly transformed into a fair-appearing ten dollar bill. Several of them were readily passed before detection. It is alleged that this species of counterfeiting has been going on for a long time. It is certainly an easy way of making a living, and but for the shabby quality of the paper money now in circulation could not be so successfully practiced.

There is only one remedy for this easy way of counterfeiting and altering the currency of the country. First, reform the Bureau of Engraving and Printing so that something better than segar-box work shall be turned out and then, secondly, as before advocated by the JOURNAL, abolish the steam and give us the old-fashioned hand-press work. Conservatism is not always popular but it is infinitely safer than too much steam.

A TAXATION SCHEME.

Editor Rhodes' Journal of Banking:

BUFFALO, N. Y., Sept. 17, 1888.

SIR:—I remember that sometime during the last session of the New York Legislature a bill was introduced by Mr. Brundage, of Steuben County, which proposed to adopt the plan of listing mortgages and all other personal property as well, with the view of increasing the available sources of State revenue. What ever became of the Bill—of course I know it was not passed—and what would be the possible effect in case such a law should be enacted? As the Hon. Bradford Rhodes, Editor of the JOURNAL was a member of the last Legislature and also of the Banking Committee, and was interested in all matters which came up pertaining to banking and finance, I thought that you could throw some additional light on the subject. If not too much trouble will you state just what there is in it and how banks—Savings banks especially—would be affected?

SUBSCRIBER.

Answer.—The following figures will show what would be the effect of the so-called "Brundage Tax Bill" in case it were a law in New York State:

Mortgages held by New York Savings Banks Jan. 1, 1888	\$194,000,000.
Mortgages held by Life Insurance Companies Jan. 1, 1888	113,400,000.
Mortgages held by Fire Insurance Companies Jan. 1, 1888	7,000,000.
	\$314,400,000

The average size of each mortgage held by the Savings banks is about \$2,800, showing that they are given as a rule by people who are comparatively poor. The tax on these mortgages would certainly fall on the borrowers which would surely be a great hardship. On January 1, 1888, 135,000 persons in the State of New York had mortgaged their property to the Savings banks, Life, and Fire Insurance Companies, and it is estimated that 150,000 farmers and others not represented in the lists of mortgages held by the Savings banks and Insurance Companies have borrowed money on their property, making a total of 285,000 different people in this State who owe money on their houses and lands.

It is a rule which cannot be denied that the man of means as well as corporations can always dictate terms to the borrower, and with a law in operation, such as Mr. Brundage proposes, the burden would inevitably fall upon the borrowers or else the money would not be loaned here but go to other localities.

Proof: Connecticut began the plan of listing mortgages and other personal property in 1855. In that year the proportion of such property in that State was 10 per cent. of the whole. In 1875 it was a little over 5 per cent., and in 1885 between 3 and 4 per cent. The experience in Massachusetts is in the same direction. In 1884 the Legislature of that State became convinced that property was not created by the execution of a mortgage and the law was changed; and it is a noteworthy fact that this change was followed by an immediate decline in Boston and vicinity in rates of interest on real estate mortgage loans to the extent of about $1\frac{1}{2}$ per cent. less than before.

As to the final fate of the Brundage Bill—it was favorably reported by the Ways and Means Committee, sent back to the Committee for amendment, reported favorably again and finally, on motion of Hon. Bradford Rhodes, the enacting clause was stricken out, which killed the measure for the present at least.

BANKING AND THE SOCIAL SYSTEM.

NATIONAL BANKS FROM AN ECONOMIC STANDPOINT.

A series of discussions or, more properly, conferences has been in progress in Chicago during the past summer, tending to show the intimate relations existing between banking and the Social System, or the relations which business men and bankers sustain to the working classes. Of course the objective point of these conferences is, to endeavor by proper illustration and argument to unite or, at least, bring the two classes more closely together. At one of these conferences, Mr. LYMAN J. GAGE, Vice-President of the First National Bank of Chicago, delivered an address which is not only interesting but forcible; and, as showing the importance of perpetuating National banks as a powerful social factor, is one of the strongest arguments in favor of the system that has thus far been presented. Through the courtesy of Mr. Gage we reproduce that portion of his remarks which is of the most interest to the JOURNAL's readers:

In giving a brief description of the organization and operations of a bank, I shall confine my description to National banks alone. This for two reasons.

First, Because whatever may be said of them may be applied in a general way to all banks; and,

Second, Because National banks have been held forth especially by portions of the public press and by platform orators as injurious monopolies. The many adjectives used in so describing them I will not repeat.

If any bank is an injurious monopoly, then National banks are so; and if they deserve such a characterization, they ought to be wound up and forbidden to prosecute their injurious vocation. Do they deserve it? Let us see. A National bank may be organized by any number of citizens, not less than five, in any place in the United States. There are certain restrictions as to capital. Thus, no bank can be organized with less than fifty thousand dollars in capital, and in certain cities they must have more, reference being in general had to the population of the village or city where such organization is proposed. The number of these organizations is nowhere limited or restricted—fifty or five hundred, so far as legal restriction is concerned, may be organized in Chicago within the next year—and the laws controlling their action are made, and may at any time be amended by the representatives of the people in Congress assembled. The officers, Directors and shareholders are held to a strict accountability; and the number of bank officers now in prison, or in Canada, (by many regarded as another name for the same place), is good evidence that the laws are enforced.

A monopoly is described in the dictionary as the sole power to vend goods: a power either coming as a free grant from a government or secured by purchase. How can this word, so defined, be applied to a bank? But possibly, though not justly chargeable with monopoly, in a legal sense, they may exercise such powers as to practically bring them within the fair meaning of that word, giving it a little broader definition. What are their powers, and what are their practices?

First, as to their powers: They may deposit with the government of the United States bonds to the amount of their capital, and issue their own notes to circulate as money to the amount of ninety per cent. of the bonds so deposited. For this privilege they pay a tax into the National treasury of one per cent. per annum on the average of their notes outstanding. The small value of this privilege may be inferred from the fact that Chicago banks with a right to issue over fourteen millions of dollars in such notes have outstanding less than one million dollars. The National banks of the country, as a whole, with a right to issue about five hundred millions of such notes have outstanding only about one hundred and sixty-six millions.

Second: They have power to receive deposits of money, but no power to compel any man to deposit a penny.

Third: They have the power to lend money, but are forbidden by the law to loan any one person, firm or corporation, at any one period, more than ten per cent. of their capital. They are likewise forbidden to charge or receive a greater rate of interest than the law of the State allows its own citizens to charge or receive where the bank is located.

Fourth: They have power to sue and be sued in the courts the same as an individual.

Fifth: They may buy and sell exchange on other cities.

Sixth: They may hold real estate, for office purposes, or such as they may take in the settlement of debts previously contracted, but such real estate, so received in the settlement of debts, must not be carried longer than five years.

This, in substance, embraces all their power and privileges. It is evident from the enumeration that they can do no business unless the people in the community in which the bank is located desire it. Like a hotel or a boarding house, they may build and furnish and open their doors, but they cannot compel any one to come in. With no power of compulsion, subject to full and energetic competition, what kind of an imagination is it that finds in them anything which partakes in any way of the character of a monopoly? And why should they be called by the opprobrious name of monopolist?

We have glanced at the laws under which National banks are created and the general powers conferred upon them. Let us now look at their practical operation, and see if we can discern in their practices anything injurious to the general good. As before stated, they cannot compel patronage from any one, and so far as they do have relations with the people, it must be by the voluntary wish of the people themselves. There are over three thousand National banks in the United States, one or more being found in every village of considerable size throughout the land. As a whole, their capital aggregates five hundred and seventy-eight millions. This is a large amount, but they owe to the people, who voluntarily place their money on deposit with these banks, one thousand two hundred and forty millions. The depositors as a whole could buy the banks as a whole twice over, and have money left. What advantages do these depositors derive? In many cases, they receive a small interest on their monies, which would otherwise be idle and unproductive. In all cases, they transfer their funds from their own custody to a place of greater average security. By the check system in vogue, they are at all times able to transfer their money, in sums to suit, by orders on the bank, instead of by an actual transfer of the money itself. The keeping of a bank account also brings the depositor into acquaintance with his banker, and gives him superior claims upon the banker's regard, should he require to borrow for the temporary needs of his business or other purposes. The amount loaned by National banks to their dealers, and to the public, as shown by the statements published in October last, was one thousand five hundred and eighty-seven millions. The value of these temporary loans to merchants, manufacturers, agriculturists, and, indeed to the whole community cannot be estimated. The employes of many manufacturers, who each week with perfect regularity, receive their weekly pay, little know how often they would go home with an anxious mind and an empty pocket had not the employer found his banker ready and willing to make necessary advances to make up the weekly pay-roll.

A bank has been, not unaptly, compared to a reservoir, into which flow the temporarily unused funds of the community. Out from it, if judiciously conducted, a portion is sent in productive streams, to enrich the channels of trade and industry.

There are two ways in which the operatives at Glasgow might obtain American flour. They might put their money together, entrust it to a capable agent, and send him with it across the Atlantic, and thence across the country which separates the Atlantic from the mills at Minneapolis or Chicago, and there lay down their money, obtain their flour, and transport it to their homes in Glasgow by such means as they could command. In the days of the patriarchs this would have been their method. So Jacob did when he sent his sons into Egypt to buy corn; but thanks to the developments in commerce, and the creation of intermediate agencies, a more convenient, economical and safer method now prevails. When the operative at Glasgow wants flour, he simply goes to his grocer, secures the needed quantity, and has the value of

it entered to his debit on a week or a month's credit. His grocer, in his turn, gets flour from the jobber or wholesale dealer, on a credit of 90 or 60 days. But the latter does not send his money across the Atlantic. Instead of this, he sends a mail or telegraphic order to his broker in Chicago or Minneapolis, indicating the amount of flour he desires. The broker buys the commodity of the miller, who delivers the flour to the transportation company, and receives what is called a negotiable bill of lading. This instrument is merely a contract that, for a certain consideration, the company will transport the flour to Glasgow, and there deliver it to who ever may be the legal holder of the bill of lading. This instrument the miller delivers to the broker, and receives payment for his flour in the form of a check upon the bank, where, quite possibly, the broker has no money to his credit. To cover his check, so drawn, the broker hurries to the bank, draws his draft, generally at sixty days' sight, upon the jobber in Glasgow, for the value of the flour, with the addition of his small charges. To the draft he attaches the bill of lading, and thus secured in the control of the property, the banker puts to the credit of the broker the equivalent of the draft, and thus is provided a fund for the payment of the broker's check. The transaction is now so far advanced, that the flour is safely on its way to the consumer in Glasgow, and at this point the banker would seem to be the only one who is out of pocket as to money. If the matter went along to its natural conclusion, the flour would reach its destination, the draft drawn against it be duly paid to the banker in Glasgow or London for the credit and use of the American banker. How then, will the American banker recover back the fund which, it is thus seen, he has transferred from his own strong box to the keeping of the English bank? By a very simple method, as you will see. While this operation, the purchase and shipment of the flour, has been going on, another, but quite similar operation has occurred from the other side. The American millers have been receiving burlaps and bags from manufacturers in Scotland. Desiring to pay for these, they apply to the American banker, who, for the cash, will give them his draft or order against the funds to his credit in the English or Scotch bank, resulting from the draft or bill collected against the flour; and so the American banker has his fund in hand again. The flour is settled for, the burlaps are paid for, and all are satisfied. No money has passed between the two countries. The operation described is, in effect, an indirect exchange of commodities—flour for burlaps. The intervention of the banker and the use of bills of exchange alone make this possible. This illustration fairly shows how the great traffic between nations is carried on. With imports to the value of seven hundred millions or more, and exports to a similar amount, not more than five to eight per cent. of the whole is settled for by direct shipments of money. The great bulk is settled in the way we have described the example of the flour and the burlaps.

Surely this is a great service. It is, in substance, as if the banker stood midway between the two countries, passing in with one hand the products of foreign skill, and passing out with the other hand, in fair exchange, the products of American industry. For this service, his charge for profit, competition has reduced to an insignificant sum. His charge for profit applied to a barrel of flour, would be about one and one-quarter cents per barrel. Let me give you one or two instances taken from real transactions, which will illustrate better than argument can some of the offices and functions of a bank, and the celerity of modern methods as well. Some time ago a banker was notified that he was wanted at the telephone. With the 'phone to his ear he recognized the voice of a dealer four miles distant, who said: "It is very important that I pay to-day to Messrs. Blank, Number Blank, Union Building, London, fifty-eight hundred pounds sterling. Can it be done?" The banker's reply was, "Yea, if the cable is working; I will attend to it at once. Send in your check before close of bank." Within two hours the payment was made in London. Not long since, a Chicago dealer appeared in the bank with a cablegram in his hand. It came from a correspondent in Smyrna, Asia. It brought information that owing to fear of a war blockade a consignment of certain goods was offered for immediate cash at a very low price. By the bank's facilities the matter was arranged, and within twelve hours the cargo was paid for, duly loaded, and on its way to America. Curiously enough it was a cargo of canary seed. But if the bank or the banker is so important in our foreign trade, he is immensely more so in our home affairs, where the volume of industrial exchanges is many times greater. The mind can hardly take in and comprehend the great office served by bank checks in the purchase and sale of

industrial products in the United States. The daily reports of the Clearing-Houses of the principal cities show that daily transactions covered by checks drawn upon banks aggregate about one hundred and sixty millions of dollars per day. The total supply of money in the country is less than sixteen hundred millions, including gold, greenbacks, National bank notes, silver and silver certificates. If commercial transactions were carried by the use of money alone, an amount very much larger than our total present supply would be constantly in transit at enormous expense and great risk, or, the stock of money remaining the same, the price of commodities and labor would shrink to a degree that no man can estimate, in order to be exchanged against direct cash payments. At least eighty-five per cent. of all commercial payments are now made with checks and drafts.

In the course of the exchanges hinted at rather than fully described, it is the function of the banker to make payment for industrial products at the point of production, or at the point where they are first offered for sale, in ready cash, and to get his re-imbursement from the final market or point of consumption. To illustrate: The value of live animals annually marketed at the Union Stock Yards in Chicago is not far from two hundred millions. All are paid for by check on the bank as fast as weighed. The larger part, as you know, go forward to other markets, either immediately or after being converted into cured meats. In the final markets throughout the East, the banker realizes the fund he has here advanced. The same method is in vogue regarding all agricultural products here marketed. This service of the banker is surely a great advantage to the Western farmer, unless too dearly secured. What is the banker's charge for making these cash payments here and taking his reimbursement three days later in New York, Baltimore, Boston or Philadelphia? About fifty cents on each one thousand dollars is the average charge.

I might speak of the honorable character of an office and duty so high and important as we have seen rest upon the banker. I might also show in many other ways the benefit he confers upon the community, a benefit not conferred upon the rich and prosperous class alone, but shared in by the humblest member of our industrial society. If the suggestions I have made go to show that he fills a necessary and useful place in the social and economical system my object is attained. I should not like to attempt to prove that he is, by the nature of his calling, a disinterested philanthropist. "Favor and benevolence are not the attributes of sound banking; the rigid performance of contracts is its sure foundation." The banker is the natural result of the unfolding and development of the modern social state. In this unfolding the division of labor has been a marked feature, and in this process of division, the banker, the broker, and the insurance office, have been indispensable factors. To try to eliminate them would be a folly as great as to dis sever from the human body any one of its useful members.

The Treasury Department in Morocco.—The Italian traveller, De Amicis, publishes a readable account of the Treasury Department in Morocco under the Sultan of that fortunate country. "Within the palace of the Sultan," says the traveller, "there is another palace built of stone. It receives light from above and is surrounded by three lines of walls. After entering through an iron door, you find yourself in front of another one, and after that another. At the end of these three doors there is a corridor, low and dark, where lights are necessary. The pavement is black marble. The walls and ceiling are also black. At the end of the corridor there is a large hall, in the centre of which there is an opening that gives access to a subterranean passage or pit, into which three hundred negroes shovel four times a year the gold and silver that the Sultan sends there. His majesty himself superintends the operation. Around the hall there are ten earthen vases containing the heads of ten slaves detected in attempts to steal. The negroes employed in this palace are now shut in there for their lives. Under Muley Soliman the heads of all these employes used to be cut off when the money was shovelled in. But this style of rotation in office was abandoned some years ago." The traveler does not inform us whether there are any civil service rules and regulations in that far-away land. Doubtless the Sultan's assistants are not required to pass a very rigid examination in economics!

* BANK BOOK-KEEPING.

A TREATISE ON KEEPING AND AUDITING THE BOOKS OF STATE AND NATIONAL BANKS, PRIVATE BANKING FIRMS, SAVINGS INSTITUTIONS, FINANCIAL AGENTS, ETC.

Prepared for the JOURNAL by an experienced Bank Accountant.

LOANS AND DISCOUNTS (*Concluded*).

"I observe Mr. Payson," remarked the much-interested Mr. Brown as he observed with the most considerate attention all the details in the workings of the bank, as explained by the painstaking Cashier, "that there are a number of persons in the town who are doing quite a business with us in the line of discounting; and, also, I see the name of some of these as endorsers on paper discounted for other people. I do not wish to question the soundness of any one in particular, but I would like to ask if you are able to ascertain just how much paper we hold for which any certain person is responsible?"

"I think I am, Mr. Brown. Will you name some one of the several such persons you have in mind and we will see if I am not in a position to answer the question. Any one you may think of, it's immaterial who."

"Well, how about Mr. William Jones? We all know he's perfectly good."

"Yes, sir, he is good, I believe, and I can tell you precisely how much paper we hold upon which he is liable as principal or endorser. I have here a Liability Ledger and in it is an account, or rather a statement, showing the desired information. The account of Mr. William Jones is on page 13. Turning to this page we see at once, and without calculation, that this customer is liable for paper to the amount of \$2,500."

"And is this book, or another one like it, in general use among banks and bankers?"

"I cannot say that such a book is in general use. It is a book quite extensively used, I am sure, but there are many banks I know where nothing of the kind can be found. It requires some time to keep this book properly written up, and it is not a necessity, nor is it in any manner connected with the regular account books of a bank, but it affords me sufficient satisfaction so that I feel well paid for the little time expended upon it. The *first* column, as you see, is for the 'date' of the paper discounted; *second*, the 'time' it is to run; *third*, the date 'when due'; *fourth*, the 'number'; *fifth*, name of 'payor'; *sixth*, date 'when paid'; *seventh*, is the 'account'; that is, debit and credit columns showing amounts for which the accountee is liable and the payments in liquidation of the same; *eighth*, 'balance as payor,' wherein the last item is the amount for which the accountee is responsible; and, *ninth*, 'securities' deposited or endorsers of the paper. There are other forms

* A series of papers on Practical Bank Book-keeping: will be continued through the year 1888, or until the subject is exhausted. When required the articles will be illustrated by photo-engraved plates made from pen drawings, showing some new ideas in blank books, and other labor-saving forms.

LIABILITY LEDGER.—Account of William Jones.

DATE.	TIME.	WHEN DUE.	No.	PAYOR.	WHEN PAID.	AS PAYOR.		BALANCE AS PAYOR.	SECURITIES.
						Dr.	Cr.		
Jan. 1	30 d	Feb. 3	720	P. Smith	..	1,000		1,000	W. Cool.
" 15	30 d	" 17	741	J. Ring	..	2,000		3,000	U.S. 3½%, \$2,000.
" 17	60 d	Feb. 21	765	P. Long	Feb. 20	1,500		3,500	T. Brown.
"	768	P. Smith	Feb. 3		1,000	2,500

than this for the purpose, but so long as the necessary data are preserved and so kept as to be seen at a glance and at any time, the particular ruling of the book, I consider of little consequence."

COLLECTIONS.

"Our business in the line of collections is not extensive, Mr. Payson, though I have noticed that it has been increasing quite a good deal during the past month. You have apparently endeavored to foster that branch of the business, I should imagine."

"Indeed, Mr. Brown, I do look upon the business of collections as one of the very important functions of our institution. I have taken a special interest in this line of work, and as a result the business has increased. The charges for making collections seem small. They are, in fact, of little consideration to the person for whom the business is done. But the collection account at the end of the month is an evidence that it pays well to encourage this part of the service. The items are small, and yet they amount to enough each month to go far towards covering the expenses of the bank."

"And besides there is another advantage to be taken into account, is there not, though it is one which does not appear very distinctly in the profit and loss account? I refer to the use of the money, Mr. Payson."

"That is, of course, an item for consideration. Not so in every case, however, for we many times pay out the money the same day it is received. Where we receive collections for out of town or foreign customers, and we remit our draft on Checkton, it often happens that a number of days will elapse before the order is charged up to our account. From an estimate I have made covering a period of three months the amount kept to our credit from the collection business has been equivalent to the use of \$10,000."

"I see you keep two Collection Registers, Mr. Payson, and you recommend that plan, I presume, in preference to combining all that kind of business in one book?"

"The City and Foreign Collection Registers should, I think, be two distinct books. I

have found, even in a small business, such a plan to be the best, and as the business increases there is still more need for it. I may say here, Mr. Brown, that there is often a tendency to unnecessary elaboration in the manufacture of bank book-keeping books. I have noticed that so simple a form as is required for a Collection Register, is often made to occupy the double pages of super-royal paper; that is, extending across the two pages of the book instead of being confined to one such page. Here is my Foreign Collection Register. You see there are just ten independent items of information presented in its pages, and these are:

- 1.—Date upon which the paper was received.
- 2.—The payor.
- 3.—The owner or remitter.
- 4.—Residence of the owner or remitter.
- 5.—Date of the paper.
- 6.—The time expressed on the paper.
- 7.—The interest.
- 8.—Our number.
- 9.—Amount, (face value of the paper).
- 10.—Remarks.

Foreign Collection Register.

DATE RECEIVED.		PAYOR.	OWNER.	RESIDENCE.	DATE.	TIME.	INTER-EST.		OUR NO.	AM'T.	REMARKS.
June	1	S. Lewis . . .	A. E. Baker.	Salem ..	June 3	60 ds	6	41	75	550	
....	2	J. L. McLane.	S. H. Dent..	Fulton.. 3	90 ds	12	33	76	740	
....	2	J. C. Nesbit..	F. N. Chick.	Clinton.. 3	30 ds	1	37	77	125	

It is customary with some to try and make the register supply a much greater variety of information such, for instance, as the correspondent's instructions, the number placed on the paper by the correspondent, etc., but I think much of such data is unnecessary and by being placed on the record makes the book cumbersome and occupies time that may be more profitably expended on other books. These collections remain in our hands until they are collected or returned to our correspondent, and we have also the communication with which they came enclosed. In case of doubt about any of these minor data we would naturally seek the original information which would be either the letter or the paper."

"Then the Collection Register contains a record of paper brought in by our customers to be sent out for collection as well as that received from our correspondents, or those at a distance upon which we are to collect and remit, or report, as the case may be. Am I correct in that, Mr. Payson?"

"You are correct, Mr. Brown, so far as our own method goes. I do not say, however, but that the plan might not be improved by classifying paper coming to us for this purpose so that collections entrusted to us by our customers, and others who reside in the place, should be recorded in a book separately from paper received from out of town correspondents. But I would not suggest such a plan for an institution where the collection business

is not especially large. It would not be an advantage to us. I have found that the two books—one for domestic or city collections, and one for out of town or foreign collections—answer all purposes. My plan in the treatment of collection paper is this: When the paper is brought in, or as soon as received through the mail, I enter it directly in the one or the other of the two registers according to its destination. I do not however, consider sight drafts as belonging to this class of paper. They are sent out at once and if not paid are returned or held according to instructions received with them. After making the entry in the Register I turn directly to the Tickler and make the record there under the date upon which the paper falls due. When payment is made, the transaction is noted in the Tickler and the proper credit made to the customer or correspondent, or the remittance is made according to the nature of the case. With sight drafts received for collection, I use the letter, enclosing it as the original entry, noting thereon the fact that the paper was presented to the person on whom it was drawn, when presented, and the facts as to what followed—whether the paper was paid and remitted for or credited up to account. A copy of the remittance sheet which is retained gives the information as to the disposition when thus made. This, I believe, covers everything of importance connected with the routine in the treatment of collections." Here is the form for notices to be used in presenting and collecting notes or drafts; also, on the back of the notices, are the instructions or information for the payee:

To *W. B. Smith.*

Your *Note to H. C. Wright.*

Due *July 10.*

At *Farmers' Bank.*

Amount *\$750.*

INSTRUCTIONS AND REQUEST.

The paper referred to may be accepted or paid at the bank as required.

If there are reasons for refusing to accept or to make payment, please note the same hereon and return this notice to us.

If we do not hear from you on or before we will be obliged to return the paper referred to or take such action as instructions indicate.

(To be Continued.)

**Notes and Comments on
BANKING PRACTICE.**

**SOME NEW IDEAS ON HOW TO CONDUCT A BANK WITH SUGGESTIONS AND HINTS
REGARDING THE OLD METHODS.**

Written for RHODES' JOURNAL OF BANKING by a Bank officer—supplemented by
occasional contributions from others who are interested in the subject.

The Absent Clerk.—There is no more common occurrence in a bank than for some one of the force to be absent from his post for a longer or shorter period. Such absences may occur from various causes, and when properly provided for they should not cause any disarrangement in the work of the bank. In the first place it is always to be settled beforehand who is to do the work of the absent one so that there may be no confusion from a misunderstanding on that account. A schedule for absentees arranged systematically is also fairer and more satisfactory to all concerned. In the second place the work should be kept so close up that it may be allowed to accumulate for some little time without detriment. If the absence is to be for any length of time a substitute should be put on for it is a poor piece of policy to work men over-time. Late hours are sometimes as bad for the bank as for the clerks. Leaves of absence even for sickness are not always so readily granted as the Board of Directors may imagine. Cashiers are sometimes rather exacting towards those under their authority and occasionally show a lack of consideration which is not to be commended. While, as has been stated, the duties of the clerk who is away should be definitely assigned, at the same time there should be a general disposition to assist and, in that way, (many hands making light work) the deficiency is scarcely noticed. If the absence is occasioned by sickness it is not very considerate to allow the bank work to pile up so that on his return the man will have double duty to perform.

Lost Checks.—It occasionally happens that in balancing a pass-book a check which has been duly passed through the books is missing and cannot be found. The most diligent search fails to reveal any trace of its whereabouts. Old bank clerks can tell curious stories of items that have thus gone astray and, months or, it may be years afterwards have turned up in the most unexpected places. While accidents of this kind are always annoying it is best to face the music at once and have done with it. If the check is lost it is lost and there is no more to be said about it. The proper way is to balance up the book and supply the place of the missing item by a memorandum slip explaining the circumstances of the case. If the depositor objects to this disposition of the matter he will have to be dealt with in the best way practicable. A proper system of filing, however, will do much to reduce these occurrences to a minimum. A place for everything and everything in its place is an excellent maxim to bear in mind in this connection. Promptness in keeping everything filed up to date should always be insisted upon. Pass-books should be balanced with reasonable frequency so that accidents of this kind may be discovered as soon as possible. Delays are dangerous in these as in other

matters. Care should be exercised in the disposition of the waste paper, and it is not going too far to adopt the suggestion made in a former issue of the *JOURNAL*, namely, to throw the waste paper of each day in a big paper bag and mark the date on the outside. Lost items even when no immediate harm ensues are always unfavorable to the bank's reputation for carefulness.

Sending Drafts Direct.—The practice of sending drafts and checks direct to the point of destination is rapidly growing in favor especially among those who prefer promptness and security in the transaction of their business to saving a few pennies in the way of collection charges.

Indeed, the penny wise and pound foolish policy of sending checks from point to point consuming both time and labor has too many disadvantages to be continued as the universal rule. At the first glance, to send every item direct would seem to involve a great addition of labor on the general ledger; but by a change in the system of keeping the accounts the clerical work is in reality lessened. It is a practice with banks sending direct to do away with a formal letter altogether and instead thereof to simply attach to each check or draft a slip bearing the request to remit check for same with the slip attached. By this simple device a great deal of time and work is saved at both ends of the line. The advantage of sending direct is not only the saving of time but the getting one's checks to destination ahead of those who send by the all-the-way-round route. A single day saved in this way may mean all the difference between payment and non-payment.

English Postal Savings Banks.—Mr. Walling, American Consul at Leith, has sent to the State Department at Washington a report on the postal savings bank system in Great Britain. Nearly every money-order Post Office in the kingdom, he says, has a banking attachment. Any person can open an account at any place, the Postmaster making a record of the depositor's name, occupation, and place of residence. Any amount, from 1s. upward, will be accepted, and when the deposit has reached a pound sterling it begins to draw interest at $2\frac{1}{2}$ per cent. a year. Drafts are made by filling out a printed form, which is forwarded without charge to the central office in London, and thence a warrant comes back which the local Postmaster is required to cash. To limit the privileges of the system to the class of citizens for whose benefit it was devised, deposits exceeding £200 cease to draw interest. The public advantage sought in the establishment of these banks is the cultivation of habits of frugality and thrift among the common people, and the convenience which workingmen, commercial travelers and others who have to move about more or less from place to place find, in having what amounts practically to a bank of deposit in every town where they settle down even for a few days. The British system includes also a life insurance and annuity business, which does not, however, attract as much favorable notice as the banking operations. How popular the postal banks have become is shown by their growth in twenty-five years from less than 179,000 accounts of an average value of \$47.50 to more than 3,500,000 accounts of an average value of nearly \$70; and that it has not been an extravagant luxury is proved by the fact that the cost of management amounts to only five-eighths of 1 per cent. a year. Their popularity and exceeding convenience constitute the strongest argument in favor of introducing the system in this country.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

STOCK EXCHANGE MEMBERSHIP—SUSPENSION FOR INSOLVENCY—CONVICTION OF FRAUD—EXPULSION—RIGHT TO RE-INSTATEMENT.

This action was brought by Charles F. Kuehnemundt against James D. Smith, as President of the New York Stock Exchange.

1. To procure an adjudication that the expulsion of the plaintiff from membership in the New York Stock Exchange was null and void; and

2. To obtain an injunction restraining the officers of the exchange from interfering with the exercise by the plaintiff of the privileges of membership.

The plaintiff became a member of the New York Stock Exchange in May, 1877. On October 15, 1878, the firm of Haar & Co., of which the plaintiff was then a member, became insolvent, and in consequence thereof the plaintiff became insolvent, and he notified the President of the New York Stock Exchange that he was unable to meet his engagements.

In such a case the constitution of the New York Stock Exchange, among other things provided as follows, *viz.*:

“Article XIV. Sec. 1. Any member who fails to comply with his contracts, or becomes insolvent, shall be suspended until he has settled with his creditors. Such member shall immediately inform the President, in writing, that he is unable to meet his engagements; and it shall be the duty of the presiding officer thereupon to give notice, from the chair, of the suspension of such member. The Secretary shall record the failure of such member in a book kept for that purpose.”

The constitution also provided, in substance, that a suspended member might apply to the committee on admissions for readmission as a member on showing that he had settled with all his creditors, within a year from the time of his suspension, or such further time as the Governing Committee might grant him for that purpose.

It also provided that if a suspended member should fail to make a settlement with his creditors within one year from the time of his suspension, or an extension of his time to make such settlement, his membership shall be disposed of by the committee on admissions, and the proceeds thereof paid *pro rata* to his creditors, members of the Exchange.

In pursuance of these provisions the plaintiff was duly suspended and due notice of his suspension was given. More than a year had elapsed since such suspension, and the plaintiff had not settled with his creditors or had his time for that purpose extended, nor did he apply for readmission as a member of the Exchange.

In view of these facts, which were conceded by the plaintiff, a motion was made at the trial, at the close of the plaintiff's case, for a dismissal of the complaint on the authority of Sewell *vs.* Ives, decided by Sedgwick, *C. J.*, and reported in full in Dos Passos on Stock Brokers, p. 47.

The plaintiff thereupon withdrew so much of his prayer for relief as sought an injunction, and stated that all he asked was that it should be adjudged that his expulsion was null and void.

Held. In Sewell *vs.* Ives the complaint was drawn in precisely the same terms as contained in that in the case at bar. It was held that the expulsion

* All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL's Law Department as early as obtainable.

Attention is also directed to the “Law Notes and Comments” and “Replies to Law and Banking Questions,” which are included in this Department.

was void because the vote resulting in a conviction was not passed by the requisite majority. Nevertheless, it was held that inasmuch as it appeared (as it appears in this case) that the plaintiff, prior to his expulsion, had been suspended for insolvency and had failed to take the necessary steps entitling him to a reinstatement under the provisions of the constitution of the New York Stock Exchange, he was not entitled to injunctive relief.

That case is precisely in point, and it was in view of the decision delivered in that case that the plaintiff here withdrew his application for an injunction.

I cannot see that by this withdrawal the plaintiff has in any wise bettered his position. What he now asks is that this Court should simply declare that his expulsion was null and void. Courts of justice do not sit for the purpose of making declarations on abstract questions of right. They exist for the purpose of determining actual controversies by a judgment capable of being enforced (*McCabe vs. Emmons*, 51 N. Y. Superior Court, 225; *Platt vs. Jones*, 49 *id.*, 279, *aff'd* 96 N. Y., 24.)

Moreover, upon all the facts disclosed, it appears that the expulsion of the plaintiff is not open to legal objection. On becoming a member of the New York Stock Exchange, the plaintiff agreed to be bound by the constitution of the Exchange, and that constitution provides the cases in which, and the general method by which, a member may be expelled. The plaintiff therefore was not entitled to a trial conducted in accordance with the rules which govern the proceedings of the regular Courts of the land, but only to a trial prescribed by the constitution to which he voluntarily subscribed. If he had such a trial, he is entitled to nothing more.

On the day after his suspension, the plaintiff appeared before the Committee on Insolvencies of the Exchange, whose duty it was, under the constitution, to investigate every case of insolvency, and he made a statement before this committee of the circumstances under which the failure occurred. The committee reported to the Governing Committee, and thereupon a committee of five was appointed to inquire into all the circumstances attending the failure of Haar & Co. Several persons appeared before this investigating committee and made statements in relation to the transactions of Haar & Co. and the plaintiff, and these statements were taken down by a stenographer. This committee, on October 23, 1878, reported to the Governing Committee, and thereupon the Governing Committee appointed a committee of three to prepare charges and specifications of fraud against the plaintiff and any other member of the Exchange who might be deemed implicated by the testimony taken. This committee of three on October 23, 1878, reported to the Governing Committee a charge of obvious fraud against the plaintiff with four specifications. Thereupon the Governing Committee adopted the following resolution:

"Resolved, That Mr. Kuehnemundt be summoned to appear in his own defense at a special meeting of the Governing Committee, to be held Monday next, at three and a quarter p. m., and that he be furnished with a copy of the foregoing charge and specifications, and be granted permission to examine the testimony in the case, in the Secretary's office."

This charge against the plaintiff was made under the following provision of the constitution of the Stock Exchange:

"Article XX. Members guilty of obvious fraud. Should any member be guilty of obvious fraud, of which the Governing Committee shall be the judge, he shall, upon conviction thereof by a vote of two-thirds of the members of said committee present, be declared by the President to be expelled, and his membership shall escheat to the Exchange."

On the day following the adoption of the resolution referred to, the Secretary of the Exchange sent a letter to the plaintiff stating that the above mentioned charge and specifications had been preferred against him, and containing a copy of the charge and specifications and the resolution.

Mr. Kuehnemundt's counsel thereupon sent a letter to the Secretary of the Exchange asking an adjournment of the hearing of his matter about one week. In accordance with this request the Governing Committee postponed the hearing to November 11, 1878. Prior to the meeting of the Governing Committee, held upon that day, the plaintiff examined at the Secretary's office the

testimony taken by the Investigating Committee, and on November 11, 1878, he appeared before the Governing Committee. The charge and specifications were read and also the testimony, and the plaintiff submitted a written answer to the charge and specifications pleading not guilty, upon the merits, to the charge and each specification. At this meeting the plaintiff made an oral statement, was interrogated by members of the committee and was given a full opportunity to be heard in his own defense. No other statements or testimony were taken by the Governing Committee. The plaintiff retired and the committee voted upon the charge and specifications, and the plaintiff was adjudged, by a vote of two-thirds of the members of the committee present, to be guilty of two of the specifications, and was, by a like vote, convicted of obvious fraud. On the next day the President of the Exchange declared the plaintiff to be expelled from membership in the Exchange.

The plaintiff, during all the proceedings against him taken by the Exchange, acted under the advice of his counsel, and no objection was raised by him to the regularity or validity of the proceedings by which he was expelled, until the commencement of this action on January 14, 1887, nearly nine years afterwards. He did not, during the course of the proceedings against him, request to be confronted with the persons examined by the Investigating Committee, or ask for the privilege of cross examining them, or offer any testimony or evidence on his own behalf at the hearing before the Governing Committee. His application for a postponement of the hearing was at once granted, and he was given an opportunity to examine the testimony taken and full opportunity to be heard before the Governing Committee. He does not now claim that the Governing Committee did not act honestly and fairly, or that their action was influenced by any ill feeling or bias against him.

In view of these facts it is immaterial that, before the meeting of the Governing Committee, the Secretary refused to permit the plaintiff to copy or take notes from the testimony collected against him. If material to plaintiff's defense, the plaintiff should have made a proper request for that purpose to the Governing Committee. So, if the plaintiff intended to claim the right to be confronted with the witnesses against him and to cross examine them, he should have made the claim before the Governing Committee. By omitting to make such a claim then and there, and submitting his case to the Governing Committee in the manner he did, he waived any rights he had in the premises.

In any aspect of the case, therefore, the defendant is entitled to judgment dismissing the complaint, with costs.

Kuchnemundt vs. Smith, New York Superior Court, Special Term, August 20, 1888.

INDORSEMENT OF DRAFT BY OWNER TO THIRD PARTY AS TRUSTEE—DEPOSIT BY LATTER TO THE CREDIT OF HIS INDIVIDUAL ACCOUNT—SUCH TRUSTEE IS CHARGEABLE TO AN ATTACHING CREDITOR OF THE OWNER UNDER TRUSTEE PROCESS ONLY IN CASE HE COULD HAVE DRAWN AGAINST THE DEPOSIT AS OF RIGHT AT THE TIME OF SERVICE OF THE WRIT; NOT IF HE COULD HAVE DRAWN ONLY IN DISCRETION OF BANK.

This was an action brought by Joseph B. Moors and others against Benjamin Goddard, principal defendant, in which Richard Stone and Robert M. Morse, Jr., were summoned as trustees of the principal defendant, and Thomas Wigglesworth appeared as claimant of the funds in their hands.

One of the trustees had received by mail from Washington a treasury draft in favor of Goddard, which the latter indorsed and delivered to Stone pursuant to an alleged assignment in trust for the claimant. Stone deposited the draft without change in the Lincoln National Bank, and the amount was credited to his account. Plaintiff's writ was served on the alleged trustees on the same day of such deposit, while the draft was still in the actual possession of the bank. A finding was made against the principal defendant for \$5,000. The Court ruled that, except as to the validity of the assignment, upon which it did not pass, if Stone could have drawn against the deposit as of right, or if the bank would have paid Stone's check against the deposit pursuant to any agreement implied by the course of dealing between the parties or pursuant to any contract obligation, then Stone was to be charged as trustee, but refused

to rule that he was to be so charged if he would have been allowed to draw, and the bank would have paid, in its discretion, relying on the responsibility of Stone or the character of the paper. The court ordered that the trustees be discharged, and plaintiff alleged exceptions.

Held: While the question raised by the bill of exceptions—*viz.*, whether Mr. Stone is to be held as trustee—has been argued before us and before the Superior Court between the plaintiff and the claimant, it is really one between the plaintiff and the trustee. The claimant is only concerned when it is ascertained that there are funds in the hands of the trustee originally belonging to the defendant, which, but for the assignment or other title which the plaintiff may have acquired, would be payable to him. An adverse claimant does not come into court for the purpose of showing that there are no goods, effects and credits of the defendant in the hands of the alleged trustee—which would ordinarily be to prove himself out of court—but for the purpose of showing himself entitled to those funds to which, but for his claim, the plaintiff would be entitled. He can have no judgment in his own favor except in the matter of costs against either plaintiff, defendant or trustee. (*Gifford vs. Rockett*, 119 Mass., 71; *Clark vs. Gardner*, 123 Mass., 358). It has therefore been held that a statement of facts, signed by plaintiff and claimant only and not on behalf of the trustees who are necessary parties to the judgment, must be discharged. (*Massachusetts Nat. Bank vs. Bullock*, 120 Mass., 86; *Gifford vs. Rockett*, *supra*). The first question in such case is therefore, as between plaintiff and the alleged trustee, whether the latter is primarily chargeable; and the second, whether the amount for which he is chargeable has been assigned or is due to any other party, who may then be permitted to present his claim. In practice these questions are undoubtedly often tried at the same time, if not absolutely together, but they are essentially distinct.

In the case at bar the only question passed upon by the court was whether the trustee was chargeable, and this in a controversy between the plaintiff and the claimant. The presiding judge deemed that this was sufficient for the purpose of the case as presented to him, and held it to be unnecessary to consider the validity of the assignment to the claimant. The trustee had answered fully and had no wish apparently to be heard, but was prepared to submit the case upon his general answer and his replies to the interrogatories put to him.

As the trustee was discharged, if it shall appear, notwithstanding any irregularity of the trial, that the plaintiff, who is the excepting party, was not entitled, as between himself and either of the other parties, to any of the rulings requested by him no injustice will have been done. It might be said, parenthetically, that it would seem that the questions upon the one hand, whether the trustee was not entitled to be discharged upon his whole answer, and upon the other, whether the trustee was not chargeable by reason of the fact that he deposited in the bank the drafts belonging to the defendant as his own, might fairly have arisen at the hearing. But the bill is not so framed as to present them, nor could we assume that it contains all the facts necessary to be stated if they were open for discussion. The questions presented by the bill of exceptions only are before us, and no other part of the case is brought here for revision. This has been so often decided and the reasons for such a decision are so obvious that they do not require restatement. (*Richardson vs. Curtis*, 2 Gray, 497; *Jones vs. Sisson*, 6 Gray, 268; *Wall vs. Provident Sav. Inst.*, 3 Allen, 96; *Ames vs. McCamber*, 124 Mass., 85)

The defendant had received two treasury drafts and had indorsed them to Morse and Stone to be collected and devoted by them to certain purposes specified in a written agreement. They were deposited by Mr. Stone in the Lincoln Bank, in Boston, and he was credited with the amount of them in his pass-book. While these drafts were yet in the bank, and unpaid, the plaintiff's writ was served on the alleged trustees. The validity of an attachment by trustee process must be determined by the state of facts existing at this time.

The rulings requested by the plaintiff vary in form, but they were in substance that if after the deposit of the draft by Stone, he could or would have received payment for the amount of them by a check drawn upon the bank for the amount of them, the trustees should be charged. The plaintiff did

not claim to hold the trustees as such on account of their having received and deposited the drafts to their own credit, or because they held drafts belonging to the plaintiff for which, when collected, they were to account. It has often been held that choses in action—as notes, drafts, checks, etc. uncollected—which have been deposited with another to be thereafter collected, do not render him liable to be charged under the trustee process. (*Lupton vs. Citter*, 8 Pick., 298; *Lane vs. Felt*, 7 Gray, 491; *Hancock vs. Colyer*, 99 Mass., 187).

The position of the plaintiff was and is that the property in the drafts had passed to the bank; that Stone was a creditor to the amount of them of the bank, and that if in fact Stone could have collected the money for them whenever he called for it, it is immaterial whether he could have enforced a payment for them from the bank.

In reply to the plaintiff's request the Court ruled, except as to the alleged assignment to the claimant, on the validity of which it did not pass, "that if said Stone could have drawn against said deposit as of right, or if the bank would have paid said Stone's check against said deposit pursuant to any agreement implied by the course of dealing, or pursuant to any contract obligation, then said Stone was to be charged as trustee, but refused to rule that he was to be charged as trustee if he would have been permitted to draw in the discretion of the bank, and said bank would have paid in its discretion, relying on the responsibility of said Stone, the character of the paper deposited, or both or all the elements which might affect its discretion when not under obligation to pay."

The Court further found as a fact "that at the time of service Stone had not control of the credit entered upon his deposit-book on account of the draft in question, and could not check or draw upon it as of right;" but did not pass upon the question whether the bank would have paid a draft by said Stone against said deposit. It further ordered the trustees to be discharged.

This finding of facts was fully justified by the evidence tending to show that, by the custom of banks in Boston, checks and drafts were credited conditionally subject to correction on non-payment; that such deposits were not subject to check of depositors until the check or draft was collected, or sufficient time had elapsed for notice of non-payment in the course of business; that banks did in certain cases pay checks drawn immediately against deposits of checks or drafts, and that when they did so the responsibility of the customer, the responsibility of the drawer and drawee of the check, or character of the draft deposited and various other elements, affected their decision. There was also evidence from other sources that credit for the deposit of checks or drafts was absolute and not conditional. So far as there was a conflict of evidence on this subject it was a matter for the final decision of the presiding judge. With the usage of the bank as it is found by the judge to have existed, with which he dealt, Stone must be held to have been acquainted. The circumstance that by engaging his personal responsibility Stone could have obtained the money for these drafts, did not make him liable for the amount of them to the defendant whose property they were when confided to him. Until the bank was under a legal obligation to pay him, there was no pecuniary obligation on his part to the defendant. No person is to be "adjudged a trustee by reason of any money or any other thing due from him to the defendant, unless it is at the time of service of the writ or lien due absolutely and without depending on any contingency." (*Pub. Stat.*, Chap. 183, Sec. 34, Cl. 4).

It is suggested that a deposit of the drafts, for which credit was given by an entry on the books of the bank in the same manner as deposits of bank bills, must be held to have created the relation of debtor and creditor between the bank and trustee. If so, the trustee would certainly have had at once a right of action for the amount of the drafts, which, by the usage of the banks in regard to such deposits, it is found he did not. The entry made, whether called a memorandum or by any other name, must be construed with reference to its usage, and did not make the bank liable to the depositor of the draft at all events.

The plaintiff urges that the case of *Hancock vs. Colyer*, 103 Mass., 396, is

practically decisive in his favor. We do not so consider it. In that case the trustees had collected the amount of the check in money and deposited it subject to their own order in the bank and it was liable to be immediately drawn out by them as of right when the trustee process was served. They could not have taken more complete possession of the money.

Exceptions overruled.

Moors vs. Goddard, Supreme Judicial Court of Massachusetts, Suffolk, June 21, 1888.

CHECK ON BANK—FIFTEEN DAYS' DELAY IN PRESENTMENT—LIABILITY OF ACCOMMODATION DRAWER WHERE PAYEE HAS ABSCONDED—TRANSFER OF COLLATERAL AS AFFECTING LIABILITY OF SURETY.

The defendant drew a check for \$80 on the Traders' National Bank in favor of H. J. Robinson, and Robinson indorsed this check to plaintiff, the understanding between Robinson and the plaintiff being that the latter should keep the check for fifteen days. He did so keep it, and then presented it to the bank who refused to pay it. Plaintiff thereupon gave notice to the defendant, and demanded payment from him. The bank then was and still remained solvent. Robinson had absconded the day before the check was presented, leaving many questionable transactions behind. Robinson, when he ran away, had household furniture worth about \$2,500, on which the plaintiff held an unrecorded mortgage as security for Robinson's general indebtedness to him (including said check), which he had recorded immediately afterwards. The check had been given by the defendant to Robinson for his accommodation, on his representation that he had a friend who would put it in his drawer as cash, and that in a day or so, he (Robinson) would redeem it. Robinson told the defendant a day or two afterwards, that he had taken the check up and destroyed it.

Plaintiff sued defendant as drawer, and recovered judgment in the Court below. The case then came before the Supreme Court of Rhode Island on a petition for a new trial.

Held, The defendant claims that he was discharged by the delay to present the check for payment. He does not claim to be discharged by reason of any failure of the bank, but on the ground that if the check had been immediately presented, and he had had notice of the non-payment, he could have secured himself by paying the plaintiff and attaching the furniture, the mortgage upon which was then unrecorded, or by arresting Robinson. It is, however, entirely uncertain whether, if the check had been earlier presented and payment refused, the plaintiff would not have had the mortgage earlier recorded, or whether, in such event, Robinson would not earlier have run away, and so avoided arrest. If the defendant was entitled to claim discharge on the ground of delay for these reasons, we think the question whether he was injured by the delay must be regarded as purely a question of facts, and we are not satisfied that the judgment was against the evidence on that point.

It also appeared in evidence that, after the present action was begun, the plaintiff transferred his mortgage on Robinson's furniture, for \$225 or \$250, to Robinson's father, the plaintiff never having previously had possession of the mortgaged property. The defendant claims that, as accommodation drawer of the check, he was entitled to the privileges of a surety, the circumstances in which the plaintiff received the check being such as to give him notice of his relation to the drawee, and that he is therefore discharged by the transfer of the mortgage, under the decision of this Court in *Otis vs. Von Storch*, 15 R. I. 41, 42. But in *Otis vs. Von Storch* the Court held that a surety will be discharged if the creditor surrenders or releases a security for the debt taken from the principal debtor. That is not this case, for here there was no surrender of the security to the principal debtor, but only a transfer of it to a third person. Such a transfer will not discharge a surety. (*Wheatley vs. Bastow*, 7 De Gex, M. & G. 261, 279, 280; *De Coly Guar.* 440, 441.) Such a transfer of a mortgage operates also as a transfer of the debt secured by it. (*Jones vs. Huggeford*, 3 Metc. 515; *Campbell vs. Birch*, 60 N. Y., 214.) And the question might arise whether, after such a transfer, the plaintiff would be entitled

to continue to prosecute the action. There was, however, no evidence to show that he was prosecuting it in fraud, or against the will of the assignee. In the absence of such testimony, the assignor is allowed to go on. (Alsop *vs.* Caines, 10 Johns. 400; Raymond *vs.* Johnson, 11 Johns. 488; Gardner *vs.* Smith, 5 Heisk. 256.) If it be the fact that the plaintiff is prosecuting the suit for himself, in violation of the rights of his assignee, the matter can be brought before the Court below by motion for a stay of execution, or other appropriate proceeding.

Petition dismissed.

Wilbur *vs.* Williams, Supreme Court of Rhode Island, June 16, 1888.

INSOLVENT NATIONAL BANK—EFFECT OF DISSOLUTION BY FOREIGN TRIBUNAL ON REMEDIES OF CREDITORS IN THE STATE—ATTACHMENT CANNOT ISSUE OUT OF STATE COURT.

On the 18th day of June, 1887, the plaintiff was granted an attachment in New York against the property of the Fidelity National Bank upon the ground that the defendant was a foreign corporation having certain property in the State, which was levied upon under the attachment. On the 27th day of June, 1887, David Armstrong was appointed Receiver of the defendant, and he intervened in the action and made a motion to vacate the attachment. This was denied by the Special Term of the Supreme Court, and the Receiver took an appeal to the General Term.

Held. The motion of the Receiver was originally based upon the allegation that, since the granting of the attachment, the defendant had been dissolved by a decree of the Federal Court. But this is not a reason for granting the motion. It was held in the case of the Hibernian National Bank *vs.* Lacombe (84 N. Y., 367), that however fatal the adjudication in a foreign tribunal may be to the existence of the defendant corporation in that State, it cannot deprive the creditors of remedies afforded by other forums against its property. Notwithstanding the dissolution, the corporation is deemed to live, at least to such an extent as to permit creditors who have acquired valid liens to maintain them, and the action to continue in form by its present title, as though the defendant had an actual legal existence.

Another question is whether or not the defendant was, at the time of the service of the attachment, insolvent, within the meaning of the National bankrupt law. By Section 5,242 of the Revised Statutes of the United States, all transfers or evidences of debt owing to any National banking association, or deposits to its credit, all assignments of mortgages, sureties on real estate, or of judgments or decrees in its favor, all deposits of money, bullion, or other valuable thing for its use, or for the use of any of its shareholders or creditors, and all payments of money to either, made after the commission of an act of insolvency, or in contemplation thereof, with a view to prevent the application of its assets in the manner prescribed, or with a view to the preference of one creditor to another, except in payment of its circulating notes, shall be utterly null and void "and no attachment, injunction or execution shall be issued against such association or its property before final judgment in any suit, action or proceeding in any State, county or municipal Court."

It is firmly established by the evidence before us that at the time of the granting, and of the service of the attachment, neither the plaintiff nor its agent, had any knowledge, suspicion or belief that the defendant was in an insolvent condition; on the contrary, Mr. Lang, the plaintiff's agent, testified that he believed the defendant to be wholly solvent. It further appeared that the defendant continued in business after the granting of the attachment on the 18th and 20th days of June (the 19th being Sunday), and was not closed by the banking department until the 21st day of that month. Hence, so far as appearances go, irrespective of the stopping of the payment of checks, the defendant was not, within the meaning of the Federal statute, insolvent. If the defendant was in fact insolvent such knowledge was possessed only by the officers of the bank, for, as has already been pointed out, it continued business for two days thereafter, paying out money and receiving deposits in the usual

and ordinary course of banking business, though it subsequently turned out that the bank was at the time of the issuing of the attachment, in fact insolvent, that is to say, in the sense that it did not at that time have sufficient property with which to pay all of its debts. Such insolvency standing alone, unaccompanied by any act, omission or purpose, is not what is contemplated by the provisions of the Federal statute. The language of the statute is not broad enough to cover such a case. On the contrary it is not restrictive in its terms as to the meaning which shall be given to the word "insolvency."

The construction of this statute, as it had been maintained up to the time of the argument of this case, was to the effect that an attachment might be issued, as was done in this case, provided no act of insolvency or bankruptcy had been committed by the defendant, if done without any knowledge or suspicion of the contemplation of insolvency and without any effort to get possession of the property of the defendant otherwise than under the laws of the State. The prohibition to the issuing of an attachment before final judgment was limited to cases only where there had been an act of insolvency or contemplation thereof made with a view to prevent the application of the assets in the manner prescribed by the Federal statutes.

But since the argument of this cause, the Supreme Court of the United States, in the case of the Pacific National Bank *vs.* Mixter (124 U. S. 721), have announced a decision which renders further discussion unprofitable, and shows that the previously accepted views of the profession as well as the decision in this case, are erroneous. The Court there says: "It stands now, as it did originally, as the paramount law of the land, that attachments shall not issue from State Courts against National banks, and writes into all State attachment laws an exception in favor of National banks. Since the Act of 1878, all the attachment laws of the State must be read as if they contained a provision in express terms, that they were not to apply to suits against a National bank."

Feeling ourselves bound by this decision, it follows that the order appealed from should be reversed and the attachment vacated, but under the circumstances it should be done without costs.

Bank of Montreal *vs.* Fidelity National Bank, N. Y., Supreme Court, General Term, First Dept., June 19, 1888.

PROMISSORY NOTE—STIPULATION FOR PAYMENT OF INTEREST IN EXCESS OF LEGAL RATE — WILL SUCH CONVENTIONAL RATE, OR ONLY ORDINARY LEGAL RATE, BE PAYABLE AFTER MATURITY ?

The language of the note in suit, after the usual promise to pay the principal, was "with interest from this date at the rate of eight per cent per annum, payable as per five interest notes hereto attached." The interest notes alluded to covered interest to the maturity of the note. The question for determination was as to the rate of interest the note bore after maturity.

Held: In Georgia, where this note was executed and is payable, the ordinary legal rate of interest is seven per cent., but a higher rate may be stipulated for by contract in writing, not to exceed 8 per cent. per annum. It may be considered as settled, I think, in the Federal Courts, controlled as they are by the decisions of the Supreme Court of the United States, that, if a conventional rate of interest higher than the ordinary legal rate is stated in a promissory note, such higher rate will not be allowed beyond the maturity of the paper, unless the terms of the instrument itself extend it beyond maturity. (Brewster *vs.* Wakefield, 22 How., 118; Burnhisel *vs.* Firman, 22 Wall, 170; Holden *vs.* Trust Co, 100 U. S., 72). There is a qualification, however, to this ruling by the Supreme Court, namely, that the local law of the State will control. It is claimed by counsel for the plaintiff that the decisions of the Supreme Court of this State have established a different rule in Georgia, and some decisions have been cited in support of that position. The first case cited is that of Ware *vs.* Bank, 59 Ga., 840. I have been unable to see anything in that decision controlling here. The only point decided with reference to interest is that the holder of the draft in that case

could collect the same rate of interest that the acceptor might have collected. Two other cases are cited and relied upon, namely, *Cauthen vs Bank*, 68 Ga., 287, and *Daniel vs. Gibson*, 72 Ga., 387. In both of these cases the note provided for a conventional rate of interest (in the first case 12 per cent., and in the latter case 15 per cent.) after maturity; and the question before the Court in both cases was whether the judgment should bear the rate of interest provided in the contract, and it was decided in the affirmative. That is to say, it was held in those two cases that, where the contract provided for a conventional rate of interest after the maturity of the paper, the judgment should bear the same rate. The question here is, where a contract only expressly provides for a conventional rate of interest higher than the ordinary rate to the maturity of the paper, will it be extended by implication beyond its terms? A very different question, I think.

Some stress has been laid in argument upon section 2,054, Code Ga., the language of which section is, "All judgments in this State bear lawful interest upon amount recovered;" the language of the original act of 1845 (Cobb, Dig. 394) from which it is said this section was codified in part; and the reasoning of the Court in 72 Ga., *supra*, in reference thereto. The point made, in brief, is, under these statutes, that judgments in Georgia bear the contract rate of interest. It is unnecessary, I think, to dispute that. The question here is, what was the rate of interest at the time the judgment was rendered? If, as in the cases in 68 Ga. and 72 Ga., the contract provided for a conventional rate of interest after maturity, it might be very properly held that that meant after maturity and until paid; and that consequently a judgment rendered on such a contract should bear the same rate of interest. No other decision or statute of the State has been cited as affecting this question. I do not think that the decisions or statutes I have mentioned establish any local rule adverse to the recognized doctrine in the courts of the United States. The ordinary legal rate of interest in Georgia is seven per cent. per annum. The presumption of the law was that this note would be paid at maturity. Such must be held to have been the expectation of the parties. An implication will not arise when, in the absence of evidence, it must be based upon a presumption which does not exist. A contract to pay a higher rate of interest than the ordinary legal rate will not be extended beyond its terms. If it is desired that the indebtedness should bear such higher rate of interest beyond maturity, the contract should provide for it. In my opinion, in this case, interest at the rate of 8 per cent. per annum ceased at the maturity of the note.

Sherwood vs. Moore, United States Circuit Court, N. D. Georgia, February 25, 1888.

ABSTRACT OF CASES.

DEPOSIT WITH BANK OF FUNDS OF COUNTY BY "DEPUTY TREASURER"—
BANK HAS NO RIGHT TO APPLY TO OVERDRAFTS OF ANOTHER COUNTY
TREASURER—ESTOPPEL

Plaintiff deposited money in defendant's bank as "deputy treasurer," and in an action by him to recover the balance of account the question involved was whether the defendant had the right to charge plaintiff with the amount of overdraft made by one M. who had been county treasurer and had kept an account with defendant. There was no dispute that the money deposited both by plaintiff and M. was public money belonging to the county. Defendant claimed that the ownership of the two funds being the same, it could set off the indebtedness existing on the one account against the claim of the plaintiff on the other.

Held: This case is ruled by *Bank vs. Mason*, 95 Pa., St. 113. It was there held that "it is clearly against public policy to permit a bank that has received money from a depositor, credited him therewith upon its books, and thereby entered into an implied contract to honor his check, to allege that the money deposited belongs to some one else. This may be done by an attaching creditor or by the true owner of the fund, but the bank is estopped by its own act." The bank had no standing to assert that the money deposited to the credit of W. J. Alexander, deputy treasurer, did not belong to him; much less had it

the right to apply \$1,942.53 of this money to an overdraft of C. H. McAuley, treasurer. Granted that the money deposited by Alexander belonged to the county as a matter of fact, yet, as between the bank and its depositor, it was the money of the latter. It was in no sense ear-marked as county money. The fact that it was deposited to the credit of W. J. Alexander, deputy treasurer, did not so ear-mark it. For aught that appeared upon the books of the bank, it might have been as deputy treasurer of a building association. The most effect that could be claimed for the words "deputy treasurer" was an acknowledgement by Alexander that he held the money for some one else; and the other person not being designated, as between the bank and Alexander, the money belonged to Alexander. The bank could not refuse his check unless at the demand of an attaching creditor or the true owner of the fund. It is equally true that the bank could not have paid out a dollar of this fund upon the check of McAuley, the treasurer. The very object of the arrangement with Alexander, assuming the money to belong to the county, was to place it beyond the control of McAuley. If the latter could not draw it upon his check, how can the bank apply it to cover McAuley's overdraft? It was gross negligence in the bank to allow the overdraft, and it cannot protect itself in this summary manner and deny its depositor's check. The case is too plain to require further discussion.

Judgment against bank affirmed.

Citizen's Bank of Warren vs. Alexander, Supreme Court of Pennsylvania, May 21, 1868.

PROMISSORY NOTES—NEGOTIABILITY IN CONNECTICUT—ORDER OR BEARER.

The notes in suit were made payable to Ellen T. Young, the words "or her order" or "or bearer" being omitted. The question was whether the notes were negotiable, so that the expiration of six years would bar a recovery, or non-negotiable so as to require a longer time.

Held: It is conceded that, under the statute as it was until the Revision of 1875, such notes were not negotiable. We would remark, *in limine*, that these notes were given in 1869, and of course were not negotiable when given. We should hesitate to hold that a subsequent change of the statute made them negotiable. But, aside from that, we are satisfied that the Legislature did not intend by the change to change the meaning of the statute. In the Revision of 1866 a note is negotiable which is "payable to any person or his order, or to the bearer * * * according to the custom of merchants and the law relating to inland bills of exchange." The change consists in omitting the words in italics. As this court decided (*Backus vs. Danforth*, 10 Conn., 297) that a note payable to a particular person, and not to his order or to bearer, was not negotiable, and as such was universally understood to be the law by business men and the profession, we think the words were omitted because they had come to be without meaning, and were therefore unnecessary. Moreover, we think the statute, as it now is "payable to any person or his order, or to the bearer," in view of former decisions and of the general understanding of the law, may well be construed as requiring that the note should be payable to the order of a person, or to the bearer, in order to be negotiable.

Curtiss vs. Hazen, Supreme Court of Errors of Connecticut, December 30, 1867.

DEFALCATION OF CASHIER—LIABILITY OF SURETIES ON CASHIER'S BOND—NEGLIGENCE AND MISCONDUCT OF PRESIDENT AND DIRECTORS NO DEFENSE.

Defendants were sureties on the bond of the Cashier of a National bank conditioned for the faithful performance of his duties as Cashier, Teller and Book-keeper. The Cashier having become a defaulter to a large amount, one of the defenses set up by the sureties was that the willful negligence and misconduct of the President and Board of Directors permitted the fraudulent acts of the Cashier, and the sureties consequently were not liable therefor. On this point the court *Held*; The bond of the Cashier, signed by defendants, was given to the bank, not to the President nor to the Board of Directors;

and if the Cashier committed the defalcations and frauds charged, neither he nor his sureties can be excused because of any negligence or omission of duty on the part of the President or Board of Directors. They could not excuse, justify or release them by a formal vote; *a fortiori* they cannot be held to excuse or palliate them by conduct. (*Minor vs. Bank*, 1 Pet., 71, Et. Seq.) The bond was not given to secure the bank against such defalcations as the Cashier could make without the knowledge of, or such as were not within the means of discovery by the President or Directors; nor was the bond given upon the condition that the President or the Board should watch him and prevent any defalcation or fraud on his part. It was absolute in its terms, guaranteeing that he would faithfully perform his duties, and account for all funds coming into his hands without reference to or respect for any one else. Even if he acted with the fraudulent connivance of the President or any one or all of the Board, this would only make them partners in crime and still his sureties would be responsible.

Phillips vs. Bossard, United States District Court, D. South Carolina, May 22, 1883.

PRESENTMENT FOR PAYMENT—DISCHARGE OF INDORSER—SUBSEQUENT PROMISE OF INDORSER TO PAY.

In an action against the indorser of a promissory note, plaintiff admitted that he made no presentment or demand of the maker, but set up the excuse that the maker had absconded before the note fell due. The only evidence which he offered to prove this was that the maker's shop was closed, and he was told that the maker had "skipped." He did not inquire for him at his house or demand payment there.

Held: That plaintiff had not made out a proper excuse for failing to make demand for, supposing the maker had absconded, still if he had any known domicile within the State, as from the testimony he seemed to have had, it was incumbent on the plaintiff to make presentment or demand there in order to charge the indorser.

Further Held: As to a subsequent promise to pay claimed to have been made by the indorser. The main current of decision in this country is to the effect that, while the promise of an indorser after maturity to pay the note is *prima facie* evidence of due demand and notice, yet, if the fact appears that there has been laches on the part of the holder, in that case such a promise by the indorser will not render him liable unless it also appears that the promise was made with full knowledge of the fact that he had been discharged by the laches of the holder.

Glaser vs. Bounds, Supreme Court of Rhode Island, May 26, 1883.

NATIONAL BANK—INSOLVENCY—PRIORITY OF CLAIMS.

A creditor of an insolvent National bank, whose demand grows out of a fraudulent transaction perpetrated by the officers of the bank in contemplation of the immediate wrecking of their corporation, does not thereby become entitled to a preference over the general creditors of the bank.

On the 22nd and 23rd of March plaintiff, a bank in Raleigh, N. C., received, in the ordinary course of business, checks drawn on the State National Bank of that city, which, after deduction had been made of its checks received by the latter bank, amounted to \$17,000. It paid the same by its checks on a bank in New York. The President of the State National Bank knew when he signed such checks that they would not be honored, and was making preparations to abscond with the assets of his bank. *Held*, That plaintiff was not entitled to any preference over other unsecured creditors.

Citizen's National Bank vs. Dowd, United States Circuit Court, E. D. North Carolina, June 21, 1883.

NEGOTIABLE INSTRUMENTS—INTEREST AFTER MATURITY—DILIGENCE OF MAKER.

Where a promissory note is made payable at a certain city, but no particular place in such city is designated, and neither party has any office or place of

business or residence within the city, and the note is for the payment of a certain sum, without interest, except that a stipulation is added that, if the note is not paid when due it shall draw interest at the rate of 12 per cent. per annum from date, and the payee of the note, at the time and before it becomes due, is ready and able to pay the same but fails because he cannot ascertain where the note is kept, or where payment will be received.

Held: That if he exercised reasonable diligence to ascertain where the note was kept, and to pay the same, he will be relieved from the payment of the penalty although he failed to pay the note on the very day on which it became due.

Ansel vs. Olson, Supreme Court of Kansas, July 7, 1887.

PROMISSORY NOTE—LIABILITY OF INDORSER—DISCHARGE.

A promissory note was indorsed by the payee in blank, and by several subsequent indorsers in a similar manner. The holder released the payee from his liability on the note.

Held: That such release, without the consent of the subsequent indorsers, discharged them from liability thereon.

Brewer vs. Boynton, Supreme Court of Michigan, July 11, 1888.

NATIONAL BANK—TAKING POSSESSION OF GOODS UNDER CHATTEL MORTGAGE TO SECURE INDEBTEDNESS—BANK CANNOT TAKE ADVANTAGE OF WANT OF AUTHORITY OF ITS CASHIER TO ESCAPE LIABILITY FOR SURPLUS AFTER PAYMENT OF ITS CLAIM.

Where a National bank, in order to secure its indebtedness, takes possession, by its Cashier, of goods under a chattel mortgage and disposes of them, it cannot claim immunity from liability for any surplus remaining after payment in full of its claims, on the ground that its Cashier, being an officer of a National bank, exceeded his powers and acted *ultra vires*.

Cooper vs. First National Bank of Washington, Supreme Court of Kansas, July 7, 1888.

INDORSEMENT OF NOTE BY PARTY WHO IS NEITHER PAYEE NOR INDORSEE —CHARACTER OF LIABILITY ASSUMED.

P. made a note payable to his own order, and indorsed it to the order of S. Under this indorsement defendant placed his name before negotiation. In an action by S. against defendant,

Held: That he was liable as an original promisor, and was properly declared against as such.

Stevens vs. Parsons, Supreme Judicial Court of Maine, April 5, 1888.

LAW NOTES AND COMMENTS.

RIGHTS OF TRANSFERREES OF NEGOTIABLE INSTRUMENTS TAINTED AT THEIR INCEPTION. — Champlin, *J.*, delivering the opinion of the Supreme Court of Michigan in *Davis vs. Seeley* (July 11, 1888) speaking on this question, says: "There is a distinction between contracts which are void between the immediate parties because they will not be enforced on grounds of public policy, and contracts where the statute declares them void. In the first class, negotiable instruments, fair on their face, which have, before maturity, passed into the hands of *bona fide* holders for value, will be enforced in the hands of such holders; but in the other class they are void as against the party who gave them, and in the hands of all other parties." (Citing *Edwards vs. Dick*, 4 Barn. & Ald. 212; *Towne vs. Rice*, 122 Mass. 71; *Aurora vs. West*, 22 Ind., 88; *Eagle vs. Kohn*, 84 Ill., 2, 2; *Cowing vs. Altman*, 71 N. Y., 435).

Speaking generally of the right of a transferee of negotiable paper to recover, the Court says: "In England prior to 1820 it was pretty generally held that bad faith alone would prevent a holder for value from recovering

upon commercial paper. In *Gill vs. Cubitt*, 3 Barn. & C., 466, under the influence of Lord Tenterden (see *Slater vs. West*, 3 Car. & P., 325), due care and caution was made a test. In 1834 the king's bench held that nothing short of gross negligence could defeat the title of a holder for value. (*Crook vs. Jardis*, 5 Barn. & Adol., 909). But Lord Denman, in 1836, in the case of *Goodman vs. Harvey*, 4 Adol. & E., 876, reasserted the doctrine, which has since been held in England, that bad faith alone could disentitle a holder for value to recover; that gross negligence might be evidence of bad faith, but was not conclusive of it. This doctrine is now firmly established in the United States." (Citing *Murray vs. Lardner*, 2 Wall., 110; *Collins vs. Gilbert*, 94 U. S., 753; *Farrell vs. Lovett*, 68 Me., 326; *Bank vs. Bank*, 10 Cush, 488; *Chapman vs. Rose*, 56 N. Y., 140; *Johnson vs. Way*, 27 Ohio, St. 874; *Shreeves vs. Allen*, 79 Ill., 553; *Kelly vs. Whitney*, 45 Wis., 110; *Miller vs. Finley*, 26 Mich., 254; *Howry vs. Eppinger*, 34 Mich., 29; *Hamilton vs. Vought*, 34 N. J. Law, 187; *Welch vs. Sage*, 47 N. Y., 148; *Oates vs. Bank*, 100 U. S., 289).

LIABILITY OF BANK FOR FAILING TO CARRY OUT INSTRUCTIONS.—A case which, on account of the principles involved, has aroused much interest among bankers and commission men was decided, September 14th, by Judge Gary at Chicago. The suit was by George W. Dumond, of Earlville, Ill., against the Merchants' National Bank of Chicago and the Union Stock Yards' National Bank. Dumond's commission men at the stock yards deposited with the Union Stock Yards' Bank \$1,200 belonging to Dumond with directions to have it placed in the Merchants' National Bank to the credit of the Exchange Bank of Earlville for the use of Dumond. The Union Stock Yards' Bank failed to state that it was for the use of Dumond, and the Merchants' Bank, supposing that it belonged to the Earlville Bank, applied the money on an indebtedness of the Earlville Bank to it. Judge Gary held that the Union Stock Yards' Bank and not the Merchants' Bank was liable for the money. It was instructed to place it to the credit of the Earlville Bank for the use of Dumond. It failed to do this, and accordingly was solely responsible. The bank appealed.

REPLIES TO LAW AND BANKING QUESTIONS.

Editor Rhodes' Journal of Banking:

MERIDIAN, Miss., Sept. 18, 1888.

SIR:—H. owes B. \$250 and buys from D. and D., bankers, a check or draft on a New York bank payable to B. or order. B., who owes J., sent the \$250 draft or check, after indorsing the same, to J. J. kept the draft for two weeks and then sent it on to New York for presentment. When presented the New York bank refused payment on the ground that D. and D. had no funds. D. and D., bankers, failed after giving the draft or check, and J. demands payment of B. B. pays J. and then demands of H. the amount due him, that is, the \$250. H. declines to pay, assigning as a reason the laches of J. in presenting the draft or check. Can B. recover from H.? SUBSCRIBER.

Answer.—The presumption is, in the absence of an agreement express or implied, or a course of dealing to the contrary, that the giving of a third person's check is only a conditional payment of a debt; and unless there are facts in the case going to show that it was received as absolute payment by B., the presumption would be as above stated and only to be regarded as an absolute payment when cashed.

But although B. took the check as conditional payment only, we think that the two weeks' delay of J. in presenting the check was such laches as would charge him with the loss, providing of course that the drawers had funds with the New York bank to pay the check if it had been presented within a reasonable time. If D. and D. had funds in the New York bank at the time of drawing the draft and for a sufficient time thereafter to meet it if it had

been presented within a reasonable time, J.'s laches in presenting made the check his own and shouldered him with the loss; and B. was not legally liable to refund the amount to him. As B. was not legally liable to J., by voluntarily paying the amount to him B. could not make H. liable over to him to reimburse him for such voluntary payment. This answer proceeds on the assumption that the instrument referred to was not a time draft.

Editor Rhodes' Journal of Banking:

WASHINGTON, D.C., Sept. 11, 1888.

SIR:—On page 769 of the JOURNAL for August I read: "The date side of a coin is always the head." How about the gold dollar with the date on the reverse?

CURIOUS.

Answer.—We trust our correspondent has a collection of these nondescript coins, for it is very doubtful whether enough of them have ever been seen by the average American to enable him to determine on which side the date really was. But if what is stated is true it is the exception, and only "proves the rule."

Here is what Webster's Dictionary says:

"*Head*—the uppermost, foremost or most important part of an *inanimate* object, as the head of a cane, a coin, a nail, etc. * * * * * *Head or tail*, this side or that—a phrase used in throwing a coin to decide a choice, question or stake, *head* being the side of the coin bearing the effigy or principal figure, and *tail* the other side."

As the date of all the American coins—with the possible exception of the gold dollar referred to—is on the effigy or vignette side, and as, according to Webster, that is the head side, it is safe to assume that the date side is always the head or principal side of a coin.

Editor Rhodes' Journal of Banking:

CLEARFIELD, Pa., Sept. 8, 1888.

SIR:—We hold A.'s note for money loaned which is past due and unpaid. He has lodged with us for collection, notes of B. As I understand the law, we can hold these notes of B. to secure A.'s note, notwithstanding there was no specific arrangement to that effect at the time the notes were left. Subsequently we make a loan to B., secured by collateral; the collateral amounting to a considerable sum in excess of the amount loaned. The note which B. signed specifies that "the collateral hereby pledged shall be applicable in like manner to secure the payment of any past or any future obligations of the undersigned held by the holders of this obligation." A creditor of B. attaches these collaterals. Is our claim to the notes of B. which A. deposited sufficiently strong to justify us, under the clause of B.'s note quoted above, in deducting the amount of these notes, together with the one of B. for the money which we loaned him, from the amount of the collateral, in answering the interrogatories as to how much is due B.?

TELLER.

Answer.—The special agreement under which the collateral was pledged is that "the collateral hereby pledged shall be applicable in like manner to secure the payment of any past or any future obligations of the undersigned held by the holders of this obligation."

The question is, whether the holder of the collateral so pledged can retain, as against an attaching creditor of the pledgor, sufficient of such collaterals to secure not only the payment of all obligations of the pledgor held by the pledgee as owner, but also the payment of an obligation of the pledgor to a third party which is held by the pledgee by virtue of a lien thereon. The determination of the question will depend on whether the phrase "*held by the holders of this obligation*" is to be construed to mean, held by the holders, as owners only, or its meaning extended to apply to holders of an obligation of the pledgor who are not owners, but hold the obligation by virtue of a lien for indebtedness.

We have been unable to find any decision wherein such a point was raised or decided, or wherein such a phrase has been judicially construed; and we are inclined to the opinion that a Court would determine the question in accordance with the understanding and intention of the parties at the time the

agreement was made. If when the note was given pledging the collaterals, the pledgor knew that the bank also held a note of his, given to another party, as security for an indebtedness of that party, and understood that the collaterals were also to be held as security for that note, the bank would have a right to retain, as against an attaching creditor, sufficient of the collateral to cover that note also. The term *held* in the clause referred to is not sufficiently specific and unambiguous, and the bank would probably be entitled, in a Court of justice, to introduce parol evidence to show what the phrase referred to was really intended to include.

Editor Rhodes' Journal of Banking:

DES MOINES, IOWA, August 30, 1888.

DEAR SIR:—A. and B. are respectively President and Cashier of a bank. They are backing a business man, C. by endorsing his notes. They obtain a special remuneration from C. for doing this. They placed considerable of this (C.'s) paper in their bank. Once they allowed C. to overdraw his account about \$3,000, and finally took C.'s individual, unsecured note for \$3,000 to cover the overdraft. This note they did not allow to be entered on the books of the bank but carried it as a cash memorandum for forty-five days. The Board of Directors finally learned of this note from the Teller and requested A. and B. to make some more satisfactory arrangement for the \$3,000, and also to obtain better security on a note of \$3,500 made by C. endorsed by his mother and held by the bank. Hereupon A. (the President), had C.'s father execute a \$5,000 mortgage on a Canadian summer hotel in order, so B. says, to take up this unsecured \$3,000 note and part of the \$3,500 note endorsed by C.'s mother. B. the Cashier, placed this mortgage to the credit of his (B.'s) individual account in the bank having made the deposit slip in his own writing although A. himself had an account in the bank. B. explains by saying that he merely acted as Cashier of the A.-B.-C. combination. B. furthermore contends that he objected to the taking of the mortgage but that A., the President, took it. A. and B. owned equal amounts of stock in the bank. On the same day that this mortgage was taken B. also credited his personal account with a \$12,000 note of C.'s endorsed by A. and B. making B.'s balance in the bank about \$17,000. B. then gave the bank his check for \$11,800 to take up (1), the overdue C. note endorsed by C.'s mother \$3,500; (2), the unsecured \$3,000 C. note; (3), another overdue C. note of \$4,500 endorsed by A. and B. and (4), interest; so that B.'s account in the bank at the close of the day showed a balance of about \$5,000. On the following days B. checked out the balance of his account for the use and benefit of C.

It now turns out that the \$5,000 mortgage taken *ostensibly* to replace previous undesirable loans is worthless. The question is this: Can the bank look to both A. and B. to protect it against loss by this mortgage? A. left the bank shortly after the mortgage was taken and B. succeeded him as President. B. says that "A. did it." It was generally known that A. and B. were involved with C.

IOWA.

Answer.—From the above statement of the facts we would gather that the only loss which the bank has sustained has arisen by reason of the \$5,000 mortgage turning out to be worthless; and the question is, can A. and B. be held liable to the bank therefor?

So far as the liability of B. is concerned, the statement shows that his individual account was credited with about \$17,000, which included this mortgage for \$5,000. He then drew out \$11,800 to take up C.'s notes, and subsequently the balance. If his account has been credited with a \$5,000 item which proves worthless he is certainly chargeable with that amount, and if he has drawn it out there can be no question of his liability to refund.

Had the mortgage been taken and held by the bank as part of its assets, the question would be upon the responsibility of A. and B. as officers of the bank for breach of duty in taking a security known to be worthless by them, but from the statement it appears that the bank never took the mortgage. B. took it individually and it went to swell his account. B. then drew out his entire account, part being paid to the bank to take up the notes of C., and the balance was checked out for the use and benefit of C. As the mortgage was worthless B. checked out \$5,000 more than he had any right to do, for which amount he must be debtor to the bank. If we thoroughly understand the facts, B. is the party liable to the bank.

AMERICAN BANKERS' ASSOCIATION.

THE PRESIDENT'S ADDRESS.

The Thirteenth Annual Convention of the American Bankers' Association, held at Cincinnati on the 3d and 4th of the present month, was an interesting occasion, and, it is hoped, will result in much practical benefit to the banking community. A full report of the proceedings will appear in the next issue of the JOURNAL. Following is the excellent address of LOGAN C. MURRAY, President of the Association, delivered at the opening of the Convention.

Gentlemen of the Association :

A distinguished Englishman, high in official position, said recently to an American audience : " You have indeed carried to the highest perfection the science of the production of wealth. Never before, in the history of the world, was such a result. But this is but one stage only in your Nation's progress. You are likely to be confronted sooner or later, and if I do not mistake the signs of the times, rather sooner than later, with the problem of formulating conditions for the distribution and the employment of the wealth which is now being created." This, as I understand it, is a matter of great concern to us, co-ordinate and equally important with the aid we render in the extension of commerce in our own land and in foreign lands. This latter suggestion is, of course, uppermost in our practical thought, for we realize daily that—

"The band of commerce is designed
To associate all the branches of mankind,
And if a boundless plenty be the robe,
Trade is the golden girdle of the globe."

Nevertheless, we claim at these meetings to keep in full view the duty of formulating and distributing the wealth, as Emerson would say, like the thread loom, throwing the shuttle until the sable ground is flowered all over with a woof of human industry, symbols of useful and generous arts, with beauty and courage, and the victories of the wise and just over malice and wrong.

President Lincoln added fame to his immortal name when he uttered these words at Gettysburg : " It matters little what we say here, but it matters much what was done here ; so to the Greek, as he stood at Thermopylae and declared that on this spot immortal deeds of valor were accomplished. In all ages men love to review the past, to live in the past, and mark the spot and blaze the trees for those who follow on, so may not we, for a little, review what has been done, mark the spot here a little and there a little, in all these years of endeavor ; what has been accomplished from this spot, in what has been said or done for the up-building of all the people." It was said of one who was a master of his day, that when he put the trumpet to his lips, the world stood still and listened. What can be said of any who have spoken for us ? Soon, perhaps, many uttered truths will be forgotten, as he who uttered them. There lies in his grave in Trinity Churchyard, New York, close by the wall in Rector Street, all that was mortal of Alexander Hamilton, the matchless financier of our young century ; unmindful, thousands pass it daily in the thronged metropolis. A lifted hand could touch his marble tomb, perhaps only one in ten thousand thinks or cares for what he was in his day, ere that splendid young life went out in an inexpressible gloom.

From this fact, as an example, we may reckon it will always be so, but of one thing we may be sure—his thought will not die. A truth well-expressed and often expressed, will by-and-by crystallize itself into a living force, which cannot be resisted ; and though it comes as unnoticed as the dew upon the grasses in the fullness of time it gleams out in splendid achievements, and we reap in due season the ripened grain.

Fourteen years ago a small company met in New York to form what soon afterwards became the American Bankers' Association, and but two or three

of that number are with us to-day. As was then announced, our object was to form a more perfect social and business bond within the fraternity throughout the Union. All about us lay the wrecks of the financial crisis of 1873; vast territory was being opened in the great Northwest; the South was beginning to feel conscious of undeveloped resources of wealth. From that day to this it has been our constant endeavor to place the hand of any reputable man from the remotest part in the hand of any other, whose interests might lie along the same lines. Is it not so that it has proven a wise thought, for untold millions have gone into distant States within these years, and many, many friendships have been formed which have led to wonderful business accomplishments; meantime, political changes have been accomplished within these years, without severe friction, and, politically speaking, "It is all quiet along the Potomac to-night." May it not be possible that we have been silent workmen in a wonderful development? I assume that it will not be doubted that never in the history of the world has there been such a march of civilization, mighty in its conception, tremendous in its accomplishments. The nations of the earth behold it in wonder, and the pride of American citizenship girdles the earth. Yes, we have had a powerful hand in it all: money, intelligence, and truth are the great pacificators and adjudicators; these have been the garb of the pioneer, and we salute them at the far front.

On all subjects which have touched us in any manner we have been bold to declare for the highest principles, daring to inscribe upon our banner living, lasting utterances, regardless of sections or political affiliations. Useless war taxes were abolished under repeated demands; tardy, yet accomplished. Friends from the Pacific have held friendly intercourse with friends from the far South, or New England, at many hospitable boards; indeed, a nation of bankers have come to know each other as never before, "and hearts that had grown cold had met again like parted streams, and mingled as of old." Yes, it has been worth all it has cost, in any light we view it, and so will continue till each in his turn has reached far towards the sunset.

Doubtless many subjects of importance have suggested themselves to your minds for discussion at this meeting. We have the Surplus Question and its relation to the Tariff; the National Bank System and a Basis for National Bank Circulation; the Silver Dollar question; Federal and State Bank Taxation; Immigration Laws; the Inter-State Commerce Act; Fall of Prices; the Formation of Trusts; a Bankrupt Law; Corners in Breadstuffs; the Reconciliation of Capital and Labor; Equal Taxation of all Money Lenders, whether they be Banks, Insurance Companies, Trust Companies, or Foreign, Private, Bankers, etc. All of these are living, important questions to us. The first of these, the Treasury surplus, is closely allied to the tariff; the people will soon be called upon to answer it. There is a suggestion which is worthy of emphasis; a heavy surplus in the Treasury is the best back-bone the banks can have; commerce demands a strong reservoir, which the banks are not always able to supply; it gives confidence in panics and relief in times of stringency; a depleted Treasury would mean over-strained banks. There is a moral question involved in lowering the Government income; the Government owes fifteen hundred millions of debt, four-fifths of which is interest bearing; both principal and interest has to be provided for and good faith demands that it shall be provided for as in any other good business management. We should hear a different song if we had bad crops and consequent low custom. We have been sung to sleep in this matter by great prosperity. There is an irrepressible conflict to hang over this country in the tariff question, and this Association needs to look at it in the light of the two suggestions above, to wit: Always a strong surplus in the Treasury and good faith in the payment of the Government debt by a sufficient income from the source pre-supposed and tacitly agreed upon at the time the debt was created.

Next we come to the maintenance of the National bank system. In 1863 the Government of the United States, irrespective of State lines, took hold of the Bank question and made it a National one, inaugurating a state of perfection which I believe is unparalleled in the history of finance among the nations of the world.

This child of the war between the States, born in the travail of the very soul of the Nation, is to-day full-grown, of five-and-twenty years, comely, substantial, and has not been disappointing. Hard money was scarce in 1861. There had been built upon this limited supply, through the channels of credit, a massive structure—suddenly as the storm arose, the sky became dark, and the curtains of night were let down around State boundaries; with these parcels of credit, known as State Currency, far from home, with no foster parent hand near by to protect it, intercourse cut off, we found ourselves depending upon a broken staff, which was but as chaff in the mighty storm, commercial ruin on every hand, and our shores strewn with the wrecks of a dismembered, useless and faithless medium.

We found the Secretary of the Treasury knocking at the doors of our strongest moneyed institutions, asking from them aid in his great distress, appealing to the wisdom, courage, patriotism and resources of an almost forlorn hope. How nobly he was met is a matter of history. In the light of subsequent years of the requirements of the Government how little does this aid appear, which in the earlier days of 1861 Mr. Chase asked and received of the banks of the eastern cities—yet how sufficient for the day?

Did you ever think when a commercial firm is in trouble how few are willing to advance the necessary sum to relieve it of embarrassment? A man who steps forward and supplies the necessary funds, without security, except faith, possibly in a dismembered firm, as was the case in this instance, would be considered a brave, almost a reckless man—and yet we find this very state of facts. The Treasury notes, or greenbacks, as they were then called, were fast sinking below par; immense sums were required daily (by many considered without warrant of law) and yet substantial, hard money was thrown into this river, which was growing wider and deeper day by day. Did it not require courage, patriotism and wisdom to look into the future and act? Yet we found it so; and not until 1863, or two years afterwards, did the National Bank system have its birth. Born of despair, of want, blood-bought, yea, in the very darkness of that midnight storm. Yet it is but the survival of the fittest. And now let us see if in the changes which have been wrought and the uses which have been made of the system, of the unparalleled prosperity which has come to us as a Nation, in which no people on earth has reached such mighty proportions under its influence, in which States have been born, capitals have been built, and broken capitals re-erected. The song of the harvest has come and gone and come with ever increasing prosperity, our graneries have burst with fatness. The world has taken notice of this marvellous development, and has sent hither men, women and money to add to the rising stream. Communities have been free to lay hold of this privilege and advance their local industries. In the midst of this great prosperity we come to ask each other if the parent of all this prosperity, to a greater or less degree, is to breathe its last, if its strong arm is to be stilled, and we are to look for something better, which is something more uncertain. And shall we wonder that men are perplexed and that you gentlemen of this Association are bewildered when you look into the future and ask what is to supply the vacuum caused by the decay of the National Banking system. I, for one, want to answer back in a voice not to be misunderstood, without hesitancy: Do not fear, the National Banking system is not going to be destroyed. In the fullness of time it will be yet better established. It was created for the people, by the people. In more stormy days than these, in times of trouble meanwhile, it has answered all reasonable requirements. It has worked smoothly in harness and for those parts of the machinery which are disabled we will supply new parts, just where the old are worn out or cease to work; but as for the machine it will go on and should go on, because it has been a faithful friend to every enterprise in whatever locality and under whatever circumstances.

Let us divide the system into two parts, as it were, and treat them as they may be. First, there is the Treasury of the United States, the Secretary charged with certain duties, the Comptroller of the Currency, the executive officer with each of the two thousand odd institutions in every section of the land reporting directly to him, responsible to him, and he to the country at large—and by far his greatest responsibility is the care, faithful preservation

and safe return to the depositors of the great mass of the deposits of the people made with these institutions. This is one part, and the great part of the system—the care of the deposits of the people, and the careful and safe loaning of these deposits to the commercial and manufacturing community by each institution, all under his general supervision.

Now we will come to the next part of the business of the system, and that is, issuing note circulation. Does it occur to you how small a proportion of the circulation of the United States to-day the National Bank circulation is to the whole? Let us say it is about one-fifth part. Now let us assume that this shall gradually be cut off—as undesirable as that is—it is gradually declining while other mediums of circulation are advancing in volume. Now for a practical suggestion: We must remember that money, actual money, is about 4 per cent. only of all commercial transactions; credit and credit alone supplies the other 96 per cent. however we look at it—it falls in importance. Risking its constitutionality, introduce the shortest possible bill in Congress, it would read thus:

“Any National Banking Association may be permitted to be organized, and those already organized shall not be required to lodge any bonds of the United States with the Treasury, provided such National Banking Association does not elect to take out circulation, and that all laws heretofore enacted requiring any deposit of bonds are hereby repealed.”

Now I do not think any National bank or any other bank should emit any bill or note for circulation without it is secured. Is it not true that there are very many National banks in the United States to-day, which do not issue circulation, even though banks of a capital of \$150,000 and above are required to lodge but \$50,000 of bonds with the Treasury, and some of these do not take out circulation on those bonds—whereas a small bank in Dakota is required to lodge one-fourth part of its capital, say if it is \$50,000 it is required to lodge \$12,500 of bonds with the Treasury whether it takes out circulation or not. Why is it so? If they issue no circulation, then no bonds should be required. If large banks to-day are not issuing circulation on the small amount of bonds required, say \$50,000, even though its capital be five millions (as is the case) then why require one-fourth part of the capital of a small bank to be first invested in a high-priced bond before beginning business? Therefore repeal that part of the National Bank Act which requires a deposit of United States bonds, hence that bank is to receive no circulation. If it choose to lodge bonds, then give it the privilege of issuing circulation on them as of old. As to the constitutionality of chartering a bank without circulation let us test the question.

I will take the case of one National bank in New York which has five millions of capital, and it has only fifty thousand dollars of bonds at Washington, and it has taken out no circulation on those bonds. What is \$50,000 to \$5,000,000 of capital, and what an unjust proportion to require a small bank in Dakota of \$50,000 capital to put up \$12,500 of bonds? The thing is inconsistent, unreasonable and foolish. We can have National banks and let the National bank circulation pass out of existence as the bonds are called. No friction, except constitutional questions, I think, to require, say \$1,000 bonds only by each bank, and circulation on it would settle that.

Now, this leads me to answer that which possibly is occurring to your minds to ask, What is the use of a National Banking system if that system does not furnish a currency? I think this is reasonably answered in the fact that the National currency is but about one-fifth of the total circulating medium to-day. We have at least six times as much gold in the United States to-day as we had in 1861. We have two hundred millions more silver coined than we had in 1861. We have a great volume of United States notes in existence, which are not being diminished. We can trust to the future for enough of something as well secured as the above, to fill up this one-fifth of National Bank currency as it vanishes. Can we not trust the future for that? But I repeat, in the name of all that is dear to us of commercial prosperity, of experience, of enlightenment, and the progress of a quarter of a century, do not let these well-managed banks be destroyed as a system, simply

because there is a law requiring some sort of lodgment of a very minimum amount of United States bonds, and absolutely no law *requiring* a note issue thereon. Indeed, to my mind the suggestion is preposterous. Circulation is not valuable to the National Banks as an income. I doubt if the banks as a whole make any money on the circulation they issue. They will be perfectly willing to let that part of their business go, if the people are content. For I have tried to show you that it is not a very important factor in the life and existence of National banks.

I will not enter very far into any suggestion as to what would be practicable and desirable in lieu of United States bonds, upon which an issue of circulating notes may be made by National banks when all the United States bonds have matured and passed out of existence. I am better content to plead for the organization and maintenance under the present espionage by the Treasury of the banks in securing to the people in an intense and unknown degree the safety of their savings, the conduct of their daily business by this class of institutions, and let the question of circulation sink into utter insignificance. Yet the last year has positively demonstrated that a crisis in the system has been reached, and will continue if the old lines are adhered to. It has been suggested, and I recommend that it be not relegated to oblivion without discussion, to lay a tax of two and one-half per cent. on circulation to be issued by any bank, such bank taking out an amount equal to half its paid-in capital, the Government requiring no security for guaranteeing the circulation. This accumulated tax fund would be sure to cover any general deficiency in failed banks. Let us hope that Congress will be swift to settle this vexed question.

The National banks paid \$1,602,137 tax to the United States on circulation last year. Did the Government need this tax, or was it just the old habit of taxing somebody, especially a bank? We ask that it be taken off.

But what of the silver dollar? Has not this Association repeatedly placed itself upon record as to the continued coinage of the dollar and lived in hope and anticipation of unity of action by the Nations? The Royal Commission is certainly looking forward to an endeavor to get a unity of action; meanwhile, our two great political parties are drifting into free coinage. Hear what one of them says in a declared platform: "The Republican party is in favor of the use of both gold and silver as money, and condemns the policy of the Democratic administration in its efforts to demonetize silver." Now hear what the other great party says: "We believe in honest money, the gold and silver coinage of the Constitution, and a circulating medium convertible into such money without loss."

Who, then, is now standing against free coinage? Neither of the political parties is opposed to it. This is very impressive. This also reminds me of the Irish cabman, when a gentleman said to him, in Dublin, "See here, driver, I ordered a smart trap to take a drive in Phoenix Park, and you come around in rags not fit for a beggar." He answered: "I know it, yer honor, and I would like to wear fine clothes, but there's not a tailor in all Dublin as can take me measure, I'm that devilish ticklish." We will rest our case without recession from our former declaration, ticklish as it is in politics. Our only hope is in International co-operation for a common standard.

Let us look at our Immigration Laws. The continued coming in of cheap labor cheapens wages at home, and is bound to result in mischief for our working people. I repeat—tax every male emigrant three hundred dollars, this will keep out the bad. Your American boy needs American protection, and foreign born boys among us will not be hurt by American ideas.

Commercial Trusts have been formed very rapidly within the last year and now behold, the farmers have formed a trust; still they were early in the field, as the granger movement of a dozen years ago was but this in spirit, if not in name. Make a common grave for selfish and unlawful movements against railways, etc., and commercial combinations against the necessities of life; see that the stone be not rolled away from this grave and the century will bend to true progress.

Has the Inter-State Commerce law worked good and not evil? Distinguished judges have recently declared that railroads are entitled to receive a reasonable

income upon their investments, so has the miller, so has the farmer, or the Congressman to draw his salary. This judicial opinion will be sure to meet the approval of fair-play men under a general principle of law.

I will not detain you longer on these questions before the country, for the conscience of the republic must finally work them out. Busy brains, bad brains and designing brains will propose all sorts of disturbing laws; how can it be otherwise in this great land of strangely conflicting interests of motive and of desire? A distinguished writer says:

The dark continent of motive and desire has never been explored. In the brain that wondrous world with one inhabitant, there are recesses dim and dark; treacherous sands and dangerous shores, where seeming syrens tempt and fade; streams that rise in unknown lands from hidden springs, strange seas with ebb and flow of tides, resistless billows urged by storms of flame, profound and awful depths hidden by mist of dreams, obscure and phantom realms where vague and fearful things are half revealed, jungles where passion's tigers crouch and skies of cloud and blue where fancies fly with painted wings that dazzle and mislead, and the poor sovereign of this pictured world is led by old desires and ancient hates and stained by crimes of many vanished years, and pushed by hands that long ago were dust, until he feels like some bewildered slave that mockery has throned and crowned.

Such is the troubled sea in which we must work out our better thought. With minds trained to a thoughtful pursuit, let this Association be ever a citadel of strength against all vagaries, as a strong ship in the Southern seas, entangled in the vicious sea-weed, great cables drifting aimlessly on the ocean, wandering islands without a name, yet ever retarding the ship's progress, so will it be slow and laborious to us; let us surrender ourselves to the leadership of this thought, as under the Great Taskmaster's eye, paying our tithes of mint, anise and cumin, as well as in the weightier matters of law, judgment and mercy, and doing it as one who knows it not,

"But rather like a vine that year by year brings forth its grapes and cares not for the wine."

And now, gentlemen, in a final official word, receive my grateful thanks for the opportunity you have so patiently and generously given me in this official position, which I am so soon to relinquish, for doing as best I might the things which looked for peace and prosperity, having had an extravagant joy in contemplating the possibilities we possessed.

Curiosities of Currency.—Almost every nation and tribe, as well as every epoch, has its peculiar currency. Not only gold, silver, copper, brass, iron, lead and paper, but glass, shells, beads, books, stones, soap, bits of various colored cloth and numerous other articles have been used to represent money. The Burmese, Karens and Ghans have no coined money, lead and silver in bullion being the ordinary tender in trade, weight and purity being the standard of value. It must be a curious spectacle to see a Burmese out on a "hurrah," with a lot of pig lead to spend at bars.

Salt was, for a long time, the ordinary money of the Abyssinians, which rendered it difficult for them to get a fresh supply when they were broke. Fish has long been and is now the legal tender of Iceland. "Shad scales" as money probably originated there.

The Carthaginians were the first to introduce a stamped leather currency. Leather coins with a silver nail in the center were issued in France by King John the Good in 1306, but they are not good now.

In the interior towns of Northern China slips of the bark of the Mulberry tree, bearing the imperial "chop" and a stamp to denote their worth, have long been used as we use bank notes, and malefactors who counterfeited them got the imperial "chop" also. Marco Polo found this kind of money there in his time, and they have still an extensive local circulation.

In some small villages in Scotland laborers formerly carried in their pockets nails in place of coin to pay "on the nail" for the day's supply of bread and ale, just as a native Australian divests himself of a string of beads for the purchase of some coveted luxury.

NEW HAMPSHIRE.**BANK COMMISSIONERS' ANNUAL REPORT.**

[We acknowledge receipt from Hon. James O. Lyford and Alonzo I. Nute, Bank Commissioners, of the forty-third annual report showing the condition of the one State bank, the three trust companies and sixty-nine savings banks of New Hampshire on the 31st of March, 1888. As the report is of unusual interest in that it treats largely of Western farm and city mortgages which represent more than one-third of the resources of the savings banks of that State, we have made liberal extracts from the report, believing it will be found of value to the JOURNAL'S readers.—THE EDITOR.]

By comparative tables it is shown that the amount of Savings Bank deposits in 1887 was \$50,292,666 and at the same date in 1888 \$53,989,079, an increase of over \$3,500,000; and the total liabilities show an increase of over \$4,000,000.

The total book value of resources foots up \$58,825,880 in 1888 of which \$21,713,679 or more than one-third of the whole amount is represented by Western farm and city mortgages and loans represented by Western personal and collateral security. The following figures show the increase or decrease in amount and character of loans during the past year, as well the deposits, surplus, etc.: Deposits, an increase of \$3,646,412; guaranty fund, an increase of \$413,812; surplus, an increase of \$243,926; miscellaneous indebtedness, a decrease of \$3,050; western farm and city loans, an increase of \$2,208,381; local real estate, an increase of \$273,836; personal security, an increase of \$6,917; personal security (Western), an increase of \$216,114; collateral security, an increase of \$721,221; collateral security (Western), an increase of \$145,880; United States and State bonds, a decrease of \$128,025; county, city, town and district bonds, a decrease of \$445,963; railroad bonds, a decrease of \$137,750; railroad stock, an increase of \$334,595; bank stock, an increase of \$166,395; manufacturing stock, an increase of \$94,635; miscellaneous bonds and stocks, an increase of \$813,500; miscellaneous investments, an increase of \$70,170; real estate acquired or held by foreclosure, an increase of \$24,081; real estate purchased for the banks, a decrease of \$1,418; cash on hand, a decrease of \$56,311.

WESTERN INVESTMENTS.

It is to be regretted that other matters so engrossed the attention of the last legislature that it did not have an opportunity to calmly consider the question of Western investments, and that no action was taken to bring within State control and regulation the large number of Western investment agencies that are doing business with the savings banks and the people of the State. Connecticut, early in 1887, by legislative enactment, brought all foreign investment companies operating in that State under the supervision of its bank commissioners. There can be no question as to the necessity of some supervision of the numerous foreign investment companies and agencies that are absorbing so much of the capital of New Hampshire. No foreign insurance company is permitted to do business in this State until it has made a satisfactory showing of its affairs to the insurance commissioner, but any foreign investment company can sell its securities unrestricted by regulation or license.

The high rates of interest that have heretofore prevailed in the West, and the almost uniform success that has attended the savings banks and individuals in their Western ventures, have led the people of the State to look upon all Western investments as secure, and to covet those bearing the higher rates of interest. An unhealthy stimulus has been given to the entire Western investment business. Loan and investment agencies have augmented in the West beyond any legitimate call for their existence, and not a few of them are conducted by men who have little capital invested, who are without business experience, and whose sole aim is to pay large dividends to the stockholders regardless of future consequences to the company or the investor. Loans are urged upon borrowers by agents working on commission, excessive valuations are placed upon the property accepted as security, and there is a general disregard of all business principles in the management of these companies. The State is overrun with the representatives of just such companies. They have not met with much encouragement from the savings banks, but they have found a fertile

field of operation with the individual investor, whom they induce, by the tempting offer of higher rates of interest, to withdraw his deposit from the savings bank and invest directly in Western securities.

The more conservative of our savings banks are limiting their dealings to fewer companies, and to those only of well-established reputation. Some of them are not renewing their loans as they mature, but are re-investing the proceeds in marketable securities. The wisdom of their course is plain: for unless there is intelligent discrimination on the part of all classes of investors in Western securities, the next few years will be fruitful of loss and disaster. The following private letter from the Cashier of a Western company is in accord with much of the testimony that comes to us from the West, of the manner in which the Western loan business is now conducted:

"I am frank to say that a condition of affairs exists in portions of this State which is to be deplored, and which will prove a curse incalculable in its effects. This condition has not arisen out of the necessities of our people. It is a condition for which the more careful and conservative companies, handling Western securities, are not responsible. It is due in part to the avarice of Eastern investors seeking a higher rate of interest than the farmer can afford to pay, therefore higher than responsible loan companies can provide the securities. Investors have therefore sought the higher rate of interest from loans negotiated by loan agencies neither morally nor financially responsible. The system of doing business through commission agents is bad, and productive of injury to the community through over-solicitation of loans, which carries with it a train of evils, and to the investor, who must suffer for the guile or ignorance of the agent. This State is not, in my judgment, invested with a greater curse than the hundreds, yes, thousands, of unprincipled loan agents who now dwell within its borders. For the last two years loan companies have been in operation on a small capital, conducted by men without any financial experience, with no prestige among bankers, or standing with the men calculated to give strength, tone, or character in their own community, dependent upon local agents for their business, and upon the negotiation of each loan before its proceeds could be paid to the borrower. By such companies business has been done in the poorer sections, and loans made on comparatively valueless lands and outside town properties. Thousands of dollars of such loans must eventually default both interest and principal. At first defaults will be glossed over, the holders of the defaulted paper misled by misrepresentations, and the full fruit of such business will not be apparent for two or three years. Then its influence will be damaging to the community, to the State, and to all reputable companies. Anticipating the consequences, we as a company have limited what business we may do to choice sections of this and other States, and loaned only at legal rates, which are as high as are consistent with absolute safety. That so few losses, comparatively, have occurred through Western loans indifferently secured and placed by irresponsible representatives, is largely due to the fact that the lands have steadily appreciated; but this is an unstable basis for a loan, and offers no guaranty of payment at any subsequent time."

Western farm loans have been for a number of years profitable investments for our savings banks and for private investors. They have enabled the banks to pay higher dividends than similar institutions in adjoining States, and to-day, if made at about the legal rate of interest with a view solely to the security of the investment they furnish a safe field for Eastern capital. But the Western investment business has been taking a wider range within a few years. To no inconsiderable extent Eastern capital has been used to boom Western localities, and money has not been loaned on the intrinsic value of property, but on its prospective increase. Mortgages on lots in the additions to so-called cities, and mortgages on town lots where cities are expected to spring up, have superseded the farm loans, because of the higher rates of interest offered. Chattel mortgages, so difficult to negotiate if the property were situated in the East, debenture bonds based upon second mortgages, bonds for the development of towns, cities, and counties whose growth is problematical, form no small part of the Western investments now sent to the New Hampshire market. In their dealings in Western securities, as in their discrimination between Western investment agencies, the savings banks of the State can exercise a healthful influence on the private investor. The bank examiner of Maine, Hon. Fred. E. Richards, in his last annual report, well says:

"As custodians of the poor, trustees of the property of widows, orphans, and charitable institutions, savings banks stand before the public as the great conservators of value. They are the acknowledged tribunal whose determination discriminates, measures, classifies, and selects such securities as are a fit investment for such a trust. Their influence has a salutary effect upon private investors."

The day of high rates of interest in the West has gone by. With capital continually flowing into that section, interest rates have decreased until in the older Western States they are but little if any higher than in the East, on safe investments. This is the testimony of all reputable investment companies, and it is confirmed by

replies to letters addressed by the commissioners to life insurance companies of Connecticut and New Jersey that are large holders of Western loans. The President of one company carrying \$16,000,000 of Western farm mortgages, writes:

"My impression is, that our Western loans will fully average six and one-half per cent. net to the company. This company has been engaged for thirty years in loaning money upon Western farms, commencing with the time when the rates of interest were as high as ten per cent., and our experience teaches us that this class of investments is safe and desirable if properly made."

The President of another company writes:

"This company, as you are aware, holds loans of that description to a considerable amount, made during the last six years, most of them of more than three years' standing. We are well satisfied with them in all respects as investments. In a large majority of instances the rate of interest is six per cent. In a few cases of city-property mortgages the rate is a little less, and in some farm mortgages a little more."

The President of a third company holding \$20,000,000 of Western farm loans, writes:

"I beg to say that our investments in Western farm mortgages are confined to that section of the country which we consider the best portion of the 'corn belt,' including in general outline the northwestern part of Ohio, the northern three-quarters of Indiana and Illinois, northern and western Missouri, the eastern third of Kansas, with some exceptions as to the southeastern portion, the southeastern corner of Nebraska, and all of Iowa except the two northern tiers of counties; and within this best portion we try to get the best borrowers and the best security. To that end we . . . come directly face to face with the borrower through our correspondent. In most cases we can get but six per cent. for the class of security and borrowers we desire. In some instances, however, and on small amounts, we can get seven per cent."

Excepting the territories of Dakota and Washington, where in some sections a higher rate of interest prevails, it is apparent that safe Western farm loans, now made, will not net the Eastern investor much over six per cent., and certainly not over seven per cent. Many of the loans now held by the savings banks of the State, bearing a higher rate of interest, were negotiated by them several years ago, and have not yet matured, or having matured, have been extended for a year or two at the same rate of interest. With money plenty in the older sections of the West, the borrower with ample security is not obliged to pay more than the legal rate of interest and the commission for negotiating the loan. If life insurance companies, dealing directly with the borrower, cannot get more than six, six and a half, and seven per cent. on what they consider good investments, it is evident that investment companies, firms, and individuals offering for sale loans bearing a higher rate of interest have taken risks not consistent with safety. While no individual, firm, or corporation dealing in Western securities is restricted by law from doing business in this State, it would be good policy if private investors, as well as the banks, dealt only with those agencies of known financial soundness and established business reputation, and the part of wisdom for all the banks to follow the lead of the few in increasing their quick assets to meet any possible emergency that may arise from indiscriminate investments in the West. It seems to us that the passage of a law similar to that of Connecticut, but more comprehensive if need be, which should subject all foreign investment agencies operating in this State to examination and license, would do much towards driving out irresponsible parties and placing the Western investment business on a stable basis. In the main, the officers of the savings banks are in favor of such a law, and in the absence of any State regulation are endeavoring to eliminate those agencies that they deem unsafe.

In this connection, we call attention to the following recommendation of the Connecticut bank commissioners:

"Debenture bonds should be secured by the deposit of loans . . . with trustees having no connection with the company issuing them, preferably with a corporation located in some one of the financial centers. The trustees should have absolute title to the securities deposited, and be in full possession of all papers relating thereto. If the trustees were at all times kept in possession of funds sufficient to pay one installment of interest, it would be a safeguard against any sudden stringency in the money market that might occur at the time the interest became due."

How to Increase Business.—C. T. Walker, Cashier of the German National Bank, Little Rock, Ark., writes under date of August 15th: "We desire to increase our business as much as possible and can see no better way than by advertising in the *JOURNAL OF BANKING*. I therefore enclose you order for a page advertisement in the *JOURNAL* with copy for same. I hope you can give us a prominent page in your very excellent publication."

STATE OF VERMONT.

ANNUAL REPORT OF CONDITION OF SAVINGS BANKS AND TRUST COMPANIES.

Hon. Carroll S. Page, Inspector of Finance submits the following as the condition of savings banks and trust companies doing business in the State of Vermont on the 30th of June, 1888. The text is from advance sheets of the report which is dated September, 1888, and will be submitted at the beginning of the next legislative session.

The steady growth of deposits in these institutions, the slow but certain increase in accumulated reserve, and especially the important changes being made from year to year in the nature of investments in Vermont savings banks, are matters demanding especial consideration.

DEPOSITS AND DEPOSITORS.

The whole number of depositors in all the savings banks and trust companies in the State at the date of the reports, June 30, 1888, was 57,520, an increase during the past year of 3,710, being 8,067 more than there were two years ago.

There was to the credit of such depositors on the thirtieth day of June last \$16,602,067.76 showing an increase in amount of deposits during the past year of \$1,015,016.83, and in the past two years of \$2,348,104.29.

Of the total amount of deposits in the different savings banks and trust companies, \$13,888,186.65 belong to depositors living in this State, being an increase of \$885,642.96 as compared with 1887, and of \$1,988,229.96 as compared with 1886. The amount belonging to non-residents is \$2,713,881.11, being an increase of \$129,373.87 as compared with 1887, and of \$359,874.33 as compared with 1886.

The average amount to the credit of each depositor is \$288.63, a decrease of \$1.04 as compared with 1887.

DIVIDENDS AND EARNINGS.

The reports show that \$539,944.82 has been credited to depositors' accounts for interest on deposits in savings banks, not including trust companies, and \$28,750.00 as dividends to stockholders in trust companies, an increase of \$23,761.23 over the amount credited last year to depositors, and a decrease of \$50.00 in amount paid to stockholders.

Of the nineteen savings banks, one, the West Fairlee, has again passed dividends with a view to winding up the institution.

Table four shows that two savings banks paid five per cent. dividends to depositors; eleven, four and one-half; two, four and one-fourth; and three, four per cent. Of the ten trust companies, one has passed dividends to stockholders; one has paid ten; two, eight; four, six; one, five; and one, three per cent.

ACCUMULATIONS AND SURPLUS.

The guaranty or surplus reserved, agreeably to Act of 1884, amounted, June 30, 1888, to \$400,411.31, an increase of \$50,510.71 during the past year, and of \$100,079.20 since 1886; while the total accumulations, including the surplus, undivided earnings and interest, amount to \$901,973.43, being \$125,860.44 more than last year.

LOANS AND INVESTMENTS.

During the past year there has been an increase of \$138,681.05 in the amount loaned on mortgage security in the State, and of \$387,894.38 on mortgage security out of the State.

Loans on personal security have increased \$202,254.04, while loans to towns, villages, etc., are \$16,228.18 more than last year.

Loans on bank stocks have increased \$24,783.70.

The item of real estate owned has increased from \$218,474.96 last year to \$227,066.12, an increase of \$8,591.16 for the year, and \$51,190.41 over 1886.

State, city, county, town, village and school bonds now amount to \$3,475,118.97, showing an increase during the year of \$323,387.44, and of \$761,049.53, as compared with 1886.

There has been an increase of \$25,900.00 in amount of National bank stocks owned as compared with 1887, and of \$75,565.00 as compared with 1886, the amount now owned being \$391,655.00.

The items comprising miscellaneous assets can be found by examination of the detailed reports.

The amount of cash on deposit in banks, mostly on interest, has increased from \$625,706.00 last year to \$653,455.20 this year.

The amount invested in United States bonds is \$256,610.00, being a decrease of \$4,850.00 as compared with 1887 and \$79,400.00 as compared with 1886.

Cash on hand June 30, 1886, \$144,845.43; 1887, \$136,269.75; 1888, \$137,819.65.

The percentage of assets in the various classes of investments, as shown by the detailed reports of the several institutions for the years 1884, 1885, 1886, 1887, 1888 is as follows:

	1884.	1885.	1886.	1887.	1888.
In public funds and loans thereon and to towns, counties and cities	23 36	21.05	21.55	21.43	21.91
In bank stock and loans thereon	4.26	3.96	3.24	3.19	3.31
In mortgages of real estate in this State	20.30	20.27	20.96	20.68	20.12
In mortgages of real estate elsewhere	31.43	32.07	35.61	36.90	36.41
Real estate99	1.14	1.07	1.29	1.26
Loans on personal security	10.45	10.43	9.25	8.95	9.49
Miscellaneous assets and on other collateral security	5.05	4.80	3.64	3.05	3.11
Deposits in banks, mainly on interest	3.06	5.51	8.74	3.71	3.63
Cash on hand	1.01	.77	.94	.80	.76

TAXES.

The direct taxes paid to the State Treasurer by the trust companies and savings banks for the year ending June 30, 1888, amount to \$95,394.54, which is \$8,936.63 more than last year and \$12,282.58 more than in 1886.

THE WEST FAIRLEE SAVINGS BANK.

This institution is doing no new business and its affairs would have been long since closed but for the fact that over \$14,000 out of its entire \$16,000 of assets are Vermont Copper Company bonds. These bonds have been held by the Savings Bank to await sale of the mining property, which has recently been effected, and it now seems probable that its affairs will be finally closed during the coming year.

NEW SAVINGS BANKS.

Since the last session of the Legislature three savings institutions have been organized in our State, *viz*: The White River Savings bank at White River Junction, the People's Trust Company at St. Albans and the Citizens' Saving Bank and Trust Company at St. Johnsbury, making twenty-nine of these institutions in the State, not including the St. Albans Trust Company which is in the hands of a Receiver.

THE VERMONT INVESTMENT AND GUARANTY COMPANY.

This institution is not, in any sense, a savings bank, and the inspector is not required by law to make an examination of its affairs. The statute, however, provides that the inspector shall "have power to examine into the affairs of said corporation to such an extent as he shall deem the public good may require," and being invited by its managers to make an inspection I examined its assets and methods of doing business. I should be pleased to express my views fully upon the management of this company, but do not deem it proper to make the inspector's report a medium for commending any financial institution. It is, however, a matter of simple justice to say that its officers are painstaking, careful and methodical and its Directors, who comprise some of the most successful and substantial business men in our State, appear to be thoroughly conservative in their ideas of management.

DEATH OF TREASURER CHAPMAN.

The death of George R. Chapman, Treasurer of the Ottauquechee Savings Bank, removes the oldest, and one of the most conservative, efficient and highly esteemed managers connected with the savings banks of Vermont. He regarded his position as a post of honor and trust and gave to it the best energies of his life. By his death Woodstock suffers the loss of a highly respected citizen and the bank an able and painstaking official in whose integrity and faithfulness they have implicitly and safely confided for many years.

RECOMMENDATIONS.

The savings banks of Vermont are in most respects models of financial management. With scarcely an exception they are in the hands of our most conservative and substantial business men. They have, as they deserve to have, the confidence of our people to such an extent that the average amount to the credit of each depositor is larger than in any of the other New England States, or New York, with the

exception of Rhode Island, in which State there is not, as in Vermont, a limit to the amount which may be received from any one individual.

I should, however, come short of what I believe to be my duty, were I to terminate my official relations with the savings banks of Vermont without giving expression to my well settled conviction that trustees, in their anxiety to pay their depositors liberal dividends, are in too many instances allowing the *quality* of their assets to fall below the high standard which should be maintained. The large rates of interest which western borrowers are able to offer are too attractive for the ordinary investor to withstand, and funds received for the fine line of government and municipal bonds which have been maturing during the past few years have been reinvested, in by far too many instances, in western mortgages. To show the tendency in this direction your attention is respectfully called to the following facts, shown by the savings bank reports for the past ten years. The amount of western mortgages held by the savings banks of Vermont on June 30th in the years 1879 to 1888 inclusive were as follows:

1879.....	\$1,278,399.63	1884.....	\$4,651,274.96
1880.....	1,755,399.38	1885.....	4,774,872.17
1881.....	2,219,696.44	1886.....	5,466,271.64
1882.....	3,168,434.98	1887.....	6,225,908.10
1883.....	3,950,143.44	1888.....	6,563,797.48

Now, whatever may be claimed in behalf of western mortgages, the time has certainly come when we should apply to this matter the homely maxim which teaches that we should not put too many eggs in one basket. It is true that these investments enable our banks to declare larger dividends than they otherwise could, but we should not lose sight of the well-known principle which should always govern savings banks, that large dividends are of secondary importance as compared with absolute safety. Confidence in our entire system of savings banks is all important to the end that our workingmen and middle classes, for whose benefit they were more especially established, may use them more and more extensively. Disaster to any one of them inflicts an injury upon all and is a shock to public confidence which causes irreparable injury to the general welfare of the State. Experience demonstrates clearly and conclusively that high rates of interest are not the attractive feature of savings banks in the eye of the depositor, but rather absolute freedom from any misgivings or uneasiness with reference to the safety of the principal. The banks paying the largest dividends are not those which show the most healthy growth. But even if the reverse were true, still the State owes it to the general welfare of all to see that such a policy is pursued as shall prevent, as far as may be, the possibility of disaster to any. There are several savings banks in Vermont which I believe should have divided fully one-half per cent. less per annum to their depositors, during the last four years, investing the extra half per cent. in premiums upon first-class municipal bonds, bonds of cities and counties whose credit ranks so high that in case of any financial stringency they would be readily convertible without sacrifice. To do otherwise is to invite a run upon the weaker institutions upon the slightest indication of approaching financial disturbance. Let those who prefer high rates to absolute safety withdraw their funds from savings institutions. Trustees should cheerfully welcome such withdrawals as being for the good of their institutions. To try to attract deposits by high rates is subverting the purpose for which savings banks were established, and in my judgment is little less than a crime.

It is my well settled conviction that the law allowing investments in western mortgages should be so amended as to permit only 40 per cent. of the entire assets of any savings bank or trust company to be invested therein, and the law with reference to dividends so changed as to prohibit the declaring of more than 4½ per cent. per annum, until a net reserve of at least 10 per cent., without including furniture, fixtures, premiums or uncollected interest, be accumulated; and that until a net reserve of at least 6 per cent. be accumulated the dividends be restricted to 4 per cent. I would further recommend that the law with reference to municipal bonds be so amended as to permit investments in the county bonds, and in the bonds of cities of 10,000 population or more, in the States of New York, Ohio, Minnesota and Michigan, where such bonds were not issued in the aid of railroads and where the indebtedness of the county or city does not exceed 5 per cent. of the assessed valuation of such county or city. Under existing laws no municipal bonds of any kind issued by the cities or counties of any of these States can be held by Vermont savings banks. I believe there are other city and county bonds which might safely be added to the list of those in which our savings banks may invest.

THE BANK OF FRANCE.

[The following very interesting article is from the London *Bankers' Magazine* for August. It gives a new insight into the inner workings of this famous financial institution.—THE EDITOR.]

CONSTITUTION AND GENERAL PRINCIPLES OF WORKING.

The transactions of the Bank of France have been recorded in the *Bankers' Magazine* from the year 1875—those for that year will be found in the magazine for 1876—to the present time. The reports have been translated and given in full, both those which proceed from the Governor and those which are made by the Censors, who may be regarded as officers performing some of the duties usually entrusted to an audit committee. A complete abstract of the very voluminous tables of accounts given in the original reports—as extensive as the demands on our space permit us to include—has likewise been furnished from year to year. This abstract gives copious details as to the nature of the business carried on by the bank, and enables its course and extent to be traced with great completeness. It is our intention on the present occasion to give an analysis of the working of the bank for the last ten years over which the accounts published by us extend, comparing this in some points with earlier figures showing what the similar transactions were in the years 1845-1846-1847, thus enabling us to trace the changes in the development of the business which have taken place during the period first mentioned, and also in some degree between the present time and a date some forty years since. During the last ten years the course of business in France has been tranquil, unruffled by great political disturbance or European war. As has been the case in our country, affairs have felt the serious and long-continued depression of trade in France; they have followed, however, a steady course, uninfluenced by any very violent outburst of speculation. Hence the period selected for examination may be taken as fairly indicative of the ordinary current of affairs.

The working of the Bank of France is connected in a very intimate manner with the business of that country, and hence a *resume* of what has been done by that powerful institution will enable us to follow to a considerable extent the course of business in France itself. There are also in that country several other very strong banking companies, besides great private firms which carry on a vast business. But notwithstanding the existence and competition of these other institutions, the Bank of France holds very distinctly the foremost place; and the share taken by it in assisting the conduct of the general trade of the country is far larger than that which is taken by the Bank of England here.

The Bank of England has different functions to perform. The Bank of France, besides being far more distinctly under the control of the Government than is the case with the Bank of England, has likewise, at the bidding of the Government, extended its operations by means of a very numerous body of branches and subordinate agencies, over the whole surface of the country.

Having preface'd our remarks with these explanatory observations, we will now proceed to trace the history of the establishment and the principles of working followed by the Bank of France. The bank itself dates back to the year 1800, when a number of the principal bankers and merchants of Paris and the provinces, who were anxious to bring back to France the capital which political events had driven out of the country, founded, under the title of the "Bank of France," a joint stock company of the description which in France is called a "Societe Anonyme." The capital was fixed at thirty millions of francs—say £1,200,000—divided into 30,000 shares. The principal occupation of this association was to be discounting; it likewise issued notes payable to the bearer, at sight; but, at first, the Government granted it no special privileges with respect to these issues.

The bank carried on business on these lines till the year 1808. During the period from the commencement of the century to that year a great number of other commercial institutions issued notes likewise. The number of issues and the variety of notes hence resulting, caused uncertainty and hesitation in the mind of the public

with respect to the whole paper circulation. The people became doubtful as to the real value of the notes in their hands, and finished by declining to accept any of them; thus the circulation became impeded. Meanwhile the ability with which the affairs of the Bank of France had been carried on impressed the mind of the First Consul—Napoleon I.—so strongly, that by the law of "24 Germinal, An XI.," a date which corresponds with 1803, he granted it the privilege of being the sole issuer, in Paris, of notes to bearer, payable at sight. In the provinces other banks were allowed to issue notes for some years later. At the same time the capital of the bank was to be increased from thirty million to forty-five million francs—that is to say, from £1,200,000 to £1,800,000. After three years time several further changes were made. The organization established by the Emperor Napoleon I., in 1803, under which it is practically carried on at the present time, arranged that the management of the bank should be in the hands of a general council, whose members were to be elected by the shareholders, and of the governor and two deputy-governors, all these three last being appointed by the chief of the State. The general council, which remains as fixed when the bank commenced its operations, consists of fifteen regents and three censors, appointed by the general meeting of the association. Of these fifteen, however, two have always to be chosen among the receivers general. These officers (the receivers general) are named by the Government, and have very important duties in connection with the receipt of taxes, Government payments, the raising loans when required, and other duties of a similar nature in connection with the revenue. The general meeting is formed from the 200 shareholders whose holding is the largest; these are representative of the whole body of shareholders. The regents are elected for five years, the censors for three; the censors are particularly charged, by the Statutes, with the duty of watching over the operations of the bank, and of verifying the amounts of securities and cash held. The general council meets weekly.

In 1808 the capital was increased from 45 to 90 millions of francs—that is, from £1,800,000 to £3,600,000. Some alterations were subsequently made. In 1857 it was increased from £1,250,000 francs, at which it then stood, to 182,500,000 francs—that is, from £3,650,000 to £7,300,000, at which amount it stands at present, with a reserve of profits in addition to capital of about 8,000,000 francs—£320,000, and other reserves of 36,000,000 francs—£1,440,000. It thus possesses resources (including these reserves, which, collectively, amount to about £1,700,000) of about £9,000,000 in all. The bank now possesses 94 branches, and many towns in which no branches exist are likewise included in the scope of its operations through the branches for discount purposes and other banking facilities; including Paris there are 258 places thus brought within the influence of the Bank of France. The establishment of the offices beyond Paris commenced in the year 1808. In that year branches were opened at Lyons and Rouen, followed in 1810 by a branch at Lille. The many struggles which the country went through caused these branches to be suppressed, and from 1817 to 1836 the bank confined its operations to Paris alone. In 1836 the work of establishing branches over the country was recommenced, and at the present time every provincial centre of any importance is provided with a branch of the bank. The circulation of the notes of the bank continued to increase. By the law of 12th August, 1870, notes of 25 francs (£1) each were authorized, and on 12th December of the same year notes of 2½ francs (16s.) were permitted. Notes of 5 francs (4s. 2d.) have also been issued. At the present time, as will be seen by the analysis of the circulation which will be given further on, these small notes have practically been withdrawn.

The principal business of the bank lies, as mentioned previously, in the discounts of commercial bills and in making advances to facilitate trade. Very strict rules are laid down for the conduct of these operations. The paper presented for discount is examined by a committee, consisting of the governor, the two deputy-governors, of four regents and three members of the council for discount. The deliberations of this committee are private. Bills cannot be admitted for discount without the approval of the governor. The bank only discounts genuine commercial bills, payable to order, with a date not exceeding three months, and provided with at least three signatures, that is, a drawer, a drawee and one indorser, who must all be persons known to be in good credit. Paper with two signatures may, however, be admitted, if it takes its origin *bona fide* from a business transaction, when the third signature is replaced by a transfer of Government securities, shares of the bank itself, or of any

of those securities on which the bank is authorized to make advances. Receipts for deposits of goods, equivalent or analogous to dock warrants, may also be taken in place of the third signature. When the bills have been admitted to discount, those who present them may draw for the amount on the day that they are brought. If, when they fall due, the bills are not paid, the person for whom they have been discounted is bound to repay the amount immediately to the bank. The rate of discount is fixed by the general council; it has to be uniform at the branches and the central bank, unless a special permission is granted by the Government. By the law of 1857 the bank was permitted to raise the rate both for discounts and advances above 6 per cent. when circumstances required it.

Current accounts, with or without arrangements for discounts, may be opened with the bank, when permission has been granted by the general council. A request for permission must first be addressed to the governor; this request must be supported by a certificate, the form of which is supplied by the bank. This has to be signed by three persons known to the bank—custom requires that they themselves should have accounts with the bank. No person who has failed in business, and whose failure has not been annulled, can have a current account with the bank. Persons who wish to place money with the bank, but not on current account, can do so on deposit receipt; but no deposit receipt can be granted for a sum below £200 at Paris, and £80 at the branches.

The bank will take charge of any public securities—whether French or foreign—of which the dividends are payable in Paris, for any person who desires it.

There is an annual charge for this service, which is as follows:—

20c	say 2d.	for securities of 1,250 francs, say £50 and below	
30c	" 3d.	" " 1,251 to 2,000 francs, say £50. 10s. to £80	
40c	" 4d.	" " 2,001 " 3,000	£80. 10s. to £120

and for larger amounts according to the same scale.

Amounts in the public funds of France are charged for at the rate of 10c. (say 1d.) for every 25 francs (£1) of income, being 4 per *millé*. The minimum charge is a franc for the deposit, not including the stamp. The bank receives and pays over without charge the dividends arising from the securities placed under its care.

The Statutes of 1806 permitted the bank to make advances on the public securities of France, which were repayable at a fixed date. By the law of 17th May, 1834, this permission was extended to those securities which were not repayable in this manner. An imperial decree of 3rd March, 1852, extended this authority to the shares and bonds of the French railways; another decree of the 28th of the same month extended this permission to the bonds of the city of Paris; it was further extended by the law of 9th June, 1857, to the bonds of the "Credit Foncier," and finally by the decree of 13th January, 1869, to the bonds of the "Societe Generale Algerienne." As the securities of this nature are continually exposed to fluctuations in market value, the bank could not allow the borrowers to borrow the amount of the market rate of the day, without exposing itself to the risk of holding, perhaps the next day after the loan was made, a security not equal in value to the advance. Hence a margin has to be taken against this risk. The regulation of this margin is one of the duties of the general council; it varies according to circumstances and the class of securities; but for advances on the public funds the margin must never be below 20 per cent. Besides this guarantee the borrower engages to cover the bank for any drop which may occur in the value of the securities on which the advance is made. The length for which the advance is made is invariably for sixty days on every class of security on which an advance is allowed to be made.

The bank also makes advances on bullion, both gold and silver. In these cases it is willing to advance up to the nominal value of the security. The regular charge for interest is 1 per cent., but with a minimum charge of thirty-six days' interest if the transaction is closed within a shorter time.

The bank supplies drafts payable to order, at sight, on all the towns in which it has branches. The same facility is offered to the public, with respect to similar drafts on Paris in all the towns in which branches exist. But the branches are not allowed to issue drafts on each other, as the law does not allow them to carry on any business between each other, at all events without an express authority from the general council. The bank charges a commission on the amount of these drafts; this commission varies according to the distance of the towns on which the drafts are sup-

pled; this commission, which is fixed by the general council, cannot be less than 50 cents, say 5*d.*—and the maximum does not exceed 1 per *millé*.

It will be seen from these details as to the mode of conducting the operations of the bank that the care of the bank extends to very minute, as well as to the very largest, operations. The retail trade of Paris and the provinces, as well as the transactions of the Stock Exchange and the *haute banque*, come equally under its purview and are fostered by its assistance. We shall see this clearly when we examine into the details of the working of the bank.

The bank was established, as we have mentioned, in the first year of the century, for the purpose of facilitating—distributing, it has been said—credit over the whole surface of the country. When it was founded, Count Mollén, the most celebrated and able Minister of Finance under Napoleon I. (Count Mollén took office in 1806, and continued in it till the fall of the first Empire), observed that if a bank which circulated notes contrived to form for itself, through a rigid adherence to principle and the prudent rules laid down for its business, a character of *infallibility*, it might actually be able to carry on its affairs without the need of possessing any capital at all. The reason he gave for this was that if it only issued notes against real and *bona fide* mercantile bills, running from two to three months, representing goods and covered by three good signatures, it ought never to make any losses at all.

In expressing himself thus, Count Mollén no doubt did not in the least intend to recommend that a bank should be established without possessing a sound and solid amount of capital, but that the capital should be retained as a guarantee for the operations of the bank, and not employed in the ordinary transactions of its business. It is perfectly impossible that business should, in any country, preserve an absolutely smooth and uniform course. From the very nature of things there must constantly be fluctuations in it—one bad harvest, much more a succession of bad harvests, disturbances in other countries, political troubles, speculation—all these circumstances affect a bank which, as the Bank of France does, ramifies throughout the whole of a large country—very sharply at times. It has been the merit of the Bank of France to have maintained its credit at a high level through a series of difficult circumstances. The desire of the Emperor Napoleon I. in arranging its constitution was that it should always be ready to lend money at 4 per cent. It is, of course, impossible to enforce such a desire. Even the Emperor himself would have found it as easy to decree that the price of wheat should not rise above a certain and fixed limit, as that the price of money should invariably remain at the same level. At the same time it should be mentioned that the fluctuations in the rate of the Bank of France have never been so extreme as in the case of the rate of the Bank of England. This has partly resulted from the fact that the Bank of France is far more under the direct control of the ruling powers of that country than is the case with the Bank of England. And the greater steadiness of the rate is probably connected also with the very different circumstances of business in each country. England is far more distinctly exposed, through the nature of the business carried on in the country, to violent fluctuations than is the case in France. Something, perhaps, is also due to the constitution of the two banks—the division of the Bank of England into the two departments of banking and issue has a tendency, no doubt, to mark off its reserve by more strict and rigid lines than occurs with the Bank of France, where no such division occurs. Something, also—and perhaps this factor has the greatest weight of all—depends on the fact that the use of credit is far less distinctly developed in France than in England. With us the whole of the country is so much more efficiently supplied with banking facilities than France, that the ramifications of credit extend much more completely over the whole surface, and any check to it is felt much more acutely. At the same time it is due to the Bank of France to say that it has performed the duties committed to it with prudence, skill and firmness; and that in the many difficult epochs through which France has passed this great credit institution has—in bad times as well as in good—conducted its operations with vigor and with sobriety to the great and permanent advantage of France.

“Rhodes' Journal of Banking discusses current financial propositions incisively and intelligently. The banking law department contains the latest banking decisions, notes on financial law and answers to queries on law and banking matters. The other departments are unusually full and interesting.”—*St. Paul Pioneer-Press*.

FINANCIAL MATTERS IN CHICAGO.

[From the JOURNAL'S Chicago Correspondent.]

While there has been quite a perceptible hardening of money rates during September, the demand has been nothing like that of previous years. But this should not have been expected in view of the subsidence of real estate speculation throughout the West, together with the excitement incident to the presidential campaign. The former, however, I believe to be the chief cause. The lateness of the season is also in a measure responsible. Call loans are five and six per cent., with time loans at six and seven; a few at eight. Board of Trade loans have been more active by reason of the revival of trade in that quarter. New York exchange closed the month at seventy cents per \$1,000 discount. A gradual lowering of rates on first class inside real estate is constantly taking place, and a limited amount of funds can now be had at $4\frac{1}{2}$ per cent. on the above security. This is about the lowest point yet reached, and demonstrates the growth of the city as a financial center.

The real estate market continues quiet as far as buying for speculation is concerned. Much property changes hands, but nearly all of it goes to supply homes for the purchasers and to meet the demands of the city's growth. Speculation is seeking other channels where the profits are more rapid, but more precarious. Chicago real estate is a decidedly good investment and values continue to appreciate; in short, the market is in an eminently healthy condition—more so, in fact, than the brokers desire.

The feeling among our stock brokers is one of strength, and there is every reason for it. The recent action of the St. Paul directors is thought to have pricked the bubble of inflation wherever it existed, and placed stocks upon a solid basis of value, from which there is likely to be a gradual and healthy appreciation. Certainly there is every prospect of a large volume of business for the granger roads, which should make a marked increase in their earnings, unless the suicidal policy of rate cutting is inaugurated, which, I am inclined to think, will be avoided as much as possible this Fall. The roads have no money to waste in that manner.

The past month has been one of much excitement and heavy trading on the Board of Trade. The reports of shortages in the wheat crop both at home and abroad have pushed the price of that cereal above the dollar point for future delivery, and to two dollars for the month just closed. But the last was due to manipulation and the corner engineered by B. P. Hutchinson, who seems to be the autocrat of the wheat market this Fall. There was not an extended short interest involved in the corner, as all had plenty of warning and the majority got out in time. A few large operators here and in New York were squeezed, and it is reported that Mr. Hutchinson netted something over three millions from the deal. The December option, in which the most of the trading has been done, reached 105 on September 29th—the highest point so far. The fluctuation during the month has been from $90\frac{1}{2}$ up to the point above mentioned. The opening of October will probably witness higher prices, when it will doubtless begin to affect provisions and other grains.

The sessions of the Board have been recently changed, doing away with the afternoon session entirely, while the regular session now closes at 1.15 P.M., opening as before at 9.30 A.M.

Chicagoans interested in mines and mining seem to anticipate a revival in mining speculation, and the establishment of mining exchanges in St. Louis and Kansas City has led to the belief that Chicago should have one too. While it is quite probable that people have by this time so far forgotten the experiences of the past as to be ready to dabble in mining stocks again, it is quite improbable that there is enough business in Chicago to warrant the maintenance of an Exchange. Chicago is too remote from mining centers, and then it already offers too many other varieties of speculation of which it is the recognized head.

The activity on the Board of Trade has had a depressing influence upon the Stock Exchange business. The operations have been of limited extent, and there is great

need of a fluctuating local security. The quotations of the various stocks listed show very slight variations from last month's prices, so I have omitted the list this month.

I hoped by this time to be able to record something definite in regard to our elevated railroad projects; but everything seems to be *in statu quo*, awaiting the action of the city council. It is not improbable that this latter body is awaiting some "incentive" to action from the companies. Such things have occurred before.

The incorporation of numerous building associations, mentioned in a former letter, has led to the organization of an association or central governing body, having in view the regulation of the business, and to prevent injurious competition and rivalry. In fact, it looks something like another trust!

The suburban town of Pullman has just passed through an experience with a young imitator of Mr. Ives. The Roseland bank had for its President a young man by the name of Swart, who, after obtaining a good line of deposits from the working people and farmers in the vicinity by offering high rates of interest on deposits, and embarking in numerous enterprises to induce confidence in his victims, silently stole away to Canada with all the available assets of the bank, leaving his depositors and contractors to ponder over the fickleness of fortune. The bank is an absolute wreck, and many poor people have lost the savings of years. How long shall Canada continue to afford a refuge for such rascals?

The very excellent savings bank law, passed by the Illinois Legislature not long ago, has been adjudged unconstitutional by the State Supreme Court in a test case. The decision of the Court is that the measure should have been submitted to a vote of the people, as provided in the State Constitution, before it could become a law. The efficacy and desirability of the law itself were not questioned, and without doubt it will again pass the Legislature and be presented to the people for suffrage in regular order. It is a much needed provision in this State, and it is to be deplored that any hitch in its enforcement should occur. It provides for State supervision of savings banks, and makes possible the organization of such substantial institutions as the Merchants' Loan & Trust Co. of this city. The want of such a law has heretofore placed savings banks in discredit in Chicago, and thus we have been deprived of one of the most potent causes of prosperity among the laboring classes. H. M. JORALMON.

A Bank Clerk's Punishment.—A new method of punishing dishonest bank clerks is now being tried in a certain institution not far from New York. Some time ago a clerk's accounts were investigated and he was found to be several thousand dollars short. To remove and prosecute the man would have been troublesome and apt to hurt the reputation of the bank, so they have made him stay, as if nothing had happened, but have placed him in such a position that he can take no more and informed his fellow-clerks of the defalcation. He is avoided by the insiders, and his position is about as disagreeable as can well be imagined. Constantly under surveillance, he will work out in time the amount he has taken and will then be discharged.

A Unique Bank Bill.—A. M. Craig, of Southington, Conn., has a curiosity in the shape of a bank note, on one side of which is a promise to pay \$10 and on the reverse \$20. In 1861 among the notes made by the Government for the Second National Bank of Springfield, Mass., there was an error in printing one sheet of three bills, and they were signed and paid out, first to the town and then to the Fire Department and then to the merchants. The error was of course at once discovered and the bills called in. Two of the number were found and destroyed, but the third was lost. Mr. Craig, not long ago, was shown some curiosities, among them this bill. He made an offer for it, which was accepted. He has already been offered over \$200 for it by curiosity seekers.

The Banker's Paradise.—If we are to believe the English Consul at Newchwang, Manchouria must be the paradise of bankers. He says it is well understood that wealthy mandarins and merchants, not caring for their wealth to be known, make deposits with bankers without taking receipts, and that it is a curious fact that rather than risk the loss of capital so deposited by its becoming known to the paternal Government, to whom, probably, such capital rightly belongs, no interest is derived from such deposits, except, of course, of course, of course, of the banker's own investments. At the death of a depositor his heir may not know that 100,000 taels, more or less, are deposited in some bank or other. From such causes as these, says this authority, native bankers become very rich.

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Mississippi—New Bank in Vicksburg.—The Delta Trust & Banking Company has been organized with \$500,000 capital which may be increased to \$1,000,000. The incorporators—A. R. Bertron, Charles Benjamin, Charles N. Fowler and associates—are connected with the Kansas City (Mo.) Equitable Loan Association. It is expected the institution will be ready for business October 1.

Kentucky—American-German National Bank, Paducah.—On the 16th of September this bank suffered a loss by fire, the total damage amounting to \$661, which sum was promptly paid by the Insurance Company. As the loss has been grossly exaggerated—some so-called banking publications placing it as high as \$200,000—the bank authorizes the foregoing statement to correct any false impression which may have been created by the circulation of such unfounded rumors.

N. Y. City—Empire State Bank.—Still another new financial institution has been organized in New York city styled the Empire State Bank. The capital is \$250,000 all paid in, besides a surplus of \$50,000. The officers are: James W. Conrow, President; Leon Mandel, of Mandel Bros., New York and Chicago, Vice-President, and Chas. H. Roberts, Cashier. The list of Directors is composed of well-known merchants in what is known as the "Middle Broadway District." The bank will be located on Broadway near Bleecker Street and will be ready for business November 1.

New York City—New Stock Clearing-House.—Several prominent members of the New York Stock Exchange including Chase & Higginson, Moore & Schley, Van Emburgh & Atterbury, E. K. Willard & Co., and Jones, Kennett & Hopkins, have made an agreement with the Manhattan Trust Co. to act as a Clearing-House for stocks. It is said that the charge will be only ten cents per hundred shares and it is believed, by the originators, that the benefits to be derived are so great that a large proportion of the members will enter into the arrangement.

N. Y. City—Chase National Bank.—A few weeks ago the Chase National Bank sent out a Circular Letter to friends and patrons in the Western, Northwestern, Southern and Southwestern States, making inquiries as to the present condition and probable yield of grain, cotton, etc., in these sections. The result was that several hundred replies were received and much valuable information obtained, all of which has been compiled in neat form for the benefit of their numerous customers as well as the public generally. The idea is not only novel but shows enterprise.

Arkansas—First National Bank, Helena.—This is one of the solid institutions of the State. It was originally established as the Phillips County Bank, and was organized as a National bank May 1, 1887, since which date it has paid 11 per cent. in dividends and placed \$10,000 to the surplus fund. The capital stock of the bank is \$100,000. It conducts a general banking business on the soundest principles governing banking and finance, and makes a specialty of merchants' and bank collections. The officers are F. B. Slinger, President; Lycurgus Lucy, Cashier, and Walter Lucy, Assistant Cashier.

Maryland—Eutaw Savings Bank of Baltimore.—In October the Eutaw Savings Bank will move into a new and handsome building. The Eutaw is the second largest savings institution in this city. Its resources are over \$11,000,000, with a surplus of \$1,000,000. Their depositors number over 28,000. The Eutaw is a popular institution and has long deserved their new quarters. The latest designs in safety deposit and bank construction are embodied in the new building. Artizan and artist have produced a beautiful and convenient building without lavish expenditure. The bank was incorporated in 1847, and has had but two Presidents. Wm. F. Burns became President

in 1873. He is a widely known financier. He has been for many years a factor in the material progress of the city. As one of the Directors of the B. & O. R. R. Co. he is always on the Finance Committee, and is peculiarly fitted for a savings bank President.

Texas—North Texas National Bank, Dallas.—Mr. S. J. Howell, 2nd Vice-President of this bank, has resigned in order to engage in mercantile business. Although the bank reluctantly accepts his resignation he has the satisfaction of knowing that there is a very successful career before him. It is also matter of congratulation that the bank will, in the future as in the past, have not only Mr. Howell's personal influence but in addition that of his desirable business connections throughout the State. Already this institution ranks among the most successful banks of the Southwest.

Kansas—First National Bank, Junction City.—At a recent meeting of the Directors of this bank the following preamble and resolutions were adopted:

"WHEREAS, Mr. S. D. Carr, our Cashier, has received and accepted a very flattering offer to return to his old bank, the First National Bank of Toledo, Ohio, and

WHEREAS, Our intimate associations with Mr. Carr during his connection with this bank have endeared him to us all therefore be it

RESOLVED, That in accepting the resignation of Mr. Carr, we part with a young man of long banking experience, in prime of life and one in whom every requisite for a successful banking career is embodied."

Mr. Carr returns to Toledo, Ohio, and assumes the position of Vice-President of the First National Bank.

Missouri—New Bank in St. Louis.—A St. Louis correspondent writes that Mr. E. H. Robinson, who is largely interested in St. Louis property, recently went East on a business trip. The object of the trip is to perfect arrangements for a new banking institution with a capital of from \$1,000,000 to \$2,000,000. Negotiations for a site for the banking building have been going on for some time, and it is only within the past few days that the location has been selected. In connection with the bank it is proposed to organize a trust company with a capital of about half a million, after the plan adopted by the Farmers' Loan & Trust Company, of New York. The two companies will erect one of the largest commercial buildings in the West.

End of a Famous Bank Failure.—The equity suit of Henry Warner, Assignee of the Penn Bank, of Pittsburgh, Pa., against W. N. Riddle of New York and John R. Beal and M. K. McMullen, oil brokers at Pittsburgh, came up for a final hearing September 15. After hearing the arguments the court handed down a decree confirming the Master's report and declaring that the defendants are jointly and severally indebted to and shall pay to Henry Warner the sum of \$758,912.12 with interest from August 1, 1883, and that the defendants are jointly and severally indebted to the plaintiff in the further sum of \$68,179.28, with interest from August 1, 1883. The court also decided that the defendants must pay all costs including a Master's fee of \$1,000. This is the final chapter in the suit against Riddle and the other defendants growing out of the Penn Bank failure.

New York City—East Side Bank.—A strong institution, styled the East Side Bank has been organized and will open for business about October 1st. It will be located at 459 Grand street, and the officers, already elected are Thomas R. Manners, President, Samuel B. Clarke, Vice-President, and James A. Oakly, Cashier. The authorized capital stock is \$500,000, \$100,000 of which was subscribed for and paid up at 125, which leaves a surplus of \$25,000 to start with. Among the Directors are Walter Luttgen, of August Belmont & Co., Richard A. Elmer, President American Surety Company; Wm. Nelson Cromwell; S. M. Janney, of Chrystie & Janney; Myer Hellman, of Hellman & Blaut, and D. O. Eshbaugh, of the New England Loan & Trust Co. The list of stockholders includes William Dowd, R. Hoe & Co., W. H. Gillen, Homer Lee, H. F. Hotchkiss, and Frederick Billings, of Woodstock, Vermont. The new bank will clear through the Bank of North America.

Missouri—American National Bank, Kansas City.—The prosperity of this institution seems to be fully assured. It was organized a little over two years ago with a paid-up capital of \$1,250,000, and its deposits on the opening day were \$300,000. Having outgrown its former quarters the bank has recently moved into the new eight-story building on Eighth and Delaware Streets, which has been erected by the American Bank Building Company expressly for the American National Bank, and is one of the handsomest structures in Kansas City. Besides being fitted with all the

conveniences suggested by ingenious artisans, this bank boasts one of the finest burglar proof safes in the country. It is built of fine chrome steel in one piece and is a combination of five burglar proof compartments. The weight of this safe is 89,000 pounds and the combined weight of the safes and vaults is 168,000 pounds. The vault extends from the floor to the ceiling and is divided into two stories, in the lower one being the large safe thus described. The upper story contains a smaller safe, similar in all respects to the larger one below, save that it is divided into three burglar proof compartments. Science and the highest mechanical skill has done here everything they could do to guard the immense treasures that will be contained therein. Thus equipped and managed, the stockholders and patrons of the American National can consider their interests in a safe and prosperous channel.

Kentucky—New National Bank in Lexington.—A correspondent referring to the organization of the new Phoenix National Bank furnishes the following interesting facts as to the condition of the banks in that locality:

"There is not, perhaps, in Kentucky a single city that has so much capital invested in banks in proportion to the population as there is in Lexington. There are now in this city nine banking institutions, with another to be started at once with ex-Sheriff J. W. Rodes as Cashier and W. H. Cassell, a prominent business man, as President. The new institution will be known as the Phoenix National and will be located in the new addition now being made to the Phoenix Hotel. There seems to be a fatality about Lexington Sheriffs going into the banking business. Major R. S. Bullock at once started in the Fayette National Bank as Cashier, as soon as his term expired, and Capt. W. D. Nicholas started in the Second National as soon as his term expired, and Major B. G. Thomas was Cashier in the bank of Grinstead & Brally, which closed a few years ago. The present institution will make the seventh National Bank, the total capital stock of which aggregates \$1,400,000 as follows: First National, \$400,000; Second National, \$150,000; Third National, \$100,000; Lexington City National Bank, \$200,000; National Exchange Bank, \$100,000; Fayette National Bank, \$300,000; Phoenix National, \$150,000. There are also three private banking firms with a capital of \$1,873,000, as follows: D. A. Sayre & Co., \$80,000; R. H. Courtney, \$20,000, and the Northern Bank, with \$1,823,000, making a total capital stock of the Lexington banks \$3,273,000. All the banks are doing a flourishing business."

That New Mexican Bank.—It is claimed that the plan, which has been contemplated for the past two years to make New York the leading silver market of the world, is in a fair way of successful completion. A syndicate of New York and European bankers, headed by H. B. Hollins & Co. and Robert Colgate, have signed a contract with the Mortgage Bank of Mexico, whose charter was granted by the Mexican Government in 1882, previous to that of the National Bank of Mexico. By the terms of the agreement the Mexican Mortgage Bank becomes the International and Mortgage Bank of Mexico, and the principal condition of the syndicate's agreement with the bank is the granting by the Government of certain modifications of the charter so as to enable it to carry on a general banking business and to issue certificates of deposit in silver and gold, in dollars or ounces, payable in Mexico or abroad. One-third of the interest in the bank will be owned in New York city, one-third in Mexico and one-third in Europe. Silver certificates will be issued negotiable all over the world, based on silver deposits in New York. To what extent the Mexican Government has gone in granting concessions to the new institution cannot be definitely told at present, but it is thought that the bank will have the right to issue legal-tender notes against securities deposited and to undertake Government improvements. The President of the new bank will probably be Mr. P. Martin, the representative in Mexico of Baring Brothers, of London.

Michigan—The Waldron Bank, Hillsdale.—Charles W. Waldron, principal owner and namesake of the Waldron Bank, at Hillsdale, Michigan, has treated the State and public generally to a genuine surprise. On the 22d of August he left town taking with him not only another man's wife but all the available assets of his bank and also of the Savings Bank in Reading, Michigan, of which he was principal owner. It is said that the total amount Waldron has got away with is \$100,000, including his own money. It has been learned also that deeds were put on record, many made to parties in Detroit, that were given a year ago, but withheld from record "until a certain occasion should arise." It was subsequently learned that this transaction was to protect the Merchants and Manufacturers' National Bank of Detroit for money advanced. It is further definitely learned that the total sum secured by Waldron from different Detroit banks was \$125,000. The banks all claim to be fully secured by bonds, mortgages, and real estate, and that is probably the case. Waldron had litt:

difficulty in obtaining whatever money he wanted, as his reputation as a close and shrewd business man was of the very best, and he had long been connected with the banking business at Hillsdale. He was rated by Dun & Co. as of the highest credit and as worth \$300,000 to \$500,000. Of course, as it turns out, he was vastly overrated. The Savings Bank at Reading is said not to be seriously affected. Its deposits are stated to reach \$30,000 to \$40,000, owing in moderate sums to farmers in all the country round, a rich farming region. The collapse created much excitement in the town, the scared depositors swarming in in great numbers. There has been no such scandal in high life for years in Michigan, as the Waldron family are of the highest repute and known all over the State.

Iowa.—First National Bank, Ida Grove.—This is a new bank which has been organized with \$100,000 paid-up capital and the following officers: H. M. Whinery, President; Alexander McHugh, Vice-President; Edwin Coles, Acting Cashier; E. M. Donaldson, Cashier, who is also Cashier of the First National Bank of Marion, Kans., and Secretary of the Union Mortgage & Trust Company; C. E. Eldridge, Book-keeper and Teller. The gentlemen comprising the Directory are: Wm. H. Dudley, President of the First National Bank of Marion, Kans.; Alexander McHugh, a retired merchant and business man, devoted to the superintendence of large landed interests in Ida County; H. M. Whinery, President; Hon. Geo. H. Stearns, Treasurer Union Mortgage & Trust Company, Manchester, N. H.; Wm. M. Wilcox, Financial Representative of the Aetna and North-Western Life Insurance Companies, and other private and corporate capital; Geo. R. Long, merchant and broker; Andrew J. Santee, a prominent farmer and stock grower, and highly esteemed citizen of Woodbury County; Paul M. Downing, formerly for four years Deputy County Treasurer of Ida County; William Pilcher, Supervisor of Ida County, and now owner and proprietor of a valuable, improved and well-stocked farm of 460 acres; Sandusky S. Dillenbeck, a retired business man, devoted to the superintendence of his valuable farm of 640 acres; George T. Williams, Editor and proprietor of the *Ida County Pioneer*; and Joseph L. Hosmer, President of the Union Mortgage & Trust Company, Manchester, N. H.

Careful provision has been made for a conservative management and supervision of the affairs of the bank.

The local interest and support accorded to the bank has exceeded the anticipation of its promoters. The Iowa stockholders, numbering thirty-four, include many of the representative and most respected citizens of Ida County, and are, without exception, men of financial responsibility and influence. In this connection it may be stated that the stock of the bank is distributed in fourteen States, and among above sixty-five individuals and corporations.

There are now in operation, in Ida Grove, two strong and reputable private banks. That an opening may be made for a National bank, judiciously managed, can only be appreciated after a careful investigation of the wealth of the agricultural resources of this part of the State of Iowa and the possibilities of its development, considered in connection with the opportunity which the choice of location affords for extending the interests of the bank into other desirable localities in Central and Northern Iowa. These considerations, it is believed, fully justify the location; and the interests now identified with the bank insure a conservative, efficient management, and its assured success as a business enterprise.

There is but little doubt that an enterprise of so much value and influence to the town of Ida Grove, and to the county of Ida, will meet with a most cordial welcome from her citizens. It is true that the community is not now in a position to appreciate the benefit to accrue to it by reason of a National bank of such strength and prestige as the bank just organized will carry with it; but so far as can now be discerned, the citizens are far-seeing, and will ultimately accord to the bank that support which the conduct of its affairs merits.

Contracts for the building and its appointments have already been closed, and its construction pushing rapidly forward.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

— J. H. Bouvé, President of the Boston National Bank, Boston, Mass., is rapidly improving, and expects to be able to resume his duties at the bank early in October.

- The National bank notes now in process of redemption amount to \$7,480,000.
- A National bank is being organized at Colebrook, New Hampshire, with \$100,000 capital.
- A mortgage is one of the most ominous things a man can leave behind him at his death.
- Rumor has it that Hon. John Sherman is thinking of engaging in the banking business in Chicago.
- Robert Wait is reported as Cashier of the Reynolds Bank, of Reynolds, Ill. M. Schoonmaker, owner.
- Dwiggins, Starbuck & Co., are owners of the Citizens' Bank, Clinton, Ind., with \$50,000 paid-up capital.
- John S. Lawrence, of Grand Rapids, has been appointed Receiver of the Lowell, (Michigan) National Bank.
- A Franco-Russian company has been formed with the view of uniting the Black and Caspian seas by a canal.
- The Lowell National Bank, Lowell, Michigan, has suspended, but the officers claim it is only temporary.
- The East Kansas Loan & Investment Company of Burlingame, Kansas, has been incorporated with \$50,000 capital.
- Seth L. Keeney has been elected President of the Commercial Bank, Brooklyn, N. Y., vice Thomas D. Hudson, deceased.
- The total number of depositors in the New Hampshire savings banks is 129,967, an increase of more than 7,000 within the year.
- Application has been made to the Canadian Department of Justice for the extradition of DeBaun, the New York bank defaulter.
- Vicksburg, Miss., is to have a new National bank. The proposed capital is \$250,000, of which amount \$150,000 has been subscribed.
- The House has passed a bill to redeem mutilated subsidiary coins at a fair value, instead of as bullion, in sums less than five dollars.
- Hon. Nathan Goff, President of the Merchants' National Bank of Clarksburg, is the Republican candidate for Governor of West Virginia.
- There are at present in Pennsylvania 243 National banks, with a capital of \$33,525,340 and a surplus of \$12,187,862. Deposits amount to \$76,000,000.
- Henry Hague, who was for many years the New York agent of the Merchants' Bank of Canada, is now Acting General Manager of the bank at Montreal.
- It is said that another new bank is being organized in Cincinnati, Ohio, but whether it will be a National or State organization has not been announced.
- The city Treasurer of Boston, Mass., recently borrowed \$1,000,000 of the New England Trust Company, payable November 1, 1888, at 8 90-100 per cent. interest.
- The case of Gen. Lester B. Faulkner, of Dansville, N. Y., charged with being concerned in wrecking the First National Bank of that place, has been put over the term.
- L. P. Davis, for many years Cashier of the National Loan & Trust Company of Topeka, Kansas, has resigned to accept the Cashiership of a National bank in Marion, Kansas.
- It is a good thing to be able to write well and spell correctly, but most people would rather be able to scrawl a check that could be depended on to pull \$100,000 out of the bank.
- Chief Brooks, of the Secret Service Bureau, desires the public to be warned of the circulation of counterfeit standard silver dollars, which it appears has just been commenced.
- The Pierre Savings Bank of Pierre, Dak., now has a strong organization with C. C. Bennett, President and Eugene Steere, Secretary of the Dakota Bankers' Association, Cashier. J. L. Keyes succeeds Mr. Steere as Cashier of the Citizens' Bank. Lewis

E. Ransom, President National Bank of Deposit, N. Y. city, is a Director of the Savings Bank.

— James Gadsden, President of the State Bank, Schuyler, Nebraska, since its organization, has sold out to the remaining stockholders. It is rumored that he intends locating elsewhere.

— Mr. John H. Watt, the popular Cashier of the Bank of North America, Philadelphia, who has been laid up for several weeks with typhoid fever, is rapidly regaining his strength.

— The Camden National Bank, Camden, N. J., which commenced business on August 18, 1885, reports that on August 18, 1888, its capital was \$100,000, surplus \$15,000, and deposits \$500,565.

— The Skagit River Bank has recently been opened at Mount Vernon, Washington Territory, with a paid-up capital of \$25,000. The Manager is B. Hufty, and correspondents, Dexter, Horton & Co., Seattle.

— It is asserted that Waldron the Hillsdale (Michigan) bank President who recently ran away, took at least \$500,000 with him in money and securities. He and his companion are believed to be in London.

— The Sixth National Bank of Philadelphia, Pa., passed a preamble and resolution expressive of regret at the decease of James Ballenger, who had been a Director of that organization for twenty-four years past.

— It is stated that the embezzlement of Joseph Breed, the Assistant Cashier of the Hartford National Bank, Hartford, Conn., who recently committed suicide, will aggregate \$108,500, instead of \$22,000 as was first reported.

— Charles B. Whiting, the Worcester, Mass., broker, was arraigned on the charge of embezzlement and discharged, but was subsequently rearrested and held on the charge of fraudulent conversion of money to his own use.

— The recent failure of Charles B. Whiting & Co., of Worcester, Mass., is reported to have created a sensation in that locality similar to that when Grant & Ward failed. He is said to have done business in the Ferdinand Ward style.

— The new Treasury silver vaults in Washington are so damp that the bags containing the coin are literally rotting away. Measures are being adopted to improve the ventilation, and the coin is to be kept in boxes instead of bags.

— The Merchants' National Bank, Vicksburg, Miss., reports \$25,000 surplus and \$15,000 individual profits. W. H. Fitz Hugh is Assistant Cashier. This bank began business a little over two years ago and already ranks among the first in the State.

— In the savings banks in the United States there are 3,405,968 depositors, and the amount of their deposits is \$1,202,236,035. The assets of the banks amount to \$1,328,070,161. During the year 1887 these banks paid out more than \$43,000,000 in dividends.

— The Philadelphia Stock Exchange will move into its new quarters in the Drexel Building on October 27. The Exchange has occupied its present quarters since 1876, the building having been specially erected for it by the Board of City Trusts, the land being part of the Girard estate.

— The First National Bank, Beaver City, Nebraska, has purchased the banking house and good will of Wm. Howard Phelps. By this well directed stroke of policy the First National doubles the volume of its business and gains a location which may well be considered the key to the business situation of the town.

— Mr. Enoch Pratt, President of the National Farmers and Planters' Bank of Baltimore, Md., recently celebrated his eightieth birthday. He is notable for his vigorous business activity, and always has time to chat pleasantly with any old friends who chance to call. He is a farmer, and takes great interest in the management of his fine country place in Baltimore County.

— Thomas O'Donnell had \$26.00 on deposit in the Warren Five-Cents Savings Bank of Peabody, Mass., which he recently drew out. Shortly afterwards the Cashier found his cash \$234 short and, thinking he made a mistake and paid O'Donnell too much, made a claim for refunding that sum. The depositor denied that he had received any more than he was entitled to; but, on examination, was held for trial on the charge of constructive larceny.

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

INTEREST DOESN'T ALWAYS GROW.

Editor Rhodes' Journal of Banking:

SIR:—It would seem as if many persons otherwise intelligent held the belief that interest grows on money like fruit on a tree, and that the "legal rate" has only to be plucked off. A recent correspondence between our Savings bank and Australia (12 cents postage) illustrates this curiously. The correspondent wrote: "On September 1, 1866, I deposited \$1 in your bank as per pass-book, No. —, which I now have in as good condition as the day I received it. I am now anxious to know how much my dollar has gained in these twenty-two years." The reply, which must have been discouraging, was as follows: "By reference to the extracts from the By-laws printed in your pass-book, you will see that no interest is paid on sums less than \$5." Now comes the reply of the indignant depositor: "Is it possible that there is any man or set of men in the United States of America to use even one dollar of another man's money twenty-two years without paying him legal interest thereon? VOLASPODEL.

NEW YORK, Sept. 12, 1888.

ESTABLISHING BRANCH BANKS.

Editor Rhodes' Journal of Banking:

SIR:—The suggestion made by Mr. Jorammon in the August number of the JOURNAL is one that has often occurred to me and one that Eastern banks may well consider, as it is certain that it would materially increase their profits if their selection of officers and location for the branch were well made.

In the light of past experience it is evident, to any unprejudiced mind, that not only has a better rate been realized on loans in the West than can possibly be obtained in the Eastern or Middle States, but that losses are much less frequent under conservative management than is oftentimes supposed.

The method pursued in conducting the banking business in the West differs materially from the Eastern idea in many points, but this need not necessarily make it any more hazardous, as good security can be obtained here as well as elsewhere, and the careful banker is he who loans his money on such security only. Care should therefore be exercised in the selection of the managing officers as, on their judgment, almost wholly depends the future prosperity of the bank and a large proportion of the legitimate bank failures may be directly ascribed to their carelessness in the selection of securities. I say *legitimate*, for the reason that by far the greater number of bank failures are due to the fact that one or more of the officers attempted to make money through some other channel—gambling or speculation that form *no part of the banking business*—and, let me add, that a banker must not be satisfied alone with the thought, or knowledge, that the security offered is worth much more than the amount desired, as frequently he might accept what would prove to be really poor security, as it might be of such a nature that it could not readily be converted into *cash* in case of *necessity*. This point should never be lost sight of, as it is, at times, the only reliable test.

The objections to a bank establishing branches are more than offset by the advantages derived; and if possible for them to do so, many Savings banks could well afford to avail themselves of the privilege as from two to six per cent. more could be realized on perfectly good paper, well secured in the West, than can be obtained in the East, and banking, like all other branches of business, is conducted for the purpose of gain.

BIRD CITY, Kans, Sept. 25, 1888.

G. A. TAYLOR, Cashier.

SMALL BANKS VS. JOINT STOCK COMPANIES.

Editor Rhodes' Journal of Banking:

SIR:—In the JOURNAL for July, page 674, there is an extract from a San Francisco paper in reference to the alleged undesirability of small banks throughout a State, which seems to me to call for some criticism. In the first place the writer assumes

that joint stock banks are necessarily stronger as a system than the present system of separate and independent National banks. Whether this is true is certainly open to question. The financial experience of this country is so different from that of other countries that the "lamp of experience" gives a somewhat uncertain light and the mere fact of joint stock banks having been a success in Great Britain is not a sufficient reason for assuming that they will be equally successful here. Under the separate system as we have it here the banks are independent of each other for evil as well as for good, and the failure of one does not involve the downfall of a wide-spread network of branches. In banking as well as in mercantile affairs competition is the life of trade and the numerous small banks scattered through the country make trade pretty lively all around. The facility with which small banks can be organized under the National Bank Act has undoubtedly been one of the chief factors in developing the newer sections of the country. In the matter of failures the National banks will compare not unfavorably with such affairs as those of Overend, Gurney & Co., or the Glasgow bank in Scotland. Perhaps it will be news to the advocates of joint stock banks to be told that the autonomy of the National banks has been considered rather a merit than a defect of the system.

This is the idea the writer of the article in question has of a National bank: "A showy office, with plate-glass windows, large gilt letters for a sign, a dude for a Cashier and a capital paid up or otherwise of \$50,000 and forthwith we have a first-class country bank." What curious things one does read in the newspapers. OCCASIONAL. OMAHA, Sept. 18, 1888.

A LETTER TO A YOUNG MAN.

Mr. _____

MY DEAR SIR:—Your favor of the 28th, asking my advice as to the advisability of your accepting a position as messenger in the _____ National Bank is at hand and has my immediate and careful attention. In the first place allow me to express my appreciation of your action in seeking the opinion of an older person before taking so important and responsible a position. I can only regret that you did not chance upon a more competent adviser. Whether regarded as a permanent or as a temporary arrangement a clerical position in a well-managed bank has many advantages; it also, no doubt, has disadvantages and it will be my aim to set both before you as clearly as I may be able. Regarded as a merely temporary arrangement I do not think that you could spend the first year of your mercantile career more profitably than as a clerk in a good bank. A practical knowledge of the banking business is of great value to a merchant; and there is no way of obtaining that knowledge except by actually working inside of a bank and witnessing and taking part in the operations of the institution. I do not mean to underrate the value of the very careful instruction in book-keeping, etc., which you have received at your school, but there is so much about the business that cannot be learned in the schoolroom that what has been learned there must be looked upon as only a stepping-stone to what must be mastered by practical, everyday work. From this point of view you will naturally look upon the bank as a means to an end and on that account you will strive the harder to make the most of your advantages. To urge you to be attentive to your business, to be courteous and engaging in your manner and to practise generally those precepts of good conduct which have been instilled into you from your youth would be, I am sure, a superfluous task. The inner working of a bank is a mystery to many otherwise well-informed business men, and the practical knowledge which you will gain even by the experience of one year will be of much value to you. As a permanent situation, a clerkship in a bank is usually looked upon as a choice position. The salaries, as a rule are good, the work is comparatively light and promotion though not rapid, is tolerably sure. There is little risk of loss of position from any changes in the management of the corporation, as not infrequently happens in the case of other employments. A moderate degree of attention is sufficient to master the routine of the business and to ensure a satisfactory performance of one's duties. The tenure of the position is practically for good behavior, *i. e.*, for life; this of itself is a great consideration. If then you are one of those who are content with that station in life in which you chance to be placed, no better position could be offered you than the one concerning which you have asked my views.

Let us suppose, however, that you are ambitious and have a desire to rise to positions of responsibility, as, indeed, I know to be the case. What opportunities does

a bank clerk's place offer from this point of view? I must confess that a position in the office of a good stock and investment broker offers to my mind more opportunities for advancement than a bank clerkship as, in such a situation, one is thrown more into contact with the outside world. At the same time bear in mind that a bank clerk is not so much shut in as is commonly supposed. This tendency, however, to grow out of touch with the mercantile community is something to be guarded against with care and perseverance. Bank work is necessarily of a very routine character, and unless one is careful one is apt to fall into that rut from which there is scant hope of deliverance. As is the case in every profession so in banking—there is plenty of room at the top. How to get there is another matter. The main point is, to be prepared for the chance when it comes. To this end you must use every means to perfect yourself in the knowledge of your profession, both on its practical and on its theoretical side. Without carrying things to an extreme always be ready to help out at other desks and so gain a practical knowledge of all the departments. There is, as of course you know, a great amount of standard literature on the subject of banking which you will make it your business to read systematically; in addition notice everything that comes in your way such as sample copies of papers, magazines, etc., not omitting advertisements. By cultivating this habit you will pick up many odd bits of information which will prove useful when most wanted. It goes without saying that you will read regularly some banking periodical of established reputation. It is so much more pleasant to give than to receive advice, (with me it has all the charm of novelty) that I might extend this letter indefinitely. Suffice it to say that in my judgment you would do well to accept the position tendered you at least for a year or so and I am quite sure that you will not regret your action.

Boston, Sept. 20, 1888.

MODEEN BUSINESS COMBINATIONS—AN ESSAY.

Editor Rhodes' Journal of Banking:

SIR:—"Leben und leben lassen," is a proverb emanating from the just and humane spirit of our Anglo Saxon progenitors—"Live and let live" as adopted by English speaking peoples. Every fair-minded person, not utterly and hopelessly selfish, will recognize the force of the above maxim, and desire to give honest labor and effort a chance to reap an adequate reward. Sympathy with all fair endeavors to lighten the burdens of the toiler, and to make his labor as productive as possible, is universal. Efforts to bring about results in that direction are pretty generally welcomed. Organization for the benefit of all classes of working people, and for the increase and steadiness of the reward for their labor, is generally encouraged; yet, while the kind interest shown, on behalf of the working employee is manifest, a great majority of the people seem unwilling to permit the employer to earn a fair reward for his labor and capital, by forming such combinations, or organizations, which, in modern times to a great extent, will alone enable him to pay fair and steady remuneration to his employes and to exist himself. Nor do they appear to be willing to give the trader and middleman a reasonable, living profit. A great deal of ignorance on the subject of pools and trusts prevails among the people, and, in the cause of humanity, it becomes necessary to combat such prejudices and to point out the difference between the use and the abuse of such combinations. To point out such differences, to defend the uses, and to consign the abuses to public condemnation, is the object of these lines.

Pools, trusts and syndicates are springing up everywhere in large numbers. Combinations are made in many branches of trade and industry to guard against individual disaster. Necessity calls for the protection of classes, the consequence of competitive force draws together the competitors, in order to protect, by union of forces, the component members. Free and unrestricted competition has become fierce and unendurable. It has ceased to be a desirable mode of conducting business. It produces failures and the growing disparity between rich and poor. It prevents living profits and develops callousness, envy, greed and selfishness, blunting the nobler traits of the human character. Competition may be the life of trade in some respects, but, in many cases, it is undoubtedly the death of the trader. While there are hardly any reasons for human suffering, there being no lack of shelter, raiment, or food, unreasonable competition is the apparent cause of a great deal of distress and misery in this world. By highly developing the productive powers, it causes overproduction, which in turn depresses profits and causes losses. It bases upon the principle of the survival of the

fittest, which, remorseless and crushing, becomes the most oppressive monopoly. It is the principal cause of the nervous anxiety, so evidently shown by active business men of our day to the detriment of their health. While it may sharpen the wits for gain and selfishness on the one hand, it destroys culture and lessens the interest of men in science, art and literature, on the other. It consequently deteriorates mankind physically and mentally, developing the coarser elements, at the expense of the refined, in man's character. It is the enemy of happiness and contentment.

New discoveries and inventions, the adoption of scientific principles in manufacture, improved machinery and the lately applied use of elementary powers, have enlarged production beyond the power of consumption. The consequent evil of overproduction causes increased efforts to distribute the excess and prevent a fall in prices, which implies losses, impoverishment, failure and ruin, in addition to waste of time, labor and capital.

Tradespeople and manufacturers look in self defence to a remedy against the evils of free competition and unrestricted production. They form combinations, not so much for the purpose of aggression, but principally for preservation. They desire to do away with needless production and aimless competition by trusts, which will combine the clashing interests of the many for mutual benefit. The organizers of such like combinations generally commence by informing themselves of the demand for certain articles, where their production is cheapest, and manufacture them only there. They stop excessive production by buying, or closing, other plants, and transferring skilled labor to the best productive fields. They limit supplies for the purpose of working off overproductions, and restoring reasonable prices, and adjust them thereafter according to the demand. They establish prices, which cannot be raised or lowered except by mutual consent, and prevent middlemen from obtaining, and selling, goods at less than certain profitable rates, for mutual protection. Some limit the territory in which individual members are to offer and sell their products. A great many simply enter pools in order to reduce expenses of administration, to stop unnecessary outlay, caused by competition, by rivalry or by useless waste. Others combine to encourage the production of certain domestic, industrial and commercial plants, or mineral products, which may equally well take the place of expensive foreign articles. Some purpose to control shipments and visible supplies, in order to avoid gluts in any given market. Others again distribute the manufacturing of different classes of the same sort of goods, with regard to facility, adaptability and cheapness of product. Some agree together to prevent labor troubles, and to control objectionable and disturbing elements among their help, or to concentrate marts of supply, and to lessen the prime cost of necessities, by buying in larger quantities. Others again combine to correct abuses in classification of certain products. Representative trade-bodies join to establish reforms in trade rules or to abolish unjust discrimination in freights, and to enforce positive rules in place of arbitrary rulings. Penitentiaries pool, in order to raise the price of their products to an adequate figure. Many combinations are made simply to control the market, stop ruinous competition and consequent individual losses and general disaster, and to force organization, preventing destruction, saving cost of contest, effecting the downfall of heartless, rich and unreasonable competitors and securing reasonable compensation for time, labor and capital to component members. Untoward circumstances, lowering prices, compel some interests to organize trusts in order to save their mills and machinery from becoming actually worthless, and, finally, no doubt some come together for the less laudable purpose of artificially keeping up prices at a higher rate than necessary and just below the importing figures, taking undue advantage of the Tariff; while others forbid their members to make estimates and bids against each other, and a few combine to bribe legislative bodies, or to force certain products arbitrarily upon consumers. It is true that abuses, of a more or less aggravating character, have frequently crept into the formation of pools and trusts, that unjust discriminations in transportation have been obtained, that prices have been raised to, and kept up at unreasonable figures, that monopolies have abused their financial strength, influence and power, by acts of extortion and oppression in the processes of selling, transporting, or employing labor, and that some have remorselessly killed off competition and become public nuisances. But all these objections can just as truthfully be raised against certain grasping individuals.

The results of the establishment of these modern business combinations, to the

consumer and the people, have, on the whole, been beneficial, as will be readily conceded by any unprejudiced reader. In benefiting the individuals, who have formed them, directly, trusts and pools have also, to a great extent, been advantageous to the public at large. They have enabled great numbers of manufacturers to engage skilled, and ordinary, labor at fair wages steadily, because, by such combination, fair prices for their production have been received, and because they are permanently in operation, where formerly these manufacturers were unable to pay satisfactory wages, on account of depressed prices, and were frequently compelled to stop, on account of a superabundance of supply in the markets. In many notable instances trusts have enabled their members to sell goods at a living profit, for the same prices, which before resulted in losses to individuals. Combinations frequently prevent cut-throat competition between retailers and middlemen. They have started new sources of profit to farmers and miners, by introducing new articles for products, formerly unknown or not utilized. They have restrained overstocking, a consequent break of prices and losses in certain markets, and have more equally distributed articles of consumption, thereby keeping prices from fluctuating and removing the elements of uncertainty from legitimate business, thus preventing unconscientious speculators from injuring honest dealers. They have caused machinery and skilled labor for the production of certain articles to be concentrated at the most favorable spots, and have thereby enabled producers to get their articles out at less cost or of better quality, thus cheapening, or improving them, for the people. Combined efforts have frequently succeeded to prevent serious losses, by controlling or abolishing unfavorable discriminations, beyond the power of control by individuals. Pools and trusts have frequently been able to offer better goods, cheaper than single persons could. They have often substituted regular employment at fair wages in places where employes formerly had work by fits and starts and at ever changing remuneration. They have afforded chances of employment to well paid home labor, when formerly individuals, by reason of fierce competition, were compelled to look abroad for cheap labor. By preventing waste, saving administrative costs of rivalry and contest, and intelligent management, they have caused profits, where formerly losses occurred. They have, in many instances, enabled employers to reduce the hours of work without corresponding reduction of wages, thereby benefiting the employe. By raising the price paid for convict labor, and increasing the receipts of penitentiaries and workhouses, they have lightened the burden of taxpayers. By systematizing classifications of certain articles of consumption they have served the public and intercepted swindling and sharp practice. Generally they have been beneficial in many ways, by means of putting intelligent system in the place of headless competition, which did nobody any good, and where everyone was for himself regardless of consequences, by controlling supply, stopping overproduction, securing fixed wages, reasonable interest on capital, and living profits, without necessarily raising the prices to the consumers, while in a few instances, it is true, they have increased prices out of reason, mercilessly ruined competition and impaired public morals.

In conclusion it must be admitted that, where labor and capital are producing more satisfactory results and consumers are not oppressed or inconvenienced, but, on the contrary, frequently benefited, pools and trusts are desirable; and every person who is willing to pay a reasonable price for what he gets who deems the honest worker worthy of his hire, and who wants to do unto others as he would like others to do unto him, in short, everyone who is willing to "live and let live," will acknowledge that the uses of modern business combinations are manifold and desirable for the betterment of the human family, and that the abuses of trusts and pools are no worse than the abuses daily practiced by unscrupulous persons in power, or of large means—the latter simply crushing out and annihilating their competitors, while trusts and pools generally offer competition a chance to join, or to sell out at fair figures. It will readily appear to such reasonable persons how unjust and uncritical is a sweeping condemnation of all business combinations, and that a distinction should, in justice, be made between associations using their powers in a rational and just manner, intending only reasonable efforts for self-preservation and a fair return for labor and capital, looking simply to class protection by organization of capital and labor, purporting to regulate production and manufacture according to the laws of supply and demand, and fixing and maintaining prices yielding a living profit, on the one hand, and such monopolies as are operated in a manner detrimental to the public welfare and

for aggrandizement, undue advantages, oppression and extortion on the other. Neither can it be denied that the substitution of reasonably profitable and reliable business methods for unprofitable, fitful rivalry and unreasonable competition, is a gain, as well to the tradesman as to the public, because it tends to put steadily employed and well-paid consumers, who are able to pay a fair price for what they need, in the place of inadequately paid or unemployed labor, which is unable to pay fair prices for its necessities. Steadiness of prices, consistency in business methods, and the elimination of the elements of speculation and of gambling, largely follow the organization of trusts and pools, and are certainly to be welcomed by conservative people. Hence it appears that only combines, made for purposes of monopoly or extortion, should be condemned and abolished.

Fortunately the natural laws of supply and demand will gradually exterminate many of that undesirable class. In cases where artificial high prices are extorted, or where inferior products are substituted for a better article at the same price, and where, consequently, abnormally large profits are obtained, rival combinations will be called into existence and healthy competition will either drive such associations to the wall, or bring them to a reasonable level. In other such cases consumers will stop using the high priced monopolized articles, substituting something else, thereby causing the same crushing result to the monopolist. Public opinion will regulate and curtail the operation of combinations, tending to corrupt public morals and to injure the public good, and efficiently correct such abuses.

Where these conditions cannot remedy such evils, intelligent legislation should abolish them by the enactment of reasonable laws, which should, at the same time, be directed against individuals as well as against companies, whose private manipulations are equally detrimental to the public, and against trusts. Such laws should, however, be made with due care and caution lest they might hurt such combinations which use their powers for their own and the public good, while not effectually hindering and stopping such concerns as abuse their powers to injure the public. E. C. BOYNT.

LOUISVILLE, Ky., September 21, 1888.

Mutilated Currency.—The rule of the Sub-Treasury is that any United States or National bank bill will be redeemed on presentation, no matter how badly mutilated, provided that not more than one-tenth of the bill is missing. Beyond that proportion the bill can be sent to the Treasury Department at Washington, where it is redeemed in proportion to the amount remaining down to 50 per cent. of the face of the note. If the loss is over half of the note it will not be redeemed, unless the owner can prove that the missing part has been totally destroyed, in which case the full value of the original bill may be recovered.

Poor's Manual of Railroads in the United States for 1888 is, like the preceding issues, a *sine qua non*. The current volume is the twenty-first, and it is safe to assume that it is the best and most complete ever published—fully keeping pace with the subject of which it treats. In its 1,325 pages are full particulars relating to every railroad in the country, organization, history, finances, earnings—everything, in short, which can be of use to the reader, no matter of what nature his interests in railroads may be. The *Manual* has made for itself a place second to none for usefulness in the office of the banker, broker, investor and man of business generally. It is published by H. V. & H. W. Poor, No. 70 Wall street, New York.

Morse on the Law of Banks and Banking.—Bankers, as a class, have constant need of good authority on banking law. "Morse's Treatise on the Law of Banks and Banking" ranks as a standard authority and most bankers recognize it as about as indispensable as a safe. A new edition of this valuable work has just been published by Messrs. Little, Brown & Co., of Boston. The former edition was in a single volume; the new edition has been greatly enlarged and it now appears in two volumes of nearly 700 pages each substantially bound in law calf and is, like all the issues of the University Press, in every way admirable. The publishers are deserving of much credit for this fine addition to the banker's law library. A complete review of the work will appear in the next issue of the JOURNAL.

On another page will be found an advertisement of the book to which special attention is directed. Copies are for sale by BRADFORD RHODES & Co., 78 William Street, New York, at the publisher's price, \$11 net. Sent by mail on receipt of \$11.60.

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

SURRENDER OF BANK NOTE CIRCULATION.—Although a contraction of \$27,700,000 has occurred during the past twelve months in the National bank note circulation, only \$11,800,000 of this amount has been due to the withdrawal during that period of bonds deposited with the Treasury as security. The larger amount, or \$15,900,000, came from the fund for the redemption of notes of banks which had, previously to the commencement of the year, surrendered this part of their circulation. In other words, the contraction of National bank note circulation during the past year has been much more largely due to the continued retirement of the notes originally based upon the three per cent. bonds, and for the redemption of which the banks furnished funds when the three per cent. bonds were redeemed, than from the voluntary surrender during the past twelve-months of four or four-and-a-half per cent. bonds. Expensive as these bonds have become, and slight as is the inducement for holding them as a basis of note circulation, here is another evidence that the banks surrender their circulation very slowly, and that the contraction which is in progress is more largely due to the compulsory surrender of the three per cent. bonds, when they were being called, than to the subsequent voluntary sale of the high-priced bonds now held as the basis of circulation.

Surprise was recently occasioned by the publication of figures showing that the daily bond-purchases by the Treasury have induced very few banks to surrender any of their bonds held for either circulation or deposits. Although it had been at first assumed that Treasury purchases would lead to the rapid relinquishment of bonds by banks, and that the contraction of bank note circulation would be as rapid as when the banks were being compelled to surrender their three per cent. bonds, the returns now show that there was little justification for such an expectation. On the contrary, despite the heavy burden which is now imposed upon bank note circulation and the unjust and illogical requirements of law, the banks adhere tenaciously to their bonds and are indeed making a desperate struggle for existence. The vitality of the system and the strength of its popular support are shown by the pertinacity with which the banks maintain their charters and continue to comply with the requirements, which are steadily becoming more and more severe as the prices of bonds advance. The analysis of the year's returns shows clearly that there has scarcely been a bond surrendered except under the pressure of absolute necessity, and yet the relinquishment has proceeded more rapidly than it can continue without forcing many banks out of the National system. The Comptroller of the Currency has shown that while the National banks organized in 1863 deposited 72 per cent. more bonds than the law required, those organized in 1867 deposited less than one per cent. more than was incumbent upon them in order to maintain their charters. The past twelve-month has witnessed a further reduction toward amount of bonds which it is compulsory for banks to deposit, and the rate of reduction cannot be continued and the requirements of law fulfilled.

Public sentiment has demanded the maintenance of the National banks in great cities and small towns, and throughout the country, no matter how well established State or private banks may be, and the National banks will doubtless continue to meet the heavy pressure of the present laws until the purpose of Congress can be ascertained; but the fact cannot be ignored that the questions involved are no longer ones of the future—nor ones that can be postponed without serious results. The Comptroller's Report for the twelve months past shows a steady though reluctant reduction of the bond deposits to the amounts which the law makes compulsory. It also shows that the new National banks organized have taken less than \$3,000,000 of new circulation, depositing less bonds than a similar number of banks ever before. The action of the old banks and the continued admission of new ones shows the earnestness of the battle which the National banking system will make for self-

preservation; but the returns show, in a manner equally conclusive, the necessity for a prompt reduction in the compulsory amount of bond deposits. One respect in which the year's returns will be regarded as disappointing is the failure of the banks to make any progress in the substitution of four for four-and-a-half per cent. bonds. As the former have several years longer to run, there has been general recognition among bankers of the importance of substituting the long term for the short term bonds, and thus securing the maintenance of the bank charters at least as long as the lease of life of the four per cent. bonds. This substitution should be made now while the two classes of bonds are in existence and nearly at a par when interest worth is computed. It will thus be seen that the proportion of four per cent. bonds has fallen instead of rising. This is, however, partially offset by the fact that the National bank depositories have furnished \$37,400,000 of fours and only \$17,700,000 of four-and-a-halves as security for deposits; and this amount of four per cents is, to some extent, owned by National banks, which can substitute these bonds for the four-and-a-halves now held as security for circulation. A careful examination of the present status of the National banking system and the tendencies which are causing an absorption and appreciation of bonds can leave no room for doubt as to the necessity for early action to relieve the banks of the grievous weight of present requirements, and to allow the system fair play at least during the few years remaining of the time for which the present issues of Government bonds will continue outstanding.—*Commercial Bulletin*, New York.

Failures and Suspensions.

Illinois—CHICAGO.—The Traders' Bank failed October 2d, and according to the Receiver's statement, it looks like a total wreck. Liabilities are estimated at \$1,000,000, and things are so mixed it will take weeks to find out what the assets are. The bank had a capital of \$200,000, of which, the President, Joseph O. Rutter, owned \$150,000, and Thomas P. Tallman, the Cashier, owned the balance. There were but two stockholders. The cause of failure is attributed to loaning too much money to small dealers on their individual notes, without sufficient security. In the last number of the **BANKERS' REFERENCE BOOK** the condition of their report and credit rating was such as to put correspondents and others on their guard.

Kentucky—CARROLLTON.—The Carrollton National Bank was reported closed on account of embezzlement of Cashier. Later advices state that the bank is not closed but the President is conducting business as usual. The Cashier is said to have taken \$4,000 and is believed to be in Canada. His bondsmen are responsible and the bank will lose nothing by the defalcation.

Massachusetts—FALL RIVER.—The Union Savings Bank has been closed on account of its intimate relations with the National Union Bank, whose Cashier, Chapin—and also Treasurer of the Savings Bank—had been loaning money to irresponsible parties to a large amount. How much the bank will lose cannot be yet stated, but it is claimed not more than \$35,000. The cause of the trouble was loaning \$150,000 to one family, about evenly divided between the two banks, which was manipulated by the Cashier in such a way as to escape detection for two years.

Massachusetts—WORCESTER.—Charles B. Whiting & Co. closed their doors Sept. 15, owing, it is said, \$200,000. For some time past the concern (which was C. B. Whiting only) was rated "no capital and no credit." The immediate cause of failure was an attachment for \$15,000 to secure pay for 200 shares of railroad stock. Whiting was arrested on the charge of embezzlement, but on examination, discharged. He was subsequently held on another charge in \$15,000 bail. About a year ago he was reported in our **REFERENCE BOOK** as worth \$20,000; later, however, that amount was withdrawn.

Missouri—TRENTON.—Shanklin & Austin's Bank (J. H. Shanklin and W. E. Austin, proprietors), closed Oct. 4th, said to have been caused by the failure of the Traders' Bank, Chicago. Liabilities believed heavy but exact amount not yet known. The Traders' Bank was their Chicago correspondent. The bank claimed a capital of \$50,000 and carried a large line of deposits. In the last issue of our **BANKERS' REFERENCE BOOK** their actual capital was put down at \$10,000.

New York—NEW YORK CITY.—C. M. Ward, a Stock Exchange broker, suspended.

NEW BANKS, CHANGES IN OFFICERS, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

New National Banks.—The Comptroller of the Currency furnishes the following statement of National banks organized since our last report.

Names of officers and further particulars regarding new National banks will be found under their proper State headings in this list.

3924—First National Bank, Tower, Minnesota. Capital, \$50,000.

3925—First National Bank, Buchanan, Michigan. Capital, \$50,000.

3926—First National Bank, West Superior, Wisconsin. Capital, \$100,000.

3927—Central Nebraska National Bank, Broken Bow, Nebraska. Capital, \$60,000.

ALABAMA.

TUSCALOOSA.—J. M. Daniel, Cashier Merchants' National Bank, *vice* W. R. Foster.

ARKANSAS.

DARDANELLE.—Dardanelle Bank is new institution. J. E. Hart, President; W. H. Gee, Cashier. Capital, \$30,000.

JONESBORO.—Sam. A. Warner, President Bank of Jonesboro, *vice* Wm. H. Cate.

STUTTGART.—Arkansas County Banking Company reported. C. K. Leslie, Cashier.

CALIFORNIA.

REDDING.—Bank of Northern California reports Edward Frisbie, President; J. D. Andrews, Cashier.

SAN DIEGO.—Bank of San Diego and First National Bank consolidated under title of First National Bank of San Diego. Capital, \$300,000. R. A. Thomas, President; J. H. Braly, Vice-President; O. S. Hubbell, Cashier.

NEW BRUNSWICK.

ST. JOHN.—Blair & Co. is new banking firm reported here.

What Is It?—A company has been started in New York for the purpose of guaranteeing payment to depositors in banks, and will likely be ready to begin business some time next year. Those interested say that, with a capital of \$5,000,000 paid in, the company will start on a solid foundation. The fee or premium to be charged each guaranteed bank will be one-fifth of one per cent. on the total amount of deposits in the bank. There is no extra expense to depositors, and they will have the satisfaction of knowing that rigid examination will be made at the instance of a company which is particularly interested in maintaining the solvency of the guaranteed bank as well as by the Government in the case of National banks. There are between six thousand and seven thousand State and National banks in the United States.—*Monetary Times*, Toronto.

Farm Mortgage Foreclosures.—By inference, the extent of the business in Western farm mortgages may be judged from the tables presented in the current issue of the "American Wool Reporter," showing the number of pending foreclosures entered at a single term of court by seventy-two companies in fifty-two counties of the State of Kansas. This exhibit, covering six months' business, shows the number of such foreclosures to be 607, and is said to be "not an unfavorable one." What would undoubtedly be alarming under a different condition of things, is seen to indicate nothing more than the usual commercial risk in a business which has established itself as legitimate and useful in the system under which the Western States and Territories have continued their development. With all Kansas covered with mortgages the failure of 607 farmers in six months to meet the conditions of their bonds is "not unfavorable." But with relief from the burdens of a system of taxation which presses most heavily upon this unprotected class, the ratio of foreclosures to the total number of mortgages will naturally become smaller and the security of these investments, as well as the prosperity of the borrowers, be increased.—*Boston Post*.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, October 3, 1888.

Notwithstanding the fact that the appropriations made by Congress will largely absorb the expected revenues for the fiscal year ending July, 1889, yet the position of the Treasury to the money market continues to attract much attention and cause considerable apprehension. The fact that the nearly full amount of revenue will be required to meet the current expenditures during the coming year, will necessarily have the effect to render the Secretary unwilling to invest any great sum in the purchase of bonds. Therefore there is danger that during the fall and winter larger amounts of currency than usual will be accumulated in the Treasury or until such time as the appropriations for specific objects are drawn out. Then if the Secretary knows that next spring large sums will be required under the River and Harbor bill, he will not feel at liberty to use the funds required then, even if there should be temporary over-accumulation in the Treasury in the meantime. The only relief for this temporary accumulation is the deposit of the public moneys with National bank depositories in the localities where it is to be used. It is quite surprising that there should be such opposition to dealing with the difficulties of the financial situation in this way. The stock demagogic argument that the Government lends to the banks, without interest, money that the banks lend to the people for interest, is effective in arousing ignorant opposition, but becomes of no effect when it is considered that the bulk of bank deposits are loaned to the banks without interest by individuals which the banks loan again at interest. Why should the Government be criticized for doing for its own benefit and that of the public what individuals do every day? A bill has been introduced in Congress by Mr. J. B. Weaver to repeal the law authorizing the deposit of public moneys with National banks. The law should rather be enlarged than restricted or repealed. In fact, it would be better to permit the deposit of public moneys with State banks on the same terms as to security, as are now required of the National banks. There can be no more danger of loss in the one case than in the other. During the last month the conditions affecting the money market have continued much the same as during August. There has been an increasing demand for currency on account of trade requirements and a consequent steady demand on the reserves. This has been counteracted somewhat by the amounts disbursed by the Treasury for bonds. This supply is, however, uncertain in that it depends too much on the price of bonds. To rely upon it too exclusively is like reasoning in a circle. Disturbance of the money market is to be cured by action which, far from being independent of such disturbance is entirely influenced and dependent on it. Thus, in case of a panic, United States bonds become a favorite security and do not fall in sympathy with the distrust of other securities. The Treasury may not feel warranted in buying to the extent required at such a time even if holders would sell. Hence comes the uncertainty of the future of the money market preventing and restricting loans that the amount of money on hand might otherwise warrant. We do not, however, think the situation will become critical, but that it will rather improve than otherwise as the crops begin to move. The disbursements from the Treasury, on account of appropriations, will begin within a month and the malignant aspect of that factor will be much lessened.

FOREIGN EXCHANGE.—During the first week in September sterling exchange was very dull, and there were no marked feature. The market was steady and rates were maintained. For the week ending September 15th, exchange was dull for the first three days but during the latter part

of the week there was an improvement in the demand. The supply of commercial bills was limited. There was a slight increase of rate owing to the advance of the discount rate of the Bank of England to 4 per cent. For the week ending September 22d, the demand for sterling exchange was rather small and the market dull. There was a continued scarcity in commercial bills, the market being weak on account of the purchase of stocks on foreign account. For the week ending September 29th, the demand for exchange was moderate but the market continued quiet and steady. On September 13th the Bank of England advanced its rate of discount from 3 to 4 per cent. From August 30th to September 20th, the Bank of England lost £265,837 in specie, and the Bank of France lost 3,712,765 francs in gold and 189,700 francs in silver.

The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, \$4.84½; sight, nominal, \$4.83½; 60 days, actual, \$4.83¾ @ \$4.84; sight, actual, \$4.87½ @ \$4.87¾; Cable transfers, \$4.89½ @ \$4.89; Prime commercial sterling, long, \$4.82¾ @ \$4.83; Documentary sterling, 60 days, \$4.82½ @ \$4.82¾; Paris bankers', 60 days, 5.24¾ @ 5.23¾; sight, 5.21¼ @ 5.20½; Paris, commercial, 60 days, 5.25½ @ 5.25; sight, 5.22½ @ 5.21½; Antwerp commercial, 60 days, 5.26¼ @ 5.25½; Swiss bankers', 60 days, 5.24¾ @ 5.23¾; sight, 5.21¼ @ 5.20½; Reichsmarks (4), bankers', 60 days, 94¾ @ 94⅞; sight, 94¾ @ 95⅞; Reichsmarks (4), commercial, 60 days, 94½ @ 94⅞; sight, 95 @ 95½; Guilders, bankers', 60 days, 40 1-16 @ 40½; sight, 40¼ @ 40 5-16; Guilders, commercial, 60 days, 39 15-16 @ 40; sight, 40¼ @ 40 5-16; Copenhagen, Stockholm and Christiana, krona, 60 days, 26½ @ 26 11-16; sight, 26½ @ 26 15-16. Paris dispatches quote exchange on London 25f. 41¼c.

The following table shows the posted rates for bankers' sterling at 60 days and sight and the average for prime commercial bills and for exchange on Paris for September:

1888.	BANKERS		Cable Transfers.	Commercial.	PARIS	
	60 days.	Sight.			60 days.	Sight.
January	4.85	4.88	4.83¼	4.83¼	5.20½	5.18¼
September	4.84¼	4.87¼	4.88¼	4.82¾	5.25½	5.22¼

COINS AND BULLION.—Bar silver is quoted in London at 43¼d. per ounce. The following are New York quotations in gold for other coins and bullion:

New (41¼ grains) dollars... ..	②	Twenty marks	4 74	②	4 80	
American silver ½s & ¼s... ..	②	Spanish doubloons.....	15 55	②	15 70

HOME MONEY MARKET.—The open market rates for call loans on stock and bond collaterals for the week ending September 7th, ranged from 1½ to 2½ per cent. with 4 per cent. as an exceptional rate. Prime commercial paper was quoted at 4½ to 5½ per cent. For the week ending September 15th, the open market rates for call loans on stock and bond collaterals ranged from 1½ to 2½ per cent. the same as the previous week and with 4 per cent. as an exceptional rate. Prime commercial paper was quoted at 5 to 6 per cent. For the week ending September 22d, the open market rates for call loans on stock and bond collaterals ranged from 3 to 2½ per cent. with 4 per cent. as an exceptional rate. Prime commercial paper being quoted at 4 from 5 to 6 per cent. For the week ending September 29th, the open market rates on stock and bond collaterals ranged from 1½ to 4 per cent. Prime commercial paper was quoted at from 4¾ to 5½ per cent. The following are the latest rates of exchange on New York: Savannah, buying ¼ discount; selling ½ discount to par. Charleston, buying 8-16 to ¼ discount, selling par. New Orleans commercial, \$1.25 to \$1.50 per \$1,000 discount; bank, par. St. Louis, 75c. per \$1,000 discount. Chicago, 75c. per \$1,000 discount.

NEW YORK BANKS.—During the week ending September 7th the combined gold and currency received from the interior by the New York banks was \$1,320,000, and they shipped \$3,205,000, making a gain of \$885,000. By Sub-Treasury operations the same week they lost \$2,000,000, making a net loss of \$3,885,000. During the week ending September 14th the banks received from the interior \$1,117,000, and they shipped \$4,650,000, losing \$3,533,000. By Sub-Treasury operations they gained \$5,500,000, making a net gain for the week of \$1,967,000. For the week ending September 22d they received from the interior \$978,000, and shipped \$6,145,000, losing \$5,167,000 by dealings with the interior. By Sub-Treasury operations they gained \$4,200,000, making a total loss of gold and currency for the week of \$967,000. For the week ending September 29th, the banks received \$1,680,000 from the interior and shipped \$5,145,000, losing \$3,465,000. They gained, however, \$7,000,000 from the Sub-Treasury, making a net gain for the week of \$3,535,000. From September 1st to September 29th the total currency and gold gained was \$650,000, as against a loss of \$9,707,000 during August and a loss of \$585,000 in July. The following table shows the condition of the New York Clearing-House banks for a number of weeks past :

1888.	Loans.	Specie.	Legal-tenders.	Deposits.	Circulation.	Surp. Res.
Sept. 29.	\$ 90,707,300	\$85,326,400	\$31,609,500	\$408,714,900	\$6,893,000	\$14,757,175

The statement of the Comptroller of the Currency for September shows total circulation of National bank notes outstanding on September 29th, not including circulation of National gold banks, to be \$243,409,950, a decrease since September 30, 1887, of \$29,242,551, and since August 31, 1888, of \$2,823,545. During the month just closed there has been issued to new banks circulation to the amount of \$78,770, and to banks increasing circulation \$172,250. There has been surrendered and destroyed during the interval \$3,074,565. The amount outstanding against United States bonds on September 29th, was \$155,364,908, a decrease since September 30, 1887, of \$14,566,772, and since August 31, 1888, of \$2,768,804. The amount of circulation repre-

sent by lawful money on deposit with United States Treasurers to redeem notes was \$88,045,042 on September 29, 1888, a decrease since September 30, 1887, of \$14,675,779, a decrease during the month of \$54,741. The total United States registered bonds on deposit to secure circulating notes on September 29th, was \$173,280,250, and to secure public deposits, \$54,648,000.

The following shows the amount of each description of bonds held by the Treasurer to secure National bank circulation on the dates indicated :

	Oct. 1, 1888.	Sept. 1, 1888.	July 1, 1888.	Jan. 1, 1888.	Jan. 1, 1887.
Currency 6 per cents..	\$3,281,000	\$3,281,000	\$3,181,000	\$3,254,000	\$3,680,000
4½ per cents.....	67,528,800	68,620,300	69,670,300	68,955,050	59,636,200
4 per cents.....	102,428,950	104,620,050	105,423,850	112,102,400	113,903,200
3 per cents.....	37,500	37,500	37,500	131,500	52,218,950
Total.....	\$173,280,250	\$176,508,850	\$178,312,650	\$184,444,950	\$229,438,350

The following table shows the net gold and silver held by the United States Treasury on the dates given :

	Oct. 1, 1888.	August 1, 1888.	Jan'y 1, 1888.
Gold coin and bullion.....	\$382,551,305	\$381,128,480	\$306,342,187

* Stands for ex-Dividend.

The total number of shares sold during the month of September was 7,136,806 representing dealings in 132 different stocks. Of this number of shares 5,531,579, or over three-quarters, represent dealings in sixteen stocks as follows:

Shares.	Shares.	Shares.	Shares.
St. Paul..... 1,258,878	C. & N. W.... 487,545	Union Pac..... 235,705	Texas Pac.... 125,910
Phil. & Read. 795,710	Lake Shore... 385,983	Erie..... 192,955	R. & W. Ft. Pfd. 114,530
D. L. & W.... 525,050	W. U. Tel... 330,552	Mo. Pac.... 160,467	N. J. Cent.... 65,355
N. Y. & N. E. 482,574	N. Pac. Pfd... 276,448	L. & Nash.... 135,250	Canada S..... 56,397
3,062,212	1,380,528	724,377	362,463

leaving 1,625,229 shares to represent the dealings in the remaining 116 stocks. In addition railroad bonds amounting to \$27,814,300 were sold, \$33,506 State bonds and \$50,500 Government bonds. Of unlisted securities were sold: Bonds \$502,000, Stocks 39,442 shares; mining stocks, 20,040 shares; American cotton oil certificates, 102,651; Pipe line certificates, 19,157,000 barrels. The listed stocks show an increase of 3,498,227 shares over amount sold during August. Transactions in railroad bonds show a decrease of \$4,242,200 during same period, also a decrease of \$214,700 in State bonds and \$340,900 in Government bonds. In unlisted bonds a decrease of \$ 45,000; stocks, 6,806 shares, mining stocks, 1,150 shares; an increase of 59,996 in cotton oil certificates.

The operations of the market during the month of September show a great increase over the previous month. There has been much buying on foreign account. Our prophecy that money would be close during the last thirty days has been verified. It is believed that there will be an improvement in October. While much uncertainty as to the future still exists in the minds of many the chances are that there will be large exportations of grain and cotton and this will bring much foreign capital to this market. Money will begin to be paid out on the Government appropriations and this will be a much steadier dependence than the spasmodic purchases of bonds on which the only reliance to prevent stringency has been placed during the summer months. The feature of the month was the break in St. Paul. When it was learned that there would be no dividend the market broke.

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange.

The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

WANTED—OFFICERS AND CLERKS, POSITIONS, BANKS FOR SALE ETC.

[Notices under this head—four lines or less—cost \$2 an insertion; over four lines, 50 cents a line. If replies are to be sent to this office the advertiser must send us two stamped envelopes addressed to himself, in which the replies will be forwarded.]

WANTED.—A young man, (33) with eight years' experience in a National bank in the State of New York, six years of which he filled the position of Assistant Cashier, wishes to engage in banking in some live city or town. Will invest some capital in new State or National bank where there is a good opportunity to build up a successful business. The advertiser is fully competent to fill the position of Cashier. Address: SETH A. RHODES, care of RHODES' JOURNAL OF BANKING, 78 William Street, N. Y.

WANTED.—A young man (24), graduate of Eastern Law School, for past two years Assistant Cashier in Western bank, specially conversant with Kansas and Nebraska banking and real estate loan business, desires employment in Western Bank, Collection Agency, or Investment Co. References and bond if required. Address: "STRONG," care of RHODES' JOURNAL, New York.

TO BANKERS.—A Canadian, age 27, trained in the theory and practice of banking, is desirous of making an engagement with a first-class bank or firm of private bankers in New York, Boston or some other monetary centre in the United States. Satisfactory references in the United States and Canada. Address "S," Box 407, St. Thomas, Ont.

BANK STOCK FOR SALE. \$1,000 to \$5,000 of choice Minnesota bank stock for sale at 107, although worth more. Dividends, 8 per cent. per annum, besides surplus. Address "MINNESOTA," care RHODES' JOURNAL, New York.

BANKERS' OBITUARY RECORD.

Breed.—Joseph Breed, Assistant Cashier, Hartford National Bank, Hartford, Conn., died August 29.

Byers.—John Byers, a prominent merchant and philanthropist and a Director of the Central National Bank, N. Y. city, died at Andover, Mass., recently.

Cook.—Stephen Cook, President of the First National Bank, Provincetown, Mass., died September 3 at the age of 71. He was identified with the whaling business the greater part of his life.

Corwith.—Henry Corwith, a well-known capitalist and Director of the National Bank of Illinois at Chicago, died recently.

Edwards.—F. K. Edwards, Cashier of the Farmers' Bank, Hugoton, Kansas, since its organization, died recently.

Elmer.—Richard A. Elmer, President of the American Surety Company, New York city, died suddenly Oct. 1. He was comparatively a young man, being only 46 years of age. He was bred to the law but decided to enter the First National Bank of Waverly, N. Y., of which his brother is President, and becoming its Cashier remained there for twelve years. In 1884 he organized the Surety Company and had the satisfaction of seeing it a great success. He was a Director in several railroad and other corporations and also identified with a number of charitable institutions.

Emery.—William P. Emery, Vice-President of the Hunterdon County National Bank, Flemington, N. J., died September 9. He was an old and influential citizen.

Freeman.—Edward A. Freeman, a well-known member of the Boston Stock Exchange, died August 23 at the age of 56.

Gillett.—John D. Gillett, President of the First National Bank, Lincoln, Ill., died August 25 in his 70th year. He was one of the largest land owners in Central Illinois and owned, besides, stocks in five different banks. He was emphatically a self-made man and left a fortune estimated at \$2,000,000.

Greene. Joseph W. Greene, President of the South Brooklyn Savings Bank, Brooklyn, N. Y., died September 20, aged 90 years. He was engaged for years in the manufacturing jewelry business, and was identified with several financial institutions.

L'Engle.—Henry A. L'Engle, President and founder of the State Bank of Florida, died of yellow fever, at Jacksonville, Sept. 14th. He was State Treasurer for four years.

Lloyd.—William M. Lloyd, who was interested in banking institutions in nearly every State in this Union, died at Altoona, Pa., August 29 at the age of 70. He was known, in that section, as the pioneer banker.

Lynde.—Cornelius Lynde, of the firm of Mitchell & Lynde, bankers, died at his residence in Rock Island, Ill., September 6. He was one of the best known bankers of Western Illinois.

Moore.—C. W. Moore died in Colorado, September 11, in the 45th year of his age. He was Vice-President of the Texarkana (Tex.) National Bank and also Cashier of the Mount Pleasant Bank in the same State. He was one of the founders of the Texarkana National Bank, and the esteem in which he was held is evidenced by the following resolution of the Directors: "That by the death of C. W. Moore our bank has lost an efficient and faithful officer, whose good name and efforts have greatly aided in its successful establishment as a solid, strong and high standing institution."

Paxton.—John A. Paxton, senior member of the firm of Paxton & Curtis, Austin, Nev., died on board steamship while en route to Europe in May last, aged 68. He was one of the pioneers of banking in that section, having been in the business for thirty-five years and at different times was a member of the following firms: Decker, Jewett & Paxton, Marysville, Cal.; Paxton, Thornburgh & Co., Virginia, Nev.; Paxton & Co., of Eureka, Nev., and Paxton, Curtis & Co., of Reno, Nev. He was also general agent of the Bank of California at Hamilton and Treasure City at the time these agencies were in existence, and at the time of his death was a large stockholder in several banks in California and Nevada. He was born in Virginia of Scotch descent.

Richards.—R. H. Richards, a Director and Vice-President of the Atlanta (Ga.) National Bank since its organization in 1865, died September 16. He was reputed to be worth \$750,000.

Robbins.—Nathan Robbins, a well-known Boston business man died September 5, aged 85. He had been President of the Faneuil Hall National Bank since its organization in 1851.

Smith.—David Smith, one of the oldest and most prominent residents in Jersey City, N. J., died September 19 at the age of 82. He was President of the Provident Institution for Savings.

Stanley.—Wm. B. Stanley, President of the Central National Bank, Columbia, S. C., died August 31, aged 78. He was a veteran of the Mexican war, had been Mayor of his city several terms and ranked among the most wealthy and prominent men of his State.

Torrey.—Ebenezer Torrey died in Fitchburg, Mass., September 3, aged 87. He was one of the incorporators of the Fitchburg Bank in 1832, was Cashier until 1850, and when it nationalized became its President, holding that position until his death. He was also Treasurer and President of the Fitchburg Savings Bank from 1846 to 1878.

Wood.—William B. Wood, a prominent merchant in Boston, died suddenly September 9, at Lexington, Mass., aged 58. In his younger years he was Cashier of the Rollstone National Bank of Fitchburg, but resigned on account of connection with business interests in other localities.

RHODES'

JOURNAL OF BANKING.

Vol. XV. NOVEMBER, 1888. No. 11.

WE DESIRE TO CALL ATTENTION to the interesting paper by Mr. Edward Atkinson printed in another place in the JOURNAL, and to the strong argument made by him in favor of a bank circulation. The withdrawal of the present National bank circulation is only a question of time, and the payment of the legal-tender note must take place after the bonded debt has been paid. Then what? Of course there are the gold and silver certificates but they are the mere representatives of gold and silver, and neither increase nor reduce the circulating medium. If the silver certificate is in circulation a silver dollar is locked up in the Treasury vault not to come out until its representative is returned. The same is the case with the gold certificate. All certificates based on a deposit of gold and silver money are subject to the causes which attract or repel metallic money to and from a country. Moreover, to use this form of money for circulation is to reduce its effectiveness as a reserve fund. A bank circulation properly secured based on gold and silver, much extends the usefulness of the actual money on which such bank currency is based. The gold and silver remains as a reserve while the bank currency does the work. Mr. Atkinson does not even start back in horror from the alternative, that if some further circulation privilege be not given to the National banks, the issue of notes by State banks may be possible at some not distant day. The general conditions not only of business but of knowledge and civilization have so improved since the time when State banking proved disastrous that even under the same laws such wild financial schemes as were then tolerated would not now result in profit. That the banks, or at least some banks, can be trusted to issue notes on their own responsibility was shown by the use of Clearing-House loan certificates, issued by the Associated Banks of New York city during the panics of 1873 and 1884. These loan certificates were issued to banks in the Clearing-House upon the deposit of collaterals—the collaterals being the assets of the banks deemed good by the Clearing-House Committee. The assets might not, in time of panic, be available in the disturbed market, but certificates representing them vouched for by the Clearing-

House served all the purpose of money. Similarly, Mr. Atkinson desires that some central authority or bank shall examine the collaterals offered as a basis for circulation by individual banks, and when favorably passed, that bank circulation should be issued thereon.

THE AMERICAN BANKERS' ASSOCIATION held its convention at Cincinnati on October 3d and 4th. As has heretofore been stated in the JOURNAL, this Association was inaugurated in 1875-76, soon after the great financial panic of 1873. This crisis in banking business made a deep and lasting impression on the banking community. The list of failures among prominent banks was great. It commenced, in New York city, with the failure of the Warehouse Security Company on September 8th, followed by that of Jay Cooke & Co., which had left the legitimate business of banking to embark in the negotiation of railroad securities. Other prominent private bankers and stock brokers also failed. On the 20th of September the failure of the Union Trust Company, the National Trust Company, the National Bank of the Commonwealth and three well-known private banking houses was announced. The New York Stock Exchange closed its doors and did not re-open for ten days. An active demand for deposits, chiefly from country correspondents, commenced on the 18th, increased during the 19th and 20th, and these drafts continued to such an extent that the reserves of the banks in the money centres of the East were alarmingly reduced. Call loans were entirely unavailable. The collaterals could not be sold except at ruinous sacrifices. A suspension of currency payments followed, at first confined to the banks of New York city, but soon extending to other large cities dependent on New York. It is plain that a large number of the country correspondents drew for their money on this occasion—not because of any business demand at home, but because of a natural fear as to the safety of their funds. This fear arose, and was at first confined to the distant correspondents; but as these drew not only on New York but upon other reserve cities the banks of which kept their reserves in New York, these tributary reserve cities were also compelled to add to the strain on the New York city banks with the result of a general stoppage. The associated banks of New York banded together for self protection, and, by the issue of Clearing-House certificates based on bills receivable and other approved securities, succeeded in gradually restoring confidence. The advantage of association among the banks of New York city was thus rendered patent to all. It was equally plain that the danger which had just been averted was due, in a great measure, to a lack of understanding of the true interests of banks in the aggregate. If the forbearance and good sense shown by the associated banks of New York and those in the larger reserve cities had been shown by the country correspondents, there would have been no pressure sufficient to lead to

suspension of currency payments. It was this thought, and the consequent desire to bring the country correspondents into accord with their depository banks in the large money centres, that inspired the organization in 1875-76 of the American Bankers' Association. The organization has brought all the banks of the country into closer contact. Bankers from different localities have met each other under circumstances that enabled them to interchange ideas and acquire greater confidence in each other—a confidence which will always prove of the greatest benefit in trying times. The Association is of equal advantage—both to the bankers who become the depositories of reserves in the money centres and to the banks in the country who keep their surplus cash away from home. When a stringency in the money centres occurs, the country bankers are beginning to learn that they only add to it by making demands for balances above their actual immediate needs. Distrust has, through association, been diminished and the feeling that the Central banks should be sustained and encouraged by a wise forbearance, is increasing. A comparison of the financial crisis of 1884 indicates to what an extent these ideas had taken root in the eleven years since 1873, during nine of which the American Bankers' Association had been in existence. The trouble in 1884 came even more suddenly and unexpectedly than that of 1873. The country was doing business on a gold basis and the prospect for good crops were excellent. When the Metropolitan National Bank and the Second National Bank of New York city suspended and the Marine National Bank and several important private banking firms closed their doors there was as dark an outlook as at any time in 1873. The New York Clearing-House banks, as in 1873, again took measures to avert the danger. They were most successful, and were aided, to a much greater extent than in 1873, by the forbearance of their country correspondents. This forbearance was due, to some extent no doubt, to the fact that the measures taken in 1884 by the Clearing-House banks of New York city were the same that proved successful in 1873; but in a great degree it was also due to the better personal understanding that existed between the managers of the banks in the country and those of the banks at the money centres, and this personal understanding had been brought about by the agency of the American Bankers' Association. This organization is one, therefore, that should be earnestly sustained by the bankers of the country. In a legitimate way it advances the interests of all bankers and protects the public who are the owners of bank deposits.

THE CONVICTION OF PITCHER, the defaulting Teller of the Union Bank, Providence, R. I., is an event which should be hailed with joy by bankers throughout the country. That a Canadian Court should at last have the courage to render a decision that will probably make an example of at least one defaulter, is almost as much matter of

congratulation as astonishment. It had become the accepted rule that once an American criminal was safely over the Canada line he had nothing to fear from either country. What the extradition laws failed to protect was amply supplemented by the Courts; and to an extent that was so discouraging, as to render the invocation of their aid a matter seldom thought of except in extreme or very plain cases, and then with unsatisfactory results. So we say, that this conviction, if it stands, coming as it does when crimes of the nature of Pitcher's seem to be epidemic, cannot fail to have a beneficial effect. It has established the precedent, at least, that a party cannot bring stolen money into Canada—knowing it to have been stolen—without incurring the penalty meted out to Pitcher. It has also settled another thing, apparently, and that is the necessary evidence must be furnished by the parties whose duty it is to do so. In the present instance, Pitcher's conviction is due and is clearly traceable to the action of the Guarantee Company of North America who had bonded the defaulter and were especially interested in his arrest and prompt punishment. It goes without saying, that Pitcher never would have received his just deserts but for the activity and energy displayed by Mr. Edward Rawlings, Vice-President and Managing Director of the Guarantee Company. Of course, other guarantee companies have done and would do the same thing under similar circumstances; but it was extremely fortunate that Mr. Rawlings was on the ground and secured evidence which, later on, would not have been available. Pitcher's case brings out in a clearer light the value of guarantee companies. So long as human nature is, like Pitcher's, unable to withstand temptation, the only safeguard in financial institutions or any others where persons are employed in a fiduciary capacity is to insist upon a bond, in sufficient amount, guaranteed by a corporation of known responsibility. Such security is double-acting; it protects and it punishes.

IN A RECENT ARTICLE in "Bradstreet's," Mr. Edward Atkinson states that notwithstanding the fact that for fifteen years since the alleged demonetization of silver by Germany the product of silver has been double what it was for fifteen years before, this whole product has been absorbed by the world's market, leaving no stock anywhere. The amount coined by the United States is, according to Mr. Atkinson, about equal to the stock held by Germany when she demonetized the metal. This absorption of silver is due, Mr. Atkinson says, to the great industrial progress made in Asia, Africa and South America. There will be also an increasing demand for it as the commerce of these countries increases. Mr. Atkinson's suggestions are exceedingly interesting. The only thing that can be urged against the hypothetical conclusion that the price of silver will increase is, that although during the fifteen years since 1873 the product of silver has been double that of the fifteen years precedent to 1873, and although at the same time

the industrial development and commerce of Asia, Africa and South America has enormously increased, so as to absorb the silver produced, yet the price of silver has as a rule suffered a steady decline. If during the next fifteen years the commerce and development of Asia, Africa and South America should increase in the same ratio as it is now increasing, there are perhaps similar reasons for thinking that the production of silver may also again double, and the conclusion still might be a continued fall in the price of silver. If, however, Mr. Atkinson is right in the supposition to which he seems to lean that the increased trade of the countries named, will outfoot the increased product of silver, and that the price of silver will rise, then another extreme point in the oscillation of the two standards has been reached. It may be that the bullion value of the standard dollar will yet approach its legal value, although it is hard to conceive of so startling an advance in the price of the white metal as to bring about such a result.

THE HONORABLE SECRETARY of the Treasury in his address to the business men of Wall Street on October 13, defended his action in depositing sixty millions of the public money with the National bank depositories. The criticism to which he referred, was, that he instead of permitting the banks to have the use of this enormous loan, should have used the fund to purchase bonds. The JOURNAL has always considered it good policy to deposit public funds with the banks, because the funds are thus available for use in the business of the country and there is no locking up of cash, and if there is an irreducible surplus it can do less harm deposited with the banks than if locked up in the Treasury vaults. The Secretary does not seem to be borne out by facts when he said that in December, 1887, when he first began to enlarge the deposits, he had no other way in which he could use the surplus. The Secretary has ever since the passage of the act of March 3, 1881, had ample authority to purchase United States bonds. The law is perfectly clear. The Senate has said he had, the House of Representatives has said he had, so it must be concluded that he did have authority. It is plain then that he might have used the sixty millions of dollars or at least some forty millions of it, in purchasing fours and four-and-a-halves. Contrary to expectation there does not appear to have been any difficulty in securing offers from holders, and it is probable that the whole surplus in Mr. Fairchild's hands could have been invested in bonds at prices that would have netted the Government about two per cent.

THE BANKS OF NEW YORK CITY hold the reserves of the other banks of the country. They also hold the surplus money of large numbers of individuals and corporations who prefer to keep their money at the great financial centre. The result is that every one watches the

financial pulse as shown by the weekly statements of the Clearing-House banks. These statements are looked for with great anxiety and a sudden fall in the reserves of cash has an exceedingly depressing effect on the markets. Apart from any profit to the Clearing-House banks, it would be a good thing for their correspondents and depositors, banks and individuals if the Associated banks could issue notes for circulation, guaranteed by the Association based simply on the assets and general credit of each bank. It would be merely an extended use of Clearing-House loan certificates. The amount that each bank was permitted to issue could be regulated by the Association, through an inspection of the assets of the issuing bank. The notes could be sent to correspondents who required cash without depleting the reserves of the banks and would serve all purposes until they came back to New York where they would, as a rule, be redeemed through the clearings. Of course the United States law preventing the circulation of any form of bank currency except National bank notes now prevents this plan being adopted ; but it is easy to see how complete a guard it would be against the sudden stringencies in the money market now caused by anticipated or actual pressure on the central reserves.

THERE WAS A LIVELY TIME in wheat at Chicago, the first of October which seemed to set at naught all the calculations as to the bountiful harvest of the present year. The crop was not as large as that of 1887, but it is estimated to amount to some 411,000,000 bushels which, with some 66,000,000 left over from the old crop, makes 467 millions of bushels to supply the country until the new crop is ready. After making all the necessary allowances for home consumption and seed, it is believed that nearly 150 millions of bushels will be left. But, notwithstanding these estimates which are made by the Agricultural Department, the price was forced to two dollars a bushel by shrewd manipulation of the market. The brokers and dealers themselves make the rules by which they are bound to conduct transactions with each other, and now and then some one shrewder or more unscrupulous than the others comes along and, by unexpectedly large transactions under the rules, squeezes all the rest. The wheat in stock, that is in the cars and elevators, is the wheat in which they deal ; and notwithstanding that the estimates of the Agricultural Department may be correct as to the aggregate amount of the crop, yet the wheat available to be dealt in was much smaller in quantity than at the same time in 1887. On October 30 the total stock out of farmers' hands in Minnesota and Dakota, the two greatest wheat raising States, was 10,741,000 bushels as against 21,030,000 bushels at the corresponding date last year. From August 1, 1888, there have been received of the new crop in Minneapolis and Duluth 14,171,536 bushels of wheat as against 17,760,141 bushels from the same date in 1887. It is plain that the manipulators of the wheat corner in Chicago had information

more to the point than the glittering generalities of the Agricultural Department. The crop of merchantable wheat is evidently much smaller the present year than it was in 1887. Moreover there is likely to be a strong foreign demand. While the corner price was a corner price, the actual value of wheat bids fair to be much higher than it has been for some years past. Those who buy for foreign markets are waiting for lower prices ; but we doubt if there will be any slump as there was last year.

THE RISE IN THE PRICE of silver during September caused some surprise. It went up to 44 3-16. Several foreign Governments, including Russia, bought silver to a moderate extent in the London market. The speculators obtained some knowledge that the purchases were to be made and took advantage of the fact to manipulate the rise. The East Indian banks are the great purchasers of silver and one of them, it is said, checked the upward movement by offering to sell silver at the end of the year for 45. This was an intimation that too stiff a price in London would induce sales from India. The ordinary stock in the London market is so small that an increase in demand from any source gives the holders an opportunity to raise the price temporarily. The demand is usually very regular, but, as has been seen, the least outside call causes a fluctuation. This does not appear however to indicate any permanent improvement in the price of the white metal. The great supplies are at a distance from the place where the price is fixed. India has an immense supply of silver which, as a rule, of late years she has secured at low rates. Any favorable turn in the price makes her willing to part with it for gold.

THE TOTAL PAYMENTS for bonds made by the Treasury Department from April 23d to September 29th, were \$73,340,268. Purchases amounting to \$37,351,900 have been applied to the sinking fund. The Secretary fulfilled the requirement of the sinking fund for the fiscal year from July 1, 1887, to July 1, 1888, by the redemption of three per cent. bonds and the purchase of fours and four-and-a-halves under the circulars of August and September, 1887. Then he stopped buying altogether until on April 17th the House of Representatives confirmed his authority to purchase under the act of March 3, 1881. He then issued his circular of April 23, 1888, and commenced to buy bonds under that act, which he continued to do up to July 1, 1888. Then he stopped buying bonds under the Act of March, 3, 1881, and commenced to buy again for the sinking fund for the fiscal year ending July 1, 1889. The only difference in the result is that bonds purchased for the sinking fund are technically supposed to be held by the Government and to continue to bear interest, while the bonds purchased under the Act of March 3, 1881, are cancelled. The sinking fund bonds, however,

are in reality as much cancelled as the others, the difference being that they form the basis of the calculation by which the amount of money that must be used to meet the requirements of the sinking fund for the next year must be arrived at. Thus all the bonds ever bought for the sinking fund are technically supposed to be drawing interest, and this interest is supposed to be constantly re-invested and added to the aggregate fund, which must, each year, be laid out in the purchase of new bonds. In reality, as said before, it is only a process that results in determining how much the sinking fund requires to be invested each year by the Government in its own debt. The Secretary has thus, it may be seen, ample authority to purchase bonds under two distinct laws.

DURING THE PAST MONTH there seems to have been a gratifying revival of business throughout the country, the more so in that it has occurred notwithstanding the excitement of the Presidential campaign. It gives promise, as soon as the election is over, of developing into a veritable boom in almost every branch of business. In view of this outlook the management of the finances of the Government becomes of the utmost importance. It is apparent that under present laws, the Secretary of the Treasury holds a most important and delicate discretion. It is in his hands to permit or relieve stringency in the money market as he sees fit. When business becomes strong and urgent in its demands the reserves of the country are withdrawn from the money centres. At the same time the money to pay the taxes to the Treasury are drawn from the same source. The Secretary's only method of replacing the funds drawn by the payment of the revenues of the Government from the channels of trade, is to buy bonds. During the last two months he has bought largely, although he has not accepted all that have been offered. The National banks are much hampered in sales they would otherwise make by a provision in the Act of July 12, 1882, which prevents such banks from depositing, in the aggregate, over three millions of dollars in lawful money in any one calendar month to retire their circulation and withdraw their bonds to sell them to the Government. The profits on circulation now amount to nothing and many of the banks would like to dispose of their bonds at the present good prices; but this law gives the Secretary power to refuse permission to withdraw them when the aggregate withdrawal would require a deposit of over \$3,000,000 in lawful money in any one calendar month. The restriction was intended by those who injected it into the Act to prevent the banks from conspiring to retire all their circulation at once and thus cause a dearth of currency—a ridiculous apprehension—basis for which existed only in the brains of a few financial cranks in Congress. It now stands as a bar to the Secretary's securing bonds from the holders who are most anxious to dispose of them at moderate prices.

THE PARIS SAVINGS BANK.

The reports of the Savings Bank of Paris (France), are instructive. Each annual exhibit makes a pamphlet in quarto form, of about 100 pages, containing :

1st. The report of the President giving at great length, facts and figures relating to the operations of the bank for the preceding year, together with comments, recommendations and comparisons with past years.

2nd. The statement of the bank Examiners—(comité de censure).

3rd. Extracts—condensed reports of savings banks in other parts of Europe.

4th. About a dozen pages of tabulated statistics—a vast and varied amount of information, relating to the progress of the bank since its organization in 1818—to the character and occupations of its depositors, etc., etc.

5th. A diagram showing graphically an epitome of the history of the institution. At the bottom of this folded page are six horizontal parallel lines. The space between the two upper ones is filled with figures, 1818, 1819, and so on to 1888. Over each of these dates are two colored stripes or columns, upon which are figures—those upon the red showing the number of depositors, upon the green the amount of deposits. These columns vary in length as the figures increase or decrease, one-sixteenth of an inch for depositors represents about 1,000, for francs, 1,000,000.

The horizontal spaces under the dates are barred off into sections (some embracing few and some many years), in which are figures showing—

1st. The maximum amounts, ranging from 1,000 to 8,000 francs, allowed for individual deposits.

2d. The per cent., varying from 8 to $4\frac{3}{4}$, paid to depositors in dividends.

3d. The cost of administration—from $\frac{1}{4}$ to $\frac{3}{4}$ of one per cent.

Lastly. The rate of interest paid to the Savings Bank by the National Bank of Trusts and Deposits.

Upon the last pages of each report are the names, with vocations, of more than 800 administrators or corporators.

The deposits, of this and all other savings banks in France, instead of being invested in mortgages and other securities as in this country, are paid into the National Bank of Deposits & Trusts and invested in government bonds (Rentes).

The savings banks receive on the money thus transferred interest at four per cent., all of which, except half of one per cent., retained for expenses of administration, is paid or credited to their depositors as dividends.

The number of open accounts in the Paris Savings Bank December 31, 1887, was 547,894, showing balances in favor of depositors amounting to 118,568,790 francs (\$23,000,000). Many of the savings banks in the United States have larger deposits, but none have so large a clientage, none have amounts aggregated from so small sums.

Two pages of statistics are devoted to the deposits of School Savings Bank institutions of recent origin, but very popular throughout France.*

The number of deposits made by the children in the Paris schools is not

* At the close of the year 1886 there were in France 23,980 school savings banks—491,160 depositors with credits amounting to 11,934,286 francs.

given, but in the reports of the schools in the city of Amiens it is stated that of the 6,814 attendants, 4,884 made, during the year 1882, 440,450 separate deposits, aggregating 11,011 francs, which shows an average of $2\frac{1}{2}$ centimes ($\frac{1}{2}$ a cent in our currency) for each deposit.

For thirty years prior to 1882—when the maximum was increased to 2,000 francs—no one account, including dividends, was permitted to accumulate beyond 1,000 francs (§.98.)

The authorities in France encourage the people to put their savings into rentes or annuities. To this end the savings banks, as agents, annually procure for their clients, free of cost, thousands of government bonds.

At the close of every year deposits uncalled for, or accounts that have remained without change, except credits for dividends for thirty years, are transferred, after due advertisement, to the National bank, and there remain, subject to the demand of the original depositor or his heirs, if such should ever be legally made. The number thus transferred for 1885 was 1,516.

Another peculiar feature noticeable in these reports is the large number of pass books, averaging annually about 8,000, each issued, usually to some child, to whom a depositor wishes to make a substantial birthday, Christmas, or New Year's present. At the request of the donor a stipulation is noted in the bank book that the money thus deposited with its dividends shall not be withdrawn until the person to whom it is given shall become of age, until the day of his or her marriage, or some other specified time.

The French are eminently a saving people. Their school banks, postal banks, and savings banks all foster habits of economy.

Argentine Finances and Affairs.—"The steady influx of gold from England no longer excites attention," says the Buenos Ayres *Standard*, "and the market is becoming convinced that in the future the Bank of England must prepare every year to meet this heavy drain of the precious metal for the Argentine Republic. The country needs much fresh capital to keep up the present great strain in the boom of affairs in general, and since the influx of private capital does not suffice, the national and provincial government must appeal to fresh loans. It is not only fresh gold that this market requires, though the influx of specie amounts to five or ten millions sterling; it is in need of far more capital, and hence the resort to increased issues of Cédulas, which are merely loans in disguise, as every Cédula goes to London, Paris, Antwerp, or Hamburg. More paper money is the cry at the moment, from the foot of the Andes to the banks of the Plate. It is idle to dream of a return to specie payments under such circumstances, and our foreign readers may believe us when we state that nobody dreams of such a dreadful eventuality for the present. All appear to be well satisfied with gold premium and paper discount, and the government will certainly not disturb such satisfaction and equanimity.

It is probable the note circulation next year will exceed the present issue by at least fifty millions. The season is one of the most satisfactory on record, promising a very heavy wool clip and a splendid harvest. The prospects of farmers have never been more roseate, and what with the steady price of wool on the continent, and bad crop prospects in England and other countries, the busy season of 1884-9 promises a mine of gold to producers."

Prepared for the JOURNAL by an experienced Bank Accountant.

REMITTANCES OF DRAFTS.

"In looking over the general ledger, Mr. Payson, I did not see in the account with the Merchants' Bank of Checkton where you had charged up drafts sent them for collection—I mean the items. I found where you had charged amounts from day to day, but apparently they were aggregates, and the only explanation was 'R. A.,' which, I presumed, referred to drafts sent forward."

"So it does, Mr. Brown. By the letters 'R. A.,' I mean Remittance Account, the name applied to my statement book of drafts forwarded to the Merchants' Bank. The items are in the special book for that purpose, and I carry to the ledger account only the total of such remittances for the day. When I wish to know any of the particulars I go to the Remittance Account, or book, where the information is given in a shape that is perfectly clear and distinct, the columns in this book being headed:—

1.—The date of the draft. 2.—Drawer's number which is on the draft
3.—Name of the drawer. 4.—Name of the endorser. 5.—Name of the payer.
6.—The amount. 7.—Remarks."

Remittance Account of Drafts to Merchants' Bank, Checkton.

"In forwarding the drafts for collection you send also a letter of instruction, a form for which I believe I have noticed, have I not?"

"You have observed too, Mr. Brown, that the letter is a very plain and simple one, and I not only enclose this letter with the drafts as I forward them

* A series of papers on Practical Bank Book-keeping: will be continued through the year 1888, or until the subject is exhausted. When required the articles will be illustrated by photo-engraved plates made from pen drawings, showing some new ideas in blank books, and other labor-saving forms.

but I include also a blank receipt or acknowledgement for the Cashier of the Merchants' Bank to fill out and return to me. This acknowledgment when received properly filled up I consider a very important voucher. It is not only an evidence for my satisfaction that the drafts reached the hands of him for whom they were intended but it performs a still more valuable service. It is a voucher which I hold as a proof that the amount called for in my Remittance Account is positively correct. It is not conclusive, I know, that I have not remitted some false draft which in due course will be returned and charged back to us as uncollectable; it is nevertheless a factor in a perfect system of vouchers which I have established and to which I rigorously adhere."

BANK OF FARMER.

Farmer, July 11.

Merchants' Bank of Checkton.

We hand you herein for collection, as follows:

Draft, Wilson & Dodge (protest)	\$427.50.
" do. (no pro.)	136.20.
" J. C. Cole (protest)	1270.00.
" Chick & Co. (no pro.)	285.10.

Please acknowledge and oblige,

PAYSON, Cashier.

Letter of Remittance with Drafts for Collection.

Checkton, July 12, 1888.

No. 40.
\$2,118.80.

We this day acknowledge receipt from Bank of Farmer Drafts for collection as per statement amounting to:
Two Thousand One Hundred Eighteen and 80-100 Dollars which will be collected and placed to credit or returned as instructed.

T. B. WILLIAMS, Cashier.

Form of Acknowledgement for Drafts Remitted.

"But this process of yours, Mr. Payson, is not in general use, as I understand, and there are other forms I believe."

"Yes, sir; I will show you a plan for keeping a memorandum of drafts," said Mr. Payson, "which, although I do not use it myself, I believe is a good one. The plan is in use to some extent and it possesses some very excellent advantages. A book-keeper in a National bank where the form has been in use several years says of it:

'No other book is kept for references to outstanding collections. The stub is filled except the lower lines referring to place and manner of settlement. The letter is then filled and detached and mailed with the draft and note for collection. The collector detaches the lower end of the letter and returns it with his check or the unpaid paper, often without any further letter of advice which the printed form renders quite unnecessary. The clerk, upon receiving the return slip refers to the books and finds the proper stub, notes on the

lower lines the date of receipt and detaches the narrow margin which has indicated that the paper is still unsettled—the detachment now being proof that settlement has been made. The remaining margins which of course project about two or three-eighths of an inch beyond the regular stubs or those for which settlements have been made, serve as a ready means of turning almost instantly to those particular accounts which are not paid. We use this form,' says the book-keeper, 'for memoranda in transmitting deeds of trust and nearly every kind of valuable document. Thus far we have found an index quite unnecessary. As it is essential that commercial paper, unless explicit orders to the contrary are given must be protested, the word "Protest" is inserted and is never erased; but in cases where protest is waived we add "No." The general instruction about telegraphing advice is prominent and cannot well be overlooked. We seldom put more than one item on a stub. Any clerk can use the book for transmitting or receiving collections."

Form of Advice with Stub and attached Return Notice.

EXCHANGE.

"How about the exchange business, Mr. Payson? You have some call for our drafts, I see, though I imagine that part of our service to the people here will be extended gradually."

"Yes, we are doing a fair business in that line, and it is growing. Bills of exchange or drafts as we are accustomed to call them are used generally by the merchants in the transfer of large amounts, but for amounts of fifty dollars and under, some other means is usually patronized. Post-office and express money orders, for small amounts, are cheap, and are generally popular with the people. For larger amounts, however, the bank draft is much the safest and most convenient. In some banks a record is kept of drafts drawn on the regular correspondent in a book devised especially for the

AMERICAN BANKERS' ASSOCIATION.

PROCEEDINGS OF THE THIRTEENTH ANNUAL CONVENTION, HELD AT
CINCINNATI, OCTOBER 3d AND 4TH, 1888.

The Convention of 1888 was held at Cincinnati by order of the Executive Council, on account of the cordial invitation received from the banks and business men of that city, from the Clearing-House Association and the Chamber of Commerce. One special attraction urged in the invitation was that a Centennial Exposition was in progress in the city, beginning on July 4th and continuing for one hundred business days thereafter. The Cincinnati bankers were actuated by a desire to make the occasion one to be long remembered for the pleasure and instruction it afforded. They wished to make the visiting delegates at home in their city and, as Mr. Espy expressed it in his address of welcome, it was the desire not only of the bankers but of the citizens generally that the visitors should take away the pleasantest possible memory of Cincinnati. The headquarters of the delegates were at the Burnet House, where everything was done for the accommodation and comfort of the guests. Over two hundred and forty delegates were in attendance, representing banks located in over thirty-two States and Territories. The session was convened at the Scottish Rite Cathedral, Cincinnati, Ohio, on Wednesday, Oct. 3, 1888.

The President, Mr. Logan C. Murray, of New York, called the Convention to order at 11 o'clock A. M., introducing Rev. Dudley Rhodes, who opened the session with prayer.

The President invited the Vice-Presidents and Executive Council to take seats upon the platform, after which the Hon. James Espy, President of the Cincinnati Clearing-House and of the Ohio Valley National Bank of that city, offered the following address of welcome :

ADDRESS OF HON. JAMES ESPY.

It is a most agreeable duty appointed to me in behalf of the banks and bankers of Cincinnati to say to gentlemen of the Bankers' Association here assembled, that we are heartily glad to have this opportunity of entertaining you.

Our entire community also extend their greeting to your Executive Council for their adoption of this city for the meeting of the Convention, thus recognizing the importance of the Centennial Celebration of the Ohio Valley States, an exhibition worthy of your attention, now in the full tide of success.

Our city is singularly an appropriate place for your meeting. Besides being the metropolis of the Ohio Valley, the Statisticians of the Government Census of 1880 place us within less than ten miles of the geographical centre of population of the entire Nation.

Upon the conclusions of your deliberations to-day, it is arranged that you visit the Centennial Buildings where the officers in charge will show you every attention. In the evening we expect you to dine with us at the Burnet House. To-morrow afternoon we offer you a drive to the Museum and the overlook from Mt. Adams, from there through our suburbs. In the evening we shall all meet together in a social reception at the Queen City Club House. I beg to say, however, that it is not intended to restrict you to this programme, for it is our desire that each member of this body is to consider himself our especial guest, whom we delight to honor by every means in our power and we shall expect you to ask for anything you may desire.

It is the earnest wish of our people that all of you shall take away the pleasantest possible memory of Cincinnati, and a conviction of the fact that we are a progressive city with great and varied mercantile and manufacturing interests, fully abreast of

* The American Bankers' Association was organized in Philadelphia, on October 3, 1876. The convention was held at the Judge's Hall, Centennial Building, and this meeting was an adjourned one from a convention of bankers held at Saratoga in 1875, when it was agreed to form an association, and a committee was appointed to draft a constitution and by-laws. The conventions of 1875 and 1876 were therefore one convention, but the association was not organized until 1876.

the active movements of this busy age; with banks solid in capital, maintaining their old-time character for conservatism and vigilant management, and also that the episode of speculative bank organizations, managed by desperate men inexperienced in dealing with credits, has disappeared forever from our midst leaving scarcely a trace of evil on our good name.

I again extend the hospitalities of our city.

Mr. Espy was followed by Mr. Logan C. Murray, the President of the Association, whose able address was published in full in the October number of the JOURNAL. At the conclusion of Mr. Murray's address he introduced Mr. Chas. Parsons, the First Vice-President, who spoke as follows:

ADDRESS OF MR. CHARLES PARSONS,

First Vice-President of the Association.

Mr. President and Gentlemen of the American Bankers' Association:

I thank you for your expression of confidence and esteem in selecting me last year, in my absence, to be the First Vice-President of your Association. I consider it as also a mark of appreciation of our Western country. It seems in the history of the Old World that the first dawn of civilization came with the rising sun from the East, spreading slowly over Western Asia and Egypt, and following the path of commerce thence around the shores of the Mediterranean until, after a long period of time, it pervaded all Europe. So here in this country the Ocean shore in the East was first the scene of the white settlements, and later on, with slow march, the country West became the home of civilization and art. Now, however, we western people consider that we are ready to take up and follow to a successful termination almost any project, either of science, art or finance. We are met, gentlemen, here to consider the things which concern our own immediate pursuit. All classes, trades, and professions now have their annual meetings, their various officers, committees and deliberations on their special interests and affairs; and I think it is eminently fit that we, to whom is intrusted the control of the finances of the vast body of people of the United States, who literally hold the purse-strings of the Nation, should meet, compare our views, and carefully deliberate on those matters that concern not only our own immediate profit and welfare, but that of the whole American people, for it is unquestionably true there is no one pursuit that more clearly indicates the prosperity of the country at large than our own. When our business is flourishing and healthy, so are likewise all the various occupations of the masses. The banks are barometers which indicate the rise and fall of the business temperature. It is not in times of panic and monetary stringency that we are most flourishing, although many, not initiated, so suppose. No; those are not times of prosperity for the legitimate banker; they are the days of engorgement for the money vulture, the usurer, who fattens on the misfortunes of his fellows. At such times it is our duty, and should be our pleasure, to lend all the aid in our power to the solvent customer, that with him we may ride out the storm and make a peaceful harbor.

We are met here, gentlemen, in this goodly city of Cincinnati; she has been called the Queen City of the West for many years, and was originally named in honor of and after the distinguished society formed under the auspices of the Father of his Country, to perpetuate the memories and friendships formed in the struggle for Independence by the officers of the Revolutionary Army. The society has lapsed, but the city still lives and thrives, and will ever continue to perpetuate its memory. When we consider the condition of the country before the War as to banks of circulation, when multitudes of them were existing in out-of-the-way places, in swamps and forests inaccessible, which sent forth their issues, not to be a legitimate currency redeemable at the pleasure of the holder, but only to rest like a nightmare on the business of the country, producing only stagnation and distress; we can but hope that no circumstances shall arise by reason of which we may be relegated to that miserable condition of unnumbered banks issuing circulation under State charters. For relieving us from this state of things, and for his great services in that supreme struggle when the fate of the Nation trembled in the balance, let us honor and revere the name of Salmon P. Chase. But there is another name, alas, also gone into the everlasting sunlight beyond the river, who in a most trying time, came to the rescue of our financial system. When the immediate need of the Greenback issue was over and sound financiers thought it was time for providing for their redemption, there arose a class of men

who were advocates of a permanent continuance and enlargement of this species of currency, which was originally limited by law to \$400,000,000, those men called the currency "flat" money, money literally made by a word, and which could easily have been unmade by a word. No means were to be provided for their redemption; and the bold, bad proposal was made to issue as many of them as would equal the whole debt of the United States, and then say to the bondholders, "Come and take this stuff or nothing." At this time, when it seemed as if a large proportion of politicians, *merely*, would go and join this false notion of finance, and our system of currency would become as worthless as the French assignats, then nobly stood up a man from the State of Ohio, in the Lower House of Congress, who, with others, braved the craze of the hour and showed the utter falsity of the principle. He also delivered, in old Faneuil Hall, in Boston, a speech on this and other subjects, financial and economical, that seemed to me so full of sound, practical sense, that I ordered 10,000 copies of it, printed and distributed them wherever I could. Thanks to James A. Garfield and kindred spirits, this heresy did not prevail.

But Ohio has not lost all her great men; there still lives in this State one to the manor born, who in many respects is perhaps the superior of all—one who, for long years in the Senate of his country, and in the high post of Secretary of the United States Treasury, has well-earned the plaudits of his countrymen. At this time there exists not in the list of honorable gentlemen composing the Senate of the United States a man who is his superior in knowledge of financial affairs, or with a greater disposition to use that knowledge for the common benefit. Looking back to the days of the war, and later, to the time when a resumption of specie payments was agitated, and the bill passed ordering it, and still later when a deadly onset, a war to the death, was made against that most desirable object, I recall his services with the utmost pleasure. His readiness of reply, perfect mastery of the subject of finance, and especially of the finances of this country, were shown in the meetings held between him and the House Committee on the question of resumption. For his long and valuable services in the Finance Committee, in the Senate, and for his aid in the vital question of resumption of specie payments, the bankers and people of the United States owe a debt of gratitude to the Honorable John Sherman.

But Ohio has had other great men, and if I may be permitted to go out of the financial line, I would like to pay a passing tribute to some who have illustrated her history and that of our common country in another field; I allude to those great military men who have written their name in enduring letters on the pages of our annals—Grant, Sherman and Sheridan who bared their bosoms to the shock of battle in defense of their country. Grant, silent, persistent and undaunted by danger, never elated by success; he was the incarnation of military common sense. And greater than all else was his conduct when, after four long years of struggling, victory having rested on his banners, how grandly he extended his hand to the conquered and bade them go home in peace. In a moment the hostile armies faded away, and peaceful citizens of a united country remained.

But when at last, borne down by pecuniary misfortune and sickness, the grip of death on his throat, what nobler sight was there ever seen than he with his last efforts telling the unvarnished story of his life in language so clear and vivid that many have said the work was as remarkable as the classic commentaries of Cæsar. Adieu, great commander! Sheridan too, has gone; brilliant soldier, he came to the rescue when his services were invaluable; he snatched victory from defeat and was greatest in the time of greatest danger. Sherman alone remains of these three. Grand, rugged old leader, many a patriotic heart beats quicker at the mention of his name. For one, my feelings of high admiration for his great military genius, my personal friendship and regard, I cannot express in words. Long may he live to enjoy the proud pleasure of witnessing the glory of his happy reunited country. Thus much for his grand old State where we are met. We take pleasure in her prosperity and honor, for as citizens of a common country, as Americans, it is partly our own.

At the close of the Vice-President's Address, Mr. James Espy, Chairman of the Bankers' Committee of Cincinnati, announced to the Delegates, that the Committee had provided an entertainment, for which programme and button badge would be furnished each delegate. The Exposition Commissioners had requested the Association to meet at 4 o'clock, in Music Hall of the Exposition

Buildings. The Chamber of Commerce, Libraries and Clubs throw their doors open and invite you to give them a call.

The President—The next business, in order is the call of the roll. The Secretary will call the roll.

On motion, the call of the roll was dispensed with.

The President—Our next business is the report of the Executive Council.

Mr. Knox—Mr. President, as Chairman of the Executive Council, I am authorized to report the following resolution, which I am happy to say is quite in conformity with the address of the President of the Association :

Resolved: That the American Bankers' Association assembled at Cincinnati, recommend the passage of a bill by Congress, providing for the issue of circulating notes to any National Banking Association to the full extent of the par value of the same instead of 90 per cent. of such par value as now provided by law, and also that National Banks now organized or hereafter organized, shall not be required to keep on deposit, or deposit with the Treasurer of the United States, United States bonds in excess of ten thousand dollars at the par value thereof, or not more than one-tenth of their capital stock if \$100,000 or less.

The Committee have no further report to make at the present.

The President—Gentlemen, you have heard the report of the Executive Council, what is your pleasure ?

On motion, the report of the Executive Council was accepted and adopted.

The President—The report of the Treasurer is now in order.

REPORT OF MR. GEO. F. BAKER,

Treasurer of the Association.

To the American Bankers' Association :

Gentlemen—I have the honor to submit the following report of the receipts and disbursements during the past year :

Balance on hand, as per report, October 8, 1887	\$1,820 15
Received from Banks, Bankers, etc., subscriptions :	
922 at ten dollars	\$9,220 00
734 at five dollars	3,670 00
1 at 2½ dollars	2 50
2 at two dollars	4 00
	<hr/>
	13,596 50
For Advertisement in "Journal"	50 00
	<hr/>
	\$14,966 65
Disbursements as per accompanying vouchers	10,385 00
	<hr/>
Leaving a balance on hand of	\$4,581 65

Respectfully, GEO. F. BAKER, Treasurer.

The President—What is your pleasure with the Treasurer's report ?

On motion, the report was accepted and filed.

The President—The report of the Auditing Committee is in order.

The Secretary read the following report of the Auditing Committee :

REPORT OF AUDITING COMMITTEE.

To the American Bankers' Association :

CINCINNATI, October 2, 1888.

GENTLEMEN:—We have carefully examined the account of George F. Baker, Treasurer of this Association, and have compared it with the bills and vouchers for the expenses from Oct. 8, 1887, to Oct. 1, 1888, and find it correct.

Your Committee would suggest that the thanks of the Association are due and be tendered Mr. Baker for his continued faithfulness and efficiency as our Treasurer.

S. K. SNEED, W. G. DESHLER, Auditing Committee.

The President—Gentlemen, what is your pleasure with the report ?

On motion, the report was accepted and adopted.

The President—The Secretary's report is next in order.

REPORT OF THE SECRETARY.

The Secretary prefaced his report with a history of the organization of the Association in 1875-76, and of the conventions held during the last fourteen years, and concluded as follows :

To give some idea of the recent growth of the Association, it is found that in 1888 there were 1,358 members, in 1884, 1,364, in 1885, 1,402, in 1886, 1,466, in 1887, 1,663, and

during the year just passed the number has increased to 1,718. The membership at the date of the Convention in 1887 was, as above stated, 1,688. Of these, 10 have failed, 12 have discontinued business, 121 have withdrawn from the Association, and 31, while not formally withdrawing, have not paid their dues. This reduced the number of members by 174, but this loss was more than made good by 204 new members joining the Association. Of the 1,718 members now belonging to the Association, 992 paid \$10 and 734 paid \$5. The total amount received by the Association during the year was \$13,646.50, of which \$50 was received from advertisement. The total expenditures for the year, as shown by the report of the Treasurer, were \$10,385, but of this \$3,776.03 was incurred for expenses properly belonging to the previous year—and the actual expenses for the present year have been \$6,608.97 only. The balance on hand at the date of the last Convention was \$1,320.15. The actual cash balance at the present date, as shown by the Treasurer's report, is \$4,581.65, and if to this be added the amount of the last year's bills paid out of this year's receipts, there would have been a net balance of \$7,037.53.

The bankers of the country have been invited to adopt the uniform check and draft form recommended by the Chicago bankers, and approved by resolution of the Convention at Pittsburgh. Over seventy-five thousand circulars and letters have been sent out to the banks and bankers of the country. The Secretary has endeavored to communicate with the police authorities throughout the country, in order to procure early information of the operations of bank robbers and forgers, but this has not proved a success. The news of these occurrences, as a rule, appears first in the daily press, and it is a work of supererogation to send out circulars to the banks informing them of events they may have before read in the papers. The proper function of the Association in this respect seems to be confined to giving aid to members of the Association who have been victimized, in the detection, arrest, and prosecution of the deprecators.

During the year, notices have been received of the deaths of 101 officers of banks belonging to the Association, 52 Directors, and 10 Bankers.

The President—Gentlemen, you have the Secretary's report before you, what is your pleasure?

On motion, the report as read was accepted, adopted and ordered printed.

The President—The next thing in order will be the address of Edward Atkinson, of Boston, on "What shall be the future instruments of exchange;" if Mr. Atkinson is present, he will please read it.

Mr. Atkinson not being present, the President requested Mr. Knox to read the paper. Mr. Knox on coming forward said: "Mr. Atkinson is a friend of mine, and is well known to many of you as one of the highest authorities on finance."

PAPER BY MR. EDWARD ATKINSON ON "WHAT SHALL BE THE FUTURE INSTRUMENTS OF EXCHANGE."

It may be assumed that all bankers and bank officers are now trying to solve the problem which will presently become an urgent one. What shall we do for the instruments of exchange when the high price of United States bonds has induced all the banks to surrender their note circulation and when the liquidation of the demand debt for the United States represented by the legal-tender notes shall have been carried to the end, for the simple reason that no more bonds can be bought in the purchase of which these notes may be re-issued as they are now; in which event the notes must be liquidated unless taxation should be rapidly reduced.

It may be assumed that by way either of moderate reduction of taxation or by extraordinary expenditures this mode of contracting the Currency may for a time be deferred; but in reasoning upon the subject we may well assume that there will be no Congress capable of removing taxes fast enough to prevent a more rapid accumulation of a surplus ere long, as the country grows. Leaving all consideration of the tariff question on one side, and looking upon the subject merely from the banker's point of view, one may ask, what would be the effect of the Mills bill, supposing it to pass at the Second Session of Congress after the election is over, in its present form? How much would it reduce the surplus? Who can tell?

In 1842 the first measure of tariff reduction presented in Great Britain by Sir Robert Peel resembled the Mills bill. It carried into the free list or reduced the duties on 600 articles out of 1,250; the reduction of revenue expected from this measure was two

and one-half million pounds sterling on a gross revenue of about twenty million: in the same measure an income tax was imposed for three years for the first time in the history of England as a peace measure, to make up for this expected deficiency; but such was the effect of this measure for removing duties on crude materials upon the manufactures and commerce of Great Britain, that the revenue from the dutiable articles remaining in the tariff presently came up to the original sum of about twenty million pounds sterling. The benefit of the measure was shared alike by all consumers, manufacturers and merchants alike. Again in 1845 about 700 articles out of the remaining 750 were treated in the same way; most of them being put on the free list; again the income tax was extended for three years in expectation of a deficiency; again the benefit to the manufacturing and mechanic arts and to the people in general was so great, that consuming power and therefore the import of the fifty articles which remained subject to duty rapidly increased, and before the three years were out the revenue was again at or about twenty million pounds sterling where it remains to the present day on a list covering substantially only six principal commodities with a few trifling matters subject to duty yielding a little revenue, added thereto.

What is more likely to happen than a similar sequence in case a judicious measure should be passed by the present or by another Congress, putting into the free list all the petty articles which are of little consequence, removing the duties on crude or partly manufactured articles, and reducing other duties in proportion. May not a reduction in the cost of our textile manufactures, which will ensue from the removal of the disparity in the price of materials which now exists as compared to other manufacturing countries, enable us to supply foreign markets in very much greater measure than we do now? Will not a corresponding import of dutiable articles follow of necessity? Will not the revenue be maintained? Will any Congress be capable of anticipating the true effect of any measure of tax reduction which they can pass; will any Congress dare to reduce the revenue to such an extent as to leave any considerable amount of debt unpaid at the end of the present century, whether it be bonded debt, or demand debt represented by legal-tender notes? I submit these as the possible conditions which may make it an absolute necessity for the people of this country to invent a new instrument of exchange, to take the place of the legal-tender notes and of the bank notes secured by U. S. bonds, unless the whole circulating medium is to consist either of bullion or of certificates of the Government backed by bullion, dollar for dollar. This is a different question from that affecting the kind of bullion; a bullion currency it may be backed by silver and gold. Whatever metal becomes the standard, are we not now tending to a strict bullion basis? In order to reason clearly upon this subject is it not a necessity to discriminate between the function of whatever may be lawful money, whether gold coin, silver coin or legal-tender notes entitled to be counted in the bank reserves and the function of money as an instrument of exchange?

In order to make this discrimination must we not ask ourselves what does a bank do? Putting aside the loan of the money or of the credit of a bank upon stocks or bonds as having no direct connection with the pending issue, we may consider the function of the bank in one department, that of furnishing the means for moving the crops. What is the process?

The merchant who has the capital or the credit either to buy parts of the crop in the far West, or to receive portions of the crop on consignment, submits to the bank a note or bill of exchange to be discounted; he draws some kind of instrument of exchange which will pass current among the farmers to whom he may cause the money to be sent in the far West, who may hold such instrument of exchange for a considerable time. While in circulation, if in coin, the bank reserves are depleted. But this instrument of exchange, whatever it might be, becomes the representative of wheat, cotton or corn on the way from the producer to the consumer; true it may not be ear-marked, or tied to any specific parcel of grain or cotton, but it is a representative of actual substance on the way toward consumption; therefore it is not an absolute necessity that this specific instrument of exchange should consist of coin or of any kind of money which shall actually carry in its own substance the value which it purports to represent. It is already the representative of the grain in motion, and the consumption of the grain will give the means of redemption.

Now the actual money, *the coin*, should be in the bank, waiting there to redeem the obligations of the bank, whether note obligations or deposits; would it not then

be an absurdity in the system if State banks should continue to be prohibited from issuing their own notes and that it should be necessary to withdraw from the banks a part of their reserve in coin, in order to put that coin in service as a mere instrument of exchange, at the very time when the crops are the largest and when there is the greatest amount of actual capital in the community ready to meet any emergency? Is not this the very time to keep the coin reserve strong in order to furnish an adequate credit for moving a big crop? Do we not under such conditions deplete the reserve of banks and bankers at the time when that reserve should be maintained in fullest measure as the basis of the credit needed in moving the crops? Do we not thus restrict credit by depleting the reserves and put up the rate of interest at the very time when a strong reserve is most needed, when credit is most desirable and when interest ought to be the lowest for the reason that there is the greatest amount of capital in existence in the form of grain, cotton, and other like articles waiting to be passed on from the producer to the consumer?

The plain and simple question then arises, Ought that fund or mass of coin which constitutes the reserve of the Deposit Banking System to consist of the same identical pieces of metal which also serve as the instrument of exchange or money in use in the pockets of the community? Is there any necessary connection between these two functions of bank reserve and instruments of exchange? Is there not some way in which instruments of exchange, redeemable in coin, can be furnished by banks and bankers at the time of need, without its being necessary to put the reserve coin into circulation, except in emergencies in which reserves should be drawn upon?

Can the function of money as a circulating medium be distinctly separated from the function of the precious metals as the standard to which *both* the circulating medium and the deposits, as well as all other obligations, are to be bound?

Of course, the immediate reply may be that the old State Bank System can be resumed for the issue of notes; this is very plain, and it might be resumed under very different conditions from those which prevailed in former days; the country is very much richer, the banking system has been more fully perfected, the redemption of the notes could be more readily assured, and we might be free from speculative or wild-cat banking; but should we be? are there not grave objections patent to every one conversant with the subject, to a return to this method?

What other method can be devised?

It is assumed both in the National Banking law and admitted in practice that the necessity for a reserve to protect deposits is something in its nature quite different from the necessity of a reserve to protect a secured note circulation. A panic often occurs from the fear that a deposit may not be convertible on demand into a medium, *i. e.*, notes or coin which will serve the purpose of circulation. The fear does not consist in any doubt of the ability of the banks to meet their obligations; rather of a doubt of the ability of the banks to meet their obligations in a particular manner. The familiar case may be cited of the run upon the Bank of England, which was stopped by the sudden recollection that in its vaults might be found a large amount of one-pound notes not intended to be reissued; the reissue of these notes stopped the panic. This suggests the idea that there should be no distinct separation between the functions of the bank of deposit and the functions of the bank of issue, or the issue department, corresponding to the actual difference which now exists between the trust company and the ordinary bank.

In practice, at the present time, a given amount of coin or of lawful money in reserve is demanded alike by the Bank Act and by the principles which govern the conduct of banking, in order that banks and bankers may be able to meet any probable and almost any possible demand upon them for the liquidation of the balance due to their depositors; but it also appears that given even a small amount of coin held in reserve for the liquidation of the legal-tender notes, yet a very large circulation both of legal-tender notes not covered by coin and of bank notes, covered only by convertibility into legal-tender notes may and must be maintained in use to meet the absolute need of the people for pocket-money. Witness the fact that nearly one hundred million dollars of bank notes have also remained in circulation long after the banks have surrendered the bonds on which these notes had been secured, the Government becoming responsible for their redemption.

There is a certain amount of Currency always required, therefore a certain amount which need not be backed by coin provided it is convertible, and also

provided it is backed by property which can be converted into coin at any time in the world's market. Land does not meet this condition; land cannot be quickly converted into coin in the world's market; and therefore all land banks have failed. But in these later days there are vast amounts of stocks and bonds, aside from the National bonds, which might serve as an adequate security for convertible notes, such notes to be also backed by a sufficient reserve of actual coin, and said coin to be kept entirely distinct and separate from the coin reserve held to secure deposits. For instance, let it be assumed that the taxes on bank note circulation were removed and the present National Bank notes and legal-tender notes to have been withdrawn or paid; let it then be assumed that a central bank of circulation should be established for the distinct purpose of issuing notes; this bank should invest its entire funds in State or railway bonds of the best kind, such as would be chosen by competent managers empowered to issue notes thereon up to a certain proportion conditioned upon maintaining a certain and suitable reserve of coin for the redemption of the note circulation. But this central bank should also receive from other banks such bonds or securities as might be approved with the guaranty of the corresponding banks upon said securities; therefore notes could be based upon such securities to corresponding banks for a certain proportion of their value, say ninety per cent. of the face value of the securities deposited, conditioned also upon such bank also maintaining a reserve in coin to meet daily demands for redemption. Is it not entirely conceivable that in this way a circulating medium may be provided, separate, distinct and independent from all banks of deposit to the end, that even in times of scarcity of capital, short crops and the like, when a severe strain may come upon the reserve of the banks of deposit, the banks of issue should be so absolutely secure that no fear would be felt in regard to the redemption of the notes and no run would occur on them?

On the other hand, would not such a currency be elastic? Would it not adapt itself from time to time to the absolute needs of the people for instruments of exchange in the most speedy and effective way, without regard to the conditions of the banks of deposit and discount?

Of course I do not claim any originality in this suggestion, I merely present the subject in this form because it seems to me to give the logic of the case. The conditions are now entirely different from those which prevailed before the National Bank act came into force when the Suffolk Bank system of redemption existed in New England, and the Safety Fund Banks existed in the State of New York. We now have a resource, as security for notes which may serve the purposes of money, in the vast volume of first-class securities which are, so to speak, *international* in their quality; that is to say, railroad, State and city bonds exist which can be sold at all times in the principal stock markets not only of this country but of Europe. Theoretically they constitute even a better security than the United States bonds issued for war purposes, inasmuch as they represent construction and are backed by valuable property in existence and subject to their payment while the bonds of the nation merely represent the destruction of war and the power of taxation for purposes of payment. The difference, however, is not a practical one.

The summary of the case may be stated in this form: The tendency of events is to cause the withdrawal from circulation of uncovered paper, to wit: National Bank notes and legal-tender notes, leaving only in circulation certificates of deposit of gold or silver backed dollar for dollar by actual coin and also gold and silver coin in specie.

No position could be stronger than this; but the difficulty will arise in the fact that even were the annual revenues and expenditures of the Government equalized, the working of the Sub-Treasury act in dealing with such large sums as now constitute the financial transactions of the Government might seriously interfere with the money market at times. Under present conditions it is becoming apparent that it is impossible for the Government to adjust its transactions to the ordinary conditions of the money market; it is also impossible for Government to perform the functions of a bank of issue; the tension is now very great, and the conditions cannot possibly be continued for any length of time. The issue of certificates of deposit of gold or silver could not meet the varying conditions of supply and demand for instruments of exchange or circulating notes, but, there will soon be no Government bonds available as securities for bank notes; there is a volume of other securities in existence, which would form an absolute security for a circulating medium covered in part only by a reserve of

actual coin. Can the arrangements be made and the authority established for a selection among these securities, of those which ought to be made available to secure the notes which might serve as instruments of exchange? Can a central bureau, bank, or other form of administration be established by a permissive act, with branches in different parts of the country, to supply an elastic, safe, and suitable paper currency, convertible into coin on demand, on a separate foundation and under a separate administration from that under which banks of deposit and discount may continue to be organized? All this is theoretically possible. Is it capable of being put in practice? Would the difficulty be surmounted to which I have attempted to call attention in this memorandum, to wit: the drawing upon the reserves of banks of discount and deposit at the time when the reserves should be kept the strongest, and the credit of the banks of discount be used most freely for the mere purposes of using the coin drawn from the reserves as a mere instrument of exchange? Cannot this reserve be maintained, and some other equally safe and more suitable instrument of exchange be adopted, so that it can be used in time of need without interfering with the ordinary functions of the banks of deposits?

I submit this memorandum with some hesitation. I do not feel sure myself as to its quality; it may be so elementary that the Secretary to whom it is sent will keep it in his pigeon-hole, and do me the service of not presenting it to the Association. Suffice it that I have been induced to write it because I have as yet seen no plan formulated which should meet the case as it will stand when all the paper not yet covered, dollar for dollar, in specie, shall have been withdrawn from circulation, and our only Currency will consist of bullion or bullion certificates.

Mr. Knox—I move that a vote of thanks of this Association be returned to Edward Atkinson for the paper he has contributed.

The President—Gentlemen, you have heard the motion.

The motion was carried.

The President then called on Mr. Jas. D. Sturgis, of Chicago, National Bank Examiner, to read a paper on "Some Observations in Practical Bank Examinations."

Mr. Sturgis' paper was an exceedingly valuable one for practical bankers, and will be published in full in the next number of the JOURNAL.

The President—The next thing in order will be reading the letters of regret by the Secretary.

The Secretary then read letters from General W. T. Sherman; Hon. C. S. Fairchild, Secretary of the Treasury; Hon. W. S. Trenholm, Comptroller of the Currency; Hon. John Sherman and Hon. H. B. Payne, United States Senators from Ohio; Hon. John A. Bingham, of Ohio; Hon. Wm. A. Groesbeck, of Cincinnati; Hon. J. S. Pillsbury, ex-Governor of Minnesota; Hon. H. W. Grady, of the "Atlanta Constitution;" Hon. Francis A. Walker, of Massachusetts; Hon. David A. Wells, of Connecticut; Mr. Chas. B. Alexander, of New York, and Mr. John Johnston, of Milwaukee.

The President—We are now ready for the reports of the different committees.

Mr. Knox—The Executive Council have no report to make at present.

Mr. President—Is there any other committee ready to report? There was a Special Committee,* of which Mr. W. S. Culbertson, of New Albany, Ind., is a member, on the reorganization of the Association and the election of officers, etc. Is that Committee ready to report?

REPORT OF MR. W. S. CULBERTSON.

Mr. Culbertson—*Mr. President and Gentlemen of the Convention:* I received a letter a few days ago that a gentleman here and one from Ironton, Ohio, with myself, were appointed a Committee for the purpose of deciding the best

* This Committee was appointed in accordance with the following action taken at the Convention of the Association held at Pittsburg, in 1887. Mr. Wilson, of Ironton, Ohio, on the second day of the Convention, moved, "That it is the sense of this Convention that in future all nominations for President, Vice-Presidents, and Executive Council shall be made upon the floor in open Convention, and that the vote thereon shall be by ballot." This motion was referred to the Executive Council for an immediate report, and at the same session of the Convention the Executive Council reported that a Committee be appointed by the President to bring the matter before the Convention of 1888.

method of naming officers for the Association. I have not had the pleasure of meeting any of those gentlemen, and I am told neither of them are here. The President informs me that a letter has been received from Mr. Wilson, of Ironton, saying he would not be here. For the present I do not think any better mode can be adopted than the one we have had heretofore, that a Committee be appointed by the President to make the nominations and report to this Association for their adoption. I only report individually and verbally, as it is the only report I can make, because I have not had the pleasure of meeting with the other gentlemen.

The President—Gentlemen, you have heard the report, what is your pleasure.

On motion, the report of the Committee was accepted, and the Committee continued.

Mr. Rhawn, of Philadelphia—Inasmuch as the Committee are not able to make a report, I move that a committee of five on reorganization of elections be appointed by the Chair.

The motion was seconded and adopted. Subsequently the President designated the following gentlemen as the Committee :

Mr. Wm. G. Deshler, President of the National Exchange Bank of Columbus, Ohio; Mr. W. S. Culbertson, President of the First National Bank of New Albany, Ind.; Mr. John Wandling, Cashier of the Deposit Bank of Owensboro, Ky.; Mr. Emory Wendell, President of the First National Bank, Detroit, Mich.; and Mr. Henry Rogers, Vice-President of the Tradesmen's National Bank, Philadelphia, Pa.

Mr. Sneed, of Kentucky—I move that this Association express its sincere thanks to the Centennial Committee of Cincinnati for its cordial invitation.

The motion was seconded and carried.

Moved and seconded, that when this Association adjourns it shall adjourn until to-morrow morning at 10 o'clock A. M. Carried.

The President—If there is no further business before the Association, the motion to adjourn will be in order.

On motion, the Association adjourned.

SECOND DAY'S PROCEEDINGS.

On the second day of the Convention the session commenced according to adjournment. The delegates were called to order by President Murray, and the Rev. Geo. P. Hays, D.D., made the opening prayer. The President then announced the following gentlemen as the Committee on Nominations. *viz.* : William G. Deshler of Columbus, O., Mr. W. S. Culbertson of New Albany, Ind., Mr. John Wandling of Owensboro, Ky., Mr. Emory Wendell of Detroit, Mich., and Mr. Harry Rogers of Philadelphia. At this point Mr. J. W. Proctor of Danville, Kentucky, offered a resolution, which was called out by the belief that there should be some change in the manner of nominating and electing the officers of the Association. At the Convention in Pittsburg in 1887 on the second day, Mr. H. W. Wilson, of Ironton, Ohio, made a motion in this direction, which was referred to the Executive Council. That body reported the same day that a committee should be appointed by the President, who, and that said committee, should consider the matter and report at the Convention of 1888. As has been seen before in the report of the first day at Cincinnati, Mr. W. S. Culbertson made a report from the committee appointed by the President against making any change. Mr. Proctor represented those who thought that some modification was necessary, and accordingly introduced the following resolution. He said he had no complaint to make of any thing in the past but desired to guard against misunderstanding in the future :

It shall be the duty of the Vice-President of each State immediately after the first adjournment of the Convention at its annual session to call his State delegation together and each delegation shall name a member for the Committee on Nominations. Said Committee on Nominations shall meet at a place to be designated by the Committee on Arrangements, or the President of the Convention.

The Committee may make its report at any subsequent meeting of the Association.

but their nomination shall not exclude the name of any person nominated in the Convention.

The resolution was referred to the Executive Council to report at any subsequent meeting. Mr. Asa P. Potter, of Boston, then introduced the following substitute for Section 1 of Article 3 of the Constitution, which was also referred to the Council :

ARTICLE III.

SECTION 1.—The administration of the affairs of this Association shall be vested in the President and First Vice-President of this Association, and one Vice-President for each State and Territory which may be represented in this Association, and in an Executive Council, who shall be elected at the annual meetings, and who shall serve until their successors are chosen or appointed. The Executive Council shall be composed of 21 members divided in three classes, one-third of which shall be elected annually.

Mr. Sneed, of Kentucky, then addressed the Convention. He said that in 1886, at the meeting in Boston, an amendment was presented to the constitution that no member of the Executive Council or any other officer, could serve longer than three years, and that one-third should retire each year. The intention was mainly as to the Executive Council. The Executive Council at the time thought it a proper amendment. The idea was, that body should be a representative one, and that it should have no appearance of personal favoritism ; also that every member of the Association should have a voice in its management and in the election of officers of the Association. While intended to apply exclusively to the Executive Council the Boston amendment applied, as it was worded, to all the other officers also. Of course one-third of our President could not retire each year, and while there was no such absurdity in its application to the Vice-Presidents, yet the constitution already provided that these should be elected annually. He wished to emphasize the fact that there was no ground to the charge that has been made against members of the Council that they wished either to retain themselves in office, or control the election of President or to suppress any of the wishes of the Convention. The Executive Council is not opposed to having the delegation from each State present its candidate for Vice-President to the Nominating Committee. Personally I am in favor of the amendment presented by Mr. Potter.

Mr. Deshler said that no constitutional amendment could be passed at this Convention but he thought that one-third of the Council should retire each year and, as to the Vice-Presidents, there was no objection to the delegates from each State presenting a candidate for Vice-President to the Nominating Committee.

Mr. Van Allen, of Albany, N. Y., then presented the following resolution which was referred immediately to the Executive Council.

Resolved: That the Executive Council be requested to consider the subject of establishing a subscription fund subject to future assessments, that shall be chargeable with rewards that may from time to time be offered by the Council, payable only upon the conviction and imprisonment of forgers, thieves and bank burglars; and if found feasible and practicable, that the Executive Council be authorized to establish such a fund and offer rewards for the punishment of such crimes, under suitable regulations.

The Committee are of the opinion that the power asked for now exists in Article 4 of the Constitution with the possible exception of making amendments which the Committee deem impracticable.

Referred back to the Executive Council by vote.

Mr. Wilcox, of Baltimore, offered a resolution "that a certified list of the names of the President and Cashier of the banks and firm members of the Association be published in the annual report." This was also referred.

Mr. Brant, of Iowa, said that in view of the fact that there is no provision in the constitution regarding representation of State Associations of Banks and Bankers he desired to present the following resolution : "That the Executive Council be requested to prepare and submit for adoption at the next annual meeting of this Association an amendment to the Constitution providing for the reception and recognition of representatives from State Associations as members of our Annual Convention." This went accordingly

to the Council. Mr. Murray, the President, said a similar matter was brought before the Convention at Pittsburg. It seemed to him the most apt thing that each banking association in each State shall have a representative.

Mr. Deshler, of the Nominating Committee, requested the several State delegations to send to the committee a name for Vice-President from each State. This suggestion was acted upon at once. Mr. T. F. Wilcox, of Baltimore, then offered the following resolution: "That this Association deprecates the circulation of mutilated silver coin in our country, and that the proper authorities be requested to have a bill introduced in the United States Congress embodying some effective measure to prevent the mutilation of coin and to punish the passing of the same." The President then presented the following paper by Mr. William McDermott of Pennsylvania.

THE ACCUMULATION OF SURPLUS.

Mr. President and Gentlemen of the Convention:

The vast accumulation of surplus funds in the National Treasury has become an important factor in the political discussions of the present Presidential campaign, and the problems involved demand the highest ability of the most distinguished statesmanship. National debts *may or may not* be "National blessings," but the immense concentration of funds is fraught with danger, and menace the general good of the country. Too much money is scarce less an evil than too little. As was said by Napoleon, after a hard-fought battle, and a victory, "Such a victory is only less disastrous than a defeat."

And the huge storing of the "Surplus Fund" and "Undivided Profits" in our National banks is a matter demanding the attention of the careful and conservative financier.

We assume that the profits of a bank, after the depositor and the public are protected, belong to the individual shareholders, not to their grandchildren. Let us apply this principle to a business operation outside of banking: Suppose a hundred of us form an organization to build houses. We invest one thousand dollars, each of us, and we erect one hundred houses. As a matter of convenience, five persons are selected to attend to rents, the care of property and the funds. At the end of the year this committee state that each house has yielded a net profit of one hundred dollars, giving us one hundred dollars for the investment; but we are told that they (the committee) think it best to pay us only fifty dollars, and keep and invest the other fifty themselves, and, having the power, they act accordingly. Thus, year by year, the increase goes on; but by and by their investment has met with a loss, and all our money is swept away. Do you suppose that all of us ninety-five would have thus lost *all* our savings? Certainly we should not! Some of us might have paid debts we had, or put it into our business or in real estate. We think such things could not occur in the banking business. Let us cite a "case" or two—in one instance we had the *experience*, and know "whereof we affirm." A bank managed by experienced officers determined to increase its capital from about eight hundred thousand dollars to a million dollars. The par was twenty-five dollars, the increase was sold at thirty a share. After a few years, and not in a panic either, but amid calm seas, the bank met with a loss, and a dividend was passed. By the time another dividend was due forged paper was found, and a dividend skipped. On the third term it was found that a trusted officer of more than thirty years was a defaulter. In the meantime they had consolidated the stock, making one out of four, and the shares fell to eighty-nine dollars for what had been selling for one hundred and twenty—surplus about wiped out! Would *all* the stockholders have lost their revenue if it had been divided? In another instance, in the same city, the whole of the surplus was lost and the stock reduced ten dollars on every share. Profits vanished! stock impaired! The loss in this last instance was one-fifth of the par value of the shares.

It is often said, when a bank meets with a loss, that it can stand it, because of the surplus. Is not the loss practically the same? If I earn an hundred dollars by my labor for a month, or if I receive an hundred dollars as an income from an investment it matters little which hundred I lose, I am *that* amount the poorer.

The law prohibits the loaning of more than one-tenth of the capital to any individual or firm, or the members of a firm, no matter how strong financially they may be or what collaterals may be assigned. Yet here is a bank with a capital of half a

million dollars, but a surplus fund of five millions, ten times the amount of the capital; this bank, with its immense resources, could only loan fifty thousand dollars, in any circumstances, to any one party, to carry out the letter and spirit of the law. Large surplus and undivided profits demand taking greater risks in order to keep the funds active and to realize a revenue, which would not be required if the extra surplus was divided. You can always invest more safely a small amount than a large sum. The Government authorizes a bank with a specified capital, and one-fifth more for safety (and formerly required a percentage of the capital to be in Government bonds), yet with this huge surplus the practical capital is far beyond the Government authorization. Piling up the undivided profits gives the stock a fictitious value. It would be better and safer if the market value was kept close to the par value for both holders and purchasers. In one of the cities the aggregate capital is forty-nine millions, the surplus more than thirty millions, the undivided profits beyond ten millions; thus the practical available capital is nearly double that authorized by law. Add the 20 per cent. to the capital, and in this case the excess is twenty millions of dollars that should be given to the shareholders, and if they did not need it the funds could lay on deposit with the bank. Take the market value of the stocks of our best banks, and how few pay more than 4 per cent. on the price?

At the last report of the Comptroller of the Currency there were three thousand seven hundred and ninety-five banks. We suppose that the number of Directors would not average more than seven to a bank, and yet it would be fair to infer that there are not less than twenty shareholders to each Director. Thus every Director assumes to take care of what his money has earned and the twenty other associated stockholders, is it not fair to infer that the other twenty could take as good care of their own resources as one who happens to be a Director? It is not fair—it is not safe!

We have a splendid banking system—none better in any nation; note holder and depositor amply secured. Having been a Teller for fifteen years under the old State Banking system, and almost twenty-four years under the National Bank Law, we know the advantages of the "New" over the "Old." In the olden times a hatful of notes would hardly take you through the old "Keystone State," when to go from the Capital of our State to the Capital of the Nation you must submit to a "shave" at almost every station on the railroads. When "Shinplasters" and "Wildcat" currency may not have been very classical, but vigorously expressed the truth with reference to our abominable banking system and currency before the war. Criticism is easy: fault finding comes almost naturally. It comes more in accord with human nature, perhaps, to tear down than to build up. It did not require much talent or skill to fing a fire-brand into the Kremlin and destroy that magnificent structure. We offer these objections to perpetuate our grand banking system and keep it strong and popular for all time to come.

We would have every National bank put away 25 per cent. of the capital as a surplus fund, add 10 per cent. for a profit-and-loss account, and keep these amounts intact—permit no reduction whatever. Before the declaring of any dividend, after charging off expenses and the taxes already due, or due during the current year, and not only all "bad debts," technically so called, but *all* paper laying over of which there was a doubt of it being paid, having a clean sheet, then make a dividend of what is left of what has been legitimately made during the preceding period for which the dividend was declared. Then a close and careful supervision would be had over the investments and the management as well, for large reserves make men careless, and under the present system *defalcations should never take place.*

After reading this paper suggestions were made as to where the Convention should be held in 1889.

Kansas City, Mo.—Mr. Anderson, of Kansas City, said: "My city and State is very far West yet we would like you to visit us. We have some things out there we should like to show you. We think we have all the facilities for your entertainment; we have cable roads and all the improvements of a model city and shall be glad to have you with us."

Omaha.—Mr. Millard, of Omaha, said: "I have been requested by the bankers and citizens of Omaha to extend an invitation to this Association, to meet in convention at Omaha. I am aware the Executive Council must pass upon the matter, but if the delegates talk the matter up they will greatly aid the Council. A gentleman said to me the other day, 'Why, you live out

there among the Apache Indians.' Well, once perhaps we did, but we have got some civilization now and we shall be glad to show you what we have."

San Francisco.—Mr. Murphy, of San Francisco, said: "I am not authorized by the bankers and citizens of San Francisco to extend an invitation but at the same time I say to you that the citizens and bankers of San Francisco will welcome you with open arms and hearts to that hospitable city. In due time we shall present our request and invitation to the Executive Committee, and we shall hope to see you."

Chattanooga.—Mr. Bassett, of Chattanooga, said: "The citizens and bankers of Chattanooga will give you a most cordial welcome if you will come there. There are many places of interest to the American heart growing out of the late war near Chattanooga. We have Lookout Mountain, where Hooker fought; Mission Ridge, where Bragg fought, and within ten miles we have the Chickamauga battle-grounds and we have as hospitable a city as any."

Denver.—Mr. Chamberlain, of Denver, said: "Denver through its citizens and bankers invites this Association to meet in Convention in that city."

St. Paul.—Mr. Willis, of St. Paul, said: "On behalf of the citizens and bankers of St. Paul you are invited to meet in that city in Convention."

Dallas.—Mr. Exall, of Dallas, Texas, said: "As a representative of the Bankers' Association of the State of Texas, as a citizen of the largest city in the largest State in the United States, I most cordially invite the American Bankers' Association to meet in Convention in that city. Mind, I do not say that Dallas is the largest city in the United States, but I do say that it is the largest city in the largest State in the United States—a State that has shown more material advancement in the last ten years than any other State in the Union. From 1870 to 1880 her population more than doubled; that population is cosmopolitan in every sense of the word and represents every State in the whole Union. For the last ten years it has been the most profitable place in the world owing to its material development for investments of money. She has cotton growing now which will more than pay for the land upon which it grows. She will sell more than eighty millions of dollars worth of cotton. With the best crop in our history, with a people whose energy is second to none, she invites this Association to come there and witness her growth for themselves

Buffalo.—Mr. Warren, of Buffalo, N. Y., said: "I can speak in the name of the Association of banks in Buffalo for I believe I am the only representative here from that city, although not the only member of the Association in that city. I represent the American Exchange Bank and can recommend Buffalo as a very desirable place for the meeting of this Association. I can say, like my friend who has just spoken, that we are growing and going to grow. We have been increasing in population very rapidly for the past five years, and those of the gentlemen who are acquainted with Buffalo must have noticed this. I am certain the bankers of our city and its citizens will extend the right hand of fellowship and welcome you if you will meet with us in 1889."

Mr. Knox, chairman of the Executive Council, then reported on Mr. Van Allen's resolution to establish a subscription fund chargeable with rewards to be offered for the conviction and imprisonment of forgers, bank thieves and burglars. The chairman said that the Council were of the opinion that the power now exists in Article IV. of the Constitution with the exception that the committee have no power to make special assessments for the fund. Mr. Van Allen spoke in favor of his resolution and cited the excellent effect of a policy such as was embodied in his resolution in the case of the Associated Insurance Companies. He said he would not press his resolution but the report of the Council has not changed my conviction that some such course is necessary. The chairman of the Council said he agreed with Mr. Van Allen but the question was one of funds and whether the banks would consent to be assessed for the purpose. Mr. Van Allen then moved to refer the resolution back to the Executive Council to report during the next year. This motion was adopted. The chairman then reported favorably the resolution of Mr. Wilcox requiring the names of the President, Vice-President and Cashier of each bank a member of the Association to be printed with the proceedings in the certified

list of members. It was adopted. The Chairman then reported that the resolution as to mutilated silver coin should lie on the table as the statutes of the United States already contain sufficient legislation on this subject.

The Chairman of the Executive Council next presented the report of the Council on Mr. Proctor's resolution to change the method of electing the officers of the Association. Mr. Knox said the Executive Council had no objection to Mr. Proctor's resolution except that it would make too large a committee. After some debate on the resolution it was, on motion of Mr. Rhawn, referred back to the Executive Council to report at the next meeting.

Mr. Deshler, of the Nominating Committee, then reported the nominations for officers, President, Vice-Presidents and Executive Council which was adopted. The following are the names of the officers selected:

President,

CHARLES PARSONS, President State Bank of St. Louis, Mo.

First Vice-President,

MORTON MCMICHAEL, Cashier First National Bank, Philadelphia, Pa.

Treasurer,

GEORGE F. BAKER, President First National Bank, New York City.

Executive Council.

JOHN JAY KNOX, President National Bank of the Republic, New York City.
 GEORGE S. COE, President American Exchange National Bank, New York City.
 LYMAN J. GAGE, Vice-President First National Bank, Chicago, Ill.
 DANIEL ANNAN, Cashier Second National Bank, Cumberland, Md.
 E. B. JUDSON, President First National Bank, Syracuse, N. Y.
 AUGUSTUS H. MOSS, President Moss National Bank, Sandusky, Ohio.
 JOHN J. P. ODELL, Vice-President Union National Bank, Chicago, Ill.
 HOEL H. CAMP, President First National Bank, Milwaukee, Wis.
 LOGAN H. ROOTS, President First National Bank, Little Rock, Ark.
 J. THOMAS SMITH, Cashier National Bank of Baltimore, Md.
 S. K. SNEED, Vice-President Henderson National Bank, Henderson, Ky.
 W. E. SCHMERTZ, President Third National Bank, Pittsburgh, Pa.
 A. U. WYMAN, Vice-President Omaha National Bank, Omaha, Neb.
 W. P. ST. JOHN, President Mercantile National Bank, New York City.
 ASA P. POTTER, President Maverick National Bank, Boston, Mass.
 RICHARD M. NELSON, President The Commercial Bank of Selma, Ala.
 W. S. CULBERTSON, President First National Bank, New Albany, Ind.
 JAMES S. BARRETT, Cashier German Security Bank, Louisville, Ky.
 J. K. DEMING, Cashier Second National Bank, Dububue, Iowa.
 LOGAN C. MURRAY, President United States National Bank, New York City.
 GUSTAV WILLIUS, President National German-American Bank, St. Paul, Minn.

Secretary,

WILLIAM B. GREENE, 128 Broadway, New York.

Vice-Presidents,

ALABAMA—Joseph F. Johnston, President Alabama National Bank, Birmingham.
 ARIZONA—M. W. Kales, President National Bank of Arizona, Phoenix.
 ARKANSAS—Creed T. Walker, Cashier German National Bank, Little Rock.
 CALIFORNIA—S. G. Murphy, President First National Bank, San Francisco.
 COLORADO—J. A. Thatcher, President Denver National Bank, Denver.
 CONNECTICUT—George A. Butler, Vice-President National Tradersmen's Bank, New Haven.
 DAKOTA—Asa Fisher, President First National Bank, Bismarck.
 DELAWARE—Edward Betts, President First National Bank, Wilmington.
 DISTRICT OF COLUMBIA—Samuel Norment, President Central National Bank, Washington.
 FLORIDA—D. G. Ambler, President National Bank of the State of Florida, Jacksonville.
 GEORGIA—A. W. Hill, Vice-President Gate City National Bank, Atlanta.
 IDAHO—John Huntoon, Cashier First National Bank of Idaho, Boise City.
 ILLINOIS—Lorenzo Bull, Banking House of L. & C. H. Bull, Quincy.
 INDIANA—W. M. McGrew, President First National Bank, Huntington.

IOWA—W. D. Lucas, Cashier Valley National Bank, Des Moines.
 KANSAS—A. W. Gilbert, President First National Bank, Minneapolis.
 KENTUCKY—James M. Fetter, President Kentucky National Bank, Louisville.
 LOUISIANA—Albert Balwin, President New Orleans National Bank, New Orleans.
 MAINE—I. P. Farrington, President Casco National Bank, Portland.
 MARYLAND—Douglas H. Thomas, President Merchants' National Bank, Baltimore.
 MASSACHUSETTS—Edward Tyler, Cashier Suffolk National Bank, Boston.
 MICHIGAN—Theo. H. Hinchman, President Merchants & Manufacturers' National Bank, Detroit.
 MINNESOTA—Henry P. Upham, President First National Bank, St. Paul.
 MISSISSIPPI—J. P. Roach, President First National Bank, Vicksburg.
 MISSOURI—D. V. Rieger, Cashier American National Bank, Kansas City.
 MONTANA—Samuel T. Hauser, President First National Bank, Helena.
 NEBRASKA—Henry W. Yates, President Nebraska National Bank, Omaha.
 NEVADA—D. A. Bender, President First National Bank, Reno.
 NEW HAMPSHIRE—George B. Chandler, Cashier Amoskeag Nat. Bank, Manchester.
 NEW JERSEY—I. C. Martindale, Cashier Camden National Bank.
 NEW MEXICO—Jefferson Reynolds, President First National Bank, Las Vegas.
 NEW YORK—Henry C. Brewster, Cashier Traders' National Bank, Rochester.
 NORTH CAROLINA—W. E. Breese, President First National Bank, Asheville.
 OHIO—Hugh W. Hughes, Vice-President Ohio Valley National Bank, Cincinnati.
 OREGON—D. P. Thompson, President Commercial National Bank, Portland.
 PENNSYLVANIA—R. K. Wilson, Cashier Citizens' National Bank, Pittsburgh.
 RHODE ISLAND—Royal C. Taft, President Merchants' National Bank, Providence.
 SOUTH CAROLINA—Andrew Simonds, President First National Bank, Charleston.
 TENNESSEE—David T. Porter, President Memphis National Bank, Memphis.
 TEXAS—Henry Exall, Vice-President North Texas National Bank, Dallas.
 UTAH—W. S. McCornick, of McCornick & Co., Bankers, Salt Lake City.
 VERMONT—Charles W. Woodhouse, President Merchants' National Bank, Burlington.
 VIRGINIA—J. W. Lockwood, Cashier National Bank of Virginia, Richmond.
 WASHINGTON—W. J. Thompson, President Merchants' National Bank, Tacoma.
 WEST VIRGINIA—J. S. Jamison, President First National Bank of Piedmont.
 WISCONSIN—N. B. Van Slyke, President First National Bank, Madison.
 WYOMING—T. B. Hicks, Vice-President First National Bank, Cheyenne.
 Mr. Murray then said: "Gentlemen. I return to you my hearty thanks for the honor you have conferred upon me. I again say good-by to you, may the blessings of peace and prosperity now and forevermore rest upon you. I have the pleasure of introducing to you my successor, Mr. Parsons."
 Mr. Parsons took the chair and addressed the convention. At the close of this address, after a vote of thanks was given to the citizens and bankers of Cincinnati for the hospitable welcome and entertainment the members of the Association had received, the convention adjourned *sine die*.

THE SOCIAL FEATURES OF THE CONVENTION.

The bankers and citizens of Cincinnati invited the Association to their city promising to make it pleasant for them, and right nobly did they redeem their promise. The guests were given the freedom of the city. The Burnet House was selected as the headquarters of the Association, and the accommodations furnished there were beyond criticism. The arrangements in Cincinnati were under the direction of the following committees:

Reception Committee.—James Espy, Chairman, L. B. Harrison, M. M. White, H. B. Olmstead, F. H. Reno, S. Kuhn, Henry Meyer, W. W. Brown, W. S. Rowe, D. J. Falls, W. A. Goodman, John Hauck, B. S. Cunningham, Edwin Stevens, L. Kleybolte, W. A. Lemmon, J. D. Hearne, C. B. Foote, H. W. Hughes, Edward Well, Franklin Alter, C. J. Stedman, Edward Albert.

Committee on Invitations.—C. H. Kellogg, Jr., Chairman, W. A. Goodman, Geo. W. Forbes, Theo. Stanwood, Jas. Espy.

Committee on Entertainment.—W. S. Rowe, Chairman, J. R. Murdoch, O. H. Tudor, W. A. Lemmon, George Peck.

Committee on Banquet.—J. V. Guthrie, Chairman, H. P. Cooke, H. C. Yergason, G. P. Griffith, Geo. H. Bohrer.

Committee on Finance.—M. M. White, Chairman, B. S. Cunningham, W. S. Rowe, W. A. Goodman, J. D. Hearne.

Committee on Halls and Hotels.—H. C. Yergason, Chairman, G. P. Griffith, A. B. Voorheis, J. R. Murdoch, A. S. Winalow.

Committee on Toasts and Speeches.—H. C. Urner, Franklin Alter, James Espy.

General Committee.—G. P. Griffith, J. V. Guthrie, W. S. Rowe.

The programme was first, a reception at Music Hall Exposition Building, to take place at 4 P. M. on Wednesday, October 3d, at the close of the first session of the Convention. Second, a banquet at the Burnet House on Wednesday evening. Third, the guests were taken in carriages to view the Art Gallery and the various points of interest in the city on Thursday afternoon, at the close of the session of the Convention on that day. Fourth, there was a reception and banquet at the Queen City Club on Thursday evening, the club extending, through the local committee, a cordial invitation to all the delegates. This programme was carried out to the letter, with a spirit of hospitality never excelled. At the reception in Music Hall on Wednesday, the Hon. Amor Smith, Mayor of the City, addressed the delegates. He was cordially replied to by Hon. Logan H. Roots on behalf of the visitors. After the speeches, the remainder of the afternoon was spent in examining the wonders of the Exposition. The banquet at the Burnet House in the evening was a great success. About three hundred sat down to the table. The menu was elaborate and served with elegance. Mr. Espy, of Cincinnati, presided and called on a number of gentlemen, who responded to appropriate toasts. Mr. Logan C. Murray, the retiring President of the Association, and Mr. Chas. Parsons, the new President, first spoke; they were followed by the Hon. John Jay Knox, Hon. Murat Halstead, Hon. Benjamin Butterworth, Morton McMichael, Logan H. Roots, S. K. Sneed, Asa P. Potter and others. The speeches were pithy and entertaining, and continued until a late hour.

The excursion in carriages on Thursday to review the wonders of Cincinnati was particularly enjoyed. The weather was pleasant, and every point of interest was thrown open to and enjoyed by the visitors. The reception and banquet at the Queen City Club was also an additional success in showing the resources and good will of the entertainers. All who attended this Convention went to their homes full of praise for the good feeling and spirit of hospitality shown in every detail of the two days' programme by the citizens and bankers of Cincinnati. In fact, the time was, if anything, too short to fully avail of all the good things provided for the entertainment of the visiting bankers.

A Stream of Silver.—There is a stream of silver pouring into Washington at the rate of half a million dollars' worth a day. It comes in the shape of fresh, glittering new dollars, standard silver dollars of the vintage of 1888, with the milling unknicked and the face of the Goddess of Liberty fresh from the stamp. The stream is flowing at present from the Philadelphia Mint, but before long the sluice gate will be switched around and the shining flood will be turned in from New York, then, after a time, from New Orleans, and finally from San Francisco, thus giving the United States a silver belt that will outshine even that of a champion pugilist. The Adams Express Company carries the silver in trunks or iron-bound boxes, guarded by armed men. At the Washington end of the line the silver is carried direct to the Treasury Department in great iron-latticed wagons, that look like the animal cages in a menagerie. At the Treasury the boxes are taken into the building and into the basement, then down a winding stairway in the northeast corner of the building into the sub-basement, where the air at present has an odor of soft mustiness that brings thoughts of mysterious treasures, hidden gold, stories of Captain Kidd, and similar ideas. The visions of the mystic are suddenly dispelled by a prosy, business-like door of grated iron that bars the way and brings the visitor to a halt. Beyond this door there is only one "open sesame"—a permit of the Treasurer.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

CONVERSION OF STOCK—MEASURE OF DAMAGES RECOVERABLE BY OWNER—AN IMPORTANT DECISION IN WHICH THE NEW YORK COURT OF APPEALS ARE NOT UNANIMOUS.

This was an action by Benjamin H. Wright (and after his death by Henrietta H. Wright), the owner of certain stock, against the Bank of the Metropolis, to recover from said bank damages for a conversion of the stock. The facts were as follows :

About the 7th of January, 1878, one Henry C. Elliott received in his correspondence from Rome, N. Y., from B. Huntington Wright a check for two thousand dollars, payable to the order of Elliott, with a request from Wright that he, Elliott, would meet some drafts Wright would draw upon him, and obtain payment from the check. He accordingly honored the drafts, and, having indorsed the check, procured its discount by the defendant. It was not paid when presented, and Elliott, being unable to learn the reason, went to Rome to see the drawer of the check. He then learned that the drawer had made a general assignment for the benefit of his creditors, and stated his inability to do anything for Elliott. Finally, Elliott succeeded in obtaining a number of shares of stock in different railroad companies as collateral security for the check then lying protested in the hands of the defendant. The history of the interview, resulting in the procuring of the stock by Elliott, is contradictory, but the verdict of the jury shows that they believed that which was given on the part of the plaintiff. From the evidence thus given, it appears that the stock was in reality the stock of Benjamin H. Wright, the father of B. Huntington Wright, and that it was delivered by the old gentleman to Mr. Elliott voluntarily, and for the purpose of being used as a collateral to his own note at six months, which was to be used to take up the check, but the stock was not to be sold for six months, as it was then selling in market much below what the father thought the stock was really worth. The stock was owned by Mr. Wright, as he said, for an investment, and he had no idea of selling it, but he allowed Elliott to take it because he felt sorry for his situation and wanted to help him, as far as he reasonably could, out of the difficulty he was in.

Elliott took the stock and went to New York and had a talk with the Cashier and Vice-President of the defendant, who reserved their decision as to whether they would take the note and the stock. Subsequently, and on the 17th of January, the Cashier wrote that the stock being non-dividend paying, and the note six months' paper, it would be impossible to get it through the Board, and he suggested that it would be much better to obtain Mr. Wright's consent to sell the stock and to make his (Elliott's) account good in that way. Elliott inclosed this note to Mr. Wright in a letter addressed to "B. H. Wright," and in response, and on the 22d day of January, Benjamin H. Wright, the owner of the stock, wrote Mr. Rogers, the Cashier of defendant, refusing to sell the stock or to permit of its being sold. Mr. Rogers had never seen either of the Messrs. Wright and did not know there were two, and subsequently, and about the 29th of January, Elliott told him that Mr. Wright

* All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL'S Law Department as early as obtainable.

Attention is also directed to the "Law Notes and Comments" and "Replies to Law and Banking Questions," which are included in this Department.

had authorized a sale of the stocks, and they were immediately sold, less commission, for \$2,261.50.

On the part of the plaintiff it was claimed that Mr. Wright, the true owner of the stocks, never gave such authority to sell them, and that he was unaware that they had been sold until May 9, 1878.

On February 14, 1881, the stock reached the highest price down to the day of trial, selling on that day for \$18,003. This action was commenced on October 7, 1879. Mr. Wright, the owner of the stock, was about 76 years of age in May, 1878, and in the latter part of that year went South, and returned early in the year 1879. On the 9th of May, 1878, he made a demand upon the defendant for the stocks, and tendered it the amount of the check and interest, being something over \$2,000. The Cashier stated that the stocks had been sold by the authority of the owner thereof, as he supposed, given through Mr. Elliott, and refused to deliver them or their value. The original plaintiff died since the first trial of the case, and the present one was duly substituted.

The Court charged the jury that, if they found for the plaintiff, he was entitled to recover the highest price at which the stocks could have been sold in the market between the date of their actual conversion and a reasonable time thereafter, and that the jury should fix the reasonable time not arbitrarily or through sympathy or prejudice; but they were to say what, under all the circumstances, would be a reasonable time within which to commence this action, and also, it may be, reasonable diligence in prosecuting it, because if the action were commenced in fact in a reasonable time after the conversion of the stock, and had been prosecuted with reasonable diligence since then, the plaintiff was entitled to recover the highest market price that the stock reached between the date of the conversion and the time of the trial, less the amount of the check and interest, and with interest on the balance. This charge was duly excepted to. The jury found a verdict for \$3,391.25. There was no evidence which shows when the stock reached that value. Upon the rendition of the verdict both parties moved to set it aside, the plaintiff on the ground that he was entitled, under the charge, to the highest value of the stock down to the trial, and the defendant on the ground that the damages were excessive and contrary to the evidence. The Court granted the motion of the plaintiff and set the verdict aside on the ground stated, and denied the motion of the defendant. The defendant appealed to the General Term of the Supreme Court from both of such orders. The Court reversed the order setting aside the verdict and ordered judgment thereon, and affirmed the order made on defendant's motion, refusing to set aside the verdict. Judgment was then entered upon the verdict of the jury, and from that judgment both sides appealed to the Court of Appeals, and they also appealed from the orders of the General Term, upon which the judgment was entered.

Peckham, *J.*, delivered the opinion of the Court: This case comes before us in a somewhat peculiar condition. As both parties appealed from the same judgment, which is for a sum of money only, it would seem as if there ought not to be much difficulty in obtaining the reversal. It is obvious, however, that a mere reversal would do neither party any good, as the case would then go down for a new trial, leaving the important legal question in the case not passed upon by this Court. This, we think, would be an injustice to both sides. The case is here, and the main question is in regard to the rule of damages, and we think it ought to be decided. By this charge the case was left to the jury to give the highest price the stock could have been sold for intermediate to its conversion and the day of trial, provided the jury thought under all the circumstances, that the action had been commenced within a reasonable time after the conversion, and had been prosecuted with reasonable diligence since. Authority for this rule is claimed under *Romaine vs. Van Allen* (26 N. Y., 209), and several other cases of a somewhat similar nature referred to therein. *Markham vs. Jaudon*, (41 N. Y., 285) followed the rule laid down in *Romaine vs. Van Allen*. In these two cases a recovery was permitted which gave the plaintiff the highest price of the stock between the conversion and the trial. In the *Markham* case the plaintiff had not paid for the stock, but was having it carried for him by his broker (the defendant) on

margin. Yet this fact was not regarded as making any difference in the rule of damages, and the case was thought to be controlled by that of *Romaine*. In this state of the rule the case of *Matthews vs. Coe* (49 N. Y., 57-62) came before the Court. The precise question was not therein involved, but the Court, per Church, *C. J.*, took occasion to intimate that it was not entirely satisfied with the correctness of the rule in any case not special and exceptional in circumstances, and the learned Judge added that they did not regard the rule as so firmly settled by authority as to be beyond the reach of review whenever an occasion should render it necessary. One phase of the question again came before this Court, and in proper form, in *Baker vs. Drake* (53 N. Y., 211), where the plaintiff had paid but a small percentage on the value of the stock, and his broker, the defendant, was carrying the same on a margin, and the plaintiff had recovered in the Court below as damages for the unauthorized sale of the stock the highest price between the time of conversion and the time of trial. The rule was applied to substantially the same facts as in *Markham vs. Jaudon* (*supra*) and that case was cited as authority for the decision of the Court below. This Court, however, reversed the judgment and disapproved the rule of damages which had been applied. The opinion was written by that very able and learned Judge, Rapallo, and all the cases pertaining to the subject were reviewed by him, and in such a masterly manner as to leave nothing further for us to do in that direction. We think the reasoning of the opinion calls for a reversal of this judgment.

In the course of his opinion the Judge said that the rule of damages as laid down by the trial Court, following the case of *Markham vs. Jaudon*, had "been recognized and adopted in several late adjudications in this State in actions for the conversion of property of fluctuating value, but its soundness, as a general rule, applicable to all cases of conversion of such property, has been seriously questioned and is denied in various adjudications in this and other States." The rule was not regarded as one of those settled principles in the law as to the measure of damages to which the maxim of *stare decisis* should be applied. The principle upon which the case was decided rested upon the fundamental theory that in all cases of the conversion of property (except where punitive damages are allowed) the rule to be adopted should be one which affords the plaintiff a just indemnity for the loss he has sustained by the sale of the stock, and in cases where a loss of profits is claimed, it should be, when awarded at all, an amount sufficient to indemnify the party injured for the loss which is the natural, reasonable, and proximate result of the wrong complained of, and which a proper degree of prudence on the part of the complainant would not have averted.

The rule thus stated in the language of Judge Rapallo he proceeds to apply to the facts of the case before him. In stating what, in his view, would be a proper indemnity to the injured party in such a case, the learned Judge commenced his statement with the fact that the plaintiff did not hold the stocks for investment, and he added that if "they had been paid for and owned by the plaintiff different considerations would arise; but it must be borne in mind that we are treating of a speculation carried on with the capital of the broker and not of the customer. If the broker has violated his contract or disposed of the stock without authority, the customer is entitled to recover such damages as would naturally be sustained in restoring himself to the position of which he has been deprived. He certainly has no right to be placed in a better position than he would be in if the wrong had not been done."

The whole reasoning of the opinion is based upon the question as to what damages would naturally be sustained by the plaintiff in restoring himself to the position he had been in, or, in other words, in repurchasing the stock. It is assumed, in the opinion, that the sale by the defendant was illegal and a conversion, and that plaintiff had a right to disaffirm the sale and require defendants to replace the stock. If they failed, then the learned Judge said the plaintiff's remedy was to do it himself, and to charge the defendants with the loss necessarily sustained by him in doing so.

Is not this equally the duty of a plaintiff who owns the whole of the stock that has been wrongfully sold? I mean, of course, to exclude all question of

punitive damages resting on bad faith. In the one case the plaintiff has a valid contract with a broker to hold the stock, and the broker violates it and sells the stock. The duty of the broker is to replace it at once upon the demand of the plaintiff. In case he does not it is the duty of the plaintiff to repurchase it. Why should not the same duty rest upon a plaintiff who has paid in full for his stock and has deposited it with another conditionally? The broker who purchased it on a margin for a plaintiff violates his contract and his duty when he wrongfully sells the stock, just as much as if the whole purchase price had been paid by the plaintiff. His duty in each case is to replace the stock upon demand, and in case he fails so to do, then the duty of the plaintiff springs up and he should repurchase the stock himself. This duty, it seems to me, is founded upon the general rule which one holds to another who converts his property under an honest mistake to render the resulting damage as light as it may be reasonably within his power to do. It is well said by Earl, *J.*, in *Parsons vs. Sutton* (66 N. Y., 92), that "the party who suffers from a breach of contract must so act as to make his damages as small as he reasonably can. He must not, by inattention, want of care or inexcusable negligence permit his damage to grow and then charge it all to the other party. The law gives him all the redress he should have by indemnifying him for the damage which he necessarily sustains." See also *Dillon vs. Anderson*, 43 N. Y., 231; *Hogle vs. N. Y. Central and H. R. R. Co.*, 28 Hun. 363, the latter case being an action of tort. In such a case as this, whether the action sounds in tort or is based altogether upon contract, the rule of damage is the same. (Per Denio, *Ch. J.*, in *Scott vs. Rogers*, 31 N. Y., 676, and per *Rapallo, J.*, in *Baker vs. Drake, supra*.)

The rule of damages as laid down in *Baker vs. Drake* in cases where the stock was purchased by the broker on a margin for plaintiff, and where the matter was evidently a speculation, has been affirmed in the later cases in this Court. (See *Gruman vs. Smith*, 81 N. Y., 25; *Colt vs. Owens*, 90 N. Y., 368). In both cases the duty of the plaintiff to repurchase the stock within a reasonable time is stated.

I think the duty exists in the same degree where the plaintiff had paid in full for the stock and was the absolute owner thereof. In *Baker vs. Drake*, the learned Judge did not assume to declare that in a case where the pledgor was the absolute owner of the stock and it was wrongfully sold, the measure of damages must be as laid down in the *Romaine* case. He was endeavoring to distinguish the cases and to show that there was a difference between the case of one who was engaged in a speculation with what is substantially the money of another, and the case of an absolute owner of stock which is sold wrongfully by the pledgee. And he said that at least the former ought not to be allowed such a rule of damages. It can be seen, however, that the judge was not satisfied with the rule in the *Romaine* case, even as applied to the facts therein stated. In his opinion he makes use of this language: "In a case where the loss of probable profits is claimed as an element of damage, if it be even allowable to mulct a defendant for such a conjectural loss, its amount is a question of fact, and a finding in regard to it should be based upon some evidence." In order to refuse to the plaintiff in that case, however, the damages claimed, it was necessary to overrule the *Markham* case, which was done.

Now, so far as the duty to repurchase the stock is concerned, I see no difference in the two cases. There is no material distinction in the fact of such ownership which should place the plaintiff outside of any liability to repurchase after notice of sale, and should render the defendant continuously liable for any higher price to which the stocks might mount after conversion and before trial. As the same liability on the part of the defendant exists in each case to replace the stock, and as he is technically a wrong-doer in both cases, but in one no more than in the other, he should respond in the same measure of damages in both cases, and that measure is the amount which, in the language of *Rapallo, J.*, is the natural, reasonable, and proximate result of the wrongful act complained of, and which a proper degree of prudence on the part of the plaintiff would not have averted. The loss of the stock at the highest price down to trial would seem to be a less natural and proximate

result of the wrongful act of the defendant in selling it, when plaintiff had the stock for an investment, than when he had it for a speculation, for the intent to keep it as an investment is at war with any intent to sell it at any price, even the highest. But in both cases the qualification attaches that the loss shall only be such as a proper degree of prudence on the part of the complainant would not have averted, and a proper degree of prudence on the part of the complainant consists in repurchasing the stock after notice of its sale and within reasonable time. If the stock then sells for less than the defendant sold it for, of course the complainant has not been injured, for the difference in the two prices inures to his benefit. If it sells for more, that difference the defendant should pay.

It is said as he has already paid for the stock once, it is unreasonable to ask the owner to go to the market and repurchase it. I do not see the force of this distinction. In the case of the stock held on the margin, the plaintiff has paid his margin once to the broker, and so it may be said that that it is unreasonable to ask him to pay it over again in the purchase of the stock. Neither statement, it seems to me, furnishes any reason for holding a defendant liable to the rule of damages stated in this record. The defendant's liability rests upon the ground that he has converted, though in good faith, and under a mistake as to his rights, the property of the plaintiff. The defendant is, therefore, liable to respond in damages for the value. But the duty of the plaintiff to make the damage as light as he reasonably may, rests upon him in both cases; for there is no more legal wrong done by the defendant in selling the stock which he has agreed to hold on a margin, and which agreement he violates by selling it. All that can be said is that there is a difference in amount, as in one case the plaintiff's margin has gone, while in the other the whole price of the stock has been sacrificed. But there is no such difference in the legal nature of the two transactions as should leave the duty resting upon the plaintiff in the one case to repurchase the stock, and in the other case should wholly absolve him therefrom. A rule which requires a repurchase of the stock in a reasonable time does away with all questions as to the highest price before the commencement of the suit, or whether it was commenced in a reasonable time, or prosecuted with reasonable diligence, and leaves out of view any question as to the presumption that plaintiff would have kept his stock down to the time when it sold at the highest mark before the day of trial, and would then have sold it, even though he had owned it for an investment.

Such a presumption is not only of quite a shadowy and vague nature, but is also, as it would seem, entirely inconsistent with the fact that he was holding the stock as an investment. If kept for an investment it would have been kept down to the day of trial, and the price at that time there might be some degree of propriety in awarding, under certain circumstances, if it were higher than when it was converted. But to presume in favor of an investor that he would have held his stock during all of a period of possible depression, and would have realized upon it when it reached the highest figure, is to indulge in a presumption which, it is safe to say, would not be based on fact once in a hundred times. To formulate a legal liability based upon such presumption I think is wholly unjust in such a case as the present.

Justice and fair dealing are both more apt to be promoted by adhering to the rule which imposes the duty upon the plaintiff to make his loss as light as possible, notwithstanding the unauthorized act of the defendant, assuming, of course, in all cases that there was good faith on the part of the defendant.

It is the natural and proximate loss which the plaintiff is to be indemnified for, and that can not be said to extend to the highest price before trial, but only to the highest price reached within a reasonable time after the plaintiff has learned of the conversion of his stock within which he could go in the market and repurchase it. What is a reasonable time when the facts are undisputed and different inferences can not reasonably be drawn from the same facts is a question of law. See *Colt vs. Owens*, 90 N. Y., 368; *Hedges vs. Railroad Company*, 49 N. Y., 228.

We think that beyond all controversy in this case, and, taking all the facts into consideration, this reasonable time had expired by July 1, 1878, following

the 9th of May of the same year. The highest price which the stock reached during that period was \$2,795, and as it is not certain on what day the plaintiff might have purchased, we think it fair to give him the highest price it reached in that time.

From this should be deducted the amount of the check and interest to the day when the stock was sold, as then it is presumed the defendant paid the check with the proceeds of sale.

In all this discussion as to the rule of damages we have assumed that the defendant acted in good faith, in an honest mistake as to its right to sell the stock, and that it was not a case for punitive damages. A careful perusal of the whole case leads us to this conclusion. It is not needful to state the evidence, but we can not see any question in the case showing bad faith, or indeed any reason for its existence. The fact is uncontradicted that the defendant sold the stock upon what its officers supposed was the authority of the owner thereof, given to them by Elliott.

The opinion delivered by the learned Judge at General Term, while agreeing with the principle of this opinion as to the rule of damages in this case, sustained the verdict of the jury, upon the theory that if the plaintiff had gone into the market within a reasonable time and purchased an equivalent of the stocks converted, he would have paid the price which he recovered by the verdict. This left the jury the right to fix what was a reasonable time and then assumed there was evidence to support the verdict. In truth there was no evidence which showed the value of the stock to have been anything like the amount of the verdict, for the evidence showed it was generally very much less, and sometimes very much more. But fixing what is a reasonable time ourselves, it is seen that the stock within that time was never of any such value.

The judgment must be reversed and a new trial granted, with costs to abide the event.

Henrietta H. Wright vs. The Bank of the Metropolis, New York Court of Appeals, October, 1888.

PURCHASE OF DRAFT BY BANK AND TRANSMISSION TO CORRESPONDENT FOR COLLECTION—COLLECTION BY CORRESPONDENT AND FAILURE BEFORE TRANSMITTING FUNDS—SELLER OF DRAFT CANNOT BE HELD LIABLE TO PURCHASING BANK WHERE HE DID NOT GUARANTY SOLVENCY OF FAILED BANK.

This was an action by the First National Bank of Warren against J. A. Cadwallader, to recover the balance unpaid on a draft for \$5,600. The facts are sufficiently stated in the following charge to the jury by the Court of Common Pleas, Brown, *P. J.*: "On the 5th of April, 1882, it appears that the defendant, Mr. Cadwallader, being, as would seem from the evidence, engaged in the purchase of lands in this section of country, had occasion to raise some money by drafts drawn upon persons interested with him in such purchases; that he went to the First National Bank of Warren, and had a consultation with Mr. Beecher, the Cashier, in regard to funds. Among the drafts that he drew upon persons interested in the land purchase, was one of \$5,600, drawn upon W. H. Johnson, of Buffalo. It appears that Johnson (to this extent there is no dispute) paid that draft. He paid it into the First National Bank of Buffalo, where it had been sent by Mr. Beecher. The First National Bank of Buffalo sent to the First National Bank of Warren a draft for an amount sufficient to cover the amount of money that had been paid into the First National Bank of Buffalo. This draft was on the Fourth National Bank of New York. When it was presented, which I think was upon the 12th of April, the First National Bank of Buffalo had no funds there to meet it, and it went to protest, and has never been fully paid. If the plaintiff in this case is entitled to recover at all, it is entitled to the amount of that draft, with interest on it, less the amount that has been received by the First National Bank of Warren from the Receiver of the First National Bank

of Buffalo; and counsel will present you with a statement giving the amounts and dates, from which you can make your computation. I have said that it appeared that Mr. Cadwallader went to the First National Bank of Warren and made an arrangement with Mr. Beecher to cash the draft of \$5,600 drawn upon Mr. Johnson. Whether that was for the accommodation of Mr. Cadwallader or not, is not, as I look at the case, very material. Mr. Beecher advanced the money and bought the draft. The draft was paid; but, owing to the unfortunate failure of the Buffalo bank, somebody loses. If there was nothing in the case other than I have thus far stated, I would say to you, as matter of law, that the verdict must be in favor of the defendant. This brings us to what we consider the essential question of fact, which you must determine from the evidence. The plaintiff alleges that at the time Mr. Beecher took the draft on Mr. Johnson, the defendant requested that it should be sent for collection to the First National Bank of Buffalo; and that, in consideration that it should be sent to the First National Bank of Buffalo, the defendant agreed that that bank would faithfully and promptly collect the amount from Mr. Johnson, and safely transmit and send the same to the plaintiff. The important question of fact for you to determine is, was that agreement made between Mr. Beecher and Mr. Cadwallader? I call your attention very briefly to the testimony. Mr. Beecher testifies that in the conversation between himself and Mr. Cadwallader, he demurred to sending the draft to the First National Bank. One reason was that, if they sent it to their correspondent there would be no charges for collection. It seems to be agreed that Mr. Cadwallader made reply that there would be none if sent to the First National Bank. There seems to be some question as to whether Mr. Beecher was acquainted with the solvency of Mr. Johnson, and whether the draft would probably be met. This appears from the testimony of Mr. Cadwallader. According to the testimony of Mr. Beecher there seems to be some question as to whether the bank there would properly discharge its duty. In connection with this, Mr. Beecher says that Mr. Cadwallader guaranteed that it would be 'all right.' What would be 'all right?' The burden of proof rests on the plaintiff to show what was referred to by the stipulation of Mr. Cadwallader that it should be all right. Was it that he would guaranty that the First National Bank of Buffalo would discharge its duty, and remit to the First National Bank of Warren the funds that were collected from Mr. Johnson? Substantially, this is the testimony of Mr. Russell and the testimony of Carey Beecher. Speaking now of the testimony of Cashier Beecher, Mr. Russell, and Carey Beecher, is it so definite that you are enabled to say (for the burden of proof is upon the plaintiff), that Mr. Cadwallader agreed to be responsible for the solvency and due payment by the First National Bank of Buffalo, to the First National Bank of Warren, of the money collected by the bank? This is the real question that you are to determine in the case. That Mr. Cadwallader and Mr. Beecher do not recollect all the facts alike is very plain. That they are both honest, and both testify to what they believe to be the facts, we have no reason to doubt. There is a mistake in this matter, evidently, somewhere, as to some of the details of the transaction. It is claimed upon the part of the defendant that this was a bank in Buffalo doing business; that, so far as it appears, there was no reason why Mr. Beecher should distrust its responsibility,—no reason why he should exact a guaranty of Mr. Cadwallader of its responsibility. Again, on the part of the defendant, Mr. Cadwallader is called, and testifies that what he said was that he would guaranty the responsibility of Mr. Johnson; and that, if Mr. Johnson didn't pay, he would. If that was the agreement, the plaintiff cannot recover.

* * * In determining the question as to what was the real contract between the parties, you have these facts in the case. There was some question raised as to the solvency of Mr. Johnson. There was some question raised as to the costs for the collection of the draft. Now, when Mr. Cadwallader guaranteed, in response to the suggestion made by Mr. Beecher, that it would be all right, what was it that he agreed would be all right? Was it that it would cost nothing if it was sent to the First National Bank of Buffalo for collection, or did he mean that it would be all right because Mr. Johnson would pay it, or

did he mean by that expression that the First National Bank of Buffalo would pay over to the First National Bank of Warren the money that it collected from Mr. Johnson? Here is the whole question in the case, and as you determine it, you will find for the plaintiff or defendant."

The jury returned a verdict for the defendant, on which judgment was entered, and the bank took the case to the Supreme Court of Pennsylvania for review.

Held: All that Cadwallader had to do with the \$5,600 draft after it had passed to the plaintiff was to see that it was honored when due, which, it seems, was done. The paper belonged to the plaintiff as fully as any other chattel that might have been passed to it on a full consideration paid. What, then, had the defendant to do or to say as to the agent, through whom the bank might choose to collect it? He might advise, but he could do nothing more. He might recommend such an agent, but the bank, on the other hand, might adopt such recommendation or not, as it saw fit. It follows that the First National Bank of Buffalo was alone responsible to the plaintiff, and the loss resulting from its failure cannot be charged to the defendant.

Judgment affirmed.

First National Bank of Warren vs. Cadwallader, Supreme Court of Pennsylvania, May 25, 1888.

PAYMENT OF CHECK BY BANK AFTER NOTICE OF CLAIM BY RECEIVER OF PROPERTY OF PAYEE—THE QUESTION OF TITLE TO FUNDS ON DEPOSIT CONSIDERED—BANK'S RESPONSIBILITY.

This was an action by Charles E. O'Connor a receiver in supplementary proceedings of the property of Herbert Foote Beecher, a judgment debtor, and a son of the late Henry Ward Beecher, to recover funds on deposit in The Mechanics' Bank, alleged to be the property of the judgment debtor, and which, after notice of appointment and demand, the defendant refused to pay over to plaintiff.

In March, 1887, Henry Ward Beecher died, leaving an estate of real and personal property, and a last will which was subsequently admitted to probate, and under which Herbert Foote Beecher, the judgment debtor, became entitled to one-fourth of the estate as legatee. About December, 1887, the executors having sold the personal estate, deposited \$10,000 of the proceeds with defendant in an account, entitled "Estate of Henry Ward Beecher," against which all drafts were to be by check of Henry B. or William C. Beecher "as executor."

In January, 1888, the executors made a distribution among legatees and apportioned about \$5,000 thereof as the share of the judgment debtor. After the payment of some claims against the judgment debtor, one of the executors drew and signed as executor, another check against said account, dated January 30th, 1888, for \$2,286.92 (the balance due), to the order of the judgment debtor, and mailed this check to him to Port Townsend, Washington Territory, where he resided. This check was not certified by the bank, nor was it paid until March 10th, 1888. On February 1st, 1888, a third party order was obtained and served, containing the usual injunction, and on February 2d, the Cashier of the bank was examined thereunder and the proceedings were thereafter adjourned so that the injunction order was continued in force until March 21st, 18-8. On February 4th, 1888, plaintiff was appointed receiver of the property of the judgment debtor, and a certified copy of the order of appointment was served on the bank. Subsequently and before the check was paid in March, during all which period there was on deposit from time to time funds sufficient to pay the check sent to the judgment debtor, the plaintiff gave to defendant full notice of the claim made, and demanded the payment to him of the \$2,286.92, as the property of the judgment debtor. Upon the refusal of the bank to pay, this action was brought.

Held: Upon these facts is the plaintiff entitled to recover?

The bank relies principally on the case of *Etna National Bank vs. Fourth National Bank* (46 N. Y., 88,) wherein certain principles are enunciated relative to the duties and obligations of banks of deposit. It is therefore the settled

law of this State that checks being inland bills of exchange impose no obligation upon the drawees until accepted, and that the contract and obligation of the bank is to and with the depositor and not the holder of the check, and that the relation of banker and customer in respect to deposits is that of debtor and creditor, deposits belonging to the bank as a part of its general funds. The depositor's own right is a mere chose in action. As regards the holder of a check, the bank cannot be said to have any trust fund or property of which it is the trustee for the check holder as *cestui que trust* (idem).

That case further holds that a check is not a lien in law or equity, nor does it operate as a transfer or assignment of the funds on deposit until accepted by the bank. It is clear, therefore, that if plaintiff predicated his cause of action on the naked claim that the funds on deposit were the property of the judgment debtor to the extent of \$2,286, because a check against such funds had been drawn in favor of the judgment debtor, the case of *Ætna Bank vs. Fourth* would be conclusive against him. Under such circumstances, no privity would exist between the judgment debtor and the bank, and therefore the receiver could not maintain an action.

As I view it, however, the facts present a very different question, involving as was stated in *Van Allen vs. American National Bank* (52 N. Y.), not a question of privity, but a question of title. And unless the \$2,286 of the funds on deposit in said account belonged to the judgment debtor and was in the possession or due from the bank to the judgment debtor, then, although a demand was made, the plaintiff would not be entitled to receive that amount from the bank.

The deposits being in the name of the executor, were funds held in trust for the judgment debtor and the other legatees, and as soon as his share in them was fixed and set aside he would seemingly be entitled to the possession. The case of *Van Allen vs. American Bank* is authority for the proposition that the title of plaintiff does not depend on whether the bank had or had not knowledge of plaintiff's title. The very character of the account and the fact that checks were to be signed as executor gave notice to the bank that the deposits made were trust funds. The usual relation of debtor and creditor existing between a bank and its depositors, and the well settled rule that the money deposited generally with the banker becomes the money of the depository, do not apply to deposits of trust funds. A fund deposited only becomes a debt due from a depository to depositor "where it does not appear that the fund was impressed with any trust" (*Attorney General vs. Continental Life*, 71 N. Y., 232).

As stated in *Baker vs. N. Y. National Bank* (10) N. Y., 33): "When the bank was notified that the money belonged to the plaintiff it did not lie in its mouth to set up want of privity." "Where the account is a trust fund known to be such by the bank, the *cestui qui trust* can follow that fund, and on refusal of bank to pay, maintain an action against the bank" (idem).

The executors were bound to distribute the estate, and it would appear from the authorities that as soon as they apportioned the respective shares of the legatees, such shares became vested in the legatees, and the executors were thereupon divested of any title therein. The judgment debtor's title to his apportioned share did not vest in him by virtue of the check, but by virtue of the will. It is true he would not be entitled to possession until the same was set apart, but when the apportionment by the executors was made and his share was fixed and identified he was entitled to its possession. The check drawn by the executor to the order of judgment debtor, while of itself it conferred no right of action, yet in view of the receiver's prior claim, and the grounds thereof, that additional evidence should have put the bank upon inquiry which would have resulted in showing that the receiver's claim was not entirely groundless.

If I am correct in my conclusion that to the extent of his share when apportioned, the fund of the account in the bank belonged to the judgment debtor, the same vested in the receiver, and the bank having received notice, should not, after such notice and demand, have paid the same over to any one other than plaintiff. The bank was in no perilous position. The law affords

ample protection and suggests a means by which, if it choose, it could relieve itself from any liability. Instead of paying out the money after demand and notice, it could have retained the same or deposited it in Court, and been entirely released.

It would seem as though the right of interpleader was intended for just such a case. The bank was not called upon to determine who was entitled to this fund, and it could have relieved itself of any responsibility in the manner above indicated, but having undertaken to determine the question with a knowledge of the facts, and after due notice, if it has reached a wrong conclusion it must assume the responsibility.

Upon the facts I am of opinion that the plaintiff is entitled to judgment against the defendant.

Opinion by O'Brien, J.

O'Connor vs. The Mechanics' Bank, New York Supreme Court, Special Term, September, 21, 1888.

AGREEMENT BETWEEN PARTIES TO JOIN IN THE PURCHASE AND SALE OF STOCK—NOTE GIVEN BY ONE PARTY TO THE OTHER FOR SHARE OF LOSSES—SUIT TO INVALIDATE NOTE CAN NOT BE MAINTAINED BECAUSE CERTAIN OF THE SALES WERE MADE THROUGH ANOTHER FIRM.

This action was brought to have a certain note given by the plaintiff to the assignors of the defendant declared invalid and given without consideration.

The complaint among other things alleged a certain agreement with one Frederick W. Foote, a member of the firm of John J. Cisco & Son, the defendant's assignors, whereby said Foote and plaintiff should join in the purchase and sale of stocks on joint account and risk—that all the purchases should be made by and through the said firm and the account kept in plaintiff's sole name. That in pursuance of said agreement the plaintiff deposited various sums of money to the credit of said account, and was informed by said Foote verbally that certain purchases and sales of stock had been made. That in March, 1884, Foote represented that these transactions had resulted in large loss, and that his (plaintiff's) share of such loss was \$2,605.63 over and above all credits. That the plaintiff, believing said statement, gave his note therefor, bearing date April 1st, 1884, and payable six months after date. That after the assignment of John J. Cisco & Son to the defendant, the plaintiff demanded a copy of the account, which was furnished, and he then discovered for the first time that he had not received credit for two payments, aggregating \$4,320.31, and that thereupon he refused to pay said note and demanded its return.

The answer substantially admitted the giving by the plaintiff of his note to balance his account, and admitted that the plaintiff was not given credit in his account for the said sum of \$4,320.31, but alleged that the same was credited in another account, a copy of which was furnished to the plaintiff, and to balance which these payments were made. The answer thereupon declared upon said note of \$2,605.63 as a counterclaim, and demanded judgment therefor.

Upon the trial the whole controversy between the parties was entirely changed, and the plaintiff endeavored to sustain his action by proof that 500 shares of the stock of the Northern Pacific preferred had been sold by Floyd-Jones & Co. instead of by John J. Cisco & Son, and that he had no knowledge that the sale had been made by Floyd-Jones & Co. The Court, at Special Term, after trial, rendered judgment for the defendant, and plaintiff appealed.

Held, The testimony shows that the sale was made by order of Foote, who had the authority to give such order; but it is claimed that the firm of John J. Cisco & Son had no power to give the order to another firm to execute upon the ground that the execution of the order involved an exercise of discretion and that it was of the character of a trust and in its nature personal.

In this contention we think the plaintiff has taken an erroneous view of the relations of the parties.

There was certainly a discretion vested as to whether a sale should be made or not; but when a sale had been determined upon, the discretion had

been exercised, and the execution of the order involved the exercise of no discretion whatever. It was not necessary that a member of the firm of John J. Cisco & Son should personally make such sale. They had the right to employ a sub-agent for that purpose. The sale would then be through the firm, as required by the agreement claimed by the plaintiff.

There is no pretense that the stock was not sold at the market rates or that the order was not faithfully carried out.

The claim made that because Mr. Floyd-Jones attended, upon the employment of John J. Cisco & Son, to the borrowing of this stock, no liability was incurred, is equally without foundation.

The plaintiff knew of the payment of these sums, and liquidated the account, and if there was an error therein he was bound to show it.

The plaintiff seems to assume that because he has shown that this note was given for the balance appearing upon these accounts that, therefore, the burden is thrown upon the defendant to show that these accounts are correct.

After the giving of this note the burden was upon the plaintiff to show that these accounts were incorrect. The giving of the note was an admission of their verity, and the plaintiff was bound to attack them.

This he has not attempted to do, except so far as he has done by claiming that the firm of John J. Cisco & Son had no power to make the sale of stock by Mr. Jones, and as we have seen this claim is not well founded.

The only exception to evidence to which our attention is called is that taken to the evidence of Mr. Jones proving the sale of this stock.

This exception cannot avail the plaintiff even if well taken.

If we strike out this evidence it is true there would be no proof that the sale had been made, but there would be no proof that the sale had not been made, and as in view of the admission by the plaintiff by the giving of his note that the sale had been made, in the absence of all evidence upon the subject, the conclusion must necessarily be in accordance with the admission.

The judgment must therefore be affirmed, with costs.

George V. Sims, vs. Lewis May, New York Supreme Court, General Term, September, 1888.

NATIONAL BANK—ASSESSMENT UPON STOCK—LIABILITY OF MARRIED WOMAN AS SHAREHOLDER.

This was an action at law by Chester W. Witters, as Receiver of the First National Bank of St. Albans, against Edward A. Sowles and Margaret B. Sowles, his wife, to recover an assessment, equal to the par value, on 400 shares of \$100 each in said bank, held by the *feme* defendant. The plaintiff first brought a bill in equity against these defendants to enforce this liability. The defendants demurred to the bill on the ground that a married woman could not be holden for such an assessment; and that, if she could, the remedy in that case would be at law, and not in equity. The question of her liability was then examined and held to exist, but the nature of it was found to be such that there was no jurisdiction in equity to enforce it, and the bill was dismissed for that reason. (32 Fed. Rep., 767.) In the present action the defendants demurred to the declaration, and the cause was heard on the demurrer.

Held: The defendants insist again, here, that this liability rests upon contract; that the contracts of married women, in Vermont, at the time when the liability accrued, if at all, were wholly void, and that therefore no liability was created. Some books and cases not referred to before have been produced now, and the subject has been re-examined. That the liability for such an assessment rests upon contract, and not upon any incurring of a penalty or tort, is true (Richmond vs. Irons, 121 U. S., 27); and that married women could not at that time by their mere contracts bind themselves to the payment of money, in Vermont, is also true. But the contracts sought to be enforced are the contracts of the bank, and not those of this *feme*, or any other shareholder. Without the statute she would not be liable in this direction at all. That makes the shareholders of every National banking

association responsible "for all contracts, debts, and engagements of such association to the extent of the amount of their stock therein." (Rev. St. U. S., §5151.) The contract is the contract of the bank; the shareholders have nothing whatever to do about making it. The law annexes their obligations by its own force; no act or capacity to act on their part is required. The declaration well sets forth that the *feme* defendant was the shareholder of these shares, and that proper proceedings were taken to fix this liability. These facts are admitted by the demurrer. The declaration, therefore, sets forth a good cause of action, if married women are included by the general words of the statute. That they are included is shown by the case of *The Reciprocity Bank*, 22 N. Y., 9; *Sayles vs. Bates*, 5 Atl. Rep., 497; and *Hobart vs. Johnson*, 19 Blatchf., 359. By taking the position of a shareholder she placed herself within reach of the statutory obligation. She could become a shareholder in various ways: by subscribing for the stock; by purchasing it; or by accepting it as a gift or bequest. The mode of acquisition would make no difference. Assent, at least, is required to becoming a stockholder in any manner, and that is sometimes referred to in connection with this liability. This reference is not, however, understood to signify that the assent or contract involved in becoming a shareholder is of any materiality beyond accomplishing that relation. No agreement to become liable, or protest against liability, would add to or take from the statutory obligation, and no contract or assent is involved beyond what is necessary to acquire the stock. Consequently no capacity would be required outside of what would be sufficient for that. This liability is an incident to holding the shares, like that to pay taxes on them. The coverture does not appear to afford any exception from either. Many cases have been referred to in argument bearing upon the manner in which married women and their property may become bound, and how they may be proceeded against; but as this case is not understood to rest upon any contract of the *feme* defendant, they do not appear to have any important part in determining the questions involved, and are not further referred to. The relation of shareholder, admitted by the demurrer, appears to carry with it the liability of the defendants.

Demurrer overruled.

Witters vs. Sowles, United States Circuit Court, D. Vermont, July 21, 1888.

EXECUTION OF NOTE BY EMPLOYEE IN THE NAME OF EMPLOYERS WITHOUT AUTHORITY, AND NEGOTIATION TO THIRD PARTY—GIVING OF NEW NOTE BY EMPLOYERS TO TAKE UP FORMER NOTE—THE QUESTION WHETHER RENEWAL NOTE WAS GIVEN FOR ACCOMMODATION, OR FOR LIABILITY ON FORMER NOTE, SHOULD BE SUBMITTED TO THE JURY.

George A. Dowden brought an action against John Calvin and Thomas Wright to recover the amount of a promissory note. The defendants carried on business under the name of Calvin & Wright, and employed one Louis La Farge as their bookkeeper, giving him power to sign checks on the bank account only. Plaintiff lent La Farge various sums of money, which he claimed to have believed were used in defendants' business. For part of the money so lent, La Farge gave plaintiff a note, to which he signed the defendants' names without authority. La Farge had represented to plaintiff that he was the owner of the business, and was carrying it on in the name of Calvin & Wright, who were only his employees. The note was given without the knowledge of Calvin & Wright. La Farge soon after died, and during his last illness plaintiff first learned that the note was given without authority. He then requested defendants to give him a new note to take up the former, which he had discounted, and save his credit at the bank. Defendants consented, and executed the note in suit. The trial court directed a verdict for plaintiff, and defendants appealed.

Held: If the note in suit was given for the accommodation of Dowden (and we think the jury might reasonably have drawn that conclusion from the testimony), he cannot recover upon it. Whether the note was an accommodation note, or whether it was given because the defendants did not dispute

their legal liability upon the former note that was signed in their names by La Farge, is a question that ought to have been submitted to the jury. It was, in our opinion, an error to direct a verdict. There is no question of usury in the case.

Judgment reversed and new trial ordered.

Dowden vs. Calvin, Court of Common Pleas for the City and County of New York, General Term, June 28, 1888.

DEFUNCT SAVINGS BANK—LIABILITY OF MANAGERS—OFFER OF COMPROMISE—RIGHTS OF DEPOSITORS—POSITION AND DUTY OF RECEIVER, AND OF COURT.

In a suit by Washington B. Williams, Receiver of the Mechanics and Laborer's Savings Bank against its managers and officers to compel them to make good losses occasioned by their misconduct, an offer of compromise was made by certain of the defendants to the Receiver. The Receiver thereupon made application to the Court for advice as to the acceptance of the offer. The facts are stated in the conclusions of the Vice-Chancellor, advising the rejection of the offer.

Van Fleet, *V. C.*: Twelve of the twenty-six defendants in this suit seek to purchase their peace. They offer to pay \$47,500 in cash, on condition that that sum is accepted in full satisfaction, so far as they are concerned, of all the claims which the Receiver is seeking to establish against them by the decree of this Court, leaving the Receiver free to proceed against the other fourteen defendants and get what he can. When the Receiver laid this offer before the Court in April last, for the purpose of receiving direction as to whether it should be accepted or not, he stated that he was of opinion that it would be judicious and expedient to accept the offer. At that time I fully concurred in that opinion. Since then a part of the persons, on whose behalf this suit is brought, have expressed themselves as strongly opposed to the acceptance of the offer. When the bank failed the amount on deposit was about \$219,000. Persons holding about \$81,000 of this amount oppose acceptance, persons holding about \$42,000 favor acceptance, and those holding the other \$96,000 say nothing. The Receiver now says, in view of the strong opposition made to the acceptance of the offer, that he is unwilling to take the responsibility of urging its acceptance, but submits the question whether it shall be accepted or rejected, to the Court without recommendation; so that the offer is now before the Court with no opinion by the Receiver whether the Court should accept it or reject it. In this posture of affairs, I think the duty of the Court is entirely plain.

The defendants were managers and officers of the Mechanics and Laborer's Savings Bank; they are charged with gross negligence and wilful violation of duty, and the object of this suit is to compel them to make good to the depositors the losses which have been sustained in consequence of their misconduct. Under such circumstances it is the clear right of the depositors to have the suit prosecuted to final decree, in order that every dollar which the law will give may be recovered. That is their primary right, and that is what a large majority of those who have spoken upon the question of acceptance or rejection say they want. It may be that they want what is not best for them, but at this time nobody can say, with perfect certainty, that that is so. Very decided opinions may be formed both ways, at present, which the future may show are fallacious. The Receiver's position in the case is such that the Court must, to a large extent, be controlled in its action by his views. He is both client and counsel, and consequently possesses as perfect knowledge of the grounds on which the liability of the defendant rests, as it is possible for any person to possess; besides, he is the trustee of the depositors and, as such, bound to do the very best he can to protect and promote their interests. Now, if standing in a position where his knowledge is thorough and complete, and his duty plain, he hesitates to advise the acceptance of the offer—and he ought not to advise its acceptance unless it appears clear to him that the best interests of the depositors would be promoted by its acceptance—it is clear that the

Court should not accept it. An order will be advised directing the Receiver not to accept the offer.

Williams vs. Halliard, et al., Court of Chancery of New Jersey, July 24, 1888.

ABSTRACT OF CASES.

POWERS OF BANK CASHIER—AUTHORITY TO TURN OVER NOTES TO DEPOSITOR IN PAYMENT OF DEPOSIT—RIGHTS OF ATTACHING CREDITOR.

The defendant N. was a depositor in the bank of D., of which G. was Cashier. On the 11th day of August, 1885, the place of business of D. was closed by the sheriff. On the morning of that day, and just before the time for commencing business, N. obtained from the Cashier of the bank a small sum of money and a quantity of notes, which were turned over in payment of his deposit. The plaintiff S., having commenced an action against the banker to recover an indebtedness due to him, obtained a writ of attachment in aid of the action, and this was served by garnishing the defendant N. S. obtained judgment against D., and N., the garnishee, joined issue by the service of an answer in which he denied all liability to D. Plaintiff claimed that the notes were wrongfully obtained by N., and that he was liable for the amount he realized from them, since they had all been collected.

Held: In the absence of a more general authority, the Cashier would be restricted in his power to bind his principal to the doing of such acts as are usually performed by persons who occupy the position he held. In other words, in the absence of proof of special authority, G. must be held to have had power to bind his employer only by acts done in the usual and ordinary course of business. N. was a depositor, and the notes were turned over in payment of his deposit. We do not think that bank depositors are usually paid in that manner, and there is no showing that it was the ordinary method adopted by D.

Judgment for plaintiff against garnishee.

Schneitman vs. Noble, Supreme Court of Iowa, September 7, 1888.

PROMISSORY NOTE—STATUTE OF LIMITATIONS—ACKNOWLEDGMENT REVIVING DEBT—INTEREST.

Upon a promissory note made in February, 1874, and due in November thereafter, a credit, entered and signed by the maker, as follows: "1882, April 27, by balance account rendered for 1876, credited under date of November 12, 1876, \$48.01. H. W. Vines,"—is an acknowledgement of the debt as existing at the date of the entry, to wit, April 27, 1882, and operates as a new promise from that time, and prevents the bar of the statute of limitations from attaching for a period of six years thereafter.

Inasmuch as a new promise revives or extends the original liability, creating no new liability, (Code of Georgia, § 2936,) the rate of conventional interest borne by the note is a part of the liability revived or extended; and such rate continues in force as fully after the making of the new promise as it was at the creation of the debt. Nor does it make any difference that, by a change in the law of usury, made in the interval between the execution of the note and the date of the promise, such conventional rate was largely in excess of any conventional rate allowed by the new law.

Vines vs. Tift, Supreme Court of Georgia, March 3, 1888.

LAW NOTES AND COMMENTS.

THE THIRD EDITION OF MORSE ON BANKS AND BANKING.—A new edition of "Morse on Banks and Banking" is before us from the press of Little, Brown & Co., edited by Mr. Frank Parsons of the Boston bar. The original work of Mr. Morse was presented to the public in 1870. It was the first attempt by an American writer to bring together and classify in an exhaustive treatise the multitude of cases which had arisen and been adjudicated

involving questions in banking law, and by comparison, criticism, and a discussion of the various cases in connection with each other and in the light of the general rules of law, to deduce and present a statement of the established principles of the law relating to the banking business. A second edition was issued by Mr. Morse in 1879. The work has received high favor from both bench and bar and has been quoted with approval by many of our courts. The present edition is the third, and Mr. Parsons has continued the work, established by his predecessor, with marked ability. The leading changes made in the present work can be best expressed in the words of the author: "The text has been broken up into sections, with head-lines in black; new matter has been added, exceeding in mass the whole of the last edition, necessitating the appearance of the book in two volumes; the original text has been carefully revised, re-arranged and in part re-written, in the process of moulding all the matter, old and new, into consistent sections; the whole has been carefully re-indexed; the text of the National banking act of 1864 has been replaced by the corresponding text of the United States Revised Statutes of the edition of 1878, retaining, however, the order of the law of 1864, so that cases which refer to the sections of that law may be easily handled; the laws of Congress relating to banking which have been enacted since 1878 will also be found in Part Second, together with notes of many cases construing the National banking laws; and in connection with the text, throughout the book, a system of analyses has been adopted at the heads of the chapters."

While the former work of Mr. Morse was admirable in many respects, the present, we may candidly say, is a vast improvement; not only in the form in which it is presented (the arrangement into sections and headings, and the analysis, enabling the reader to grasp the subject more readily) but especially in the thoroughness and exhaustiveness which characterize the discussion and statement of all the subjects treated. In no branch of the law is there more conflict among the judicial decisions in the various States than that relating to the banking business. In some of the States a bank taking paper for collection on a distant place is held directly liable to its customer for the neglect or default of all subsequent correspondents to whom the paper has been transmitted while in other jurisdictions a contrary doctrine is held. Again, the courts of some of the States deny any right of action in the holder of a check, before certification, against the bank thereon, while in other tribunals, such a right is recognized. Again, the law with reference to the remedy of a banker who pays money on a check whereon the drawer's signature has been forged, is in a confused and unsatisfactory condition; and in numerous other instances the decisions upon questions of equal importance are at variance and the law in an unfortunate state of ununiformity and bewilderment. The treatment by Mr. Parsons of all such questions is especially full and satisfactory, and the work evidences that special pains have been taken to present these subjects to the reader in the most thorough manner possible.

In the chapter on "Collections," in addition to a presentation of the general subject in all its detail, the author has appended a brief statement of the general principles of the law merchant regarding presentment for acceptance, presentment for payment, protest, notice of dishonor, and excuses for failure to present or notify, the object being to give, in a condensed form the essence of the law on these subjects for the information of the banker undertaking collections. To the chapter on Official Bonds and Liabilities of Sureties, is subjoined a statement of the procedure in bond cases, including notes on evidence, the measure of damages, and the practice and pleading in general. In dealing with the subject of the business of the bank, the author makes a six-fold division, namely, (1) When can the bank do business? (2) Where must it be done? (3) What business can it do? (4) How is the business to be done? (5) What rights, duties and liabilities arise in doing it? and (6) What is the effect of the acts of a bank beyond its authority? All these questions are treated at great length, especially the subject of what business a bank can do and the expansion of its powers in reference to the purchase of negotiable paper, handling stocks, dealing in real estate and saving debts. Appended to the chapter presenting the general principles of the law

relating to officers and agents of the banks, is a note on the competency of bank officials and shareholders as witnesses on the bank's behalf. Especially exhaustive, also, are the chapters on "Directors," "President" and "Cashier." There are many other topics of which we might equally make special mention, but it is sufficient to say that while the present edition contains twice the volume of matter embraced within the former book, there is nothing contained in it that does not properly belong in a standard work on banking law. As such, we regard it as a valuable acquisition to the present library of works on the subject.

GIFT OF A CHECK.—Judge Woerner, of the Probate Court of St. Louis, on September 20th, decided a very interesting question in connection with unpaid checks presented for allowance against estates. Mrs. Susan Shoemaker, being in ill-health and on the eve of departure for California, signed and handed to Mrs. Leontine T. Newcomb her check on the St. Louis National Bank for \$100, dated December 30, 1857, and payable to Mrs. Newcomb's order. At the same time she requested Mrs. Newcomb to present the check in "case she died," explaining that it was for Mrs. Newcomb's kindness to her and her children, and that "she did not want any one to know it." She also said that "if she lived to get home in May or June she would then give the amount named in the check or let Mrs. Newcomb draw it." She died without returning, and on learning of her death Mrs. Newcomb presented the check for payment, but the bank refused to pay it. The check was then presented for allowance against Mrs. Shoemaker's estate. Judge Woerner, in passing upon the matter, stated that, as the facts were uncontroverted, the question was whether the check was given for a debt or whether it was intended as a gift. If a debt it was not discharged, but if a gift the further question arose whether there had been a sufficient delivery to constitute a gift either *inter vivos* or *mortis causa*. The Judge concludes that the check was a gift, but that such a gift was not complete until the check was either paid or accepted by the drawee, and in the absence of such payment or acceptance, the death of the drawer operated to revoke it. That the kind intentions of the generous donor, as well as the reasonable and well-merited claims to her bounty on the part of the donee, should both be disappointed in consequence of a legal technicality, was ground for regret; but it did not authorize the Court to act in place of the donor by completing a gift which she herself had not completed. Judgment is then given for the estate.

MEASURE OF DAMAGES ON THE CONVERSION OF STOCK.—There will be found elsewhere in this number an important decision by the New York Court of Appeals in the case of *Wright vs. The Bank of the Metropolis*, upon the question of the damages which the owner of stock of a fluctuating market value is entitled to recover from a party who, acting in good faith, has converted the same under an honest mistake.

The decision settles, for New York, the rule of damages, in cases of conversion of stock; a question which has been the subject of much conflicting adjudication. It is to be regretted, however, that the judges of the court are not unanimous in the conclusions reached.

REPLIES TO LAW AND BANKING QUESTIONS.

Questions in Banking Law—submitted by subscribers—which may be of sufficient general interest to warrant publication will be answered in this Department.

A reasonable charge is made for Special Replies asked for by correspondents—to be sent promptly by mail. See advertisement on another page.

Editor Rhodes' Journal of Banking:

PLATTSBURGH, N. Y., October 22, 1888.

SIR:—A National bank obtains judgment on a promissory note held by it. A third party offers the bank its pay in full amount of the judgment and asks to have the judgment assigned to him at his risk, cost and charges in all respects. Can the President or Cashier make the assignment without authority from the Board of

Directors, and, if not, must such authority be given in each case? or would a resolution made to cover all such cases be legal?

CASHIER.

Answer.—If the transaction was to be regarded as a payment of the debt to the bank, the Cashier would have authority, by virtue of his office, to receive the amount and satisfy the judgment; but regarded as a sale and assignment of the judgment to a third party, it is probable that neither the President or Cashier would have the inherent power to do this, but that the authority of the Directors would be necessary. A general resolution, however, to cover all such cases would be sufficient.

Editor Rhodes' Journal of Banking:

SPEARFISH, Dak., October 10, 1888.

SIR:—A customer deposits with this bank a certified check on a bank in a neighboring city. The drawer of the check directs the bank not to pay, and notified us not to pay the check. Can the certifying bank legally refuse to pay on presentment and would we be safe in paying the check?

BANKER.

Answer.—After a bank has certified a check it is too late for the drawer to revoke it. So far as the drawer is concerned the bank is liable to the holder, on the check, and "Banker" would be safe in taking it. A different question might arise if the certifying bank had a claim against the holder which it sought to set off against the check. In that case, if "Banker" received notice not to give value for it, the safer way would be to take the check for collection only and not credit the amount to the depositor until paid.

Editor Rhodes' Journal of Banking:

WASHINGTON, D. C., October 13, 1888.

SIR:—The following is with reference to page 937 of JOURNAL for October:

See "Illustrated History of the United States Mint" (by George A. Evans, publisher), Philadelphia, 1885, p. 82: "Three-Dollar Piece"—"Reverse: '3 dollars 1854.' within a wreath of corn, wheat, cotton, and tobacco." p. 83: "Dollar"—"Reverse: '1 Dollar 1849' within a laurel wreath, 'United States of America.'" See, also, "Visitor's Guide and History of the United States Mint, Philadelphia, Pa." (published by A. M. Smith, numismatist), Philadelphia, 1885—Matlock & Hawly, printers, 224-235 Fifth St., Phila.—p. 45, line 46. "Reverse [of gold dollar]: A laurel wreath enclosing, in three lines, the inscription, *1 Dollar 1849.*" P. 47, line 28, "Reverse [of three-dollar gold piece]: A wreath of tobacco, corn, wheat, and cotton occupies the field, in it, in three lines, *3 Dollars 1854.* No change has been made in these dies except date of the year."

"CURIOUS," II.

Editor Rhodes' Journal of Banking:

BESSEMER, Ala., September 24, 1888.

SIR:—Suppose A sends an accepted draft to B, same being payable at B's bank, for collection, with instructions to protest if not paid. The acceptor of draft having failed in business ten or fifteen days before same became due, B returned it without protest. A returns draft, saying the drawer refused to take it up, claiming to be released because B failed to protest, and that he, A, will hold B responsible for same. The drawer has since tried to compromise with the acceptor. Is B responsible to A, and is the drawer released by B's failure to protest?

T. J. CORNWELL, Cashier.

Answer.—The bankruptcy and insolvency of the acceptor constitutes no excuse for neglect to make presentment for payment, and give notice of non-payment. The drawer would therefore be discharged, and the collecting bank liable for neglect, unless there was some other element in the case constituting an excuse for non-presentment and protest.

Editor Rhodes' Journal of Banking:

HONEY GROVE, TEXAS, October 20, 1888.

SIR:—Kindly inform us if the Assistant Cashier of a National bank has authority to sign its circulating notes?

CASHIER.

Answer.—The National Bank Act provides that the notes shall contain the "signatures of the President or Vice-President and Cashier." (Sec. 5172, U. S. Rev. Stat.) It therefore provides for two signatures, one of which must be by the President or Vice-President, and the other by the Cashier. Whether

the Assistant Cashier of a National bank would have authority to sign in place of the Cashier must be determined from a reading of the section, as there is no judicial precedent on the point. We think it would be better in all cases to follow the plain direction of the Act. There might be cases, however, where the office of Cashier was temporarily vacant, or where he was ill, or abroad, in which the Assistant Cashier, authorized to perform all the duties of the Cashier's office and clothed with all his powers, would have the right to sign the notes. But whenever present, to avoid all question, the Cashier should personally sign.

Editor Rhodes' Journal of Banking:

MARSHALL, Texas, October 16, 1888.

Sir:—If of sufficient importance to be answered in your "Replies to Law and Banking Questions," will you kindly state what is the legal effect of the words 'Duplicate unpaid,' sometimes printed on bank drafts? For instance, the following draft:

Duplicate unpaid.	FIRST NATIONAL BANK.	No. 1289.
	SMITHVILLE, Texas, September 1, 1888.	
Pay to John Jones or order One Hundred Dollars (\$100).		
To National Park Bank, New York.		I. HOPE, Cashier.

The above is properly indorsed by Jones, but refused by the Park Bank on the ground that the duplicate has been paid. Jones has received the money on the draft and skipped. On whom does the loss fall, the bank that issued the draft or the bank that cashed the draft for Jones?

SUBSCRIBER.

Answer.—The words quoted indicate that the draft was issued in two parts, and are similar in purport to the words "Pay this my first of exchange—second remaining unpaid." The two parts constitute but one bill, and when the drawee bank has paid one part, upon a proper indorsement, the other is not payable, by virtue of the condition expressed. The bank, cashing the draft, was entitled to the transfer of both parts, and should have received them both, before paying the money. If this had been done, the fraud by the payee would have been prevented. As it is, the loss falls on the bank cashing the duplicate; not on the bank who issued the draft.

Banking in London and New York.—A correspondent, in comparing the system of banking in London and New York says that the fifteen leading joint stock banks in London—namely, the London and Westminster, the London Joint Stock, the Union, the Glyn, Mills, Currie & Co., the City, the Imperial, the Alliance, the Consolidated, the Central, the London and South-western, the London and County, the National Provincial, the Lloyds Barnetts, the London and Provincial and the Capital and Counties, have together an aggregate capital and surplus of £28,000,000, or \$130,000,000, and deposits of £175,000,000, or \$875,000,000. Their discounts amount to £118,000,000, or \$585,000,000, and their cash, call loans and Government stocks on hand to £88,000,000, or \$440,000,000.

In New York there are altogether eighty-eight banks, big and little, with an aggregate capital and surplus of \$115,000,000, deposits of \$412,000,000, loans and discounts of \$390,000,000, and a cash reserve of \$120,000,000. The fifteen largest among them are the America, the American Exchange, the Broadway, the Central, the Chemical, the City, the Commerce, the Corn Exchange, the First National, the Gallatin, the Importers and Traders', the Mechanics', the Manhattan, the New York, and the Park. The aggregate capital and surplus of these fifteen banks is \$65,000,000, their deposits \$218,000,000, their loans and discounts \$198,000,000, and their cash reserves \$65,000,000. In a word, the above London banks have twice as much capital as the largest New York banks, and do nearly three times the business.

The dividends of these London banks are not, it must be acknowledged, altogether commensurate with the enormous amount of work they perform. The London and County Bank pays 20 per cent. per annum, the Capital and Counties \$1, the London and Westminster, 14, and all the others but three from 12½ down to 10 per cent., the three exceptions paying 7 per cent.

CALIFORNIA.

BANK COMMISSIONERS' REPORT.

We have the honor to submit for your consideration the tenth annual report of the Board of Bank Commissioners.

The total number of banks engaged in active business which report to us, according to law, is one hundred and sixty-three, of which twenty-three are Savings, one hundred and ten (one hundred and five State and five foreign) Commercial, and thirty Private. Full statements from these banks and tabular statements are appended to this report. Also, statements of the affairs of five banks in liquidation, and (by their courtesy) statements from the National banks—thirty-eight in number.

During the past year one hundred and twenty-seven incorporated banks (including the banks in liquidation), the entire number required by law, have been inspected by one or more Commissioners. Statements taken from the books on these occasions, and reported to the Attorney-General, are published in connection with the semi-annual sworn statements of the officers.

NEW BANKS.

A greater number of banks were incorporated under the laws of this State within the past twelve months than during any similar period since the Commission was created. The list is as follows:

City Savings Bank, Santa Cruz; People's Home Savings Bank, San Francisco; American Bank & Trust Company, San Francisco; California Bank, Los Angeles; California Bank & Trust Company, Oakland; California State Bank, National City; Bank of Commerce, San Diego; Commercial Bank, Santa Barbara; Commercial Bank, San Luis Obispo; Bank of Elsinore, Elsinore; Exchange Bank of Elsinore, Elsinore; Farmers' Co-operative Union, Yuba City; Granite Bank, Monrovia; Market Street Bank, San Francisco; Bank of Oakdale, Oakdale; Bank of Oceanside, Oceanside; Pajaro Valley Bank, Watsonville; People's Bank, Pomona; Placer County Bank, Auburn; Bank of San Diego, San Diego; Bank of San Pedro, San Pedro; Bank of Santa Paula, Santa Paula; State Bank, Ontario.

NOTES.

Last year we published reports from one hundred and twelve incorporated banks. The National City Bank, listed last year as a new bank, reports for the first time this year, in addition to those listed above.

The Commercial Bank of Santa Barbara succeeds the Santa Barbara Savings Bank.

The Pasadena Savings Bank, incorporated in May, 1887, retired from business in December for want of patronage.

The East San Bernardino Valley Bank changed in June, 1888, from a State into a National bank, and is now known as the First National Bank of Redlands.

The Bank of Lodi, incorporated June 7, 1888, was licensed to transact business on and after July 2, 1888.

The Bank of Rideout, Smith & Co., Oroville, incorporated May 31, 1888, was licensed to transact business on and after July 2, 1888. This bank succeeds the firm of the same name.

The Directors of the Bank of Haywards, incorporated December 12, 1887, resolved to retire without transacting business, and will disincorporate.

The Bank of Tustin, incorporated October 10, 1887, the Bank of Northern California, Redding, incorporated April 23, 1888, and the Sierra Madre Bank, incorporated March 20, 1888, are organizing.

The Bank of Watsonville reduced its capital from \$200,000 to \$100,000 on the first of January. The stockholders decided that the former amount was in excess of the demands of business.

Since our last report Clearing-Houses have been started in Los Angeles and Fresno.

The Stockton Savings & Loan Society and the Stockton Savings Bank, each organized to carry on a savings and commercial business, are classed in this report as

commercial banks, and the Sacramento Bank, which transacts no commercial business, is classed as a savings bank.

PRIVATE BANKS.

Last year statements were published from twenty-nine private banks. Of these the following are now National organizations: D. B. Carver, St. Helena, succeeded by the Carver National Bank; Jack, Goldtree & Co., San Luis Obispo, succeeded by the First National Bank. The following have retired from business: W. A. C. Smith, St. Helena; A. H. Reynolds, National City; as well as Tillinghast, Henry & Co., Whittier, who reported in January and have since retired.

We add this year the following private banks to our reports:

Thomas Bakewell & Sons, Riverside; Wm. Collins & Sons, Ventura; Ricker, Mason & Lindley, Whittier; Paso Robles Bank, Paso Robles; Bank of Stockton, Stockton.

THE BANKS IN LIQUIDATION.

In response to applications filed with this Board from the Masonic, the Odd Fellows, and the Farmers & Mechanics' Bank, all of San Francisco, the time for liquidation of each bank was extended to October 8, 1888.

LIQUIDATION OF THE ORIGINAL FRENCH BANK.

On the twentieth day of September, 1878, this bank being unable to meet an extraordinary demand for reimbursement from its depositors, ceased to do business, and a thorough examination and appraisal of its assets by the Board of Bank Commissioners disclosed the fact that, owing to bad and doubtful loans, depositors would probably be subjected to a loss of 30 per cent. on the amount of their deposits. The bank had conducted business without a guarantee capital.

At a meeting of the depositors a new Board of nine Directors, composed of the most prominent French residents, was elected for the purpose of liquidating in the most advantageous way the affairs of the society, and the Board with all possible diligence commenced realizing into money the available assets.

Owing to a general desire on the part of the French and Italian population to maintain in San Francisco a savings bank more particularly identified with them, on the twenty-first of February, 1879, a special meeting of the members of the society was called to consider a plan of reorganizing with a guarantee capital of \$300,000.

At that meeting it was resolved, by a unanimous vote, to reorganize the society on that basis, and from that date the new society, while acting in the capacity of trustee for the old organization, has gradually built up a thriving and satisfactory business. The old affairs have been kept entirely distinct and separate from the new business; from time to time, as the assets were converted into money, dividends in liquidation were declared on the old deposits. The final dividend in liquidation was payable May 7, 1888, being at the rate of 11-6 per cent. The total amount of dividends paid was 72 1-6 per cent.

The amount due depositors was \$5,591,129, and the amount paid them was \$4,034,931.

In view of the doubtful character of many of the assets, and the very unsatisfactory condition of affairs in San Francisco at the time when the liquidation was first commenced, we consider the result to be much more satisfactory than the depositors had reason to expect at the outset.

NATIONAL BANKS.

In response to requests made by this Board, all the National banks of California sent us last year, for the first time, statements of their condition for publication in our report. This year blanks were again sent from this office to these banks. We acknowledge with sincere thanks the courteous responses received from the respective officers. The statements, thirty-eight in number, a gain of ten since our last report, are published and tabulated herewith.

The following are the new National banks:

Fresno National Bank of Fresno; First National Bank of Merced; First National Bank of Monrovia; First National Bank of Redlands; Carver National Bank of St. Helena; San Bernardino National Bank of San Bernardino; California National Bank of San Diego; San Diego National Bank of San Diego; Garden City National Bank of San Jose; First National Bank of San Luis Obispo; First National Bank of Santa Monica.

MISNOMERS.

It will be observed by reference to the reports that some of the private bankers use corporate titles. These banks are compelled by law to file sworn statements,

which are published, thus somewhat obviating a serious objection to the practice, which is a questionable one, to say the least.

Again, individuals and associations incorporated for other purposes announce themselves or their concerns as bankers, banks, or banking companies, but decline to furnish statements, on the ground that they are not conducting a banking business, or to quote them specifically, are not receiving deposits.

Inasmuch as the law, so far as we know, does not prohibit such practices, we most respectfully ask the attention of your Excellency and the honorable the Legislature to the matter.

AN UNSAFE PRACTICE.

Notwithstanding the example of the best banks, the wishes of the public, and the continual remonstrances of this Board, there are still a few bankers in this State who habitually allow the cash on hand to run so low as to be utterly disproportionate to the amount due depositors, a course not only certain to cast reproach upon them, but likely to inconvenience their customers and jeopardize the interests of stockholders.

SAVINGS BANKS.

Certain facts in connection with the savings bank business present features of general interest.

The Marysville Savings Bank, in liquidation, is about to declare a final dividend. This bank, a "mutual" one, will not only pay dollar for dollar, but will divide a small surplus fund among its depositors.

The Odd Fellows Bank, originally a mutual savings, was reorganized during a crisis into a capital stock bank. Of a total subscription of \$250,000, about one-half was paid in, which was immediately absorbed by the depositors, who were withdrawing from the bank. The run upon it continuing, and other causes operating, the bank was forced into liquidation. Some four years thereafter certain stockholders sued to be reinstated as depositors, and to be declared entitled to their *pro rata* of the assets of the concern. This case was decided in February last by the Supreme Court against the stockholders.

In the San Francisco savings banks the paid-up capital has been increased as follows since our last report: In the California Savings & Loan Society, from \$73,400 to \$100,000; in the Savings Union, from \$400,000 to \$604,750; in the German Savings & Loan Society, from \$800,000 to \$600,000; in the French Savings Bank, from \$189,035 to \$191,480, and a new bank, the People's Home, starts with \$100,000 paid up. The Savings & Loan Society has decided to increase from \$500,000 to \$1,000,000. The total amount of capital employed in this class of banks in San Francisco is \$2,326,230, with surplus funds amounting to \$966,272, representing eight of the nine banks. The Hibernia Savings & Loan Society has a surplus fund amounting to \$1,670,969, held as a reserve, but no capital stock. This bank and the Mendocino Bank are the only banks in the State organized upon what is known as the "mutual" plan.

In January, 1882, the San Francisco savings banks held real estate, acquired in settlement of loans, to the amount of \$4,798,858. In this report the amount held July 1, 1888, is valued at \$1,002,778. The reduction denotes the prosperity of the State, and is gratifying to all parties interested in the banks.

Savings banks, in their origin, were eleemosynary institutions, and they still have something of this character in the extreme Eastern States. To some extent they are such in the minds of the people of this coast. They have lost their original character in all the progressive States, and it may be said there are no banks in this State now working on the purely mutual principle. All have either a capital stock or a reserve fund, in which only a part of the depositors would be interested in case of liquidation. That is to say, those depositors who have withdrawn, yet whose funds have contributed towards earning the reserve, forfeit all claim to it.

We understand that the proportion, or alleged disproportion, between dividends to depositors and dividends on capital stock, occasions remark. But, as a matter of fact, the savings banks of California are business enterprises of private individuals with incidental benefit to the public, in no wise differing in this regard from commercial banks. It is not the duty of the State to determine how the profits of business shall be divided, that must be left to the force of competition and the discretion of the managers who appeal to the public for support.

The State, however, has a duty to perform, which is (through its Bank Commissioners or otherwise) to see that the affairs of the savings banks are administered and

the profits of business divided in accordance with the contract between bank and depositor. Such contract may exist by virtue of by-laws, conditions of agreement, or even by the terms of advertisements by which patronage is solicited. As the funds of the stockholder are put up for the purpose of guaranteeing the safety of those of the depositor, it is but natural that he should demand a larger rate of dividend to compensate his risk. It is urged that if this privilege be denied them, the conservative, prudent, representative business men of the community will no longer be connected with savings banks.

INVESTIGATING COMMITTEES.

We call the attention of stockholders, especially in new banks, to the necessity of providing in the by-laws for the establishment of a regular committee to examine the affairs of the corporation, scrutinize the management, and, to a certain extent at least, supervise the business. This committee is usually appointed by the Board of Directors from its own number. The work it should perform is the more imperatively called for in those banks where it is not the custom to have weekly or semi-weekly meetings of the Board. Such committees are important in banks where the Board does not pass upon the discounts before they are granted, which method of doing business prevails in this State, contrary to the custom almost universally followed in Eastern cities.

It is a remarkable fact that, in some of the banks having such committees, the duty is rarely attempted, or, if attempted, discharged in a careless and incompetent manner, and not altogether from unconcern, indifference, or over-confidence—sometimes fear of, or deference to, the officers, or some such feeling is sufficient to prevent the parties interested in a bank from inquiring too closely into its affairs and becoming acquainted with the men who are conducting it.

Again, a sense of inexperience in accounts, or the books peculiar to banks, disqualify Directors, in their own minds, from serving satisfactorily either to themselves, or, as they fear, to the rest of the stockholders.

It is a mistake to suppose that the officers of any properly conducted banking business will receive in any other manner than cordially the inquiry of any of their associates who may be duly authorized to investigate, and who are competent to judge of the affairs that interest them in common, and for the successful prosecution of which all, to a greater or lesser degree, are responsible. It is more reasonable to assume that men who do good work are eager to have the facts known, that they may be the more appreciated. All faithful employes, whatever their positions, are protected by the approval of the Directory, an indorsement they should be permitted to receive, an advantage of which they should have the benefit, and it is more likely to be just when based upon the actual knowledge gained in long periods of time and investigations of minute details.

So far as the system of accounts is concerned, it is one of the points to be examined, for in all well-regulated banks the figures, especially when presented by the men who make them, exhibit the affairs of the bank in so clear a manner that they may be readily comprehended by examiners, whether accountants or not. We admit, of course, that skillful manipulation of the figures can deceive. That is another phase of the question. We are attempting to interest stockholders in those concerns where every expectation of honest treatment is justifiable.

Boards of Bank Directors are sometimes composed of the best men available for the purpose, and sometimes they are not—often of sheer figureheads, who are known to be such. The want of discretion on the part of stockholders in making appointments not based upon fitness is illustrated in the case of the Marine National Bank—the Grant-Ward Bank—of which a late Comptroller of the Currency has said:

An examination of the minutes of the Board of Directors of the bank shows that on the 11th of April, 1884, twenty-five days before the failure of the bank, the committee of examiners appointed by the Board of Directors reported that they had examined the securities, counted the bills and specie, examined the balances on the ledgers of the bank, and found the recorded statement of the 7th of April, 1884, to be correct. The minutes further show that the Directors were in session about an hour before the bank closed. They apparently had no suspicion of the state of its affairs, and voted to discount certain offerings of commercial paper; and within one half hour after adjournment of this meeting the bank closed its doors. It would seem, therefore, that the Board of Directors was grossly deceived as to the true state of its affairs.

But we may assume that all Boards are capable of forming competent investigating

committees, if not from their own number, with outside assistance, presumably among the heaviest stockholders.

The members of an "Auditing," "Examining," or "Finance" Committee—as it may be called—are not expected to be auditors merely. In banks where the force is sufficiently large to employ good methods, and proper precautions are taken, the work audits itself. In small banks a rigid examination of the books is of great service to faithful employees. The quotation given above shows that a certain amount of auditing was done in that bank, and in addition, the specie that was there was counted, and it was found to be correct. If the specie that is not there could be counted it would often be more to the purpose. The specie is a fluctuating commodity at the best. It is the loans that give character to the bank. Of the loans and investments this committee should know all there is to be known, and without unnecessary waste of time. The duties, in addition, affect the conduct of every person in the employ and the methods of transacting business. A familiarity is essential, for questions will arise that are local or peculiar, and practices of doubtful policy about which the authorities disagree will be suggested. Decisions must be rendered understandingly, for these matters present different aspects in different banks, in each of which they must be decided according to circumstances.

In view of the fact that in some quarters the duties now under consideration are regarded as belonging to Commissioners only, we may suggest that stockholders are entitled to all the aids to efficient management they can get. Bank officers and supervising committees are always present, with every opportunity to acquire local knowledge, thereby affording the best sources of information available to Commissioners. The latter must rely on a comprehensive rather than a detailed view of the business, taking it as an entirety, while, on the contrary, the banker can analyze details to the extreme limit necessary. Between the visits of the Commissioners, between the meetings of the Directors, the business may be relieved, by prompt interference on the part of a committee, of risks created perhaps by a fluctuating market, otherwise likely to grow to dangerous degrees by the carelessness of the officers. In this connection it must be remembered that the authority of the stockholders is unquestionable, while with us, in banks where no illegal, or irregular, or dangerous practices are detected, and no question of solvency can arise, it is not the intention of the law that we should interfere with the business, much as we should like to do so at times. We must be content to recommend while Directors can decree. This question of official interference is a very delicate one. In short, it is the province of this committee to prevent the abuses which, if they neglect their plain duty, we may be expected to cure.

No attempt has been made here to show the necessity of such examining committees in banks where apprehensions are aroused. When frauds are suspected the investigations are made thoroughly; no difficulty is experienced in finding men who can "spare the time" and slight other interests to attend to the bank and its difficulties.

We urge the consideration of this subject upon every bank in the State that it may concern, however prosperous and well managed.

REAL ESTATE IN COMMERCIAL BANKS.

The Hon. W. L. Trenholm, Comptroller of Currency, points out with great force the necessity of the utmost caution on the part of National banks in investing in real estate securities. His remarks apply directly to our State commercial banks, our laws permitting loans on real estate by all banks. We urge upon our bank managers the most serious attention to this subject. Such loans, even when made with prudence, should not aggregate a proportion of the entire assets so large as to be likely to be embarrassing if circumstances demand the conversion of them into ready money. Wholly or in part to entanglements in real estate loans the Comptroller attributes the failure of sixteen out of one hundred banks.

The Comptroller has carefully investigated the insolvent banks under his charge to ascertain, when possible, the cause of failure. From the tables published by him we have prepared the following statement. We ask that it be carefully examined, for we believe the information, coming from so eminent an authority, to be of great value in pointing out to our own State bankers the methods of doing business which prove unfortunate.

CAUSES OF FAILURE.

Since the organization of the National Banking System seven hundred and forty-four banks have retired from it, leaving three thousand and sixty-one in active business. Of those retiring one hundred and twenty were placed in the hands of Receivers. In ninety-one cases the cause of failure has been ascertained as stated below. The Comptroller's report is dated November 1, 1887:

Defalcation of officers, 2; defalcation of officers and fraudulent management, 12; defalcation of officers and excessive loans to others, 1; defalcation of officers and depreciation of securities, 1; depreciation of securities, 5; excessive loans to others, injudicious banking and depreciation of securities, 1; excessive loans to officers and Directors and depreciation of securities, 3; excessive loans to officers and Directors and investments in real estate and mortgages, 1; excessive loans to others and depreciation of securities, 1; excessive loans to others and investments in real estate and mortgages, 2; excessive loans and failures of large debtors, 1; excessive loans to officers and Directors, 2; failure of large debtors, 2; fraudulent management, 5; fraudulent management and excessive loans to officers and Directors and depreciation of securities, 2; fraudulent management and depreciation of securities, 8; fraudulent management and injudicious banking, 3; fraudulent management, defalcation of officers and depreciation of securities, 3; fraudulent management, injudicious banking, investments in real estate and mortgages and depreciation of securities, 2; fraudulent management, excessive loans to officers and Directors and excessive loans to others, 1; injudicious banking, 2; injudicious banking and depreciation of securities, 20; injudicious banking and failure of large debtors, 2; investments in real estate and mortgages and depreciation of securities, 8; investments in real estate and mortgages and failure of large debtors, 1.

The "injudicious banking" which caused one failure is described as "trying to do too much business for its means," and to the same cause is assigned the case of a bank which "suffered an impairment of capital through losses attributable mainly to the gradual withdrawal of deposits by customers who were moving out of the locality, general stagnation of business and a marked decline of the enterprises of the town." It appears this attempt to do business at all is designated as "injudicious." It may be proper to add that an effort has been made to voluntarily liquidate this bank, which failed, and a Receiver was appointed. The depositors were paid in full.

The description of another case of "injudicious banking" is as follows: "In 1883 a change was made in the officers and Directors, but the new men proved unequal to the exigency. It appears that the President lived several miles away from Corry, and that the Cashier was negligent and a poor business man, while the Directors were weak or inattentive. In consequence of general neglect the bank went from bad to worse, and the Cashier is particularly censured for not fully informing the Directors of the true condition of a large amount of the paper which was thus allowed to become entirely worthless. Added to the effects of weak management, there was a constant shrinkage in the value of old assets, adverse decisions were rendered in important litigation, and losses on current business proved to be large."

An instance of "fraudulent management" is the case of a bank which "made excessive loans to certain persons, the officers misrepresenting the value of the securities."

"Defalcation of officers and fraudulent management" means, in certain cases, "the unlawful use of the funds and credits of the associations, the officers accomplishing this malfeasance by obtaining in their official capacity the discount of notes in which the bank had no interest."

To guard against this kind of imposition the Hon. J. J. Knox, then Comptroller, says: "It is suggested that an Act prohibiting any bank from obtaining rediscounts upon its own bills receivable, unless authorized by its Board of Directors, under the seal of the bank, would have the effect to put other banks upon their guard when applied to for such favors."

TABLES.

The following tables accompany this report: Aggregate of reports for ten years of the three classes of banks required by law during that period to file statements with this Board. Comparative statements of the Savings, Commercial, Foreign and Private Banks for July, 1887, January and July, 1888, with aggregates. Comparative

statements of the National Banks, July, 1887, and July, 1888. Aggregate of all the Banks of California, July 1, 1887, and July 1, 1888. Semi-annual Tabular Statements.

The sections of the Codes of this State referring to banks and banking are included in this report.

We wish to extend our thanks to the officers of all the banks for courtesies shown us.

Respectfully submitted,

W. W. MORELAND, A. W. POTTS, J. A. THOMPSON, *Bank Commissioners.*

Columbus, Georgia.

SOME OF ITS ADVANTAGES.

It is very doubtful if the average Northerner or Westerner fully realizes the rapid strides which some parts of the Sunny South are making and the wonderful natural resources which are fast bringing that portion of the Union into world-wide prominence. From a recently published circular it is easy to be seen that Columbus, Ga., is situated in one of the most favored sections of the Gulf States, and possesses natural advantages which, aided by the judicious investment of capital, must, in the near future, result in placing it in the front rank of Southern cities.

Columbus is located at the head of navigation on the Chattahoochee river, which here forms the boundary line between Georgia and Alabama, and also gives a direct water communication with the Gulf of Mexico. By rail, it is 100 miles to Macon, 115 miles to Atlanta—the capital—250 miles to Savannah, 145 miles to Birmingham, and 100 miles to Montgomery, the capital of Alabama. This location commands superior facilities for controlling the trade of three States and embracing a territory containing the richest agricultural, forest, and mineral regions in the South. Besides, its railroad and shipping facilities are nearly perfect—embracing not only water but rail communication with every important point in the West and Southwest.

The population is now 30,000, and rapidly increasing. The climate is delightful—in summer, not too oppressively warm, and in winter, snow and ice are seldom seen.

But it is as a manufacturing centre that Columbus has unsurpassed advantages. The Chattahoochee here furnishes a water power that is one of the wonders of the world. Within the short distance of $2\frac{1}{4}$ miles there is a fall of one hundred and twenty-five feet, giving a total of 86,000 horse power, and extending northward for forty miles the fall is equal to 1,000,000 horse power for low water and double that for the average stage. At the present time, barely one-third of the available horse power, directly accessible to the city, is in use. The total capacity is sufficient to run 800,000 spindles, with the accompanying machinery.

As to healthfulness—this city has never had a case of epidemic disease, and has never been quarantined against cholera or yellow fever. The city government is well and economically administered. The streets are well paved and lighted with gas and electricity. There are four banks—two National, one State, one Savings—representing an aggregate capital of nearly half a million; fine educational facilities—including public and good private schools and a female college. There are also plenty of good hotels, an opera house and other places of amusement, beautiful parks and the handsomest shade trees of any city in the South. The different church organizations are well represented, embracing two Baptist, three Methodist, one Presbyterian, one Catholic, one Free Will Baptist, one Episcopal Church, and a Jewish Synagogue, all of which have fine edifices. The colored people also have attractive buildings and large congregations. Any further information can be obtained by addressing the Columbus Board of Trade, to whose circular we are indebted for the foregoing interesting facts.

Illinois—The Merchants' National Bank of Chicago.—On another page of the JOURNAL will be found the tabulated statements, showing the condition of this bank, as taken from the reports to the Comptroller of the Currency from March, 1881, to October, 1888, inclusive. This is a showing of which any financial institution might justly feel proud. The apparent solidity and prosperity is not only attested by such an exhibit, but it shows, also, a very able and conservative management. The officers are to be congratulated upon such a showing. It certainly must be highly gratifying to the stockholders.

FINANCIAL MATTERS IN CHICAGO.

[From the JOURNAL'S Chicago Correspondent.]

Much activity has characterized the past month on the Chicago Stock Exchange, the transactions being more numerous and of greater importance than for some time. The quotations of the leading stocks for October 29th and the same day of the preceding month are as follows:

BANK STOCKS, PAR \$100.	Amount of the Capital Stock.	OCT. 29.		SEPT. 29.

H. M. JORALMON.

At last, the Presidential campaign has made itself felt in business and financial matters. The last two weeks of October have been particularly dull, so much so that there has been quite a marked decrease in the bank clearings for the period

mentioned. The demand for money, while fair, is not so good as it should be at this time of the year, with the abundant crops to move. However, everything presages a period of unusual activity immediately following the election crisis. Demand loans are steady at five per cent., with time loans at six and seven. New York exchange ranges about twenty-five cents per \$1,000 discount.

The business of the Board of Trade has been highly satisfactory to the operators on that Exchange during the past four weeks although in many cases the fluctuations have been so severe and rapid that brokers have advised their customers to keep out of the market entirely. The market for wheat is still very strong, and it would probably soar beyond all bounds were it not for the lack of foreign demand at the prevailing prices. The fears of a corner in the December option has much to do with adding strength to the market. Corn does not seem to sympathize with wheat, for it has been declining steadily under the pressure of heavy receipts and the prospects of abundance next month. The failure of the Traders' Bank, a small institution owned solely by the President and Cashier, was the first bank failure that Chicago has had in many years. The institution seems to have been losing ground for several years, and the embarrassment was not so great a surprise to our shrewd financiers. President Rutter has died since the failure and all together it seems that in this case business inertia has been mistaken for conservatism.

My attention has been directed to a statement made in the JOURNAL for October relating to the investment of Eastern capital in Western farm mortgages. The assertion was that the demand for money in the West has been supplied and that rates there are declining rapidly. I have just returned from a rather extended tour through some of the most promising sections of the West, and I can say emphatically that the West will need and can absorb all the money it can get for several years to come. It is true that insurance companies and other large financial corporations are offering money in the larger cities and towns at 6 and 7 per cent. when the prevailing rate is 8 and 10 per cent., including commissions; but it is also true that borrowers experience much unnecessary trouble and delay when obtaining money from the cheaper sources and prefer to pay the higher rates and be sure of getting the accommodation when they want it. Enormous quantities of Eastern capital are loaned in the West, but it is all earning its interest every year and netting a good profit to the farmer besides. Even if a year of bad crops does come, I believe the interest will not be allowed to default, but will be paid from the self denial of the farmers. They know what the term means; they have encountered it time and time again in obtaining their farms, and they are not going to shrink from it when it becomes necessary in order to retain their property. Of course I am speaking of loans which are intelligently placed. There is where the chief danger lies. In the great majority of cases losses occur from the selection of an agent to negotiate the loan who is either irresponsible, inexperienced, or both.

H. M. JORALMON.

Worth More Than it Costs.—Chester Sloanaker, Cashier First National Bank, Newton, Iowa, writes September 27th, as follows: "I have received the JOURNAL for September and examined it last evening. Think I got more than *one dollar's* worth from the one number."

California—Nevada Bank of San Francisco.—At the annual meeting of the Nevada Bank, held on October 10th, there was a full representation of the 30,000 shares of the capital stock, apportioned as follows: James G. Fair, 10,000; John W. Mackay, 10,000; James L. Flood, 9,500; A. E. Davis, 250, and J. F. Bigelow, 250 shares. The statement of assets and liabilities for the year shows this bank to be in a very flourishing condition. The old Board of Directors was re-elected for the ensuing year, and the old officers reappointed, consisting of James G. Fair, President; J. F. Bigelow, Vice-President; D. B. Davidson, Cashier, and George Grant, Assistant Cashier.

A New Check Protector.—At the Bankers' Convention recently held in Cincinnati, a device was brought to the notice of the members, which general opinion pronounced the *best* to prevent the raising of drafts, etc. It is rapid in operation and has the advantage of not weakening the paper, and consequently the figures will not tear out, which seems to be the objection to some machines now in use. This machine is known as the ABBOTT AUTOMATIC CHECK PROTECTOR, and is sold by The Abbott Machine Co., manufacturers, at 51 West Washington St., Chicago.

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Germany—A New Bank in Berlin.—A recent dispatch announces the founding of the International Bank of Berlin with a capital of \$5,000,000. The new bank absorbs Goldberger's banking business without taking the liabilities. The Directors include Goldberger and Dessauer, manager of the Rothschild's Vienna house, who are President and Vice-President, respectively.

Canada—Canadian Bank of Commerce.—The authorities of the Canadian Bank of Commerce give an emphatic contradiction to the report in circulation that ten-dollar bills on that bank have been counterfeited. There have been none of the alleged counterfeit notes in circulation in Toronto, and at none of the bank's branches have any been detected. The \$10 note counterfeited some time since has been retired from circulation, and there is no counterfeit on notes being issued by the bank.

South Carolina—Sumter.—An exchange is authority for the statement that another bank will soon be started in this town. It is to be a State institution with \$50,000 capital. Sumter is way behind other towns in the State in banking facilities, and it is admitted by all shrewd business men both in and out of Sumter that right there is one of the best places in South Carolina for banking purposes. Sumter is at last waking up to this fact. Subscription books have been opened in the office of Haynsworth & Cooper for the purpose of taking subscriptions for this new enterprise. A State bank, with W. F. B. Haynsworth at the head of it, is one of the possibilities of the near future.

California—People's Bank, Pomona.—At a recent meeting of the Directors of this bank, held in their new banking rooms, Mr. Geo. H. Hopkins was elected Director and Cashier to fill the vacancy caused by the resignation of Geo. J. Mitchell. Although a comparatively young man, Mr. Hopkins is an experienced banker. Beginning as a clerk, he worked his way up through the various grades until he was made Cashier of the Kenduskeag National Bank of Bangor, one of the oldest and most substantial banking institutions in Maine. After holding this office for several years he resigned his position and spent a considerable time in traveling through the West for the purpose of studying the banking methods of that section. During the past year he has been connected with the management of the First National Bank of Leavenworth, Kan., in which he is a large stockholder. The People's Bank is to be congratulated upon the acquisition of so valuable an officer.

Pennsylvania—Philadelphia Stock Exchange.—The new Stock Exchange, in the Drexel Building, has been formally opened with ceremonies appropriate to the occasion. Our correspondent writes that a wall of palms and ferns formed a screen that hid the musicians from view, and over across the great room with its affluence of decoration there was a pyramid of beautiful blooming plants. President Kurtz made a short address, and then the orchestra struck up the Boulanger March, when the guests filed in two down the corridor to the Clearing-House and Bond Room, where the tables were well filled. Among the guests were visitors from New York, Baltimore and Boston, besides many of the leading bank Presidents and railroad men of Philadelphia. The out-of-town visitors included Vice-President Morse and Secretary Ely of the New York Stock Exchange, President Charles G. Wilson of the New York Consolidated Stock & Petroleum Exchange, President A. W. Spencer of the Boston Stock Exchange, President Fahnstock and Vice-President J. Wilcox Brown of the Baltimore Stock Exchange.

Kansas—Farmers' Loan & Trust Company of Anthony.—The vast increase in the formation of Mortgage, Loan and Trust Companies throughout the West has

caused investors in that class of securities to make a thorough investigation of their strength and the character of those in charge of them. The investment of hundreds of millions in Western farm mortgages, or debentures based on them, is sufficient proof that they stand in the front rank of American securities. The several savings institutions of New Hampshire held in June, 1880, loans secured by Western farm mortgages to the amount of \$12,113,500.75, besides \$3,362,423.61 secured by Western city mortgages, showing their confidence in that class of securities. From the most reliable sources it is learned that these amounts have been very largely increased during the past year. The great development of the agricultural interests of some of the Western States—notably Kansas—has offered a basis of apparent security that has been made the most of. The loans made by the Farmers' Loan & Trust Co. of Kansas are largely made in what is called the corn-belt of Kansas, and their loans are negotiated with a thoroughness, system and carefulness equal to the most conservative business methods anywhere. This company invites the most careful investigation of their manner of making loans. Their Eastern office is under the careful management of A. C. Goss, 84 Devonshire street, Boston, and their Western office is at Anthony, Kans.

Bank Buying as a Fine Art.—One Danford, who hails from Akron, Ohio, will probably go down into history as the champion bank buyer of the century—that is buying banks without investing any visible capital and eventually leaving the confiding depositors to whistle for their money. His latest exploit was in Cannelton, Ind., where he bought out Hull & Pace, who had a small, private bank in that place. The firm had some outstanding indebtedness, mostly with depositors, and the understanding was that Danford should assume this debt, and they were to take his note for a specified amount, payable in sixty days. The proposition was accepted, an agreement was signed and recorded, and Danford took charge of the bank. After the first week the new Cashier announced that he was going to Ironton, Ohio, to bring back his family, and, drawing \$500 of the bank's money, left. From his actions Messrs. Hull & Pace became suspicious and telegraphed to Ironton, and received word from the authorities there that they knew nothing of Danford. The latter was traced to Louisville, Ky., and the Chief of Police was wired to arrest him.

Danford has at some time been a man of some prominence, for letters of recommendation from Senators Ingalls and Plumb, of Kansas, were found in his pocket. He had, also, a pass entitling him to a reserved seat in the gallery of the National Senate Chamber at Washington. When Danford was asked to explain his trick at Cannelton, he merely replied that he was trying to make a speculation out of the bank and had no intention of defrauding any one. The police believe, however, that he is a sharp, shrewd, dangerous man, and his arrest is regarded an important one. Danford made no resistance, but seems to think he can not be held for his offense.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- The new East Side Bank, New York city, opened for business October 15th.
- Counterfeit one and five-dollar American bills are in circulation in Montreal.
- The Philadelphia banks have steadily reduced their reserves since the middle of August.
- Mr. Edwin S. Hooley has become a partner in the firm of Rolston & Bass, New York city.
- The Commercial Bank building, Delphos, Ohio, was recently burned. Loss, about \$30,000.
- The National Bank of Evanston, Ill., with a capital of \$50,000, is among the probabilities in the near future.
- Hon. Gilbert W. Phillips of Putnam, Conn., died recently. He was, at one time President of the First National Bank.
- The Seventh National Bank, Philadelphia, Pa., has recently been making extensive improvements in its building.
- Ray, Hardy & Co., have formed a co-partnership in N. Y. city for transacting a commission business in stocks, bonds and petroleum.
- Mr. John Pickering, of Pickering & Moseley, Boston, Mass., was recently married to Miss Anna Dane Varney, of Salem, Mass.

— It is expected that the new building of the Keystone National Bank of Philadelphia, Pa., will be ready for occupancy by November 15.

— The latest currency issue of the Treasury Department is a \$20 silver certificate bearing upon its face an excellent engraving of Daniel Manning.

— The Comptroller of the Currency has declared a third dividend of 18 per cent. in favor of the National Bank of Sumter, S. C., making in all 80 per cent.

— It is rumored that Stain and Cromwell, convicted of the murder of Cashier Barron of the Dexter, Maine Savings Bank, are to have a new trial.

— The funded debt of Connecticut was reduced \$300,723 during the fiscal year ending July 1, 1888, and the improvement since then has nearly doubled.

— The President has approved the act for the relief of the First National Bank of Portland, Oregon, for money advanced to build the revenue cutter Corwin.

— The Exchange National Bank of Norfolk, Va., failed April 9, 1885, has just paid 5 per cent., making in all 50 per cent. on claims proved amounting to \$2,360,166.

— The Fourth Street National Bank of Philadelphia, Pa., has just celebrated its second anniversary. Since its start this bank has met with remarkable success.

— Receiver McConville, of the defunct Metropolitan National Bank, Cincinnati, Ohio, recently paid a dividend of 10 per cent. to the stockholders of that institution.

— The new Empire State Bank, New York city, will be located in a handsome building now being erected on the south-east corner of Broadway and Bleecker street.

— The assignee of John J. Cisco & Son, New York city, announces that he will pay to the creditors, as a final dividend, the sum of 2½ per cent. upon the amount of their claims.

— The idea seems to be generally entertained that the bulk of the bonds purchased by the Government has come from the National banks. This is very wide of the truth indeed.

— Homer W. Nash, United States Bank Examiner in Michigan, has been elected Cashier of the Fourth National Bank of Grand Rapids, resigning his Government position.

— The Receiver of the Fifth National Bank, St. Louis, Mo., which failed November 7, 1887, has just paid 15 per cent., making in all 80 per cent. on claims proved amounting to \$959,410.

— The Henrietta National Bank of Henrietta, Tex., recently paid 15 per cent., making in all 90 per cent. on claims proved amounting to \$62,155. This bank failed July 25, 1887.

— Mr. Charles A. Kidder, of the well-known banking firm of Kidder, Peabody & Co., was recently married in Southborough, Mass., to the daughter of Dr. Joseph Burnett of that place.

— Charles B. Whiting, the Worcester (Mass.) banker, has been indicted for embezzlement of some \$8,000 worth of bonds of the American Electric Manufacturing Company. He plead not guilty.

— A clerk who has charge of the money exchange in Castle Garden, New York city, is said not to have made the slightest error in a service of twenty-five years, though handling about \$10,000 dully.

— The Farmers' Loan & Trust Co., of New York city, recently secured the entire issue of \$1,500,000 water and dock bonds of that city at \$108.31 for the water and \$110.76 for the dock. The bids aggregated \$25,000,000.

— J. M. Dinwiddie has been elected Secretary of the Iowa Bankers' Association in place of J. E. Henriques, who has removed from the State. The next annual Convention will be held at Cedar Rapids in June, 1889.

— At the New York Consolidated Stock and Petroleum Exchange the petition to buy up all memberships of deceased and insolvent members is before the Governing Committee and will receive their speedy attention.

— It has been ascertained that the man who so successfully did up the Quebec Bank in Montreal, Canada not long since, is an expert New York thief named Edward O'Connor, *alias* Seymour, who some time ago captured \$2,000 from the Teller's desk in

the Fifth National Bank, and a few hours later \$8,700 in the same way from the Commercial National Bank in New York city.

— The war estimates of France for the current year amount to 180,000,000 francs. The total of the sums asked by the Minister of War is 918,000,000 francs, of which amount 220,000,000 francs has already been voted.

— As the examination into the affairs of the Traders' Bank of Chicago continues, the evidence of the rottenness of the institution increases, and the depositors have only dim chances of recovering much of their money.

— It is reported that Sylvester A. Cosgrove, stock broker of Pittsburg, Pa., has disappeared after forging notes to an amount variously estimated at \$15,000 to \$25,000, and depositing as collateral for them securities not his own.

— E. S. Cox, the ex-stock broker of Toronto, Ont., who obtained about \$100,000 of the funds of the Central Bank of Canada shortly before it collapsed last fall, has been discharged on the last of the charges preferred against him.

— Mr. Henry Seligman, a member of the well-known banking firm of J. & W. Seligman & Co., of New York city, who has been abroad for the past six months conducting some important financial negotiations, has recently returned.

— The report comes from Cincinnati that Wm. Means, former President of the wrecked Metropolitan National Bank, is in a very serious condition, both mentally and physically, and that he is on the verge of a complete mental collapse.

— Mr. Frank B. Waterman, of Parkersburg, W. Va., who was private Secretary to Hon. Johnson N. Camden during his six years' term in the United States Senate, has accepted a position in the First National Bank of Parkersburg as Receiving Teller.

— Gold sold at 235 on the 11th of July, 1864, which was the highest point. It did not go below 200 from the 21st of June of that year to the 28th of September. It was also above 200 all the time from the 12th of October, 1864, to the 23d of January, 1865.

— The Comptroller of the Currency has declared a seventh dividend of 10 per cent. in favor of the creditors of the Richmond National Bank of Richmond, Ind. This makes, in all, 71 per cent. on claims proved amounting to \$366,932. The bank failed June 23, 1864.

— It is understood that the new Mexican International Bank, under its name of "International and Mortgage Bank," will open for business very early in the coming year, and already there is a large demand for shares in Mexico, even among persons who steadily fought the transfer of the concession to the New Yorkers.

— It is alleged that Secretary Ely, of the New York Stock Exchange, recently stated that the trouble in relation to the names of Stock Exchange firms appearing on the Directory of the Consolidated Stock & Petroleum Exchange would probably be settled by the members publishing cards to the effect that they do not belong to the opposition Exchange.

— It is rumored, with a prospect of the rumor becoming a reality, that the Building & Loan Association and Bonham Investment Company of Bonham, Tex., will combine and merge into a banking company. Each of the institutions has a capital stock of \$100,000, nearly all paid up. The unity of the two will make one of the largest banking institutions in North Texas.

— The Massachusetts Savings Bank Commissioner authorizes the statement that the loss to the Union Savings Bank of Fall River will not exceed 10 per cent. at the outside, and can be made up by passing dividends for two years. He wishes this announcement made officially for the information of depositors, many of whom are disposing of their bank books at ridiculously low prices.

— William R. Merriam, President of the Merchants' National Bank of St. Paul and the Republican candidate for Governor of Minnesota, entered Racine College at fifteen and was graduated at twenty-one. He led in everything, athletics as well as studies, was historian and valedictorian of his class, and Dr. De Koven's favorite student. He is supposed to be the youngest bank President on record—he is thirty-eight now.

— It is said that an investigation into the affairs of the Farmers & Mechanics' Bank of Pittsburg, Pa., has shown it to be in a bad way. The general ledger gives deposits

of \$108,000 and the individual ledger \$319,000, a difference of \$216,000. The books have not been examined for ten years, and it is not known where the money has gone. It is supposed that the bank was hurt by the failure of the Fidelity National Bank of Cincinnati.

— The National banks of this country pay annually the sum of \$138,997 to keep their currency clean and neat. Dirty and mutilated bills on National banks are rare. But how is it with the Government paper? Go into the banks and see. There you will find in almost any bank, silver and gold certificates and legal-tender notes torn, ragged, and so dirty and filthy that a handful of them will give out an odor like a glue factory.

— The annual meeting of the stockholders of the Bank of California was recently held in San Francisco. The cash movement for the year past was \$338,522.802 or \$99,576,900 per month. This is the largest movement ever reported, and is \$45,000,000 greater than for the previous year. In exchange the operations foot up \$63,231,919, and the receipts of bullion \$6,289,010. The net earnings, after deducting expenses, were \$613,549.25.

— The New York representatives of the Hong Kong and Shanghai Banking Corporation have received a copy of the report for the half year ending June 30 last. The profits amount to \$710,441.36, out of which a dividend of £1 10s. per share is paid (equal to 15 per cent. per annum); \$100,000 added to the reserve fund, raising that fund to \$4,000,000, and \$10,441.36 carried forward to the credit of the next half year's profit and loss account.

— The Comptroller of the Currency has declared, in favor of the creditors of the First National Bank of Wahpeton, Dak., which failed March 27, 1888, a third dividend of 10 per cent., making in all 45 per cent. on claims proved amounting to \$110,669; and also in favor of the Commercial National Bank, Dubuque, Iowa, a second dividend of 10 per cent., making in all 40 per cent. on claims proved amounting to \$395,776. This bank failed March 20, 1888.

— The Receiver of the Stafford Springs National Bank, Conn., which suspended in October, 1887, made the final payment to the creditors on the 22d of October. He paid fifty per cent. in January last, twenty-five per cent. in March and the final dividend was twenty-five per cent., with interest in full. The result of the whole affair is that the creditors get their claims in full, with interest, and the stockholders lose about ninety per cent. of the bank's capital of \$200,000.

— The trouble in the Union Savings Bank of Fall River, Mass., has caused a good deal of annoyance to other similar institutions in that city. Since the first announcement of the difficulty the newspapers have spoken of the matter, for convenience, as "the Fall River Savings Bank" case, but it happens that there is another bank bearing exactly that name, and its officers have found it necessary to protest against the use of expressions likely to damage them and the other savings institutions.

— The Receiver of the defunct Vermont National Bank of St. Albans having secured judgment in the United States Court against certain banks of that State which declined to pay assessments upon them as stockholders, announces another dividend of 25 per cent. to be paid about November 1st. This will make an aggregate of 67½ per cent. paid thus far. The balance to be paid depositors depends upon the sale of Boston, Portland & Montreal first mortgage bonds owned by the bank, and it is hoped to realize enough therefrom to pay claims nearly in full.

National Safety Paper.—It is claimed that by using this paper absolute protection is guaranteed against loss by fraudulent alteration or erasion. No better evidence of its excellence can be furnished than that it is used and recommended by the leading banks, bankers, and corporations in New York city and, in fact, throughout the country. The expense of printing checks and drafts on this paper is but little more than on ordinary, plain paper. It is only necessary to fill up the paper with heavy, distinct writing, using ordinary black ink. After it becomes dry it is impossible to erase or alter it. It has been tested in the severest manner and, so far, there has not been a single instance of successful alteration. This paper is supplied in any quantity by Augustine Smith & Co., sole manufacturers, 110 and 112 Nassau street, New York.

OPEN LETTERS FROM BANKERS.

An Interchange of Opinion by the Journal's readers.

THE NATIONAL BANKS.

Editor Rhodes' Journal of Banking:

SIR:—I was pleased with the editorial article on the National Banking System, in your JOURNAL for September. As you well remark: "It cannot be denied, that, all things considered, the system of National banks is nearer financial perfection than anything ever before attempted in this or any other country." This proposition is so generally conceded that it is not necessary to dwell on it at any length.

In the same number of the JOURNAL, however, you comment on the fact, that there is a "recent remarkable increase of State banks in New York, and more especially in New York city." This is true, also, in regard to Pennsylvania, and it is, possibly, the case in other States. I observe you do not touch upon the causes which have induced this change, and I now propose to give some of the reasons which have, in my opinion, induced this change from a system that "is nearer perfection than anything ever before attempted in this or any other country."

In the first place, from the very inception of the National Banking system, it was viewed with a jealous eye by at least one of the great political parties of the country, and it has been made the subject of unkind criticism and unfriendly legislation by its members, as occasion offered, ever since. The system has always been taxed heavily, and it was one of the very last to be partially relieved of National taxation. It required years of effort to accomplish what has been removed, but there is still too much of it left to be satisfactory to the banks.

The tax on National bank circulation was originally designed to cover the expenses of its issue and redemption. Instead of confining this tax to that purpose, it has been, from the start, made a source of considerable revenue to the Government. The latest report, in my reach, is for the year 1886. In that year the National banks paid a tax on their circulation amounting to \$2,592,021. The entire expenses of the office of the Comptroller of the Currency for that year were only \$198,005. Our legislators have been worrying over the excessive surplus in the United States Treasury, and I cannot find any good reason why this tax should not be largely reduced and thus materially assist in that desirable work.

Another onerous tax is that involved in the amount of circulation allowed to the banks on bonds deposited with the Government as security. Only 90 per cent. of circulation is given to the banks on their bonds. This was the rate fixed when bonds were selling at par, and it has never been changed although bonds have been selling as high as 30 per cent. premium. Repeated efforts have been made by the banks to obtain the face of their bonds in circulation; but the old, unfriendly feeling still lingers around the Capitol, and it seems impossible for the banks to obtain any concession in that direction.

These are some of the reasons why capital is seeking to get out of the National Banking system in certain States. It has struck me that there was always an unfriendly feeling shown towards the National banks by those in power. State legislation, too, has not been favorable. The National banks are heavily taxed in Pennsylvania, whilst private bankers are allowed to evade the law almost entirely. They pay very little or no State tax, and not any to the general Government. It is no wonder, therefore, that very few new National banks are being organized in the old Eastern States. There is very little left that is desirable in a National bank charter beyond a possible *prestige* due to its origin and certain safeguards which may secure an additional degree of public favor and confidence from the people. This is now about all that prevents hundreds of National banks from throwing up their charters to-day. As it is, they have generally cut down their circulation to the lowest figures allowed by law; and they feel restive because they are laboring under many restrictions and penalties that are not imposed on State or private banks.

J. E. MCF.

MEADVILLE, Pa., Oct., 1888.

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

THE AMERICAN BANKERS' COLONY.—Another defaulting banker has left his home in Michigan to join the colony established by his countrymen in Canada. This time it is Charles W. Waldron, one of the proprietors and managers of the Waldron Bank of Hillsdale, Mich., and President of the Bank of Reading. Waldron, who is a married man with two children, left his wife and family behind him and came to Canada in company with Mrs. Bidwell, of Quincy. He took with him some of the assets of both banks, amounting to from \$60,000 to \$80,000. The other proprietors of these institutions are able to satisfy all depositors and are doing business as usual. The recent disclosures in connection with C. C. Nelson, the defaulting President of the North Side Savings Bank of Atlanta, Ga., in which a division of spoils was made between the representatives of the bank and the defaulter himself, by which the latter retained enough to live comfortably for the rest of his life, are not without their fruit. If our law respecting the bringing of stolen property into Canada, made solely for the protection of despoiled Americans, is to be set at defiance and made the machinery of dishonest compacts it would be better for Canada to retaliate by repealing it, as retaliation would seem to be the order of the day.—*Shareholder, Montreal.*

AMERICAN SILVER.—Moreton Frewen, the English bi-metallist and financial authority, who is now in Washington, discusses the silver question in a recent interview. He says: America's action in resuming and maintaining the coinage of silver has kept its price from falling to thirty pence an ounce. If the United States would coin it to the full limit allowed by law—\$4,000,000 a month—the value of the silver dollar would go to par, and its effect would be felt all over the world. India's commerce would be ruined if the silver rupee had depreciated much further.

It would never do to allow the banks, bondholders and creditor classes to dictate the financial policy of a country. They desire to have money scarce and dear, and would contract the currency of the world one-half by demonetizing silver if they could have their way. Certain great European houses have urged such a course in the past, and have fastened such a policy on several European countries to their vast detriment. Bi-metallism is the only safeguard against the proper money heresy.

The world's supply of gold is decreasing, and silver offers the only relief from a contraction of the world's currency. America has kept up the price of her export crops of cotton and wheat only by coining silver. Stop its coinage and both crops will fall in the markets of the world. The English government report on the silver question was published about the middle of October, and I want to see what is doing in America since then.—*Financial Critic, Phila.*

THE SAVINGS BANK SYSTEM.—A valuable and interesting paper on the development of the savings bank system in the United States was recently read by Mr. John D. Townsend before the American Social Science Association at Saratoga. The writer is enthusiastic as to the beneficent results both economically and morally of the savings bank system, and presents a strong argument for its extension as a method of insuring law and order, inculcating habits of economy and decreasing pauperism, with its attendant following of crime. Attention is called to the benefit to the community by encouraging in the poorer classes a disposition to save, thus establishing a feeling of self-respect and self-reliance which result in better citizenship, for there is nothing so conservative as the possession of property, and the man who has something to lose is far less likely to thirst for the overthrow of our institutions than one who has all to gain thereby. Mr. Townsend's compilation of statistics of savings banks is more complete and accurate than any before presented to the public. A discrepancy exists between his figures and those in the reports of the Comptroller of the Currency, arising from the fact that the latter includes returns of deposits

amounting to \$100,087,406 from a considerable number of institutions of which Mr. Townsend takes no account, as they are not savings banks in the strict sense of being benevolent organizations without capital, managed by trustees without salary and conducted exclusively in the interest of depositors, but he finds other sources of deposit, so that the difference between the two estimates is but \$33,441,035, the total of the Comptroller's report being \$1,235,736,000.

The assets of the 690 banks given in the statement reach a total of \$1,328,070,161,—\$450,000,000 of which is in mortgages and \$218,000,000 in Government bonds, \$73,300,000 in cash or demand loans, and the balance in State, county, municipal and railroad securities. The dividends paid the past year aggregate more than \$48,000,000. However wonderful the expansion of the system to the present day may have been, the field is yet very largely uncovered, and a further and rapid growth must continue. The deposits are generally greater per capita in the more densely populated communities and much larger in the manufacturing than in the agricultural sections, this being due to the fact that the accumulation of capital in the former is more rapid and the opportunities for individual investment not so large in proportion.—*Commercial Bulletin*, Boston.

MONEY IN THE MAILS—LOOSE BANKING METHODS.—The theft of a pouch containing \$10,000 in transit from Portland, Oregon, to New York city is one of the most remarkable instances of loose business methods on record. The United States Government assumes no risks for packages sent by registry through the mails, but only undertakes greater care of them and to send them in a manner which will render them more readily traced should any loss occur. On the other hand the Express Companies for a somewhat larger sum, actually assume all risks for packages committed to them. Yet notwithstanding this fact, which is perfectly well known to every bank official in the country as well as every man of business, the money was sent by mail. It is difficult to account in any way for this proceeding. Were there no other means of transportation than that afforded by the Post Office there would, of course, have been no other course to have chosen, but with responsible Express Companies at the door of every bank, the method of sending this particular \$10,000 to New York seems highly culpable.

Nor is this all. While the Post Office does not guarantee the delivery of any package committed to its care, there are insurance companies which make it their business to do so. By the payment of a small sum for this purpose, the bank could readily have protected itself against loss. The officers of the Chemical Bank write us that they do not know whether this package was insured or not, they themselves never sending money by mail. Two methods, therefore, were open to the bank at Portland, for transferring its funds to New York, which were both perfectly safe and sure, and which in no event would have rendered the bank liable to any loss. These were the facilities offered by the Express Companies and the insuring of the package through the mails. Unfortunately neither of these seem to have been selected, and instead of being sent as sound business ideas, or common sense would have suggested, the only unprotected way was adopted.—*Financial Critic*, Phila.

THE THRAPSTON BANK FAILURE.—With the failure of Eland's bank the last private bank in Northamptonshire has disappeared. Established in 1812, it had up to the present enjoyed the confidence and respect of the farmers and dealers in corn and cattle, as well as the bootmakers of Raunds and Higham Ferrers who banked with it; but in bidding for popularity it is to be feared that the partners have been too liberal in their advances without good and realisable securities—hence the present disaster. About twenty-five years ago, when the then senior partner died, so well was the bank esteemed by the county gentry that Mr. George Ward Hunt, M. P., of Wardenhoe, near Thrapston, who did so much for the agricultural interest during the cattle plague, proposed to join as partner. It was understood at the time that it was only through the disincarnation of Mr. George Eland, who became senior partner, to allow Mr. Hunt's name to stand first in the style of the firm, that the latter did not carry out his intention.

The authorized issue of the bank was £11,550, and in the height of its prosperity the trouble was to keep the issue down to the prescribed limits. People often brought in Bank of England notes to change for "Eland's baa-lams," as the notes were then

called, doubtless from the escutcheon on the left hand side of the note wherein was depicted a sheep branded "T. K." (Thrapston and Kettering). After Mr. George Eland died the business was carried on by his two sons, Robert Fowler Eland and Stephen Eaton Eland, without the importation of any new blood or strength, and the note issue gradually ran down to about £3,500 on an average, showing that confidence was waning, and that—at all events by some—the failure was not wholly unexpected. The bank was fought through troublous times, viz.: the frequent panics which occurred previous to the passing of the Bank Act of 1844. Messrs. Yorke & Co., bankers at Peterborough, Oundle and Thrapston, who failed about 1860, were by many confounded with the firm of Yorke & Eland (the then style of the present firm); but the latter came bravely out of the ordeal, as well as through the panic caused in 1866 by the failure of Messrs. Overend & Co., the great bill discounters of Lombard street, with whom Messrs. Eland had intimate connections. It is to be regretted, therefore, that a career of seventy-six years of prosperity and credit should end in a disaster like that which has now occurred.—*Financial News*, London.

BAD POLICY.—The inefficiency of bond purchases, as a means of disposing of the surplus, has been demonstrated conspicuously by the experience of the Treasury. Those who contended that redemption of the outstanding debt would dispose of any excess of revenue as safely and expeditiously as would a reduction of revenue have always been obliged to ignore the effect of this policy upon the market. They can do so no longer. When Mr. Fairchild began his purchases last Fall he set a price limit above which he would not accept propositions to sell. That limit was quickly reached. Whenever the Secretary accepted an offer at a given figure, the next offer was made on terms a little higher. No seller was so foolish as not to make the best bargain that he could. There was a steady rise in the prices of Government securities, and the Treasury met with constantly increasing unfavorable conditions as a consequence of its presence in the market on the bull side. With the assembling of Congress, bond purchases ceased, until the passage of a resolution explicitly authorizing the policy caused it to be resumed. Since that we have had a rather ludicrous illustration of its effect.

In the first place, the rise in bonds continued. For every purchase Mr. Fairchild had to pay a figure equal to as much as he refused to pay a few months ago. If he had not done so he could not have obtained a single bond. Then came a week in which the offerings were unexpectedly large. Over \$5,000,000 worth of bonds were accepted by the Secretary in one block at a handsome figure. Of course there was an immediate fluctuation in market price to correspond. If purchases were to proceed at this rate, the least experienced operator knew that Government bonds would soon become a scarce commodity at present prices, and up went the quotations. But, when the Secretary of the Treasury came to look for his \$5,000,000 purchase, it was not to be found. The firm whose name had been attached to the proposition to sell denied all knowledge of the transaction. It appeared that the whole thing was a clever swindle. Some daring and unscrupulous operator had forged the bond offering, knowing that it would affect the market accordingly, and had used that knowledge to make a good little deal in Government bonds on his own account. Mr. Fairchild was made his dupe. Now this is only one example of what can happen when the Treasury mixes itself up with Wall Street. If such a thing had occurred under some administrations the air would have been thick with charges of criminal collusion between the Secretary of the Treasury and the heavy brokers. Nobody believes, however, that Mr. Fairchild is anything worse than the victim of an ingenious piece of sharp practice. But it has been proved that the custom of Treasury purchases of bonds in open market both enhances their price and offers opportunity to just such fraudulent use of the Treasury's participation in the affairs of the street. The bond-buying policy is not only a makeshift, but it is a miserably poor one. The necessity for revenue reduction is made the plainer by this incident and the facts which it brings into clearer view.—*Pioneer Press*, St. Paul.

FARM MORTGAGE FIGURES.—The "American Wool Reporter" has recently been investigating the farm mortgage business in Kansas, and publishes a table showing the foreclosures by seventy-two investment companies in fifty-two counties of that

State—by counties and by companies. In these fifty-two counties there have been 607 foreclosures at the last term of court, representing six months' business. Several well-known companies are not represented in the list by a single foreclosure; quite a number of others have but one, and others but a small number. The companies having the largest number of foreclosures were the following:

J. B. Watkins Land Mortgage Company, 73; Kansas National Loan Company, 46; Jarvis-Conklin Mortgage Company, 46; Shupe, Treseley & Lark, 23; Western Farm Mortgage Company, 45; Crippen, Lawrence & Co., 23; Smedley Darlington, 22; S. L. Nelson, 23; Kansas & New Jersey Loan Company, 19; Pennsylvania Investment Company, 17; Neosho Valley Investment Company, 18; McKinley & Heliker Investment Company, 14; Lombard Investment Company, 14.

As the "Wool Reporter" points out, a comparison of the merits of the various companies, one with another, should give the amount of loans of each company, as well as the number of foreclosures. There is one point to be learned from this table which investors should not overlook. The great mass of the foreclosures are in the south central, or, rather, south central westerly portion of the State, chiefly between the Cimarron and Arkansas rivers. Kingman County, which has the very worst record, with 104 foreclosures, is in the second tier of counties from the southern border, between the two rivers named, and Clark County, with forty-seven such catastrophes, is on the Indian Territory line, well to the westward. There is reason to believe that this region has been settled in advance of its real fitness for cultivation without irrigation; the belt of equability of rainfall is moving slowly westward, but in southwestern Kansas the farmers often settle upon arid districts where the wind storms sometimes blow their seed out of the ground, and the surface of the ground along with it. There are but few counties in the eastern part of the State which are at all heavily represented in this list. Cherokee County, which has thirty-three foreclosures, is in the extreme southeastern corner, while Wyandotte County, with thirteen, contains the Kansas portion of Kansas City. The facts presented in the "Wool Reporter's" tables are not unfavorable to Western farm investments in general. The proportion of failures is, after all, but small. The "Wool Reporter" says:

"The formation of foreclosure companies to engage in the business of buying up these foreclosures is a matter which is now attracting the attention of the investing public. The plan of the foreclosure companies will be to assume the old mortgage or create a new one for the same period, and then to sell, as opportunity offers, any property thus acquired, and apply the profit to the payment of dividends." It is asserted that such property would have an average market value considerably in excess of the advances made.—*Boston Transcript*.

Failures and Suspensions.

Iowa—LOGAN.—Cadwell's Bank in this place, owned by Cadwell & Son, failed October 13th, owing some \$40,000 to depositors. The bank was established in 1874 with a capital of \$10,000. The failure is ascribed to bad investments.

Iowa—WOODBINE.—The Boyer Valley Bank closed its doors on the 11th of October, and a Receiver was appointed. The total deposits will not exceed \$50,000, but how much depositors will receive cannot yet be stated. The cause of the failure is attributed to speculation in land at prices too high for successful realization, and no dishonesty is charged. The bank was a branch of Cadwell's Bank at Logan.

Pennsylvania—PITTSBURG.—The Farmers & Mechanics' Bank failed October 12th. The announcement of the failure caused little excitement in financial circles. It was a small concern and the failure has no significance. The general ledger shows the amount due depositors was about \$103,000, while the individual ledger showed the amount due the depositors to be about \$319,000. There are many rumors afloat about the bank's losses. It is said that it has lost money by carrying the paper of a glass concern; that the failure of the Fidelity Bank of Cincinnati caused a heavy loss, and that it has \$65,000 of unimproved real estate in South Birmingham or an investment of half its capital in unavailable assets. The stockholders are individually liable, and the ultimate loss will probably not be large. Advices through our CONFIDENTIAL LETTER to subscribers indicated, for some months past, that the bank was in trouble, and was likely to be thrown out of the Clearing-House.

NEW BANKS, CHANGES IN OFFICERS, ETC.

NOTE.—We shall esteem it a favor if readers of the JOURNAL will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

MANITOBA.

PORTAGE LA PRAIRIE.—The Commercial Bank has opened a branch here; J. Pitblado, Manager. — The Imperial Bank has recently established a branch, N. G. Leslie, Manager.

Greenville, Miss.—Few cities, if any, in the South enjoy the financial standing universally accorded Greenville. Pointedly considered, it has no rival in the amount of banking capital in proportion to population. The Bank of Greenville has more capital than any two banks in the State, and is individually exceeded only by Memphis, Nashville, Chattanooga, Birmingham, Atlanta and New Orleans. The annual trade of Greenville of \$40,000,000 requires large capital, especially the handling of 60,000 bales of cotton. The Bank of Greenville dates back to 1839, when it was started in a small way on limited capital. Under the management of Mr. W. A. Pollock its business grew with the city until last July it was incorporated with a capital of \$250,000. Its territory covers the Greenville district and adjacent parts of Louisiana and Arkansas, and it has correspondents in every large city in the United States. The First National Bank was organized in 1882, under the name of Negus, Treys & Co., and later the Merchants' Bank, and last July became a National bank, with \$100,000 paid in capital. The officers are Jas. E. Negus, President, and Thomas Mount, Cashier. Its building is a large, handsome one, and the safe is one of the finest in the country, encased with railroad iron and fitted with time locks.

Fresh Paper Money in Russia.—A very important financial measure has just been made public in St. Petersburg, consisting of an Imperial ukase, dated July 20 last, granting power to the Minister of Finance to issue fresh paper money through the State Bank whenever it is actually necessary to increase the circulating medium; and in virtue of this decree an order of the Minister of Finance is announced for the issue of 15,000,000 more of paper rubles upon the guarantee of the same amount of gold at nominal value, to be delivered from the funds of the Treasury into the coffers of the Imperial Bank. The reason for this measure is the want of sufficient circulating currency, caused by the enormous and unprecedented grain export business of this year and the consequent unusual drain upon the resources of the State Bank. The new paper issue is altogether a temporary one, guaranteed by its actual metallic equivalent, to be conveyed to the bank by the Treasury in the presence of the usual official and commercial delegates, and it is to be destroyed gradually as the necessity for it disappears. The gold guarantee is also to be returned to the Treasury as the paper is withdrawn from circulation and burned. In order to allay any possible fear that the Government has changed, or intends to change, its avowed policy of gradually withdrawing and destroying the 266,000,000 rubles' worth of paper money issued without its gold equivalent during the last Turkish war, it is expressly stated that the present temporary inflation, which is to be regarded as a sign of commercial prosperity, will in no way affect the two decrees of 1881 and 1887 whereby the rest of the unguaranteed notes are to be gradually removed from circulation. The new issue is purely for commercial necessities.

THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, November 3, 1888.

During the first part of the month money was much unsettled with upward rates. The main cause of this was the corner in wheat in Chicago. The speculation in wheat pervaded not only Chicago but most all of the Western money centres and even as far East as New York. The banks felt called upon to strengthen themselves and consequently heavy drafts for currency were made on Eastern correspondents. For the week ending October 5, the New York banks shipped over 11 millions of gold and currency and only received about 13 hundred thousand. The Treasury bond purchase for the week was not sufficient to make up this great loss. It needs a Secretary with more boldness and sense of his great responsibility to the money market to properly meet such a situation. The sudden development of the wheat corner, the intense excitement that prevailed, the wide spreading effects on the money market, all indicate with what little notice trouble may suddenly come from a clear sky. The weekly see-saw between the drafts from the country and the supplies from the Treasury has continued without intermission, and shows what a narrow margin everything is now working on. It all depends on the Secretary of the Treasury. If he dares to accept bond offers enough to make good the drafts for currency and gold that have left the centres things remain as they were. This is too much responsibility to entrust to any one man. Not that he will use it to the advantage of himself and his friends, but because he must be more or less hampered by what he may consider political necessity. The banks of New York are more than ever important to the business world as it is by watching the ups and down of their surplus reserve that the Secretary seems to arrive at the amount of his bond purchases. During the first week in October the bonds offered aggregated \$26,488,800. The Secretary accepted \$4,607,650. During the second week in October the bonds offered for sale aggregated \$40,000,000 but the Secretary accepted less than twenty millions. During the third week \$11,810,100 were offered and \$3,750,500, all $4\frac{1}{2}$'s, were accepted. During the week ending October 27th \$6,090,200 were offered and \$2,547,800, all $4\frac{1}{2}$'s, were accepted. The prices ranged from 129-130 for fours and from 107-108 $\frac{1}{2}$ for $4\frac{1}{2}$'s. It has been asserted that the reason the Secretary did not buy any fours the last two weeks was because he was disconcerted at his own boldness in paying 130 for one of the last large lots he bought. It is also supposed that he has promised certain banks to take their bonds as soon as the monthly limit of \$3,000,000 will allow it. The banks during the month have loaned largely on call and the rates have as a rule been high. There has been an excellent demand for loans on good collateral and much foreign capital has come into the market. Both the election and the great influence wielded by the Treasury have had an effect to dampen any desire to branch out widely and banks and bankers are acting in a manner to protect themselves from any sudden changes in the market. The various political canards and pseudo excitements cause no changes. The financial public evidently believe that the financial policy of the Government will in the main be the same whichever party is successful. On the Stock Exchange dullness has been the rule. The principal dealings were in sixteen stocks. The list, with some exceptions, shows a prominent decline all along the line. Union Pacific advanced on the belief that it would begin to pay dividends. The greatest advance of the month was in Richmond Terminal.

FOREIGN EXCHANGE.—During the first week in October there was no more than an ordinary demand for sterling exchange, and the market

was dull all through. The rates were unsettled on account of the dullness, but the advance of the discount rate of the Bank of England from four to five per cent. caused a slight rise in short sterling. For the week ending October 13th there was little inquiry for sterling beyond the regular requirements of trade. There were more offerings of commercial and security bills and this, with the general dullness, made the market less strong. During the week ending October 20th there was a stronger market for sterling exchange, as there was fair inquiry from time to time. The supply of commercial and security bills was rather limited and this accounted in part for the rise in rates. For the week ending October 27th dullness was the rule. There was little or no demand and rates drooped. The general tenor of the market for the month has been dullness. On October 4th the Bank of England raised its rate of discount from four to five per cent. During the week ending on that day it lost £804,000 in specie, but gained during the next three weeks £681,000, the net loss for the month being £123,000. The Bank of France lost during the month 47,825,000 francs in gold and 2,725,000 francs in silver.

The following are the latest posted and actual rates of the principal dealers : Bankers' sterling, 60 days, nominal, \$4.85; sight, nominal, \$4.83½; 60 days, actual, \$4.84¼@ \$4.84½; sight, actual, \$4.87¼@ \$4.87½; Cable transfers, \$4.88@ \$4.88¼; Prime commercial sterling, long, \$4.83½@ \$4.83¾; Documentary sterling, 60 days, \$4.88@ \$4.88¼; Paris bankers', 60 days, 5.22½@ 5.21¾; sight, 5.18¾@ 5.18½; Paris, commercial, 60 days, 5.24¾@ 5.23¾; sight, 5.20½@ 5.20; Antwerp commercial, 60 days, 5.25½@ 5.25; Swiss bankers', 60 days, 5.23¼@ 5.22¾; sight, 5.19¾@ 5.18¾; Reichsmarks (4), bankers', 60 days, 95¼@ 95¼; sight, 95½@ 95¼; Reichsmarks (4), commercial, 60 days, 94¾@ 94¾; sight, 95¼@ 95¾; Guilders, bankers', 60 days, 40 1-16@ 40¼; sight, 40¼@ 40 5-16; Guilders, commercial, 60 days, 39 15-16@ 40; sight, 40¼@ 40 3-16; Copenhagen, Stockholm and Christiana, krona, 60 days, 26½@ 26 11-16; sight, 26¾@ 26 15-16. HOME MONEY MARKET.—The open market rates for call loans during the week ending October 6th, on stock and bond collaterals, ranged from 1½ to 5 per cent. with 7 per cent. an exceptional rate. This great variation in the rates was in a great measure due to the effect of the wheat corner in Chicago. Prime commercial paper was from 4¾ to 5½ per cent. During the week ending October 13th the open market rates for call loans on stock and bond

collaterals ranged from 2 to 5 per cent., and prime commercial paper from $4\frac{3}{4}$ to $5\frac{1}{2}$ per cent. During the week ending October 20th the open market rates for loans on bond and stock collaterals ranged from $1\frac{1}{2}$ to 3 per cent., and prime commercial paper was quoted at from $4\frac{3}{4}$ to $5\frac{1}{2}$ per cent. as during the two previous weeks. During the last week in October the open market rates on stock and bond collaterals ranged from $1\frac{1}{2}$ to $2\frac{1}{2}$ per cent., and prime commercial paper was quoted at from $4\frac{3}{4}$ to $5\frac{1}{2}$ per cent. The following are the latest rates of exchange on New York: Savannah, buying $\frac{1}{4}$ discount; selling par. Charleston, buying 3-16 $\frac{1}{8}$ discount; selling par. New Orleans commercial, \$1.25@\$.50 per \$1,000 discount; bank, par. St. Louis, 50c. per \$1,000 discount. Chicago, par.

NEW YORK BANKS.—During the week ending October 6th the combined gold and currency received from the interior by the New York banks was \$1,353,000, while in the same time they shipped \$11,102,000, losing \$9,744,000. The Treasury, however, came to their rescue, and the result of the operations with the Sub-Treasury was a gain to the banks of \$4,700,000, which reduced their loss for the week to \$5,044,000. During the week ending October 13th the banks received from the interior \$910,000 in gold and currency, and shipped \$7,100,000, experiencing a loss of \$6,190,000. By Sub-Treasury operations and exports of gold they gained \$8,000,000 in the same week, making a net gain for the week of \$1,810,000. During the week ending October 20th the banks received \$1,540,000 from the interior, and shipped \$4,970,000, losing \$3,430,000. In dealings with the Sub-Treasury they gained \$6,500,000, making a net gain for the week of \$3,070,000. During the week ending October 27th the banks received gold and currency from the interior amounting to \$1,890,000. They shipped \$3,202,000, losing \$1,312,000. By Sub-Treasury operations they made a further loss of \$500,000, the total loss for the week being \$1,812,000. From September 29th to October 27th the banks lost \$1,760,000 in currency and gold, as against a gain of \$650,000 in September, and a loss in August of \$9,707,000. The following table shows the condition of the New York Clearing-House banks for a number of weeks past:

1888.	Loans.	Specie.	Legal-tenders.	Deposits.	Circulation.	Surp. Res.
Nov. 3	\$394,410,900	\$70,063,100	\$28,114,000	\$417,787,400	\$6,365,800	\$13,730,250

National bank notes.....	230,385,237	4,187,954	226,217,283
Totals.....	\$1,979,698,287	\$571,826,619	\$1,407,871,668

The statement of the Comptroller of the Currency which, for a month or two past, has appeared in a new form shows the total amount of National bank notes outstanding not including \$183,987 of retired circulation of National gold banks, was, on October 31st, \$239,196,250, a decrease during the month of \$4,213,700, and for the year of \$32,605,024. During the month just closed there has been issued to new banks circulation amounting to \$103,570, and to banks increasing circulation \$202,820. There has been surrendered

and destroyed during the interval \$4,520,090. The amount outstanding protected by a deposit of United States bonds was \$152,866,328, a decrease of \$3,304,970 since September 29th, and of \$37,987,087 for the year. The amount of circulation secured by the deposit of lawful money was \$86,829,922, showing a reduction in this class of circulation of \$15,756,285 during the past year.

The following shows the amount of each description of bonds held by the Treasurer to secure National bank circulation on the dates indicated :

	Nov. 1, 1888.	Oct. 1, 1888.	Sept. 1, 1888.	Jan. 1, 1888.	Jan. 1, 1887.
Currency 6 per cents..	\$3,468,000	\$3,281,000	\$3,231,000	\$3,256,000	\$3,680,000
4½ per cents.....	66,121,750	67,528,800	68,620,300	68,956,050	59,636,200
4 per cents.....	100,413,600	102,432,950	104,620,050	112,102,400	113,903,200
3 per cents.....		37,500	37,500	131,500	52,218,950
Total.....	\$170,003,350	\$173,280,250	\$176,508,850	\$184,444,950	\$229,438,350

The Treasury Statement for the 1st of November shows that the Treasury net holdings were as follows: the holdings for the two previous months and for July 1, 1887, and January, 1, 1888, are also given.

U. S. Treasury Net holdings of.	July 1, 1887.	Jan'y 1, 1888.	Sept. 1, 1888.	Oct. 1, 1888.	Nov. 1, 1888.

* Stands for ex-Dividend.

The total number of shares sold during the month of October was 6,246,310 representing dealings in 134 different stocks. Of this number of shares 4,922,678, or over three-quarters, still continue to represent dealings in the following sixteen stocks:

Shares.	Shares.	Shares.	Shares.
Phil. & Read. 819,167	St. Paul..... 473,166	N. Pac. Pfd... 206,295	L. & Nash..... 73,785
Union Pac. ... 781,338	W. U. Tel.... 258,870	Del. L & W... 204,518	Texas Pac.... 47,650
N. Y. & N. E. ... 628,212	Mo. Pacific... 228,917	Lake Shore... 199,641	Can. South.... 40,596
R. & W. Pf. 587,494	C. & N. W. ... 225,826	Erie..... 116,508	N. Jer. Cen.... 30,665
2,816,211	1,186,779	726,982	192,726

leaving 1,333,632 shares to represent the dealings in the remaining 118 stocks. In addition, railroad bonds amounting to \$33,210,700 were sold, \$885,500 State bonds and \$920,400 Government bonds. Of unlisted securities were sold: Bonds, \$1,623,000; Stocks, 80,173 shares; mining stocks, 94,865 shares; American cotton oil certificates, 815,402; Pipe line certificates, 19,684,000 barrels. The listed stocks show a decrease of 810,498 shares as compared with the amount sold during September. Transactions in railroad bonds show an increase of \$5,398,400 during same period, also an increase of \$242,000 in State bonds and \$889,900 in Government bonds. In unlisted bonds an increase of \$1,123,000; stocks, 40,531 shares; mining stocks, 74,825 shares, also an increase of 212,751 in Cotton oil certificates and 528,000 in Pipe line certificates.

The stock market was dull during the month with a downward tendency in prices as a rule. The notable exceptions to this were Union Pacific, and Richmond Terminal. It was thought that the latter was in the hands of a syndicate. The rise in Union Pacific was on account of the belief that dividend paying would be resumed. The wheat corner in Chicago at the beginning of the month eclipsed all other speculation. Money has been higher during October than was anticipated. The same conditions that prevailed in October are likely to last through the greater part of November. Money will probably be comparatively close during the month. The Secretary of the Treasury, up to last Thursday afternoon, bought about \$1,800,000 of bonds.

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange. The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a *. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

WANTED—OFFICERS AND CLERKS, POSITIONS, BANKS FOR SALE, ETC.
 [Notices under this head—four lines or less—cost \$2 an insertion; over four lines, 50 cents a line. If replies are to be sent to this office the advertiser must send us two stamped envelopes addressed to himself, in which the replies will be forwarded.]

BANK INTEREST FOR SALE.—A \$10,000 interest, or the control, in a \$50,000 bank doing a healthy and growing business will be sold to a man competent and willing to take entire charge of the business. Reason, other demands on the time of present owner. Address "BANK INTEREST," in care RHODES' JOURNAL OF BANKING.

BANK STOCK FOR SALE.—\$1,000 to \$5,000 of choice Minnesota bank stock for sale at 107, although worth more. Dividends, 8 per cent. per annum, besides surplus. Address "MINNESOTA," care RHODES' JOURNAL, New York.

WANTED.—A young man, (33) with eight years' experience in a National bank in the State of New York, six years of which he filled the position of Assistant Cashier, wishes to engage in banking in some live city or town. Will invest some capital in new State or National bank where there is a good opportunity to build up a successful business. The advertiser is fully competent to fill the position of Cashier. Address: SETH A. RHODES, care of RHODES' JOURNAL OF BANKING, 78 William Street, N. Y.

BANKERS' OBITUARY RECORD.

Baker.—W. N. Baker, Cashier of the State Bank of Florida, and another one of the yellow fever victims, died at Jacksonville, Fla., October 1st.

Benedict.—Andrew C. Benedict, Vice-President of the Bowery Savings Bank, New York city, died recently at the advanced age of 87. He had been in the jewelry business for over fifty years, and was well-known in church and social circles.

Bosworth.—Charles M. Bosworth, President of the First National Bank, Wilmington, Ohio, died October 10. He was one of the leading and wealthiest citizens and prominently identified with the business interests of that town.

Bouve.—James H. Bouvé, President of the Boston National Bank, Boston, Mass., died October 27th, aged 59 years. He entered the bank as a messenger and successively filled the positions of Cashier, Vice-President and, for a number of years past, of President. He was known for his fairness, integrity and good judgment, and, until a few months ago he attended faithfully to his duties, and only relinquished them, as was supposed temporarily, on account of ill health.

Bruce.—Alexander Bruce died at Marseilles, Ill., October 21. He had been for many years President of the First National Bank, and was a Director at the time of his decease. He was an active citizen and prominently identified with the business interests of his locality as a contractor.

Butler.—Charles S. Butler, a prominent leather merchant, died in Boston, Mass., recently. He was a Director in the National Hide & Leather Bank, and also a Trustee of the Boston Five Cents' Savings Bank.

Campbell.—James Campbell, of Manchester, Conn., died recently in Europe, aged 78. He had been a Director of the United States Bank of Hartford, Conn., since its organization in 1872, and had been connected with the *Ætna* Life Insurance Company over thirty years, and was a large stockholder.

Cotton.—A. D. Cotton, Cashier of the People's Bank, Minneapolis, Minn., died September 24 at the age of 63. He formerly resided in Franklin, Pennsylvania, where he was Cashier of the First National Bank. The Directors of the People's Bank met and drew up a memorial, in which the highest possible tribute was paid to the deceased. Appropriate action was also taken by the Clearing-House Association.

Daniel.—Col. James J. Daniel, Vice-President of the State Bank of Florida, at Jacksonville, died October 2d.

Dohnert.—John H. Dohnert, widely known as the first President of the Northern Savings Fund, Safe Deposit & Trust Co., died in Philadelphia, September 16, aged 86.

Eaton.—Russell Eaton, the oldest journalist in Maine, died in Augusta, Sept. 28th, aged 87. He was President of the Kennebec Savings Bank for many years.

Evans.—Charles S. Evans died in Boston, Mass., October 19, aged 82 years. Although, at the time of his decease, only a messenger of the Market National Bank, he had been connected with that institution since its organization in 1834, as the old Market Bank. He was the oldest bank messenger in this country and one of the original stockholders of the bank of which he was afterwards the messenger.

Holden.—A. B. Holden, Cashier of the Bank of Honeoye Falls, N. Y., died October 7.

Jackson.—James L. Jackson died recently at Yonkers, N. Y. He was the founder of the Jackson Architectural Iron Works, and was a Director in the Oriental Bank and National Broadway Bank, New York city, and also in the Mechanics & Traders' Fire Insurance Company.

Lloyd.—John Lloyd, known as the oldest member of the Philadelphia Stock Exchange, died recently in that city, at the age of 90. He was, at one time, actively engaged in the hardware business.

Marvin.—Frank Marvin died at Jacksonville, Fla., October 9th. He was Cashier of the banking house of Ambler, Marvin & Stockton, and universally loved and respected. His death is one of the saddest incidents in connection with the yellow fever epidemic which has been scourging that section. He was only 24 years of age, but his reputation as a business man and one of integrity stood very high.

Rolston.—John H. Rolston, Cashier of the Bank of the State of New York, N. Y. city, died suddenly at his residence in Elizabeth, N. J., October 26th, aged 70 years. He had been ailing for some time, but able to attend to his duties as usual; and his sudden demise was altogether unexpected. He had been Cashier of the institution for more than twelve years and was well and favorably known by the business community. He was a brother of R. G. Rolston, President of the Farmers' Loan & Trust Company.

Rutter.—Joseph O. Rutter, late President of the Traders' Bank of Chicago, Ill., died October 4. He was also a member of the N. Y. Produce Exchange. It is thought that the unfortunate situation of affairs which resulted in the failure of the bank of which he was President, hastened his death.

Webb.—Josiah Webb, who was for twenty-five years a Director of the Blue Hill National Bank, Milton, Mass., died October 11th, aged 77. He was widely known as the manufacturer of Webb's chocolate.

Wood.—Geo. A. Wood, a prominent business man and Director in the Bennington County National Bank, died recently at Bennington, Vt., at the age of 60.

RHODES'

JOURNAL OF BANKING.

Vol. XV. DECEMBER, 1888. No. 12.

THE Secretary of the Treasury has construed all the laws which have affected the reduction of the debt of the United States since the optional bonds were called in a manner most unfavorable to the Government. What was the situation? There was a large unpaid debt, drawing a rate higher than that warranted by the borrowing power of the Government. There was a large amount of surplus money in the Treasury available for any financial operation which would reduce the burden of debt. There were a number of laws and precedents that might have served as giving the Secretary sufficient authority to act efficiently. It is not now necessary to speak of what might have been done in the way of refunding the debt at lower rates of interest, in which, with even more brilliant opportunities, the Secretary might have followed in the line indicated by the action of Secretary Windom in 1881, when he reduced the six and five per cent. bonds to three and a-half per cent. To do this it may have required some financial genius, as distinguished from the mere financial talent which the Secretary is allowed to possess. But why, when he had the full authority given by the Act of March 3, 1881, to reduce the debt by the purchase of bonds, he did not avail himself of it, has puzzled all who gave the subject a thought. He construed that law as not meaning what it distinctly said, and what Congress, to whom he appealed to sustain his construction, afterwards said it said. Why should not the Government take advantage of laws intended for its own benefit? The debt was there, the surplus money was there, the law was there. But the Secretary instead of acting, decided that he must construe the law adversely to the interests of the Government he had sworn to sustain. What he did not do at first Congress told him he must do. What he has done is now ancient history, hardly worth adverting to but for a new manifestation of the same recalcitration, of the same disposition to find reasons for not acting when the law requires him to act. The class of bondholders most willing to surrender their bonds at the present time are the National banks. Many of them finding no profit in circulation, wish to retire their circulation and reduce their bonds

to the minimum amount required by law. They would make large offers to the Secretary in response to his bond purchase circulars were it not for a law which has been as wrongfully misconstrued by the Secretary as was the law of March 3, 1881. This new misconception is of a provision in the Act of July 12, 1882. It is in Section 9 of that Act and is that the National banks taken together shall not deposit more than \$3,000,000 in lawful money, to retire circulation in any one calendar month. This restricts the amount of bonds which may be offered for sale by the banks in any one month to about \$3,400,000. At the time this law was passed there was an absurd fear that the banks might desire or conspire to get revenge on some one, or to ruin the country, and retire all their circulation at once, and by depositing lawful money in the Treasury, cause a serious contraction of the currency. Senator Beck was more imbued with this idea than any one else, and he secured the insertion of the restrictive provision in the bill. In 1882 the Government was calling the three per cent. bonds that were chiefly held by the banks. Therefore, in order to prevent this \$3,000,000 restriction from defeating the Government in calling its own bonds, another proviso was added, that the restriction should not apply to the called three per cents held by the banks. That is, the banks could deposit lawful money to any extent when they were called upon to surrender three per cent. bonds. In spirit, therefore, the restriction to a deposit of \$3,000,000 per month was not to apply when the Government wanted the bonds. The Government now wants to cancel the bonds held by the banks by purchase. In 1882 it wanted to cancel the bonds held by the banks by redemption. The \$3,000,000 restriction did not apply to the cancellation by redemption. Why should it to cancellation by purchase? The Government has the same control over the amount purchased as over the amount called. The \$3,000,000 limit was only intended to apply to voluntary surrender by the banks over which the Government had no control. It was not intended to thwart the wants of the Government itself. Yet the Secretary rules against himself. Why is it? Is he indignant that Congress made him buy bonds when he did not want to?

CIVIL SERVICE REFORM, so called, is practically an attempt to introduce a system of examinations to determine the fitness of candidates for subordinate positions under the Government. It is an attempt to domicile in the United States a system that at one time served a purpose in England but which has to a certain extent become antiquated there. The most recent expressions in that country in regard to the usefulness of competitive examinations as a means of determining fitness for office have been unfavorable. The examination business has in many respects proved a failure for the purpose for which it was intended and has done injury to the whole educational system of the country. When, in England, the cry of reform of the

civil service was first raised, the subordinate official positions and Government clerkships had from time immemorial been considered the perquisites of the privileged classes and were filled, as a rule, from those classes. There is nothing to show that there was not fitness and efficiency on the part of the appointees to the extent usual at that period. The adoption of the system of examination threw down the barriers and opened the doors to all classes alike. By the new plan any one, whatever his rank or position in society, was given a chance to compete for the offices. Tests of educational fitness were the more necessary at that day in England for education was not universal as it is in the United States. Here, however, there has never been a time since the foundation of the Government when any citizen has been ineligible to obtain office, either elective or by appointment. The introduction of civil service examinations here was really a slur on the plan of universal education which has been so carefully fostered by our institutions. The spirit of republican form of government contemplates frequent changes in office at the will of the people as the best method of preserving pure administration. In addition to this there is the hope held out that good conduct in office may secure re-election. Where offices are filled by appointment the appointments are made by officers who hold their places by election. To append to this constitutional method one by which elected officers are hampered and checked in the discharge of their duties to themselves and the public in making appointments is a contradiction and an absurdity.

SOME TIME AGO, immediately after the failure of the Fidelity National Bank of Cincinnati, the JOURNAL animadverted on the error made by the Comptroller of the Currency in permitting the charter of that corporation to be declared forfeited. The object of so doing was to dissolve certain attachments that had been made by certain creditors of the Fidelity National, of outlying assets of the bank found in New York and, perhaps, other places. The Bank of Montreal was one of the creditors that attached certain property of the insolvent Cincinnati institution in New York city. The Receiver made a motion in the New York Supreme Court to dissolve the attachment, on the ground that since the granting of the attachment the corporate existence of the Fidelity National Bank had been dissolved by the Federal Court. The New York court decided against the Receiver, and he appealed to the General Term. The General Term held that the dissolution of the corporate existence of the Fidelity National Bank was no ground for vacating the attachment. On other grounds the court did declare the attachment vacated. This of course shows only the uselessness of causing the forfeiture of the charter to be made, inasmuch as such forfeiture did not answer the purpose for which it was intended, but the legal difficulties that will result in winding up the affairs of the bank have not yet been fully

encountered, but they will be when the suits against stockholders and Directors come more fully before the courts. It takes years to settle the litigation growing out of the failure of such a bank as the Fidelity National, and at some future time, how distant no man can tell, that forfeiture of charter will turn up to plague those who are then endeavoring to liquidate the still remaining assets of the Fidelity National Bank.

THE REPORT OF THE TREASURER of the United States contains as usual interesting information as to the changes in the circulating medium and the financial operations of the Government. The report of this officer always covers the fiscal year, that is from July 1st of one year to July 1st of the next, and the present report is for the period from June 30, 1887, to July 1, 1888. The revenues of the Government were \$379,266,074, and the expenditures \$267,924,801, the surplus receipts being \$111,341,273, an increase of \$7,870,175 over that of the previous fiscal year. The Treasury balance during the year has, however, increased from \$69,224,379 to \$129,804,242. It is evident from the report that the issue of coin certificates, both gold and silver, is having an effect in diminishing the use of legal-tender notes. Not but that, nominally, the legal amount of the latter fixed by the Act of May 31, 1878, is still outstanding, but a larger portion of this sum remains on deposit in the Treasury. The denominations less than ten dollars are being supplanted by silver certificates and those over one hundred dollars by gold certificates. If this process goes on all the legal-tender notes may at no distant day be in the Treasury, where they may be conveniently cancelled by Act of Congress without affecting the circulation of the country. At the end of the year \$142,023,150 in gold certificates were outstanding. The amount of silver certificates issued during the year was \$105,896,000, and these were mostly in denominations of ten dollars and under. The total amount outstanding June 30, 1888, was \$229,491,772. The Treasurer has had great difficulty in meeting the demand for the one and two dollar silver certificates. This was due to the inefficiency of the Bureau of Engraving and Printing to do all the work necessary to meet the wants of the public. The Treasurer does not say this, but he says "it had been impossible to meet the demand for the denominations of one and two dollars and in consequence their issue was suspended between October 18, 1887, and February 3, 1888." This was the busy season of the year. If the private bank-note companies could have been given some of this surplus work the public would have been saved the expense of carting silver dollars back and forth and an important branch of American industry sustained. Over \$9,000,000 of these dollars were thrown into circulation because the notes could not be had, and when the Bureau of Engraving and Printing again caught up, they were returned for notes. The

Treasurer intimates that there are enough silver dollars coined now to meet the demand for redemption of silver certificates and that if purchases of silver are to be continued the metal should be piled up in the Treasury in the form of heavy bars or ingots. This proposition is similar to one made by Comptroller of the Currency Cannon in his report for 1885. It would save the expense of minting the dollars and in case of any change of the relation between gold and silver by international agreement would be a preparation to carry such change into effect. The fund for retiring National bank notes was largely reduced during the year. The notes retired by the banks by the deposit of lawful money, principally gold, have been redeemed by the Government in silver certificates and Treasury checks. This has had the effect of sustaining the gold holdings of the Treasury. The whole tenor of the report indicates that the silver certificates are gradually but surely supplanting every other form of circulating medium in the hands of the public. This view is further borne out by the fact that since June 30th, to November 1, 1888, silver certificates in circulation have increased from 229 millions on June 30th to 299 millions on November 1st. Gold certificates outstanding on November first were some two millions less than on June 30th. The Treasury gold has been well sustained because the Government pays silver and receives gold. The convenience of the silver certificate and the contraction of the National bank currency by the payment of the debt, are both working to sustain the gold reserve in the Treasury and will continue to do so until paper redeemable in silver predominates paper payable in gold. The Treasurer's report is a clear statement of the changes in the Government cash and of the circulating medium of the country.

SPECIAL ATTENTION IS CALLED to the Index with the present number of the JOURNAL, which completes Volume XV. Each department has its special place in the index, and we think that our subscribers will find much that will interest them by glancing it over. It has been said that a perfect index was never made, but the same has been said in regard to books. No book was ever printed absolutely free from typographical errors, and no index was ever made that would absolutely suit every one who might be looking in search of some particular item in the book to which the index belonged. When information is looked for, it is recalled to the mind of the searcher by some association of ideas, which may bring up some phase of the subject that never could be foretold by the indexer. This it is that renders it impossible to make the index as full as the book, or the ideas suggested by the book. A good index should interest the reader in the work it gives the clue to. In looking it over the reader may be attracted by this or that subject, and the shorter view thus taken of the contents may excite an interest that the book alone would fail to do. The portion relating

to banking law has been made very full and complete, as has that relating to the events of the year. A banking journal taken for a year, and bound at the end of the year, becomes after its current value as a monitor of important financial events has departed, a record that becomes even more valuable as time goes on. The fifteen volumes of RHODES' JOURNAL OF BANKING are in epitome the financial history of the last fifteen years. In the editorial comments and in the news department are to be found the side history that is of so much importance in understanding the financial legislation of the country, and the management of the banks and financial institutions. The law department contains the growth of the case law that is so important to be acquainted with to understand what to do and what to avoid in every-day banking. We also call attention to the information on practical banking, which has been a special feature of the JOURNAL; to the new banks, and changes in the organization and names of old ones; to the money articles and stock tables, and to the mortuary record of the members of the banking fraternity for the year. All of these departments of the index will be well worth glancing over, as calling to mind reminiscences and fixing facts and dates.

ONE OF OUR EXCHANGES, in commenting on a table showing the reserves of the National banks on October 4, 1888, prepared in the office of the Comptroller of the Currency, remarks that the showing is "one of the clearest indications yet given of the operations of the new reserve city law, and gives evidence of the increasing independence of interior cities." Whether the law has had any effect or not in altering the course of deposits or of exchange is extremely doubtful, but it is a common fallacy to ascribe to the operation of a law events which occur subsequent to its passage without regard to their real derivation from it. The exchange from which we quote remarks further, that "the money holdings throughout the West were doubtless much larger than ever before at a corresponding date, and had it not been that the crops were unprecedentedly large, these cities would have required less currency from the money centres of the East than during prior years." This assumes that the effect of the law mentioned is to strengthen cash holdings in Western banks so that in the fall there is less drawing on the East. This fall, it tacitly admits, there *has* been drawing from the East, but ascribes it to the excessive crops. Again it is questionable whether the crops have been excessive. It is well known the wheat crop has been less than usual. But admitting larger crops, the amount of circulating medium is also larger this year than last. However, notwithstanding the law, it is admitted that this year the Eastern cities have been heavily drawn on, and whether admitted or not it is the fact. The law contains two principal provisions, one permitting banks in cities of certain population to become reserve banks keeping

half their reserve in cash, and the other permitting banks in certain other cities to become reserve banks keeping their total reserve in cash, in like manner as the New York banks. Chicago and St. Louis National banks took advantage of the latter provision of law, and these two cities with New York are the three central reserve cities of the country. That is, all National banks outside, whether in reserve cities of the second class or elsewhere, may have deposits with National banks in either or any of these three cities counted as a part of their required reserve. If the deposits of the banks in the two new central reserve cities show any extraordinary increase over what might have been expected from the natural growth of business, then the law may have had some effect in increasing their deposits. If the deposits in these two cities show any undue growth as compared with those in New York banks then it would indicate some power in the law to divert deposits from New York.

Now what are the facts? On October 7, 1886, before the passage of the Act of March 3, 1887, the National banks of New York city had net deposits amounting to \$282,790,246. On October 4, 1888, the New York city National banks had net deposits amounting to \$342,159,954, an increase of about 21 per cent. The Chicago National banks on October 7, 1886, had net deposits amounting to \$62,860,827, and on October 4, 1888, to \$69,331,024, an increase of about 10 per cent. The St. Louis National banks on October 7, 1886, had net deposits amounting to \$10,359,416, and on October 4, 1888, to \$7,881,231, a decrease of more than 20 per cent. These figures are from the reports of the Comptroller of the Currency. How any one who examines the Comptroller's reports can say that the law of March 3, 1887, has had any effect in attracting deposits, is past finding out. But let us see as to reserve held. New York banks in October, 1886, held a cash reserve of 27.24 per cent., and in October, 1888, of 28.16 per cent. In October, 1886, Chicago banks held a total reserve of 32.33 per cent., of which over 21 per cent. was cash. In October, 1888, the Chicago banks held a total reserve of 30.24, all of which was cash. The actual cash reserve held by Chicago National banks in October, 1886, was \$13,522,180, as against \$20,962,421 in 1888, an increase in cash at home of \$7,440,241. In October, 1886, the St. Louis banks held a total reserve of 35.01 per cent., of which 21 per cent., was cash. In October, 1888, St. Louis banks held a cash reserve of 27.07 per cent. The actual cash reserve held in St. Louis in October, 1886, was \$2,222,790, and in October, 1888, \$2,133,376, a decrease in cash reserve held under the new law of \$89,414. The result is a somewhat larger cash reserve in Chicago and a smaller cash reserve in St. Louis. There are no startling differences, and there is nothing to show that the accounts kept by Chicago and St. Louis National banks in New York city National banks are not as large as ever. If the law has had any effect at all, it is to compel the Chicago and St. Louis National banks to keep cash

reserves entirely disproportionate to the amount required by safety or by the business of those places. This law from the beginning has been a bull against the comet, neither effectual on the one hand or dangerous on the other. The West prospers as much with it as without it, and New York still continues the place to which the reserves of the country will flow when they cannot be used at home.

THE REPORT OF THE COMMISSION appointed by the English Parliament to report on the silver question is rather favorable to some international agreement settling a permanent relation between gold and silver. It seems to be agreed by experts that, if any permanent relation between the values of the two metals can be artificially established, it must be done by the common consent of mankind and that the only practical way of securing this is by agreement among the principal commercial nations. The only bar to the successful settlement of the question has heretofore been the unwillingness of England to enter into any agreement by which her present gold standard would be changed. Germany would not consent to definite action without England, and so the matter has hung since the last international Congress. Now the outlook is favorable for England's consent although, of course, the report of the commission has yet to be acted on by Parliament. Assuming that the action of England will be favorable to another international Congress, an interesting question then arises as to the attitude that will be taken by the United States. Delegates to the Congress being sent, what position will they take as to the relation most profitable and expedient to be established. The relation adopted by the Latin Union is 15.5 to one, and this the bi-metallists of Europe have always insisted upon. The relation established by the coinage of the silver dollar is 16 to 1, and the relation in the bullion market is about 24 to 1. It is believed that this latter relation is abnormal and the result of the demonetization of silver. If the theory be correct that the determination of a relation by an international agreement will be a permanent settlement of the question, the proportion selected will depend very much on questions of policy. The Latin Union, having already a large number of five-franc pieces coined at a relation of 15.5 to one will perhaps insist on the adoption of that proportion, while the United States, having a large number of silver dollars coined at a relation of 16 to 1, will perhaps insist on the latter relation. Assuming for illustration that the relation of 15.5 to 1 is adopted by the international Congress, it is interesting to enquire what will be the effect on the silver dollars now in circulation in this country, either as such or in the form of certificates. If the mints of the world are thrown open to the free coinage of silver at the relation agreed upon, as they must be to fully carry out the theory of the bi-metallists, the result will depend very much on whether the free coinage begins immediately or is delayed until each country has

effected some adjustment of its own silver coinage to the new relation. If, as has been assumed, 15.5 to 1 be adopted, the existing coinage of the Latin Union will be consistent with it, but as there may be quantities of silver in the form of plate, etc., that individuals may wish to send to the mint to be coined, it may be readily seen that even in a country where the legal relation corresponds with that adopted by the Congress, there might be hesitation about throwing open the mints too suddenly. In the United States, however, the silver dollar would be undervalued, and the holders of certificates or dollars would be anxious to secure the advantage given by the newly established rule; and if free coinage were allowed immediately after the new relation is agreed upon, there would be an immediate contraction of the silver coinage until it was recoined. If free coinage were delayed for a time the Government might agree to redeem in gold such silver certificates as were presented pending the recoinage of the silver dollars on deposit in the Treasury and thus realize the difference between the new and the old valuation of the mass of silver held by it. The gain of this difference would go far toward wiping out the National debt. Truly in these times there are wonderful chances for the public financier—especially when he calculates for a Government with a large stock of silver. Let the nations all join to bull silver.

NOW THAT WITHIN A FEW MONTHS there will be a change of public administration, it seems fitting to say a word as to the management of the Treasury for the last four years. The banks of the country have little reason to find fault with the policy adopted in 1885. One reason of this is the fact that a man with real financial ability has been permitted to advise to a large extent the course to be pursued by the Treasury Department. That the financial success of the past four years has not been greater, is because the advice of ex-Treasurer Jordan has not been followed to a greater extent. It is customary to give to Daniel Manning the credit of whatever success may have followed the management of the National finances, but the praise really due to him is that he listened to, and to some extent followed, the advice of Mr. Jordan. In 1884 and 1885 the silver question had become one of the greatest importance. Daily the proportion of the silver to the gold was growing greater, and at critical times, when the exportation of gold was assuming large proportions, the Treasury was put to it to maintain its gold reserves and trust funds. In July, 1884, Secretary Folger had been in something of a quandary to maintain gold payments, and there was a recurrence of the same difficulty in the summer of 1885. How to strengthen the gold balance and utilize the silver was the problem. Mr. Jordan was the confidential adviser of the Secretary long before his appointment as Treasurer. He was studying into methods and laying out the necessary plans. The three per cent. bonds subject

to call were then largely held by the banks. They were payable in gold, and to have continued calling them would have depleted further the gold balance. It was boldly announced that no further calls would be made, and that the \$100,000,000 gold reserve on legal-tender notes would be maintained. This at once inspired confidence in financial quarters. The stoppage of bond calls stopped the rapid retirement of the National bank currency, and allowed the gold from customs to accumulate. In the meantime the silver coinage necessarily went on, but it was restricted to the minimum. To show how close was the Treasury to silver payments when the calling of bonds ceased, it is only necessary to point out that in the summer of 1885, Mr. Jordan, on behalf of the Treasury Department, secured a loan of ten millions of gold from the New York banks to continue gold payments without trenching on gold reserves and trust funds. This critical time passed, the full benefit of the policy began to be felt, gold began to flow in, but this flow was soon increased by Mr. Jordan's treatment of the silver question. The National banks had a large fund in the Treasury to redeem their retired notes when presented. This was a gold fund, or principally so, because the largest part of the lawful money deposited was either legal-tender notes or gold, or it was the proceeds of bonds payable in gold redeemed by the Government. The National bank notes when presented for redemption were paid in silver certificates, these being as acceptable to the public for immediate use as any other form of paper money, sustained as they were on the gold basis by the strong gold reserve policy of the Treasury, advised by Mr. Jordan. The Act authorizing silver certificates of small denominations, five's, two's and one's, gave a great impetus to the demand for silver certificates, especially as the one's and two's of the legal-tender notes were retired. The retirement of National bank currency going on more and more rapidly, strengthened the gold reserve, while the redemption of the notes afforded an outlet for silver. When all this was well in train, the Treasury could again reduce the debt with safety, and began and continued to call the three per cents until all were redeemed. With the gold reserve firmly established by the course previously pursued, every bond surrendered by the banks—and most of the three's were held by the banks—still further strengthened the gold reserve and put the silver in circulation. This policy if followed out would have also kept down the surplus; but since the three's were redeemed, Secretary Fairchild seems to have departed from it. By throwing obstacles in the way of bond purchases from the banks, the Secretary has changed the policy which has given so much strength to the Treasury. Notwithstanding the success due to Mr. Jordan in maintaining the gold reserve during the last four years, the opportunity to refund the four per cents at a lower rate of interest has been neglected.

DANGER AHEAD.**A VETERAN FINANCIER'S VIEWS.**

Inasmuch as it is evident that in the event of panic or of any sudden financial emergency, silver dollars and silver dollar certificates will be the only available currency, it is vitally interesting to form as correct an idea as possible of what this condition of exclusive dependence on silver will mean to the country. Those who have seen and studied financial panics, here and in Europe for more than fifty years, know that they come without warning. They are due to many causes—war in Europe was never more imminent than at present, and its breaking out would undoubtedly collapse the mono-metallic gold specie basis there and here, and bring the United States to the silver dollar as its standard of value. A similar result might follow any impairment of confidence in our banks, trust companies or savings banks, and who can say that some catastrophe like that which in 1857 was ushered in by the failure of the Ohio Loan & Trust Company or that which followed the failure of Jay Cooke & Co. in 1873, or that which in 1874 commenced with the failures of Grant & Ward, the Marine and Metropolitan National banks—may not now be imminent, or can tell how far reaching may be the results.

Studying our money condition I find the situation this: Gold is the centre piece or bulls eye; greenbacks—legal-tender notes—are convertible into gold on presentation at the Sub-Treasury. National bank notes can also be converted into gold by sending them to Washington for redemption. Silver certificates can be used to draw gold by asking importers to use them in payment of duties. Deposits in banks, trust companies and savings banks are payable in gold or money convertible into gold. A sudden call for the liquidation of these immense demand debts of the Government and the banks would bring to light the terrible weakness of the gold basis, on which they all rest. What increases the danger of the situation is the fact that the trust companies and savings banks, though paying to a very large extent their deposits without notice, keep no reserves of their own. The cash reserves of the commercial banks have to stand not only for the protection of their own deposits but for those of the trust companies and savings banks. So long as confidence is unimpaired the financial situation is secure, but with so narrow a metallic basis as gold alone affords, there is always danger of disaster. The system is evenly balanced, and like a humming top seems to move safely and harmoniously. But a little less speed, a little less force, a little falling off in the strength of credit, a decrease in deposits, a calling in of loans, and the fabric will begin to waver and be in danger of toppling on its side. This is financial panic. With this condition of things gold will cease to be the standard and the silver legal-tender dollar will take its place. What then? This is a financial question to be met at no distant day. If gold goes to a premium under pressure from one of the sources indicated, or on account of pressure from some unexpected concatenation of circumstances, as

it is very likely to do, in view of the very narrow basis upon which the enormous gold credits of the world and especially those of the United States rest, both the legal-tender notes and the National bank notes, being payable in gold, will disappear from circulation. The gold certificates will do likewise, and the whole business of the country will remain dependent upon the silver dollars and silver certificates.

A statement furnished by the Treasury shows that on November 1st the gold circulation of the United States, including under this head gold coin, gold certificates, legal-tender notes, and National bank notes, was \$1,065,715,454, while the silver circulation, including subsidiary silver, was but \$342,156,214. The disappearance of the gold circulating medium and the necessity of depending on the silver would be contraction with a vengeance. How near we are to just such a precipice as this has already been pointed out. The causes which may disturb the statu quo on which financial safety now depends are multifarious. One or two dangerous contingencies have been mentioned. But a condition of things where slight causes, rumors of war abroad, or loss of confidence in some one of our great financial institutions, may pull down in a moment the whole fabric of credit is not pleasant to contemplate. We do not face a "theory but a condition."

The English royal commission on the silver question have recently reported to Parliament, six in favor of and six against silver coinage. The argument of the gold mono-metallic six is a plea in behalf of the creditor class, and that of the gold and silver bi-metallic six is a plea in behalf of the debtor class. It is an interesting contest between the aristocratic income receivers on the one side, and the laboring, enterprising, mercantile and manufacturing classes on the other. The price of silver has recently shown a tendency to rise. Edward Atkinson has recently pointed out that the surplus stock of silver resulting from its demonetization by Germany has been more than absorbed, and that the least extraordinary demand at once enhances the price. Moreover, there is danger that the commercial western nations will not be alone in their position as the greatest absorbers of the gold product. India, heretofore looked upon as the great market for silver, is increasing in wealth and enterprise, and is now, in addition to her demand for silver, developing a rapidly increasing demand for gold. The reasons for the free employment of both the precious metals as money are, therefore, becoming more numerous and cogent, and the objections to such use more feeble. For, while the rapidly growing business interest of the West requires a broader metallic foundation, the East by her new demand for gold, is narrowing the single gold basis which many have thought sufficient.

In view of the prominent dangers of our present financial system, and the changes favorable to bi-metallism that are taking place in the relation of the precious metals, I appeal to Congress to take such action as will enable the country to prepare itself for the sudden crisis which, I believe, to be only too imminent. I see one way by which this condition may be bettered for this country, and that is a more liberal coinage of silver with a more ample volume of silver certificates; let Congress increase the monthly limit of coinage of the silver dollar, or at least order the Secretary to coin the full amount of the present maximum, viz.: \$4,000,000 per month. This will be in accordance with the views of the two great parties, Republican and Democratic,

as expressed in their platforms. The following extracts from important documents bearing upon the question are appended. JOHN THOMPSON.

Extract from Act of February 28, 1878, authorizing the coinage of the standard silver dollar :

"And the Secretary of the Treasury is authorized and directed to purchase from time to time silver bullion at the market price thereof, not less than two million dollars worth per month, nor more than four million dollars worth per month, and cause the same to be coined monthly as fast as so purchased, into such dollars," etc., etc.

Extracts from the platforms of the two great parties. Position of each on the silver question :

REPUBLICAN PARTY (Platform of 1868.)

"The Republican party is in favor of the use of both gold and silver as money, and condemns the policy of the Democratic administration in its efforts to demonetize silver."

DEMOCRATIC PARTY (Platform of 1868.)

"We believe in honest money, the gold and silver coinage of the Constitution, and a circulating medium convertible into such money without loss."

Extracts from Dr. Soetbeer's pamphlet : "*Materials toward the elucidation of the economic conditions affecting the precious Metals.*" Translated and published in "Bi-metallism in Europe," page 523. December, 1887. Government Printing Office, under direction of Department of State. Showing demand for gold in India :

"The natives are careful watchers of the bullion market, and have not failed to note that in recent times the value of silver at the bazaars has become less as compared with gold. Ornaments and hoards of silver are therefore less highly prized than in former years. In India, as elsewhere, gold is taking the place of silver." p. 521. After quoting in a note a number of private letters showing the increased demand for gold in India, Dr. Soetbeer says : "Private letters, such as these, sent me from India by Germans who have no interest in distorting facts one way or another, may serve to explain that large import of gold into India which astonishes so many observers and seems to be a phenomenon of no temporary duration."

Extract from the London "Economist" of Nov. 17th, 1888, under head of Money Market :

"Still, however conservative we may be, the fact remains that when big financial operations are in progress the Bank of England, as the repository of the only really open stock of gold, is always exposed to the risk of having heavy demands made upon it, and now, when it has to face this risk with a stock of less than £19,000,000 the position is evidently worse than unsatisfactory—it is precarious."

History of the Fractional Currency.—General Francis E. Spinner, formerly United States Treasurer, gives in a letter to a bank officer the history of the fractional currency during the war of the rebellion. He says: "When all the silver had been paid out of the Treasury of the United States early in 1862, I procured from the post office department quantities of postage stamps for the purpose of making change; to facilitate the making of change, I had the stamps pasted on slips of paper so as to make twenty-five and fifty cents. This was done after agreement with Hon. Montgomery Blair, the then Postmaster General, that he would redeem them in that condition, in postage stamps. It was soon found that this mode of procedure was impracticable. I then persuaded the Postmaster General to procure the engraving and printing of fac-similes of the postal, compound postage stamps. These the Treasury bought from the Postmaster General under an agreement that the post office department would redeem them. This was what was called "postal currency." It was made redeemable in postage stamps only. Afterwards a law was passed for the printing of a currency which would represent the fractions of the dollar. These notes were called fractional currency."

NATIONAL FINANCES.

The second session of the Fiftieth Congress of the United States convened at Washington on Monday, December 8d. President Cleveland in his annual Message refers to the purchase of bonds by the Government, and the silver coinage question, as follows :

EFFECT OF RECENT BOND PURCHASES.

The requirements of the Sinking Fund Act have been met for the year ended June 30, 1888, and for the current year also, by the purchase of bonds. After complying with this law as positively required, and bonds sufficient for that purpose had been bought at a premium, it was not deemed prudent to further expend the surplus in such purchases until the authority to do so should be more explicit. A resolution, however, having been passed by both houses of Congress removing all doubt as to Executive authority, daily purchases of bonds were commenced on the 23d day of April, 1888, and have continued until the present time. By this plan bonds of the Government not yet due have been purchased up to and including the 30th day of November, 1888, amounting to \$94,700,400, the premium paid amounting to \$17,508,613.08.

The premium added to the principal of these bonds represents an investment yielding about 2 per cent. interest for the time they still had to run ; and the saving to the Government represented by the difference between the amount of interest at 2 per cent. upon the sum paid for principal and premium and what it would have paid for interest at the rate specified in the bonds if they had run to their maturity is about \$27,165,000.

At first sight this would seem to be a profitable and sensible transaction on the part of the Government. But, as suggested by the Secretary of the Treasury, the surplus thus expended for the purchase of bonds was money drawn from the people in excess of any actual need of the Government, and was so expended rather than allow it to remain idle in the Treasury. If this surplus under the operation of just and equitable laws had been left in the hands of the people it would have been worth in their business at least 6 per cent. per annum. Deducting from the amount of interest upon the principal and premium of these bonds for the time they had to run at the rate of 6 per cent., the saving of 2 per cent. made for the people by the purchase of such bonds, the loss will appear to be \$55,760,000.

This calculation would seem to demonstrate that if excessive and unnecessary taxation is continued and the Government is forced to pursue this policy of purchasing its own bonds at the premium which it will be necessary to pay, the loss to the people will be hundreds of millions of dollars.

Since the purchase of bonds was undertaken as mentioned nearly all that have been offered were at last accepted. It has been made quite apparent that the Government was in danger of being subjected to combinations to raise their price, as appears by the instance cited by the Secretary of the offering of bonds of the par value of only \$326,000 so often that the aggregate of the sums demanded for their purchase amounted to more than \$19,700,000.

Notwithstanding the large sums paid out in the purchase of bonds, the

surplus in the Treasury on the 30th day of November, 1888, was \$52,234,610.01, after deducting about \$20,000,000 just drawn out for the payment of pensions.

SILVER COINAGE.

At the close of the fiscal year ended June 30, 1887, there had been coined under the compulsory silver-coinage Act \$266,988,280 in silver dollars, \$55,504,310 of which were in the hands of the people.

On the 30th day of June, 1888, there had been coined \$299,708,790; and of this \$55,829,303 was in circulation in coin, and \$200,387,376 in silver certificates, for the redemption of which silver dollars to that amount were held by the Government.

On the 30th day of November, 1888, \$312,570,990 had been coined, \$60,970,990 of the silver dollars were actually in circulation, and \$287,418,346 in certificates.

The Secretary recommends the suspension of the further coinage of silver, and in such recommendation I earnestly concur.

What May or May Not Happen.—A Berlin correspondent of the London "Statist," referring to the financial and political situation in Europe, says that everything is apparently serene, and the interests of all the really potent parties are so clearly on the side of the "bulls" that an event which under ordinary circumstances would suffice for creating a stampede would be interpreted as something quite harmless. Therefore, experienced observers do not expect disturbances of any magnitude for the present, although it must be admitted that many operators and the public have carried their ventures to an excess. The apprehensions regarding speculation, which are so freely expressed by members of foreign stock exchanges, are not shared in Berlin; but at the same time, it is frankly admitted that a great deal of skill and *sangfroid* is required in order to avoid a catastrophe sooner or later. One might compare many of the adventurous operators to a somnambulist walking on the edge of a steep roof. An incident may bring him to grief, whereas otherwise he would never become conscious of the dangers surrounding him. To wind up this comparison, one is pretty safe to say that for the present there is no danger of a premature awakening. Critical days, however, are in store, with advancing money rates and the possibility that money may become stringent. A good deal will depend on the state of foreign exchanges, which so far are still on a declining scale, and also on the measures of the Russian Minister of Finance. The further decrease in the accounts which the Russian Government keeps here and in London would contribute to disturb the market. Withdrawals of gold from London are also dreaded. On the other side the report, which undoubtedly has some foundation, that German bankers negotiate with the Russian Government, either for a conversion or for a new loan, tends to create a sentiment of security; for such a transaction could not be contemplated if we were drifting towards unsteady times. The political relations between Germany and Russia do not seem to contradict the supposition that Russia contemplates a new loan in Germany, and there is no reason to assume that the public will show less inclination to subscribe for a Russian loan than they have shown for Argentines. The issues of the four and a half per cent. Argentine loan and the Greek loan were both successful, but at the same time both transactions provoked much criticism.

THE GILBART LECTURES ON BANKING.

BY J. R. PAGET, ESQ., BARRISTER-AT-LAW.

[The following is the first of a series of very interesting and instructive lectures on Banking—in its widest sense—which were delivered the past summer before the London Institute of Bankers, and published in the *Journal of the Institute*. We shall continue their publication in monthly parts until the subject is exhausted.—THE EDITOR.]

I.

Before entering upon this course of lectures, I wish to say a few words of apology and explanation. Unfortunate circumstances have unavoidably deprived you of the privilege and advantage of having the Gilbert lectures this year delivered by Professor Leone Levi, whose peculiar qualifications for the duty are too well-known to need any remarks from me. His course was, I believe, already announced when he was compelled to abandon the idea of giving the lectures this year. When it was suggested to me that, in Professor Leone Levi's regrettable absence, I should undertake the delivery of the lectures *pro hac vice*, I had an opportunity of seeing the syllabus he had prepared, and I then felt, even more than before, my utter incapacity to act as his substitute; for that syllabus comprised, as you may possibly be aware, lectures on banking in its wider application and most comprehensive aspects—matters with which I was at once obliged to confess myself not in any way conversant. Still, I was unwilling to forego the honor of addressing you, and, casting about to see in what way any knowledge or experience I possess might be utilized for your advantage within the sphere of these lectures, it struck me that, as I have had certain opportunities and occasions of considering and dealing with a good many points and incidents of banking business from the purely legal, professional, practical stand-point, the only line I could conscientiously adopt would be to lay before you, to the best of my ability, a sort of general exposition of banking business as it presents itself to the consideration of a practising lawyer.

To the legal mind the same things appear in a totally different aspect. To it the leading idea with regard to every transaction is, what does it involve, what rights, what liabilities, am I safe in doing what I propose to do, does it constitute a right of action to anyone against me, how can I safe-guard myself, are there any and what precautions I ought to take, must I have it in writing, does it want a stamp, and so on. Well, it is a suspicious, hostile frame of mind, perhaps, but, after all, a necessary one. And if justifiable in any walk of life, it seems to me so in respect of banking, for bankers are, from their position, a mark for the efforts of the unscrupulous. The nature of their business operations renders the cropping up of legal questions inevitable, while the instruments of their warfare, so to speak—negotiable instruments, bills, notes, cheques, and so forth—are about the most fruitful source of legal difficulty and litigation which could be named.

I know it is said that a little knowledge is a dangerous thing, and so far as it is true at all, it is probably true of legal knowledge; but the little knowledge, legal or otherwise, is only dangerous when unduly presumed on, and I hope it may not be impossible for you to gather some hints which may prove practically useful in enabling you to act with promptitude and safety in contingencies which may arise in the course of your work. It must happen frequently that you are called on to act promptly with relation to matters arising in business. You have not time to consult a legal adviser, and in those cases it is the man who knows what is the really right, safe, recognized thing to do who is the master of the situation and the gainer by the opportunity. Moreover, if I succeed in carrying out my idea, I shall put you in the way of and inspire you with the taste for increasing indefinitely your knowledge of

the legal aspect of banking, until that knowledge be by no means little. If I can lay before you clearly and bring home to you that legal aspect in its simpler forms, there is scarcely a law book or report in a newspaper you can take up which will not give you some new information, which you will then be in a position to appreciate and assimilate. Take the *Times* in the morning, and look through its law news. You will always find something about a bank, or a bill, or a note, or a guarantee, or realizing securities, or something intimately touching your own line of work, to interest you and give you information, if you only know enough of that branch of law to enable you to follow what it is all about.

And when I began to write this lecture, it struck me as a curious coincidence, possibly justifying my attempt to elucidate some of the law as to banking, that the very subject with which I had of necessity to deal first, as being the natural foundation and starting point of the whole matter, should turn out to present at least as much difficulty, when closely examined, as any branch of banking law with which I am acquainted. One might not unnaturally expect that at least the law governing the formation and status of banks and the regulation of the note issue of the country should be plain and unmistakable. I can assure you, however, that, as I think you will presently admit, both these important subjects are in a state of horrible confusion, so far as the law affecting them is concerned; that law having to be gathered and deduced from an undigested mass of statute law, hardly, if at all, reconcilable in itself, and actually, in some of its details, being of so doubtful comprehension and interpretation that competent authorities take diametrically opposed views as to its real meaning. The confusion is materially enhanced by the double lines on which legislation with regard to banks has always gone, the subject of the issue of notes and bills by banks having been affected by a different set of statutes to those dealing with banks in their purely depository capacity. In a subject so complicated, the only chance of getting it straight is to go as far back towards the very origin as one can, with a view to tracing the successive developments as they have arisen, and in the present case this is all the more necessary, inasmuch as misapprehensions seem to exist as to the character of banking as carried on in England at one of the most critical periods, namely, in the 17th century. If I appear to revert to periods so remote as not to have much apparent bearing on the business and condition of modern times, my excuse must be this complexity of the subject, and if I may judge by my own experience, you will not be uninterested by the story of the early protests of the banking community against the rapacity and corruption which characterized the reign of Charles II, and to a certain extent that of Charles I as well, for the early history of banking in England is one of struggle against extreme difficulties, and one which does not show either law or executive in a very favorable light.

Mr. Douglas Walker, in his treatise on Banking Law, says that "previously to the year 1694 (which was a notable year for bankers, as having witnessed the establishment of the Bank of England), banking in both its branches (that is, deposit and issue) had been carried on by individuals and co-partnerships, but the system of receiving deposits, which now forms the chief business of the banks of this country, formed but a small part of the business of that day, and indeed was hardly known as banking at all. The circulation and issue of notes or bills payable to bearer on demand was then thought the chief function of a bank, as it was, in fact, the source of the chief profit; and the term '*bank*' meant a bank of circulation and issue, and had no reference to what is now known as a bank of deposit."

No doubt this view receives some support from remarks in the case of the Bank of England *vs.* Anderson, 3 Bing., N. C., 589, which he quotes as an authority for his proposition, and from the sense in which the word "bank" is used in some of the earlier statutes relating to the Bank of England, but there seems to me ample ground for deducing from the history of those times that the practice of receiving deposits was actively engaged in for many years prior to 1694 by those who represented the bankers of the day, and that its discontinuance was only due to external circumstances of violence and

illegality in high places, which form an interesting, if shameful, episode of the period.

Up to 1640, banking in the modern sense of the term, either as meaning the receiving of deposits or the issue of notes, had no appreciable existence in England. Merchants deposited their superfluous bullion and cash in the Mint in the Tower for convenience and security under the guardianship of the Crown. But in 1640 the troubles between Charles I and his Parliament reached a climax. He dissolved Parliament after a short and barren session, during which no bills, not even supply, had been passed. An invasion by France was momentarily expected. He resorted to the expedient of a voluntary loan, the result of which was the payment of £300,000 into the Exchequer. This was soon exhausted, and Charles was reduced to the disgraceful measure of seizing the merchants' bullion and cash, lying in the Tower, to the amount of £120,000. But even so high-handed a proceeding as this, when on the part of the Crown, was not irreparable of immediate redress in those days, and the despoiled merchants were no doubt glad to get their property back by compromise on the terms of letting the King have £40,000 on remarkably easy terms. But they had learnt a lesson, and were not afterwards so ready to put their trust in princes, and for some time after that merchants kept their money at home.

But it did not suit their ideas to have their capital lying idle. The goldsmiths were the first to recognize possibilities of making a profit without exposing their capital to the caprice and dubious good faith of the Crown. The coin minted in those troublous times was very irregular in weight. They bought it up, melted down the coins exceeding the regulation or current weight and disposed of the bullion abroad. The next development of their enterprise was the lending out the money accumulated in their hands to responsible persons at interest, and finding this a lucrative business, they sought to extend it by offering interest on deposits. Here, then, we have a distinct institution of the deposit bank, while the goldsmiths' notes or receipts promising repayment to bearer, the germ of issue, were not introduced till 1670, and not recognized by law as negotiable until the reign of Anne. The goldsmiths who pursued this course were entitled bankers, the first introduction of that name into this country. A large and lucrative branch of this business consisted in the receiving on deposit at interest the rents of gentlemen's country estates, safer no doubt in London than in disturbed country districts, and Clarendon in his "Life of Himself" says of the bankers that "there were five or six of them pre-eminent among the rest, known to be so rich and of so good reputation that all the money of the Kingdom would be trusted or deposited in their hands."

During the Commonwealth things seem to have gone fairly well with these bankers, and they appear to have entered into those relations with the State which were afterwards to end so disastrously for them and their customers. Cromwell applied to them for advances in anticipation of supplies, and these advances were made from time to time and presumably repaid.

But on the Restoration, extravagance and recklessness became the order of the day. Charles II naturally desired to get rid of the Republican armies formed under the Commonwealth. The only safe method of so doing was to pay them off, and Ministers accordingly had recourse to the bankers. Fresh necessities arose, and the King was in frequent communication with the bankers, the transactions being conducted in a manner of which Clarendon has left us a graphic description. The King would send for the leading men among the bankers and ask how much each was prepared and disposed to contribute. One would say so much, another so much—they did not act in any concert or on any joint-stock principle, but independently, according as each had available funds at his disposal. Then the question of interest would be mooted, and this was generally courteously left to his Majesty's pleasure with the information and suggestion that 6 per cent. was what they had to give their customers. Eight per cent. came to be the rate of interest usually granted by the Crown, and the repayment was secured by an equivalent assignment of the first moneys which should be voted by Parliament or by

tallies giving a charge on the revenue or both, the payments being made out of the Exchequer. But this system culminated before long in an episode which I cannot pass over, inasmuch as it marks an important stage in the history of banking and formed the subject of one of the most famous State trials on record.

In 1667, Charles had issued a proclamation affirming the inviolability of the Exchequer and precluding and prohibiting the idea of any stoppage of or interference with the payments to be made thereout in discharge of such loans. But on the 20th of January, 1671, a second proclamation appeared, having been prepared, as was the step it announced, with the utmost secrecy, suspending all payments out of the Exchequer for a year, but promising interest during that time at 6 per cent. The proclamation is a plausible document, which is set out in full in a curious and interesting little book published in 1675 by one Turnor, and called the "Case of the Bankers and their Creditors," a book which is highly commended by Hargrave, the learned annotist of Coke upon Littleton. It states the King's great reluctance to take the step in question, which he justifies on the ground of public necessity and the warlike preparations of neighboring States, which there was no other means of meeting. By this measure of practical confiscation the King became possessed of no less a sum than £1,328,586, whereof £416,725 belonged to Sir Thomas Vynor, one of the bankers, or his customers.

The suspension of payment, originally for a year, was prolonged indefinitely: in December, 1671, further letters patent postponed the payment till May, 1673; when that date arrived no payment was forthcoming, and the disappointed bankers and their creditors had not even the satisfaction of having their debt recognized, if postponed, by any further letters patent or proclamation.

The distress this caused was terrible. People who had confided their money to the bankers were ruined by thousands, many put an end to their lives, or went mad, the principal creditors of the bankers alone being estimated by Turnor at 10,000, the persons consequently injured innumerable. The case is shortly and well put by Turnor thus: "A banker lends to the King an hundred thousand pounds, more or less; this money is secured to the said banker upon the customs or any other branch of the King's revenue by order registered in the Exchequer, by tally of loan, or both, and then the King (upon the warlike preparations of our neighbor princes and states) is advised to make stop of all payments out of the Exchequer, which is executed accordingly. Whether by this counsel executed, the subject's property be invaded and violated? and I clearly conceive it is"—a proposition he proceeds to support with much of that curious reference to classical and scriptural antiquity which is the characteristic of law-books of that date, but which to our minds does not seem to require much argument to substantiate it.

Up to 1676 no principal was paid and very little interest, but at length in that year the King condescended to have the accounts of the bankers and creditors examined by the Chancellor of the Exchequer, and in the next year (1677) letters patent were issued granting to each of the bankers, his heirs and assigns, for the benefit of their customers or creditors in lieu and satisfaction of their debt a yearly rent, part of the hereditary excise, equal to 6 per cent. upon the debt, with a clause for redemption upon the King paying principal and amount of interest. A bill to ratify this arrangement passed the Lords on July 10th, 1677, but it was never presented to the Commons and never became law. Interest was, however, paid spasmodically till Lady Day, 1683, and then ceased altogether.

In 1689, some four of the bankers, reduced to desperation, petitioned the Court of Exchequer for an order upon the Treasury for payment of their claims. The Crown opposed the application and the famous trial known as the bankers' case, reported in 14 State Trials, I, began.

1691 saw the case decided in favor of the petitioners and the order for payment made. The Crown appealed to the Exchequer Chamber, in which the Lord Chancellor or Keeper of the Great Seal and the Lord High Treasurer then sat and were accustomed to receive the assistance of all the

twelve common law judges. Just then there happened to be no Lord High Treasurer, so Lord Somers, then Lord Keeper, sat with the twelve judges to hear the case.

Two points were argued: 1. Whether the letters patent of 1677 were good and valid to bind the Crown. 2. Whether the remedy adopted by the petitioners was the right and authorized one, and whether the Court of Exchequer could order payment from the Treasury of sums due to claimants. The twelve judges were unanimously of opinion that the letters patent did bind the Crown, and with one exception, that of Treeby, Chief Justice of the Common Pleas, were also of opinion that the proper remedy had been adopted and that the court had power to order payment. Treeby, the dissentient judge, taking the contrary view that the proper and only remedy was by petition direct to the Crown, the court not having the power it was asked to exercise. It remained with Lord Somers to give the effectual judgment, and he did so in an argument said to have been one of the most learned and exhaustive ever delivered in Westminster Hall, as may be judged from the reported fact that he had expended several hundred pounds in collecting books and pamphlets in support of and preparation for it. However, after all this preparation, he carefully avoided deciding the main and first point and held that the only remedy was by petition.

The question was then raised whether the eleven judges could thus be overruled by the Lord Keeper, whose view was supported by one only, but on this question seven judges somewhat pusillanimously agreed that they could be; three stood out, and it is not reported what the other two thought. Lord Somers naturally supported his own authority, and the decision below was reversed. The bankers appealed to the Lords, and at length on January 29d, 1700, eleven years after the litigation commenced, the Lords reversed Lord Somers and gave judgment for the bankers. The proceedings in this trial, it may be noticed, formed part of the grounds of the subsequent impeachment of Lord Somers. But the bankers reaped but little fruit from their hard-won victory. Not a penny of arrears was ever paid or even proposed to be paid. An Act was passed in 1700 that the hereditary excise should be charged with interest at 3 per cent. on the principal until half the debt was paid, the other half being absolutely ignored. None of the principal ever was paid. It was afterwards consolidated with the South Sea Annuities, and still forms part of the National Debt. The loss to the bankers and their clients from arrears of interest unpaid and retention of principal, was estimated at nearly £3,000,000, to say nothing of the enormous expenses of so protracted a legislation.

Such is the story of the earliest development of banking in England, and it was certainly not encouraging.

Presumably, however, the bankers never lost all heart or credit, for in 1692, some of them, on behalf of their customers and themselves, after showing that £1,340,000 was due as principal, with arrears of interest at 6 per cent. for 8¾ years, proposed to forego all arrears of interest and advance a further sum equal to the said principal on having interest on the whole at 6 per cent. secured to them by Act of Parliament. But for some reason or other this scheme was not accepted.

Next, one William Paterson proposed to advance a million by subscription, upon condition of receiving £65,000 per annum, £8,000 for managing, and the rest for interest; the bills of the subscribers to be legal-tender and £200,000 to be deposited to meet them at 5 per cent. Ministers could not bring themselves to consent to the creation of a forced paper currency, and so this scheme also fell through. In 1694, the same Paterson, in conjunction with one Michael Godfrey, brought forward an amended plan for raising and circulating £1,200,000 upon a fund of £100,000 per annum, and this being accepted, proved the starting point of the Bank of England.

I may incidentally mention that Michael Godfrey did not long enjoy the success of his enterprise. In 1695 he, as Deputy Governor of the Bank, went over to Namur, which the King was then besieging, the money raised by the Bank having enabled him to carry on the war with increased energy. The object of Godfrey's expedition was to take instructions and advise how

the money should be paid out for the support of the troops. In the pre-occupation of talking business with the King, he approached dangerously near the walls of the beleagured town and was shot dead at the King's side, literally sacrificing his life in the interests of the new-born institution.

In 1694 the Statute 5 William and Mary, c. 20, was passed, which, with the letters patent which it authorized, formed the foundation of the Bank of England. The object of the statute and the transaction as expressed therein was the raising of a sum of £1,500,000 towards carrying on the war with France, and the Crown was empowered thereby to grant a charter of incorporation to the persons who had subscribed \$1,200,000 of that sum, under the name of the Governor and Company of the Bank of England, with perpetual succession, a common seal, power to hold land, and all other special attributes of a corporation by charter. Sec. 26 limited the operations of the company to the amount of £1,200,000, the equivalent of what they had advanced, and sec. 28 made their bills transferable or negotiable by indorsement, and gave the transferee power to sue in his own name, not, however, making them a legal-tender, which was not done till much later, in 1833. The necessary charter of incorporation soon followed, but neither in it nor in the above-mentioned Act is there anything conferring or even importing an exclusive monopoly of banking, either as a bank of issue or of deposit.

Indeed, such could not well have been the original intention, for within two years the 7 and 8 William III, c. 31, empowered the Government to grant a charter to a corporation to be called the National Land Bank, an undertaking which, had it been carried through, would practically have been a rival on equal terms with the Bank of England. The Act, however, provided that unless a certain sum of money therein specified should be subscribed by a certain day, there should be no such corporation, and as the money was not forthcoming the scheme fell to the ground. Still, the Bank of England was not unnaturally alarmed by an Act of Parliament having actually passed both houses and received the royal assent, by which such a rival bank was to be established; and, therefore, when the 8 and 9 William III, c. 20 was passed with a view to enlarging their capital stock, they got inserted in the recitals a special reference to the defunct National Land Bank Act, and a Section No. 28, to the effect "that during the continuance of the Corporation of the Governor and Company of the Bank of England, no other bank or any other corporation, society, fellowship, company or constitution in the nature of a bank shall be erected or established, permitted, suffered, countenanced, or allowed by Act of Parliament within this Kingdom." At first sight this sweeping enactment would seem to import nothing less than an absolute monopoly to the Bank of England and the suppression of all other existing banks, but it was evidently interpreted, and subsequently by a later statute expressly stated, to mean only that no new bank should be established under parliamentary auspices and with special powers such as had been accorded to the Bank of England. So there was no direct prohibition of banking by private persons, either by way of deposit or issue, and apparently both classes of business were pursued by independent individuals and partnerships until the passing of the Act 7 Anne, c. 20, whereby, after reciting the enactments of the 8 and 9 William III, c. 20, it was stated that, since the passing of that Act, "some companies, by color of the charters to them granted, and other great numbers of persons, by pretence of deeds or covenants united together, have presumed to borrow great sums of money, and therewith, contrary to the intent of the said Act, do deal as a bank, to the apparent danger of the established credit of the Kingdom," and it is enacted "That it shall not be lawful for any body politic or corporate, whatsoever, erected or to be erected, other than the said Governor and Company of the Bank of England, or for other persons whatsoever, united or to be united in covenants or partnerships exceeding the number of six persons in that part of Great Britain called England, to borrow, one, or take up any sum or sums of money on their bills or notes payable on demand or at any less time than six months from the borrowing thereof."

As was pointed out in the case of the Bank of England *vs.* Anderson

(1837). this "dealing as a bank" was a dealing as a bank of circulation and issue, for merely dealing as a bank of deposit could scarcely "affect the credit of the Bank of England," the securing of which credit is the object mentioned in the title to the Act; still less could it operate "to the damage of the established credit of the Kingdom," which is the effect of such dealing as described in the recital to the above section.

The particular coalitions aimed at were "The Million Bank" and the "Mining Bank," who were borrowing large sums of money on bills and notes.

No doubt the use of the term, "do deal as a bank," taken with the interpretation put upon it in the case just mentioned, and the nature of the prohibition contained in the section might lead to the conclusion that issue banking was the only class of banking practiced up to that time. But I think the bankers' case shows the contrary, and it must be remembered that the object of the Bank of England, and consequently of the statute was not to interfere with the receipt of deposits, but only the issue of notes. Any way the operative part of this Act did not touch banking so far as deposits were concerned, nor does it in terms prohibit persons united in co-partnerships of more than six from acting as a bank of circulation and issue altogether, but adopts the somewhat singular and vague language which I have quoted, and curiously enough this quaint phraseology about "borrowing, owing, and taking up," has been retained in every successive Act dealing with the issue of notes by banks, though in the later ones it is supplemented by the more explicit term, "make or issue their bills or notes payable on demand." But it is not difficult to see that these words are really equivalent to and operate as a prohibition of the issue of notes. The issue of a note in return for money to be repaid on presentation of that note is simply a borrowing, taking up, or owing money on that note, and the two terms are really synonymous and interchangeable.

From this point the statutes regulating deposit banking and issue banking diverge, and a special set of Acts were directed to the control of banks of issue as distinguished from purely depository banks.

They are numerous, but I need not go through them as they did not relate the state of affairs prescribed in the statute of 7 Anne. In all of them the privilege of *exclusive banking*, so-called, was reserved to the Bank of England and the prohibition of the 7 Anne, as to the owing, borrowing, or taking up on bills payable on demand by co-partnerships of more than six persons was re-enacted. At this time then the position was this, no limitation on deposit banking and issue banking confined to the Bank of England, and the smaller associations not numbering more than six persons each which the Bank of England apparently considered beneath its notice as rivals.

But in 1826, an important alteration was made in the law, by the passing of the statute 7 Geo. IV, 46, which accorded a large concession with respect to issue of notes. For it authorized the issue of notes payable on demand and the borrowing, taking up, and owing on such notes by corporations and co-partnerships of *more than six persons* so long as such bills or notes were issued and made *outside a 65 mile radius* from London, and the corporations or partnerships issuing them had no establishment or place of business as bankers in London, or within the 65 mile radius, and every member of such corporation or partnership was made personally responsible for the whole amount of such issue. Two years afterwards, that is to say in 1828, the 9 Geo. IV, c. 23, allowed any person or persons carrying on business as bankers in England (*except within the City of London or a radius of three miles*), to issue notes on unstamped paper payable on demand for sums not less than £5, if they obtained a license and gave security, and here there is no mention of any limitation to six persons.

In 1833 the Legislature retraced their steps, and passed a restrictive Act (3 and 4 Will. IV, 98), whereby co-partnerships or corporations of more than six persons were again prohibited from issuing notes payable on demand in London, or within sixty-five miles of London, but such corporations were expressly allowed to carry on the business of banking within the above

limits, provided they did not take up, owe, or borrow money on bills or notes at less than six months' date. This Act also gave the Bank of England the privilege of its notes being a legal-tender for any sum over £5, except by the bank itself or its branches. Questions arose as to whether this Act made such notes legal-tender in Scotland and Ireland, and some years later, the point was settled in the negative by declaratory sections introduced into Scotch and Irish Bank Acts.

In 1844 the Bank Charter Act (7 and 8 Vict., c. 32) was passed, and is the statute which still regulates the whole note issue of England. It separated the banking and issue departments of the Bank of England, authorized the issue department to issue to the banking department notes payable on demand to the amount of £14,000,000 on the credit of securities of equal value, gave anyone the right to demand bank notes from the issue department in exchange for gold or silver bullion, and gave power under certain circumstances to increase the issue of notes. The issue of notes by other banks is dealt with by sec. 10 and 11. Sec. 10 enacts that, from and after the passing of this Act, no person, other than a banker who, on the 6th of May, 1844, was lawfully issuing his own bank notes, shall make or issue bank notes in any part of the United Kingdom—bank note being defined later on in the Act as meaning all bills or notes for the payment of money to bearer on demand, other than bills or notes of the Governor and Company of the Bank of England, and by sec. 11, bankers in England and Wales, with the same exception, are prohibited from taking up, owing or borrowing any sums of money on bills or notes payable to bearer on demand, and it was further provided that it should not be lawful for any company or partnership, then consisting of six or less persons, to issue bank notes at any time after the number of partners therein should exceed six in the whole.

Sec. 12 provided that if any banker, entitled to issue bank notes became bankrupt, gave up business, or ceased to issue bank notes, it should not be lawful for such banker, at any time thereafter, to issue any such notes.

Banker was defined to include corporations and co-partnerships, and it was provided that no change in the personal composition of any company or partnership within the prescribed limits should affect the right to issue. Similar Acts were passed for Scotland and Ireland, but nothing was done to make the notes of any Scotch or Irish bank a legal-tender anywhere.

In 1857 the statute 20 and 21 Vict., c. 49, was passed, the effect of the 12 sec. of which has been taken by some authorities to allow the increases of the above number of six to ten, and this section is not affected by the Companies' Act, 1862, which in repealing that Act, especially saved this section. But I must say something about this section presently.

Here then is a mass of complicated legislation, the statutes overlapping and being inconsistent with one another, but not repealing one another, so that the whole have to be construed together somehow.

It is by no means an easy task to reconcile or construe them, but the outcome has been thus stated by eminent authority.

In London and within a circle of three miles round, the Bank of England has a monopoly of issuing bills of exchange or notes which are expressed to be or in legal effect are payable to bearer on demand; beyond three and within sixty-five miles the monopoly is shared with banks of six or less than six persons established before 1844, and issuing notes of that date; beyond the sixty-five mile limit, the monopoly is shared with all banks established before 1844, and then issuing notes, who have not since lost their privileges.

This is practically the rule as stated by Lord Justice Lindley in his book on Partnership, by Grant on Banking, by Chitty on Bills of Exchange, by Mr. Douglas Walker in his Treatise on Banking Law, and by Mr. Cavanagh in his work on Money Securities. On the other hand, His Honor Judge Chalmers, a very eminent authority on all matters connected with bills and banking, Macleod on Banking, and Byles on Bills, lay down that beyond the three mile radius and within the sixty-five mile radius from London, the effect of the Statute of 1857, 20 and 21 Vict., c. 49, above referred to, is to allow the increase to ten of any partnership, who, not being then more than

six, were issuing notes on May 6th, 1844, without interfering with their right to continue such issue.

For my own part, I do not think this is the effect of that statute, and I think that six is still the maximum number.

In the first place, the Act relates purely to the formation of Joint-Stock Banking Companies of more than seven persons. This is shown by its title, "An Act to amend the law relating to Banking Companies." Then this section 12 repeals Statute 7 and 8 Vict., 113, and then continues: "And notwithstanding anything contained in the said Act of the eighth year of the reign of Her present Majesty, chap. 113, or in any other Act, it shall be lawful for any number of persons, not exceeding ten, to carry on in partnership the business of banking in the same manner, and upon the same conditions in all respects as any company, if not more than six persons, could before the passing of this Act have carried on such business."

But when we turn to the repealed Statute 7 and 8 Vict., c. 113, to which we shall have to allude hereafter, we find that it again has nothing to do with the issue of notes; it was the first of the statutes introducing the joint-stock principle into banking; it provided that no new company of more than six persons should be formed to carry on the business of banking in England after the passing of the Act, except by virtue of letters patent to be obtained under it, but that existing companies of more than six might petition if they liked for letters patent, and so come within its provisions, but otherwise it did not interfere with existing companies.

No doubt the Act of 1857 says generally "or any other Act," and uses the general term "carrying on the business of banking"; but the object of the Act clearly is only to expand the provisions of 7 and 8 Vict., c. 113, by enabling partnerships of ten persons to carry on banking business without registration or letters patent. I think this is also shown by the words "ANY company of six persons." Only those companies of six persons who were issuing notes in 1844 could continue to issue them. Companies might have been, and no doubt were, formed under the 7 and 8 Vict., c. 113, of six or less persons, who could not, however, issue notes, and I do not think the word "any" here can be interpreted as including "any company with exclusive and peculiar privileges"; besides, the term "*business of banking*," acquired after the Bank Charter Act a different meaning. It could not then, in reference to new companies, include issue of notes, and this is the sense in which it is clearly used in 7 and 8 Vict., c. 113, which came soon after the Bank Charter Act.

But what I think is quite conclusive is that this very Statute 20 and 21 Vict., 49, in sec. 19 enacts that nothing contained in the Act is to affect the provisions of 7 and 8 Vict., c. 32, that is to say, of the Bank Charter Act itself, which, as you remember, fixed the precise conditions under which banks might continue the issue of notes, and specially provides (sec. 11) that it shall not be lawful for any company or partnership consisting of only six, or less than six persons, to issue notes at any time after the number of partners therein shall exceed six in the whole.

It seems to me clear, therefore, that the rule as first stated is the right one, and that any partnership issuing notes by right of being six or less than six, which increases its number to ten, would lose its right of issue.

And as you have heard, banks may lose their right to issue notes in other ways, either by becoming bankrupt, ceasing to carry on business, or discontinuing the issue, in which case it cannot be resumed. An instance of this was in the case of the Queen *vs.* Birbeck in 1884, where a limited company attempted, by purchase of the business as a going concern of a firm entitled to issue notes, to acquire a right to issue notes on their own account, but the Court held that, as by the terms of the agreement the firm had ceased to carry on the business of bankers, the company could not continue the issue.

And similarly it is deducible from cases that the courts would interfere to stop anything which is in effect issuing bills payable to bearer on demand, by persons not entitled to do so. As, for instance, if a branch bank were to draw bills or cheques payable to bearer on demand upon the head office, and give

them to persons in exchange for cash, or to draw such bills or cheques on the manager of the head office on the credit of the person taking them undertaking to remit funds to such manager to meet such cheques or bills, or anything of that sort; such transactions, if not actual issuing, being at least owing, borrowing, and taking up. So again the issue of bankers' cash notes payable to bearer on demand by banks not entitled to issue notes would be illegal. I have seen it stated in a work of authority that it is still illegal under the 3 and 4 Will. IV., 98, for a bank of more than six persons in London or within 65 miles of it, to accept bills of exchange payable at a less interval than six months from their acceptance, but I think this is not so, since the 7 and 8 Vict., c. 32, sec. 28, specially provides that any society or company or persons in partnership, though exceeding six in number, carrying on the business of banking in London or within 65 miles thereof, may draw, accept, or endorse bills of exchange, not being payable to bearer on demand, anything in the thereinbefore recited Act passed in the 4th reign of Will. IV (which is the Act in question) or any other Act to the contrary notwithstanding.

It does not directly repeal the "owing, borrowing" section in so many words, but this is the section clearly pointed at, and if it be not superseded, the two are inconsistent, and the latter ought to prevail.

Township Bonds Declared Unconstitutional in South Carolina.—The State Supreme Court of South Carolina, decided December 1st that bonds issued in behalf of railroad corporations by townships are unconstitutional and invalid. The case came up on an appeal from Judge Norton's decision in the Circuit Court upon a case arising in Ninety-six Township, Abbeville County. Under an Act of the Legislature Ninety-six Township was authorized to subscribe \$20,800 to aid in the construction of the Greenville and Port Royal Railroad. This amount was to be raised by special tax levy, which was resisted by certain taxpayers of the township, who took the question into court. Judge Norton decided that a township was not a corporation, that the endeavor to create it made the law obnoxious to the Constitution, inasmuch as it created two separate and distinct corporations, only one of which was mentioned in the title of the law, and that the so-called township of Ninety-six is not a township within the meaning of the Constitution.

The Supreme Court affirms Judge Norton's decision, which applies necessarily to all bonds issued by townships in like manner. If the Supreme Court agrees with Judge Norton completely other township bonds which have been issued for railroad purposes must be held to be equally invalid with those issued by Ninety-six Township.

It is difficult to estimate what is the whole amount of township bonds which have been issued for railway purposes in that State, but it is estimated that it will approximate a million dollars. It is not yet known whether all of these bonds have been nullified by the Supreme Court. It would require an examination of each Act authorizing the issue of township bonds to determine this. The bonds issued by the various counties, cities and towns of the State in aid of railroad corporations amounting, Charleston city excluded, to \$1,504,600, are not affected by the decision.

The loss of the amount of bonds affected by the decision will seriously injure the railway companies and may prevent the completion of projects which are considered valuable and desirable. It will be likewise an injury to the public credit in general.

Iowa—A VINDICATION.—When the Commercial National Bank of Dubuque suspended, it was announced in the papers that Mr. Rufus C. Graves, President of the bank, was the cause; that his draft upon it broke the bank, and that he was forced to resign. Great injury and injustice was done Mr. Graves, as will be seen from a letter from Mr. C. H. Harris, Cashier, to a prominent financial gentleman, published elsewhere in the JOURNAL. This letter is a complete vindication of Mr. Graves. It is a pleasure to be able to give so clear a refutation to derogatory reports.

BANKING LAW.

* LEGAL DECISIONS AFFECTING BANKERS.

KENTUCKY BANK TAX CASES—PROVISIONS IN CHARTERS FOR PAYMENT OF FIFTY CENTS ON EACH \$100 CAPITAL "IN FULL OF ALL TAX OR BONUS," ARE CONSTITUTIONAL AND BINDING UPON THE STATE—SUCH PROVISIONS EXEMPT THE BANKS FROM THE PAYMENT OF COUNTY OR CITY TAXES.

The Franklin County court, having assessed for county taxation all the corporate property in Franklin County of the Bank of Kentucky, and the other banks who are named herein, including their notes, bonds, bills, money, and choses in action, the banks brought their separate actions of injunction against that court for the purpose of enjoining the collection of the tax. The city of Frankfort, having assessed the real estate of said banks within the corporate limits of Frankfort for the purpose of taxation, said banks also brought separate actions of injunction against the city for the purpose of enjoining the collection of said tax. The lower court perpetuated the injunction in each action, and separate appeals were taken by the Franklin County Court and by the city of Frankfort to the Court of Appeals of Kentucky. The cases were heard together, and were considered in the following order by that court.

Franklin County, Court vs. The Bank of Kentucky.—The appellee, the Bank of Kentucky, was chartered in 1834 by an Act of the Legislature of this State. The incorporating Act provides that the appellee "shall have and keep its principal office of discount and deposit in the city of Louisville, and it shall be the appellee's duty to establish not less than four nor more than six branches * * *," and one branch shall be located at the seat of government, "to aid in the management of the fiscal affairs of the State." The Act authorizes the appellee to have "a capital stock of five millions of dollars, divided into shares of one hundred dollars each;" that the amount of capital stock that "shall be employed at the principal bank, and at the several branches, shall be under the control of the president and directors of the principal bank;" that the appellee shall have "full power and authority to acquire, hold, and enjoy such real estate as shall be convenient for the transaction of its business, or which may be received in discharge of any debt, or purchased in satisfaction of any judgment or decree in favor of the bank, or in the purchase of any property on which the said bank may have a lien." The fifteenth section provides "that it shall be the duty of the principal bank, on the 1st day of July, 1836, and on the 1st day of July in each succeeding year during the continuance of this charter, to pay to the treasurer of this Commonwealth twenty-five cents on each one hundred dollars of stock held and paid for in said bank, which shall be in full of all tax or bonus; provided, that the Legislature may increase or diminish the same, but at no time shall the tax exceed fifty cents on each one hundred dollars of stock paid for in said bank." In 1837 the Legislature fixed fifty cents as the sum that the appellee should pay into the treasury on each one hundred dollars of its capital stock, "which shall be in full of tax or bonus." By the Act of 1834 the appellee's charter was to continue in force until the 1st day of October, 1864. The Legislature, by an Act approved February 15, 1858, enacted "that the chartered privileges and rights of" the appellee "shall

* All the latest Decisions affecting Bankers rendered by the United States Courts and State Courts of last resort will be found in the JOURNAL'S Law Department as early as obtainable.

Attention is also directed to the "Law Notes and Comments" and "Replies to Law and Banking Questions," which are included in this Department.

continue in force for twenty years from the 1st day of October, 1864; but said extension of the charter of said bank shall be subject to the following restrictions and provisions:" (1.) It shall be subject to all the limitations, conditions and duties imposed upon it by the act of incorporation. * * * (3.) After this act of extension takes effect, the amount of circulation shall not be greater than the amount of capital actually paid in. * * * (4.) The appellee shall establish a branch at Columbus, Kentucky, with a capital of \$150,000. * * * (5.) The appellee shall within a year from the 10th day of May, 1858, by a vote of a majority of its stockholders, determine whether it will accept the "proposed extension," and if it determines to accept it shall notify the Governor of the Commonwealth of the acceptance by the certificate of its president and directors, and this Act shall be in force from that date." The sixth section provides that the appellee "shall pay annually to the commissioners of the sinking fund, fifty cents upon each \$100 of the contingent fund now held or which may hereafter accrue to said bank over and above the amount now required to be retained by its charter." By an Act of the Legislature, approved February 1st, 1872, the appellee was authorized to purchase from the Commonwealth the stock which she owned in its bank. But the bank "shall annually on the 1st day of January, pay into the treasury a tax of fifty cents on each share of \$100 of its increased capital stock, which shall be in full of all tax or bonus on such increased capital stock." The fifth section provides "that the charter of the Bank of Kentucky be, and the same is hereby, extended twenty-five years."

The appellant's first contention is that the Legislature had no constitutional power to exempt the appellee from the common burden of taxation except "in consideration of public services." It contends that the exemption of the appellee from all taxation except fifty cents on \$100 of its capital stock was not "in consideration of public services," and therefore void. At the time the appellee was chartered and for years afterwards the Federal Government issued no paper currency. Banks and banking were creatures of the respective States. It was the policy of this Commonwealth to charter banks with authority to issue paper currency, based upon a gold and silver redemption, upon the demand of the holder. The issue of these banks constituted in the main the circulating medium in the Commonwealth for individual, commercial and public uses. While the aggregation of capital for banking purposes was, on the part of the projectors, for the purpose of individual gain, yet the Commonwealth accepted the overture as auspicious to the purpose of furnishing a currency as stable as in the nature of things it could be made, for the private, commercial, and public benefit of her citizens; also to aid her in the management of her fiscal affairs, which not only consisted in the providing of means to meet the ordinary administration of State affairs, but sometimes extended, or at least might extend, to the borrowing of money to meet any extraordinary or unforeseen emergency. Therefore we should hesitate to decide, were it material to decide the question, that the granting of the charter to the appellee, and the fixing of a specific tax of fifty cents on each share of its capital stock, was not in consideration of public services.

But the right of the State to grant the charter to the appellee, and exempt it from the payment of all taxes, except fifty cents on each share of its capital stock, rests upon the power of the State to make, for a valuable consideration, a valid and irrevocable contract. The State of Kentucky, in the management and control of her affairs, in her relation to the other States, in her relation to the Federal Government, except in so far as certain powers are delegated by the Constitution of the United States to the Federal Government, or are denied to the States, is sovereign by right. It is by virtue of her sovereignty that she has the power to contract. No binding contract can be entered into except by virtue of sovereign power. It is by this power that the State makes contracts with individuals, that she borrows money, and gives her obligation for its payment. To deny a State the power to make binding contracts is a denial of her power as a sovereign. Possessing the sovereign power to contract, she exercises the right just as an

individual exercises it. The individual, in exercising the right of contract, does not barter away his sovereignty. He for a valuable consideration simply exercises it. For a valuable consideration, coming to him from the other party to the contract, he surrenders something, and receives something in its stead which he deems an equivalent. Whether the one or the other has in fact received an intrinsic equivalent for that with which he has parted is not the question. The fact that it is of more or less value, and deemed by him to be an equivalent, is all that is desired to make the contract irrevocably binding. In thus contracting, he does not surrender his sovereign power; he merely exercises it. Upon precisely the same principle the Commonwealth contracts. If her contract is without any valuable consideration it is a *nudum pactum*; so is that of the citizen. But if there is a valuable consideration to support it, she is bound by it, not upon the idea that she has surrendered or bartered away her sovereignty, but that she has exercised it in accordance with what she deems to be for the best interest of her citizens. The State possessing the power to make, for a valuable consideration, a binding contract, she falls within that provision of the Federal Constitution that declares that she shall pass no law impairing its obligation. In respect to her contracts she stands upon precisely the same footing that she does in reference to the contracts made between individuals—she shall pass no law impairing their obligation.

In accordance with the foregoing views the Supreme Court of the United States, ever since the Dartmouth College case, 4 Wheat, 518, have consistently held that the creation of a corporation, especially banks, by the Legislature of a State, whereby it was agreed that the corporation, in consideration of paying to the State a specific tax or bonus, was to be released from the payment of all other taxes, constituted a binding contract, from which the State could not recede without the consent of the corporation; unless the State, in making the contract, expressly reserved the power to alter or amend it; or unless there was a general law in force at the time of making the contract which authorized the State, by subsequent legislation, to alter or amend it, and that there was nothing appearing in the Legislative Act of the contracting parties showing that the general law should not govern it. (*Bank vs. Knoop*, 16 How. 369; *New Jersey vs. Yard*, 95 U. S. 104, and *Farrington vs. Tennessee*, Id. 679.) This doctrine is so firmly rooted by the decisions of the Supreme Court of the United States, and so uniformly recognized by the courts of last resort of all the States, that a decision by us holding the contrary would be regarded as eminently sporadic.

Does the provision in the appellee's charter and amendments, declaring that the payment of fifty cents on each \$100 of its capital stock "shall be in full of all tax or bonus," exempt the appellee from the payment of county or city taxes? The appellant contends that it does not. It may be regarded as settled by the current of authority, and for the purpose of this investigation we will concede that it is so settled, that the appellee's capital stock, and the shares of its stock are distinct things; that the capital stock is the money authorized to be paid in, and actually paid in, as the basis of the business of the bank, and the means of conducting its operations. The bank cannot increase or diminish this capital stock without express authority to do so; for the reason that it constitutes a trust fund which is held by the appellee as trustee—first, for the purpose of meeting and making good its liabilities; second, after discharging its obligations, for the benefit of its stockholders. The shares of the capital stock are represented by certificates. Each holder is a beneficiary to the extent of his ownership, but he cannot control or withdraw a dollar of the principal; that must remain as the basis of the appellee's business operations. The shareholder is entitled only to share in the profits; so the capital stock and the shares of the capital stock are distinct things and both may be taxed. So, also, the franchise—the right of the bank to exercise its powers in the prosecution of its business as a distinct right from its capital stock—may be taxed. So, also, its surplus earnings, being distinct from its capital stock, may be taxed. So, also, its real estate if it does not represent its capital stock, but only its earnings,

which are not a part of its capital stock, may be taxed. (Ang. and A. Corp. Sec. 556, 557; *Bradley vs. People*, 4 Wall. 459; *Bank vs. Com.* 9 Wall. 352.)

If when the State granted to the appellee its charter, she had been silent as to her right to tax it, she would have the absolute right to tax it, under the foregoing heads, without being amenable to the objection of being guilty of imposing double taxation. Nor could it be successfully maintained that the appellee would not be liable to be taxed by the appellant, the County Court, under the Act of the 17th of March, 1876, and by the appellant, the City of Frankfort, under its charter. But the State did not choose to be silent. It did speak. It said that in consideration of the appellee's paying into the Treasury 50 cents on each \$100 of its capital stock, paid in without reference to its real value, such payment should be "in full of all tax or bonus." To say that this language has reference to the capital stock of the appellee, and not to the shares of its stockholders, or *vice versa*, or that it has no reference to the real estate of the appellee acquired and used in its legitimate business, would be to torture the meaning of language. The State agrees that, in consideration of receiving 50 cents on each \$100 of the appellee's capital stock paid in, the same shall be in full of all tax or bonus. It is conceded that this language binds the State to make no other assessment, and well may the concession be made; because, regarding the 50 cents in the light of a payment on the stock as capital stock proper, or as the stockholders' shares, yet the contract says that the payment "shall be in full of all tax or bonus." Also regarding the appellee's real estate as a separate subject of taxation (and so is the capital stock and the shares) yet the contract says that the payment of the 50 cents shall be in full of all taxation. If any part of the appellee's property—its franchise, its capital stock, or the shares of its capital stock, or its real property used in the operation of its business—is to be taxed in addition to the 50 cents, then it cannot be truthfully said that the payment of the 50 cents is "in full of all tax or bonus."

As before said, it is conceded that the terms of the contract bar the State from imposing any additional taxation; but it is contended that its terms do not bar the county and city from levying and collecting taxes for county and city purposes. In this position counsel clearly overlook the fact that the county and city are integrant parts of the State, and that they cannot levy and collect taxes without the authority of the State conferring that right upon them. So the absurdity is presented that the State contracts with the appellee in consideration of its paying 50 cents on each \$100 of its capital stock, to release it of "all tax or bonus"—that is the meaning of the language—and at the same time authorizes its local subdivision to levy and collect other taxes of the appellee; that is to say, that the State by its contract with the appellee, deprives itself of the right to levy and collect other taxes of the appellee, but may, notwithstanding, authorize all its subdivisions, if the appellee's property and business were distributed in all of them, to levy and collect other or additional taxes of it. It seems that it would occur to one at first blush that such a procedure would be a palpable violation of the contract. "Under such a contract between individuals a doubt could not exist." The State, when she makes a contract, based upon a valuable consideration, stands upon precisely the same footing. In *Bank vs. Edwards*, 5 Ired. 516, where the charter provided that the bank should pay annually into the Treasury of the State 25 cents on each share of its stock owned by individuals, and that the bank should not be liable to any further tax, it was held that the bank was liable to no other tax, State or County. See also *Farrington vs. Tennessee*, 95 U. S. 679, and *New Jersey vs. Yard*, Id. 104, and the authorities there cited. Also in the case of *Bank* (one of the present appellees) *vs. Greenup Co.*, 6 Bush. 127, where the bank's charter provided that the annual payment into the State Treasury of 50 cents on each \$100 of the bank's capital stock "shall be in full of all tax or bonus," it was held that said provision exempted the bank from the payment of all other tax, whether State or County, including the bank's real estate purchased for debt.

The appellant's next contention is that if the appellee's charter exempted

it from all taxation, except that therein provided, the same expired on the 1st day of October, 1864, and the Act of the 15th of February, 1858, extending the charter for twenty years, created a new corporation, which the Legislature under the Act of February 14th, 1856, reserved the right to amend at pleasure; and that the Act of the 17th of February, 1876, authorizing counties that levied and collected *ad valorem* taxes to assess banks and other corporations within said counties, operated as a valid amendment of the appellee's charter, to the extent of authorizing the collection of said taxes. The Act of the 14th of February, 1856, provides, "Section 1. That all charters and grants of or to corporations or amendments thereof, and all other statutes, shall be subject to amendment or repeal at the will of the Legislature, unless a contrary intent be therein plainly expressed: provided, that, while privileges and franchises so granted may be changed or repealed, no amendment or repeal shall impair other rights previously vested." "Sec. 3. That the provisions of this Act shall only apply to charters and acts of incorporation to be granted hereafter."

There is a broad distinction between the extension of a charter and the grant of a new one. An Act which continues the life of a charter to a period beyond the time fixed in the charter for its expiration, and reserves the corporate organization, privileges, powers, duties and rights, is an extension of the charter; thus extended it is the same charter, with a continued lease of life, under which the organization must be kept up; to which the company must look for its powers, privileges and rights; by which it is to be governed and controlled. The Act of extension relates back to the date of the charter. The Legislature and the company are presumed to contract for the extension with reference to that event by which the respective rights of the contracting parties were agreed on, which agreement, in consideration of the continuous discharge of the obligations therein expressed, is to be continued beyond the time first agreed on. (See *Ang. & A. Corp. Sec. 780*; *People vs. Marshall, Gilman 672*; *Bank vs. Rogers, 7 N. H. 32*; *Bank vs. Richardson, Greenl. 79.*) Here the Legislature by the Act of the 15th of February, 1858, continued the chartered privileges and rights of the appellees twenty years from the 1st day of October, 1864. This extension did not have the effect of creating a new charter, but merely extended the life of the one which was already in existence. Therefore, the Act of the 14th of February, 1856, does not apply; for the third section expressly provides that the Act shall only apply "to charters and Acts of incorporations to be granted" thereafter. Conceding, however, that the Act of the 15th of February, 1858, creates a new charter, was it not the intention of the Legislature, plainly expressed, not in so many words, it is true, that the first section of the Act of 1856 should not apply to it? Let us see. The Act of 1858, as an additional consideration for the extension, provides that the appellee should establish a branch at Columbus, Ky.; that the amount of its circulation should not be greater than the amount of its capital stock actually paid in; that it should in addition to the 50 cents per share on its capital stock, pay annually 50 cents upon each \$100 of its contingent fund; that it should be subject to all the limitations, conditions and duties imposed upon it by the Act of incorporation; that it should formally accept the terms of the extension. In addition to this, the Act of the 1st of March, 1872, authorized the appellee to purchase the stock that the State held in its bank, upon which it was to pay annually 50 cents on each \$100, which was to be "in full of all tax or bonus" on such increased stock; also her charter was "extended twenty-five years." That the appellee, in addition to its former obligation, agreed to pay annually 50 cents on each \$100 of its contingent fund and increased capital stock for the period of twenty-five years; that it was to be exempt from all other taxation thereon during that period; that it was to establish another branch at Columbus, Ky.; that it was to restrict its circulation; that its business involved a large capital, the profits of which were limited to 6 per cent. interest; that well-defined and permanent rules were essential to its successful management; that changes in its chartered privileges might hazard its

success and safety, and render uncertain and precarious a business whose success depended upon a steady adherence on the part of the State to its plighted faith—these considerations induce the belief that the Acts of 1858 and 1872 were intended to continue in force an irrevocable contract.

Franklin County Court vs. Farmers' Bank.—The appellee was chartered in 1850, which was to continue in force until the — day of —, 1880. By the fifteenth section of said charter, the appellee was required to pay annually into the State Treasury 50 cents on each \$100 of its capital stock, "which," according to said section, "shall be in full of all tax or bonus." By an Act of the Legislature, approved March 10, 1876, the appellee's charter was extended for the period of twenty-five years, from and after the expiration of the time fixed in said charter. The principles announced in the Bank of Kentucky case, *supra*, apply to this case.

Franklin County Court vs. Deposit Bank of Frankfort.—The appellee was chartered March 3, 1863, to continue twenty years. There was no specific tax agreed on in the charter, but, by the general law then in force, the appellee was required to pay annually into the State Treasury 50 cents on each \$100 of its stock. It may be conceded that as the appellee and the State by the terms of the charter, made no contract in reference to taxation, the State would have the power to subject the appellee to the payment of such taxes as are imposed upon persons generally, and that the appellant would have the right to tax the appellee under the law of 1876. But the Legislature, by an Act approved March 18, 1871, declared "that the tax or bonus now paid by said bank in future shall be in full of all taxation, but this shall not be construed to apply to city tax upon real estate owned by it." By an Act approved February 23, 1882, the appellee's charter, together with the foregoing amendment, was extended and continued in force for twenty years, from the 3rd of March, 1883. The language of the amendment of 1871, "in full of all taxation," not only exempts the appellee from the payment of any other tax, whether County or State; but its meaning is made doubly clear by the succeeding clause that excepts from the exemption city taxes on its real estate. Also, if the Act of 1876, in the light of the Act of 1856, should ordinarily be construed as repealing the exemption from taxation so far as the appellant is concerned, the Act of 1882 puts that matter at rest; for by said Act, the Act of 1871 is expressly continued in force, thereby showing that it was the intention of the Legislature that the Act of 1876 should not apply to the appellee.

The City of Frankfort vs. The Farmers' Bank of Kentucky.—From what has been said in the case of the Franklin County Court *vs.* The Bank of Kentucky, it follows that the appellant, the City of Frankfort, has no authority to tax the real estate belonging to either of the appellees.

The judgment of the lower court in each case is affirmed.

Franklin County Court *vs.* The Bank of Kentucky, *et al.*, Court of Appeals of Kentucky, June 5, 1888.

**COLLECTING BANK—FAILURE—PROCEEDS OF COLLECTION IN CASH DRAWER
—CAN OWNER TRACE PROCEEDS AND RECOVER IN FULL FROM RECEIVER,
OR ONLY SHARE AS A GENERAL CREDITOR ?**

The material facts of this case are the following : On the 16th June, 1887, the Montgomery Oil Works drew its draft on the American Cotton Oil Company of Cincinnati for the sum of \$2,379.56 in favor of the First National Bank of Montgomery, Ala. The payee forwarded the draft to the Fidelity National Bank for collection, under a special indorsement thereof, as follows: "Pay to Ammi Baldwin, Cashier, or order, for collection, for account of the First National Bank of Montgomery, Ala." The draft so indorsed was received by the Fidelity National Bank, at Cincinnati, on June 18, 1887; was duly presented on that day for payment, and was paid and taken up by the drawee, who gave its check on the Citizens' National Bank of Cincinnati to the Fidelity National Bank for the amount of the draft. This check of the drawee, so accepted by the Fidelity National Bank, was received and treated as money. It was placed in the cash drawer of said collecting bank

as so much cash, and at the close of that day's business the amount of said collection was deducted from the total amount of cash on hand belonging to said Fidelity National Bank, and the letter of transmission from the First National Bank of Montgomery was placed in the cash drawer of said collecting bank to indicate that said sum of \$2,379.56 so deducted from the total cash, but still left in the cash drawer in the shape of said check given by the drawee in taking up the draft, belonged to the First National Bank of Montgomery. On June 20, 1887, the check of the drawee (the American Cotton Oil Company) was collected by the Fidelity National Bank, through the Clearing-House, by a change or exchange of credits, and the Fidelity National Bank thus actually realized and received the amount of said draft on the afternoon of June 20, 1887. At the close of that day's business the cash and cash assets of said Fidelity National Bank showed an excess over what actually belonged to it of \$2,379.56; and to account for this excess, and to show to whom it really belonged, that amount was deducted from the total of cash and cash assets, and that same memorandum, in the shape of the transmitting bank's letter, was placed with the cash assets, to indicate the fact that \$2,379.56 of the money in the cash drawer of the bank was the property of the First National Bank of Montgomery, Ala. The clerk who transacted the business gave this account of the matter. In reply to the question as to what was done by the collecting bank, if anything, to distinguish the proceeds of said draft, or to indicate to whom said surplus of cash belonged, he stated:

"Well, at the end of this day's business (June 18, 1887), as that money was not remitted, by order of Harper (the Vice-President), and as they, the First National Bank of Montgomery, had no regular credit account with the Fidelity, instead of remitting it we simply took that much off the total amount of our cash; not actually taking the money out, but taking off the total of our cash, the \$2,379.56, which made our cash appear that much less than it really was."

This was again done on the afternoon of June 20, 1887, after the drawee's check, which took up the draft, had been collected by the Fidelity Bank through the Clearing-House. It thus appeared that this fund belonging to the First National Bank of Montgomery, was, so far as the bookkeeping of the collecting bank could do so, separated and kept distinct from the other cash belonging to the Fidelity Bank, and was further identified by placing in the cash drawer the transmitting bank's letter, to indicate that said excess of cash on hand belonged to said bank. The Fidelity National Bank transacted no business after June 20, 1887. It was insolvent, and the Comptroller of the Currency, on the morning of June 21, 1887, caused its doors to be closed and took possession of its assets. The defendant, David Armstrong, was appointed Receiver, and upon taking possession of the bank's effects, he found on hand said excess of \$2,379.56 more than belonged to the Fidelity National Bank, and in the cash drawer said memorandum indicating that said excess belonged to the First National Bank of Montgomery. Finding in the cash assets of the bank this sum of \$2,379.56 more than the Fidelity National Bank was entitled to, with the memorandum indicating to whom it actually belonged, the Receiver, for the purpose of disposing of it, or of accounting for the same, on the 15th of September, 1887, credited the amount to the First National Bank of Montgomery on the books of the Fidelity Bank. "He did that," said the clerk, "because we had this \$2,379.56 more cash than our books called for."

The First National Bank of Montgomery instituted the present suit to recover this fund which thus came into the actual possession of the Receiver. Its claim was resisted on the grounds that the Fidelity Bank never actually received the money, or, if it did, the fund was mingled and blended with other cash of the bank, and could not be so identified as to entitle the claimant to recover it, and that the Montgomery bank could only be regarded and treated as a general creditor of the Fidelity Bank for the amount so collected.

Held: Neither of these positions interposed for the defense can be maintained under the facts of the case and the law applicable thereto. It

admits of no question that the Fidelity Bank did, in point of fact, receive and realize the amount of plaintiff's draft sent to it for collection, and that as the result of the transaction, there was found in the collecting bank's assets, when the same went into the hands of the Receiver, the sum of \$2,379.56 more cash than the Fidelity Bank was entitled to, or its books called for as belonging to it. It is equally clear that this excess was derived from the plaintiff's draft, which the Fidelity Bank actually collected. The mode or method of collection is not material. The result of the transaction was that the Fidelity Bank obtained and held \$2,379.56 of funds that did not belong to it, but was justly and equitably the property of the Montgomery bank, and this fund, having actually come into the possession of the Receiver without right, cannot properly be withheld from the true owner. If, after having accepted the check of the drawee in payment of the draft sent to it for collection, the Fidelity used the check as money, and thereby retained in its coffers an equal amount in cash, how can it be said that it did not receive the money on the draft it had received for collection for account of the transmitting bank? Equitable rights and trusts are not to be adjusted and enforced on grounds so narrow and technical as defendant's position assumes.

It is well settled by the authorities, and was so held by this court in the case of *Winter's Bank vs. Armstrong*, that, under a special indorsement like that placed upon the draft forwarded for collection, the relation thereby created between the transmitting and receiving bank was merely one of principal and agent; that no act of the collecting agent could change that relation; and that the principal could follow and recover his funds so long as they could be traced and identified. The act of the Receiver on the 15th September, 1887, in crediting the Montgomery bank with the amount of the collection on the books of the Fidelity Bank, in no way changed the agency relations of the parties, and could not lawfully operate to convert the Montgomery bank into a general creditor of the Fidelity, and thus force it to share with other creditors in the distribution of its own funds. The old idea that because money has no ear-marks it cannot be followed when mingled with the funds of a wrong-doer, has long since been exploded. The decisions in England and in this country now allow a trust fund to be followed as long as it can be traced, and its identity ascertained, whether in its original or in some substituted form. A leading case on this subject is *Taylor vs. Plumer*, 8 Maule & S., 562, where the trust fund was traced through several changes; Lord Ellenborough holding that the property in its new form still belonged to the principal, notwithstanding the changes which the agent had made in its character. He laid down the principle, since generally recognized, that "the product of, or substitute for, the original thing still follows the nature of the thing itself, so long as it can be ascertained to be such, and the right only ceases when the means of ascertainment fail." In *Knatchbull vs. Hallett*, 13 Ch. Div., 696, the beneficial owners were allowed to follow their trust funds into the agent's, or bailee's bank account, and into certain bonds in which it had been invested. In *Overseers vs. Bank*, 2 Grat., 544, an attorney having collected money for his clients, deposited the same in the bank in his own name, and mixed it with his own funds. The rightful owner was allowed to recover it, tracing it simply as a gross sum; the court holding that whether the fund remain in the hands of the agent or his representative or assignee, it could be followed until it was transferred to some *bona fide* purchaser or assignee for value without notice. So in *Whitley vs. Foy*, 6 Jones, Eq. 34, an agent had deposited his principal's funds in his own name. The principal was allowed to follow and to recover the same. The same rule was applied in *Kip vs. Bank*, 10 Johns, 63, where the trustee had deposited the trust fund in bank in his own name. The trustee became insolvent, and the funds so deposited passed into the hands of his assignee in insolvency. The beneficiaries were allowed to follow it; Kent, *C. J.*, saying that the necessary requirement of distinguishing the trust fund was met by showing that it went into the bank deposit, and thence into the hands of the defendants. That the right to follow and recover trust or quasi trust funds does not cease until "the means of ascertainment fail," is settled by numerous later cases, which need

not be noticed in detail. (See *Van Alen vs. Bank*, 52 N. Y., 1; *Cragie vs. Hadley*, 99 N. Y., 181; *Long vs. Majestre*, 1 Johns, Ch. 305; *Bank vs. King*, 57 Pa. St., 202; *Cook vs. Tullis*, 18 Wall, 332; *Bank vs. Insurance Co.*, 104 U. S., 54; *Schuyler vs. Bank*, 27 Fed. Rep., 424.) In the present case the means of ascertainment of the plaintiff's fund have not failed. Its money has been clearly traced into the possession of the Fidelity Bank, and thence into the hands of the Receiver, who is in no sense an assignee or transferee for value, so as to defeat the plaintiff's right to follow and recover its property. It follows that the plaintiff is entitled to a decree against the defendant for the recovery of said sum of \$2,379.56, with costs of suit. No interest will be allowed on the \$2,379.56 while held by the Receiver, as he has not made interest on the funds.

First National Bank of Montgomery vs. Armstrong, United States Circuit Court, S. D., Ohio, W. D., May 10, 1888.

BANK AND DEPOSITOR—SUCCESSION BY BANKING FIRM TO BUSINESS OF PREDECESSOR—LIABILITY TO DEPOSITOR OF ORIGINAL FIRM—LIMITATION OF ACTION ON DEPOSIT.

This was an action by the plaintiff, Starr, against the defendant, Stiles, as assignee of the insolvent firm of Hudson & Co., bankers, to have his claim for \$4,382.50 allowed against the estate of Hudson & Co., and also to recover from the assignee 80 per cent. in dividends; Starr alleging that Stiles, as assignee of the estate, had declared three dividends aggregating 80 per cent. on the indebtedness of Hudson & Co., and that said assignee had paid no dividend or sum whatsoever to plaintiff on his claim. Defendant admitted that D. J. Edwards, the assignor of plaintiff, had deposited with Safford, Hudson & Co., a firm composed of A. P. K. Safford, Charles Hudson, James H. Toole and John Wasson, between August 14, 1879, and January 1, 1880, \$1,182.50, and with the firm of Safford, Hudson & Co., composed of said Safford, Hudson, Toole and J. S. Vosburg, between January 1, 1880, and March 26, 1880, the further sum of \$3,250, and that no more than \$310 and \$230 had been drawn from said firm of Safford, Hudson & Co. The evidence showed that the various banking firms of Safford, Hudson & Co. succeeded each other, and that the firm of Hudson & Co. succeeded the last firm of Safford, Hudson & Co.; that each firm paid and collected the accounts of its predecessor as though no change had been made, and the check-books issued by Hudson & Co. stated that they were the successors of Safford, Hudson & Co. It appeared, also, that each firm assumed the obligations of their predecessors. The ledgers of Safford, Hudson & Co. showed the original account with Edwards, and its transfer through successive ledgers to the last one used by Hudson & Co., at the time of their failure; and it was agreed that as each of the successive firms was organized, it took and continued to use the books of the former firm until the necessities of the business required a new set, when all accounts not theretofore closed were transferred to a new book. The assignee testified that the account of Edwards was not paid, and on the books of Hudson & Co. it was charged against said firm as one of its debts. He admitted that if Edwards were present he would testify that "he had made the deposits, and knew of the various changes in said banking firms at the time the same were made, and knowing that each of said firms had received all the property, assets and deposits of its immediate predecessor, assumed all the liabilities thereof, and, believing each firm as it succeeded the other to be responsible and liable to him, and intending to continue each of the said successive firms as his bankers, he continued to leave his deposits and money with the new firms, respectively, after they had succeeded the old firms," as set forth in the complaint.

The district court adjudged that the plaintiff had a valid claim against the estate of Hudson & Co. for \$3,072.50, and rendered judgment in his favor against defendant for \$921.75 out of the estate. Defendant appealed to the Supreme Court of Arizona.

Held: It is urged against the validity of this claim that the money of Edwards was not deposited with the firm of Hudson & Co., and hence that

there is no privity of contract between Edwards and the firm; that he had deposited money with Safford, Hudson & Co., and that that company owed him; and while, as between the two firms, Safford, Hudson & Co. might require Hudson & Co. to reimburse them, should they be required to pay the same by the terms of this contract, that Edwards, being no party to that contract, could not enforce it against the latter firm. This would be true unless he, by some act of his, waived his right to sue Safford, Hudson & Co. and made Hudson & Co. his debtor. The depositor Edwards, when he had knowledge of the change of firms, had the right to withdraw his funds from the bank, and to treat solely with the firm that received his deposit. But if he, after full knowledge of all the facts, acquiesced in the change of firms, permitted his funds to remain with the new firm, and they treated him as their depositor and carried his balance into their books, they cannot be heard to say that they do not owe him. They are estopped by their acts. The evidence shows that the books of Hudson & Co. show that Edwards was a creditor to the amount he claims at the time of the assignment of Hudson & Co. to Stiles; and as the assignment was for the benefit of creditors, it was for the benefit of this creditor; and as it appears that dividends to 30 per cent. have been paid other creditors, this creditor was entitled to a like amount out of the estate. This was the judgment of the court below.

It is also contended that, as Edwards had received \$1,000 from Wasson and Safford, and had released them, that thereby Hudson & Co. were released, and the familiar principle is invoked that the release of one joint debtor is a release of all. The Revised Statutes of Arizona, Sec. 133, repeals this well known doctrine of the common law, and enacts that the release of one joint debtor does not release the others. These were not, however, joint obligations of these firms. The contract of each, whatever it was, whether expressed or implied, was a several obligation. It is not necessary to decide whether Edwards is estopped to assert that Safford, Hudson & Co. are his debtors, by permitting his funds to remain with Hudson & Co. after knowledge of the transfer. This only need to be decided: that Hudson & Co. became his debtors by their acts, and while Edwards might have repudiated it, they could not.

Again it is urged that the deposit checks or tickets in evidence (and they were evidences to the depositor of his deposit) were due when given, and the statute of limitations began to run against them at that time; that a deposit in a bank creates a mere debt or chose in action. This is true for many purposes; but when a bank holds the funds of a depositor subject to call at any time, the contract is to pay on demand, and the statute does not begin to run until demand.

Judgment affirmed.

Starr vs. Stiles, Supreme Court of Arizona, October 1, 1888.

PROMISSORY NOTE SIGNED "INDEPENDENCE M'FG CO., B. S. BROWNELL, PRES."—INDIVIDUAL LIABILITY OF PRESIDENT—PAROL EVIDENCE INADMISSIBLE TO SHOW DIFFERENT INTENTION OF PARTIES.

This was an action on the following promissory note:

INDEPENDENCE, Iowa, July 18th, 1884.

One year after date, value received, we promise to pay Daniel Heffner, or bearer, two hundred dollars, with eight per cent. from date until paid. Payable at Independence, Iowa, with reasonable attorney's fees if sued. If interest is not paid when due it shall draw interest at eight per cent.

INDEPENDENCE M'FG Co.
B. S. BROWNELL, Pres.
D. B. SANFORD, Sec'y.

The defendant, Brownell, filed a demurrer to the petition, which, being sustained, the cause was brought, upon appeal, to the Supreme Court of Iowa and the judgment was reversed. (See 70 Iowa, 591.) The defendant then filed an answer in which he alleged that the instrument sued on was the note

of the Independence Manufacturing Company alone; that it was given for an indebtedness of that company to plaintiff, and was executed under the seal of the company, which was a corporation; that the defendant was President and D. B. Sanford was Secretary of the company, and it was their duty, under its by-laws, to execute in its name all contracts entered into by it; that in pursuance of that authority, they signed the note, intending to bind the company only, which facts were well-known to plaintiff at the time, and that he accepted it with the understanding that the company alone was to be bound. Plaintiff demurred to the answer, and, the demurrer being overruled, he elected to stand on his demurrer, and judgment was given for defendant for costs, from which plaintiff appealed.

Held: 1. On the former appeal we held that "the note purports on its face to be the note of all the persons, including the corporation, who executed it." The correctness of that holding has been questioned on this appeal, and numerous authorities have been cited with which it is claimed by counsel to be in conflict. But the settled rule is that we will not on a second appeal review or reverse the decision made on the former appeal. (*Adams Co. vs. Railroad Co.*, 55 Iowa, 94). The holding is therefore the law of the case.

2. The only other question in the case is whether extrinsic evidence would be admissible to show the intention of the parties. There is no ambiguity in the language of the contract, but it clearly expresses the undertaking of the parties. The almost uniform holding of the authorities is that in such cases parol evidence of the intention of the parties is not admissible. We think the demurrer should have been sustained.

Judgment reversed.

Heffner vs. Brownell, Supreme Court of Iowa, October 4, 1888.

INDORSEMENT OF NOTE BY CORPORATION—AUTHORITY OF AGENT.

This action was against the defendant, a corporation, as indorser of a promissory note. It was, in fact, indorsed by one Ingersoll, the treasurer of the defendant. On the trial, in the Superior Court of the City of New York, the defendant denied that Ingersoll had authority from it to indorse its name. The trial Judge directed the jury to render a verdict in favor of the defendant. Plaintiff appealed to the General Term of the Court, which handed down the following opinion:

The plaintiff proved that for many years Ingersoll had signed the name of the defendant as maker of notes, and had indorsed its name upon notes to the knowledge of the defendant—the defendant recognizing its liability in these instances. This was proof that, at the time of these instances, Ingersoll acted as agent of defendant, with authority to bind it. This agency, upon the facts in the case, was presumed to continue to the time of the indorsement of the note in suit. The form of the indorsement is the same as that previously used by Ingersoll. Ingersoll being the authorized agent to sign and indorse and transfer, bound the defendant, by any express or implied representation by him, that the conditions which limited his power as between the defendant and himself had been complied with.

Authority to one to act for another need not be conferred in words. Such authority may be inferred from the course of business and employment and from the fact that similar actions of the assumed agent have been acquiesced in by the principal as done by his authority. But the defendant contends, and the evidence tends to show, that the note in question is an accommodation note, and that an authority to indorse an accommodation note cannot be inferred from the fact that the alleged agent had the right to indorse business paper. This contention cannot be sustained. It is not necessary, in order to authorize the inference of general agency, that the person who has assumed to act as agent should have done an act the same in specie as the one on which the alleged principal is sought to be held. If he has usually done things of the same general character and effect with the assent of his principal, it is enough (*Commercial Bank vs. Norton*, 1 Hill, 501).

This authority to act for another, which is inferred from appearances, operates only by way of estoppel, and takes the place of real authority only

when some person has acted upon the appearances (*People vs. Bank of North America*, 75 N. Y., 548) and has, in good faith, parted with value.

It, therefore, became necessary for the plaintiff to show that it had parted with value, and that it had knowledge of the apparent authority of Ingersoll to indorse the note in question in the name of the defendant. Evidence was offered which tended to show that plaintiff had parted with value. The plaintiff then attempted to show that at the time it discounted the note in suit, its president was told that the indorsement on the note was defendant's regular indorsement, that is, that Ingersoll was authorized by the defendant to indorse notes for it. This evidence was excluded by the court, and the plaintiff duly excepted. This ruling was erroneous. It is not necessary that the appearances on which plaintiff acted should arise from transactions had between the plaintiff and defendant. It is sufficient that there were transactions from which the authority of Ingersoll to act as defendant's agent in indorsing the note in suit could be inferred, and that plaintiff had knowledge of these transactions.

This court has lately held that where a corporation has in many instances recognized that one of its officers was its agent, competent to sign its name in a certain manner, it is estopped from taking, against a holder for value, the position that such an officer had not the power to sign its name in that manner (*National Park Bank vs. The German American Mutual Warehousing and Security Co.* 58 Superior Court Rep. 367).

The case now before us is to be distinguished from the case of *The People's Bank against St. Anthony's & C., Church* (109 N. Y., 512), in which case the plaintiff failed to establish or to give evidence which raised a presumption that the notes in question were the authorized obligations of the defendant. It is true that the plaintiff in that case did prove that the notes were signed by the president, secretary and treasurer of the defendant, and that said officers constituted three of the five members of defendant's Board of Trustees. But the defendant proved that the notes were signed by the officers of the defendant, acting separately, and not at the same time or place, or while assembled as a Board of Trustees. It was held in that case that "the trustees had no separate or individual authority to bind the corporation, and this, although the majority of the whole number (of trustees) acting singly and not collectively as a board, should assent to the particular transaction. This principle * * * is * * * expressly applied to the action of religious corporations by the Act of 1818, which declares that * * * a "majority of the trustees being lawfully convened, shall be competent to do and perform all matters and things which such trustees are authorized or required to do or perform." But this very case is an authority by implication, for the principle that the authority of the agent to bind his principal may be inferred from other similar transactions; for it is said, "A presumption has never been indulged in to sustain an allegation that an unsealed contract, executed by officers of a corporation in its name, was a corporate obligation, unless authority was implied from the nature of the office, or from previous similar dealings recognized by the corporation, or a ratification was shown. When an agency is once lawfully constituted, the agent may, in some cases, bind the principal by a false representation that a particular transaction of the same general nature with that authorized, is within the power conferred, when in fact it has never been authorized, and was a fraud upon the power." An officer of a corporation may, by the conduct of its directors or managers, be invested with capacity to bind the corporation by acts beyond the powers inherent in his office. Thus, when in the course of business an officer of a corporation has been allowed to manage its affairs, his authority may be implied from the manner in which he has been permitted to transact such business (*National Park Bank vs. German-American Mutual Warehousing and Security Co.*, 53 Superior Court Rep. 367). In such cases the officer's authority does not depend so much upon his title, or upon the theoretical nature of his office, as on the duties he is in the habit of performing (*Fifth Ward Savings Bank vs. The First National Bank*, 7 Atlantic Rep. 818).

It is true that one who deals with an officer of a corporation, is presumed

to know the extent of his power to bind the corporation. But when an officer of a corporation has made, in the name of the corporation, what purports to be the contract of the corporation, and this contract is upon its face one that the corporation has authority to make, and its only defect consists in some extrinsic fact, such as the purpose or object for which it was made, such contract is binding upon the corporation, and the person with whom the contract is made is not bound to inquire as to such extrinsic fact. (See *Farmers' and Mechanics' Bank, &c., vs. Butchers' and Drovers' Bank*, 16 N.Y., 129, 130; 4 American and English Encyclopædia of Law, 227, and cases there cited).

Since this case was argued before us, the Supreme Court in the Fifth Department, in an action brought against the above-named defendant on a state of facts similar to the facts in this case, has held the defendant as indorser.

The plaintiff's exceptions are sustained, and a new trial is ordered with costs to abide the event.

The Second National Bank of Allentown vs. The Pottler & Stymus Manufacturing Co., New York Superior Court, General Term, October 31, 1888.

ABSTRACT OF CASES.

PROMISSORY NOTE — STATUTE OF LIMITATIONS — ACKNOWLEDGEMENT IN WRITING REVIVES DEBT.

An endorsement made and signed by the debtor on a promissory note after it has become barred by the Statute of Limitations in these words, "I hereby acknowledge the indebtedness of this note," takes the note out of the operation of the statute.

Drake vs. Signfoos, Supreme Court of Minnesota, November 12, 1888.

INDORSEMENT OF NOTE BY THIRD PERSON BEFORE DELIVERY TO PAYEE—CHARACTER OF LIABILITY ASSUMED—PAROL EVIDENCE.

Where a third person indorses a note before delivery to the payee, it is *prima facie* evidence of a guaranty, but it may be shown that the real contract is that the liability intended to be assumed is that of indorser.

De Witt County National Bank vs. Nixon, Supreme Court of Illinois, September 27, 1888.

PROMISSORY NOTE—REMOVAL OF MAKER—EXCUSE FOR DEMAND OF PAYMENT TO CHARGE INDORSER.

A note was made in Minneapolis, Minnesota, no place of payment being fixed. At the time of the making the payee resided there; the maker then resided in Wisconsin. The payee indorsed the note (the indorsee then doing business in Minneapolis), and knowing that the maker at the time of making the note, and then, resided in Wisconsin. Before the note became due the maker (without the knowledge of the holder) removed from Wisconsin, and became a resident of Minneapolis. *Held*, that this excused demand for payment of note, so as to charge the indorser.

Salisbury vs. Bartleson, Supreme Court of Minnesota, November 12, 1888.

FRAUDULENT CONTRACTING OF DEBT—ATTACHMENT—DISCHARGE.

A and B were in partnership in buying and shipping grain from Fairmont and Geneva, in Fillmore county, Nebraska, to the city of Chicago, the residence of A. A sent his agent to Fairmont, who finding that B was improperly using the money furnished by A for the purpose of carrying on the partnership business, employed an attorney and in B's absence ordered the local banks to pay no more of B's checks until a settlement of the partnership affairs was made. B retained defendant as his attorney, to protect his interest in the settlement, and in any litigation which might follow. A basis of settle-

ment was agreed upon subject to the approval of A, and which was to be submitted to him by B and A's agent in Chicago.

Prior to B's departure for Chicago, he received a check for \$500, the property of the firm, and delivered it to defendant, his attorney, who converted it into money. There was evidence from which the District Court could find that A's agent, while in Fairmont, agreed with defendant B's attorney that A would pay the fees due defendant for his services, in case the settlement was made.

The settlement was approved by A, and the partnership continued. In an action by A against defendant for the \$500, an attachment was procured upon the ground that the debt was fraudulently contracted by defendant, which attachment was, on motion of defendant, discharged upon the ground that the proofs failed to sustain the allegations of the affidavit.

On appeal, *Held*, No error.

Warren vs. Barsby, Supreme Court of Nebraska, November 15, 1888.

NOTICE TO INDORSER—SENDING BY MAIL—SUFFICIENCY.

B was an indorser on a promissory note which was protested for non-payment. The notary public who protested the note placed a copy of the notice in the post-office in Abingdon, Va., in a sealed envelope, addressed to B, Abingdon, Va., B's post-office being at Abingdon. No personal service of notice was made on B, nor was any inquiry made or notice left at either his residence or place of business, though both were close by; his residence only 208 yards from the post-office, on the same street, extended—though just outside the then actual corporate limits of the town of Abingdon—163 yards from the said corporate line. At the date of protest, B was temporarily absent from his residence, where his family remained, he being in the city of Louisville, Kentucky, whence he returned home ten days thereafter. The fact was shown that B did not receive any notice through the mail, or otherwise, of the protest, and never heard of it until over sixteen months from the day of protest. B at the time he indorsed the note had no knowledge of any usage of the bank, who owned the note, sending notices of protest through the post-office to persons living outside of the town, but in the vicinity. B's family were at his residence, and his place of business was open, and his book-keeper in attendance there during business hours.

Held: B, as indorser of the note sued upon, never had any legal notice of the protest; and he did not, in fact, ever receive or hear of, for more than sixteen months thereafter, the drop-letter notice deposited in the post-office at Abingdon; and if he had, even this would have been insufficient, living, as he did, in close proximity to the bank which was the holder of the note, and in the same place, in fact, though not within the actual, corporate limits of the then old, original, legal line of the town. He was entitled to personal service of notice; and notice by drop-letter in the post-office of the town, without any special carriers for delivery of mail matter, was not good as a substituted service of notice. "If the parties reside in the same city or town, the indorser must be personally notified of the dishonor of the bill or note, either verbally or in writing, or a written notice must be left at his dwelling-house or place of business." (Williams vs. Bank, 2 Pet., 102.) Mr. Justice Story states the rule in these words: "Where the party entitled to notice and the holder reside in the same town or city, the general rule is that the notice should be given to the party entitled to it, either personally, or at his domicile or place of business." (Story, Bills, § 352.)

Judgment for indorser.

Brown vs. Bank of Abingdon, Supreme Court of Appeals of Virginia, July 26, 1888.

PROMISSORY NOTE—OMISSION TO FILL BLANK—VALIDITY.

Where, in the execution of a promissory note, a blank space is left before the words "promise to pay," apparently intended to be filled by the pronoun "I" or "We," it is competent for the payee, or any indorsee of the note, to

fill such blank space with the proper pronoun, without impairing in any manner, or to any extent, the validity or binding force of such note as a contract. (Marshall vs. Drescher, 68 Ind., 359.)

Brown vs. First National Bank of Indianapolis, Supreme Court of Indiana, October 10, 1888.

LAW NOTES AND COMMENTS.

THE ILLINOIS SAVINGS BANK ACT HELD UNCONSTITUTIONAL.—By an Act taking effect May 23, 1887, the Legislature of Illinois made provision for the organization of savings societies, or institutions for savings, by thirteen or more citizens of the State. No provision was made for the submission of the Act to a vote of the people before it should take effect, and it was, therefore, claimed to be void under Section 5 of Article 11 of the Constitution of the State, which provides as follows: "No Act of the General Assembly, authorizing or creating corporations or associations with banking powers, whether of issue, deposit, or discount, nor amendments thereto, shall go into effect or any manner be in force, unless the law shall be submitted to a vote of the people at the general election next succeeding the passage of the same, and be approved by a majority of all the votes cast at such election for or against such law."

The Attorney General of the State instituted a proceeding against the "Chicago Society for Savings," which was organized thereunder to test the validity of the Act, and the Supreme Court of Illinois have rendered a decision (Reed *et al.* vs. People *ex rel.* Attorney General, September 27, 1888), declaring it unconstitutional. The court states that the inquiry is not whether the defendant may or may not be a savings bank, but whether the Act under which it was organized "confers upon it banking powers of issue, of deposit, or of discount." In section 15 of the Act it is declared that no such corporation, organized thereunder, shall be deemed a bank or company having or exercising banking powers; but the court holds that these declarations do not affect the powers conferred, nor do they limit the authority of the corporation. If any of the sections of the Act, in plain and express words, confers banking powers, the character of the corporation is to be determined from the powers thus conferred, and not from the fact that some portion of the Act declares the corporation shall not be deemed a bank. After reviewing the provisions of the Act, the court states: "Under the sections of the Act we have referred to, the corporation is invested with full powers to receive money on deposit, and to discount notes. These are banking powers as has been abundantly shown. In many of the sections of the Act there seems to have been a labored effort to conceal the real powers conferred upon the corporation, and the relation existing between the corporation and its patrons; but in section 19 the mask seems to have been removed, and it is there plainly disclosed that those who place their funds in the hands of the corporation are depositors, and the corporation is dealing with the depositors, and using their funds as a bank."

It was contended on the argument that the section of the constitution above quoted had reference only to banking corporations with stockholders who owned the bank, and that as the defendant had no stockholders, it was unaffected by the Constitution; but the court holds that the terms of section 5 are general, and prohibit any Act creating a corporation with banking powers, whether such corporation may have stockholders or not, unless the law should be adopted by vote of the people.

PAYMENT OF RAISED CHECKS.—Judge David McAdam, of the City Court of New York, has rendered a decision (November 16, 1888) in the case of William W. Flannigan against the National Bank of Dover, N. J., that relates to the negotiation of raised checks. On April 21, 1888, one M. R. Ford applied to and obtained from the National Bank of Dover a draft on the National Broadway Bank for \$8.50. Ford, or some one in his interest, then added a "y" to the eight in the body of the check, and a naught between the

"8" and the "5" numerals, making it appear as a draft for \$80.50. In this condition he presented the check to Flannigan, and was paid in good faith the raised amount. When Flannigan presented the check to the National Broadway Bank the Paying Teller suspected an alteration and refused to honor the draft. Flannigan then sued to recover the \$80.50 from the National Bank of Dover.

Judge McAdam decided in favor of the defendant, holding that in determining which of the two innocent persons, the plaintiff or defendant, must suffer by the fraudulent act of Ford, the payee of the draft, the law is that the duty of ascertaining the genuineness of all parts of the check or draft (except the signature of the drawer) devolves upon the holder, and that the drawee of a bill is presumed to know only the handwriting of the drawer, and this he cannot, after payment, dispute to the prejudice of the holder to whom the payment has been made. The defendant drew a check for \$8.50 and exercised all reasonable care both in the writing of the body of the check and the numerals. There was no negligence in any particular on the part of the defendant. With the plaintiff it was different. He paid to Ford the \$80.50 without taking the precaution to ascertain whether or not the check was genuine in all its parts, and, therefore, must suffer for his negligence.

In concluding his decision Judge McAdam says :

"In the present instance Ford was clothed with no authority whatever by the defendant. It confided nothing to him, and he had no more right to alter the completely filled up draft which he purchased from it than he would have had to alter one of its bank bills by making it \$50 instead of a \$5, for the draft given to him was as completely an executed contract when he received it as the promise to pay contained in the ordinary bank notes issued by a banking institution."

Judge McAdam maintains that where an instrument has once been effectually annulled by forged alterations it cannot receive vitality and life by mere transfer to an innocent purchaser.

SUFFICIENCY OF INDICTMENT FOR FORGERY OF A CHECK.—A decision has just been handed down (November 13, 1888), by Chief Justice Gilfillan, of the Supreme Court of Minnesota, in the case of the State against H. W. Curtis, which is important as establishing a precedent in criminal practice in Minnesota courts. The case was one of forgery, and the defendant was convicted in the court below. The instrument on which forgery was charged was submitted in court and admitted as a check, but the indictment failed to set forth one particular item of description, viz., the name of the drawee. On this ground an appeal was taken from the lower court, and also on the ground that the defendant, when sworn as a witness in his own behalf, was asked if he had ever been convicted of crime. The syllabus of the case in question is as follows:

An indictment for forgery charged that "consisted of indorsing the name of Fred W. Smith upon a check dated March 8, 1887, for the sum of \$50, signed and drawn by J. A. Gilfillan and payable to the order of Rev. Fred W. Smith," the name of the drawee not being given. Held sufficient. A defendant in a criminal case sworn as a witness on his own behalf may on cross-examination be asked if he has been convicted of crime. Order affirmed. GILFILLAN, C. J.

Judges Mitchell and Vanderburgh both dissent from the opinion of Chief Justice Gilfillan. The former filed an opinion, Judge Vanderburgh concurring.

Objection is based on the ground that the writing submitted in evidence was not a check, while it was called by that name. In the dissenting opinion Judge Mitchell says that

"It probably would be wise policy for the Legislature to change the law, as has been done in England, by providing that the forged instrument may be described simply by the name by which it is usually known—as a promissory note, bill of exchange, or check—without further description, but

the common law rule is so well settled otherwise, that I think the Legislature, and not the courts, should make the change."

REPLIES TO LAW AND BANKING QUESTIONS.

Questions in *Banking Law*—submitted by subscribers—which may be of sufficient general interest to warrant publication will be answered in this Department.

A reasonable charge is made for Special Replies asked for by correspondents—to be sent promptly by mail. See advertisement on another page.

Editor Rhodes' Journal of Banking:

DENTON, Tex., November 20, 1888.

DEAR SIR:—How should interest be computed on a note drawn as follows:

"On or before two years after date, for value received, I promise to pay to the order of A, twenty-four hundred dollars with interest at the rate of 6 per cent. per annum from date. Interest payable semi-annually." Signed B.

B pays \$100 per month on said note at the end of each month, and the interest at the end of each six months. Now, should the interest be compounded on B each month or should the credits draw 6 per cent. interest from date of payment till the close of the six months interest period?

By answering above you will oblige,

A SUBSCRIBER.

Answer.—We think that B should receive credit for the interest on the payments from the date they were made.

Editor Rhodes' Journal of Banking:

PITTSBURGH, Pa., Nov. 19, 1888.

DEAR SIR:—A bank at A sends to its correspondent at B a check drawn by a pension agent on the United States Assistant Treasurer at Boston. B bank in turn forwards the check to its Boston correspondent. The indorsement being imperfect payment is refused at the Sub-Treasury and the Boston bank returns it through the mails to B. It is lost in transmission, and a duplicate cannot be obtained for the reason that it is not known which pension agent issued it nor to whom it was payable. Upon whom will the loss fall? We claim the Boston bank is bound to deliver it to B before it can claim credit for the same and, therefore, it (the Boston bank) must bear the loss. Are we right? An answer through the columns of your valuable JOURNAL will be appreciated.

CASHIER.

Answer.—We do not think the Boston bank can be held liable for the loss of the draft. Its position is that of a collecting agent, and it has been guilty of no want of reasonable care with regard to the draft. Returning it by mail was the usual and proper course. As between the Boston bank and the owner, the loss will fall on the latter.

Editor Rhodes' Journal of Banking:

JACKSONVILLE, Ill., Nov. 8, 1888.

SIR:—On Friday, June 17, 1887, N, a party in the city of J, receives per mail from a party in Cincinnati, a check drawn by the latter upon a Cincinnati bank. On the next day, June 18th, N deposits the check with his banker in J. and the bank on the same day forwards the check to its St. Louis correspondent for collection and credit, this being its customary manner of handling Cincinnati items. On June 20th (the next business day) the St. Louis bank forwards the item to its Cincinnati correspondent, who receives it on the 21st of June; but on the same day and before the check is presented, the Cincinnati bank on whom the check is drawn, fails and closes its doors, and the check is therefore not paid. The drawer now claims that N has no recourse upon him for the amount of the check, because the check was not sent direct to Cincinnati by the bank in J instead of going by way of St. Louis. Is he correct?

SUBSCRIBER.

Answer.—Daniel on Negotiable Instruments at §1592 states the rule applicable to the case in question as follows: "Where the payee receives the check from the drawer in a place distant from the place where the bank on which it is drawn is located, it will be sufficient for him to forward it by the post to some person at the latter place on the next secular day after it is received; and then it will be sufficient for the person to whom it is thus forwarded to present it for payment on the day after it has reached him by

due course of mail. (Citing: Middletown Bank vs. Morris, 28 Barb., 616; Smith vs. Jones, 20 Wend., 192; Moule vs. Brown, 4 Bing., N. Cas., 266; Hare vs. Henty, 30 L. J. C. P., 302; Rickford vs. Ridge, 2 Camp, 537; Bond vs. Warden, 1 Collyer, 588; Story on Notes, §498.) This period, which is requisite for the convenient presentment of the check by diligent means must have been contemplated by the drawer, and he remains absolutely liable although the bank might fail pending its duration."

Had this rule been strictly followed, and the check sent direct to Cincinnati, instead of *via* St. Louis, it would have left J on the 18th, and would not have reached the bank in Cincinnati until the next secular day, viz., the 20th. The Cincinnati bank would then have until the close of business on the 21st to present it, and as the check was presented on the 21st it does not seem that the sending by way of St. Louis in this case would affect the liability of the drawer.

Editor Rhodes' Journal of Banking: CONCORDIA, Kansas, Oct. 31, 1888.
 SIR: Is the waiver on the face of the following note binding upon indorsers and guarantors on the back? SUBSCRIBER.

\$.....	CONCORDIA, Kansas,	188.....
.....after date, without grace, for value received.		
I promise to pay to the order of		
THE FIRST NATIONAL BANK OF CONCORDIA,		
....., Dollars.		
at the First National Bank, Concordia, Kansas, with interest at the rate of 12 per cent. per annum from maturity until paid.		
We, the indorsers, guarantors, assignors and sureties, severally waive presentment for payment, protest and notice of protest for non-payment of this note, and all defense on the ground of any extension of time of its payment that may be given by its holder or holders to the maker or makers thereof.		
P. O. Address.....
Sec....., Twp....., Range.....

Answer.—Yes. The indorsers are bound by the contract appearing on the face of the note.

Editor Rhodes' Journal of Banking: SALINA, KANS., Nov. 16, 1888.
 SIR:—A check is payable to John Johnson or order, and presented by Samuel Smith, there being two intermediate indorsements as between Johnson and Smith. Having a passing acquaintance with Smith and knowing the two previous endorsemments to be correct, the banker pays the check. Later the endorsement of John Johnson proves to be a forgery. Has the banker recourse on the endorsers following Johnson? An old Cashier says not. I differ with him. FRANK C. MILLER, Cashier.

Answer.—An indorsement warrants the genuineness of all prior signatures, and such warranty is broken when the indorsement of the payee turns out to be forged. The bank undoubtedly has a right of action against the last indorser to whom it has paid the amount, and probably, also, against the others.

Bank Book-keeping.—Owing to the great length of the yearly index and other current matters which appear in this number of the JOURNAL, the usual installment in the Bank Book-keeping series is unavoidably crowded out. It is believed that the part which will appear in the January JOURNAL will repay our readers for the temporary break in the chain.

The Bankers' Reference Book.—Volume VII., of this work containing all reports received to November 5th is now ready for subscribers. It shows a number of marked improvements over former issues, and gives the correct condition and the credit rating of the National and State banks and private bankers, and all others throughout the United States transacting any class of banking or collection business.

The REFERENCE BOOK is supplemented by a "Confidential Letter" which is sent to subscribers as occasion demands.

A copy of the agreement between subscribers and ourselves will be sent on application to those intending to subscribe.

SOME OBSERVATIONS IN PRACTICAL BANK EXAMINATIONS.

BY JAMES D. STURGIS, NATIONAL BANK EXAMINER.

[The following exceedingly valuable and interesting paper, read at the recent Convention of the American Bankers' Association in Cincinnati, was unavoidably crowded out of its regular place in the report of the proceedings of the Convention as published in the November JOURNAL.—THE EDITOR.]

I must preface what I have to say by the remark that I come before you this morning in an entirely new role. It has been suggested to me that I might say a few words to the members of the American Bankers' Association here present which might be of benefit. What I shall say will be very brief, and I shall aim to treat of something practical.

A National Bank Examiner, in the course of his work, will perhaps observe many things which might escape the notice of the managers of an individual bank. The manager of a bank has *his own* ideas as to the conduct of the office work, and the *system* (it cannot always be called "system") by which he thinks he keeps a thorough knowledge of all the workings of the bank, especially of its assets and liabilities. The former, it appears to me, receives the greater part of the care and attention. The *true inwardness* of the latter requires the stricter watch. In a small bank the managing officer may perhaps be able to detect discrepancies in the deposits readily, having comparatively but few accounts, and knowing them well. The certificates of deposit also may all come to his notice in such a manner that he may readily detect any attempt to manipulate them. In some banks a practice prevails of making *partial* payments on certificates of deposit. This is one of the most open doors to fraud, and is a practice which should *never be allowed*. A joint understanding between a bookkeeper and a Teller may cause the books to show the deposits below the actual amount, and may be carried along regularly unless the bank has some method of checking it. Where a number of bookkeepers are employed some managers change them from one set of books to another, *without notice*. Pass-books should never be written up by the bookkeeper who keeps the account.

The practice of many banks of having an Examining Committee, which is supposed to make a thorough examination of the bank from two to four or five times a year, is a good one; and in many cases such committee thinks that it has thoroughly done the work when it has proven up the cash bills, railroad bonds, etc., as compared with the bank statement as furnished to the committee by the manager or a bookkeeper. But how many of such committees ever attempt to check up the other side of the bank statement—"The Liabilities"—and ascertain (if possible) whether the bank statement shows the *extent of the liabilities*; whether the balance of certificate of deposit account shows the true amount outstanding. If individual deposit accounts could be kept in the same way as accounts of correspondents, it would be a step in the right direction. I am satisfied that it can be done, and without any extra labor on the part of the bookkeeper. Such a system prevails in a large Chicago bank, where it gives entire satisfaction to the managers of the bank, to the employees, and to the customers. A customer can present his pass-book to be balanced, and by waiting not over five minutes can have it returned to him balanced with cancelled vouchers, no matter how large and active his account may be. This system is also a *daily* check on the correctness of the deposits as shown by general books.

In the matter of the discounting of bills receivable, I think more system should prevail than obtains in many cases—in perhaps the *majority* of cases.

The managing officer of a bank writes to his correspondent in some money centre, asking to have, say ten thousand dollars of his business paper rediscounted. The offering being satisfactory, and the loaning bank in funds, the paper is taken and proceeds credited to the *bank* whose manager has asked for the loan, without further investigation. So far it is held that the purchasing bank is entirely safe, whether the manager asking the accommodation draws against it for *his own* private purposes or not. But would not a proper regard for the *stockholders* (the owners of the asking

bank) require the authority of the Board of Directors that such rediscount was duly authorized by them. Should not specific authority for *each* rediscount so asked accompany the application? Does not the lending bank owe such a moral obligation to its correspondent? How many bank wrecks would have been avoided if such a course had been universally adopted. The manager of the borrowing bank may say, "I cannot always get my Directors together when we need money." Then the stockholders should elect a Board of Directors which would give at least that much attention to the interests of the owners of the bank.

The proving up of cash on hand, bills, railroad bonds, real estate, and the assets generally, is comparatively an easy matter. They are nearly all before the Committee or the Examiner, and "show up" in *propria persona* to be sufficient (or not) to fill the amount as shown by bank statement. But the most serious question is—Is such amount the correct one?

On the part of the manager of the bank it involves the question—Are my employees honest? On the part of the Directors—Are our employees and our Manager honest? On the part of the stockholders—Are we intrusting our means to the hands of Directors who *properly* appreciate the position of bank Directors. In this connection I want to say that my own observation shows me that the position of Director in a good, sound, live bank, is one not to be lightly esteemed by the holder, or carelessly bestowed by the stockholders. The holder of the position (if a man of any business capacity) will have a better insight into the general business of the community, and will in consequence be better able to profitably shape his own business than he otherwise could. It should on that account, if no other, induce him to exercise his right, and often investigate the *detail* of his bank's business, and fulfil the real position of a Director.

Many banks have too many Directors—especially in the country. The by-laws of a bank perhaps require from nine to fifteen Directors, and Directors' meetings monthly (perhaps weekly). Record book shows perhaps three meetings a year. Why, says the Examiner, does not your Board conform to the requirements of your by-laws? Manager says: It is impossible to get a quorum of our Directors, except to elect officers or declare dividends. Such banks had better reduce the number of their Directors to five good live men, who will take the true part of Directors, and who can offer a quorum whenever they ought.

I want to say a word or two on the subject of deposit books and accounts. Many recent innovations in the shape of combined Journal and Ledger, so-called labor saving books, are open to great objection, as they offer to employees, inclined to be crooked, excellent facilities. They are also difficult to investigate and check up. I have never seen any other deposit account books, which in my estimation are as satisfactory and as readily checked up and verified as the good, old-fashioned three column balance ledger and journal. To the officers and Directors of a bank, they certainly are the most satisfactory. While I believe in progress, I cannot consider any so-called improvements that have come under my observation, a change for the better.

To Directors as well as managers of banks I would say: Use your best endeavor to *know your liabilities*. The assets should show readily whenever you want to know them.

Connecticut Savings Banks.—The annual report of the Bank Commissioners of the State of Connecticut, which will soon be submitted to Governor P. C. Lounsbury, will contain the information that there has been a falling off of several million dollars in the savings bank deposits during the past year. The bulk of this money has been withdrawn from the savings banks for investment in Western mortgage securities. The Commissioners state that large amounts of Western debenture bonds, based on second mortgages, have been disposed of in the State. Even the Treasurers of savings banks have become agents for selling these bonds, and money has been loaned on them as collateral afterward. In this way the effect of the State laws restricting the loan of savings bank deposits on real estate outside of Connecticut is avoided. The second mortgage debenture bonds are regarded with suspicion by the Bank Commissioners, but they are helpless so far as preventing the loans on them as collateral. The anomalous condition of things has been brought about by the law passed two years ago authorizing the examination of Western institutions dealing in securities of this class. The full text of the Commissioners' report on the subject will be published in the JOURNAL after it has been submitted to the Governor.

SECRETARY FAIRCHILD'S REPORT.

The report of the Hon. CHARLES S. FAIRCHILD, Secretary of the Treasury, submitted to Congress December 3d, furnishes a comprehensive statement of the National finances. The subjects of especial interest to the JOURNAL's readers—purchase of bonds, currency circulation, the coinage of silver and coin certificates—are published herewith in full.

SILVER COINAGE.

The ownership of silver by the Government again was largely decreased, in spite of the increase of the total stock of silver dollars in the country, by the coinage of sixteen months. During the past few years the decrease of circulation caused by the cancellation of National bank notes and by the deposit of money with the Treasurer by the banks to redeem their notes when presented for that purpose, has been but little exceeded by the increased circulation of silver certificates and of standard silver dollars; thus silver seems to have filled the vacuum caused by the retirement of National bank circulation. The circulating medium in small denominations has been largely converted into silver certificates. And finally, business has largely increased in the South and in portions of the country where there are few banking facilities. All of these causes have co-operated to postpone any evil effects which might arise from a continued and excessive coinage of the silver dollar; but the danger still exists and should be guarded against. This can be done by the adoption of the recommendation of my last report, viz., by fixing the maximum of silver which shall belong to the Government, and by providing that when it was exceeded by \$5,000,000 the purchase of silver bullion should cease until the amount owned by the Government should be again reduced to such maximum, or by cancelling United States notes to the amount of the excess over the maximum, provided the Government held the notes; if not, then by ceasing the purchase of bullion. Such plan, if adopted, would provide a safety-valve which would be self-operative and would assure the country against any possible danger from silver, for as soon as it exceeded the amount which could be absorbed in the business of the country it would begin to flow into the Treasury in payment of taxes and would be there held until business called for it, and when the Government's ownership fell below the maximum the purchase of the bullion would again begin.

Thus the country's business demand would regulate the country's silver circulation, and there would be little danger of depreciation in the value of the silver dollar as compared with the gold dollar. I venture to predict that if some such safeguard is not adopted and if thereby the silver dollar is suffered at some time to lose a part of its purchasing power, that the people will demand the absolute stoppage of the silver bullion purchase, and furthermore, the use by the Government of the whole or a portion of the silver coinage profits for the redemption of the silver dollars which are held by them. It is to be hoped that before such crisis is reached that the nations of the world will have agreed upon some standard of bi-metallism which will forever maintain a fixed ratio between gold and silver, but in the meantime there is no occasion to burden ourselves with a stock of silver which may be troublesome.

COIN CERTIFICATES.

The system of coin circulation by means of certificates has certain conveniences and advantages, but it is a costly form of money; last year the cost of the \$105,000,000 silver certificates issued was about \$421,000, and as more and more of these certificates are converted into smaller denominations this cost is likely to increase. There are also certain dangers connected with it—for example, in time of war, the possession by the Government of such vast stores of the precious metals might prove embarrassing, and at a time when the Government was in financial need the temptation to spend the coin held against outstanding certificates might prove too strong. The loss by the abrasion of the coin, if it was in circulation, would not equal the cost of the certificates: on the whole, I think it may be said that the currency of the country would be more safe and more economical if the coin were in actual circulation instead

of being held by the Government on pledge against outstanding certificates, as is now the case. But whatever may be thought about the wisdom of the certificate system there can be no doubt that with it the further coinage of gold and silver, except subsidiary coin, is not necessary or wise. Far more gold and silver coins are now in the possession of the Government than probably ever will be needed for the redemption of certificates. Future accumulation of the precious metals should be only in the form of bullion, which can be kept more safely and counted more easily than the coin. If this suggestion was adopted all but one of our mints might be closed and large, useless expense saved annually. I earnestly call the attention of the Congress to this subject.

CURRENCY CIRCULATION.

The following table shows changes in circulation which are interesting:

COMPARATIVE STATEMENT SHOWING THE CHANGES IN CIRCULATION FROM JULY 1, 1887, TO NOVEMBER 1, 1888.

	<i>In circulation July 1, 1887.</i>	<i>In circulation Nov. 1, 1888.</i>	<i>Decrease.</i>	<i>Increase.</i>	<i>Net Increase.</i>
Gold coin.....	\$378,758,607	\$380,018,817	\$3,258,210	
Standard silver dollars..	55,504,310	59,801,350	4,297,040	
Subsidiary silver	48,987,259	52,571,712	3,574,453	
Gold certificates	91,225,437	140,613,658	49,388,221	
Silver certificates.....	142,118,017	229,783,152	87,665,135	
United States notes.....	326,867,219	309,867,696	\$16,999,523	
National bank notes....	276,855,206	236,217,233	41,637,973	
Total.....	\$1,317,828,052	\$1,407,871,668	\$58,437,443	\$148,483,059	\$80,045,616

COMPARATIVE STATEMENT SHOWING THE CHANGES IN MONEY AND BULLION HELD IN THE TREASURY FROM JULY 1, 1887, TO NOV. 1, 1888.

	<i>In Treasury July 1, 1887.</i>	<i>In Treasury Nov. 1, 1888.</i>	<i>Decrease.</i>	<i>Increase.</i>	<i>Net Increase.</i>
Gold coin.....	\$192,368,916	\$223,209,020	\$30,840,104	
Standard silver dollars..	211,483,970	249,979,440	38,495,470	
Subsidiary silver.....	26,977,494	24,088,769	\$2,888,725	
United States notes.....	20,013,797	36,813,320	16,799,523	
National bank notes....	2,362,585	4,167,954	1,805,369	
Gold bullion.....	85,732,190	108,479,218	22,747,028	
Silver bullion.....	3,982,472	4,369,972	387,500	
Trade-dollars as bullion	6,984,963	6,189,142	745,821	
Total.....	\$549,856,387	\$657,296,830	\$3,634,546	\$111,074,989	\$107,440,443

As was the case last year, the increase in circulation this year has been in the form of small money. The increase of outstanding paper and coin in denominations of \$20 and less is more than \$115,000,000, thus exceeding the total increase of circulation among the people by about \$25,000,000, and showing a conversion of larger into smaller denominations to that extent.

PURCHASE OF BONDS.

Since the last annual report and after the completion of the sinking fund requirements for the year ended June 30, 1888, no bonds were bought until there had been an expression of opinion by resolutions in both houses of Congress that it was lawful and proper to invest the surplus in bonds at the premium necessary to obtain them. Under the then state of public opinion in many parts of the country upon this question, both as to its legality and propriety, it seemed wise to seek the co-operation of the Congress in this important matter. I am confident that the delay in the purchase of bonds while waiting for Congress to act resulted in no substantial pecuniary loss to the Government. The purchase was resumed under a circular of April 17, 1888, and since that time nearly all the bonds which have been offered for sale to the Government have been bought by it, as will appear from an inspection of the bond purchase book. Of course many offerings of bonds have been declined because the price was thought to be too high, but finally almost all of the offered bonds were bought at some price. An example will show this more clearly. Certain bonds of a par value of only \$326,000 were offered so often that the offerings aggregated over \$19,700,000, but they were at last secured by the department. Ninety-four millions of dollars of bonds have been secured under this circular, and a premium paid for the privilege of buying them of about \$18,000,000; the net rate of interest realized from this investment is only about

2 per cent., and the saving in the total amount of interest which would have been paid had the bonds been allowed to run to maturity is about \$27,000,000. Had taxation been reduced so as to leave this money with the people, and if it is worth in their business 6 per cent. per annum, the total value of the money to them during the term which these bonds had to run would be about \$63,000,000; thus there is a resulting loss to the people of \$56,000,000 upon this transaction alone; if this overtaxation is not stopped, and if the Government is forced to continue to be a purchaser of its own bonds at the holder's prices, the loss to the people, as could be shown by a like calculation, must be hundreds of millions of dollars.

FINANCIAL MATTERS IN CHICAGO.

[From the JOURNAL'S Chicago Correspondent.]

Since the election the demand for funds for all classes of borrowers has been constantly improving, until now at the close of the month rates may be said to be decidedly firm. Rates for call loans are quoted at five and six per cent., but by far the greatest amount goes at the latter figure. Time transactions command from six to eight per cent., with the bulk of the business at seven. Much money is going West, and this demand bids fair to increase materially before the holidays. New York exchange closes the month at par and twenty-five cents per \$1,000 premium.

November has witnessed considerable falling off in the activity on the Board of Trade, although interest still centres around the wheat pit to an extent that shows the life is not all out of the market yet. While wheat has been declining steadily for several weeks, the bears are easily frightened and rush into cover at every sign of strength. The lack of shipments from the Atlantic seaboard is the chief cause of the weakness, and it is quite probable that should these commence it will quickly soar upwards. Corn and provisions are generally weak, being weighed down by the abundant receipts.

What is popularly known as the Chicago Syndicate, under the leadership of Mr. C. B. Holmes, of the South Side cable road, has for some time been absorbing street railway properties in Indianapolis, Rock Island, Moline, Los Angeles and other places. The latest move is upon the lines of St. Louis, negotiations for the transfer of which are said to be approaching consummation.

The city council has at last taken up the numerous elevated railroad schemes, and the probabilities are that the West Side will have at least one and possibly two. What is known as the Onderdonk Company has had its application for a charter favorably passed upon, and there is little doubt that this company will get its ordinance as soon as the law committee has revised it. The project for a South Side road has been laid on the table indefinitely, by a close vote at a recent meeting.

An enterprise styled "The Chicago Belt and Elevated Railroad Co.," with a published capital of seven millions, has been projected to encircle the city with an elevated railroad track. It seems that the project is emphatically in an embryotic state as yet, although it has been suggested that it is allied to the Canadian Pacific Railroad, which is presently to enter Chicago from Detroit.

The Illinois State Savings Bank Act, which was carried unanimously at the late election, proves to be almost worthless by reason of a serious clerical error, and also on account of its lack of completeness. The error referred to is in transcribing, and makes provision for banks in towns of only ten thousand inhabitants or under, making no mention whatever of larger towns where the law is most needed. Another serious oversight is making the Act less strong upon the subject of the liability of stockholders than the article on banking in the State Constitution. Still another provision exists relative to a bank's changing its name and location, which is thought to be at variance with a certain decision of the Supreme Court. In view of these flaws, it is quite probable that the Act will have to be submitted to the Supreme Court, and thus be useless for some time to come. It is strange that in an important matter of this kind legislation should have been so hasty and so bungling.

Cashier Thomas P. Tallman, of the defunct Traders' Bank has been indicted by the grand jury for embezzlement on the ground that he received deposits up to the time of the failure of the bank, knowing meanwhile that the bank would be forced to suspend. The penalty for this action prescribes a fine of twice the amount of money

so taken in during the thirty days immediately preceding the suspension, and imprisonment from one to three years. Mr. Tallman is confident of his ability to prove the falsity of the charges against him, and alleges that the proceedings are simply spite work.

On the Chicago Stock Exchange business was unusually active during November, and to provide for its transaction an afternoon session at 2:15 has been commenced. The bulk of the trading has been in gas stocks, which seem to be a favorite Chicago investment at the present time. The following are the quotations of the more active securities for November 30th and the corresponding day the preceding month:

BANK STOCKS, PAR \$100.	Amount of the Capital Stock.	NOV. 30.		OCT. 30.	
		Bid.	Ask.	Bid.	Ask.
American Exchange National	1,000,000	*125	*130

* Last sales.

The Bankers' Council of the National Union was organized here on November 18th, the membership being about one hundred and fifty. The officers of the new organization are: President, Frank W. Smith, Corn Exchange Bank; Vice-President, B. G. Warn, of S. A. Kean & Co.; Speaker, D. Vernon, Commercial National Bank; Secretary,

Howard Roper, North-Western National Bank; Treasurer, G. N. Neice; Chaplain, P. C. Peterson, Merchants' Loan & Trust Bank. The Trustees are: M. Schweisthal, International Bank; F. M. Blount, Chicago Nat. Bank; H. Schaffner, H. Schaffner & Co.'s Bank.

The nineteenth annual meeting of the National Board of Trade was held in the Grand Pacific Hotel, Chicago, November 1st, 2d and 3d. There was a large representation of prominent business men from all sections of the country, and the time was spent in the discussion of live issues and the many matters of commercial and financial importance which at the present time confront the people of the United States.

The mania for organizing building and loan societies continues with but slight abatement, and yet no provision has been made for any supervision of their affairs and management by a State officer. In view of the immense amount of money these organizations are absorbing, the general ignorance of the public as to how they are run, and the great opportunity for misappropriation of funds and bad judgment in their investment, it seems like courting disaster to neglect this matter longer. When some of the horses are stolen, the barn door will probably be shut.

A certificate has just been filed at the State capital decreasing the capital stock of the Atchison, Topeka and Santa Fé Railroad Company in Chicago from ten millions to five millions, and another decreasing the capital stock of the Chicago, Santa Fé and California Railroad Co. from thirty millions to fifteen millions. H. M. JORALMON.

California—National Bank of D. O. Mills & Co., Sacramento.—An ingenious and very unusual attempt to swindle the National Bank of D. O. Mills & Co. out of \$500 on a forged express order—which was fortunately frustrated by the Cashier's shrewdness—is recounted in the following clipping from the Sacramento "Bee" of a recent date, supplemented by a detailed statement from the Assistant Cashier of the bank. From the novelty as well as ingenuity of the method adopted it is of great interest to bankers, who will do well to be on their guard against similar attempts:

"O. H. Bliss, *alias* Kral, who about a month ago forged the name of C. F. Gardner to a check for \$500 on D. O. Mills' Bank, also appeared for sentence, having pleaded guilty to forgery. He made a statement, pleading financial distress and illness as an excuse for his attempted crime. He used language which confirmed his statement that he was given a first-class education. He said that he has a father who stands high in Masonic circles in the East, and a brother who is a prominent politician, and an old mother, whose last days would be made unhappy if her son were given a long term in State Prison. At the conclusion of his remarks Judge Armstrong sentenced him to ten years' imprisonment at Folsom."

Editor Rhodes' Journal of Banking:

SACRAMENTO, Cal., Nov. 25th, 1888.

SIR:—Referring to above clipping I thought you might consider the facts worthy your notice. October 18th we received a cipher telegram from Farmers & Merchants Bank, Los Angeles, instructing us to pay Wells, Fargo & Co. for O. H. Bliss \$500. The express company declined to receive money, saying that they would refer Bliss to bank if he inquired there. Soon after a gentlemanly German person called at bank, introduced himself as O. H. Bliss, and inquired if there was a money order of \$500 here for him. On receiving an affirmative reply with blank receipt for the amount, he signed receipt at counter "O. H. Bliss," and said that he would take it to the office of C. F. Gardner—a land lawyer—whom he knew and who would endorse it in case he was too busy to come to bank and identify him. Late in the afternoon when we were busy with a crowd at the counter he passed the receipt over to Cashier Frank Miller, with the name of C. F. Gardner written on the face. However, Mr. Miller was equal to the occasion, and compared writing with signature we had on file which showed that Gardner's name had been forged, although it was not a bad copy of the genuine. We arrested the man and conferred with Mr. Gardner who pronounced his signature a forgery; he informed us that this man had written him from Los Angeles inquiring about some Government land, and requested that he answer his letter by leaving a note at Western Hotel, this city, as he expected to be there in couple days, and Mr. G. did so. We then wired a full description of the prisoner to Los Angeles bank, who replied that he was not O. H. Bliss, although they had received a message from Sacramento signed O. H. Bliss (who, by the way, is one of their depositors and Directors residing at Santa Cruz, this State) requesting a remittance of \$500 care Wells, Fargo & Co., soon as possible. The prisoner, John Kral, acknowledged that he was cornered, and admitted he forged the telegram and names of Bliss and Gardner to the receipt, which we came near paying.

CHAS. F. DILLMAN, *Asst. Cashier.*

BANKING AND FINANCIAL NEWS.

THIS DEPARTMENT ALSO INCLUDES: OPEN LETTERS FROM BANKERS, THE WORLD OF FINANCE, AND A COMPLETE LIST OF NEW BANKS, CHANGES IN OFFICERS, DISSOLUTIONS AND FAILURES.

Minnesota—Northwestern Stamp Works, St. Paul.—On another page will be found the advertisement of The Northwestern Stamp Works of St. Paul, Minnesota. It is one of the most reliable houses of the kind in the United States, and parties who need anything in that line cannot make a mistake by sending that house an order.

Minnesota—Irish-American Bank, Minneapolis.—This is the title of a new banking institution which has recently commenced business in Minneapolis. The capital is \$100,000, and the officers are J. S. Coughlin, President; J. E. Gould, Vice-President; J. C. Scallen, Cashier. The correspondents are American Exchange National Bank, New York, and Merchants' Loan & Trust Co., Chicago.

West Virginia—Merchants' National Bank, Clarksburg.—The JOURNAL has before referred to the fact that General Nathan Goff, the President of this bank, was a candidate for Governor of his State. From the corrected returns thus far received there seems to be no doubt of his election. If the General will carry the same executive ability into his new office which has characterized his management of the Merchants' National Bank his administration will be highly successful.

Pennsylvania—Nanticoke's New Bank.—The National Bank of Nanticoke has recently been organized with \$75,000 capital, \$68,000 of which is already paid in and the balance is forthcoming. The Directory, which is a very strong one, is composed of the following names: Hendrick B. Search, of Shicksbiny; John Smoulter, Jr., Nanticoke; X. Wernet, Nanticoke; Isaac Everitt, West Pittston; G. L. Halsey, White Haven; Manus McGinty, Wilkes Barre; C. F. Bohan, Pittston; F. P. Drinker, Berwick; J. C. Brader, Nanticoke; John M. Garman, Nanticoke; Dr. J. F. Hill, Nanticoke; David Jonathan, Nanticoke. The President is Isaac Everitt, of West Pittston, and Vice-President John Smoulter, Jr., of Nanticoke. Mr. Everitt will act as temporary Treasurer until the Cashier and other officers are chosen at the next meeting.

Connecticut—City National Bank, Bridgeport.—One of the most reliable banking institutions in Connecticut is the CITY NATIONAL BANK of Bridgeport. For several months past, capable architects and mechanics have been engaged in making extensive repairs and improvements in the banking building, which are now fully completed. The completeness of this model banking house is observable by every visitor, and the officials, the Directors, the committee who had all this work to carry out, the Tellers and bookkeepers, the very large number of its depositors and customers, and certainly the shareholders, all are to be warmly congratulated on the unique success attained. The City National Bank was organized as the Bridgeport City Bank in 1854, with a capital of \$100,000, which was increased to \$200,000 in 1859. It was organized under its present name in 1865 with \$250,000 capital. The following named gentlemen have served as Presidents: A. P. Houston, S. F. Hurd, Ira Sherman, Sherwood Sterling, G. B. Waller, and for the past ten years the present incumbent, D. N. Morgan. The Cashiers who have served are as follows: G. H. Fairchild, E. Lacey, R. T. Clarke, J. F. Fayerweather and T. L. Bartholomew, who has officiated for eight years. The present Board of Directors is Daniel N. Morgan, Nathaniel Wheeler, Edwin G. Sanford, George Mallory, Elbert E. Hubbell, Miles Beardley, Daniel W. Kissam, David B. Booth and Thomas L. Bartholomew. In addition to the \$250,000 capital, the bank now has \$125,000 surplus, aside from other undivided profits of \$37,000, so that in addition to paying eight per cent. annually to the shareholders, they have, during the present management of ten years now completed, added upwards of \$100,000 to the assets, to use for their benefit in meeting the

increased demand for loans naturally following the rapid growth of the city, and this thriving bank is now conspicuously placed in the front rank in every respect, among Bridgeport's strong and conservative financial institutions.

Alabama—The John McNab Bank, Eufaula.—On the 24th of last October, Mr. JOHN McNAB—the founder, and for nearly one-third of a century the active manager of the John McNab Bank—resigned his position as President. On that occasion he published an address to all the old customers and patrons of his bank, which is of such an interesting character that the principal portion of it is reproduced for the benefit of the JOURNAL'S readers:

"Feeling deeply impressed with the fact that my long life (I am now nearing my 82d year), is by the order of nature drawing to a close, I deem it proper to withdraw from the responsibilities of an active business life. I have, therefore, this day resigned the Presidency of the John McNab Bank. My son-in-law, W. N. Reeves, has been elected President in my stead, and his brother, J. H. Reeves, also my son-in-law, has been elected to the office of Vice-President. C. Rhodes, who has been with me nearly thirty years, will continue as heretofore Cashier. Thus after being actively engaged in banking as private banker and President forty-five years, I am now permitted to carry out a long cherished purpose to retire from all active business while of sound mind and disposing memory. In reviewing the many years of my banking career, it is gratifying to know that amid all the violent fluctuations that characterized much of that period, I have never suspended payment, and no one has ever had to call a second time for a deposit. And it is also most gratifying to know that now in retiring from the John McNab Bank, I am leaving it in a healthy, prosperous condition, and turning over its management to those who for many years have successfully done the real work of the bank. W. N. Reeves has been intimately associated with me for twenty years, and J. H. Reeves fifteen years. Having transferred to them all my stock in the John McNab Bank, I now turn over to them its legal control in full confidence that all its interests will be faithfully guarded and protected. I shall continue, as heretofore, to give the business my constant supervision and support. Profoundly grateful to Almighty God for the blessings of a long life, and deeply appreciating the liberal patronage of so many years, I cheerfully recommend the John McNab Bank to your continued confidence and support."

Oregon—Oregon Loan and Trust Company, Salem.—Referring to this institution, the following letter will be read with interest. Mr. Hine is editor of the *Insurance Monitor*, published in New York city. He recently paid Salem a visit while on his way home from a trip to Alaska, and the letter is the result of his observations while in that city:

NEW YORK, Nov. 7, 1889.

W. W. Hutchinson, Esq., *Manager the Oregon Loan and Trust Co., Salem, Oregon:*

DEAR SIR—Responding to yours of the 10th ult., my recent visit in Oregon was part of a trip undertaken for rest and recuperation rather than active observation, but it was impossible for me to keep my eyes closed to the obvious beauty and large resources of the Willamette Valley. I am not surprised at the heavy population which it has already attracted. As I stood on the top of your State House, and looked abroad toward every point of the compass, and saw, as far as the eye could reach, cultivated farms and comfortable homes, I found it difficult to realize that I was in the extreme West. The well-grown orchards and the advanced condition of both town and country resembled the finest districts in Ohio, Indiana or Illinois, and made a very deep impression on my mind that the prosperous present was only an augury of the still grander future which Oregon, and particularly your portion of the State, had before it.

Yours, respectfully,

C. C. HINE.

The Oregon Loan and Trust Company is a new institution, and the foregoing letter is to the point as to the Willamette Valley, in which it operates. The Directors are as follows: W. W. Thayer, ex-Gov. and Judge of Supreme Court; R. S. Strahan, Judge of the Supreme Court; Wm. P. Lord, Judge of the Supreme Court; Richard Williams, ex-Member of Congress; Geo. W. Webb, State Treasurer; E. B. McElroy, Supt. Public Instruction; L. L. Rowland, Pres. State Ins. Co.; Geo. Williams and Wm. England, bankers and brokers; H. W. Cottle, Sec'y and Manager State Insurance Co., and Chas. B. Moores, Sec'y of the Salem Street Railway. The Board of Directors embraces seventeen in all, and those whose names are mentioned are among the most influential and representative men. Their names are a synonym for honesty and integrity.

Illinois—American Exchange National Bank, Chicago.—Readers of the JOURNAL will remember the famous "wheat deal" of 1887, which resulted in the wrecking of the Fidelity National Bank of Cincinnati. When the Fidelity National was in the throes of death, Vice-President Harper sent Wilshire to Chicago with \$600,000 in drafts to be cashed at the American Exchange National Bank. That bank cashed over \$400,000 of them, but when presented to the banks upon which they were drawn, payment was refused. The American Exchange National Bank presented its

claim to Receiver Armstrong, but he refused to pay it on the ground that Harper had no funds to warrant the drafts he had made. Suit was then brought by the American Exchange National Bank, but when Receiver Armstrong, in October, 1887, declared a dividend of 25 per cent., he set aside money to pay this claim, but, of course, refused to pay it until the question was decided in court. The case has recently been tried before Judges Jackson and Sage, of the United States Court, and at the close of the argument they decided in favor of the claimant. The point of their decision was that the American Exchange National Bank did not, in this case, exceed the scope of its powers, and became an innocent purchaser of paper that was intrinsically worthless. The immediate result of this decision is that the Receiver of the Fidelity Bank must pay to the American Exchange National Bank of Chicago \$100,000, with interest from October, 1887; and the future result is, that so far as the assets of the Fidelity Bank and the liability of the stockholders will suffice, the entire claim will be paid in full. The American Exchange National Bank has for some time past had this suit pending against the Receiver of the Fidelity National Bank of Cincinnati for \$400,000. The loss of the American Exchange National Bank was immediately made good at the time by an assessment on its stockholders, so that all that has been recovered by the recent successful suit, or that will hereafter be recovered from the Fidelity National Bank, will go to the surplus fund of the institution. The outcome of this victory to the Chicago bank, in vindicating the position which it has held throughout, and in showing the falsity of the many rumors which have prevailed as to its position in this matter, cannot be overestimated. The management of the bank deserve hearty congratulations upon the successful issue of this suit. The decision is rightly termed "a most remarkable one," as the judges never left the bench to render it.

Light on Causes of Failure of Commercial National Bank of Dubuque, Iowa.—The following letter from Mr. E. H. Harris, Cashier of the Commercial National Bank, Dubuque, Iowa, fully exonerates Mr. R. E. Graves, President of the bank, and relieves him from the cloud, which was unjustly thrown around him by the temporary suspension of that bank. The letter was addressed to a prominent financier in another State:

COMMERCIAL NATIONAL BANK,
DUBUQUE, IOWA, April 25, 1888.

DEAR SIR:—Mr. R. E. Graves has requested me, as Cashier and having had charge of the correspondence and records of the Commercial National Bank of Dubuque for the past seven years, to write you the real facts regarding the failure in view of the sensational dispatches which were sent out at the time.

It was stated that "Graves' draft broke the bank; that \$65,000 had to be raised within two hours, or the bank closed; that he was requested to resign, and that afterwards the Directors contributed \$145,000, but finding the bank insolvent, asked the appointment of a Receiver."

There never was a time that it was necessary to raise \$65,000 or any other sum within a given time, or suspend. No contribution of any sum was made by the Directors after Mr. Graves' resignation.

Mr. Graves had only a small interest in the bank since May, 1886, at which time Mr. Stout and Mr. Andrew negotiated the purchase of the control of the bank nominally for C. H. Booth, on whose earnest solicitation Mr. Graves continued as President—conditioned in 1887 on the business being conducted by an executive committee—so that his position was only nominal. The loans were made by that committee the past year, Mr. Graves declining to take any responsibility except in case of disagreement between Mr. Booth and Mr. Waller, when (in a few instances only) Mr. Graves was required by them to decide. At stated meetings of the Directors the loans were read and formally approved. The Directors were fully informed as to all the business, the resources and liabilities of the bank in detail. Mr. Graves was unanimously re-elected in January last, at which time I know he contemplated removal to Colorado, and had several times asked the executive committee—Mr. Booth (since President) and Mr. Waller (Vice-President)—to accept his resignation, and the complimentary resolutions passed and recorded early in February (without a dissenting voice, the entire Board being present), when he resigned to remove to Colorado endorsing his integrity and ability, evidence the facts in the case. When the Bank Examiner took charge after the suspension, all the accounts, city and country, were verified and balanced without variation of a cent, and the system of keeping accounts was pronounced by him the best he had seen, and the records of the bank perfect.

Reference has been made to the Oat Meal Mill Co.'s indebtedness, by which the bank lost heavily. The advances to that company were made by instructions of the then Vice-President, Mr. Stout, and after Mr. Graves had refused to advance them any further sum without written instructions, three of the Directors gave the written instructions. Some ill feeling was occasioned by the position taken by Mr. Graves in this matter, who insisted that the Directors in the bank who were also Directors of the Mill company, were individually liable for that debt, and would have to pay it, their responsibility being unquestioned. All these things had been accomplished through

two trustees before Mr. Graves resigned. One special dispatch sent out said, "Mr. Graves has always been regarded as an honest man, and the failure is attributed to lack of business ability."

With full knowledge of all the facts, candor compels me to say that "lack of business ability" does not apply to Mr. Graves, and the city and country depositors of the bank—without exception so far as my knowledge goes, and I have since conversed with many of them—believe as I do, that, had Mr. Graves been here, the bank would not have suspended—and his integrity of character and ability as a banker cannot justly be questioned by reason of the failure of this bank, under the condition of the facts as hereinbefore stated. Very respectfully, C. H. HARRIS, *Cashier*.

P. S.—The Receiver of the bank examining the loans with me, and discovering that one of the last loans made before the suspension was an additional loan to the heaviest debtor to the bank, remarked: "That loan having been made long after Mr. Graves' resignation, they certainly cannot blame him for that." C. H. HARRIS, *Cashier*.

MISCELLANEOUS BANK AND FINANCIAL ITEMS.

- The National Bank depositories now hold \$46,491,994 of Government deposits.
- The silver certificates in circulation have increased \$3,573,331 since October 31st.
- The Erie Railway Company has at last settled the Marine National Bank claim.
- The First National Bank of Mahanoy City, Pa., has increased its capital to \$100,000.
- The Keystone National Bank, Philadelphia, moved into its new banking house Nov. 23.
- The Bowery National Bank of New York city has voted to reorganize as a State bank.
- Cashier Barker of the Argentine (Kan.) Bank, was recently robbed of \$1,000 on a street car.
- The Thomaston National Bank will shortly succeed Seth E. Thomas, banker, at Thomaston, Conn.
- C. A. Putnam & Co., bankers and brokers of Boston, Mass., have removed to 17 Congress Street.
- On November 28th, two men stole \$800 from the banking office of J. B. Picken & Co., Montreal, Canada.
- Adolphus Merriam, President of the Framingham Savings Bank, in Framingham, Mass., died November 27th.
- There has been an increase of \$5,100,000 in the amount of standard silver dollars in circulation since August 1, last.
- Avoca, N. Y., is at present without a bank. There is an opening for the right party to establish a good paying bank.
- The last published statement of the Imperial Bank of Germany shows an increase in specie of 3,840,000 marks.
- Mr. Clarence H. Venner, of C. H. Venner & Co., Boston, Mass., bankers, has gone to Europe for a two months' vacation.
- The new Empire State Bank, New York city, which opened for business December 1, received \$250,000 in deposits on that day.
- The failure of the Bank of Durham, N. C., and the attendant failures of six other business firms has occasioned considerable comment.
- A new institution styled the Albany Savings & Loan Association has been organized in Albany, N. Y., the capital not to exceed \$500,000.
- John W. Mackintosh & Co., bankers and brokers, of Boston, Mass., have failed. Flint & Père Marquette Railroad securities are said to be the cause.
- Mr. E. K. Wright has been elected Vice-President of the National Park Bank, New York city. He entered the bank as a clerk thirty-five years ago.
- The American Trust Company, with a paid-up capital of \$100,000, has begun business at Concord, New Hampshire, with William Yeaton President.
- Samuel Halliwell, a prominent real estate agent of New Haven, Conn., was recently arrested charged with embezzling \$3,000 from the Stonington Savings Bank. In three days the charge would have been outlawed by the Statute of Limitations.

— Alley, Dowd & Co., of N. Y. city, announce the formation of a limited partnership, in which Messrs. F. T. Hopkins and Thomas T. Thomas will be special partners.

— F. A. Smith has been elected Cashier of the City Bank, Minneapolis, Minn., in place of John E. Gould who resigned to accept the Vice-Presidency of another bank.

— Marc Eidlitz has been elected President of the Germania Bank, N. Y. city, in place of Christian Schwarzwaeider, deceased, and Edward C. Schaefer, Vice-President.

— Mr. Silas Petroe has been elected President of the Boston National Bank, Boston, Mass., until the annual meeting in January to fill the vacancy caused by the death of James H. Bouvé.

— William M. Strong, formerly Vice-President, has been elected President of the Central National Bank, New York city, in place of William M. Bliss who resigned on account of ill health.

— Thomas L. Huggard, the Cashier of the defunct Shackamaxon Bank, Philadelphia, Pa., who was punished for other people's offences, has been pardoned by the Governor, and released from prison.

— The Scott County Bank of Scott City, Kan., has been attached and the President arrested, charged with embezzlement. The bank was incorporated with an authorized capital of \$50,000, only a small part of which was paid in.

— Fuller, Harding & Co. is a new banking house recently organized in Boston, Mass. The firm comprises W. Fuller, formerly of Cordley, Young & Fuller, Theo. P. Harding, formerly of the same house, and Lamar S. Lowry.

— The creditors of Waldron, the Michigan banker, who took an extended European trip some five months ago, will be glad to learn that he is disposed to pay his debts. He has returned to Reading, Mich., his old home.

— A Washington correspondent is authority for the statement that when Mr. Cleveland retires from the Presidency he will engage in banking and become President of one of the most prosperous banks in New York city.

— Mr. George L. Brander has been elected President of the State Investment and Insurance Company of San Francisco, Cal. Mr. Brander was for many years Cashier of the Nevada Bank and Vice-President of the Nevada Assurance Corporation.

— The Supreme Court has dismissed the complaint in William S. Williams' suit against the United States Trust Company, New York city, for \$105,000 damages, and directed judgment for the defendant for \$2,567.54, the amount of its counter claim.

— It is reported that J. A. Buck, a member of the firm of Buck Bros., of Litzitz, Pa., which recently failed with liabilities exceeding assets nearly \$50,000, has been arrested on the charge of fraud alleged by the Citizens' Bank of Reading. He gave bail for trial.

— The suit of Banker Samuel Hazlett against the Commercial National Bank of Philadelphia, for \$5,000 because of alleged delay in presenting a draft upon the Penn Bank of Pittsburgh, which subsequently closed its doors, resulted in a verdict in favor of the Commercial National Bank.

— The First National Bank of Columbus, Indiana, has recovered \$195,000 in securities which were stolen from it recently by William Schreiber, its bookkeeper. He had deposited the funds in the Merchants' Exchange Bank at Milwaukee and the Waukesha National Bank at Waukesha, Wis.

— Mr. William Sherer, who was Cashier of the Sub-Treasury in New York city since 1863, has resigned his position and been appointed Assistant Manager of the New York Clearing-House, in place of Mr. John P. Ritter, who has been retired in consequence of ill health, after about 24 years of service.

— The Metropolitan National Bank of New York city has procured a judgment against Henry W. Ford for \$171,898 35 in a suit brought for moneys loaned during the past six years. The same bank also secured a judgment for \$2,157 59 against Richard W. Bogart, as a balance due for moneys loaned.

— The Rochester National Bank, of Rochester, N. H., furnishes a remarkable example of New England longevity in bank service. The President, Mr. John McDuffee, has been with the bank as Cashier or President for 58 years. No bank bill was ever issued without the signature of Mr. McDuffee in one of the above capacities.

As he is still actively discharging the duties of President, few cases present a more remarkable record.

— The written confession made by George L. Lewis of his intention to rob the City National Bank of Springfield, Mass., states that the story told by him to the bank officers was true in every respect and that he had abused the confidence of the bank officials and intended to enrich himself at the bank's expense.

— The capital stock of the 3,140 National banks of the United States reporting October 4th, exceeded \$592,000,000. The individual deposits amounted to \$1,350,000,000 and Government deposits to \$56,000,000. There was a net increase of capital in the year of over \$14,000,000 and a net decrease of circulation of \$17,000,000.

— The reports which have been made to the Comptroller of the Currency of the condition of the National Banks of the country as of October 4 are now completed, and they show the 3,140 banks of the United States to have had on deposit on that date \$1,543,566,788. The amount of reserve held against these deposits was \$446,166,273 or 28.90 per cent.

— The Union Bank of Providence, R. I., has received from the court at Montreal an order for High Constable Bissonette to hand over to them some \$14,777 in gold and bills, now in his possession, and stolen from them by Pitcher, the absconding Teller of that bank. This approaches a clearing up of the Pitcher defalcation, so far as the bank is concerned, for it has now all but \$388 of the large amount which Pitcher carried away.

— Advices from Philadelphia leave little room for doubt that the confidence man, Henry Hunter, who is under arrest in Toronto, Canada, is Horace Hovan, *alias* Little Horace, one of the most notorious bank thieves in the world. Detectives have secured a walking stick which he ordered from a machinist before his arrest. It works like an automatic pencil, a pair of steel tweezers at the bottom being operated by a silver band near the top.

— Recently Walter S. Stokes & Co. recovered a verdict of \$20,225.10 against Grovesteen & Pell, of New York city, the bankrupt brokers. On August 23, 1887, the plaintiffs loaned \$20,000 to defendants, accepting as collateral twenty bonds of the East & West Railroad of Alabama, and four bonds of the Rome & Decaturville Railroad. On the following day the defendants failed, with liabilities of \$1,706,821.85. The plaintiffs claimed that the defendants fraudulently represented the value of the collateral.

— The Tax Collector of Brooklyn, N. Y., and the banks of that city, which are the depositories of the city's money, are at odds because the Collector does not send in his deposits before the close of banking hours. The city charter obliges him to bank the money the day that it is received, and during the month of December the receipts are large and it is oftentimes midnight before they are counted. The banks object to keeping clerks on duty and the Collector objects to keeping the receipts, amounting sometimes to \$1,000,000, in his office.

— Recently 1,400 silver dollars were lost in transit between the United States Mint at New Orleans and the Treasury at Washington. The Government officials located the responsibility with the express company which had charge of the transportation. The company tacitly admitted this by paying the amount of missing money. It has since transpired that the theft was committed by an express employee, who had deftly substituted shot for the coin, on the supposition that the bags were not opened at Washington. The money has been recovered intact by the company.

The Abbott Check Perforator.—Referring to this useful machine the following letter from the "Oakland Home Insurance Co.," Oakland, Cal., is interesting:
Abbott Machine Co., Chicago, Ill. OAKLAND, Cal., Oct. 4, 1888.

GENTS: We regard your CHECK PERFORATOR as *indispensable*. It works to perfection and we can unhesitatingly recommend it as the right thing in every office.

Yours very truly, OAKLAND HOME INS. CO.,
 WM. F. BLOOD, Sec.

W. A. Ponder, Cashier of the Exchange National Bank, Denton, Texas, writes: "I am well pleased with our bank card in the JOURNAL's 'Special List of Banks and Bankers,' and believe it has already brought us a number of new collections."

THE WORLD OF FINANCE.

Current Opinion on Monetary Affairs from many sources.

INTERNATIONAL BILLS OF EXCHANGE.—The consideration of bills of exchange with a view of framing some basis on which the commercial laws of all countries could be made to rest, was one of the subjects which received no little attention from the International Congress which has been recently sitting at Antwerp. A bill of exchange is an order authorizing the transfer of money from a debtor to a creditor in a distant city or country. They were in use to some extent among the Greeks and Romans long before the Christian era. Modern bills of exchange are said to have originated at the great public fairs held in Italy during the twelfth and thirteenth centuries, which rose to importance on account of the travel caused by the Crusades. At first bills were drawn only from one fair to another, but as commerce expanded they became common in all international dealings. Sicilian merchants drew on English debtors in 1255. The oldest copy of a bill extant is, we believe, dated Milan, March, 9, 1325, and is substantially in the modern form. In England reference was made to the drawing of foreign bills in a statute of 1381; and in 1394 the magistrates of Barcelona, Spain, enacted that bills should be accepted within twenty-four hours after presentation, which shows that they formed part of the ordinary routine of business. At first they were, no doubt, confined to trade transactions, and were used to avoid the necessity of transmitting cash from place to place.—*Shareholder, Montreal.*

WESTERN FARM MORTGAGES.—In New Hampshire where the people have put their accumulations to a surprising extent into Western farm mortgages, the Bank Commissioners, in their annual report about to be issued, recommend the passage of a law subjecting companies engaged in the placing of these loans to the rigid scrutiny of the bank commission, compelling them to make a yearly exhibit of their assets and liabilities and, in a word, putting them under such close watch that none but responsible agencies will be able to carry on business. In an article in the "Manchester Mirror" on this subject, it is shown that, of the \$58,825,880 which represents the resources of the sixty-nine savings banks of New Hampshire, \$23,600,000, or more than one-third, is invested in Western mortgages, while New Hampshire insurance companies, National banks and private individuals probably hold \$16,000,000 more, making \$39,600,000 of New Hampshire money loaned upon good, bad and indifferent real estate security in the West. The situation of the savings banks in New Hampshire and Massachusetts has this marked difference, that our own savings banks are not permitted to invest in real estate mortgages outside the State. The report of our Savings Bank Commissioners for 1887 shows that at least seven-eighths of the total amount of deposits are doing service within our own borders. Of the remaining one-eighth a considerable portion is in United States bonds and the remainder in public funds, railroad bonds and (a very small amount) the stock of banks outside the State. The savings banks of Massachusetts are justly a subject of great pride to the Commonwealth. Their investments have been a matter of rigid regulation, and not in a sense hostile to the bank corporations themselves, because the managers of those corporations have been among the first to protest against any relaxation of the regulations which tend to keep investments in safe lines.

In Massachusetts we have, however, about \$100,000,000 invested in Western mortgages, which, without being as large, probably, as the proportion of the people's accumulations in New Hampshire, which is understood to be the pioneer State in this class of investments, is quite large enough in amount to warrant a good deal of local interest in the proposed New Hampshire experiment of inquiring into and regulating the companies which deal in Western farm mortgages. With so large a share of their eggs in this basket, it is certainly no wonder that the New Hampshire people propose to keep a little sharper lookout into the way they are carried. Some New Hampshire people have made a good deal of money in these Western mortgages. Still others have been bitten and do not want to be bitten any more. The Manchester

paper from which we have quoted gives both sides of the Western farm mortgage in so picturesque a way as to warrant an extract. Here is, first, the ideal Kansas mortgage:

A farmer in northeastern Kansas has 320 acres of land worth \$20 per acre. It has all been fenced in and ploughed, and yields heavy crops. He has worked off the mortgage which it carried for years and is out of debt. But he wants stock to feed his corn to, perhaps fifty hogs and as many steers, and besides this he needs a barn to winter them in, for very likely heretofore he has sold his corn from the field, and got along with the merest apology for a barn. He cannot borrow money there, for there is none to lend, for a term of years. So he goes to the agent of an investment company, borrows \$2,000 and mortgages his farm to secure the lender. Of course such a loan is as safe as a Government bond.

It takes two cases to tell the other side of the story:

Here is another man who owns 320 acres in the "Sand Hills," or some other waste section of Kansas, which he has obtained in trade. It may have been fenced and partially ploughed, and have what is called a house in that section upon it, but it is not and never will be worth more than \$4 per acre—for any other purpose than to trade and borrow money on it is worthless, but a travelling agent finds him, writes a mortgage on his farm for \$2,000 and sends it East to be sold, and when he gets the money he skips to some other country, leaving the mortgagee to take the property when he discovers that he cannot get anything else. Of course such a mortgage is not worth fifty cents on a dollar.

Down in Southern Kansas or Western Nebraska is a quarter section owned by a shiftless loafer who is there because he happens to be. He is in a country where hot winds or hail, or something else, destroys three crops out of four, and the height of his ambition is to "stay." He does not expect to pay what he owes, and makes no effort to. As long as he can he will pay the interest on his loan, and when it matures and the mortgage is foreclosed, he will move on, as he has done before, unless he finds somebody to make him a new one. Such a loan is poor property at any price.

In general, of course, the New England investor has no direct means of discriminating between these two classes. The representations made to him may be quite similar in both cases; and as the agency is apt to absorb whatever excess of interest the less desirable Western borrower may have to pay by reason of his less favorable situation and doubtful character, the rate of interest offered gives no guide. The investor must depend, in nine cases out of ten, upon the representations of the agency, and too great a degree of confidence is perilous.—*Boston Transcript*.

Failures and Suspensions.

Massachusetts—BOSTON.—John W. Mackintosh & Co. have failed. The firm, composed of J. W. Mackintosh and F. A. Schirmer, has been quite largely interested in Western railroad securities, chiefly those of the Flint and Pere Marquette road. It is said that they dealt more largely in those securities than any other firm or individual broker in Boston. Recently the securities declined in value from 42 to 28, and being unable to respond to calls for margins the firm submitted to the inevitable and caused the announcement of failure to be made. The liabilities and assets cannot be correctly stated at this time.

Iowa—OSCEOLA.—The Osceola Bank has been placed in the hands of a Receiver. The bank was started in 1869 by Geo. H. Cowles, and was incorporated in February, 1866, with a paid-in capital of \$25,000. The average deposits were about \$100,000. It was considered one of the strongest banks in Clarke County, although late reports in our "Confidential Letter" to REFERENCE BOOK subscribers indicated sufficient to put prudent persons on their guard. Too much speculation in wheat is the alleged cause of the failure.

Nebraska—VALPARAISO.—The State Bank has closed its doors and the proprietors have left for parts unknown. The amount of liabilities is placed at \$200,000 with assets not worth computing. It is claimed to be one of the greatest swindles of the kind ever known in this State. It appears to have been a crooked concern since its inception. REFERENCE BOOK patrons will observe that it was one of the few banks from which no reliable or definite report could be obtained, and was rated accordingly.

Virginia—NORFOLK.—The Home Savings Bank has suspended. The bank was chartered in September, 1874, and was founded on the ruins of the old Freedman's Savings Bank. The capital stock was \$50,000. A run on the bank, owing to unfavorable rumors, precipitated the suspension. The last published statement was not altogether satisfactory to depositors. It is claimed by the officials that depositors will lose little, if anything. Injudicious investments is alleged to be the reason for the failure.

NEW BANKS, CHANGES IN OFFICERS, ETC.

NOTE.—We shall esteem it a favor if readers of the *JOURNAL* will notify us of any changes in the banks with which they are connected, as well as of new banks and banking firms organized or recently opened in their place or vicinity, in order that the changes and additions may be made without delay in this department.

New National Banks.—The Comptroller of the Currency furnishes the following statement of National banks organized since our last report. Names of officers and further particulars regarding new National banks will be found under their proper State headings in this list.

3937—Third National Bank, Columbus, Georgia. Capital, \$100,000.
 3938—Wellsborough National Bank, Wellsborough, Pennsylvania. Capital, \$50,000.
 3939—First National Bank, Wood River, Nebraska. Capital, \$50,000.
 3940—American National Bank, Sioux City, Iowa. Capital, \$150,000.
 3941—First National Bank of Bar Harbor, Eden, Maine. Capital, \$50,000.
 3942—Phenix National Bank, Lexington, Kentucky. Capital, \$150,000.
 3943—First National Bank, London, Kentucky. Capital, \$50,000.

ALABAMA.

ALEXANDER CITY.—Herzfeld Bros. have recently started in the banking business.
OXFORD.—The Bank of Oxford is a new institution. Capital, \$50,000. D. C. Cooper, President; Oliver W. Cooper, Cashier.

ARKANSAS.

SPRINGDALE.—The Bank of Springdale is a new organization, Henry A. Wagner, Cashier.

CALIFORNIA.

ALAMEDA.—The First National Bank has gone into voluntary liquidation.
GRASS VALLEY.—The Citizens' Bank is reported, E. M. Preston, President, J. T. Morgan, Cashier, John M. Thomas, Agent.
SAN DIEGO.—The San Diego National Bank reported in voluntary liquidation.

DAKOTA.

ABERDEEN.—Joseph Sears is Vice-President of the North Western National Bank.
CENTREVILLE.—The Citizens' Bank, newly organized, reports A. S. Hanford, President, John H. Coulter, Cashier.

PIERRE.—First National Bank reports W. G. Nixon Vice-President in place of C. W. Richardson, no Cashier in place of W. G. Nixon, E. H. Andrews, Assistant Cashier.
WEBSTER.—Webster City Bank reported, capital \$20,000, Wm. L. Curtis, President, Chalmers Curtis, Cashier.

WILLOW LAKE.—The Farmers' Exchange Bank has been opened, capital, \$10,000, Fred. Bohri, President, C. Bohri, Vice-President, Fred. C. Bohri, Cashier.

GEORGIA.

CARROLLTON.—The Merchants & Planters' Bank is a new organization, E. G. Kramer, President, Henry Lanier, Cashier, capital, \$25,000.
COLUMBUS.—Third National Bank is new institution, G. Gunby Jordan, President, J. W. Murphey, Cashier, capital, \$100,000.

ILLINOIS.

ROCKFORD.—Manufacturers' National Bank has been organized, capital, \$125,000. C. O. Upton, President, Aug. P. Floberg, Cashier, Chas. E. Herrick, Assistant Cashier.

INDIANA.

DANVILLE.—Thomas J. Cofer is President of First National Bank, vice John V. Hadley.

INDIANAPOLIS.—Indianapolis National Bank, Edwin E. Rexford, Cashier in place of Henry Latham and W. F. C. Golt, Assistant Cashier.

WABASH.—The Wabash National Bank reports Geo. N. King, Vice-President.

IOWA.

DANBURY.—Danbury Bank, now Danbury Savings Bank, Union Banking Company, Marion, Kansas, owners.

EAGLE GROVE.—Title of the Bank of Eagle Grove is now the State Bank, \$30,000 capital, Josias J. Andrews, President, Anna Andrews, Cashier, R. W. Smallpage, Vice-President.

IDA GROVE.—Alex. McHugh, Vice-President First National Bank.

WISCONSIN.

LACROSSE.—John Ldenlokken is reported in the banking business, capital, \$10,000.

RHODES' JOURNAL OF BANKING.

~~~~~  
Prospectus for 1889.—Sixteenth Annual Volume.  
~~~~~

For the year 1889 the JOURNAL will not only maintain its established reputation as the best banking and financial periodical, but it will more than ever before keep abreast of the times in monetary affairs. Never before in its history has the JOURNAL had such a large list of regular subscribers, while its value as an advertising medium is seen in the fact that it has to-day over *four times* the number of bank advertisements to be found in any other bankers' publication. Its circulation can be figured on just about the same basis.

CONTENTS.

The JOURNAL is a *practical* every-day aid to bankers and others who wish to keep posted in banking and monetary affairs. It covers the entire range of such information—and it is always reliable.

Following is the schedule of contents—arranged under four Departments—proposed for the New Year:

I.

Editorial Comment.—Short and well-considered Editorial articles on subjects of *present interest* to bankers. No long essays. Editorial comments are always timely and to the point.

The JOURNAL is a purely financial publication—Editorial comments will freely criticize current events and point out what may aid the banks and bankers of the country. The Editorial efforts of the JOURNAL have but one end in view, a correct appreciation of financial events as they occur.

Contributed Articles will represent all shades of financial opinions. The JOURNAL will have in this department the aid of writers skilled in every phase of finance, both theoretical and practical, and will give as far as possible all sides of every important financial question. Readers may be sure that they will not be confined to one view of any of the subjects treated of. The contributors to this department are experts upon the questions they deal with.

Bank Book-Keeping.—The series of articles on Bank Book-keeping is creating much interest in banking circles. Prepared by a Bank Accountant of many years experience and illustrated by forms and plain explanations. The Series will probably run through the entire year 1889.

Notes and Comments on Banking Practice is another feature which is highly commended by bank clerks—as well as officers—who are looking for better and safer methods of conducting the business.

II.

BANKING LAW.—The Law Department for the year 1889 will be conducted under three heads, *viz* :

1. **Legal Decisions affecting Bankers.** It is our purpose to give *all* the current decisions in Banking Law of the Federal Courts and the Courts of Last Resort of the various States. To do this, in some instances, the cases will necessarily be more or less condensed, according to their relative importance. Such a complete report of *all banking cases* will be of great value to subscribers, and is given in no other financial publication.

2. **Replies to Law and Banking Questions.** Under this head will be published the replies to questions of subscribers which are of sufficient interest to warrant publication. Questions will be given full consideration and, usually, the reply will appear

in the next number. Many, however, require considerable labor and research, which necessarily postpones the reply for a month. Much satisfaction has been given in the past by the promptness and thoroughness of replies.

3. *Law Editor's Notes and Comments.* Frequently in reporting a decision or in replying to a question, it is desirable to make a note or suggestion with reference thereto. It very often happens that a case decided conflicts with a decision or line of decisions previously rendered. The Law Editor's notes are especially useful in calling attention to such cases. The Law Editor of the JOURNAL spares no pains to give the results of the decisions in the courts covering, as has been said, the whole country. The remarks made, while called forth by some particular decision, put the whole subject in a practical and plain way before the banker in search of information.

[Many subscribers write that the Law Department alone is worth the subscription price many times over in the course of a year. It is conducted by an Attorney of wide experience in Banking Law.]

III.

BANKING AND FINANCIAL NEWS.—Under this head the JOURNAL's readers will find, in concise form, all the news of interest to bankers from every part of the country. All the items relating to banking matters are collected and digested. No banker can be well informed as to what is going on in his line without consulting this department.

New Banks, Changes in Officers, Failures, Dissolutions, etc.—A complete list of all the new banks, changes in officers, dissolutions, failures, etc., arranged under State headings for easy reference. This is the only complete current list published. The information is derived from early reports received from the Comptroller of the Currency at Washington, from officials supervising banking under State laws, from the banks themselves, as well as from other sources under our own control. The high character and aims of the JOURNAL have inspired a confidence in official and banking circles, which enables all legitimate banking information to be obtained at the earliest moment.

"Open Letters from Bankers."—Under this head the JOURNAL readers exchange opinions on a variety of subjects connected with banking and finance. A number of interesting discussions appear under this head every year.

"The World of Finance" gives the cream of current monetary opinion and criticism culled from leading newspapers all over the country.

IV.

REVIEW OF THE FINANCIAL SITUATION, MONETARY TABLES, AND PRICES.—Under this head will be found a carefully-prepared review of the Money Market and Financial Situation.

Comparative tables of prices of active stocks and bonds.

Official Quotations of all the stocks and bonds listed at the New York Stock Exchange, including Bank Stocks, etc.

~~~~~  
Annual Subscription, \$5.

The numbers of a calendar year constitute a complete Volume, which is fully indexed for easy reference.

☞ In accordance with the usual custom, subscriptions expiring with this (December) issue will be continued on our books for the year 1889, unless a discontinuance request is received before January 1st.

## THE BANKERS' GAZETTE.

The Money Market and Financial Situation.

NEW YORK, December 4, 1888.

The general inactivity during the month may, to some extent, be ascribed to the influence of the change in governmental control that the election has brought about. While this has had some effect, there are other important causes at work both abroad and in this country, to render the future of the money market somewhat uncertain, and therefore to render loaners and loanees cautious and far from anxious to enter into long engagements. Money has been very cheap during the month, but there has been a very close discrimination exercised as to collaterals. Call loans have been preferred by the leading financial institutions. The high discount rate maintained by the Bank of England has been justified by the course of events. The open market rate in London was much less than the bank rate, but it seems to have risen, and is now more in coincidence with the limit fixed by the bank. Gold exports have prevailed to some extent, showing the degree to which gold drafts have been made on England by other parts of the world. In the fall in the United States, drafts from the money centres to the interior are expected. As to England, her colonies and dependencies all over the world, exercise the same influence as the interior does as to the banks at the money centres here. All these various colonies and dependencies when they need gold draw on England; England when her stock seems in danger of depletion draws on the United States. There is now in this country a vast stock of gold, and some of it can well be spared, but a too long continued drain might affect the financial situation here. The speculation in wheat in the West has forced up prices somewhat beyond what is warranted by the short crop, and all dealers for consumption, both here and abroad, are at a standstill. The stock market is feeling the effect of the unwise methods which for a number of years have prevailed in the stock exchanges, and little has been done in that part of the financial world. The railroads of the country are all strong, and they are watching each other with little desire to change the *statu quo*. The demand on the New York banks from the interior has not fallen off. Bond purchases have amounted to \$7,489,350, of which \$3,438,050 were purchased election week. There seems to be plenty of money but very little confidence in the future, still all this may change within a week or two. The condition of the market is very neutral in every respect, and any change in the situation is hardly to be expected for some months. It is probable that the action of Congress between now and the fourth of March may put the Treasury in a situation to disburse large sums. It is highly probable that the bill refunding the direct tax to the States will become a law. It does not seem that the currency is in any way responsible for whatever dullness is complained of. Affairs all over the world are settled, and it is hardly to be expected that we shall have startling changes in the money market. Safe business and small profits seem to be the order of the day. The complaints come from those who are looking for chances to do great things in a short time. The present condition of the money market is not one to be deplored. It shows a quiet prosperity and great strength in all our financial institutions.

FOREIGN EXCHANGE.—During the first week in November there was no increase in the demand for sterling exchange and the market remained dull and without striking features. Rates were firm, however, owing to the scarcity of commercial and other bills, and long-time sterling advanced a little. For the week ending November 10th the market for sterling exchange

continued dull. There was no demand and, while there was no change in rates, they were a trifle heavy. For the week ending November 17th there was at the beginning of the week some activity in the market for sterling exchange; the demand was on account of foreign sale of American securities. The demand, however, fell off and the market continued dull but firm. Rates were strong and higher. For the week ending November 24th while there was no activity the market was very firm, in consequence of demand for short bills and cables, from the higher open market discount rate in London. Commercial bills were also scarce. There was a shipment of \$4,000,000 in gold, although the rates hardly warranted it. For the week ending November 31st the market for sterling exchange was dull. There was little demand. Most of the business done was in short bills and cables. Commercial bills were scarce, but rates were lower. There were gold shipments to the extent of \$1,817,000. These shipments during this and the previous week indicate that gold is plenty here; in fact easier to get, notwithstanding quoted rates, than suitable exchange. The rate of discount of the Bank of England has continued at 5 per cent. during the month. The open market rate in London during the early part of the month was over two per cent. below this, but about the third week it came up to the normal difference of one per cent. During the month the Bank of England lost £2,060,257 in specie, and the Bank of France lost 1,975,000 francs in gold, and gained 5,280,000 francs in silver. The following are the latest posted and actual rates of the principal dealers: Bankers' sterling, 60 days, nominal, \$4.85½; sight, nominal, \$4.89; 60 days, actual, \$4.84¼@ \$4.85; sight, actual, \$4.88@ \$4.88½; Cable transfers, \$4.88¼@ \$4.89¼; Prime commercial sterling, long, \$4.83¾@ \$4.84; Documentary sterling, 60 days, \$4.83¼@ \$4.83½; Paris bankers', 60 days, 5.21¼@ 5.20½; sight, 5.18¼@ 5.17½; Paris, commercial, 60 days, 5.23¾@ 5.23¼; sight, 5.20@ 5.19¾; Antwerp commercial, 60 days, 5.25@ 5.24¾; Swiss bankers', 60 days, 5.21¼@ 5.21¼; sight, 5.18¾@ 5.18¼; Reichsmarks (4), bankers', 60 days, 95¼@ 95¾; sight, 95¼@ 95¾; Reichsmarks (4), commercial, 60 days, 94¾@ 95; sight, 95¾@ 95½; Guilders, bankers', 60 days, 40 8-16@ 40¼; sight, 40¾@ 40 7-16; Guilders, commercial, 60 days, 40 1-16@ 40 ¼; sight, 40¼@ 40 5-16; Copenhagen, Stockholm and Christiana, krona, 60 days, 26¾@ 26¾; sight, 27@ 27¼. Paris dispatches quote exchange on London 25f. 30½c.

The following table shows the posted rates for sterling and exchange on Paris at various dates in November:

| 1888.          | BANKERS  |        | Cable      |             | PARIS    |        |
|----------------|----------|--------|------------|-------------|----------|--------|
|                | 60 days. | Sight. | Transfers. | Commercial. | 60 days. | Sight. |
| November 1.... | 4.85     | 4.88½  | 4.89¼      | 4.88¾       | 5.22¼    | 5.18¼  |
| " 19....       | 4.85     | 4.88½  | 4.89       | 4.88¾       | 5.22¼    | 5.19¾  |
| " 21....       | 4.85¼    | 4.89   | 4.89¼      | 4.88¾       | 5.22¼    | 5.19¾  |
| " 23....       | 4.85¼    | 4.89   | 4.89¼      | 4.84¼       | 5.20¾    | 5.19¾  |

COINS AND BULLION.—Bar silver is quoted in London at 43d. per ounce. The following are New York quotations in gold for other coins and bullion:

|                                        |                                         |
|----------------------------------------|-----------------------------------------|
| New (41¾ grains) dollars... .. @ ..... | Twenty marks..... 4 74 @ 4 80           |
| American silver ½ & ¼e... .. @ .....   | Spanish doubloons.....15 55 @ 15 70     |
| American dimes..... .. @ .....         | Spanish 25 pesetas..... 4 80 @ 4 85     |
| Mexican dollars..... .. 78¾ @ 75¼      | Mexican doubloons.....15 55 @ 15 70     |
| Peru soles & Chilian pesos.. 73¾ @ 75  | Mexican 20 pesos.....19 50 @ 19 65      |
| English silver..... .. 4 80 @ 4 85     | Ten guilders..... 3 96 @ 4 00           |
| Five francs..... .. 93 @ 95            | Com'l silver bars, per oz... 84 @ 95    |
| Victoria sovereigns..... 4 85 @ 4 88   | U. S. Assay silver bars ... 94½ @ 95    |
| Twenty francs..... .. 3 86 @ 3 90      | Finegold bars par@¼¢ prem.on Mintvalue. |

HOME MONEY MARKET.—The open market rates for call loans on stock and bond collaterals for the week ending November 3d, ranged from 1½ to 4 per cent., and prime commercial paper was quoted at 4½ to 5¼ per cent. For the week ending November 10th the open market rate on call loans on stock and bond collateral ranged from 1½ to 2½ per cent., and prime commercial paper was quoted at 4½ to 5 per cent. For the week ending

November 17th, the open market rates on call loans on stock and bond collaterals ranged from  $1\frac{1}{2}$  to 3 per cent., and prime commercial paper was quoted at  $4\frac{1}{2}$  to 5 per cent. For the week ending November 24th, the open market rates on call loans on stock and bond collaterals ranged from 2 to 4 per cent., while prime commercial paper was quoted at from  $4\frac{1}{2}$  to 5 per cent. During the last week in November the open market rates on call loans on stock and bond collaterals ranged from 2 to 4 per cent., and prime commercial paper from  $4\frac{1}{2}$  to 5 per cent. The foregoing figures indicate but little life in the money market, although the rather higher rates on call loans towards the end of the month give an impression of more business done in that line. There was a tendency to loan foreign capital on good security and some tendency to American investments. The following are the latest rates of exchange on New York, Savannah buying  $\frac{1}{4}$  discount; selling,  $\frac{1}{4}$  discount to par. Charleston buying,  $\frac{1}{2}$  discount; selling, par. New Orleans, commercial, \$1.25 discount; bank, par. Chicago, par.

**NEW YORK BANKS.**—During the week ending November 8d the combined gold and currency received from the interior by the New York banks was \$1,979,000, while in the same time they shipped \$2,080,000, losing \$101,000. By Sub-Treasury exchanges they gained \$150,000 making a net gain for the week of \$49,000. During the week ending November 10, the banks received from the interior gold and currency amounting to \$981,000, and shipped in the same period \$2,515,000, making a net loss of \$1,534,000. By Sub-Treasury operations they gained \$900,000, and taking this in connection with the dealings with the interior the net loss was \$634,000. During the week ending November 17th, the banks received from the interior \$995,000 and shipped \$2,555,000, to their correspondents; the loss of cash was \$1,560,000. By Sub-Treasury exchanges they added \$600,000 to this loss, making a total loss for the week of \$2,160,000. During the week ending November 23d, the currency and gold shipped to the interior aggregated \$2,200,000, and the banks received from the same source \$2,785,000, making a net gain of \$585,000, but to offset this they lost \$1,500,000 by Sub-Treasury changes, making a net loss again for the week of \$915,000. They lost also the amount of the gold shipments, aggregating \$3,666,000. During the last week in November the shipments to the interior were \$2,065,000, and the receipts \$1,870,000, showing a loss of \$195,000. At the same time the loss from Sub-Treasury exchanges was \$5,500,000, making a net loss for the week of \$5,695,000. So the net loss in cash of the banks in New York city for the period from October 27th to November 30th was \$13,070,000, including loss by gold shipments, as against a loss of \$1,976,000 in October. The following table show the condition of the New York Clearing-House banks for a number of weeks past:

| 1888.        | Loans.        | Specie.      | Legal-lenders. | Deposits.     | Circulation. | Surp. Res.   |
|--------------|---------------|--------------|----------------|---------------|--------------|--------------|
| Dec. 1.....  | \$391,404,300 | \$82,598,300 | \$29,518,700   | \$408,161,800 | \$5,337,300  | \$10,078,550 |
| Nov. 24..... | 390,814,000   | 87,471,300   | 27,875,500     | 412,139,300   | 5,343,000    | 12,311,975   |
| Nov. 17..... | 392,990,800   | 87,263,500   | 27,935,800     | 414,550,000   | 5,317,900    | 11,591,800   |
| Nov. 10..... | 393,974,100   | 88,582,400   | 27,700,900     | 414,902,800   | 5,322,300    | 11,557,800   |

The statement of the Comptroller of the Currency shows the total amount of National bank notes outstanding, not including \$185,767 of retired circulation of National gold banks, was, on November 30th, \$236,257,400, a decrease during the month of \$2,938,850, and for the year of \$33,391,741. During November there has been issued to new banks circulation amounting to \$112,560 and to banks increasing circulation \$132,205. There has been surrendered and destroyed during the interval \$3,183,615. The amount outstanding protected by a deposit of United States bonds was \$149,487,373, a decrease of \$2,878,955 since October 31st, and of \$18,876,446 for the year. The amount of circulation secured by lawful money was \$86,770,027, showing a decrease in this class of circulation of \$15,015,295 during the past year. It is evident from an examination of the tables furnished from month to month by the Comptroller's office, that the National bank circulation though still forming an important part of the currency of the country is rapidly being superseded by other forms of paper money. The use of gold and silver

certificates has already assumed proportions greater than the use of National bank notes even when the system was at the zenith of its success. The provision in the original banking law that National banks should not after the resumption of specie payments issue notes in denominations of less than five dollars has had much to do with the successful substitution of coin certificates.

The following shows the amount of each description of bonds held by the Treasurer to secure National bank circulation on the dates indicated :

|                        | Dec. 1, 1888.        | Nov. 1, 1888.        | Oct. 1, 1888.        | Jan. 1, 1888.        | Jan. 1, 1887.        |

\* Stands for ex-Dividend.

The total number of shares sold during the month of November was 4,864,202, representing dealings in 124 stocks. Of this number of shares 4,226,991 or nearly three-eighths represent the dealings in the following sixteen stocks:

| Shares.               | Shares.              | Shares.              | Shares.                |
|-----------------------|----------------------|----------------------|------------------------|
| Phil. & Read. 915,056 | Union Pac. 339,917   | Mo. Pacific. 184,877 | Ore. & Trans'l 132,960 |
| St. Paul. 433,909     | R. & W. Pt. 232,560  | W. U. Tel. 181,387   | L. & Nash. 62,366      |
| Lake Shore. 414,411   | Del. L. & W. 284,130 | N. Pac. Pfd. 161,434 | Texas Pac. 45,250      |
| N. Y. & N. E. 386,880 | C. & N. W. 243,520   | Erie. 140,125        | Can. South. 28,000     |

leaving 637,211 shares to represent the dealings in the remaining 108 stocks. In addition, railroad bonds amounting to \$22,969,500 were sold, \$1,032,590 State bonds and \$320,100 Government bonds. Of unlisted securities were sold: Bonds, \$192,000; stocks, 137,217 shares; mining stocks, 43,463 shares; American cotton oil certificates, 290,076; Pipe Line certificates, 12,364,000 barrels. The listed stocks show a decrease of 1,322,108 shares as compared with the amount sold in October. Transactions in railroad bonds show a decrease of \$10,241,200 during the same period, an increase of \$697,000 in State bonds and a decrease of \$600,300 on Government bonds. In unlisted bonds a decrease of \$1,433,000; an increase of 57,044 shares in stocks, a decrease of 51,402 in mining shares; a decrease of 25,326 in cotton oil certificates and a decrease of 6,321,000 barrels in Pipe Line certificates.

The stock market has continued dull during the month. This is hardly surprising. The Presidential election occupied the first half, and absorbed the minds of most people, including stock brokers. The fact is the individual enterprise of the country is in a transition state. Activity in stock speculation is not the measure of the energy of the nation. It is only when there is capital for which there is no better outlet that people generally speculate in stocks. There has been an impression abroad, that to make money on the stock exchanges required a special experience only to be acquired by having a seat in some one of the stock boards. Too many brokers like too many lawyers, or doctors, is a source of detriment to some. If brokers would confine themselves to their commissions there would be enough business for all, for those who rely on scalping would soon have to undertake some other occupation. The tacit consent to speculation among brokers now given on all our boards should be somewhat curtailed. The public would then feel that their interests in stocks were intrusted to men less liable to temptation. It is said even a worm will turn. Why not a lamb?

STOCK EXCHANGE QUOTATIONS.

Revised by the official lists up to the first day of this month. The following tables include all securities listed at the New York Stock Exchange. The Quotations indicate the last bid or asked price. Where there was no quotation during the past month the last previous quotation is designated by a \*. The highest and lowest prices for the year 1887—actual sales—are given for comparison.

SPECIAL LIST.

This "Special List" is made up of securities—both stocks and bonds—which are not regularly "called" at the Exchange. Members are at liberty to deal in them daily, on the Bond Call, but the transactions are infrequent.

### BANKERS' OBITUARY RECORD.

**Blackstone.**—Lorenzo Blackstone, the millionaire cotton manufacturer, died in Norwich, Conn., November 14th, at the age of 69 years. In 1845 he secured the exclusive right of the rubber market of Great Britain, which he controlled until 1859, when he returned to this country to engage in the manufacture of cotton and woollen goods. At the time of his demise he owned the Attawangan Mills, three in all, the Ballou Mills, the Totoket Mills and the Pequot Mills. He was a Director and one of the executive committee of the Ponemah Manufacturing Company, one of the largest cotton manufacturing companies in the world; the President of the Chelsea Savings Bank, a Director of the Thames National Bank, and of the Chicago and Alton Railroad Company.

**Branch.**—Thomas Branch, senior member of the firm of Thomas Branch & Co., and a well-known banker, died at his home in Richmond, Va., November 15th. He was a Union man before the war, a member of the Secession Convention and spoke and voted against the Ordinance, but afterwards signed it.

**Breese.**—William L. Breese, of the firm of Breese & Smith, stock brokers, 96 Broadway, New York city, died at his country home, Islip, N. Y., December 7th.

**Brown.**—John H. Brown died in Philadelphia November 15th, in the eightieth year of his age. He was engaged in mercantile pursuits and was also a Director of the Bank of North America.

**Comly.**—Seth I. Comly, a prominent business man of Philadelphia, Pa., died in that city November 12th, aged 73 years. He was at one time Collector of the Port, appointed by President Grant to fill a vacancy, the duties of which office he performed with ability. He was Vice-President of the Girard Life Insurance and Trust Co.

**Elliott.**—John Elliott, one of the founders of the famous banking house of Riggs & Co., Washington, D. C., died at his home in New York city December 5th, aged 72 years. He was in the dry goods business in Philadelphia at one time, was a Director of the Illinois Central Railroad Company, a Trustee of the Atlantic Trust Company and the Manhattan Company, New York city, and several other corporations at the time of his death.

**Foster.**—William H. Foster died suddenly at Salem, Mass., November 30th, at the age of 90 years. He was for over fifty years Cashier of the Asiatic National Bank, which position he resigned a few years ago, being the oldest bank Cashier in the country. He entered the bank as a book-keeper in 1824, and his connection with the institution covers the remarkable period of sixty-four years, during fifty-six of which he was Cashier. In the meantime he was Trustee, Vice-President and a member of the Investigating Committee of the Salem Savings Bank, was the prime mover in getting an Act of incorporation for the Eastern Railroad, was President of the Old Ladies' Home Association, President of the Hamilton Hall Corporation, Trustee of the Bertram Home for Aged Men, Director in the Salem Laboratory Company, in the Oriental Power, of Gorham, Maine, and in the Franconia Iron Company. His connection with the Savings Bank dates back to 1837.

**Haslehurst.**—Theodore E. Haslehurst, of the firm of Cipperly, Cole & Haslehurst, bankers and brokers, and a prominent resident of Troy, N. Y., died suddenly, December 4th. He was Past Grand Commander Knights Templar of the State of New York.

**Heath.**—Stafford R. W. Heath, one of the most prominent business men of Newark, N. J., died at his residence in that city, December 2d. He had for thirty-four years been a Director of the Newark City National Bank; was a Trustee of Rutgers College, President of the Firemen's Insurance Company, and connected with many other financial corporations.

**Hostetter.**—Dr. David Hostetter, known throughout the world as the millionaire bitters manufacturer, of Pittsburgh, Pa., died in New York city November 5th, at the age of 58. He was President of the Fort Pitt National Bank, of Pittsburgh, and also President of the Consolidated Gas Company, which was formed of half a dozen natural gas companies of Western Pennsylvania. Mr. Hostetter's wealth at the time of his death was estimated to be about \$20,000,000.

**Hoyt.**—Frederic A. Hoyt, for twenty-two years a Director of the National Bank of the Republic, Philadelphia, Pa., died in that city recently.

**Marvin.**—Tasker H. Marvin, a well-known member of the New York Stock Exchange, died at his home in Brooklyn November 14th, at the age of 48. Mr. Marvin had been a member of the Stock Exchange since August 11, 1862. The son of a stock broker, he spent his life in Wall street and he won there an enviable reputation, although he met with the usual changes of fortune which a Wall street career involves. Until the panic of 1873, he was associated with his father and afterward the firm of Marvin Brothers was a prominent and successful one. A dozen years ago he retired from business and made a leisurely tour of the world. But the old love for Wall street was consuming, and when he got back to New York he drifted quickly into his old stock market field. He met with financial reverses, however, and this, added to the death of his wife, son and daughter, no doubt hastened his own death. He was for several years a member of the Brooklyn Board of Education, and for a long period President of the Young Men's Christian Association of Brooklyn, and died Treasurer and Director of the Collegiate and Polytechnic Institute, of Brooklyn, and a Director of the Packard Collegiate Institute.

**Merriam.**—Adolphus Merriam died at Framingham, Mass., November 27th, aged 68 years. He was President of the Framingham Savings Bank and was formerly

President of the Acton & American powder companies and largely connected with Cordavalle and Southbridge woollen mills and other enterprises.

**Moss.**—Augustus H. Moss, President of the Moss National Bank, of Sandusky, Ohio, died December 8th. He was a member of the Executive Council of the American Bankers' Association, and had been long prominently identified with financial affairs in his State. A more extended notice will appear in next month's JOURNAL.

**Phillips.**—Gilbert W. Phillips, President of the First National Bank of Putnam, Conn., died recently, aged 60 years. He was prominent in business and political circles, and at one time was attorney for the New York & New England Railroad Company.

**Potts.**—Frederick A. Potts, head of the well-known mercantile firm of F. A. Potts & Co., died in New York city November 9th, aged 52 years. He was the son of George H. Potts, late President of the National Park Bank. Mr. Potts was well known in the coal trade and in railroad circles. He was President of the Coal Exchange, Vice-President of the National Park Bank, President of the New York and Susquehanna Railroad, a Director in the Mutual Benefit Life Insurance Company, of Newark, N. J., and also held other offices of importance. He was once the Republican candidate for Governor of New Jersey, and was widely known in that State. He came of Revolutionary stock, his grandfather having been a member of the Continental Congress.

**Schwarzwaelder.**—Christian Schwarzwaelder died in New York city November 25th. For twenty years he had been President of the Germania Bank and was widely known as an honest, upright man who won the respect of all who had business relations with him.

**Scranton.**—Gerald B. Scranton died in Lakewood, N. J., December 5th, at the comparatively young age of 49. In early life he was a clerk in the office of E. T. H. Gibson, a prominent stock-broker of that time. Afterwards he formed a partnership with C. H. Kimball, now head of the firm of Kimball, Howell & Co., but subsequently united with E. K. Willard, thus forming the firm of Scranton & Willard, which achieved a high reputation. He went abroad after a few years, but on his return entered again into active business, and again retired on account of his health, keeping up a connection with E. K. Willard & Co.

**Smith.**—Joel Smith, a prominent manufacturer, and for many years a Director of the Leominster National Bank, Leominster, Mass., died recently. He was a staunch temperance man, and of the old anti-slavery pioneers.

**Spaulding.**—Mahlon D. Spaulding died at his residence in Boston, Mass., November 4th, at the age of 61. He was in 1858 President of the Bank of Genesee, Ill. In 1859 he came to Boston, and in 1872 was elected President of the Atlas National Bank, holding the position for five years. At the time of his death he was a Director in that bank, also a State Director of the Boston and Albany Railroad, a Director of the Union Pacific Railroad and a Commissioner of the Boston Sinking Fund.

**Stark.**—Lucius J. N. Stark died in New York city November 6th, at the age of 72. He was President of the Department of Docks, ex-President of the New York Produce Exchange and a Director of the Produce Exchange Bank. Until within a few months Mr. Stark was also President of the Merchants' National Bank of Whitehall, N. Y. He was a man of great executive ability, and was long and favorably known among the business men of New York city.

**Thompson.**—David Thompson, a prominent citizen and counsellor-at-law, and for many years President of the Sussex National Bank, died at his home in Newton, N. J., recently. He was 80 years of age.

**Wright.**—Dr. Thomas B. Wright died at Bowling Green, Ky., October 29th. He was one of the founders and was also President of the Warren Deposit Bank for eighteen years. Appropriate resolutions were passed by the Board of Directors which stated, among other things, that "Dr. Wright was a strong man mentally and morally—a pure man, a true man, a Christian gentleman—and his broad place in the ranks of men will be difficult to fill."

#### WANTED—OFFICERS AND CLERKS, POSITIONS, BANKS FOR SALE, ETC.
